Chicago: 333 North Michigan Ave., Suite 728, Chicago, IL, 60601; telephone: (312) 781-1831; fax: (312) 781-1839; email: parepchicago@ yahoo. com.

Houston: 11850 Jones Road, Houston, TX, 77070; telephone: (281) 890-2223; fax: (281) 890-1433; email: parep houston@sbcglobal.net.

Los Angeles: 10850 Wilshire Blvd., Suite 1100, Los Angeles, CA 90024; telephone: (310) 441-5114; fax: (310) 441-9256; email: info@pak consulatela.org.

New York: 12 East 65th St., New York, NY 10021; telephone: (212) 879-5800; fax: (212) 517-6987; website: www.pakistanconsulateny.org.

If a traveler plans to stay longer than the time listed on the visa, he or she must extend the stay with the local passport office of the Ministry of Interior. Visit the Embassy of Pakistan web site at http://www.pakistan-embassy.org for the most current visa information.

Safety and Security: A number of extremist groups within Pakistan continue to target American and other Western interests and high-level Pakistani government officials. Terrorists and their sympathizers have demonstrated willingness and capability to attack targets where Americans are known to congregate or visit. Terrorist actions may include, but are not limited to, suicide operations, bombing—including vehicle-borne explosives and improvised explosive devices—assassinations, carjacking, assault or kidnapping. U.S. Government personnel are not permitted to stay at or frequent major hotels in Islamabad, Karachi, Lahore and Peshawar. Government personnel have also been advised to restrict the number and frequency of trips to public markets, and to avoid public restaurants in Islamabad, Karachi, and Peshawar.

On November 12, 2008, an American government contractor and his driver in Peshawar were shot and killed in their car. In September 2008, over fifty people, including three Americans, were killed and hundreds were injured when a suicide bomber set off a truck filled with explosives outside a major international hotel in Islamabad. In August 2008 gunmen stopped and shot at the vehicle of an Ameri-

can diplomat in Peshawar. In March 2008, a restaurant frequented by westerners in Islamabad was bombed, killing one patron and seriously injuring several others, including four American diplomats. On March 2, 2006, an American diplomat, his locally employed driver, and three others were killed when a suicide bomber detonated a car packed with explosives in front of the U.S. Consulate General in Karachi. Fifty-two others were wounded in the attack.

Sectarian and extremist violence has resulted in fatal bomb attacks in Islamabad, Rawalpindi, Karachi, Peshawar, Quetta, Lahore, and other Pakistani cities since 2006. Since 2007, over 1,000 bombings have killed more than 1,000 people throughout Pakistan and injured many more. Rallies, demonstrations, and processions occur from time to time throughout Pakistan on very short notice and have often taken on an anti-American or anti-Western character. Because of the possibility of violence, Americans are urged to avoid all public places of worship and areas where Westerners are known to congregate.

During the Islamic (Shi'a) religious observance of Moharram, rivalries and hostilities often increase.

In 2007 and 2008, several American citizens throughout Pakistan were kidnapped for ransom or for personal reasons. Kidnappings for ransom are particularly common in some parts of Pakistan, such as the Northwest Frontier Province and Sindh Province.

It is best to avoid public transportation. For security reasons, U.S. Mission personnel are prohibited from using taxis or buses. (See the Traffic Safety and Road Conditions section below).

Women are advised to dress conservatively, with arms and legs covered, and avoid walking around alone. It is unwise for anyone to travel on the streets late at night. Visitors to Pakistan should attempt to maintain a low profile, blend in, be aware of their surroundings, and seek security with their family or sponsoring organization.

Northern Areas—While we continue to discourage non-essential travel to Pakistan, we advise Americans wishing to trek in Gilgit, Hunza or Chitral to use only licensed guides and tourist agencies. While overall crime is low, there have been occasional assaults on foreign visitors.

Northwest Frontier Province—The U.S. Consulate in Peshawar has temporarily relocated some personnel to Islamabad while the Consulate reevaluates necessary security measures to operate under the heightened threat conditions. The Federally Administered Tribal Areas (FATA) along the Afghan border, and certain areas within the Northwest Frontier Province (NWFP), are designated as tribal areas and are not subject to normal government jurisdiction.

The Government of Pakistan requires all citizens of countries other than Pakistan and Afghanistan to obtain permission from the Home and Tribal Affairs Department prior to visiting these locations. The permit may stipulate that an armed escort must accompany the visitor. Even in the settled areas of the NWFP there is occasional ethnic, sectarian, and political violence. There have been dozens of bombings in Peshawar of varying sophistication since September 2006. Members of the Taliban and Al-Qaida are known to be in the FATA, and may also be in the settled areas. Due to security concerns the U.S. Government currently allows only essential travel within the FATA by American officials.

Kashmir—While direct military hostilities between India and Pakistan across the Line of Control (LOC) are infrequent, militant groups engaged in a long-running insurgency on the Indian side of the LOC are reported to have bases and supporters operating from the Pakistani side.

Most of these groups are anti-American, and some have attacked Americans and other Westerners. The Government of Pakistan restricts access to many parts of this region and requires that visitors obtain a permit from the Ministry of Interior before traveling.

Punjab Province—Violence has increased in Punjab Province. Since September 2007, several suicide operations have taken place, including attacks in Rawalpindi and Lahore. As a precaution against these possible dangers, U.S. citizens are cautioned to avoid public transportation and crowded areas. The Wagah border crossing into India near Lahore remains open daily (from 9:30 a.m. to 3:30 p.m.) for travel to and from India if the passport holder has a valid visa for both countries. Visitors are advised to confirm the current status of the border crossing prior to commencing travel.

Sindh Province—In Karachi and Hyderabad, there has been recurring violence characterized by bombings, violent demonstrations and shootings. An October 2007 suicide attack on former Prime Minister Benazir Bhutto killed more than 130 and injured approximately 375 people in Karachi. In the aftermath of her December 2007 death, rioting in Karachi led to multiple deaths and injuries, as well as widespread property damage. In May 2008, clashing groups of lawyers burned buildings and vehicles in several areas of the city, resulting in at least 11 fatalities. Americans and other westerners continue to be a particular target of hostility and occasional anti-Western mob violence. The Consulate General in particular has been the target of several major terrorist attacks or plots in recent years, including the deadly March 2006 suicide attack described above. Non-essential travel to these cities is strongly discouraged. In rural Sindh Province, the security situation is hazardous, especially for those engaged in overland travel. The Government of Pakistan recommends that travelers limit their movements in Sindh Province.

Balochistan Province—The Province of Balochistan, which borders both Iran and Afghanistan, is notorious for narcotics and other forms of cross-border smuggling. Members of the

Taliban and Al-Qaida are also believed to be present there. Tribal unrest sometimes turns violent. Because provincial police presence is limited, travelers wishing to visit the interior of Balochistan should consult with the province's Home Secretary. Advance permission from provincial authorities is required for travel into many areas. Local authorities have detained travelers who lacked proper permission. Quetta, the provincial capital, has experienced an increase in bombings, occasional gun battles in the streets, and the imposition of curfews. Terrorist attacks against Pakistani government installations and infrastructure have been reported throughout 2005 and 2006.

For the latest security information, Americans traveling abroad should regularly monitor the Department's Internet website where the current Travel Warnings and Travel Alerts, including the Worldwide Caution Travel Alert, can be found. Up-to-date information on security can also be obtained by calling 1-888-407-4747 toll free in the U.S. and Canada, or, for callers outside the United States and Canada, a regular toll line at 1-202-501-4444.

Crime: Crime is a serious concern for foreigners throughout Pakistan. Carjacking, armed robberies, house invasions, and other violent crimes occur in many major urban areas. Petty crime, especially theft of personal property, is common. American travelers to Pakistan are strongly advised to avoid traveling by taxi and other forms of public transportation, and have members of their host organizations or families meet them at the airport.

In many countries around the world, counterfeit and pirated goods are widely available. Transactions involving such products may be illegal under local law. In addition, bringing them back to the United States may result in forfeitures and/or fines. More information on this serious problem is available at http://www.cybercrime.gov/18usc2320.htm.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

The local equivalent to the "911" emergency line in Pakistan is: 15.

Medical Facilities and Health Information: Adequate basic non-emergency medical care is available in major Pakistani cities, but is limited in rural areas. Facilities in the cities vary in level and range of services, resources, and cleanliness, and Americans may find them below U.S. standards; facilities in rural areas are consistently below U.S. standards. Medical facilities require prepayment and do not accept credit cards.

Water is not potable anywhere in Pakistan and sanitation in many restaurants is inadequate. Stomach illnesses are common.

Effective emergency response to personal injury and illness is virtually non-existent in Pakistan. Ambulances are few and are not necessarily staffed by medical personnel. Any emergency case should be transported immediately to a recommended emergency receiving room. Many American-brand medications are not widely available, but generic brands from well-known pharmaceuticals usually are. The quality of the locally-produced medications is uneven.

The U.S. Department of State is unaware of any HIV/AIDS entry restrictions for visitors to or foreign residents of Pakistan.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's internet site at http://www.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) website at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith/en.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation. As noted above, emergency medical care in Pakistan is very limited. Medical evacuations from Pakistan may cost in excess of $45,000 for uninsured travelers requiring emergency assistance.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Pakistan is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

Traffic in Pakistan moves on the left, opposite of U.S. traffic. In addition to this source of potential confusion, travel by road in Pakistan has a variety of other risks. Roads are crowded, drivers are often aggressive and poorly trained, and many vehicles, particularly large trucks and buses, are badly maintained. Donkeys, cattle, horse carts, and even the occasional camel can pose roadside hazards in some areas.

Roads, including most major highways, also suffer from poor maintenance and often have numerous potholes, sharp drop-offs and barriers that are not sign-posted. Extreme

caution should be exercised when traveling at night by road since many vehicles do not have proper illumination or dimmers nor are most roads properly illuminated or signed. Driving without experienced local drivers or guides is not recommended.

It is best to avoid public transportation. For security reasons, U.S. Mission personnel are prohibited from using taxis or buses. Visit the website of Pakistan's national tourist office at http://www.tourism.gov.pk/ and the national authority responsible for road safety at http://www.nha.gov.pk.

Aviation Safety Oversight: The U.S. Federal Aviation Administration (FAA) has assessed the Government of Pakistan's Civil Aviation Authority as being in compliance with International Civil Aviation Organization (ICAO) aviation safety standards for oversight of Pakistan's air carrier operations. For more information, travelers may visit the FAA's website at http://www.faa.gov.

Special Circumstances: Pakistan is largely a cash economy. Personal checks are not commonly accepted. Most Pakistanis do not use checking accounts for routine transactions. Outside major cities, even credit cards and travelers' checks are generally not accepted, and there have been numerous reports of credit card fraud. There are bank branches as well as registered moneychangers in all international airports. ATMs can also be found in major airports. English is widely spoken by professional-level airport staff.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating Pakistani laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Pakistan are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy and Consulate Locations: Americans living or traveling in Pakistan are encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration website so that they can obtain updated information on travel and security within Pakistan. Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency. The U.S. Embassy in Islamabad is located at Diplomatic Enclave, Ramna 5; telephone: (92-51) 208-0000; Consular Section telephone: (92-51) 208-2700; fax: (92-51) 282-2632; website: http://islamabad.usembassy.gov.

The U.S. Consulate General in Karachi, located at 8 Abdullah Haroon Road, closed its public operations indefinitely due to security concerns. U.S. citizens requiring emergency assistance should call the Consular Section in Karachi; telephone: (92-21) 520-4200; fax: (92-21) 568-0496; website: http://karachi.usconsulate.gov.

The U.S. Consulate in Lahore is located on 50 Sharah-E-Abdul Hamid Bin Badees (Old Empress Road), near Shimla Hill Rotary; telephone: (92-42) 603-4000; fax: (92-42) 603-4200; website: http://lahore.usconsulate.gov/; email: amconsul@brain.net.pk.

The U.S. Consulate in Peshawar is located at 11 Hospital Road, Cantonment, Peshawar; telephone: (92-91) 526-8800; fax: (92-91) 528-4171; website: http://peshawar.usconsulate.gov.

Intercountry Adoption

November 2008

The information in this section has been edited from a report available through the U.S. Department of State Office of Children's Issues. For more information detailed, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Pakistan is not party to The Hague Convention on Protection of Children and Co-operation in Respect of Intercountry Adoption (Hague Adoption Convention).

Who Can Adopt? To bring an adopted child to United States from Pakistan, you must be found eligible to adopt by the United States Government. For detailed information on these requirements for adoption, please review the *Intercountry Adoption* section of this publication and visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

Interested United States citizens are strongly encouraged to contact United States consular officials in Islamabad before formalizing an adoption agreement to ensure that appropriate procedures have been followed which will make it possible for the Embassy (Consulate) to issue a United States immigrant visa for the child.

In addition to the United States requirements for adoptive parents, Pakistan also has the following requirements for adoptive parents.

Age Requirements: If single, the petitioner must be a United States citizen who is at least 24 years old when filing form I-600A, and at least 25 years old when filing form I-600. If married, only one spouse is technically the petitioner (must be a United States citizen). The other spouse (who does not have to be a United States citizen) must co-sign the forms, consent to the adoption, and be approved in the home study.

Marriage Requirements: Prospective adoptive parents can be married or single.

Who Can Be Adopted? Pakistan has specific requirements that a child must meet in order to be eligible for adoption. It should be noted that Pakistan is not an easy country from which to adopt a child. If you have a particular child in mind for adoption, especially a relative, be sure to have a lawyer or USCIS assist you in determining if the child fits the definition of "orphan" before proceeding.

In addition to these requirements, a child must meet the definition of an orphan under United States law for you to bring him or her home back to the United States.

Pakistani Adoption Authority: Family Court

The Process: The first step in adopting a child is usually to select a licensed agency in the United States that can help with your adoption. Adoption service providers must be licensed by the United States state in which they operate.

There are no adoption agencies in Pakistan; however, the American Embassy provides a list of attorneys that the parents can use.

To bring an adopted child from Pakistan to the United States, you must apply to be found eligible to adopt (Form I-600A) by the USCIS.

The adjudication of such petitions can be very time-consuming and parents are encouraged to begin the process well in advance.

In addition to meeting the United States requirements for adoptive parents, you need to meet the requirements of Pakistan as described in the Who Can Adopt section.

A prospective adoptive parent may file Form I-600A with the USCIS office having jurisdiction over their place of residence. Detailed information about filing these forms can be found on USCIS web site at http://www.uscis.gov.

If you are eligible to adopt, and a child is available for intercountry adoption, the central adoption authority in Pakistan will provide you with a referral to a child.

Documents Required: The following documents are required to complete the adoption process:

- Proof of United States citizenship of petitioner
- Proof of marriage of petitioner (if married); if the petitioner is unmarried but was previously married, submit proof of termination of all previous marriages
- Fingerprint cards of petitioner, spouse, and all other adult members of the petitioner's household
- Approved home-study

For updates on document requirements and information on how to authenticate documents, visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

Bringing Your Child Home: Once your adoption is complete (or you have obtained legal custody of the child), there are a few more steps to take before you can head home. Specifically, you need to apply for several documents for your child before he or she can travel to the United States, such as a birth certificate, a passport or travel document for your child from the country in which he or she was born, and a U.S. Immigration Visa.

For detailed and updated information on how to obtain these documents, review the *Intercountry Adoption* section on this publication and visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

Child Citizenship Act: For adoptions finalized abroad: The Child Citizenship Act of 2000 allows your new child to acquire American citizenship automatically when he or she enters the United States as lawful permanent residents. For adoptions finalized in the United States: The Child Citizenship Act of 2000 allows your new child to acquire American citizenship automatically when the court in the United States issues the final adoption decree. To learn more, review the *Intercountry Adoption* section on this publication and visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

International Parental Child Abduction

November 2008

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *International Child Abduction* section of this book and review current reports online at www.travel.state.gov/childabduction.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is

provided for general information only. Questions involving interpretation of specific foreign laws should be addressed to foreign legal counsel.

Under Pakistani family law, which is based on Islamic law, the father controls virtually all aspects of his family's life. He decides where his wife and children will live, how the children are to be educated and whether or where they may travel. Courts rarely, if ever, give custody of children to a woman who is not a Muslim, who will not raise the children as Muslims, does not plan to raise them in Pakistan, or has remarried. In all probability, even if the mother wins custody, the children would still need the father's permission, to leave the country. Any matter of custody in Pakistan can only be resolved through the appropriate local judicial system.

Currently, the only treaties which have any application to abductions of children from the United States are the Hague Convention on the Civil Aspects of International Child Abduction and the extradition treaties which the United States has with individual countries. Pakistan is not a party to the Hague Convention, and there is no bilateral treaty in effect between the U.S. and Pakistan which would cover parental child abduction.

While the courts of Pakistan may take into account the laws of other countries, custody orders from other countries are viewed simply as evidence in a Pakistani proceeding. Possession of a custody order, even in the absence of such an order by the Pakistani spouse, will not automatically result in the return of an abducted child. That parent would have to appeal to the family court in order to try to obtain an order for custody.

Pakistan will recognize decrees of other countries, whether or not there are any formal treaties with them. Abduction by a father is considered abduction by Pakistani authorities (the implication being that it is considered to be an illegal action). However, a foreign-born mother with U.S. custody orders still is not automatically allowed to take possession of her children and depart the country. She would have to retain an attorney and appeal to the High court. The high court acts like a post office in such cases. They send the case to the appropriate district judge for execution. The District Court reviews the papers and then calls in the concerned parties for a hearing. In spite of the illegal action (the abduction), and even though the foreign-born mother has a court order, there is still a great possibility the mother will not be given custody of the child. Moreover, if she is granted custody, the father can appeal to the Supreme Court on a matter of law, which means there was some legal point which was not adhered to during the course of the hearing. If the Supreme Court grants custody (no cases have gone that far yet in this district), there is no further recourse for the father or mother. If the foreign-born mother is granted custody and the father does not comply with the court order, the children can be taken by force. In addition, other civil actions can be taken such as attaching the father s property or arresting him. If a foreign born mother were granted full custody of her child, the father has the right to refuse to allow the mother and child to depart if the court order does not specifically allow her to remove the children from Pakistan.

Although appeal to the courts may seem difficult to a mother seeking custody of her children, it is recommended that parents be urged to appeal to the courts or other legal resources available. If a foreign-born mother has the only court order (U.S. or other) in effect regarding the custody of her child, it is also recommended that in addition to appealing to the courts, she should seek assistance in effecting that order from other local authorities (i.e. from local police or school officials).

Parents seeking legal assistance in Pakistan should be advised that local attorneys in Pakistan do not research or investigate cases. Therefore, she must bring as much documentary evidence as she can when she comes to Pakistan. She may be able to hire a local investigator (attorneys also do not use the services of independent investigators) to gain whatever evidence she needs from Pakistan. At this point, it would probably be best for the mother to be present in Pakistan, at least part way through the investigation, to check on the actual progress being made and to try and minimize the possibility that the investigator will be bribed to alter his findings.

The mother might wish to have a U.S. attorney review all collected evidence for advice on what may be useful and what may not. Once all evidence is collected, a Pakistani attorney should be retained. Constitutionally, courts are bound to resolve such cases within six months. But in reality, such cases could take more than one year if there are appeals. Since Pakistani attorneys do not do investigations, the costs incurred are purely for court-related costs and are therefore likely to be affordable, running as low as 10,000 Pakistani Rupees (U.S. Dollars $400.00) to 50,000 Pakistani Rupees (U.S. Dollars 2,000.00).

There are major family court sections in the civil courts in Rawalpindi, Lahore, Karachi, and Peshawar. In smaller towns, any judge could hear such a case.

In Pakistan, most mothers do not earn an income. The courts keep this is mind in determining what is in the best interests of the child. A father is legally bound to take care of his children no matter what since he is the income earner. A mother is not so bound. That is why, in most cases, the father is granted custody.

Laws protecting the rights of mothers are written into the Quran (Koran). Under Islamic law, a woman has the right to keep a boy child up to the age of seven years and a girl child up to the age of twelve. The Guardian and Wards Act of 1890 can be used to help American citizens in two categories of juvenile cases. It can be used to gain custody of a child for adoption purposes and it can be used to justify granting custody of a child to one parent or the other. According to the Act, a person who is granted custody of a child is given the responsibility to

take care of the child and any property or other inheritance that may belong to that child. Since any inheritance is most likely to come through the father, the father would most likely prevail in such a situation.

The Extradition Treaty of 1931 was signed under the British mandate and could be used as a basis of cooperation in child custody cases. The Extradition Act of 1972 was not made with the U.S., but it could be extended in the interest of an American claimant. However, extradition has not been a recourse to which the U.S. Government has resorted in child custody cases.

Travel Warning

November 21, 2008

The Department of State warns U.S. citizens against non-essential travel to Pakistan in light of the threat of terrorist activity. This replaces the Travel Warning dated October 1, 2008, and updates information on security incidents, notes the temporary relocation of some employees from the US Consulate in Peshawar to Islamabad, and reminds U.S. citizens of ongoing security concerns in Pakistan.

The presence of Al-Qaida, Taliban elements, and indigenous sectarian groups poses a potential danger to American citizens, especially in the western border regions of Pakistan. Continuing tensions in the Middle East also increase the possibility of violence against Westerners in Pakistan. Terrorists and their sympathizers have demonstrated their willingness and capability to attack targets where Americans are known to congregate or visit, such as hotels, clubs and restaurants, places of worship, schools, or outdoor recreation events. U.S. Government personnel are not permitted to stay at or frequent major hotels in Islamabad, Karachi, Lahore and Peshawar. Government personnel have also been advised to restrict the number and frequency of trips to public markets, and to avoid public restaurants in Islamabad, Karachi, and Peshawar.

On November 12, 2008, an American government contractor and his driver in Peshawar were shot and killed in their car. In September 2008, over fifty people, including three Americans, were killed and hundreds were injured when a suicide bomber set off a truck filled with explosives outside a major international hotel in Islamabad. In August 2008, gunmen stopped and shot at the vehicle of an American diplomat in Peshawar. In March 2008, a restaurant frequented by westerners in Islamabad was bombed, killing one patron and seriously injuring several others, including four American diplomats. On March 2, 2006, an American diplomat, a Consulate employee, and three others were killed when a suicide bomber detonated a car packed with explosives alongside the U.S. Consulate General in Karachi. Fifty-two others were wounded.

Sectarian and extremist violence has resulted in fatal bomb attacks in Islamabad, Rawalpindi, Karachi, Peshawar, Quetta, Lahore, and other Pakistani cities in 2006, 2007 and 2008. Since 2007, over 1,000 bombings have killed more than 1,000 people throughout Pakistan and injured many more. Some of the attacks have occurred outside major hotels, in market areas and other locations frequented by Americans. Other recent targets have included restaurants, Pakistani government officials and buildings, and international NGOs.

In 2007 and 2008, several American citizens throughout Pakistan were kidnapped for ransom or for personal reasons. Kidnappings for ransom are particularly common in some parts of Pakistan, such as the Northwest Frontier Province and Sindh Province.

The Pakistani military has been engaged in an active campaign against militants in the Bajaur district of the Federally Administered Tribal Areas (FATA). Access to many areas of Pakistan, including the FATA along the Afghan border, and the area adjacent to the Line of Control (LOC) in the disputed territory of Kashmir, is restricted by local government authorities for non-Pakistanis. Travel to any restricted region requires official permission by the Government of Pakistan. Failure to obtain such permission in advance can result in arrest and detention by Pakistani authorities. Due to security concerns the U.S. Government currently allows only essential travel within the FATA by American officials.

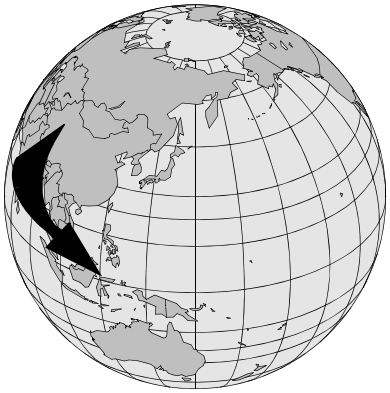
The U.S. Consulate in Peshawar has temporarily relocated some personnel to Islamabad while the Consulate evaluates necessary security measures to operate under heightened threat conditions. The Consulate remains open.

Rallies, demonstrations, and processions occur regularly throughout Pakistan on very short notice. In the aftermath of the December 2007 death of former Prime Minister Benazir Bhutto, widespread rioting in Karachi led to multiple deaths and injuries as well as widespread property damage. Demonstrations have often taken on an anti-American or anti-Western character, and Americans are urged to avoid large gatherings.

U.S. citizens who travel to or remain in Pakistan despite this Travel Warning are encouraged to register with the Embassy in Islamabad or the Consulates in Karachi, Lahore, or Peshawar. This registration can be completed online through the Department of State's travel registration website: https://travelregistration.state.gov. Alternatively, Americans without Internet access should contact the nearest Embassy or Consulate for information on registering in person. Registration enables citizens to obtain updated information on travel and security within Pakistan via the emergency alert system (warden network).

Americans in country should take appropriate individual precautions to ensure their safety and security. These measures include maintaining good situational awareness, avoiding crowds and demonstrations and keeping a low profile. Americans should avoid setting patterns by varying times and routes for all

required travel. Americans should ensure that their travel documents and visas are valid at all times. Official Americans are instructed to avoid use of public transportation and restrict their use of personal vehicles in response to security concerns.



The U.S. Embassy in Islamabad is located at Diplomatic Enclave, Ramna 5; telephone: (92-51) 208-0000; Consular Section telephone: (92-51) 208-2700; fax: (92-51) 282-2632; website: http://islamabad.usembassy.gov.

The U.S. Consulate General in Karachi is located at 8 Abdullah Haroon Road; telephone: (92-21) 520-4200 or (92-21) 520-4400 after hours; fax: (92-21) 568-0496; website: http://karachi.usconsulate.gov.

The U.S. Consulate in Lahore is located on 50 Sharah-E-Abdul Hamid Bin Badees (Old Empress Road), near Shimla Hill Rotary; tel:(92-42)603-4000 or (91-92)603-4250; fax: (92-42) 603-4200; website: http://lahore.usconsulate.gov; email: amconsul@brain.net.pk.

The U.S. Consulate in Peshawar is located at 11 Hospital Road, Cantonment, Peshawar; telephone: (92-91) 526-8800; fax: (92-91) 528-4171; website: http://Peshawar.usconsulate.gov.

For the latest security information, Americans traveling abroad should regularly monitor the Department's Internet web site at http://travel.state.gov where the Worldwide Caution and the Pakistan Country Specific Information and Travel Warning can be found. Up-to-date information on security can also be obtained by calling 1-888-407-4747 toll free in the United States and Canada, or, for callers outside the United States and Canada, a regular toll line at 1-202-501-4444. These numbers are available from 8:00 a.m. to 8:00 p.m. Eastern Time, Monday through Friday (except U.S. federal holidays).

PALAU

Compiled from the December 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Republic of Palau

PROFILE

Geography

Area: 458 sq. km. (about 190 sq. mi.) in eight main islands plus more than 250 islets.

Cities: Capital—Melekeok (pop. 391).

Terrain: Varies from mountainous main island to smaller, reef-rimmed coral islands.

Climate: Tropical.

People

Nationality: Noun and adjective—Palauan.

Population: Approximately 20,000 (non-Palauan population, approx. 5,500). Age structure—less than 15 years old, 5,150; 16-64 years old, 13,600; more than 65 years old, 1,130.

Population growth rate: 1.3%.

Ethnic groups: Palauans are Micronesian with Malayan and Melanesian elements.

Religions: Roman Catholic, Protestant, Modekngei (an indigenous Palauan religion).

Languages: English (official in all 16 states), Palauan.

Education: Literacy—92%.

Health: Life expectancy—male 68 yrs.; female 76 yrs. Infant mortality rate—16.2/1,000.

Work force: Public sector—56%; private sector—44%.

Government

Type: Constitutional republic in free association with United States.

Independence (from U.S.-administered UN trusteeship) October 1, 1994.

Constitution: January 1, 1981.

Government branches: Executive—president (head of state and government), vice president, cabinet. Legislative—bicameral parliament elected by popular vote. Judicial—Supreme Court, National Court, Court of Common Pleas, and the Land Court.

Economy

GDP: (2006, provisional figure) $157.7 million.

GDP per capita: $7,921.

National income: (GDP + foreign assistance) $195.4 million.

National income per capita: $9,817.

GDP composition by sector: Public administration 23%, trade 20%, construction 15%, hotels and restaurants 11%, transportation and communications 9%, fisheries 2%, agriculture 1%, manufacturing and mining 1%.

Industry: Types—government, trade, construction, tourism.

Trade: Exports ($5.9 million, 2004)—fish, handicrafts. Export markets—U.S., Japan and Taiwan. Imports ($107.3 million)—fuel, food and beverages, manufactured goods. Import sources—U.S. (Guam), Japan, Singapore, Taiwan, and Korea.

External debt: (2006) $38 million.

Currency: U.S. dollar.

GEOGRAPHY AND PEOPLE

The Republic of Palau consists of eight principal islands and more than 250 smaller ones lying roughly 500 miles southeast of the Philippines. The islands of Palau constitute part of the Caroline Islands chain. About 70% of Palauans live in the capital city of Koror on Koror Island. The capital, however, relocated in 2006 from Koror to a newly constructed complex in Melekeok State on the larger but less developed island of Babeldaob—the second largest island in all of Micronesia after Guam.

HISTORY

Palau was initially settled more than 4,000 years ago, probably by migrants from what today is Indonesia. British traders became prominent visitors in the 18th century,

followed by expanding Spanish influence in the 19th century. Following its defeat in the Spanish-American War, Spain sold Palau and most of the rest of the Caroline Islands to Germany in 1899. Control passed to Japan in 1914 and then to the United States under UN auspices in 1947 as part of the Trust Territory of the Pacific Islands.

Four of the Trust Territory districts formed a single federated Micronesian state in 1979, but this eventually dissolved as the individual districts—long culturally distinct—opted for more locally popular status. Palau approved a new constitution in 1981, subsequently signing a Compact of Free Association with the United States in 1982. After eight referenda and an amendment to the Palauan constitution, the Compact went into effect on October 1, 1994, marking Palau's emergence from trusteeship to independence.

GOVERNMENT

Palau is a democratic republic with directly elected executive and legislative branches. Presidential elections take place every 4 years, at the same time as the United States' presidential election, to select the president and the vice president, who now run as a team. The Palau National Congress (Olbiil era Kelulau) has two houses. The Senate has nine members elected nationwide. The House of Delegates has 16 members, one each from Palau's 16 states. All of the legislators serve 4-year terms and are limited to three consecutive terms. Each state also elects its own governor and legislature.

The Council of Chiefs, comprising the highest traditional chiefs from each of the 16 states, is an advisory body to the president. The Council is consulted on matters concerning traditional laws and customs.

The judicial system consists of the Supreme Court—with trial and appellate divisions—the Court of Common Pleas, and the Land Court. (Palau's constitution has a provision for an additional National Court, but this is not currently active.) In November 2008 Palauans elected a new president and vice president: Johnson Toribiong and Kerai Mariur. They will take office in mid-January 2009. The same elections brought sweeping change to the legislature and passed more than 20 amendments to the constitution.

Ambassador to the US: **Hersey KYOTA**
Permanent Representative to the UN, New York: **Stuart BECK**

Palau maintains an embassy at 1700 Pennsylvania Avenue, Suite 400, Washington, DC 20006 (tel: 202-452-6814, fax: 202-452-6281). The Republic of Palau's Mission to the United Nations is located at 866 United Nations Plaza, Suite 575, New York, New York 10017 (tel: 212-813-0310, fax: 212-813-0317).

POLITICAL CONDITIONS

While calm in recent years, Palau witnessed several instances of political violence in the 1980s. The republic's first president, Haruo I. Remeliik, was assassinated in 1985, with the Minister of State eventually found to be complicit in the crime. Palau's third president, Lazurus Salii, committed suicide in September 1988 amidst bribery allegations. Salii's personal assistant had been imprisoned several months earlier after being convicted of firing shots into the home of the Speaker of the House of Delegates. Legislation making Palau an "offshore" financial center was passed by the Senate in 1998. In 2001 Palau passed its first bank regulation and anti-money laundering laws.

ECONOMY

Palau's per capita GDP of $7,921 makes it one of the wealthier Pacific Island states. Nominal GDP increased by an annual average of nearly 14% from 1983 to 1990, and by an annual rate of over 10% from 1991 to 1997. Growth turned sharply negative in 1998 and 1999 as a result of the Asian financial crisis, but there has been a gradual rebound in recent years and the economy grew by 5.4% in 2005.

Tourism (and its attendant infrastructure changes) is Palau's main industry. Its major draws are its diverse and pristine marine environment, and its above-water tropical island beauty. The number of visitors—75% of whom come from Taiwan, Japan, and the U.S.—exceeded 82,000 in 2006, a 2% increase from 2005. Continental Airlines and Far Eastern Transport (FAT), have direct flights to Palau from Guam, Taiwan, and the Philippines. Japan Airlines runs chartered flights from Tokyo; Korean Airlines does the same from Seoul on a seasonal basis. In 2006 tourist spending in Palau was $62 million. Palauan tourism and environmental authorities would like to adjust the industry, simultaneously decreasing tourist volume and increasing income while by attracting more high-dollar tourists.

The service sector dominates the Palauan economy, contributing more than 50% of GDP and employing more than half of the work force. The government alone employs nearly 25% of workers and accounts for 23% of the GDP. One of the government's main responsibilities is administering external assistance. Under the terms of the Compact of Free Association with the United States, Palau will receive more than $450 million in

assistance over 15 years and is eligible to participate in more than 40 federal programs. The first grant of $142 million was made in 1994. Further annual payments in lesser amounts will be made through 2009. Total U.S. grant income in 2006 was $23.7 million. Construction is an important industrial activity, contributing over 15% of GDP. Several large infrastructure projects, including the Compact Road, relocation of the new capital, and new hotels, have boosted this sector's recent contribution to GDP.

Agriculture is mainly on a subsistence level, the principal crops being coconuts, taro, and bananas. Fishing is a potential source of revenue, but the islands' tuna output dropped by over one-third during the 1990s. Fishing industry revenues are mostly from license fees from fishing vessels. The main economic challenge confronting Palau is to ensure the long-term viability of its economy by reducing its reliance on foreign assistance. The Compact of Free Association created a trust fund to provide perennial budget support when U.S. direct assistance ends in 2009. The value of the trust fund in 2007 was approximately $175 million.

FOREIGN RELATIONS

Palau gained its independence October 1, 1994 with the entry into force of the Compact of Free Association with the United States. Palau was the last component of the Trust Territory of the Pacific Islands to gain its independence. Under the Compact, the U.S. remains responsible for Palau's defense for 50 years.

The Compact of Free Association is subject to a bilateral review to be completed by the 15th anniversary of its adoption. Palau is a sovereign nation and conducts its own foreign relations. Since independence, Palau has established diplomatic relations with a number of nations, including many of its Pacific neighbors, and is one of two dozen nations that have diplomatic relations with Taiwan.

Palau was admitted to the United Nations on December 15, 1994, and has since joined a number of other international organizations.

TRAVEL

Consular Information Sheet

July 11, 2008

Country Description: The Republic of Palau is a constitutional democracy in free association with the United States. Palau is an archipelago consisting of several hundred volcanic and limestone islands and coral

atolls, few of which are inhabited, and is politically divided into 16 states. Palau's developing economy depends on tourism, marine resources and a small agricultural sector. There are two kinds of public transportation available, taxi and Airai bus service. Palau International Airport is located on Babeldaob Island, near Koror Island. Direct commercial air service exists from Manila, Taipei and Guam to Palau.

Entry Requirements: Citizens and nationals of the United States of America, with the exception to United States military personnel must have a valid passport or other travel document for entry. United States military personnel shall have in their possession official orders or documents certifying the status of the individual or group. Such orders or documents shall be shown on request to the appropriate authorities of the Government concerned.

For the purpose of their identification while in Palau, United States military dependents ten years of age or older shall have in their possession a personal identification card authorized by the Government of the United States which shall show the name, date of birth, status, and photograph of the bearer. Such card shall be shown on request to the appropriate authorities of the Government concerned. A passport shall not be considered valid if it expires in less than six months from date of entry. A visa is not required for U.S. citizens visiting Palau for one year or less, provided the visitor otherwise complies with applicable regulations, for example, on employment. For more information about entry requirements of Palau, travelers may consult with the Embassy of Palau, 1700 Pennsylvania Avenue NW, Suite 400, Washington, DC 20036, (202) 452-6814. Visit the Embassy of Palau's web site at http://www.palauembassy.com/ for the most current information.

Safety and Security: For the latest security information, Americans traveling abroad should regularly monitor the Department's web site, where the current Worldwide Caution Travel Alert, Middle East and North Africa Travel Alert, Travel Warnings and other Travel Alerts can be found. Up-to-date information on security can also be obtained by calling 1-888-407-4747 toll free in the U.S., or, for callers outside the U.S. and Canada, a regular toll line at 1-202-501-4444.

Crime: Although, the crime rate in Palau is relatively low, foreign residents can be the target of petty and sometimes violent crimes, as well as other random acts against individuals and property. Therefore, visitors should not be complacent regarding personal safety or the protection of valuables.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, to contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney, if needed.

The local equivalent to the "911" emergency line in Palau is: 911.

Medical Facilities and Health Information: Health facilities in Palau are adequate for routine medical care, but limited in availability and quality. Doctors and hospitals often expect immediate cash payment for health services. Serious medical conditions requiring hospitalization or evacuation to the United States, or elsewhere, may cost thousands of dollars.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747); or via the CDC's web site at http://wwwn.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith/en.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Palau is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

Palau accepts a driver's license issued by a U.S. state or military authority. Roads in Koror, where the vast majority of the population lives, are in fair condition, but lack sidewalks and have little or no shoulder. The main road connecting the airport with downtown Koror is being repaved; construction to be completed by the end of 2008. The Compact Road—the newly constructed roadway that loops around the large island of Babeldaob - is in excellent condition. Secondary roads connecting villages to the Compact Road vary in quality from good to rough. The national speed limit is 25 miles per hour, but drivers routinely ignore this limit on the good-quality roads, and traffic often moves more slowly in congested areas. Passing slow-moving vehicles is illegal, but drivers do this routinely, creating potentially dangerous situations. Drunken drivers are a late-night hazard in Palau.

Aviation Safety Oversight: As there is no direct commercial air service to the United States by carriers

registered in Palau, the U.S. Federal Aviation Administration (FAA) has not assessed Palau's Civil Aviation Authority for compliance with International Civil Aviation Organization (ICAO) aviation safety standards. For more information, travelers may visit the FAA's web site at http://www.faa.gov.

Special Circumstances: The official currency of Palau is the U.S. dollar. Major credit cards, including Visa, Mastercard, and American Express, are accepted in most locations catering to tourists. There are several ATMs in Koror, located at branches of U.S. banks. Koror State, where most tourist facilities are located, enforces a curfew between 2:30 a.m. and 5:00 a.m. Monday to Thursday, and between 4:00 a.m. and 6:00 a.m. Friday to Sunday and on national holidays. Firearms of any kind are strictly prohibited in Palau. The penalty for possession of a firearm or ammunition is up to fifteen years imprisonment. Palau customs authorities may enforce strict regulations concerning temporary importation into or export from Palau of certain items. It is advisable to contact the Embassy of Palau in Washington, D.C., for specific information regarding customs requirements.

General information regarding disaster preparedness is available via the Bureau of Consular Affairs' website, and from the U.S. Federal Emergency Management Agency (FEMA) home page at http://www.fema.gov.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than those in the United States for similar offenses.

Persons violating Palauan laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession of, use of, or trafficking in illegal drugs in Palau are strict, and convicted traffickers face a mandatory twenty-five year jail sentence and USD 50,000 fine. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living in or visiting Palau are encouraged to register at the Consular Section of the U.S. Embassy in Koror or through the State Department's travel registration web site, and to obtain updated information on travel and security within Palau.

Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency. The U.S. Embassy is located in Koror, the capital city, in an area known as Ngermid Hamlet. There is no street address. The mailing address is: PO Box 6028, Koror, Palau 96940. The telephone number is (680) 488-2920/2990. The fax number is (680) 488-2911. The Embassy does not issue passports; that function is performed by the Honolulu Passport Agency.

Intercountry Adoption

July 2007

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is based on public sources and current understanding. Questions involving foreign and U.S. immigration laws and legal interpretation should be addressed respectively to qualified foreign or U.S. legal counsel.

Important Note: Although the "Compact of Free Association" between Palau and the United States permits Palauan citizens to travel to the United States for some temporary purposes without a U.S. visa, this provision is NOT applicable to adopted children who will reside permanently with American families in the United States.

Prospective adoptive parents of Palauan children must go through the appropriate Palauan adoption procedures as well as the relevant U.S. immigration procedures related to adopted foreign orphans. Adopted Palauan children who enter the United States without a visa will later have difficulties adjusting their U.S. immigration status and, eventually, acquiring U.S. citizenship.

Patterns of Immigration: No Palauan children have received U.S. orphan immigrant visas in the past five fiscal years (2002-2006).

Adoption Authority: There is no specifically designated Palauan authority or agency overseeing adoption procedures. Americans considering adoption from Palau should begin by contacting a Palauan attorney to assist them in the judicial process.

Eligibility Requirements for Adoptive Parents: Under Palauan law, both married couples and single individuals may adopt Palauan children if the Palauan authorities deem the prospective adoptive parents "suitable." Foreign citizens who are married to Palauan citizens may also adopt their Palauan stepchildren.

Residency Requirements: The Palauan government has no specific requirement or policy as regards the residency of foreign prospective adoptive parents.

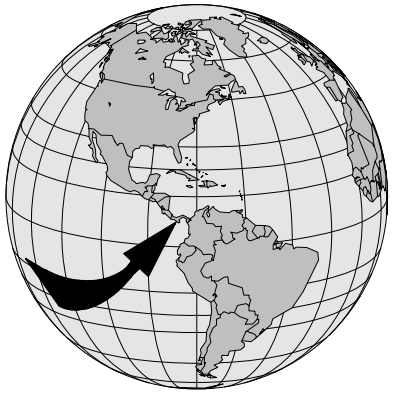
Time Frame: The U.S. Embassy in Koror, Palau has indicated that Palauan adoptions generally take from one to two months to complete.

Adoption Agencies and Attorneys: Prospective adoptive parents are advised to fully research any adoption agency or facilitator they plan to use for adoption services.

Adoption Fees: Prospective adoptive parents should expect to pay a court filing fee in Palau of fifty U.S. dollars ($50). If they hire a local attorney to assist them in the adoption process, they would of course also have to pay the attorney. Attorneys' fees vary.

Adoption Procedures: Palauan adoption procedures are very straightforward: the prospective adoptive parents petition the court for adoption, and if the court grants the adoption, the child's name can be changed and the child may leave the country after receiving a U.S. immigrant visa.

Despite the apparent simplicity of this process, however, the U.S. Embassy in Koror strongly recommends that prospective adoptive parents residing outside of Palau hire a Palauan lawyer who will be easily able to investigate and provide to the court any/all relevant information on their background, living environment and financial status.



Required Documents: According to the Palauan authorities, the prospective adoptive parents must present the child's original Palauan birth certificate as well as a letter of consent from the child's birth parents.

Embassy of Palau
1700 Pennsylvania Avenue, N.W., Suite 400
Washington, DC 20036
Telephone: (202) 452-6814
http://www.palauembassy.com

U.S. Immigration Requirements: Prospective adoptive parents are strongly encouraged to consult USCIS publication M-249, *The Immigration of Adopted and Prospective Adoptive Children*, as well as the Department of State publication, *Intercountry Adoptions*. Please see the *Intercountry Adoption* section of this book for more details and review current reports online at http://adoption.state.gov.

U.S. Embassy: The U.S. Embassy in Palau is located in Koror, the capital city, in an area known as Ngermid Hamlet. There is no street address. The mailing address is: P.O. Box 6028, Koror, Palau 96940. The telephone number is (680) 488-2920/2990. The fax number is (680) 488-2911.

Additional Information: Specific questions about adoption in Palau may be addressed to the U.S. Embassy in Koror. Questions about the immigrant visa process for Palauan orphans should be directed to the U.S. Embassy in Manila. General questions regarding intercountry adoption may be addressed to the Office of Children's Issues, U.S. Department of State, CA/OCS/CI, SA-29, 4th Floor, 2201 C Street, NW, Washington, D.C. 20520-4818, toll-free Tel: 1-888-407-4747.

PANAMA

Compiled from the September 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Republic of Panama

PROFILE

Geography

Area: 78,200 sq. km. (30,193 sq. mi.); slightly smaller than South Carolina. Panama occupies the southeastern end of the isthmus forming the land bridge between North and South America.

Cities: Capital—Panama City (1.1 million). Other cities—Colon (198,551), David (138,241).

Terrain: Mountainous (highest elevation Cerro Volcan Baru, 3,475 m.—11,468 ft.); coastline 2,857 km. (1,786 mi.).

Climate: Tropical, with average daily rainfall 28 mm. (1 in.) in winter.

People

Nationality: Noun and adjective—Panamanian(s).

Population: (2004 estimate) 3.3 million.

Annual growth rate: 1.7%.

Ethnic groups: Mestizo (mixed African, Amerindian, and European ancestry) 70%, Amerindian and mixed (West Indian) 14%, Caucasian 10%, Amerindian 6%. Origins: 36.5% African, 37.6% indigenous and 25.9% Caucasian.

Religions: Roman Catholic 84%, Protestant 15%, other 1%.

Languages: Spanish (official); 14% speak English as their native tongue; various indigenous languages. Many Panamanians have a working knowledge of English and most professional college-educated Panamanians in Panama City are bilingual.

Education: Years compulsory—6. Attendance—95% for primary school-age children, 60% for secondary. Literacy—92.6% overall: urban 94%, rural 62%.

Health: Infant mortality rate (2004)—14.9/1,000. Life expectancy—75.0 yrs.

Work force: (March 2007, 1.4 million) Commerce (wholesale and retail)—17.9%; agriculture, cattle, hunting, silviculture—16.1%; construction—9.8%; industries (manufactures)—9.2%; transportation, storage, communications—6.9%; private home domestic services—5.8%; public and defense administration—5.6%; hotels and restaurants—5.4%; other community and social activities, teaching—4.9%; real estate activities, business and rentals—4.8%; social and health services—3.5%; financial intermediation—2.0%.

Government

Type: Constitutional democracy.

Independence: November 3, 1903.

Constitution: October 11, 1972; amended 1983 and 1994 and reformed in 2004.

Government branches: Executive—president (chief of state), two vice presidents. Legislative—National Assembly (unicameral, 78 members reduced to 74 members for September 2009 elections). Judicial—Supreme Court.

Political subdivisions: Nine provinces and five (Indigenous) territories.

Political parties: The Panamenista Party (formerly the Arnulfista Party (PA); Democratic Change (CD); National Liberal Republican Movement (MOLIRENA); the Democratic Revolutionary Party (PRD); Patriotic Union (UP).

Suffrage: Universal at 18.

Economy

GDP: (2007, real) $17 billion.

Annual growth rate: (2005) 6.9%; (2006) 8.1%; (2007) 11.2%.

Per capita GDP: (2007) $5.970.

Natural resources: Timber, seafood, copper.

Services: (80% of GDP) Finance, insurance, health and medical, transportation, telecommunications, the Canal and maritime services, tourism, Colon Free Zone, public administration, and general commerce.

Agriculture and fisheries: (7.4% of GDP) Products—bananas and other fruit, corn, sugar, rice, coffee, shrimp, timber, vegetables, livestock.

Industry/Manufacturing: (12.7% of GDP) Types—food and drink processing, petroleum products, chemicals, paper and paper products,

printing, mining, refined sugar, clothing, furniture, construction.

Trade: (2007) Exports—$9.3 billion: bananas, petroleum products, shrimp, sugar, coffee, and clothing. Exports to U.S.—$365 million (3.9% of total). Imports (goods)—$12.6 billion: capital goods, crude oil, foodstuffs, chemicals, other consumer and intermediate goods. Imports (goods) from U.S.—$3.7 billion (29.7% of total).

PEOPLE

Panamanians' culture, customs, and language are predominantly Caribbean Spanish. The majority of the population is ethnically mestizo or mixed Spanish, Indigenous, Chinese, and West Indian. Spanish is the official and dominant language; English is a common second language spoken by the West Indians and by many businesspeople and professionals. More than half the population lives in the Panama City-Colon metropolitan corridor.

Panama is rich in folklore and popular traditions. Lively salsa—a mixture of Latin American popular music, rhythm and blues, jazz, and rock—is a Panamanian specialty, and Ruben Blades its best-known performer and Minister of Tourism since September 2004. Indigenous influences dominate handicrafts such as the famous Kuna textile molas. Artist Roberto Lewis' Presidential Palace murals and his restoration work and ceiling in the National Theater are widely admired. As of 2004, more than 92,500 Panamanian students attended the University of Panama, the Technological University, and the University of Santa Maria La Antigua, a private Catholic institution. Including smaller colleges, there are 88 institutions of higher education in Panama. The first six years of primary education are compulsory, and for the 2004/2005 school year there were about 430,000 students enrolled in grades one through six. The total enrollment in the six secondary grades for the same period was 253,900. More than 90% of Panamanians are literate.

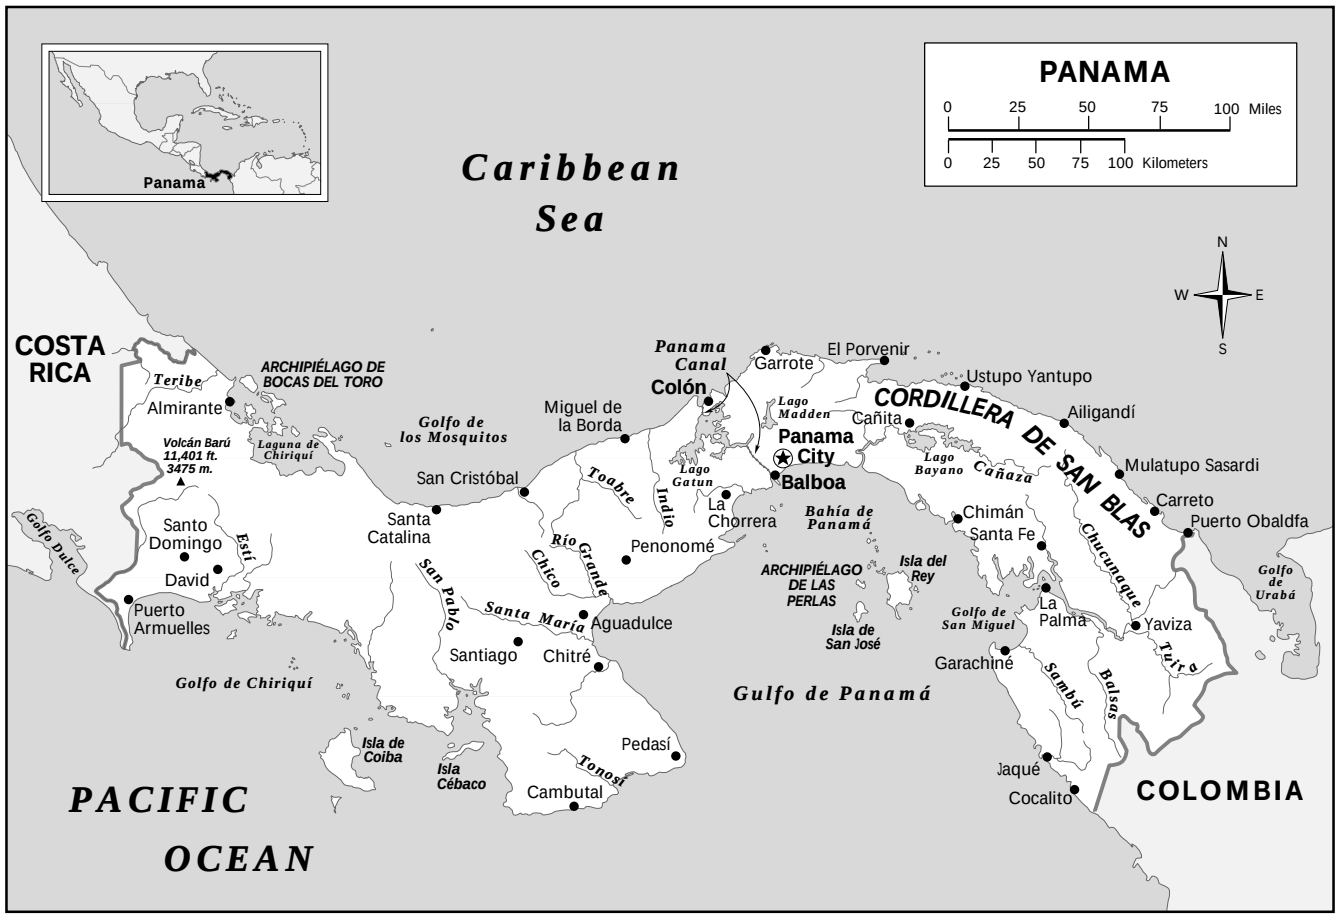
HISTORY

Panama's history has been shaped by the evolution of the world economy and the ambitions of great powers. The earliest known inhabitants of Panama were the Cuevas and the Coclé tribes, but they were decimated by disease and fighting when the Spanish arrived in the 1500s.

Rodrigo de Bastidas, sailing westward from Venezuela in 1501 in search of gold, was the first European to explore the Isthmus of Panama. A year later, Christopher Columbus visited the Isthmus and established a short-lived settlement in the Darien. Vasco Nunez de Balboa's tortuous trek from the Atlantic to the Pacific in 1513 demonstrated that the Isthmus was, indeed, the path between the seas, and Panama quickly became the crossroads and marketplace of Spain's empire in the New World. Gold and silver were brought by ship from South America, hauled across the Isthmus, and loaded aboard ships for Spain. The route became known as the Camino Real, or Royal Road, although it was more commonly known as Camino de Cruces (Road of the Crosses) because of the abundance of gravesites along the way.

Panama was part of the Spanish empire for 300 years (1538-1821). From the outset, Panamanian identity was based on a sense of "geographic destiny," and Panamanian fortunes fluctuated with the geopolitical importance of the Isthmus. The colonial experience also spawned Panamanian nationalism as well as a racially complex and highly stratified society, the source of internal conflicts that ran counter to the unifying force of nationalism.

Building the Canal



Modern Panamanian history has been shaped by its transisthmian canal, which had been a dream since the beginning of Spanish colonization. From 1880 to 1890, a French company under Ferdinand de Lesseps attempted unsuccessfully to construct a sea-level canal on the site of the present Panama Canal. In November 1903, with U.S. encouragement, Panama proclaimed its independence and concluded the Hay/Bunau-Varilla Treaty with the United States.

The treaty granted rights to the United States "as if it were sovereign" in a zone roughly 10 miles wide and 50 miles long. In that zone, the U.S. would build a canal, then administer, fortify, and defend it "in perpetuity." In 1914, the United States completed the existing 83-kilometer (52 mile) canal, which is one of the world's greatest feats of engineering. The early 1960s saw the beginning of sustained pressure in Panama for the renegotiation of this treaty.

Military Coups and Coalitions

From 1903 until 1968, Panama was a constitutional democracy dominated by a commercially oriented oligarchy. During the 1950s, the Panamanian military began to challenge the oligarchy's political hegemony. In October 1968, Dr. Arnulfo Arias Madrid, twice elected president and twice ousted by the Panamanian military, was ousted for a third time as president by the National Guard after only 10 days in office. A military government was established, and the commander of the National Guard, Brigadier General Omar Torrijos, soon emerged as the principal power in Panamanian political life. Torrijos' regime was harsh and corrupt, but his charisma, populist domestic programs, and nationalist (anti-U.S.) foreign policy appealed to the rural and urban constituencies largely ignored by the oligarchy.

Torrijos' death in 1981 altered the tone but not the direction of Panama's political evolution. Despite the 1983 constitutional amendments, which appeared to proscribe a political role for the military, the Panama Defense Forces (PDF), as they were then known, continued to dominate Panamanian political life behind a facade of civilian government. By this time, General Manuel Noriega was firmly in control of both the PDF and the civilian government.

The United States froze economic and military assistance to Panama in the summer of 1987 in response to the domestic political crisis in Panama and an attack on the U.S. Embassy. In April 1988, President Reagan invoked the International Emergency Economic Powers Act, freezing Panamanian Government assets in all U.S. organizations. In May 1989 Panamanians voted overwhelmingly for the anti-Noriega candidates. The Noriega regime promptly annulled the election, and embarked on a new round of repression. By the fall of 1989 the regime was barely clinging to power, and the regime's paranoia made daily existence unsafe for American citizens.

On December 20, 1989, President George H.W. Bush ordered the U.S. military into Panama to protect U.S. lives and property, to fulfill U.S. treaty responsibilities to operate and defend the Canal, to assist the Panamanian people in restoring democracy, and to bring Noriega to justice. The U.S. troops involved in Operation Just Cause achieved their primary objectives quickly, and Noriega eventually surrendered to U.S. authorities. He completed his sentence for drug trafficking charges in September 2007. In August 2007, a U.S. federal court in Miami found Noriega extraditable to France to serve a sentence imposed there after an in absentia conviction for money laundering. Noriega remains in custody pending the outcome of his legal challenges to the certificate of extraditability issued August 2007.

Rebuilding Democracy

Panama's Electoral Tribunal moved quickly to rebuild the civilian constitutional government, reinstated the results of the May 1989 election on December 27, 1989, and confirmed the victory of President Guillermo Endara and Vice Presidents Guillermo Ford and Ricardo Arias Calderon.

During its 5-year term, the often-fractious Endara government struggled to meet the public's high expectations. Its new police force was a major improvement over its predecessor but was not fully able to deter crime. Ernesto Perez Balladares was sworn in as President on September 1, 1994, after an internationally monitored election campaign.

Perez Balladares ran as the candidate for a three-party coalition dominated by the Democratic Revolutionary Party (PRD), the erstwhile political arm of military dictatorships. Perez Balladares worked skillfully during the campaign to rehabilitate the PRD's image, emphasizing the party's populist Torrijos roots rather than its association with Noriega. He won the election with only 33% of the vote when the major non-PRD forces splintered into competing factions. His administration carried out economic reforms and often worked closely with the U.S. on implementation of the Canal treaties.

On September 1, 1999, Mireya Moscoso, the widow of former Presi-

dent Arnulfo Arias Madrid, took office after defeating PRD candidate Martin Torrijos, son of the late dictator, in a free and fair election. During her administration, Moscoso attempted to strengthen social programs, especially for child and youth development, protection, and general welfare. Moscoso's administration successfully handled the Panama Canal transfer and was effective in the administration of the Canal.

The PRD's Martin Torrijos won the presidency and a legislative majority in the National Assembly in 2004. Torrijos ran his campaign on a platform of "zero tolerance" for corruption, a problem endemic to the Moscoso and Perez Balladares administrations. Since taking office, Torrijos has passed a number of laws making the government more transparent. He formed a National Anti-Corruption Council whose members represent the highest levels of government, as well as civil society, labor organizations, and religious leadership. In addition, many of his closest Cabinet ministers are non-political technocrats known for their support for the Torrijos government's anti-corruption aims. Despite the Torrijos administration's public stance on corruption, few high-profile cases, particularly involving political or business elites, have been acted upon.

GOVERNMENT AND POLITICAL CONDITIONS

Panama is a representative democracy with three branches of government: executive and legislative branches elected by direct vote for 5-year terms, and an independently appointed judiciary. The executive branch includes a president and two vice presidents. The legislative branch consists of a 78-member unicameral National Assembly. The Constitution was changed in 2004, however, and beginning with national elections in 2009, the executive branch will have only one vice president, and the membership of the National Assembly was to be capped at 71 (subsequently changed to 74). The judicial branch is organized under a nine-member Supreme Court (each judge is appointed for a 10-year term) and includes all tribunals and municipal courts. An autonomous Electoral Tribunal supervises voter registration, the election process, and the activities of political parties. Anyone over the age of 18 may vote.

NATIONAL SECURITY

The government has converted the former PDF into the Panamanian Public Force (PPF), a "law enforcement focused" force that is subordinate to civilian authority, composed, until August 2008, of four independent organizations: the Panamanian National Police (Policia Nacional de Panamá or PNP), National Maritime Service (Servicio Maritimo Nacional or SMN), the National Air Service (Servicio Aéreo Nacional or SAN), and the Institutional Protectional Service (Servicio de Protección Institucional or SPI). Utilizing special authority granted him by the National Assembly, President Torrijos enacted legislation in August 2008 that formed the National Frontier Service (Servicio Nacional de Fronteras or SENAFRONT), the National Aero-Naval Service (Servicio Nacional Aero-Naval or SENAN), and the Civilian Intelligence Service (Servicio Nacional de Ingteligencia y Seguridad - SENIS). The process by which President Torrijos enacted this legislation drew much public criticism, but his government moved forward on efforts to stand up these new entities beginning in September 2008. A constitutional amendment passed in 1994 permanently abolished the military.

Law enforcement units that are separated from the PPF, such as the Judicial Investigative Directorate (DIJ), also are directly subordinate to civilian authorities. The PPF budget, in contrast to the former PDF, is on public record and under the control of the executive. The lead criminal investigative entity is the DIJ. Previously under the nominal direction of the autonomous Attorney General and known as the Technical Judicial Police (PTJ), the DIJ is now part of the PNP though it maintains investigative links with the Attorney General's office.

Attorney Gen.: **Ana Matilde GOMEZ Ruiloba**
Dir., Council for Public Security & National Defense: **Erick ESPINOSA Concepcion**
Manager, National Bank of Panama: **Juan Ricardo DE DIANOUS**
Ambassador to the US: **Federico Antonio HUMBERT Arias**
Permanent Representative to the UN, New York: **Ricardo Alberto ARIAS Arias**

Panama maintains an embassy in the United States at 2862 McGill Terrace, NW, Washington, DC 20008 (tel: 202-483-1407), and consulates in Atlanta, Boston, Chicago, Honolulu, Houston, Los Angeles, Miami, New Orelans, New York, Philadelphia, San Juan, San Diego, San Francisco, and Tampa.

ECONOMY

Panama's economy is based primarily on a well-developed services sector that accounts for nearly 80% of GDP. Services include the Panama Canal, banking, the Colon Free Zone, insurance, container ports, flagship registry, tourism, and medical and healthcare.

In October 2006, Panamanians voted in favor of a $5.25 billion Canal expansion project to construct a third set of locks, which is expected to take eight to ten years to complete. The Government of Panama expects the project to be a transforming event for Panama that will provide 7,000-9,000 direct new jobs during the peak construction period of 2009-2011 and set the tone economically for years to come. The expansion is expected to be financed through a combination of increased tolls and debt.

GDP growth in the first three months of 2007 was 9.4%, surpassing most private and government projections and the robust growth seen in 2006 and 2005, which was 8.1% and 6.9%, respectively. Growth has been fueled by the construction sector, transportation, port and Panama Canal-related activities, and tourism. Though Panama has the highest GDP per capita in Central America, about 40% of its population remains mired in poverty.

Panama has bilateral free trade agreements with Chile, El Salvador, Taiwan, Singapore, Honduras, and Costa Rica. Panama is exploring free trade negotiations with Mexico and other Latin American countries. The U.S. and Panama signed a Trade Promotion Agreement (TPA) in June 2007. Panama ratified the agreement in July 2007; it still requires U.S. congressional approval to enter into force. This agreement will promote economic opportunity by eliminating tariffs and other barriers to trade of goods and services.

FOREIGN RELATIONS

Panama is a member of the UN General Assembly and most major UN agencies, and started its fourth term as a member of the UN Security Council in January 2007. It maintains membership in several international financial institutions, including the World Bank, the Inter-American Development Bank, and the International Monetary Fund.

Panama is a member of the Organization of American States and was a founding member of the Rio Group. Although it was suspended from the Latin American Economic System—known informally both as the Group of Eight and the Rio Group—in 1988 due to its internal political system under Noriega, Panama was readmitted in 1994 as an acknowledgment of its democratic credentials.

Panama also is one of the founding members of the Union of Banana Exporting Countries and belongs to the Inter-American Tropical Tuna Commission. Panama is a member of the Central American Parliament as well as the Central American Integration System (SICA). Panama joined its six Central American neighbors at the 1994 Summit of the Americas in signing the Alliance for Sustainable Development, known as the Conjunta Centroamerica-USA or CONCAUSA, to promote sustainable economic development in the region.

U.S.-PANAMANIAN RELATIONS

The United States cooperates with the Panamanian Government in promoting economic, political, security, and social development through U.S. and international agencies. Cultural ties between the two countries are strong, and many Panamanians come to the United States for higher education and advanced training. In 2007, the U.S. and Panama partnered to launch a regional health worker training center. The center provides training to community healthcare workers in Panama and throughout Central America. About 25,000 American citizens reside in Panama, many retirees from the Panama Canal Commission and individuals who hold dual nationality. There is also a rapidly growing enclave of American retirees in the Chiriqui Province in western Panama.

Panama continues to fight against the illegal narcotics and arms trade. The country's proximity to major cocaine-producing nations and its role as a commercial and financial crossroads make it a country of special importance in this regard. The Panamanian Government has concluded agreements with the U.S. on maritime law enforcement, counter-terrorism, counter-narcotics, and stolen vehicles. A three-year investigation by the Drug Prosecutors Office (DPO), the PTJ, and several other law enforcement agencies in the region culminated in the May 2006 arrest in Brazil of Pablo Rayo Montano, a Colombian-born drug kingpin. Assets located in Panama belonging to his criminal cartel were among those seized by the Government of Panama following his indictment by a U.S. federal court in Miami. In March 2007 the U.S. Coast Guard in cooperation with the Government of Panama seized over 38,000 lbs. of cocaine off the coast of Panama, the largest drug seizure in the eastern Pacific.

In the economic investment arena, the Panamanian Government has been successful in the enforcement of intellectual property rights and has concluded a Bilateral Investment Treaty Amendment with the United States and an agreement with the Overseas Private Investment Corporation. Although money laundering remains a problem, Panama passed significant reforms in 2000 intended to strengthen its cooperation against international financial crimes.

In January 2005, Panama sent election supervisors to Iraq as part of the International Mission for Iraqi Elections to monitor the national elections.

The Panama Canal Treaties

The 1977 Panama Canal Treaties entered into force on October 1, 1979. They replaced the 1903 Hay/Bunau-Varilla Treaty between the United States and Panama (modified in 1936 and 1955), and all other U.S.-Panama agreements concerning the Panama Canal, which were in force on that date. The treaties comprise a basic treaty governing the operation and defense of the Canal from October 1, 1979 to December 31, 1999 (Panama Canal Treaty) and a treaty guaranteeing the permanent neutrality of the Canal (Neutrality Treaty). The details of the arrangements for U.S. operation and defense of the Canal under the Panama Canal Treaty are spelled out in separate implementing agreements. The Canal Zone and its government ceased to exist when the treaties entered into force and Panama assumed jurisdiction over Canal Zone territories and functions, a process which was finalized on December 31, 1999.

TRAVEL

Consular Information Sheet

June 5, 2008

Country Description: Panama has a developing economy. Outside the Panama City area, which has many first-class hotels and restaurants, tourist facilities vary in quality. The U.S. dollar is the paper currency of Panama, and is also referred to as the Panama balboa. Panama mints its own coinage.

Entry Requirements: U.S. citizens traveling by air to and from Panama must present a valid passport when entering or re-entering the United States. Sea travelers must have a valid U.S. passport (or other original proof of U.S. citizenship, such as a certified U.S. birth certificate with a government-issued photo ID). American citizens can visit travel.state.gov or call 1-877-4USA-PPT (1-877-487-2778) for information on applying for a passport.

Panamanian law requires that travelers must either purchase a tourist card from the airline serving Panama or obtain a visa from a Panamanian embassy or consulate before traveling to Panama. Further information may be obtained from the Embassy of Panama, 2862 McGill Terrace NW, Washington, DC 20009, tel. (202) 483-1407, or the Panamanian consulates in Atlanta, Boston, Chicago, Honolulu, Houston, Los Angeles, Miami, New Orleans, New York, Philadelphia, San Juan, San Diego, San Francisco or Tampa.

U.S. citizens transiting the Panama Canal as passengers do not need to obtain visas, report to customs, or pay any fees. U.S. citizens piloting private craft through the canal should contact the Panama Canal Authority at 011-507-272-1111 or consult the canal's web page online at http://www.pancanal.com.

In an effort to prevent international child abduction, many governments have initiated procedures at entry/exit points. These often include requiring documentary evidence of relationship and permission for the child's travel from the parent(s) or legal guardian not present. Having such documentation on hand, even if not required, may facilitate entry/departure.

Panamanian law requires all persons to carry official identification documents at all times. This law applies to both Panamanian citizens and visitors to the country. Due to an increase in illegal aliens in Panama, the police have been checking documents more frequently, resulting in the detention of people not carrying identification.

For this reason, all Americans are encouraged to carry their passports or other official identification at all times.

Safety and Security: U.S. citizens are warned not to travel to Darien Province. Embassy personnel are only allowed to travel to Darien Province on official business with prior approval of the Embassy's Regional Security Officer. This restricted area encompasses the Darien National Park as well as privately owned nature reserves and tourist resorts. While no incidents have occurred at these resorts, U.S. citizens, other foreign nationals and Panamanian citizens have been the victims of violent crime, kidnapping and murder in this general area. Reliable communications and medical infrastructure are not readily available in the region, which makes travel therein potentially hazardous. Moreover, all around the Panama-Colombia border area the presence of Colombian terrorist groups, drug traffickers and other criminals is common, increasing the danger to travelers. Note: The Secretary of State has designated the Revolutionary Armed Forces of Colombia (FARC), the National Liberation Army (ELN) and the United Self-Defense Forces of Colombia (AUC) as Foreign Terrorist Organizations.

There is increasing evidence that the Revolutionary Armed Forced of Colombia (FARC), a designated foreign terrorist organization, has increased its operations in Panama's Darien Province, including in areas far removed from the immediate vicinity of Panamanian-Colombian border. In February 2008 encounters between six FARC members and the Panamanian police near the city of Jaque resulted in the arrest of the FARC members.

From time to time, there may be demonstrations protesting internal Panamanian issues, or manifestations of anti-American sentiment by small but vociferous groups. While most demonstrations relate to labor disputes or other local issues and are typically non-violent, it is nonetheless a good security practice to avoid demonstrations. U.S. citizens are advised to exercise caution on the campus of the University of Panama, where members of radical, anti-U.S. student groups are active. For updated security information, contact the U.S. Embassy Consular Section at the address below.

Visitors should be cautious when swimming or wading at the beach. Some beaches, especially those on the Pacific Ocean, have dangerous currents that cause drowning deaths every year. These beaches are seldom posted with warning signs.

On the Pacific coast, boaters should be wary of vessels that may be transporting narcotics northward from Colombia. Special permission is needed from the Ministry of Government and Justice and the National Environment Authority to visit the National Park on Coiba Island. At this time, the island, a former penal colony, has fewer than 20 prisoners. Boaters should avoid the southeastern coast of Kuna Yala Comarca (San Blas Islands), south of Punta Carreto, on the Atlantic Coast.

Local maritime search and rescue capabilities are limited and well below U.S. standards.

For the latest security information, Americans traveling abroad should regularly monitor the Department's web site, where the current Worldwide Caution Travel Alert, Middle East and North Africa Travel Alert, Travel Warnings and other Travel Alerts can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll-free in the U.S. and Canada, or for callers outside the U.S. and Canada, a regular toll line at 1-202-501-4444.

Crime: Crime in Panama City is moderate but increasing, particularly because of the activities of youth gangs. The city of Colon is a high crime area. Police checkpoints have become commonplace on weekends on roads in both cities. Based upon reported incidents by local police, the high-crime areas around Panama City are San Miguelito, Rio Abajo, El Chorrillo, Ancon, Curundu, Veracruz Beach, Panama Viejo, and the Madden Dam overlook. Crimes there are typical of those that plague metropolitan areas and range from rapes to armed robberies, muggings, purse-snatchings, "express kidnappings" from ATM banking facilities, in which the victim is briefly kidnapped and robbed after withdrawing cash from an ATM, and petty theft. Tourists recently experienced a problem with armed bandits during an organized canoe trip on the Chagres River.

Panama City has a curfew for persons under 18 years of age. Under the law, students attending night classes must have a carnet or permit, issued by the school or, if employed, a Certificate of Employment. Minors who are picked up for a curfew violation are subject to detention at a police station until parents or legal guardians can arrange for them to be released into their custody. Parents or legal guardians may be fined up to U.S. $50.00 for the violation.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed. The Panamanian Government also sponsors a program for Assistance to Victims of Crimes. The program is managed by the Oficina de Asistencia a Víctimas de Crímenes, located at the Policia Tecnica Judicial in the Ancon area of Panama City, telephone number is 011-507-262-1973 or 011-507-512-2222.

Medical Facilities and Health Information: Although Panama City has some very good hospitals and clinics, medical facilities outside of the capital are limited. When making a decision regarding health insurance, Americans should consider that many foreign doctors and hospitals require payment in cash prior to providing service and that a medical evacuation to the U.S. may cost well in excess of $50,000. Uninsured travelers who require medical care overseas often face extreme difficulties, whereas travelers who have purchased overseas medical insurance have, when a medical emergency occurs, found it to be life-saving. Some insurance policies also include coverage for psychiatric treatment and for disposition of remains in the event of death. In Panama, most hospitals accept credit cards for hospital charges, but not for doctors' fees.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's web site at http://wwwn.cdc.gov/travel/default.aspx. For information about outbreaks of infectious diseases abroad, consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith/en.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Panama is provided for general reference only, and may not be totally accurate in a particular location or circumstance. Panama's roads, traffic and transportation systems are generally safe, but traffic lights often do not exist, even at busy intersections. Driving is often hazardous and demanding due to dense traffic, undisciplined driving habits, poorly maintained streets, and a lack of effective signs and traffic signals. On roads where poor lighting and driving conditions prevail, night driving is difficult and should be approached with caution. Night driving is particularly hazardous on the old Panama City—Colon highway.

Buses and taxis are not always maintained in a safe operating condition due to lack of regulatory enforcement. Auto insurance is not mandatory and many drivers are uninsured. If an accident occurs, the law requires that the vehicles remain in place until a police officer responds to investigate. Traffic in Panama moves on the right, as in the U.S., and Panamanian law requires that drivers and passengers wear seat belts. Flooding during the April to December rainy season occasionally makes city streets impassible and washes out some roads in the interior of the country. In addition, rural areas are often poorly maintained and lack illumination at night. Such roads are generally less traveled and the availability of emergency roadside assistance is very limited. Road travel is more dangerous during the rainy season and in the interior from Carnival through Good Friday. Carnival starts the Saturday prior to Ash Wednesday and goes on for four days.

Traveling on the Pan American Highway: There is often construction at night on Panama's main Pan American highway. There are few signs alerting drivers to such construction and the highway is not well lit at night. When traveling on the highway, travelers should be aware of possible roadblocks. The Pan American Highway ends at Yaviza in the Darien Province of Panama and does not go through to Colombia. The paved portion of the road ends at Santa Fe, with all-weather surface through Canglón. Travelers going to South America by car may wish to ship their cars on a freighter.

Aviation Safety Oversight: The U.S. Federal Aviation Administration (FAA) has assessed the Government of Panama's Civil Aviation Authority as being in compliance with International Civil Aviation Organization (ICAO) aviation safety standards for oversight of Panama's air carrier operations. For more information, travelers may visit the FAA's web site at http://www.faa.gov.

Special Circumstances: Panamanian customs authorities may enforce strict regulations concerning temporary importation into or export from Panama of items such as firearms and ammunition, cultural property, endangered wildlife species, narcotics, biological material, and food products. It is advisable to contact the Embassy of Panama in Washington or one of Panama's consulates in the United States for specific information regarding customs requirements. In many countries around the world, counterfeit and pirated goods are widely available. Transactions involving such products are illegal and bringing them back to the United States may result in forfeitures and/or fines.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating Panamanian laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Panama are severe, and convicted offenders can expect long jail sentences and heavy fines.

Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country are crimes that are prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child

abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in Panama are encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration web site so that they can obtain updated information on travel and security within Panama.

Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency. The U.S. Embassy and U.S. Consular Section are located in Avenida Demetrio Basilio Lakas, Building No.783 in the Clayton section of Panama City.

The international mailing address is: Apartado 0816-02561, Zona 5, Panama, Republic of Panama. The U.S. mailing address is U.S. Embassy Panama, Department of State, Washington, DC 20521-9100. The telephone numbers for the Embassy are 011-507-207-7000, or for after-hours emergencies, 011-507-207-7200; Consular Section 011-507-207-7030 and fax 011-507-207-7278 or 011-507-207-7303. The Embassy web site is http://panama.usembassy.gov. E-mail inquiries may be addressed to Panama-ACS@state.gov.

Intercountry Adoption

March 2006

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is based on public sources and current understanding. Questions involving foreign and U.S. immigration laws and legal interpretation should be addressed respectively to qualified foreign or U.S. legal counsel.

Please Note: In cases where the U.S. citizen is a resident of Panama and has an interest in filing a petition locally,the Department of Homeland Security in Panama is the first point of contact for an intercountry adoption. The DHS officer will approve the I-600 petition prior to receipt of an approved I-600A or Visas Thirty-Seven cable. The petition approval by DHS includes a field investigation.

Patterns of Immigration: Please review current reports online at http://adoption.state.gov.

Adoption Authority: The government offices responsible for adoptions in Panama are the two major courts, the "Juzgado de la Niñez y Adolescencia" (Children and Minors' Court) and "Juzgados Seccionales de Familia" (Family Courts). There are 12 district courts throughout the provinces in Panama. In provinces that do not operate with either legal system, the "Juzgados de Circuitos, Ramo Civil" (Circuit Courts) will handle some adoption cases. Juzgado de la Niñez y Adolescencia—The Juzgado de la Niñez y Adolescencia has jurisdiction over adoption cases of abandoned children, wards of the court, or orphans.* The Juzgado de la Niñez y Adolescencia is the legal system for orphan adoptions in Panama. The courts generally require proof from the U.S. government such as the I-600A approval notification that the parent(s) are eligible for adoption.

Juzgados Seccionales de Familia—The Juzgados Seccionales de Familia have jurisdiction over adoption cases where the child has been placed under adoption by written consent of the child's birth parent(s).

Contact Information:
Ministerio de Desarrollo Social
Telephone: 279-0667, 279-0101
Fax: 279-0713
www.mides.gob.pa
adopciones@mides.gob.pa

Eligibility Requirements for Adoptive Parents: Panamanian law requires that prospective adoptive parent(s) fall within the following categories:

- The couple must have been married for at least two years.
- No family line adoptions, meaning grandparents may not adopt their grandchildren and siblings may not adopt their minor siblings.
- The courts do not separate siblings. If a parent would like to adopt one child, they must adopt the child's siblings.
- There must be an eighteen-year age difference between the prospective adoptive parent and the child.
- Same sex couples are not permitted to adopt children.

Residency Requirements: Panamanian courts allow U.S. citizens to adopt; however, Panamanian citizens are given preference. Under Panamanian adoption law, adopted children do not need to be orphans, though their natural parent(s) must have legally abandoned them. Most adoptions of Panamanian children by U.S. parents take place in Panama. Less frequently, Panamanian Courts may grant the U.S. citizens guardianship, allowing for adoption following the family's return to he United States. There are no legal impediments to granting guardianship, but the two court systems discourage this practice.

Time Frame: Adoptions in Panama typically take 18-24 months.

Adoption Agencies and Attorneys: Panama allows adoptions through private agencies and will work through any accredited United States adoption agency.

Adoption Fees: Attorney fees for an adoption in Panama vary from $1000 to $2500. Government processing fees vary on a case by case basis.

Adoption Procedures: All of the documents supporting the prospective adoptive parent(s)' authority to adopt must be translated into Spanish.

Both courts, the Juzgado de la Niñez y Adolescencia and the Juzgados Seccionales de Familia, have similar processes for intercountry adoption:

- An attorney must submit the necessary paperwork in the form of a "demanda" or petition, to the Panamanian courts.
- For the "Juzgados Seccionales de Familia," the prospective adoptive parent(s) must have the birth parent(s) sign a document that "irrevocably" grants custody to release the child for adoption and immigration to the adoptive parent(s) or adoption agency.
- Usually, the prospective adoptive parent(s) and their attorney will communicate with the judge's staff until the demanda is ready for review. If the judge approves the demanda, the judge will forward the documents to the "Registro Civil de Panama" (Civil Register). The adoption is not official until it is published in the Civil Register and the judge has signed a final decree.
- In adoption cases where prospective adoptive parent(s) are granted legal guardianship of a child in order to adopt the child in the United States, a Panamanian judge must interview the prospective adoptive parent(s) and determine that an adoption outside of Panama is in the best interests of the child. This often includes a psychological evaluation of the parent(s) by a social worker.
- A judge must approve the departure of a child from Panama if the child is leaving without the child's birth parent(s) or legal guardian. The judge will grant the prospective adoptive parents guardianship for a trial period. This trial period can take place in either the United States or Panama. If the judge determines that the child's adjustment has been successful, the adoption is finalized under Panamanian law. If the judge is concerned about the child's welfare, the judge may extend the trial period or cancel the process altogether.

Required Documents: For intercountry adoptions, the Government of Panama requires the below listed documents. English translations of Spanish documents are required. It is advisable to obtain several authenticated copies of the same document in case extra copies are requested or required.

- Birth certificate of each adoptive parent;
- Marriage certificate of each adoptive parent, and death or divorce certificate if either parent was previously married;
- Health certificate certifying good mental and physical health of each parent. The Panamanian authorities will accept a health certificate from the prospective adoptive parents' doctor in the U.S.;
- Certificate of good conduct from local police in adoptive parents' state of residence. The I-600A does not fulfill this requirement;
- Letter from employer(s) stating position and current salary. There is no minimum income requirement;
- 2 passport size photographs of each parent;
- 2 reference letters attesting to character, financial situation, and living conditions of adoptive parents;
- Sociological home study report conducted by U.S. social worker or U.S.-certified investigative agency approved by the Panamanian courts. Home studies conducted in the U.S. can be used if approved by the Panamanian courts;
- Psychological evaluation conducted by authorized medical officer in Panama or a U.S.-certified medical official approved by the Panamanian courts.

Embassy of the Republic of Panama
2862 McGill Terr., NW
Washington, DC 20008
Phone: 202-483-1407
Fax: 202-483-8413

Panama also has consulates in: Mobile, Alabama; Los Angeles, California; San Francisco, California; Miami, Florida; Atlanta, Georgia; Honolulu, Hawaii; Chicago, Illinois; New Orleans, Louisiana; New York, New York; Cleveland, Ohio; Philadelphia, Pennsylvania; Houston, Texas, and San Juan, Puerto Rico.

U.S. Immigration Requirements: Prospective adopting parents are strongly encouraged to consult USCIS publication M-249, *The Immigration of Adopted and Prospective Adoptive Children*, as well as the Department of State publication, *Intercountry Adoptions*. Please see the *Intercountry Adoption* section of this book for more details and review current reports online at http://adoption.state.gov.

Additional Information: Specific questions about adoption in may be addressed to the U.S. Embassy. General questions regarding intercountry adoption may be addressed to the Office of Children's Issues, U.S. Department of State, CA/OCS/CI, SA-29, 4th Floor, 2201 C Street, NW, Washington, D.C. 20520-4818, toll-free Tel: 1-888-407-4747.

Toll Free—For information on intercountry adoption of children and international parental child abduction, call Overseas Citizens Services at 1-888-407-4747.

PAPUA NEW GUINEA

Compiled from the September 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Independent State of Papua New Guinea

PROFILE

Geography

Area: 462,860 sq. km.; about the size of California.

Cities: Capital—Port Moresby (254,158). Other cities—Lae (78,038), Mt. Hagen (27,789).

Terrain: Mostly mountains with coastal lowlands and rolling foothills. The largest portion of the population lives in fertile highlands valleys that were unknown to the outside world until the 1930s, but that supported agriculture some 10,000 years ago, possibly before agriculture was developed elsewhere.

Climate: Tropical. NW monsoon, Dec.-Mar.; SE monsoon, May-Oct.

People

Population: (2007 est.) 6.7 million.

Annual growth rate: 3.1%.

Languages: Three official: English, Tok Pisin, and Motu. There are approximately 860 other languages.

Education: Years compulsory—0. Literacy—49.3%

Health: Infant mortality rate—65/1,000. Life expectancy—57 yrs.

Government

Type: Constitutional monarchy with parliamentary democracy.

Constitution: September 16, 1975.

Government branches: Executive—British monarch (chief of state), represented by governor general; prime minister (head of government). Legislative—unicameral parliament. Judicial—independent; highest is Supreme Court.

Political subdivisions: 19 provinces and the national capital district (Port Moresby).

Political parties: National Alliance (NA), People's Progress Party (PPP), United Resources Party (URP), PNG Party (PNGP).

Suffrage: Universal over 18 years of age.

Economy (2006 est.)

Nominal GDP: (2006) U.S. $5.6 billion; PGK 17.3 billion.

Average exchange rate: (2006) U.S. $=Kina 3.06.

Real GDP growth rate: (2006) 3.7%.

Inflation rate: (2006) 2.9%.

Per capita GDP: U.S. $903.

Natural resources: Gold, copper ore, crude oil, natural gas, timber, fish, oil palm, tea, rubber, logs. Forestry (4% of GDP) marine (1% of GDP); minerals and oil (82% of GDP).

Agriculture: (13% of GDP): Major products—coffee, cocoa, coconuts, palm oil, timber, tea, vanilla.

Industry: (25% of GDP): Major sectors—copra crushing; palm oil processing; plywood production; wood chip production; mining of gold, silver, and copper; construction; tourism; crude oil production, refined petroleum production.

Trade: Exports—66% of GDP: gold, copper ore, oil, timber, palm oil, coffee. Major markets (in order by value—high to low)—Australia, Japan, Philippines, Germany, South Korea, China, United States, United Kingdom, Singapore, and Malaysia. Imports—31% of GDP: machinery and transport equipment, vehicles, manufactured goods, food, mineral fuels, chemicals. Major suppliers (in order by value—high to low)—Australia, United States, Singapore, Japan, China, New Zealand, Malaysia, Hong Kong, Indonesia, and United Kingdom.

PEOPLE

The indigenous population of Papua New Guinea is one of the most heterogeneous in the world. Papua New Guinea has several thousand separate communities, most with only a few hundred people. Divided by language, customs, and tradition, some of these communities have engaged in low-scale tribal conflict with their neighbors for millennia. The advent of modern weapons and modern migration into urban areas has greatly magnified the impact of this lawlessness.

The isolation created by the mountainous terrain is so great that some groups, until recently, were unaware of the existence of neighboring groups only a few kilometers away. The diversity, reflected in a folk saying, "For each village, a different culture," is perhaps best shown in the local languages. Spoken mainly on the island of New Guinea—composed of Papua New Guinea and the Indonesian province of West Papua—some 800 of these languages have been identified; of these, only 350-450 are related. The remainder seem to be totally unrelated either to each other or to the other major groupings. Most native languages are spoken by a few hundred to a few thousand, although Enga, used in part of the highlands, is spoken by some 130,000 people. However, the Enga people are subdivided into clans that regularly conflict with each other. Many native languages are extremely complex grammatically.

Melanesian Pidgin serves as the lingua franca. English is spoken by educated people and in Milne Bay Province. The overall population density is low, although pockets of overpopulation exist. Papua New Guinea's Western Province averages one person per square kilometer (3 per sq. mi.). The Chimbu Province in the New Guinea highlands averages 20 persons per square kilometer (60 per sq. mi.) and has areas containing up to 200 people farming a square kilometer of land. The highlands are home to 40% of the population.

A considerable urban drift toward Port Moresby and other major centers has occurred in recent years. The trend toward urbanization accelerated in the 1990s, bringing in its wake squatter settlements, ethnic disputes, unemployment, and attendant social problems, especially violent crime.

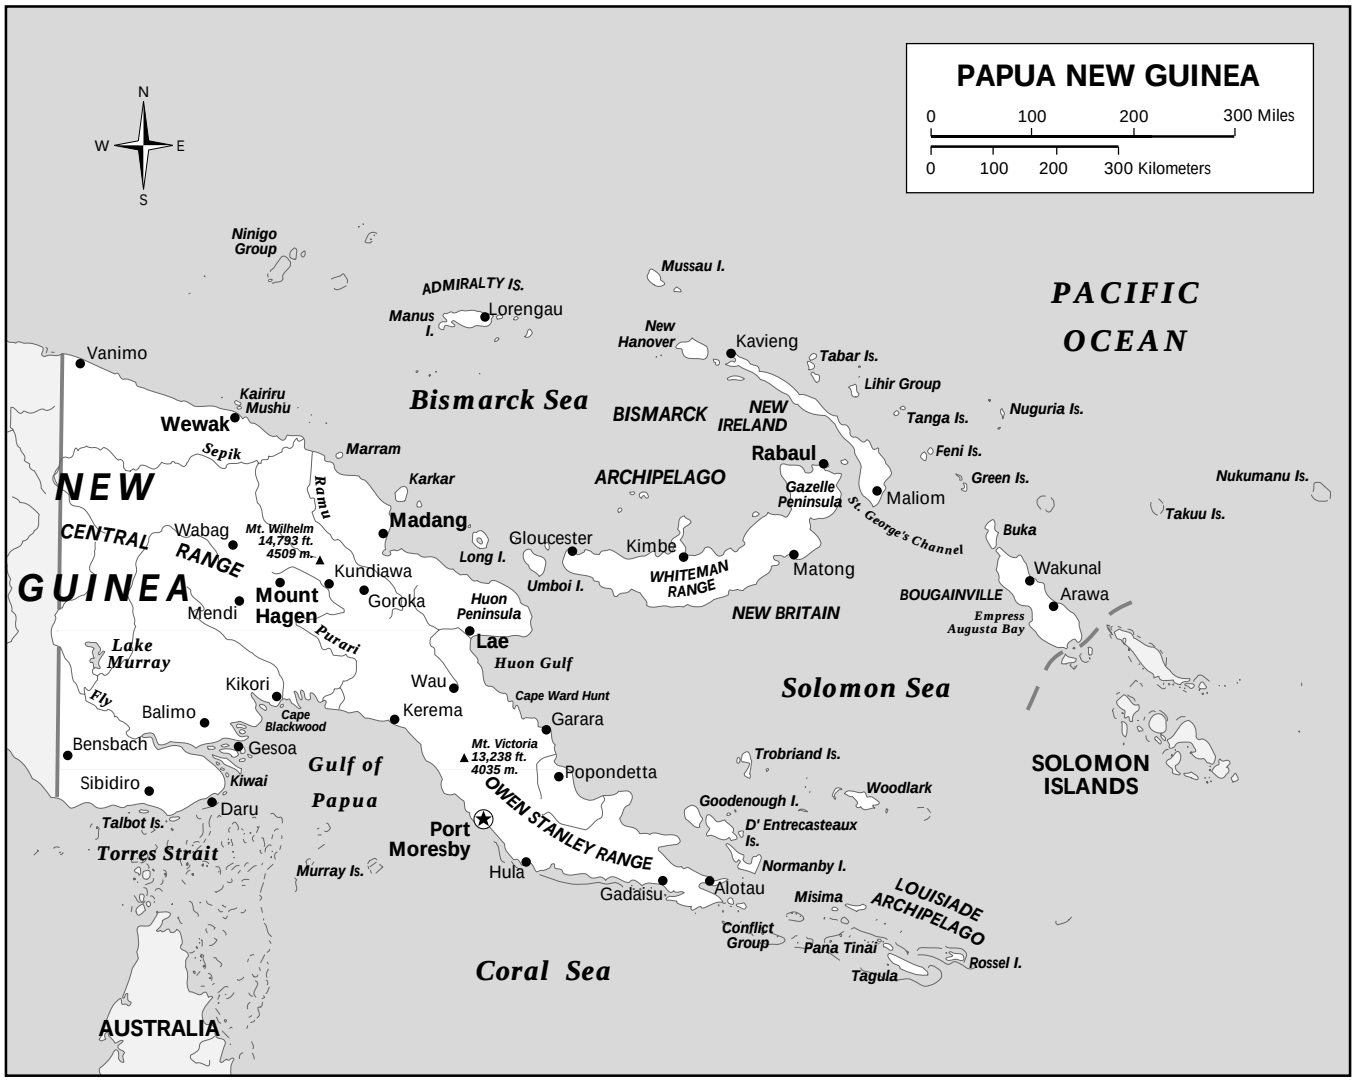
Approximately 96% of the population is Christian. The churches with the largest number of members are the Roman Catholic Church, the Evangelical Lutheran Church, the United Church, and the Seventh Day Adventist church. Although the major churches are under indigenous leadership, a large number of missionaries remain in the country. The bulk of the estimated 2,000 Americans resident in Papua New Guinea are missionaries and their families.

The non-Christian portion of the indigenous population, as well as a portion of the nominal Christians, practices a wide variety of religions that are an integral part of traditional culture, mainly animism (spirit worship) and ancestor cults.

Foreign residents comprise about 1% of the population. More than half are Australian; others are from the United Kingdom, New Zealand, the Philippines, and the United States, most of whom are missionaries. Since independence, about 900 foreigners have become naturalized citizens.

Though cultures vary widely, traditional Papua New Guinea social structures generally include the following characteristics:

- The practice of subsistence economy;
- Recognition of bonds of kinship with obligations extending beyond the immediate family group;
- Generally egalitarian relationships with an emphasis on acquired, rather than inherited, status; and
- A strong attachment of the people to land, which is held communally. Traditional communities do not recognize a permanent transfer of ownership when land is sold.



Though land and other possessions may be inherited through the female line in some cultures, women generally are considered and treated as inferiors. Gender violence is endemic. Patterns and frequency of sexual activity, though never publicly discussed, contribute to the current rapid spread of HIV. Most Papua New Guineans still adhere strongly to this traditional social structure, which has its roots in village life.

HISTORY

Archeological evidence indicates that humans arrived on New Guinea at least 60,000 years ago, probably by sea from Southeast Asia during an Ice Age period when the sea was lower and distances between islands shorter. Although the first arrivals were hunters and gatherers, early evidence shows that people managed the forest environment to provide food. There also are indications of gardening having been practiced at the same time that agriculture was developing in Mesopotamia and Egypt. Early garden crops—many of which are indigenous—included sugarcane, Pacific bananas, yams, and taros, while sago and pandanus were two commonly exploited native forest crops. Today's staples—sweet potatoes and pigs—were later arrivals, but shellfish and fish have long been mainstays of coastal dwellers' diets.

When Europeans first arrived, inhabitants of New Guinea and nearby islands—while still relying on bone, wood, and stone tools—had a productive agricultural system. They traded along the coast, where products mainly were pottery, shell ornaments, and foodstuffs, and in the interior, where forest products were exchanged for shells and other sea products.

The first Europeans to sight New Guinea were probably the Portuguese and Spanish navigators sailing in the South Pacific in the early part of the 16th century. In 1526-27, Don Jorge de Meneses accidentally came upon the principal island and is credited with naming it "Papua," a Malay word for the frizzled quality of Melanesian hair. The term "New Guinea" was applied to the island in 1545 by a Spaniard, Íñigo Ortiz de Retes, because of a fancied resemblance between the islands' inhabitants and those found on the African Guinea coast. Although European navigators visited the islands and explored their coastlines for the next 170 years, little was known of the inhabitants until the late 19th century.

New Guinea

With Europe's growing need for coconut oil, Godeffroy's of Hamburg, the largest trading firm in the Pacific, began trading for copra in the New Guinea Islands. In 1884, Germany formally took possession of the northeast quarter of the island and put its administration in the hands of a chartered company. In 1899, the German imperial government assumed direct control of the territory, thereafter known as German New Guinea. In 1914, Australian troops occupied German New Guinea, and it remained under Australian military control until 1921.

The British Government, on behalf of the Commonwealth of Australia, assumed a mandate from the League of Nations for governing the Territory of New Guinea in 1920. That mandate was administered by the Australian Government until the Japanese invasion in December 1941 brought about its suspension. Following the surrender of the Japanese in 1945, civil administration of Papua as well as New Guinea was restored, and under the Papua New Guinea Provisional Administration Act, 1945-46, Papua and New Guinea were combined in an administrative union.

Papua

On November 6, 1884, a British protectorate was proclaimed over the southern coast of New Guinea (the area called Papua) and its adjacent islands. The protectorate, called British New Guinea, was annexed outright on September 4, 1888. The possession was placed under the authority of the Commonwealth of Australia in 1902. Following the passage of the Papua Act of 1905, British New Guinea became the Territory of Papua, and formal Australian administration began in 1906. Papua was administered under the Papua Act until the Japanese invaded the northern parts of the islands in 1941 and began to advance on Port Moresby and civil administration was suspended. During the war, Papua was governed by a military administration from Port Moresby, where Gen. Douglas MacArthur occasionally made his headquarters. As noted, it was later joined in an administrative union with New Guinea during 1945-46 following the surrender of Japan.

Postwar Developments

The Papua and New Guinea Act of 1949 formally approved the placing of New Guinea under the international trusteeship system and confirmed the administrative union of New Guinea and Papua under the title of "The Territory of Papua and New Guinea." The act provided for a Legislative Council (established in 1951), a judicial organization, a public service, and a system of local government. A House of Assembly replaced the Legislative Council in 1963, and the first House of Assembly opened on June 8, 1964. In 1972, the name of the territory was changed to Papua New Guinea.

Elections in 1972 resulted in the formation of a ministry headed by Chief Minister Michael Somare, who pledged to lead the country to self-government and then to independence. Papua New Guinea became self-governing in December 1973 and achieved independence on September 16, 1975. The 1977 national elections confirmed Michael Somare as Prime Minister at the head of a coalition led by the Pangu Party. However, his government lost a vote of no confidence in 1980 and was replaced by a new cabinet headed by Sir Julius Chan as Prime Minister. The 1982 elections increased Pangu's plurality, and parliament again chose Somare as Prime Minister. In November 1985, the Somare government lost a vote of no confidence, and the parliamentary majority elected Paias Wingti, at the head of a five-party coalition, as Prime Minister. A coalition, headed by Wingti, was victorious in very close elections in July 1987. In July 1988 a no-confidence vote toppled Wingti and brought to power Rabbie Namaliu, who a few weeks earlier had replaced Somare as leader of the Pangu Party. In 1992 Paias Wingti was elected Prime Minister. Sir Julius took his place in 1994 after a vote of no confidence. The 1997 elections brought Bill Skate to power as Prime Minister, but he was replaced by Sir Mekere Morauta after a vote of no confidence in 1999. Sir Michael Somare returned as Prime Minister after the 2002 general elections. He led his national alliance party into the 2007 elections and remained as the Prime Minister, becoming the longest-serving parliamentarian in the Commonwealth. Somare celebrated his 40th year in politics on March 16, 2008.

Such reversals of fortune and a revolving-door succession of prime ministers have characterized Papua New Guinea's national politics. From 1988 to 2002, the country had numerous prime ministers. A plethora of political parties, coalition governments, shifting party loyalties, and motions of no confidence in the leadership all lent an air of instability to political proceedings. For the first 27 years of independence, a "first past the post" electoral system resulted in many parliamentarians elected with less than 15% of their constituency. Fractious politics and a 75% loss rate for incumbents precluded the development of strong political parties or a stable national leadership. Many hope that limited preferential voting, introduced in 2003, and an organic law on political parties will stabilize national politics.

In the 2007 elections, 66 members of parliament lost their seats. The government was formed by a coalition of several parties, and Sir Michael Somare, the leader of the National Alliance (and the nation's first Prime Minister in 1975), was elected Prime Minister. His government was the first to complete a 5-year term since independence and hopes to complete a 10-year term.

GOVERNMENT AND POLITICAL CONDITIONS

Papua New Guinea, a constitutional monarchy, recognizes the Queen of England as head of state. She is represented by a Governor General who is elected by parliament and who performs mainly ceremonial functions. Papua New Guinea has three levels of government—national, provincial, and local. There is a 109-member unicameral parliament, whose members are elected every 5 years. The parliament in turn elects the prime minister, who appoints his cabinet from members of his party or coalition. Members of parliament are elected from 19 provinces and the national capital district of Port Moresby. Parliament introduced reforms in June 1995 to change the provincial government system, with regional (at-large) members of parliament becoming provincial governors, while retaining their national seats in parliament.

Papua New Guinea's judiciary is independent of the government. It protects constitutional rights and interprets the laws. There are several levels, culminating in the Supreme Court.

Papua New Guinea's politics are highly competitive with most members elected on a personal and ethnic basis within their constituencies rather than as a result of party affiliation. Members of parliament are now elected in a limited preferential voting (LPV) system. There are several parties, but party allegiances are not strong. Winning candidates are usually courted in efforts to forge the majority needed to form a government, and allegiances are fluid. No single party has yet won enough seats to form a government in its own right.

Papua New Guinea has a history of changes in government coalitions and leadership from within parliament during the 5-year intervals between national elections. New governments are protected by law from votes of no confidence for the first 18 months of their incumbency, and no votes of no confidence may be moved in the 12 months preceding a national election. In an effort to create greater stability by reducing incessant votes of no confidence, the Integrity of Political Parties Act was passed in 1999, forbidding members of each party in parliament from shifting loyalty to another party.

In 2003, the electoral system was changed to limited preferential voting, which has begun to encourage politicians to strike alliances and to be responsive to constituent concerns once elected. The new system was used in the 2007 national general

elections. However, 53 election petitions disputing returns were registered with the courts. Allegations included bribery, intimidation, block voting, and undue influence.

On Bougainville Island, a 10-year rebellion was halted by a truce in 1997 and a permanent cease-fire was signed in April 1998. A peace agreement between the Government and ex-combatants was signed in August 2001. Under the eyes of a regional peace-monitoring force and a UN observer mission, the government and provincial leaders established an interim administration and made significant progress toward complete surrender/destruction of weapons. A constitution was drafted in 2004 and provincial government elections were held in May 2005. The elections were deemed to be free and fair by international observers, and Joseph Kabui was elected to serve as the first president of the Autonomous Bougainville Government (ABG). Bougainvilleans also participated in Papua New Guinea national elections in 2007 to elect representatives to the national parliament. Kabui died of a heart attack in June 2008, and a by-election for the presidency will be held November 28-December 5, 2008. A referendum was tentatively agreed to be held between 2015 and 2020, 10 to 15 years following formation of the ABG. Progress has been slow with the ABG initially focusing on disarmament, peace, and reconciliation. A small percentage of former fighters have created illegal "no go zones," particularly in the Central and South Bougainville.

Principal Government Officials

Last Updated: 11/12/08

Governor General: **Paulius MATANE, Sir**
Prime Minister: **Michael SOMARE, Sir**
Dep. Prime Min.: **Puka TEMU, Dr.**
Min. for Agriculture & Livestock: **John HICKEY**
Min. for Autonomy & Autonomous Regions: **Michael SOMARE, Sir**
Min. for Commerce & Industry: **Gabriel KAPRIS**
Min. for Communication & Information: **Patrick TAMMUR**
Min. for Community Development, Women, Religion, & Sports: **Carol KIDU**
Min. for Conservation & Environment: **Benny ALLAN**
Min. for Correctional Services: **Tony AIMO**
Min. for Culture & Tourism: **Charles ABEL**
Min. for Defense: **Bob DADAE**
Min. for Education: **Michael LAIMO**
Min. of Fisheries: **Ben SEMRI**
Min. for Foreign Affairs, Trade, & Immigration: **Sam ABAL**
Min. for Forestry: **Belden NAMAH**
Min. for Health & HIV/AIDS: **Sasa ZIBE**
Min. for Higher Education, Research, Science, & Technology: **Michael OGIO**
Min. for Housing & Urban Development: **Andrew KUMBAKOR**
Min. for Intergovernment Relations: **Job POMAT**
Min. for Internal Security: **Sani RAMBE**
Min. for Justice: **Allan MARAT**
Min. for Labor & Industrial Relations: **Mark MAIPAKAI**
Min. for Lands, Physical Planning, & Mining: **Puka TEMU, Dr.**
Min. for National Planning & District Development: **Paul TIENSTEN**
Min. for Petroleum & Energy: **William DUMA**
Min. for Public Enterprise: **Arthur SOMARE**
Min. for State Assisting the Prime Min. on Constitutional Matters: **Philemon EMBEL**
Min. for Treasury & Finance: **Patrick PRUAITCH**
Min. for Works, Transport, & Civil Aviation: **Don POYLE**
Attorney General: **Allan MARAT**
Governor, Central Bank: **Wilson KAMIT**
Ambassador to the US: **Evan PAKI**
Permanent Representative to the UN, New York: **Robert AISI**

Papua New Guinea maintains an embassy at 1779 Massachusetts Ave. NW, Washington, DC 20036 (tel. 202-745-3680; fax 202-745-3679). The Papua New Guinea mission to the United Nations is at 801 Second Avenue, New York, NY 10017 (tel. 212-682-6447).

ECONOMY

Papua New Guinea is rich in natural resources, including minerals, timber, and fish, and produces a variety of commercial agricultural products. The economy generally can be separated into subsistence and market sectors, although the distinction is blurred by smallholder cash cropping of coffee, cocoa, and copra. About 75% of the country's population relies primarily on the subsistence economy. The minerals, timber, and fish sectors are dominated by foreign investors.

Manufacturing continued to be slow in 2007. The service industry was stable, while tourism shows potential and remains largely untapped. Generally, economic activity continued to grow in 2007. The growth was boosted by favorable international commodity prices. Employment grew modestly. The financial sector enjoyed high liquidity, with increased lending due to low interest rates. Inflation remained low.

Mineral Resources

Papua New Guinea is richly endowed with gold, copper, oil, natural gas, and other minerals. In 2006 minerals and oil export receipts accounted for 82% of GDP. Government revenues and foreign exchange earnings depend heavily on mineral and oil exports. Indigenous landowners in areas affected by minerals projects also receive royalties from those operations. Copper and gold mines are currently in production at Porgera, Ok Tedi, Misima, and Lihir. A consortium led by Exxon/Mobil hopes to begin the commercialization of the country's estimated 22.5 trillion cubic feet of natural gas reserves through the construction of a liquefied natural gas (LNG) production facility by 2010. Interoil, an American-owned firm, opened Papua New Guinea's first oil refinery in 2004 and is exploring the feasibility of building a liquefied natural gas production facility by 2012 with production capacity of 32,500 barrels of product per day.

Agriculture, Timber, and Fish

Papua New Guinea also produces and exports valuable agricultural, timber, and marine products. Agriculture currently accounts for 13% of GDP and supports more than 75% of the population. Cash crops ranked by

value are coffee, oil, cocoa, copra, tea, rubber, and sugar. About 40% of the country is covered with exploitable trees, but a domestic woodworking industry has been slow to develop. A number of Southeast Asian companies are active in the timber industry, but World Bank and other donors have withdrawn support from the sector over concern for unregulated deforestation and environmental damage. Recently enacted forestry legislation has exacerbated those concerns. Papua New Guinea has an active tuna industry, but much of the catch is made by boats of other nations fishing in Papua New Guinea waters under license. Papua New Guinea is a signatory to the South Pacific Tuna Treaty (SPTT), under which U.S. purse seiners fish for tuna in the exclusive economic zones (EEZs) of the Pacific Island parties. Locally produced fish exports are confined primarily to shrimp.

Industry

In general, the Papua New Guinea economy is highly dependent on imports for manufactured goods. Its industrial sector—exclusive of mining—accounts for only 9% of GDP and contributes little to exports. Small-scale industries produce beer, soap, concrete products, clothing, paper products, matches, ice cream, canned meat, fruit juices, furniture, plywood, and paint. The small domestic market, relatively high wages, and high transport costs are constraints to industrial development.

Trade and Investment

Australia, Singapore, and Japan are the principal exporters to Papua New Guinea. Petroleum and mining machinery and aircraft have been the strongest U.S. exports to Papua New Guinea.

Australia is Papua New Guinea's most important export market, followed by Japan and the European Union. The U.S. imports modest amounts of gold, copper ore, cocoa, coffee, and other agricultural products from Papua New Guinea. Most of those exports take place through third countries.

With the 2003 withdrawal of Chevron/Texaco, Australian companies are the most active in developing Papua New Guinea's mining and petroleum sectors. Exxon/Mobil retains a major share of natural gas reserves and is constructing a liquefied natural gas processing facility. Interoil, an American-owned firm backed by an Overseas Private Investment Corporation (OPIC) loan, operates an oil refinery in Port Moresby and is exploring the feasibility of building a liquefied natural gas processing facility. China is increasing its investment in Papua New Guinea, including development of the $1 billion Ramu nickel mine.

Papua New Guinea became a participating economy in the Asia-Pacific Economic Cooperation (APEC) Forum in 1993. It joined the World Trade Organization (WTO) in 1996. It is an observer at ASEAN and a member of the ASEAN Regional Forum. It has preferential tariff agreements with the markets of Melanesian and Pacific Island neighbors through the Melanesian Spearhead Group (MSG) Trade Agreement and the Pacific Islands Countries Trade Agreement (PICTA).

Development Programs and Aid

Australia is by far the largest bilateral aid donor to Papua New Guinea, offering about $355 million a year in assistance. Budgetary support, which has been provided in decreasing amounts since independence, was phased out in 2000, with aid concentrated on project development. In 2004, Australia and Papua New Guinea embarked on the Enhanced Cooperation Program (ECP), under which Australia agreed to provide direct assistance, including 210 line police officers, to the Papua New Guinea constabulary. The ECP met with initial success, but was abruptly ended when Papua New Guinea's Supreme Court stripped Australian police officers of immunity in May 2005. Virtually all ECP personnel left Papua New Guinea following the court's decision. The governments of Papua New Guinea and Australia are now involved in protracted negotiations on a scaled-down version of the ECP. Other major sources of aid to Papua New Guinea are Japan, the European Union, the People's Republic of China, Taiwan, the United Nations, the Asian Development Bank, the International Monetary Fund, and the World Bank. Volunteers from a number of countries and mission church workers also provide education, health, and development assistance throughout the country. Foreign assistance to Papua New Guinea is approximately $46 per capita. The U.S. funds a $1.5 million-per-year HIV/AIDS project in Papua New Guinea.

Current Economic Conditions

After years of decline and government deficit, Papua New Guinea was bolstered in recent years by a general rise in commodity prices and by government steps toward spending control. The economy continues to grow modestly and the government recorded a modest surplus in 2007. However, the economic improvements are based almost entirely on high commodity prices and the nation continues to have serious problems of corruption, a lack of law and order, land tenure concerns stifling investment, political interference in business, and a lack of political will to adopt needed sweeping reforms.

FOREIGN RELATIONS

Papua New Guinea's foreign policy reflects close ties with Australia and other traditional allies. Papua New Guinea is by far the largest Pacific Island nation and has traditionally viewed itself as part of the Pacific. However, in recent years it has also been cultivating relations with Asian nations. Its views on international political and economic issues are generally moderate. Papua New Guinea has diplomatic relations with 56 countries.

U.S.-PAPUA NEW GUINEA RELATIONS

The United States and Papua New Guinea established diplomatic relations upon the latter's independence on September 16, 1975. The two nations belong to a variety of regional organizations, including the Asia-Pacific Economic Cooperation (APEC) forum; the ASEAN Regional Forum (ARF); the Secretariat of the Pacific Community (SPC); and the South Pacific Regional Environmental Program (SPREP).

One of the most successful cooperative multilateral efforts linking the U.S. and Papua New Guinea is the U.S.-Pacific Islands Multilateral Tuna Fisheries Treaty, under which the U.S. grants $18 million per year to Pacific Island parties and the latter provide access for U.S. fishing vessels. The United States has provided significant humanitarian assistance to Papua New Guinea and contributed to the rehabilitation of Bougainville.

The U.S. Agency for International Development (USAID) funds a $1.5 million-per-year HIV/AIDS project in Papua New Guinea and contributed $150,000 to Oro disaster relief efforts. The Pacific Partnership 2008 mission provided humanitarian assistance in Port Moresby and Oro Province. School and health clinic engineering projects were completed and over 25,000 people received medical care. An ongoing International Military Education and Training (IMET) program and HIV/AIDS training program exists.

The U.S. also supports Papua New Guinea's efforts to protect biodiversity. The U.S. Government supports the International Coral Reef Initiative aimed at protecting reefs in tropical nations such as Papua New Guinea. U.S. military forces, through Pacific Command (PACOM) in Honolulu, Hawaii, provide training to the Papua New Guinea Defense Force (PNGDF) and have held small-scale joint training exercises. The U.S. provides police and other education and training courses to national security officials. The U.S. also annually sponsors a handful of Papua New Guinea officials and private citizens to meet and confer with their professional counterparts and to experience the U.S. firsthand through the International Visitor Leadership Program (IVLP) and workshops sponsored by the United States Patent and Trademark Office (USPTO) and the Asia Pacific Secretariat (APEC).

The U.S. Peace Corps ceased operations in Papua New Guinea in 2001 due to security concerns. About 2,000 U.S. citizens live in Papua New Guinea, with major concentrations at the headquarters of New Tribes Mission and the Summer Institute of Linguistics (SIL), both located in the Eastern Highlands Province.

TRAVEL

Consular Information Sheet

October 17, 2008

Country Description: Papua New Guinea is a developing country in the Southwest Pacific. The capital is Port Moresby. Tourist facilities outside major towns are limited. Crime is a serious concern throughout Papua New Guinea.

Entry Requirements: Travelers must possess a valid passport, onward/return airline ticket, and proof of sufficient funds for the intended visit. Travelers may obtain business or tourist visas (valid for stays of up to 60 days, with extensions available for an additional 30 days) upon arrival at Jacksons International Airport in Port Moresby. All persons boarding international flights originating from Papua New Guinea pay a departure fee, which should be included in airline fares. Travelers may obtain more information on entry and exit requirements from the Embassy of Papua New Guinea, 1615 New Hampshire Avenue NW, Suite 300, Washington, DC 20009, tel. 202-745-3680, fax 202-745-3679, e-mail kunduwash@aol.com, or via the Papua New Guinea Embassy web site at http://www.pngembassy.org.

Travelers who plan to transit or visit Australia must enter with an Australian visa or, if eligible, an Electronic Travel Authority (ETA). The ETA replaces a visa and allows a stay of up to three months. It may be obtained for a small service fee at http://www.eta.immi.gov.au. Airlines and many travel agents in the United States are also able to issue ETA's. Travelers may obtain more information about Australian entry requirements from the Australian Embassy at 1601 Massachusetts Avenue NW, Washington, DC 20036, tel. 202-797-3000, or via the Australian Embassy's web site at http://www.austemb.org.

Safety and Security: For the latest security information, Americans traveling abroad should regularly monitor the Department of State, Bureau of Consular Affairs' web site at http://travel.state.gov, where the current Travel Warnings and Travel Alerts, as well as the Worldwide Caution, can be found.

Civil Unrest/Political Tension: Tension between communal or clan

groups, particularly in the Highlands region, occasionally leads to outbreaks of tribal fighting, often involving the use of firearms. Travelers should consult with their tour operator, the U.S. Embassy in Port Moresby, or with Papua New Guinean authorities before visiting the region.

Visitors intending to travel to the autonomous region of Bougainville Island should contact the U.S. Embassy in Port Moresby for updated security information. Bougainville Island is not peaceful, law enforcement is weak, and tourist and transportation facilities are limited. We advise travelers to Bougainville, as in other parts of Papua New Guinea, to exercise a high degree of caution. Areas near the Panguna mine, located on the southern part of the Island of Bougainville, have been officially designated "no go zones" by the Autonomous Government of Bougainville; Americans should avoid those areas.

Up-to-date information on security can also be obtained by calling 1-888-407-4747 toll free in the U.S., or, for callers outside the U.S. and Canada, a regular toll line at 1-202-501-4444.

Crime: Papua New Guinea has a high crime rate. Numerous U.S. citizen residents and visitors have been victims of violent crime in recent years, and they have sometimes suffered severe injuries. Carjackings, armed robberies, and stoning of vehicles are problems in and around major cities such as Port Moresby, Lae, Mount Hagen, and Goroka, but can happen anywhere. Pickpockets and bag-snatchers frequent crowded public areas. Hiking or other travel in rural areas and visiting isolated public sites such as parks, golf courses, beaches, or cemeteries can be dangerous. Individuals traveling alone are at greater risk for robbery or gang rape than are those who are part of an organized tour or under escort. Visitors to Papua New Guinea should avoid using taxis or buses, known as Public Motor Vehicles (PMV's), and should instead rely on their sponsor or hotel to arrange for taxi service or a rental car.

Road travel outside of major towns can be hazardous because criminals set up roadblocks near bridges, curves in the road, or other features that restrict vehicle speed and mobility. Visitors should consult with the U.S. Embassy or with local law enforcement officials concerning security conditions before driving between towns. (See also Traffic Safety and Road Conditions below). Travel to isolated places in Papua New Guinea is possible primarily by small passenger aircraft; there are many small airstrips throughout the country. Security measures at these airports are rare. Organized tours booked through travel agencies remain the safest means to visit attractions in Papua New Guinea. The Embassy recommends that prospective visitors consult a Primer on Personal Security for Visitors to Papua New Guinea at http://travel.state.gov/travel/cis_pa_tw/cis/cis_1757.html.

Kokoda Track: Americans should exercise a high degree of caution when walking the Kokoda Track and traveling through the areas adjacent to each end of the track. Travelers should travel with guides from a reputable tour company. This is particularly important given occasional threats by villagers to close parts of the track because of local land and compensation disputes. Trekkers should ensure that their tour company provides a permit in return for fees paid for this purpose. The Kokoda Track Authority (KTA) has stationed rangers along the track and at airports to collect fees from trekkers who have not obtained a valid trekking permit. The KTA can be contacted on telephone (675) 325 6165 regarding payment of the applicable fee.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, to contact family members or friends and explain how funds may be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you understand the local criminal justice process and to find an attorney, if needed. The local equivalent to the "911" emergency line in Papua New Guinea is: 000.

Medical Facilities and Health Information: Medical facilities in Papua New Guinea vary from hospitals in Port Moresby and the larger towns to aid posts (including some missionary stations) in remote areas. Medical facilities vary in quality, but those in the larger towns are usually adequate for routine problems and some emergencies. However, equipment failures and sudden shortages of common medications can mean that even routine treatments and procedures (such as X-rays) may become unavailable. A hyperbaric recompression chamber for diving emergencies is available in Port Moresby. Pharmacies in Papua New Guinea are found only in urban centers and at missionary clinics. They are small and may be inadequately stocked. Doctors and hospitals often expect immediate cash payment for medical services.

Medical conditions arising as a result of diving accidents will almost always require medical evacuation to Australia, where more sophisticated facilities are available. Medical evacuation companies could charge thousands of dollars to transport a victim to Australia or the U.S. A last-minute, one-way commercial ticket from Port Moresby to Brisbane or Cairns costs upwards of US$250 for economy class and upwards of US$550 for business class. The most commonly used facilities are in Brisbane and Cairns, both in the Australian State of Queensland. Travelers who anticipate the possible need for medical treatment in Australia should obtain entry permission for Australia in advance. Entry permission for Australia can be granted by the Australian Embassy in Port Moresby, but it is easier to obtain it prior to leaving the United States

(see section above on Entry/Exit Requirements). The U.S. Department of State is unaware of any HIV/AIDS entry restrictions for visitors to or foreign residents of Papua New Guinea. The Government of Papua New Guinea does not currently have any policy guidelines that prevent entry into the country by short- and long-term travelers and/or residents.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control (CDC) and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's web site at http://wwwn.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith/en.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and if it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Papua New Guinea is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

Traffic in Papua New Guinea moves on the left. Travel on highways outside of major towns can be hazardous. Motor vehicle accidents, especially when passengers are sitting in the open bed of a pickup truck, are a common cause of serious injury in Papua New Guinea. Drivers and passengers are advised to wear seatbelts. There is no countrywide road network; roads are generally in poor repair, and flat tires occur routinely as a result of potholes and debris on the roadways. During the rainy season landslides can be a problem on some stretches of the Highlands Highway between Lae and Mount Hagen. Criminal roadblocks have occurred during the day and more widely after dark on the Highlands Highway. Visitors should consult with local authorities or the U.S. Embassy before traveling on the Highlands Highway. Crowds can react emotionally and violently after road accidents. Crowds form quickly after an accident and may attack those whom they hold responsible, stoning and/or burning their vehicles. Friends and relatives of an injured party may demand immediate compensation from the party they hold responsible for injuries, regardless of legal responsibility. Persons involved in accidents usually should proceed directly to the nearest police station rather than stop at the scene of an accident. For specific information concerning Papua New Guinea driving permits, vehicle inspection, road tax and mandatory insurance, please contact Papua New Guinea's Tourist Promotion Authority via the Internet at http://www.pngtourism.org.pg.

Aviation Safety Oversight: As there is no direct commercial air service between the United States and Papua New Guinea, the U.S. Federal Aviation Administration (FAA) has not assessed Papua New Guinea's Civil Aviation Authority for compliance with International Civil Aviation Organization (ICAO) aviation safety standards. For further information, travelers may visit the FAA's web site at http://www.faa.gov.

Special Circumstances: Papua New Guinean and Australian customs authorities enforce strict regulations concerning temporary importation into or export from Papua New Guinea and Australia of items such as firearms, certain prescription drugs, wooden artifacts, exotic animals, food, and sexually explicit material. Other products may be subject to quarantine. It is advisable to contact the Embassies of Papua New Guinea and Australia in Washington, D.C. for specific information regarding each country's customs requirements. (See the contact information in the section on Entry/Exit Requirements above.)

Natural Disasters: Papua New Guinea is prone to earthquakes, volcanic eruptions, and sudden tidal movements. There are numerous active volcanoes throughout Papua New Guinea. General information about natural disaster preparedness is available via the Internet from the U.S. Federal Emergency Management Agency (FEMA) at http://www.fema.gov.

Documentation: U.S. citizens are encouraged to carry a copy of their U.S. passports with them at all times, so that if questioned by local officials, proof of identity and U.S. citizenship is readily available.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offences. Persons violating Papua New Guinea's laws, even unknowingly, may be expelled, arrested, or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Papua New Guinea are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States. Homosexual activity is illegal in Papua New Guinea.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy and Consulate Locations: Americans living or traveling in Papua New Guinea are encouraged to register with the nearest U.S. Embassy or Consulate through the State Depart-

ment's travel registration web site, and to obtain updated information on travel and security within Papua New Guinea. Americans without Internet access may register directly at the Consular Section of the U.S. Embassy in Port Moresby and obtain updated information on travel and security within Papua New Guinea. The U.S. Embassy is located on Douglas Street, adjacent to the Bank of Papua New Guinea, in Port Moresby, Papua New Guinea. That address should be used for courier deliveries. The mailing address is P.O. Box 1492, Port Moresby, NCD 121, Papua New Guinea. The Embassy's telephone number is (675) 321-1455; the after hour's duty officer telephone number is (675) 601-9689); fax (675) 321-1593. Americans may submit consular inquiries by e-mail to ConsularPortMoresby@state.gov.

Intercountry Adoption

July 2007

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please review current reports online at http://adoption.state.gov.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is based on public sources and current understanding. Questions involving foreign and U.S. immigration laws and legal interpretation should be addressed respectively to qualified foreign or U.S. legal counsel.

Please Note: Papua New Guinea is not a party to the Hague Convention on Protection of Children and Cooperation in respect of Intercountry Adoption. Papua New Guinea permits intercountry adoptions.

Patterns of Immigration: Recent U.S. immigrant visa statistics indicate only one immigrant visa has been issued to a Papua New Guinean orphan in the last five fiscal years.

Adoption Authority: The central authority responsible for adoptions in Papua New Guinea is the Office of Child Welfare in the Department for Community Development.

Office of Child Welfare,
Department for Community Development
Sanbra Haus
P.O. Box 7354
Boroko, NCD
Papua New Guinea
Tel: 675-325-9893

Eligibility Requirements for Adoptive Parents: The Government of Papua New Guinea requires no age limit for adoptive parents if they are healthy, fit, and capable of caring for the child. However, they must be legally married and financially stable.

Residency Requirements: There is a minimum six-month period of residency required for adoptive parents, but they need not be permanent residents.

Time Frame: It takes approximately nine months from the time a child is matched with a family for adoption until the adoption is finalized.

Adoption Agencies and Attorneys: There are no adoption agencies in Papua New Guinea. The Office of Child Welfare in the Department for Community Development and its Director assists in adoptions.

Adoption Fees: There are no government charges for adoptions of Papua New Guinean children. Attorneys' fees vary and it is advisable to contact an attorney to obtain accurate fee information.

Adoption Procedures: There is no application form for an adoption. The prospective adoptive parents must write a letter stating their intentions to adopt and address it to the Director of Child Welfare, Department for Community Development at Sanbra Haus, P.O. Box 7354, Boroko, NCD, Papua New Guinea.

Required Documents:

- Birth certificate
- Medical reports
- Bank Statements
- Marriage certificate, and
- Family photos

Embassy of Papua New Guinea
1779 Massachusetts Avenue, NW
Suite 805
Washington, DC 20036
Phone: (202) 745-3680
Fax: (202) 745-3679
E-mail: info@pngembassy.org
Internet address:
http://www.pngembassy.org

U.S. Immigration Requirements: Prospective adoptive parents are strongly encouraged to consult USCIS publication M-249, *The Immigration of Adopted and Prospective Adoptive Children*, as well as the Department of State publication, *Intercountry Adoptions*. Please see the *Intercountry Adoption* section of this book for more details and review current reports online at http://adoption.state.gov.

U.S. Embassy—Port Moresby
P.O. Box 1492
Port Moresby, N.C.D. 121
Papua New Guinea
Tel: +(675) 321-1455
Fax: +(675) 320-0637
E-mail: png@state.gov
Internet:
http://portmoresby.usembassy.gov

Additional Information: Specific questions about adoption in Papua New Guinea may be addressed to the U.S. Embassy in Port Moresby. General questions regarding intercountry adoption may be addressed to the Office of Children's Issues, U.S. Department of State, CA/OCS/CI, SA-29, 4th Floor, 2201 C Street, NW, Washington, D.C. 20520-4818, toll-free Tel: 1-888-407-4747.

PARAGUAY

Compiled from the June 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Republic of Paraguay

PROFILE

Geography

Area: 406,752 sq. km. (157,047 sq. mi.); about the size of California.
Cities: Capital—Asuncion (pop. 539,000). Other cities—Ciudad del Este, Concepción, Encarnación, Pedro Juan Caballero, Coronel Oviedo.
Terrain: East of the Paraguay River—grassy plains, wooded hills, tropical forests; west of the Paraguay River (Chaco region)—low, flat, marshy plain.
Climate: Temperate east of the Paraguay River, semiarid to the west.

People

Nationality: Noun and adjective—Paraguayan(s).
Population: (2006 est.) 6,506,464.
Annual population growth rate: 2.45% (2006 est.).
Ethnic groups: Mixed Spanish and Indian descent (mestizo) 95%.
Religions: Roman Catholic 90%; Mennonite and other Protestant denominations.
Languages: Spanish (language of business and government), Guarani (spoken and understood by 90% of the population).
Education: Years compulsory—9. Attendance—92%. Literacy—94%. (UNICEF)
Health: Infant mortality rate—29/1,000. Life expectancy—69 years male; 73 years female. (Population Reference Bureau)
Work force: (2002, 2.5 million) Agriculture—45%; industry and commerce—31%; services—19%; government—4%.

Government

Type: Constitutional Republic.
Independence: May 1811.
Constitution: June 1992.
Government branches: Executive—President. Legislative—Senate and Chamber of Deputies. Judicial—Supreme Court of Justice.
Political subdivisions: 17 departments, 1 capital city.
Political parties: National Republican Association/Colorado Party (ANR), Authentic Radical Liberal Party (PLRA), Beloved Fatherland (PQ), National Union of Ethical Citizens (UNACE), National Encounter Party (PEN), The Country in Solidarity Party (PPS), and numerous small parties not represented in Congress.
Suffrage: 18 years of age; universal and compulsory by law up to age 75.

Economy

(Source: Central Bank of Paraguay and the IMF)
GDP: (2007) $12.8 billion.
Annual growth rate: (2007) 6.4%.
Per capita GDP: (2007) $1,928.
Natural resources: Hydropower, timber, iron ore, manganese, limestone.
Agriculture: (21.9% of GDP): Products—soybeans, cotton, beef, pork, cereals, sugarcane, cassava, fruits, vegetables. Arable land—9 million hectares, of which 35% is in production.
Manufacturing and construction: (18.7% of GDP): Types—sugar, cement, textiles, beverages, wood products.
Trade: (2007) Exports—$6.898 billion: soybeans and soy-related products, cereals, beef, wood, leather, cotton, sugar, apparel, tobacco. Major markets—Uruguay (22.0%), Brazil (17.2%), Russia (11.9%); the United States in 7th place with 3.3%. Imports—$7.012 billion: machinery and mechanical appliances; electrical machinery, equipment, and materials; mineral fuels and lubricants; motor vehicles, tractors, parts and accessories; plastics and articles thereof; fertilizers; beverages and tobacco; toys, games, and sporting equipment; chemical products; rubber and articles thereof; paper, paperboard and articles thereof. Major suppliers—China (27.0%), Brazil (20.0%), Argentina (13.6%), Japan (8.3%), and U.S. (6.3%).

PEOPLE

Paraguay's population is distributed unevenly throughout the country. The vast majority of the people live in the eastern region, most within 160 kilometers (100 mi.) of Asuncion, the capital and largest city. The Chaco, which accounts for about 60% of the territory, is home to less than 2% of the population. Ethnically, culturally, and socially, Paraguay has one of the most homogeneous populations in South America. About 95% of the people are of mixed Spanish and Guarani Indian descent. Little trace is left of the original Guarani culture except the language, which is understood by 90% of the population. About 75% of all Paraguayans speak Spanish. Guarani and Spanish are official languages. Brazilians, Argentines, Germans, Arabs, Koreans, Chinese, and Japanese are among those who have settled in Paraguay with Brazilians representing the largest number.

HISTORY

Pre-Columbian civilization in the fertile, wooded region that is now Paraguay consisted of numerous seminomadic, Guarani-speaking tribes, who were recognized for their fierce warrior traditions. They practiced a mythical polytheistic religion, which later blended with Christianity. Spanish explorer Juan de Salazar founded Asuncion on the Feast Day of the Assumption, August 15, 1537. The city eventually became the center of a Spanish colonial province. Paraguay declared its independence by overthrowing the local Spanish authorities in May 1811.

The country's formative years saw three strong leaders who established the tradition of personal rule that lasted until 1989: Jose Gaspar Rodriguez de Francia, Carlos Antonio Lopez, and his son, Francisco Solano Lopez. The younger Lopez waged a war against Argentina, Uruguay, and Brazil (War of the Triple Alliance, 1864-70) in which Paraguay lost half its population; afterward, Brazilian troops occupied the country until 1874. A succession of presidents governed Paraguay under the banner of the Colorado Party from 1880 until 1904, when the Liberal party seized control, ruling with only a brief interruption until 1940.

In the 1930s and 1940s, Paraguayan politics were defined by the Chaco war against Bolivia, a civil war, dictatorships, and periods of extreme political instability. Gen. Alfredo Stroessner took power in May 1954. Elected to complete the unexpired term of his predecessor, he was reelected president seven times, ruling almost continuously under the state-of-siege provision of the constitution with support from the military and the Colorado Party. During Stroessner's 35-year reign, political freedoms were severely limited, and opponents of the regime were systematically harassed and persecuted in the name of national security and anticommunism. Though a 1967 constitution gave dubious legitimacy to Stroessner's control, Paraguay became progressively isolated from the world community.

On February 3, 1989, Stroessner was overthrown in a military coup headed by Gen. Andres Rodriguez. Rodriguez, as the Colorado Party candidate, easily won the presidency in elections held that May, and the Colorado Party dominated the Congress. In 1991 municipal elections, however, opposition candidates won several major urban centers, including Asuncion. As president, Rodriguez instituted political, legal, and economic reforms and initiated a rapprochement with the international community.

The June 1992 constitution established a democratic system of government and dramatically improved protection of fundamental rights. In May 1993, Colorado Party candidate Juan Carlos Wasmosy was elected as Paraguay's first civilian president in almost 40 years in what international observers deemed fair and free elections. The newly elected majority-opposition Congress quickly demonstrated its independence from the executive by rescinding legislation passed by the previous Colorado-dominated Congress. With support from the United States, the Organization of American States, and other countries in the region, the Paraguayan people rejected an April 1996 attempt by then-Army Chief Gen. Lino Oviedo to oust President Wasmosy, taking an important step to strengthen democracy.

Oviedo became the Colorado candidate for president in the 1998 election, but when the Supreme Court upheld in April his conviction on charges related to the 1996 coup attempt, he was not allowed to run and remained in confinement. His running mate, Raul Cubas Grau, became the Colorado Party's candidate and was elected in May. The assassination of Vice-President Luis Maria Argana and the killing of eight student anti-government demonstrators, allegedly carried out by Oviedo supporters, led to Cubas' resignation in March 1999. The President of the Senate, Luis Gonzalez Macchi, assumed the presidency and completed Cubas' term. Gonzalez Macchi offered cabinet positions in his government to senior representatives of all three political parties in an attempt to create a coalition government that proved short-lived. Gonzalez Macchi's government suffered many allegations of corruption, and Gonzalez himself was found not guilty in a Senate impeachment trial involving corruption and mismanagement charges in February 2003.

In April 2003, Colorado candidate Nicanor Duarte Frutos was elected president. He was inaugurated on August 15. Duarte's administration has established a mixed record on attacking corruption and improving the quality of management. In his first year, Duarte worked constructively with an opposition-controlled Congress, removing six Supreme Court justices suspected of corruption from office and enacting major tax reforms. While Duarte remains the most dominant political figure, he faced stiff opposition mid-term from the opposition strongly opposed to his efforts to amend the Constitution to allow him to run for reelection. Macroeconomic performance has improved significantly under the Duarte administration, with inflation

falling significantly, and the government clearing its arrears with international creditors. Unemployment remains stubbornly high and the living standard of most households has not improved. The administration has placed a strong emphasis on participating in international institutions and has used diplomacy to promote the opening of international markets to Paraguayan products. In June 2004, Oviedo returned to Paraguay from exile in Brazil and was imprisoned for his 1996 coup-plotting conviction. In November 2007, Oviedo's criminal charges were overturned by the Supreme Court, and he was allowed to participate in the April 2008 presidential elections.

On April 20, 2008, former Roman Catholic bishop Fernando Lugo (representing a coalition of opposition parties) was elected President. According to the National Election Tribunal (TSJE), Lugo won 40.8% of the vote. Colorado candidate Blanca Ovelar came in second with 30.6% of the vote, and UNACE's Lino Oviedo came in third with 21.9% of the vote. President-elect Lugo will assume office on August 15, 2008. Lugo has identified reduction of corruption and economic inequality as two of his priorities.

GOVERNMENT AND POLITICAL CONDITIONS

Paraguay's highly centralized government was fundamentally changed by the 1992 constitution, which provides for a division of powers. The president, popularly elected for a 5-year term, appoints a cabinet. The bicameral Congress consists of an 80-member Chamber of Deputies and a 45-member Senate, elected concurrently with the president through a proportional representation system. Deputies are elected by department and senators are elected nationwide. Paraguay's highest judicial body is the Supreme Court. A popularly elected governor heads each of Paraguay's 17 departments.

Principal Government Officials

Last Updated: 11/12/08

Pres.: **Fernando Armindo LUGO Mendez**
Vice Pres.: **Federico FRANCO**
Min. of Agriculture & Livestock: **Candido VERA Bejarano**
Min. of Communications: **Augusto DOS SANTOS**
Min. of Education & Culture: **Horacio GALEANO Perrone**
Min. of Emergency Preparedness: **Camilo SOARES Machado**
Min. of Finance: **Dionisio BORDA**
Min. of Foreign Affairs: **Alejandro HAMED Franco**
Min. of Industry & Commerce: **Martin HEISECKE**
Min. of Interior: **Rafael FILIZZOLA**
Min. of Justice & Labor: **Blas LLANO**
Min. of National Defense: **Luis BAREIRO Spaini**
Min. of the Presidency: **Miguel LOPEZ Perito**
Min. of Public Health & Social Welfare: **Esperanza MARTINEZ**
Min. of Public Works: **Efrain ALEGRE**
Presidential Security Adviser:
Governor, Central Bank: **Jorge CORVALAN**
Ambassador to the US: **James SPALDING**
Permanent Representative to the UN, New York:

Paraguay maintains an embassy in the United States at 2400 Massachusetts Avenue, NW, Washington, DC 20008 (tel. 202-483-6960). Consulates are in Miami, New York, and Los Angeles.

ECONOMY

Paraguay has a predominantly agricultural economy, with a struggling commercial sector. There is a large subsistence sector, including sizable urban unemployment and underemployment, and a large underground re-export sector. The country has vast hydroelectric resources, including the world's largest hydroelectric generation facility built and operated jointly with Brazil (Itaipú Dam), but it lacks significant mineral or petroleum resources.

The government welcomes foreign investment in principle and accords national treatment to foreign investors, but widespread corruption is a deterrent. The economy is dependent on exports of soybeans, cotton, grains, cattle, timber, and sugar; electricity generation, and to a decreasing degree on re-exporting to Brazil and Argentina products made elsewhere. It is, therefore, vulnerable to the vagaries of weather and to the fortunes of the Argentine and Brazilian economies.

Paraguay's real GDP in 2007 of $12.8 billion (in 2000 dollars) represented an increase of 30.6% from $9.8 billion in 2006. The per capita GDP rose to $1,928 in current U.S. dollar terms in 2007, up from $1,546 in 2006, and surpassing the peak of $1,793 in 1996. Given the importance of the informal sector, accurate economic measures are difficult to obtain. In 2007, Paraguay had a current account deficit of $73 million, derived from a small deficit in the trade of goods, but accompanied by a significant increase in agriculture exports and services (electricity), reflecting favorable market prices for agricultural commodities and exports of electricity from the hydroelectric dams. In 2007, official foreign exchange reserves rose to $2.4 billion, an increase of 41% over 2006, and over four times the figure for 2002 ($582.8 million). Foreign official debt fell slightly from $2.2 billion in 2006 to $2.1 billion in 2007. Inflation in 2007 was 6.0%, down from 12.5% in 2006, and 9.9% in 2005.

Agriculture and Commerce

Agricultural activities, most of which are for export, represent about 21.9% of GDP and employ just under half of the workforce. More than 250,000 families depend on subsistence farming activities and maintain marginal ties to the larger productive sector of the economy. In addition to the commercial sector with retail, banking, and professional services, there is significant activity involving the import of goods from Asia and the United States for re-export to neighboring countries.

The underground economy, which is not included in the national accounts, may equal the formal economy in size, although greater enforcement efforts by the tax administration and customs are having an impact on the informal sector.

DEFENSE

The constitution designates the president as commander in chief of the armed forces. Military service is compulsory, and all 18-year-old males—and 17 year olds in the year of their 18th birthday—are eligible to serve for one year on active duty. However, the 1992 constitution allows for conscientious objection. Of the three services, the army has the majority of personnel, resources, and influence. With about 7,000 personnel, it is organized into three corps, with six infantry divisions and three cavalry divisions.

The military has two primary functions: national defense (including internal order) and engaging in civic action programs as directed by the president.

The navy consists of approximately 2,000 personnel and in addition to its fleet, has an aviation section, a prefecture (river police), and a contin-

gent of marines (naval infantry). The air force, the smallest of the services, has approximately 1,200 personnel.

FOREIGN RELATIONS

Paraguay is a member of the United Nations and several of its specialized agencies. It also belongs to the Organization of American States, the Latin American Integration Association (ALADI), the Rio Group, INTERPOL, and MERCOSUR (the Southern Cone Common Market). Paraguay is closely aligned with its MERCOSUR partners on many political, economic, and social issues. It is the only country in South America that recognizes Taiwan and not the People's Republic of China.

U.S.-PARAGUAY RELATIONS

U.S. Interests in Paraguay

The United States and Paraguay have an extensive relationship at the government, business, and personal level. Paraguay is a partner in hemispheric initiatives to improve counternarcotics cooperation, combat money laundering, trafficking in persons, and other illicit cross-border activities, and adequately protect intellectual property rights. The United States looks to Paraguay, which has tropical forest and riverine resources, to engage in hemispheric efforts to ensure sustainable development. The United States and Paraguay also cooperate in a variety of international organizations.

Paraguay has taken significant steps to combat terrorism-financing activity in the tri-border area it shares with Argentina and Brazil. It participates in antiterrorism programs and fora, including the Three Plus One Security Dialogue, with its neighbors and the United States. The United States strongly supports consolidation of Paraguay's democracy and continued economic reform, the cornerstones of cooperation among countries in the hemisphere. The United States has played important roles in defending Paraguay's democratic institutions, in helping resolve the April 1996 crisis, and in ensuring that the March 1999 change of government took place without further bloodshed.

Bilateral trade with the United States has increased over the last 6 years, after a steady decline over several years due to a long-term recession of the Paraguayan economy. Although U.S. imports from Paraguay were only $68 million in 2007, up from $58 million in 2006, U.S. exports to Paraguay in 2007 were $1.2 billion, up from $910 million in 2006, according to U.S. Customs data. (Not all exports and imports are reflected in Paraguayan government data.) More than a dozen U.S. multinational firms have subsidiaries in Paraguay. These include firms in the computer, agro-industrial, telecom, banking, and other service industries. Some 75 U.S. businesses have agents or representatives in Paraguay, and more than 3,000 U.S. citizens reside in the country.

U.S. Assistance

The U.S. Government has assisted Paraguayan development since 1942. In 2006, Paraguay signed a $34.9 million Millennium Challenge Corporation's (MCC) Threshold Country Program (TCP) with the U.S. focused on supporting Paraguay's effort to combat impunity and informality. Also in 2006, Paraguay signed and ratified an agreement with the U.S. under the Tropical Forest Conservation Act that provides Paraguay with $7.4 million in relief and zeroing out its remaining bilateral debt in exchange for the Paraguayan Government's commitment to conserve and restore tropical forests in the southeastern region of the country. Separately, the U.S. Agency for International Development (USAID) supports a variety of programs to strengthen Paraguay's democratic institutions in the areas of civil society, local government and decentralization, national reform of the state, rule-of-law, and anti-corruption. Other important areas of intervention are economic growth, the environment and public health. The total amount of the program was approximately $10 million in fiscal year 2006. The U.S. Department of State, the Drug Enforcement Administration, the Department of Justice and the Department of Treasury provide technical assistance, equipment, and training to strengthen counter narcotics enforcement, combat trafficking in persons, promote respect for intellectual property rights, and to assist in the development and implementation of money laundering legislation and counter terrorism legislation.

- On December 19, 2003, U.S. and Paraguayan officials signed a new Memorandum of Understanding to strengthen the legal protection and enforcement of intellectual property rights in Paraguay. The MOU was extended in 2006 through the end of 2007.

- Since 2003 the U.S. Government has had a Resident Justice Advisor in Paraguay to support efforts to combat money laundering and terrorist financing and other financial crimes as well as organized crime and corruption.

- Starting in 2004, a Resident Public Debt Advisor, a Resident Budget Advisor, and a Resident Tax Advisor from the Department of Treasury have been working with Paraguayan counterparts to implement essential reforms.

The U.S. Department of Defense (D0D) provides technical assistance and training to help modernize and professionalize the military, including by promoting respect for human rights and obedience to democratically elected civilian authorities. DOD also provides assistance to impoverished communities through its Humanitarian Assistance Program.

The Peace Corps has about 160 volunteers working throughout Paraguay on projects ranging from agriculture and natural resources to education, rural health, and urban youth development. 2007 marked the

40th anniversary of the Peace Corps in Paraguay. The Office of Public Diplomacy also is active in Paraguay, funding Fulbright and other scholarships to the U.S., U.S. scholars to Paraguay, other short- and long-term exchanges, English scholarship programs, donations of books and equipment, and a cultural preservation project to restore Paraguay's National Library.

TRAVEL

Consular Information Sheet

September 15, 2008

Country Description: Paraguay is a constitutional democracy with a developing economy. Tourist facilities are adequate in the capital city of Asuncion, but they vary greatly in quality and prices. Travelers outside Asuncion should consider seeking travel agency assistance, as satisfactory or adequate tourist facilities are very limited in other major cities and almost nonexistent in remote areas.

Entry Requirements: A passport and visa are required. U.S. citizens traveling to Paraguay must submit completed visa applications in person or by secure messenger to the Paraguayan Embassy or one of the consulates and pay a fee. Paraguay issues visas for one-entry or multiple entries up to the validity of the U.S. passport. Applicants under 18 years of age traveling alone must appear with both of their parents or a legal guardian. In case of a guardian, an original and one copy of proof of legal guardianship are required. A document of authorization from parents/guardian will be accepted only if it is notarized and certified by the county clerk. Travelers entering or departing

Paraguay with regular U.S. passports will be fingerprinted. Some airlines include the Paraguayan airport departure tax in the price of the airline ticket. It is recommended that you check with the airline in order to determine whether or not the departure tax has been included. If the tax is not included in the airline ticket then payment would be required upon departure in either U.S. or local currency (no credit cards or checks accepted). Visit the Embassy of Paraguay web site at http://www.embaparusa.gov.py for the most current visa information.

Safety and Security: As stated in the Department of State's latest Worldwide Caution, U.S. citizens overseas may be targeted by extremist groups and should maintain a high level of vigilance. The U.S. Embassy is not aware of any specific terrorist threat to Americans in Paraguay. Individuals and organizations providing financial support to extremist groups operate in Ciudad del Este and along the tri-border area between Paraguay, Brazil and Argentina. Small armed groups have also been reported to be operating in the San Pedro and Concepcion Departments. Drug trafficking remains a serious concern in the Department of Amambay. Because of concerns about the lack of security in border areas, the U.S. Embassy in Asuncion requires U.S. Government personnel and their family members to provide advance notice and a travel itinerary when traveling to Ciudad del Este or Pedro Juan Caballero. As a general precaution, the Embassy also counsels its employees traveling outside the capital to provide an itinerary including dates, contact names, and telephone numbers where the employee may be reached.

Since January 2007, there have been numerous kidnapping incidents mainly in the Alto Parana department. Targets have been members of the Paraguayan business community or their family members. It is believed that the individuals responsible for the kidnappings are financially motivated and have preselected their targets based on the victims' wealth.

U.S. citizens should avoid large gatherings or any other event where crowds have congregated to demonstrate or protest. Such activities have resulted in intermittent road closures including major routes traveled by tourists and residents. While generally nonviolent, demonstrations and/

or roadblocks have turned violent in the past. Areas where such closures and barricades exist should be avoided. U.S. citizens who encounter demonstrations and/or roadblocks should not attempt to continue the planned travel or to confront those at the roadblock. Instead, they should avoid areas where individuals are demonstrating and in case of roadblock, wait for the road to reopen or return to the origin of their trip. Uniformed police often conduct roving checks of vehicles and passengers.

For the latest security information, Americans traveling abroad should regularly monitor the Department of State, Bureau of Consular Affairs' web site, wherethe current Travel Warnings and Public Announcements including the Worldwide Caution Public Announcement, can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S. and Canada, or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: Crime has increased in recent years with criminals often targeting those thought to be wealthy. Although most crime is nonviolent, there has been an increase in the use of weapons and there have been incidents where extreme violence has been used. U.S. citizens have on occasion been the victims of assaults, kidnappings, robberies, and rapes.

Local authorities frequently lack the training and resources to solve these cases. Under these circumstances, U.S. citizens traveling to or residing in Paraguay should be aware of their surroundings and security at all times. They should take common sense precautions including refraining from displaying expensive-looking cameras and jewelry, large amounts of money, or other valuable items. Resistance to armed assailants has often aggravated the situation and therefore is not advised.

Armed robbery, carjackings, car theft, and home invasions are a problem in both urban and rural areas. Street crime, including pick pocketing and mugging, is prevalent in cities. The number of pick pocketing incidents and armed assaults is also increasing on public buses and in the downtown area of Asunción. As many incidents on public buses involve individuals snatching valuables, passengers should not wear expensive-looking jewelry or display other flashy items. There have been incidents of pilferage from checked baggage at both airports and bus terminals.

Travelers have found it prudent to hide valuables on their person or in carry-on luggage. Unauthorized ticket vendors also reportedly operate at the Asuncion bus terminal, badgering travelers into buying tickets for substandard or non-existent services.

In many countries around the world, counterfeit and pirated goods are widely available. Transactions involving such products may be illegal under local law. In addition, bringing them back to the United States may result in forfeitures and/or fines. More information on this serious problem is available at http://www.cybercrime.gov/18usc2320.htm.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

In Asuncion, the following phone numbers exist for roadside/ambulance assistance: Emergency Services, including police and ambulances: 911. Fire Department, including rescue of accident victims: 131, 132.

Medical Facilities and Health Information: Adequate medical facilities, prescription and over-the-counter medicine, supplies, and services are available only in Asuncion. Elsewhere, these are limited and may not exist. Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's Internet web site at http://wwwn.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith/en. The U.S. Department of State is unaware of any HIV/AIDS entry restrictions for visitors to Paraguay or foreign residents of the country.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Paraguay is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

U.S. citizens have been injured and killed in traffic accidents. Only minimal standards must be met to obtain a Paraguayan driver's license, and driver education prior to licensing is not common. Drivers throughout Paraguay routinely ignore traffic regulations. No vehicle insurance is required, and many Paraguayans drive without any insurance coverage. Persons who drive in Paraguay should be prepared to drive defensively and with their own insurance in both urban and rural areas.

Public transportation is readily available for urban and inter-city travel. Buses vary in maintenance conditions and may not meet U.S. safety standards. Armed robberies and pick pocketing occur on buses in cities and rural areas, sometimes with the apparent collusion of the bus driver. Taxis are available and may be called using telephone numbers listed in the newspapers. No passenger train service exists. Bicycle travel may not be safe due to traffic and other road hazards.

Most urban streets consist of cobblestones over dirt. Some roads in Asuncion and other large cities are paved. However, these roads frequently develop potholes that often remain unrepaired. Nearly all rural roads are unpaved, and during rainy periods and the rainy season (November-March/April), they may be impassable. Road signs indicating hazards, such as sharp curves or major intersections, are lacking in many areas.

Driving or traveling at night is not advisable outside Asuncion because pedestrians, animals, or vehicles without proper lights are often on the roads. In addition, assaults and other crimes against motorists traveling at night have occurred. Extra precautions should be exercised along infrequently traveled portions of the rural roads.

Intercity highway maintenance is not equal to U.S. standards. The privately maintained toll road between Caaguazu and Ciudad del Este and the routes between Asuncion and Encarnacion and Asuncion and Pedro Juan Caballero are in good condition. Most other intercity routes are in good to fair condition, with brief stretches in poor condition. The Trans-Chaco route is in fair condition except for the portion between Mariscal Estigarribia and the Bolivian border, which is unpaved and at times impassable.

The Touring and Automobile Club provides some roadside assistance to its members. The Club may be contacted in Asuncion by visiting its offices at 25 de Mayo near Brazil, First Floor, or telephoning 210-550, 210-551, 210-552, 210-553, Monday through Friday from 8:00 a.m. to 5:00 p.m., or Saturday from 8:00 a.m. to noon, except for Paraguayan holidays. The Touring Club also has offices in Ciudad del Este (tel. 061-512-340), Coronel Oviedo (tel. 0521-203-350), Encarnación (tel. 071-202-203), San Ignacio Misiones (tel. 082-232-080), Caaguazu Campo 9 (tel. 0528-222-211), Santani (tel. 043-20-314), Pozo Colorado (cell phone. 0981-939-611, Villa Florida (tel. 083-240-205) and Ybyyau (tel. 039-210-206). Towing services are scarce outside urban areas. Twenty-four-hour tow truck services from Asuncion may be contacted by telephoning (021) 224-366, (021) 208-400, (cellular service provider) Tigo by dialing *822 or 0971-951-930. For an extra fee, these companies may provide service outside Asuncion, but they typically demand immediate payment and may not accept credit cards.

Visit the web site of Paraguay's national tourist office and national authority responsible for road safety at www.senatur.gov.py and http://www.mopc.gov.py.

Aviation Safety Oversight: The U.S. Federal Aviation Administration (FAA) has assessed the Government of Paraguay's Civil Aviation Authority as not being in compliance with International Civil Aviation Organization (ICAO) aviation safety standards for the oversight of Paraguay's air carrier operations. For more information, travelers may visit the FAA's Internet web site at http://www.faa.gov.

Special Circumstances: Paraguay's customs authority may enforce strict regulations concerning temporary importation into or export from Paraguay of items such as firearms, medications, toys resembling weapons, or protected species. It is advisable to contact the Paraguayan Embassy in Washington, D.C., or one of Paraguay's consulates in the United States for specific information regarding customs requirements.

Paraguay does not recognize dual Paraguayan nationality for American citizens. Under Article 150 of the Paraguayan Constitution, naturalized Paraguayans lose their nationality by virtue of a court ruling based on unjustified absence from the Republic for more than three years, or by voluntary adoption of another nationality.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating Paraguay's laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Paraguay are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in Paraguay are encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration web site so that they can obtain updated information on travel and security within Paraguay. Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate.

By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency. The U.S. Embassy is located at 1776 Mariscal Lopez Avenue; telephone (011-595-21) 213-715, fax (011-595-21) 213-728; Internet: http://paraguay.usembassy.gov, email: paraguayusembassy@state.gov. The Consular Section is open for

U.S. citizen services, including registration, Monday through Thursday from 1:00 p.m. to 4:30 p.m. and Fridays from 7:30 a.m. to 10:30 a.m., except for U.S. and Paraguayan holidays; telephone (011-595-21) 213-715, fax (011-595-21) 228-603.

Intercountry Adoption

August 2007

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is based on public sources and current understanding. Questions involving foreign and U.S. immigration laws and legal interpretation should be addressed respectively to qualified foreign or U.S. legal counsel.

Please Note: Presently, intercountry adoptions are not allowed in Paraguay. Paraguayan law gives preference in adoption to Paraguayan citizens and legal permanent residents of Paraguay, and prospective adoptive parents must reside in Paraguay.

Paraguyan government officials have to told the U.S. Embassy in Paraguay that should intercountry adoptions be permitted in the future, the government will only allow adoptions by citizens of countries that have ratified the Hague Convention on Intercountry Adoption (the Convention) and signed an agreement with the central governmental authority overseeing adoptions.

Patterns of Immigration: Please review current reports online at http://adoption.state.gov.

Adoption Authority: The Parguayan adoption authority is the Centro de Adopciones (Adoption Center), which is under the authority of the National Secretariat of Childhood and Adolescence. Inquiries should be made in Spanish.

Address: Avenida Mariscal Lopez 1549 c/Pitiantuta, Asunción.
Phone: 595-21-207-160
Hours: Monday through Friday from 7 a.m. to 1 p.m.

Eligibility Requirements for Adoptive Parents: The Paraguayan government restricts adoptions to couples who have been married for at least three years, male/female couples who have lived together for more than four years, or single women. Married couples are given preference, and single men cannot adopt. Adoptive parents must be between the ages of 25 and 50. Persons with infectious contagious diseases or mental illnesses are not eligible to adopt.

Residency Requirements: The government of Paraguay requires that adoptive parents must be Paraguayan citizens or legal permanent residents of Paraguay and must reside in Paraguay.

Time Frame: Total time to complete an adoption in Paraguay ranges from nine months to two years from the time the child is declared eligible for adoption to completion of the process. The child may be placed in the custody of the prospective adoptive parents pending the completion of the adoption.

Adoption Agencies and Attorneys: All adoptions must be processed through the Adoption Center, the contact information for which is listed above.

Adoption Fees: The Adoption Center does not charge a fee. Attorneys assisting adopting parents set their own fees, which vary greatly.

Adoption Procedures: No intercountry adoptions are permitted in Paraguay at this time. However, persons who meet the eligibility requirements listed above and who are interested in adopting a Paraguayan child must file an application form at the Adoption Center and provide the required documentation.

After a review of their application and completion of a home study, the names of individuals approved to adopt are placed on a list of available parents. When a child is abandoned or becomes an orphan, the Adoption Center is notified and must first attempt to find a relative to care for the child.

If no relative can be found, the child remains under the authority of the Adoption Center until a judicial declaration is made that the child is adoptable.

At that time, the court will usually release the child into the custody of the prospective adoptive parents. A child is assigned to prospective parents based on the Adoption Center's judgment of the best interests of the child.

Documents Required for Adoption in Paraguay:

- Prospective adoptive parent's proof of Paraguayan citizenship or legal permanent residence in Paraguay
- A copy of prospective adoptive parents marriage certificate (if applicable)
- Evidence of good conduct
- A home study carried out by an official from the Adoption Center regarding the health of the adoptive parent(s).

Embassy of Paraguay
2400 Massachusetts Avenue NW
Washington, DC 20008
Phone: (202) 483 6960
Fax: (202) 234 4508
Email:
secretaria@embaparusa.gov.py
Website: www.embaparusa.gov.py

Paraguay also has Consulates General in Los Angeles, Miami, and New York.

U.S. Immigration Requirements: Prospective adoptive parents are strongly encouraged to consult USCIS publication M-249, *The Immigration of Adopted and Prospective*

Adoptive Children, as well as the Department of State publication, *Intercountry Adoptions.*

Please see the *Intercountry Adoption* section of this book for more details and review current reports online at http://adoption.state.gov.

U.S. Embassy
1776 Mariscal Lopez Avenue
Telephone (011-595-21) 213-715
Fax (011-595-21) 213-728
Internet:
http://asuncion.usembassy.gov.

Additional Information: Specific questions about adoption in Paraguay may be addressed to the U.S. Embassy in Asunción. General questions regarding intercountry adoption may be addressed to the Officeof Children's Issues, U.S.Department ofState, CA/OCS/CI, SA-29, 4th Floor, 2201 C Street, NW, Washington, D.C. 20520-4818, toll-free Tel: 1-888-407-4747.

PERU

Compiled from the October 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Republic of Peru

PROFILE

Geography

Area: 1.28 million sq. km. (496,225 sq. mi.). Peru is the third-largest country in South America and is approximately three times the size of California.

Cities: Lima (capital), Arequipa, Chiclayo, Cuzco, Huancayo, Ica, Trujillo, Ayacucho, Piura, Iquitos, Chimbote.

Terrain: Western arid coastal plains, central rugged Andean mountains, and eastern lowlands with tropical forests that are part of the Amazon basin.

Climate: Arid and mild in coastal area, temperate to frigid in the Andes, and warm and humid in the jungle lowlands.

People

Nationality: Peruvian.

Ethnic groups: Indigenous (45%), mixed background ("mestizo") (37%), European (15%), African, Japanese, Chinese, and other (3%).

Population: (2008) 28.7 million. Approximately 30% of the population lives in the Lima/Callao metropolitan area.

Annual population growth rate: (2007) 1.6%.

Religions: Roman Catholic (81%), other (10%).

Languages: Spanish is the principal language. Quechua, Aymara and other indigenous languages also have official status.

Education: Years compulsory—11. Attendance—92% ages 6-11, and 66% ages 12-16. Literacy—96% in urban areas, 80% in rural areas.

Health: Infant mortality rate (2006)—29.96/1,000. Life expectancy (2007)—68.33 years male; 72.04 years female.

Unemployment in Lima: (2008) 8.4%; underemployment (2008) 49.7%.

Government

Type: Constitutional republic.

Independence: July 28, 1821.

Constitution: December 31, 1993.

Government branches: Executive—President, two Vice Presidents, and a Council of Ministers led by a Prime Minister. Legislative—Unicameral Congress. Judicial—Four-tier court structure consisting of Supreme Court and lower courts.

Political subdivisions: 25 departments subdivided into 180 provinces and 1,747 districts.

Political parties: Alianza Popular Revolucionaria Americana (APRA), National Unity (UN), Peru Posible (PP), Popular Action (AP), Union for Peru (UPP), Solucion Popular, Somos Peru (SP).

Suffrage: Universal and mandatory for citizens 18 to 70.

Economy

GDP: (2007) $107.5 billion.

Annual growth rate: (2007) 9.0%.

Per capita GDP: (2007) $3,810.

Natural resources: Iron ore, copper, gold, silver, zinc, lead, fish, petroleum, natural gas, and forestry.

Manufacturing: (15.6% of GDP, 2007) Types—Food and beverages, textiles and apparel, nonferrous and precious metals, nonmetallic minerals, petroleum refining, paper, chemicals, iron and steel, fishmeal.

Agriculture: (9.2% of GDP, 2006) Products—Coffee, cotton, asparagus, paprika, artichokes, sugarcane, potatoes, rice, banana, maize, poultry, milk, others.

Other sectors: (by percentage of GDP in 2007) Services (55.0%), mining (5.8%), construction (5.6%), fisheries (0.5%).

Trade: (official GOP stats) Exports (2007)—$28.0 billion: gold, copper, fishmeal, petroleum, zinc, textiles, apparel, asparagus and coffee. Major markets (2007)—U.S. (19%), China (11%), Switzerland (8.5%), Japan (7.9%), Canada (6.5%), Chile (6.1%), Spain (3.5%), Brazil (3.4%). Imports (2007)—$19.6 billion: machinery, vehicles, processed food, petroleum and steel. Major suppliers (2007)—U.S. (17.7%), China (11.9%), Brazil (9.3%), Ecuador (7.8%), Argentina (5.2%), Colombia (4.9%).

PEOPLE

Peru is the fifth most populous country in Latin America (after Brazil, Mexico, Colombia and Argentina). Twenty-one cities have a population of 100,000 or more. Rural migration has increased the urban population from 35.4% of the total population in 1940 to an estimated 74.6% as of 2005.

Most Peruvians are either Spanish-speaking mestizos—a term that usually refers to a mixture of indigenous and European/Caucasian—or Amerindians, largely Quechua-speaking indigenous people. Peruvians of European descent make up about 15% of the population. There also are small numbers of persons of African, Japanese, and Chinese ancestry. Socioeconomic and cultural indicators are increasingly important as identifiers. For example, Peruvians of Amerindian descent who have adopted aspects of Hispanic culture also are considered mestizo. With economic development, access to education, intermarriage, and large-scale migration from rural to urban areas, a more homogeneous national culture is developing, mainly along the relatively more prosperous coast. Peru's distinct geographical regions are mirrored in a socioeconomic divide between the coast's mestizo-Hispanic culture and the more diverse, traditional Andean cultures of the mountains and highlands.

HISTORY, GOVERNMENT, AND POLITICAL CONDITIONS

The Inca Empire and Spanish Conquest

When the Spanish landed in 1531, Peru's territory was the nucleus of the highly developed Inca civilization. Centered at Cuzco, the Incan Empire extended over a vast region from northern Ecuador to central Chile. In search of Inca wealth, the Spanish conqueror Francisco Pizarro, who arrived in the territory after the Incas had fought a debilitating civil war, conquered the weakened people. The Spanish captured the Incan capital at Cuzco by 1533, and consolidated their control by 1542. Gold and silver from the Andes enriched the conquerors, and Peru became the principal source of Spanish wealth and power in South America.

Pizarro founded Lima in 1535. The viceroyalty established at Lima in 1542 initially had jurisdiction over all of the Spanish colonies in South America. By the time of the wars of independence (1820-24), Lima had become one of the most distinguished and aristocratic colonial capital and the chief Spanish stronghold in the Americas.

Independence

Peru's independence movement was led by Jose de San Martin of Argentina and Simon Bolivar of Venezuela. San Martin proclaimed Peruvian independence from Spain on July 28, 1821. Emancipation was completed in December 1824, when Venezuelan General Antonio Jose de Sucre defeated the Spanish troops at Ayacucho, ending Spanish rule in South America. Spain subsequently made futile attempts to regain its former colonies, but in 1879 it finally recognized Peru's independence.

After independence, Peru and its neighbors engaged in intermittent territorial disputes. Chile's victory over Peru and Bolivia in the War of the Pacific (1879-83) resulted in a territorial settlement in which Peru ceded the department of Tarapaca and the provinces of Tacna and Arica to Chile. In 1929, Chile returned Tacna to Peru. Following a clash between Peru and Ecuador in 1941, the Rio Protocol—of which the United States is one of four guarantors (along with Argentina, Brazil and Chile)—sought to establish the boundary between the two countries. Continuing boundary disagreement led to brief armed conflicts in early 1981 and early 1995, but in 1998 the governments of Peru and Ecuador signed an historic peace treaty and demarcated the border. In late 1999, the governments of Peru and Chile likewise implemented the last outstanding article of their 1929 border agreement. Peru and Chile still dispute the sea boundary.

Military Rule and Return to Democracy (1968–1980)

The military has been prominent in Peruvian history. Coups have repeatedly interrupted civilian constitutional government. The most recent period of military rule (1968-80) began when Gen. Juan Velasco Alvarado overthrew elected President Fernando Belaunde Terry of the Popular Action Party (AP). As part of what has been called the "first phase" of the military government's nationalist program, Velasco undertook an extensive agrarian reform program and nationalized the fishmeal industry, some petroleum and mining companies, and several banks.

Because of Velasco's economic mismanagement and deteriorating health, he was replaced in 1975 by Gen. Francisco Morales Bermudez. Morales Bermudez tempered the authoritarian abuses of the Velasco administration and began the task of restoring the country's economy. Morales Bermudez presided over the return to civilian government under a new constitution and in the May 1980 elections, President Belaunde Terry was returned to office by an impressive plurality.

Instability in the 1980s (1982–1990)

Nagging economic problems left over from the military government persisted, worsened by an occurrence of the "El Niño" weather phenomenon in 1982-83, which caused widespread flooding in some parts of the country, severe droughts in others, and decimated the fishing industry. The fall in international commodity prices to their lowest levels since the Great Depression combined with the natural disasters to decrease production, depress wages, exacerbate unemploy-

ment, and spur inflation. The economic collapse was reflected in worsening living conditions for Peru's poor and provided a breeding ground for social and political discontent. The emergence of the terrorist group Sendero Luminoso (Shining Path) in rural areas in 1980—followed shortly thereafter by the Tupac Amaru Revolutionary Movement (MRTA) in Lima—sent the country further into chaos. The terrorists were financed in part from alliances with narcotraffickers, who had established a stronghold in the Peruvian Andes during this period. Peru and Bolivia became the largest coca producers in the world, accounting for roughly four-fifths of the production in South America.

Amid inflation, economic hardship, and terrorism, the American Popular Revolutionary Alliance (APRA) won the presidential election in 1985, bringing Alan García Pérez to office. The transfer of the presidency from Belaunde to García on July 28, 1985, was Peru's first transfer of power from one democratically elected leader to another in 40 years.

The Fujimori Decade (1990–2000)

Economic mismanagement by the García administration led to hyperinflation from 1988 to 1990. Concerned about the economy, the increasing

terrorist threat from Sendero Luminoso, and allegations of official corruption, voters chose a relatively unknown mathematician-turned-politician, Alberto Fujimori, as president in 1990. Fujimori felt he had a mandate for radical change. He immediately implemented drastic economic reforms to tackle inflation (which dropped from 7,650% in 1990 to 139% in 1991), but found opposition to further drastic measures, including dealing with the growing insurgency. On April 4, 1992, Fujimori dissolved the Congress in the "auto-coup," revised the constitution, and called new congressional elections. With a more pliant Congress, Fujimori proceeded to govern unimpeded. Large segments of the judiciary, the military and the media were co-opted by Fujimori's security advisor, the shadowy Vladimiro Montesinos. The government unleashed a counterattack against the insurgency that resulted in countless human right abuses and eventually quashed the Shining Path and MRTA. During this time he also privatized state-owned companies, removed investment barriers and significantly improved public finances.

Fujimori's constitutionally questionable decision to seek a third term, and subsequent tainted electoral victory in June 2000, brought political and economic turmoil. A bribery scandal that broke just weeks after he began his third term in July forced Fujimori to call new elections in which he would not run. Fujimori fled the country and resigned from office in November 2000. A caretaker government under Valentin Paniagua presided over new presidential and congressional elections in April 2001. The new elected government, led by President Alejandro Toledo, took office July 28, 2001.

The Toledo Administration (2001–2006)

The Toledo government successfully consolidated Peru's return to democracy, a process that had begun under President Paniagua. Despite being a frequent target of media criticism, Toledo maintained strong commitments to freedom of the press. The government undertook initiatives to implement the recommendations made by the Truth and Reconciliation Commission (TRC), which had been charged with studying the circumstances surrounding the human rights abuses and violations committed between 1980 and 2000. Criminal charges for corruption and human rights violations were brought against former President Fujimori. Fujimori was detained in Chile in November 2005, and was extradited to face criminal charges in Peru in September 2007. On December 11, 2007, Fujimori was convicted of ordering an illegal search and seizure of documents, and was sentenced to six years in prison. His trial on human rights charges continues.

Under President Toledo, Peru signed a Trade Promotion Agreement with the U.S. Toledo also unveiled the construction of a road that will connect Brazil and Peru's isolated interior to the Pacific coast. Toledo's economic management led to an impressive economic boom in Peru that remains strong. Poverty reduction was uneven, however. Although poverty in some areas decreased by up to 37% during the Toledo Administration, nationally it only decreased by 5.6% and nearly half of Peruvians were still living below the poverty line. In 2005 the government implemented "Juntos," a program to double the income of people living in extreme poverty.

2006 Elections and Transition to the Garcia Administration

On June 4, 2006, APRA candidate Alan García Pérez was elected to the presidency by 52.5% of the voters in his runoff with Ollanta Humala, who ran under the Union for Peru, with the support of his Peruvian Nationalist Party. APRA also won 36 Congressional seats and controls the largest voting bloc. After a disappointing presidential term from 1985 to 1990, García returned to the presidency with promises to improve Peru's social condition, balancing economic stability with increased social spending. During his term, García has overseen a robust macroeconomic performance, including strong GDP growth and declining poverty levels (39.3% of Peruvians were "poor" and 13.7% "extremely poor" in 2007). Despite this broad success, however, global inflation has pushed up prices for basic goods consumed by the poor, causing a steep decline in García's level of public support. Internationally, García has sought to improve relations with Peru's South American neighbors and with the United States, and to present Peru's democratic and pro-free trade path as a model for the region. García helped convince the US Congress to pass the US-Peru Trade Promotion Agreement. He also signed deals with Canada and Singapore, and began trade negotiations with China, the European Union, and others.

Constitution and Political Institutions

The president is popularly elected for a five year term. A constitutional amendment passed in 2000 prevents reelection. The first and second vice presidents also are popularly elected but have no constitutional functions unless the president is unable to discharge his duties. The principal executive body is the Council of Ministers, comprised of 15 members and headed by a prime minister. The president appoints its members, who must be ratified by the Congress. All Executive laws sent to Congress must be approved by the Council of Ministers.

The legislative branch consists of a unicameral Congress of 120 members. In addition to passing laws, Congress ratifies treaties, authorizes government loans, and approves the government budget.

The judicial branch of government is headed by a 16-member Supreme Court. The Constitutional Tribunal interprets the constitution on matters of individual rights. Superior courts in departmental capitals review appeals from decisions by lower courts. Courts of first instance are located in provincial capitals and are divided into civil, penal, and special chambers. The judiciary has created several temporary specialized courts in an attempt to reduce the

large backlog of cases pending final court action. In 1996 a human rights ombudsman's office was created. Peru is divided into 25 regions. The regions are subdivided into provinces, which are composed of districts. High authorities in the regional and local levels are elected. The country's latest decentralization program is in hiatus after the proposal to merge departments was defeated in a national referendum in October 2005.

Principal Government Officials

Pres., Central Reserve Bank: **Julio VELARDE**
Ambassador to the US: **Felipe ORTIZ de Zevallos**
Permanent Representative to the UN, New York: **Jorge VOTO-BERNALES Gatica**

Peru maintains an embassy in the United States at 1700 Massachusetts Avenue, NW, Washington, DC 20036 (tel. (202) 833-9860/67, consular section: (202) 462-1084). Peru has consulates in Atlanta, New York, Paterson (NJ), Miami, Chicago, Houston, Denver, Los Angeles, San Francisco, Boston, and Hartford.

ECONOMY

Peru's economy has shown strong growth over the past five years, helped by market-oriented economic reforms and privatizations in the 1990s, and measures taken since 2001 to promote trade and attract investment. GDP grew 9.0% in 2007, 7.7% in 2006, 6.8% in 2005, 5.0% in 2004, and 4.0% in 2003. President Alan García and his economic team have continued these policies. Recent economic expansion has been driven by construction, mining, export growth, investment, and domestic demand. Inflation averaged 1.8% in 2007, and the fiscal deficit was only 0.6% of GDP. Thanks to pre-payments, external debt in 2007 dropped to $20.1 billion, and foreign reserves were a record $27.7 billion.

Peru's economy is well managed, and better tax collection and growth are increasing revenues, with expenditures keeping pace. Private investment is rising and becoming more broad-based. Peru obtained investment grade status in 2008. The García administration is pursuing decentralization initiatives, and is focused on bringing more small businesses into the formal economy.

Foreign Trade

Peru and the U.S. signed the U.S.-Peru Trade Promotion Agreement (PTPA) in April 2006 in Washington, DC. The PTPA was ratified by the Peruvian Congress in June 2006 and by the U.S. Congress in December 2007. The Peruvian government is working on changes to its environmental and intellectual property laws in order to allow the PTPA to enter into force. On February 29, 2008, the President signed legislation to extend the Andean Trade Preference Act (ATPA) until December 31, 2008. Peru's exports reached $28 billion in 2007, partially as a result of high mineral prices. Peru's major trading partners are the U.S., China, EU, Brazil, Switzerland, and Japan. According to USG statistics, Peru registered a surplus in its trade with the United States of $1.15 billion in 2007, exporting $5.27 billion and importing $4.12 billion. Peru's exports include gold, copper, fishmeal, petroleum, zinc, textiles, apparel, asparagus, and coffee. Imports include machinery, vehicles, processed food, petroleum and steel. Peru belongs to the Andean Community, the Asia-Pacific Economic Cooperation (APEC) forum, and the World Trade Organization (WTO). Peru has limited trade agreements with Chile and Mexico, and signed more robust agreements with Canada and Singapore in 2008.

Foreign Investment

The Peruvian Government actively seeks to attract both foreign and domestic investment in all sectors of the economy. The registered stock of foreign direct investment (FDI) is over $16 billion, though actual FDI is estimated to be much higher. The U.S., Spain, and the United Kingdom are the leading investors. FDI is concentrated in telecommunications, mining, manufacturing, finance, and electricity.

Mining and Energy

Peru is a source of both natural gas and petroleum. In August 2004, Peru inaugurated operations of the Camisea natural gas project. Camisea gas has transformed Peru's energy matrix, reducing the country's dependence on imported diesel. The $3.8 billion Peru LNG project, currently under construction, will liquefy natural gas for export to Mexico and possibly the west coast of the United States, converting Peru into a net energy exporter in 2010.

Peru is the world's top producer of silver, second in copper and zinc, third in tin, fourth in lead, and fifth in gold. Mineral exports have consistently

accounted for the most significant portion of Peru's export revenue, comprising 62% in 2007.

FOREIGN RELATIONS

Peru generally enjoys friendly relations with its neighbors. In November 1999, Peru and Chile signed three agreements that put to rest the remaining obstacles holding up implementation of the 1929 Border Treaty. (The 1929 Border Treaty officially ended the 1879 War of the Pacific.) In late 2005, a declaration of maritime borders by Peru's Congress set off a new round of recriminations with Chile, which claims that the maritime borders were agreed to in fishing pacts dating from the early 1950s. In contrast, the Garcia administration has recently made overtures to Chile, aimed at improving that relationship.

In October 1998, Peru and Ecuador signed a peace accord to resolve once and for all border differences that had sparked violent confrontations. Peru and Ecuador are now jointly coordinating an internationally sponsored border integration project. The U.S. Government, as one of four guarantor states, was actively involved in facilitating the 1998 peace accord between Peru and Ecuador and remains committed to its implementation. The United States has pledged $40 million to the Peru-Ecuador border integration project and another $4 million to support Peruvian and Ecuadorian demining efforts along their common border.

In 1998, Peru became a member of the Asia-Pacific Economic Cooperation (APEC) forum, facilitating closer ties and economic relations between Peru and Asian nations. Peru will host the APEC Summit in 2008.

Peru has been a member of the United Nations since 1949, and is a member of the Security Council. Peruvian Javier Perez de Cuellar served as UN Secretary General from 1981 to 1991.

Peru maintains 210 troops in peacekeeping operations in Haiti under the UN's MINUSTAH.

U.S.-PERUVIAN RELATIONS

The United States enjoys strong and cooperative relations with Peru. Relations were strained following the tainted re-election of former President Fujimori in June 2000, but improved with the installation of an interim government in November 2000 and the inauguration of the government of Alejandro Toledo in July 2001.

Relations with President García's administration are positive. The United States continues to promote the strengthening of democratic institutions and human rights safeguards in Peru and the integration of Peru into the world economy.

The United States and Peru cooperate on efforts to interdict the flow of narcotics, particularly cocaine, to the United States. Bilateral programs are now in effect to reduce the flow of drugs through Peru's port systems and to perform ground interdiction in tandem with successful law enforcement operations.

These U.S. Government-supported law enforcement efforts are complemented by an aggressive effort to establish an alternative development program for coca farmers in key coca growing areas to voluntarily reduce and eliminate coca cultivation. This effort is funded by the Department of State's Bureau of International Narcotics and Law Enforcement Affairs (INL) and the U.S. Agency for International Development (USAID).

U.S. investment and tourism in Peru have grown substantially in recent years. The U.S. is Peru's number one trade partner, and economic and commercial ties will deepen with the implementation of the U.S.-Peru Trade Promotion Agreement (PTPA).

About 200,000 U.S. citizens visit Peru annually for business, tourism, and study. About 16,000 Americans reside in Peru, and more than 400 U.S. companies are represented in the country.

TRAVEL

Consular Information Sheet

December 17, 2008

Country Description: Peru is a developing country with an expanding tourism sector. A wide variety of tourist facilities and services are available, with quality varying according to price and location.

Entry Requirements: A valid passport is required to enter and depart Peru. Tourists must also provide evidence of return or onward travel. U.S. citizens may enter Peru for short-term tourist- or business-related visits of up to 90 days; however, the actual period authorized is determined by the Peruvian immigration officer at the time of entry into Peru. After admission, travelers may apply to extend their visa for an additional three months. Persons who remain beyond their period of authorized stay without obtaining a visa extension or a residence visa will have to pay a fine to depart Peru. Visitors for other than tourist or short-term business visit purposes must obtain a Peruvian visa in advance. Business workers (under contract) should ascertain the tax and exit regulations that apply to the specific visa they are granted. Peru does not require any immunizations for entry, although it recommends vaccination against Yellow Fever.

An international flight airport fee, payable in U.S. or local currency and assessed on a per-person basis, must be paid when departing Peru. There are also separate airport taxes for domestic flights charged at most domestic airports that must be paid before embarking. U.S. citizens whose passports are lost or stolen in Peru must obtain a new passport from the U.S. Embassy and present it, together with a police report on the loss or theft, to the main immigration office in downtown Lima, located at Prolongacion Espana 734, Brena, to obtain permission to depart. An additional immigration office is located within Lima's Jorge Chavez International Airport international departure terminal. For further information regarding entry requirements, travelers should contact the Peruvian Embassy at 1700 Massachusetts Avenue NW, Washington, DC 20036; telephone (202) 833-9860; http://www.peruvianembassy.us.

Note: As of June 1, 2004, it is illegal for any person within the United States, as well as U.S. citizens, nationals, and resident aliens elsewhere, to fly on or do business with Aero Continente and its successor, Nuevo Continente, an airline that is currently not in operation. Persons who violate this provision are subject to criminal and civil penalties under U.S. law. Further information on this matter is available on the U.S. Department of the Treasury's web site at http://www.treas.gov/offices/enforcement/ofac. FAA safety restrictions placed on Aero Continente are not related to this action.

Safety and Security: The Shining Path (Sendero Luminoso) terrorist group is still active, and sporadic incidents of Shining Path violence have occurred in the recent past in rural provinces of Ayacucho, Huancavelica, Huanuco, Junin, and San Martin. The Shining Path has previously targeted U.S. interests and there are indications that it continues to do so. Other incidents have included attacks by large, heavily armed groups believed to be members of Shining Path on Peruvian army and police patrols in remote areas, as well as kidnappings of Peruvian and foreign aid workers. None of these incidents occurred in areas normally visited by tourists. Mining prospectors, adventure travelers, and others considering travel to remote areas of Peru are strongly advised to contact the U.S. Embassy in Lima for current security information.

A peace treaty ending the Peru/Ecuador border conflict was signed on October 26, 1998. The Peruvian government is working to remove mines and unexploded ordnance left over from the conflict, but crossing or approaching the Peru-Ecuador border anywhere except at official checkpoints can still be dangerous. The entire Peru/Colombia border area is very dangerous because of narcotics trafficking and the occasional incursions of armed guerrilla forces from Colombia into Peru's remote areas.

Political demonstrations and labor-related strikes and marches regularly occur in urban and some rural areas and sometimes affect major highways. They can also cause serious disruptions to road, air, and rail transportation. Demonstrations are often—but not always—announced in advance. While these activities are usually peaceful, they can escalate into violent confrontations. As a general rule, it is best to avoid large crowds and demonstrations. Visitors are encouraged to keep informed by following the local news and consulting hotel personnel and tour guides.

The U.S. Embassy restricts travel of U.S. government employees where terrorist groups and narcotics traffickers have recently resorted to violent actions, usually directed against local security forces, local government authorities, and some civilians. Overland travel in or near these areas, particularly at night, is risky.

Apart from the following list of locations restricted because of the danger from terrorist and narcotics groups,

Embassy employees are prohibited from nighttime overland travel anywhere outside major urban areas because of the risks posed from robbery and unsafe road conditions. The only exception is that nighttime travel by commercial bus on the Pan-American Highway is permitted for official or personal travel. Road travel along this route, by means other than commercial bus service, and nighttime travel via commercial bus service along other routes anywhere in Peru, continue to be prohibited for Embassy employees.

This list below is under continuous review, and travelers may contact the U.S. Embassy for updated information.

Ayacucho: *Restricted:* Provinces of La Mar and Huanta. Road travel from Ayacucho to San Francisco. *Permitted:* Daylight road travel from Ayacucho City to the city of Huanta. Staying within the city limits of Huanta. Daylight road travel from Pisco to Ayacucho City.

Cuzco: *Restricted:* 20-kilometer swath of territory contiguous to the Apurimac River and Ayacucho Department. *Permitted:* Everywhere else including Machu Picchu area and city of Cuzco.

Huancavelica: *Restricted:* Province of Pampas. *Permitted:* Train travel from Huancayo to Huancavelica City. Daylight road travel from Pisco to Ayacucho City.

Huánuco: *Restricted:* Provinces of Maranon, Huamalies, and Leonicio Prado. Road travel from Huánuco City to Tingo Maria City. *Permitted:* Flying into and staying within the city limits of Huánuco and Tingo María.

Junín: *Restricted:* Provinces of Satipo and Concepcion east of the Rio Mantaro. *Permitted:* Daylight travel from La Merced to Satipo.

Loreto: *Restricted:* 20-kilometer swath of territory contiguous to the Colombia border. Travel on the Putumayo River.

San Martín: *Restricted:* Province of Tocache. *Permitted:* Flying only into and remaining within the city limits of Tocache.

Ucayali: *Restricted:* Provinces of Padre Abad and Coronel Portillo west of Pucallpa City and west of Ucayali River. Road travel from Pucallpa to Aguaytia and all cities west of Aguaytia. *Permitted:* Flying into and remaining within the city limits of Pucallpa and Aguaytía; the province of Coronel Portillo east of the Ucayali River

Inca Trail hikers are significantly safer if they are part of a guided group trail hike. To protect natural resources along the Inca Trail, the Peruvian government charges fees for hiking the trail and instituted limits on the numbers of hikers permitted on the trail. Hikers in peak season (June–August) are advised to make reservations for the Inca Trail well in advance via a travel agency. Visitors should always register when entering national parks. Hikers should exercise extreme caution in steep or slippery areas, which are neither fenced nor marked. Several climbers have died or suffered serious injuries after falling while climbing Huayna Picchu, a peak near Machu Picchu. Only very basic medical assistance is available at Machu Picchu.

Adventure travelers should be aware that rescue capabilities are limited. In recent years, several hikers have died and others have had to be rescued after serious accidents in the Huaraz region of the Cordillera Blanca Mountains, where Peru's highest peaks are located. In late June 2006 three American citizens, along with their Peruvian guides, died in Huaraz province after a serious fall while trekking. Most rescues are carried out on foot because helicopters cannot fly to the high-altitude areas where hikers are stranded. U.S. citizens who plan to visit these mountainous areas in Ancash province should contact the Peruvian National Police's High Mountain Rescue Unit ("USAM") at telephone 51-1-575-4696, 51-1-575-4698, 51-1-575-1555; fax 51-1-575-3036, or e-mail: divsam@yahoo.com. Some USAM officers read and/or speak English. Swimmers, surfers, rafters, and boaters should be aware of strong currents in the Pacific Ocean and fast-moving rivers. Two American citizens and at least three foreign visitors were killed while white water rafting in 2006 and one U.S. citizen died while surfing. Seasonal rains can exacerbate the already dangerous conditions in Peru. Those considering white-water rafting should consult local authorities about recent weather and the impact on white-water rafting conditions. Be cautious in relying on those with a commercial interest in gauging conditions. Companies offering white-water rafting in Peru, their guides, and their equipment may not be held to the same standards as similar companies in the United States. Travelers are advised to seek advice from local residents before swimming in jungle lakes or rivers, where large reptiles or other dangerous creatures may live; caimans, resembling alligators, are found in most jungle areas of Peru. One crocodile species is native to the Tumbes area, but it is limited in numbers and range. All adventure travelers should leave detailed written plans and a timetable with a friend and with local authorities in the region, and they should carry waterproof identification and emergency contact information.

Travelers to all remote areas should check with local authorities about geographic, climatic, and security conditions.

For the latest security information, Americans traveling abroad should regularly monitor the Department of State, Bureau of Consular Affairs web site, where the current Travel Warnings and Travel Alerts, including the Worldwide Caution Travel Alert, can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S. and Canada, or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: Of the approximately 260,000 Americans who visit Peru each year, a small but growing num-

ber have been victims of serious crimes. The information below is intended to raise awareness of the potential for crime and suggest measures visitors can take to avoid becoming a victim.

Violent crime, including carjacking, assault, and armed robbery is common in Lima and other large cities. Resistance to violent crime often provokes greater violence, while victims who do not resist usually do not suffer serious physical harm. "Express kidnappings," in which criminals kidnap victims and seek to obtain funds from their bank accounts via automatic teller machines, occur frequently. Thieves often smash car windows at traffic lights to grab jewelry, purses, backpacks, or other visible items from a car. This type of assault is very common on main roads leading to Lima's Jorge Chavez International Airport, specifically along De la Marina and Faucett Avenues and Via de Evitamiento, but it can occur anywhere in congested traffic, particularly in downtown Lima. Travelers are encouraged to put all belongings, including purses, in the trunk of a car or taxi. Passengers who hail taxis on the street have been assaulted. Following the April 2007 armed robbery of a U.S. Embassy employee by a taxi driver, the Embassy's Regional Security Officer advised all Embassy personnel not to hail taxis on the street. It is safer to use telephone-dispatched radio taxis or car services associated with major hotels. Travelers should guard against the theft of luggage and other belongings, particularly U.S. passports, at the Lima airport.

Passengers arriving at Lima's Jorge Chavez International Airport should be cautious in making arrangements for ground transportation. Upon exiting the airport, travelers may be approached by persons seeming to know them, or who claim that a prearranged taxi has been sent to take them to their hotel. Some travelers have been charged exorbitant rates or taken to marginal hotels in unsafe parts of town. Travelers who are not being met by a known party or by a reputable travel agent or hotel shuttle are advised to arrange for a taxi inside the airport. At least two taxi companies maintain counters inside the international arrival area (between immigration clearance and baggage claim). An additional two companies have agents at the information kiosk just before the exit from the passenger arrival area.

The threat of street crime is greatest in areas that attract large crowds, particularly crowds of tourists or wealthy Peruvians. A crowd allows a thief (or thieves, since petty thieves often operate in a group) the opportunity to select and approach the potential victim without attracting attention. Visitors should be especially careful when visiting tourist areas in Lima such as the Plaza de Armas (Government Square), the Plaza San Martin, Acho Bullring, Pachacamac, and any location in downtown Lima. Additionally, visitors to municipal markets as well as the Gamarra textile district of La Victoria should be extremely cautious. Street crime is also prevalent in cities in Peru's interior, including Cuzco, Arequipa, Puno, and Juliaca. American citizens traveling alone or in unescorted groups are more vulnerable to street crime.

Visitors are advised to keep cash and identification in their front pockets and to limit their cash on hand and unnecessary credit cards. Replacing items such as credit cards, U.S. driver's licenses, and other identification while in Peru can be difficult and time-consuming. Handbags should not be carried, but if they are, they should be tucked into the crook of an arm or, if carrying a bag with a shoulder strap, do not allow the bag to hang freely, but keep a hand over the clasp. It is generally recommended that all jewelry be removed prior to going to a market or other crowded areas.

Theft of U.S. passports is quite common in Peru. Visitors are advised not to carry their U.S. passports if they are not needed. If the police request identification, a copy of the passport is acceptable. A copy of the data page, the page with the Peruvian visa, and a copy of the page with the Peruvian entry stamp should be carried.

Counterfeit U.S. currency is a growing and serious problem in Peru. In many areas of the city, moneychangers openly change money on the street. These individuals should be avoided as they are a conduit for counterfeit currency and in many cases, work in leagues with pickpockets by pointing out potential victims. In addition, these individuals have frequently been the victims of violent robberies in which bystanders have been injured. There have also been several reported incidents of counterfeit currency being paid out as winnings by casinos, though the Embassy has not received reports of this happening at larger, well-known casinos.

In the recent past, there have been a number of cases of armed robberies, rapes, other sexual assaults, and attempted rapes of U.S. citizens and other foreign tourists in Arequipa and in Cuzco city, as well as in the outlying areas in the vicinity of various Incan ruins. These assaults have occurred both during daylight hours and at night.

Some crimes in the city of Cuzco and in Arequipa have involved the drivers of rogue (or unregistered) taxis. Travelers should use only licensed, registered taxis such as those available from taxi stands in Cuzco displaying a blue decal issued by the municipal government on the windshield of the vehicle. Visitors should not accept offers of transportation or guide services from individuals seeking clients on the streets. In late 2006 there were several reports of U.S. citizens falling victim to so-called express kidnappings in Arequipa after taking taxis hailed on the street. On occasion, the victim was bound, beaten, and held for over 24 hours as the assailants attempted to empty cash from bank accounts with the victim's stolen ATM card.

Tourists should be particularly cautious when visiting the Sacsahuayman ruins outside Cuzco. They should not travel alone, but do so in as large a group as possible. Visitors should also avoid these areas at dawn, dusk, or nighttime, since roving gangs are known to frequent

these areas and prey on unsuspecting tourists. U.S. citizen backpackers have also been victims of armed robbery while hiking on trails other than the Inca Trail.

Peruvian law enforcement authorities have responded to rising crime by increasing the number of tourist police officers patrolling Cuzco and its outskirts on horseback and motorcycles. The officers have been dispatched to bus and train terminals, taxi stands, automatic teller machine locations, and other sites frequented by tourists, such as discotheques, restaurants, and craft fairs and shops.

Crime also occurs on roads, particularly at night and outside urban areas. Clandestine, impromptu roadblocks can appear on even major highways, where bus and automobile passengers are robbed. The risk is even greater on rural roads after dark. A number of Americans have been robbed on the road between Tarapoto and Yuriguaymas in recent months. In addition, numerous Americans have reported the theft of passports, cameras, and other valuables on overnight bus rides, by thieves who take advantage of sleeping passengers.

In many countries around the world, counterfeit and pirated goods are widely available. Transactions involving such products may be illegal under local law. In addition, bringing them back to the United States may result in forfeitures and/or fines. More information on this serious problem is available at http://www.cybercrime.gov/18usc2320.htm.

U.S. citizen visitors to Peru should immediately report any criminal activity perpetrated against them to the nearest police station or tourist police ("POLTUR") office. Immediate action may result in the capture of the thieves and the recovery of stolen property. U.S. citizens should also report crimes to the U.S. Embassy in Lima (telephone 434-3000 during business hours, 8:00 a.m. to 5:00 p.m. or 434-3032 for after-hours emergencies if calling from within Lima; add the prefix 01 if calling from the provinces). Victims of crime in Cuzco should contact the Consular Agent there (while in Cuzco, telephone 231-474; from Lima, callers must dial the prefix 084 for Cuzco).

The telephone number for the tourist police in Lima is 51-1-424-2053 (Lima north) or 51-1-460-4525 (Lima south). There are also tourist police offices in 15 other cities, including all major tourist destinations, such as Cuzco, Arequipa, and Puno.

Tourists may register complaints on a 24-hour hotline provided by INDECOPI (National Institute for the Defense of Competition and the Protection of Intellectual Property) by calling 51-1-224-7800 or 51-1-224-7777. Outside of Lima, callers should dial the prefix (01), then the aforementioned numbers, or call the toll-free number 0-800-44040 from any private telephone (the 800 number is not available from public payphones). The INDECOPI hotline will assist the caller in contacting the police to report a crime, but it is intended primarily to deal with non-emergency situations such as poor service from a travel agency or guide, lost property, or unfair charges.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, contact family members or friends, and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

The local Peruvian phone system has incorporated the following phone numbers to allow access to emergency services: General Emergencies should be dialed by pressing 116, and Police Emergencies should be dialed by pressing 105.

Medical Facilities and Health Information: Medical care is generally good in Lima and usually adequate in other major cities, but it is less so elsewhere in Peru. Urban private health care facilities are often better staffed and equipped than public or rural ones. Public hospital facilities in Cuzco, the prime tourist destination, are generally inadequate to handle serious medical conditions. Although some private hospital facilities in Cuzco may be able to treat acute medical problems, in general the seriously ill traveler should return to Lima for further care as soon as is medically feasible. Visitors to high-altitude Andean destinations such as Cuzco (11,000 feet), Machu Picchu (8,000 feet), or Lake Titicaca (13,000 feet) should discuss the trip with their personal physician prior to departing the United States. Travel to high altitudes could pose a serious risk of illness, hospitalization, and even death, particularly if the traveler has a medical condition that affects blood circulation or breathing. Several U.S. citizens have died in Peru from medical conditions exacerbated by altitude. Tourists or business visitors, particularly those who suffer from cardiac-related problems or high blood pressure, who wish to travel to high-altitude areas in Peru, should undergo a medical examination before traveling. New arrivals, even healthy and fit persons, will feel symptoms of hypoxia (lack of oxygen) at high-altitude, and most will need time to adjust to the altitude. Most people will have increased respiration and heart rate. Many will have headaches, difficulty sleeping, lack of appetite, minor gastric and intestinal upsets, and mood changes. To help prevent these complications, consult your personal physician, avoid alcohol and smoking for at least one week after arrival at high altitudes, and limit physical activity for the first 36 to 48 hours after arrival at high altitudes.

In jungle areas east of the Andes mountain range (cordillera), chloroquine-resistant malaria is a serious problem. Cholera, yellow fever, hepatitis, dengue fever, and other exotic and contagious diseases are also present. Yellow fever is endemic in

certain areas of Peru; in general, those areas are located on the eastern side of the cordillera and at lower elevations in jungle areas. The U.S. Centers for Disease Control and Prevention and the Peruvian government recommend that travelers to Peru receive a yellow fever vaccination and carry documentation of the vaccination with them on their trip. Diarrhea caused by contaminated food or water is very common in Peru, and is potentially serious.

If suffering from persistent symptoms, seek medical attention. Local tap water in Peru is not considered potable. Only bottled or treated (disinfected) water should be used for drinking. Fruits and vegetables should be washed and/or disinfected with care, and meats and fish should be thoroughly cooked. Eggs, meat, un-pasteurized cheese, and seafood are common sources of the bacteria that can cause travelers' diarrhea, and they should be properly prepared or avoided.

Over the last few years, at least five American citizen visitors have died during liposuction operations in Peru. While some of these deaths occurred in ill-equipped, makeshift clinics, travelers are urged to carefully assess the risks of having this type of surgery performed overseas, even when opting for a treatment at one of the better-known clinics.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's website at http://wwwn.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith/en.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Peru is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

Driving conditions in Peru are very different than those found in the U.S. and can be considerably more dangerous. Visitors are strongly encouraged to familiarize themselves with local law and driving customs before attempting to operate vehicles. Road travel at night is extremely dangerous due to poor road markings and frequent unmarked road hazards. Drivers should not travel alone on rural roads, even in daylight. Convoy travel is preferable. Spare tires, parts, and fuel are needed when traveling in remote areas, where distances between service areas are great. Fog is common on coastal and mountain highways, and the resulting poor visibility frequently causes accidents. Inter-city bus travel is dangerous. Armed robbers, who force passengers off buses and steal all their belongings, sometimes hold up inter-city buses at night. Bus accidents resulting in multiple deaths and injuries are common, and they are frequently attributed to excessive speed, poor bus maintenance, and driver fatigue. For further information, travelers may contact their nearest automobile club, or (for information in Spanish) the Associacion Automotriz del Peru, 299 Avenida Dos de Mayo, San Isidro, Lima 27, Peru, telephone 51-1-440-0495, or at http://www.aap.org.pe.

Visit Peru's national tourist office and national authority responsible for road safety web site at http://www.peru.info/peru.asp.

Special Circumstances: The government of Peru prohibits the exportation of archaeological artifacts and colonial art. These restrictions include archaeological material from the pre-Hispanic cultures and certain ethnological materials from the colonial period of Peru, which are considered protected Peruvian cultural patrimony. U.S. law enforcement authorities can take action even after importation into the United States has occurred. For more information, contact Art Historian Dr. Alvaro Roca-Rey Miro Quesada, National Cultural Institute (Instituto Nacional de Cultura—INC), Direccion de Fomento de las Artes at 51-1-476-9900, and/or Archaeologist Ms. Alejandra Figueroa Flores, Direccion de Registro de Patrimonio Arqueologico, at 51-1-476-9887. Travelers buying art should be aware that unscrupulous traders might try to sell them articles that cannot be exported from Peru. Peruvian customs authorities may seize such articles, and the traveler may be subject to criminal penalties. In many countries around the world, counterfeit and pirated goods are widely available. Transactions involving such products are illegal and bringing them back to the United States may result in forfeitures and/or fines.

Visitors who purchase reproductions of colonial or pre-colonial art should buy only from reputable dealers, and they should insist on documentation from Peru's National Institute of Culture (INC) showing that the object is a reproduction and may be exported. Peruvian customs authorities may retain articles lacking such documentation and forward them to INC for evaluation. If the objects are found to be reproductions, they may eventually be returned to the purchaser, but, storage and shipping charges are the responsibility of the purchaser.

Vendors in jungle cities and airports sell live animals and birds, as well as handicrafts made from insects, feathers, or other natural products. Under Peruvian law, it is illegal to remove certain flora and fauna items from their place of origin to another part of Peru or to export them to a foreign country. Travelers have been detained and arrested by the Ecology Police in Lima for carrying such items.

Information on U.S. regulations for the importation of plant and animal products is available from the Animal and Plant Health Inspection Service (APHIS) of the U.S. Department of Agriculture via the web at http://www.aphis.usda.gov. Travelers bringing animals to the United States may also wish to consult with U.S. Customs or the Fish and Wildlife Service of the U.S. Department of Interior. Travelers wishing to bring animals from the United States into Peru should consult the Peruvian Servicio Nacional de Sanidad Agraria (SENASA) at 51-1-313-3300. Information regarding current restrictions is available on the SENASA web site at http://www.senasa.gob.pe.

Peruvian customs regulations require that many electronic items or items for commercial use be declared upon entering the country. Failure to make a full and accurate declaration can lead to arrest and incarceration or significant fines.

Philanthropic groups and individuals planning to enter Peru with medical supplies in quantities greater than for personal use are strongly advised to consult with a Peruvian consulate in the United States prior to arrival in Peru. Peruvian Customs authorities will seize any merchandise that is not properly documented, even if intended for charitable or philanthropic use. The cost of retrieving seized goods can often exceed the value of the merchandise.

Travelers should be aware that some drugs and other products readily available over-the-counter or by prescription in Peru are illegal in the United States. The prescription sedative flumitrapezan (Rohypnol) is one such drug; others may come on the market at any time. Although cocaleaf tea is a popular beverage and folk remedy for altitude sickness in Peru, possession of these tea bags, which are sold in most Peruvian supermarkets, is illegal in the United States.

Aviation Safety Oversight: The U.S. Federal Aviation Administration (FAA) has assessed Peru's Civil Aviation Authority as being in compliance with International Civil Aviation Organization (ICAO) aviation safety standards for oversight of Peru's air carrier operations. For more information, travelers may visit the FAA's web site at http://www.faa.gov.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating Peru's laws, even unknowingly, may be expelled, arrested, or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Peru are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Disaster Preparedness: Peru is an earthquake-prone country. U.S. citizens in areas affected by earthquakes can expect to experience temporary difficulty communicating with family and friends in the U.S. and in securing prompt onward overland transportation out of the affected areas. You are strongly encouraged to register your trip with the Embassy and to contact your family directly or, if unavailable, the U.S. Embassy following a significant disaster. General information about natural disaster preparedness is available via the Internet from the U.S. Federal Emergency Management Agency (FEMA) at http://www.fema.gov.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in Peru are encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration web site so that they can obtain updated information on travel and security within Peru. Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency.

The U.S. Embassy is located in Surco, Monterrico, a suburb of Lima, at Avenida Encalada, Block Seventeen; telephone 51-1-434-3000 during business hours (8:00 a.m. to 5:00 p.m.), or 51-1-434-3032 for after-hours emergencies; fax 51-1-618-2397, or 51-1-618-2724 (American Citizen Services Unit); web site—http://lima.usembassy.gov. The Consular Section is open for American Citizen Services, including registration, from 8:00 a.m. to 11:30 a.m. weekdays, excluding U.S. and Peruvian holidays.

The U.S. Consular Agent in Cusco may be reached at 51-84-231-474; or by email at consagentcuzco@terra.com.pe. The Consular Agency can provide information and assistance to U.S. citizen travelers who are victims of crime or need other assistance.

Intercountry Adoption

November 2008

The information in this section has been edited from a report available through the U.S. Department of State Office of Children's Issues. For more information detailed, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Peru is party to The Hague Convention on Protection of Children and Cooperation in Respect of Intercountry Adoption (Hague Adoption Convention). Therefore, all adoptions between Peru and the United States must meet the requirements of the Convention and United States law implementing the Convention. For detailed information on these requirements for adoption, please review the *Intercountry Adoption* section of this publication and visit the USCIS Intercountry Adoption web-

site at http://adoption.state.gov. Peruvian law restricts inter-country adoption to children who have been deemed legally abandoned. A Peruvian court must make a legal finding of abandonment before the child is assigned to prospective parents. In effect, this provision prohibits so-called "direct" adoptions, in which a birth parent gives a child directly (or via an intermediary) to specific prospective parent(s) for adoption. It also prohibits adoptive parents from searching for and locating a child on their own.

Who Can Adopt? Adoption between the United States and Peru is governed by The Hague Adoption Convention. Therefore to adopt from Peru, you must first be found eligible to adopt by the United States Government. In addition to the United States requirements for prospective adoptive parents, Peru also has the following eligibility requirements for prospective adoptive parents.

Residency Requirements: There is no minimum residency requirement for intercountry adoptions. Prospective adoptive parents can travel to Peru, remain in Peru to complete the adoption, and travel back to the United States without fulfilling a minimum residency period. Although both adoptive parents do not need to be present in Peru for the entire processing time, both must be present for the provisional placement, evaluation, and ratification of the adoption through the court.

Age Requirements: The age and civil status of the prospective adoptive parents determines the age range of the adopted child:

- Married parents between 25 and 43 years old may adopt children up to the age of three.
- Married parents between 44 and 50 years old may adopt children between three and six years of age.
- Married parents between 51 and 55 years old may adopt children age six and older.
- Single parents between 35 and 50 years old may adopt children age five and older.

Marriage Requirements: Prospective adoptive parents can be married or single.

Income Requirements: There are no specific income requirements; however, prospective adoptive parents will have to provide documentation detailing their current income.

Other Requirements: Prospective adoptive parents must pass a psychological evaluation.

Prospective adoptive parents of dual or mixed American and Peruvian nationality who wish to adopt a blood relative and travel to the United States with the adopted child should ensure that the adoption process complies with The Hague Adoption Convention.

Who Can Be Adopted? Because Peru is party to The Hague Adoption Convention, children from Peru must meet the requirements of the Convention in order to be eligible for adoption. In addition to Peru's requirements, a child must meet the definition of a Convention adoptee for you to bring him or her back to the United States.

Abandonment Requirements: Peruvian law restricts inter-country adoption to children who have been deemed legally abandoned. A Peruvian court must make a legal finding of abandonment before the child is assigned to prospective parents. In effect, this provision prohibits so-called "direct" adoptions, in which a birth parent gives a child directly (or via an intermediary) to specific prospective parent(s) for adoption. It also prohibits prospective adoptive parents from searching for and locating a child on their own.

Age Requirements: Peru allows children up to 18 years of age to be adopted. United States law requires that the I-800A petition to classify an adopted child as an immediate relative be filed before the child's 16th birthday.

Peru's Central Authority: Ministry for Women and Social Development (MIMDES)

The Process: In Peru, there are two separate processes for adoption. International adoptions are normally processed through the Ministry for Women and Social Development (MIMDES), which is in charge of certifying compliance with The Hague Adoption Convention. In cases involving Peruvian nationals adopting a blood relative, it is possible under Peruvian law to complete the adoption without involving MIMDES. If an adoption process is completed without MIMDES' prior certification of Hague compliance, it may be impossible for the United States Embassy to issue a Hague Convention adoptee visa.

The first step in adopting a child from Peru is to select an accredited or approved adoption service provider in the United States. Only these agencies and attorneys can provide adoption services between the United States and Peru.

After you choose an accredited adoption service provider, you apply to be found eligible to adopt (Form I-800A) by the USCIS. Once the United States Government determines that you have been provisionally approved as "eligible" and "suitable" to adopt, you or your adoption service provider will forward your information to the Central Authority in Peru. The MIMDES will review your application to determine whether you are also eligible to adopt under Peru's law.

If both the United States and the MIMDES Board of Directors determine that you are eligible to adopt, and a child is available for intercountry adoption, the MIMDES will tentatively assign a child to the prospective adoptive parent(s) and forward information regarding the assigned child to the parent's(s') adoption service provider. MIMDES assigns the United States adoption service provider a specific amount of time (usually 15-20 working days) to confirm the prospective adoptive parent's(s') intention to adopt the child.

Provisional custody is awarded to the prospective adoptive parents shortly after their arrival in Peru. After 10-15 days, a social worker assigned to the case will issue a report attesting to the compatibility and bonding of the child and the prospective parents. If the report is favorable, both of the prospective adoptive parents appear in court to ratify their adoption request, after which the judge may issue the final adoption decree.

After you accept a match with a child, you will apply to the USCIS for provisional approval to adopt that particular child (Form I-800, Petition to Classify a Convention adoptee as an Immediate Relative). USCIS will determine whether the child is eligible under United States immigration law to be adopted and enter the United States.

After this, your adoption service provider or you will submit a visa application to a Consular officer at the United States Embassy in Lima. If the Consular office determines that the child appears eligible to immigrate to the United States, he or she will notify MIMDES (Article 5 letter). For Convention country adoptions, prospective adoptive parent(s) may not proceed with the adoption or obtain custody for the purpose of adoption until this takes place.

The process for finalizing the adoption (or gaining legal custody) in Peru generally includes the following.

Role of the Central Authority: The MIMDES Board of Directors approves the prospective adoptive parents' completed dossier and tentatively assigns a child to them. Information concerning the child is forward to the adoption service provider. When the adoption is completed, the adoption is entered into a national adoption registry maintained by MIMDES.

Role of the Court: Provisional custody is awarded to the prospective adoptive parents shortly after their arrival in Peru. After 10-15 days, a social worker assigned to the case will issue a report attesting to the compatibility and bonding of the child and the prospective parents. If the report is favorable, both of the prospective adoptive parents appear in court to ratify their adoption request, after which the judge may issue the final adoption decree.

If married, Peruvian law mandates that both prospective adoptive parents must be present for the provisional placement, evaluation, and ratification of the adoption through the court.

Role of Adoption Service Providers: The adoption service provider assists the prospective adoptive parent(s) with completing the dossier. It will also notify the prospective adoptive parent(s) when a child has been assigned. The provider responds to the MIMDES within the mandated timeframe (usually 15–20 working days) of the parent's(s') intention to adopt the child.

Time Frame: Intercountry adoptions from Peru can be time consuming. The total time (from the initial inquiry with an approved adoption agency until the child arrives in the United States) can take many months and often over a year. Both prospective adoptive parents do not need to be present in Peru for the entire time; however, they must be present for the provisional placement, evaluation, and ratification of the adoption through the court. Prospective adoptive parents should expect to stay in Peru for approximately eight weeks (and sometimes longer) to complete an adoption.

Adoption Application: The adoption application is filed with the Ministry for Women and Social Development (MIMDES).

Adoption Fees: There are no specified adoption fees for intercountry adoptions from Peru.

Documents Required: The following is a list of some of the documents necessary to complete an intercountry adoption in Peru:

- Original birth certificates for each parent and for other children in the family;
- Marriage certificate, if applicable;
- Divorce certificate(s), where applicable;
- Death certificate in cases where the prospective adoptive parent is a widow or widower;
- Legalized copy of the prospective adoptive parent's(s') passport(s);
- Police reports from the prospective adoptive parent's(s') place of residence;
- Medical exam results;
- Photographs;
- Job letters; and
- Tax returns.

For updates on document requirements and information on how to authenticate documents, visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

Bringing Your Child Home: Once your adoption is complete (or you have obtained legal custody of the child), there are a few more steps to take before you can head home. Specifically, you need to apply for several documents for your child before he or she can travel to the United States, such as a birth certificate, a passport or travel document for your child from the country in which he or she was born, and a U.S. Immigration Visa.

Child Citizenship Act: For adoptions finalized abroad: The Child Citizenship Act of 2000 allows your new child to acquire American citizenship automatically when he or she enters the United States as lawful permanent residents. For adoptions finalized in the United States: The Child Citizenship Act of 2000 allows your new child to acquire American citizenship automatically when the court in the United States issues the final adoption decree. To learn more, review the *Intercountry Adoption* section on this publication and visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

After Adoption: Peruvian law also imposes post adoption reporting requirements for intercountry adoptions such that parents who leave Peru with their adopted child are required to report on the well-being of the child to the Peruvian Government for a set period of time after returning to their home country.

PHILIPPINES

Compiled from the October 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Republic of the Philippines

PROFILE

Geography

Area: 300,000 sq. km. (117,187 sq. mi.).
Cities: (2007 estimate): Capital—Manila (pop. 11.55 million in metropolitan area); other cities—Davao City (1.36 million); Cebu City (0.80 million).
Terrain: Islands, 65% mountainous, with narrow coastal lowlands.
Climate: Tropical, astride typhoon belt.

People

Nationality: Noun—Filipino(s). Adjective—Philippine.
Population: (2008 estimate): 90.5 million.
Annual growth rate: (2007 estimate): 2.04%.

Ethnic groups: Malay, Chinese.
Religions: (based on 2000 census): Roman Catholic 80.9%, Muslim 5%, Evangelical 2.8%, Iglesia ni Kristo 2.3%, Aglipayan 2%, other Christian 4.5%, other 1.8%, unspecified 0.6%, none 0.1%.
Languages: Pilipino (based on Tagalog), national language; English, language of government and instruction in education.
Education: Years compulsory—6 (note: 6 years of primary education free and compulsory; 4 years of secondary education free but not compulsory). Attendance (2007)—84% in elementary grades, 58% in secondary grades. Literacy (2003)—93.4%.

Health: Infant mortality rate (2006)—24 per 1,000. Life expectancy (2005)—67.80 yrs. for males; 72.50 yrs. for females.

Work force: (2007): 36.22 million. Services (including commerce and government, 2007)—50%; agriculture—35%; industry—15%.

Government

Type: Republic.

Independence: 1946.

Constitution: February 11, 1987.

Government branches: Executive—president and vice president. Legislative—bicameral legislature. Judicial—independent.

Political subdivisions: 15 regions and Metro Manila (National Capital Region), 79 provinces, 115 cities.

Political parties: Lakas-Christian Muslim Democrats, Nationalist People's Coalition, Laban ng Demokratikong Pilipino, Liberal Party, Aksiyon Demokratiko, Partido Demokratikong Pilipino-Lakas ng Bayan, and other small parties.

Suffrage: Universal, but not compulsory, at age 18.

Economy

GDP: (2007) $144.1 billion.
Annual GDP growth rate: (2007) 7.2% at constant prices.
GDP per capita: (2007) $1,627.
Natural resources: Copper, nickel, iron, cobalt, silver, gold.
Agriculture: Products—rice, coconut products, sugar, corn, pork, bananas, pineapple products, aquaculture, mangoes, eggs.
Industry: Types—textiles and garments, pharmaceuticals, chemicals, wood products, food processing, electronics assembly, petroleum refining, fishing.
Trade: (2007) Exports—$50.5 billion. Imports—$55.5 billion.

PEOPLE

The majority of Philippine people are descendants of Indonesians and Malays who migrated to the islands in successive waves over many centuries and largely displaced the aboriginal inhabitants. The largest ethnic minority now is the mainland Asians (called Chinese), who have played an important role in commerce for many centuries since they first came to the islands to trade. Arabs and Indians also traveled and traded in the Philippines in the first and early second millennium. As a result of intermarriage, many Filipinos have some Asian mainland, Spanish, American,

Arab, or Indian ancestry. After the mainland Asians, Americans and Spaniards constitute the next largest minorities in the country. More than 90% of the people are Christian as a result of the nearly 400 years of Spanish and American rule. The major non-Hispanicized groups are the Muslim population, concentrated in the Sulu Archipelago and in central and western Mindanao, and the mountain aboriginal groups of northern Luzon. Small forest tribes still live in the more remote areas of Mindanao.

About 87 languages and dialects are spoken, most belonging to the Malay-Polynesian linguistic family. Of these, eight are the first languages of more than 85% of the population. The three principal indigenous languages are Cebuano, spoken in the Visayas; Tagalog, predominant in the area around Manila; and Ilocano, spoken in northern Luzon. Since 1939, in an effort to develop national unity, the government has promoted the use of the national language, Pilipino, which is based on Tagalog.

Pilipino is taught in all schools and is gaining widespread acceptance across the archipelago. Many use English, Fukienese, or Mandarin as second languages. Nearly all professionals, academics, and government workers speak some English. In January 2003, President Gloria Macapagal-Arroyo ordered the Department of Education to restore English as the medium of instruction in all schools and universities. Only a few Filipino families use Spanish as a second language.

The Philippines has one of the highest literacy rates in the developing world. About 93 percent of the population 10 years of age and older are literate.

HISTORY

The history of the Philippines can be divided into four distinct phases: the pre-Spanish period (before 1521); the Spanish period (1521-1898); the American period (1898-1946); and the post-independence period (1946-present).

Pre-Spanish Period

The first people in the Philippines, the Negritos, are believed to have come to the islands 30,000 years ago from Borneo and Sumatra, making their way across then-existing land bridges. Subsequently, Malays came from the south in successive waves,

the earliest by land bridges and later in boats by sea. The Malays settled in scattered communities, named barangays after the large outrigger boats in which they arrived, and ruled by chieftains known as datus. Chinese merchants and traders arrived and settled in the ninth century, sometimes traveling on the ships of Arab traders, introducing Islam in the south and extending some influence even into Luzon. The Malays, however, remained the dominant group until the Spanish arrived in the 16th century.

Spanish Period

Ferdinand Magellan reached the Philippines and claimed the archipelago for Spain in 1521, but stayed for only a few days. Christianity was established in the Philippines only after the arrival of the succeeding Spanish expeditionary forces (the first led by Legazpi in the 16th century) and the Spanish Jesuits, and in the 17th and 18th centuries by the conquistadores.

Until Mexico proclaimed independence from Spain in 1810 the islands were under the administrative control of Spanish North America, and there was significant migration between North America and the Philippines. This period was the era of conversion to Roman Catholicism. A Spanish colonial social system was developed with a local government centered in Manila and with considerable clerical influence. Spanish influence was strongest in Luzon and the central Philippines but less so in Mindanao, save for certain coastal cities.

The long period of Spanish rule was marked by numerous uprisings. Towards the latter half of the 19th century, European-educated Filipinos or ilustrados (such as the Chinese Filipino national hero Jose Rizal) began to criticize the excesses of Spanish rule and instilled a new sense of national identity. This movement gave inspiration to the final revolt against Spain that began in 1896 under the leadership of Emilio Aguinaldo (another Chinese Filipino) and continued until the Americans defeated the Spanish fleet in Manila Bay on May 1, 1898, during the Spanish-American War. Aguinaldo declared independence from Spain on June 12, 1898.

American Period

Following Admiral George Dewey's defeat of the Spanish fleet in Manila Bay, the U.S. occupied the Philippines. Spain ceded the islands to the United States under the terms of the Treaty of Paris (December 10, 1898) that ended the war.

A war of resistance against U.S. rule, led by revolutionary General Aguinaldo, broke out in 1899. This conflict claimed the lives of tens of thousands of Filipinos and thousands of Americans. Filipinos and an increasing number of American historians refer to these hostilities as the Philippine-American War (1899-1902), and in 1999, the U.S. Library of Congress reclassified its references to use this term. In 1901, Aguinaldo was captured and swore allegiance to the U.S., and resistance gradually died out until the conflict ended with a Peace Proclamation on July 4, 1902. However, armed resistance continued sporadically until 1913, especially among the Muslims in Mindanao and Sulu, with heavy casualties on both sides.

U.S. administration of the Philippines was always declared to be temporary and aimed to develop institutions that would permit and encourage the eventual establishment of a free and democratic government. Therefore, U.S. officials concentrated on the creation of such practical supports for democratic government as public education, public infrastructure, and a sound legal system.

The first legislative assembly was elected in 1907, and a bicameral legislature, largely under Filipino control, was established. A civil service was formed and was gradually taken over by the Filipinos, who had effectively gained control by the end of World War I. The Catholic Church was disestablished, and a considerable amount of church land was purchased and redistributed. In 1935, under the terms of the Tydings-McDuffie Act, the Philippines became a self-governing commonwealth. Manuel Quezon was elected president of the new government, which was designed to prepare the country for independence after a 10-year transition period. World War II intervened, however, and in May 1942, Corregidor, the last American/Filipino stronghold, fell. U.S. forces in the Philippines surrendered to the Japanese, placing the islands under Japanese control. During the occupation, thousands of Filipinos fought a running guerilla campaign against Japanese forces.

The full-scale war to regain the Philippines began when General Douglas MacArthur landed on Leyte on October 20, 1944. Filipinos and Americans fought together until the Japanese surrendered in September 1945. Much of Manila was destroyed during the final months of the fighting, making it the second most devastated city in World War II after Warsaw. In total, an estimated one million Filipinos lost their lives in the war.

Due to the Japanese occupation, the guerrilla warfare that followed, and the battles leading to liberation, the country suffered great damage and a complete organizational breakdown. Despite the shaken state of the country, the U.S. and the Philippines decided to move forward with plans for independence. On July 4, 1946, the Philippine Islands became the independent Republic of the Philippines, in accordance with the terms of the Tydings-McDuffie Act. In 1962, the official Philippine Independence Day was changed from July 4 to June 12, commemorating the date independence from Spain was declared by Emilio Aguinaldo in 1898.

Post-Independence Period

The early years of independence were dominated by U.S.-assisted postwar reconstruction. The communist-inspired Huk Rebellion (1945-53) complicated recovery efforts before its successful suppression under the

leadership of President Ramon Magsaysay. The succeeding administrations of Presidents Carlos P. Garcia (1957-61) and Diosdado Macapagal (1961-65) sought to expand Philippine ties to its Asian neighbors, implement domestic reform programs, and develop and diversify the economy.

In 1972, President Ferdinand E. Marcos (1965-86) declared martial law, citing growing lawlessness and open rebellion by the communist rebels as his justification. Marcos governed from 1973 until mid-1981 in accordance with the transitory provisions of a new constitution that replaced the commonwealth constitution of 1935. He suppressed democratic institutions and restricted civil liberties during the martial law period, ruling largely by decree and popular referenda. The government began a process of political normalization during 1978-81, culminating in the reelection of President Marcos to a six-year term that would have ended in 1987. The Marcos government's respect for human rights remained low despite the end of martial law on January 17, 1981. His government retained its wide arrest and detention powers, and corruption and cronyism contributed to a serious decline in economic growth and development.

The assassination of opposition leader Benigno (Ninoy) Aquino upon his return to the Philippines in 1983 after a long period of exile coalesced popular dissatisfaction with Marcos and set in motion a succession of events that culminated in a snap presidential election in February 1986. The opposition united under Aquino's widow, Corazon Aquino, and Salvador Laurel, head of the United Nationalist Democratic Organization (UNIDO). The election was marred by widespread electoral fraud on the part of Marcos and his supporters. International observers, including a U.S. delegation led by Senator Richard Lugar (R-Indiana), denounced the official results. Marcos was forced to flee the Philippines in the face of a peaceful civilian-military uprising that ousted him and installed Corazon Aquino as president on February 25, 1986. Under Aquino's presidency, progress was made in revitalizing democratic institutions and civil liberties. However, the administration was also viewed by many as weak and fractious, and a return to full political stability and economic development was hampered by several attempted coups staged by disaffected members of the Philippine military.

Fidel Ramos was elected president in 1992. Early in his administration, Ramos declared "national reconciliation" his highest priority. He legalized the Communist Party and created the National Unification Commission (NUC) to lay the groundwork for talks with communist insurgents, Muslim separatists, and military rebels. In June 1994, President Ramos signed into law a general conditional amnesty covering all rebel groups, as well as Philippine military and police personnel accused of crimes committed while fighting the insurgents. In October 1995, the government signed an agreement bringing the military insurgency to an end. A peace agreement with one major Muslim insurgent group, the Moro National Liberation Front (MNLF), was signed in 1996, using the existing Autonomous Region in Muslim Mindanao (ARMM) as a vehicle for self-government.

Popular movie actor Joseph Ejercito Estrada's election as president in May 1998 marked the Philippines' third democratic succession since the ouster of Marcos. Estrada was elected with overwhelming mass support on a platform promising poverty alleviation and an anti-crime crackdown.

Gloria Macapagal-Arroyo, elected vice president in 1998, assumed the presidency in January 2001 after widespread demonstrations that followed the breakdown of Estrada's impeachment trial on corruption charges. The Philippine Supreme Court subsequently endorsed unanimously the constitutionality of the transfer of power. National and local elections took place in May 2004. Under the constitution, Arroyo was eligible for another six-year term as president, and she won a hard-fought campaign against her primary challenger, movie actor Fernando Poe, Jr., in elections held May 10, 2004. Noli De Castro was elected vice president.

Impeachment charges were brought against Arroyo in June 2005 for allegedly tampering with the results of the elections after purported tapes of her speaking with an electoral official during the vote count surfaced, but Congress rejected the charges in September 2005. Similar charges were discussed and dismissed by Congress in 2006 and 2007, and again raised in 2008.

GOVERNMENT AND POLITICAL CONDITIONS

The Philippines has a representative democracy modeled on the U.S. system. The 1987 constitution, adopted during the Aquino administration, reestablished a presidential system of government with a bicameral legislature and an independent judiciary. The president is limited to one six-year term. Provision also was made in the constitution for autonomous regions in Muslim areas of Mindanao and in the Cordillera region of northern Luzon, where many aboriginal tribes still live.

The 24-member Philippine Senate is elected at large, and all senators serve six-year terms. Half are elected every three years. There are currently 240 members in the House of Representatives, 219 of whom represent single-member districts. The remaining 21 House seats are occupied by sectoral party representatives elected at large, called party list representatives. All representatives serve three-year terms, with a maximum of three consecutive terms. On May 14, 2007, legislative and local elections were held. President Arroyo's coalition won the majority of the seats in the House of Representatives, gubernatorial seats, and city mayoral seats. However, the President's coalition won only three out of 12 vacant seats in the Philippine Senate. Although the election was

marred by some violence and irregularities, civil society monitoring groups played a welcome and active role in ensuring a relatively fair and democratic process. The next presidential and congressional elections are scheduled for May 2010.

The government continues to face threats from terrorist groups, including three terrorist groups on the U.S. Government's Foreign Terrorist Organization list. The terrorist Abu Sayyaf Group (ASG), which gained international notoriety with its kidnappings of foreign tourists in the southern islands, remains a major problem for the government, along with members of the Indonesian-based Jemaah Islamiyah (JI).

Efforts to track down and interdict ASG and JI members have met with some success, especially in Basilan and Jolo, where U.S. troops provide counter terrorism assistance and training to Philippine soldiers, along with conducting humanitarian activities. In August 2006, the Armed Forces of the Philippines began a major offensive against ASG and JI on the island of Jolo. This offensive was successful and resulted in the deaths of Abu Sayyaf leader Khadafy Janjalani and his deputy, Abu Solaiman. The U.S. Government provided rewards to Philippine citizens whose information led to these deaths in the military operations, as well as to many other operations against terrorist leaders. The broad-based efforts to weaken terrorist organizations have resulted in over 200 terrorists being killed or captured in 2007 and 2008.

An international monitoring team continues to watch over a cease-fire agreement between the government and the separatist Moro Islamic Liberation Front (MILF). In June 2003, the MILF issued a formal renunciation of terrorism. In August 2008, during peace talks mediated by the Government of Malaysia, the Philippine government and the MILF reached agreement in principle on a territorial agreement. However, intervention by the Philippine Supreme Court, and its subsequent October 14 ruling that the draft agreement was unconstitutional, have sent all parties back to the drawing board. Fighting flared up after the agreement was struck down in court and has continued sporadically in central Mindanao.

Principal Government Officials

Last Updated: 11/12/08

Pres.: **Gloria MACAPAGAL-ARROYO**
Vice Pres.: **Manuel Noli DE CASTRO, Jr.**
Executive Sec.: **Eduardo ERMITA**
Chief of Staff: **Jose SALCEDA**
Sec. of Agrarian Reform: **Nasser PANGANDAMAN**
Sec. of Agriculture: **Arthur YAP**
Sec. of the Budget & Management: **Rolando ANDAYA**
Sec. of Education, Culture, & Sports: **Jesli LAPUS**
Sec. of Energy: **Angelo REYES**
Sec. of Environment & Natural Resources: **Jose ATIENZA, Jr.**
Sec. of Finance: **Margarito Gary TEVES**
Sec. of Foreign Affairs: **Alberto ROMULO**
Sec. of Health: **Francisco DUQUE III**
Sec. of Interior & Local Govt.: **Ronaldo PUNO**
Sec. of Justice: **Raul GONZALEZ**
Sec. of Labor & Employment: **Marianito D. ROQUE**
Sec. of National Defense: **Gilberto TEODORO, Jr.**
Sec. of Public Works & Highways: **Hermogenes EBDANE, Jr.**
Sec. of Science & Technology: **Estrella ALABASTRO**
Sec. of Social Welfare & Development: **Esperanza CABRAL**
Sec. of Socioeconomic Planning: **Ralph RECTO**
Sec. of Tourism: **Joseph DURANO**
Sec. of Trade & Industry: **Peter FAVILA**
Sec. of Transportation & Communications: **Leandro MENDOZA**
National Security Adviser: **Norberto GONZALES**
Governor, Central Bank: **Amando TETANGCO, Jr.**
Ambassador to the US: **Willy GAA**
Permanent Representative to the UN, New York: **Hilario G. DAVIDE, Jr.**

The Republic of the Philippines maintains an embassy in the United States at 1600 Massachusetts Avenue NW, Washington, DC 20036 (tel. 202-467-9300). Consulates general are in New York, Chicago, San Francisco, Los Angeles, Honolulu, and Agana (Guam).

ECONOMY

Since the end of World War II, the Philippine economy has been on an unfortunate trajectory, going from one of the richest countries in Asia (following Japan) to one of the poorest. Growth immediately after the war was rapid, but slowed over time. Years of economic mismanagement and political volatility during the Marcos regime contributed to economic stagnation and resulted in macroeconomic instability. A severe recession from 1984 through 1985 saw the economy shrink by more than 10 percent, and perceptions of political instability during the Aquino administration further dampened economic activity.

During the 1990s, the Philippine government introduced a broad range of economic reforms designed to spur business growth and foreign investment. As a result, the Philippines saw a period of higher growth, although the Asian financial crisis in 1997 slowed Philippine economic development once again.

Despite occasional challenges to her presidency and resistance to pro-liberalization reforms by vested interests, President Arroyo made considerable progress in restoring macroeconomic stability with the help of a well-regarded economic team. Nonetheless, long-term economic growth remains threatened crumbling infrastructure and education systems, and trade and investment barriers. International competitiveness rankings have slipped.

The service sector contributes more than half of overall Philippine economic output, followed by industry (about a third), and agriculture (less than 20%). Important industries include food processing; textiles and garments; electronics and automobile parts; and business process outsourcing. Most industries are concentrated in the urban areas around metropolitan Manila. Mining also has great potential in the Philippines, which possesses significant reserves of chromate, nickel, and copper. Significant

natural gas finds off the islands of Palawan have added to the country's substantial geothermal, hydro, and coal energy reserves.

Today's Economy

The Philippine economy seems comparatively well-equipped to weather the global financial crisis in the short term as a result of the efforts over the past few years to control the fiscal deficit, bring down debt ratios, and adopt internationally-accepted banking sector capital adequacy standards. The Philippine banking sector—which comprises 80% of total financial system resources—has limited direct exposure to distressed financial institutions overseas (i.e., $2 billion, less than 2 percent of aggregate banking system assets). Conservative regulatory policies, including the prohibition of investments in structured products, shielded the insurance sector from exposure to distressed financial firms. While direct financial exposure to problematic investments and financial institutions is limited, the impact of external shocks to economic growth, poverty alleviation, employment, remittances, credit availability, and overall investment prospects is a concern.

GDP grew by 7.3 percent in 2007, the fastest annual pace of growth in over three decades, capping nine consecutive quarters of growth at greater than 5 percent. Historically, the Philippines has struggled to sustain growth over 5 percent. GDP increased by 5.4 percent in 2006, 4.9 percent in 2005, and 6.4 percent in 2004. Growth in 2007 was fueled by increased government and private construction expenditures; a robust information communications technology industry; improved post-drought agricultural harvests; and strong private consumption, spurred in part by $14.4 billion in remittances from overseas workers (equivalent to about 10 percent of GDP).

The services sector, which now accounts for about 55 percent of Philippine GDP, grew by 8.7 percent in 2007. Business process outsourcing (BPO) has been the fastest-growing segment of the Philippine economy, totaling an estimated 10 percent of the global outsourcing market and generating an estimated $5 billion in revenues in 2007 (equivalent to about 3.5 percent of Philippine GDP). BPO revenue grew 40 percent during 2006 and 2007. The construction industry grew by almost 20 percent in real terms during 2007, fueled by a 30 percent real increase in government construction expenditures and a 10 percent increase in private construction investment. Tourism and mining continued to emerge as key industries in 2007. Tourism enjoyed a record year in 2007, with over 3 million arrivals from overseas spending more than $5 billion and helping to fuel air transportation growth of 15 percent. Mining and quarrying grew by 25 percent.

However, real year-on-year GDP growth slowed to 4.6% during the first half of 2008 and is expected to end the year closer to 4%, reflecting the impact of high food and fuel prices and global financial uncertainties on the domestic economy. It will take a higher, sustained economic growth path to make more appreciable progress in poverty alleviation given the Philippines' annual population growth rate of 2 percent, one of the highest in Asia. The portion of the population living below the national poverty line increased from 30 percent to 33 percent between 2003 and 2006, equivalent to an additional 3.8 million poor Filipinos. Slower economic growth here and abroad and uncertainties over domestic and overseas employment opportunities threaten to push more Filipinos into poverty.

At $8.6 billion, the overall balance of payments ended 2007 with a record surplus resulting from higher overseas workers remittances, tourism receipts, BPO-related revenues, portfolio investments, and official development assistance funds. Growth in merchandise exports, relying heavily on electronics shipments for about two-thirds of export revenues, slowed to 6 percent (from 15 percent in 2006). January-August 2008 merchandise exports decelerated further to 4.4% growth year-on-year. Although there has been some improvement over the years, the local value added of electronics exports remains relatively low at about 30 percent. Net foreign direct investment (FDI) inflow rose from a low base to nearly $3 billion in 2006 and 2007— nearly double the 2005 level—but still lags most regional neighbors. Net FDI will end 2008 weaker, with net inflows estimated at $716 million during the first eight months of 2008, down 59% year-on-year. The BOP surplus had contracted to $2 billion as of September 2008, partly reflecting higher import bills for rice and fuel and net outflows of jittery foreign portfolio capital. The United States remains the Philippines' largest trading partner with over $17 billion in two-way trade, and the largest investor with more than $6.5 billion in total FDI.

The Philippine stock market index—which closed 2007 among the top performers in East Asia—has since declined and, as of the third week of October 2008, had slipped to a near three-year low. As of the third week of October, the index had slipped by about 27% from August 2007 and by 46% from the end of 2007. The Philippine peso, which appreciated about 16 percent against the U.S. dollar over the course of 2007, has since weakened and closed the third week of October 2008 down 18% from the beginning of the year. Gross international reserves ended 2007 up nearly 47 percent year-on-year to a new record high of $33.7 billion, and had increased further to nearly $36.7 billion as of September 2008, adequate for nearly 6 months of goods and services imports and equivalent to 2.7 times foreign debts maturing over the next 12 months.

Efforts in recent years to reduce the public sector deficit by raising new taxes have helped reduce high debt ratios, create additional fiscal space to increase spending on vital social services and infrastructure after years of tight budgets, and improve confidence. December 2004 legislation provided for biennial adjustments to the excise tax rates for tobacco and liquor products until 2011, while a law signed in January

2005 seeks to institute a performance-based rewards system in the government's revenue collection agencies.

The national government worked to reduce its fiscal deficits for five consecutive years to 0.1 percent of GDP in 2007 and had hoped to balance the budget in 2008, two years ahead of its original plan. The government has since reverted to the 2010 balanced-budget schedule in order to stimulate the economy and temper the adverse impact of global external shocks on the already high number of Filipinos struggling with poverty. The national government's deficit-reduction program helped yield modest primary surpluses during 2006 and 2007. While more reforms and greater transparency are needed, tighter financial controls over state-owned companies and initiatives to improve the longer-term viability of state-run pension funds also contributed to recent surpluses. Although still high, the debt of the consolidated public sector has declined to under 75 percent of GDP. Major credit rating agencies raised their rating outlook for Philippine sovereign debt from "negative" to "stable" in recognition of fiscal progress and declining debt ratios. Looking forward, further reforms are needed to ease fiscal pressures from large losses being sustained by a number of government-owned firms and to control and manage contingent liabilities. Despite recent improvements, challenges still remain to the long-term viability of state-run pension funds. The national government's tax-to-GDP ratio (14% in 2007) remains low relative to historical performance and vis-à-vis regional standards. The government has intermittently relied on heftier privatization receipts to make up for the shortfall in targeted tax collections but this is not a sustainable revenue source.

The Philippine Congress enacted an anti-money laundering law in September 2001 and followed through with amendments in March 2003 to address remaining legal concerns posed by the Organization for Economic Cooperation and Development (OECD) Financial Action Task Force (FATF). The FATF removed the Philippines from its list of Non-Cooperating Countries and Territories in February 2005, noting the significant progress made to remedy concerns and deficiencies identified by the FATF to improve implementation. The Egmont Group, the international network of financial intelligence units, admitted the Philippines to its membership in June 2005.

Seven years after the Arroyo administration enacted legislation to rationalize the electric power sector and privatize the government's debt-saddled National Power Corporation (NPC), significant progress was made in 2007, notably the privatization of the state-owned transmission company (Transco) and sales of 68% of total generating assets in Luzon and the Visayas.

The U.S. Trade Representative removed the Philippines from its Special 301 Priority Watch List in 2006, reflecting improvement in its enforcement of intellectual property rights (IPR) protection. It maintained the Philippines on the Special 301 Watch List in 2007. However, sustained effort and continuing progress on key IPR issues will be essential to maintain this status.

Despite a number of policy reforms, the Philippines continues to face important challenges and must sustain the reform momentum to catch up with regional neighbors, spur investments, achieve higher growth, generate employment, and alleviate poverty for a rapidly expanding population. Absent new revenue measures, sustained fiscal stability will require more aggressive tax collection efficiency to address the severe under-spending in infrastructure and social services after years of tight budgets. Continuing efforts to fast-track power sector privatization remain critical to the long-term stability of public sector finances, ensuring reliable electricity supply, and bringing down the cost of power.

Potential foreign investors, as well as tourists, remain concerned about law and order, inadequate infrastructure, policy and regulatory instability, and governance issues. While trade liberalization presents significant opportunities, intensifying global competition and the emergence of low-wage export economies also pose challenges. Competition from other Southeast Asian countries and from China for investment underlines the need for sustained progress on structural reforms to remove bottlenecks to growth, to lower costs of doing business, and to promote good public and private sector governance. The government has been working to reinvigorate its anti-corruption drive, and the Office of the Ombudsman has reported improved conviction rates. Nevertheless, its slipping anti-corruption ranking indicates that the Philippines' efforts are lagging and that more needs to be done to improve international perception of its anti-corruption campaign—an effort that will require strong political will and significantly greater financial and human resources.

Agriculture and Forestry

Arable farmland comprises more than 40 percent of the total land area. Although the Philippines is rich in agricultural potential, inadequate infrastructure, lack of financing, and government policies have limited productivity gains. Philippine farms produce food crops for domestic consumption and cash crops for export. The agricultural sector employs more than one-third of the work force but provides less than a fifth of GDP.

Decades of uncontrolled logging and slash-and-burn agriculture in marginal upland areas have stripped forests, with critical implications for the ecological balance. Although the government has instituted conservation programs, deforestation remains a severe problem.

With its 7,107 islands, the Philippines has a very diverse range of fishing areas. Notwithstanding good prospects for marine fisheries, the industry continues to face a difficult future due to destructive fishing methods, a lack of funds, and inadequate government support.

Agriculture generally suffers from low productivity, low economies of scale, and inadequate infrastructure support. Agricultural output increased by 5.1 percent in real terms during 2004 but stagnated to 2.24 percent in 2005 due to drought and intermittent weather disturbances. Despite the adverse effects of successive and very strong typhoons in the last four months of 2006, the overall annual farm output expanded by 3.8 percent. In 2007, the sector grew by 4.68 percent, led by gains in the fisheries subsector.

Industry

Industrial production is centered on the processing and assembly operations of the following: food, beverages, tobacco, rubber products, textiles, clothing and footwear, pharmaceuticals, paints, plywood and veneer, paper and paper products, small appliances, and electronics. Heavier industries are dominated by the production of cement, glass, industrial chemicals, fertilizers, iron and steel, and refined petroleum products. Newer industries, particularly production of semiconductors and other intermediate goods for incorporation into consumer electronics are important components of Philippine exports and are located in special export processing zones.

The industrial sector is concentrated in urban areas, especially in the metropolitan Manila region, and has only weak linkages to the rural economy. Inadequate infrastructure, transportation, and communication have so far inhibited faster industrial growth, although significant strides have been made in addressing the last of these elements.

Mining

The Philippines is one of the world's most highly mineralized countries, with untapped mineral wealth estimated at more than $840 billion. Philippine copper, gold, and chromate deposits are among the largest in the world. Other important minerals include nickel, silver, coal, gypsum, and sulfur. The Philippines also has significant deposits of clay, limestone, marble, silica, and phosphate. The discovery of natural gas reserves off Palawan has been brought on-line to generate electricity.

Despite its rich mineral deposits, the Philippine mining industry is just a fraction of what it was in the 1970s and 1980s when the country ranked among the ten leading gold and copper producers worldwide. Low metal prices, high production costs, and lack of investment in infrastructure have contributed to the industry's overall decline. A December 2004 Supreme Court decision upheld the constitutionality of the 1995 Mining Act, thereby allowing up to 100% foreign-owned companies to invest in large-scale exploration, development, and utilization of minerals, oil, and gas.

FOREIGN RELATIONS

In its foreign policy, the Philippines cultivates constructive relations with its Asian neighbors, with whom it is linked through membership in the Association of Southeast Asian Nations (ASEAN), the ASEAN Regional Forum (ARF), and the Asia-Pacific Economic Cooperation (APEC) forum. The Philippines chaired ASEAN from 2006 to 2007, hosting the ASEAN Heads of State Summit and the ASEAN Regional Forum. The Philippines is a member of the UN and some of its specialized agencies, and served a two-year term as a member of the UN Security Council from January 2004-2006, acting as UNSC President in September 2005. Since 1992, the Philippines has been a member of the Non-Aligned Movement. The government is seeking observer status in the Organization of the Islamic Conference (OIC). The Philippines has played a key role in ASEAN in recent years, ratifying the ASEAN Charter in October 2008. The Philippines also values its relations with the countries of the Middle East, in no small part because hundreds of thousands of Filipinos are employed in that region. The welfare of the some four to five million overseas Filipino contract workers is considered to be a pillar of Philippine foreign policy. Foreign exchange remittances from these workers exceed 11 percent of the country's gross domestic product.

The fundamental Philippine attachment to democracy and human rights is also reflected in its foreign policy. Philippine soldiers and police have participated in a number of multilateral civilian police and peacekeeping operations, and a Philippine Army general served as the first commander of the UN Peacekeeping Operation in East Timor. The Philippines presently has peacekeepers in Haiti and Liberia. The Philippines also participated in Operation Iraqi Freedom, deploying some 50 troops to Iraq in 2003. (These troops were subsequently withdrawn in 2004 after a Filipino overseas worker was kidnapped.) The Philippine Government also has been active in efforts to reduce tensions among rival claimants to the territories and waters of the resource-rich South China Sea.

U.S.-PHILIPPINE RELATIONS

U.S.-Philippine relations are based on shared history and commitment to democratic principles, as well as on economic ties. The historical and cultural links between the Philippines and the U.S. remain strong. The Philippines modeled its governmental institutions on those of the U.S. and continues to share a commitment to democracy and human rights. At the most fundamental level of bilateral relations, human links continue to form a strong bridge between the two countries. There are an estimated four million Americans of Philippine ancestry in the United States, and more than 250,000 American citizens in the Philippines.

Until November 1992, pursuant to the 1947 Military Bases Agreement, the United States maintained and operated major facilities at Clark Air Base, Subic Bay Naval Complex, and several small subsidiary installations in the Philippines. In August 1991, negotiators from the two countries

reached agreement on a draft treaty providing for use of Subic Bay Naval Base by U.S. forces for 10 years. The draft treaty did not include use of Clark Air Base, which had been so heavily damaged by the 1991 eruption of Mount Pinatubo that the U.S. decided to abandon it.

In September 1991, the Philippine Senate rejected the bases treaty, and despite further efforts to salvage the situation, the two sides could not reach an agreement. As a result, the Philippine Government informed the U.S. on December 6, 1991, that it would have one year to complete withdrawal. That withdrawal went smoothly and was completed ahead of schedule, with the last U.S. forces departing on November 24, 1992. On departure, the U.S. Government turned over assets worth more than $1.3 billion to the Philippines, including an airport and ship-repair facility. Agencies formed by the Philippine Government have converted the former military bases for civilian commercial use, with Subic Bay serving as a flagship for that effort. The post-U.S. bases era has seen U.S.-Philippine relations improved and broadened, with a prominent focus on economic and commercial ties while maintaining the importance of the security dimension. U.S. investment continues to play an important role in the Philippine economy, while a strong security relationship rests on the 1952 U.S.-Philippines Mutual Defense Treaty (MDT). In February 1998, U.S. and Philippine negotiators concluded the Visiting Forces Agreement (VFA), paving the way for increased military cooperation under the MDT. The agreement was approved by the Philippine Senate in May 1999 and entered into force on June 1, 1999. Under the VFA, the U.S. has conducted ship visits to Philippine ports and has resumed large combined military exercises with Philippine forces. Key events in the bilateral relationship include the July 4, 1996 declaration by President Ramos of Philippine-American Friendship Day in commemoration of the 50th anniversary of Philippine independence. Ramos visited the U.S. in April 1998, and then-President Estrada visited in July 2000. President Arroyo met with President Bush in an official working visit in November 2001 and made a state visit in Washington on May 19, 2003. President Bush made a state visit to the Philippines on October 18, 2003, during which he addressed a joint session of the Philippine Congress—the first American President to do so since Dwight D. Eisenhower. There are regular U.S. cabinet-level and congressional visits to the Philippines as well.

President Arroyo has repeatedly stressed the close friendship between the Philippines and the U.S. and her desire to expand bilateral ties further. Both governments seek to revitalize and strengthen their partnership by working toward greater security, prosperity, and service to Filipinos and Americans alike. Inaugurated into office on the same day as President Bush, President Arroyo lent strong support to the global war on terrorism. In October 2003, the U.S. designated the Philippines as a Major Non-NATO Ally. That same month, the Philippines joined the select group of countries to have ratified all 12 UN counterterrorism conventions.

The annual Balikatan (Shoulder-to-Shoulder) bilateral military exercises contribute directly to the Philippine armed forces' efforts to root out Abu Sayyaf and Jemaah Islamiyah terrorists and bring development to formerly terrorist-plagued areas, notably Basilan and Jolo. They include not only combined military training but also civil-military affairs and humanitarian projects. The International Military Education and Training (IMET) program is the largest in the Pacific and the third-largest in the world, and a Mutual Logistics Support Agreement (MLSA) was signed in November 2002. Similarly, law enforcement cooperation has reached new levels: U.S. and Philippine agencies have cooperated to bring charges against numerous terrorists, to implement the countries' extradition treaty, and to train thousands of Filipino law enforcement officers. There is a Senior Law Enforcement Advisor helping the Philippine National Police with its Transformation Program. In FY 2008, the U.S. Government—working closely with the Philippine Government, civil society, the private sector, and other donors—provided $132 million in grant funds to support a more peaceful and prosperous Philippines. About 60 percent of economic assistance resources are targeted for Mindanao, for programs that promote economic growth, mitigate conflict, and promote peace and security. The United States supports programs that promote good governance at the national and local levels, improve electoral systems, promote rule of law, help address constraints to trade and investment, improve revenue collection/administration and fiscal transparency, and enhance the ability of military and civilian law enforcement agencies to maintain peace and security. Many programs across other sectors—including health, education, agricultural productivity, microenterprise development, and natural resource management—also support improved governance, human capital development, poverty alleviation, and/or sustainable growth. Health-related assistance programs include reproductive health, maternal and child care, tuberculosis and HIV/AIDS control, and avian flu preparedness. The United States also provides humanitarian assistance to internally-displaced persons in conflict-affected areas and to victims of natural disasters (including $5 million in reconstruction assistance for the typhoon-battered Bicol region in FY 2007). In 2006, the Millennium Challenge Corporation (MCC) granted $21 million to the Philippines for a two-year Threshold Program targeted at addressing corruption in revenue administration and improving the capabilities of the Office of the Ombudsman. The success of this Threshold Program contributed to the MCC awarding the Philippines Compact eligibility status in March 2008.

Nearly 400,000 Americans visit the Philippines each year. Providing government services to U.S. and other citizens, therefore, constitutes an important aspect of the bilateral relationship. Those services include veterans' affairs, social security, and

consular operations. Benefits to Filipinos and U.S. citizens resident in the Philippines from the U.S. Department of Veterans Affairs and the Social Security Administration totaled approximately $330 million in 2007. Many people-to-people programs exist between the United States and the Philippines, including Fulbright, International Visitors, and Aquino Fellowship exchange programs, as well as the U.S. Peace Corps.

Trade and Investment

In FY 2008, the U.S. Government—working closely with the Philippine Government, civil society, the private sector, and other donors—provided $132 million in grant funds to support a more peaceful and prosperous Philippines. About 60 percent of economic assistance resources are targeted for Mindanao, for programs that promote economic growth, mitigate conflict, and promote peace and security. The United States supports programs that promote good governance at the national and local levels, improve electoral systems, promote rule of law, help address constraints to trade and investment, improve revenue collection/administration and fiscal transparency, and enhance the ability of military and civilian law enforcement agencies to maintain peace and security. Many programs across other sectors—including health, education, agricultural productivity, micro-enterprise development, and natural resource management—also support improved governance, human capital development, poverty alleviation, and/or sustainable growth. Health-related assistance programs include reproductive health, maternal and child care, tuberculosis and HIV/AIDS control, and avian flu preparedness. The United States also provides humanitarian assistance to internally-displaced persons in conflict-affected areas and to victims of natural disasters (including $5 million in reconstruction assistance for the typhoon-battered Bicol region in FY 2007). In 2006, the Millennium Challenge Corporation (MCC) granted $21 million to the Philippines for a two-year Threshold Program targeted at addressing corruption in revenue administration and improving the capabilities of the Office of the Ombudsman. The success of this Threshold Program contributed to the MCC awarding the Philippines Compact eligibility status in March 2008.

Nearly 400,000 Americans visit the Philippines each year. Providing government services to U.S. and other citizens, therefore, constitutes an important aspect of the bilateral relationship. Those services include veterans' affairs, social security, and consular operations. Benefits to Filipinos and U.S. citizens resident in the Philippines from the U.S. Department of Veterans Affairs and the Social Security Administration totaled approximately $330 million in 2007. Many people-to-people programs exist between the United States and the Philippines, including Fulbright, International Visitors, and Aquino Fellowship exchange programs, as well as the U.S. Peace Corps.

TRAVEL

Consular Information Sheet

June 17, 2008

Country Description: The Philippines is an emerging economy with a democratic system of government, located in Southeast Asia. The archipelago consists of more than 7,000 islands, of which over 800 are inhabited. The major island groupings are Luzon in the north, the Visayas in the center and Mindanao in the south. Tourist facilities are available within population centers and the main tourist areas. English is widely spoken in the Philippines, and most signs are in English.

Entry Requirements: U.S. citizens may enter the Philippines without a visa upon presentation of their U.S. passport, valid for at least six months after the date of entry into the Philippines, and a return ticket to the United States or an onward ticket to another country. Upon arrival immigration authorities will annotate your passport with an entry visa valid for 21 days. If you plan to stay longer than 21 days you must apply for an extension at the Philippine Bureau of Immigration and Deportation's main office at Magallanes Drive; Intramuros, Manila, Philippines, or at any of its provincial offices (http://www.immigration.gov.ph).

Persons who overstay their visas are subject to fines and detention by Philippine immigration authorities.

American citizens are urged to remain aware of their visa status while in the Philippines and to strictly follow immigration laws and regulations. Travelers departing the country from international airports must pay a Passenger Service Charge in Philippine Pesos. For further information on entry/exit requirements, please contact the Embassy of the Philippines at: 1600 Massachusetts Avenue N.W., Washington, DC 20036 (telephone: (202) 467-9300), or one of the Philippine consulates in the United States (Chicago, Honolulu, Los Angeles, New York, and San Francisco) or via the Internet at http://www.philippineembassy-usa.org.

Special requirements exist for the entry of unaccompanied minors. In an effort to prevent international child abduction, the Philippine government requires that a waiver of exclusion be obtained from a Philippine Embassy or Consulate or from the Bureau of Immigration and Detention in Manila for a child under 15 years of age who plans to enter the Philippines unaccompanied by either a parent or legal guardian prior to the child's entry into the Philippines.

Safety and Security: U.S. citizens contemplating travel to the Philippines should carefully consider the risks to their safety and security while there, including those due to terrorism. While travelers may encounter such threats anywhere in the Philippines, the southern island of Mindanao and the Sulu Archipelago are of particular concern. Travelers should exercise extreme caution in both central and western Mindanao as well as in the Sulu Archipelago.

Kidnap for ransom gangs operate in the Philippines. In October 2007, one such gang abducted a visiting U.S. citizen whose whereabouts are unknown at this time. Several other foreigners were also kidnapped for ransom in 2007. The New People's Army (NPA), a terrorist organization, operates in many rural areas of the Philippines, including in the northern island of Luzon. While it has not targeted foreigners in several years, the NPA could threaten U.S. citizens engaged in business or property management activities, and it often demands "revolutionary taxes."

Terrorist groups, such as the Abu Sayyaf Group, the Jema'ah Islamiyah and groups that have broken away from the more mainstream Moro Islamic Liberation Front or Moro National Liberation Front, have carried out bombings resulting in deaths, injuries and property damage. In November 2007, a bombing outside the House of Representatives in Metro Manila resulted in a number of deaths and injuries to bystanders. On January 3, 2008, a bomb exploded at a Cotabato City disco pub, killing one and injuring eight. The central and western areas of Mindanao have also experienced bombings targeting bus terminals and public buildings. While those responsible do not appear to have targeted foreigners, travelers should remain vigilant and avoid congregating in public areas; U.S. Government employees must seek special permission for travel to Mindanao or the Sulu Archipelago. When traveling in Mindanao, U.S. official travelers attempt to lower their profile, limit their length of stay and exercise extreme caution. Some foreigners who reside in or visit western and central Mindanao hire their own private security personnel.

For the latest security information, Americans traveling abroad should regularly monitor the Department of State, Bureau of Consular Affairs' web site at http://travel.state.gov, where the current Travel Warnings and Travel Alerts, as well as the Worldwide Caution, can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S. and Canada, or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: As in many of the major metropolitan areas in the United States, crime is a significant concern in Metro Manila. As a rule of thumb, Americans should exercise good judgment and remain aware of their surroundings. Reports of confidence games, pick pocketing, internet scams and credit card fraud are common. Be wary of unknown individuals who attempt to befriend you, especially just after you arrive in country. A number of robberies and assaults involving the "date rape drug" (known locally as Ativan) have occurred; the drug is generally administered to unwitting male or female victims via food or drink. It is best not to accept food, drink, or rides in private vehicles from strangers, even if they appear legitimate. While Americans are not typically targeted for kidnapping, kidnappings and violent assaults do occur in the Metro Manila area.

Taxis are the recommended form of public transportation. However, the following safeguards are important: do not enter a taxi if it has already accepted another passenger; and request that the meter be used. If the driver is unwilling to comply with your requests, it is best to wait for another cab. It is also a good idea to make a mental note of the license plate number should there be a problem. When driving in the city, make certain that the doors are locked and the windows rolled up. All other forms of public transportation, such as the light rail system, buses and "jeepneys" should be avoided for both safety and security reasons.

Visitors should also be vigilant when using credit cards. One common form of credit card fraud involves the illicit use of an electronic device to retrieve and record information, including the PIN, from the card's magnetic strip. The information is then used to make unauthorized purchases. To limit your vulnerability to this scam, never let your card out of your sight.

A continuing problem is the commercial scam or sting that attempts to sell or to seek negotiation of fraudulent U.S. securities. Visitors and residents should be wary when presented with supposed Federal Reserve Notes or U.S. securities for sale or negotiation. For further information, consult the Federal Reserve System's web site at http://www.federalreserve.gov.

In many countries around the world, counterfeit and pirated goods are

widely available. Transactions involving such products may be illegal under local law. In addition, bringing them back to the United States may result in forfeitures and/or fines. More information on this serious problem is available at http://www.cybercrime.gov/18usc2320.htm.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

The Philippines has a victim compensation program to provide financial compensation to victims of violent or personal crime and of unjust imprisonment. Information may be obtained from the Philippine Department of Justice at 011-632-536-0447 or via the Internet at http://www.doj.gov.ph.

Medical Facilities and Health Information: Adequate medical care is available in major cities in the Philippines, but even the best hospitals may not meet the standards of medical care, sanitation, and facilities provided by hospitals and doctors in the United States. Medical care is limited in rural and more remote areas.

Serious medical problems requiring hospitalization and/or medical evacuation to the United States can cost several or even tens of thousands of dollars. Most hospitals will require a down payment of estimated fees in cash at the time of admission. In some cases, public and private hospitals have withheld lifesaving medicines and treatments for nonpayment of bills. Hospitals also frequently refuse to discharge patients or release important medical documents until the bill has been paid in full. A list of doctors and medical facilities in the Philippines is available on the web page of the U.S. Embassy in Manila at http://manila.usembassy.gov.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's web site at http://wwwn.cdc.gov/travel. Tuberculosis is an increasingly serious health concern in the Philippines. For further information, please consult the CDC's Travel Notice on TB, http://wwwn.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith/en.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning the Philippines is provided for general reference only, and may not be totally accurate in a particular location or circumstance. Travel within the Philippine archipelago is possible by boat, plane, bus, or car. Few tourists rent cars to drive, as the road system is crowded and drivers are undisciplined. Driving off the national highways and paved roads is particularly dangerous, especially at night, and should be avoided. To avoid overcrowded or unsafe transport, exercise caution in planning travel by older, inter-island ferryboats, or other public conveyances. For specific information concerning Philippine driver's permits, vehicle inspection, road tax and mandatory insurance, please contact the Philippine Embassy in Washington, D.C. at tel. (202) 467-9300 or one of the Philippine consulates in the United State (Chicago, Honolulu, Los Angeles, New York, and San Francisco) or via the Internet at http://www.philippineembassy-usa.org. Please see also related information from the Philippine Department of Tourism at http://www.tourism.gov.ph and http://www.dotpcvc.gov.ph.

Aviation Safety Oversight: The U.S. Federal Aviation Administration (FAA) has assessed the Government of the Philippine's Civil Aviation Authority as not being in compliance with International Civil Aviation Organization (ICAO) aviation safety standards for oversight of the Philippine's air carrier operations. For more information, travelers may visit the FAA's web site at http://www.faa.gov.

Marriage in the Philippines: The Philippine Government requires foreigners who wish to marry in the Philippines to obtain from the U.S. Embassy a "Certificate of Legal Capacity to Contract Marriage" before filing an application for a marriage license. Because there is no national register of marriages in the United States, the U.S. Embassy cannot provide such a certification. As a result, the Philippine Government will accept an "Affidavit in Lieu of a Certificate of Legal Capacity to Contract Marriage" in its place. Americans may execute this affidavit at the U.S. Embassy in Manila Monday-Friday, between 8:00 a.m. and 10:00 a.m., except for Philippine or American holidays. The American must present his/her U.S. passport. There is a fee of $30.00 or its peso equivalent for the affidavit. Philippine authorities will not accept any substitute document issued in the United States. Before traveling to the Philippines to be married, U.S. military personnel should contact their personnel office regarding Department of Defense joint service regulations.

Execution of the affidavit by a U.S. consular officer is a notarial act and the consular officer is authorized by U.S. law to refuse to perform the service if the document will be used for a purpose patently unlawful, improper, or inimical to the best interests of the United States. Entering into a marriage contract for the principal purpose of facilitating immigration to the United States for an alien is an unlawful act, and the U.S. Code provides penalties for individuals who commit perjury in an affidavit taken by a consular officer.

Relationship fraud is a persistent problem in the Philippines, and it is not uncommon for Filipinos to enter into marriages with Americans solely for immigration purposes. Relationships developed via correspondence, particularly those begun on the Internet, are particularly susceptible to manipulation.

The Marriage Application Process: Once an American citizen has obtained from the U.S. Embassy an "Affidavit in Lieu of a Certificate of Legal Capacity to Contract Marriage," he/she may file an application for a marriage license at the office of the Philippine Civil Registrar in the town or city where one of the parties is a resident. The U.S. citizen applicant must present: (a) the affidavit; (b) divorce decree(s) or death certificate(s), if applicable (required to verify civil status and legal capacity to contract marriage); (c) his/her U.S. passport; and (d) documentation regarding parental consent or advice, if applicable. (Persons aged 18 to 21 must have written parental consent to marry in the Philippines; those aged 22 to 24 must have received parental advice. Philippine law prohibits marriage for persons under the age of 18.) A judge, a minister, or other person authorized by the Philippine Government can perform the marriage. Marriage to a U.S. citizen confers neither citizenship nor an automatic eligibility for entry to the United States. A foreign spouse requires an immigrant visa to live in the United States. Questions about filing a petition to bring a foreign spouse to the United States may be directed to the nearest U.S. Citizenship and Immigration Service office, to the U.S. Department of State's Visa Office (telephone: (202) 663-1225) or, while in the Philippines, to the U.S. Embassy's Immigrant Visa Unit at http://philippines.usembassy.gov.

Disaster Preparedness: The Philippines is a volcano-, typhoon- and earthquake-prone country. From May to December, typhoons and flash floods often occur. Flooding can cause road delays and cut off bridges. Typhoons in the vicinity of the Philippines can interrupt air and sea links within the country. Updated information on typhoons is available at the following web sites: http://metocph.nmci.navy.mil; http://www.pagasa.com and http://www.pagasa.dost.gov.ph. Volcanic activity is frequent, and periodically the Philippine Government announces alerts for specific volcanoes. Updated information on volcanoes in the Philippines is available at http://volcanoes.usgs.gov. Earthquakes can also occur throughout the country. General information about natural disaster preparedness is available via the Internet from the Philippines National Disaster Coordinating Council (NDCC) at http://ndcc.gov.ph/ndcc/ and from the U.S. Federal Emergency Management Agency (FEMA) at http://www.fema.gov.

Customs Regulations: Philippine customs authorities enforce strict regulations concerning temporary importation into or export from the Philippines of items such as firearms and currency. It is advisable to contact the Embassy of the Philippines in Washington, DC or one of the Philippine consulates in the United States (Chicago, Honolulu, Los Angeles, New York, and San Francisco) for specific information regarding customs requirements. Counterfeit and pirated goods are widely available in the Philippines; transactions involving such products are illegal and bringing them back to the United States may result in forfeitures and/or fines.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating the Philippine's laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in the Philippines are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Under the Protect Act of April 2003, it is a crime, prosecutable in the United States, for a U.S. citizen or permanent resident alien, to travel to a foreign country to engage in criminal sexual activity or to engage in illicit sexual conduct in a foreign country. It is important to note that under the new legislation, the act of illicit sexual conduct is sufficient to violate the law—the intent to travel for the purpose of engaging in the criminal sexual activity does not need to be proven. For purposes of the PROTECT Act, illicit sexual conduct means: (1) a sexual act with a person under 18 years of age that would be illegal in the United States or (2) any commercial sex act in a foreign country with a person under the age of 18.

The Philippine Bureau of Immigration arrests several Americans each year on immigration charges of "undesirability," sometimes based solely on complaints arising from personal or business disputes in the Philippines. Frequently, these detainees cannot be deported and/or released from custody until substantial fines are paid and any underlying criminal charges are resolved—a process that sometimes takes months, or even years. Fraud, swindling, "bad debts," and failure to provide spousal and child support are also serious criminal offenses in the Philippines, as is the illegal recruitment of Philippine citizens for employment overseas. Several Americans are currently serving lengthy prison sentences for illegal recruitment activi-

ties. The Philippine Government also has strict laws against the possession of firearms, and several foreigners have been sentenced to life imprisonment for bringing firearms into the country. Americans who are arrested overseas should immediately ask to contact a U.S. Embassy representative.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in the Philippines are encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration web site so that they can obtain updated information on travel and security within the Philippines. Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency. The U.S. Embassy is located at: 1201 Roxas Boulevard, Manila, Philippines, tel. (63) (2) 301-2000. The American Citizen Services (ACS) section's fax number is (63) (2) 522-3242 and the ACS web page is at http://philippines.usembassy.gov.

Intercountry Adoption

November 2008

The information in this section has been edited from a report available through the U.S. Department of State Office of Children's Issues. For more information detailed, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

The Philippines is party to The Hague Convention on Protection of Children and Co-operation in Respect of Intercountry Adoption (Hague Adoption Convention). Therefore all adoptions between The Philippines and the United States must meet the requirements of the Convention and United States law implementing the Convention. For detailed information on these requirements for adoption, please review the *Intercountry Adoption* section of this publication and visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

Who Can Adopt? To bring an adopted child to United States from The Philippines, you must be found eligible to be an adoptive parent by the United States Government. In addition to the United States requirements for adoptive parents, The Philippines also has the following requirements for adoptive parents.

Residency Requirements: United States citizens interested in adopting a Filipino child while they are living in The Philippines must be residents of the Philippines for at least three years prior to the filing of the adoption petition, maintain such residence until the adoption is finalized, and posses a certificate of legal capacity to adopt issued by the appropriate agency from the state of residence.

Prospective adoptive parents who meet these requirements should file a petition for adoption with the Philippines Court to begin the adoption process.

United States citizens not meeting these residency requirements will have to adopt through the Inter-Country Adoption Board procedures.

The Philippines Government may waive these requirements if the prospective adoptive parent is a former Filipino citizen who seeks to adopt a relative within the fourth degree of consanguinity as defined by Philippines law, or the prospective adoptive parent is a person who seeks to adopt the legitimate child of his/her Filipino spouse.

Age Requirements: There is no age limit for married prospective adoptive parents. Single prospective adoptive parents must be at least 24 years old at the time of filing the adoption petition.

Marriage Requirements: If prospective adoptive parents are married, they must file jointly for adoption.

Income Requirements: There are no minimum income requirements set by The Philippines. Prospective Adoptive Parents must prove financial stability.

Other Requirements: Prospective adoptive parents must not have ever been convicted of a crime involving moral turpitude. Parents must be in a position to provide proper care and support and to give necessary moral values and example to all his/her children, including the child to be adopted. Prospective adoptive parents agree to uphold the basic rights of the child as embodied under The Philippines laws and the U.N. Convention on the Rights of the Child.

Who Can Adopt? The Philippines has specific requirements that a child must meet in order to be eligible for adoption. In addition to these requirements, a child must meet the definition of an orphan under United States law for you to bring him or her home back to the United States.

Relinquishment Requirements: A child is "committed" by way of the "Deed of Voluntary Commitment," a document used by DSWD asking for signature from the biological parents prior to matching the child with a prospective adoptive parent. The document is essentially the consent of the parent(s), releasing the child to DSWD for subsequent adoption. In the event that the child is abandoned or neglected and no parent is available to sign the "Deed of Voluntary Commitment," the DSWD instead obtains a commitment order from the court. This endorsement certifies that intercountry adoption is in the best interests of the child.

The Philippine's Adoption Authority: The Inter-Country Adoption Board

The Process: The first step in adopting a child from The Philippines is to select an adoption service provider in the United States that has been

accredited. Only these agencies and attorneys can provide adoption services between the United States and The Philippines.

After you choose an accredited adoption service provider, you apply to be found eligible to adopt (Form I-800A) by the USCIS. Once the United States Government determines that you are "eligible" and "suitable" to adopt, you or your agency will forward your information to the adoption authority in The Philippines. The Philippines' adoption authority will review your application to determine whether you are also eligible to adopt under Filipino law.

The Philippines adoption authority matches the prospective adoptive parents with a child. The Central Authority prepares a report that determines that: the child is adoptable, the envisaged placement is in the best interest of the child, the birth parent or legal custodian has freely consented in writing to the adoption, and no payment has been made to obtain the consent necessary for the adoption to be completed.

After you accept a referral to a child, you will apply to the US Government, Department of Homeland Security, United States Citizenship and Immigration Services (USCIS) for provisional approval to adopt that particular child (Form I-800).

The Consular officer will review the child's information and evaluate the child for possible visa ineligibilities. If the Consular office determines that the child appears eligible to immigrate to the United States, he/she will notify the Philippines' adoption authority (Article 5 letter). For Convention country adoptions, prospective adoptive parent(s) may not proceed with the adoption or obtain custody for the purpose of adoption until this takes place.

Role of the Court: The Regional Trial Courts are responsible for domestic adoptions in The Philippines. This is where prospective adoptive parents file adoption petitions.

Adoption Application: To start the Philippine adoption process, prospective adoptive parents or their accredited FAA must contact the Philippine Inter-country Adoption Board (ICAB).

The prospective adoptive parents file an application with the ICAB through a United States adoption agency. The Department of Social Welfare and Development (DSWD) should endorse to the ICAB a child who has been previously committed to the Philippine Government.

The Inter-Country Adoption Placement Committee matches the child with a person or couple interested in adopting and refers its proposal to ICAB for approval. If the match is approved, the concerned adoption agency in the United States shall be sent a notice of matching proposal.

The prospective adoptive parents shall notify the adoption agency in the United States of his/her decision within 15 days of receipt of the matching proposal. The Philippine Inter-Country Adoption Act prohibits contact between the prospective adoptive parents and child's parents / guardians or custodians.

The ICAB shall issue the Placement Authority within five working days upon receipt of the prospective adoptive parents' acceptance of the matching proposal.

The adoptive parents must escort the child from The Philippines to the United States. Upon assuming custody of the child, the adoptive parents enter a six-month trial period where the accredited adoption agency in the United States monitors the child's welfare.

After completion of the trial custody period, the adoptive parent should file a petition for adoption before the court in the United States. The final United States adoption decree should be submitted to ICAB within a month after its issuance.

Time Frame: Adoption processing depends upon many variables, including the availability of children to be matched with prospective adoptive parents, the number of prospective adoptive parents on the waiting list, and the caseload of social service agencies and the courts.

Adoption Fees: Fees can vary widely depending upon the adoption agency used.

Documents Required: The following documents, which must be written and officially translated into English, shall accompany the prospective adoptive parents' application for adoption:

- Family and Home Study Reports on the family and home of the prospective adoptive parents;
- Birth Certificates of prospective adoptive parents;
- Marriage certificate or Decree of Absolute divorce, if applicable;
- Written consent of the prospective adoptive parents' biological or adopted children who are ten years of age or over, witnessed by the social worker after proper counseling;
- Physical and medical evaluation by a duly licensed physician and psychological evaluation by a psychologist;
- Latest income tax return or any other documents showing financial capability;
- Clearance issued by the police of other proper Government agency of the place of residence;
- Character reference from the local church minister/priest, employer, or a non-relative member of the immediate community who have known the prospective adoptive parents for at least five (5) years;
- Certification from the United States Department of Justice or other appropriate Government agency that the prospective adoptive parents are qualified to adopt under their national law and that

the child to be adopted is allowed to enter the country for trial custody and reside permanently once adopted; and

- Recent postcard-size pictures of the prospective adoptive parents and all immediate family.

For updates on document requirements and information on how to authenticate documents, visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

Bringing Your Child Home: Once your adoption is complete (or you have obtained legal custody of the child), there are a few more steps to take before you can head home. Specifically, you need to apply for several documents for your child before he or she can travel to the United States, such as a birth certificate, a passport or travel document for your child from the country in which he or she was born, and a U.S. Immigration Visa.

For detailed and updated information on how to obtain these documents, review the *Intercountry Adoption* section on this publication and visit the USCIS Intercountry Adoption website at http://adoption. state.gov.

Child Citizenship Act: For adoptions finalized abroad: The Child Citizenship Act of 2000 allows your new child to acquire American citizenship automatically when he or she enters the United States as lawful permanent residents.

For adoptions finalized in the United States: The Child Citizenship Act of 2000 allows your new child to acquire American citizenship automatically when the court in the United States issues the final adoption decree.

To learn more, review the *Intercountry Adoption* section on this publication and visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

International Parental Child Abduction

November 2008

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *International Child Abduction* section of this book and review current reports online at www.travel.state.gov/childabduction.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is provided for general information only. Questions involving interpretation of specific foreign laws should be addressed to foreign legal counsel.

General Information: The Philippines is not a party to the Hague Convention on the Civil Aspects of International Child Abduction, nor are there any international or bilateral treaties in force between the Philippines and the United States dealing with international parental child abduction. Therefore, there is no treaty remedy by which the left behind parent would be able to pursue recovery of the child or children should they be abducted to or wrongfully retained in the Philippines. Once in the Philippines, the child or children would be completely subject to Philippine law for all matters including custody.

The United States is not a party to any treaty or convention on the enforcement of court orders. A custody decree issued by a court in the U.S. has no binding legal force abroad, although it may have a persuasive force in some countries. Furthermore, a U.S. custody decree may be considered by foreign courts and authorities as evidence and, in some cases, foreign courts may voluntarily recognize and enforce it on the basis of comity (the voluntary recognition by courts of one jurisdiction of the laws and judicial decisions of another).

Custody Disputes: Parental child abduction is not a crime under Philippine law. Custody disputes are considered civil legal matters that must be resolved between the concerned parties or through the courts in the Philippines.

Philippine authorities advise the American Embassy that generally the Philippine courts will give custody of children under the age of seven to the mother, provided there is no evidence that would indicate that the mother is unfit to raise the child. Although there is no treaty in force between the United States and the Philippines on enforcement of judgments, the Philippine courts will also

take into consideration child custody decrees issued by foreign courts in deciding disputes regarding children residing in the Philippines.

The Department of Justice in the Philippines states that, in general, redress in child custody cases is sought through habeas corpus orders/ proceedings in court. These orders can be obtained on an expedited basis and direct law enforcement to locate and take a child into custody for the purposes of an emergency hearing. Ideally, these orders and proceedings ensure due process under the local laws as well as providing protection for the child or children. In order to bring a custody issue before the Domestic Relations/Family Court, the left-behind parent will require the assistance of an attorney licensed to practice in the Philippines. A parent holding a custody decree issued in U.S. courts must therefore retain local counsel in the Philippines to apply to the Philippine courts for recognition and enforcement of the U.S. decree, or to invoke the writ of habeas corpus. Although visitation rights for non-custodial parents are not expressly stipulated in the Philippine Civil Code, court judgments often provide visitation rights for non-custodial parents. For more information, please read the *International Parental Child Abduction* section of this book and review current reports online at www.travel.state.gov/ childabduction.

Deportation: While there is an extradition treaty between the United States and the Philippines, parental child abduction is not an extraditable offense. However, if the taking parent is a U.S. citizen whose U.S. passport has been revoked due to an outstanding federal Unlawful Flight to avoid Prosecution (UFAP) warrant or indictment on charges of International Parental Kidnapping (IPKCA), Philippine authorities may consider deportation based on lack of a valid travel document.

Dual Nationality: A child with a parent who was born outside of the U.S. or who has acquired a second nationality through naturalization in another country may have a claim to citizenship in that country. There is no requirement that a U.S. citizen parent consent to the acquisition by his/her child of another nationality and in many cases a parent is unaware that his/her child may have dual citizenship. The Embassy of the Philippines in Washington D.C. will be able to provide more detailed information on whether your child has a claim.

Initiating Foreign Enforcement Proceedings Under Local Law: If a country is not a signatory to the Hague Convention on the Civil Aspects of International Child Abduction, it may be necessary for you to initiate a child custody action in the courts in the foreign country. This usually will require retaining the services of an attorney abroad. For more information, please read the *International Parental Child Abduction* section of this book and review current reports online at www.travel. state.gov/childabduction.

Retaining a Foreign Attorney: A list of English speaking attorneys is available from the U.S. State Department Office of American Citizens Services. See also the Martindale-Hubbell Law Directory available in law libraries. It may be helpful to provide your foreign attorney with copies of any state laws concerning child custody orders and their enforcement in the U.S.

Legal Aid: Some countries provide legal aid services in child custody cases. The legal attache or consular section of the foreign embassy in Washington, D.C. may have specific guidance. Legal aid information may also be available from a local branch of the International Social Service. The ISS' headquarters are in Geneva, Switzerland, but information or assistance may be available through its New York branch at 10 W. 40th Street, New York, N.Y. 10018, Tel. No.: 212-532-6350. The National Center for Missing and Exploited Children maintains a list of attorneys interested in Hague Convention and International Child Custody cases.

Criminal Remedies: The Department of Justice, Office of International Affairs works with US prosecuting attorneys, the Federal Bureau of Investigation and with Interpol (an international police agency) in a joint cooperative effort to return persons charged with US crimes from foreign countries. Extradition of the abducting adult may not result in the return of the child. Foreign countries may refuse to extradite a person to the US if that person is also a citizen of the foreign country. Foreign countries may not recognize parental abduction as a crime. Please note that the extradition process applies only to the abducting adult/ fugitive and not the child. The proper channel for the return of the child is through civil mechanisms or voluntary return arrangements. Additional information is also available on the Internet at the web site of the U.S. Department of Justice, Office of Juvenile Justice and Delinquency Prevention (OJJDP) at http://www.ojjdp. ncjrs.org.

For further information on international parental child abduction, contact the Office of Children's Issues, U.S. Department of State at 1-888-407-4747 or visit its web site on the Internet at http://travel.state.gov. You may also direct inquiries to: Office of Children's Issues, U.S. Department of State, Washington, DC 20520-4811; Phone: (202) 736-9090; Fax: (202) 312-9743.

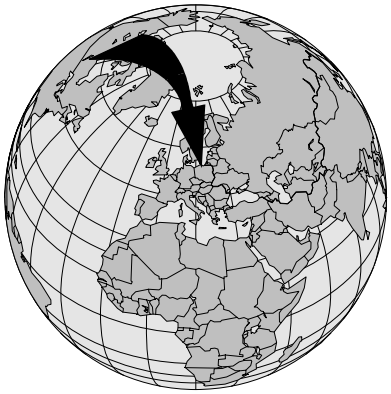
Travel Warning

February 13, 2008

This Travel Warning updates information on the security situation and reminds Americans of the risks of travel in the Philippines. This Travel Warning supersedes the Travel Warning for the Philippines issued April 27, 2007.

U.S. citizens contemplating travel to the Philippines should carefully consider the risks to their safety and security while there, including those due to terrorism. While travelers may encounter such threats anywhere in the Philippines, the southern island of Mindanao and the Sulu Archipelago are of particular concern. Travelers should exercise extreme caution

in both central and western Mindanao as well as in the Sulu Archipelago.



Kidnap for ransom gangs operate in the Philippines. In October 2007, one such gang abducted a visiting U.S. citizen whose whereabouts are unknown at this time. Several other foreigners were also kidnapped for ransom in 2007. The New People's Army (NPA), a terrorist organization, operates in many rural areas of the Philippines, including in the northern island of Luzon. While it has not targeted foreigners in several years, the NPA could threaten U.S. citizens engaged in business or property management activities, and it often demands "revolutionary taxes."

Terrorist groups, such as the Abu Sayyaf Group and the Jema'ah Islamiyah, and groups that have broken away from the more mainstream Moro Islamic Liberation Front or Moro National Liberation Front, have carried out bombings resulting in deaths, injuries and property damage. On January 3, 2008, a bomb exploded at a Cotabato City disco pub, killing one and injuring eight. The central and western areas of Mindanao have also experienced bombings targeting bus terminals and public buildings. While those responsible do not appear to have targeted foreigners, travelers should remain vigilant and avoid congregating in public areas; a recent bombing outside the House of Representatives in Metro Manila resulted in a number of deaths and injuries to bystanders.

U.S. Government employees must seek special permission for travel to Mindanao or the Sulu Archipelago. When traveling in Mindanao, U.S. official travelers attempt to lower their profile, limit their length of stay, and exercise extreme caution. Some foreigners who reside in or visit western and central Mindanao hire their own security.

The Department strongly encourages Americans in the Philippines to register with the Consular Section of the U.S. Embassy in Manila through the State Department's travel registration website, https://travelregistration.state.gov. The U.S. Embassy is located at: 1201 Roxas Boulevard, Manila, Philippines, tel. 63-2-301-2000. The American Citizen Services (ACS) section's fax number is 63-2-301-2017 and the ACS web page is at http://manila.usembassy.gov/wwwh 3004.html.

For information on general crime and security issues, U.S. citizens should also consult the Department of State's Country Specific Information for the Philippines and the Worldwide Caution, located at http://travel.state.gov. American citizens may also obtain up-to-date information on security conditions by calling 1-888-407-4747 from the United States and Canada, or 202-501-4444 from overseas.

POLAND

Compiled from the June 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Republic of Poland

PROFILE

Geography

Area: 312,683 sq. km. (120,725 sq. mi.); about the size of New Mexico.

Cities: (2004) Capital—Warsaw (pop. 1,690,821). Other cities—Lodz (776,297), Krakow (757,957), Wroclaw (636,854), Poznan (573,003), Gdansk (460,524).

Terrain: Flat plain, except mountains along southern border.

Climate: Temperate continental.

People

Nationality: Noun—Pole(s). Adjective—Polish.

Population: (2007) 38.2 million.

Annual growth rate: Unchanging.

Ethnic groups: Polish 98%, German, Ukrainian, Belorussian, Lithuanian.

Religions: Roman Catholic 90%, Eastern Orthodox, Uniate, Protestant, Judaism.

Languages: Polish.

Education: Literacy—98%.

Health: (2006) Infant mortality rate—7.2/1,000. Life expectancy—males 71 yrs., females 79 yrs.

Work force: 17.2 million. Industry and construction—29%; agriculture—16%; services—54%.

Government

Type: Republic.

Constitution: The constitution now in effect was approved by a national referendum on May 25, 1997. The constitution codifies Poland's democratic norms and establishes checks and balances among the president, prime minister, and parliament. It also enhances several key elements of democracy, including judicial review and the legislative process, while continuing to guarantee the wide range of civil rights, such as the right to free speech, press, and assembly, which Poles have enjoyed since 1989.

Government branches: Executive—head of state (president), head of government (prime minister). Legislative—bicameral National Assembly (lower house—Sejm, upper house—Senat). Judicial—Supreme Court, provincial and local courts, constitutional tribunal.

Political subdivisions: 16 provinces (voivodships).

Political parties: (in parliament) Civic Platform (PO), Law and Justice (PiS), Left and Democrats (LiD) and the Polish People's Party (PSL).

Suffrage: Universal at 18.

Economy

GDP: (2007) $420 billion.

Real GDP growth: (2007) 6.6%.

Per capita GDP: (2007) $11,030.

Inflation: (2007, average) 2,5%.

Natural resources: Coal, copper, sulfur, natural gas, silver, lead, salt.

Agriculture: Products—grains, hogs, dairy, potatoes, horticulture, sugarbeets, oilseed.

Industry: Types—machine building, iron and steel, mining, shipbuilding, automobiles, furniture, textiles and apparel, chemicals, food processing, glass, beverages.

Trade: (2007) Exports—$143.7 billion: furniture, cars, ships, coal, apparel. Imports—$158.8 billion: crude oil, passenger cars, pharmaceuticals, car parts, computers.

PEOPLE

Poland today is ethnically almost homogeneous (98% Polish), in contrast with the World War II period, when there were significant ethnic minorities—4.5 million Ukrainians, 3 million Jews, 1 million Belorussians, and 800,000 Germans. The majority of the Jews were murdered during the German occupation in World War II, and many others emigrated in the succeeding years.

Most Germans left Poland at the end of the war, while many Ukrainians and Belorussians lived in territories incorporated into the then-U.S.S.R. Small Ukrainian, Belorussian, Slovakian, and Lithuanian minorities reside along the borders, and a German minority is concentrated near the southwest city of Opole.

HISTORY

Poland's written history begins with the reign of Mieszko I, who accepted Christianity for himself and his kingdom in AD 966. The Polish state reached its zenith under the Jagiellonian dynasty in the years following the union with Lithuania in 1386 and the subsequent defeat of the Teutonic Knights at Grunwald in 1410. The monarchy survived many upheavals but eventually went into a decline, which ended with the final partition of Poland by Prussia, Russia, and Austria in 1795.

Independence for Poland was one of the 14 points enunciated by President Woodrow Wilson during World War I. Many Polish Americans enlisted in the military services to further this aim, and the United States worked at the postwar conference to ensure its implementation.

However, the Poles were largely responsible for achieving their own independence in 1918. Authoritarian rule predominated for most of the period before World War II. On August 23, 1939, Germany and the Soviet Union signed the Ribbentrop-Molotov nonaggression pact, which secretly provided for the dismemberment of Poland into Nazi and Soviet-controlled zones. On September 1, 1939, Hitler ordered his troops into Poland. On September 17, Soviet troops invaded and then occupied eastern Poland under the terms of this agreement. After Germany invaded the Soviet Union in June 1941, Poland was completely occupied by German troops.

The Poles formed an underground resistance movement and a government in exile, first in Paris and later in London, which was recognized by the Soviet Union. During World War II, 400,000 Poles fought under Soviet command, and 200,000 went into combat on Western fronts in units loyal to the Polish government in exile.

In April 1943, the Soviet Union broke relations with the Polish government in exile after the German military announced that they had discovered mass graves of murdered Polish army officers at Katyn, in the U.S.S.R. (The Soviets claimed that the Poles had insulted them by requesting that the Red Cross investigate these reports.) In July 1944, the Soviet Red Army entered Poland and established a communist-controlled "Polish Committee of National Liberation" at Lublin.

Resistance against the Nazis in Warsaw, including uprisings by Jews in the Warsaw ghetto and by the Polish underground, was brutally suppressed. As the Germans retreated in January 1945, they leveled the city.

During the war, about 6 million Poles were killed, and 2.5 million were deported to Germany for forced labor. More than 3 million Jews (all but about 100,000 of the Jewish population) were killed in death camps like those at Oswiecim (Auschwitz), Treblinka, and Majdanek.

Following the Yalta Conference in February 1945, a Polish Provisional Government of National Unity was formed in June 1945; the U.S. recognized it the next month. Although the Yalta agreement called for free elections, those held in January 1947 were controlled by the Communist Party. The communists then established a regime entirely under their domination.

Communist Party Domination

In October 1956, after the 20th ("de-Stalinization") Soviet Party Congress in Moscow and riots by workers in Poznan, there was a shakeup in the communist regime. While retaining most traditional communist economic and social aims, the regime of First Secretary Wladyslaw Gomulka liberalized Polish internal life.

In 1968, the trend reversed when student demonstrations were suppressed and an "anti-Zionist" campaign initially directed against Gomulka supporters within the party eventually led to the emigration of much of Poland's remaining Jewish population. In December 1970, disturbances and strikes in the port cities of Gdansk, Gdynia, and Szczecin, triggered by a price increase for essential consumer goods, reflected deep dissatisfaction with living and working conditions in the country. Edward Gierek replaced Gomulka as First Secretary.

Fueled by large infusions of Western credit, Poland's economic growth rate was one of the world's highest during the first half of the 1970s. But much of the borrowed capital was misspent, and the centrally planned economy was unable to use the new resources effectively. The growing debt burden became insupportable in the late 1970s, and economic growth had become negative by 1979.

In October 1978, the Bishop of Krakow, Cardinal Karol Wojtyla, became Pope John Paul II, head of the Roman Catholic Church. Polish Catholics rejoiced at the elevation of a Pole to the papacy and greeted his June 1979 visit to Poland with an outpouring of emotion.

In July 1980, with the Polish foreign debt at more than $20 billion, the government made another attempt to increase meat prices. A chain reaction of strikes virtually paralyzed the Baltic coast by the end of August and, for the first time, closed most coalmines in Silesia. Poland was entering into an extended crisis that would change the course of its future development.

The Solidarity Movement

On August 31, 1980, workers at the Lenin Shipyard in Gdansk, led by an electrician named Lech Walesa, signed a 21-point agreement with the government that ended their strike. Similar agreements were signed at Szczecin and in Silesia. The key provision of these agreements was the guarantee of the workers' right to form independent trade unions and the right to strike. After the Gdansk agreement was signed, a new national union movement—"Solidarity"—swept Poland.

The discontent underlying the strikes was intensified by revelations of widespread corruption and mismanagement within the Polish state and party leadership. In September 1980, Gierek was replaced by Stanislaw Kania as First Secretary.

Alarmed by the rapid deterioration of the PZPR's authority following the Gdansk agreement, the Soviet Union proceeded with a massive military buildup along Poland's border in December 1980. In February 1981, Defense Minister Gen. Wojciech Jaruzelski assumed the position of Prime Minister as well, and in October 1981, he also was named party First Secretary. At the first Solidarity national congress in September-October 1981, Lech Walesa was elected national chairman of the union.

On December 12-13, the regime declared martial law, under which the army and special riot police were used to crush the union. Virtually all Solidarity leaders and many affiliated intellectuals were arrested or detained. The United States and other Western countries responded to martial law by imposing economic sanctions against the Polish regime and against the Soviet Union. Unrest in Poland continued for several years thereafter.

In a series of slow, uneven steps, the Polish regime rescinded martial law. In December 1982, martial law was suspended, and a small number of political prisoners were released. Although martial law formally ended in July 1983 and a general amnesty was enacted, several hundred political prisoners remained in jail. In July 1984, another general amnesty was declared, and 2 years later, the government had released nearly all political prisoners. The authorities continued, however, to harass dissidents and Solidarity activists. Solidarity remained proscribed and its publications banned. Independent publications were censored.

Roundtable Talks and Elections

The government's inability to forestall Poland's economic decline led to waves of strikes across the country in April, May, and August 1988. In an attempt to take control of the situation, the government gave de facto recognition to Solidarity, and Interior Minister Kiszczak began talks with

Lech Walesa on August 31. These talks broke off in October, but a new series, the "roundtable" talks, began in February 1989. These talks produced an agreement in April for partly open National Assembly elections. The June election produced a Sejm (lower house), in which one-third of the seats went to communists and one-third went to the two parties which had hitherto been their coalition partners. The remaining one-third of the seats in the Sejm and all those in the Senat were freely contested; virtually all of these were won by candidates supported by Solidarity.

The failure of the communists at the polls produced a political crisis. The roundtable agreement called for a communist president, and on July 19, the National Assembly, with the support of some Solidarity deputies, elected General Jaruzelski to that office. Two attempts by the communists to form governments failed, however.

On August 19, President Jaruzelski asked journalist/Solidarity activist Tadeusz Mazowiecki to form a government; on September 12, the Sejm voted approval of Prime Minister Mazowiecki and his cabinet. For the first time in more than 40 years, Poland had a government led by non-communists.

In December 1989, the Sejm approved the government's reform program to transform the Polish economy rapidly from centrally planned to free-market, amended the constitution to eliminate references to the "leading role" of the Communist Party, and renamed the country the "Republic of Poland." The Polish United Workers' (Communist) Party dissolved itself in January 1990, creating in its place a new party, Social Democracy of the Republic of Poland. Most of the property of the former Communist Party was turned over to the state.

The May 1990 local elections were entirely free. Candidates supported by Solidarity's Citizens' Committees won most of the races they contested, although voter turnout was only a little over 40%. The cabinet was reshuffled in July 1990; the national defense and interior affairs ministers—holdovers from the previous communist government—were among those replaced.

In October 1990, the constitution was amended to curtail the term of President Jaruzelski. In December, Lech Walesa became the first popularly elected President of Poland.

The Republic of Poland

The Republic of Poland in the early 1990s made great progress toward achieving a fully democratic government and a market economy. In November 1990, Lech Walesa was elected President for a 5-year term. Jan Krzysztof Bielecki, at Walesa's request, formed a government and served as its Prime Minister until October 1991, introducing world prices and greatly expanding the scope of private enterprise.

Poland's first free parliamentary elections were held in 1991. More than 100 parties participated, representing a full spectrum of political views. No single party received more than 13% of the total vote.

Since 1991, Poland has conducted six general parliamentary elections and four presidential elections—all free and fair. Incumbent governments have transferred power smoothly and constitutionally in every instance to their successors. The post-Solidarity center-right and post-Communist center-left have each controlled the parliament and the presidency since 1991. Most recently, Poles elected Law and Justice (PiS) candidate and Mayor of Warsaw Lech Kaczynski to a 5-year term as President. Kazcynski narrowly defeated Civic Platform (PO) candidate Donald Tusk and was sworn in December 23, 2005.

PiS was also the top vote-getter in September 25, 2005, parliamentary elections. After coalition talks with runner-up PO collapsed, PiS alone formed a minority government under Prime Minister Kazimierz Marcinkiewicz. Frustrated by its inability to achieve its legislative program alone, PiS formed a formal coalition government with Self-Defense (SO) and the League of Polish Families (LPR) in April 2006. In July 2006, Prime Minister Marcinkiewicz resigned and was replaced by PiS party leader Jaroslaw Kaczynski as Prime Minister. Parliamentary elections were held again in October 2007, and Donald Tusk became Prime Minister in November 2007.

GOVERNMENT AND POLITICAL CONDITIONS

The current government structure consists of a council of ministers led by a Prime Minister, typically chosen from the majority coalition in the bicameral legislature's lower house (Sejm). The president, elected every five years for no more than two terms, is the head of state and commander-in-chief of the armed forces. The judicial branch plays a minor role in decision-making.

The parliament consists of the 460-member Sejm and the 100-member Senat, or upper house. The new constitution and the reformed administrative division (as of 1999) required a revision of the election ordinance (passed in April 2001). The most important changes were liquidation of a national list (all deputies are elected by voters in electoral districts) and introduction of a new method of calculating seats (the modified St. Lague method replaced the d'Hondt method, thus eliminating the premium for the top parties). The law stipulated that with the exception of guaranteed seats for small ethnic parties, only parties receiving at least 5% of the total vote could enter parliament.

Parties represented in the newly elected Sejm are Civic Platform (PO), Law and Justice (PiS), Left and Democrats (LiD), and the Polish People's Party (PSL).

Poland maintains an embassy in the United States at 2640 16th St. NW, Washington, DC 20009 (tel. 202-234-3800/3801/3802); the consular annex is at 2224 Wyoming Ave. NW, Washington, DC 20008 (tel. 202-234-3800). Poland has consulates in Chicago, New York City, and Los Angeles.

ECONOMY

The Polish economy grew rapidly in the mid-1990s, slowed considerably in 2001 and 2002, and returned again to healthy growth rates in 2003. Poland's gross domestic product (GDP) grew at an annualized rate of 6.1% in the first quarter of 2008. Faster growth has begun to reduce persistently high unemployment, from nearly 20% in the middle of 2004 to 10.6% in April 2008. Tight monetary policy and dramatic productivity growth have helped to hold down inflation, which was 2.5% on average in 2007. The prospects for inflation in 2008 due to growing fuel and food prices are less optimistic. Poland's current account deficit increased from 1.4% of GDP in 2005 to 3.7% in 2007. The budget deficit was only 1.5% of GDP in 2007 compared with 4.9% in 2002 and is likely to stay around a 2% level in 2008.

Throughout the 1990s, the United States and other Western countries supported the growth of a free enterprise economy by reducing Poland's foreign debt burden, providing economic aid, and lowering trade barriers. Poland graduated from U.S Agency for International Development (USAID) assistance in 2000 and paid the balance of its U.S.-held Paris Club debt in 2005. Poland officially joined the European Union (EU) on May 1, 2004.

Agriculture

Agriculture employs 16.1% of the work force but contributes only 5% to the gross domestic product (GDP), reflecting relatively low productivity. Unlike the industrial sector, Poland's agricultural sector remained largely in private hands during the decades of communist rule. Most of the former state farms are now leased to farmer tenants. Lack of credit is hampering efforts to sell former state farmland. Currently, Poland's 2 million private farms occupy 90% of all farmland and account for roughly the same percentage of total agricultural production. These farms are small—8 hectares (ha) on average—and often fragmented. Farms with an area exceeding 15 ha accounted for only 9% of the total number of farms but cover 45% of total agricultural area. Over half of all farming households in Poland produce only for their own needs with little, if any, commercial sales.

Poland is a net exporter of confectionery, processed fruit and vegetables, meat, and dairy products. Processors often rely on imports to supplement domestic supplies of wheat, feed grains, vegetable oil, and protein meals, which are generally insufficient to meet domestic demand. However, Poland is the leading producer in Europe of potatoes and rye and is one of the world's largest producers of sugarbeets. Poland also is a significant producer of rapeseed, grains, hogs, and cattle. Attempts to increase domestic feed grain production are hampered by the short growing season, poor soil, and the small size of farms.

Pressure to restructure the agriculture sector intensified as Poland prepared to accede to the European Union, which is unwilling to subsidize the vast number of subsistence farms that do not produce for the market. The changes in agriculture are likely to strain Poland's social fabric, tearing at the heart of the traditional, family-based small farm as the younger generation drifts toward the cities. Nonetheless, dramatically increasing agricultural exports to the EU-15 (38% growth in 2005) and payments to farmers from Brussels following accession have enriched Polish commercial farmers and dramatically increase support for EU membership in Poland's rural areas.

Industry

Before World War II, Poland's industrial base was concentrated in the coal, textile, chemical, machinery, iron, and steel sectors. Today it extends to fertilizers, petrochemicals, machine tools, electrical machinery, electronics, and shipbuilding.

Poland's industrial base suffered greatly during World War II, and many resources were directed toward reconstruction. The communist economic system imposed in the late 1940s created large and unwieldy economic structures operated under a tight central command. In part because of this systemic rigidity, the economy performed poorly even in comparison with other economies in central Europe.

In 1990, the Mazowiecki government began a comprehensive reform program to replace the centralized com-

mand economy with a market-oriented system. While the results overall have been impressive, many large state-owned industrial enterprises, particularly the railroad and the mining, steel, and defense sectors, have remained resistant to the change and downsizing required to survive in an open market economy.

Economic Reform Program and Direct Foreign Investment

The economic reforms introduced in 1990 removed price controls, eliminated most subsidies to industry, opened markets to international competition, and imposed strict budgetary and monetary discipline. Poland was the first former centrally planned economy in central Europe to end its recession and return to growth in the early 1990s. The private sector now accounts for over two-thirds of GDP.

In early 2002, the government announced a new set of economic reforms known as the Hausner Plan, designed in many ways to complete the process launched in 1990. The package acknowledged the need to improve Poland's investment climate, particularly the conditions for small and medium-sized enterprises, and better prepare the economy to compete as a European Union (EU) member. The government also aimed to improve Poland's public finances to prepare for eventual adoption of the euro. Though the government was able to enact only portions of the Hausner Plan, those successes coupled with successful monetary efforts to strengthen the zloty, have put Poland within reach of the National Bank's goal of Euro accession in 2008-2009.

As a result of Poland's growth and investment-friendly climate, the country has received over $85 billion in direct foreign investment (DFI) since 1990, with roughly $7 billion in 2004 alone. According to a recently publish report by Ernst and Young, Poland is tied with Germany as the most attractive destination for foreign investment in Europe. The availability of cheap land and a large, relatively skilled labor force are among Polish strengths. However, the government continues to play a strong role in the economy, as seen in excessive red tape and the high level of politicization in many business decisions. Investors complain that state regulation is not transparent or predictable, and the economy suffers from a lack of competition in many sectors, notably telecommunications.

Foreign Trade

With the collapse of the ruble-based COMECON trading bloc in 1990, Poland scrambled to reorient its trade. As early as 1996, 70% of its trade was with EU-15 members, and neighboring Germany today is Poland's dominant trading partner. Most of Poland's imports are capital goods needed for industrial retooling and for manufacturing inputs, rather than imports for consumption. Therefore, a deficit is expected and should even be regarded as positive at this point. Poland, a member of the World Trade Organization (WTO) and European Union, applies the EU's common external tariff to goods from other countries—including the U.S.

In the year after it joined the EU, Poland experienced an overall growth in exports of 30%. This growth was not confined to trade among EU partners: while exports to EU countries rose by 27%, exports to developing countries rose by 46%, and exports to Russia rose an unexpected 77%. Poland's trade balance continued to improve, with export growth significantly outpacing import growth. Opportunities for trade and investment continue to exist across virtually all sectors. The American Chamber of Commerce in Poland, founded in 1991 with seven members, now has more than 300 members. Strong economic growth potential, a large domestic market, EU membership, and political stability are the top reasons U.S. and other foreign companies do business in Poland.

FOREIGN RELATIONS AND NATIONAL SECURITY

Poland became an associate member of the EU and its defensive arm, the Western European Union, in 1994. In a June 2003 national referendum, the Polish people approved EU accession by an overwhelming margin, and Poland gained full membership in May 2004.

Changes since 1989 have redrawn the map of central Europe, and Poland has had to forge relationships with seven new neighbors. Poland has actively pursued good relations, signing friendship treaties replacing links severed by the collapse of the Warsaw Pact. The Poles have forged special relationships with Lithuania and particularly Ukraine in an effort to firmly anchor these states to the West.

Poland became a full member of the North Atlantic Treaty Organization (NATO) in March 1999 as part of the first wave of enlargement outlined at the July 1997 NATO Summit in Madrid. Poland's top national security goal is to further integrate with NATO and other west European defense, economic, and political institutions while modernizing and reorganizing its military. Polish military doctrine reflects the same defense posture as its Alliance partners.

Poland maintains a sizable armed force currently numbering about 140,572 troops divided among an army of 87,877, an air and defense force of 31,147, and a navy of 21,548. Poland relies on military conscription for the majority of its personnel strength. All males (with some exceptions) are subject to a 12-month term of military service. The Polish military continues to restructure and to modernize its equipment. The Polish Defense Ministry General Staff and the Land Forces staff have recently reorganized the latter into a NATO-compatible J/G-1 through J/G-6 structure. Although budget constraints remain a drag on modernization, Poland has been able to move

forward with U.S. assistance on acquiring 48 F-16 multi-role fighters, C-130 cargo planes, HMMWVs, and other items key to the military's restructuring.

Poland continues to be a regional leader in support and participation in the NATO Partnership for Peace Program and has actively engaged most of its neighbors and other regional actors to build stable foundations for future European security arrangements. Poland continues its long record of strong support for UN peacekeeping operations by maintaining a unit in Southern Lebanon, a battalion in NATO's Kosovo Force (KFOR), and by providing and actually deploying the KFOR strategic reserve to Kosovo. Polish military forces have served in both Operation Enduring Freedom in Afghanistan and Operation Iraqi Freedom.

U.S.-POLISH RELATIONS

The United States established diplomatic relations with the newly formed Polish Republic in April 1919. After Gomulka came to power in 1956, relations with the United States began to improve. However, during the 1960s, reversion to a policy of full and unquestioning support for Soviet foreign policy objectives and anti-Semitic feelings in Poland caused those relations to stagnate. U.S.-Polish relations improved significantly after Gierek succeeded Gomulka and expressed his interest in improving relations with the United States. A consular agreement was signed in 1972.

In 1974 Gierek was the first Polish leader to visit the United States. This action, among others, demonstrated that both sides wished to facilitate better relations.

The birth of Solidarity in 1980 raised the hope that progress would be made in Poland's external relations as well as in its domestic development. During this time, the United States provided $765 million in agricultural assistance. Human rights and individual freedom issues, however, were not improved upon, and the U.S. revoked Poland's most-favored-nation (MFN) status in response to the Polish Government's decision to ban Solidarity. MFN status was reinstated in 1987, and diplomatic relations were upgraded.

The United States and Poland have enjoyed warm bilateral relations since 1989. Every post-1989 Polish government has been a strong supporter of continued American military and economic presence in Europe. As well as supporting the Global War on Terror, Operation Enduring Freedom in Afghanistan, and coalition efforts in Iraq, Poland cooperates closely with American diplomacy on such issues as democratization, nuclear proliferation, human rights, regional cooperation in central and eastern Europe, and UN reform.

TRAVEL

Consular Information Sheet

September 10, 2008

Country Description: Poland is a stable, free-market democracy, and has been a member of the European Union since 2004.

Entry Requirements: Poland is a party to the Schengen agreement. As such, U.S. citizens may enter Poland for up to 90 days for tourist or business purposes without a visa. The passport should be valid for at least three months beyond the period of stay.

Polish immigration officials may ask travelers for proof of sufficient financial resources to cover their proposed stay in Poland, generally viewed as 100 zloty per day. Additionally, citizens of non-EU countries, including the United States, should carry proof of adequate medical insurance in case of an accident or hospitalization while in Poland. Polish immigration officials may ask for documentation of such insurance or proof of sufficient financial resources (at least 400 zloty per day) to cover such costs. Those who lack insurance or access to adequate financial resources may be denied admission to Poland. Medicare does not cover health costs incurred while abroad.

Poland requires Polish citizens (including American citizens who are or can be claimed as Polish citizens) to enter and depart Poland using a Polish passport. Americans who are also Polish citizens or who are unsure if they hold Polish citizenship should contact the nearest Polish consular office for further information.

For further information on entry requirements, please contact the consular section of the Embassy of the Republic of Poland at 2224 Wyoming Avenue NW, Washington, DC 20008, tel. (202) 234-3800, or the Polish consulates in Chicago, Los Angeles or New York. Visit the Embassy of Poland web site at http://www.polandembassy.org for the most current visa information.

Safety and Security: Poland remains largely free of terrorist incidents. However, like other countries in the Schengen area, Poland's open borders with its Western European neighbors allow the possibility of terrorist groups entering/exiting the country with anonymity. Americans are reminded to remain vigilant with regard to their personal security.

Demonstrations are commonplace in Poland and may range in number from a few people to several thousand. Prior police notice is required for public demonstrations and police oversight is routinely provided. Nonetheless, situations may develop which could pose a threat to public safety. U.S. citizens are advised to avoid areas in which public demonstrations are taking place.

For the latest security information, Americans traveling abroad should regularly monitor the Department's Internet web site, where the current Worldwide Caution Travel Alert, Travel Warnings and Travel Alerts can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S., or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: While Poland generally has a low rate of violent crime, the incidence of street crime, which sometimes involves violence, is moderate. Major cities have higher rates of crime against residents and foreign visitors than other areas.

Organized groups of thieves and pickpockets operate at major tourist destinations, in train stations, and on trains, trams, and buses in major cities. Thieves will target overnight trains. Most pick-pocketing on trains occurs during boarding; in the most common scenario, a group of well-dressed young men will surround a passenger in the narrow aisle of the train, jostling/pick-pocketing him or her as they supposedly attempt to get around the passenger. Keep an eye on cell phones; they are prized by thieves. Beware of taxi drivers who approach you at the airport or who do not display telephone numbers and a company name; these drivers usually charge exorbitant rates. Order your taxi by telephone and at the airport use only taxis in the designated taxi ranks.

Car thefts and car-jackings are significantly declining; however, theft from vehicles remains a constant concern. Drivers should be wary of people indicating they should pull over or that something is wrong with their cars; when such drivers pull over to see if there is a problem, they may find themselves suddenly surrounded by thieves from a second vehicle. Drivers encountering someone indicating that there is trouble with their car and the problem is not apparent should continue driving until they find a safe spot (a crowded gas station, supermarket, or even police station) to inspect their vehicles. There also have been incidents of thieves opening or breaking passenger-side doors and windows in slow or stopped traffic to take purses or briefcases left on the seat beside the driver. Those traveling by car should remember to keep windows closed and doors locked. American tourists of Asian and African descent have reported being targets of verbal harassment and physical attacks while traveling in Poland.

In many countries around the world, counterfeit and pirated goods are widely available. Transactions involving such products may be illegal under local law. In addition, bringing them back to the United States may result in forfeitures and/or fines. More information on this serious problem is available at http://www.cybercrime.gov/18usc2320.htm.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, contact family members or friends, and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

The local equivalent to the "911" emergency line in Poland is: 112.

Medical Facilities and Health Information: Adequate medical care is available in Poland, but hospital facilities and nursing support are not comparable to American standards. Physicians are generally well trained but specific emergency services may be lacking in certain regions, especially in Poland's small towns and rural areas. Younger doctors generally speak English, though nursing staff often does not. Doctors and hospitals often expect immediate cash payment for health services. Medications are generally available, although they may not be specific U.S. brand-name drugs.

The U.S. Department of State is unaware of any HIV/AIDS entry restrictions for visitors to, or foreign residents of, Poland.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline

for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's internet site at http://wwwn.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith.

Medical Insurance: Polish immigration law requires travelers either to carry adequate medical insurance in case of accident or hospitalization while in Poland or to be able to document access to sufficient financial resources (at least 400 zlotys per day) to cover such medical emergencies. Failure to carry insurance or the inability to provide documentation of sufficient financial resources if requested may result in a traveler being denied admission to Poland. Medicare does not cover Americans in Poland. The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Poland is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

An International Driving Permit (IDP), obtained prior to departure from the U.S., must accompany a U.S. driver's license. A U.S. driver's license without an IDP is insufficient for use in Poland, and Americans cannot obtain IDPs in Poland. Only two U.S. automobile associations—the American Automobile Association (AAA) and the American Automobile Touring Alliance (AATA)—have been authorized by the U.S. Department of State to distribute IDPs. Polish roadside services, while not at Western levels, are rapidly improving. Polski Zwiazek Motorowy Auto-Tour has multilingual operators and provides assistance countrywide; they can be reached by calling 9281 or 9637 preceded by the city code (outside of Warsaw 022-9281). The police emergency number is 997, fire service is 998, and ambulance service is 999. Mobile phone users can dial 112 for emergency assistance. Seat belts are compulsory in both the front and back seats, and children under the age of 10 are prohibited from riding in the front seat. You must use Headlights at all times, day and night. Using your cellular phone while driving is prohibited, except for "hands-free" models.

There has been a substantial increase in the number of cars on Polish roads. Driving, especially after dark, is hazardous. Roads are generally narrow, poorly lighted, frequently under repair (especially in the summer months), and are often also used by pedestrians and cyclists. The Ministry of Infrastructure has a program called "Black Spot" (Czarny Punkt), which puts signs in places with a particularly high number of accidents and/or casualties. These signs have a black spot on a yellow background, and the road area around the "black spot" is marked with red diagonal lines.

Alcohol consumption is frequently a contributing factor in accidents. Polish laws provide virtually zero tolerance for driving under the influence of alcohol, and penalties for driving under the influence of alcohol (defined as a blood alcohol level of 0.02 or higher) include a fine and probation or imprisonment for up to two years. Penalties for drivers involved in accidents are severe, and can be imprisonment from six months to eight years.

Within cities, taxis are available at major hotels and designated stands or may be ordered in advance. Some drivers accept credit cards and/or speak English. Travelers should be wary of hailing taxis on the street, especially those that do not have a telephone number displayed, because these may not have meters, and many of them charge more. Do not accept assistance from "taxi drivers" who approach you in the arrivals terminal or outside the doors at Warsaw Airport. Travelers availing themselves of these "services" often find themselves charged significantly more than the usual fare. Use only taxis at designated airport taxi ranks.

Visit the website of Poland's National Tourist Office at http://www.polandtour.org and Poland's Ministry of Transport responsible for road safety, at http://www.mt.gov.pl.

Aviation Safety Oversight: The U.S. Federal Aviation Administration (FAA) has assessed the Government of Poland's Civil Aviation Authority as being in compliance with International Civil Aviation Organization (ICAO) aviation safety standards for oversight of Poland's air carrier operations. For more information, travelers may visit the FAA's web site at http://www.faa.gov.

Special Circumstances: Visitors importing more than 10,000 Euros should, as part of the arrivals process, complete a form to declare currency, traveler's checks, and other cash instruments. This form should be stamped by Polish Customs and retained by the traveler for presentation on departure. Undeclared cash may be confiscated upon departure, and visitors carrying undeclared cash may be prosecuted. Most banks now cash traveler's checks, ATMs are readily available, and credit cards increasingly accepted. Polish customs authorities may enforce strict regulations concerning the export of items such as works of art, particularly those created before 1953. Works produced by living artists after 1953 may be exported with permission from the Provincial Conservator of Relics. Some works of art produced after 1953 may still be subject to a ban on exportation if the artist is no longer living and the work is considered of high cultural value. If you are importing an item or work of art like those described above, even if only temporary (e.g., for an exhibit or performance) you should declare it to customs upon entry and carry proof of ownership in order to avoid problems on departure. Contact the Polish Embassy in Washington, D.C., or one of the Polish consulates in the United

States for specific information regarding customs requirements. Poland does not recognize (although it does not prohibit) dual nationality. A person holding Polish and U.S. citizenship is deemed by Poland to be a Pole and subject to Polish law.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating Polish laws, even unknowingly, may be expelled, arrested, or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Poland are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in Poland are encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration web site and to obtain updated information on travel and security within Poland. Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency. The U.S. Embassy in Warsaw is located at Aleje Ujazdowskie 29/31. The Consular Section entrance is located around the corner at Ulica Piekna 12. The Embassy's telephone number is (48) (22) 504-2000. This number can be called 24 hours/day: for emergencies after business hours, press "0." The Embassy's fax number is (48)(22) 504-2688 and the fax number for the Consular Section is (48)(22) 627-4734 (consular fax only checked during normal business hours). The U.S. Consulate General in Krakow is located at Ulica Stolarska 9. The Consulate General's telephone number is (48)(12) 424-5100; fax (48)(12) 424-5103; after-hours cellular phone (for emergencies only) 601-483-348. A Consular Agency providing limited consular services in Poznan is located at Ulica Paderewskiego 8. The Consular Agency's telephone number is (48)(61) 851-8516; fax (48)(61) 851-8966. The Embassy's web site is at http://poland.usembassy.gov.

Intercountry Adoption

November 2008

The information in this section has been edited from a report available through the U.S. Department of State Office of Children's Issues. For more information detailed, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Poland is party to The Hague Convention on Protection of Children and Co-operation in Respect of Intercountry Adoption (Hague Adoption Convention). Therefore all adoptions between Poland and the United States must meet the requirements of the Convention and United States law implementing the Convention. For detailed information on these requirements for adoption, please review the *Intercountry Adoption* section of this publication and visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

Who Can Adopt? Adoption between the United States and Poland is governed by The Hague Adoption Convention. Therefore to adopt from Poland, you must first be found eligible to adopt by the United States Government.

At the present time, Polish judges require both adoptive parents to have met the child prior to adoption. In rare cases, a judge may permit an adoption when only one prospective parent has met the child prior to adoption. In such cases, the documentary requirements for prospective parents will differ slightly.

In addition to the United States requirements for prospective adoptive parents, Poland also has the following requirements for prospective adoptive parents.

Residency Requirements: There are no Polish residence requirements for prospective adoptive parents.

Age Requirements: Under Polish law, there are no formal, legal restrictions on the age of prospective adoptive parents. In practice, however, prospective adoptive parents may be up to 40 years older than the child.

Marriage Requirements: Both married and single prospective adoptive parents are permitted to adopt a child in Poland.

Other Requirements: Non-Catholic prospective adoptive parents are permitted to adoptive a child in Poland.

Who Can Be Adopted? Because Poland is party to The Hague Adoption Convention, children from Poland must meet the requirements of the Convention in order to be eligible for adoption. In addition to Poland's requirements, a child must meet the definition of a Convention adoptee for you to bring him or her back to the United States.

Only adoption centers authorized by the Minister of Labor and Social Welfare can evaluate a Polish child's eligibility for intercountry adoption. At present, only the Public Adoptive-Guardian Center (Publiczny Osrodek Adopcyjno-Opiekunczy) has this authorization. The Public Adoptive-Guardian Center maintains a list of all children residing in orphanages who are available for intercountry adoption because their parents have died, have relinquished all rights to them, or have had them relinquished by a court.

Polish Adoption Authority: Public Adoptive-Guardian Center (Publiczny Osrodek Adopcyjno-Opiekunczy)

The Process: The first step in adopting a child from Poland is to select an adoption service provider in the United States that has been accredited. Only these agencies and attorneys can provide adoption services between the United States and Poland.

There are three adoption centers in Poland that are authorized to qualify foreign prospective parents for adoption in Poland. The prospective parents or duly-licensed American adoption agencies may submit documents of candidates for adoption only to these centers. You will find their information in the Contacts section.

Prospective adoptive parents who wish to use the Public Adoptive-Guardian Center may contact the Center directly or through an attorney or licensed adoption agency. The National Adoptive-Guardian Center of the Children's Friends Society or Catholic Adoptive-Guardian Center, however, may only be contacted through accredited adoption agencies in the United States.

Polish adoption law does not explicitly forbid directed or private adoptions. However, Polish law only allows intercountry adoption of orphans listed by the Public Adoptive-Guardian Center. This Center will only list orphans for intercountry adoption for whom no adopting Polish family can be found. Thus, in practice it is extremely difficult to arrange a directed adoption between a birth parent and prospective adoptive parent without violating Polish law.

Before considering "direct" or "private" adoptions in any country, please contact the office of Children's Issues, Department of State.

After you choose an accredited adoption service provider, you apply to be found eligible to adopt (Form I-800A) by the USCIS. Once the United States Government determines that you are "eligible" and "suitable" to adopt, you or your agency will forward your information to the adoption authority in Poland. Poland's adoption authority will review your application to determine whether you are also eligible to adopt under Polish law. If both the United States and Poland determine that you are eligible to adopt, and a child is available for intercountry adoption, the central adoption authority in Poland may provide you with a referral for a child.

After the child has been identified and the prospective adoptive parents agree to continue with the adoption process, a formal request to adopt the child is then filed with the Polish court in the region where the child resides. The documentation should consist of the original documents previously submitted to the Public Adoptive-Guardian Center plus three sets of copies of the Polish translations (one for the judge, one for the prosecutor, and one for the legal guardian of the child).

In addition, a copy of the state adoption law where the prospective adoptive parents reside must also be submitted with a Polish translation. Please be advised that it is rarely possible to switch jurisdictions. Polish law requires both prospective adoptive parents to be present during the adoption hearing. This proceeding consists of at least two hearings. At the first hearing, the judge will grant permission for the prospective adoptive parents to visit with the child and spend the day with the child(ren) before returning them to the orphanage. At the discretion of the judge, this first hearing may be conducted without the presence of the prospective adoptive parents. Personal interaction between the child and the prospective adoptive parents is mandatory and will later be evaluated by a local adoption center psychologist.

After you accept a match with a child, you will apply to the USCIS for provisional approval to adopt that particular child (Form I-800). After this, your adoption service provider or you will submit a visa application for to a Consular officer at the United States Embassy. The Consular officer will review the child's information and evaluate the child for possible visa ineligibilities. If the Consular office determines that the child appears eligible to immigrate to the United States, he/she will notify Poland's adoption authority (Article 5 letter). For Convention country adoptions, prospective adoptive parent(s) may not proceed with the adoption or obtain custody for the purpose of adoption until this takes place.

At the second hearing, the judge will usually make the final decision granting adoption to the prospective adoptive parents. Once the final hearing has been held and the adoption is approved, a 21-day waiting period is imposed before the adoption is finalized. This period may be shortened to 14 days at the judge's discretion.

Role of Adoption Agencies: There are three adoption centers in Poland that are authorized to qualify foreign prospective parents for adoption in Poland.

Time Frame: Polish adoption procedures are complicated, time consuming, and often require professional legal guidance. The entire process may take a year or more. Two trips to Poland may sometimes be necessary before all requirements are completed.

There is a 21-day appeal period between the time of the final adoption hearing and the time the court's decision goes into legal force. At the judge's discretion, this appeal period may be shortened to 14 days. In general, prospective adoptive parents can expect to stay in Poland for at least four to six weeks before they can obtain all proper documentation and a new passport for the child.

Adoption Fees: There is no fee for registering as a prospective adoptive family with any of the three authorized adoption centers in Poland. However, prospective adoptive parents can expect to pay the following fees and costs in connection with a Polish adoption:

- original complete birth certificate (25 PLN per copy)
- new complete birth certificate (25 PLN per copy)
- Polish passport (45 PLN)

- certified copies of adoption records (20 PLN)
- immigrant visa fee ($380)
- medical exam (200 PLN)
- vaccination form fee (25 PLN)
- translations of Polish documents into English (30-40 PLN per page)
- court interpretation services (200-600 PLN per hour)

In some areas of Poland, adoptive parents may also be financially responsible for the costs of housing the child in the orphanage from the time the adoption is final and until the adoptive parents remove the child from the orphanage.

It is also customary, but not required, for adoptive parents to make donations in the amount of $300-$1000 USD each to the orphanage where their child was living and/or to the private adoption center (National Adoptive-Guardian Center of the Children's Friends Society or Catholic Adoptive-Guardian Center) who assisted in the adoption processing. It is not appropriate to make a donation to the Governmental agency, Public Adoptive-Guardian Center.

In the adoption services contract that you sign at the beginning of the adoption process, your agency will itemize the fees and estimated expenses related to your adoption process.

Documents Required:

- An application to the Public Adoptive-Guardian Center
- Birth certificate(s) of the prospective adoptive parent(s)
- Marriage certificate(s), and proof of termination of previous marriage(s), if applicable
- Good conduct police certificate from the local police department where the prospective adoptive parents reside
- Evidence of financial stability, such as tax returns, deeds to property, bank statements, letters from employers stating salary and length of service
- Proof of citizenship (e.g., copy of passport)
- Certificate attesting to good physical and mental health of the prospective adoptive parents
- Evidence of approval by local social service authorities for adoption as well as a copy of the home study conducted by a licensed agency
- Evidence of approval from the United States Government to bring an adopted child into the United States (i.e., approved petition)

For updates on document requirements and information on how to authenticate documents, visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

Bringing Your Child Home: Once your adoption is complete (or you have obtained legal custody of the child), there are a few more steps to take before you can head home. Specifically, you need to apply for several documents for your child before he or she can travel to the United States, such as a birth certificate, a passport or travel document for your child from the country in which he or she was born, and a U.S. Immigration Visa.

For detailed and updated information on how to obtain these documents, review the *Intercountry Adoption* section on this publication and visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

Child Citizenship Act: For adoptions finalized abroad: The Child Citizenship Act of 2000 allows your new child to acquire American citizenship automatically when he or she enters the United States as lawful permanent residents.

For adoptions finalized in the United States: The Child Citizenship Act of 2000 allows your new child to acquire American citizenship automatically when the court in the United States issues the final adoption decree. To learn more, review the *Intercountry Adoption* section on this publication and visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

After Adoption: Poland requires adoptive parents to submit post adoption reports. Your adoption agency may be able to help you with this process.

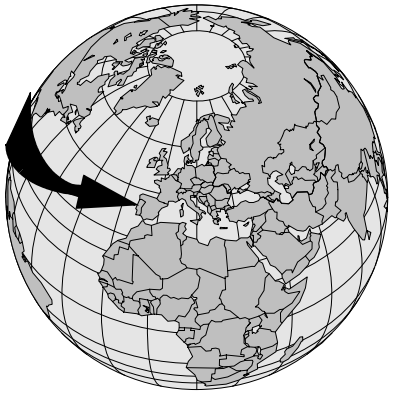
International Parental Child Abduction



November 2008

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *International Child Abduction* section of this book and review current reports online at www.travel.state. gov/childabduction.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is provided for general information only. Questions involving interpretation of specific foreign laws should be addressed to foreign legal counsel.

The Hague Convention on the Civil Aspects of International Child Abduction came into force between the United States and Poland on November 1, 1992. Therefore, Hague Convention provisions for return would apply to children abducted or retained after November 1, 1992. Parents and legal guardians of children taken to Poland prior to November 1, 1992 may still submit applications for access to the child under the Hague Convention. Do not wait to get a custody order to begin the application process. Submit your completed, signed, application as soon as possible. For more information on The Hague Convention, see the *International Parental Child Abduction* section of this publication and review current reports from the U.S. Department of State at www.travel.state. gov/childabduction.

For a list of contact names and addresses for Central Authorities, review current reports online at www.travel.state.gov/childabduction.

PORTUGAL

Compiled from the October 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Portuguese Republic

PROFILE

Geography

Area: 92,391 sq. km.; includes continental Portugal, the Azores (2,333 sq. km.) and Madeira Islands (828 sq. km.); slightly smaller than the State of Indiana; located in Europe's southwest corner bordered by Spain (North and East, 1,214 km.) and the Atlantic Ocean (West and South, 1,793 km.).

Cities: Lisbon (capital, metropolitan area pop. 2.1 million); Porto (metropolitan area pop. 1.9 million).

Terrain: Mountainous in the north; rolling plains in the central and southern regions.

Climate: Maritime temperate (Atlantic-Mediterranean); average annual temperature is 61°F. Temperatures may drop into the low 30s (°F) at night during the coldest months, with daytime highs in the 50s and 60s. The remainder of the year is normally sunny with minimal rainfall. Days are pleasant, with temperatures seldom exceeding 95°F, except in the southern interior of the country; afternoons and evenings are breezy, with nighttime temperatures in the 60s and low 70s; May-October (dry and warm), November-April (cool with rain and wind in the north, mild in the south).

People

Nationality: Noun and adjective—Portuguese (singular and plural).

Population: (2007 est.): 10.6 million. Ages 0 to 14 years—1.6 million (male 840,000; female 798,000). Ages 15 to 24 years—1.3 million (male 646,000; female 620,000). Ages 25 to 64 years—5.9 million (male 2,881,000; female 2,987,000). Ages 65 and over years—1.8 million (male 764,000; female 1,065,000).

Population density: 114 per sq. km. (44 per sq. mi.).

Annual growth rate: (2008 est) 0.8%.

Ethnic groups: Homogeneous Mediterranean stock with small minority groups from Africa (Angola, Cape Verde, Mozambique), South America (Brazil) and Eastern Europe (Ukraine, Romania).

Religions: Roman Catholic 92%, Protestant 4%, atheists 3%, others 1%.

Languages: Portuguese.

Education: Years compulsory—9. Literacy (2004)—93.3%.

Health: (2007 est.): Birth rate—10.59/1,000 (1.07 male/female). Death rate—10.56/1,000. Infant mortality rate—4.9/1,000. Life expectancy—77.87 years.

Work force: (2008 est.) 5.6 million. Government and services (60%); industry and manufacturing (30%); agriculture and fishing (10%).

Government

Type: Republic.

Constitution: Effective April 25, 1976; revised 1982, 1989, 1992, 1997, 2001, 2004, and 2005.

Government branches: Executive—president (head of state), Council of State (presidential advisory body), prime minister (head of government), Council of Ministers. Legislative—unicameral Assembly of the Republic (230 deputies): PS=121, PSD=75, PCP=11, CDS/PP=12, BE=8, PEV=2, NINSC=1. Judicial—Supreme Court, District Courts, Appeals Courts, Constitutional Tribunal.

Political subdivisions: 18 Districts (Lisbon, Leiria, Santarem, Setubal, Beja, Faro, Evora, Portalegre, Castelo Branco, Guarda, Coimbra, Aveiro, Viseu, Braganca, Vila Real, Porto, Braga, Viana do Castelo); 2 Autonomous Island Regions (the Azores and Madeira).

Political parties: Socialist Party (PS), Social Democratic Party (PSD); Portuguese Communist Party (PCP); Popular Party (CDS/PP); Left Bloc (BE); Green Party (PEV).

Economy

GDP: (2008 est.): €169 billion (approx. $228 billion).

Annual growth rate: (2008 est.) 0.8%.

Per capita GDP: (2008 est.): €15,945 (approx. $21,547).

Avg. inflation rate: (2008 est.) 2.46%.
Natural resources: Fish, tungsten, iron, copper, tin, and uranium ores.
Agriculture: Products—forestry, fisheries, cork, wine.
Services: (gross value added 69.2%) Wholesale and retail trade; hotels and tourism; restaurants; transport, storage and communication; real estate; banking and finance; repair; government, civil, and public sectors.
Industry: (gross value added 28.3%) Textiles, clothing, footwear, wood and cork, paper, chemicals, auto-parts manufacturing, base metals, diary products, wine and other foods, porcelain and ceramics; glassware, technology; telecommunications.
Agriculture: (gross value added 2.5%) Livestock, crops, fish.
Trade: (2007) Exports——€37.5 billion (approx. $50.6 billion): machinery and tools 19.8%; vehicles and other transport materials 12.8%; base metals 8.8%; clothing 6.9%; plastics and rubber 5.7%; minerals and mineral products 5.7%; chemical products 5.1%; food products 4.6%; textile materials 4.5%; wood pulp and paper 4.5%; oil products 4.4%; wood and cork 4.3%; agricultural products 3.9%; footwear 3.5%; optical and precision instruments 0.9%; skin and leather 0.3%. Imports—€57 billion (approx. $77 billion): machinery and tools 19.8%; minerals and mineral products 14.0%; vehicles and other transport material 12.0%; base metals 9.9%; agricultural products 9.0%; chemical products 8.7%; plastics and rubber 5.0%; food products 3.6%; textile materials 3.1%; clothing 2.8%; wood pulp and paper 2.4%; optical and precision instruments 2.1%; minerals and mineral products 1.6%; wood and cork 1.3%; skins and leather 1.0%; footwear 0.9%. Export partners—Spain (27.47%); Germany (13.2%); France (12.46%); United Kingdom (6.0%); United States (4.9%); others (35.6%). All EU-27 (76.41%). Import partners—Spain (31%); Germany (13.1%); France (8.46%); Italy (5.5%); United States (1.6%); others (40.4%). All EU-27 (75.4%).
U.S. trade with Portugal (2007): Exports—$2.4 billion: electrical machinery, telecommunications 37.2%; aerospace 16.5%; machinery and mechanical appliances, computers 9%; oil seeds and grains 4.9%; all others 32.4%. Imports—$3.1 billion: mineral fuels, oils 25.7%; electrical machinery, telecommunications 14.9%; vehicles and parts 13.2%; cork and articles of cork 6.1%; all others 40.1%.
Foreign direct investment (FDI, 2007): Incoming FDI by industry: manufacturing—29.1%; real estate, rentals and services to companies—25.5%; wholesale and retail—23.8%; financial activities—8.4%; transport, warehousing, and communication—5.2%; construction—2.0%; electricity, gas, water—0.8%; exploration industry—0.7%; agriculture, silviculture, and fisheries—0.2%; other—4.3%. Incoming FDI by country in Euros (total €30 billion; approx. $40.5 billion): Germany—19.9%; United Kingdom—15.5%; Netherlands—14.7%; Spain—13.0%; France—11.2%; Luxembourg—4.3%; Belgium—3.0%; Switzerland—2.9%; United States—2.6%; Ireland—2.1%; other—10.8%. Portuguese FDI abroad by country in Euros (total €12.3 billion; approx. $16.62 billion): Netherlands—37.2%; Spain—12.8%; Brazil—4.6%; United Kingdom—4.6%; Angola—3.6%; United States—3.4%; Turkey—2.3%; Poland—2.2%; Luxembourg—2.0%; Romania—1.4%; other—25.9%.
Exchange rate (October 24, 2008): US$1 = €0.74 EUR.

HISTORY

Portugal is one of the oldest states in Europe. It traces its modern history to A.D. 1140 when, following a 9-year rebellion against the King of Leon-Castile, Afonso Henriques, the Count of Portugal, became the country's first king, Afonso I. Afonso and his successors expanded their territory southward, capturing Lisbon from the Moors in 1147. The approximate present-day boundaries were secured in 1249 by Afonso III.

By 1337, Portuguese explorers had reached the Canary Islands. Inspired by Prince Henry the Navigator (1394-1460), explorers such as Vasco da Gama, Bartolomeu Dias, and Pedro Alvares Cabral made explorations from Brazil to India and Japan. Portugal eventually became a massive colonial empire with vast territories in Africa and Latin America (Brazil) and outposts in the Far East (East Timor, Macau, Goa).

Dynastic disputes led in 1580 to the succession of Philip II of Spain to the Portuguese throne. A revolt ended Spanish hegemony in 1640, and the House of Braganca was established as Portugal's ruling family, lasting until the establishment of the Portuguese Republic in 1910.

During the next 16 years, intense political rivalries and economic instability undermined newly established democratic institutions. Responding to pressing economic problems, a military government, which had taken power in 1926, named a prominent university economist, Dr. Antonio Salazar, as finance minister in 1928 and prime minister in 1932. For the next 42 years, Salazar and his successor, Marcelo Caetano, appointed prime minister in 1968, ruled Portugal as an authoritarian "corporate" state. Unlike most other European countries, Portugal did not play a combatant role in World War II. It was a charter member of NATO, joining in 1949.

In the early 1960s, wars with independence movements in Portugal's African territories began to drain labor and wealth from Portugal. Professional dissatisfaction within the military, coupled with a growing sense of the futility of the African conflicts, led to the formation of the clandestine "Armed Forces Movement" in 1973.

The downfall of the Portuguese corporate state came on April 25, 1974, when the Armed Forces Movement seized power in a nearly bloodless coup and established a provisional military government.

GOVERNMENT AND POLITICAL CONDITIONS

Portugal moved from authoritarian rule to parliamentary democracy following the 1974 military coup against dictator Marcello Caetano, himself a continuation of the long-running dictatorship of Antonio Salazar. After a period of instability and communist agitation, Portugal ratified a new Constitution in 1976. Subsequent revisions of the Constitution placed the military under strict civilian control; trimmed the powers of the president; and laid the groundwork for a stable, pluralistic liberal democracy, as well as privatization of nationalized firms and the government-owned communications media. Portugal joined the European Union in 1986, and has moved toward greater political and economic integration with Europe ever since. The four main branches of the national government are the presidency, the prime minister and Council of Ministers (the government), the Assembly of the Republic (the parliament), and the judiciary. The president, elected to a five-year term by direct, universal suffrage, also is commander in chief of the armed forces. Presidential powers include confirming the prime minister and Council of Ministers; dismissing the prime minister; dissolving the assembly to call early elections; vetoing legislation, which may be overridden by the assembly; and declaring a state of war or siege. The Council of State, a presidential advisory body, is composed of six senior civilian officers, former presidents elected under the 1976 constitution, five members chosen by the assembly, and five selected by the president.

The government is headed by the prime minister, who is nominated by the assembly for confirmation by the president. The prime minister then names the Council of Ministers. A new government is required to present its governing platform to the assembly for approval.

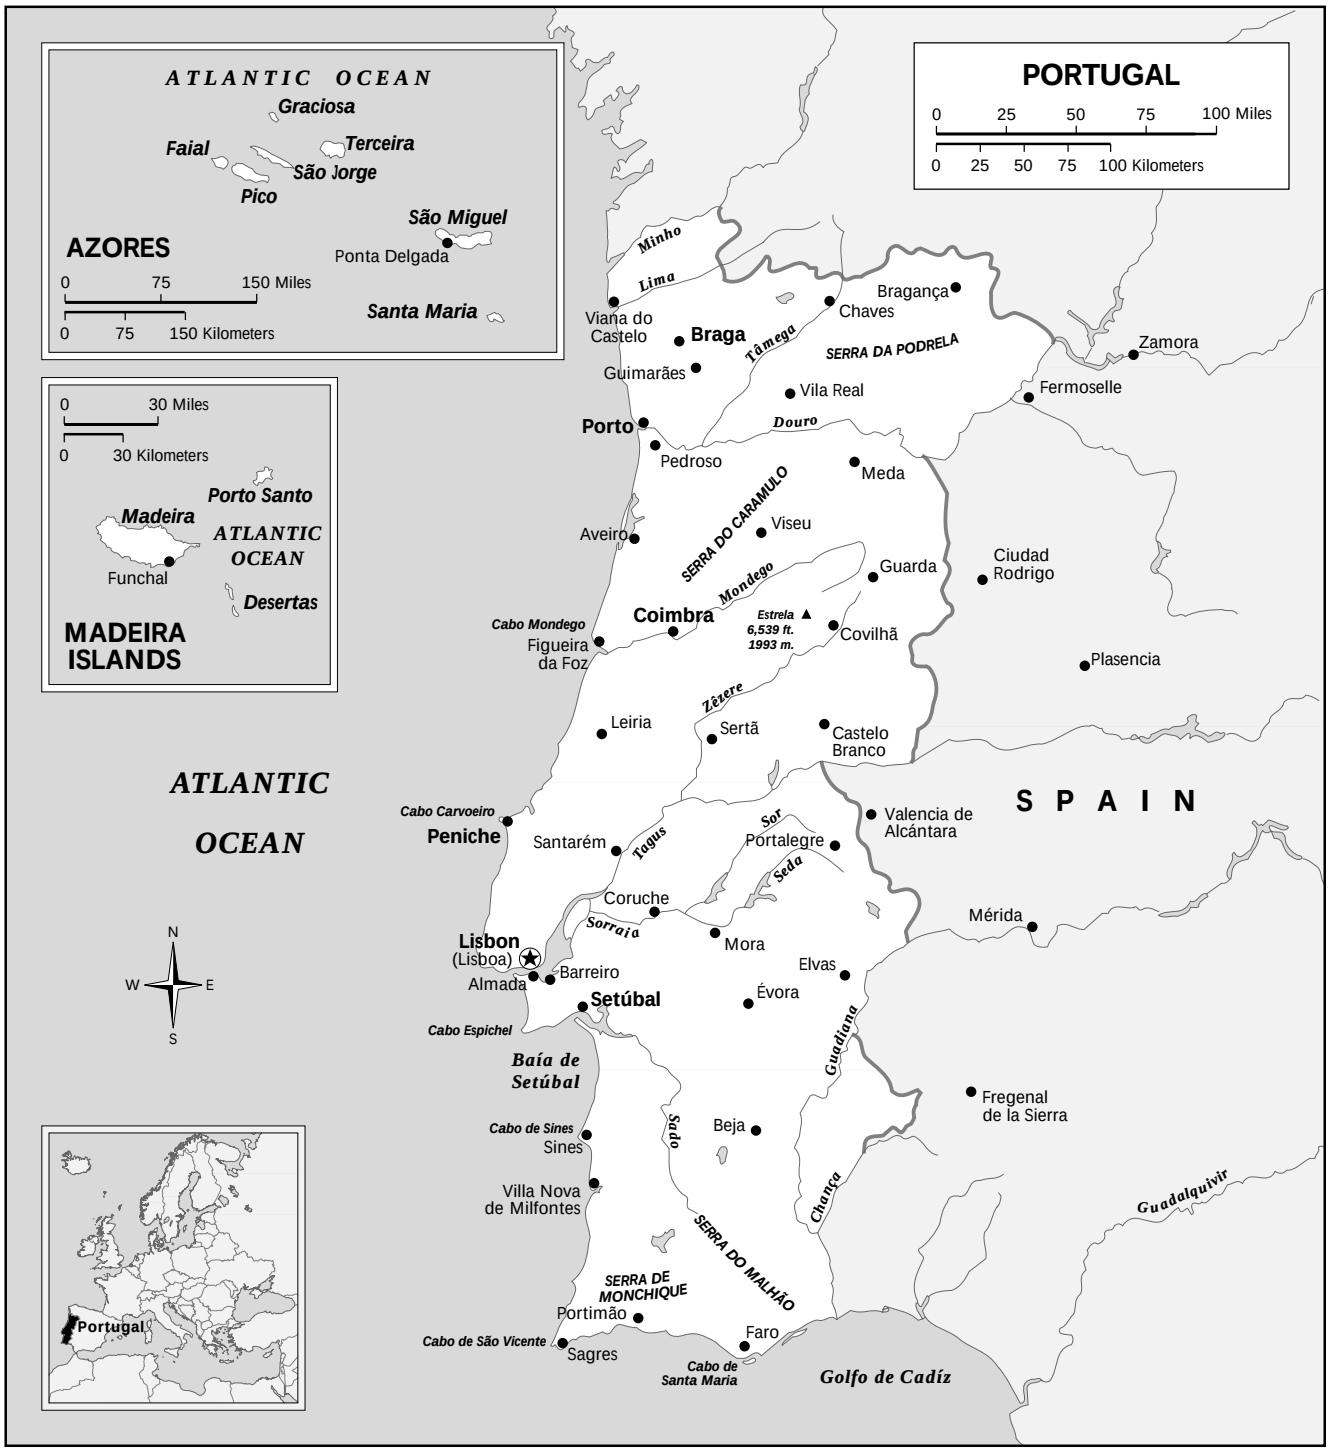
The Assembly of the Republic is a unicameral body composed of 230 deputies. Elected by universal suffrage according to a system of proportional representation, deputies serve terms of office of four years, unless the president dissolves the assembly and calls for new elections.

The national Supreme Court is the court of last appeal. Military, administrative, and fiscal courts are designated as separate court categories. A nine-member Constitutional Tribunal reviews the constitutionality of legislation.

The Azores and Madeira Islands have constitutionally mandated autonomous status. A regional autonomy statute promulgated in 1980 established the Government of the Autonomous Region of the Azores; the Government of the Autonomous Region of Madeira operates under a provisional autonomy statute in effect since 1976. Continental Portugal is divided into 18 districts, each headed by a governor appointed by the Minister of Internal Administration.

Current Administration

Parliamentary elections on February 20, 2005, gave the Socialist Party a comfortable majority for the new Prime Minister, Jose Socrates. Socrates' government formally assumed power March 12, 2005. The Socialist Party's 2005 victory followed a period of transition after center-right (PSD) Prime Minister Jose Manuel Durão Barroso resigned to accept the nomination as President of the European Commission. Durão Barroso, elected in 2002, committed his government to public-sector austerity and business incentives to promote growth, trade, and productivity. It faced rising unemployment, meeting euro-zone fiscal requirements, and adapting to European Union and NATO enlargement.



After Durão Barroso's resignation, President Jorge Sampaio asked the former mayor of Lisbon, Pedro Santana Lopes, to form a new government. Sampaio lost confidence in that government by the end of 2004, dissolved parliament, and called for new parliamentary elections. Social Democrat Anibal Cavaco Silva, a center-right candidate and former Prime Minister, won the Portuguese presidential election on January 22, 2006 with 50.6% of the vote. He was sworn in on March 9, 2006, replacing outgoing Socialist President Sampaio.

Principal Government Officials

Portugal maintains an embassy in the United States at 2012 Massachusetts Avenue, NW, Washington, DC 20036; Tel. 202-350-5400; Fax 202-462-3726 and consulates general in New York City, Boston, San Francisco, and Newark, NJ; consulates in Providence, RI and New Bedford,

MA; and honorary consulates in Honolulu, Los Angeles, Houston, New Orleans, Chicago, Philadelphia, Miami, San Juan, and Waterbury. The Portuguese National Tourist Office in the United States is located at 590 Fifth Avenue, New York, NY 10036 (tel: 212-354-4403).

ECONOMY

Portugal's membership in the European Union (EU) contributed to stable economic growth, largely through increased trade and an inflow of EU funds for infrastructure improvements. Furthermore, Portugal's 1999 entry into the European Monetary Union (EMU) brought exchange rate stability, lower inflation, and lower interest rates. Falling interest rates, in turn, lowered the cost of public debt and helped the country achieve its fiscal targets. Until 2001, average annual growth rates consistently

exceeded those of the EU average. However, a dramatic increase in private sector loans led to a serious external imbalance, with large current and capital account deficits that year.

The Government of Portugal managed to keep the budget deficit under 3% in accordance with the Eurozone's Stability and Growth Pact during 2002-2004. However, in 2005 Portugal acknowledged breaching the target when its budget deficit surged to an all-time high of 6.1%. Since that time, the Socrates government has worked hard to bring the budget situation under control. In 2006, the government reduced the deficit to 3.9%, mainly through revenue-generating measures (i.e., increased collection enforcement and higher taxes). The 2007 budget further reduced the deficit to 2.6% through spending cuts and structural reforms, and the 2008 budget brought the deficit down to 2.2%, the lowest rate in 30 years. The proposed 2009 budget projects the same 2.2%, as additional spending is offset by additional tax revenue. Helped in part by a wider EU recovery, the Portuguese economy grew by 1.9% in 2007, up from 1.4% the year before. A slowing regional economy meant the economy grew by only 0.8% in 2008, short of predictions, and the 2009 budget estimates 0.6% growth in 2009. Unemployment was 7.3% in early 2008.

The service sector, comprised of the public service, retail, tourism, and recreation, is now Portugal's largest employer, having overtaken the traditionally predominant manufacturing and agriculture sectors since the country joined the EU in 1986. EU expansion into Eastern Europe has erased Portugal's historic competitive advantage and relatively low labor costs, particularly in the manufacturing and agriculture sectors. The government is working to change Portugal's economic development model from one based on public consumption and public investment to one focused on exports, private investment, and development of the high-tech sector.

Due to slow economic growth, Portugal has lost ground relative to the rest of the EU since 2002. It is projected that Portugal's 2008 per capita GDP will stand at 65.6% of the EU-27 average and that it will drop to 19th in purchasing power parity behind Cyprus, Greece, the Czech Republic, Malta, and Estonia.

FOREIGN RELATIONS

Portugal has been a significant beneficiary of European Union funding and is a strong proponent of European integration. Portugal held the presidency of the EU Council for the third time during the latter half of 2007. During its presidency, Portugal oversaw the signing of a new EU reform treaty, staged EU summits with Brazil, Russia, India, China, and Ukraine, and held a second EU-Africa summit.

Portugal is a founding member of NATO; it is an active member of the alliance by, for example, contributing proportionally large contingents in Balkans peacekeeping forces. Portuguese forces also participate in NATO operations in Afghanistan. Portugal proposed the creation of the Community of Portuguese Language Countries (CPLP) to improve its ties with other Portuguese-speaking countries, and it currently holds the chairmanship of the Community of Democracies (CD). Portugal has also participated in a series of Ibero-American summits. Portugal was a strong advocate of independence for Timor-Leste, a former Portuguese colony, and has committed troops and money to Timor-Leste in close cooperation with the United States, Asian allies, and the United Nations. Portugal contributed a small gendarme force to Iraq that it withdrew in February 2005, and has contributed funds and personnel for other training and development projects for Iraq reconstruction, including the NATO Training Mission. Portuguese forces are also part of the UN force in Lebanon.

U.S.-PORTUGUESE RELATIONS

Bilateral ties date from the earliest years of the United States. Following the Revolutionary War, Portugal was among the first countries to recognize the United States. On February 21, 1791, President George Washington opened formal diplomatic relations, naming Col. David Humphreys as U.S. minister.

Contributing to the strong ties between the United States and Portugal are the sizable Portuguese communities in Massachusetts, Rhode Island, New Jersey, California, and Hawaii. The latest census estimates that 1.3 million individuals living in the United States are of Portuguese ancestry, with a large percentage coming from the Azores. There are about 20,000 Americans living in Portugal.

The defense relationship between the United States and Portugal is excellent, centered on the 1995 Agreement on Cooperation and Defense (ACD). For 50 years, Lajes Air Base in the Azores has played an important role in supporting U.S. military aircraft. Most recent missions are engaged in counter-terrorism and humanitarian efforts, including operations in Afghanistan and Iraq. Portugal defines itself as "Atlanticist," emphasizing its support for strong European ties with the United States, particularly on defense and security issues. Portugal sees its role as host of NATO's "Joint Command Lisbon," located near Lisbon, as an important sign of alliance interest in transatlantic security issues.

U.S.-Portuguese trade is relatively small, with the United States exporting $2.4 billion worth of goods in 2007 and importing an estimated $3.1 billion. While total Portuguese trade has increased dramatically over the last 10 years, the U.S. percentage of Portugal's exports and imports has been growing at a slower rate. The Portuguese Government is seeking to increase exports of textiles and footwear to the United States and is

encouraging greater bilateral investment. U.S. firms play significant roles in the pharmaceutical, computer, and retail sectors in Portugal, but their involvement in the automotive manufacturing sector has declined in recent years.

TRAVEL

Consular Information Sheet

November 18, 2008

Country Description: Portugal is a developed and stable democracy with a modern economy. Tourist facilities are widely available.

Entry Requirements: Portugal is a party to the Schengen agreement. As such, U.S. citizens may enter Portugal for up to 90 days for tourist or business purposes without a visa. The passport should be valid for at least three months beyond the period of stay. For further details about travel into and within Schengen countries, please see our fact sheet.

Portuguese law requires some non-European Union foreign nationals to register with immigration officials within three working days of entering Portugal. The law affects those who transit another Schengen area country by air en route to Portugal and stay at noncommercial accommodations.

Travelers may also contact the Embassy of Portugal at 2012 Massachusetts Avenue NW, Washington, DC 20036, tel. (202) 350-5400, or the Portuguese Consulates in Boston, MA; New Bedford, MA; Providence, RI; New York, NY; Newark, NJ; San Francisco, CA; or Los Angeles, CA. Visit the Government of Portugal's web site at http://embassyportugal-us.org for the most current visa information.

Safety and Security: Portugal remains largely free of terrorist incidents. However, like other countries in the Schengen area, Portugal's open borders with its Western European neighbors allow the possibility of terrorist groups entering/exiting the country with anonymity. Americans are reminded to remain vigilant with regard to their personal security and to exercise caution.

Brief general strikes and public protests by public sector employees, industrial workers and/or university student groups take place with some frequency, but are usually publicized in advance and are rarely violent.

For the latest security information, Americans traveling abroad should regularly monitor the Department of State, Bureau of Consular Affairs Internet site at http://travel.state.gov, where the current Travel Warnings and Travel Alerts, including the Worldwide Caution Travel Alert, can be found. The Portuguese national emergency response telephone number is 112. This service is similar to the U.S. 911 emergency response telephone number and may be called from all telephones, including cell phones, for police, fire and medical emergencies. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S. and Canada, or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: Portugal has a relatively low rate of violent crime. Travelers may become targets of pickpockets and purse snatchers, particularly at popular tourist sites, restaurants, or on public transportation. Rental cars and vehicles with non-local license plates can be targets for break-ins; travelers should remove visible luggage from vehicles upon parking. Travelers should also avoid using automatic teller machines in isolated or poorly lit areas. Drivers in Portugal should keep car doors locked when stopped at intersections. In general, visitors to Portugal should carry limited cash and credit cards on their person, and leave extra cash, credit cards, and personal documents at home or in a hotel safe. While thieves may operate anywhere, the U.S. Embassy receives most reports of theft from the following areas.

Lisbon: Pick pocketing and purse snatching in the Lisbon area sometimes occurs in buses, restaurants, the airport, trains, train stations, and trams, especially aboard tram number 28 to the Castle of São Jorge. Theft of purses, briefcases and wallets also occurs in hotel lobbies, restaurants and elevators. At restaurants, items hung over the backs of chairs or placed on the floor may be stolen. There have been reports of theft of unattended luggage from the Lisbon Airport. Special care should be taken in the Santa Apolonia and Rossio train stations, the Alfama and Bairro Alto districts, the Castle of São Jorge and the area of Belm.

Outside Lisbon: Thefts have been reported in the towns of Sintra, Cascais, Mafra, Fatima and in the

Algarve. Automobile break-ins sometimes occur in parking areas at tourist attractions and near restaurants. Special care should be taken in parking at the Moorish Castle and Pena Palace in Sintra and at the beachfront areas of Guincho, Cabo da Roca, and Boca do Inferno.

Azores: Pick pocketing and purse snatching are not common occurrences in the Azores. There are no reports of organized crime or gangs.

Madeira: Pick pocketing, while infrequent, may occur in the Old Town and Santa Catarina Park areas of Funchal.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

Portugal has a crime victim's assistance program, administered through an organization known by its acronym, "APAV." Click here for more information (translated into English). Office hours are weekdays, 10 a.m. to 1 p.m., and 2–5 p.m. Phone: [351] 707 20 00 77. To learn about possible sources of American compensation, see our information on Victims of Crime.

The local equivalent to the "911" emergency line in Portugal is: 1-1-2. English-speaking operators are normally available.

Medical Facilities and Health Information: Good medical care is available, but facilities may be limited outside urban areas. Public hospitals offer services at a lower cost generally than private hospitals but sometimes do not maintain the same standards as hospitals in the United States. Travelers are encouraged to obtain insurance that would cover medical services from a private Portuguese hospital or clinic. Private hospitals will ask for a credit card or other form of payment upon admission. In a life-threatening emergency, an ambulance can be requested by calling the national emergency response telephone number 1-1-2. On the other hand, private ambulances should only be used for transport, not life-threatening emergencies, and usually require on-the-spot payment. Note that the responsiveness of emergency services is often not up to U.S. standards.

Travelers sometimes request that relatives or friends in the U.S. mail prescription medicines to them in Portugal, but to do so violates Portuguese law and usually results in the shipment of medications being impounded by Portuguese Customs. When this occurs, the medications may not be released. Travelers who use prescription medicine should bring a sufficient supply with them to cover their anticipated stay in Portugal, along with a copy of their physician's prescription. Should an unforeseen need for prescription refills or new medications arise, Portuguese pharmacies generally carry equivalent medications to those found in the United States, however, they may be sold under a different brand, may not be available in the same dosage, and may require a prescription from a local doctor.

The U.S. Department of State is unaware of any HIV/AIDS entry restrictions for visitors to or foreign residents of Portugal.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's web site at http://wwwn.cdc.gov/travel/default.aspx. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith/en.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Portugal is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

Portugal has one of the highest rates of automobile accidents and related fatalities in Europe. Drivers should use extreme caution, as local driving habits, high speeds, and poorly marked roads pose special hazards. In Portugal, fines for traffic violations are substantial and usually must be paid on the spot. Taxis are a reliable means of transportation, though travelers should be alert to possible discrepancies between the meter fare and the amount requested by the driver. Buses are reliable and inexpensive.

In the Azores, driving can be treacherous due to narrow cobblestone streets, blind curves, unprotected embankments, herds of cows in the countryside roads, and the high speeds of other drivers. In contrast to the situation on the Portuguese mainland, traffic violations are registered by radar and later forwarded to the offender via the postal service; payments are not made on the spot. Taxis do not have meters. The fare consists of a base fee plus a posted rate per kilometer traveled. Public buses are inexpensive. Bus services begin at 7:00 a.m. and generally operate until 8:00 p.m. depending on the destination.

U.S. visitors to Portugal may drive with a valid U.S. driver's license for up to six months. For international driving permits, please contact AAA or the National Auto Club. For specific information concerning Portuguese driver's permits, vehicle inspection and mandatory insurance, please contact the Portuguese National Tourist Office by telephone at 1-800-767-8842 or visit the website for the Portuguese Directorate-General for Traffic at www.dgv.pt.

Visit the website of Portugal's national tourist office at www.portugal.org, or the national authority responsible for road safety at http://www.dgv.pt.

Aviation Safety Oversight: The U.S. Federal Aviation Administration (FAA) has assessed the Government of Portugal's Civil Aviation Authority as being in compliance with International Civil Aviation Organization (ICAO) aviation safety standards for oversight of Portugal's air carrier operations. For more information, travelers may visit the FAA's web site at http://www.faa.gov.

Special Circumstances: Portuguese customs authorities may enforce strict regulations concerning temporary importation into or export from Portugal of such items as firearms, antiquities, medications, business equipment, sales samples and other items. It is advisable to contact a Portuguese Embassy or Consulate in the U.S. for specific information regarding customs requirements. Portugal's customs authorities encourage the use of an ATA (Admission Temporaire/ Temporary Admission) carnet for the temporary admission of professional equipment, commercial samples, and/or goods for exhibitions and fair purposes.

ATA Carnet Headquarters, located at the U.S Council for International Business, 1212 Avenue of The Americas, New York, NY 10036, issues and guarantees the ATA carnet in the United States. For additional information, please telephone (212) 354-4480, or send an e-mail to atacarnet@uscib.org, or visit http://www.uscib.org for details.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating Portugal's laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Portugal are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in Portugal are encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration web site so that they can obtain updated information on travel and security within Portugal. Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate.

By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency. The U.S. Embassy is located on Avenida das Forças Armadas, in the neighborhood of Sete Rios. Telephone (351)(21) 727-3300, fax (351)(21) 727-2354, Internet home page: lisbon.usembassy.gov.

The U.S. Consulate in the Azores is located in the city of Ponta Delgada on the island of San Miguel. The address is Av. Principe do Monaco, 6-2o, phone 351-296-282-216, fax 351-296-28-72-16.

There is a part-time U.S. Consular Agency in Funchal, on the island of Madeira, on Rua Alfandega, no 10-2, Room A-B, phone 351-291-235-636, fax 351-291-229-360. The Consular Agency is open Monday through Friday, from 10:00 a.m. to 12:00 p.m.

Intercountry Adoption

May 2006

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is based on public sources and current understanding. Questions involving foreign and U.S. immigration laws and legal interpretation should be addressed respectively to qualified foreign or U.S. legal counsel.

Please Note: Intercountry adoptions are permitted between Portugal and the United States. However, according to Portuguese adoption law only children who have no possibility of being adopted by applicants in Portugal are available for intercountry adoption. As a result, the youngest children available for intercountry adoption often have medical issues or are older, i.e., from 10 to 14 years of age.

Patterns of Immigration: Please review current reports online at http://adoption.state.gov.

Adoption Authority: The central authority (CA) for intercountry adoption in Portugal is the General Directorate of Welfare and Social Services, Families and Children (Direcção-Geral da Segurança Social, da Família e da Criança) in the Ministry of Labor and Social Solidarity.

Direcção-Geral da Segurança Social,
da Família e da Criança
Av. da República, 67

1069-033 Lisboa—Portugal
Tel.: 00 351 217 920 100; Fax: 00 351 217 934 739;
e-mail: dgssfc@seg-social.pt
Contact: Dra. Graça Ribeiro

Eligibility Requirements for Adoptive Parents:

- Persons who have been married or living in a common-law relationship for more than 4 years and who are both over age 25;
- Single persons over age 30;
- Persons under age 60, provided that the age difference between the child and the adopter does not exceed 50 years.

Residency Requirements: A U.S. citizen residing outside of Portugal who wishes to obtain the Portuguese Court's authorization to transfer a Portuguese orphan to the U.S. for the purposes of adoption in the U.S. does not need to establish residency in Portugal. However, a U.S. citizen who wishes to fully complete the adoption of a child in Portugal must be a legal resident of Portugal.

Time Frame: The amount of time needed to complete a process in Portugal varies considerably from case to case. According to Portuguese authorities, the average amount of time to complete an intercountry adoption is three months.

The intercountry adoption process involves the Portuguese judicial system, in coordination with the Portuguese Central Authority as well as the Ministry's local Welfare and Social Services office (Centro Distrital da Segurança Social).

Adoption Agencies: To date, No U.S. private adoption agency has applied accreditation by the Government of Portugal to transmit intercountry adoption cases directly to the Portuguese Central Authority.

However, the Portuguese CA has advised the U.S. Embassy in Lisbon that private adoption agencies licensed in the U.S. may initiate intercountry adoption requests and submit them to the Portuguese CA if they do so through a competent U.S. State authority, i.e., a state-level government agency that has oversight over adoption issues.

Adoption Fees: The adoption process is free of charge in Portugal. There are no fees for court services.

Adoption Eligibility: Portuguese children may become eligible for adoption in Portugal or in a receiving State under the following circumstances:

- if the minor is a child of unknown or deceased parents;
- if there has been previous consent to the adoption, i.e., the biological parents have given their authorization before a Portuguese court;
- if the parents have abandoned the minor;
- if the parents, by action or omission, have put in danger the minor's safety, health, moral formation or education, in ways which, by their gravity, seriously compromise the proper bonds of affection and affiliation;
- if the parents of a minor sheltered in a private home or in an institution have revealed a manifest lack of interest in the child, seriously compromising the proper bonds of affection and affiliation, at a minimum, during the three-month period prior to the submission of a petition to the court requesting the entrustment of the child for future adoption.

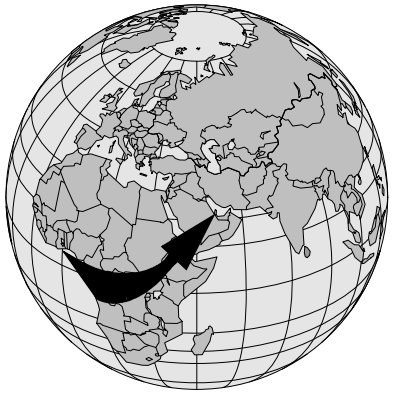
Adoption Procedures: To apply to become an adoptive parent, the following steps must be taken:

- A home study must be performed in the United States by a competent adoption organization.
- The home study and other relevant documents must be submitted by the adoption organization to the competent State agency in the U.S. state in which the adoption of the child will be completed, for that agency's approval.
- Once approved, the state agency forwards the adoption package to the Portuguese CA.
- Upon the Portuguese CA's finding that the case meets the legal requirements of the state of origin and the receiving state, the CA will submit a report to the Portuguese court, recommending that the child be placed with the prospective adoptive parents and released for intercountry adoption. The CA will also request that legal guardianship be transferred from the foster care home where the minor resides to the prospective adopting parents. The Portuguese Welfare and Social Services office will also be notified of the steps that are being taken regarding the minor.
- Prospective adoptive parents will subsequently be notified by the court to appear for a hearing before the Family Court Judge. They must appear in person. Attorneys may not represent prospective adopting parents in Court.
- Upon the successful conclusion of the judicial proceedings, the Court issues legal guardianship, awards legal custody of the child to the prospective adoptive parents and releases the child for intercountry adoption. The court must also authorize the travel of the minor with the adopting parents to be adopted abroad.

Required Documents:

- Home study report (social and psychological evaluation);
- Certificate of eligibility and suitability to adopt in Portugal;
- Criminal record;
- Health certificate;
- Residence certificate;
- Marriage certificate, or, if applicable, statement proving that the couple live as common-law husband/wife;

- Birth certificate(s) of prospective adoptive parents;
- Income certificate;
- Identity card or passport;
- The prospective adoptive parents' consent to have the competent authorities in the Receiving State supervise the integration of the child with the family during the pre-adoption period and producing progress reports on the situation each six months until the full adoption is ordered;
- Agreement by the prospective adoptive parents to forward to the Portuguese Central Authority an abstract of the U.S. Court's full adoption decree dully certified with the seal of the Apostille Convention.



Embassy of Portugal
2012 Massachusetts Avenue, NW
Washington, DC 20036
Tel. 202-350-5400
Fax 202-462-3726

Portugal also has consulates general in Boston, Newark, New York, and San Francisco. There are also consulates in Providence, Rhode Island and New Bedford, Massachusetts.

U.S. Immigration Requirements: Prospective adopting parents are strongly encouraged to consult USCIS publication M-249, *The Immigration of Adopted and Prospective Adoptive Children*, as well as the Department of State publication, *Intercountry Adoptions*. Please see the *Intercountry Adoption* section of this book for more details and review current reports online at http://adoption.state.gov.

U.S. Embassy
Avenida das Forças Armadas
1600-081 LISBOA
Apartado 43033
1601-301 LISBOA

Additional Information: Specific questions about adoption in Portugal may be addressed to the U.S. Embassy in Lisbon. General questions regarding intercountry adoption may be addressed to the Office of Children's Issues, U.S. Department of State, CA/OCS/CI, SA-29, 4th Floor, 2201 C Street, NW, Washington, D.C. 20520-4818, toll-free Tel: 1-888-407-4747.

QATAR

Compiled from the June 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
State of Qatar

PROFILE

Geography

Area: 11,437 sq. km. (4,427 sq. mi.); about the size of Connecticut and Rhode Island combined.

Cities: Capital—Doha 431,525 (2005 est.). Other cities—Messaieed, Al-Khor, Dukhan, Ruwais.

Terrain: Mostly desert, flat, barren.

Climate: Hot and humid, with a mild winter.

People

Nationality: Noun and adjective—Qatari(s).

Population: (May 2008 est.) 1,448,446; males 1,096,815 (75.7%); females 351,630 (24.3%).

Population growth: (May 2008 est.) 59.6%.

Ethnic groups: Qatari (Arab) 20%; other Arab 20%; Indian 20%; Filipino 10%; Nepali 10%; Pakistani 7%; Sri Lankan 5%; other 5%.

Religions: Islam (state religion, claimed by virtually all of the indigenous population).

Languages: Arabic (official); English (widely spoken).

Education: Compulsory—ages 6-16. Attendance—98%. Literacy (2004 est.)—89% total population, 89.1% male, 88.6% female.

Health: (2007 est.) Infant mortality rate—17.46/1,000 live births. Life expectancy—74.14 years.

Work force: (2006) 508,000. Private sector—61.2%; mixed sector—28.5%; government—5.6%.

Government

Type: Constitutional monarchy.

Independence: September 3, 1971.

Constitution: Approved by popular vote 2003; came into force June 2005.

Government branches: Executive—Council of Ministers. Legislative—Advisory Council (currently appointed pending elections in 2008; has assumed only limited responsibility to date). Judicial—independent.

Political subdivisions: Fully centralized government; nine municipalities.

Political parties: None.

Suffrage: Universal over age 18, since 1999.

Economy

GDP: (2007) $63.8 billion.

Real growth rate: (2007) 12.5%.

Per capita income: (2007) $67,000.

Natural resources: Petroleum, natural gas, fish.

Agriculture: Accounts for less than 2% of GDP. Products—fruits and vegetables (most food is imported).

Industry: Types—oil production and refining and natural gas development (60% of GDP), mining, manufacturing, construction, and power.

Trade: (2006 est.) Exports—$34 billion, principally oil 47% and gas 36%. Partners (2005)—Japan 36.3%, South Korea 19.1%, Singapore 8.1%, India 5.1%, U.A.E. 2.9%, U.S. 1.2%. Imports—$6.7 billion, principally consumer goods, machinery, food. Partners (2005)—France 11.8%, Japan 10.7% U.S. 10.6%, Germany 8.5%, Saudi Arabia 7.4%, U.K. 7.1%, Italy 6.6%, South Korea 5.6%, U.A.E. 4.9%.

PEOPLE

Natives of the Arabian Peninsula, many Qataris are descended from a number of migratory tribes that came to Qatar in the 18th century from the neighboring areas of Nejd and Al-Hasa. Some came from neighboring Gulf emirates and others are descended from Persian merchants. Most of Qatar's 907,229 inhabitants live in Doha, the capital. Foreigners with temporary residence status make up about three-fourths of the population. Foreign workers comprise 52% of the total population and make up about 89% of the total labor force. Most are South and Southeast Asians, Egyptians, Palestinians, Jordanians, and Iranians. About 8,000 U.S. citizens reside in Qatar.

For centuries, the main sources of wealth were pearling, fishing, and trade. At one time, Qataris owned nearly one-third of the Persian Gulf fishing fleet. With the Great Depression and the introduction of Japan's cultured-pearl industry, pearling in Qatar declined drastically.

The Qataris are mainly Sunni Muslims. Islam is the official religion, and Islamic jurisprudence is the basis of Qatar's legal system, although civil courts have jurisdiction over commercial law. Arabic is the official language, and English is widely spoken. Education is compulsory and free for all Arab residents 6-16 years old. Qatar has an increasingly high literacy rate.

HISTORY

Qatar has been inhabited for millennia. The Al Khalifa family of Bahrain dominated the area until 1868 when, at the request of Qatari nobles, the British negotiated the termination of the Bahraini claim, except for the payment of tribute. The tribute ended when the Ottoman Empire occupied Qatar in 1872.

When the Ottomans left at the beginning of World War I, the British recognized Sheikh Abdullah bin Jassim Al Thani as ruler. The Al Thani family had lived in Qatar for 200 years. The 1916 treaty between the United Kingdom and Sheikh Abdullah was similar to those entered into by the British with other Gulf principalities. Under it, the ruler agreed not to dispose of any of his territory except to the U.K. and not to enter into relationships with any other foreign government without British consent. In return, the British promised to protect Qatar from all aggression by sea and to lend their good offices in case of a land attack. A 1934 treaty granted more extensive British protection.

In 1935, a 75-year oil concession was granted to the Qatar Petroleum Company, a subsidiary of the Iraq Petroleum Company, which was owned by Anglo-Dutch, French, and U.S. interests. High-quality oil was discovered in 1940 at Dukhan, on the western side of the Qatari peninsula. However, the start of WWII delayed exploitation of Qatar's oil resources, and oil exports did not begin until 1949.

During the 1950s and 1960s gradually increasing oil revenues brought prosperity, rapid immigration, substantial social progress, and the beginnings of Qatar's modern history. When the U.K. announced a policy in 1968 (reaffirmed in March 1971) of ending the treaty relationships with the Gulf sheikdoms, Qatar joined the other eight states then under British protection (the seven trucial sheikdoms—the present United Arab Emirates—and Bahrain) in a plan to form a union of Arab emirates. By mid-1971, as the termination date of the British treaty relationship (end of 1971) approached, the nine still had not agreed on terms of union. Accordingly, Qatar declared independence as a separate entity and became the fully independent State of Qatar on September 3, 1971.

In February 1972, the Heir Apparent, Sheikh Khalifa bin Hamad, deposed his cousin, Amir Ahmad, and assumed power. Key members of the Al Thani family supported this move, which took place without violence or signs of political unrest.

On June 27, 1995, the Deputy Amir, Sheikh Hamad bin Khalifa, deposed his father Amir Khalifa in a bloodless coup. An unsuccessful counter-coup was staged in 1996. The Amir and his father are now reconciled, though some supporters of the counter-coup remain in prison. The Amir announced his intention for Qatar to move toward democracy and has permitted a freer and more open press and municipal elections as a precursor to expected parliamentary elections. Qatari citizens approved a new constitution via public referendum in April 2003, which came into force in June 2005.

GOVERNMENT AND POLITICAL CONDITIONS

The ruling Al Thani family continued to hold power following the declaration of independence in 1971. The head of state is the Amir, and the right to rule Qatar is passed on within the Al Thani family. Politically, Qatar is evolving from a traditional society to one based on more formal and democratic institutions to meet the requirements of social and economic progress. The country's constitution formalizes the hereditary rule of the Al Thani family, but it also establishes an elected legislative body and makes government ministers accountable to the legislature. In current practice, the Amir's role is influenced by continuing traditions of consultation, rule by consensus, and the citizen's right to appeal personally to the Amir. The Amir, while directly accountable to no one, cannot violate the Shari'a (Islamic law) and, in practice, must consider the opinions of leading families and the religious establishment.

The opinions of the people are institutionalized in the Advisory Council, an appointed body that assists the Amir in formulating policy. However, it is possible that the first elections for this body will occur in 2008. Elections in 1999, in which both men and women participated, resulted in the formation of a municipal council. One woman candidate was elected to the municipal council in 2003. Municipal elections were held for the third time in April 2007.

There has been no serious challenge to Al Thani rule. As the most visible sign of the move toward openness, the Al Jazeera satellite television station based in Qatar is considered the most free and unfettered broadcast source in the Arab world. In practice, however, Al Jazeera rarely criticizes the ruling Al Thani family.

Min. of State for Foreign Affairs: **Ahmad bin Abdallah al-MAHMUD**
Min. of State for Internal Affairs: **ABDALLAH bin Nasir bin Khalifa Al Thani**
Governor, Central Bank: **ABDALLAH bin Saud Al Thani**
Ambassador to the US: **Ali Fahad al-Shahwany al-HAJRI**
Permanent Representative to the UN, New York: **Nasir bin Abd al-Aziz al-NASIR**

Qatar maintains an embassy in the United States at 2555 M Street, NW, Washington, DC 20037 (tel. 202-274-1600) and a consulate in Houston at 4265 San Felipe Street, Suite 1100, Houston, Texas 77207 (tel. 713-968-9840). Qatar's Permanent Mission to the United Nations is at 747 Third Ave., 22nd floor, New York, NY 10017 (tel. 212-486-9335).

DEFENSE

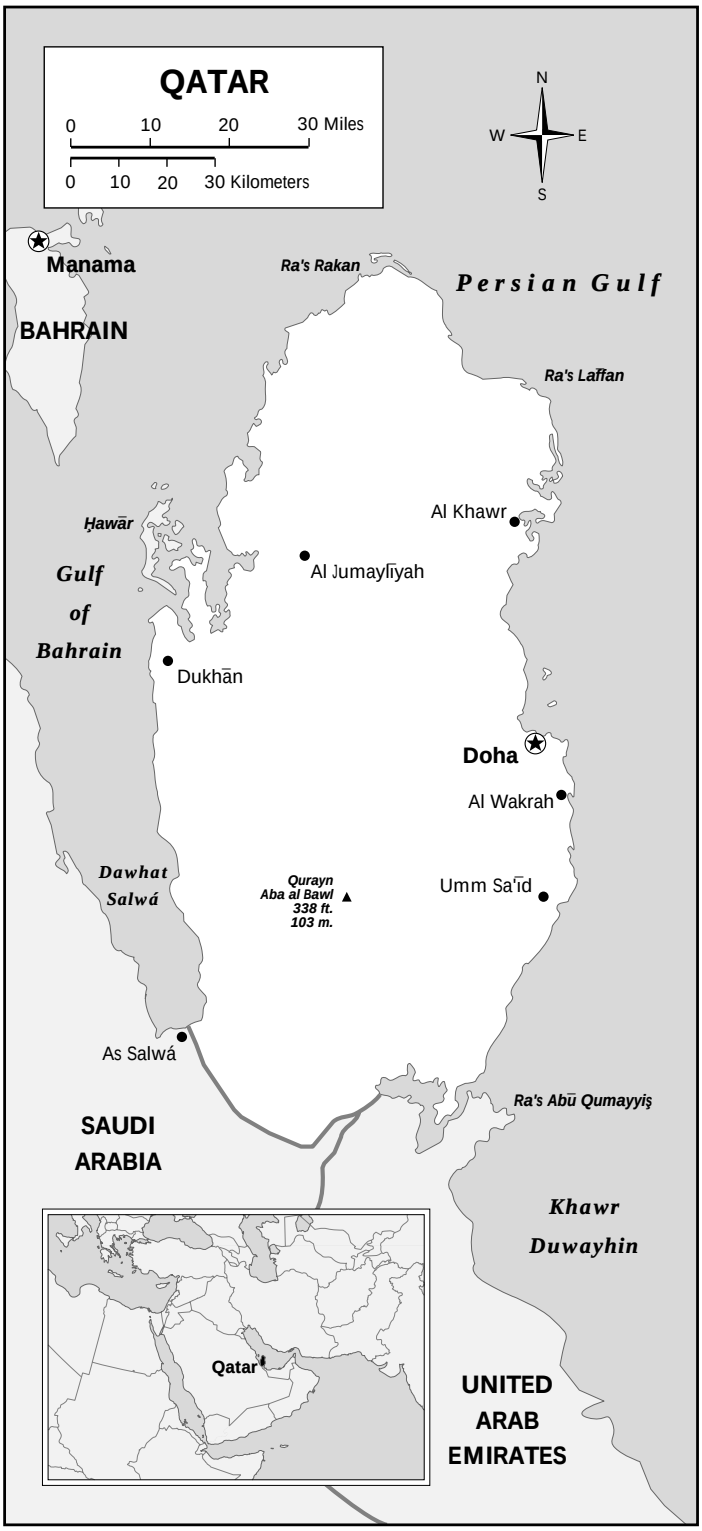
Qatar's defense expenditures are estimated to be in the range of 10% of GDP. Qatar maintains a modest military force of about 12,000 men, including an army, navy, and air force. The country has a public security force of about 8,000 men, including a coast guard, national firefighting force, air wing, marine police, and an internal security force. Qatar also has signed defense pacts with the U.S., U.K., and France. Qatar plays an active role in the collective defense efforts of the Gulf Cooperation Council (GCC—the regional organization of the Arab states in the Gulf; the other five members are Saudi Arabia, Kuwait, Bahrain, the U.A.E., and Oman). Qatari forces played an important role in the first Gulf War, and Qatar has supported U.S. military operations critical to the success of Operation Enduring Freedom and Operation Iraqi Freedom. Qatar hosts CENTCOM Forward Headquarters.

ECONOMY

Oil formed the cornerstone of Qatar's economy well into the 1990s and still accounts for about 62% of total government revenue. In 1973, oil production and revenues increased sizably, moving Qatar out of the rank of the world's poorest countries and providing it with one of the highest per capita incomes. In 2007, Qatar's per capita income of nearly $67,000 was the fifth-highest in the world.

Qatar's economy suffered a downturn from in the mid-1990s. Lower Organization of Petroleum Exporting Countries (OPEC) oil production quotas, a fall in oil prices, and the generally unpromising outlook on international markets reduced oil earnings. In turn, the Qatari Government cut spending plans to match lower income. The resulting recessionary local business climate caused many firms to lay off expatriate staff. With the economy recovering in the late 1990s, expatriate populations have grown again.

Oil production is currently around 835,000 barrels a day (bpd), and is expected to reach 1.1 million bpd by 2009. At the current production pace, oil reserves are expected to last more than 40 years. Moreover, Qatar's proven reserves of gas are the third-largest in the world, exceeding 900 trillion cubic feet (14% of the world's total proven gas reserves). Qatar shares with Iran the largest single non-associated gas field in the world, the North Field. Qatar is now the world's largest producer of liquefied natural gas (LNG), with a capacity of more than 31 million metric tons per annum (mmta), and it expects to reach 77.5 mmta of LNG exports by 2010. By 2010, Qatar will account for one-third of the world's LNG supply.



The 1991 completion of the $1.5-billion Phase I of the North Field gas development project strongly boosted the economy. In 1996, Qatar began exporting liquefied natural gas to Japan. Further phases of North Field gas development costing billions of dollars are in various stages of planning and development, and Qatar has concluded agreements with the U.A.E. to export gas via pipelines and to Spain, Turkey, Italy, the U.S., France, South Korea, India, China, Taiwan, and the U.K. via ship. However, the government has halted any further expansion of gas production until 2010, as it assesses its plans for future exploitation of the field.

Qatar's natural gas liquefaction facilities and related industries are located in Ras Laffan Industrial City, site of the world's largest LNG exports of more than 31 million metric tons per year. Qatar's heavy industrial base, located in Messaieed, includes a refinery with a 140,000

bpd capacity, a fertilizer plant for urea and ammonia, a steel plant, and a petrochemical plant, and several new petrochemical plants will be built in the coming years. All these industries use gas for fuel. Most are joint ventures between U.S., European, and Japanese firms and the state-owned Qatar Petroleum (QP). The U.S. is the major equipment supplier for Qatar's oil and gas industry, and U.S. companies are playing a major role in the development of the oil and gas sector and petrochemicals.

The country's economic growth has been stunning. Qatar's nominal GDP, currently $63.8 billion, had recently been growing at an average of 15%, and the 2007 growth rate was 12.5%. Qatar's per capita GDP is $67,000, and projected to soon be the highest in the world. The Qatari Government's strategy is to utilize its wealth to generate more wealth by diversifying the economic base of the country beyond hydrocarbons.

Qatar pursues a vigorous program of "Qatarization," under which all joint venture industries and government departments strive to move Qatari nationals into positions of greater authority. Growing numbers of foreign-educated Qataris, including many educated in the U.S., are returning home to assume key positions formerly occupied by expatriates. In order to control the influx of expatriate workers, Qatar has tightened the administration of its foreign manpower programs over the past several years. Security is the principal basis for Qatar's strict entry and immigration rules and regulations.

FOREIGN RELATIONS

Qatar achieved full independence in an atmosphere of cooperation with the U.K. and friendship with neighboring states. Most Arab states, the U.K., and the U.S. were among the first countries to recognize Qatar, and the state promptly gained admittance to the United Nations and the Arab League. Qatar established diplomatic relations with the U.S.S.R. and China in 1988. It was an early member of OPEC and a founding member of the GCC. In September 1992, tensions arose with Saudi Arabia when Saudi forces allegedly attacked a Qatari border post, resulting in two deaths. Relations have since improved, and a joint commission has been set up to demarcate the border as agreed between the two governments. Most, but not all, of the border issues have been resolved. For years, both Qatar and Bahrain claimed ownership of

the Hawar Islands. The case was eventually referred to the International Court of Justice (ICJ) in The Hague. The ICJ issued a ruling in June 2001, which both sides accepted. In the agreement Bahrain kept the main Hawar Island but dropped claims to parts of mainland Qatar, while Qatar retained significant maritime areas and their resources.

U.S.-QATARI RELATIONS

Bilateral relations are strong and expanding. The U.S. embassy was opened in March 1973. The first resident U.S. ambassador arrived in July 1974. Ties between the U.S. and Qatar are excellent. Amir Hamad last visited Washington in 2004, and President Bush visited Qatar in 2003. Qatar and the United States coordinate closely on regional diplomatic initiatives, cooperate to increase security in the Gulf, and enjoy extensive economic links, especially in the hydrocarbons sector. Qatar sees the development of a world-class educational system as key to its continued success. As a result, hundreds of Qataris study in the United States. Cornell University has established a degree-granting branch medical school campus in Doha, and other universities including Texas A&M, Carnegie Mellon University, the Virginia Commonwealth University School of Design, and the Georgetown School of Foreign Service also have branch campuses in Qatar's "Education City" complex.

TRAVEL

Consular Information Sheet

November 10, 2008

Country Description: Qatar is a monarchy governed by the ruling Al Thani family in consultation with a council of ministers, an appointed advisory council and an elected municipal council. Islamic ideals and beliefs provide the foundation of the country's customs, laws and practices. Located in the heart of the Persian Gulf, Qatar is a dynamic, modernizing, rapidly developing country that is among the wealthiest per capita in the world. The capital is Doha. Tourist facilities are available.

Entry Requirements: Passports and visas are required. U.S. citizens may obtain a single-entry tourist or business visa at Doha International Airport upon arrival. Single entry visas cost $28 and must be paid by credit card only. Cash is not accepted. Visas are valid for 30 days and may be extended for an additional 30 days for a $28 fee through the Airport Visas Section of the Immigration Department located next to Doha International Airport. However, U.S.-citizen travelers will be able to clear Qatari immigration more quickly and be granted a longer stay in country by obtaining visas prior to arrival. Former resident permit holders who return to Qatar for a short business or tourist trip may still obtain a visa on arrival at Doha International Airport. To facilitate entry with Qatari Immigration, former resident permit holders should carry a "no objection letter" issued by their former sponsor.

If planning to arrive at another port of entry in Qatar or if a previous resident of Qatar whose visa had been cancelled early or for whom a sponsor may have filed a complaint, travelers should obtain a tourist or business visa in advance of their arrival from a Qatari embassy or consulate abroad or online at Qatar's E-Government English language web site, http://portal.www.gov.qa/wps/portal. Travelers should also note that the Qatari Government charges $55 for each day that an individual overstays a visa, up to a maximum amount of $3,300.

For further information on visas, residence permits and entry requirements, please visit the Qatar's E-Government English language web site, http://portal.www.gov.qa/wps/portal. Travelers may also contact the Embassy of the State of Qatar (www.qatarembassy.net) at 2555 M Street NW, Washington, DC 20037, telephone (202) 274-1600, fax (202) 237-0061. They may also contact the Consulate General of the State of Qatar, 1990 Post Oak Blvd. Suite 810, Houston TX 77056, telephone (713) 355-8221, fax (713) 355-8184, send email inquiries to info@qatarembassy.org.

Military personnel are subject to different entry/exit requirements and should refer to www.fcg.pentagon.mil for specific information pertaining to their travel requirements.

NOTE FOR DUAL NATIONALS: Qatari law requires that Qatari citizens only hold Qatari citizenship and enter and exit on a Qatari passport. Qatari authorities have confiscated the passports of U.S. citizens who acquired Qatari citizenship through marriage to a Qatari national or by virtue of birth in the U.S. In several cases, Qatari authorities informed U.S. citizens that their U.S. citizenship had been revoked and was no longer valid.

However, foreign governments have no authority to revoke the citizenship

of a U.S. citizen. If this occurs, please contact the U.S. Embassy in Doha immediately.

Safety and Security: Incidents of violence are rare in Qatar, although attacks against Western targets have occurred. To provide for public security, a large police presence is deployed throughout the country. American citizens in Qatar are strongly encouraged to maintain a high level of vigilance, be aware of local events and take the appropriate steps to bolster their personal security at all times.

The Department of State remains concerned about the possibility of terrorist attacks against U.S. interests worldwide, including the Middle East. Both historical and recurring information suggests that al-Qa'ida and affiliated organizations continue to plan strikes against Western targets; these attacks may employ a wide variety of tactics to include assassination, kidnapping, hijacking and bombing. On March 19, 2005, a suicide bomber detonated a vehicle-borne improvised explosive device (VBIED) at a theater in Doha regularly frequented by westerners; a citizen of the United Kingdom was killed, and several other individuals were injured.

Increased security at official facilities has led terrorists and their sympathizers to seek softer, less fortified targets; the March 2005 theater attack in Doha is one such example. Other locations of potential concern include any venue where U.S. citizens and other foreigners are known to congregate in large numbers such as public assemblies, sporting events, restaurants, residential areas, clubs, places of worship, schools, hotels, etc. The Government of Qatar occasionally provides security for such locations and events, but to varying degrees. In most instances, the Embassy cannot gauge the appropriateness of security for a given event prior to its commencement. The Embassy strongly encourages American citizens to avoid large crowds and demonstrations whenever possible.

For the latest security information, Americans traveling abroad should regularly monitor the Department's Internet web site, where the current Worldwide Caution Travel Alert, Middle East and North Africa Travel Alert, Travel Warnings and other Travel Alerts and additional resources can be found.

Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S. and Canada or, for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: The crime rate in Qatar is generally low. A large police presence is apparent to travelers throughout the country. Incidents of violence are rare but have occurred more frequently as Doha's population and economic pressures on expatriate workers have increased substantially during the past few years. Local and third country national young men have been known to verbally and physically harass unaccompanied, expatriate women.

Reports of petty theft have been growing, including ATM and credit card theft, purse snatching and pick-pocketing. Travelers are cautioned not to leave valuables such as cash, jewelry, and electronic items unsecured in hotel rooms or unattended in public places.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the U.S. Embassy in Doha. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the U.S. Embassy for assistance. The Embassy staff can, for example, assist you to find appropriate medical care, contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

The local equivalent to the "911" emergency line in Qatar is: 999. The Qatari Police can be contacted for emergency assistance by dialing 999 from any telephone in Qatar.

Medical Facilities and Health Information: Good modern medical care and medicines are available in Doha, although only basic or no medical care may be available in Qatar's smaller cities or outlying areas. Serious medical problems requiring hospitalization and/or medical evacuation to the United States can cost thousands of dollars. Doctors and hospitals expect immediate cash payment for health services. Information about the Qatari national healthcare system is available at http://www.hmc.org.qa.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's web site at http://wwwn.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith/en.

Qatar does not allow individuals with HIV/AIDS to enter the country. Medical exams are required for all long-term visitors and residents. Individuals who have HIV/AIDS may be subject to deportation. Please verify this information with the Embassy of Qatar at www.qatarembassy.net before you travel.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S.

citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Qatar is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

Short-term visitors should obtain a valid International Driving Permit prior to arrival and should not drive in Qatar on a U.S. driver's license. New and prospective residents should obtain a permanent Qatari Driving License immediately after arrival. To obtain a Qatari driver's license, American citizens will need a valid U.S. driver's license. American citizens should renew their driver's license before leaving the U.S. Qatari authorities will not accept learner's permits and temporary permits as valid driver's licenses. Short-term visitors and business travelers can also obtain a Temporary Qatari Driving License by presenting their U.S. driver's license at any branch of Qatar's Traffic Police. Once an American citizen holds a valid Qatari residence permit, they are no longer permitted to drive in Qatar with an International Driving Permit or a Temporary Qatar Driving License.

Traffic accidents are among Qatar's leading causes of death. Safety regulations in Qatar are improving thanks to a more stringent traffic law adopted in October 2007 and a country-wide traffic safety campaign. However, informal rules of the road and the combination of local and third-country-national driving customs often prove frustrating for first-time drivers in Qatar. The combination of Qatar's extensive use of roundabouts, many road construction projects and the high speeds at which drivers may travel can prove challenging. The rate of automobile accidents due to driver error and excessive speed is declining but remains higher than in the United States. In rural areas, poor lighting, wandering camels and un-shouldered roads present other hazards.

Despite aggressive driving on Qatar's roads, drivers should avoid altercations or arguments over traffic incidents, particularly with Qatari citizens who, if insulted, have filed complaints with local police that resulted in the arrest and overnight detention of U.S. citizens. Drivers can be held liable for injuries to other persons involved in a vehicular accident, and local police have detained U.S. citizens overnight until the extent of the person's injuries were known. Due to its conservative Islamic norms, Qatar maintains a zero-tolerance policy against drinking and driving. Qatar's Traffic Police have arrested Americans for driving after consuming amounts of alcohol at even smaller levels normally accepted in the U.S.

Any motor vehicle over five years old cannot be imported into the country. For specific information concerning Qatari driver's permits, vehicle inspection, road tax and mandatory insurance, please contact either the Embassy of the State of Qatar in Washington, DC or the Consulate General of the State of Qatar in Houston, Texas.

Aviation Safety Oversight: The U.S. Federal Aviation Administration (FAA) has assessed the Government of Qatar's Civil Aviation Authority as being in compliance with International Civil Aviation Organization (ICAO) aviation safety standards for oversight of Qatar's air carrier operations. For more information, travelers may visit the FAA's Internet web site at http://www.faa.gov.

Special Circumstances: Qatari customs authorities enforce strict regulations concerning importation into Qatar of items such as alcohol, narcotics, pork products, firearms, or anything deemed pornographic by Qatari authorities. While importation of religious material for personal use is acceptable, importation of religious material for the purpose of proselytizing is not. It is advisable to contact the Embassy of the State of Qatar in Washington, D.C., or the Consulate General of the State of Qatar in Houston for specific information regarding customs requirements.

Pets entering Qatar require an import permit from the Ministry of Agriculture. Cats with proper documentation are allowed to enter with no difficulty, but some breeds of dogs, especially large dogs, are not admitted. Application forms for import permits may be obtained from the Ministry of Agriculture through a sponsoring employer. A copy of the pet's health certificate and vaccination record must be submitted with the application. Qatari law does not recognize dual nationality. Persons who possess Qatari citizenship in addition to U.S. citizenship are considered Qatari citizens by the State of Qatar and are subject to Qatar's laws. Qatari citizenship imposes special obligations, particularly with regard to child custody and exiting or entering the country. For additional information, please refer to our dual nationality flyer or contact the U.S. Embassy in Doha.

All U.S. citizens are encouraged to carry a copy of their passports with them at all times so that, if questioned by local officials, proof of identity and U.S. citizenship is readily available. Qatari employers/sponsors customarily hold passports of foreign (i.e., non-Qatari) employees during the terms of their employment in Qatar. Residents carry a Qatari Identification Card (Iqama) for identification in place of a passport. Foreign nationals, including U.S. citizens, may not leave Qatar without permission in the form of exit visas obtained by their employer/sponsor.

The U.S. Embassy in Doha cannot assist U.S. citizens in Qatar to obtain third-country visas for unofficial travel.

Islam provides the foundation of Qatar's customs, laws and practices. Foreign visitors are expected to remain sensitive to the Islamic culture and not dress in a revealing or provocative manner, including the wearing of sleeveless shirts and blouses, halter-tops and shorts. Western bathing attire is worn only at hotel pools and beaches.

Business And Employment Contracts: The written, Arabic text of a contract governs employment and business arrangements under Qatari

law. Before signing a contract, U.S. citizens and companies should obtain an independent English translation of the original Arabic to ensure a full understanding of the contract's terms, limits, and agreements. No U.S. citizen should work in Qatar or make a business arrangement without having seen and understood the full written contract. Verbal assurances or side letters are not binding in Qatar.

In the event of a contract or employment dispute, Qatari authorities refer to the Arabic language of a contract. Since a Qatari sponsor holds the employee's passport and controls the issuance of exit visas, U.S. citizens will be unable to leave Qatar without their sponsor's approval in the event of an emergency or employment or business dispute. Any U.S. citizen who breaks an employment or business contract may have to pay substantial penalties before being allowed to depart Qatar. Qatari law favors employers over employees, and Qatari sponsors have substantial leverage in any negotiations and may block the departure of the employee or bar future employment in Qatar. If a sponsor files a complaint against an employee who departed Qatar, the employee may be barred from returning to Qatar, even on a subsequent tourist or airport visa.

Transferring employment in Qatar requires the permission of the previous employer, which is discretionary, and is subject to approval by the Ministry of the Interior. The Ministry of the Interior has denied employment transfers in the past, including ordering U.S. citizens deported and barred from re-entry to Qatar for two years. The U.S. Embassy has no standing in Qatar's courts, cannot sponsor visas, and cannot mediate labor or business disputes. U.S. consular officers can provide lists of local attorneys to help U.S. citizens settle disputes, but ultimate responsibility for the resolution of disputes through Qatar's legal system lies with the parties involved.

To obtain a residence permit in Qatar, the Government of Qatar usually requires foreign citizens to provide a police clearance certificate from their home countries. Prospective residents can obtain a U.S. police clearance certificate two ways: through a local or state law enforcement agency or through the Federal Bureau of Investigations (FBI). In both cases, the clearance will run against the National Crime Information Center, which contains all federal, state and local criminal records. Please visit our web site http://qatar.usembassy.gov/police-clearances.html for more information. This process requires several weeks, and the U.S. Embassy in Doha strongly recommends that prospective residents obtain a U.S. police clearance before they arrive in Qatar.

For more information on business opportunities and practices in Qatar, please visit the Foreign Commercial Service's Country Commercial Guide for Qatar at http://www.buyusa.gov/qatar.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Criminal offenses are punished according to Qatari laws, which in some cases are based on Islamic law and sometimes more severe than in the United States for similar offenses. Persons violating Qatari laws, even unknowingly, may be arrested, imprisoned, deported, or subject to a ban from departing Qatar. Travel bans are not lifted until both parties resolve a dispute and the case is abandoned or, if not, until the matter is resolved by a court, which may require months to process the case. Qatari law enforcement authorities have detained potential witnesses or relatives without charges or access to legal counsel during the investigation of a crime.

The U.S. Embassy in Doha cautions American citizens that Qatari police have arrested American citizens suspected of or witness to a crime, including traffic accidents involving injuries to pedestrians or the occupants of other cars, traffic arguments, slander, and a variety of lesser offenses. Once arrested, the Qatari Police have no independent authority to grant a release, an authority reserved solely for Qatar's Public Prosecution and Courts. As a result, arrested Americans, regardless of the charges, often spend one or two nights in jail awaiting a hearing with Qatar's Public Prosecution or the appropriate court.

Qatari law enforcement authorities do not routinely notify the U.S. Embassy in Doha of a U.S. citizen's arrest and, for more serious crimes, may not allow a U.S. Embassy official to visit an arrested U.S. citizen until the initial interrogation is completed. Upon arrest, U.S. citizens should ask to speak to the U.S. Embassy immediately, and if not allowed, request a friend or family member notify the U.S. Embassy through the contact information below.

Incidents involving insults or obscene language/gestures often result in arrest, overnight imprisonment and/or fines whether the incident occurs between private parties or involves officers of the law. Insulting someone in public is considered a punishable offense. Drunk driving, public intoxication and other alcohol-related offenses are treated with severity and will result in arrest, heavy fines, imprisonment, or expulsion from the country. Penalties for possession, use, or trafficking in illegal drugs in Qatar are severe, and convicted offenders can expect long jail sentences and heavy fines. Homosexual activity is considered to be a criminal offense, and those convicted may be sentenced to lashing and/or a prison sentence, and/or deportation. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in Qatar are encouraged to register

with the U.S. Embassy in Doha through the State Department's travel registration web site to obtain updated information on travel and security within Qatar. Americans without Internet access may register directly with the U.S. Embassy in Doha. By registering, American citizens make it easier for the U.S. Embassy in Doha to contact them in case of emergency. The U.S. Embassy is located in the Al-Luqta District on 22nd February Street, PO Box 2399, Doha; phone (974) 488-4101, extension 0 or 6500. For after-hours emergencies, U.S. citizens may call (974) 488-4101, extension 0 or 6600, to reach the duty officer. On the Internet, you may reach the Embassy web site at http://qatar.usembassy.gov for additional information and operating hours. The embassy observes a Sunday through Thursday workweek. Government offices and most businesses in Qatar also observe a Sunday through Thursday workweek.

International Parental Child Abduction

November 2008

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *International Child Abduction* section of this book and review current reports online at www.travel.state.gov/childabduction.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is provided for general information only. Questions involving interpretation of specific foreign laws should be addressed to foreign legal counsel.

General Information: Qatar is not a party to the Hague Convention on the Civil Aspects of International Child Abduction, nor are there any international or bilateral treaties in force between Qatar and the United States addressing international parental child abduction. American citizens who travel to Qatar place themselves under the jurisdiction of local courts, as well as the country's laws and regulations. American citizens planning a trip to Qatar with dual- national children should bear this in mind.

Custody Disputes: When child custody disputes arise between parents of any religion, the custody decisions by Qatari courts are based on Islamic (Shari'a) law. Custody cases can be very complex and are usually determined on a case-by-case basis. When making decisions regarding child custody matters, Qatari courts consider the parents' religion(s), place(s) of permanent residence, income, and marital status.

Qatari law differentiates between custodianship and guardianship. Generally speaking, a custodian is awarded physical custody of the child and is responsible for his/her upbringing including education and daily care. A guardian is responsible for the child's financial support and can be held responsible for ensuring a sound upbringing, such as proper religious foundation. In many cases, the guardian (frequently male) must grant permission for children to depart Qatar.

Qatari courts do not, as a general rule, award custody of "dual national" (U.S./Qatari) children to an American mother or father, even one who is Muslim. A fundamental consideration in awarding custody is a parent's place of permanent residence and degree of access to the children. Custody of very young children is generally granted to the mother, as long as certain restrictive conditions are met. Once the children come of age (for males, completion of their seventh year of age, for females, the onset of puberty), the father can appeal for, and will usually be awarded, full custody, provided certain restrictive conditions are met. If a father is unable or unfit to be custodian of his children, the court may give custody to another family member. Shari'a court judges have broad discretion in custody cases and often make exceptions to these general guidelines, particularly in cases in which a parent is from an influential family or has powerful connections in Qatar.

Even when a mother is granted custody, the non-custodial father maintains a great deal of influence on the rearing of the children. In many cases, the father has been able to acquire legal custody of children against the wishes of the mother when she is unable or unwilling to meet certain conditions set by law for her to maintain her custodial rights. For example, if a mother refuses to give the father access to his child or attempts to leave Qatar with the children without the court's permission, a mother's custody rights can be severed. The Qatari court can sever a mother's custody if it determines that the mother is incapable of safeguarding the child or of bringing the child up in accordance with the appropriate religious standards. Either parent can lose custody by re-marrying a party considered "unmarriageable," or by residing in a home with people that might be "strangers." However, the final decision is left to the discretion of the Shari'a court. Persons who wish to pursue a child custody claim in a Qatari court should retain an attorney in Qatar. The State Department and the U.S. Embassy in Qatar maintain a list of attorneys willing to represent American clients. A copy of this list may be obtained by contacting either office. It is the responsibility of the prospective client to assess the capabilities of an attorney.

The Embassy cannot recommend any specific attorney, and makes no claim as to the ability or the integrity of the attorneys on the list. Questions involving Qatari law should be addressed to a Qatari attorney or to the Embassy of Qatar at:

Embassy of the State of Qatar
4200 Wisconsin Avenue, NW,
Suite 200
Washington, DC 20016
Telephone: (202) 274-1600

Enforcement of Foreign Judgments: Custody orders and judgments of foreign courts are not enforceable in Qatar if they potentially contradict or violate local laws and practices. For example, an order from a U.S. court granting custody to an American mother will not be honored in Qatar if the mother intends to

take the child to live outside Qatar. Courts in Qatar will not enforce U.S. court decrees ordering a parent in Qatar to pay child support.

Visitation Rights: In cases where the father has custody of a child, visitation by the mother is entirely at the discretion of the father. Upon a non-Qatari parent's departure from Qatar, the Qatari parent (either the mother or father) may request an immigration stop against the other parent, thereby preventing future entry into Qatar even with a valid visa. For further information on international parental child abduction, contact the Office of Children's Issues, U.S. Department of State at 1-888-407-4747 or visit its web site on the Internet at http://travel.state.gov. You may also direct inquiries to: Office of Children's Issues, U.S. Department of State, Washington, DC 20520-4811; Phone: (202) 736-9090; Fax: (202) 312-9743.

ROMANIA

Compiled from the April 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Romania

PROFILE

Geography

Area: 237,499 sq. km. (91,699 sq. mi.); somewhat smaller than New York and Pennsylvania combined.

Cities: Capital—Bucharest (pop. 2.02 million). Other cities—Iasi (350,000), Constanta (344,000), Timisoara (327,000), Cluj-Napoca (334,000), Galati (331,000), Brasov (316,000).

Terrain: Consists mainly of rolling, fertile plains; hilly in the eastern regions of the middle Danube basin; and major mountain ranges running north and west in the center of the country, which collectively are known as the Carpathians.

Climate: Moderate.

People

Nationality: Noun and adjective—Romanian(s).

Population: 21.6 million (December 2006).

Annual population growth rate: -0.3%.

Ethnic groups: Romanians 89%, Hungarians 7.1%, Germans 0.5%, Ukrainians, Serbs, Croats, Russians, Turks, and Roma 2.5%.

Religions: Orthodox 86.8%, Roman Catholic 5%, Reformed Protestant, Baptist, and Pentecostal 5%, Greek Catholic (Uniate) 1 to 3%, Muslim 0.2%, Jewish less than 0.1%.

Languages: Romanian (official). Other languages—Hungarian, German.

Education: Years compulsory—10. Attendance—98%. Literacy—98%.

Health: Infant mortality rate—18.7/1000 (2001); 18.6/1,000 (2002). Life expectancy—men 67.61 yrs., women 74.9 yrs.

Work force: (June 2007) 9.4 million. Agriculture—3.0 million, industry and construction—2.8 million, services—3.3 million, other—0.3 million.

Government

Type: Republic.

Constitution: December 8, 1991, amended by referendum October 18-19, 2003.

Government branches: Executive—president (head of state), prime minister (head of government), Council of Ministers. Legislative—bicameral Parliament. Judicial—Constitutional Court, High Court of Cassation and Justice, and lower courts.

Political subdivisions: 41 counties plus the city of Bucharest.

Political parties: Political parties represented in the Parliament are the Social Democratic Party (PSD); the National Liberal Party (PNL); the Democratic Liberal Party (PD-L); the Hungarian Democratic Union of Romania (UDMR); the Conservative Party (PC); the Greater Romania Party (PRM). Other political parties include National Democratic Christian Peasant Party (PNTCD), the New Generation Party (PNG), National Initiative Party (PIN) as well as political organizations of minorities.

Suffrage: Universal from age 18.

Defense: 1.9% of GDP.

Economy

GDP: (2006) $122.3 billion.

Annual GDP growth rate: (2006) +7.7%; +5.8% (Jan.-June 2007).

GDP per capita: (2006) $5,662.

Natural resources: Oil, timber, natural gas, coal, salt, iron ore.

Agriculture: (2006) Percent of GDP—8.0%. Products—corn, wheat, potatoes, oilseeds, vegetables, livestock, fish, and forestry.

Industry: (2006) Percent of GDP—23.9%. Types—machine building, mining, construction materials, metal production and processing, chemicals, food processing, textiles, clothing. Industrial output increased by 7.1% in 2006 and 6.1% in Jan.-June 2007.

Services: (2006) Percent of GDP—61.1%.

Construction: (2006) Percent of GDP—7.0%.

Trade: Exports (2006)—$32.3 billion; (Jan.-June 2007) $18.6 billion. Types—textiles, chemicals, light

manufactures, wood products, fuels, processed metals, machinery and equipment. Exports to the U.S. (2006)—$827.5 million; (Jan.-June 2007) $391 million. Major markets—Italy, Germany, Turkey, France, Hungary, U.K., U.S. (2.6%). Imports (2006)—$50.9 billion; (Jan.-June 2007) $31.3 billion. Types—machinery and equipment, textiles, fuel, coking coal, iron ore, machinery and equipment, and mineral products. Imports from the U.S. (2006)—$1.2 billion; (Jan.-June 2007) $414.1 million. Major suppliers—Germany, Italy, Russia, France, Turkey, Austria, U.K., China, Hungary, U.S. (2.4%).

Exchange rate: 2.38 new Lei=U.S.$1 (end-October 2007).

GEOGRAPHY

Extending inland halfway across the Balkan Peninsula and covering a large elliptical area of 237,499 square kilometers (91,699 sq. mi.), Romania occupies the greater part of the lower basin of the Danube River system and the hilly eastern regions of the middle Danube basin. It lies on either side of the mountain systems collectively known as the Carpathians, which form the natural barrier between the two Danube basins.

Romania's location gives it a continental climate, particularly in Moldavia and Wallachia (geographic areas east of the Carpathians and south of the Transylvanian Alps, respectively) and to a lesser extent in centrally located Transylvania, where the climate is more moderate. A long and at times severe winter (December-March), a hot summer (April-July), and a prolonged autumn (August-November) are the principal seasons, with a rapid transition from spring to summer. In Bucharest, the daily minimum temperature in January averages -7°C (20°F), and the daily maximum temperature in July averages 29ºC (85ºF).

PEOPLE

About 89% of the people are ethnic Romanians, a group that—in contrast to its Slav or Hungarian neighbors—traces itself to Latin-speaking Romans, who in the second and third centuries A.D. conquered and settled among the ancient Dacians, a Thracian people. As a result, the Romanian language, although containing elements of Slavic, Turkish, and other languages, is a romance language related to French and Italian.

Hungarians and Roma are the principal minorities, with a declining German population and smaller numbers of Serbs, Croats, Ukrainians, Greeks, Turks, Armenians, Great Russians, and others. Minority populations are greatest in Transylvania and the Banat, areas in the north and west, which belonged to the Austro-Hungarian Empire until World War I. Even before union with Romania, ethnic Romanians comprised the overall majority in Transylvania. However, ethnic Hungarians and Germans were the dominant urban population until relatively recently, and ethnic Hungarians still are the majority in a few districts.

Before World War II, minorities represented more than 28% of the total population. During the war that percentage was halved, largely by the loss of the border areas of Bessarabia and northern Bukovina (to the former Soviet Union—now Moldova and a portion of south-west Ukraine) and southern Dobrudja (to Bulgaria), as well as by the postwar flight or deportation of ethnic Germans. In the last several decades, more than two-thirds of the remaining ethnic Germans in Romania emigrated to Germany.

Romanian troops during World War II participated in the destruction of the Jewish communities of Bessarabia and Transnistria (both now comprising the independent Republic of Moldova) and Bukovina (now part of Ukraine). Although subjected to harsh persecution, including government-sanctioned pogroms and killings, most Jews from the territory now comprising Romania survived the Holocaust. Mass emigration, mostly to Israel, has reduced the surviving Jewish community from over 300,000 to less than 10,000.

Religious affiliation tends to follow ethnic lines, with most ethnic Romanians identifying with the Romanian Orthodox Church. Also ethnically Romanian is the Greek Catholic or Uniate church, reunified with the Orthodox Church by fiat in 1948, and restored after the 1989 revolution. The 2002 census indicates that less than 1% of the population is Greek Catholic, as opposed to about 10% prior to 1948. Roman Catholics, largely ethnic Hungarians and Germans, constitute about 5% of the population; Calvinists, Baptists, Pentecostals, and Lutherans make up another 5%. There are smaller numbers of Unitarians, Muslims, and other religions.

Romania's rich cultural traditions have been nourished by many sources, some of which predate the Roman occupation. The traditional folk arts, including dance, music, wood-carving, ceramics, weaving and embroidery of costumes and household decorations still flourish in many parts of the country. Despite strong Austrian, German, and especially French influence, many of Romania's great artists, such as the painter Nicolae Grigorescu, the poet Mihai Eminescu, the composer George Enescu, and the sculptor Constantin Brancusi, drew their inspiration from Romanian folk traditions.

The country's many Orthodox monasteries, as well as the Transylvanian Catholic and Evangelical Churches, some of which date back to the 13th century, are repositories of artistic treasures. The famous painted monasteries of Bukovina make an important contribution to European architecture.

Poetry and the theater play an important role in contemporary Romanian life. Classic Romanian plays, such as those of Ion Luca Caragiale, as well as works by modern or avant-garde Romanian and international playwrights, find sophisticated and

enthusiastic audiences in the many theaters of the capital and of the smaller cities.

HISTORY

Since about 200 B.C., when it was settled by the Dacians, a Thracian tribe, Romania has been in the path of a series of migrations and conquests. Under the emperor Trajan early in the second century A.D., Dacia was incorporated into the Roman Empire, but was abandoned by a declining Rome less than two centuries later. Romania disappeared from recorded history for hundreds of years, to reemerge in the medieval period as the Principalities of Moldavia and Wallachia. Heavily taxed and badly administered under the Ottoman Empire, the two Principalities were unified under a single native prince in 1859, and had their full independence ratified in the 1878 Treaty of Berlin. A German prince, Carol of Hohenzollern-Sigmaringen, was crowned first King of Romania in 1881.

The new state, squeezed between the Ottoman, Austro-Hungarian, and Russian empires, looked to the West, particularly France, for its cultural, educational, and administrative models. Romania was an ally of the Entente and the U.S. in World War I, and was granted substantial territories with Romanian populations, notably Transylvania, Bessarabia, and Bukovina, after the war.

Most of Romania's pre-World War II governments maintained the forms, but not always the substance, of a liberal constitutional monarchy. The fascist Iron Guard movement, exploiting a quasi-mystical nationalism, fear of communism, and resentment of alleged foreign and Jewish domination of the economy, was a key destabilizing factor, which led to the creation of a royal dictatorship in 1938 under King Carol II. In 1940, the authoritarian General Antonescu

took control. Romania entered World War II on the side of the Axis Powers in June 1941, invading the Soviet Union to recover Bessarabia and Bukovina, which had been annexed in 1940.

In August 1944, a coup led by King Michael, with support from opposition politicians and the army, deposed the Antonescu dictatorship and put Romania's battered armies on the side of the Allies. Romania incurred additional heavy casualties fighting alongside the Soviet Union against the Germans in Transylvania, Hungary, and Czechoslovakia.

According to the officially recognized 2004 Wiesel Commission report, Romanian authorities were responsible for the death of between 280,000 and 380,000 Romanian and Ukrainian Jews in the territories under Romanian jurisdiction (including Bessarabia, Bukovina, and Transnistria) out of a population of approximately 760,000. In addition, 132,000 Romanian Jews were killed by the pro-Nazi Hungarian authorities in Transylvania.

A peace treaty, signed in Paris on February 10, 1947, confirmed the Soviet annexation of Bessarabia and northern Bukovina, but restored the part of northern Transylvania granted to Hungary in 1940 by Hitler. The treaty also required massive war reparations by Romania to the Soviet Union, whose occupying forces left in 1958.

The Soviets pressed for inclusion of Romania's heretofore negligible Communist Party in the post-war government, while non-communist political leaders were steadily eliminated from political life. King Michael abdicated under pressure in December 1947, when the Romanian People's Republic was declared, and went into exile.

By the late 1950s, Romania's communist government began to assert some independence from the Soviet Union. Nicolae Ceausescu became head of the Communist Party in 1965 and head of state in 1967. Ceausescu's denunciation of the 1968 Soviet invasion of Czechoslovakia and a brief relaxation in internal repression helped give him a positive image both at home and in the West. Seduced by Ceausescu's "independent" foreign policy, Western leaders were slow to turn against a regime that, by the late 1970s, had become increasingly harsh, arbitrary, and capricious. Rapid economic growth fueled by foreign credits gradually gave way to economic autarchy accompanied by wrenching austerity and severe political repression.

After the collapse of communism in the rest of Eastern Europe in the late summer and fall of 1989, a mid-December protest in Timisoara against the forced relocation of an ethnic Hungarian pastor grew into a country-wide protest against the Ceausescu regime, sweeping the dictator from power. Ceausescu and his wife were executed on December 25, 1989, after a cursory military trial. About 1,500 people were killed in confused street fighting. An impromptu governing coalition, the National Salvation Front (FSN), installed itself and proclaimed the restoration of democracy and freedom. The Communist Party was dissolved and its assets transferred to the state. Ceausescu's most unpopular measures, such as bans on private commercial entities and independent political activity, were repealed.

Ion Iliescu, a former Communist Party official demoted by Ceausescu in the 1970s, emerged as the leader of the NSF. Presidential and parliamentary elections were held on May 20, 1990. Running against representatives of the pre-war National Peasants' Party and National Liberal Party, Iliescu won 85% of the vote. The NSF captured two-thirds of the seats in Parliament, and named a university professor, Petre Roman, as Prime Minister. The new government began cautious free market reforms such as opening the economy to consumer imports and establishing the independence of the National Bank. Romania has made great progress in institutionalizing democratic principles, civil liberties, and respect for human rights since the revolution. Nevertheless, the legacy of 44 years of communist rule cannot quickly be eliminated. Membership in the Romanian Communist Party was usually the prerequisite for higher education, foreign travel, or a good job, while the extensive internal security apparatus subverted normal social and political relations. To the few active dissidents, who suffered gravely under Ceausescu and his predecessors, many of those who came forward as politicians after the revolution seemed tainted by association with the previous regime.

Over 200 new political parties sprang up after 1989, gravitating around personalities rather than programs. All major parties espoused democracy and market reforms, but the governing National Salvation Front proposed slower, more cautious economic reforms. In contrast, the opposition's main parties, the National Liberal Party (PNL), and the National Peasant-Christian Democrat Party (PNTCD) favored quick, sweeping reforms, immediate privatization, and reducing the role of the ex-communist elite.

In the 1990 general elections, the FSN and its candidate for presidency, Ion Iliescu, won with a large majority of the votes (66.31% and 85.07%, respectively). The strongest parties in opposition were the Democratic Alliance of Hungarians in Romania (UDMR), with 7.23%, and the PNL, with 6.41%.

Unhappy at the continued political and economic influence of members of the Ceausescu-era elite, anti-communist protesters camped in University Square in April 1990. When miners from the Jiu Valley descended on Bucharest two months later and brutally dispersed the remaining "hooligans," President Iliescu expressed public thanks, thus convincing many that the government had sponsored the miners' actions. The miners also attacked the headquarters and houses of opposition leaders. The Roman government fell in late September 1991, when the miners returned to Bucharest to demand higher salaries and better living conditions. Theodor Stolojan was appointed to head an interim government until new elections could be

held. Parliament drafted a new democratic constitution, approved by popular referendum in December 1991. The FSN split into two groups, led by Ion Iliescu (FDSN) and Petre Roman (FSN) in March 1992; Roman's party subsequently adopted the name Democratic Party (PD). National elections in September 1992 returned President Iliescu by a clear majority, and gave his party, the FDSN, a plurality. With parliamentary support from the nationalist PUNR and PRM parties, and the ex-communist PSM party, a technocratic government was formed in November 1992 under Prime Minister Nicolae Vacaroiu, an economist. The FDSN became the Party of Social Democracy of Romania (PDSR) in July 1993. The Vacaroiu government ruled in coalition with three smaller parties, all of which abandoned the coalition by the time of the November 1996 elections.

The 1992 elections revealed a continuing political cleavage between major urban centers and the countryside. Rural voters, who were grateful for the restoration of most agricultural land to farmers but fearful of change, strongly favored President Ion Iliescu and the FDSN, while the urban electorate favored the CDR (a coalition made up by several parties—among which the PNTCD and the PNL were the strongest—and civic organizations) and quicker reform. Iliescu easily won reelection over a field of five other candidates. The FDSN won a plurality in both chambers of Parliament. With the CDR, the second-largest parliamentary group, reluctant to take part in a national unity coalition, the FDSN (now PDSR) formed a government under Prime Minister Nicolae Vacaroiu, with parliamentary support from the PUNR, PRM, and PSM. PRM and PSM left the government in October and December 1995, respectively.

The 1996 local elections demonstrated a major shift in the political orientation of the Romanian electorate. Opposition parties swept Bucharest and many of the larger cities. This trend continued in the national elections that same year, where the opposition dominated the cities and made steep inroads into rural areas theretofore dominated by President Iliescu and the PDSR, which lost many voters in their traditional strongholds outside Transylvania. The campaign of the opposition hammered away on the twin themes of the need to squelch corruption and to launch economic reform. The message resonated with the electorate, which swept Emil Constantinescu and parties allied to him to power in free and fair presidential and parliamentary elections. The coalition government formed in December 1996 took the historic step of inviting the UDMR and its Hungarian ethnic backers into government.

The coalition government retained power for four years despite constant internal frictions and three prime ministers, the last being the Governor of the National Bank, Mugur Isarescu.

In elections in November 2000, the electorate punished the coalition parties for their corruption and failure to improve the standard of living. The PDSR (renamed PSD—Social Democratic Party at June 16, 2001 Congress) came back into power, albeit as a minority government. In the concurrent presidential elections, former President Ion Iliescu decisively defeated the extreme nationalist Greater Romania Party (PRM) leader Corneliu Vadim Tudor.

The PSD government, led by Prime Minister Adrian Nastase, forged a de facto governing coalition with the ethnic Hungarian UDMR, ushering in four years of relatively stable government. The PSD guided Romania toward greater macro-economic stability, although endemic corruption remained a major problem. In September 2003, the center-right National Liberal Party (PNL) and centrist Democratic Party (PD) formed an alliance at a national and local level, in anticipation of 2004 local and national elections. Romania then moved closer toward a political system dominated by two large political blocs.

In October 2003 citizens voted in favor of major amendments to the constitution in a nationwide referendum to bring Romania's organic law into compliance with European Union standards.

On November 28, 2004, Romania again held parliamentary and the first round of presidential elections. In the December 12 presidential runoff election, former Bucharest Mayor Traian Basescu, representing the center-right PNL-PD alliance, delivered a surprise defeat to PSD candidate Nastase. Basescu appointed PNL leader Calin Popescu-Tariceanu as Prime Minister, whose government was approved by the Parliament on December 28, 2004.

This coalition unraveled due to enmity between the President and Prime Minister by April 2007. Since April 3, 2007, Prime Minister Tariceanu's PNL party has run an ultra-minority government in coalition with the UDMR and tacit support of the PSD.

GOVERNMENT

Romania's 1991 constitution proclaims Romania a democracy and market economy, in which human dignity, civic rights and freedoms, the unhindered development of human personality, justice, and political pluralism are supreme and guaranteed values. The constitution directs the state to implement free trade, protect the principle of competition, and provide a favorable framework for production. The constitution provides for a president, a Parliament, a Constitutional Court and a separate system of lower courts that includes a Supreme Court.

The two-chamber Parliament, consisting of the Chamber of Deputies and the Senate, is the law-making authority. Deputies and senators are elected for 4-year terms by universal suffrage. Elected officials at all levels of government, with the exception of the president and mayors, are selected on the basis of party lists, with parliamentary seats, city and county council representation, all allocated in proportion to party

choices made by the electorate. The president is elected by popular vote for a maximum of two terms. The length of the term was extended from four to five years in an October 2003 constitutional referendum. He is the Chief of State, charged with safeguarding the constitution, foreign affairs, and the proper functioning of public authorities. He is supreme commander of the armed forces and chairman of the Supreme Defense Council. According to the constitution, he acts as mediator among the power centers within the state, as well as between the state and society. The president nominates the prime minister, who in turn appoints the government, which must be confirmed by a vote of confidence from Parliament.

The Constitutional Court adjudicates the constitutionality of challenged laws and decrees. The court consists of nine judges, appointed for non-concurrent terms of 9 years. Three judges are appointed by the Chamber of Deputies, three by the Senate, and three by the president of Romania.

The Romanian legal system is based on the Napoleonic Code. The judiciary is to be independent, and judges appointed by the president are not removable. The president and other judges of the High Court of Cassation and Justice are appointed for terms of 6 years and may serve consecutive terms. Proceedings are public, except in special circumstances provided for by law.

The Ministry of Justice represents "the general interests of society" and defends the legal order as well as citizens' rights and freedoms. The ministry is to discharge its powers through independent, impartial public prosecutors.

For territorial and administrative purposes, Romania is divided into 41 counties and the city of Bucharest. Each county is governed by an elected county council. Local councils and elected mayors are the public administration authorities in villages and towns. The county council is the public administration authority that coordinates the activities of all village and town councils in a county. The central government appoints a prefect for each county and the Bucharest municipality. The prefect is the representative of the central government at the local level and directs any public services of the ministries and other central agencies at the county level.

A prefect may block the action of a local authority if he deems it unlawful or unconstitutional. The matter is then decided by an administrative court. Under legislation in force since January 1999, local councils have control over spending of their allocations from the central government budget, as well as authority to raise additional revenue locally.

Principal Government Officials

Last Updated: 11/12/08

Pres.: **Traian BASESCU**
Prime Min.: **Calin Popescu-TARICEANU**
Dep. Prime Min. for Culture, Education, & European Integration:
Min. of Admin. Reform & Interior: **Cristian DAVID**
Min. of Agriculture & Rural Development: **Dacian CIOLOS**
Min. of Communication & Information Technology: **Karoly BORBELY**

Min. of Development, Public Works, & Housing: **Laszlo BORBELY**
Min. of Economy & Finance: **Varujan VOSGANIAN**
Min. of Education, Youth, & Research: **Cristian ADOMNITEI**
Min. of Environment & Sustainable Development: **Attila KORODI**
Min. of Foreign Affairs: **Lazar COMANESCU**
Min. of Health: **Eugen NICOLAESCU**
Min. of Justice: **Catalin PREDOIU**
Min. of Labor, Social Solidarity, & Family: **Paul PACURARU**
Min. for Small & Medium-Sized Enterprises, Trade, Tourism, &Freelance Professions: **Ovidiu SILAGHI**
Min. of Transport: **Ludovic ORBAN**
Min.-Del. for Relations With Parliament: **Mihai Alexandru VOICU**
Governor, National Bank of Romania: **Mugur ISARESCU**

Ambassador to the US: **Adrian VIERITA**
Permanent Representative to the UN, New York: **Simona-Mirela MICULESCU**

Romania maintains an embassy in the United States at 1607 23rd St., NW, Washington, DC 20008 (tel. 202-232-3694, fax: 202-232-4748).

POLITICAL CONDITIONS

November 2004 elections left the Romanian parliament closely divided between the center-right PNL-PD alliance and the PSD, which each hold between 30-40% of the seats in each chamber. The PNL-PD, however, forged a parliamentary majority with the support of the UDMR, PC and (in the lower house) the ethnic minority party representatives. The extreme nationalist PRM won fewer seats than in the 2000 elections, but remained a significant political player. Although the PNL and PD voted as a bloc in the parliament and ran candidates on a common list in the 2004 parliamentary elections, the two parties remained separated. On several occasions since 2005, President Traian Basescu has publicly expressed support for snap parliamentary elections. Parliamentary leaders have steadily opposed calling new elections.

After Romania's accession to the EU on January 1, 2007, the cooperation between PD President Basescu and PNL Prime Minister Tariceanu devolved into political infighting. The political turmoil resulted in a rupture of the PD-PNL alliance in April 2007, the 30-day suspension of the President in May, and the President's campaign to force a change from party list representational voting to single-member districts. Prime Minister Tariceanu continues to head a minority government in coalition with the UDMR and with the tacit support of the Socialist opposition.

Political parties represent a broad range of views and interests, and elected officials and other public figures freely express their views. Civil

society watchdog groups remain relatively small but have grown in influence. The press is free and outspoken, although there have been incidents of politically motivated intimidation and even violence against journalists and media management, particularly prior to 2004 national elections. Independent radio networks have proliferated, and several private television networks now operate nationwide. In addition, a large number of local private television networks have emerged.

Through support of or participation in consecutive government coalitions, the UDMR has ensured the continuing influence of the ethnic Hungarian minority in national government. In addition, consecutive governments have sought to improve the socio-economic situation of the Roma minority, which continues to suffer from severe poverty in many areas and discrimination. Although according to government statistics Roma officially represent 2.5% of the population, Romani organizations claim the percentage is actually several percentage points higher.

The restitution of private and religious property seized under communism or during World War II continues to move slowly. Particularly problematic is the return of Greek-Catholic churches, which were given to the Romanian Orthodox Church by the communist regime. The Romanian Orthodox Church thus far has turned over very few of these churches, many of which had belonged to the Greek Catholic community for hundreds of years. Romania has repealed communist-era legislation criminalizing homosexual acts and banned xenophobic and racist groups and their activities. Romanian law does not prohibit women's participation in government or politics, but societal attitudes remain a significant barrier. Women hold some high positions in government and roughly 10% of the seats in each chamber in the Parliament.

ECONOMY

Romania is a country of considerable potential: rich agricultural lands; diverse energy sources (coal, oil, natural gas, hydro, and nuclear); a substantial industrial base encompassing almost the full range of manufacturing activities; an educated work force; and opportunities for expanded development in tourism on the Black Sea and in the Carpathian mountains. The Romanian Government borrowed heavily from the West in the 1970s to build a substantial state-owned industrial base. Following the 1979 oil price shock and a debt rescheduling in 1981, Ceausescu decreed that Romania would no longer be subject to foreign creditors. By the end of 1989, Romania had paid off a foreign debt of about $10.5 billion through an unprecedented effort that wreaked havoc on the economy and living standards. Vital imports were slashed and food and fuel strictly rationed, while the government exported everything it could to earn hard currency. With investment slashed, Romania's infrastructure fell behind its historically poorer Balkan neighbors.

Since the fall of the Ceausescu regime in 1989, successive governments sought to build a Western-style market economy. The pace of restructuring was slow, but by 1994 the legal basis for a market economy was largely in place. After the 1996 elections, the coalition government attempted to eliminate consumer subsidies, float prices, liberalize exchange rates, and put in place a tight monetary policy. The Parliament enacted laws permitting foreign entities incorporated in Romania to purchase land. Foreign capital investment in Romania has been increasing rapidly, although it remains less in per capita terms than in some other countries of East and Central Europe.

Romania was the largest U.S. trading partner in Eastern Europe until Ceausescu's 1988 renunciation of most favored nation (MFN or non-discriminatory) trading status resulted in high U.S. tariffs on Romanian products. Congress approved restoration of MFN status effective November 8, 1993, as part of a new Bilateral Trade Agreement. Tariffs on most Romanian products dropped to zero in February 1994, with the inclusion of Romania in the Generalized System of Preferences (GSP). Major Romanian exports to the U.S. include shoes, clothing, steel, and chemicals. Romania signed an Association Agreement with the European Union (EU) in 1992 and a free trade agreement with the European Free Trade Association (EFTA) in 1993, codifying Romania's access to European markets and creating the basic framework for further economic integration. At its Helsinki Summit in December 1999, the European Union invited Romania to formally begin accession negotiations. In December 2004, the EU Commission concluded pre-accession negotiations with Romania. In April 2005, the EU signed an accession treaty with Romania and its neighbor, Bulgaria, and in January 2007, they were both welcomed as new EU members.

Privatization of industry was first pursued with the transfer in 1992 of 30% of the shares of some 6,000 state-owned enterprises to five private ownership funds, in which each adult citizen received certificates of ownership. The remaining 70% ownership of the enterprises was transferred to a state ownership fund. With the assistance of the World Bank, European Union, and International Monetary Fund (IMF), Romania succeeded in privatizing most industrial state-owned enterprises, including some large state-owned energy companies. Romania completed the privatization of the largest commercial bank (BCR) in 2006. The privatization of the last state-owned bank—the National Savings Bank (CEC)—was stopped in 2006 and has been indefinitely postponed. Four of the country's eight regional electricity distributors have now been privatized. Privatization of natural gas distribution companies also progressed with the sale of Romania's two regional gas distributors, Distrigaz Nord (to E.ON Ruhrgas of Germany) and Distrigaz Sud (to Gaz de France). Further progress in energy sector privatization, how-

ever, has been delayed as the government reconsiders its strategy on the Rovinari, Turceni, and Craiova energy complexes, contemplating the creation of an integrated, state-owned energy producer. Romania has a nuclear power plant at Cernavoda, with one nuclear reactor in operation since 1996 and a second one commissioned in the fall of 2007.

The return of collectivized farmland to its cultivators, one of the first initiatives of the post-December 1989 revolution government, resulted in a short-term decrease in agricultural production. Some four million small parcels representing 80% of the arable surface were returned to original owners or their heirs. Many of the recipients were elderly or city dwellers, and the slow progress of granting formal land titles remains an obstacle to leasing or selling land to active farmers.

Financial and technical assistance continues to flow from the U.S., European Union, other industrial nations, and international financial institutions facilitating Romania's reintegration into the world economy. The International Monetary Fund, World Bank (IBRD), the European Bank for Reconstruction and Development (EBRD), and the U.S. Agency for International Development (USAID) all have programs and resident representatives in Romania, although USAID programs will phase out completely by June 1, 2008. As of August 2007, Romania had attracted $21.8 billion in foreign direct investment. Of this total, U.S. direct investment accounted for $915.7 million (4.9%), ranking sixth among national investors but first among non-EU countries.

After years of IMF-guided economic reforms, Romania' stand-by agreement with the IMF expired on July 7, 2006. Romania's inflation rate has steadily decreased, while growth rates have been between 4% and 8% since 2001. However, the IMF has been critical of Romania's 2005 adoption of a 16% flat tax, pointing to the country's low rate of tax collection as a medium- to long-term impediment to growth. The IMF has also criticized Romania's public sector wage policy as inflationary. Public sector wages increased 36% through 2006, and the Government of Romania approved public sector wage increases of 14%-19% over three rounds in 2007. Analysts have warned about increasing macroeconomic imbalances, such as the growing current account deficit (10.3% of GDP in 2006 and possibly reaching 15% in 2007, the IMF estimated). This along with deteriorating education and health services, aging and inadequate physical infrastructure, and a looming real estate price bubble are all seen as threats to future growth.

Romania's budget deficits also dropped under IMF guidance, though the trend is reversing. Actual deficits decreased from 4% of GDP in 1999 to only 0.8% in 2005 and 1.7% in 2006. However, the 2007 deficit rose to 2.5% of GDP, driven by rising spending on infrastructure, public sector wages, and pension increases. The IMF had recommended that Romania strive to keep the 2007 deficit below 2%, dropping to 1% of GDP in 2008. The IMF also advised that Romania is lacking a realistic fiscal policy framework for the medium term. The country made progress in combating domestic tax arrears and expanding the tax base in 2005, though Romania has one of the lowest collection rates in Europe, at 31.0% of GDP in 2006.

Unemployment was officially 3.9% in August 2007, although these figures do not capture high levels of temporary emigration, gray-market employment, or under-employment.

In the early 1990s, inflation was one of Romania's most serious economic problems. Inflation rates have gradually declined, finally reaching single digits in 2004. Inflation in 2006 stood at a historical low of 4.9%. The Central Bank set an ambitious annual target band of 4% plus/minus 1% for 2007, but outside analysts noted that inflationary pressures were growing and predicted that the rate for the year would slightly exceed the top of this band.

FOREIGN RELATIONS

Since December 1989, Romania has actively pursued a policy of strengthening relations with the West in general, more specifically with the U.S. and the European Union. Romania was a helpful partner to the allied forces during the first Gulf War, particularly during its service as president of the UN Security Council. Romania has been active in peacekeeping operations in Afghanistan, UNAVEM in Angola, IFOR/SFOR in Bosnia, KFOR in Kosovo, and in Albania. Romania also offered important logistical support to allied military operations in Iraq in 2003 and, after the cessation of organized hostilities, has been participating in security and reconstruction activities. Romania is a member of the Organization for Security and Cooperation in Europe (OSCE), which it chaired in 2001.

Romania was the first country to enroll in the NATO Partnership for Peace program. NATO member states invited Romania to join the Alliance in 2002, based on Romania's rapid progress in modernizing its armed forces and its contributions to allied peacekeeping and other military operations. Romania officially became a member of the North Atlantic Treaty Organization on March 29, 2004 after depositing its instruments of treaty ratification in Washington, DC. In 1996, Romania signed and ratified a basic bilateral treaty with Hungary that settled outstanding issues and laid the foundation for closer, more cooperative relations. In June 1997, Romania signed a bilateral treaty with Ukraine that resolved certain territorial and minority issues, among others. Romania also signed a basic bilateral treaty with Russia in July 2003.

Romania hosted President Bush's final NATO Summit April 2-4, 2008. The venue symbolized the expansion of the Alliance from the Baltic to the Black Sea, and set new goals for years to come.

Romania acceded to the European Union on January 1, 2007 along with

Bulgaria, bringing the number of EU states to 27. Romania is a strong advocate for a "larger Europe," encouraging other countries that were formerly part of the Soviet sphere to integrate into both NATO and the EU.

Romania has been actively involved in regional organizations, such as the Southeast Europe Cooperation Initiative (SECI) and the Stability Pact for Southeast Europe, and has been a positive force in supporting stability and cooperation in the area.

Romania maintains good diplomatic relations with Israel and was supportive of the Middle East peace negotiations initiated after the Gulf conflict in 1991. Romania also is a founding member of the Black Sea Consortium for Economic Development. It joined the International Monetary Fund and the World Bank in 1972, and is a member of the World Trade Organization.

DEFENSE

In accordance with the December 1991 Romanian constitution, the Romanian armed forces have the defensive mission of ensuring the territorial integrity of the country. The military enjoys popular support, partly because of its role in supporting the December 1989 revolution. The army is the largest service. Romania has an all-volunteer military force; conscription ended in 2007. The Romanian armed forces have about 75,000 military personnel and 15,000 civilians, for a total of 90,000 men and women. Out of these 75,000, about 45,800 are in the Land Forces. In 1993, the U.S. military began training of Romanian military and civilian officials through IMET and other exchange programs, emphasizing civilian democratic control over the military.

U.S.-ROMANIAN RELATIONS

Cold during the early post-war period, U.S. bilateral relations with Romania began to improve in the early 1960s with the signing of an agreement providing for partial settlement of American property claims. Cultural, scientific, and educational exchanges were initiated, and in 1964 the legations of both nations were promoted to full embassies.

Responding to Ceausescu's calculated distancing of Romania from Soviet foreign policy, particularly Romania's continued diplomatic relations with Israel and denunciation of the 1968 Soviet intervention in Czechoslovakia, President Nixon paid an official visit to Romania in August 1969. Despite political differences, high-level contacts continued between U.S. and Romanian leaders throughout the decade of the 1970s, culminating in the 1978 state visit to Washington by President and Mrs. Ceausescu.

In 1972, a consular convention to facilitate protection of citizens and their property in both countries was signed. Overseas Private Investment Corporation (OPIC) facilities were granted, and Romania became eligible for U.S. Export-Import Bank credits.

A trade agreement signed in April 1975 accorded most favored nation (MFN) status to Romania under section 402 of the Trade Reform Act of 1974 (the Jackson-Vanik amendment that links MFN to a country's performance on emigration). This status was renewed yearly after congressional review of a presidential determination that Romania was making progress toward freedom of emigration.

In the mid-1980s, criticism of Romania's deteriorating human rights record, particularly regarding mistreatment of religious and ethnic minorities, spurred attempts by Congress to withdraw MFN status. In 1988, to preempt congressional action, Ceausescu renounced MFN treatment, calling Jackson-Vanik and other human rights requirements unacceptable interference in Romanian sovereignty.

After welcoming the revolution of December 1989 with a visit by Secretary of State Baker in February 1990, the U.S. Government expressed concern that opposition parties had faced discriminatory treatment in the May 1990 elections, when the National Salvation Front won a sweeping victory. The slow progress of subsequent political and economic reform increased that concern, and relations with Romania cooled sharply after the June 1990 intervention of the miners in University Square. Anxious to cultivate better relations with the U.S. and Europe, and disappointed at the poor results from its gradualist economic reform strategy, the Stolojan government undertook some economic reforms and conducted free and fair parliamentary and presidential elections in September 1992. Encouraged by the conduct of local elections in February 1992, Deputy Secretary of State Eagleburger paid a visit in May 1992. Congress restored MFN in November 1993 in recognition of Romania's progress in instituting political and economic reform. In 1996, the U.S. Congress voted to extend permanent MFN graduation to Romania. As Romania's policies became unequivocally pro-Western, the United States moved to deepen relations. President Clinton visited Bucharest in 1997. The two countries initiated cooperation on shared goals, including eco-

nomic and political development, defense reform, and non-traditional threats (such as trans-border crime and non-proliferation).

Following the tragic events of September 11, 2001, Romania has been fully supportive of the U.S. in the Global War on Terror. Romania was invited to join the North Atlantic Treaty Organization (NATO) in November 2002 and formally joined NATO on March 29, 2004 after depositing its instruments of treaty ratification in Washington, DC. President Bush helped commemorate Romania's NATO accession when he visited Bucharest in November 2002. On that occasion he congratulated the Romanian people on building democratic institutions and a market economy following the fall of communism. Romanian troops serve alongside U.S. troops in both Iraq and Afghanistan.

In March 2005, President Traian Basescu made his first official visit to Washington to meet with President Bush, Secretary of State Rice, Secretary of Defense Rumsfeld, and other senior U.S. officials. In December 2005, Secretary Rice visited Bucharest to meet with President Basescu and to sign a bilateral defense cooperation agreement that will allow for the joint use of Romanian military facilities by U.S. troops. The first proof of principle exercise took place at Mihail-Kogalniceanu Air Base from August to October 2007.

President Bush held separate bilateral meetings with both President Basescu and Prime Minister Tariceanu during his NATO Summit visit in 2008. Secretary Rice and Defense Secretary Gates were also in attendance.

TRAVEL

Consular Information Sheet

July 18, 2008

Country Description: Romania joined NATO in 2004 and the European Union in 2007. Rapid economic growth in recent years has improved tourist and transportation infrastructure in many areas.

Entry Requirements: A valid passport is required. U.S. citizen visitors are granted 90 days of stay without a visa within a given six-month period. An exit visa must be obtained in cases of overstay. For stays longer than 90 days, an extension of stay may be obtained in Romania from the Romanian Immigration Office in the area of residence (http://aps.mai.gov.ro) The Romanian Government is enforcing visa regulations more vigorously and a record of visa overstay can result in payment of large fines and the denial of entry without visa for a specified time. Visitors can obtain information regarding entry requirements from the Romanian Embassy at 1607 23rd Street NW, Washington, DC 20008, telephone number (202) 232-4747, or the Romanian Consulates in Los Angeles, Chicago, or New York City. Web site: http://www.roembus.org.

U.S. visa information for Romanians and other foreign citizens can be found on the web site of the U.S. Embassy in Bucharest at http://bucharest.usembassy.gov or the Department's travel web site.

Safety and Security: The assessed threat to visitors as the result of political violence is medium. The Romanian Government does give permission to groups who wish to assemble for demonstration purposes. Demonstrations are normally well-contained and the police are close at hand and efficient. Nevertheless, for general safety purposes, it is wise to stay away from these gatherings and be alert to the fact that the normal traffic patterns can be disrupted during and just after the event.

For the latest security information, Americans traveling abroad should regularly monitor the Department's web site, where the current Worldwide Caution Travel Alert, Travel Warnings and other Travel Alerts can be found. Americans are reminded to remain vigilant with regard to their personal security and to exercise caution. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S., or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: While most crimes in Romania are non-violent and non-confrontational, crimes do occur in which victims suffer personal harm. Crimes against tourists, including robbery, mugging, pickpocketing and confidence schemes, remain a problem in Romania. Organized groups of thieves and pickpockets, sometimes including minors, operate in train stations and on trains, subways, and buses in major cities. A number of thefts and assaults have occurred on overnight trains, including thefts from passengers in closed compartments. The Embassy recommends using the highest class available for train travel.

Money exchange schemes targeting travelers are common in Romania. Some of these ploys have become rather sophisticated, involving indi-

viduals posing as plainclothes policemen, who approach the potential victim, flash a badge, and ask for the victim's passport and wallet. In many of these cases, the thieves succeed in obtaining passports, credit cards, and other personal documents. Credit card and Internet fraud remain among the most common crimes affecting foreigners in Romania.

In many countries around the world, counterfeit and pirated goods are widely available. Transactions involving such products may be illegal under local law. In addition, bringing them back to the United States may result in forfeitures and/or fines. More information on this serious problem is available at http://www.cybercrime.gov/18usc2320.htm.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed. To contact the local police, dial 112.

Medical Facilities and Health Information: Medical care in Romania is generally not up to Western standards, and basic medical supplies are limited, especially outside major cities. Some medical providers that are up to Western quality standards are available in Bucharest and other cities, but can be difficult to identify and locate. Travelers seeking medical treatment should therefore choose their provider carefully. A list of hospitals and physicians is available on the web site of the U.S. Embassy in Bucharest at http://bucharest.usembassy.gov. Information regarding health threats or other medical issues affecting visitors to Romania can also be found at this site. The emergency telephone number for ambulance and other emergency services is 112. The U.S. Department of State is unaware of any HIV/AIDS entry restrictions for visitors to or foreign residents of Romania.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's web site at http://wwwn.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation. Americans who wish to extend their stay in Romania must present health insurance that applies overseas for the duration of their intended stay in Romania.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Romania is provided for general reference only, and may not be totally accurate in a particular location or circumstance. Road conditions vary widely throughout Romania. While major streets in larger cities and major inter-city roads are in fair to good condition, many other roads are in poor repair, badly lit, narrow, or lack marked lanes. Pedestrians, animals, people on bicycles, and horse-drawn carts that are extremely difficult to see, especially at night, also use many roads, particularly in rural areas. Roads, especially in the mountains, can be particularly dangerous when wet or covered with snow or ice.

Romanian traffic laws are very strict. The traffic police can confiscate any form of driver's license or permit for 1-3 months and payment of fines may be requested at the time of the infractions. Some examples when this might occur are failure to yield the right of way, failure to yield to pedestrians at crosswalks, and failure to stop at a red light or stop sign. Romanian traffic law provides for retention of licenses and possible imprisonment for driving under the influence of alcohol or for causing an accident resulting in injury or death. There is zero tolerance for driving under the influence of alcohol and police are required to give breathalyzer tests at the scene of an accident to all drivers. Refusal to take a breathalyzer test will result in criminal penalties regardless of whether or not alcohol was involved; in spite of these strict rules, however, many drivers in Romania drive aggressively and often do not follow traffic laws or yield the right of way. Therefore, it is strongly recommended that defensive driving be practiced while driving in Romania. U.S. driver's licenses are only valid in Romania for up to 90 days. Before the 90-day period has expired, U.S. citizens must either obtain an international driving permit in addition to their U.S. driver's license or a Romanian driver's license. Wearing a seat belt is mandatory. Children under 12 years of age may not be transported in the front seat. Drivers must yield to pedestrians at all marked pedestrian crosswalks, but many of these are poorly maintained, difficult to see, and sometimes located in unexpected places for foreign drivers.

Unless otherwise marked with road signs, speed limits are as follows:

- Inter-city traffic on highways: 130 km/hr for cars and motorcycles, 110 km/hr for vans
- Urban traffic: 50 km/hr Express and European roads; 100 km/hour for cars and motorcycles, 90 km/hour for vans

- All other roads: 90 km/hr for cars and motorcycles, 80 km/hr for vans

Motor vehicles with trailers and drivers with less than one year of driving experience have speed limits 20 km/hr slower than those listed above.

Inter-city travel is generally done via trains and buses, which vary in terms of quality, safety, cost, and reliability. Pickpockets pose a danger on night trains and in train stations. Inter-city travel by taxi is much more expensive and safety depends on the quality of the driver. Many older taxis are not equipped with seat belts. To avoid being overcharged, passengers should request the taxi by phone and make sure the taxi has an operational meter, or agree upon a price before entering the taxi.

The host country authority responsible for road safety is the Traffic Police of the Romanian Ministry of Interior. Emergency roadside help and information may be reached by dialing 9271 for vehicle assistance and towing services. For ambulance services, fire brigade, or police, dial 112.

Visit the web site of the country's national tourist office and national authority responsible for road safety at http://www.romaniatourism.com.

Aviation Safety Oversight: The U.S. Federal Aviation Administration (FAA) has assessed the Government of Romania's Civil Aviation Authority as being in compliance with International Civil Aviation Organization (ICAO) aviation safety standards for oversight of Romania's air carrier operations. For more information, travelers may visit the FAA's web site at http://www.faa.gov.

Special Circumstances: Romania is largely a "cash only" economy. While an increasing number of businesses do accept credit cards, travelers are advised to use cash for goods and services rendered due to the prevalence of credit card fraud. Vendors have been known to misuse credit card information by making illegal purchases on individual's accounts. To make a credit card purchase, a PIN is usually required. There are an increasing number of ATMs located throughout major cities, and increasingly sophisticated identity theft rings are targeting them. Travelers should try to use ATMs located inside banks and check for any evidence of tampering with the machine before use. Travelers' checks are of limited use but may be used to purchase local currency at some exchange houses.

Americans should exercise caution when traveling to Romania to meet individuals known only through contact over the Internet. A significant number of confidence scams have been uncovered involving Romanians who contact their prospective American victims through chat rooms or personal advertisements. They generally identify themselves as young Romanian women and develop a "relationship" with their victim over time. Variations of this scam have emerged, but money extortion remains the ultimate goal. Americans who suspect they may have fallen victim to this kind of scam should contact American Citizens Services at the U.S. Embassy.

While the population of stray dogs in and around Bucharest has decreased in recent years, groups of dogs are still found in some areas and attacks on pedestrians and joggers are not uncommon. While there have not been any reported problems with rabies, travelers are advised to avoid all stray dogs.

Romania's customs authorities may enforce strict regulations concerning temporary importation into or export from Romania of items such as firearms, antiquities, and medications. Romanian law allows travelers to bring cash into or out of Romania; however, sums larger than 10,000 Euros or the equivalent must be declared. Travelers are advised to contact the Embassy of Romania in Washington or one of Romania's consulates in the United States for specific information regarding customs requirements. Romania is an earthquake-prone country. General information about natural disaster preparedness is available on the U.S. Federal Emergency Management Agency (FEMA) web site at http://www.fema.gov.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating Romania's laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Romania are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Under Romanian law, engaging in sexual conduct with a minor under the age of 15 or a minor between the ages of 15 and 18 where the adult has abused the minor's trust or had influence/authority over the minor is a crime punishable with a 3-10 year prison sentence. Engaging in illicit sexual conduct with someone who has a physical or psychological disability is punishable with a 3-12 year prison sentence. Distribution of obscene materials depicting minors is a crime punishable with a 1-5 year prison sentence. Prostitution is illegal in Romania, regardless of the age of the participants.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov. In 2005, Romania banned intercountry adoptions except by grandparents.

Registration and Embassy Locations: Americans living or traveling in Romania are encouraged to register with the U.S. Embassy through the State Department's travel registration web site, https://travelregistration.state.gov, and to obtain

updated information on travel and security within Romania. Americans without Internet access may register directly with the U.S. Embassy. By registering, American citizens make it easier for the Embassy to contact them in case of emergency. The U.S. Embassy is located at Strada Tudor Arghezi 7-9, telephone (40) 21-200-3300. In life or death emergencies, an after hours duty officer may be reached by calling (40) 21-200-3433. Consular services for U.S. citizens are performed at the Consular Section located at Strada Filipescu no. 26 (formerly Strada Snagov), one block from the U.S. Embassy at the corner of Strada Batistei. The Consular Section can be reached through the Embassy operator at (40) 21-200-3300, and faxes can be sent to (40) 21 200-3381 or 200-3578.

Intercountry Adoption

November 2008

The information in this section has been edited from a report available through the U.S. Department of State Office of Children's Issues. For more information detailed, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Romanian law currently does not allow for intercountry adoption except by the biological grandparents of the child.

Romania is party to The Hague Convention on Protection of Children and Co-operation in Respect of Intercountry Adoption (Hague Adoption Convention). Therefore all adoptions between Romania and the United States must meet the requirements of the Convention and United States law implementing the Convention.

RUSSIA

Compiled from the July 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Russian Federation

PROFILE

Geography

Area: 17 million sq. km. (6.5 million sq. mi.); about 1.8 times the size of the United States.

Cities: Capital—Moscow (pop. 10.4 million). Other cities—St. Petersburg (4.6 million), Novosibirsk (1.4 million), Nizhniy Novgorod (1.3 million).

Terrain: Broad plain with low hills west of Urals; vast coniferous forest and tundra in Siberia; uplands and mountains (Caucasus range) along southern borders.

Climate: Northern continental.

People

Nationality: Noun and adjective—Russian(s).

Population: (January 2008) 142 million.

Annual growth rate: (2007 est.) -0.484% (population declining).

Ethnic groups: Russian 79.8%, Tatar 3.8%, Ukrainian 2%, other 14.4%.

Religions: Russian Orthodox, Islam, Judaism, Roman Catholicism, Protestant, Buddhist, other.

Languages: Russian (official); more than 140 other languages and dialects.

Education: (total pop.) Literacy—99.4%.

Health: Life expectancy (2007 est.)—59.12 yrs. men, 73.03 yrs. women.

Work force: (73.88 million) (2006 est.) Production and economic services—84%; government—16%.

Government

Type: Federation.

Independence: August 24, 1991.

Constitution: December 12, 1993.

Government branches: Executive—president, prime minister (chairman of the government). Legislative—Federal Assembly (Federation Council, State Duma). Judicial—Constitutional Court, Supreme Court, Supreme Court of Arbitration, Office of Procurator General.

Political parties: The December 2007 Duma elections were contested by United Russia, the Communist Party (KPRF), the Liberal Democratic Party (LDPR), For a Just Russia, the Union of Right Forces (SPS), Yabloko, and four other minor parties. SPS and Yabloko, parties favoring liberal reforms, failed to clear the 7% threshold to enter the Duma as a party.

Political subdivisions: 21 autonomous republics, 47 oblasts, 2 federal cities (Moscow and St. Petersburg) and 14 autonomous territories and regions.

Suffrage: Universal at 18 years.

Economy

GDP: (2007 estimate) $1.34 trillion.

Growth rate: (2007 estimate) 8.1%.

Natural resources: Petroleum, natural gas, timber, furs, precious and nonferrous metals.

Agriculture: Products—Grain, sugar beets, sunflower seeds, meat, dairy products.

Industry: Types—Complete range of manufactures: automobiles, trucks, trains, agricultural equipment, advanced aircraft, aerospace, machine and equipment products; mining and extractive industry; medical and scientific instruments; construction equipment.

Trade: (2007) Exports—$355 billion: petroleum and petroleum products, natural gas, woods and wood products, metals, chemicals. Major markets—EU, CIS, China, Japan. Imports—$223 billion: machinery and equipment, chemicals, consumer goods, medicines, meat, sugar, semi-finished metal products. Major partners—EU, U.S., NIS, Japan, China.

U.S. exports—$7.4 billion. Principal U.S. exports (2007)—oil/gas equipment, autos/parts, meat, aircraft, electrical machinery, medical equipment, plastics, cosmetics, and chemicals. U.S. imports—$19.4 billion. Principal U.S. imports (2006)—oil, chemicals, aluminum, iron/steel, precious stones, nickel, fish and crustaceans, copper, base metals, and wood.

PEOPLE

Most of the roughly 142 million Russians derive from the Eastern Slavic family of peoples, whose original homeland was probably present-day Poland. Russian is the official language of Russia and is one of the six official languages of the United Nations. Russian is also the language of such giants of world literature as Pushkin, Tolstoy, Dostoevsky, Chekhov, Pasternak and Solzhenitsyn.

Russia's educational system has produced nearly 100% literacy. About 3 million students attend Russia's 519 institutions of higher education and 48 universities, but continued reform is critical to producing students with skills to adapt to a market economy. Because great emphasis is placed on science and technology in education, Russian medical, mathematical, scientific, and space and aviation research is still generally of a high order. The number of doctors in relation to the population is high by American standards, although medical care in Russia, even in major cities, is generally far below Western standards. The unraveling of the Soviet state in its last decades and the physical and psychological traumas of transition during the 1990s resulted in a steady decline in the health of the Russian people. Currently Russia faces a demographic crisis as births lag far behind deaths. While its population is aging, skyrocketing deaths of working-age males due to cardiovascular disease is a major cause of Russia's demographic woes. A rapid increase in HIV/AIDS infections and tuberculosis compounds the problem. In 2007, life expectancy at birth was 59 for men and 73 for women. The large annual excess of deaths over births is expected to cut Russia's population by 30% over the next 50 years.

The Russian labor force is undergoing tremendous changes. Although well educated and skilled, it is largely mismatched to the rapidly changing needs of the Russian economy. Official unemployment has dropped in recent years to 6.9%, and labor shortages have started to appear in some high-skilled job markets. Nonetheless, pockets of high unemployment remain and many Russian workers are underemployed. Unemployment is highest among women and young people. Following the 1991 collapse of the Soviet Union and the economic dislocation it engendered, the standard of living fell dramatically. However, real disposable incomes have doubled since 1999, and experts estimate that the middle class ranges from one-fifth to one-third of the population. In 2006, 15.8% of the population lived below the subsistence level, in contrast to 38.1% in 1998.

Moscow is Russia's capital and largest city (population 8.3 million). Moscow is also increasingly important as an economic and business center; it has become Russia's principal magnet for foreign investment and business presence. Its cultural tradition is rich, and there are many museums devoted to art, literature, music, dance, history, and science, as well as hundreds of churches and dozens of notable cathedrals.

The second-largest city in Russia is St. Petersburg, which was established by Peter the Great in 1703 to be the capital of the Russian Empire as part of his Western-looking reforms. The city was called Petrograd during World War I and Leningrad after 1924. In 1991, as the result of a city referendum, it was renamed St. Petersburg. Under the tsars, the city was Russia's cultural, intellectual, commercial, financial, and industrial center. After Lenin moved the capital back to Moscow in 1918, the city's political significance declined, but it remained a cultural, scientific, and military-industrial center. The Hermitage, formerly the Winter Palace of the tsars, is one of the world's great fine arts museums. Russia has an area of about 17 million square kilometers (6.5 million sq. mi.); in geographic terms, this makes Russia the largest country in the world by more than 2.5 million square miles. But with a population density of about 22 persons per square mile (9 per sq. km.), it is sparsely populated, and most of its residents live in urban areas.

HISTORY

Although human experience on the territory of present-day Russia dates back to Paleolithic times, the first lineal predecessor of the modern Russian state was founded in 862. The political entity known as Kievan Rus was established in Kiev in 962 and lasted until the 12th century. In the 10th century, Christianity became the state religion under Vladimir, who adopted Greek Orthodox rites. Consequently, Byzantine culture predominated, as is evident in much of Russia's architectural, musical, and artistic heritage. Over the next centuries, various invaders assaulted the Kievan state and, finally, Mongols under Batu Khan destroyed the main population centers except for Novgorod and Pskov in the 13th century and prevailed over the region until 1480. Some historians believe that the Mongol period had a lasting impact on Russian political culture.

In the post-Mongol period, Muscovy gradually became the dominant principality and was able, through diplomacy and conquest, to establish suzerainty over European Russia. Ivan III (1462-1505) referred to his empire as "the Third Rome" and considered it heir to the Byzantine tradition. Ivan IV (the Terrible) (1530-1584) was the first Russian ruler to call himself tsar. He pushed Russian eastward with his conquests but his later reign was marked by the cruelty that earned him his familiar epithet. He was succeeded by Boris Godunov, whose reign commenced the so-called Time of Troubles. Relative stability was achieved when Michael Romanov established the dynasty that bore his name in 1613.

During the reign of Peter the Great (1689-1725), modernization and European influences spread in Russia. Peter created Western-style military forces, subordinated the Russian Orthodox Church hierarchy to the tsar, reformed the entire governmental structure, and established the beginnings of a Western-style education system. He moved the capital westward from Moscow to St. Petersburg, his newly-established city on the Baltic. His introduction of European customs generated nationalistic resentments in society and spawned the philosophical rivalry between "Westernizers" and nationalistic "Slavophiles" that remains a key dynamic of current Russian social and political thought.

Catherine the Great continued Peter's expansionist policies and established Russia as a European power. During her reign (1762-96), power was centralized in the monarchy, and administrative reforms concentrated great wealth and privilege in the hands of the Russian nobility. Catherine was also known as an enthusiastic patron of art, literature and education and for her correspondence with Voltaire and other Enlightenment figures. Catherine also engaged in a territorial resettlement of Jews into what became known as "The Pale of Settlement," where great numbers of Jews were concentrated and later subject to vicious attacks known as pogroms.

Alexander I (1801-1825) began his reign as a reformer, but after defeating Napoleon's 1812 attempt to conquer Russia, he became much more conservative and rolled back many of his early reforms. During this era, Russia gained control of Georgia and much of the Caucasus. Throughout the 19th century, the Russian Government sought to suppress repeated attempts at reform and attempts at liberation by various national movements, particularly under the reign of Nicholas I (1825-1855). Its economy failed to compete with those of Western countries. Russian cities were growing without an industrial base to generate employment, although emancipation of the serfs in 1861 foreshadowed urbanization and rapid industrialization late in the century. At the same time, Russia expanded into the rest of the Caucasus, Central Asia and across Siberia. The port of Vladivostok was opened on the Pacific coast in 1860. The Trans-Siberian Railroad opened vast frontiers to development late in the century. In the 19th century, Russian culture flourished as Russian artists made significant contributions to world literature, visual arts, dance, and music. The names of Dostoyevsky, Tolstoy, Gogal, Repin, and Tchaik-

ovsky became known to the world. Alexander II (1855-1881), a relatively liberal tsar, emancipated the serfs. His 1881 assassination, however, prompted the reactionary rule of Alexander III (1881-1894). At the turn of the century, imperial decline became evident. Russia was defeated in the unpopular Russo-Japanese war in 1905. The Russian Revolution of 1905 forced Tsar Nicholas II (1894-1917) to grant a constitution and introduce limited democratic reforms. The government suppressed opposition and manipulated popular anger into anti-Semitic pogroms. Attempts at economic change, such as land reform, were incomplete.

1917 Revolution and the U.S.S.R.

The ruinous effects of World War I, combined with internal pressures, sparked the March 1917 uprising that led Tsar Nicholas II to abdicate the throne. A provisional government came to power, headed by Aleksandr Kerenskiy. On November 7, 1917, the Bolshevik Party, led by Vladimir Lenin, seized control and established the Russian Soviet Federated Socialist Republic. Civil war broke out in 1918 between Lenin's "Red" army and various "White" forces and lasted until 1920, when, despite foreign interventions and a war with Poland, the Bolsheviks triumphed. After the Red army conquered Ukraine, Belarus, Azerbaijan, Georgia, and Armenia, a new nation, the Union of Soviet Socialist Republics (U.S.S.R.), was formed in 1922.

First among its political figures was Lenin, leader of the Bolshevik Party and head of the first Soviet Government, who died in 1924. In the late 1920s, Josef Stalin emerged as General Secretary of the Communist Party of the Soviet Union (CPSU) amidst intra-party rivalries; he maintained complete control over Soviet domestic and international policy until his death in 1953. In the 1930s, Stalin oversaw the forced collectivization of tens of millions of its citizens in state agricultural and industrial enterprises. Millions died in the process. Millions more died in political purges, the vast penal and labor system, and in state-created famines. Initially allied to Nazi Germany, which resulted in significant territorial additions on its western border, the U.S.S.R. was attacked by the Axis on June 22, 1941. Twenty million Soviet citizens died during World War II in the successful effort to defeat the Axis, in addition to over two million Soviet Jews who perished in the Holocaust. After the war, the U.S.S.R. became one of the Permanent Members of the UN Security Council. In 1949, the U.S.S.R. developed its own nuclear arsenal.

Stalin's successor, Nikita Khrushchev, served as Communist Party leader until he was ousted in 1964. Aleksey Kosygin became Chairman of the Council of Ministers, and Leonid Brezhnev was made First Secretary of the CPSU Central Committee in 1964. In 1971, Brezhnev rose to become "first among equals" in a collective leadership. Brezhnev died in 1982 and was succeeded by Yuriy Andropov (1982-84) and Konstantin Chernenko (1984-85). In 1985, Mikhail Gorbachev became the next (and last) General Secretary of the CPSU. Gorbachev introduced policies of perestroika (restructuring) and glasnost (openness). But his efforts to reform the creaky Communist system from within failed. The people of the Soviet Union were not content with half-freedoms granted by Moscow; they demanded more and the system collapsed. Boris Yeltsin was elected the first president of the Russian Federation in 1991. Russia, Ukraine and Belarus formed the Commonwealth of Independent States in December 1991. Gorbachev resigned as Soviet President on December 25, 1991. Eleven days later, the U.S.S.R. was formally dissolved.

The Russian Federation

After the December 1991 dissolution of the Soviet Union, the Russian Federation became its successor state, inheriting its permanent seat on the UN Security Council, as well as the bulk of its foreign assets and debt. By the fall of 1993, politics in Russia reached a stalemate between President Yeltsin and the parliament. The parliament had succeeded in blocking, overturning, or ignoring the President's initiatives on drafting a new constitution, conducting new elections, and making further progress on democratic and economic reforms.

In a dramatic speech in September 1993, President Yeltsin dissolved the Russian parliament and called for new national elections and a new constitution. The standoff between the executive branch and opponents in the legislature turned violent in October after supporters of the parliament tried to instigate an armed insurrection. Yeltsin ordered the army to respond with force to capture the parliament building and crush the insurrection. In December 1993, voters elected a new parliament and approved a new constitution that had been drafted by the Yeltsin government. Yeltsin remained the dominant political figure, although a broad array of parties, including ultranationalists, liberals, agrarians, and communists, had substantial representation in the parliament and competed actively in elections at all levels of government.

In late 1994, the Russian security forces launched a brutal operation in the Republic of Chechnya against rebels who were intent on separation from Russia. Along with their opponents, Russian forces committed numerous violations of human rights. The protracted conflict, which received close scrutiny in the Russian media, raised serious human rights and humanitarian concerns abroad as well as within Russia. After numerous unsuccessful attempts to institute a cease-fire, in August 1996 the Russian and Chechen authorities negotiated a settlement that resulted in a complete withdrawal of Russian troops and the holding of elections in January 1997. A peace treaty was concluded in May 1997. Following a number of terrorist incidents blamed on Chechen separatists, the Russian government launched a new military campaign into Chechnya. By spring 2000, federal forces claimed control over Chechen territory, but fighting continues as rebel fighters regularly ambush Russian forces in the region. Throughout 2002 and 2003, the abil-

ity of Chechen separatists to battle the Russian forces waned but they claimed responsibility for numerous terrorist acts. In 2005 and 2006, key separatist leaders were killed by Russian forces.The situation stabilized after Ramzan Kadyrov was confirmed as Chechen President, although small-scale fighting continues between rebel forces and local law enforcement.

On December 31, 1999 Boris Yeltsin resigned, and Vladimir Putin was named Acting President. In March 2000, he won election in his own right as Russia's second president with 53% of the vote. Putin moved quickly to reassert Moscow's control over the regions, whose governors had confidently ignored edicts from Boris Yeltsin. He sent his own "plenipotentiary representatives" (commonly called 'polpred' in Russian) to ensure that Moscow's policies were followed in recalcitrant regions and republics. He won enactment of liberal economic reforms that rescued a faltering economy and stopped a spiral of hyperinflation. Putin achieved wide popularity by stabilizing the government, especially in marked contrast to what many Russians saw as the chaos of the latter Yeltsin years. The economy grew, both because of rising oil prices and in part because Putin was able to achieve reforms in banking, labor, and private property. During this time, Russia also moved closer to the U.S., especially after the terror attacks of September 11, 2001. In 2002, the NATO-Russia Council was established, giving Russia a voice in NATO discussions.

GOVERNMENT AND POLITICAL CONDITIONS

In the political system established by the 1993 constitution, the president wields considerable executive power. There is no vice president, and the legislative branch is far weaker than the executive. The bicameral legislature consists of the lower house (State Duma) and the upper house (the Federation Council). The president nominates the highest state officials, including the prime minister, who must be approved by the Duma. The president can pass decrees without consent from the Duma. He also is head of the armed forces and of the Security Council.

Duma elections were held most recently on December 2, 2007, and presidential elections on March 2, 2008. The pro-government party, United Russia, won a constitutional majority (more than two-thirds) of the seats in the Duma. Of the three other parties that won seats in the Duma, two of them—Just Russia and the Liberal Democratic Party—are considered to have a pro-Kremlin orientation. The final party represented in the Duma—the Communist Party—is the only opposition party. The Organization for Security and Cooperation in Europe's (OSCE) Office of Democratic Institutions and Human Rights did not observe the Duma elections because of restrictions placed on the observer mission by the Government of Russia and delays in issuing visas. Parliamentarians of the OSCE and the Council of Europe who observed the elections concluded that they were "not fair and failed to meet many OSCE and Council of Europe commitments and standards for democratic elections." They noted that the elections took place in an atmosphere which seriously limited political competition. Frequent abuses of administrative resources, media coverage strongly in favor of United Russia, and the revised election code combined to hinder political pluralism.

Dmitriy Medvedev, running as United Russia's candidate, was elected to a four-year term as President on March 2, 2008, with 70.28% of the vote. The Russian constitution does not allow presidents to serve more than two consecutive terms. Next elections for the Duma are scheduled to occur in December 2011 and for President in March 2012.

Russia is a federation, but the precise distribution of powers between the central government and the regional and local authorities is still evolving. The Russian Federation consists of 84 administrative units, including two federal cities, Moscow and St. Petersburg. The constitution explicitly defines the federal government's exclusive powers, but it also describes most key regional issues as the joint responsibility of the federal government and the regional administrative units. In 2000, President Putin grouped the regions into seven federal districts, with presidential appointees established in Moscow and six provincial capitals. In March 2004, the Constitution was amended to permit the merger of some regional administrative units. A law enacted in December 2004 eliminated the direct election of the country's regional leaders. Governors are now nominated by the president and subject to confirmation by regional legislatures.

Judicial System

The Russian judicial system consists of the Constitutional Court, courts of general jurisdiction, military courts, and arbitrage courts (which hear commercial disputes). The Constitutional Court of the Russian Federation is a court of limited subject matter jurisdiction. The 1993 constitution empowers the Constitutional Court to arbitrate disputes between the executive and legislative branches and between Moscow and the regional and local governments. The court also is authorized to rule on violations of constitutional rights, to examine appeals from various bodies, and to participate in impeachment proceedings against the president. The July 1994 Law on the Constitutional Court prohibits the court from examining cases on its own initiative and limits the scope of issues the court can hear. The system of general jurisdiction courts includes the Supreme Court of the Russian Federation, regional level courts, district level courts and justices of the peace.

The Duma passed a Criminal Procedure Code and other judicial reforms during its 2001 session. These reforms help make the Russian judicial system more compatible with its Western counterparts and are seen by most as an accomplishment in human rights. The reforms have rein-

troduced jury trials in certain criminal cases and created a more adversarial system of criminal trials that protect the rights of defendants more adequately. In 2002, the introduction of the new code led to significant reductions in time spent in detention for new detainees, and the number of suspects placed in pretrial detention declined by 30%. Another significant advance in the new Code is the transfer from the Procuracy to the courts of the authority to issue search and arrest warrants. There are rising concerns, however, that prosecutors have selectively targeted individuals for political reasons, as in the prosecution of Yukos Oil CEO Mikhail Khodorkovskiy.

In spite of the general tendency to increase judicial independence (for example, by recent considerable salary raise to judges), many judges still see their role not as of impartial and independent arbiters, but as of government officials protecting state interests. See below for more information on the commercial court/business law.

Human Rights

Russia's human rights record remains uneven and poor in some areas. Despite significant improvements in conditions following the end of the Soviet Union, problem areas remain. In particular, the Russian Government's policy in the North Caucasus has been a cause for international concern. Although the government has recognized the legitimacy of international human rights standards, the institutionalization of procedures to safeguard these rights has lagged. There are, however, some indications that the law is becoming an increasingly important tool for those seeking to protect human rights.

The judiciary is not independent, is often subject to manipulation by political authorities, and is plagued by large case backlogs and trial delays. Lengthy pretrial detention remains a serious problem. Russia has one of the highest prison population rates in the world, at 685 per 100,000. There are credible reports of beating and torture of inmates and detainees by law enforcement and correctional officials, and brutality perpetrated by the prisoners themselves, some of whom are informally granted authority to enforce order within the prisons. Prison conditions fall well below international standards and extreme overcrowding is common. In 2001, President Putin ordered a moratorium on the death penalty. There are reports that the Russian Government might still be violating promises they made upon entering the European Council, especially in terms of prison control and conditions.

In Chechnya, there have been credible allegations of violations of international human rights and humanitarian law committed by Russian and pro-Moscow Chechen forces. Chechen rebels also have committed abuses and acts of terrorism. Although the number of kidnappings and disappearances committed by government and rebel forces markedly declined in Chechnya in 2007, similar incidents have been reported in neighboring Ingushetiya and Dagestan. Russian authorities have introduced some improvements, such as requiring the presence of civilian investigators during all large-scale military operations and targeted search and seizure operations. Human rights groups claim that most abuses remain uninvestigated and unpunished and have spread more broadly in the North Caucasus.

The Russian constitution provides for freedom of religion, the equality of all religions before the law, and the separation of church and state. More than 70% of Russians identify themselves as Russian Orthodox. While Muslims, Jews, and other religious minorities continue to encounter prejudice and societal discrimination, they have not been inhibited by the government in the free practice of their religion. High-ranking federal officials have condemned anti-Semitic hate crimes, but law enforcement bodies have not always effectively prosecuted those responsible. The Federal Registration Service and some local officials continue to prevent some religious minorities from registering locally or from acquiring property. One legal requirement (namely that religious groups be established at least 15 years before being able to register as a religious organization) continues to prevent the Church of Scientology from registering outside of the city of Moscow.

The constitution provides for freedom of speech and of the press; however, in practice government pressure on the media persists, resulting in numerous infringements of these rights. The government uses direct ownership or ownership by large private companies with links to the government to control or influence the major media outlets, especially television, through direct control and through self-censorship by editors and journalists. The government uses its controlling ownership in major national television and radio stations, as well as the majority of influential regional ones, to restrict access to information about issues deemed sensitive, including coverage of opposition political parties and movements. Unsolved murders of journalists, including the murder of respected investigative reporter Anna Politkovskaya in October 2006, have caused significant international concern and increased the reluctance of journalists to cover controversial subjects.

The 2006 law on non-governmental organizations (NGOs) created a burdensome registration process for all NGOs with stricter requirements for foreign-funded NGOs and more relaxed requirements for religious organizations. The law and implementing regulations impose onerous paperwork reporting burdens on NGOs, which many medium and small NGOs have been unable to meet as evidenced by the fact that only 36% of local NGOs had met their reporting requirements by October 2007. This law was used to close an NGO for the first time in January 2007 on the basis of extremism charges. Most foreign NGOs have successfully re-registered.

The constitution guarantees citizens the right to choose their place of residence and to travel abroad. Some big-city governments, however, have

restricted this right through residential registration rules that closely resemble Soviet-era restrictions. These restrictions, though, are widely circumvented, as evidenced by the large number of undocumented foreign workers in these cities. The freedom to travel abroad and emigrate is respected although restrictions may apply to those who have had access to state secrets, or who have court orders against them for default on debts. Since 1994, the U.S. President has found Russia to be in full compliance with the provisions of the Jackson-Vanik Amendment.

Principal Government Officials

Last Updated: 11/12/08

Pres.: **Dmitriy Anatolyevich MEDVEDEV**
Premier: **Vladimir Vladimirovich PUTIN**
First Dep. Premier: **Igor Ivanovich SHUVALOV**
First Dep. Premier: **Viktor Alekseyevich ZUBKOV**
Dep. Premier: **Sergey Borisovich IVANOV**
Dep. Premier: **Aleksey Leonidovich KUDRIN**
Dep. Premier: **Igor Ivanovich SECHIN**
Dep. Premier: **Sergey Semenovich SOBYANIN**
Dep. Premier: **Aleksandr Dmitriyevich ZHUKOV**
Min. of Agriculture: **Aleksey Vasilyevich GORDEYEV**
Min. of Civil Defense, Emergencies, & Natural Disasters: **Sergey Kuzhugetovich SHOYGU**
Min. of Communications & Mass Media: **Igor Olegovich SHCHEGOLEV**
Min. of Culture: **Aleksandr Alekseyevich AVDEYEV**
Min. of Defense: **Anatoliy Eduardovich SERDYUKOV**
Min. of Economic Development: **Elvira Sakhipzadovna NABIULLINA**
Min. of Education & Science: **Andrey Aleksandrovich FURSENKO**
Min. of Energy: **Sergey Ivanovich SHMATKO**
Min. of Finance: **Aleksey Leonidovich KUDRIN**
Min. of Foreign Affairs: **Sergey Viktorovich LAVROV**
Min. of Health & Social Development: **Tatyana Alekseyevna GOLIKOVA**
Min. of Industry & Trade: **Viktor Borisovich KHRISTENKO**
Min. of Internal Affairs: **Rashid Gumarovich NURGALIYEV**
Min. of Justice: **Aleksandr Vladimirovich KONOVALOV**
Min. of Natural Resources & Ecology: **Yuriy Petrovich TRUTNEV**
Min. of Regional Development: **Dmitriy Nikolayevich KOZAK**
Min. of Sport, Tourism, & Youth Policy: **Vitaliy Leontyevich MUTKO**
Min. of Transportation: **Igor Yevgenyevich LEVITIN**
Dir., Foreign Intelligence Service (SVR): **Mikhail Yefimovich FRADKOV**
Dir., Federal Security Service (FSB): **Aleksandr Vasilyevich BORTNIKOV**
Head, Govt. Apparatus: **Sergey Semenovich SOBYANIN**
Sec., Security Council: **Nikolay Platonovich PATRUSHEV**
Procurator Gen.: **Yuriy Yakovlevich CHAYKA**
Chmn., Central Bank of Russia: **Sergey Mikhaylovich IGNATYEV**
Ambassador to the US: **Sergey Ivanovich KISLYAK**
Permanent Representative to the UN, New York: **Vitaliy Ivanovich CHURKIN**

The Russian Federation maintains an embassy at 2650 Wisconsin Ave., NW, Washington, DC 20007 (tel. 202-298-5700) and a consular section at 2641 Tunlaw Road, Washington, DC (tel. 202-939-8907/8913/8918). Russian consulates also are located in Houston, New York, San Francisco, and Seattle.

ECONOMY

The Russian economy underwent tremendous stress in the 1990s as it moved from a centrally planned economy to a free market system. Difficulties in implementing fiscal reforms aimed at raising government revenues and a dependence on short-term borrowing to finance budget deficits led to a serious financial crisis in 1998. Lower prices for Russia's major export earners (oil and minerals) and a loss of investor confidence due to the Asian financial crisis exacerbated financial problems. The result was a rapid and steep decline (60%) in the value of the ruble, flight of foreign investment, delayed payments on sovereign and private debts, a breakdown of commercial transactions through the banking system, and the threat of runaway inflation.

Still, Russia has weathered the crisis well. In the nine years following the financial crisis, GDP growth averaged 7% due to a devalued ruble, implementation of key economic reforms (tax, banking, labor and land codes), tight fiscal policy, and favorable commodities prices. Household consumption and fixed capital investments have both grown by about 10 percent per year since 1999 and have replaced net exports as the main drivers of demand growth. Inflation and exchange rates have stabilized due to a prudent fiscal policy (Russia has run a budget surplus since 2003). The government created a stabilization/rainy day fund ($156 billion at the end of 2007), and has the third-largest foreign exchange reserves in the world (close to $476 billion at the end of 2007) which should shelter it from commodity price shocks.

Russia's balance of payments continues to show dynamic growth. The current account balance fell slightly, from $95.3 billion in 2006 to $78.3 billion in 2007, as imports increased rapidly. Large amounts of capital moved into Russia in 2007. The capital account balance was $84.3 billion, compared to $6.1 billion in 2006. In addition, net private capital flows continued to increase in 2007 to $81.2 billion from $40.9 billion in 2006. Foreign direct investment (FDI) flows continued to improve in 2007 to $52.5 billion compared to $32.4 billion in 2006. As of July 1, 2006, the ruble is convertible for both current and capital transactions. Russia prepaid its entire Soviet-era Paris Club debt of $22 billion in late 2006. Russia maintains relatively small amounts of sovereign debt. In 2007, total sovereign foreign debt was $36 billion, or about 3% of GDP, down from $45 billion at the end of 2006. Russia's total public and private foreign debt at the end of 2007 was $460 billion, or 34% of GDP. Russia currently has a sovereign investment-grade rating from Standard and Poor's of BBB+.

Although the economy has begun to diversify, the government budget remains dependent on oil and gas revenues; consumption and investment are, however, contributing to an increasing share to GDP growth.

While currently sheltered from external price shocks, the government realizes the need to intensify reforms that will promote new investment in aging infrastructure and continued productivity gains. The government believes it can do this by creating state-sponsored investment funds, special economic zones, and by exercising control of strategic enterprises (a law defining strategic sectors was passed by the Duma in March 2008). Although investors are returning to Russia, excessive bureaucracy, corruption, insufficient and insufficiently enforced legislation, selective interpretation of laws (particularly tax laws), unclear limits and conditions on foreign investment, obsolete infrastructure, and stalled economic reforms still remain a problem. In 2005, the government announced reform programs in four priority areas (health, education, housing, and agriculture), but further work is needed on them as well as in financial regulation, civil service reform, and reform of government monopolies, such as railroads, gas, and electricity.

Gross Domestic Product

A strong expansion in domestic demand continues to drive GDP growth, despite a slowdown in manufacturing. GDP growth and industrial production for 2007 were 8.1% and 6.3%, respectively, relative to 6.7% and 4.8% in 2006. GDP growth is currently derived from non-tradable sectors, but investment remains concentrated in tradables (oil and gas). Construction continued to be the fastest-growing sector of the economy, expanding by 22% in 2007. The main private sector services—wholesale and retail trade, banking and insurance, and transportation and communications—showed strong growth of about 10%. In contrast, public sector services lagged behind in 2007 with only 1.6%-2.4% growth in education and health care, although public administration increased to 7.5%. Recent productivity growth has still been strong in some parts of domestic manufacturing. Real disposable incomes grew by 10.4% in 2007 spurring considerable growth in private consumption.

Monetary Policy

Large balance of payments surpluses have complicated monetary policy for Russia. The Central Bank has followed a policy of managed appreciation to ease the impact on domestic producers and has sterilized capital inflows with its large budget surpluses. However, the Central Bank also has been buying back dollars, pumping additional ruble liquidity into the system. Given the rising demand for money, this has softened the inflationary impact, but these policy choices have complicated the government's efforts to lower inflation to the single digits. Consumer Price Index (CPI) inflation rose to 11.9% in 2007.

Government Spending/ Taxation

The Russian federal budget has run growing surpluses since 2001, as the government has taxed and saved much of the rapidly increasing oil revenues. In 2007 the federal budget surplus was 5.5% of GDP. Despite strong pressures to relax spending ahead of elections, the government has loosened its spending gradually, as the economy is running at near capacity and there are dangers of increasing inflation and rapid exchange rate appreciation. Spending increases to date have mostly been for increased salaries of government employees and pensions, but some money is also being dedicated to special investment funds and tax breaks to develop new industries in special economic zones. The government overhauled its tax system for both corporations and individuals in 2000-01, introducing a 13% flat tax for individuals and a unified tax for corporations, which improved overall collection. Business has put pressure on the government to reduce value added taxes (VAT) on oil and gas, but the government has postponed this discussion. Tax enforcement of disputes continues to be uneven and unpredictable.

Population

Russia's population was 142 million as of January 1, 2008. It declined at a lower rate in 2007 than in 2006 and previous years due to a significant (8%) increase in the birth rate and a 5% reduction in the death rate. The improvements may in part be attributed to the implementation of a National Priority Health Project and financial incentives to mothers having two or more children. Life expectancy remains low compared to developed countries but rose to 60.37 years for men and 73.23 for women in 2006. Cardiovascular diseases, cancer, traffic accidents and violence continue to be major causes of death among working age men. Many premature deaths are attributed to excessive alcohol consumption and smoking. To combat the looming demographic crisis, in October 2007 then-President Putin approved the concept of demographic policy for the years 2008-2025. The program aims to increase life expectancy, reduce mortality, increase the birth rate, improve the population's health, and develop a sound migration policy. The government instituted the National Priority Health Project and "mother's capital" in order to slow the population decline. These programs have had short-term success; Russia's population declined by 0.14% compared to 0.42% in 2006. It is unknown if such programs offer a long-term solution. In April 2008, the government approved joining the World Health Organization's Framework Convention on Tobacco Control, which is expected eventually to reduce extremely high smoking rates.

HIV/AIDS

At the end of 2007, there were 403,000 HIV cases officially registered in Russia, though many experts believe the actual number of cases may be two to three times higher (1 million to 1.3 million HIV cases). Prevalence of HIV cases was 270.1 per 100,000 people in 2007, higher than the 2006 indicator of 243 per 100,000. The chief form of transmission continued to be intravenous drug use, which accounted for 65% of new HIV cases in 2007. More than 44% of new HIV cases are identified in females, and transmission through heterosexual sex has grown rapidly. The number of secondary, AIDS-associated diseases has increased more

than twofold in 2007. As a result, the number of deaths from AIDS has grown by 10% compared to 2006. The Government of Russia implements HIV treatment and prevention programs through its National Priority Health Project, Federal Targeted Program, and Global Fund Grants. The government currently spends over $250 million per year on HIV/AIDS treatment programs and will spend over $42 million over the next five years to support HIV/AIDS vaccine research. At the September 2003 Camp David Summit, and again at the Bratislava meeting in February 2005, Presidents Bush and Putin pledged to deepen ongoing cooperation between the two countries to fight HIV/AIDS.

Commercial Law

Russia has a body of conflicting, overlapping and rapidly changing laws, decrees and regulations, which has resulted in an ad hoc and unpredictable approach to doing business. In this environment, negotiations and contracts from commercial transactions are complex and protracted. Uneven implementation of laws creates further complications. Regional and local courts are often subject to political pressure, and corruption is widespread. However, more and more small and medium businesses in recent years have reported fewer difficulties in this regard, especially in the Moscow region. In addition, Russian businesses are increasingly turning to the courts to resolve disputes. Russia's World Trade Organization (WTO) accession process is also helping to bring the country's legal and regulatory regime in line with internationally accepted practices.

Natural Resources

The mineral-packed Ural Mountains and the vast oil, gas, coal, and timber reserves of Siberia and the Russian Far East make Russia rich in natural resources. However, most such resources are located in remote and climatically unfavorable areas that are difficult to develop and far from Russian ports. Nevertheless, Russia is a leading producer and exporter of minerals, gold, and all major fuels. Natural resources, especially energy, dominate Russian exports. Ninety percent of Russian exports to the United States are minerals or other raw materials.

Industry

Russia is one of the most industrialized of the former Soviet republics. However, years of very low investment have left much of Russian industry antiquated and highly inefficient. Besides its resource-based industries, it has developed large manufacturing capacities, notably in metals, food products, and transport equipment. Russia is now the world's third-largest exporter of steel and primary aluminum.

Russia inherited most of the defense industrial base of the Soviet Union, so armaments remain an important export category for Russia. Efforts have been made with varying success over the past few years to convert defense industries to civilian use, and the Russian Government is engaged in an ongoing process to privatize many of the state-owned enterprises.

Agriculture

Russia has relatively little area for agriculture, but given its massive expanses, the country still accounts for about 9% of the world's arable land. Grain production for export is concentrated in the south of European Russia, with additional grain for domestic consumption grown throughout the rest of non-Arctic Russia west of the Urals as well as western Siberia.

Livestock production was in decline from 1990 to 2006, when new government support policies were instituted to stimulate cattle and hog raising. Poultry production has rebounded and is rising at 17% per year. Small plots averaging one acre in size, urban and suburban gardens, and gardening cooperatives produce over half of Russia's food output. Former state and collective farms have been largely privatized, but management quality is uneven and profitability is highly dependent on proximity to major urban markets. Foreigners are not allowed to own farmland, although long-term leases are permitted.

Investment/Banking

Russia attracted $52.5 billion in foreign direct investment (FDI) in 2007 (4.1% of GDP), up from $32.4 billion in FDI in 2006. Russia's annual FDI figures are now in line with those of China, India, and Brazil. However, Russia's per capita cumulative FDI still lags far behind such countries as Hungary, Poland, and the Czech Republic. The paradox is that Russia's challenging business climate, lack of transparency, and weak rule of law/corruption has taken a back seat to Russia's extraordinary macroeconomic fundamentals and the consumer and retail boom, which is providing double digit returns to investors and attracting new flows. Russian domestic investment is also returning home, as the foreign investment coming into Russia from havens like Cyprus and Gibraltar, is actually returning Russian capital. Retail loans amounted to $132.1 billion at the end of 2007, up from $78.4 billion at the end of 2006. Retail deposits increased to $209.3 billion from $144.1 billion from $95.7 billion over the same period. Also, currently deposits are fully insured up to $4,000 and an additional $12,000 is insured at 90%.

Although still small by international standards, the Russian banking sector is growing fast and is becoming a larger source of investment funds. To meet a growing demand for loans, which they were unable to cover with domestic deposits, Russian banks borrowed heavily abroad in 2007, accounting for 57% of the private-sector capital inflows in that year. Ruble lending has increased since the October 1998 financial crisis, and in 2007 loans were 66% of total bank assets, with consumer loans posting the fastest growth at 57% that same year. Fewer Russians prefer to keep their money outside the banking sector, the recent appreciation of the ruble against the dollar has persuaded many Russians to keep their money in rubles or other currencies such as

the euro, and retail deposits grew by 35% in 2007. Despite recent growth, the poorly developed banking system, along with contradictory regulations across banking, bond, and equity markets, still makes it difficult for entrepreneurs to raise capital as well as to permit capital transfer from a capital-rich sector such as energy to capital-poor sectors such as agriculture and manufacturing and to diversify risk.

Banks still perceive small and medium commercial lending as risky, and some banks are inexperienced with assessing credit risk, though the situation is improving. In 2004, Russia enacted a deposit insurance law to protect deposits up to 100,000 rubles (about $3,700) per depositor. Subsequent amendments to the law increased the Deposit Insurance Agency's coverage for deposits up to 400,000 rubles.

Trade

The U.S. exported $7.4 billion in goods to Russia in 2007, a 57% increase from the previous year. Corresponding U.S. imports from Russia were $19.4 billion, down a slight 2%. Russia is currently the 20th-largest export market for U.S. goods. Russian exports to the U.S. were fuel oil, inorganic chemicals, aluminum, and precious stones. U.S. exports to Russia were machinery, vehicles, meat (mostly poultry), aircraft, electrical equipment, and high-tech products.

Russia's overall trade surplus in 2007 was $132 billion, roughly equal to the $139 billion surplus in 2006. World prices continue to have a major effect on export performance, since commodities—particularly oil, natural gas, metals, and timber—comprise most of Russian exports. Russian GDP growth and the surplus/deficit in the Russian Federation state budget are closely linked to world oil prices.

Russia is in the process of negotiating terms of accession to the World Trade Organization (WTO). The U.S. and Russia concluded a bilateral WTO accession agreement in late 2006, and negotiations continued in 2007 on meeting WTO requirements for accession. Russia reports that it has yet to conclude bilateral agreements with Saudi Arabia and Georgia.

According to the 2005 U.S. Trade Representative's National Trade Estimate, Russia continues to maintain a number of barriers with respect to imports, including tariffs and tariff-rate quotas; discriminatory and prohibitive charges and fees; and discriminatory licensing, registration, and certification regimes. Discussions continue within the context of Russia's WTO accession to eliminate these measures or modify them to be consistent with internationally accepted trade policy practices. Nontariff barriers are frequently used to restrict foreign access to the market and are also a significant topic in Russia's WTO negotiations. In addition, large losses to U.S. audiovisual and other companies in Russia owing to poor enforcement of intellectual property rights in Russia are an ongoing irritant in U.S.-Russia trade relations. Russia continues to work to bring its technical regulations, including those related to product and food safety, into conformity with international standards.

DEFENSE

Russia's efforts to transform its Soviet-legacy military into a smaller, lighter and more mobile force continue to be hampered by an ossified military leadership, discipline problems and human rights violations, limited funding and demographics. Recent steps by the Government of Russia suggest a desire to reform. There has been an increased emphasis on practical training, and the government is introducing bills to improve the organization of the military.

Despite recent increases in the budget, however, defense spending is still unable to sustain Russia's oversized military. Current troop strength, estimated at 1.1 million, is large in comparison to Russia's GDP and military budget, which continues to make the process of transformation to a professional army difficult. This is the result of the Soviet legacy and military thinking that has changed little since the Cold War. Senior Russian leaders continue to emphasize a reliance on a large strategic nuclear force capable of deterring a massive nuclear attack.

Russian military salaries are low. Theoretically, the army provides all necessities, but housing and food shortages continue to plague the armed forces. Problems with both discipline and brutal hazing are common as well. Such conditions continue to encourage draft evasion and efforts to delay military service. Moreover, military officials complain that new recruit cohorts are plagued by increasing incidences of poor education, communicable diseases, and criminality. HIV infection rates in the Russian army are estimated to be between two and five times higher than in the general population, and tuberculosis is a persistent problem.

The Russian Government has stated a desire to convert to a professional army, but implementation has been progressing slowly. In an effort to make military service more attractive, the tour of duty for conscripts was reduced to one year (from 18 months) beginning in 2008, and the military is offering increased pay and benefits to raise the number of professional servicemen. Current plans envision a transition to a mixed force, in which professional soldiers fill approximately 70%, including in select units, and conscription fills 30%. There is also an effort to develop a non-commissioned officer (NCO) corps, but the military faces difficulties recruiting NCOs, and has done little to develop the mechanisms and capability to sustain such a force.

FOREIGN RELATIONS

In the years after the dissolution of the Soviet Union, Russia took important steps to become a full partner in the world's principal political groupings. On December 27, 1991, Russia assumed the permanent UN Security Council seat formerly held by the

Soviet Union. Russia also is a member of the Organization for Security and Cooperation in Europe (OSCE) and the Euro-Atlantic Partnership Council (EAPC). Russia and the European Union (EU) signed a Partnership and Cooperation Agreement. It signed the North Atlantic Treaty Organization (NATO) Partnership for Peace initiative in 1994. The NATO-Russia Founding Act established the Permanent Joint Council (PJC) in 1997, with the NATO-Russia Council superseding the PJC in 2002. Russia, despite misgivings, did not actively oppose enlargement of NATO by members of the former Warsaw Pact and the Baltic states, which had been forcibly integrated into the Soviet Union. However, Russia has recently stressed its strong opposition to the membership aspirations of Ukraine and Georgia.

Over the past several years Russia has increased its international profile, played an increasing role in regional issues, and been more assertive in dealing with its neighbors. The rise in energy prices has given it leverage over countries which are dependent on Russian sources. Russia continues to support separatist regimes in Georgia and Moldova.

U.S.-RUSSIA RELATIONS

The United States and Russia share common interests on a broad range of issues, including counterterrorism and the drastic reduction of our strategic arsenals. Russia shares our basic goal of stemming the proliferation of weapons of mass destruction and the means to deliver them. The Cooperative Threat Reduction (CTR) program, launched in 1992 to facilitate dismantlement of weapons of mass destruction in the former Soviet Union, was renewed in 2006 until 2013. At the 2006 G8 Summit in St. Petersburg, the U.S. and Russia announced the Global Initiative to Combat Nuclear Terrorism to keep terrorists from acquiring nuclear materials. We are working with Russia to bring Iran's nuclear programs into compliance with International Atomic Energy Agency (IAEA) rules and United Nations Security Council Resolutions 1737, 1747, and 1803. On North Korea, Russia is a participant in the Six-Party Talks aimed at the verifiable denuclearization of the Korean Peninsula. Russia also takes part in the Middle East Peace Process "Quartet" (along with the UN and the EU). Russia now interacts with NATO members as an equal through the NATO-Russia Council but without veto power over NATO decisions. During the past several years, Russia has intensified its efforts to combat trafficking in persons. We are cooperating in the fight against HIV/AIDS.

U.S. Assistance to Russia

For more detailed information on U.S. Government assistance to Russia, please see the annual reports to Congress on U.S. Government Assistance to and Cooperative Activities with Eurasia, which are available in the Bureau of European and Eurasian Affairs section on the State Department's website. A 2008 fact sheet on U.S. assistance to Russia can be found at http://www.state.gov/p/eur/rls/fs/103515.htm.

TRAVEL

Consular Information Sheet

June 20, 2008

Country Description: Russia is a vast and diverse nation that continues to evolve politically, economically, and socially. Travel and living conditions in Russia contrast sharply with those in the United States. Major urban centers show tremendous differences in economic development compared to rural areas. While good tourist facilities exist in Moscow, St. Petersburg, and some other large cities, they are not developed in most of Russia, and some of the goods and services taken for granted in other countries are not yet available. Travel to the Caucasus region of Russia is dangerous. The Department of State recommends Americans not travel to Chechnya and adjoining areas, and recommends that Americans who are in these regions depart immediately.

Entry Requirements: The Russian government maintains a restrictive and complicated visa regime for foreigners who visit, transit, or reside in the Russian Federation. A U.S. citizen who does not comply with Russian visa laws can be subject to arrest, fines, and/or deportation. Russian authorities will not allow a U.S. citizen traveler with an expired visa to depart the country, effectively stranding the person for up to 20 days, until local authorities grant an exit visa.

The Government of Russia does not recognize the standing of the U.S. diplomatic mission to intervene in visa matters, including situations in which an American is stranded because of an expired visa. U.S. citizens should also be aware that Russian immigration and visa laws change regularly, and the implementation of new regulations has not always been transparent or predictable.

Dual citizens who also carry Russian passports face additional complicated regulations. Dual citizen minors who travel on their Russian passports also face special problems. International cruise ship passengers do not need visas if they remain with authorized tour groups at all times while ashore.

Sponsorship: Under Russian law, every foreign traveler must have a Russian-based sponsor, which could be a hotel, tour company, relative, employer, university, etc. Even if a visa was obtained through a travel agency in the United States, there is always a Russian legal entity whose name is indicated on the visa and who is considered to be the legal sponsor. Russian law requires that the sponsor must apply on the traveler's behalf for replacement, extension, or changes to a Russian visa. U.S. citizens are strongly advised to ensure that they have contact information for the visa sponsor prior to arrival in Russia, as the sponsor's assistance will be essential to resolve any visa problems.

Entry Visas: To enter Russia for any purpose, a U.S. citizen must possess a valid U.S. passport and a bona fide visa issued by a Russian Embassy or Consulate. It is impossible to obtain an entry visa upon arrival, so travelers must apply for their visas well in advance. U.S. citizens who apply for Russian visas in third countries where they do not have permission to stay more than 90 days may face considerable delays in visa processing. Travelers who arrive in Russia without an entry visa will not be permitted to enter the country, and face immediate return to the point of embarkation at their own expense.

A Russian entry/exit visa has two dates written in the European style (day/month/year) as opposed to the American style (month/day/year). The first date indicates the earliest day a traveler may enter Russia; the second date indicates the date by which a traveler must leave Russia. A Russian visa is only valid for those exact dates and cannot be extended after the traveler has arrived in the country, except in the case of a medical emergency.

Russian tourist visas are often granted only for the specific dates mentioned in the invitation letter provided by the sponsor. U.S. citizens sometimes receive visas valid for periods as short as four days. Even if the visa is misdated through error of a Russian Embassy or Consulate, the traveler will still not be allowed into Russia before the visa start date or be allowed to leave after the visa expiration date. Any mistakes in visa dates must be corrected before the traveler enters Russia. It is helpful to have someone who reads Russian check the visa before departing the United States. Travelers should ensure that their visas reflect intended activities in Russia (e.g., tourism, study, business, etc.).

U.S. citizens who are denied visas may seek a clarification from the Ministry of Foreign Affairs, 32/34 Smolenskaya-Sennaya Pl., Moscow, Russia, 119200, e-mail ministry@mid.ru. The U.S. Embassy and the Consulates General, however, cannot advocate on behalf of private U.S. citizens who have been refused visas or denied entry into Russia.

Limitations on Length of Stay: In October 2007, the Russian government made significant changes to its rules regarding the length of stay permitted to most foreign visitors. For any visa issued on or after October 18, 2007, unless that visa specifically authorizes employment or

study, a foreigner may stay in Russia only 90 days in any 180-day period. This applies to business, tourist, humanitarian and cultural visas, among other categories.

Exit Visa: A valid visa is necessary to depart Russia. Travelers who overstay their visa's validity, even for one day, will be prevented from leaving until their sponsor intervenes and requests a visa extension on their behalf. Russian authorities may take up to 20 calendar days to authorize an exit visa, during which time the traveler will be stranded in Russia at his or her own expense. The ability of the Embassy or Consulates General to intervene in these situations is extremely limited.

Travelers with expired visas should also be aware that they may have difficulty checking into a hotel, hostel, or other lodging establishment. There are no adequate public shelters or safe havens in Russia and neither the U.S. Embassy nor the Consulates General have means to accommodate such stranded travelers.

Visitors who lose their U.S. passports and Russian visas to accident or theft must immediately replace their passports at the U.S. Embassy or one of the Consulates General. The traveler must then enlist the visa sponsor to obtain a new visa in order to depart the country. As noted above, the U.S. Embassy and Consulates General are not able to intercede in cases in which visas must be replaced. It is helpful to make a photocopy of your visa in the event of loss, but a copy is not sufficient to permit departure.

Travelers who are departing Russia by train should be aware that if they board a train on the last day of a visa's validity, Russian immigration officials may consider the visa to have expired if the train crosses the international border after midnight on the day of expiry. The Embassy and Consulates General are aware of cases in which travelers have been detained at border crossings, unable to leave Russia, because their visas were expired by a matter of hours or minutes.

Visas for students and English teachers sometimes allow only one entry. In these cases, the sponsoring school is responsible for registering the visa and migration card and obtaining an exit visa. Obtaining an exit visa can take up to twenty days so students and teachers need to plan accordingly. Please see the section below regarding Teaching in Russia.

Migration Card: All foreigners entering Russia must fill out a two-part migration card upon arrival. The traveler deposits one part of the card with immigration authorities at the port of entry, and keeps the other part for the duration of his or her stay. Upon departure, the traveler must submit his or her card to immigration authorities. Foreign visitors to Russia are normally required to present their migration cards in order to register at hotels.

Migration cards, in theory, are available at all ports of entry from Russian immigration officials (Border Guards). The cards are generally distributed to passengers on incoming flights and left in literature racks at arrival points. Officials at borders and airports usually do not point out these cards to travelers; it is up to the individual travelers to find them and fill them out.

Replacing a lost or stolen migration card is extremely difficult. While authorities will not prevent foreigners from leaving the country if they cannot present their migration cards, travelers could experience problems when trying to re-enter Russia at a future date.

Although Russia and Belarus use the same migration card, travelers should be aware that each country maintains its own visa regime. U.S. citizens wishing to travel to both nations must apply for two separate visas. A traveler entering Russia directly from Belarus is not required to obtain a new migration card, but at his or her option may do so if blank ones are available at the time of entry.

Visa Registration: Travelers who spend more than three days in Russia must register their visa and migration card through their sponsor. Travelers staying in a hotel must register their visa and migration card with their hotel within one day. Even travelers who spend less than three days in one place are encouraged to register their visas. If a traveler chooses not to register a stay of less than three days, he or she is advised to keep copies of tickets, hotel bills, or itineraries in order to prove compliance with the law.

U.S. citizens should be aware that Russian police officers have the authority to stop people and request their identity and travel documents at any time, and without cause. Due to the possibility of random document checks by police, travelers should carry their original passports, migration cards, and visas with them at all times.

Transit Visas: Travelers intending to transit through Russia en route to a third country must have a Russian transit visa. Even travelers who are simply changing planes in Moscow or another international airport in Russia for an onward destination will be asked to present a transit visa issued by a Russian Embassy or Consulate. Russian authorities may refuse to allow a U.S. citizen who does not have a transit visa to continue with his or her travel, obliging the person to immediately return to the point of embarkation at the traveler's own expense.

Restricted Areas: U.S. citizens should be aware that there are several closed cities and regions in Russia. Travelers who attempt to enter these areas without prior authorization are subject to arrest, fines, and/or deportation. A traveler must list on the visa application all areas to be visited and subsequently register with authorities upon arrival at each destination. Travelers should check with their sponsor, hotel, or the nearest office of the Russian Federal Migration Service before traveling to unfamiliar cities and towns.

American Citizens Also Holding Russian Passports: Dual U.S./Russian nationals who enter Russia on

Russian passports face several possible difficulties. Russian authorities will not permit departure from Russia if the person's Russian passport has expired or has been lost, whether or not the traveler also has a valid U.S. passport. In these cases the traveler will be required to obtain a new Russian passport, a process that can take several months. In order to apply for a Russian visa in a U.S. passport, however, Russian consular officials normally require a person to renounce his or her Russian citizenship.

Russian external passports extended by Russian Consulates or Embassies overseas are not considered valid for departure from Russia no matter how long the extension. Bearers of such passports will have to apply for a new passport inside the country. Males of conscript age (18 - 27 years old) who are deemed to be Russian citizens may experience problems if they have not satisfied their military service requirement.

Minors: American citizen minors who also have Russian citizenship and who are traveling on their Russian passports must have a power-of-attorney, written in Russian, allowing them to travel if they are traveling alone or in the company of adults who are not their parents. Such minors will be prevented from entering or leaving Russia if they cannot present such a power-of-attorney.

In an effort to prevent international child abduction, many governments have initiated special procedures at entry/exit points. These often include requiring documentary evidence of relationship and permission for the child's travel from the parent(s) or legal guardian if not present. Having such documentation on hand, even if not legally required, may facilitate entry/departure. For further information, please see the Department of State's webpage regarding the prevention of international child abduction.

International Cruise Ship Passengers: International cruise ship passengers are permitted to visit Russian ports without a visa for a period of up to 72 hours. Passengers who wish to go ashore during port calls may do so without visas provided that they are with an organized tour at all times, accompanied by a tour operator who has been duly licensed by Russian authorities. These special entry/exit requirements do not apply to river boat cruise passengers and travelers coming to Russia on package tours. These travelers will need to apply for visas prior to entry, and should follow the general guidelines for entry/exit requirements.

For additional information concerning travel to Russia, U.S. citizens may contact the Embassy of the Russian Federation, Consular Section, 2641 Tunlaw Rd. NW, Washington, DC 20007, tel. 202-939-8907, http://www.russianembassy.org. In addition, there are Russian Consulates in:

Houston: 1333 West Loop South, Ste.1300, Houston, TX 77027, tel. 713-337-3300;

New York: 9 East 91 St., New York, NY 10128, tel. 212-348-0926;

San Francisco: 2790 Green St., San Francisco, CA 94123, tel. 415-928-6878 or 415-202-9800; and

Seattle: 2323 Westin Building, 2001 6th Ave., Seattle, WA 98121, tel. 206-728-1910.

Safety and Security: Due to continued civil and political unrest throughout much of the Caucasus region, the Department of State continues to warn U.S. citizens against travel to Chechnya and all areas that border it: North Ossetia, Ingushetia, Dagestan, Stavropol, Karachayevo-Cherkessiya, and Kabardino-Balkariya. The U.S. Government's ability to assist Americans who travel to the northern Caucasus is extremely limited. Throughout the region, local criminal gangs have kidnapped foreigners, including Americans, for ransom. U.S. citizens have disappeared in Chechnya and remain missing. Close contacts with the local population do not guarantee safety. There have been several kidnappings of foreigners and Russians working for media and non-governmental organizations in the region. Due to the ongoing security concerns, U.S. Government travel to the area is very limited. American citizens residing in these areas should depart immediately as the safety of Americans and other foreigners cannot be effectively guaranteed.

Acts of terrorism, including bombings and hostage taking, have occurred in Russia over the last several years. Bombings have occurred at Russian government buildings, hotels, tourist sites, markets, entertainment venues, schools, residential complexes, and on public transportation including subways, buses, trains, and scheduled commercial flights. Hostage-taking incidents have included a raid on a school that resulted in horrific losses of life of children, teachers, and parents.

There is no current indication that American institutions or citizens are targets, but there is a general risk of American citizens being victims of indiscriminate terrorist attacks. American citizens in Russia should be aware of their personal surroundings and follow good security practices. Americans are urged to remain vigilant and exercise good judgment and discretion when using any form of public transportation. When traveling, Americans may wish to provide a friend, family member, or coworker a copy of their itinerary. Americans should avoid large crowds and public gatherings that lack enhanced security measures. Travelers should also exercise a high degree of caution and remain alert when patronizing restaurants, casinos, nightclubs, bars, theaters, etc., especially during peak hours of business.

American citizens living in Russia or traveling there for even a few days are strongly urged to register with the U.S. Embassy or nearest Consulate General. Registration will allow the embassy to provide direct information on the security situation as necessary. Registration can be done on-line and can be done in advance of travel.

For the latest security information, Americans traveling abroad should regularly monitor the Department's web site, where the current Worldwide Caution Travel Alert, Travel Warnings and other Travel Alerts can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S. and Canada, or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: The U.S. Embassy and Consulates General continue to receive reports of unprovoked, violent harassment against racial and ethnic minorities, including well-publicized cases in which members of minorities have been beaten and in several instances, murdered. Travelers are urged to exercise caution in areas frequented by "skinhead" groups and wherever large crowds have gathered. Americans most at risk are those of African, South Asian, or East Asian descent, or those who, because of their complexion, are perceived to be from the Caucasus region or the Middle East. These Americans are also at risk for harassment by police authorities.

Visitors to Russia need to be alert to their surroundings. In large cities, they need to take the same precautions against assault, robbery, or pickpockets that they would take in any large U.S. city:

- keep billfolds in inner front pockets,
- carry purses tucked securely under arms,
- wear the shoulder strap of cameras or bags across the chest,
- walk away from the curb and carry purses away from the street.

The most vulnerable areas include underground walkways and the subway, overnight trains, train stations, airports, markets, tourist attractions, and restaurants.

Groups of children and adolescents have been aggressive in some cities, swarming victims, or assaulting and knocking them down. They frequently target persons who are perceived as vulnerable, especially elderly tourists or persons traveling alone. Some victims report that the attackers use knives. Persons carrying valuables in backpacks, in back pockets of pants and in coat pockets are especially vulnerable to pickpockets.

Foreigners who have been drinking alcohol are especially vulnerable to assault and robbery in or around nightclubs or bars, or on their way home. Some travelers have been drugged at bars, while others have taken strangers back to their lodgings, where they were drugged, robbed and/or assaulted.

In many cases involving stolen credit cards, thieves use them immediately. Victims of credit card or ATM card theft should report the theft to the credit card company or bank without delay.

Travelers are advised to be vigilant in bus and train stations and on public transport. Always watch for pickpockets in these areas. Bogus trolley inspectors, who aim to extort a bribe from individuals while checking for trolley tickets are also a threat. Travelers have generally found it safer to travel in groups organized by reputable tour agencies. Robberies may occur in taxis shared with strangers. Travelers should be aware that there are few registered taxi services in Russia and should be aware of the safety risks inherent in flagging down informal or "gypsy" cabs.

A common street scam in Russia is the "turkey drop" in which an individual "accidentally" drops the money on the ground in front of an intended victim, while a confederate either waits for the money to be picked up, or picks up the money himself and offers to split it with the pedestrian. The individual who dropped the currency returns, aggressively accusing both of stealing the money. This confrontation generally results in the pedestrian's money being stolen. Avoidance is the best defense. Do not get trapped into picking up the money, and walk quickly away from the scene. To avoid highway crime, travelers should try not to drive at night, especially when alone, or sleep in vehicles along the road. Travelers should not, under any circumstances, pick up hitchhikers: they not only pose a threat to physical safety, but also put the driver in danger of being arrested for unwittingly transporting narcotics.

Extortion and corruption are common in the business environment. Threats of violence and acts of violence are commonly resorted to in business disputes. Organized criminal groups and sometimes local police target foreign businesses in many cities and have been known to demand protection money. Many Western firms hire security services that have improved their overall security, although this is no guarantee. Small businesses are particularly vulnerable. U.S. citizens are encouraged to report all extortion attempts to the Russian authorities and to inform consular officials at the U.S. Embassy or nearest Consulate General.

Travelers should be aware that certain activities that would be normal business activities in the United States and other countries are either illegal under the Russian legal code or are considered suspect by the FSB (Federal Security Service). U.S. citizens should be particularly aware of potential risks involved in any commercial activity with the Russian military-industrial complex, including research institutes, design bureaus, production facilities or other high technology, government-related institutions. Any misunderstanding or dispute in such transactions can attract the involvement of the security services and lead to investigation or prosecution for espionage. Rules governing the treatment of information remain poorly defined.

It is not uncommon for foreigners in general to become victims of harassment, mistreatment and extortion by law enforcement and other officials. Police do not need to show probable cause in order to stop, question or detain individuals. If stopped, travelers should try to obtain, if safe to do

so, the officer's name, badge number, and patrol car number, and note where the stop happened, as this information assists local officials in identifying the perpetrators. Authorities are concerned about these incidents and have cooperated in investigating such cases. Travelers should report crimes to the U.S. Embassy or the nearest Consulate General.

Internet Dating Schemes: The U.S. Embassy receives reports almost every day of fraud committed against U.S. citizens by Internet correspondents professing love and romantic interest. Typically, the correspondent asks the U.S. citizen to send money or credit card information for living expenses, travel expenses, or "visa costs." The anonymity of the Internet means that the U.S. citizen cannot be sure of the real name, age, marital status, nationality, or gender of the correspondent. The U.S. Embassy has received many reports of citizens losing thousands of dollars through such scams. American citizens are advised never to send money to anyone they have not met in person.

In many countries around the world including Russia, counterfeit and pirated goods are widely available. In Russia, CD and DVD piracy is an especially serious problem. Transactions involving such products are illegal under Russian law, and the Russian government has markedly increased its enforcement activities against intellectual property rights infringements. In addition, bringing counterfeit and pirated products back to the United States may result in forfeitures and/or fines.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

Medical Facilities and Health Information: Medical care in most localities is below Western standards; shortages of medical supplies, differing practice standards and the lack of comprehensive primary care all combine to make the medical system difficult to negotiate as well as suspect. The few facilities in Moscow and St. Petersburg that approach acceptable standards do not necessarily accept all cases (i.e., they may not be licensed to treat trauma, infectious disease or maternity cases). Access to these facilities usually requires cash or credit card payment at Western rates at the time of service.

Elderly travelers and those with existing health problems may be at particular risk. Elective surgeries requiring blood transfusions and non-essential blood transfusions are not recommended, due to uncertainties surrounding the local blood supply. Most hospitals and clinics in major urban areas have adopted the use of disposable IV supplies, syringes and needles as standard practice; however, travelers to remote areas might consider bringing a supply of sterile, disposable syringes and corresponding IV supplies for eventualities. Travelers should refrain from visiting tattoo parlors or piercing services due to the risk of infection.

Outbreaks of diphtheria and Hepatitis A have been reported throughout the country, even in large cities such as Moscow and St. Petersburg. The U.S. Centers for Disease Control and Prevention recommend up-to-date tetanus and diphtheria immunizations before traveling to Russia and neighboring countries. Typhoid can be a concern for those who plan to travel extensively in the region. Rarely, cases of cholera have also been reported throughout the area. Drinking bottled water can reduce the risk of exposure to infectious and noxious agents. Tap water in Russia, outside of Moscow, is generally considered unsafe to drink. Travelers are strongly urged to use bottled water for drinking and food preparation. Tuberculosis is an increasingly serious health concern in Russia. For further information, please consult the CDC's Travel Notice on TB at http://wwwn.cdc.gov/travel.

Rates of HIV infection have risen markedly in recent years. While most prevalent among intravenous drug users, prostitutes, and their clients, the HIV/AIDS rate in the general population is increasing. Reported cases of syphilis are much higher than in the United States, and some sources suggest that gonorrhea and chlamydia are also more prevalent than in Western Europe or the United States. Travelers should be aware of the related health and legal risks.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's website at http://wwwn.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith/en.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation. Medicare does not provide benefits for medical care overseas. Travelers should consider obtaining traveler's insurance prior to going abroad.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Russia is provided for general reference only,

and may not be totally accurate in a particular location or circumstance. In some areas of Russia roads are practically non-existent. Persons planning to drive in Russia should adhere to all local driving regulations; these are strictly enforced and violators are subject to severe legal penalties. Drivers should be aware that Russia practices a zero tolerance policy with regard to alcohol consumption prior to driving. The maximum punishment is a two-year suspension of a driver's license. An intoxicated driver may also be detained until they are deemed to be sober.

Avoid excessive speed and, if at all possible, do not drive at night, particularly outside of major cities. In rural areas, it is not uncommon to find livestock crossing roadways at any given time. Construction sites or stranded vehicles are often unmarked by flares or other warning signals. Sometimes cars have only one headlight with many cars lacking brake lights. Bicycles seldom have lights or reflectors. Due to these road conditions, be prepared for sudden stops at any time. Learn about your route from an auto club, guidebook or government tourist office. Some routes have heavy truck and bus traffic, while others have poor or nonexistent shoulders; many are one-way or do not permit left-hand turns. Also, some of the newer roads have very few restaurants, motels, gas stations or auto repair shops along their routes. For your safety, have your vehicle serviced and in optimum condition before you travel. It is wise to bring an extra fan belt, fuses and other spare parts.

A valid U.S. driver's license with a notarized Russian translation or a valid Russian license is necessary to drive a vehicle in Russia. Tourists may use international driver's licenses issued by the American Automobile Association to drive in Russia. Foreigners in Russia on a business visa or with a permanent residence status in Russia are required by law to have a Russian driver's license. In order to obtain this license one has to take the appropriate exams in Russian. An American driver's license cannot be exchanged for a Russian license. Travelers without a valid license are often subject to prolonged stops by police and fines.

Drivers must carry third party liability insurance under a policy valid in Russia. U.S. automobile liability insurance is not valid in Russia nor are most collision and comprehensive coverage policies issued by U.S. companies. A good rule of thumb is to buy coverage equivalent to that which you carry in the United States.

Roadside checkpoints are commonplace. These checkpoints are ostensibly in place to detect narcotics, alien smuggling, and firearms violations. However, they are generally viewed as a means for traffic police to extract cash "fines."

For specific information concerning Russian driving permits, vehicle inspection, road tax and mandatory insurance, please refer to the Russia national tourist organization at www.russia-travel.com.

Aviation Safety Oversight: The U.S. Federal Aviation Administration (FAA) has assessed the Government of Russia's Civil Aviation Authority as being in compliance with International Civil Aviation Organization (ICAO) aviation safety standards for oversight of Russia's air carrier operations. For more information travelers may visit the FAA's web site at http://www.faa.gov.

Travelers should be aware that local air carriers in remote regions may not meet internationally accepted customer service standards. Some local airlines do not have advance reservation systems but sell tickets for cash at the airport. Flights often are canceled if more than 30% of the seats remain unsold. Travelers should have their passports with them at all times.

Teaching In Russia: Many Americans come to Russia to teach English, and some have complained about schools' failure to facilitate proper visas and pay agreed salaries. Prospective teachers should ensure that schools are prepared to comply with Russian laws governing the employment and documentation of foreigners, including proper visa support, registration and legal salary payments.

Prospective teachers should ask for references from other foreigners who have taught at the school being considered and should consider insisting upon written contracts stipulating the provisions of their employment, just as they would in the United States. Warning signs include instructions to arrive in Russia on a tourist visa and "change status" later, payment under the table (in cash with no documentation or tax withholding), and requirements that the school retain a passport for the length of the employment. (Upon arrival, a legal employee must surrender his or her passport for registration by the employer but this process should take less then three weeks.)

Currency: The Russian ruble is the only legal tender currency. It is illegal to pay for goods and services in U.S. dollars except at authorized retail establishments. Worn U.S. bills or bills marked in any way are often not accepted at banks and exchange offices.

Travelers need no longer bring large amounts of hard currency unless they expect to travel in rural areas. ATMs are plentiful in major cities. Travelers should follow all normal precautions about using ATMs. In particular, they should avoid "stand-alone" machines and opt for machines at banks or higher-class hotels and stores. Credit card acceptance, while not universal, is rapidly spreading in Moscow and to a lesser extent in other large cities. Travelers should check in advance whether a specific store, restaurant, or hotel accepts credit cards. Outside of major cities, commercial enterprises still operate largely on a cash basis and travelers should plan accordingly.

Customs Regulations: There have been increasing reports of rigorous searches of baggage and stricter enforcement of customs regulations against the exportation of items of

"cultural value." Visitors to Russia have been arrested for attempting to leave the country with antique items which they believed were legally purchased from licensed vendors. Travelers should obtain receipts for all high-value items (including caviar) purchased in Russia. Any article that could appear old or as having cultural value to the Customs Service, including artwork, icons, samovars, rugs, military medals and antiques, must have a certificate indicating that it has no historical or cultural value. Certificates will not be granted for the export of articles that are more than 100 years old, irrespective of the value. These certificates may be obtained from the Russian Ministry of Culture. For further information, Russian speakers may call the Airport Sheremetyevo-2 Customs Information Service in Moscow at (7) (495) 578-2125/578-2120. In St. Petersburg, the Ministry of Culture may be reached at 311-3496.

Russia also has very strict rules on the importation of large quantities of medication: certain prescription and over-the-counter drugs common in the United States are prohibited in Russia, and large quantities of any medicine will receive scrutiny. It is advisable to contact a Russian Embassy or Consulate for specific information regarding this or other customs regulations.

The importation and use of Global Positioning Systems (GPSs) and other radio electronic devices are sometimes subject to special rules and regulations in Russia. The Russian Customs Service has most recently stated that terminal GPSs can be imported upon their simple declaration on arrival. A special customs permit should be obtained in the case of importation of a GPS to be used as a peripheral device to a separate computer and/or antenna to increase its capability.

In general, mapping and natural resource data collection activities associated with normal commercial and scientific collaboration may result in seizure of the associated equipment and/or arrest. The penalty for using a GPS device in a manner which is determined to compromise Russian national security can be a prison term of ten to twenty years.

Visitors may bring regular cellular telephones to Russia without restriction. Satellite telephones require advance approval from the Russian authorities. The State Customs Committee has stated that there are no restrictions on bringing laptop computers into the country for personal use. The software, however, can be inspected upon departure. Hardware and software found to contain sensitive or encrypted data may be subject to confiscation.

Travelers should address specific questions to the Federal Customs Service of the Russian Federation, e-mail: webmaster@mail.customs.ru, web site: http://www.customs.ru/en.

Great care should be taken to safeguard against the loss of airline tickets for Russian carriers. Generally, a central office must authorize the replacement of lost airline tickets, which can take 24 hours or more. In some cases, Americans who have lost their tickets just prior to their flights on local airlines have been forced to buy new full-fare tickets or miss the flight because replacement tickets were not authorized in time.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating Russian laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Russia are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in Russia are encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration web site so that they can obtain updated information on travel and security within Russia. Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency.

The U.S. Embassy's consular section is located at Novinskiy Bulvar 21, Moscow, metro station Barrikadnaya. The Embassy's switchboard is tel. (7) (495) 728-5000, and the American Citizen Services Unit at tel. (7) (495) 728-5577. In the event of an after-hours emergency, please contact the main switchboard. The American Citizens Services Unit may also be contacted by fax at (7) (495) 728-5084, by e-mail at moscowwarden@state.govand through the Embassy web site at http://moscow.usembassy.gov.

U.S. Consulates General are located in:

St. Petersburg

Intercountry Adoption

November 2008

The information in this section has been edited from a report available through the U.S. Department of State Office of Children's Issues. For more information detailed, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Russia is not party to The Hague Convention on Protection of Children and Co-operation in Respect of Intercountry Adoption (Hague Adoption Convention).

Who Can Adopt? To bring an adopted child to United States from Russia, you must be found eligible to adopt by the United States Government. For detailed information on USCIS requirements for adoption, please review the Intercountry Adoption section of this publication and visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

In addition to the United States requirements for adoptive parents, Russia also has the following requirements for adoptive parents.

Residency Requirements: There are no residency requirements for intercountry adoptions from Russia. Prospective adoptive parents will have to come to Russia twice during the adoption process.

Age Requirements: For single persons who wish to adopt, there must be a 16 year age difference between the prospective parent and the prospective child. There are no age requirements for married couples.

Marriage Requirements: Both married couples and single persons may adopt. Single persons must be at least 16 years older than the adoptive child.

Other Requirements: Russia has some medical requirements for prospective adoptive parents. Prospective adoptive parents should consult their adoption agencies concerning medical conditions. Some disqualifying conditions include tuberculosis (active and chronic), illness of the internal organs and nervous system, dysfunction of the limbs, infectious diseases, drug and alcohol addictions, psychiatric disorders, and any disability preventing the person from working.

Who Can Be Adopted? Russia has specific requirements that a child must meet in order to be eligible for adoption. In addition to these requirements, a child must meet the definition of an orphan under United States law for you to bring him or her home back to the United States.

Waiting Period: The Russian Government maintains a database of children without parental care. Under Russian law, a child must be registered first on the local databank for one month, the regional databank for one month, and the federal databank for six months before the child can be released for intercountry adoption. Therefore, the total amount of time before a child is released for intercountry adoption is usually eight months.

Russia's Adoption Authority: Ministry of Education and Science of the Russian Federation

The Process: The first step in adopting a child from Russia is usually to select an agency or attorney in the United States that can help with your adoption. Adoption service providers must be licensed by the United States state in which they operate.

Adoptive parents who work through an adoption agency must use an agency that the Russian Government has accredited to provide adoption services. For additional information on which United States agencies have Russian accreditation, please visit the United States Embassy in Moscow website. The United States Embassy discourages intercountry adoptions conducted independently without the assistance of an accredited agency.

To bring an adopted child from Russia to the United States, you must apply to be found eligible to adopt (FORM I-600A) by the United States Government, Department of Homeland Security, United States Citizenship and Immigration Services (USCIS).

If you are eligible to adopt, and a child is available for intercountry adoption, the central adoption authority in Russia will provide you with a referral to a child.

Role of the Adoption Authority: The Ministry of Education reviews the request to adopt in that region. Upon approval, the parents are directed to an orphanage. The Ministry also assists the Adoption Agency with pre-selecting the child.

Role of the Court: The prospective adoptive parents apply for a court date after they have traveled to Russia to meet and select a child. It may take four to six weeks to receive a court date. Prospective adoptive parents are advised to return to the United States so there are no problems with the validity of their visa.

For the court date, parents must produce three additional documents which must be signed in front of a Russian notary. The documents verify that they have been informed of the child's medical conditions and they accept them, they will register their adopted child with the Ministry of Foreign Affairs (MFA), and they will provide post-placement reports.

Role of Adoption Agencies: Prospective adoptive parents must work through an agency that the Russian Government has accredited to provide adoption services.

Adoption Application: Once the prospective adoptive parents identify

the adoptive child, they fill out the adoption application. The application is obtained from the Russian court where the adoption hearings will take place.

Time Frame: The average time for the adoption process is six to twelve months from the time the I-600A petition is approved to the date of the immigrant visa interview.

Adoption Fees: The average total cost for intercountry adoptions from Russia are approximately $20,000 to $30,000 USD. This includes travel, lodging, and fees.

Documents Required: The following documents are needed to register an adopted child with the MFA:

- Parent's passports (photocopies are not acceptable)
- Letter from the orphanage (orphanage release)
- Letter from the Ministry of Education of Russia
- Court decision
- Adoption certificate
- Application for Registration and two photos of the child

The Consular Section of the MFA is open for intake Monday—Friday from 9:30 a.m.–12:00 p.m. They are open Monday—Thursday from 3:00 p.m.–5:00 p.m., and Friday from 2:00 p.m.–4:00 p.m., for issuance of completed registration and documents.

The process takes two days since documents are issued the day after they are received.

For updates on document requirements and information on how to authenticate documents, visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

Bringing Your Child Home: Once your adoption is complete (or you have obtained legal custody of the child), there are a few more steps to take before you can head home. Specifically, you need to apply for several documents for your child before he or she can travel to the United States, such as a birth certificate, a passport or travel document for your child from the country in which he or she was born, and a U.S. Immigration Visa.

For detailed and updated information on how to obtain these documents, review the *Intercountry Adoption* section on this publication and visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

Child Citizenship Act: For adoptions finalized abroad: The Child Citizenship Act of 2000 allows your new child to acquire American citizenship automatically when he or she enters the United States as lawful permanent residents. For adoptions finalized in the United States: The Child Citizenship Act of 2000 allows your new child to acquire American citizenship automatically when the court in the United States issues the final adoption decree. To learn more, review the *Intercountry Adoption* section on this publication and visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

After Adoption: Adopted Russian children must be registered with the Government of Russia either by registering with the Ministry of Foreign Affairs (MFA) before they leave the country or by working with their adoption agency to register their adopted children with the G.O.R. when they return to the United States If registering prior to departing Russia. United States citizen families should do this after an adopted child has received an immigrant visa to the United States.

Russia requires periodic post-adoption placement reports on the welfare of the adopted orphan in his or her American family. The initial post-placement report is due six months after the court decision went into effect. The second report is due six months after the first report but no later than 12 months after the court decision. The third report is due at 24 months and the fourth at 36 months.

RWANDA

Compiled from the June 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Republic of Rwanda

PROFILE

Geography

Area: 26,338 sq. km. (10,169 sq. km.); about the size of Maryland.
Cities: Capital—Kigali (est. pop. 800,000). Other cities—Gitarama, Butare, Ruhengeri, Gisenyi.
Terrain: Uplands and hills.
Climate: Mild and temperate, with two rainy seasons.

People

Nationality: Noun and adjective—Rwandan(s).
Population: (July 2008 est.) approximately 10,180,000.

Annual growth rate: (2008 est.) 2.8%.
Ethnic groups: Hutu 85%, Tutsi 14%, Twa 1%.
Religions: Christian 93.5%, traditional African 0.1%, Muslim 4.6%, 1.7% claim no religious beliefs.
Languages: French, English, Kinyarwanda.
Education: Years compulsory—6. Attendance—75% (prewar). Literacy—70.4%.
Health: Infant mortality rate (2008 est.)—83.4 deaths/1,000. Life expectancy (2008 est.)—49.8 years.
Work force: Agriculture—90%; industry and commerce, services, and government—10% (2000).

Government

Type: Republic.

Independence: July 1, 1962.

Constitution: May 26, 2003.

Government branches: Executive—president (chief of state), prime minister (head of government). Broad-based government of national unity formed after the 1994 civil war. Elections in 2003 elected a president, 80-seat Chamber of Deputies and 26-member Senate. Legislative—Chamber of Deputies; Senate. Judicial—Supreme Court; High Courts of the Republic; Provincial Courts; District Courts; mediation committees.

Political subdivisions: 4 provinces plus Kigali; 30 districts; 416 sectors; 2,148 cells.

Political parties: There are nine political parties, including the ruling Rwandan Patriotic Front (RPF), which leads a coalition that includes the Centrist Democratic Party (PDC), the Rwandan Socialist Party (PSR), the Ideal [formerly Islamic] Democratic Party (PDI), and the Democratic Popular Union (UPDR). Other parties include the Social Democratic Party (PSD), the Liberal Party (PL), the Concord Progressive Party (PPC), and the Prosperity and Solidarity Party (PSP).

Suffrage: Universal for citizens over 18—except refugees, prisoners, and certain categories of convicts.

Budget: (2007 est.) 31.7 billions of Rwandan francs ($29 million) Revenues—$28 million. Expenditures—$29 million.

Economy

GDP: (2007 est.) $2.8 billion.

Real GDP growth rate: (2007 est.) 6.3%.

Per capita income: (2006 est.) $260. Purchasing power parity (2006 est.) $1,600.

Average inflation rate: (2007 est.) 9.4%.

Agriculture: (2007) 36.2% of GDP. Products—coffee, tea, pyrethrum (insecticide made from chrysanthemums), bananas, beans, sorghum, potatoes, livestock.

Industry: (2007) 15.3% of GDP. Types—cement, agricultural products, beer production, soft drinks, soap, furniture, shoes, plastic goods, textiles, cigarettes, pharmaceuticals.

Services: (2007) 42.7%

Trade: (2007 est.) Exports—$145 million: tea, coffee, coltan, cassiterite, hides, iron ore, and tin. Major markets—China, Belgium, and Germany. Imports (2007 est.)—$488 million f.o.b.: foodstuffs, machinery and equipment, steel, petroleum products, cement, and construction material. Major suppliers—Kenya, Germany, Belgium, France, Uganda, and Israel.

GEOGRAPHY

Rwanda's countryside is covered by grasslands and small farms extending over rolling hills, with areas of rugged mountains that extend southeast from a chain of volcanoes in the northwest. The divide between the Congo and Nile drainage systems extends from north to south through western Rwanda at an average elevation of almost 9,000 feet. On the western slopes of this ridgeline, the land slopes abruptly toward Lake Kivu and the Ruzizi River valley, which form the western boundary with the Democratic Republic of the Congo (formerly Zaire) and constitute part of the Great Rift valley. The eastern slopes are more moderate, with rolling hills extending across central uplands at gradually reducing altitudes, to the plains, swamps, and lakes of the eastern border region.

Although located only two degrees south of the Equator, Rwanda's high elevation makes the climate temperate. The average daily temperature near Lake Kivu, at an altitude of 4,800 feet (1,463 meters) is 73o F (23o C). During the two rainy seasons (February-May and September-December), heavy downpours occur almost daily, alternating with sunny weather. Annual rainfall averages 80 centimeters (31 in.) but is generally heavier in the western and northwestern mountains than in the eastern savannas.

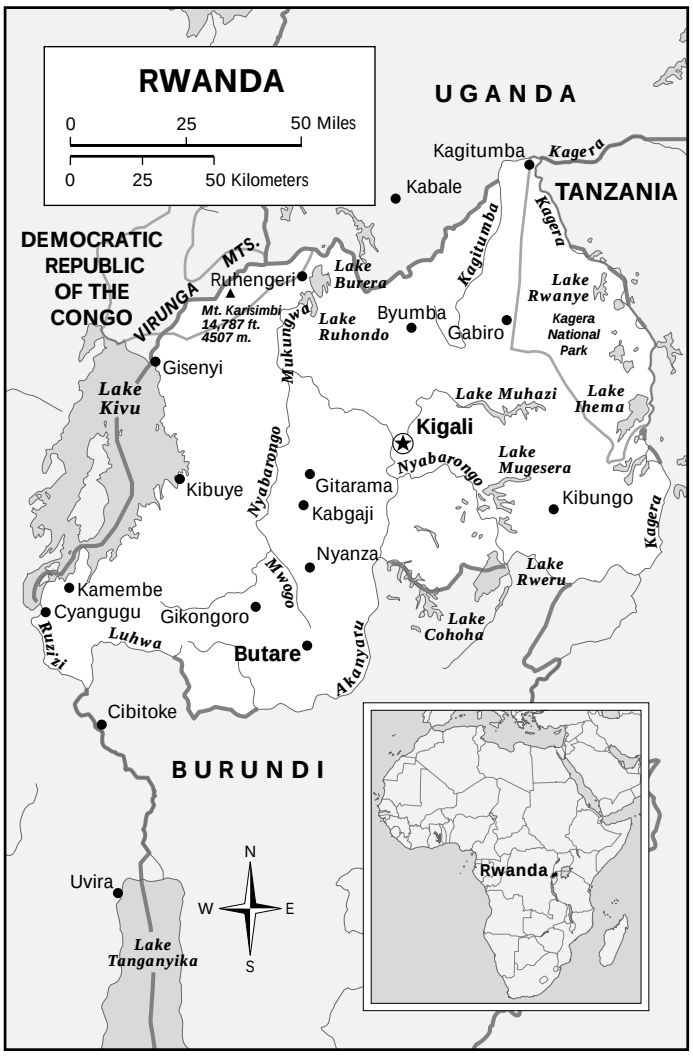
PEOPLE

Rwanda's population density, even after the 1994 genocide, is currently the highest in Sub-Saharan Africa. Nearly every family in this country with few villages lives in a self-contained compound on a hillside. The urban concentrations are grouped around administrative centers. The indigenous population consists of three ethnic groups. The Hutus, who comprise the majority of the population (85%), are traditionally farmers of Bantu origin. The Tutsis (14%) are traditionally a pastoral people who arrived in the area in the 15th century. Until 1959, they formed the dominant caste under a feudal system based on cattle holding. The Twa (1%) are thought to be the remnants of the earliest settlers of the region. Over 70% of the adult population is literate, but not more than 5% have received secondary education. During 1994-95, most primary schools and more than half of prewar secondary schools reopened. The national university in Butare reopened in April 1995; enrollment is over 7,000. Rebuilding the educational system continues to be a high priority of the Rwandan Government.

HISTORY

According to folklore, Tutsi cattle breeders began arriving in the area from the Horn of Africa in the 15th century and gradually subjugated the Hutu inhabitants. The Tutsis established a monarchy headed by a mwami (king) and a feudal hierarchy of Tutsi nobles and gentry. Through a contract known as ubuhake, the Hutu farmers pledged their services and those of their descendants to a Tutsi lord in return for the loan of cattle and use of pastures and arable land. Thus, the Tutsi reduced the Hutu to virtual serfdom. However, boundaries of race and class became less distinct over the years as some Tutsi declined until they enjoyed few advantages over the Hutu. The first European known to have visited Rwanda was German Count Von Goetzen in 1894. He was followed by missionaries, notably the "White Fathers." In 1899, the mwami submitted to a German protectorate without resistance. Belgian troops from Zaire chased the small number of Germans out of Rwanda in 1915 and took control of the country.

After World War I, the League of Nations mandated Rwanda and its southern neighbor, Burundi, to Belgium as the territory of Ruanda-Urundi. Following World War II, Ruanda-Urundi became a UN Trust Territory with Belgium as the administrative authority. Reforms instituted by the Belgians in the 1950s encouraged the growth of democratic political institutions but were resisted by the Tutsi traditionalists who saw in them a threat to Tutsi rule. An increasingly restive Hutu population, encouraged by the Belgian military, sparked a revolt in November 1959, resulting in the overthrow of the Tutsi monarchy. Two years later, the Party of the Hutu Emancipation Movement (PARMEHUTU) won an overwhelming victory in a UN-supervised referendum.



During the 1959 revolt and its aftermath, more than 160,000 Tutsis fled to neighboring countries. The PARMEHUTU government, formed as a result of the September 1961 election, was granted internal autonomy by Belgium on January 1, 1962. A June 1962 UN General Assembly resolution terminated the Belgian trusteeship and granted full independence to Rwanda (and Burundi) effective July 1, 1962.

Gregoire Kayibanda, leader of the PARMEHUTU Party, became Rwanda's first elected president, leading a one-party government chosen from the membership of the directly elected unicameral National Assembly. Peaceful negotiation of international problems, social and economic elevation of the masses, and integrated development of Rwanda were the ideals of the Kayibanda regime; in reality the Kayibanda government promoted a Hutu-supremicist ideology.

Relations with 43 countries, including the United States, were established in the first 10 years. Despite the progress made, inefficiency and corruption began festering in government ministries in the mid-1960s. On July 5, 1973, the military took power under the leadership of Maj. Gen. Juvenal Habyarimana, who dissolved the National Assembly and the PARMEHUTU Party and abolished all political activity.

In 1975, President Habyarimana formed the National Revolutionary Movement for Development (MRND) whose goals were to promote peace, unity, and national development. The movement was organized from the "hillside" to the national level and included elected and appointed offi-

cials.Under MRND aegis, Rwandans went to the polls in December 1978, overwhelmingly endorsed a new constitution, and confirmed President Habyarimana as president. President Habyarimana was re-elected in 1983 and again in 1988, when he was the sole candidate. Responding to public pressure for political reform, President Habyarimana announced in July 1990 his intention to transform Rwanda's one-party state into a multi-party democracy.

On October 1, 1990, Rwandan exiles banded together as the Rwandan Patriotic Front (RPF) and invaded Rwanda from their base in Uganda. The rebel force, composed primarily of ethnic Tutsis, blamed the government for failing to democratize and resolve the problems of some 500,000 Tutsi refugees living in the diaspora around the world. The war dragged on for almost 2 years until a cease-fire accord was signed July 12, 1992, in Arusha, Tanzania, fixing a timetable for an end to the fighting and political talks, leading to a peace accord and power sharing, and authorizing a neutral military observer group under the auspices of the Organization for African Unity. A cease-fire took effect July 31, 1992, and political talks began August 10, 1992.

On April 6, 1994, the airplane carrying President Habyarimana and the President of Burundi was shot down as it prepared to land at Kigali. Both presidents were killed. As though the shooting down was a signal, military and militia groups began rounding up and killing all Tutsis and political moderates, regardless of their ethnic background.

The prime minister and her 10 Belgian bodyguards were among the first victims. The killing swiftly spread from Kigali to all corners of the country; between April 6 and the beginning of July, a genocide of unprecedented swiftness left up to 800,000 Tutsis and moderate Hutus dead at the hands of organized bands of militia—Interahamwe. Even ordinary citizens were called on to kill their neighbors by local officials and government-sponsored radio. The president's MRND Party was implicated in organizing many aspects of the genocide. The RPF battalion stationed in Kigali under the Arusha accords came under attack immediately after the shooting down of the president's plane. The battalion fought its way out of Kigali and joined up with RPF units in the north. The RPF then resumed its invasion, and civil war raged concurrently with the genocide for 2 months. French forces landed in Goma, Zaire, in June 1994 on a humanitarian mission. They deployed throughout southwest Rwanda in an area they called "Zone Turquoise," ostensibly to quell the genocide and stop the fighting there; many members of the genocidal rump regime established after the genocide escaped through the French zone to eastern Congo. The Rwandan Army was quickly defeated by the RPF and fled across the border to Zaire followed by some 2 million refugees who fled to Zaire, Tanzania, and Burundi. The RPF took Kigali on July 4, 1994, and the war ended on July 16, 1994. The RPF took control of a country ravaged by war and genocide. Up to 1 million had been murdered, another 2 million or so had fled, and another million or so were displaced internally.

The international community responded with one of the largest humanitarian relief efforts ever mounted. The United States was one of the largest contributors. The UN peacekeeping operation, UNAMIR, was drawn down during the fighting but brought back up to strength after the RPF victory. UNAMIR remained in Rwanda until March 8, 1996.

Following an uprising by the ethnic Tutsi Banyamulenge people in eastern Zaire in October 1996, a huge movement of refugees began which brought more than 600,000 back to Rwanda in the last 2 weeks of November. This massive repatriation was followed at the end of December 1996 by the return of another 500,000 from Tanzania, again in a huge, spontaneous wave. Less than 100,000 Rwandans are estimated to remain outside of Rwanda, and they are thought to be the remnants of the defeated army of the former genocidal government, its allies in the civilian militias known as Interahamwe, and soldiers recruited in the refugee camps before 1996.

In 2001, the government began implementation of a grassroots village-level justice system, known as gacaca, in order to address the enormous backlog of cases. Despite periodic prison releases, including the most recent January 2006 release of approximately 7,000 prisoners, tens of thousands of individuals remain in the prison system, some scheduled to face the traditional court system, some awaiting trial by gacaca courts, some convicted by gacaca courts and returned to serve their sentences. By the end of 2006, 818,000 genocide suspects had been identified by the gacaca courts. These courts hope to complete their caseload by the end of 2008.

In January 2008 a moderate earthquake in neighboring D.R.C., near the southern Rwandan border town of Cyangugu, caused several dozen deaths and hundreds of injuries in two Rwandan districts, with hundreds of homes rendered uninhabitable and several churches demolished. Rwandan authorities responded quickly to the tragedy and, with the assistance of local and international non-governmental organizations (NGOs), assisted those in need.

GOVERNMENT AND POLITICAL CONDITIONS

After its military victory in July 1994, the RPF organized a coalition government similar to that established by President Habyarimana in 1992. Called "The Broad Based Government of National Unity," its fundamental law is based on a combination of the June 1991 constitution, the Arusha accords, and political declarations by the parties. The MRND Party was outlawed. In April 2003, the transitional National Assembly recommended the dissolution of the Democratic Republican Party (MDR), one of eight political parties participating in the Government of National Unity since 1994. Human rights groups noted the subsequent disappearances of political figures associated with the MDR, including at least one parliamentarian serving in the National Assembly. On May 26, 2003, Rwanda adopted a new constitution that eliminated reference to ethnicity and set the stage for presidential and legislative elections in August and September 2003. The seven remaining political parties endorsed incumbent Paul Kagame for president, who was elected to a 7-year term on August 25, 2003. Rwanda held its first-ever legislative elections September 29 to October 2, 2003. A ninth political party formed after these 2003 elections. In the spring of 2006, the government conducted local nonpartisan elections for district mayors and for sector and cell executive committees. Elections for the House of Delegates will occur in September 2008.

Challenges facing the government include promoting further democratization and judicial reform; completion of prosecution of hundreds of thousands of individuals for crimes relating to the 1994 genocide, either by the regular court system or the gacaca system; preventing the recurrence of any insurgency directed by ex-military and Interahamwe militia who remain in eastern Congo; and the continuing work on medium- and long-term development planning.

Principal Government Officials

Last Updated: 11/12/08

Pres.: **Paul KAGAME**
Prime Min.: **Bernard MAKUZA**
Min. of Agriculture & Animal Resources: **Christopher BAZIVAMO**
Min. of Cabinet Affairs: **Charles MURIGANDE**
Min. of Defense & National Security: **Marcel GATSINZI, Gen.**
Min. of East African Community: **Monique MUKARURIZA**
Min. of Education: **Daphrose GAHAKWA**
Min. of Finance & Economic Planning: **James MUSONI**
Min. of Foreign Affairs & Regional Cooperation: **Rosemary Kobusingye MUSEMINARI**
Min. of Health: **Jean Damascene NTAWUKULIRYAYO, Dr.**
Min. of Infrastructure: **Linda BIHIRE**
Min. of Internal Security: **Fazil Musa HARERIMANA**
Min. of Justice: **Tharcisse KARUGARAMA**
Min. of Local Govt., Good Governance, Community Development, & Social Affairs: **Protais MUSONI**
Min. of Natural Resources: **Stanislas KAMANZI**
Min. of Public Service & Labor: **Anastse MUREKEZI**
Min. of Sports & Culture: **Joseph HABINEZA**
Min. of Trade & Industry: **Monique NSANZABAGANWA**
Min. of Youth: **Protais MITALI**
Min. in the Office of the Pres.: **Solina NYIRAHABIMANA**
Min. in the Office of the Pres. in Charge of Science, Technology, & Scientific Research: **Romain MURENZI**
Min. in the Office of the Prime Min. in Charge of Gender & Women in Development: **Jeanne d'Arc MUJAWAMARIYA**
Min. in the Office of the Prime Min. in Charge of Information: **Louise MUSHIKIWABO**
Min. of State for Agriculture in the Min. of Agriculture & Animal Resources: **Agnes KALIBATA**
Min. of State for Community Development & Social Affairs in the Min. of Local Govt., Good Governance, Community Development, & Social Affairs: **Christine NYATANYI**
Min. of State for Energy in the Min. of Infrastructure: **Albert BUTARE**
Min. of State for Environment, Water, & Mines in the Min. of Natural Resources: **Bikoro MUNYANGANIZI**

Min. of State for HIV/AIDS & Other Epidemics, Min. of Health: **Innocent NYARUHIRIRA, Dr.**
Min. of State for Industry & Investment Promotion in the Min. of Trade & Industry: **Vincent KAREGA**
Min. of State for Labor in the Min. of Public Service & Labor: **Angelina MUGANZA**
Min. of State for Lands & Environment in the Min. of Natural Resources: **Patricia HAJABAKIGA**
Min. of State for Primary & Secondary Education in the Min. of Education: **Theoneste MUTSINDASHYAKA**
Attorney Gen.: **Tharcisse KARUGARAMA**
Governor, Central Bank: **Francois KANIMBA**
Ambassador to the US: **Zac NSENGA**
Permanent Representative to the UN, New York: **Joseph NSENGIMANA**

Rwanda maintains an embassy in the United States at 1714 New Hampshire Avenue NW, Washington, DC 20009 (tel. 202-232-2882).

ECONOMY

The Rwandan economy is based on the largely rain-fed agricultural production of small, semi-subsistence, and increasingly fragmented farms. It has few natural resources to exploit and a small, uncompetitive industrial sector. While the production of coffee and tea is well suited to the small farms, steep slopes, and cool climates of Rwanda, the average family farm size is one-half hectare, unsuitable for most agro-business purposes, especially in view of government ownership of all land and the resettlement of displaced persons. Agribusiness accounts for 36.2% (2007 est.) of Rwanda's GDP and 40.2% of exports. Minerals in 2007 accounted for 35.9% of export earnings, followed by tourism, tea and coffee, and pyrethrum (whose extract is used in insect repellant). Mountain gorillas and other upscale eco-tourism venues are increasingly important sources of tourism revenue. Rwanda's tourism and hospitality sector requires further development. Rwanda is a member of the Common Market for Eastern and Southern Africa (COMESA) and the East African Community. Some 34% of Rwanda's imports originate in Africa, 90% from COMESA countries. The Government of Rwanda has sought to privatize several key firms. Rwandatel, the government fixed-line provider and the country's second-largest mobile phone provider, sold to American-led Terracom in 2006, was resold to a Libyan firm in 2007. The government in the last several years also sold off several government-owned tea estates, and made great strides in completing privatization of the banking sector. Electrogaz, the utility monopoly, remains to be privatized, as do several other parastatals.

During the 5 years of civil war that culminated in the 1994 genocide, GDP declined in 3 out of 5 years, posting a dramatic decline at more than 40% in 1994, the year of the genocide. The 9% increase in real GDP for 1995, the first postwar year, signaled the resurgence of economic activity, due primarily to massive foreign aid.

In the immediate postwar period—mid-1994 through 1995—emergency humanitarian assistance of more than $307.4 million was largely directed to relief efforts in Rwanda and in the refugee camps in neighboring countries where Rwandans fled during the war. In 1996, humanitarian relief aid began to shift to reconstruction and development assistance.

Since 1996, Rwanda has experienced steady economic recovery, thanks to foreign aid and governmental reforms. Since 2002, the GDP growth rate has ranged from 3%-9% per annum, and inflation had ranged between 2%-9%. Rwanda depends on significant foreign imports (over $400 million per year). Exports have increased, up to $145 million in 2007. Private investment remains below expectations despite an open trade policy, a favorable investment climate, cheap and abundant labor, tax incentives to businesses, stable internal security, and crime rates that are comparatively low. Investment insurance also is available through the Africa Trade Insurance Agency or the Overseas Private Investment Corporation. The weakness of exports as well as low domestic savings rates are threats to future growth. The Government of Rwanda remains committed to a strong and enduring economic climate for the country. To this end the government focuses on poverty reduction, infrastructure development, privatization of government-owned assets, expansion of the export base, and liberalization of trade. The implementation of a value added tax of 18% and improved tax collections are having a positive impact on government revenues and thereby services rendered. Banking reform and low corruption also are favorable current trends. Agricultural reforms, improved farming methods, and increased use of fertilizers are improving crop yields and national food supply. Moreover, the government is pursing educational and healthcare programs that bode well for the long-term quality of Rwanda's human resource skills base.

Many challenges remain for Rwanda. Rwanda is dependent on significant foreign aid. Exports continue to lag far behind imports and will continue to affect the health of the economy. Inflation may become a problem due to the large influx of donor funds. The persistent lack of economic diversification beyond the production of tea, coffee, and minerals keeps the country vulnerable to market fluctuations. Rwanda's landlocked situation necessitates strong highway infrastructure maintenance, and good transport linkages to neighboring countries, especially Uganda and Tanzania, are critical. Transportation costs remain high and, therefore, burden import and export costs. Rwanda has no railway system for port access in Tanzania, although the nearest railhead from Kigali is 380 kilometers away at Isaka, Tanzania. The development of small manufacturing and service industries is needed, and the tourism industry has far greater potential given the current stability, travel infrastructure, and available animal parks as well as other potential tourist sites. In 2006, Rwanda completed the Multilateral Debt Relief Initiative and the Heavily Indebted Poor Countries (HIPC) debt initiative, significantly lowering its foreign debt load.

American business interest in Rwanda, other than in tea and telecommunications, is weak, and the African Growth and Opportunity Act (AGOA) has yet to make a significant impact in Rwanda. Energy needs will stress natural resources in wood and gas, but hydroelectric power development is underway, albeit primarily in the planning stages, as is methane development. Rwanda does not have nuclear power or coal resources. Finally, Rwanda's fertility rate—averaging 5.43 births (2006 est.) per woman—will continue to stress services, and diseases such as AIDS/HIV transmission, malaria, and tuberculosis will have a major impact on human resources.

Rwanda's government-run radio broadcasts 15 hours a day in Kinyarwanda, English, and French, the national languages. News programs include regular re-broadcasts from international radio such as Voice of America, BBC and Deutsche Welle. There is one government-operated television station. In addition to government-operated Radio Rwanda, there are a number of independent FM radio stations.

There are few independent newspapers; most newspapers publish in Kinyarwanda on a weekly, biweekly, or monthly basis. Several Western nations, including the United States, are working to encourage freedom of the press, the free exchange of ideas, and responsible journalism.

Defense

The military establishment is comprised of a well-trained army and a small, rotary-wing air force. Defense spending continues to represent a disproportionate share of the national budget, largely due to continuing security problems along the frontiers with the Democratic Republic of the Congo and Burundi in the aftermath of the war.

Following withdrawal of Rwandan Armed Forces from the Democratic Republic of the Congo in October 2002, the government completely restructured the military and launched an ambitious plan to demobilize thousands of soldiers. At end state, Rwanda will have a small, well-equipped army of 25,000 soldiers.

FOREIGN RELATIONS

Rwanda is an active member of the international community and has remained in the international spotlight since the genocide. Rwanda is an active member of the UN, having presided over the Security Council during part of 1995. The UN assistance mission in Rwanda (UNAMIR), a UN Chapter Six peacekeeping operation, involved personnel from more than a dozen countries. Most of the UN development and humanitarian agencies have had a large presence in Rwanda. At the height of the humanitarian emergency, more than 200 nongovernmental organizations were carrying out humanitarian operations. In addition to receiving assistance from the international community, Rwanda has also contributed to international peacekeeping missions. Currently, Rwanda Defense Forces (RDF) has deployed four battalions in support of the UNAMID Mission in Sudan.

Several west European and African nations, including Belgium, Canada, China, Egypt, the United Kingdom, Libya, the Netherlands, Russia, Sweden, the Holy See, and the European Union maintain diplomatic missions in Kigali.

In 1998, Rwanda, along with Uganda, invaded the Democratic Republic of the Congo (D.R.C.) to back Congolese rebels trying to overthrow then-President Laurent Kabila. Rwandan troops pulled out of the D.R.C. in October 2002, in accordance with the Lusaka cease-fire agreement.

In the fall of 2006, Rwanda broke diplomatic relations with France, following a French judge's indictment of senior Rwandan officials on charges of having participated in the shooting down of the presidential jet in 1994. Rwanda rejects these charges. Rwanda, along with Burundi, joined the East African Community in 2007.

U.S.-RWANDAN RELATIONS

U.S. Government interests have shifted significantly since the 1994 genocide from a strictly humanitarian concern focusing on stability and security to a strong partnership with the Government of Rwanda focusing on sustainable development. The largest U.S. Government programs are the President's Emergency Plan for AIDS Relief (PEPFAR) and the President's Malaria Initiative, which aim to reduce the impact of these debilitating diseases in Rwanda. Other activities promote rural economic growth and support good governance and decentralization. Overall U.S. foreign assistance to Rwanda has increased four-fold over the past four years.

A major focus of bilateral relations is the U.S. Agency for International Development's (USAID) program. In support of the overall Government of Rwanda development plan, USAID aims to improve the health and livelihoods of Rwandans and increase economic and political development. To achieve this, USAID activities focus on:

- Prevention, treatment and care of HIV/AIDS;
- Reducing mortality and morbidity due to malaria;
- Increasing access to, and use of, voluntary family planning methods;
- Improving maternal and child health;
- Promoting rural economic growth through specialty coffee, dairy, and eco-tourism;
- Encouraging participatory governance and decentralization in 12 target districts;
- Promoting a democratic Rwanda, where the government respects human rights, civil liberties, and the rule of law; and

- Providing food aid to the most vulnerable populations.

The Mission is currently implementing a number of activities related to the goals above, and is working closely with the Millennium Challenge Corporation (MCC) to obtain approval of the Threshold Country Plan submitted by the Government of Rwanda in November 2007. Once approved, the plan will be implemented by USAID and will focus on strengthening the justice sector and civic participation, and promoting civil rights and liberties.

The State Department's Public Affairs section maintains a cultural center in Kigali, which offers public access to English-language publications and information on the United States.

American business interests have been small; currently, private U.S. investment is limited to the tea industry, franchising (FedEx, Coca-Cola, Western Union, and Moneygram) and small holdings in service and manufacturing concerns. Annual U.S. exports to Rwanda, under $10 million annually from 1990-93, exceeded $40 million in 1994 and 1995. Although exports decreased in the years immediately after the genocide, in 2007 they were estimated at approximately $17 million, a 20% increase over 2006.

TRAVEL

Consular Information Sheet

May 19, 2008

Country Description: Rwanda is a landlocked developing country in central Africa which has made considerable progress in rebuilding its infrastructure and establishing security since the 1994 civil war and genocide in which at least 800,000 people were killed. Economic activity and tourism are on the rise in Rwanda. Hotels and guesthouses are adequate in Kigali, the capital, and in major towns, but are limited in remote areas.

Entry Requirements: A passport and evidence of yellow fever immunization are required. Visas are not required for American citizens entering Rwanda for less than 90 days. U.S. citizens planning on working in Rwanda should apply for a work permit at the Directorate of Immigration as soon as possible after arrival in Rwanda. Detailed entry information may be obtained from Rwanda's Directorate of Immigration at: http://www.migration.gov.rw/ or from the Embassy of the Republic of Rwanda, 1714 New Hampshire Avenue NW, Washington DC 20009, telephone 202-232-2882, fax 202-232-4544, web site http://www.rwandaembassy.org. Overseas, inquiries may be made at the nearest Rwandan Embassy or Consulate.

Safety and Security: There are currently no travel restrictions in place within Rwanda, but travelers should use caution when traveling near or crossing the border into Burundi, eastern Democratic Republic of the Congo (DRC), and Uganda.

In March 2005, the Congo-based Democratic Forces for the Liberation of Rwanda (FDLR), comprising ex-Rwandese Armed Forces, Interahamwe, and other extremists, announced it would end its armed struggle against the Government of Rwanda, but thousands of combatants are estimated to remain in eastern Congo. The combatants currently are not well-organized or funded, nor do they pose a serious threat to Rwandan security. However, in early March 2007, in Gisenyi Province (near the Volcanoes National Park in northwestern Rwanda) they launched a mortar round and rocket into Rwandan territory. There were no casualties, and it appears to have been an isolated incident. While visitors may travel freely to Volcanoes National Park, they are not permitted to visit the park without permission from Rwanda's Office of Tourism and National Parks (ORTPN). ORTPN stipulates that the park can only be used for gorilla tours and nature walks. Since December 2006, all restrictions have been lifted in the Nyungwe Forest near the Burundian border in southwestern Rwanda. In the past, the FDLR infiltrated Rwanda from Burundi through the Nyungwe Forest, but the last reported incident in the park was in November 2003. However, FDLR rebel factions are known to operate in northeastern DRC, Burundi, Tanzania, and Uganda, including near the popular tourist area of Bwindi Impenetrable Forest National Park. For information on travel to those and other countries, and for the latest security information, American citizens traveling abroad should regularly monitor the Department of State, Bureau of Consular Affairs web site at http://travel.state.gov, where the current Travel Warnings and Travel Alerts, as well as the Worldwide Caution, can be found.

From time to time, travel by U.S. Embassy personnel may be restricted based on changing security conditions. Visitors are encouraged to con-

tact the appropriate U.S. Embassy Regional Security Office or Consular Section for the latest security information, including developments in eastern Congo, Uganda and Burundi. (See Registration/Embassy Location section below.) Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S. and Canada, or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444. These numbers are available from 8:00 a.m. to 8:00 p.m. Eastern Time, Monday through Friday (except U.S. federal holidays).

Crime: Pick-pocketing in crowded public places is common, as is petty theft from cars and hotel rooms. Although violent crimes such as carjacking, robbery, and home invasion occur in Kigali, they are rarely committed against foreigners. Americans are advised to remain alert, exercise caution, and follow appropriate personal security measures. Although many parts of Kigali are safe at night, walking alone after dark is not recommended since foreigners, including Americans, have occasionally been the targets of robbery.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, contact family members or friends and explain how funds could be transferred.

Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed. The U.S. Embassy provides some information on its web site about criminal justice in Rwanda at http://rwanda.usembassy.gov.

Medical Facilities and Health Information: Medical and dental facilities are limited, and some medicines are in short supply or unavailable. Travelers should bring their own supplies of prescription drugs and preventive medicines. In Kigali, Americans may go to King Faisal Hospital, a private facility that offers limited services and dental facilities. There is also a missionary dental clinic and a few private dentists. American-operated charitable hospitals with some surgical facilities can be found in Kibagora, in southwestern Rwanda, in Ruhengeri, near the gorilla trekking area, and in Rwinkavu, near the entrance to Akagera National Park. The U.S. Embassy maintains on its website a current list of healthcare providers and facilities in Rwanda at http://rwanda.usembassy.gov/medical_information.html; this list is also included in the Consular Section's welcome packets for American citizens. There are periodic outbreaks of meningitis in Rwanda. Yellow fever can cause serious medical problems, but the vaccine, required for entry, is very effective in preventing the disease. Malaria is endemic to Rwanda. All visitors are strongly encouraged to take prophylactic medications to prevent malaria. These should be initiated prior to entry into the endemic area. Because of possible counterfeit of antimalarial medications, these should be obtained from a reliable pharmaceutical source. Multiple outbreaks of ebola have been reported in neighboring Democratic Republic of Congo and Uganda in the past year, but none within Rwanda.

Information about vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's website at http://wwwn.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith/en.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Rwanda is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

and dental facilities are limited, and some medicines are in short supply or unavailable. Travelers should bring their own supplies of prescription drugs and preventive medicines. In Kigali, Americans may go to King Faisal Hospital, a private facility that offers limited services and dental facilities. There is also a missionary dental clinic and a few private dentists. American-operated charitable hospitals with some surgical facilities can be found in Kibagora, in southwestern Rwanda, in Ruhengeri, near the gorilla trekking area, and in Rwinkavu, near the entrance to Akagera National Park. The U.S. Embassy maintains on its website a current list of healthcare providers and facilities in Rwanda at http://rwanda.usembassy.gov/medical_information.html; this list is also included in the Consular Section's welcome packets for American citizens. There are periodic outbreaks of meningitis in Rwanda. Yellow fever can cause serious medical problems, but the vaccine, required for entry, is very effective in preventing the disease. Malaria is endemic to Rwanda. All visitors are strongly encouraged to take prophylactic medications to prevent malaria. These should be initiated prior to entry into the endemic area. Because of possible counterfeit of antimalarial medications, these should be obtained from a reliable pharmaceutical source. Multiple outbreaks of ebola have been reported in neighboring Democratic Republic of Congo and Uganda in the past year, but none within Rwanda.

Visit the web site of the country's national tourist office and national authority responsible for road safety at http://www.gov.rw.

Aviation Safety Oversight: As there is no direct commercial air service between the United States and Rwanda, the U.S. Federal Aviation Administration (FAA) has not assessed Rwanda's Civil Aviation Authority for compliance with International Civil Aviation Organization (ICAO) aviation safety standards. For more information, travelers may visit the FAA's Internet web site at http://www.faa.gov. In recent months, Rwandair, which charters aircraft to fly its routes, has had difficulties maintaining its schedule, resulting in delayed and cancelled flights which have left passengers stranded for extended periods.

Special Circumstances: Telephone communication to and from Rwanda is generally reliable. Cellular telephones and Internet connections are available in Kigali and large towns. Non-biodegradable plastic bags have been banned in Rwanda and travelers carrying them upon arrival at the Kayibanda International airport may have them confiscated and have to pay approximately $4 for a reusable cloth replacement.

International ATMs are not available in Rwanda. The Rwandan franc is freely exchangeable for hard currencies in banks and the Bureaux de Change. Several Kigali banks can handle wire transfers from U.S. banks, including Western Union. Credit cards are accepted at only a few hotels in Kigali and only to settle hotel bills. Hotels currently accepting credit cards for payment include the Kigali Serena (formerly Intercontinental) Hotel, the Hotel des Mille Collines, the Novotel Umubano, Stipp Hotel and the Kivu Sun Hotel. Note that there may be an added fee for using a credit card.

Travelers should expect to handle most expenses, including air tickets, in cash. Traveler's checks can be cashed only at commercial banks. Because some travelers have had difficulty using U.S. currency printed before the year 2000, the Embassy recommends traveling with newer U.S. currency notes.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating Rwandan laws, even unknowingly, may be expelled, arrested or imprisoned.

Penalties for possession, use, or trafficking in illegal drugs in Rwanda are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov. Both foreigners and Rwandans taking Rwandan children to live outside Rwanda, e.g., after adoption, must obtain an exit permission letter from the Ministry of Family and Gender located within the Primature complex at P.O. Box 969, Kigali, Rwanda; Tel: 011-250-587-128; Fax: 011-250-587-127.

Registration and Embassy Locations: Americans living or traveling in Rwanda are encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration website so that they can obtain updated information on travel and security within Rwanda. Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency. The U.S. Embassy is located at 2657 Avenue de la Gendarmerie; the mailing address is B.P. 28, Kigali, Rwanda; tel. (250) 596-400,; fax: (250) 596-591. The Consular Section's email address is consularkigali@state.gov. The Embassy's web site is http://rwanda.usembassy.gov. American Citizen Services hours are Tuesdays from 9:00 -17:00 and Fridays from 9:00–12:00 except on U.S. and Rwandan holidays.

Intercountry Adoption

November 2007

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Dsiclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is based on public sources and current understanding. Questions involving foreign and U.S. immigration laws and legal interpretation should be addressed respectively to qualified foreign or U.S. legal counsel.

Please Note: Immigrant visas for Rwandan citizens including adopted orphans are issued at the U.S. Embassy in Nairobi, Kenya. Please visit the web site for the Immigrant Visa Section at the U.S. Embassy in Nairobi for information on immigrant visa services. http://nairobi.usembassy.gov/wwwhins1.html or e-mail: nairobiivdv@state.gov. Please check with the Kenyan Embassy in Washington about visa requirements to travel to Nairobi.

Patterns of Immigration: Recent U.S. immigrant visa statistics indicate that eight immigrant visas were issued to Rwandan orphans in the last five fiscal years.

Adoption Authority:
Ministry of Gender and Family Promotion (MIGEPROF)
P.O. Box 969
Kigali, Rwanda
Tel: 011-250-587-128
Fax: 011-250-587-127

Eligibility Requirements for Adoptive Parents: Adoptive parents must be under age 50. However, a judge can waive the age requirement.

Residency Requirements: There are no residency requirements for foreign adoptive parents.

Time Frame: Allow 1-2 months to complete the Rwandan adoption and subsequent U.S. immigration procedures.

Adoption Agencies and Attorneys: There are no known Rwandan or U.S. adoption agencies that provide adoption services in Rwanda. Upon request, the U.S. Embassy can provide a list of attorneys. Neither the Department of State nor the U.S. Embassy can vouch for the efficacy or professionalism of any attorneys on this list.

Adoption Fees: There are no Rwandan government fees associated with intercountry adoptions. However, adoptive parents can expect to pay attorneys' fees for services rendered.

Adoption Procedures: Prospective adoptive parents must petition the local court having jurisdiction over the prospective adoptive child's residence. Once the adoption is approved, the adoption decree is filed at the local vital records registry for the child's place of residence. Documents are filed with the Ministry of Family and Gender. A travel letter is required for the child to exit Rwanda. Documents from the Government of Rwanda are in French. Prospective adoptive parents will need English translations of the birth certificates and death certificates (if applicable) of the adopted child's birth parents to complete immigrant visa processing in Nairobi. The U.S. Embassy in Rwanda can assist in locating translation services, but no U.S. Government resources are available for translating documents.

Required Documents:

- Birth certificate(s) of the adoptive parent(s). If a birth certificate is unavailable, a legal or administrative certificate that proves date of birth and identity may be submitted;
- Original birth certificate of the child to be adopted;
- Marriage Certificate of adoptive parents;
- Waiver of age limit certificate, if applicable (for adoptive parents over the age of 50);
- The "Act of Adoption," which is prepared by the local Bureau de l'Etat Civil (Vital Statistics Office);
- Declaration of the adoptive parent's spouse and adult children consenting to the adoption;
- The Adoption Act. The act must reference the information on the birth and death certificates, whichever are applicable, as well as the identities/documents of the adopting persons (passports and International Adoptive Home Study);
- Authorization letter for departing Rwanda (issued by the Ministry of Family and Gender);
- Legal Judgment Document (a court order approving the adoption), which is prepared by the local court having jurisdiction where the child is located;
- Recommendation from Rwandan Embassy in Washington, DC;
- Home Study Report;
- Certificate of Good Behavior/ Police Record;
- Certificate of Complete Identification;
- Household Composition;
- Proof of Income;
- Adoption acceptance letter from US Department of State.

Note: Documents should be certified by a notary public as well as by the Rwandan Embassy in the U.S., if possible.

Rwandan Embassy in the United States
1714 New Hampshire Avenue, NW
Washington, D.C. 20009

Additional Information: Specific questions about adoption in Rwanda may be addressed to the U.S. Embassy in Rwanda. General questions regarding intercountry adoption may be addressed to the Office of Children's Issues, U.S. Department of State, CA/OCS/CI, SA-29, 4th Floor, 2201 C Street, NW, Washington, D.C. 20520-4818, toll-free Tel: 1-888-407-4747.

ST. KITTS AND NEVIS

Compiled from the July 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Federation of St. Kitts and Nevis

PROFILE

Geography

Area: St. Kitts 168 sq. km. (65 sq. mi.); Nevis 93 sq. km. (36 sq. mi.).

Cities: Capital—Basseterre (pop. about 15,000).

Terrain: Generally mountainous; highest elevations are 1,156 m. (3,792 ft.) at Mt. Liamuiga on St. Kitts and 985 m; (3,232 ft.) at Nevis peak on Nevis.

Climate: Tropical.

People

Nationality: Noun and adjective—Kittitian(s), Nevisian(s).

Population: (2007) 39,129.

Annual growth rate: (2007) 1%.

Ethnic groups: Predominantly of African origin; some of British, Portuguese, and Lebanese descent.

Religions: Principally Anglican, with Evangelical Protestant and Roman Catholic minorities.

Languages: English (official).

Education: (2005) Adult literacy—97.8%.

Health: (2007) Infant mortality rate—14.5/1,000. Life expectancy—men 68 years; women 72 years.

Unemployment: (2006) 5.1%.

Government

Type: Parliamentary democracy; independent sovereign state within the Commonwealth.

Constitution: 1983.

Independence: September 19, 1983.

Government branches: Executive—governor general (representing Queen Elizabeth II, head of state), prime minister (head of government), cabinet. Legislative—bicameral Parliament. Judicial—magistrate's courts, Eastern Caribbean Supreme Court (High Court and Court of Appeals), final appeal to Privy Council in London.

Political subdivisions: 14 parishes.

Political parties: St. Kitts and Nevis Labour Party (ruling), People's Action Movement (PAM), Concerned Citizens Movement (a Nevis-based party), and Nevis Reformation Party.

Suffrage: Universal at 18.

Economy

GDP: (2007) $477.4 million.

GDP growth rate: (2006) 5.8%.

Per capita GDP: (2006) $8,546.

Inflation: (2006) 5.25%.

Natural resources: Negligible.

Agriculture: Sugarcane, rice, yams, bananas, fish, cotton, peanuts, vegetables.

Industry: Financial and business services, tourism, construction, clothing, footwear, beverages, and tobacco.

Trade: (2006) Exports—$31 million (merchandise) and $139 million (commercial services). Major markets—United States (91.9%), EU (3.0%), Trinidad and Tobago (2%), Netherlands Antilles (0.8%), St. Vincent and the Grenadines (0.3%). Imports—$210 million (merchandise) and $87 million (commercial services). Major suppliers—United States (57.9%), Trinidad and Tobago (14.1%), European Union (9.3%), Japan (3.8%), and Barbados (2.8%).

Exchange rate: EC$2.70 = U.S. $1.

HISTORY

At the time of European discovery, Carib Indians inhabited the islands of St. Kitts and Nevis. Christopher Columbus landed on the larger island in 1493 on his second voyage and named it after St. Christopher, his patron saint. Columbus also discovered Nevis on his second voyage, reportedly calling it Nevis because of its resemblance to a snowcapped mountain (in Spanish, "nuestra senora de las nieves" or our lady of the snows). European settlement did not officially begin until 1623-24, when first English, then French settlers arrived on St. Christopher's Island, whose name the English shortened to St. Kitts Island. As the first English colony in the Caribbean, St. Kitts served as a base for further

colonization in the region. The English and French held St. Kitts jointly from 1628 to 1713. During the 17th century, intermittent warfare between French and English settlers ravaged the island's economy. Meanwhile Nevis, settled by English settlers in 1628, grew prosperous under English rule.

St. Kitts was ceded to Great Britain by the Treaty of Utrecht in 1713. The French seized both St. Kitts and Nevis in 1782. The Treaty of Paris in 1783 definitively awarded both islands to Britain. They were part of the colony of the Leeward Islands from 1871-1956, and of the West Indies Federation from 1958-62. In 1967, together with Anguilla, they became a self-governing state in association with Great Britain; Anguilla seceded late that year and remains a British dependency. The Federation of St. Kitts and Nevis attained full independence on September 19, 1983.

GOVERNMENT AND POLITICAL CONDITIONS

As head of state, Queen Elizabeth II is represented in St. Kitts and Nevis by a governor general, who acts on the advice of the prime minister and the cabinet. The prime minister is the leader of the majority party of the House of Representatives, and the cabinet conducts affairs of state. St. Kitts and Nevis has a bicameral legislature: An 11-member Senate appointed by the governor general (mainly on the advice of the prime minister and the leader of the opposition); and an 11-member popularly elected House of Representatives which has eight St. Kitts seats and three Nevis seats. The prime minister and the cabinet are responsible to the Parliament.

St. Kitts and Nevis has enjoyed a long history of free and fair elections, although the outcome of elections in 1993 was strongly protested by the opposition and the Eastern Caribbean Regional Security System (RSS) was briefly deployed to restore order. The elections in 1995 were contested by the two major parties, the ruling People's Action Movement (PAM) and the St. Kitts and Nevis Labour Party. Labour won seven of the 11 seats, with Dr. Denzil Douglas becoming prime minister. In the 2004 elections, Denzil Douglas and the Labour Party were returned to power, winning seven of the eight seats allotted to St. Kitts in the Parliament. The Nevis-based Concerned Citizens Movement (CCM) won two seats, the Nevis Reformation Party (NRP) won one seat, and the PAM party won one seat. The next elections are constitutionally due by October 2009, but many believe that Douglas will call elections in late 2008. The constitution gives Nevis considerable autonomy. Nevis has an island assembly, a premier, and a deputy governor general. Under certain specified conditions, it may secede from the federation. In accordance with its rights under the Constitution, in 1996 the Nevis Island Administration under the Concerned Citizens' Movement (CCM) of Premier Vance Amory initiated steps towards secession from the Federation, the most recent being a referendum in 1998 that failed to secure the required two-thirds majority for secession. In the July 10, 2006 Nevis elections for the Nevis Island Administration, the NRP won three of the five seats; the CCM won two. The NRP's Joseph Parry assumed the premiership of Nevis. While opposing secession, the Government acknowledged the constitutional rights of Nevisians to determine their future independence. Constitutional safeguards include freedom of speech, press, worship, movement, and association. Like its neighbors in the English-speaking Caribbean, St. Kitts and Nevis has an excellent human rights record. Its judicial system is modeled on British practice and procedure and its jurisprudence on English common law.

Principal Government Officials

Last Updated: 11/12/08

Governor Gen.: **Cuthbert Montraville SEBASTIAN**
Prime Min.: **Denzil DOUGLAS, Dr.**
Dep. Prime Min.: **Sam CONDOR**
Min. of Agriculture & Fisheries: **Cedric Roy LIBURD**
Min. of Consumer Affairs: **Timothy HARRIS**
Min. of Education: **Sam CONDOR**
Min of Finance & Intl. Trade: **Timothy HARRIS**
Min. of Foreign Affairs: **Denzil DOUGLAS, Dr.**
Min. of Health: **Rupert Emmanuel HERBERT**
Min. of Housing: **Cedric Roy LIBURD**
Min. of Immigration: **Denzil DOUGLAS, Dr.**
Min. of Industry & Commerce: **Timothy HARRIS**
Min. of Information & Technology: **Sam CONDOR**
Min. of Justice & Legal Affairs: **Dennis MERCHANT**
Min. of Labor: **Sam CONDOR**
Min. of National Security: **Denzil DOUGLAS, Dr.**
Min. of Public Works, Utilities, Transport, & Posts: **Earl Asim MARTIN**

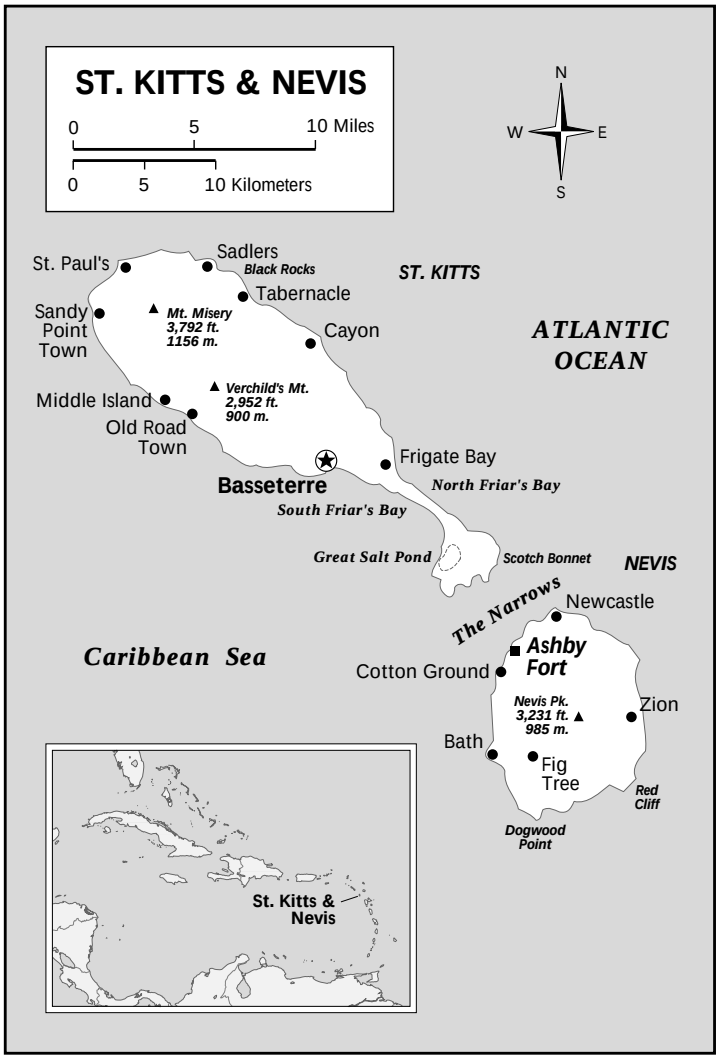
Min. of Sustainable Development: **Denzil DOUGLAS, Dr.**
Min. of Tourism, Culture, & Sport: **Denzil DOUGLAS, Dr.**
Min. of Youth Affairs & Social Security: **Sam CONDOR**
Min. of State in the Office of the Prime Min. With the Responsibility for Education, Youth Affairs, Labor, Social Security, Information, & Technology: **Nigel Alexis CARTY**
Min. of State in the Office of the Prime Min. With the Responsibility for Tourism, Sports, & Culture: **Richard SKERRIT**
Attorney Gen.: **Dennis MERCHANT**
Ambassador to the US: **Izben Cordinal WILLIAMS**
Permanent Representative to the UN, New York: **Delano Frank BART**

The embassy of St. Kitts and Nevis is located at 3216 New Mexico Ave., NW, Washington, D.C. 20016 (tel. 202-686-2636).

ECONOMY



St. Kitts and Nevis was the last sugar monoculture in the Eastern Caribbean until the government decided to close the sugar industry in 2005, after decades of losses at the state-run sugar company. To compensate for the loss of the sugar industry, the

Government of St. Kitts and Nevis has begun exploring alternative energy uses for sugar cane. The United States and Brazil have agreed to develop biofuels programs in the region.

The economy of St. Kitts and Nevis experienced strong growth for most of the 1990s, but hurricanes in 1998 and 1999 and the September 11, 2001 terrorist attacks hurt the tourism-dependent economy. Economic growth picked up in 2004, with a real GDP growth rate of 6.4%, followed by 4.1% growth in 2005. The GDP growth rate rose to 5.8% in 2006, mostly as a result of diversification into tourism and construction related to the Cricket World Cup. Tourism has shown the greatest growth and is now a major foreign exchange earner for St. Kitts and Nevis, as evidenced by an 83% increase in foreign direct investment in a range of tourism-related projects. Recent significant investment included a 648-room Marriott hotel and convention center that opened in December 2002, as well as 2007 plans for "Christophe Harbor," a U.S. investor-funded $500 million resort project. The government instituted a program of investment incentives for businesses considering the possibility of locating in St. Kitts or Nevis, encouraging domestic and foreign private investment. Government policies provide liberal tax holidays, duty-free import of equipment and materials, and subsidies for training provided to local personnel.

However, the debt of public enterprises has increased, and total public and publicly guaranteed debt reached $290,740,000 in 2006. Consumer prices have risen marginally over the past few years. The rate of inflation, as measured by the change in the CPI, rose on average by 5.3% in 2006, compared with 3.6% in 2005 and 2.3% in 2004.

St. Kitts and Nevis is a member of the Eastern Caribbean Currency Union (ECCU). The Eastern Caribbean Central Bank (ECCB) issues the Eastern Caribbean dollar (EC$) for all members of the ECCU. The ECCB also manages monetary policy, and regulates and supervises commercial banking activities in its member countries. The ECCB has kept the EC$ pegged at EC$2.7 to U.S. $1.

FOREIGN RELATIONS

St. Kitts and Nevis maintains diplomatic relations with the United States, Canada, the United Kingdom, France, Russia, Taiwan, Cuba, and South Korea, as well as with many Latin American countries and neighboring Eastern Caribbean states. It is a member of the Commonwealth, the United Nations, the World Bank and the International Monetary Fund, the Organization of American States, the Organization of Eastern Caribbean States, the Eastern Caribbean Regional Security System (RSS), and the Caribbean Community and Common Market (CARICOM). The Eastern Caribbean Central Bank is headquartered in St. Kitts. St. Kitts and Nevis has chosen to recognize Taiwan instead of the People's Republic of China.

U.S.-ST. KITTS AND NEVIS RELATIONS

Since St. Kitts and Nevis attained full independence in 1983, relations with the United States have been friendly. The United States seeks to help St. Kitts and Nevis develop economically and to help strengthen its moderate, democratic, parliamentary form of government. St. Kitts and Nevis is a beneficiary of the U.S. Caribbean Basin Initiative. U.S. assis-

tance is primarily channeled through multilateral agencies such as the World Bank and the Caribbean Development Bank (CDB), as well as the USAID office in Bridgetown, Barbados. In addition, St. Kitts and Nevis benefits from U.S. military exercises and humanitarian civic action construction projects. St. Kitts and Nevis is strategically placed in the Leeward Islands, near maritime transport lanes of major importance to the United States. St. Kitts and Nevis' location close to Puerto Rico and the U.S. Virgin Islands makes the two-island federation attractive to narcotics traffickers. To counter this threat, the Government of St. Kitts and Nevis cooperates with the United States in the fight against illegal narcotics. In 1995, the Government signed a maritime law enforcement treaty with the United States, later amended with an overflight/order-to-land amendment in 1996. St. Kitts and Nevis also signed an updated extradition treaty with the United States in 1996, and a mutual legal assistance treaty in 1997. St. Kitts and Nevis is a popular American tourist destination. In the aftermath of September 11, 2001, tourism declined, but the islands have seen growing numbers of visitors in recent years. Fewer than 1,000 U.S. citizens reside on the island, although students and staff of Ross University Veterinary School and the Medical University of the Americas (Nevis) constitute a significant population of U.S. citizens. The United States maintains no official presence in St. Kitts and Nevis. The Ambassador and Embassy officers are resident in Barbados and frequently travel to St. Kitts and Nevis. A U.S. consular agent residing in nearby Antigua, however, assists U.S. citizens in St. Kitts and Nevis.

TRAVEL

Consular Information Sheet

April 2, 2008

Country Description: For information, travelers can contact the Embassy of St. Kitts and Nevis, 3216 New Mexico Avenue, N.W., Washington, D.C. 20016, telephone (202) 686-2636, the Permanent Mission to the UN in New York, or via the Internet at http://www.stkittsnevis.org. St. Kitts and Nevis is a developing Caribbean nation consisting of two islands. Tourist facilities are widely available.

Entry Requirements: All Americans traveling by air outside the United States are required to present a passport or other valid travel document to enter or re-enter the United States. This requirement will be extended to sea travel (except closed loop cruises), including ferry service, by the summer of 2009. Until then, U.S. citizens traveling by sea must have government-issued photo identification and a document showing their U.S. citizenship (for example, a birth certificate or certificate of nationalization), or other WHTI compliant document such as a passport card for entry or re-entry to the U.S. Sea travelers should also check with their cruise line and countries of destination for any foreign entry requirements. Applications for the new U.S. Passport Card are now being accepted. Based on current projections, we expect the passport card to be in full production beginning in July 2008. The card may not be used to travel by air and is available only to U.S. citizens. Further information on the Passport Card is available at http://travel.state.gov/passport/ppt_card/ppt_card_3926.html and upcoming changes to U.S. passport policy can be found on the Bureau of Consular Affairs web site at http://travel.state.gov/travel/cbpmc/cbpmc_2223.html. We strongly encourage all American citizen travelers to apply for a U.S. passport well in advance of anticipated travel. American citizens can visit travel.state.gov or call 1-877-4USA-PPT (1-877-487-2778) for information on how to apply for their passports. Visitors may be asked to present an onward/return ticket and proof of sufficient funds to cover the cost of their visit. Stays of up to three months are granted at immigration. Anyone requiring an extension must apply to the Ministry of National Security. There is an airport departure tax and environmental levy charged when leaving the country.

Safety and Security: For the latest security information, Americans traveling abroad should regularly monitor the Department of State, Bureau of Consular Affairs' web site at http://travel.state.gov, where the current Worldwide Caution, Travel Warnings, and Travel Alerts can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S. and Canada, or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444. These numbers are available from 8:00 a.m. to 8:00 p.m. Eastern Time, Monday through Friday (except U.S. federal holidays).

Crime: Petty street crime occurs in St. Kitts and Nevis, as well as the occasional burglary; visitors and residents should take common-sense precautions. Travelers should avoid carrying large amounts of cash and use hotel safety deposit facilities to safeguard valuables and travel documents. Travelers should not leave valuables unattended on the beach or in cars and should exercise caution when walking alone at night.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, to contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

Medical Facilities and Health Information: Medical care is limited. The main hospitals are Joseph N. France General Hospital (telephone (869) 465-2551) on St. Kitts and Alexandria Hospital (telephone (869) 469-5473) on Nevis. St. Kitts has two additional hospitals and both islands have several health clinics. Neither island has a hyperbaric chamber. Divers suffering from decompression illness are transported to the island of Saba, in the Netherlands Antilles. Serious medical problems requiring hospitalization and/or medical evacuation to the U.S. can cost thousands of dollars. Doctors and hospitals expect immediate cash payment for health services.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's Internet site at http://www.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) website at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning St. Kitts and Nevis is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

Traffic in St. Kitts and Nevis moves on the left-hand side of the road. Roads are reasonably well paved but narrow and sometimes poorly marked. Drivers often stop on the side of or in the middle of the road to visit with other drivers, blocking one lane of traffic. Honking one's horn is a common form of greeting, not a warning. Travelers are required to obtain a visitor's drivers license, which may be obtained from the Traffic Department or the Fire Station for a small fee on presentation of a valid home or international license. Public Transportation consists of mini-buses and taxis. Established fares are available from airport dispatchers and local hotels. Complaints regarding taxi or minibus services may be lodged with The Department of Tourism or with your hotel. More detailed information on roads and traffic safety can be obtained from the Ministry of Tourism, Culture and the Environment, Bay Road, Pelican Mall, P.O. Box 132, Basseterre, St. Kitts, telephone (869) 465-4040. For specific information concerning St. Kitts and Nevis driving permits, vehicle inspection, road tax and mandatory insurance, contact the St. Kitts and Nevis national tourist organization via the Internet at http://www.stkitts-tourism.com/index.asp.

Aviation Safety Oversight: The U.S. Federal Aviation Administration (FAA) has assessed the Government of St. Kitts and Nevis' Civil Aviation Authority as being in compliance with International Civil Aviation Organization (ICAO) aviation safety standards for the oversight of St. Kitts and Nevis' air carrier operations. For more information, travelers may visit the FAA's Internet web site at http://www.faa.gov.

Special Circumstances: There is no U.S. Embassy or Consulate in St. Kitts and Nevis. The U.S. Embassy in Bridgetown, Barbados, is responsible for American citizen services in these islands. U.S. citizens are encouraged to carry a copy of their U.S. passports or other proof of citizenship with them at all times so that, if questioned by local officials, proof of identity and U.S. citizenship are readily available. All Caribbean countries can be affected by hurricanes. The hurricane season normally runs from June to the end of November, but there have been hurricanes in December in recent years. General information about natural disaster preparedness is available via the Internet from the U.S. Federal Emergency Management Agency (FEMA) at http://www. fema.gov.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating the laws of St. Kitts and Nevis, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in St. Kitts and Nevis are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in St. Kitts and Nevis are encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration website, and to obtain updated information on travel and security within St. Kitts and Nevis. Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency. The U.S. Embassy is located in Barbados in the Wildey Business Part, Wildey, St. Michael telephone 1-246-436-4950, website http://bridgetown.usembassy.gov.

The Consular Section telephone number is 1-246-431-0225. The Consular Section fax number is 1-246-431-0179. The Embassy web address is http://bridgetown.usembassy.gov. Hours of operation are 8:30 a.m. to 4:00 p.m. Monday-Friday, except Barbados and U.S. holidays. In certain circumstances, the U.S. Consular Agency in Antigua can be of assistance. Persons seeking assistance should call the Consular Agent at 1-268-463-6531 to schedule an appointment.

Intercountry Adoption

February 2008

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is based on public sources and current understanding. Questions involving foreign and U.S. immigration laws and legal interpretation should be addressed respectively to qualified foreign or U.S. legal counsel.

Please Note: The St. Kitts/Nevis Adoption of Children act does not differentiate between adoption by nationals and foreigners. The applicant must, however, be resident and domiciled in St. Kitts/Nevis in order to be eligible to adopt a child. The adoption of a female child by a single male is not permitted unless a family tie exists.

Patterns of Immigration: Please review current reports online at http://adoption.state.gov.

Adoption Procedures: Children do not have to be orphans to be adopted. An orphan is defined as a truant child, a child who has no natural parents or other legal guardians or other persons responsible for his/her maintenance, care, and upbringing. Children do not have to be abandoned for purposes of adoption. The adoption process averages approximately 6 months. The judicial court of St. Kitts/Nevis is responsible for the legal proceedings. The court appoints a guardian ad litem who provides a written study on the home of the applicant to the court. A private lawyer represents the adopting parents and a government appointed lawyer represents the child to be adopted. The cost for adoption is approximately U.S. dollars 745. It is illegal for any adopter, parent or guardian, except with the sanction of the court, to receive any payment or other reward or to give or take any such payment or reward for adoption. An application for an adoption order must contain a statement that no such payment was received or made. There are no exit controls on children leaving St. Kitts/Nevis.

Age And Civil Requirements: Prospective adoptive parents must be 25 years old and must be 21 years older than the child to be adopted.

Doctors: The US Embassy in Bridgetown, Barbados maintains current lists of doctors and sources for medicines should either you or your child experience health problems while in St. Kitts/Nevis.

The US Embassy in Barbados is the nearest US embassy to St. Kitts/Nevis. The US Embassy in Barbados is located at: The Canadian Imperial Bank of Commerce Bldg. Broad Street, Bridgetown (PO Box 302) or FPO AA 34055 (Tel: 809-436-4950).

Additional Information: Prospective adoptive parents are strongly encouraged to consult USCIS publication M-249, *The Immigration of Adopted and Prospective Adoptive Children*, as well as the Department of State publication, *Intercountry Adoptions*. Please see the *Intercountry Adoption* section of this book for more details and review current reports online at http://adoption.state.gov.

Questions: Specific questions regarding adoptions in St. Kitts and Nevis may be addressed to the Consular Section of the US Embassy in Bridgetown, Barbados. You may also contact the Office of Children's Issues, 2401 E Street, N.W., Room L127, Washington, D.C. 20037; Phone: (202) 737000; Fax: (202) 312-9743.

ST. LUCIA

Compiled from the July 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Saint Lucia

PROFILE

Geography

Area: 619 sq. km. (238 sq. mi.).
Cities: Capital—Castries (pop. est. 67,000); Micoud; Gros-Islet; Vieux Fort; Soufriere.
Terrain: Mountainous.
Climate: Tropical.

People

Nationality: Noun and adjective—St. Lucian(s).
Population: (2006) 166,014.
Annual growth rate: (2006) 0.74%.
Ethnic groups: African descent 90%, mixed 6%, East Indian 3%, European 1%.
Religions: Roman Catholic, Seventh Day Adventist, various Protestant denominations.
Languages: English (official); a French patois is common throughout the country.
Education: (2004) Adult literacy—94.8%.
Health: (2006) Infant mortality rate—12/1,000. Life expectancy—men 73 years; women 76 years.
Unemployment: (2006) 15.7%.

Government

Type: Westminster-style parliamentary democracy.
Independence: February 22, 1979.
Constitution: 1979.
Government branches: Executive—governor general (representing Queen Elizabeth II, head of state), prime minister (head of government), cabinet. Legislative—bicameral parliament. Judicial—district courts, Eastern Caribbean Supreme Court (High Court and Court of Appeals), final appeal to Privy Council in London.
Political subdivisions: 11 parishes.
Political parties: United Workers Party (incumbent); St. Lucia Labour Party.
Suffrage: Universal at 18.

Economy

GDP: (2006) $899 million.
GDP growth rate: (2006) 4.5%.
Per capita GDP: (2006) $4,803.
Inflation of consumer prices: (2006) 2.34%.
Natural resources: Forests, minerals (pumice), mineral springs.
Agriculture: Bananas, cocoa, coconut, citrus fruits, and livestock.
Manufacturing: Garments, electronic components, beverages, corrugated boxes.
Services: Tourism and offshore banking.
Trade: (2005) Exports—$64 million (merchandise) and $389 million (commercial services). Major markets—European Union (28.2%), Trinidad and Tobago (22.5%), United States (14.0%), Barbados (10.1%), and Grenada (5.2%). Imports—$475 million (merchandise) and $159 million (commercial services). Major suppliers—United States (43.9%), Trinidad and Tobago (14.2%), European Union (14.2%), Japan (4.6%), and Barbados (3.0%).
Exchange rate: EC$2.70 = U.S. $1.

PEOPLE

St. Lucia's population is predominantly of African and mixed African-European descent, with small East Indian and European minorities. English is the official language, although many St. Lucians speak a French patois. Ninety percent of the population is Roman Catholic, a further reflection of early French influence on the island. The population of just over 165,000 is evenly divided between urban and rural areas, although the capital, Castries, contains more than one-third of the population.

HISTORY

St. Lucia's first known inhabitants were the Arawaks, believed to have come from northern South America in 200-400 A.D. Numerous archaeological sites on the island have produced specimens of the Arawaks' well-developed pottery. Caribs

gradually replaced Arawaks during the period from 800-1000 A.D. Europeans first landed on the island in either 1492 or 1502 during Spain's early exploration of the Caribbean. The Dutch, English, and French all tried to establish trading outposts on St. Lucia in the 17th century but faced opposition from the Caribs.

The English, with their headquarters in Barbados, and the French, based in Martinique, found St. Lucia attractive after the sugar industry developed in the 18th century. Britain eventually triumphed, with France permanently ceding St. Lucia in 1815. In 1838, St. Lucia was incorporated into the British Windward Islands administration, headquartered in Barbados. This lasted until 1885, when the capital was moved to Grenada.

Increasing self-governance has marked St. Lucia's 20th-century history. A 1924 constitution gave the island its first form of representative government, with a minority of elected members in the previously all-nominated legislative council. Universal adult suffrage was introduced in 1951, and elected members became a majority of the council. Ministerial government was introduced in 1956, and in 1958 St. Lucia joined the short-lived West Indies Federation, a semi-autonomous dependency of the United Kingdom. When the federation collapsed in 1962, following Jamaica's withdrawal, a smaller federation was briefly attempted. After the second failure, the United Kingdom and the six windward and leeward islands—Grenada, St. Vincent, Dominica, Antigua, St. Kitts-Nevis-Anguilla, and St. Lucia—developed a novel form of cooperation called associated statehood.

As an associated state of the United Kingdom from 1967 to 1979, St. Lucia had full responsibility for internal self-government but left its external affairs and defense responsibilities to the United Kingdom. This interim arrangement ended on February 22, 1979, when St. Lucia achieved full independence. St. Lucia continues to recognize Queen Elizabeth II as titular head of state and is an active member of the Commonwealth. The island continues to cooperate with its neighbors through the Caribbean Community and Common Market (CARICOM), the CARICOM Single Market and Economy (CSME), the East Caribbean Common Market (ECCM), the Organization of Eastern Caribbean States (OECS), and the Regional Security System (RSS).

GOVERNMENT AND POLITICAL CONDITIONS

St. Lucia is a parliamentary democracy modeled on the Westminster system. The head of state is Queen Elizabeth II, represented by a governor general, appointed by the Queen as her representative. The governor general exercises ceremonial functions, but residual powers, under the constitution, can be used at the governor general's discretion. The actual power in St. Lucia lies with the prime minister and the cabinet, usually representing the majority party in parliament.

The bicameral parliament consists of a 17-member House of Assembly whose members are elected by universal adult suffrage for 5-year terms and an 11-member senate appointed by the governor general. The parliament may be dissolved by the governor general at any point during its 5-year term, either at the request of the prime minister—in order to take the nation into early elections—or at the governor general's own discretion, if the house passes a vote of no-confidence in the government.

St. Lucia has an independent judiciary composed of district courts and a high court. Cases may be appealed to the Eastern Caribbean Court of Appeals and, ultimately, to the Judicial Committee of the Privy Council in London. The island is divided into 10 administrative divisions, including the capital, Castries. Popularly elected local governments in most towns and villages perform such tasks as regulation of sanitation and markets and maintenance of cemeteries and secondary roads. St. Lucia has no army but maintains a coast guard and a paramilitary Special Services Unit within its police force.

The United Workers Party (UWP) was once the dominant force in the politics of St. Lucia. Until 1997, the UWP governed the country for all but three years since independence. John Compton was premier of St. Lucia from 1964 until independence in February 1979 and remained prime minister until elections later that year. The St. Lucia Labour Party (SLP) won the first post-independence elections in July 1979, taking 12 of 17 seats in parliament. A period of turbulence ensued, in which squabbling within the party led to several changes of prime minister. Pressure from the private sector and the unions forced the government to resign in 1982. New elections were then called and were won resoundingly by Compton's UWP, which took 14 of 17 seats.

The UWP was re-elected on April 16, 1987, but with only nine of 17 seats. Seeking to increase his slim margin, Prime Minister Compton suspended parliament and called new elections on April 30. This unprecedented snap election, however, gave Compton the same results as before—the UWP retained nine seats and the SLP eight. In April 1992, Prime Minister Compton's government again defeated the SLP. In this election, however, the government increased its majority in parliament to 11 seats.

In 1996, Compton announced his resignation as prime minister in favor of his chosen successor Dr. Vaughan Lewis, former director-general of the Organization of Eastern Caribbean States (OECS). Dr. Lewis became Prime Minister and Minister of Finance, Planning and Development on April 2, 1996. The SLP also had a change of leadership with former CARICOM official Dr. Kenny Anthony succeeding businessman Julian Hunte. In elections held May 23, 1997, the St. Lucia Labour Party won all but one of the 17 seats in parliament, and Dr. Kenny Anthony became Prime Minister and Minister of Finance, Planning and Development on May 24, 1997. In elections of December 3, 2001, the SLP won 14 of the 17 available seats. The leader of the UWP, Dr. Morella Joseph, failed to win a seat. Marcus Nicholas served as leader of the parliamentary opposition. Former Prime Minister Sir John Compton came out of retirement to become leader of the opposition UWP in 2005. The United Workers Party won an upset victory in elections held December 11, 2006, taking 11 seats against 6 won by the St. Lucia Labour Party. Sir John Compton once again returned to the position of Prime Minister, as well as Minister of Finance.

In May 2007, Prime Minister Compton became ill and appointed Minister for Health Stephenson King as Acting Prime Minister. King served in this capacity until Compton passed away on September 7, 2007. Two days later, King was sworn in as Prime Minister.

Principal Government Officials

Last Updated: 11/12/08

Governor Gen.: **Pearlette LOUISY, Dame**
Prime Min.: **Stephenson KING**
Min. for Agriculture, Lands, Forestry, & Fisheries: **Ezechiel JOSEPH**
Min. for Communications, Works, Transport, & Public Utilities: **Guy Eardley JOSEPH**
Min. for Education & Culture: **Arsene Vigil JAMES**
Min. for Finance, Economic Affairs, Economic Planning, National Development, & External Affairs: **Stephenson KING**
Min. for Health Wellness, Family Affairs, National Mobilization, Human Services, & Gender Relations: **Keith MONDESIR, Dr.**

Min. for Tourism & Civil Aviation: **Allen CHASTANET**
Attorney Gen.: **Nicholas FREDERICK**
Ambassador to the US: **Sonia JOHNNY**
Permanent Representative to the UN, New York: **Julian HUNTE**

St. Lucia maintains an embassy at 3216 New Mexico Ave., NW, Washington, DC 20016 (tel. 202-364-6792). St. Lucia also maintains consulates general in New York and Miami.

ECONOMY

St. Lucia's economy depends primarily on revenue from tourism and banana production, with some contribution from small-scale manufacturing. All sectors of the economy have benefited from infrastructure improvements in roads, communications, water supply, sewerage, and port facilities. These improvements, combined with a stable political environment and educated work force, have attracted foreign investors in several different sectors. Although St. Lucia enjoys a steady flow of investment in tourism, the single most significant foreign investment is Hess Oil's large petroleum storage and transshipment terminal. In addition, the Caribbean Development Bank funded an extensive airport expansion project. Although banana revenues have helped fund the country's development since the 1960s, the industry is now in a terminal decline, due to competition from lower-cost Latin American banana producers and soon-to-be reduced European Union trade preferences. The country is encouraging farmers to plant crops such as cocoa, mangos, and avocados to diversify its agricultural production and provide jobs for displaced banana workers.

Tourism recovered in 2004, following the post-September 11, 2001 recession, and continued to grow in 2005, making up more than 48% of St. Lucia's GDP. The hotel and restaurant industry grew by 6.3% during 2005. Stay-over arrivals increased by 6.5%, and the United States remained the most important market, accounting for 35.4% of these arrivals. Yacht passengers rose by 21.9%. Redeployment of cruise ships, remedial berth construction, and high fuel costs prevented higher growth rates. However, several investors have planned new tourism projects for the island, including a large hotel and resort in the southern part of the island. St. Lucia's currency is the Eastern Caribbean Dollar (EC$), a regional currency shared among members of the Eastern Caribbean Currency Union (ECCU). The Eastern Caribbean Central Bank (ECCB) issues the EC$, manages monetary policy, and regulates and supervises commercial banking activities in its member countries. The ECCB has kept the EC$ pegged at EC$2.7=U.S. $1. St. Lucia is a beneficiary of the U.S. Caribbean Basin Initiative and is a member of the Caribbean Community and Common Market (CARICOM). The country hosts the headquarters of the Organization of Eastern Caribbean States (OECS).

FOREIGN RELATIONS

Historically, the major thrust of foreign affairs for St. Lucia has been economic development. The government is seeking balanced international relations with emphasis on mutual economic cooperation and trade and investment. It seeks to conduct its foreign policy chiefly through its membership in the OECS. St. Lucia participated in the 1983 Grenada mission, sending members of its Special Services Unit into active duty. St. Lucia is a member of the Commonwealth, the Organization of American States (OAS), and the United Nations. It maintains friendly relations with the major powers active in the Caribbean, including the United States, the United Kingdom, Canada, and France. St. Lucia has been active in eastern Caribbean regional affairs through the OECS and CARICOM. St. Lucia has chosen to recognize Taiwan instead of the People's Republic of China.

U.S.-ST. LUCIAN RELATIONS

The United States and St. Lucia have a cooperative relationship. The United States supports the St. Lucian Government's efforts to expand its economic base and improve the lives of its citizens. The Government of St. Lucia has cooperated with the United States on security concerns. U.S. assistance is primarily channeled through multilateral agencies, such as the World Bank, and the USAID office in Bridgetown, Barbados. The Peace Corps, whose Eastern Caribbean regional headquarters is located in St. Lucia, has 22 volunteers in St. Lucia, working primarily in business development, education, and health. U.S. security assistance programs provide limited training to the paramilitary Special Services Unit and the coast guard. In addition, St. Lucia receives U.S. counternarcotics assistance and benefits from U.S. military exercises and humanitarian civic action construction projects.

St. Lucia and the United States share interest in combating international crime and narcotics trafficking. Because of St. Lucia's geographical location, it is an appealing transit point for traffickers. In response to this threat, the Government of St. Lucia has concluded various bilateral treaties with the United States, including a Maritime Law Enforcement Agreement (subsequently amended to include overflight and order-to-land provisions), a Mutual Legal Assistance Treaty, and an Extradition Treaty.

More Americans visit St. Lucia than any other national group. In 2005, tourist visitors totaled over 700,000, mainly from the United States, the United Kingdom, and CARICOM. Cruise ship arrivals in 2005 were down by 18% over 2004, while the number of stay-over visitors increased slightly in the same period.

The United States maintains no diplomatic presence in St. Lucia. The Ambassador and Embassy officers are resident in Barbados and frequently travel to St. Lucia.

TRAVEL

Consular Information Sheet

April 2, 2008

Country Description: St. Lucia is an English-speaking, developing Caribbean island nation. Tourist facilities are widely available.

Entry Requirements: All Americans traveling by air outside the United States are required to present a passport or other valid travel document to enter or re-enter the United States. This requirement will be extended to sea travel (except closed loop cruises), including ferry service, by the summer of 2009. Until then, U.S. citizens traveling by sea must have government-issued photo identification and a document showing their U.S. citizenship (for example, a birth certificate or certificate of nationalization), or other WHTI compliant document such as a passport card for entry or re-entry to the U.S. Sea travelers should also check with their cruise line and countries of destination for any foreign entry requirements.

Applications for the new U.S. Passport Card are now being accepted. Based on current projections, we expect the passport card to be in full production beginning in July 2008. The card may not be used to travel by air and is available only to U.S. citizens. Further information on the Passport Card is available at http://travel.state.gov/passport/ppt_card/ppt_card_3926.html and upcoming changes to U.S. passport policy can be found on the Bureau of Consular Affairs web site at http://travel.state.gov/travel/cbpmc/cbpmc_2223.html. We strongly encourage all American citizen travelers to apply for a U.S. passport well in advance of anticipated travel. American citizens can visit travel.state.gov or call 1-877-4USA-PPT (1-877-487-2778) for information on how to apply for their passports.

Safety and Security: For the latest security information, Americans traveling abroad should regularly monitor the Department of State, Bureau of Consular Affairs' web site at http://travel.state.gov, where the current Worldwide Caution, Travel Warnings, and Travel Alerts can be found.

Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S. and Canada, or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444. These numbers are available from 8:00 a.m. to 8:00 p.m. Eastern Time, Monday through Friday (except U.S. federal holidays).

Crime: In 2006, there were five reported incidents of U.S. citizen visitors to St. Lucia staying in boutique hotels in rural areas being robbed at gunpoint in their rooms; some of the victims were assaulted and one was raped. In September 2007, a U.S. citizen was robbed in her room at a resort hotel near Castries by armed men. While authorities detained suspects in some of the cases, no one has been prosecuted. Efforts by the Saint Lucian authorities to improve public safety on the island are ongoing. Visitors should inquire about their hotel's security arrangements before making reservations. Valuables left unattended on beaches and in rental cars are vulnerable to theft. Visitors should use caution, especially at night and in lightly frequented areas.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, to contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

Medical Facilities and Health Information: Medical care is limited. There are two public hospitals and one private hospital in St. Lucia, neither of which provide the same level of care found in an American hospital. The main hospital is Victo-

ria Hospital (Telephone (758) 452-2421). There is no hyperbaric chamber; divers requiring treatment for decompression illness must be evacuated from the island. Serious medical problems requiring hospitalization and/or medical evacuation to the United States can cost thousands of dollars. Doctors and hospitals often expect immediate cash payment for health services.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's Internet site at http://www.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) website at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning St. Lucia is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

Vehicles travel on the left side of the road in St. Lucia. Roads are reasonably well paved but poorly marked, narrow and winding, with steep inclines/declines throughout the island. There are few guardrails in areas that have precipitous drop-offs from the road. In spite of these conditions, drivers often travel at excessive speed, and accidents are common. St. Lucia is served by privately owned and operated mini-buses, plying licensed designated routes. While most such services operate only on weekdays during daylight hours, some may operate at night and on weekends and holidays. Taxis are available at generally reasonable rates, but tourists are vulnerable to being overcharged. When using minibus or taxi services, travelers should agree to a fare ahead of time. When hiring a service at night, travelers should take precautions such as having their hotel call a reputable company for service. For additional general information about road safety, including links to foreign government sites, please refer to our Road Safety page. For specific information concerning St. Lucia driving permits, vehicle inspection, road tax and mandatory insurance, please contact the St. Lucia National Tourist Organization offices in New York via phone at (212) 867-2950 or via the Internet at http://www.stlucia.org.

Aviation Safety Oversight: The U.S. Federal Aviation Administration (FAA) has assessed the Government of St. Lucia's Civil Aviation Authority as being in compliance with International Civil Aviation Organization (ICAO) aviation safety standards for the oversight of St. Lucia's air carrier operations. For more information, travelers may visit the FAA's Internet web site at http://www.faa.gov.

Special Circumstances: There is no U.S. Embassy or Consulate on St. Lucia. The U.S. Embassy in Bridgetown, Barbados is responsible for consular issues on St. Lucia, including American citizen services. U.S. citizens are encouraged to carry a copy of their U.S. passports with them at all times, so that, if questioned by local officials, proof of identity and U.S. citizenship is readily available.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offences. Persons violating St. Lucia's laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in St. Lucia are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in St. Lucia are encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration website, and to obtain updated information on travel and security within St. Lucia. Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency. The U.S. Embassy is located in Barbados in the Wildey Business Park, Wildey, St. Michael, telephone 1-246-436-4950, website http://bridgetown.usembassy.gov. The telephone number for the Consular Section is 1-246-431-0225. The Consular Section fax number is 1-246-431-0179. The Embassy web address is http://bridgetown.usembassy.gov. Hours of operation are 8:30 a.m. to 4:00 p.m. Monday-Friday, except Barbados and U.S. holidays.

International Parental Child Abduction

February 2008

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *International Parental Child Abduction* section of this book and review current reports online at http://travel.state.gov.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is provided for general information only. Questions involving interpretation of specific foreign laws should be addressed to foreign legal counsel.

General Information: St. Lucia is not a party to the Hague Convention on the Civil Aspects of International Child Abduction, nor are there any international or bilateral treaties in force between St. Lucia and the United States dealing with international parental child abduction.

American citizens who travel to St. Lucia place themselves under the jurisdiction of local courts. American citizens planning a trip to St. Lucia with dual national children should bear this in mind.

Custody Disputes: In St. Lucia parents who are legally married share the custody of their children. If they are not married, by law the custody is granted to the mother unless there are known facts of inappropriate behavior, mental or social problems. Foreign court orders are not automatically recognized.

Enforcement of Foreign Judgments: Custody orders and judgments of foreign courts are not enforceable in St. Lucia.

Visitation Rights: In cases where one parent has been granted custody of a child, the other parent is usually granted visitation rights. The American Embassy in Bridgetown has reported few problems for non-custodial parents exercising their visitation rights.

If a custodial parent fails to allow visitation, the non-custodial parent may appeal to the court.

Dual Nationality: Dual nationality is recognized under St. Lucian law.

Travel Restrictions: No exit visas are required to leave St. Lucia.

Criminal Remedies: For information on possible criminal remedies, please contact your local law enforcement authorities or the nearest office of the Federal Bureau of Investigation (FBI).

Information is also available on the Internet at the web site of the U.S. Department of Justice, Office of Juvenile Justice and Delinquency Prevention (OJJDP) at http://www.ojjdp.ncjrs.org. Persons who wish to pursue a child custody claim in a St. Lucian court should retain an attorney in St. Lucia. The U.S. Embassy in Barbados maintains a list of attorneys willing to represent American clients. A copy of this list may be obtained by requesting one from the Embassy at:

U.S. Embassy Bridgetown
Consular Section
ALICO Building, Cheapside

Barbados
Telephone: [246] 421-0225
Fax: [246] 431-0179
Web site: www.usembassy.state.gov

For further information on international parental child abduction, contact the Office of Children's Issues, U.S. Department of State at 1-888-407-4747 or visit its web site on the Internet at http://travel.state.gov.

You may also direct inquiries to: Office of Children's Issues, U.S. Department of State, Washington, DC 20520-4811; Phone: (202) 736-9090; Fax: (202) 312-9743.

ST. VINCENT AND THE GRENADINES

Compiled from the July 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
St. Vincent and the Grenadines

PROFILE

Geography

Area: 340 sq. km. (130 sq. mi.); slightly less than twice the size of Washington, DC. The Grenadines include 32 islands, the largest of which are Bequia, Mustique, Canouan, and Union. Some of the smaller islands are privately owned.
Cities: Capital—Kingstown.
Terrain: Volcanic and mountainous, with the highest peak, Soufriere, rising to 1,219 meters (4,000 ft.).
Climate: Tropical.

People

Nationality: Noun and adjective—Vincentian.
Population: (2008) 118,100.
Annual growth rate: (2006) 0.5%.
Ethnic groups: African descent (66%), mixed (19%), West Indian (6%), Carib Indian (2%), other (7%).
Religions: Anglican (47%), Methodist (28%), Roman Catholic (13%), other Protestant denominations, Seventh-day Adventist, and Hindu.
Languages: English (official); some French Patois spoken.
Education: (2004) Adult literacy—88.1%.
Health: (2006) Infant mortality rate—17/1,000. Life expectancy—men 69 years; women 74 years.
Work force: (2006) 57,695.
Unemployment: (2004) 12%.

Government

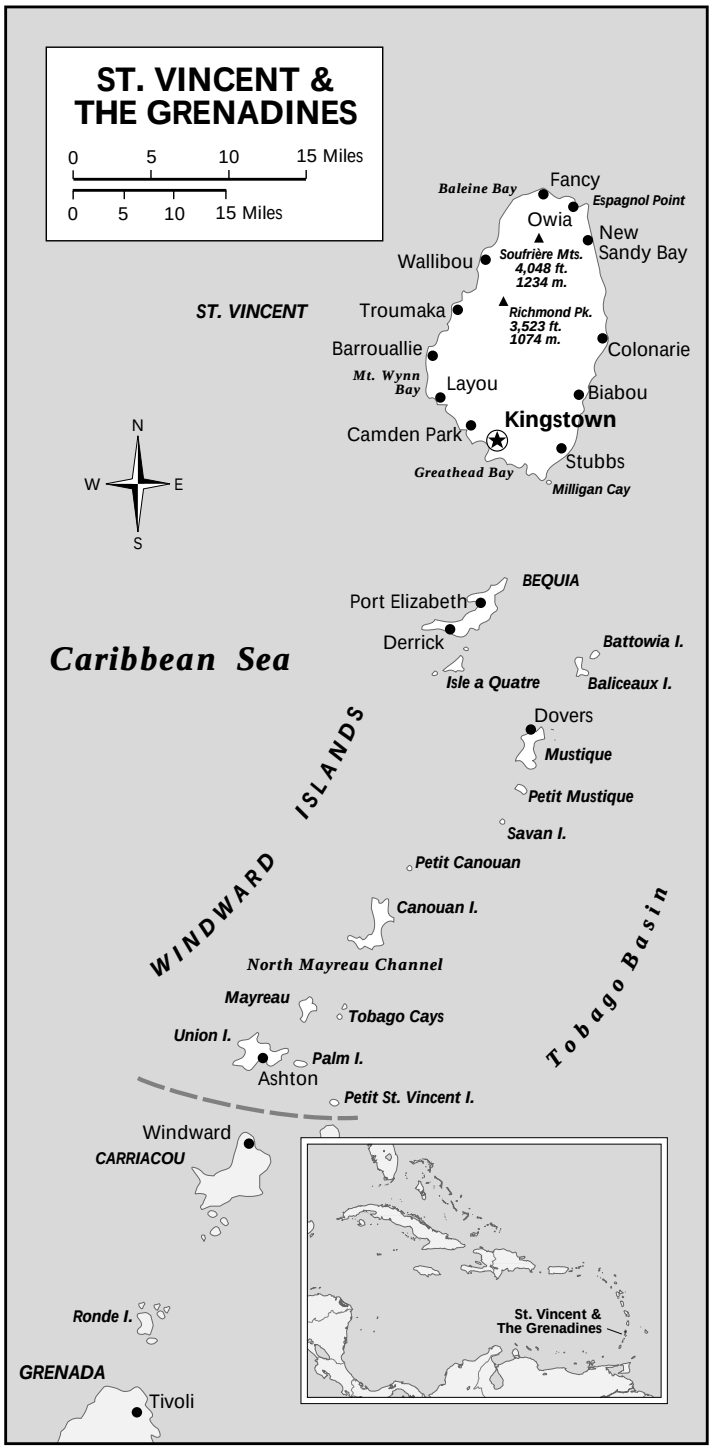
Type: Parliamentary democracy; independent sovereign state within the Commonwealth.
Independence: October 27, 1979.
Constitution: October 27, 1979.
Government branches: Executive—governor general (representing Queen Elizabeth II, head of state), prime minister (head of government), cabinet. Legislative—unicameral legislature with 15-member elected House of Assembly and six-member appointed Senate. Judicial—district courts, Eastern Caribbean Supreme Court (High Court and Court of Appeals), final appeal to the Privy Council in London.
Political subdivisions: Six parishes.
Political parties: Unity Labour Party (ULP, incumbent), New Democratic Party (NDP).
Suffrage: Universal at 18.

Economy

GDP: (2006) $422.5 million.
GDP growth: (2005) 4.9%.
Per capita GDP: (2005) $3,594.
Inflation: (2006) 3.0%.
Natural resources: Timber.
Agriculture: Mostly bananas.
Industry: Plastic products, food processing, cement, furniture, clothing, starch, and detergents.
Trade: (2005) Exports—$40 million (merchandise) and $155 million (commercial services). Major markets—European Union (27.2%), Barbados (12.7%), Trinidad and Tobago (12.3%), Saint Lucia (10.9%), and the United States (9.2%). Imports—$240 million (merchandise) and $74 million (commercial services). Major suppliers—United States (33.3%), Trinidad and Tobago (23.6%), European Union (15.1%), Japan (4.2%), and Barbados (3.9%).
Exchange rate: EC$2.70 = U.S. $1.

PEOPLE

Most Vincentians are the descendants of African slaves brought to the island to work on plantations. There also are a few white descendants of English colonists, as well as some East Indians, Carib Indians, and a sizable minority of mixed race. The country's official language is English, but a French patois may be heard on some of the Grenadine Islands.



HISTORY

Carib Indians aggressively prevented European settlement on St. Vincent until the 18th century. African slaves—whether shipwrecked or escaped from St. Lucia and Grenada and seeking refuge in St. Vincent—intermarried with the Caribs and became known as "black Caribs." Beginning in 1719, French settlers

cultivated coffee, tobacco, indigo, cotton, and sugar on plantations worked by African slaves. In 1763, St. Vincent was ceded to Britain. Restored to French rule in 1779, St. Vincent was regained by the British under the Treaty of Versailles in 1783. Conflict between the British and the black Caribs continued until 1796, when General Abercrombie crushed a revolt fomented by the French radical Victor Hugues. More than 5,000 black Caribs were eventually deported to Roatan, an island off the coast of Honduras. Slavery was abolished in 1834; the resulting labor shortages on the plantations attracted Portuguese immigrants in the 1840s and east Indians in the 1860s. Conditions remained harsh for both former slaves and immigrant agricultural workers, as depressed world sugar prices kept the economy stagnant until the turn of the century. From 1763 until independence, St. Vincent passed through various stages of colonial status under the British. A representative assembly was authorized in 1776, Crown Colony government installed in 1877, a legislative council created in 1925, and universal adult suffrage granted in 1951.

During this period, the British made several unsuccessful attempts to affiliate St. Vincent with other Windward Islands in order to govern the region through a unified administration. The most notable was the West Indies Federation, which collapsed in 1962. St. Vincent was granted associate statehood status in 1969, giving it complete control over its internal affairs. Following a referendum in 1979, St. Vincent and the Grenadines became the last of the Windward Islands to gain independence.

Natural disasters have plagued the country throughout the 20th century. In 1902, the La Soufriere volcano erupted, killing 2,000 people. Much farmland was damaged, and the economy deteriorated. In April 1979, La Soufriere erupted again. Although no one was killed, thousands had to be evacuated, and there was extensive agricultural damage. In 1980 and 1987, hurricanes devastated banana and coconut plantations; 1998 and 1999 also saw very active hurricane seasons, with hurricane Lenny in 1999 causing extensive damage to the west coast of the island.

GOVERNMENT

St. Vincent and the Grenadines is a parliamentary democracy within the Commonwealth of Nations. Queen Elizabeth II is head of state and is represented on the island by a governor general, an office with mostly ceremonial functions. Control of the government rests with the prime minister and the cabinet.

The parliament is a unicameral body, consisting of 15 elected members and

six appointed senators. The governor general appoints senators, four on the advice of the prime minister and two on the advice of the leader of the opposition. The parliamentary term of office is five years, although the prime minister may call elections at any time.

As in other English-speaking Caribbean countries, the judiciary in St. Vincent is rooted in British common law. There are 11 courts in three magisterial districts. The Eastern Caribbean Supreme Court, comprising a High Court and a Court of Appeals, is known in St. Vincent as the St. Vincent and the Grenadines supreme court. The court of last resort is the judicial committee of Her Majesty's Privy Council in London.

There is no local government in St. Vincent, and all six parishes are administered by the central government.

Principal Government Officials

Last Updated: 11/12/08

Governor Gen.: **Frederick Nathaniel BALLANTYNE, Sir**
Prime Min.: **Ralph E. GONSALVES**
Dep. Prime Min.: **Louis STRAKER**

Attorney Gen.: **Judith JONES-MORGAN**
Ambassador to the US: **La Celia Aritha PRINCE**
Permanent Representative to the UN, New York: **Camillo GONSALVES**

St. Vincent and the Grenadines maintains an embassy at 3216 New Mexico Ave., NW, Washington, DC 20016 (tel. 202-364-6730). St. Vincent also has a consul resident in New York.

POLITICAL CONDITIONS

The People's Political Party (PPP), founded in 1952 by Ebenezer Joshua, was the first major political party in St. Vincent. The PPP had its roots in the labor movement and was in the forefront of national policy prior to independence, winning elections from 1957 through 1966. With the development of a more conservative black middle class, however, the party began to lose support steadily, until it collapsed after a rout in the 1979 elections. The party dissolved itself in 1984.

Founded in 1955, the St. Vincent Labour Party (SVLP), under R. Milton Cato, gained the support of the middle class. With a conservative law-and-order message and a pro-Western foreign policy, the SVLP dominated politics from the mid-1960s until the mid-1980s. Following victories in the 1967 and 1974 elections, the SVLP led the island to independence, winning the first post-independence election in 1979. Expecting an easy victory for the SVLP in 1984, Cato called early elections. The results were surprising: with a record 89% voter turnout, James F. Mitchell's New Democratic Party (NDP) won nine seats in the House of Assembly.

Bolstered by a resurgent economy in the mid-1980s, Mitchell led his party to an unprecedented sweep of all 15 House of Assembly seats in the 1989 elections. The opposition emerged from the election weakened and fragmented but was able to win three seats during the February 1994 elections under a "unity" coalition. In 1998, Prime Minister Mitchell and the NDP were returned to power for an unprecedented fourth term but only with a slim margin of 8 seats to 7 seats for the Unity Labour Party (ULP). The NDP was able to accomplish a return to power while receiving a lesser share of the popular vote, approximately 45% to the ULP's 55%. In March 2001, the ULP, led by Ralph Gonsalves, assumed power after winning 12 of the 15 seats in Parliament.

In the December 2005 parliamentary elections, Prime Minister Gonsalves and the ULP retained their 12-3 majority over the NDP.

ECONOMY

Banana production employs upwards of 60% of the work force and accounts for 50% of merchandise exports in St. Vincent and the Grenadines, with an emphasis on the main island of St. Vincent. Such reliance on one crop has made the economy vulnerable to fluctuations in banana prices and reduced European Union trade preferences. To combat these vulnerabilities, the Government of St. Vincent and the Grenadines is focused on diversifying its economy away from reliance on bananas. Recently, there has been a parallel reduction in licit agriculture and a rise in marijuana cultivation, making St. Vincent and the Grenadines the largest marijuana producer in the Eastern Caribbean.

In contrast to developments on the main island, tourism in the Grenadines has grown to become a very important part of the economy, and

the chief earner of foreign exchange for the country as a whole. The Grenadines have become a favorite of high-end tourism and the focus of new development in the country. Super-luxury resorts, yachting tourism, and a commitment by the government to rehabilitate and protect the Tobago Keys as a national park have all contributed to strong tourism returns in the Grenadines.

St. Vincent and the Grenadines' currency is the Eastern Caribbean Dollar (EC$), a regional currency shared among members of the Eastern Caribbean Currency Union (ECCU). The Eastern Caribbean Central Bank (ECCB) issues the EC$, manages monetary policy, and regulates and supervises commercial banking activities in its member countries. The ECCB has kept the EC$ pegged at EC$2.7=U.S. $1.

St. Vincent and the Grenadines is a beneficiary of the U.S. Caribbean Basin Initiative that grants duty-free entry into the United States for many goods. St. Vincent and the Grenadines also belongs to the predominantly English-speaking Caribbean Community and Common Market (CARICOM) and the CARICOM Single Market and Economy (CSME).

FOREIGN RELATIONS

St. Vincent and the Grenadines maintains close ties to the United States, Canada, and the United Kingdom, and is a member of regional political and economic organizations such as the Organization of Eastern Caribbean States (OECS) and CARICOM. St. Vincent and the Grenadines is also a member of the United Nations, the Commonwealth of Nations, the Organization of American States (OAS), and the Association of Caribbean States (ACS). St. Vincent and the Grenadines has chosen to recognize Taiwan instead of the People's Republic of China.

U.S.-ST. VINCENT RELATIONS

The United States and St. Vincent have solid bilateral relations. Both governments are concerned with eradicating local marijuana cultivation and combating the transshipment of narcotics. In 1995, the United States and St. Vincent signed a Maritime Law Enforcement Agreement. In 1996, the Government of St. Vincent and the Grenadines signed an Extradition Treaty with the United States. In 1997, the two countries signed a Mutual Legal Assistance Treaty.

The United States supports the Government of St. Vincent and the Grenadines' efforts to expand its economic base and to provide a higher standard of living for its citizens. U.S. assistance is channeled primarily through multilateral agencies such as the World Bank. The United States has 27 Peace Corps volunteers in St. Vincent and the Grenadines, working in business development, education, and health. The U.S. military also provides assistance through construction and humanitarian civic action projects.

A relatively small number of Americans—fewer than 1,000—reside on the islands.

The United States maintains no official presence in St. Vincent. The Ambassador and Embassy officers are resident in Barbados and frequently travel to St. Vincent.

TRAVEL

Consular Information Sheet

April 2, 2008

Country Description: St. Vincent and the Grenadines is an English-speaking developing Caribbean island nation. Tourism facilities are widely available.

Entry Requirements: For information concerning entry requirements,

travelers can contact the Embassy of St. Vincent and the Grenadines, 3216 New Mexico Avenue, N.W., Washington, D.C. 20016, telephone (202) 364-6730, or the consulate in New York.

All Americans traveling by air outside the United States are required to present a passport or other valid travel document to enter or re-enter the United States. This requirement will be extended to sea travel (except closed loop cruises), including ferry service, by the summer of 2009. Until then, U.S. citizens traveling by sea must have government-issued photo identification and a document showing their U.S. citizenship (for example, a birth certificate or certificate of nationalization), or other WHTI compliant document such as a passport card for entry or re-entry to the U.S. Sea travelers should also check with their cruise line and countries of destination for any foreign entry requirements.

Applications for the new U.S. Passport Card are now being accepted. Based on current projections, we expect the passport card to be in full production beginning in July 2008. The card may not be used to travel by air and is available only to U.S. citizens. Further information on the Passport Card is available at http://travel.state.gov/passport/ppt_card/ppt_card_3926.html and upcoming changes to U.S. passport policy can be found on the Bureau of Consular Affairs web site at http://travel.state.gov/travel/cbpmc/cbpmc_2223.html. We strongly encourage all American citizen travelers to apply for a U.S. passport well in advance of anticipated travel. American citizens can visit travel.state.gov or call 1-877-4USA-PPT (1-877-487-2778) for information on how to apply for their passports.

U.S. citizens should take special care to secure these documents while traveling, as it can be time-consuming and difficult to acquire new proof of citizenship to facilitate return travel should the original documents be lost or stolen.

U.S. citizens traveling to St. Vincent and the Grenadines must also present an onward or return ticket.

Safety and Security: For the latest security information, Americans traveling abroad should regularly monitor the Department of State, Bureau of Consular Affairs' web site at http://travel.state.gov, where the current Worldwide Caution, Travel Warnings, and Travel Alerts can be found.

Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S. and Canada, or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444. These numbers are available from 8:00 a.m. to 8:00 p.m. Eastern Time, Monday through Friday (except U.S. federal holidays).

Crime: Petty street crime occurs in St. Vincent and the Grenadines. From time to time, property has been stolen from yachts anchored in the Grenadines. Valuables left unattended on beaches are vulnerable to theft. Persons interested in nature walks or hikes in the northern areas of St. Vincent should arrange in advance with a local tour operator for a guide; these areas are isolated, and police presence is limited.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, to contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

Medical Facilities and Health Information: Medical facilities are limited. The main hospital is Milton Cato Memorial Hospital (Telephone (784) 456-1185). There is a hospital in the capital, Kingstown, but serious medical problems may require evacuation to another island or the United States. There is no hyperbaric chamber; divers requiring treatment for decompression illness must be evacuated from the island. The closest hyperbaric chamber is located in Barbados. Serious medical problems requiring hospitalization and/or medical evacuation to the United States can cost thousands of dollars. Doctors and the hospital often expect immediate cash payment for health services.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's internet site at http://wwwn.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) website at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning St. Vincent and the Grenadines is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

Vehicles travel on the left side of the road. Roads are narrow, and generally poorly paved, with steep inclines throughout the islands. Taxis and buses are relatively safe, but buses are often overcrowded. Vans are gen-

erally overcrowded and frequently travel at high rates of speed. Night driving is discouraged in mountainous areas because the roads are not well marked; there are few, if any, guardrails, and roads are steep and winding.

Aviation Safety Oversight: The U.S. Federal Aviation Administration (FAA) has assessed the Government of St. Vincent and the Grenadines' Civil Aviation Authority as being in compliance with International Civil Aviation Organization (ICAO) aviation safety standards for the oversight of St. Vincent and the Grenadines' air carrier operations. For more information, travelers may visit the FAA's internet website at http://www.faa.gov.

Special Circumstances: All Caribbean countries can be affected by hurricanes. The hurricane season normally runs from June to the end of November, but there have been hurricanes in December in recent years. General information about natural disaster preparedness is available via the Internet from the U.S. Federal Emergency Management Agency (FEMA).

There is no U.S. Embassy or Consulate in St. Vincent and the Grenadines. The U.S. Embassy in Bridgetown, Barbados is responsible for consular issues on the islands of St. Vincent and the Grenadines, including American Citizens Services. U.S. citizens are encouraged to carry a copy of their citizenship documents with them at all times so that if questioned by local officials, proof of identity and U.S. citizenship are readily available.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offences. Persons violating St. Vincent and the Grenadines' laws, even unknowingly, may be expelled, arrested or imprisoned.

Penalties for possession, use, or trafficking in illegal drugs in St. Vincent and the Grenadines are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in St. Vincent and the Grenadines are encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration website, and to obtain updated information on travel and security within St. Vincent and the Grenadines. Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency. The U.S. Embassy in Bridgetown is located in the Wildey Business Park in suburban Wildey, south and east of downtown Bridgetown. The main number is (246) 431-0225; after hours, the Embassy duty officer can be reached by calling (246) 436-4950. The website for Embassy Bridgetown is http://bridgetown.usembassy.gov. Hours of operation are 8:30 a.m. to 4 p.m. Monday-Friday, except Barbados and U.S. holidays.

SAMOA

Compiled from the September 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Independent State of Samoa

PROFILE

Geography

Area: 2,934 sq. km. (1,133 sq. mi.) in two main islands plus seven smaller ones.
Cities: Capital (pop. 34,000)—Apia.
Terrain: Mountainous with narrow coastal plain.
Climate: Tropical.

People

Nationality: Noun and adjective—Samoan.
Population: (2007 est.) 182,548. Age structure (2006)—60.81% under 15; 14.6% over 65.
Growth rate: 1.4% (mainly due to emigration).
Ethnic groups: Samoan 92.6%, Euronesian (mixed European and Polynesian) 7%, European 0.4%.
Religions: Christian 98.9%.
Languages: Samoan, English.
Education: Literacy—98.6%.
Health: Life expectancy—male 67.8 yrs.; female 74.2 yrs. Infant mortality rate—24/1,000.
Work force: Agriculture—2%; services—50%.

Government

Type: Mix of parliamentary democracy and Fa'aSamoa (Samoan custom/ 'way').
Independence: (from New Zealand-administered UN trusteeship) January 1, 1962.
Constitution: January 1, 1962.
Government branches: Executive—head of state (5-year term; elected by parliament), prime minister (head of government), cabinet. Legislative—unicameral parliament (Fono). Judicial—Court of Appeal, Supreme Court, and supporting hierarchy.
Political parties: Human Rights Protection Party (HRPP), Samoa Democratic United Party (SDUP), Samoa Party (SP), Tautua Samoa Party (TSP), and The People's Party (TPP).

Economy

GDP: (2007) $571.6 million.
GDP per capita: (2007) $3,131.
GDP composition by sector: Services 75.3%, industry 13.1%, agriculture 11.6%.
Industry: Types—tourism, coconuts, small scale manufacturing, fishing.
Trade: (2007) Exports—$13.37 million: fish, coconut products, nonu fruit products, processing of automotive components, beer, taro. Export markets—New Zealand, Australia, U.S. (includes American Samoa). Imports—$247 million: food and beverages, industrial supplies. Import sources—New Zealand, Hong Kong, U.S. ($19.99 million), Australia, Japan, and Fiji.
External debt: (2007) $202.8 million (99.9% is owed to multilateral lenders).
Currency: Tala (or Samoan dollar).

GEOGRAPHY AND PEOPLE

Samoa consists of the two large islands of Upolu and Savai'i and seven small islets located about halfway between Hawaii and New Zealand in the Polynesian region of the South Pacific. The main island of Upolu is home to nearly three-quarters of Samoa's population and its capital city of Apia. The climate is tropical, with a rainy season from November to April. The Fa'a Samoa, or traditional Samoan way, remains a strong force in Samoan life and politics. Despite centuries of European influence, Samoa maintains its historical customs, social systems, and language, which is believed to be the oldest form of Polynesian speech still in existence. Only the Maoris of New Zealand outnumber the Samoans among Polynesian groups.

HISTORY

Migrants from Southeast Asia arrived in the Samoan islands more than 2,000 years ago and from there

settled the rest of Polynesia further to the east. Contact with Europeans began in the early 1700s but did not intensify until the arrival of English missionaries and traders in the 1830s. At the turn of the 20th century, the Samoan islands were split into two sections. The eastern islands became territories of the United States in 1904 and today are known as American Samoa. The western islands became known as Western Samoa (now the Independent State of Samoa), passing from German control to New Zealand in 1914. New Zealand administered Western Samoa under the auspices of the League of Nations and then as a UN trusteeship until independence in 1962. Western Samoa was the first Pacific Island country to gain its independence. In July 1997 the Constitution was amended to change the country's name from Western Samoa to Samoa (officially the "Independent State of Samoa"). Western Samoa had been known simply as Samoa in the United Nations since joining the organization in 1976. The neighboring U.S. territory of American Samoa protested the move, feeling that the change diminished its own Samoan identity. American Samoans still use the terms Western Samoa and Western Samoans.

GOVERNMENT

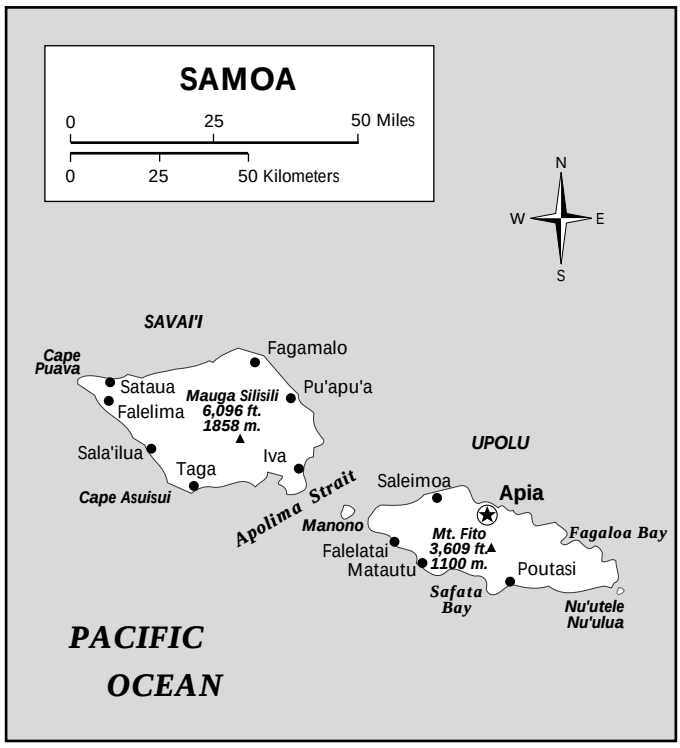
The 1960 Constitution, which formally came into force with independence, is based on the British Westminster parliamentary system, modified to take account of Samoan customs. Malietoa Tanumafili held the post of head of state for 45 years until his death in May 2007. His successor, Tui Atua Tupua Tamasese Efi, was selected by the Fono for a 5-year term.

The unicameral legislature (Fono) contains 49 members serving 5-year terms. Forty-seven are elected from territorial districts by ethnic Samoans districts; the other two are chosen by non-Samoans on separate electoral rolls. Universal suffrage was extended in 1990, but only chiefs (matai) may stand for election to the Samoan seats. The voting age is 21 years and over. There are more than 30,000 matais in the country, about 8% of whom are women.

The prime minister is chosen by a majority in the Fono and is appointed by the head of state to form a government. The 12 cabinet ministers are appointed by the head of state on the advice of the prime minister, and subject to the continuing confidence of the Fono.

The judicial system is based on English common law and local customs. The Supreme Court is the court of highest jurisdiction. Its chief justice is appointed by the head of state upon the recommendation of the prime minister.

Principal Government Officials



Last Updated: 11/12/08

Chief of State: **Tui Atua Tupua Tupuola Efi TAMASESE**
Prime Min.: **Sailele Malielegaoi TUILAEPA**
Dep. Prime Min.: **Telefoni Retzlaff MISA**
Min. of Agriculture: **Tavaga Kitiona Seuala TAUA**
Min. of Commerce, Industry, & Labor: **Telefoni Retzlaff MISA**
Min. of Communication & Information Technology: **Pa'aga Neri SAFUNEITUUGA**
Min. of Education, Sports, & Culture: **Alapati Poese TOOMATA**
Min. of Finance: **Lee Hang NIKO**
Min. of Foreign Affairs & Trade: **Sailele Malielegaoi TUILA'EPA**
Min. of Health: **Amataga Alesana Gildow GATOLOAIFAANA**
Min. of Justice & Courts Admin.: **Mesi Galo UNASA**
Min. of Natural Resources & Environment: **Liuga FAUMUINA**
Min. of Police: **Sailele Malielegaoi TUILAEPA**
Min. of Revenue: **Anasii Leota TUUU**
Min. of Telecommunications: **Sailele Malielegaoi TUILAEPA**
Min. of Women, Community, & Social Development: **Naomi Mataafa FIAME**
Min. of Works, Transport, & Infrastructure: **Sofara Aveau TUISUGALETAUA**
Attorney Gen.: **Brenda HEATHER-LATU**
Governor, Central Bank: **Papali'i Tommy SCANLAN**
Ambassador to the US: **Ali'ioaga Feturi ELISAIA**
Permanent Representative to the UN, New York: **Ali'ioaga Feturi ELISAIA**

Samoa maintains its diplomatic representation in the United States at 800 2nd Avenue, Suite 400D, New York, NY 10017; tel: 212-599-6196.

POLITICAL CONDITIONS

The Human Rights Protection Party (HRPP) has held majority in the Fono for the past six consecutive 5-year terms. HRPP leader Tofilau Eti Alesana served as prime minister for nearly all of the period between 1982 and 1998, when he resigned due to health problems. Tofilau Eti Alesana was replaced by his deputy Tuilaepa Sailele Malielegaoi. Parliamentary elections are held every 5 years, and the last was held in March 2006. The Human Rights Protection Party (HRPP), led by Tuilaepa Sailele Malielegaoi, won 35 of the 49 seats. After the elections, the Samoa Democratic United Party (SDUP) was the opposition party but since then has suffered defections and divisions that have reduced it below the eight members required by parliamentary orders to constitute an official parliamentary party. Its remaining adherents have thus officially become independents, and as of March 2008 there was no recognized opposition party. The Supreme Court ordered by-elections, due to bribery and death of a member of parliament, that saw HRPP gain two extra seats to 37 of the 49 seats. In March 2008, two HRPP members left the party in a dispute over legislation proposed by the Prime Minister to change the "road code" from driving on the right (American) side to driving on the left (British) side, which will come into effect September 2009. These resignations—the first in recent years—left the HRPP with 35 seats. In July 2008, two new political parties were formed: Tautua Samoa Party (TSP), consisting of Independents and the two individuals who had defected from HRPP (however, not recognized in parliament because standing

orders state they must have registered before the general election); and The People's Party (TPP), formed from a group protesting the government's legislation to switch the driving side of the road.

ECONOMY

The Samoan economy is dependent on agricultural exports, tourism, and capital flows from abroad. The effects of three natural disasters in the early 1990s were overcome by the middle of the decade, but economic growth cooled again with the regional economic downturn. Long-run development depends upon upgrading the tourist infrastructure, attracting foreign investment, and further diversification of the economy.

Two major cyclones hit Samoa at the beginning of the 1990s. Cyclone Ofa left an estimated 10,000 islanders homeless in February 1990; Cyclone Val caused 13 deaths and hundreds of millions of dollars in damage in December 1991. As a result, GDP declined by nearly 50% from 1989 to 1991.

Further economic problems occurred in 1994 with an outbreak of taro leaf blight and the near collapse of the national airline Polynesian Airlines. Taro, a root crop, traditionally was Samoa's largest export, generating more than half of all export revenue in 1993. But a fungal blight decimated the plants, and in each year since 1994 taro exports have accounted for less than 1% of export revenue.

The government responded to these shocks with a major program of road building and post-cyclone infrastructure repair. Economic reforms were stepped up, including the liberalization of exchange controls. GDP growth rebounded to over 6% in both 1995 and 1996 before slowing again at the end of the decade.

The primary sector (agriculture, forestry, and fishing) employs less than 2% of the labor force and produces 11.6% of GDP. Important products include coconuts and fish. The service sector accounts for about three-quarters of GDP and employs approximately 50% of the labor force. Tourism is the largest-single activity, more than doubling in visitor numbers and revenue over the last decade. More than 122,000 visitors arrived in Samoa in 2007, contributing over $116.5 million to the local economy. About 40% of the tourist numbers came from New Zealand, 21% from American Samoa, and 7% from the United States. Visitors from other Pacific Islands doubled in 2007, mainly for the Samoan-hosted South Pacific Games in September.

Industry accounts for about 13% of GDP while employing less than 6% of the work force. The largest industrial venture is Yazaki Samoa, a Japanese-owned company processing automotive components for export to Australia under a concessional market-access arrangement. The Yazaki plant employs more than 2,000 workers and makes up over 20% of the manufacturing sector's total output. New Zealand is Samoa's principal trading partner, typically providing between 35% and 40% of imports and purchasing 45%-50% of exports. The increasing number of Asian-owned businesses in Samoa has led the increasing trade with Hong Kong and Japan. Australia, the U.S., including American Samoa, and Fiji also are important trading partners. Samoa's principal exports are coconut products, nonu fruit, and fish. Its main imports are food and beverages, industrial supplies, and fuels.

The collapse of taro exports in 1994 has had the unintended effect of modestly diversifying Samoa's export products and markets. Prior to the taro leaf blight, Samoa's exports consisted of taro ($1.1 million), coconut cream ($540,000), and "other" ($350,000). Ninety percent of exports went to the Pacific region, and only 1% went to Europe. Forced to look for alternatives to taro, Samoa's exporters have dramatically increased the production of copra, coconut oil, and fish. These three products, which combined to produce export revenue of less than $100,000 in 1993, now account for over $6.7 million. There also has been a relative shift from Pacific markets to European ones, which now receive nearly 15% of Samoa's exports. Samoa's exports are still concentrated in fish ($5.8 million), nonu fruit products ($3.27 mil-

lion), and coconut products ($0.9 million worth of copra, copra meal, coconut oil, and coconut cream), but are at least somewhat more diverse than before.

In April 1998, Samoa applied for World Trade Organization membership. The accession process is still in place as negotiations at a bilateral level to resolve opening market access. Samoa's bid for membership moved forward with the successful conclusion of bilateral trade negotiations with New Zealand.

Samoa annually receives important financial assistance from abroad. The more than 100,000 Samoans who live overseas provide two sources of revenue. Their direct remittances have amounted to $128.2 million per year recently (about 24% of GDP), and they account for more than half of all tourist visits. In addition to the expatriate community, Samoa also receives more than $28 million annually in official bilateral development assistance from sources led by China, Japan, Australia, and New Zealand. These three sources of revenue—tourism, private transfers, and official transfers—allow Samoa to cover its persistently large trade deficit.

In March 2006, the United Nations reviewed Samoa's status as a Least Developed Country and recommended graduation into Developing Country status. Samoa has sought a review of the decision on grounds of economic and environment vulnerability, although graduation may improve Samoa's international ratings for investment risk.

FOREIGN RELATIONS AND U.S.-SAMOAN RELATIONS

The Samoan Government is generally conservative and pro-Western, with a strong interest in regional political and economic issues. At independence in 1962, Samoa signed a Treaty of Friendship with New Zealand. This treaty confirms the special relationship between the two countries and provides a framework for their interaction. Under the terms of the treaty, Samoa can request that New Zealand act as a channel of communication to governments and international organizations outside the immediate area of the Pacific islands.

Samoa also can request defense assistance, which New Zealand is required to consider (Samoa does not maintain a formal military). Overall Samoa has strong links with New Zealand, where many Samoans now live and many others were educated.

The Samoan Government was an outspoken critic of the French decision to resume nuclear weapons testing in the South Pacific in 1995. Large-scale street demonstrations were held in Apia against the French tests, which concluded in 1996. The Samoan Government also banned visits to Samoa by French warships and aircraft for several years. This ban has now been lifted, and a French warship visited Apia in July 2006.

The Government of Samoa has a strong relationship with the Government of the People's Republic of China (P.R.C.). The P.R.C. has provided substantial assistance to Samoa, including an economic grant agreement for new development projects valued at $2.6 million concluded in April 2007. Assistance from the P.R.C. has been especially focused on construction projects, including the main government building as well as performance venues for the South Pacific Games, which Samoa hosted in August/September 2007. In August 2008, the P.R.C.-funded parliamentary offices were opened with the Justice building set for completion by mid-2009.

A $64 million concessionary loan was also signed in September 2008 between the two countries for the construction of a multi-storey office and conference building. Since 1967, the United States has supported a substantial Peace Corps program in Samoa. Over 1,900 Peace Corps Volunteers have served in Samoa over that time, with 40 Volunteers currently in-country. Peace Corps programs emphasize village-based development and capacity building. Other forms of U.S. assistance to Samoa are limited. Relations with the U.S. reached an all-time high in July 2008, when Secretary of State Rice visited Samoa and met with Prime Minister Tuilaepa as well as her counterparts from other Pacific Island nations.

This was the second time a Secretary of State had visited in 20 years; George Schultz visited in 1987. The U.S. Embassy, staffed by a single officer, is the smallest Embassy in Samoa (although a few countries have honorary consuls) and one of the few one-officer U.S. Embassies in the world.

Samoa participated in a first round of negotiations with its Pacific Island neighbors for a regional trade agreement in August 2000. Samoa is a member of the United Nations and strong advocate of the Pacific Commission and Pacific Islands Forum.

TRAVEL

Consular Information Sheet

July 18, 2008

Country Description: Samoa consists of the two large islands of Upolu and Savai'i and seven small islets. The country has a stable parliamentary democracy with a developing economy. Tourist facilities are accessible by bus, taxi and car and are within walking distance of access roads. Infrastructure is adequate in Apia, the capital, but it is limited in other areas. Nearly all Internet connections use a relatively slow dial-up method. Samoa has two digital telephone service providers, and visitors can easily purchase prepaid phones that cover virtually the entire country. The Samoa Tourism Authority, at http://www.visitsamoa.ws/, provides a wide range of information of interest to travelers.

Entry Requirements: U.S. nationals who are not U.S. citizens, and who are resident in American Samoa, must obtain a visitor permit prior to all travel to Samoa. U.S. nationals have not been permitted to travel to Samoa on certificates of identity since May 2005 except on a case-by-case basis. (U.S. law distinguishes between individuals who are citizens and those who are nationals. The U.S. passport bio-page shows one's status as either a citizen or a non-citizen national.) As of March 22, 2006, visitor permits to travel to Samoa can be applied for at the new Samoa Consulate General office in Pago Pago, American Samoa. The Samoa Consulate General address is P.O. Box 1313, Pago Pago, American Samoa, telephone (684) 633-5919, fax (684) 633-5929. A valid passport and an onward/return ticket are required for all Americans (both citizens and nationals) to travel to Samoa. Visitor permits are not required for U.S. citizens (they are required for U.S. nationals) seeking to stay in Samoa for up to 60 days. All visitors are required to pay a departure tax of 40 Tala (approximately 17.50 USD) upon leaving the country. Further information about entry requirements and the departure tax may be obtained from the Samoa Mission to the United Nations at 800-2nd Avenue, Suite 400J, New York, NY 10017, telephone (212) 599-6196, fax (212) 599-0797, or email Samoa@un.int. Visit the Embassy ofSamoa web site at http://www2.un.int/public/Samoa/ for the most current visa information or visit the Samoa Immigration web site at http://www.samoaimmigration.gov.ws

Safety and Security: In Apia and many villages, stray dogs wander the streets. Visitors should not approach or feed them; they can become aggressive in the presence of food or if they feel threatened.

Although there have been no major accidents involving the ferry service linking Upolu and Savai'i, vessels are sometimes overloaded. One of the ferries, a multi-deck automobile ferry, sometimes transports passengers on its automobile deck. Americans who choose to use this ferry are encouraged not to remain in the automobile deck during the crossing and to ride only in the passenger compartment in order to avoid injury from shifting vehicles.

Samoa has numerous "blowholes" (lava tubes open to the sea where wave action produces, often spectacular, geysers). These blowholes are popular tourist attractions. The footing around the mouths of most blowholes is very slippery. To avoid being swept in, visitors should not approach too closely and should never stand between the opening of the blowhole and the sea.

Snorkeling and diving in ocean lagoons is a popular activity for many visitors to Samoa. Tide changes can produce powerful currents in these lagoons. Visitors are encouraged to consult local residents and tour operators about hazards and conditions at a particular location before venturing into the water.

For the latest security information, Americans traveling abroad should regularly monitor the Department of State, Bureau of Consular Affairs' web site at http://travel.state.gov, where the current Travel Warnings and Travel Alerts, as well as the Worldwide Caution, can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S. and Canada, or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: Overall, Samoa is considered a low threat environment. Nevertheless, visitors should remain aware of their surroundings, lock their doors at night, and not leave their belongings unattended. Incidents of petty theft/robberies of personal effects are common. Some such incidents have involved residential break-ins. While rare, violent assaults, including sexual assaults have occurred in Samoa.

No specific groups have been targeted, nor have there been any racially motivated or hate crimes against Americans. Police responsiveness in Apia is generally good. Because of the very limited police presence elsewhere in Samoa (where order is maintained primarily by local village authorities), police responsiveness elsewhere is problematic.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed. The local equivalent to the "911" emergency line in Samoa is: 994 for fire emergencies, 996 for the Ambulance and 995 for the Police.

Medical Facilities and Health Information: Health care facilities in Samoa are adequate for routine medical treatment, but are limited in range and availability; complex illnesses and life-threatening emergencies generally need to be treated elsewhere. Dental facilities do not meet U.S. standards, but good dental treatment and some emergency care can be obtained nearby at the LBJ Tropical Medical Center in Pago Pago, American Samoa. The national hospital and a small private hospital are located in Apia, and there are several small district hospitals on Savai'i and in outlying areas of Upolu. There are no hyperbaric chambers on any of the islands for the treatment of scuba diving related injuries. Serious cases of decompression sickness are evacuated to the nearest treatment center in Suva, Fiji, or Auckland, New Zealand.

Serious medical conditions and treatments that require hospitalization and/or medical evacuation to the United States can cost thousands of dollars. Travelers should carry emergency evacuation insurance. Doctors and hospitals often expect immediate cash payment for health services. There is no reported incidence of malaria or rabies in Samoa. Occasional outbreaks of typhoid and nonhemorrhagic dengue do occur.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's web site at http://wwwn.cdc.gov/travel.

For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith/en.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Samoa is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

Safety of public transportation and rural road conditions in Samoa are considered to be fair, while urban road conditions/maintenance is considered to be good. Taxis are widely available and used by Samoans and visitors alike; buses are slow, generally crowded and uncomfortable, and rarely utilized by visitors. Rental cars can also be obtained. No roadside assistance is available. Most major roads are tar-sealed, but secondary roads are predominantly dirt and gravel and may be overgrown with vegetation. A four-wheel drive vehicle is recommended for travel on these roads. Travelers should be aware that vehicle safety regulations are rarely enforced and traffic violations occur routinely. Roads outside Apia are often narrow, winding, relatively steep, with narrow or no shoulders, and poorly lighted. Pedestrians as well as vehicles and livestock regularly travel these roads. Due to poor and deteriorating road conditions, night driving on unlit rural roads can be dangerous and should be avoided if possible. Roads in Samoa often traverse small streams. Drivers are urged to exercise extreme caution when fording these streams, which can become swollen and dangerous with little warning. Vehicles should never enter a stream if the roadbed is not visible or if the water's depth exceeds the vehicle's clearance.

Speed limits in Samoa are 25 miles per hour in the Apia area and 35 miles per hour outside Apia, with certain exceptions. At unmarked intersections, traffic on the left has the right of way. As in the United States, vehicular traffic moves on the right side of the road; although right-hand-drive vehicles (mainly from New Zealand) do exist in Samoa. In April 2008, Samoa adopted legislation mandating a change from driving on the right side of the road to driving on the left side (as in the United Kingdom) and forbidding further importation of left-hand drive vehicles. The date of the change has not been set, although some sources suggest it may occur in the latter part of 2009.

Visit the web site of the country's national tourist office at Samoa Tourism Authority at www.visitsamoa.ws.

Aviation Safety Oversight: The U.S. Federal Aviation Administration (FAA) has assessed the Government ofSamoa's Civil Aviation Authority as being in compliance with International Civil Aviation Organization (ICAO) aviation safety standards for oversight of Samoa's air carrier operations. For more information, travelers may visit the FAA's web site at http://www.faa.gov.

Special Circumstances: Some overseas treatment centers, known as Behavior Modification Facilities, operate in Samoa. Though these facilities may be operated and staffed by U.S. citizens, the Samoan government is solely responsible for compliance with local safety, health, sanitation and educational laws and regulations, including all licensing requirements of the staff in country. These standards, if any, may not be strictly enforced or meet the standards of similar facilities in the U.S. Parents should be aware that U.S. citizens and non-citizen nationals 14 years of age and older have a right to apply for a passport and to request repatriation assistance from the U.S. government, both without parental consent. Any U.S. citizen or non-citizen enrollee has the right to contact a representative from the U.S. Embassy. For further information, consult the Department of State's Fact Sheet on Behavior Modification Facilities, available via the Bureau of Consular Affairs home page. Parents may also contact the U.S. Embassy in Apia or the country officer in the Office of American Citizens Services, Bureau of Consular Affairs at 202-647-5226.

Financial Transactions: Although some businesses (especially those in Apia or those frequented by tourists) do accept credit cards, many (including gas stations) do not. Major credit cards (Visa, Master Card, and American Express) are accepted at major hotels and some restaurants and stores. Samoan currency can be obtained from ATMs, which are located in Faleolo Airport and in many locations in Apia. For more information on ATM locations and banking services see ANZ web site at http://www.anz.com/samoa/overview.asp and WESTPAC web site at http://www.westpac.com.

Disaster Preparedness: Samoa is located in an area of high seismic activity. Although the probability that a major earthquake would occur during an individual trip is remote, earthquakes can and will continue to happen. Major cyclones have occurred in the past and are always a concern. Strong winds and very heavy rains are common, especially during the rainy season from November to April.

During this period, Samoa receives most of its annual average of over 130 inches of rain. General information about natural disaster preparedness is available via the Internet from the U.S. Federal Emergency Management Agency's (FEMA) web site at http://www.fema.gov.

Customs Regulations: Samoa customs authorities may enforce strict regulations concerning temporary importation into or export from Samoa of items such as firearms, fruits, pets and other animals, and drugs. It is advisable to contact the Samoan Mission to the United Nations at 800 2nd Avenue, Suite 400J, New York, NY 10017, telephone (212) 599-6196 for specific information regarding customs requirements.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating Samoa's laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Samoa are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: Samoa is not a member of the Hague Convention on the Civil Aspects of International Child Abduction. For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in Samoa are encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration web site so that they can obtain updated information on travel and security within-Samoa. Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency. The U.S. Embassy is located in the Accident Compensation Board (ACB) Building, Fifth Floor, Apia. The Embassy is open to the public from 8:15 a.m. to 5:00 p.m. Monday—Friday. The Embassy's mailing address is U.S. Embassy, P.O. Box 3430, Apia, Samoa 0815. The telephone numbers are (685) 21436/21631/22696 and 21452. The fax number is (685) 22030.

An Embassy officer can be reached after hours in an emergency involving the welfare of a U.S. citizen or non-citizen national at (685) 21514 or (685) 777-1776. Visit the U.S. Embassy's web site at http://samoa.usembassy.gov.

Intercountry Adoption

February 2007

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is based on public sources and current understanding. Questions involving foreign and U.S. immigration laws and legal interpretation should be addressed respectively to qualified foreign or U.S. legal counsel.

Please Note: Samoan law places restrictions on the "overseas adoption" of Samoan children by any person who is not a citizen of Samoa. The American Embassy Apia, Samoa, does not process immigrant visas. This process must be completed through the American Consulate General in Auckland, New Zealand.

Patterns of Immigration: Please review current reports online at http://adoption.state.gov.

Adoption Authorities: The government offices responsible for adoptions in Samoa are:

Ministry of Justice & Courts Administration
APIA
Ph: (685) 22-671
Fax: (685) 21-050
Office of the Attorney General
P.O. Box 27, APIA
Ph: (685) 20-295
e-mail: attorney.general@samoa.ws

Eligibility Requirements for Adoptive Parents: Prospective adoptive parents must be of the age of majority, which is 21. They may be married or single. Samoan law requires that before any Samoan court grants an adoption of a Samoan child to a citizen of another country, the Samoan Attorney General must certify that the child has no suitable

family members in Samoa who are willing and able to care for the child in Samoa and there is no other suitable arrangement available in Samoa.

Residency Requirements: There is no specific requirement that the applicants be residents of Samoa.

Time Frame: The adoption process may take from several months to a year or more.

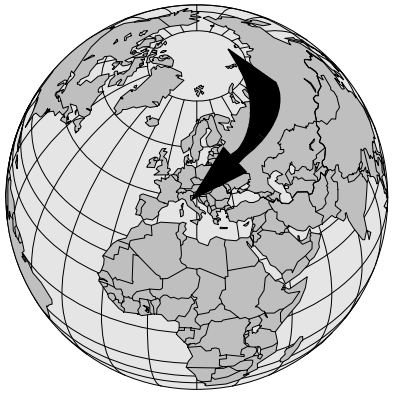
Adoption Agencies and Attorneys: Samoan law requires that adoption agencies, prior to facilitating adoptions in or from Samoa, must be registered with the Samoan Government and have the prior written authorization from the Attorney General.

The U.S. Embassy in Apia maintains a list of attorneys at: http://wellington.usembassy.gov/pacific_islands. html.

Adoption Fees: Attorneys' fees range from $900- $1200. In addition, prospective adoptive parents should expect to pay approximately $300 for justice and court administration fees.

Adoption Procedures: Adoption applications must be made to the Magistrates Court, which may in turn determine that the Supreme Court should review the case. As was stated above, certification from the Attorney General that the child has no family or other possibilities within Samoa is required before an adoption decree may be granted.

Required Documents:



- Original Birth Certificates for adoptive parents
- Original Marriage Certificate for adoptive parents
- Proof of Citizenship—Naturalization Certificates/Passports
- Original birth certificate for adopted child
- Proof of ownership of home from adoptive parents—proof of adequate space in the home to accommodate an additional household member

Permanent Mission of Samoa to the United Nations
800 Second Avenue, Suite 400J
New York, New York 10017
Tel: 212 599 6196
Fax: 212 599 0797
Email: samoa@un.int

U.S. Immigration Requirements: Prospective adoptive parents are strongly encouraged to consult USCIS publication M-249, *The Immigration of Adopted and Prospective Adoptive Children*, as well as the Department of State publication, *Intercountry Adoptions*. Please see the *Intercountry Adoption* section of this book for more details and review current reports online at http://adoption.state.gov.

American Embassy
5th Floor, ACB Building,
Matafele Street
Apia, SAMOA
Phone: (685) 21436
Fax: (685) 22030
Email: AmEmbApia@state.gov

Additional Information: Specific questions about adoption in Samoa may be addressed to the U.S. Embassy in Apia, Samoa or the U.S. Consulate General in Auckland, New Zealand. General questions regarding intercountry adoption may be addressed to the Office of Children's Issues, U.S. Department of State, CA/OCS/CI, SA-29, 4th Floor, 2201 C Street, NW, Washington, D.C. 20520-4818, toll-free Tel: 1-888-407-4747.

SAN MARINO

Compiled from the April 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Republic of San Marino

PROFILE

Geography

Area: 61.2 sq. km.; about one-third the size of Washington, DC.
Cities: Capital—San Marino (pop. 4,482). Other cities—Serravalle, Borgo Maggiore, Domagnano.
Terrain: Rugged mountains.
Climate: Mediterranean; mild to cool winters; warm, sunny summers.

People

Nationality: Noun and adjective—Sammarinese.
Population: (December 2007) 30,780.
Ethnic groups: Sammarinese, Italian.
Religions: Roman Catholic.
Languages: Italian.
Education: Literacy—96%.
Health: Infant mortality rate: (2006)—5.63/1,000 live birth rates. Life expectancy (2006)—79.6 for men and 85.2 for women.
Work force: (December 2007) 22,056.

Government

Type: Independent republic.
Constitution: October 8, 1600, electoral law of 1926 and manuscript of rights (1974) serve some of the functions of the Constitution.
Government branches: Captain Regent Rosa Zafferani and Captain Regent Federico Pedini Amati (co-chiefs of state); Congress of State (cabinet) elected by the Great and General Council; Secretary of State for Foreign and Political Affairs Fiorenzo Stofli (head of government). Legislative—unicameral parliament: 60-member Great and General Council. Judicial—Council of Twelve.
Political subdivisions: 9 municipalities.
Political parties: Christian Democratic Party of San Marino, Party of Socialists and Democrats, National Alliance, Popular Alliance, United Left, New Socialist Party, We Sammarinesi, Sammarinesi for Freedom, and Democrats of the Center.
Suffrage: Universal, 18 years of age.

Economy

GDP: (2007 estimate) Euros 1.277 billion (approx. $1.85 billion).
Per capita income: (2006) Euros 29,560 (approx. $42,560).
GDP growth: (2007 est.) 6.3%.
Natural resources: Building stone.
Agriculture: Products—wheat, grapes, maize, olives, cattle, pigs, horses, meat, cheese, hides.
Industry: Types—tourism, textiles, electronics, ceramics, cement, wine.
Trade: Exports (2005)—2.035 billion Euros (approx. $2.9 billion). 90% to Italy. Imports (2005)—2.076 billion Euros (approx. $3.0 billion) manufactured goods, food. Partners—Italy, Western Europe, Eastern Europe, South America, China, Taiwan.

PEOPLE AND HISTORY

The population of San Marino is comprised of native Sammarinese and Italian citizens. Crop farming, sheep farming, and the working of stone from the quarries formed the early backbone of San Marino's economy. It has no mineral resources, and today most of the land is cultivated or covered by woods.

According to tradition, San Marino was founded in AD 301 when a Christian stonemason named Marinus the Dalmatian fled to the island of Arbe to escape the anti-Christian Roman Emperor Diocletian. Marinus hid on the peak of Mount Titano and founded a small community of people following their Christian beliefs. It is certain that the area had been inhabited since prehistoric times, although evidence of existence on Mount Titano only dates back to the Middle Ages. In memory of the stonecutter, the land was renamed "Land of San Marino" and was finally changed to its present-day name, "Republic of San Marino."

The original government structure was composed of a self-governed assembly known as the Arengo, which consisted of the heads of each family. In 1243, the positions of Captains Regent (Capitani Reggenti) were established to be the joint heads of state.

The land area of San Marino consisted only of Mount Titano until 1463, at which time the republic entered into an alliance against Sigismondo Pandolfo Malatesta, Lord of Rimini, who was later defeated. As a result, Pope Pius II Piccolomini gave San Marino the towns of Fiorentino, Montegiardino, and Serravalle. Later that year, the town of Faetano joined the republic on its own accord. Since then, the size of San Marino has remained unchanged.

San Marino has been occupied by foreign militaries twice in its history, both for only short periods of time. In 1503, Cesare Borgia, known as Valentino, occupied the republic until his death several months later. In 1739, Cardinal Alberoni used military force to occupy the country. Civil disobedience was used to protest his occupation, and clandestine notes sent to the Pope to obtain justice were answered by the Pope's recognition of San Marino's rights and restoration of San Marino's independence.

GOVERNMENT

The Arengo, initially formed with the heads of each family, relinquished its power to the Great and General Council. In 1243, the first two Captains Regent were nominated by the Council, and this method of nomination is still in use today. The Council is composed of 60 members who are elected every 5 years under a proportional representation system in all nine administrative districts. These districts (Townships) correspond to the old parishes of the Republic, and each one is ruled by a Council, which is chaired by a Captain elected every 5 years. The Great and General Council approves the budget, as well as the nominations of Captains Regent and heads of the Executive.

Every 6 months, the Council elects two Captains Regent to be the heads of state. The Regents are chosen from opposing parties so they can keep an eye on each other. They serve a 6-month term. The investiture of the Captains Regent takes place on April 1 and October 1 in every year. Once this term is over, citizens have 3 days in which to file complaints about the previous Regents' activities. If they warrant it, judicial proceedings against the former head(s) of state can be initiated.

The State Congress, composed of 10 Secretaries, wields executive power. The 10 Secretaries are (1) Secretary of State for Foreign and Political Affairs, and Economic Planning; (2) Secretary of State for Internal Affairs and Civil Defense; (3) Secretary of State for Finance, Budget, and Relations with the State Philatelic and Numismatic Office; (4) Secretary of State for Education, Culture, University and Social Affairs; (5) Secretary of State for Territory, Environment and Agriculture; (6) Secretary of State for Health and Social Security; (7) Secretary of State for Industry, Trade and Relations with the Azienda Autonoma di Stato for Services; (8) Secretary of State for Communication, Transport, Tourism, and Sport; (9) Secretary of State for Justice, Information, and Peace; and (10) Secretary of State for Labor and Cooperation.

The Great and General Council elects the Council of Twelve for the duration of the Legislature and serves a jurisdictional body that also acts as a

third instance Court of Appeals. Two government inspectors represent the State in financial and patrimonial questions.

The Legislative body consists of the Great and General Council, the parliament, and a unicameral Chamber. The members of parliament are usually elected every five years and are in charge of legislation, justice, and the administration of jurisdiction. In addition, they are tasked with electing the Captains Regent, the State Congress, the Council of Twelve, the Advising Commission, and the Government Unions once the Council nominates them. Parliament also has the power to ratify contracts with other countries. The parliament is divided into five different Advising Commissions consisting of 15 councils which examine, propose, and discuss the implementation of new laws that are on being submitted to the Great and General Council.

The judiciary is composed of the commissioner of the law, the judging magistrate, the appellate judge, the juvenile court, and the judge of last appeal. The commissioner tries civil and penal cases with penalties not exceeding a three-year sentence. The judging magistrates, who are appointed by parliament for a three-year term and can be indefinitely reappointed, preside over all other cases.

Reform legislation, enacted in 2004, no longer requires that the country's lower court judges be noncitizens; however, most lower court judges remained Italian citizens. A local conciliation judge handles cases of minor importance. Under the same reform, the final court of review is the judge of the last appeal. In civil matters, this judge confirms or overrules either the lower court judgment or an appellate decision; in criminal matters, he judges on the legitimacy of detention measures and on the enforcement of a judgment.

On April 28, 2005 a new act established the country's constitutional court with the following functions: 1) to verify that laws, acts, and traditions that are given the force of law conform to constitutional precepts; 2) to verify the admissibility of a referendum; 3) to decide on conflicts between constitutional institutions; 4) to control the activity of the Captains Regent. The court is composed of three standing judges and three alternate judges. They are selected by the Great and General Council with a two-thirds majority to a four-year term. After the first selection one-third of the members of the court are reselected every two years.

Principal Government Officials

Last Updated: 11/12/08

Captain Regent (Co-Head of State): **Federico Pedini AMATI**

Captain Regent (Co-Head of State): **Rosa ZAFFERANI**

Sec. of Budget & Finance: **Stefano MACINA**

Sec. of Health & Social Security: **Fabio BERARDI**

Sec. of Industry, Trade, & Research: **Tito MASI**

Sec. of Interior & Civil Protection: **Valeria CIAVATTA**

Sec. of Justice, Information, & Peace: **Ivan FOSCHI**

Sec. of Labor: **Antonello BACCIOCCHI**

Sec. of Public Education, Culture, & Social Affairs: **Francesca MICHELOTTI**

Sec. of State for Foreign & Political Affairs & for Economic Planning: **Fiorenzo STOLFI**

Sec. of Territory, Environment, & Agriculture: **Marino RICCARDI**

Sec. of Tourism, Telecommunications, Transportation, Economic Cooperation, & Sports: **Paride ANDREOLI**

Permanent Representative to the UN, New York: **Daniele BODINI**

San Marino has honorary Consulates General in Washington, DC and New York and honorary Consulates in Detroit and Honolulu. The honorary Consulate General in Washington, DC is located at 1899 L Street NW, Suite 500, Washington, DC 20036.

The Republic of San Marino's Web Site provides information on politics, trade, and events in San Marino.

POLITICAL CONDITIONS

San Marino is a multi-party democratic republic. The two main parties are the Christian Democratic Party of San Marino (PDCS), and the Party of Socialists and Democrats (PSD), in addition to several other smaller parties. Due to the small size and low population of San Marino, it is difficult for any party to gain a pure majority, and most of the time the government is run by a coalition. Following the June 2006 election results, the PSD formed a center-left coalition government with the Popular Alliance and the United Left parties. After a government crisis in the fall of 2007, the four members of the Democrats of the Center also joined the ruling coalition.

Because tourism accounts for more than 50% of the economic sector, the government relies not only on taxes and customs for revenue but also the sale of coins and postage stamps to collectors throughout the world. In addition, the Italian Government pays San Marino an annual budget subsidy provided under the terms of the Basic Treaty with Italy. In recent years banking has also become an important economic activity.

Harmonization of statutes and policies with the EU is a major domestic and foreign policy priority of the republic. Another priority issue is the signing of a cooperation agreement with Italy, San Marino's most important economic partner.

ECONOMY

San Marino's per capita income in 2005 stood at 28,570 Euros (approx. $41,400) with more than 50% coming from the tourism industry, which draws about 2 million people annually.

Traditional economic activities in San Marino were food crops, sheep farming, and stone quarrying. Today farming activities focus on grain, vines, and orchards, as well as animal

husbandry (cattle and swine). Besides the tourism industry, San Marino makes most of its income from the banking industry and from the manufacture and export of ceramics, tiles, furniture, clothing, paints, fabrics, and spirits/wines. The per capita level of output and standard of living in San Marino are comparable to those of Italy. In addition, San Marino maintains the lowest unemployment rate in Europe and no national debt.

FOREIGN RELATIONS

San Marino is an active player in the international community. Currently, the Republic has diplomatic relations with over 70 countries. Italy is the only country represented by an ambassador resident in San Marino. The Papal Nuncio, based in Rome, is the dean of San Marino's diplomatic corps.

San Marino is a full member of the United Nations (UN), International Court of Justice (ICJ), United Nations Educational, Scientific and Cultural Organization (UNESCO), International Monetary Fund (IMF), World Health Organization (WHO), World Tourism Organization (WTO), Council of Europe, International Red Cross Organization, the International Institution for the Unification of Private Law (UNIDROIIT), and Interpol, among others. It also cooperates with UNICEF and the United Nations High Commission for Refugees (UNHCR) and has official relations with the European Union (EU). From May-November 1990 and from November 2006-May 2007, San Marino held the semi-annual presidency of the Committee of Ministers of the Council of Europe, headquartered in Strasbourg, France.

U.S.-SAN MARINO RELATIONS

The United States and San Marino enjoy friendly diplomatic relations. San Marino consistently supports U.S. foreign policy positions, as well as U.S. candidates to international organizations. The two countries are on excellent terms. In September 2006 President George W. Bush appointed Ambassador to Italy Ronald P. Spogli to serve concurrently as Ambassador to San Marino. Ambassador Spogli is the first U.S. Ambassador to San Marino in the country's history. In July 2007, Ambassador Paolo Rondelli became San Marino's first ambassador to the U.S. For consular purposes, the republic is within the jurisdiction of the Florence consular district. Consulate officials regularly visit San Marino to carry out diplomatic demarches, represent U.S. interests, and administer consular services.

TRAVEL

Consular Information Sheet—Italy

June 10, 2008

Country Description: Italy is a developed democracy with a modern economy. The Holy See is a sovereign entity that serves as the ecclesiastical, governmental and administrative capital of the Roman Catholic Church, physically located within the State of the Vatican City inside Rome, with a unique, non-traditional economy. San Marino is a developed, constitutional democratic republic, also independent of Italy, with a modern economy. Tourist facilities are widely available.

Entry Requirements: A valid passport is required. Italian authorities may deny entry to travelers who attempt to enter without a valid passport. A visa is not required for tourist stays up to three months. However, for all other purposes, such as work, study, etc., a visa is required and must be obtained from the Italian Embassy or Consulates before entering Italy. For further information concerning visas and entry requirements for Italy, travelers may contact the Embassy of Italy at 3000 Whitehaven St NW, Washington, DC 20008, via telephone at (202) 612-4400 or via the Internet: http://www.ambwashingtondc.esteri.it/ambasciata_washington, or Italian Consulates General in Boston, Chicago, Detroit, Houston, Los Angeles, Miami, Newark, New Orleans, New York, Philadelphia, or San Francisco, accessible through the above Internet site.

Americans staying or traveling within Italy for less than three (3) months are considered non-residents. This includes persons on vacation, those taking professional trips, students registered at an authorized school, or persons performing research or independent study.

As of May 28, 2007, under Italian law (http://www.camera.it/parlam/leggi/07068l.htm), all non-residents are required to complete a dichiarazione di presenza (declaration of presence). Tourists arriving from a non-Schengen-country (e.g. the United States) should obtain a stamp in their passport at the airport on the day of arrival. This stamp is considered the equivalent of the declaration of presence. Tourists arriving from a Schengen-country (e.g. France) must request the declaration of presence form from a local police office (commissariato di zona), police headquarters (questura) or their place of stay (e.g hotel, hostel, campgrounds) and submit the form to the police or to their place of stay within eight business days of arrival. It is important that applicants keep a copy of the receipt issued by the Italian authorities. Failure to complete a declaration of presence is punishable by expulsion from Italy. Additional information may be obtained (in Italian only)

via Internet from the following websites: www.portaleimmigrazione.it and http://www.poliziadistato.it/pds/ps/immigrazione/soggiorno. htm.

Americans staying in Italy for more than three (3) months are considered residents and must obtain a permesso di soggiorno (permit of stay). This includes Americans who will work or transact business and persons who want to simply live in Italy. An application "kit" for the permesso di soggiorno may be requested from one of 14,000 national post offices (Poste Italiane). The kit must then be returned to one of 5,332 designated Post Office acceptance locations. It is important that applicants keep a copy of the receipt issued by the Post Office. Additional information may be obtained from an Italian immigration website via Internet at: http://www.portaleimmigrazione.it. Within 20 days of receiving the permit to stay in Italy, Americans must go to the local Vital Statistics Bureau (Anagrafe of the Comune) to apply for residency. It generally takes one to two months to receive the certificate of residence (Certificato di Residenza).

Safety and Security: There have been occasional episodes of politically motivated violence in Italy, most often connected to Italian internal developments or social issues. At various times, Italian authorities have found bombs outside public buildings, have received bomb threats and were subjects of letter bombs. Firebombs or Molotov cocktails have been thrown at buildings or offices in the middle of the night. These incidents have all been attributed to organized crime or anarchist movements. Americans were not targeted or injured in these instances.

Demonstrations may have an anti-American character. Even demonstrations intended to be peaceful have the potential to turn into confrontational situations and possibly escalate into violence. U.S. citizens traveling or residing in Italy should take common sense precautions and follow news reports carefully in order to avoid demonstrations and to be aware of heightened security and potential delays when they occur. Italy remains largely free of terrorist incidents. However, like other countries in the Schengen area, Italy's open borders with its Western European neighbors allow the possibility of terrorist groups entering/exiting the country with anonymity.

For the latest security information, Americans traveling abroad should regularly monitor the Department of State Burea of Consular Affair's Internet site at http://travel.state.gov, where the current Worldwide Caution Travel Alert, Travel Warnings and Travel Alerts can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S., or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: Italy has a moderate rate of violent crime, some of which is directed towards tourists, principally for motives of theft. Some travelers have been victims of rape and beatings. There have also been incidents of drinks laced with drugs being used by criminals to rob, and in some cases, assault tourists. Many of these incidents have occurred in the vicinity of Rome's Termini train station and at major tourist centers such as Campo de Fiori and Piazza Navona, as well as in Florence and Naples. Criminals using this tactic "befriend" a traveler at a train station, bus stop, restaurant, café or bar in tourist areas, then eventually offer a drink laced with a sleeping drug. When the tourist falls asleep, criminals steal the traveler's valuables. There have also been instances where the victim was assaulted, either physically or sexually.

Americans are urged to exercise caution at train stations and airports, and when frequenting nightclubs, bars and outdoor cafes, particularly at night, because criminals may make initial contact with potential victims in such settings. Individuals under the effect of alcohol may become victims of crime, including robbery, physical and sexual assault, due to their impaired ability to judge situations and make decisions. This is particularly a problem for younger Americans visiting Italy, where the age limit on the sale of alcoholic beverages is lower than in most U.S. states. If you are a victim of such a crime, please file a police report and contact the U.S. Embassy or nearest Consulate. There are also in-country organizations, which provide counseling, medical, and legal assistance to certain crime victims.

Petty crimes such as pick pocketing, theft from parked cars, and purse snatching are serious problems, especially in large cities. Pickpockets sometimes dress like businessmen so tourists should not be lulled into a false sense of security by believing that well-dressed individuals are not potential pickpockets or thieves. Most reported thefts occur at crowded tourist sites, on public buses or trains, or at the major railway stations: Rome's Termini; Milan's Centrale; Florence's Santa Maria Novella; and Naples' Centrale and Piazza Garibaldi. Travelers should also be alert to theft in Milan's Malpensa Airport, particularly at car rental agencies. Clients of Internet cafes in major cities have been targeted. Tourists who have tried to resist petty thieves on motor scooters have suffered broken arms and collarbones.

Thieves in Italy often work in groups or pairs. Pairs of accomplices or groups of street urchins are known to divert tourists' attention so that another can pickpocket them. In one particular routine, one thief throws trash, waste or ketchup at the victim; a second thief assists the victim in cleaning up the mess; and the third discreetly takes the victim's belongings. Criminals on crowded public transportation slit the bottoms of purses or bags with a razor blade or sharp knife, then remove the contents. Theft of small items such as radios, luggage, cameras, briefcases, and even cigarettes from parked cars is a major problem.

Carjackings and thefts have also been reported from occupied vehicles waiting in traffic or stopped at traffic lights. Vehicles parked near beaches during the summer have been broken into and items stolen. Robbers take

items from cars at gas stations often by smashing car windows. In a scam practiced on the highways, one thief signals a flat tire to the driver of another car and encourages the driver to pull over. Often, the tire has been punctured by an accomplice, while in other instances, there may, in fact, be nothing wrong with the vehicle.

When the driver stops, one thief helps change the tire, while the other takes the driver's belongings. Use particular caution driving at night on highways, when there may be a greater incidence of robbery attempts. There have been occasional reports of break-ins of rental cars driven by Americans when the precautions mentioned above were not followed during stops at highway service areas.

On trains, a commonly reported trick involves one or more persons who pretend to befriend a traveler and offer drugged food or drink. Also, thieves have been known to impersonate police officers to gain the confidence of tourists. The thief shows the prospective victim a circular plastic sign with the words "police" or "international police." If this happens, the tourist should insist on seeing the officer's identification card (documento), as impersonators tend not to carry forged documents. Tourists should immediately report thefts or other crimes to the local police.

The U.S. Secret Service in Rome has been advised of, and is assisting Italian Law Enforcement authorities in investigating, an increase in the appearance of ATM skimming devices. These devices are attached to legitimate bank ATMs, usually located in tourist areas, and capture the account information stored electronically on the card's magnetic strip. The devices consist of a card reader installed over the legitimate reader and a pin-hole video camera mounted above the keypad that records the customer's PIN. ATMs with skimming devices installed may also allow normal transactions to occur. The victim's information is sold, traded on-line or encoded on another card such as a hotel key card to access the compromised account. Here are some helpful hints to protect yourself and to identify skimming devices:

- Use ATMs located in well-lit public areas, or secured inside the bank/business
- Cover the keypad with one hand as you enter your PIN
- Look for gaps, tampered appearance, or other irregularities between the metal faceplate of the ATM and the card reader
- Avoid card readers that are not flush with the face of the ATM
- Monitor your account statements for unauthorized transactions

Organized criminal groups operate throughout Italy, but are more prevalent in the south. They have occasionally resorted to violence to intimidate or to settle disputes. Though the activities of such groups are not generally targeted at tourists, visitors should be aware that innocent bystanders could be injured.

In many countries around the world, counterfeit and pirated goods are widely available. Transactions involving such products may be illegal under local law. In addition, bringing them back to the United States may result in forfeitures and/or fines. More information on this serious problem is available at http://www.cybercrime.gov/18usc2320.htm.

According to Italian Law (Law 80 of May 14, 2005), anyone caught buying counterfeit goods (for example, DVDs, CDs, watches, purses, bags, belts, sunglasses, etc.) is subject to a fine of no less than EUR 1,000. Police in major Italian cities enforce this law to varying degrees. Travelers are advised to purchase products only from stores and other licensed retailers to avoid unknowingly buying counterfeit and illegal merchandise.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, contact family members or friends and explain how funds could be transferred. Lost or stolen credit cards present risk of identity theft and should be cancelled immediately. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

Medical Facilities and Health Information: Medical facilities are available, but may be limited outside urban areas. Public hospitals, though generally free of charge for emergency services, sometimes do not maintain the same standards as hospitals in the United States, so travelers are encouraged to obtain insurance that would cover a stay in a private Italian hospital or clinic. It is almost impossible to obtain an itemized hospital bill from public hospitals, as required by many U.S. insurance companies, because the Italian National Health Service charges one inclusive rate (care services, bed and board). For information on avian influenza (bird flu), please refer to the Department of State's Avian Influenza Fact Sheet, available at http://travel.state.gov/travel/tips/health/health_1181.html.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's web site at http://wwwn.cdc.gov/travel. For information about outbreaks of infectious diseases abroad, consult the World Health Organization's web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith.

In Naples and the region of Campania, a perennial problem exists due to periodic garbage collection strikes and inadequate dump facilities. Residents often resort to burning the garbage which can give off toxic substances that can aggravate respiratory problems. Warm summer temperatures further aggravate this problem.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Italy is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

Streets in historic city centers are often narrow, winding and congested. Motor scooters are very popular and drivers often see themselves as exempt from conventions that apply to automobiles. Travelers who rent scooters should be particularly cautious. Pedestrians and drivers should be constantly alert to the possibility of scooters' sudden presence. Throughout Italy, the number of pedestrian deaths and injuries are increasing. Most deaths and injuries involve pedestrians or cyclists who are involved in collisions with scooters or other vehicles. U.S. citizens should remain vigilant and alert while walking or cycling near traffic. Pedestrians should be careful, as sidewalks, especially in major cities, can be extremely congested and uneven, and drivers of bicycles, motorcycles and other vehicles routinely ignore traffic signals and traffic flows, routinely park and even drive on sidewalks. For safety, pedestrians should look carefully in both directions before crossing streets, even when using a marked crosswalk with a green "avanti" ("walk") light illuminated.

Traffic lights are limited, often disobeyed, and a different convention of right-of-way is observed. Italy has over 5,600 kilometers (3,480 mi.) of "Autostrada," or superhighways. Commercial and individual vehicles travel and pass on these well-maintained roads at very high speeds. Accidents occur in which contributing factors include excessive speed, alcohol/drug use and/or sleepiness of long-distance drivers. Italy has one of the highest rates of car accident deaths in the European Union.

In rural areas, a wide range of speed on highways makes for hazardous driving. Roads are generally narrow and often have no guardrails. Travelers in northern Italy, especially in winter, should be aware of fog and poor visibility, responsible for multiple-car accidents each year. Most Italian automobiles are equipped with special fog lights. Roadside assistance in Italy is excellent on the well-maintained toll roads, but limited on secondary roads. Use of safety belts and child restraining devices is mandatory and headlights should be on at all times outside of urban areas.

U.S. citizens driving in Italy are reminded that they must adhere to the local driving laws and regulations. Vehicle traffic in some historic downtown areas of cities and towns throughout Italy is limited by a system of permits (called "ZTL" and functioning the same way as an "EasyPass" system in the U.S. might on the freeway). Cameras record the license plates of cars driving in parts of the city that require a permit. Although most of the automated verification stations are clearly marked, if a driver passes one it is impossible to know at the time that a violation occurred or has been recorded. Violators are not pulled over or stopped, and there is no personal contact with a police officer. Whenever possible, the fines imposed for these violations are forwarded to the driver's home in the U.S. to request payment. The fines are cumulative for each time a driver passes a control point. A similar system of automated traffic control cameras is in place in many parts of the highway system and is used to ticket speeding violations.

U.S. citizens driving in Italy should also note that, according to Italian regulation, if a resident of a non-European Union country (e.g. the United States) violates a traffic law (e.g. for speeding), the violator must pay the fine at the time the violation occurs to the police officer issuing the ticket. If the citizen does not or cannot pay the fine at the time, Italian regulation allows the police officer to confiscate the offender's vehicle (even if the vehicle is a rental vehicle.)

For specific information concerning Italian driving permits, vehicle inspection, road tax and mandatory insurance, contact the Italian Government Tourist Board (ENIT) offices via the Internet at: http://www.enit.it, tel: 212-245-4822 or the A.C.I. (Automobile Club Italiano) at Via Magenta 5, 00185 Rome, tel: 39-06-4477. For information on obtaining international drivers licenses, contact AAA or the American Automobile Touring Alliance. Visit the website of the country's national tourist office online at www.italiantourism.com and national authority responsible for road safety at www.infrastrutturetrasporti.it.

Aviation Safety Oversight: The U.S. Federal Aviation Administration (FAA) has assessed the Government of Italy's Civil Aviation Authority as being in compliance with International Civil Aviation Organization (ICAO) aviation safety standards for oversight of Italy's air carrier operations. For more information, travelers may visit the FAA's web site at http://www.faa.gov.

Special Circumstances: Strikes and other work stoppages occur frequently in the transportation sector (national airlines, airports, trains, and bus lines). Most are announced in advance and are of short duration. Information on strikes may be found at http://www.infrastrutture.gov.it/page/NuovoSito/site.php. Reconfirmation of domestic and international flight reservations is highly recommended.

U. S citizens using public transportation while in Italy are reminded that they must adhere to local transporta-

tion laws and regulations. Travelers must purchase train tickets and validate them by punching them in validating machines usually located near the entrance of train tracks prior to boarding. Failure to follow this procedure may result in an on-the-spot fine by an inspector on the train. Travelers must purchase bus tickets prior to boarding and validate them immediately after boarding. Tickets may be purchased at tobacco stores or kiosks. Failure to follow this procedure may result in an immediate fine imposed by an inspector on the bus. If the violator does not pay the fine on the spot, it will automatically double and will be forwarded to the violator's home address.

Disaster Preparedness: Several major earthquake fault lines cross Italy. Principal Italian cities, with the exception of Naples, do not lie near these faults, but smaller tourist towns, like Assisi, do and have suffered earthquakes. General information about disaster preparedness is available via the Internet from the U.S. Federal Management Agency (FEMA) at http://www.fema.gov. Detailed information on Italy's earthquake fault lines is available from the U.S. Geological Survey (USGS) at http://www.usgs.gov.

Italy also has several active volcanoes generating geothermal events. Mt. Etna, on the eastern tip of the island of Sicily, has been erupting intermittently since 2000. Mt. Vesuvius, located near Naples, is currently capped and not active. Activity at Mt. Vesuvius is monitored by an active seismic network and sensor system, and no recent seismic activity has been recorded. Two of Italy's smaller islands, Stromboli and Vulcano in the Aeolian Island chain north of Sicily, also have active volcanoes with lava flows. Detailed information on volcano activity in Italy is available from the U.S. Geological Survey (USGS) at http://www.usgs.gov.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations. They may differ significantly from those of the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating Italian law, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use or trafficking in illegal drugs in Italy are severe and convicted offenders can expect long jail sentences and heavy fines. Engaging in illicit sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

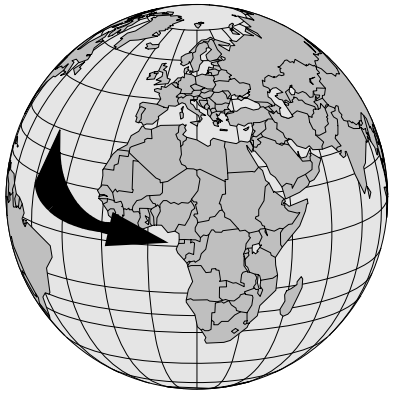
Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy and Consulate Locations: Americans living or traveling in Italy are encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration website, https://travelregistration.state.gov, and to obtain updated information on travel and security within Italy. Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency. The U.S. Embassy is located at Via V. Veneto 119/A, tel: 39-06-46741 and fax: 39-06-4674-2217; Internet address: http://italy.usembassy.gov.

The U.S. Consulates are located in:

Florence: Lungarno Amerigo Vespucci 38, tel: 39-055-266-951, consular fax: 399-055-215-550;

Milan: Via Principe Amedeo 2/10, tel: 39-02-290-351, and fax: 39-02-290-35-273;



Naples: Piazza della Repubblica, tel: 39-081-583-8111, and consular fax: 39-081-583-8275.

There are U.S. Consular Agents located in:

Genoa: Via Dante 2, tel: 39-010-584-492, and fax: 39-010-553-3033;

Palermo: Via Vaccarini 1, tel: 39-091-305-857, and fax: 39-091-625-6026;

Venice: Viale Galileo Galilei, 30, tel: 39-041-541-5944, and fax: 39-041-541-6654.

SÃO TOMÉ & PRÍNCIPE

Compiled from the December 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Democratic Republic of São Tomé and Príncipe

PROFILE

Geography

Location: Western Africa; islands straddling the equator in the Gulf of Guinea west of Gabon.

Area: 1,001 sq. km. (386 sq. mi.); about the size of metropolitan Indianapolis, or one-third the size of Rhode Island.

Cities: Capital—São Tomé. Other cities—Trinidade, Santana, Angolares, Neves, Santo Antonio.

Terrain: Two small, volcanic islands.

Climate: Tropical, with wet and dry seasons, influenced by the mountainous topography.

People

Nationality: Noun and adjective—São Toméan(s).

Population: (July 2008 est.) 206,178.

Annual growth rate: (2008 est.) 3.116%.

Ethnic groups: Mixed African, Portuguese-African.

Religions: Christian (Roman Catholic, Evangelical Protestant, Seventh-day Adventist) 80%.

Languages: Portuguese (official).

Education: Literacy (census 2001)—68.1%. Years compulsory—to secondary level.

Health: Life expectancy (2008 est.)—68 yrs. Infant mortality rate (2008 est.)—38.36/1,000.

Work force: (by household, 2000 UN Development Program est.) Agriculture—15.3%; industry, commerce, services—36.5%; government—11.5%.

Government

Type: Republic.

Independence: July 12, 1975 (from Portugal).

Constitution: November 5, 1975; revised September 1990, following a national referendum, revised again January 2003.

Government branches: Executive—president and prime minister. Legislative—National Assembly. Judicial—Supreme Court.

Political subdivisions: Seven counties, six on São Tomé and one on Príncipe.

Political parties: Movement for the Liberation of Sao Tome and Principe (MLSTP), Party of Democratic Convergence (PCD), Independent Democratic Action (ADI), Democratic Movement Force of Change (MDFM), Christian Democratic Front-Socialist Union Party (FDC-PSU), Santomean Workers Party (PTS); Popular Party of Progress (PPP), and National Union for Democracy and Progress (UNDP).

Suffrage: Universal adult.

Economy

GDP: (2007 est.) $119 million.

Annual real GDP growth rate: (2007 est.) 6.0%.

Per capita GDP: (2007 est.) $881.

Consumer price inflation: (2007 est.) 19.9%.

Natural resources: Agricultural products, fish, petroleum (not yet exploited).

Agriculture: (16.6% of GDP, 2006) Products—cocoa, coconuts, copra, palm kernels, cinnamon, pepper, coffee, bananas, beans, poultry. Cultivated land—484 sq. kilometers.

Industry: (15.3% of GDP, 2006) Types—light construction, shirts, soap, beer, fisheries, shrimp processing, palm oil.

Trade: Exports (2007 est.)—$4 million (f.o.b.): 95% cocoa, copra, palm kernels, coffee. Major markets—Portugal, Netherlands, Spain, Germany, China. Imports (2007 est.)—$73 million (f.o.b.): food, fuel, machinery and electrical equipment. Major suppliers—Portugal (43%), France (16%), U.K. (14%).

Total external debt: (2007 est.) none.

Fiscal year: Calendar year.

GEOGRAPHY

The islands of São Tomé and Príncipe, situated in the equatorial Atlantic about 300 and 250 kilometers (200 mi. and 150 mi.), respectively, off the

northwest coast of Gabon, constitute Africa's smallest country. Both are part of an extinct volcanic mountain range, which also includes the island of Bioko in Equatorial Guinea to the north and Mount Cameroon on the African west coast.

São Tomé is 50 kilometers (31 mi.) long and 32 kilometers (20 mi.) wide and the more mountainous of the two islands. Its peaks reach 2,024 meters (6,640 ft.). Príncipe is about 30 kilometers (19 mi.) long and 6 kilometers (4 mi.) wide. Swift streams radiating down the mountains through lush forest and cropland to the sea cross both islands.

At sea level, the climate is tropical—hot and humid with average yearly temperatures of about 27ºC (80ºF) and little daily variation. At the interior's higher altitudes, the average yearly temperature is 20ºC (68ºF), and nights are generally cool.

Annual rainfall varies from 500 centimeters (200 in.) on the southwestern slopes to 100 centimeters (40 in.) in the northern lowlands. The rainy season runs from October to May.

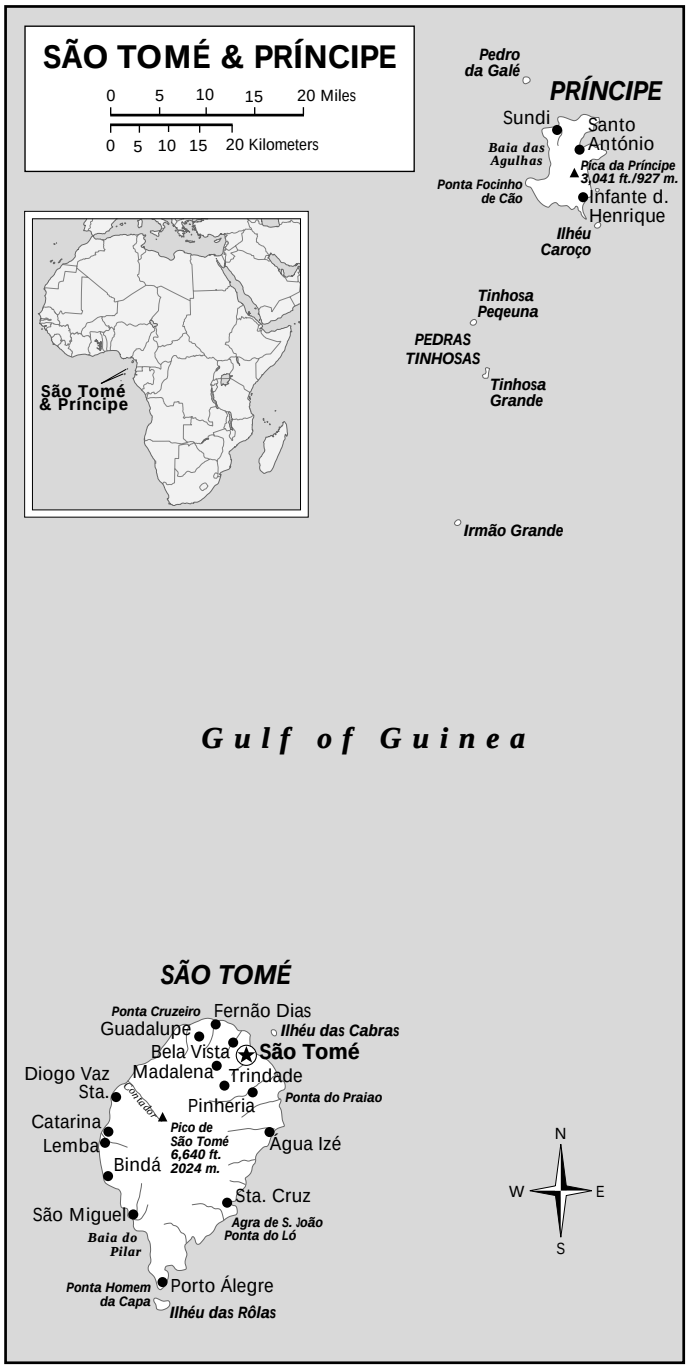
PEOPLE

Of São Tomé and Príncipe's total population, about 137,500 live on São Tomé and 6,000 on Príncipe. All are descended from various ethnic groups that have migrated to the islands since 1485. Six groups are identifiable:

- Mestico, or mixed-blood, descendants of African slaves brought to the islands during the early years of settlement from Benin, Gabon, and Congo (these people also are known as filhos da terra or "sons of the land");
- Angolares, reputedly descendants of Angolan slaves who survived a 1540 shipwreck and now earn their livelihood fishing;
- Forros, descendants of freed slaves when slavery was abolished;
- Servicais, contract laborers from Angola, Mozambique, and Cape Verde, living temporarily on the islands;
- Tongas, children of servicais born on the islands; and
- Europeans, primarily Portuguese.

In the 1970s, there were two significant population movements—the exodus of most of the 4,000 Portuguese residents and the influx of several hundred São Toméan refugees from Angola. The islanders have been absorbed largely into a common Luso-African culture. Almost all belong to the Roman Catholic, Evangelical Protestant, or Seventh-day Adventist Churches, which in turn retain close ties with churches in Portugal.

HISTORY



The islands were first discovered by Portuguese navigators between 1469 and 1472. The first successful settlement of São Tomé was established in 1493 by Alvaro Caminha, who received the land as a grant from the Portuguese crown. Príncipe was settled in 1500 under a similar arrangement. By the mid-1500s, with the help of slave labor, the Portuguese settlers had turned the islands into Africa's foremost exporter of sugar. São Tomé and Príncipe were taken over and administered by the Portuguese crown in 1522 and 1573, respectively.

Sugar cultivation declined over the next 100 years, and by the mid-1600s, São Tomé was little more than a port of call for bunkering ships. In the early 1800s, two new cash crops, coffee and cocoa, were introduced. The rich volcanic soils proved well suited to the new cash crop industry, and soon extensive plantations (rocas), owned by Portuguese companies or absentee landlords, occupied almost all of the good farmland. By 1908, São Tomé had become the world's largest producer of cocoa, still the country's most important crop.

The rocas system, which gave the plantation managers a high degree of authority, led to abuses against the African farm workers. Although Portugal officially abolished slavery in 1876, the practice of forced paid labor continued. In the early 1900s, an internationally publicized controversy arose over charges that Angolan contract workers were being subjected to forced labor and unsatisfactory working conditions. Sporadic labor unrest and dissatisfaction continued well into the 20th century, culminating in an outbreak of riots in 1953 in which several hundred African laborers were killed in a clash with their Portuguese rulers. This "Batepa Massacre" remains a major event in the colonial history of the islands, and the government officially observes its anniversary.

By the late 1950s, when other emerging nations across the African Continent were demanding independence, a small group of São Toméans had formed the Movement for the Liberation of São Tomé and Príncipe (MLSTP), which eventually established its base in nearby Gabon. Picking up momentum in the 1960s, events moved quickly after the overthrow of the Salazar and Caetano dictatorship in Portugal in April 1974. The new Portuguese regime was committed to the dissolution of its overseas colonies; in November 1974, their representatives met with the MLSTP in Algiers and worked out an agreement for the transfer of sovereignty. After a period of transitional government, São Tomé and Príncipe achieved independence on July 12, 1975, choosing as its first President the MLSTP Secretary General, Manuel Pinto da Costa.

In 1990, São Tomé became one of the first African countries to embrace democratic reform. Changes to the constitution, including the legalization of opposition political parties, led to nonviolent, free, and transparent elections in 1991. Miguel Trovoada, a former Prime Minister who had been in exile since 1986, returned as an independent candidate and was elected President. Trovoada was reelected in São Tomé's second multiparty presidential election in 1996.

The Party of Democratic Convergence (PCD) toppled the MLSTP to take a majority of seats in the National Assembly, with the MLSTP becoming an important and vocal minority party. Municipal elections followed in late 1992, in which the MLSTP came back to win a majority of seats on five of seven regional councils. In early legislative elections in October 1994, the MLSTP won a plurality of seats in the Assembly. It regained an outright majority of seats in the November 1998 elections. The Government of São Tomé fully functions under a multiparty system. Presidential elections were held in July 2001. The candidate backed by the Independent Democratic Action Party, Fradique de Menezes, was elected in the first round and inaugurated on September 3. Parliamentary elections held in March 2002 led to a coalition government after no party gained a majority of seats. An attempted coup d'etat in July 2003 by a few members of the military and the Christian Democratic Front (mostly representative of former São Toméan volunteers from the apartheid-era Republic of South African Army) was reversed by international, including American, mediation without bloodshed. In September 2004, President de Menezes dismissed the Prime Minister and appointed a new cabinet, which was accepted by the majority party. In June 2005, following public discontent with oil exploration licenses granted in the Joint Development Zone (JDZ) with Nigeria, the MLSTP, the party with the largest number of seats in the National Assembly, and its coalition partners threatened to resign from government and force early parliamentary elections. After several days of negotiations, the President and the MLSTP agreed to form a new government and to avoid early elections. The new government included Maria Silveira, the well-respected head of the Central Bank, who served concurrently as Prime Minister and Finance Minister.

The March 2006 legislative elections went forward without a hitch, with President Menezes' party, the Movement for the Democratic Force of Change (MDFM), winning 23 seats and taking an unexpected lead ahead of MLSTP. MLSTP came in second with 19 seats, and the Independent Democratic Alliance (ADI) came in third with 12 seats. Amidst negotiations to form a new coalition government, President Menezes nominated a new prime minister and cabinet.

July 30, 2006 marked São Tomé and Príncipe's fourth democratic, multiparty presidential elections. The elections were regarded by both local, and international observers as being free and fair and Incumbent Fradique de Menezes was announced the winner with approximately 60 % of the vote. Voter turnout was relatively high with 63% of the 91, 000 registered voters casting ballots.

In November 2007, President de Menezes dismissed and replaced several ministers in his government following significant public criticism of souring economic conditions and the government's handling of recurring

mutinies by dissident police officers. The changes took place peacefully and without incident. During another government shakeup in February 2008, President de Menezes appointed Patrice Trovoada as Prime Minister.

On May 20, 2008 the government collapsed after losing a parliamentary vote of confidence. The opposition Movement for the Liberation of Sao Tome and Principe-Social Democratic Party (MLSTP-PSD), with the support of Party of Democratic Convergence (PCD), asserted that Prime Minister Trovoada had failed to deliver on reforms that he promised when he entered office. Joachim Rafael Branco became Prime Minister in June 2008.

GOVERNMENT

Following the promulgation of a new constitution in 1990, São Tomé and Príncipe held multiparty elections for the first time since independence. Shortly after the constitution took effect, the National Assembly formally legalized opposition parties. Independent candidates also were permitted to participate in the January 1991 legislative elections. The 55-member National Assembly is the supreme organ of the state and the highest legislative body. Its members are elected for a 4-year term and meet semiannually.

The president of the republic is elected to a 5-year term by direct universal suffrage and a secret ballot, and may hold office up to two consecutive terms. Candidates are chosen at their party's national conference or individuals may run independently. A presidential candidate must obtain an outright majority of the popular vote in either a first or second round of voting in order to be elected president. The prime minister is named by the president but must be ratified by the majority party and thus normally comes from a list of its choosing. The prime minister, in turn, names the 14 members of the Cabinet. Justice is administered at the highest level by the Supreme Court. Formerly responsible to the National Assembly, the judiciary is now independent under the current constitution. Administratively, the country is divided into seven municipal districts, six on São Tomé and one comprising Príncipe. Governing councils in each district maintain a limited number of autonomous decision-making powers, and are reelected every 5 years.

Principal Government Officials

Last Updated: 11/12/08

Pres.: **Fradique DE MENEZES**
Prime Min.: **Joachim Rafael BRANCO**
Min. of Agriculture, Rural Development, & Fisheries: **Jose Luis Xavier MENDES**
Min. of Commerce, Tourism, & Industry: **Celestino Da Graca ANDRADA**
Min. of Education & Culture: **Jorge Lopes Bom JESUS**
Min. of Foreign Affairs & Cooperation: **Carlos Alberto Pires TINY**
Min. of Health: **Arlindo de CARVALHO**
Min. of Internal Affairs & Civilian Protection: **Raul Antonio Da Costa CRAVID**
Min. of Justice, Govt. Reform, & Parliamentary Affairs: **Justino VEIGA**
Min. of Labor, Solidarity, Women, & Family Affairs: **Maria Tome De ARAUJO**
Min. of National Defense & Internal Order: **Elsa Texeira De Barros PINTO**
Min. of Natural Resources & Environment: **Agostinho Da Silveira RITA**
Min. of Planning & Finance: **Angela Viegas SANTIAGO**
Min. of Public Works & Infrastructure, Urban Development, Transportation, & Communications: **Benjamin Vera CRUZ**
Min. of State for Press, Youth, & Sports: **Maria De Cristo Da Costa CARVALHO**
Governor, Bank of Sao Tome & Principe:
Ambassador to the US: **Ovidio Manuel BARBOSA PEQUENO**
Permanent Representative to the UN, New York:

The São Tomé and Príncipe Mission to the United Nations, which also is the São Toméan Embassy to the United States, is located at 400 Park Avenue, 7th floor, New York, NY 10022 (tel. 212-317-0580; email stp@un.int).

POLITICAL CONDITIONS

Since the constitutional reforms of 1990 and the elections of 1991, Sao Tome has made great strides toward developing its democratic institutions and further guaranteeing the civil and human rights of its citizens. Sao Tomeans have freely changed their government through peaceful and transparent elections. And while there have been disagreements and political conflicts within the branches of government and the National Assembly, the debates have been carried out and resolved in open, democratic, and legal fora, in accordance with the provisions of Sao Tomean law. A number of political parties actively participate in government and openly express their views. Freedom of the press is respected, and there are several independent newspapers in addition to the government bulletin. The government's respect for human rights is exemplary; the government does not engage in repressive measures against its citizens, and respect for individuals' rights to due process and protection from government abuses is widely honored. Freedom of expression is accepted, and the government has taken no repressive measures to silence critics. The ongoing negotiations to establish a new government may create a level of paralysis in the government's operations, but thus far daily activities are continuing.

ECONOMY

Since the 1800s, the economy of São Tomé and Príncipe has been based on plantation agriculture. At the time of independence, Portuguese-owned plantations occupied 90% of the cultivated area. After independence, control of these plantations passed to various state-owned agricultural enterprises, which have since been privatized. The dominant crop on São Tomé is cocoa, representing about 95% of exports. Other export crops include copra, palm kernels, and coffee.

Domestic food-crop production is inadequate to meet local consumption, so the country imports some of its food. Efforts have been made by the government in recent years to expand food production, and several projects have been undertaken, largely financed by foreign donors.

Other than agriculture, the main economic activities are fishing and a small industrial sector engaged in processing local agricultural products and producing a few basic consumer goods. The scenic islands have potential for tourism, and the government is attempting to improve its rudimentary tourist industry infrastructure. The government sector accounts for about 11% of employment.

Following independence, the country had a centrally directed economy with most means of production owned and controlled by the state. The original constitution guaranteed a 'mixed economy,' with privately owned cooperatives combined with publicly owned property and means of production. In the 1980s and 1990s, the economy of São Tomé encountered major difficulties. Economic growth stagnated, and cocoa exports dropped in both value and volume, creating large balance-of-payments deficits. Efforts to redistribute plantation land resulted in decreased cocoa production. At the same time, the international price of cocoa slumped.

In response to its economic downturn, the government undertook a series of far-reaching economic reforms. In 1987, the government implemented an International Monetary Fund (IMF) structural adjustment program, and invited greater private participation in management of the parastatals, as well as in the agricultural, commercial, banking, and tourism sectors. The focus of economic reform since the early 1990s has been widespread privatization, especially of the state-run agricultural and industrial sectors.

The São Toméan Government has traditionally been reliant on foreign assistance from various donors, including the UN Development Program, the World Bank, the European Union (EU), Portugal, Taiwan, and the African Development Bank. São Tomé qualified for debt relief when it reached decision point under the IMF's Heavily Indebted Poor Countries Initiative (HIPC) in December 2000, but went off track on its poverty reduction program in early 2001. After four years and satisfactory performance on an interim staff-monitored program, the IMF approved a new three-year $4.3 million Poverty Reduction and Growth Facility (PRGF) program for São Tomé in September 2005. The ambitious new program aims to reduce inflation to a single-digit number, address the country's macroeconomic imbalances, and substantially reduce poverty.

In 2001, São Tomé and Nigeria reached agreement on joint exploration for petroleum in waters claimed by the two countries. After a lengthy series of negotiations, in April 2003 the joint development zone (JDZ) was opened for bids by international oil firms. The JDZ was divided into 9 blocks; the winning bids for block one, ChevronTexaco, ExxonMobil, and the Norwegian firm Equity Energy, were announced in April 2004, with São Tomé to take in 40% of the $123 million bid, and Nigeria the other 60%. Blocks 2 through 6 were allocated in June 2005. Nigeria and São Tomé signed production sharing contracts with the winning bidders in November 2005.

Chevron became the first firm to start exploratory drilling in January 2006. Portugal remains one of São Tomé's major trading partners, particularly as a source of imports. Food, manufactured articles, machinery, and transportation equipment are imported primarily from the EU.

FOREIGN RELATIONS

Until independence in 1975, São Tomé and Príncipe had few ties abroad except those that passed through Portugal. Following independence, the new government sought to expand its diplomatic relationships. A common language, tradition, and colonial experience have led to close collaboration between São Tomé and other ex-Portuguese colonies in Africa, particularly Angola. São Toméan relations with other African countries in the region, such as Gabon and the Republic of the Congo, also are good. In December 2000, São Tomé signed the African Union treaty; the National Assembly later ratified it.

The São Toméan Government has generally maintained a foreign policy based on nonalignment and cooperation with any country willing to assist in its economic development. In recent years, it also has increasingly emphasized ties to the United States and western Europe.

U.S.-SAO TOMEAN RELATIONS

The United States was among the first countries to accredit an ambassador to São Tomé and Príncipe. The U.S. Ambassador based in Gabon is accredited to São Tomé on a non-resident basis.

The Ambassador and Embassy staff make regular visits to the islands. The first São Toméan Ambassador to the United States, resident in New York City, was accredited in 1985. In 1986, São Toméan President da Costa visited the United States and met with then-Vice President George H.W. Bush.

U.S. relations with São Tomé are excellent. In 1992, the Voice of America (VOA) and the Government of São Tomé signed a long-term agreement for the establishment of a relay transmitter station in São Tomé; VOA currently broadcasts to much of Africa from this facility.

The U.S. Government also maintains a number of smaller assistance programs in São Tomé, administered through non-governmental organizations or the Embassy in Libreville.

TRAVEL

Consular Information Sheet

August 15, 2008

Country Description: São Tomé and Príncipe is a developing nation, comprising the islands of São Tomé and Príncipe, located off the western coast of central Africa. Facilities for tourism are limited, but adequate.

Entry Requirements: A passport, visa, and evidence of yellow fever vaccination are required for entry. Visas must be obtained in advance. Travelers can obtain visas and the latest information on entry requirements from the Permanent Mission of São Tomé and Príncipe to the UN, 400 Park Ave., 7th Floor, New York, NY 10022, telephone (212) 317-0533, fax (212) 317-0580. Travelers transiting through Gabon can also obtain visas and the latest information on entry requirements from the São Tomé and Príncipe Embassy to Gabon, B.P. 49, Libreville, Gabon, telephone (241) 72-15-27, fax (241) 72-15-28. Overseas, inquiries should be made at the nearest São Toméan and Príncipian embassy or consulate.

Safety and Security: Americans should maintain security awareness at all times. There have been recent, isolated incidents of civil unrest in the capital city. Large gatherings or any other events where crowds have congregated to demonstrate or protest should be avoided.

Americans may contact the U.S. Embassy in Gabon for the most up-to-date information on safety and security. The Embassy informs the registered resident U.S citizen community of security matters through a warden system. In the event of a fire, dial 112 on the telephone.

For the latest security information, Americans traveling abroad should regularly monitor the Department of State, Bureau of Consular Affairs' web site, where the current Travel Warnings and Travel Alerts including the Worldwide Caution Travel Alert, can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S. and Canada, or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

For further information on safety and security in Sao Tome & Principe, please visit the Overseas Security Advisory Council (OSAC) web site at www.osac.gov, and use the "Jump to Country" pull-down menu to reach the Sao Tome and Principe Country Profile.

Crime: Crimes such as burglary, pick-pocketing and armed robberies in homes do occur on the islands, particularly around the winter holidays. Such crimes can occur anywhere, but are more prevalent in public places, such as in markets, on the streets, or near hotels. Do not display large amounts of cash in public. If possible, leave valuables and extra cash at your hotel while sightseeing or visiting the beach. When dining in restaurants or visiting markets, it is recommended that one carry only minimal amounts of cash and avoid wearing excessive amounts of jewelry. If involved in an attempted robbery or carjacking, Americans are encouraged to comply with the attacker to avoid injury and to report all incidents to the police and the U.S. Embassy in Libreville. Police response time to reports of crime can be slow.

While scams and confidence schemes are not common, travelers should exercise caution. The prevalence of sexual assault is low, and no specific groups seem to be targets for victimization.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

The local equivalent to the "911" emergency line in São Tomé and Príncipe to reach the police is 22-22-22.

Medical Facilities and Health Information: Medical facilities in São Tomé and Príncipe are extremely limited. There is one hospital in the country, on the island of São Tomé, and several foreign-run clinics. However, the level of care is low. For all but minor medical needs, it is necessary to travel to Libreville (Gabon), Lisbon (Portugal), or elsewhere. Additionally, some medicines are not available; travelers should carry properly labeled required medicines and medications with them.

The U.S. Department of State is unaware of any HIV/AIDS entry restrictions for visitors to or foreign residents of São Tomé and Príncipe. Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be

obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's Internet site at http://wwwn.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith/en.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning São Tomé and Príncipe is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

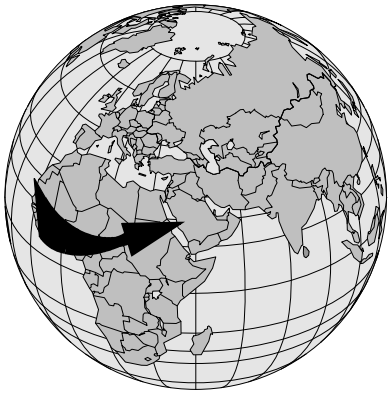
Streets in the city of São Tomé are paved, but large potholes are common. Major roads outside of town are also paved. Pedestrians, bicyclists, motorcyclists, and animals on the roads can be a major hazard. Outside of the city of São Tomé, there are no sidewalks or shoulders along the side of roads. In rural areas outside of the capital city, drivers are expected to honk the car's horn periodically as a warning signal of their approach. There is no street lighting outside of the capital. Some roads may be impassable without a four-wheel-drive vehicle.

Only a few miles of improved roads exist on the island of Príncipe; the conditions are similar to those found on São Tomé. Although taking taxis is fairly safe, it is advisable to rent a car instead. If you must take a taxi, exercise caution, and negotiate the rate before entering the taxi.

Aviation Safety Oversight: As there is no direct commercial air service between the United States and São Tomé and Príncipe, the U.S. Federal Aviation Administration (FAA) has not assessed São Tomé and Príncipe's Civil Aviation Authority for compliance with International Civil Aviation Organization (ICAO) aviation safety standards. For more information, travelers may visit the FAA's web site at http://www.faa.gov.

Special Circumstances: São Tomé and Príncipe is a Lusophone country; travelers who do not speak Portuguese may face difficulties associated with the language barrier.

Americans should always carry identification with them in the event they are stopped by police. Taking photographs of military or government buildings is strictly forbidden.



São Tomé and Príncipe is largely a cash economy. Credit cards are accepted at only a few major hotels. Travelers' checks can be cashed or dollars exchanged for dobra at hotels and at one private bank in São Tomé city, but transaction fees can be high. U.S. dollars are widely accepted at tourist establishments.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating São Tomé and Príncipian laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in São Tomé and Príncipe are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Although there is no U.S. Embassy in São Tomé and Príncipe, the U.S. Embassy in Libreville, Gabon is also accredited to São Tomé and Príncipe and can provide assistance to Americans there. All Americans in São Tomé and Príncipe are encouraged to register with the U.S. Embassy in Gabon through the State Department's travel registration web site so that they can obtain updated information on travel and security within São Tomé and Príncipe. Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate. By registering, Americans make it easier for the Embassy or Consulate to contact them in case of emergency.

The U.S. Embassy is located in downtown Libreville on the Boulevard du Bord de Mer. The mailing address is Centre Ville, B.P. 4000, Libreville, Gabon. The telephone numbers are (241) 76-20-03 or (241) 76-20-04. The fax numbers are (241) 74-55-07 or (241) 76-88-49 and the web site is http://libreville.usembassy.gov.

SAUDI ARABIA

Compiled from the January 2009 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Kingdom of Saudi Arabia

PROFILE

Geography

Area: 1,960,582 sq. km. (784,233 sq. mi.), slightly more than one-fifth the size of the continental United States.
Cities: (2006 est.) Capital—Riyadh (pop. 4.3 million). Other cities—Jeddah (3.4 million), Makkah, (1.6 million), Dammam/Khobar/Dhahran, (1.6 million).
Terrain: Primarily desert with rugged mountains in the southwest.
Climate: Arid, with great extremes of temperature in the interior; humidity and temperature are both high along the coast.

People

Nationality: Noun—Saudi(s). Adjective—Saudi Arabian or Saudi.
Population: (July 2008 est.) 28 million (22.6 million Saudis, 5.8 million foreign nationals).
Annual growth rate: (2008 est.) 1.9%.
Ethnic groups: Arab (90% of native pop.), Afro-Asian (10% of native pop.).
Religions: Islam.
Languages: Arabic (official).
Education: Literacy—Total: 78.8% (male 84.7%, female 70.8%).
Health: Infant mortality rate (2008 est.)—12.01/1,000. Life expectancy—male 74 years, female 78 years.
Work force: 6.49 million, about 35% foreign workers (2005 est.); industry—25%; services (including government)—63%; agriculture—12%.

Government

Type: Monarchy with Council of Ministers and Consultative Council.
Unification: September 23, 1932.
Constitution: The Holy Qur'an (governed according to Islamic law), Shari'a, and the Basic Law.
Government branches: Executive—King (chief of state and head of government). Legislative—a Consultative Council with advisory powers was formed September 1993. Judicial—Supreme Council of Justice, Islamic Courts of First Instance and Appeals.
Political subdivisions: 13 provinces.
Political parties: None.

Economy

GDP: (2008 est.) $527 billion.
Annual growth rate: (2008 est.) 6.1%.
Per capita GDP: (2008) $21,062.
Natural resources: Hydrocarbons, gold, uranium, bauxite, coal, iron, phosphate, tungsten, zinc, silver, copper.
Agriculture: Products—dates, grains, livestock, vegetables. Arable land—1.76%.
Industry: Types—petroleum, petrochemicals, cement, fertilizer, light industry.
Trade: (2008 est.) Exports—$364 billion: petroleum and petroleum products. Imports—$103 billion: manufactured goods, transportation equipment, clothing and textiles, processed food products. Major trading partners—China, France, Germany, Italy, Japan, Singapore, South Korea, Taiwan, U.K., U.S. (2006).

PEOPLE

Saudi Arabia's 2008 population was estimated to be about 28 million, including about 5.6 million resident foreigners. Until the 1960s, most of the population was nomadic or seminomadic; due to rapid economic and urban growth, more than 95% of the population now is settled. Some cities and oases have densities of more than 1,000 people per square kilometer (2,600 per sq. mi).

Saudi Arabia is known as the birthplace of Islam, which in the century following Muhammad's death in 632 A.D. spread west to Spain and east to India. Islam obliges all Muslims to make the Hajj, or pilgrimage to Makkah, at least once during their lifetime if they are able to do so. The cultural environment in Saudi Arabia is highly conservative; the country

adheres to a strict interpretation of Islamic religious law (Shari'a). Cultural presentations must conform to narrowly defined standards of ethics. Men and women are not permitted to attend public events together and are segregated in the work place.

Most Saudis are ethnically Arab. Some are of mixed ethnic origin and are descended from Turks, Iranians, Indonesians, Indians, Africans, and others, most of whom immigrated as pilgrims and reside in the Hijaz region along the Red Sea coast. Many Arabs from nearby countries are employed in the kingdom. There also are significant numbers of Asian expatriates mostly from India, Pakistan, Bangladesh, Indonesia, and the Philippines. Westerners in Saudi Arabia number under 100,000.

HISTORY

Except for a few major cities and oases, the harsh climate historically prevented much settlement of the Arabian Peninsula. People of various cultures have lived in the peninsula over a span of more than 5,000 years. The Dilmun culture, along the Gulf coast, was contemporaneous with the Sumerians and ancient Egyptians, and most of the empires of the ancient world traded with the states that existed on the peninsula, which lay along important trade routes.

The Saudi state began in central Arabia in about 1750. A local ruler, Muhammad bin Saud, joined forces with an Islamic reformer, Muham-

mad Abd Al-Wahhab, to create a new political entity. Over the next 150 years, the fortunes of the Saud family rose and fell several times as Saudi rulers contended with Egypt, the Ottoman Empire, and other Arabian families for control on the peninsula. The modern Saudi kingdom was founded by the late King Abdul Aziz Al Saud (known internationally as Ibn Saud, or "Son of Saud"). In 1902, Abdul Aziz recaptured Riyadh, the Al Saud dynasty's ancestral capital, from the rival Al-Rashid family. Continuing his conquests, Abdul Aziz subdued Al-Hasa in the east, the rest of the central Nejd region, and the Hijaz along the Red Sea coast between 1913 and 1926. In 1932, Abdul Aziz declared these regions unified as the Kingdom of Saudi Arabia.

Boundaries with Jordan, Iraq, and Kuwait were established by a series of treaties negotiated in the 1920s, with two "neutral zones"—one with Iraq and the other with Kuwait—created. The Saudi-Kuwaiti neutral zone was administratively partitioned in 1971, with each state continuing to share the petroleum resources of the former zone equally. Tentative agreement on the partition of the Saudi-Iraqi neutral zone was reached in 1981, and partition was finalized by 1983. The country's southern boundary with Yemen was partially defined by the 1934 Treaty of Taif, which ended a brief border war between the two states. A June 2000 treaty further delineated portions of the boundary with Yemen. The location and status of Saudi Arabia's boundary with the United Arab Emirates is not final; a de facto boundary reflects a 1974 agreement. The border between Saudi Arabia and Qatar was resolved in March 2001. The border with Oman also is not demarcated.

King Abdul Aziz died in 1953 and was succeeded by his eldest son, Saud, who reigned for 11 years. In 1964, Saud abdicated in favor of his half-brother, Faisal, who had served as Foreign Minister. Because of fiscal difficulties, King Saud had been persuaded in 1958 to delegate direct conduct of Saudi Government affairs to Faisal as Prime Minister; Saud briefly regained control of the government in 1960-62. In October 1962, Faisal outlined a broad reform program, stressing economic development. Proclaimed King in 1964 by senior royal family members and religious leaders, Faisal also continued to serve as Prime Minister. This practice has been followed by subsequent kings.

The mid-1960s saw external pressures generated by Saudi-Egyptian differences over Yemen. When civil war broke out in 1962 between Yemeni royalists and republicans, Egyptian forces entered Yemen to support the new republican government, while Saudi Arabia backed the royalists. Tensions subsided only after 1967, when Egypt withdrew its troops from Yemen.

Saudi forces did not participate in the Six-Day (Arab-Israeli) War of June 1967, but the government later provided annual subsidies to Egypt, Jordan, and Syria to support their economies. During the 1973 Arab-Israeli war, Saudi Arabia participated in the Arab oil boycott of the United States and Netherlands. A founding member of the Organization of Petroleum Exporting Countries (OPEC), Saudi Arabia had joined other member countries in moderate oil price increases beginning in 1971. After the 1973 war, the price of oil rose substantially, dramatically increasing Saudi Arabia's wealth and political influence.

In 1975, King Faisal was assassinated by a nephew, who was executed after an extensive investigation concluded that he acted alone. Faisal was succeeded by his half-brother Khalid as King and Prime Minister; their half-brother Prince Fahd was named Crown Prince and First Deputy Prime Minister. King Khalid empowered Crown Prince Fahd to oversee many aspects of the government's international and domestic affairs. Economic development continued rapidly under King Khalid, and the kingdom assumed a more influential role in regional politics and international economic and financial matters.

In June 1982, King Khalid died, and Fahd became King and Prime Minister in a smooth transition. Another half-brother, Prince Abdallah, Commander of the Saudi National Guard, was named Crown Prince and First Deputy Prime Minister. King Fahd's full brother, Prince Sultan, the Minister of Defense and Aviation, became Second Deputy Prime Minister. Under King Fahd, the Saudi economy adjusted to sharply lower oil revenues resulting from declining global oil prices. Saudi Arabia supported neutral shipping in the Gulf during periods of the Iran-Iraq war and aided Iraq's war-strained economy. King Fahd played a major part in bringing about the August 1988 cease-fire between Iraq and Iran and in organizing and strengthening the Gulf Cooperation Council (GCC), a group of six Arabian Gulf states dedicated to fostering regional economic cooperation and peaceful development.

In 1990-91, King Fahd played a key role before and during the Gulf war, helping consolidate the coalition of forces against Iraq and define the tone of the operation as a multilateral effort to reestablish the sovereignty and territorial integrity of Kuwait. Acting as a rallying point and personal spokesman for the coalition, King Fahd helped bring together his nation's GCC, Western, and Arab allies, as well as nonaligned nations from Africa and the emerging democracies of Eastern Europe. He used his influence as Custodian of the Two Holy Mosques to persuade other Arab and Islamic nations to join the coalition.

King Fahd suffered a stroke in November 1995. From 1997, Crown Prince Abdallah took on much of the day-to-day responsibilities of running the government. Upon King Fahd's death on August 1, 2005, Abdallah assumed the throne as King. Prince Sultan, Minister of Defense and Aviation, became Crown Prince and First Deputy Prime Minister. Since ascending to the throne, King Abdallah has continued to pursue an incremental program of social, economic, and political reforms.

GOVERNMENT AND POLITICAL CONDITIONS

The central institution of Saudi Arabian Government is the monarchy. The Basic Law adopted in 1992 declared that Saudi Arabia is a monarchy ruled by the sons and grandsons of King Abd Al Aziz Al Saud, and that the Holy Qur'an is the constitution of the country, which is governed on the basis of Islamic law (Shari'a). There are no political parties or national elections; however, the country held its first municipal elections in 2005. The king's powers are limited because he must observe the Shari'a and other Saudi traditions. He also must retain a consensus of the Saudi royal family, religious leaders (ulema), and other important elements in Saudi society. In the past the leading members of the royal family chose the king from among themselves with the subsequent approval of the ulema. In November 2006, King Abdallah established an Allegiance Commission that will select future crown princes, a step designed to help formalize the selection process.

Saudi kings gradually have developed a central government. Since 1953, the Council of Ministers, appointed by and responsible to the king, has advised on the formulation of general policy and directed the activities of the growing bureaucracy. This council consists of a prime minister, the first and second deputy prime ministers, 20 ministers (of whom the minister of defense also is the second deputy prime minister), two ministers of state, and a small number of advisers and heads of major autonomous organizations.

Legislation is by resolution of the Council of Ministers and the Shura Council, ratified by royal decree, and must be compatible with the Shari'a. Justice is administered according to the Shari'a by a system of religious courts whose judges are appointed by the king on the recommendation of the Supreme Judicial Council, composed of 12 senior jurists. The independence of the judiciary is protected by law. The king acts as the highest court of appeal and has the power to pardon. Access to high officials (usually at a majlis, or public audience) and the right to petition them directly are well-established traditions.

The kingdom is divided into 13 provinces governed by princes or close relatives of the royal family. All governors are appointed by the King.

In March 1992, King Fahd issued several decrees outlining the basic statutes of government and codifying for the first time procedures concerning the royal succession. The King's political reform program also provided for the establishment of a national Consultative Council, with appointed members having advisory powers to review and give advice on issues of public interest. It also outlined a framework for councils at the provincial or emirate level.

In September 1993, King Fahd issued additional reform decrees, appointing the members of the national Consultative Council and spelling out procedures for the new council's operations. He announced reforms regarding the Council of Ministers, including term limitations of 4 years and regulations to prohibit conflict of interest for ministers and other high-level officials. The members of 13 provincial councils and the councils' operating regulations also were announced in September 1993. In February, March, and April 2005, Saudis voted in the country's first municipal elections in more than 50 years. Women, and male members of the military, were not permitted to vote.

In July 1997, the membership of the Consultative Council was expanded from 60 to 90 members, and again in May 2001 from 90 to 120 members. In 2005, membership was expanded to 150 members. Membership has changed significantly during expansions of the council as many members have not been reappointed. The role of the council is gradually expanding as it gains experience.

In November 2006, King Abdallah announced the formation of an Allegiance Commission which, in the future, will select the Crown Prince. The Commission will be charged to select a crown prince to replace Prince Sultan. A December 2007 royal decree named the initial members fo the Commission, all of whom are sons of grandsons of the Kingdoms' founder, King Abdul Aziz. Only the direct male descendants of Abdul Aziz are eligible to become crown prince or king.

Principal Government Officials

Last Updated: 11/12/08

King: **ABDALLAH bin Abd al-Aziz Al Saud**
Prime Min.: **ABDALLAH bin Abd al-Aziz Al Saud**
Dep. Prime Min.: **SULTAN bin Abd al-Aziz Al Saud**
Min. of Agriculture: **Fahd bin Abd al-Rahman bin Sulayman BALGHUNAYM**
Min. of Civil Service: **Muhammad bin Ali FAYIZ**
Min. of Commerce & Industry: **Abdallah bin Zainal ALI REZA**
Min. of Communications & Information Technology: **Muhammad bin Jamil bin Ahmad MULLA**
Min. of Culture & Information: **Iyad bin Amin MADANI**
Min. of Defense & Aviation: **SULTAN bin Abd al-Aziz Al Saud**

Min. of Labor: **Ghazi bin Abd al-Rahman al-QUSAYBI**
Min. of Municipal & Rural Affairs: **MITIB bin Abd al-Aziz Al Saud**

Min. of Petroleum & Mineral Resources: **Ali Ibrahim al-NAIMI**
Min. of Pilgrimage Affairs & Religious Trusts: **Fuad Abd al-Salam Muhammad al-FARSI**
Min. of Social Affairs: **Yusif bin Ahmad al-UTHAYMAYN**
Min. of Transport: **Jubarah SURAYSRI**
Min. of Water & Electricity: **Abdallah al-HUSAYN**
Min. of State: **Musaid bin Muhammad al-AYBAN**
Min. of State: **Abd al-Aziz bin Abdallah al-KHUWAYTIR**
Min. of State: **Mutalib bin Abdallah al-NAFISA**
Min. of State: **ABD AL-AZIZ bin Fahd bin Abd al-Aziz Al Saud**
Pres., Higher Council of Ulema: **Abdallah bin Ahmad bin Yusif ZAYNAL**
Governor, Saudi Arabian Monetary Agency: **Hamad bin Saud al-SAYARI**
Ambassador to the US: **Adil al-Ahmad al-JUBAYR**
Permanent Representative to the UN, New York: **Fawzi bin Abd al-Majid SHUBUKSHI**

The Embassy of the Kingdom of Saudi Arabia is located at 601 New Hampshire Avenue NW, Washington, DC 20037; tel. 202-342-3800.

ECONOMY

Oil was discovered in Saudi Arabia by U.S. geologists in the 1930s, although large scale production did not begin until after World War II. Oil wealth has made possible rapid economic development, which began in earnest in the 1960s and accelerated spectacularly in the 1970s, transforming the kingdom.

Saudi oil reserves are the largest in the world, and Saudi Arabia is the world's leading oil producer and exporter. Oil accounts for more than 90% of the country's exports and nearly 75% of government revenues. Proven reserves are estimated to be 263 billion barrels, about one-quarter of world oil reserves.

More than 95% of all Saudi oil is produced on behalf of the Saudi Government by the parastatal giant Saudi ARAMCO. In June 1993, Saudi ARAMCO absorbed the state marketing and refining company (SAMAREC), becoming the world's largest fully integrated oil company. Most Saudi oil exports move by tanker from Gulf terminals at Ras Tanura and Ju'aymah. The remaining oil exports are transported via the east-west pipeline across the kingdom to the Red Sea port of Yanbu. Due to a sharp rise in petroleum revenues in 1974 following the 1973 Arab-Israeli war, Saudi Arabia became one of the fastest-growing economies in the world. It enjoyed a substantial surplus in its overall trade with other countries; imports increased rapidly; and ample government revenues were available for development, defense, and aid to other Arab and Islamic countries.

But higher oil prices led to development of more oil fields around the world and reduced global consumption. The result, beginning in the mid-1980s, was a worldwide oil glut, which introduced an element of planning uncertainty for the first time in a decade. Saudi oil production, which had increased to almost 10 million barrels per day (b/d) during 1980-81, dropped to about 2 million b/d in 1985. Budgetary deficits developed, and the government drew down its foreign assets. Responding to financial pressures, Saudi Arabia gave up its role as the "swing producer" within OPEC in the summer of 1985 and accepted a production quota. Since then, Saudi oil policy has been guided by a desire to maintain market and quota shares and to support stability in the international oil market.

Saudi Arabia was a key player in coordinating the successful 1999 campaign of OPEC and other oil-producing countries to raise the price of oil to its highest level since the Gulf War by managing production and supply of petroleum. That same year, Saudi Arabia established the Supreme Economic Council to formulate and better coordinate economic development policies in order to accelerate institutional and industrial reform.

In response to increasing international demand for oil, Saudi ARAMCO is engaged in an expansion of its oil production capacity, and plans to raise its capacity from the current 9.5-10 million barrels/day (mb/d) to 12 mb/d within the next several years. Saudi ARAMCO is also increasing production of associated and non-associated natural gas to feed the expanding petrochemical sector. Notably, Saudi Arabia has awarded contracts to foreign companies to conduct gas exploration in selected regions of the country—the first such foreign participation in the petroleum sector upstream since the nationalization of ARAMCO in the 1970s.

Saudi Arabia continues to pursue rapid industrial expansion, led by the petrochemical sector. The Saudi Basic Industries Corporation (SABIC), a parastatal petrochemical company, is now one of the world's leading petrochemical producers, and the government promotes private sector involvement in petrochemicals. The government also plans new investments in the mining sector and in refining,

After Saudi Arabia announced its intention to join the World Trade Organization (WTO), negotiations focused on increasing market access to foreign goods and services and the timeframe for becoming fully compliant with WTO obligations. In April 2000, the government established the Saudi Arabian General Investment Authority to encourage foreign direct investment in the country. Saudi Arabia signed a Trade Investment Framework Agreement with the U.S. in July 2003, and joined the WTO in December 2005.

Through 5-year development plans, the government has sought to allocate its petroleum income to transform its relatively undeveloped, oil-based economy into that of a modern industrial state while maintaining the kingdom's traditional Islamic values and customs. Although economic planners have not achieved all their goals, the economy has progressed rapidly. Oil wealth has increased the standard of living of most Saudis. However, significant population growth has strained the government's ability to finance further

improvements in the country's standard of living. Heavy dependence on petroleum revenue continues, but industry and agriculture now account for a larger share of economic activity. The mismatch between the job skills of Saudi graduates and the needs of the private job market at all levels remains the principal obstacle to economic diversification and development; about 4.6 million non-Saudis are employed in the economy.

Saudi Arabia's first two development plans, covering the 1970s, emphasized infrastructure. The results were impressive—the total length of paved highways tripled, power generation increased by a multiple of 28, and the capacity of the seaports grew tenfold. For the third plan (1980-85), the emphasis changed. Spending on infrastructure declined, but it rose markedly on education, health, and social services. The share for diversifying and expanding productive sectors of the economy (primarily industry) did not rise as planned, but the two industrial cities of Jubail and Yanbu—built around the use of the country's oil and gas to produce steel, petrochemicals, fertilizer, and refined oil products—were largely completed.

In the fourth plan (1985-90), the country's basic infrastructure was viewed as largely complete, but education and training remained areas of concern. Private enterprise was encouraged, and foreign investment in the form of joint ventures with Saudi public and private companies was welcomed. The private sector became more important, rising to 70% of non-oil GDP by 1987. While still concentrated in trade and commerce, private investment increased in industry, agriculture, banking, and construction companies. These private investments were supported by generous government financing and incentive programs. The objective was for the private sector to have 70% to 80% ownership in most joint venture enterprises.

The fifth plan (1990-95) emphasized consolidation of the country's defenses; improved and more efficient government social services; regional development; and, most importantly, creating greater private-sector employment opportunities for Saudis by reducing the number of foreign workers.

The sixth plan (1996-2000) focused on lowering the cost of government services without cutting them and sought to expand educational training programs. The plan called for reducing the kingdom's dependence on the petroleum sector by diversifying economic activity, particularly in the private sector, with special emphasis on industry and agriculture. It also continued the effort to "Saudiize" the labor force.

The seventh plan (2000-2004) focused more on economic diversification and a greater role of the private sector in the Saudi economy. For the period 2000-2004, the Saudi Government aimed at an average GDP growth rate of 3.16% each year, with projected growths of 5.04% for the private sector and 4.01% for the non-oil sector. The government also set a target of creating 817,300 new jobs for Saudi nationals.

The eighth plan (2005-2010) again focuses on economic diversification in addition to education and inclusion of women in society. The plan calls for establishing new universities and new colleges with technical specializations. Privatization as well as emphases on a knowledge-based economy and tourism will help promote the goal of economic diversification.

FOREIGN RELATIONS

Saudi foreign policy objectives are to maintain its security and its paramount position on the Arabian Peninsula, defend general Arab and Islamic interests, promote solidarity among Islamic governments, and maintain cooperative relations with other oil-producing and major oil-consuming countries.

Saudi Arabia signed the UN Charter in 1945. The country plays a prominent and constructive role in the International Monetary Fund, the World Bank, and Arab and Islamic financial and development assistance institutions. One of the largest aid donors in the world, it still gives some aid to a number of Arab, African, and Asian countries. Jeddah is the headquarters of the Secretariat of the Organization of the Islamic Conference and its subsidiary organization, the Islamic Development Bank, founded in 1969. Membership in the 11-member OPEC and in the technically and economically oriented Arab producer group—the Organization of Arab Petroleum Exporting Countries—facilitates coordination of Saudi oil policies with other oil-exporting governments. As the world's leading exporter of petroleum, Saudi Arabia has a special interest in preserving a stable and long-term market for its vast oil resources by allying itself with healthy Western economies which can protect the value of Saudi financial assets. It generally has acted to stabilize the world oil market and tried to moderate sharp price movements.

The Saudi Government frequently helps mediate regional crises and supports the Israeli-Palestinian peace negotiations. A charter member of the Arab League, Saudi Arabia supports the position that Israel must withdraw from the territories which it occupied in June 1967, as according to United Nations Resolution 242. Saudi Arabia supports a peaceful resolution of the Arab-Israeli conflict but rejected the Camp David accords, claiming that they would be unable to achieve a comprehensive political solution that would ensure Palestinian rights and adequately address the status of Jerusalem. Although Saudi Arabia broke diplomatic relations with and suspended aid to Egypt in the wake of Camp David, the two countries renewed formal ties in 1987. In March 2002, then-Crown Prince Abdallah offered a Middle East peace plan, now known as the Arab Peace Initiative, at the annual summit of the Arab League in which Arab governments would offer "normal relations and the security of Israel in exchange for a full Israeli withdrawal from all occupied Arab lands, recogni-

tion of an independent Palestinian state with Jerusalem as its capital, and the return of Palestinian refugees." In March 2007 the Arab League reiterated its support for the Arab Peace Initiative by emphasizing that it will be the foundation for a broad Arab-Israeli peace. In November 2007, Saudi Foreign Minister Prince Saud al-Faisal attended the Annapolis Conference, along with more than 50 representatives of concerned countries and international organizations. The Conference was convened to express the broad support of the international community for the Israeli and Palestinian leaders' courageous efforts and was a launching point for negotiations designed to lead to the establishment of a Palestinian state and the realization of Israeli-Palestinian peace.

Saudi Arabia supports the establishment of a unified, independent and sovereign Iraq. The Kingdom is a charter member of the International Compact with Iraq and participates in the Expanded Iraq Neighbors process. In January 2008, Foreign Minister Prince Saud al-Faisal reiterated Saudi Arabia's intention to open a diplomatic mission in Baghdad and appoint an ambassador.

In 1990-91, Saudi Arabia played an important role in the Gulf War, developing new allies and improving existing relationships between Saudi Arabia and some other countries. However, there also were diplomatic and financial costs. Relations between Saudi Arabia and Tunisia, Algeria, and Libya deteriorated. Each country had remained silent following Iraq's invasion of Kuwait but called for an end to violence once the deployment of coalition troops began. Relations between these countries and Saudi Arabia have returned to their pre-war status. Saudi Arabia's relations with those countries which expressed support for Saddam Hussein's invasion of Kuwait—Yemen, Jordan, and Sudan—were severely strained during and immediately after the war. For example, several hundred thousand Yemenis were expelled from Saudi Arabia after the Government of Yemen announced its position, thus exacerbating an existing border dispute. Saudi-Yemeni relations, especially in the wake of the 1994 Yemen civil war, remain fragile and of significant concern to the Saudi Government. The Palestine Liberation Organization's support for Iraq cost it financial aid as well as good relations with Saudi Arabia and other Gulf states. Recently, though, Saudi Arabia's relations with Jordan and the Palestinian Authority have improved, with the Saudi Government providing assistance for the Palestinian Authority.

During and after the Gulf War, the Government of Saudi Arabia provided water, food, shelter, and fuel for coalition forces in the region. There also were monetary payments to some coalition partners. Saudi Arabia's combined costs in payments, foregone revenues, and donated supplies were $55 billion. More than $15 billion went toward reimbursing the United States alone.

Since ascending to the throne, King Abdallah has followed a more activist foreign policy, offering Saudi assistance and support in efforts to resolve regional crises in Lebanon, Sudan, and Somalia; fostering Israeli-Palestinian peace efforts; and increasing Saudi diplomatic engagement around the world. In particular, he has pursued an Interfaith Dialogue Initiative to encourage religious tolerance on a global level, which was endorsed in a session of the UN General Assembly in November 2008.

U.S.-SAUDI ARABIAN RELATIONS

Saudi Arabia's unique role in the Arab and Islamic worlds, its possession of the world's largest reserves of oil, and its strategic location make its friendship important to the United States. Diplomatic relations were established in 1933; the U.S. embassy opened in Jeddah in 1944 and moved to Riyadh in 1984. The Jeddah embassy became a U.S. consulate. Meanwhile, a U.S. consulate opened in Dhahran in 1944.

The United States and Saudi Arabia share a common concern about regional security, oil exports and imports, and sustainable development. Close consultations between the U.S. and Saudi Arabia have developed on international, economic, and development issues such as the Middle East peace process and shared interests in the Gulf. The continued availability of reliable sources of oil, particularly from Saudi Arabia, remains important to the prosperity of the United States as well as to Europe and Japan. Saudi Arabia is one of the leading sources of imported oil for the United States, providing more than one million barrels/day of oil to the U.S. The U.S. is Saudi Arabia's largest trading partner, and Saudi Arabia is the largest U.S. export market in the Middle East.

In addition to economic ties, a long-standing security relationship continues to be important in U.S.-Saudi relations. A U.S. military training mission established at Dhahran in 1953 provides training and support in the use of weapons and other security-related services to the Saudi armed forces. The United States has sold Saudi Arabia military aircraft (F-15s, AWACS, and UH-60 Blackhawks), air defense weaponry (Patriot and Hawk missiles), armored vehicles (M1A2 Abrams tanks and M-2 Bradley infantry fighting vehicles), and other equipment. The U.S. Army Corps of Engineers had a long-term role in military and civilian construction activities in the Kingdom. The U.S., as part of the Gulf Security Dialogue with individual Gulf Cooperation Council (GCC) members, has announced plans to sell advanced, primarily defensive, military equipment to GCC members, including Saudi Arabia, to support the efforts of these countries to increase their capacity for self-defense.

In August 2003, following the U.S.-led war in Iraq in March and April 2003, the United States withdrew its troops stationed in Saudi Arabia.

Saudi Arabia's relations with the United States were strained after the September 11, 2001, terrorist attacks in which 15 of the suicide bombers

were Saudi citizens. In May 2003, a terrorist organization directly affiliated with al-Qaida launched a violent campaign of terror in Saudi Arabia. On May 12, suicide bombers killed 35 people, including nine Americans, in attacks at three housing compounds for Westerners in Riyadh. On November 8, 2003 terrorists attacked another compound housing foreign workers from mainly Arab countries. At least 18 people, including 5 children died in this attack, and more than 100 were injured. On May 1, 2004 terrorists killed two Americans in the Yanbu oil facility in the western part of the country. On May 29, 2004 terrorists killed one American and wounded several others in attacks on an official building and housing compound in al-Khobar in the Eastern Province.

On June 6, terrorists shot and killed a BBC journalist. On June 9 and June 12, 2004 terrorists killed Americans Robert Jacobs and Kenneth Scroggs. On June 18, 2004 terrorists kidnapped and beheaded American Paul Johnson. On December 6, 2004 terrorists attacked the U.S. Consulate in Jeddah, killing five consulate employees. Terrorists also targeted and killed other foreign nationalities during this time.

Saudi security services have waged an active counterterrorism campaign that has largely neutralized this terrorist organization, though sproradic instances of terrorism still occur. In May 2006, terrorists attempted to attack the important ARAMCO oil-processing facility near Abqaiq. In February 2007, four French nationals were killed in western Saudi Arabia in a suspected terrorist attack.

Saudi Arabia is an important partner in the campaign against terrorism, providing assistance in the military, diplomatic, and financial arenas. Counterterrorism cooperation between Saudi Arabia and the United States increased significantly after the May 12, 2003 bombings in Riyadh and continues today. In February 2005, the Saudi government sponsored the first ever Counter-Terrorism International Conference in Riyadh.

Human Rights

Despite close cooperation on security issues, the United States remains concerned about human rights conditions in Saudi Arabia. Principal human rights problems include abuse of prisoners and incommunicado detention; prohibitions or severe restrictions on the freedoms of speech, press, peaceful assembly and association, and religion; denial of the right of citizens to change their government; systematic discrimination against women and ethnic and religious minorities; and suppression of workers' rights.

TRAVEL

Consular Information Sheet

August 25, 2008

Country Description: Saudi Arabia is a monarchy ruled by a king chosen

from and by members of the Al Saud family. The king rules through royal decrees issued in conjunction with the Council of Ministers, and with advice from the Consultative Council. The king appoints members of both councils. Islamic law is the basis of the authority of the monarchy and provides the foundation of the country's conservative customs and social practices. Saudi Arabia has a modern and well-developed infrastructure, and facilities for travelers are widely available.

Entry Requirements: A passport valid for at least six months and a visa are required for entry. Visas are issued for business and work, to visit close relatives, and for transit and religious visits. Visas for tourism are issued only for approved tour groups following organized itineraries. Airport and seaport visas are not available. All visas require a sponsor, can take several months to process, and must be obtained prior to arrival. In the past, American citizens have reported they were refused a Saudi visa because their passports reflected travel to Israel or indicated they were born in Israel, although this has not happened recently. Women visitors and residents are required to be met by their sponsor upon arrival. Women traveling alone, who are not met by sponsors, have experienced delays before being allowed to enter the country or to continue on other flights.

Women considering relocating to Saudi Arabia should be keenly aware that women and children residing in Saudi Arabia as members of a Saudi household (including adult American-citizen women married to Saudi men, adult American-citizen women who are the unmarried daughters of Saudi fathers, and American-citizen boys under the age of 21 who are the sons of Saudi fathers) are considered household property and require the permission of the Saudi male head of their household to leave the country. Married women require their husband's permission to depart the country, while unmarried women and children require the permission of their father or male guardian. The U.S. Embassy can intercede with the Saudi government to request exit permission for an adult American woman (wife or daughter of a Saudi citizen), but there is no guarantee of success, or even of timely response. Mothers are not able to obtain permission for the departure of minor children without the father's agreement.

As of February 20, 2008, a new regulation went into effect requiring Saudi men seeking the mandatory permission from their government to marry foreign women to sign a binding document granting irrevocable permission for foreign born spouses and children of those foreign spouses to travel freely and unhindered in and out of Saudi Arabia. However, this regulation is not retroactive. Under Saudi law, women married to Saudi men prior to the effective date of these new regulations still need their husbands' permission to leave Saudi Arabia, and their children still require their fathers' permission to leave the country.

Visitors that overstay their visit in the Kingdom are subject to a 10,000 Saudi Riyal (or $2,667) fine and incarceration pending deportation proceedings. Americans should request clarification from Saudi Immigration authorities upon arrival as to the permitted length of stay. A common mistake among visitors is confusing the validity of their Saudi visa for the permitted length of stay in the Kingdom. The U.S. Mission in Saudi Arabia has received several reports of Americans fined for inadvertently overstaying their permitted time in the Kingdom. It can take up to two weeks to resolve such an error with Immigration.

Americans entering Saudi Arabia on visitor visas normally do not need an exit permit but may be prevented from departing the country if they are involved in a legal dispute. American citizens involved in labor disputes or employment dismissal will not be granted an exit permit prior to court resolution or abandonment of the case by the American citizen. Saudi sponsors have substantial leverage in the negotiations and may block departure or bar future employment in the country. As of June 2007, all travelers to and from the Kingdom carrying cash amounts, transferable monetary instruments, or precious metals exceeding 60,000 Saudi Riyals (or $16,000) are required to declare them to Saudi Customs. Customs forms are available at all Saudi ports or downloadable from http://www.customs. gov.sa. Failure to declare or provide accurate information can lead to prosecution, legal penalties and confiscation.

Visitors to Saudi Arabia should generally obtain a meningitis vaccination prior to arrival. A medical report or physical examination is required to obtain work and residence permits.

Residents in Saudi Arabia who are departing the country must obtain an exit permit prior to leaving and an exit/reentry permit if they intend to return to Saudi Arabia. The Saudi sponsor's approval is required for exit permits.

Dual Nationality: Several American citizens of Saudi descent have encountered difficulty leaving the Kingdom after entering on a Laissez Passer rather than a Saudi or U.S. passport. As a Saudi exit visa in a U.S. passport or a new Saudi passport and U.S. visa may take months to obtain, Saudi missions abroad sometimes propose to issue a Laissez Passer to Saudi passport applicants, rather than a Saudi passport. This, however, only leads to difficulties when the traveler wishes to depart the Kingdom to return to the U.S. In particular, American citizens of Saudi descent should be aware that the Saudi government may refuse to recognize a U.S. passport presented by a Saudi passport applicant as valid for travel out of Saudi Arabia, if it was not used to enter Saudi Arabia. Also, American citizens of Saudi descent should understand that Saudi nationality is not confirmed quickly or easily, and documentary requirements encountered in Saudi Arabia may differ from those described by Saudi missions abroad.

We strongly recommend that American citizens who also have Saudi nationality enter Saudi Arabia with

either a Saudi passport or U.S. passport and Saudi visa, but not with a Laissez Passer. For further information on entry/exit requirements, travelers may contact the following Saudi government offices in the U.S.:

Royal Embassy of Saudi Arabia, 601 New Hampshire Avenue NW, Washington, DC 20037, telephone (202) 342-3800. The Embassy's home page is http://www.saudiembassy.net.

Saudi Consulate General in Houston: 5718 Westheimer, Suite 1500, Houston, TX 77057, tel: (713) 785-5577.

Saudi Consulate General in Los Angeles: Sawtelle Courtyard Building, 2045 Sawtelle Blvd., Los Angeles, CA 90025, tel: (310) 479-6000.

Saudi Consulate General in New York: 866 United Nations Plaza, Suite 480, New York, NY 10017, tel: (212) 752-2740.

Visit the Embassy of Saudi Arabia web site at http://saudiembassy.net for the most current visa information.

Safety and Security: In the most recent Travel Warning for Saudi Arabia, the Department of State urges U.S. citizens to consider carefully the risks of traveling to Saudi Arabia. There is an on-going security threat due to the continued presence of terrorist groups, some affiliated with al Qaida, who may target Western interests, housing compounds, and other facilities where Westerners congregate. These terrorist groups may also target Saudi Government facilities and economic/commercial targets within the Kingdom.

In February 2007, four French tourists were killed by terrorists on a desert track north of Medina. A gunman fired shots at the U.S. Consulate General in Jeddah in May 2006. In February 2006, an attack was attempted on Saudi oil facilities in Abqaiq in the Eastern Province. An armed attack on the U.S. Consulate General in Jeddah on December 6, 2004, resulted in five deaths and eleven serious injuries among non-U.S. staff members.

Although terrorists have not conducted a successful attack against Westerners since February 2007, the United States Mission in Saudi Arabia remains an unaccompanied post as a result of continued security concerns. The Department of State has approved a family visitation program, in part because of the significant progress Saudi security forces have made in counteracting the terrorist threat within Saudi Arabia as they continue to arrest and break up extremist cells.

American citizens who choose to visit Saudi Arabia are strongly urged to avoid staying in hotels or housing compounds that do not apply stringent security measures and are also advised to maintain good situational awareness when visiting commercial establishments frequented by Westerners. American citizens also are advised to keep a low profile; vary times and routes of travel; exercise caution while driving, entering or exiting vehicles; and ensure that travel documents and visas are current and valid.

From time to time, the U.S. Embassy and Consulates in Saudi Arabia may restrict travel of official Americans or suspend public services for security reasons. In those instances, the Embassy and Consulates will keep the local American citizen community apprised through the Warden System and make every effort to provide emergency services to U.S. citizens. Warden Messages can be found on the U.S. Embassy Riyadh web site at http://riyadh.usembassy.gov.

For the latest security information, Americans traveling abroad should regularly monitor the Department's web site where the current Travel Warnings and Travel Alerts, including the Worldwide Caution Travel Alert, Middle East and North Africa Travel Alert, and Saudi Arabia Travel Warning can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll-free in the U.S. and Canada or, for callers outside the U.S. and Canada, a regular toll line at 1-202-501-4444.

Crime: Street crime is generally not a problem for travelers in Saudi Arabia. However, private Saudi citizens who perceive that a foreigner is not observing conservative standards of conduct may harass, pursue, or assault that person. The U.S. Embassy in Riyadh cautions American citizens that Saudi Arabian police authorities have detained potential witnesses to crimes without charges or access to legal counsel, and with limited or delayed consular access, during the investigative stage of criminal cases, which can take months. On occasion, Saudi authorities have temporarily confiscated the personal effects of detained potential witnesses. Even when released from detention, witnesses to criminal incidents may be prohibited from leaving the country until investigation of the incident is complete. In many countries around the world, counterfeit and pirated goods are widely available. Transactions involving such products may be illegal under local law. In addition, bringing them back to the United States may result in forfeitures and/or fines. More information on this serious problem is available at http://www.cybercrime.gov/18usc2320.htm.

Information for Victims of Crime: The loss or theft of a U.S. passport abroad should be reported immediately to local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, to contact family members or friends and explain how funds may be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

The local equivalent to the "911" emergency line in Saudi Arabia is 999.

Medical Facilities and Health Information: Good modern medical

care and medicines are available in several hospitals and health centers in the major cities of Saudi Arabia, but only adequate medical care may be available in the outlying areas. Serious medical problems requiring hospitalization and/or medical evacuation to the United States can cost thousands of dollars. Doctors and hospitals often expect immediate cash payment for health services.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's web site at http://wwwn.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith/en.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Saudi Arabia is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

Short-term male visitors may drive on their U.S. driver's license. American men employed in Saudi Arabia should obtain a local driver's license with the Department of Traffic Police. Women are not allowed to drive or ride bicycles on public roads.

Traffic accidents are a significant hazard in Saudi Arabia. Driving habits are generally poor, and accidents involving vehicles driven by minors are not uncommon. In the event of a traffic accident resulting in personal injury, all persons involved (if not in the hospital) may be taken to the local police station.

Drivers are likely to be held for several days until responsibility is determined and any reparations paid. In many cases, all drivers are held in custody regardless of fault. Those involved in an accident should immediately contact their sponsor and the U.S. Embassy or nearest U.S. Consulate.

Visit the web site of Saudi Arabia's national tourist office and national authority responsible for road safety at www.sct.gov.sa/, which also includes specific information concerning Saudi Arabian driving permits, vehicle inspections, road tax and mandatory insurance. Contact information for the Supreme Commission for Tourism is: Kindi Center, D.Q., PO Box 66680, Riyadh, Kingdom of Saudi Arabia 11586, telephone: 011-966-1-480-8855, web site http://www.sct.gov.sa.

Aviation Safety Oversight: The U.S. Federal Aviation Administration (FAA) has assessed the Government of Saudi Arabia's Civil Aviation Authority as being in compliance with International Civil Aviation Organization (ICAO) aviation safety standards for oversight of Saudi Arabia's air carrier operations. For more information, travelers may visit the FAA's web site at http://www.faa.gov.

Special Circumstances: Residents working in Saudi Arabia generally must surrender their passports while in the Kingdom. The sponsor (normally the employer) obtains work and residence permits for the employee and for any family members. Family members of those working are not required by law to surrender their passports, though they often do. Residents carry a Saudi residence permit (Iqama) for identification in place of their passports. The U.S. Embassy and Consulates General in Saudi Arabia cannot sponsor private American citizens for Saudi visas.

A married woman should be aware that she must have her husband's permission to depart or have their children depart Saudi Arabia. This is true even if the woman and/or children are U.S. citizens and even if her husband does not have Saudi nationality. The Saudi Government has added new regulations to Saudi men wishing to marry foreigners. Saudi men must first sign a binding document granting irrevocable permission for their foreign born spouses and children born of foreign spouses, to travel freely and unhindered in and out of Saudi Arabia before the Saudi Government will give permission for him to marry. This regulation is not retroactive. The U.S. Embassy can intercede with the Saudi government to request exit permission for adult American women who are not affected by this new regulation, but will not be able to obtain permission for the departure of minor children without the father's agreement (See Entry/Exit Requirements section above). Obtaining exit permission for an adult American woman can take many months.

The Saudi government does not recognize dual nationality. Saudi authorities have confiscated the U.S. passports of U.S. citizens and dual (Saudi/U.S.) nationals when they have applied for Saudi citizenship or a Saudi passport. This does not constitute loss of U.S. citizenship, but should be reported to the U.S. Embassy in Riyadh or the Consulates General in Jeddah or Dhahran. For additional information, please refer to the Bureau of Consular Affairs dual nationality flyer.

Saudi customs authorities enforce strict regulations concerning importation into Saudi Arabia of such banned items as alcohol products, weapons and any item that is held to be contrary to the tenets of Islam, such as pork products and pornography. Imported and domestic audiovisual media and reading matter are censored.

Saudi customs and postal officials broadly define what is contrary to Islam, and therefore prohibited. Christmas decorations, fashion mag-

azines, and "suggestive" videos may be confiscated and the owner subject to penalties and fines.

Importing Animals: Dogs, regardless of their breed, may only enter Saudi Arabia if their importation paperwork describes them as 'guard dogs' or 'hunting dogs'. Cats and dogs entering Saudi Arabia require a Veterinary Health Certificate and a letter from the veterinary private practitioner dated and addressed to the Director of Customs, Saudi Arabia. Both documents must be authenticated by the Department of Agriculture Veterinary Service Office and the State Department's Authentications Office and attested by the Royal Embassy of Saudi Arabia.

The certificate must indicate that the animal was examined, that rabies and other vaccines are current, and must confirm that the animal is free from diseases. Information on the name, breed, sex, color and age of the animal must also be stated. Birds generally require a prior import permit issued by the Saudi National Commission for Wildlife Conservation and Development (NCWCD). However, all birds coming from the U.S. and transiting via a third country are not permitted entry in the Kingdom due to the lack of quarantine facilities and the existing virus-related import ban on all birds.

Business Contracts: The written Arabic text of a contract governs employment and business arrangements under Saudi law. Before signing a contract, American companies should obtain an independent translation to ensure a full understanding of the contract's terms, limits, and agreements. No American should come to work in Saudi Arabia or make a business arrangement without having seen and understood the full written contract. Verbal assurances or side letters are not binding under Saudi law. In the event of any contract dispute, the Saudi authorities refer to the contract. Since the Saudi sponsor holds the employee's passport and controls the issuance of exit permits, Americans cannot simply leave Saudi Arabia in the event of a labor or business dispute. An American who wishes to break an employment or business contract may have to pay substantial penalties before being allowed to leave Saudi Arabia. To change employers in Saudi Arabia requires the permission of the previous employer, which is discretionary. Saudi courts take seriously their responsibility to adjudicate disputes.

This process, which is performed in accordance with Saudi law and customs, may require the hiring of legal counsel, should not be entered into without an Arabic translator, and can take several months. The U.S. Embassy and U.S. Consulates General cannot adjudicate labor or business disputes or provide translation services. U.S. consular officers can provide lists of local attorneys to help U.S. citizens settle business disputes, but ultimate responsibility for the resolution of disputes through the Saudi legal system lies with the parties involved.

Standards Of Conduct And Religious Police: Islam is the official religion of the country and pervades all aspects of life in Saudi Arabia. Public display of non-Islamic religious articles such as crosses and Bibles is not permitted. Travel to Makkah (Mecca) and Medina, the cities where the two holiest mosques of Islam are located, is forbidden to non-Muslims.

The norms for public behavior in Saudi Arabia are extremely conservative, and religious police, known as Mutawwa, are charged with enforcing these standards. Mutawwa are required to carry special identification and usually are accompanied by uniformed police; however, in some cases they have detained persons even without police presence. To ensure that conservative standards of conduct are observed, the Saudi religious police have accosted or arrested foreigners, including U.S. citizens, for improper dress or other alleged infractions, such as consumption of alcohol or association by a female with a male to whom she is not related. While most incidents have resulted only in inconvenience or embarrassment, the potential exists for an individual to be physically harmed or deported. U.S. citizens who are involved in an incident with the Mutawwa should report the incident to the U.S. Embassy in Riyadh or the U.S. Consulates General in Jeddah or Dhahran. The Saudi Embassy in Washington advises women traveling to Saudi Arabia to dress in a conservative fashion, wearing ankle-length dresses with long sleeves, and not to wear trousers in public. In many areas of Saudi Arabia, particularly Riyadh and the central part of the Kingdom, Mutawwa pressure women to wear a full-length black covering known as an Abaya, and to cover their heads. Most women in these areas therefore wear an Abaya and carry a headscarf to avoid being accosted. Women who appear to be of Arab or Asian origin, especially those presumed to be Muslims, face a greater risk of being confronted.

Some Mutawwa try to enforce the rule that men and women who are beyond childhood years may not mingle in public unless they are family or close relatives. Mutawwa may ask to see proof that a couple is married or related. Women who are arrested for socializing with a man who is not a relative may be charged with prostitution.

Some restaurants, particularly fast-food outlets, have refused to serve women who are not accompanied by a close male relative. In addition, many restaurants no longer have a "family section" in which women are permitted to eat. These restrictions are not always posted, and in some cases women violating this policy have been arrested. This is more common in Riyadh and the more conservative central Nejd region.

In public, dancing, playing music and showing movies are forbidden.

The Hajj and Umrah: American Muslims who plan to participate in the annual Hajj or Umrah pilgrimages to the holy cities of Makkah (Mecca) and Medina should pay close attention to the following.

For those interested in performing Hajj visits, all travel plans should be made through a Saudi-government-

approved travel agent in order to obtain entry, accommodation, and transportation in Saudi Arabia during the Hajj season.

See the Royal Embassy of Saudi Arabia web site at http://www.saudiembassy.net/ for further information.

Hajj and Umrah visas are required for all U.S. citizens, and are valid only for travel to the Holy Cities of Makkah (Mecca) and Medina. Onward travel to Riyadh or other Saudi Arabian cities is usually not permitted during the Hajj. During Umrah, visitors may obtain permission after arrangements have been made with a travel agency to travel to other cities in Saudi Arabia. Umrah visa holders may only visit Saudi Arabia outside of the annual Hajj period. Please note that the U.S. Consulate in Jeddah cannot assist in arranging such travel permissions within Saudi Arabia.

Foreign Muslim residents of the Kingdom may perform the Hajj once every five years. Advance approval must be obtained from an immigration office with the approval of the Saudi sponsor. U.S. citizen residents of Saudi Arabia must travel with Saudi-government-approved sponsor groups to perform Hajj.

King Abdul Aziz International Airport in Jeddah is large and modern, with special terminal facilities to accommodate hundreds of thousands of pilgrims. However, due to the extremely large number of people arriving, waiting time at the airport upon arrival during the Hajj may be as long as ten hours. Pilgrims should plan on a lengthy wait before leaving the airport on their way to Makkah or Medina. Travelers with only carry-on bags will find baggage transfer at the airport much easier than will those with checked baggage. Some Hajj pilgrims now fly directly to Medina and proceed to Makkah by road. There is no airport in Makkah. Before leaving home, travelers should make at least two copies of their passports, including the pages stamped with Saudi visas. One copy should be left with someone at home and one taken with the traveler and kept in a secure location when possible. It is mandatory for Hajj visitors to turn U.S. passports over to the tour group organizer upon arrival in the Kingdom, and passports are returned only immediately prior to departure while at the airport. This is a Hajj Ministry-mandated practice for all Hajj pilgrims, and it has proved effective in nearly eliminating lost and stolen passport problems. Upon arrival, all pilgrims are issued an identification card and wristband that they should carry as identification at all times. Umrah visitors do not receive an identification card or wristband. Hajj and Umrah pilgrims have reported thefts (including of passports) at the pilgrimage sites to Consulate General Jeddah. As such, a money belt or pouch is the best way to carry valuables. Upon arrival it is possible to buy what is known as a "Hajj belt," which is somewhat larger than American equivalents. Pilgrims should bring sufficient funds to cover any unforeseen emergencies. If pilgrims need to purchase Saudi Riyals, there are exchange and ATM facilities available in the airports and in all major cities of Saudi Arabia.

The Hajj has been an attractive target for defrauding unsuspecting tourists. Travelers should be aware and vigilant of unscrupulous tour operators who abandon tourists, leaving them with unpaid bills, and hoteliers who demand the payment of exorbitant "hidden charges" for the return of passports. Pilgrims are urged to deal only with licensed and established tour operators. In addition, the Saudi Arabian government has experienced and helpful personnel available from the government's Ministry of Hajj in the Holy Cities area during the Hajj season. Communications facilities to contact family in the United States are available in all parts of Saudi Arabia. "Internet cafés" are available in all major cities. Before arriving in Saudi Arabia for Hajj or Umrah, establish a communication routine for family and friends with whom you wish to keep in contact. Travelers should expect crowded conditions during the Hajj.

Temperatures in Makkah range between 60 and 80 degrees Fahrenheit during the winter months of December, January, and February. There are many facilities providing water, public accommodations, and other amenities. In case of emergency, Hajj pilgrims should first contact the United Agents Office (Makkah), telephone (02) 542-7003, or (02) 542-0992, or National Adilla Est. (Medina), telephone (04) 826-0088, and then contact the American Consulate General in Jeddah, telephone (02) 667-0080.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses.

Persons violating Saudi Arabian laws, even unknowingly, may be expelled, arrested, imprisoned or even executed. Suspects may be detained without charges or legal counsel, and with limited consular access, for months during the investigative stage of criminal cases. Penalties for the import, manufacture, possession, and consumption of alcohol or illegal drugs are severe. Convicted offenders can expect jail sentences, fines, public flogging, and/or deportation. The penalty for drug trafficking in Saudi Arabia is death. Saudi officials make no exceptions. Customs inspections at ports of entry are thorough. The U.S. Embassy and Consulates General have no standing in Saudi courts to obtain leniency for an American convicted of alcohol or drug offenses. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Saudi authorities do not permit criticism of Islam or the royal family. The government prohibits the public practice of religions other than Islam. Non-Muslims suspected of violating these restrictions have been jailed.

Homosexual activity is considered to be a criminal offense and those convicted may be sentenced to lashing, prison, or death.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy and Consulate Locations: Americans living or traveling in Saudi Arabia are encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration web site and to obtain updated information on travel and security within Saudi Arabia. Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency. Registration information and a link to subscribe to warden messages can be found in the American Citizens Services page of the Embassy web site at http://usembassyriyadh.biglist.com/sub. The U.S. Embassy in Riyadh, Saudi Arabia, is located at Collector Road M, Riyadh Diplomatic Quarter. The international mailing address is PO Box 94309, Riyadh 11693. Mail may also be sent via the U.S. Postal Service to: U.S. Embassy, Unit 61307, APO AE 09803-1307. The Embassy telephone number is (966) (1) 488-3800; fax is (966) (1) 483-0773.

The U.S. Consulate General in Dhahran, Saudi Arabia, is located between Aramco Headquarters and the old Dhahran Airport at the King Fahd University of Petroleum and Minerals highway exit. The international mailing address is PO Box 38955, Doha-Dhahran 31942. Mail may also be sent via the U.S. Postal Service to: Unit 66803, APO AE 09858-6803. The telephone number is (966) (3) 330-3200; fax is (966) (3) 330-0464. The U.S. Consulate General in Jeddah, Saudi Arabia, is located on Palestine Road, Ruwais. The international mailing address is PO Box 149, Jeddah. Mail may also be sent via the U.S. Postal Service to: Unit 62112, APO AE 09811-2112. The telephone number is (966) (2) 667-0080; fax is (966) (2) 669-3078 or 669-3098.

Intercountry Adoption

February 2008

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is based on public sources and current understanding. Questions involving foreign and U.S. immigration laws and legal interpretation should be addressed respectively to qualified foreign or U.S. legal counsel.

Please Note: The basis for the Saudi judicial system, and Saudi family law, is a strict interpretation of Islamic Sharia law. Thus, there is no adoption under Saudi law, only legal guardianship which the U.S. Citizenship and Immigration Services in the Department of Homeland Security and the Board of Immigration Appeals have deemed insufficient for the purposes of immigration under the Immigration and Nationality Act.

The American Embassy in Riyadh, Saudi Arabia however, can, process immigrant visas for orphans adopted in other countries and brought to Saudi Arabia to live with American citizen families temporarily resident in the Kingdom.

Availability of Children for Adoption: Please review current reports online at http://adoption.state.gov.

Doctors: The U.S. Embassy in Riyadh and Consulates General in Jeddah and Dhahran maintain lists of doctors and sources for medicines, should you experience health problems while in Saudi Arabia.

U.S. Immigration Requirements: A Saudi Arabian child adopted by an American citizen must obtain an immigrant visa before he or she can enter the U.S. as a lawful permanent resident. Prospective adopting parents are strongly encouraged to consult USCIS publication M-249, *The Immigration of Adopted and Prospective Adoptive Children*, as well as the Department of State publication, *Intercountry Adoptions*. Please see the *Intercountry Adoption* section of this book for more details and review current reports online at http://adoption.state.gov.

Embassy of the
Kingdom Saudi Arabia
601 New Hampshire Avenue, NW
Washington, DC 20037
(202) 342-3800

Saudi Arabia also has Consulates in Los Angeles, California, New York, and Houston, Dhahran, and Jeddah.

Embassy of the
United States of America
P. O. Box 94309
Riyadh 11693
Saudi Arabia

Embassy of the
United States of America
Unit 61307
APO, AE 09803-1307
Tel: 966-1-488-3800, x1132 (Immigrant Visa Unit)
Fax: 966-1-488-7275

Questions: Specific questions regarding adoption in Saudi Arabia may be addressed to the Consular Section of the U.S. Embassy or Consulate in Riyadh, Saudi Arabia. You may also contact the Office of Children's Issues, SA-29, 2201 C Street, NW, U.S. Department of State, Washington, DC 20520-2818, telephone 1-888-407-4747 with specific questions.

International Parental Child Abduction

November 2008

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens

Services. For more information, please read the *International Child Abduction* section of this book and review current reports online at www.travel.state.gov/childabduction.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is provided for general information only. Questions involving interpretation of specific foreign laws should be addressed to foreign legal counsel.

General Information: The Kingdom of Saudi Arabia is not a party to the Hague Convention on the Civil Aspects of International Child Abduction, nor are there any international or bilateral treaties in force between Saudi Arabia and the United States dealing with international parental child abduction.

American citizens who travel to Saudi Arabia are subject to the jurisdiction of Saudi courts, as well as to the country's laws and regulations. This holds true for all legal matters including child custody. Parents planning to travel with their children to Saudi Arabia should bear this in mind.

Custody Disputes: In Saudi Arabia, child custody is based on Islamic law. The primary concern of Saudi courts in deciding child custody cases is that the child be raised in accordance with the Islamic faith. Most custody disputes in Saudi Arabia are handled by the Islamic "Shari'a" courts. In rare cases, the Board of Grievances, a religious appeals court, has ruled on custody disputes.

Saudi courts generally do not award custody of children to non-Saudi women. If the mother is an Arab Muslim, judges will usually not grant her custody of children unless she is residing in Saudi Arabia, or the father is not a Muslim. All Saudi citizens are considered to be Muslim. Since Saudi women are prohibited from marrying non-Muslims, custody disputes between a Saudi mother and American father would be heard by the Shari'a court, which would usually apply Islamic rules of custody and decide the case on its merits.

If the mother wins custody, the father is usually granted visitation rights. According to Saudi law, a child whose mother is Saudi and father is non-Saudi is not granted Saudi citizenship. However, even if an American father wins custody of his children, he may still need permission from the Saudi mother to remove the children from Saudi Arabia. Saudi courts hesitate to rule in a child custody case if both parents are non-Muslim. The court will refer the case to the family court in the country from which the parents came. Often, if pressured to address such a situation, the court will rule that both parents should be deported from Saudi Arabia to avoid complications and embarrassment.

Normally, under Shari'a law, a mother can maintain custody of her male children until the age of nine, and female children until age seven. In practice the courts favor keeping children within a strict Islamic environment. Shari'a court judges have broad discretion in custody cases and often make exceptions to these general guidelines.

Even when a mother who is residing in Saudi Arabia is granted physical custody of children, the father maintains legal custody and has the right to determine where the children live and travel. In many cases, the father has been able to assume legal custody of children against the wishes of the mother when she is unable or unwilling to meet certain conditions set by law for her to maintain her custodial rights. For example, if the mother moves to another country, the father is entitled to have custody. A court can sever a mother's custody if it determines that the mother is incapable of safeguarding the child or of bringing the child up in accordance with the appropriate religious standards. The mother can lose custody by re-marrying a non-Muslim, or by residing in a home with non-relatives. Shari'a law allows custody of children to be awarded to the closest male relative of a Saudi father in the case of death or imprisonment of the father, even if the Saudi father has made clear his wish that the children's mother have full custody.

Persons who wish to pursue a child custody claim in a Saudi court should retain an attorney in Saudi Arabia. The U.S. Embassy in Riyadh and the Consulates General in Dhahran and Jeddah maintain lists of attorneys willing to represent American clients. For more information, please read the *International Parental Child Abduction* section of this book and review current reports online at www.travel.state.gov/childabduction.

Enforcement of Foreign Judgments: Custody orders and judgments of foreign courts are generally not enforceable in Saudi Arabia. For example, an order from a U.S. court granting custody to an American parent will not be honored in Saudi Arabia. Courts in Saudi Arabia will not enforce U.S. court decrees ordering a parent in Saudi Arabia to pay child support.

Visitation Rights: Women entering Saudi Arabia with the intent of visiting their children may do so only with the written permission of the father of the children. The father must file a "statement of no objection" with the Saudi Ministry of Interior before the mother will be granted a visa to enter the Kingdom. This includes Muslim fathers who are non-Saudi nationals. If the father refuses to sponsor the mother, or to authorize a child's travel to another country, there is little that can be done to effect a visit. Women visitors are required to be met by their sponsor upon arrival in Saudi Arabia.

If a non-Saudi father wants to enter the Kingdom to visit his children, he can do so by applying for a Saudi visa with proof that his children are living in Saudi Arabia. Saudi authorities may consult with the mother if she is Saudi, who may be able to prevent issuance of the visa.

Some American Muslim parents have considered traveling to Saudi Arabia on Umrah (religious pilgrimage to Mecca) as a means to visit their children. However, issuance of an Umrah visa does not guarantee that a parent will be permitted to see his or her children once in the Kingdom. Persons who obtain a visa for business or

religious visits (Hajj and Umrah) with the intention of visiting their children may face legal penalties including detention and/or deportation.

Before traveling to Saudi Arabia to visit their children, women should consider whether they obtained a complete Islamic declaration of divorce from the Shari'a court in Saudi Arabia. Secular, American divorce orders are not recognized by the Shari'a courts. Although an Islamic divorce can be obtained from several mosques within the U.S., it has been the experience of several divorced spouses in the U.S. that the Shari'a courts in Saudi Arabia will not recognize orders originating from an American mosque. The purpose of obtaining a Shari'a declaration is to establish the legal personal status of the mother prior to traveling to the Kingdom. If an American woman is considered to still be married, the "husband" can prohibit the woman from departing Saudi Arabia. For more information, please read the *International Parental Child Abduction* section of this book and review current reports online at www.travel.state.gov/childabduction.

Dual Nationality: Dual nationality is not recognized under Saudi law. Children of Saudi fathers automatically acquire Saudi citizenship at birth, regardless of where the child was born. Saudi women cannot transmit citizenship; therefore, their children would acquire only the citizenship of the father. Saudis must enter and leave the country on Saudi passports even if they are entitled to hold the passport of another country.

Travel Restrictions: Exit visas are required to leave Saudi Arabia. The U.S. Embassy or Consulates General cannot obtain exit visas for American citizens. Women must have permission from their husband or father to exit Saudi Arabia. The government of Saudi Arabia has been known to issue international arrest warrants against women who have taken their children from Saudi Arabia without the father's permission.

Criminal Remedies: For information on possible criminal remedies, please contact your local law enforcement authorities or the nearest office of the Federal Bureau of Investigation (FBI). Information is also available on the Internet at the web site of the U.S. Department of Justice, Office of Juvenile Justice and Delinquency Prevention (OJJDP) at http://www.ojjdp.ncjrs.org. For further information on international parental child abduction, contact the Office of Children's Issues, U.S. Department of State at 1-888-407-4747 or visit its web site on the Internet at http://travel.state.gov. You may also direct inquiries to: Office of Children's Issues, U.S. Department of State, Washington, DC 20520-4811; Phone: (202) 736-9090; Fax: (202) 312-9743.

Travel Warning

July 9, 2008

This Travel Warning updates information on the security situation in Saudi Arabia and reminds U.S. citizens of recommended security precautions. It supersedes the Travel Warning issued December 19, 2007.

The Department of State urges U.S. citizens to consider carefully the risks of traveling to Saudi Arabia. There is an ongoing security threat due to the continued presence of terrorist groups, some affiliated with al Qaida, who may target Western interests, housing compounds, and other facilities where Westerners congregate. These terrorist groups may also target Saudi Government facilities and economic/commercial targets within the Kingdom.

In February 2007, four French tourists were killed in a terrorist incident on a desert track north of Medina. A gunman fired shots at the U.S. Consulate General in Jeddah in May 2006. In February 2006, an attack was attempted on Saudi oil facilities in Abqaiq in the Eastern Province. An armed attack on the U.S. Consulate General in Jeddah on December 6, 2004, resulted in five deaths and eleven serious injuries among non-U.S. staff members.

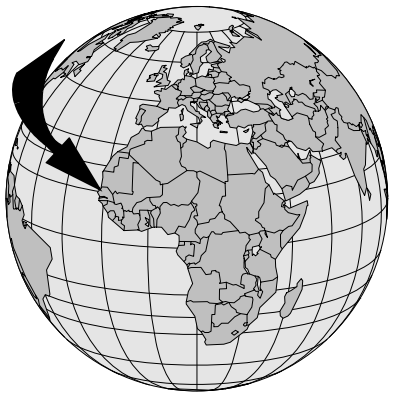
Although terrorists have not conducted a successful attack against Westerners since February 2007, the United States Mission in Saudi Arabia remains an unaccompanied post as a result of continued security concerns. The Department of State has approved a family visitation program, in part because of the significant progress Saudi security forces have made in counteracting the terrorist threat within Saudi Arabia as they continue to arrest and break up terrorist cells.

From time to time, the U.S. Embassy and Consulates in Saudi Arabia may restrict travel of official Americans or suspend public services for security reasons. In those instances, the Embassy and Consulates will keep the local American citizen community apprised through the Warden system and make every effort to provide emergency services to U.S. citizens. Warden messages can be found on the U.S. Embassy Riyadh website: http://riyadh.usembassy.gov.

American citizens who choose to visit Saudi Arabia are strongly urged to avoid staying in hotels or housing compounds that do not apply stringent security measures and are also advised to maintain good situational awareness when visiting commercial establishments frequented by Westerners.

American citizens also are advised to keep a low profile; vary times and routes of travel; exercise caution while driving, entering or exiting vehicles; and ensure that travel documents and visas are current and valid.

The Department of State advises that under Saudi law, married women need the permission of their husbands to leave Saudi Arabia and their children will require their father's permission to exit the country. This is true regardless of nationality. The U.S. Embassy has very limited ability to facilitate exit permission.



On February 20, 2008, a new regulation took effect. It requires Saudi men seeking the mandatory permission from their government to marry a for-

eign woman to sign a binding document granting irrevocable permission for their foreign-born spouse, and children born to them and that spouse, to travel freely and unhindered in and out of Saudi Arabia. However, this regulation is not retroactive. Under Saudi law, women married to Saudi males prior to the effective date of these new regulations still need the permission of their husbands to leave Saudi Arabia, and their children require the permission of their fathers to leave the country. Updated information on travel and security in Saudi Arabia may be obtained from the Department of State by calling 1-888-407-4747 from within the U.S. or Canada or, from outside the U.S. or Canada on a regular toll line at 1-202-501-4444.

These numbers are available from 8:00 am to 8:00 pm Eastern Time, Monday through Friday (except U.S. federal holidays.)

For additional information, consult the Department of State's Country Specific Information for Saudi Arabia, and the Worldwide Caution at http://travel.state.gov.

U.S. citizens who require emergency services may telephone the Embassy in Riyadh at (966) (1) 488-3800, the Consulate in Jeddah at (966) (2) 667-0080, or the Consulate in Dhahran at (966) (3) 330-3200.

SENEGAL

Compiled from the September 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Republic of Senegal

PROFILE

Geography

Area: 196,840 sq. km. (76,000 sq. mi.), about the size of South Dakota.

Cities: Capital—Dakar. Other cities—Diourbel, Kaolack, Kolda, Louga, Rufisque, Saint-Louis, Thies, Tambacounda, Ziguinchor, Fatick, Matam, Kedougou, Sedhiou.

Terrain: Flat or rising to foothills.

Climate: Tropical/Sahelian—desert or grasslands in the north, heavier vegetation in the south and southeast.

People

Nationality: Noun and adjective—Senegalese (sing. and pl.).

Population: (2007 est.) 12,521,851.

Annual growth rate: 2%.

Ethnic groups: Wolof 43%; Fulani (Peulh) and Toucouleur 23%; Serer 15%; Diola, Mandingo, and others 19%.

Religions: Muslim 95%, Christian 4%, traditional 1%.

Languages: French (official), Wolof, Pulaar, Serer, Diola, Mandingo, Soninke.

Education: Attendance—primary 75.8%, middle school 26.5%, secondary 11% (estimated). Literacy—50.7%.

Health: Infant mortality rate—60.15/1,000. Life expectancy—56.69 yrs.

Work force: (4.0 million) Agriculture—70% (subsistence or cash crops). Wage earners (350,000) private sector 61%, government and parapublic 39%.

Government

Type: Republic.

Independence: April 4, 1960.

Constitution: March 3, 1963, last amended in 2001.

Government branches: Executive—President (chief of state, commander in chief of armed forces). Legislative—Bi-cameral parliament with a 150 member National Assembly and a 100 member Senate. Judicial—Constitutional Council (appointed by the president from senior magistrates and eminent academics and attorneys), Court of Final Appeals, Council of State.

Political subdivisions: 14 regions, 34 departments, 320 rural councils.

Political parties: 72 political parties are registered, the most important of which are the Democratic Party of Senegal (PDS), Rewmi, Socialist Party (PS), the Alliance of Forces for Progress (AFP), "AND JEF/PADS," the Union for Democratic Renewal (URD), "JEF JEL," the National Democratic Rally (RND), and the Independence and Labor Party (PIT).

Suffrage: Universal adult, over 18.

Budget: (2007) revenues: $2.948 billion; expenditures: $3.036 billion; including capital expenditures of $1.302 billion

Defense: (2007) $133 million

National holidays: April 4, Independence Day.

Economy

GDP: (2006) $10.6 billion

Real annual growth rate: 4.6% (2007 estimate)

Per capita GDP: (2006) $700—in terms of purchasing power parity (PPP) $1,936 (2007).

Natural resources: Fish, peanuts, phosphate, iron ore, gold, titanium, oil and gas, cotton.

Primary sector: Agriculture represents 15% of GDP. Products—peanuts, millet, sorghum, manioc, rice, cotton, vegetables and flowers, fruit.

Secondary sector: 21.4% of GDP, of which industry and mining represent 22%. Types—fishing; agricultural product processing; light manufacturing; mining including energy, oil mining, and construction.

Tertiary sector: 63% of GDP of which services represent 40% of GDP and trade 22% of GDP.

Trade: (2006) Exports—$1.407 billion (fish products, peanut products, phosphate products). Major markets—France, other European Union, West African CFA zone. Imports—$3.040 billion (food, con-

sumer goods, petroleum, machinery, transport equipment, petroleum products, computer equipment). Major suppliers—France, Nigeria, Cameroon, United States.

Exchange rate: Fixed to the euro. African Financial Community (CFA) 656 CFA =1 euro.

Economic aid received: In October 2007, major donors pledged approximately $4 billion in assistance for the next four years; U.S. assistance was around $55 million in 2007.

GEOGRAPHY

Senegal is bounded by the Atlantic Ocean, Mauritania, Mali, Guinea, and Guinea-Bissau. The Gambia penetrates more than 320 kilometers (200 mi.) into Senegal. Well-defined dry and humid seasons result from northeast winter winds and southwest summer winds. Dakar's annual rainfall of about 61 centimeters (24 in.) occurs between June and October when maximum temperatures average 27ºC (82ºF); December to February minimum temperatures are about 17ºC (63ºF). Interior temperatures are higher than along the coast, and rainfall increases substantially farther south, exceeding 150 centimeters (60 in.) annually in some areas.

PEOPLE

About 75% of Senegal's population is rural. In rural areas, density varies from about 77 per square kilometer (200 per sq. mi.) in the west-central region to 2 per square kilometer (5 per sq. mi.) in the arid eastern section. About 50,000 Europeans (mostly French) and Lebanese reside in Senegal, mainly in the cities. French is the official language but is used regularly only by the literate minority. All Senegalese speak an indigenous language, of which Wolof has the largest usage.

HISTORY

Archaeological findings throughout the area indicate that Senegal was inhabited in prehistoric times. Islam established itself in the Senegal River valley in the 11th century; 95% of Senegalese today are Muslims. In the 13th and 14th centuries, the area came under the influence of the Mandingo empires to the east; the Jolof Empire of Senegal also was founded during this time.

In January 1959, Senegal and the French Soudan merged to form the Mali Federation, which became fully independent on June 20, 1960, as a result of the independence and the transfer of power agreement signed with France on April 4, 1960. Due to internal political difficulties, the Federation broke up on August 20, 1960. Senegal and Soudan (renamed the Republic of Mali) proclaimed independence. Leopold Sedar Senghor, internationally known poet, politician, and statesman, was elected Senegal's first President in August 1960.

After the breakup of the Mali Federation, President Senghor and Prime Minister Mamadou Dia governed together under a parliamentary system. In December 1962, their political rivalry led to an attempted coup by Prime Minister Dia. Although this was put down without bloodshed, Dia was arrested and imprisoned, and Senegal adopted a new constitution that consolidated the President's power. In 1980, President Senghor decided to retire from politics, and he handed over power in 1981 to his handpicked successor, Abdou Diouf. Abdou Diouf was President from 1981-2000. He encouraged broader political participation, reduced government involvement in the economy, and widened Senegal's diplomatic engagements, particularly with other developing nations. Domestic politics on occasion spilled over into street violence, border tensions, and a violent separatist movement in the southern region of the Casamance. Nevertheless, Senegal's commitment to democracy and human rights strengthened. Diouf served four terms as President. In the presidential election of 2000, he was defeated, in a free and fair election, by opposition leader Abdoulaye Wade. Senegal experienced its second peaceful transition of power, and its first from one political party to another. Parliamentary and presidential elections were held in 2007.

GOVERNMENT AND POLITICAL CONDITIONS

Senegal is a secular republic with a strong presidency, bi-cameral legislature, reasonably independent judiciary, and multiple political parties. Senegal is one of the few African states that has never experienced a coup d'état. As noted above, power was transferred peacefully, if not altogether democratically, from Senghor to Diouf in 1981, and once again, this time in fully democratic elections, from Diouf to Wade in March 2000.

The president is elected by universal adult suffrage to a 5-year term. The Bi-cameral Parliament has a National Assembly with150 members, who are elected separately from the president and a Senate with 100 members of which 35 are elected and 65 are chosen by the President. The Socialist Party dominated the National Assembly until April 2001, when in free and fair legislative elections President Wade's coalition won a majority (89 of 120 seats). The Cour de Cassation (Highest Appeals Court, equivalent to the U.S. Supreme Court) and the Constitutional Council, the justices of which are named by the president, are the nation's highest tribunals. Senegal is divided into 14 administrative regions, each headed by a governor appointed by and responsible to the president. The law on decentralization, which came into effect in January 1997, distributed significant central government authority to regional assemblies.

Senegal's principal political party was for 40 years the Socialist Party (PS). Its domination of political life came to an end in March 2000, when Abdoulaye Wade, the leader of the Senegalese Democratic Party (PDS) and leader of the opposition for more than 25 years, won the presidency. Under the terms of the 2001 constitu-

tion, future presidents will serve for 5 years and be limited to two terms. Wade was the last President to be elected to a 7-year term.

On February 25, 2007 President Abdoulaye Wade (pronounced "wahd") won 56 percent of the vote in a field of 15 candidates, with 73 percent of registered voters going to the polls. Twice-postponed parliamentary elections took place on June 3, but most of the major opposition parties boycotted them, allowing the ruling Senegalese Democratic party (PDS) and its allies to capture 131 of the 150 seats in the National Assembly that met for the first time on June 20. In 2000 and 2007, Wade won open, peaceful and highly competitive elections due to a strong Senegalese national desire for change after nearly 40 years of Socialist Party governments. Having come under tough scrutiny and criticism for not having realized many of his campaign promises, he has undertaken major public works projects that benefited him politically.

President Wade has advanced a liberal agenda for Senegal, including privatizations and other market-opening measures. He has a strong interest in raising Senegal's regional and international profile. The country, nevertheless, has limited means with which to implement ambitious ideas. The liberalization of the economy is proceeding, but at a slow pace. Senegal continues to play a significant role in regional and international organizations. President Wade has made excellent relations with the United States a high priority.

There are presently 72 registered political parties, most of which are marginal and little more than platforms for their leaders. The principal political parties, however, constitute a true multiparty, democratic political culture, and they have contributed to one of the most successful democratic transitions in Africa, even among all developing countries. A flourishing independent media,

largely free from official or informal control, also contributes to the democratic politics of Senegal. The country's generally tolerant culture, largely free from ethnic or religious tensions, has provided a resilient base for democratic politics.

Principal Government Officials

Last Updated: 11/12/08

Pres.: **Abdoulaye WADE**
Prime Min.: **Cheikh Hadjibou SOUMARE**
Min. of Armed Forces: **Becaye DIOP**
Min. of Civil Service, Labor, & Professional Orgs.: **Innocence NTAB**

Min. of Urban Planning, Housing, & Construction: **Oumar SARR**
Min. of Women's Affairs & Entrepreneurship: **Awa NDIAYE**
Min. of Youth & Employment: **Mamadou Lamine KEITA**
Ambassador to the US: **Amadou BA**
Permanent Representative to the UN, New York: **Paul BADJI**

Senegal maintains an embassy in the United States at 2112 Wyoming Avenue, NW, Washington, DC 20008 (tel. 202-234-0540), and a Mission to the United Nations at 392 Fifth Avenue, 9th floor, New York, NY 10018 (tel. 212-517-9030).

ECONOMY

The former capital of French West Africa, Senegal is a semi-arid country located on the westernmost point of Africa. Predominantly rural and with limited natural resources, the country earns foreign exchange from fish, phosphates, peanuts, tourism, and services. Its economy is highly vulnerable to variations in rainfall and changes in world commodity prices. Senegal depends heavily on foreign assistance, which in 2007 represented about 23% of overall government spending—including both current expenditures and capital investments—or African Financial Community (CFA) 315 billion (U.S.$630 million).

The fishing sector has replaced the groundnut sector as Senegal's export leader. Its export earnings reached $249 million in 2005. The industrial fishing operations struggle with high costs, and Senegalese tuna is rapidly losing the French market to more efficient Asian competitors.

Phosphate production, the second major foreign exchange earner, has been steady at about $230 million (around 1500 tons). Exports of peanut products reached $63 million in 2003. Peanut production has decreased by 30%, one of its lowest levels. Receipts from tourism, the fourth major foreign exchange earner, have picked up since the January 1994 devaluation. Today, tourism constitute between 5 and 6% of national income. Senegal has about 250 tourist class hotels and the sector employs about 100.000 people.

Senegal's Agency for the Promotion of Investment (APIX) plays an important role in the government's foreign investment program. Its objective is to increase the investment rate from its current level of 20.6% to 30%. Currently, there are no restrictions on the transfer or repatriation of capital and income earned, or investment financed with convertible foreign exchange.

Direct U.S. investment in Senegal remains about $38 million, mainly in petroleum marketing, pharmaceuticals manufacturing, chemicals, and banking. Economic assistance comes largely from France, the IMF, the World Bank, and the United States. The European Union, the African Development bank, China, Canada, Spain, Japan, and Germany also provide fund significant aid programs.

Senegal has well-developed though costly port facilities, an international airport serving 28 international airlines that serves as a regional hub, and a reasonable telecommunications infrastructure, including a fiber optics backbone and cellular phone penetration approaching 15% of the population.

DEFENSE

Senegal has well-trained and disciplined armed forces consisting of about 17,000 personnel in the army, air force, navy, and gendarmerie. The Senegalese military force receives most of its training, equipment, and support from France and the United States. Germany also provides support but on a smaller scale. Military noninterference in political affairs has contributed to Senegal's stability since independence.

Senegal has participated in many international and regional peacekeeping missions. Its history of participation in peacekeeping is impressive. Most recently, Senegal provided peacekeeping forces for the African Union (AU) mission in Darfur, Sudan (AMIS), the UN mission in Liberia (UNIMIL), and the UN mission in Cote d'Ivoire (UNOMCI), where Lieutenant General Abdoulaye. Fall, who is now Chief of Defense of the Senegalese Armed Forces, was the Force Commander. In 2000, Senegal sent a battalion to the Democratic Republic of Congo to participate in MONUC, the UN peacekeeping mission, and agreed to deploy a U.S.-trained battalion to Sierra Leone to participate in UNAMSIL, another UN peacekeeping mission. A Senegalese contingent was deployed on a peacekeeping mission to the Central African Republic in 1997, and in 1994, Senegal sent a battalion-sized force to Rwanda to participate in the UN peacekeeping mission there. In 1992 Senegal sent 1,500 men to the ECOMOG peacekeeping group in Liberia, and in 1991, it was the only Sub-Saharan nation to send a contingent to participate in Operation Desert Storm in the Middle East.

In August 1981, the Senegalese military was invited into The Gambia by President Dawda Kairaba Jawara to put down a coup attempt. In August 1989, Senegalese-Gambian military cooperation, which began with the joint Senegalese-Gambian efforts during the 1981 coup attempt, ceased with the dissolution of the Senegambian Confederation. Senegal intervened in the Guinea-Bissau civil war in 1998 at the request of former President Vieira.

FOREIGN RELATIONS

President Senghor advocated close relations with France and negotiation and compromise as the best means of resolving international differences. To a large extent, the two succeeding Presidents have carried on Senghor's policies and philosophies. Senegal has long supported functional integration among French-speaking West African states through the West African Economic and Monetary Union. Senegal has a high profile in many international organizations and was a member of the UN Security Council in 1988-89. It was elected to the UN Commission on Human Rights in 1997. Friendly to the West, especially to France and to the U.S., Senegal also is a vigorous proponent of more assistance from developed countries to the Third World. Senegal enjoys mostly cordial relations with its neighbors. Clear progress have been made on many fronts with Mauritania to include border security, resource management, economic integration and the return of an estimated 30,000 Afro-Mauritanian refugees living in Senegal.

U.S.-SENEGALESE RELATIONS

Senegal enjoys an excellent relationship with the United States. The Government of Senegal is known and respected for its able diplomats and has often supported the U.S. in the United Nations, including with troop contributions for peacekeeping activities. The United States maintains friendly relations with Senegal and provides considerable economic and technical assistance. About 300 Senegalese students come to the United States each year for study. President Diouf paid his first official visit to Washington, DC, in August 1983 and traveled several times to the U.S. thereafter. Senegal was President George W. Bush's first stop in his July 2003 visit to Africa. In June 2001, President Wade met President Bush at the White House. Senegal hosted the Second African-African American Summit in 1995. First Lady Hillary Rodham Clinton began her trip to Africa in March 1997 with a visit to Senegal, and President Bill Clinton visited Senegal in 1998. Assistant Secretary for African Affairs Walter Kansteiner visited Senegal in August 2001. Foreign Minister Gadio met Secretary of State Colin Powell in September and November 2001. Senegal took a strong position against terrorism in the wake of the September 11, 2001 terrorist attacks against the U.S., and in October 2001 hosted a conference establishing the African Pact Against Terrorism. On July 20, 2005, Secretary Rice attended the fourth annual African Growth and Opportunity Act (AGOA) Forum held in Dakar, Senegal. That year's Forum focused on increasing investment initiatives and facilitating economic and political development in Africa. In June 2007, First Lady Laura Bush made Senegal her first stop during a four country Africa tour in support of the President's Malaria Initiative (PMI) and the President Emergency Plan for AIDS Relief (PEPFAR).

The U.S. Agency for International Development (USAID) implements the U.S. Government's development assistance program. USAID's strategy focuses on promoting economic growth/private sector development by expanding microfinance and business development services and commercializing natural and non-traditional products; improving local delivery of services and sustainable use of resources; increasing use of decentralized health services; and improving middle school education, especially for girls. In addition, there is a conflict resolution and rehabilitation program to improve conditions for peace in Senegal's two southern regions known as the "Casamance". USAID provided $29.9 million in development assistance to Senegal in fiscal year 2005.

The Peace Corps program in Senegal has approximately 150 volunteers serving in agriculture, forestry, health, and small business development. The U.S. Embassy's Cultural Affairs Section administers the Fulbright, Humphrey, and International Visitor exchange programs. The Fulbright teacher, researcher, and lecturer programs are two-way exchanges; hence the section also supports American grantees in Senegal during their stay. In addition to exchanges, the section organizes numerous programs for the Senegalese public including U.S. speaker programs, fine arts programs, film

festivals, and a book club. Finally, the section organizes an annual regional colloquium for American Studies professionals, journalists, and civic leaders from over 15 countries in Africa.

TRAVEL

Consular Information Sheet

July 8, 2008

Country Description: The Republic of Senegal is a developing West African country. The capital is Dakar. Facilities for tourists are widely available but vary in quality.

Entry Requirements: A passport is required. For U.S. passport holders, a visa is not required for stays of less than 90 days. Current yellow fever vaccination is mandatory to enter Senegal and meningitis vaccination is highly recommended if the traveler is arriving from or has recently traveled to an endemic area. Travelers unable to provide proof of vaccinations may be required to pay for and receive vaccinations at the Dakar airport. Travelers should obtain the latest information on entry requirements from the Embassy of Senegal, 2112 Wyoming Avenue NW, Washington, DC 20008, telephone (202) 234-0540, and at the Senegal Tourism Authority's official web site, http://www.senegal-tourism.com. Overseas inquiries should be made at the nearest Senegalese embassy or consulate.

Safety and Security: Public demonstrations, political gatherings, and student protests are relatively common in Senegal, both in Dakar and in outlying regions, particularly on Friday afternoons. In the past, these events have sometimes turned violent. Due to the potential for violence, U.S. citizens should avoid political gatherings and street demonstrations, and maintain security awareness at all times. For guidelines on dealing safely with public demonstrations, please see the American Citizen Services page of the U.S. Embassy Dakar web site at http://dakar.usembassy.gov/service.html.

Lac Rose (Pink Lake) is a popular tourist destination in Senegal. The Lac Rose area has a large number of tourists and isolated beach areas, but lacks multiple exit and entry points. The U.S. Embassy recommends that all visitors to Lac Rose and its surrounding beaches be particularly vigilant and not travel alone.

Banditry occurs with some regularity on the main highways after dark, particularly in the central and eastern area of Senegal, including around Tambacounda and Matam. Bandits often target RN2 (National Road) between Ndioum and Kidira and occasionally target RN1 between Kidira and Tambacounda.

The U.S. Embassy recommends that U.S. citizens avoid non-essential travel to the Casamance region west of the city of Kolda, except direct air travel to the Cap Skirring resort area or to the city of Ziguinchor. If travel is deemed essential, the U.S. Embassy recommends that U.S. citizens carefully monitor the security situation before traveling. There are currently instances of fighting in the Casamance region (composed of the Ziguinchor and Kolda regions) involving factions of the Casamance separatist MFDC (Mouvement des Forces Démocratiques de la Casamance) in southern Senegal and the Senegalese military. Some military and political leaders in the Casamance region have been killed. In May 2008, rebels kidnapped 16 local residents 5 kilometers from Ziguinchor and then cut off their left ears before releasing them. That same month two soldiers and a peasant were killed in other clashes near the same area. Reports of banditry in the area remain high. In addition, vehicles have been attacked by armed bandits even during daylight hours on well-traveled roads. On February 14, 2007, four people were killed when their bus was attacked after being stopped at a roadblock.

Landmine explosions continue to plague inhabitants of the Casamance, with fatalities and serious injury continuing into 2008. One man was killed in Tounkara, approximately 70 kilometers north of Ziquinchor. A Senegalese soldier was injured by a landmine near Boutoupa-Camaracounda, on the border with Guinea Bissau. Since 1990, more than 1,000 people have been killed by land mines in the Casamance. The U.S. Embassy strongly recommends that U.S. citizens remain on well-traveled routes at all times.

For the latest security information, Americans traveling abroad should regularly monitor the Department of State, Bureau of Consular Affairs' web site, where the current Travel Warnings and Travel Alerts including the Worldwide Caution Travel Alert, can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747

toll free in the U.S. and Canada, or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: Minor street crime is very common in Senegal, particularly in cities. Most reported incidents involve pickpockets and purse-snatchers, who are especially active in large crowds and around tourists. Aggressive vendors, panhandlers and street children may attempt to divert the victim's attention while an accomplice carries out the crime. To avoid theft, U.S. citizens should avoid walking alone in isolated areas or on beaches, particularly at night, lock their doors and close their windows when driving, and avoid public transportation. Americans should not walk on dark streets at night, even in groups. To minimize inconvenience in the event of theft, U.S. citizens should carry copies, rather than originals, of their passports and other identification documents. U.S. citizens should carry a credit card only if it will be used soon, rather than carrying it as a routine practice. There is traditionally an increase in crime before major religious holidays.

U.S. citizens are encouraged to use common sense and situational awareness to ensure personal safety and to reduce the risk of becoming a crime victim. Always be aware of the surroundings, especially in large cities and crowded places such as markets and taxi parks. Keep a low profile, remain vigilant, and avoid potential conflict situations. Do not wear flashy clothing or jewelry, and be cautious about displaying any amount of currency in public. Use common sense when faced with something out of the ordinary or if someone is following you.

While violent crime is not common in Senegal, it does occur. There have been incidents in the past year of Americans in groups of two or three being robbed at knife-point. If confronted by criminals, remember that cash and valuables can be replaced, but life and health cannot. U.S. citizens are encouraged to walk away from a criminal confrontation no matter the material cost. Break-ins at residential houses occur frequently as in major cities everywhere. Persons who plan to reside in Senegal on a long-term basis should take measures to protect their dwellings. Long-term residents should consider installation of window grilles, solid core doors with well-functioning locks, and an alarm system. In the past year, a number of American citizen residences have experienced burglaries. No violence or personal injuries have been reported in these cases, in which the burglars appear to have been exclusively seeking financial gain.

Fraud is prevalent in Senegal and U.S. citizens are often the target of scams that may cause both financial loss and physical harm. Typically, business scam operations begin with an unsolicited communication (usually by e-mail) from an unknown individual who describes a situation that promises quick financial gain, often by the transfer of a large sum of money or valuables out of West Africa. The perpetrators of these scams often claim to be victims of various western African conflicts (notably refugees from Sierra Leone) or relatives of present or former political leaders.

There are many variations of these business scams. In some cases, a series of "advance fees" must be paid in order to conclude the transaction, such as fees to open a bank account, or to pay certain taxes. In fact, the final payoff does not exist since the purpose of the scam is simply to collect the advance fees. Another common variation consists of a request for the U.S. citizen's bank account information, purportedly to transfer money into the account. Once the perpetrator obtains this information, however, he or she then simply transfers all money out of the victim's account. Other variations include apparently legitimate business deals requiring advance payments on contracts and offers to sell gold at a very low price. In the last case, the seller may present real gold to be verified then substitute fake gold and disappear with the payment. The best way to avoid becoming a victim of advance-fee fraud or business scam is to use common sense: If an offer seems too good to be true, it is probably a scam. You should carefully research any unsolicited business proposal originating in Senegal before you commit funds, provide goods or services, or undertake travel.

Visa scams take advantage of people who wish to travel to the U.S. Generally, these scams "guarantee" a U.S. visa for participants who pay a large sum of money to register for a conference or attend an event in the United States. In fact, only consular officers of the U.S. State Department may issue visas, so any offer that guarantees a U.S. visa is a scam. Please refer to the State Department web site at http://travel.state.gov or the web site of the U.S. Embassy in Dakar at http://dakar.usembassy.gov/visas.html for authoritative information about the visa process and the costs involved.

In addition to business and visa scams, personal and dating scams are also prevalent. U.S. citizens should be wary of persons claiming to live in Senegal who profess friendship or romantic interest over the Internet. A chat or e-mail exchange which quickly moves to discussion of intimate matters is often an indication of a scam. Beware of any request or appeal for money.

In a typical personal scam, the scammer typically asks the U.S. citizen to send money for essential purposes: living or travel expenses, medical treatment, visa costs or bribes to free unjustly imprisoned family members. Scammers often claim emergency circumstances, hoping that the intended victim will send money quickly and without careful consideration. Many variations of these scams exist, all with the principal goal of soliciting money from the victim. Several U.S. citizens in West Africa have reported losing thousands of dollars through such scams. The anonymity of the Internet means that the U.S. citizen cannot be sure of the real name, age, marital status, nationality or even gender of the correspondent. In some cases, the correspondent is a fictitious persona created only to lure the U.S. citizen into sending money.

U.S. citizens may prepay for a plane ticket directly with an airline rather than wiring money for transportation to the traveler. U.S. citizens may also research the legitimate immigration process with the United States Citizenship and Immigration Services (USCIS) web site at http://www.uscis.gov.

U.S. citizens who are victims or witnesses of a crime are encouraged to report crimes to the police by telephoning 800-00-20-20; 800-00-17-00, Senegal's police hotline numbers. Another 24 hour phone number for the police in Senegal is 33-821-2431. The Government of Senegal has also created a tourist police unit, which may be reached at (+221)33 860-3810.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

The local equivalent to the "911" emergency line in Senegal is 800-00-20-20 and 800-00-17-00.

Medical Facilities and Health Information: Several hospitals and clinics in the capital, Dakar, can treat major and minor injuries and illnesses. There is inadequate inpatient psychiatric care and limited office-based psychiatric treatment. Public hospitals do not meet U.S. standards. Medical facilities outside Dakar are limited.

French medications are far more readily available than American pharmaceuticals, and drugs in stock are often listed under the French trade name. Medications may be obtained at pharmacies throughout Dakar and in other areas frequented by tourists, and are usually less expensive than in the U.S. Travelers should carry a supply of any needed prescription medicines, along with copies of the prescriptions, including the generic name for the drugs, and a supply of preferred over-the-counter medications.

Malaria is a serious risk to travelers in Senegal. Travelers should consult their physician to discuss the benefits and risks of taking anti-malarial medication. Travelers who become ill with a fever or flu-like illness while traveling in a malaria-risk area and up to one year after returning home should seek prompt medical attention and tell the physician their travel history and what anti-malarial medications they have been taking. For additional information on malaria, protection from insect bites, and anti-malarial drugs, visit the CDC Travelers' Health web site at http://www.cdc.gov/malaria/faq.htm.

Water supplies in Senegal are not consistently free of disease-causing microorganisms. For this reason, the Embassy recommends drinking filtered or boiled water, particularly for babies under one year of age. Raw vegetables and fruits should be washed in a bleach solution before eating.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's website at http://wwwn.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith/en.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States.

The information below concerning Senegal is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

Driving in Senegal is very different from driving in the United States. Many U.S. citizens find the traffic in Senegal chaotic, particularly in Dakar. Drivers tend to exceed speed limits, follow other vehicles closely, ignore lane markings and attempt to pass even when facing oncoming traffic. Many vehicles are not well-maintained; headlights may be either extremely dim or not used at all. Roadways are poorly lit and poorly marked and many sections have deteriorated surfaces. Some roads have sidewalks or sufficient space for pedestrian traffic; others do not, and pedestrians are forced to walk along the roadway. Due to limited street lighting, pedestrians are difficult to see at night. Drivers in both rural and urban areas may expect to frequently encounter and share the road with motorcycles, bicyclists, pedestrians, livestock and animal carts. Caution and defensive driving techniques are strongly recommended.

While most main roads in Senegal are in relatively good condition for daytime driving, smaller roads are poor by American standards. During the rainy season, many roads are passable only with four-wheel drive vehicles.

Travelers may be stopped at police roadblocks throughout the country, where their vehicles and luggage may be searched. Service stations are available along main roads. Due to poor road conditions and the risk of crime, driving outside major cities at night is not recommended. Due to

language barriers (outside Dakar, relatively few Senegalese speak French) and the lack of roadside assistance, receiving help may be difficult in the event of distress.

For safety reasons, the Embassy recommends against the use of motorbikes, van taxis ("cars rapides"), and public transportation. They can be dangerous due to overloading, careless driving, inadequate maintenance, and the lack of basic safety equipment such as seat belts. Regulated orange-striped sedan auto taxis are safer, but make sure to agree on a fare before beginning the trip.

In Senegal, one drives on the right-hand side. Vehicles give priority to traffic coming from the right, except at traffic circles, where vehicles already in the circle have the right of way. Before January 2005, however, cars entering traffic circles had the right of way. This change is not well known, so drivers should exercise extreme caution at traffic circles.

All drivers are expected to carry the following documents in their vehicles and present them at any time at the request of the police: (1) valid driver's license; (2) valid insurance papers; (3) vehicle registration/immatriculation card ("carte grise"); (4) "vignette" tax disc for the current year; and (5) valid identification. If Americans carry a copy of their U.S. passport, the copy must be clear enough to identify the driver of the vehicle.

Third-party insurance is required for all drivers in Senegal. In an accident, a driver's third-party insurance only covers damages to the other driver and his/her vehicle. Third-party insurance does not cover damages or injuries to the at-fault driver. In other words, if you are involved in an accident resulting in injuries and you are not at fault, this insurance will cover the cost of damages to the other driver and vehicle.

However, if you are at fault, your third-party insurance will only cover all damage to the other driver and his/her vehicle, and you will have to pay for damages to your own vehicle yourself or through additional insurance. If the accident results in a death and you are at fault, the Senegalese court will decide the penalty involved. The penalty can involve imprisonment if the accident is related to drunk driving.

Senegalese law prohibits the use of cell phones while driving, unless the driver is using "hands-free" equipment. Protective helmets are mandatory for all bicycle, moped, scooter and motorcycle drivers/riders and passengers.

When police officers stop a vehicle for a traffic violation, the police officer will generally confiscate the driver's license or ID card until the fine is paid. We encourage you to comply with the request. Sometimes, police officers try to solicit bribes instead of or in addition to the fine. The U.S. Embassy does not encourage paying bribes. Visit the website of the country's national tourist office and national authority responsible for road safety at http://www.senegal-tourism.com.

Aviation Safety Oversight: As there is no direct commercial air service to the United States by carriers registered in Senegal, the U.S. Federal Aviation Administration (FAA) has not assessed Senegal's Civil Aviation Authority for compliance with International Civil Aviation Organization (ICAO) aviation safety standards. For more information, travelers may visit the FAA's Internet web site at http://www.faa.gov.

Special Circumstances: Senegalese law requires that all persons carry personal identification at all times, and all Senegalese law enforcement officials have the authority to challenge suspicious activity and to request personal identification. Be aware that they may request personal identification even without cause, which is generally not the case in the U.S. If a U.S. citizen does not cooperate and provide identification, s/he may be detained for up to 48 hours without the filing of formal charges.

The U.S. Embassy does not always receive timely notification by Senegalese authorities of the arrest of U.S. citizens. U.S. citizens are encouraged to carry a notarized copy of their U.S. passports with them at all times, so that, if questioned by local officials, proof of identity and U.S. citizenship is readily available. If arrested, U.S. citizens should always ask to be allowed to contact the U.S. Embassy. You may not bring several types of items into Senegal without clearance by Senegalese customs officials: these include computers and computer parts, video cameras and players, stereo equipment, tape players, auto parts, and various tools and spare parts. Airport customs officials may hold such items if brought in as baggage or carry-on luggage. Travelers should check with the Embassy of Senegal in Washington, DC, regarding these restrictions.

Senegalese customs authorities encourage the use of an ATA (Admission Temporaire/Temporary Admission) Carnet for the temporary admission of professional equipment, commercial samples, and/or goods for exhibitions and fair purposes. ATA Carnet Headquarters, located at the U.S. Council for International Business, 1212 Avenue of the Americas, New York, NY 10036, issues and guarantees the ATA Carnet in the United States. For additional information, call (212) 354-4480, send an email to atacarnet@uscib.org, or visit http://www.uscib.org for details.

Travelers can obtain cash from some ATMs in Senegal. Travelers can get cash and/or traveler's checks through international credit cards, such as Master Card, Visa, and American Express, by presenting their credit card at a local financial institution sponsoring their card. Travelers can transfer cash through Western Union and Moneygram.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking

the law can be more severe than in the United States for similar offenses.

Persons violatingSenegalese laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Senegalare severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in Senegal are encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration web site so that they can obtain updated information on travel and security within Senegal. Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency. The U.S. Embassy is located at Avenue Jean XXIII, Dakar; the mailing address is B.P. 49, Dakar, Senegal. The telephone number is (221) 33 829-2100; after hours (221) 33 829 2209. The U.S. Embassy web site is http://dakar.usembassy.gov.

Intercountry Adoption

January 2008

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is based on public sources and current understanding. Questions involving foreign and U.S. immigration laws and legal interpretation should be addressed respectively to qualified foreign or U.S. legal counsel.

Please Note: Senegalese adoption law states that only individuals who are unable to have biological children may adopt a child. However, the President of the Republic can grant an exemption, which must be obtained before filing a request to adopt with the Regional Court of Dakar.

If an individual is seeking to adopt his or her spouse's children, the law requires that the couple not yet have any children from their union on the day they file their request. Couples who cannot have children due to medical reasons are given priority. According to the Senegalese adoption law, children from three months to 18 years old may be adopted.

Patterns of Immigration: Recent U.S. immigrant visa statistics indicate that only three immigrant visas have been issued to Senegalese orphans in the last five fiscal years.

Adoption Authority: The Ministry of Justice, Office of Open-System Educative Action and Social Welfare (Office de Action Educative au Milieu Ouvert—AEMO) is responsible for intercountry adoptions in Senegal. Adoption laws are outlined in the Senegalese Family Code (Code de la Famille).

Coordination AEMO
Ministere de la Justice
Bloc des Madeleines
Dakar, Senegal
The Dakar AEMO Regional Coordinator is SECK, Daouda
Website: http://www.justice.gouv.sn/
Tel: (221) 821-5720

Types Of Adoption: There are two types of adoptions in Senegal: simple adoption and full adoption.

In a simple adoption, the adopted child does not change his/her family name and the child's age can range from three months to 18 years. (Please note that in order to meet the definition of orphan under the Immigration and Nationality Act, the child must be adopted while under the age of 16 or, if over the age of 16, must be adopted concurrently with a sibling who is under the age of 16.)

The ties of the child to his/her birth family are not severed and the child may continue to have contact with his or her biological family. Simple adoptions are revocable.

In contrast, full adoptions are irrevocable and are granted when one or both parents have died and any living biological parent has irrevocably severed ties with the child. In order to complete an intercountry adoption in Senegal, prospective adoptive parents are encouraged to obtain a full adoption rather than a simple adoption. If a simple adoption is obtained, the adoption court order should indicate that the child is released for emigration. In order to adopt, the prospective adoptive parents must have a local attorney and meet the eligibility requirements.

Eligibility Requirements for Adoptive Parents: According to Senegal's adoption law, the adoption must meet the following criteria:

- the adoption should benefit the child;
- the child should be under the age 18 and not emancipated (under 16 to immigrate to U.S.);
- the adoption must be with the full consent of the child if s/he is 15 years old or older, unless s/he is mentally disabled;
- the adoptive parents must be 15 years older than the child to be adopted. In the case of step-children, the required age difference is 10 years;
- the adoptive parents applying jointly have to be married more than five years, are not legally or voluntarily separated, and one of

the them is at least 30 years old. Unmarried adoptive parents must be 35 years or older. The rules are the same for single men as for single women.

Residency Requirements: According to AEMO, there are no residency requirements for prospective adoptive parents.

Time Frame: There are no fixed timelines for adopting a child in Senegal. According to Senegalese authorities, the adoption process can take from one to three years to complete.

Adoption Agencies and Attorneys: Only full adoption is recognized for U.S. immigration purposes. There are no adoption service providers (i.e., adoption agencies or facilitators) in Senegal. A local attorney is required to handle all of the requisite legal paperwork. The U.S. Embassy is not aware of any attorneys or organizations that specialize in adoptions.

Adoption Fees: The fee for issuing an adoption court order is 6,000 West African Francs (CFAF) or approximately $12. This does not include additional fees that may be incurred for the attorney's time, translation, and other expenses.

Adoption Procedures: Once prospective adoptive parents are cleared for adoption in their home state and have completed the initial processing requirements of the U. S. Citizenship and Immigration Service, the next step is to submit an official request with the intent to adopt to the Regional Court of Dakar.

Prospective adoptive parents do not have to be physically present in Senegal to submit a request. An attorney representing them may do so on their behalf. In this request, prospective parents may express preferences regarding the age and sex of the child they wish to adopt; however, that does not mean that their preferences will be honored. Prospective adoptive parents may not select a child in advance.

Once the Senegalese government approves their request, the prospective adoptive parents will have to wait for a child to become available. Then, they will receive a letter from the Regional Court of Dakar telling them that a child has become available and when they can travel to Senegal to meet the child and complete the remaining legal procedures.

The letter also includes information about the sex and age of the child. No medical information is provided unless it is requested. If the prospective adoptive parents are not able to travel to Senegal for their appointment, they will be given a new appointment. If they miss the second appointment, AEMO will offer the child to another family.

According to AEMO, it is not mandatory for both prospective adoptive parents to travel to Senegal to escort the child. Once the prospective adoptive parents arrive in the country, they need to meet with the adoption judge at the Regional Court of Dakar in the Justice Minister's office, who personally issues the adoption court orders that parents use to obtain the release of the adopted child from the orphanage. According to AEMO, prospective adoptive parents cannot visit the child before the court order is issued.

After prospective adoptive parents have seen the child, they have three options: 1) take the child out of the orphanage; 2) leave the child at the orphanage and visit daily in order to bond with the child; or 3) reject the child. For the second option, parents may choose to stay at the orphanage until they leave the country, but they will have to make their own arrangements with the orphanage staff.

The prospective adoptive parents may decline the child, but they will not be allowed to adopt another child in Senegal and their approved adoption request and court order will be immediately revoked.

Prospective adoptive parents will receive a birth for the child from the Senegalese government with a Christian and Muslim name. This birth certificate will enable the adoptive parents to apply for a certificate of citizenship and a Senegalese passport. Prospective adoptive parents may submit a request to the Regional Court of Dakar to change the child's name after the child has been officially adopted.

The new name will have to be recorded in the appropriate birth register. If the prospective adoptive parents decide to change the child's name, they may apply for the child's passport after this process has been completed.

The adoption process for Senegalese citizens wishing to adopt in Senegal may be different than the one described above, and Americans who are also citizens of Senegal should consult a local attorney for assistance.

Required Documents: All documents should be notarized and translated into French.

- Certified true copies of the adopting parent(s)' birth certificates;
- Adoptive parents' police record or certification of the lack thereof;
- Certified true copies of the adopting parents' marriage certificate, if applicable;
- Notarized Copies of each Prospective Adoptive Parent's Passport;
- Financial documents of the adopting parents (employment records, documentation of assets, retirement and social security);
- Approved I-600A from U.S. Citizenship and Immigration Services (USCIS);
- Home study performed by a licensed agent/agency in the prospective parents' U.S. state of residence;
- A letter addressed to the President of the Regional Court of Dakar;

- A medical certificate certifying that the couple cannot have biological children or an exemption from the President of the Republic for those who have biological children.

U.S. Immigration Requirements: Prospective adoptive parents are strongly encouraged to consult USCIS publication M-249, *The Immigration of Adopted and Prospective Adoptive Children*, as well as the Department of State publication, *Intercountry Adoptions.*

Please see the *Intercountry Adoption* section of this book for more details and review current reports online at http://adoption.state.gov.

General questions regarding intercountry adoption may be addressed to the Office of Children's Issues, U.S. Department of State, CA/OCS/CI, SA-29, 4th Floor, 2201 C Street, NW, Washington, D.C. 20520-4818, toll-free Tel: 1-888-404-4747.

SERBIA

Compiled from the December 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Republic of Serbia

PROFILE

Geography

Area: Serbia (77,474 sq. km.) is slightly smaller than Maine.

Cities: Capital—Belgrade. Other cities—Pancevo, Novi Pazar, Uzice, Novi Sad, Subotica, Bor, Nis.

Terrain: Varied; in the north, rich fertile plains; in the east, limestone ranges and basins; in the southeast, mountains and hills.

Climate: In the north, continental climate (cold winter and hot, humid summers with well-distributed rainfall); central portion, continental and Mediterranean climate; to the south, hot, dry summers and autumns and relatively cold winters with heavy snowfall inland.

People (2004 est.)

Nationality: Noun—Serb(s); adjective—Serbian.

Population: (2002 Republic census) Serbia (not including Kosovo) 7,478,820.

Population growth rate: -3.5%.

Ethnic groups: (2002 population census, without Kosovo) Serbian 83%, Hungarian 4%, Bosnian 2%, Albanian 1%, Montenegrin 1%, other 9%.

Religions: (2002 population census, without Kosovo) Orthodox 85%, Roman Catholic 5.5%, Muslim 3%, Protestant 1%, other 5.5%.

Languages: Serbian 88%, Hungarian 3.8%, Bosnian 2%, Albanian 1%, others 5%.

Health: Infant mortality rate—8.1 deaths/1,000. Life expectancy—males 72.44 yrs., female 77.86 yrs.

Government

Type: Republic.

Constitution: Adopted in an October 28-29, 2006 referendum.

Independence: April 11, 1992 (Federal Republic of Yugoslavia (F.R.Y.) formed as self-proclaimed successor to the Socialist Federal Republic of Yugoslavia). On February 4, 2003, the F.R.Y. parliament adopted a new Constitutional Charter establishing the state union of Serbia and Montenegro. On May 21, 2006, the Republic of Montenegro held a successful referendum on independence and after Montenegro's declaration of independence on June 3, the parliament of Serbia stated that the Republic of Serbia was the continuity of the state union, rendering the two republics independent and sovereign countries.

Government branches: Executive—president (chief of state); prime minister (head of government), Council of Ministers (cabinet). Legislative—Parliament. Judicial—Federal Court (Savezni Sud) and Constitutional Court.

Political parties: Alliance of Vojvodina Hungarians (SVM), Christian Democratic Party of Serbia (DHSS), Democratic Community of Vojvodian Hungarians (DZVM), Democratic Party (DS), Democratic Party of Serbia (DSS), Democratic Party of Albanians (PDSh), Force of Serbia (PSS), G-17 Plus (G-17), League for Sumadija (LS), League of Social Democrats of Vojvodina (LSV), Liberal Democratic Party (LDP), Movement for Democratic Progress (LDP-Albanians), New Serbia (NS), Party of Democratic Action (SDA—Bosniaks), Party of Democratic Action (PVD—Albanians), People's Party (NP), Sandzak Democratic Party (SDP—Bosniaks), Serbian Progressive Party (SNS), Serbian Radical Party (SRS), Serbian Renewal Movement (SPO), Social Democratic Party (SDP), Social Democratic Union (SDU), Socialist Party of Serbia (SPS—former Communist Party), Yugoslav United Left (JUL).

Suffrage: 16 years of age if employed; universal at 18.

Economy

GDP: (2007) $43.5 billion.

GDP growth rate: (2007) 7.5%.

GDP per capita: (2007) $5,400.

Inflation rate: (2007) 10.1%.

Natural resources: Coal, petroleum, natural gas, antimony, copper, lead, zinc, timber, bauxite, gold, silver, navigable rivers.

Agriculture: 11% of GDP.
Industry: 18% of GDP.
Services: 21% of GDP.
Trade: (2007) Exports—$8.8 billion. Major markets—Italy, Germany, Bosnia, Montenegro. Imports—$18.5 billion. Major suppliers—Germany, Italy, Russia, China.

PEOPLE AND HISTORY

The first Serbian kingdom was created in 1170 A.D. by Stefan Nemanja, the founder of the Nemanjic dynasty, whose son was canonized as St. Sava and became the patron saint of the autocephalous Serbian Orthodox Church founded in 1219. Serbia's territories expanded under the rule of King Milutin, who seized territory in nearby Macedonia from the Byzantines, and reached their peak under Milutin's son, Stefan Dusan (1331-55). However, Serbian power waned after Stefan's death in 1355, and at the Battle of Kosovo (June 28. 1389) the Serbs were defeated by the Turks. Following the Battle of Smederevo in 1459, the Ottoman empire exerted complete control over all Serb lands.

Serbs lived under the rule of the Ottoman sultans for nearly 370 years, though the Serbian Orthodox Church, with several disruptions, transmitted Serbian heritage and helped preserve Serbian identity during this period. Movements for Serbian independence began with uprisings led by Karadjordje Petrovic (1804-13) and Milos Obrenovic (1815-17), founders of two rival dynasties that would rule Serbia until World War I. Serbia became an internationally recognized principality under Turkish suzerainty and Russian protection after the Russo-Turkish War of 1828-1829. After waging war against Turkey in support of Bosnian rebels in 1876, Serbia formally gained independence in 1878 at the Congress of Berlin, largely thanks to Russian support. Following Austria-Hungary's annexation of Bosnia, Serbia led a successful coalition of Montenegrin, Bulgarian, and Greek troops (the Balkan League) that in 1913 seized remaining Ottoman-controlled territory in Europe and established Serbia as a regional military leader.

The assassination of Austrian archduke Franz Ferdinand on June 28, 1914 in Sarajevo by a Bosnian Serb, Gavrilo Princip, set off a series of diplomatic and military actions among the great powers that culminated in World War I. Austro-Hungarian and Bulgarian forces occupied Serbia soon after World War I began. After the collapse of Austria-Hungary at the war's end in 1918, Vojvodina and Montenegro united with Serbia, and former south Slav subjects of the Habsburgs sought the protection of the Serbian crown within the Kingdom of Serbs, Croats, and Slovenes. Serbia was the dominant partner in this state, which in 1929 adopted the name Yugoslavia.

The kingdom soon encountered resistance when Croatians began to resent control from Belgrade. This pressure prompted King Alexander I to split the traditional regions into nine administrative provinces. During World War II, the Axis powers occupied Yugoslavia. Royal army soldiers, calling themselves Chetniks, formed a Serbian resistance movement, but the communist Partisans, with Soviet and Anglo-American help, succeeded in defeating the Chetniks and forcing German forces from Yugoslavia by 1944. In an effort to avoid Serbian domination during the postwar years, Bosnia and Herzegovina, Macedonia, and Montenegro were given separate and equal republican status within the new socialist federation of Yugoslavia; Kosovo and Vojvodina were made autonomous provinces within Yugoslavia.

Despite the appearance of a federal system of government in Yugoslavia, Serbian communists ruled Yugoslavia's political life for the next four decades under Josip Broz Tito, a former Bolshevik and committed communist. After Tito made several significant foreign policy decisions without consulting Moscow, Yugoslavia in 1948 was expelled from the Soviet bloc, signifying a split with Moscow that left Tito independent to accept aid from the Marshall Plan and become a leader of the Non-Aligned Movement. Communist rule transformed Serbia from an agrarian into an industrial society; however, by the 1980s, Yugoslavia's economy started to fail. With the death of Tito in 1980, separatist and nationalist tensions emerged in Yugoslavia.

In the late 1980s, Slobodan Milosevic propelled himself to power in Belgrade by exploiting Serbian nationalism, especially over Kosovo. In 1989, he arranged the elimination of Kosovo's autonomy in favor of direct rule from Belgrade. Belgrade ordered the firing of large numbers of Albanian state employees, whose jobs were then taken by Serbs. As a result of this oppression, Kosovo Albanian leaders led a peaceful resistance movement in the early 1990s and established a parallel government funded mainly by the Albanian diaspora.

Between 1991 and 1992, Slovenia, Croatia, Bosnia and Herzegovina, and Macedonia all seceded from Yugoslavia. On April 27, 1992, in Belgrade, Serbia and Montenegro joined in passing the Constitution of the Federal Republic of Yugoslavia (F.R.Y.).

Kosovo's peaceful resistance movement failed to yield results, and in 1997 the Kosovo Liberation Army (KLA) began an armed resistance. The KLA's main goal was to secure the independence of Kosovo.

In late 1998, Milosevic unleashed a brutal police and military campaign against the separatist KLA, which included atrocities against civilian noncombatants. For the duration of Milosevic's campaign, large numbers of ethnic Albanians were either displaced from their homes in Kosovo or killed by Serbian troops or police. These acts, and Serbia's refusal to sign the Rambouillet Accords, provoked 79 days of bombing by NATO forces from March to June 1999 and led the UN Security Council to authorize, through UNSC Resolution 1244 (June 10, 1999), an international civil and military presence in Kosovo, placing these international presences

under UN auspices, calling for a process to determine Kosovo's status, and calling for UN interim administration of Kosovo. Following Milosevic's capitulation, international forces—including the UN Mission in Kosovo (UNMIK) and the NATO-led security force KFOR—moved into Kosovo. In March 2002, the heads of the federal and republican governments signed the Belgrade Agreement, setting forth the parameters for a redefinition of Montenegro's relationship with Serbia within a joint state. On February 4, 2003, the F.R.Y. parliament ratified the Constitutional Charter, establishing a new state union and changing the name of the country from Yugoslavia to Serbia and Montenegro. On May 21, 2006, the Republic of Montenegro held a successful referendum on independence and declared independence on June 3. Thereafter, the parliament of Serbia stated that the Republic of Serbia was the continuity of the state union, changing the name of the country from Serbia and Montenegro to the Republic of Serbia, with Serbia retaining Serbia and Montenegro's

membership in all international organizations and bodies. On February 17, 2008, Kosovo declared its independence following a 120-day last-ditch effort by the EU-Russia-U.S. Troika to facilitate an agreement between Serbia and Kosovo on the latter's status.

The UNSC was deadlocked on a way forward on Kosovo status and how to act on the report of UN Special Envoy Maarti Ahtisaari in mid-2007. The United States officially recognized Kosovo's independence the following day. More than 50 nations recognized Kosovo as of late 2008. Serbia has rejected Kosovo independence. Government officials declared their intent to pursue all peaceful, political, and diplomatic means to retain Kosovo and sought a UN resolution to request that the International Court of Justice review the legality of Kosovo's declaration of independence. After a vigorous lobbying campaign, on October 9, 2008, the UN General Assembly voted in favor of Serbia's proposal.

GOVERNMENT AND POLITICAL CONDITIONS

Routine federal elections in September 2000 resulted in a narrow official victory for Slobodan Milosevic and his coalition against Vojislav Kostunica, the consensus presidential candidate of the Democratic Opposition of Serbia (DOS), an umbrella group of 18 anti-Milosevic political parties. After Milosevic's victory was documented to be fraudulent, citizens across Serbia turned out in street protests in support of Kostunica. On October 5, 2000, Milosevic was forced to concede defeat after mass protests across Serbia. The new F.R.Y. President Vojislav Kostunica was soon joined at the top of the domestic Serbian political scene by the Democratic Party's (DS) Zoran Djindjic, who was elected Prime Minister of Serbia at the head of the DOS ticket in parliamentary elections that December. After an initial honeymoon period Djindjic and the DS found themselves increasingly at odds with the Democratic Party of Serbia (DSS) and the rest of DOS regarding the nature and pace of reform. Although initial reform efforts were highly successful, especially in the economic and fiscal sectors, by the middle of 2002, the nationalist Kostunica and the pragmatic Djindjic were openly in conflict with each other.

Despite the initial euphoria of replacing Milosevic's autocratic regime, the Serbian population by mid-2002 slid into apathy and disillusionment with its leading politicians in reaction to this political maneuvering. This political stalemate continued for much of 2002, and reform initiatives stalled. Two rounds of elections for the republic presidency in late 2002 failed because of insufficient voter turnout (Serbian law required participation by more than 50% of registered voters).

On March 12, 2003, Serbian Prime Minister Djindjic was assassinated by organized crime elements threatened by his pursuit of anti-crime measures. Zoran Zivkovic, a vice-president of Djindjic's DS party, was elected Prime Minister in March 2003, but a series of scandals plagued the new government, which ultimately led to early elections.

Republic of Serbia presidential elections were again held on November 16, 2003. These elections were also declared invalid because of insufficient voter turnout. Following the December 2003 parliamentary elections, a new minority government was formed with the Democratic Party of Serbia (DSS), G17+, and the Serbian Renewal Movement/New Serbia (SPO/NS) coalition and the tacit support of the Socialist Party of Serbia (SPS). Former F.R.Y. president Vojislav Kostunica was named Prime Minister.

On June 27, 2004, after changes to the election law to allow for a valid election with turnout of less than 50% of registered voters, Boris Tadic (DS) defeated Radical Party candidate Tomislav Nikolic by a slim margin and was elected President of Serbia. President Tadic's Democratic Party (DS) did not join the governing coalition but worked with Serbia's democratic forces to advance the reform agenda.

Following the adoption of a new Constitution in October 2006, Serbia held parliamentary elections on January 21, 2007. A government was formed in May 2007, with a coalition of the DS, DSS, and G17+. The coalition chose Prime Minister Kostunica to continue in his position. On February 3, 2008, in run-off presidential elections, Boris Tadic again defeated Radical Party candidate Tomislav Nikolic by a slim margin and was re-elected President of Serbia. Following the collapse of the governing coalition in March 2008, new parliamentary elections were held on May 11, 2008. The Democratic Party-led list, "For a European Serbia," won nearly 39% of the vote, and in July 2008 formed a coalition government with the Socialists and ethnic minority parties. In September 2008, SRS deputy president and two-time presidential candidate Tomislav Nikolic split from the SRS and formed the Forward Serbia caucus consisting of 20 parliamentarians drawn from the SRS. As of November 2008, the SRS maintained 58 seats in parliament and Nikolic's Forward Serbia caucus formed the basis for the Serbian Progressive Party (SNS), which Nikolic and former Radical General Secretary Aleksandar Vucic officially formed in October 2008.

Legislature

The Serbian National Assembly, a unicameral parliament, is the law-making body of the Republic of Serbia.

Principal Government Officials

Permanent Representative to the UN, New York: **Pavle JEVREMOVIC**

DEFENSE

Military branches include the Army of Serbia, which includes ground forces with internal and border troops, and air and air defense forces, and Civil Defense. Civilians fit for military service were estimated at about 2,088,595 for 2001.

The 2002 estimate for military expenditures as percentage of GDP was 3.6%. The Ministry of Defense has undertaken significant reform initiatives, which, if continued, will help move Serbia closer to full Euro-Atlantic integration.

ECONOMY

Serbia's economic progress since the fall of Milosevic has been substantial, but economic reform and restructuring are continuing challenges for the Serbian Government. Serbia is still far behind its neighbors, with GDP only now returning to levels comparable to 1989. Growth in 2007 was a healthy 7.5%, but this pace slowed during 2008. In 2007, Serbia recorded strong foreign direct investment (FDI) of $2.2 billion, but greenfield investment remains limited. The privatization of the banking sector has been completed, with over 70% of assets owned by foreigners.

While economic reform has been moving forward in many areas, enterprise sector reform is still halting. Over 26% of all persons employed in Serbia work for state-owned enterprises or the central and local governments. Privatization of the least attractive socially-owned companies has been left for the very last and will not be completed until sometime in 2009.

During 2008, the Serbian Government signed an agreement with car maker Fiat to purchase and invest in Zastava, Serbia's state-owned car manufacturer. This agreement revitalized interest in Serbia's industrial heartland. In addition, major U.S. investors such as U.S. Steel and Ball Packaging announced additional investments to expand production capacity in Serbia.

FOREIGN RELATIONS

From the breakup of the Socialist Republic of Yugoslavia in 1989, the foreign policy of the F.R.Y. was characterized primarily by a desire to secure its political and geopolitical position and the solidarity of ethnic Serbs in the Balkan region through a strong nationalist campaign. The F.R.Y. supported and exploited the expansion of violent conflicts—in Bosnia and Herzegovina, Croatia, and its own province, Kosovo—in order to advance its policies. However, in 2002, the F.R.Y. resolved its longstanding border dispute with Macedonia and established full diplomatic relations with its neighbor and former adversary Croatia.

Also in 2002, the F.R.Y. Government established a commission to coordinate cooperation with the International Criminal Tribunal for the former Yugoslavia (ICTY) and began serving warrants for the arrest of persons indicted for war crimes who sought refuge in the country. The crackdown on organized crime following the assassination of Serbian Prime Minister Djindjic also resulted in the apprehension and transfer to The Hague of several persons indicted for war crimes. In 2004 and 2005, a significant number of ICTY indictees surrendered to the tribunal. In 2007, Serbia assisted in the arrest of two of the remaining six persons indicted for war crimes, Zdravko Tolimir and Vlastimir Djordjevic, and in 2008 the government arrested and extradited Stojan Zupljanin and Radovan Karadzic. Bosnian Serb General Ratko Mladic and Croatian Serb political leader Goran Hadzic remain at large, but the government has indicated its intention to apprehend these individuals. Serbia's ICTY obligations will not be fully met until Mladic and Hadzic are in The Hague.

Immediately preceding the NATO bombing campaign of the F.R.Y. in March 1999, the U.S. and most European countries severed relations with Belgrade, and the U.S. Embassy was closed. After October 5, 2000, foreign embassies, including that of the U.S., reopened, and Serbia, as the successor state to the F.R.Y., regained its seat in such international organizations as the Organization for Security and Cooperation in Europe (OSCE) and the UN, and is actively participating in International Monetary Fund (IMF) and World Bank projects. In 2003, Serbia was admitted to the Council of Europe and in 2006 joined NATO's Partnership for Peace. Serbia has also indicated its desire to join the European Union (EU). Both NATO and the EU have made full ICTY cooperation a prerequisite for Serbia's increased cooperation with these organizations. Serbia and the EU signed a Stabilization and Association Agreement (SAA)—the first

step toward eventual accession—in April 2008, but the EU immediately froze the related Interim Trade Agreement pending full cooperation with the ICTY.

Serbia's bilateral relationship with many countries was chilled following Kosovo's independence in February 2008. In the days following Kosovo's independence, rioters in Belgrade attacked the embassies of several countries, including the United States, causing severe property damage. Serbia recalled its ambassadors for consultations from all countries that formally recognized Kosovo. Serbia returned its ambassadors to EU countries in July 2008 and to the remaining countries in October 2008. Serbia adopted a policy of expelling the ambassadors of countries that recognized Kosovo after the UN General Assembly's approval of a resolution referring the legality of Kosovo's declaration of independence to the International Court of Justice in early October, Subsequently, Serbia expelled the ambassadors of neighboring Montenegro and Macedonia as well as the ambassadors of Malaysia and the U.A.E.

Foreign Aid

At the social, political, and geographic crossroads between Eastern and Western Europe, Serbia occupies a key strategic juncture in the Balkans. The U.S. has been engaged in assisting Serbia's transition to a market-oriented democracy since 1997. Despite political uncertainty, U.S. Government assistance to Serbia continues to promote opportunities for economic growth, build capacity with key counterparts, and work steadily to move the country toward stability and Euro-Atlantic integration.

U.S. assistance to Serbia is strategically targeted to address priority U.S. foreign policy objectives and to promote Serbia's successful transition to a functioning market economy and stable pluralistic democracy. These resources, although modest in comparison to the European Union and other multilateral donors, have proven to be instrumental in leveraging other investments and in focusing Serbia's reform agenda. Annual congressional restrictions have been imposed on U.S. assistance to Serbia in order to ensure that the country meets its obligation to comply with the rulings of the International Criminal Tribunal for the former Yugoslavia (ICTY). In August 2008, Secretary Rice certified that Serbia was cooperating with the ICTY.

U.S.-SERBIA RELATIONS

After severing diplomatic relations in March 1999, the U.S. Embassy formally reopened in May 2001. The Serbian Embassy in Washington and the U.S. Embassy in Belgrade have reestablished bilateral relations and provide a full range of consular services. Serbia currently enjoys stable diplomatic relations with all of its neighbors except Kosovo. After recalling its ambassador to Washington in February 2008 in the wake of Kosovo's declaration of independence, Serbia in October 2008 returned Ambassador Vujacic to Washington.

TRAVEL

Consular Information Sheet

June 27, 2008

Country Description: Serbia is a country that continues to undergo political changes. In 2006, Montenegro declared its independence from Serbia, changing the name of the country from Serbia and Montenegro to the Republic of Serbia, with the Republic of Montenegro becoming a separate state. This change has had minimal impact on foreign travelers. On February 17, 2008 Kosovo declared its independence from Serbia; it is not yet clear how this change will affect foreign travelers.

Entry Requirements: A passport is required for travel to Serbia. U.S. citizens with tourist, official, or diplomatic passports do not require a visa for entry and stay in Serbia for up to 90 days within a six-month period. It is not possible to apply for or obtain temporary residence permits, required for stays of longer than 90 days, outside of Serbia. U.S. citizens already in Serbia who wish to remain in Serbia for more than 90 days must obtain a temporary residence permit from the local police having jurisdiction over their place of residence in Serbia. With their residency application, applicants will need to provide a copy of their birth and marriage certificates (if applicable), obtained within 90 days before application, and a police report authenticated for use abroad from their state of residence in the U.S. or from the country where they permanently reside. All documents should have an "apostille" stamp certifying their authenticity. Information regarding apostilles and authentication of documents is available at http://travel.state.gov/law/

info/judicial/judicial_701.html. For further information on entry requirements for Serbia, including information regarding requirements for residency and work permits, travelers may contact the Serbian Embassy in Washington at telephone (202) 332-0333 or fax (202) 332-3933. The address of the Embassy is 2134 Kalorama Road, Washington, DC 20008 and the web site is http://www.mfa.gov.yu. Alternatively, travelers may also contact the Consulate General in Chicago at telephone (312) 670-6707 or fax (312) 670-6787 or by email at yuconsulate@aol.com. The address of the Chicago Consulate is 201 East Ohio St., Suite 200, Chicago, Illinois 60611.

Travelers who obtain a new U.S. passport while in Serbia and do not have a prior passport or other evidence of their entry (for example, in cases of a lost or stolen passport or a child born in Serbia) will not be allowed to depart the country without an exit visa obtained from the Ministry of Interior. Similarly, travelers who use a different country's passport to enter than to exit (for example, entering with a Serbian passport or Serbian "National ID Card" and attempting to exit with a U.S. passport) are likely to have difficulty exiting Serbia due to the lack of an entry stamp in their passport. Note that Montenegro and Kosovo have their own immigration requirements.

Travelers who enter Serbia with more than the equivalent of 10,000 euros in cash are required to declare all currency upon entry and must obtain from customs officials a declaration that must be presented at departure. Failure to comply may result in the confiscation of all funds. Please refer to our Customs Information to learn more about customs regulations.

Registration with Local Authorities: Visitors staying in private accommodations must register with the police station responsible for the area in which they are staying within 24 hours of arrival. Failure to comply may result in a fine, incarceration, and/or expulsion. Persons who fail to register may face difficulties in departing the country. Visitors staying in hotels or tourist facilities are automatically registered with the police by the hotel. Additional information about visa requirements and the obligation of foreigners to register their location is available from the Government of Serbia at http://www.mup.sr.gov.yu.

Safety and Security: Occasional demonstrations occur. After Kosovo declared its independence in February 2008, large-scale demonstrations took place in Belgrade that turned violent. During these demonstrations, the U.S. Embassy was heavily damaged and one protestor lost his life. We wish to remind U.S. citizens that even demonstrations intended to be peaceful have the potential to turn into confrontational situations and possibly escalate into violence. U.S. citizens traveling or residing in Serbia should take commonsense precautions to avoid demonstrations and to be aware of heightened security and potential delays when they occur. Anti-American sentiment tends to be highest surrounding the anniversary dates of the 1999 NATO bombing campaign or during times of unusually high tension in Kosovo. In some instances, Serb victories in high profile international sporting events have triggered demonstrations. Most demonstrations have been peaceful or were marked by only low levels of violence.

Travelers to southern Serbia should be aware that the security situation in southern Serbia has the potential to deteriorate quickly. U.S. Government employees on official business near the border between Serbia and Kosovo travel in fully armored vehicles. Persons contemplating travel in southern Serbia near the Kosovo border should register with the U.S. Embassy and check in with the Embassy regularly for the latest security updates.

Local Belgrade nightclubs are becoming increasingly popular with foreign tourists. Patrons should be aware that these establishments can be crowded and may not comply with Western standards for occupancy control and fire safety.

For the latest security information, Americans traveling abroad should regularly monitor the Department of State, Bureau of Consular Affairs' web site at http://travel.state.gov, where the current Travel Warnings and Travel Alerts, as well as the Worldwide Caution, can be found.

For the latest security information, Americans traveling abroad should regularly monitor the Department's Internet web site, where the current Worldwide Caution Travel Alert, Travel Warnings and Travel Alerts can be found. Updated information on security can also be obtained by calling 1-888-407-4747 toll free in the U.S., or, for callers outside the U.S. and Canada, a regular toll line at 1-202-501-4444. These numbers are available from 8:00 a.m. to 8:00 p.m. Eastern Time, Monday through Friday (except U.S. federal holidays.

Crime: While Belgrade is not afflicted with high levels of street crime, pick-pocketing and purse snatchings can occur. The same precautions one would take in any large city in the United States should serve well in Belgrade. Crimes tend to be based on opportunity rather than targeting. Unsecured vehicles, items left in plain sight within vehicles, open gates, and open garage doors are inviting targets. Difficult economic conditions have led to the growth of an organized criminal class. Violent crime is most commonly associated with organized crime activities. While confrontational and gratuitously violent crimes rarely target tourists, Mafia-style reprisals have sometimes occurred, including in hotels, restaurants, shops and on the street, and the threat of passersby being affected is possible. Bombs targeting specific individuals have detonated in popular business and restaurant areas, usually after midnight and in the early morning hours.

Car thefts or break-ins can occur at all times of day or night in all sections of Belgrade and other parts of the country if vehicles do not have additional security devices like fuel line interrupter switches or steering wheel locking devices. As in other parts of the world, travelers should

be especially on guard while walking in city centers. In case of emergency, the police telephone number is 92.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance.

The Embassy or Consulate staff can, for example, assist you to find appropriate medical care, to contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

Medical Facilities and Health Information: Although many physicians in Serbia are highly trained, hospitals, clinics, and ambulances are generally not equipped and maintained to Western standards. Medicines and basic medical supplies are largely obtainable in privately owned pharmacies. Hospitals require payment in cash for all services, and do not accept health insurance as compensation.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's web site at http://wwwn.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith/en.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Serbia is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

Roads in Serbia are often poorly maintained, especially in rural areas. During winter months, fog can obscure visibility while driving. Fog can be extremely heavy in Vojvodina, the region between Belgrade and the border with Hungary. Road tolls for foreign-registered vehicles remain high. The use of seat belts is mandatory. A driver with a blood alcohol level higher than 0.05 is considered intoxicated. Roadside assistance is available by dialing 987. Other emergency numbers are police: 92, fire department: 93, and ambulance: 94.

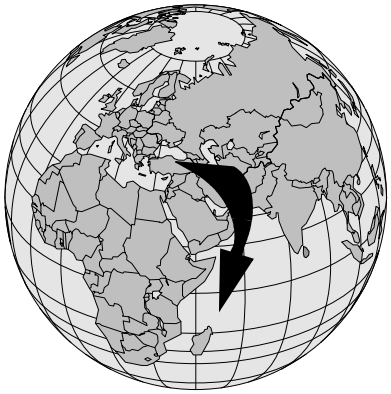
Metered taxi service is safe and reasonably priced, although foreigners are sometimes charged higher rates. Buses and trams are overcrowded in Belgrade and in other areas of Serbia, and are poorly maintained.

More specific information concerning Serbian driving permits, vehicle inspection, road tax and mandatory insurance in the Serbian language from Serbian Automotive Association can be found at www.amss.org.yu.

Some general information about driving conditions is available in English at the Belgrade Tourism Organization's web site at www.tob.co.yu/english/index.html.

Aviation Safety Oversight: The U.S. Federal Aviation Administration (FAA) has assessed the Government of Serbia's Civil Aviation Authority as not being in compliance with International Civil Aviation Organization (ICAO) aviation safety standards for oversight of Serbia's air carrier operations. For more information, travelers may visit the FAA's web site at http://www.faa.gov.

Special Circumstances: Travelers entering Serbia with more than 5,000 euros in cash are required to declare all currency upon entry and obtain from customs officials a declaration form that must be presented at departure. Failure to comply may result in the confiscation of all funds. The U.S. Embassy has been contacted by many American citizens who have failed to comply with this requirement and consequently had thousands of dollars seized by the Government of Serbia. It is advisable to contact the Serbian Embassy in Washington for specific information regarding customs requirements.



Dual U.S./Serbian nationals may be subject to laws that impose special obligations on Serbian citizens. Serbian males between the ages of 18 and 27 are required by law to perform military service. This applies to any individual whom the authorities consider to be Serbian -regardless of whether or not the individual considers himself Serbian, has a foreign citizenship and passport, or was born or lives outside of Serbia. If remaining in Serbia for more than the 90-day period permitted for tourism or business, men of Serbian descent may be prevented from leaving until they complete their military obligations or receive a waiver. Obligatory non-voluntary military service in Serbia will not affect U.S. citizenship. Specific questions on this subject should be addressed to the citizenship section of the U.S. Embassy in Belgrade.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating Serbian laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Serbia are strict and convicted offenders can expect jail sentences and heavy fines.

Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy and Consulate Locations: Americans living in or traveling in Serbia are encouraged to register with the nearest U.S. Embassy of Consulate through the State Department's travel registration web site, and to obtain updated information on travel and security in Serbia. Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency. The U.S. Embassy in Belgrade is located at 50 Kneza Milosa Street. The Embassy and consular section telephone number is 381-11-3619-344, and the same number should be used for after hour emergencies. The Consular Section fax number is 381-11-3615-989. The web site is http://belgrade.usembassy.gov.

SEYCHELLES

Compiled from the December 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Republic of Seychelles

PROFILE

Geography

Area: 444 sq. km; about 2.5 times the size of Washington DC.
Major islands: Mahe and Praslin.
Cities: Capital—Victoria.
Terrain: About half of the islands are granitic in origin, with narrow coastal strips and central ranges of hills rising to 905 m. The other half are coral atolls, many uninhabitable.
Climate: Tropical marine.

People

Nationality: Noun and adjective—Seychellois.
Population: (2008 est.) 82,247.
Annual growth rate: (2008 est.) 0.42%.
Ethnic groups: Creole (European, Asian, and African).
Religions: Catholic 82.3%, Anglican Church 6.4%, Seventh Day Adventist 1.1%, other Christian 3.4%, Hindu 2.1%, Muslim 1.1%, other 1.5%, unspecified 1.5%, none 0.6%.
Languages: Official languages are Creole, English, and French.
Education: Public schools and private schools, compulsory through grade 10. Literacy (1994)—87.5%.
Health: Free government health services for all people. Life expectancy—male 65.48 yrs, female 73.63 yrs. Infant mortality rate—14.36/1000.
Work force: 32,382 with 3,550 unemployed. Industries include tourism, fishing, manufacturing, and construction.

Government

Type: Multiple-party republic.
Independence: June 29, 1976.
Constitution: June 18, 1993.
Government branches: Executive—president (chief of state and head of government). Legislative—unicameral National Assembly with 34 seats (25 directly elected and 9 allocated on a proportional basis). Judicial—Supreme Court, Appeals Court.
Political parties: Democratic Party (DP), Seychelles National Party (SNP), Seychelles People's Progressive Front (SPPF).
Suffrage: Universal at 17.

Economy

GDP: (2007, official exchange rate): $710 million.
Annual growth rate: (2007) 6.3%.
Per capita income: (2007, purchasing power parity): $16,600.
Average inflation rate: (2005) 0.9%.
Natural resources: Fish.
Agriculture: Copra, cinnamon, vanilla, coconuts, sweet potatoes, tapioca, bananas, tuna, chicken, teas.
Industry: Tourism, re-exports, maritime services.
Trade: Exports (2007)—$400 million: canned tuna, frozen/fresh fish, frozen prawns, cinnamon bark. Imports (2007)—$720 million. Major partners—France, Italy, U.K., Singapore, South Africa, Spain, Saudi Arabia.
Exchange rate: (May 2007) 6.10 rupees=U.S.$1.
Aid per capita: (2003) $110.

GEOGRAPHY

Seychelles is located in the Indian Ocean about 1,600 kilometers (1,000 miles) east of Kenya. The nation is an archipelago of 115 tropical islands with two distinct collections of islands, some comprised of granite and others of coral. The Mahe Group consists of 42 granite islands, all within a 56-kilometer (35-mi.) radius of the main island of Mahe. These islands are rocky, and most have a narrow coastal stripe and a central range of hills rising as high as 914 meters (3,000 ft.). Mahe is the largest island—9,142 sq. km (55 sq. mi.)—and is the site of Victoria, the capital. The coral islands are flat with elevated coral reefs at different stages of formation. They have no fresh water; human life can be sustained on them only with difficulty.

The climate is equable and healthy, although quite humid, as the islands

are small and subject to marine influences. The temperature varies little throughout the year. Temperatures on Mahe vary from 24ºC to 29.9ºC (75ºF-85ºF), and rainfall ranges from 288 centimeters (90 in.) annually at Victoria to 355 centimeters (140 in.) on the mountain slopes. Precipitation is somewhat less on the other islands. During the coolest months, July and August, the temperature drops to as low as 70ºF. The southeast trade winds blow regularly from May to November, and this is the most pleasant time of the year. The hot months are from December to April, with higher humidity (80). March and April are the hottest months, but the temperature seldom exceeds 88ºF. Most of the islands lie outside the cyclone belt, so high winds are rare.

PEOPLE

About 90% of the Seychellois people live on Mahe Island. Most others live on Praslin and La Digue, with the remaining smaller islands either sparsely populated or uninhabited.

Most Seychellois are descendants of early French settlers and the African slaves brought to the Seychelles in the 19th century by the British, who freed them from slave ships on the East African coast. Indians and Chinese (1.1% of the population) account for the other permanent inhabitants. In 2006, about 4,000 expatriates lived and worked in Seychelles. Of those, about 65 were American.

Seychelles culture is a mixture of French and African (Creole) influences. Creole is the native language of 94% of the people; however, English and French are commonly used. English remains the language of government and commerce.

About 92% of the population over age 15 is literate, and the literacy rate of school-aged children has risen to well over 98%. Increases are expected, as nearly all children of primary school age attend school, and the government encourages adult education.

HISTORY

The Seychelles islands remained uninhabited for more than 150 years after they became known to Western explorers. The islands appeared on Portuguese charts as early as 1505, although Arabs may have visited them much earlier. In 1742, the French Governor of Mauritius, Mahe de Labourdonais, sent an expedition to the islands. A second expedition in 1756 reasserted formal possession by France and gave the islands their present name in honor of the French finance minister under King Louis XV. The new French colony barely survived its first decade and did not begin to flourish until 1794, when Queau de Quincy became commandant.

The Seychelles islands were captured and freed several times during the French Revolution and the Napoleonic wars, then passed officially to the British under the 1814 Treaty of Paris.

From the date of its founding by the French until 1903, the Seychelles colony was regarded as a dependency of Mauritius, which also passed from the French to British rule in 1814. In 1888, a separate administrator and executive and administrative councils were established for the Seychelles archipelago. Nine years later, the administrator acquired full powers of a British colonial governor, and on August 31, 1903, Seychelles became a separate British Crown Colony.

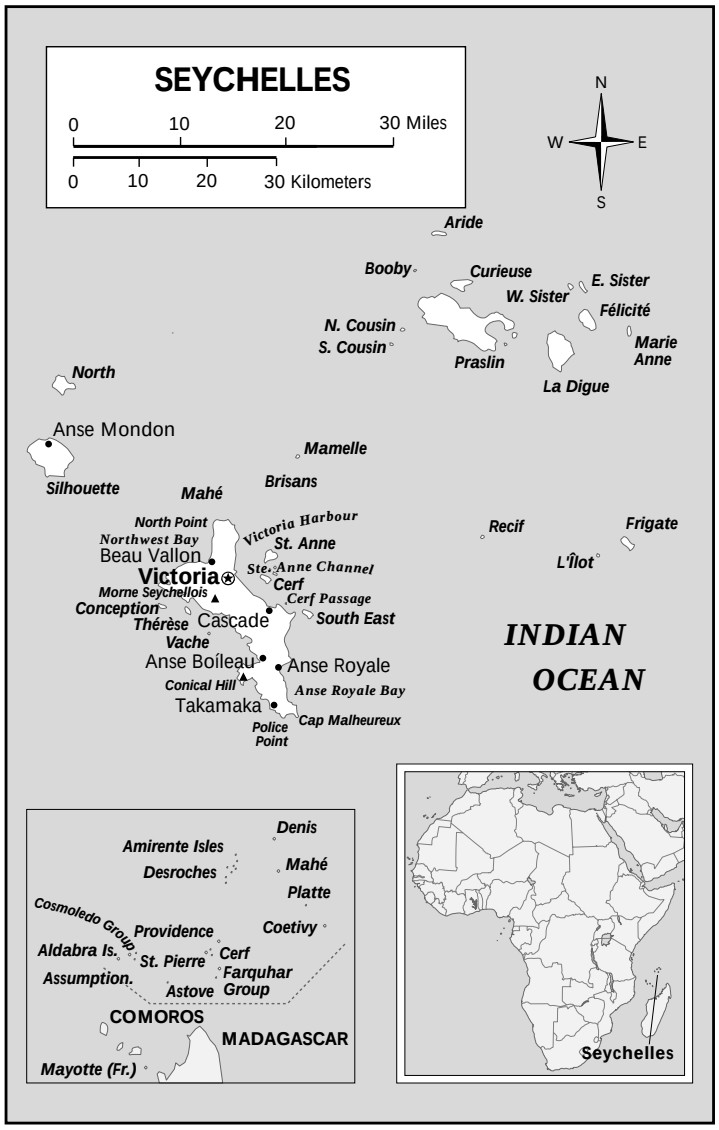
By 1963, political parties had developed in the Seychelles colony. Elections in 1963 were contested for the first time on party lines. In 1964 two new parties, the Seychelles Democratic Party (SDP) led by James Mancham, and the Seychelles People's Unity Party (SPUP) led by France Albert Rene, replaced existing parties.

In March 1970, colonial and political representatives of Seychelles met in London for a constitutional convention. Elections in November 1970 brought the resulting constitution into effect. In the November 1970 elections, the SDP won 10 seats, and the SPUP won 5 in the Legislative Assembly. Under the new constitution, Mancham became the Chief Minister of the colony.

Further elections were held in April 1974, in which both major political parties campaigned for independence. During the April 1974 elections, the SDP increased its majority in the Legislative Assembly by 3 seats, gaining all but 2 of the 15 seats. Demarcation of constituencies was such that the SDP achieved this majority by winning only 52% of the popular vote.

Following the 1974 election, negotiations with the British resulted in an agreement by which Seychelles became a sovereign republic on June 29, 1976. The SDP and SPUP formed a coalition government in June 1975 to lead Seychelles to independence. The British Government was asked to appoint an electoral review commission so that divergent views on the electoral system and composition of the legislature could be reconciled.

As a result, 10 seats were added to the Legislative Assembly, 5 to be nominated by each party. A cabinet of ministers also was formed consisting of 8 members of the SDP and 4 of the SPUP, with Chief Minister Mancham becoming Prime Minister. With independence on June 29, 1976, Mancham assumed the office of President and Rene became Prime Minister.



The negotiations following the 1974 elections also restored the islands of Aldabra, Farquhar, and Des Roches to Seychelles upon independence; those islands had been transferred in November 1965 from Seychelles to form part of the new British Indian Ocean Territory (BIOT).

Although the SDP/SPUP coalition appeared to operate smoothly, political divisions between the two parties continued. On June 5, 1977, during Mancham's absence at the London Commonwealth Conference, supporters of Prime Minister Rene overthrew Mancham in a smoothly executed coup and installed Rene as President.

President Rene suspended the constitution and dismissed the parliament. The country was ruled by decree until June 1979, when a new constitution was adopted.

In November 1981, a group of mercenaries attempted to overthrow the Rene government but failed when they were detected at the airport and repelled. The government was threatened again by an army mutiny in August 1982, but it was quelled after 2 days when loyal troops, reinforced by Tanzanian forces, recaptured rebel-held installations. At an Extraordinary Congress of the Seychelles People's Progressive Front (SPPF) on December 4, 1991, President Rene announced a return to the multiparty system of government after almost 16 years of one-party rule. On December 27, 1991, the Constitution of Seychelles was amended to allow for the registration of political parties. Among the exiles returning to Seychelles was James Mancham, who returned in April 1992 to revive his party, the Democratic Party (DP). By the end of that month, eight political parties had registered to contest the first stage of the transition process: election to the constitutional commission, which took place on July 23-26, 1992. The constitutional commission was made up of 22 elected members, 14 from the SPPF and 8 from the DP. It commenced work on August 27, 1992 with both President Rene and Mancham calling for national reconciliation and consensus on a new democratic constitution. A consensus text was agreed upon on May 7, 1993, and a referendum to approve it was called for June 15-18. The draft was approved with 73.9% of the electorate in favor of it and 24.1% against.

July 23-26, 1993 saw the first multiparty presidential and legislative elections held under the new constitution, as well as a resounding victory for President Rene. Three political groups contested the elections—the SPPF, the DP, and the United Opposition (UO)—a coalition of three smaller political parties, including Parti Seselwa. Two other smaller opposition parties threw in their lot with the DP. All participating parties and international observer groups accepted the results as "free and fair."

GOVERNMENT AND POLITICAL CONDITIONS

The president is both the chief of state and head of government and is elected by popular vote for a 5-year term. The Council of Ministers serves as a cabinet, and its members are appointed by the president. The unicameral National Assembly has 34 seats—25 elected by popular vote and 9 allocated on a proportional basis to parties winning at least 10% of the vote; members serve 5-year terms. The judicial branch includes a Court of Appeal and Supreme Court; judges

Three candidates contested the March 20-22, 1998 presidential election—Albert Rene, SPPF; James Mancham, DP; and Wavel Ramkalawan—and once again President Rene and his SPPF party won a landslide victory. The President's popularity in elections jumped to 66.6% in 1998 from 59.5% in 1993, while the SPPF garnered 61.7% of the total votes cast in the 1998 National Assembly election, compared to 56.5% in 1993. In 2001 President Rene was re-elected once again.

for both courts are appointed by the president. The legal system is based on English common law, French civil law, and customary law.

Seychelles has had a multi-party system with the adoption of a new Constitution in 1992. Since then, multi-party elections took place in 1993, 1998, 2001, 2006, and 2007. The Seychelles People's Progressive Front (SPPF) won the presidency and majority in the National Assembly in all of the elections.

Presidential elections were held in July 2006. Incumbent President James Michel of the Seychelles People's Progressive Front, who was appointed to power by former President Rene in 2004, won his first elected term. The final vote count was 53.73% for Michel to 45.71% for opposition alliance candidate and Seychelles National Party (SNP) leader, Wavel Ramkalawan. The electoral process for the 2006 presidential elections was determined to be credible by international observers. Following a six-month boycott in the National Assembly by the SNP opposition party, President Michel dissolved the National Assembly on March 20, 2007. Early elections to fill the vacated National Assembly seats were held May 10-12, 2007. The SPPF won 18 district seats and the SNP/DP alliance won seven district seats. Under the system of proportional representation, the SPPF won five seats and the SNP/DP alliance won four seats. The electoral process for the 2007 National Assembly elections was determined to be credible by international observers.

Principal Government Officials

Last Updated: 11/12/08

ECONOMY

Seychelles's economy rests on tourism and fishing. Employment, foreign earnings, construction, banking, and commerce are all largely dependent on these two industries.

The services sector—including transport, communications, commerce, and tourism—has accounted for close to 70% of GDP in recent years. The share of manufacturing has been between 15-20% of GDP, although it fluctuates from year to year owing to changes in output from the Indian Ocean Tuna cannery. Public investment in infrastructure has kept construction buoyant, with its share of GDP at around 10%. Given the shortage of arable land, agriculture, forestry, and fishing (excluding tuna) make a small contribution to national output.

GDP in 2007 was at $710 million (official exchange rate) and income per capita was at $16,600 (purchasing power parity). This puts the island in the World Bank's "upper middle-income" bracket with the result that Seychelles is low on the agenda of international donors and aid flows are limited. However, given the small size of the economy, the island remains vulnerable to external shocks.

Although the per capita income is over $16,000 (PPP), residents often have difficulty obtaining even basic foodstuffs, such as rice and sugar. Government mismanagement and excessive economic regulations, including a manipulated exchange rate, have resulted in foreign exchange shortages and a parallel market currency exchange rate double the official rate.

In 2005 and 2006, the government implemented several measures toward the liberalization of the trade regime and the privatization of state-owned entities, such as the removal of import licenses and the partial sale of the public insurance company SACOS. In October 2006, the Minister of Finance announced measures to start the process of a gradual liberalization of foreign exchange transactions. These limited measures, however, are unlikely to influence an agreement with the International Monetary Fund (IMF), which continues to press for devaluation as an important step toward resolving the persistent shortage of foreign exchange.

Although Seychelles is eligible for the African Growth and Opportunity Act (AGOA), it has failed to take advantage of AGOA thus far. Seychelles is not qualified for apparel benefits under AGOA and, in any case, its apparel manufacturing capacity is negligible.

DEFENSE

In 2002, Seychelles had a defense force (Seychelles People's Defence Forces) of about 800 army personnel, including 300 in the presidential protection unit. The army has one infantry battalion and two artillery elements. Paramilitary forces include a national guard consisting of 1,000 people and a coast guard estimated at 250 and divided into two divisions, the naval wing and security or infantry division.

The Seychelles Coast Guard (SCG), which was created in 1992, assumes many of the maritime roles commonly associated with the U.S. Coast Guard. They recently acquired responsibility for search and rescue for vessel inci-

dents as well as environmental protection from the Port and Marine Services Division. SCG has several operational vessels: the Russian-built Fortune, the Italian-built Andromache, the Scorpio, two Indian manufactured vessels, four Motor Life Boats, and the luxury yacht Gemini that also is used as the presidential yacht.

The air wing of the defense force separated from the coast guard in 1997 and does not have any dedicated aircraft, but it sometimes supplies pilots and aircrews to fly search and rescue missions. Their primary duty is to train pilots.

The Island Development Corporation (IDC) maintains the pool of aircraft, using them for sources of income by chartering them out. The aircraft inventory includes one Caravan F-406, one Defender, one Cessna 150, and one Beech 1900.

FOREIGN RELATIONS

Seychelles follows a policy of what it describes as "positive" nonalignment and strongly supports the principle of reduced superpower presence in the Indian Ocean.

The Seychelles Government is one of the proponents of the Indian Ocean zone of peace concept, and it has promoted an end to the U.S. presence on Diego Garcia. Seychelles' foreign policy position has placed it generally toward the left of the spectrum within the Nonaligned Movement.

The Russian Federation, the United Kingdom, France, India, China, and Cuba maintain embassies in Victoria. Seychelles has an ambassador resident in New York dually accredited to the United Nations and to the United States and Canada. It also has a resident ambassador to France and Belgium. In early 2007, the Seychelles Government announced the opening of new missions in South Africa, China, Italy, and India. Seychelles is a member of the Nonaligned Movement (NAM), the African Union, Commonwealth, International Monetary Fund (IMF), Indian Ocean Commission (IOC), La Francophonie, and the UN and some of its specialized and related agencies.

U.S.-SEYCHELLES RELATIONS

The year 1963 marked the beginning of an official U.S. presence in Seychelles when the U.S. Air Force Tracking Station was built and put into operation on Mahe. The USAF Tracking Station facilities were situated on land that was leased from the Seychelles Government ($4.5 million annually).

The station's complement consisted of five uniformed Air Force personnel (two officers and three sergeants), 65 employees of Loral Corporation and Johnson Instruments, and 150 Seychellois employees. The USAF Tracking Station officially closed down on September 30, 1996.

Peace Corps Volunteers served in Seychelles between 1974 and 1995. A U.S. consulate was opened in May 1976 and became an Embassy after Seychelles' independence in June 1976. The Embassy was subsequently closed in August 1996, and the United States opened a consular agency on September 2, 1996 to provide services to residents of Seychelles. The agency is under the supervision of the American Embassy in Port Louis, Mauritius. The U.S. Ambassador to Mauritius also is accredited to Seychelles.

TRAVEL

Consular Information Sheet

May 7, 2008

Country Description: The Republic of Seychelles consists of 115 islands off the east coast of Africa. The main islands of this archipelago include Mahe, which is the largest, followed by Praslin and La Digue. The total population is approximately 81,000. The capital, Victoria, is located on Mahe.

Entry Requirements: A valid passport, onward/return ticket, the local address where the visitor will stay, and proof of sufficient funds are required. A one-month entry visa may be obtained upon arrival and may be extended for a period of up to one year. There is an airport departure tax of approximately $40, which must be paid in U.S. dollars. This charge is typically included in the cost of an airline ticket. Travelers should contact the Permanent Mission of the Seychelles to the United Nations, 800 Second Avenue, Suite 400C, New York, NY 10017; telephone number (212) 972-1785, for the most current visa information.

Safety and Security: U.S. citizens should avoid crowds, political rallies, and street demonstrations. It is dangerous to swim alone at isolated beaches, especially after dark, due to strong currents. For the latest secu-

rity information, Americans traveling abroad should regularly monitor the Department of State, Bureau of Consular Affair's Internet site at http://travel.state.gov, where the current Travel Warnings and Travel Alerts, including the Worldwide Caution Travel Alert, can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S. and Canada, or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: Petty crime is a problem, but violent crime against tourists is rare. To reduce the risk of theft, travelers should keep valuables in hotel safes and close and lock hotel windows at night, even while the room is occupied. Hotels that do not have private safes in the rooms will usually have one at the reception desk. Travelers are also advised to take precautions and not leave bags unattended on the beach or in cars while swimming.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

Medical Facilities and Health Information: The 24 hour emergency number for all medical emergencies is 999. Medical facilities in Seychelles are limited, especially on the isolated islands where doctors are often unavailable. There is one government-owned hospital and several private clinics.

Recent years have seen an increase in the number of cases of chikungunya, a viral disease transmitted to humans by the bite of infected mosquitoes, and also of leptospirosis, a bacterial disease transmitted to humans and animals by exposure to water contaminated by infected animals. For more information and information on current outbreaks, please see the CDC's fact sheets on chikungunya and on leptospirosis at http://www.cdc.gov.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's website at http://wwwn.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith/en.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Seychelles is provided for general reference only and may not be totally accurate in a particular location or circumstance.

In Seychelles, one drives on the left side of the street. Roads are generally well maintained but are narrow and winding. Drivers should exercise caution due to a lack of shoulders and inadequate street lighting. Speed limits range from 25 to 50 miles an hour. Drivers and front seat passengers are required to wear seat belts. There are no laws regarding child safety seats.

Public transportation by bus is good but tends to be crowded during rush hours and usually requires several transfers to reach a desired destination. Taxis are also available.

The Seychelles Ministry of Health operates an ambulance service on the islands of Mahe, Praslin, and La Digue that can be contacted by dialing 999. Assistance on the more remote islands is limited. For more information, contact the Ministry of Health at P.O. Box 52, Victoria, Mahé, Seychelles; telephone (248) 388 000; email: mohps@seychelles.net.

For specific information concerning Seychelles driving permits, vehicle inspection, road tax and mandatory insurance, contact the Seychelles Ministry of Tourism via email at dgtmtca@seychelles.net. You may also contact the Seychelles Tourism Marketing Authority via email at seychelles@aspureasitgets.com.

Aviation Safety Oversight: As there is no direct commercial air service between the United States and Seychelles, the U.S. Federal Aviation Administration (FAA) has not assessed Seychelles' Civil Aviation Authority for compliance with International Civil Aviation Organization (ICAO) aviation safety standards. For more information, travelers may visit the FAA's Internet web site at http://www.faa.gov.

Special Circumstances: Due to strict laws regulating foreign exchange, all visitors are required to settle bills for tourism-related services in foreign currency, i.e., U.S. Dollars, Pounds Sterling, Euros, etc. Generally, cash, traveler's checks, and some credit cards are accepted. This regulation applies to all hotel, restaurant, car/driver rental, tours, boat charters, and scuba diving charges, as well as purchases in shops. Bills for taxis and other incidentals may be settled in Seychellois rupees but it is advisable to inquire prior to engaging services.

Visitors should note that automatic teller machines (ATMs) only distribute Seychellois rupees, and the Sey-

chellois government limits the amount of Seychellois rupees visitors can convert back into foreign exchange before leaving the country. Banks are currently authorized to convert 800 rupees back into foreign currency and will do so only upon presentation of an exchange receipt. It is advisable to spend all rupees prior to passing customs and immigration at the airport. It can be difficult to obtain foreign exchange while in Seychelles, so visitors may wish to bring some cash with them and check on options for payment of tourism-related services before arrival. Exchanging money on the informal, black market is a criminal offense.

For more information on foreign exchange in Seychelles, please visit the Government of Seychelles' Central CBS Bank web site at http://www.cbs.sc/ferd.html.

The Government of Seychelles prohibits wearing any camouflage apparel in the country unless one is participating in a sanctioned, military activity.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating Seychelles' law, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Seychelles are strict, and convicted offenders can expect jail sentences and heavy fines. Engaging in sex with children or using or disseminating child pornography in a foreign country is a crime, and is prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in Seychelles are encouraged to register with the U.S. Embassy in Port Louis Mauritius through the State Department's travel registration website and to obtain updated information on travel and security within Seychelles. Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency. The U.S. Embassy is located at Rogers House, Fourth Floor, Port Louis, Mauritius. The telephone numbers are (230) 202 4400; fax (230) 208 9534. In the event of an after hours emergency, the Embassy duty officer may be contacted at (230) 253 3641. The Embassy website is http://mauritius.usembassy.gov, email usembass@intnet.mu.

The U.S. Consular Agency in Victoria, Seychelles is open to U.S. citizens Tuesdays, Wednesdays, and Thursdays from 8:30 to 12:30. U.S. citizens are able to obtain passport applications, Social Security applications, and consular report of birth applications there.

The U.S. Consular Agency is located at Oliaji Trade Center, Victoria, Mahe; telephone (248) 225-256; fax (248) 225-189; e-mail consular agencyseychelles@gm-ail.com. The international mailing address is U.S. Consular Agency, P.O. Box 251, Victoria, Mahe, Seychelles.

Intercountry Adoption

October 2006

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is based on public sources and current understanding. Questions involving foreign and U.S. immigration laws and legal interpretation should be addressed respectively to qualified foreign or U.S. legal counsel.

Patterns of Immigration: Recent U.S. immigrant visa statistics show that there have only been three orphan immigrant visas issued to children from Seychelles in the past five fiscal years.

Adoption Authority:
Ministry of Social Affairs and Employment
Social Services Section
Oceangate House
P O Box 190
Victoria
Seychelles

Eligibility Requirements for Adoptive Parents: An adoption application may be made by a married couple or by a single person who is at least 21 years of age.

Residency Requirements: Adoptive parents are required to live with the child for at least three months before the adoption is finalized.

Time Frame: More than three months. The adoptive parent is required to stay in the country for at least three months for the purpose of monitoring the adoption and being available to the Social Services Department.

Adoption Agencies and Attorneys: There are no private adoption agencies. The Social Services Department oversees the adoption process.

Adoption Fees: There are no social service fees. The only fees involved are related to attorneys' fees.

Adoption Procedures: The prospective adoptive parents need to first identify a child and obtain the consent from biological parents. The "consent to an adoption order" must be signed by the biological parent(s) in front of a judge or notary. Prospective adoptive parents must undergo a medical test to determine their medical fitness with regards to raising children. The exam may be completed

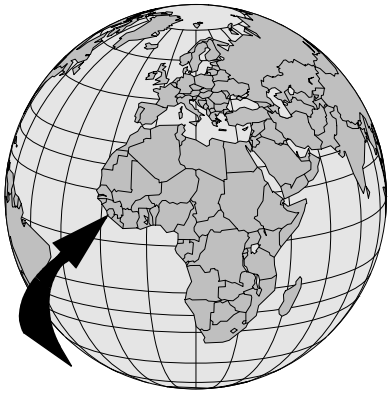
by any doctor in Seychelles. Prospective parents may obtain a form entitled "Medical cerficates as to health of applicants" from the Ministry of Social Affairs and Employment.

Medical tests are also required from the prospective adoptees. Once this is done, the prospective adoptive parents may apply for adoption to the Supreme Court of Seychelles. The Department of Social Service's role is to carry out an investigation with respect to the applicant's suitability to adopt and to make an appropriate recommendation to the Supreme Court of Seychelles with respect to the application for adoption. They typically review the following:

- Experience, attitude and ability to raise a child;
- Background of prospective adoptive parent(s);
- Civil status (stability);
- Employment status/income;
- Housing/home condition (a U.S. home study may be accepted in lieu of this requirement);
- Attitude of other members of the household;
- Biological parents' understanding of what an adoption order entails and reasons for consenting to the adoption;
- The child's feelings with regards to the adoption (if child is old enough).

Required Documents:

- Identity of adoptive parents;
- Marriage certificate, if married;
- Medical certificate of adoptive parents and child to be adopted;
- Completed application for an adoption order;
- Documents of consent from adoptive child's biological parent(s).



Embassy of the
Republic of Seychelles
c/o Permanent Mission of Seychelles to the United Nations
800 Second Avenue, Suite 400,
New York NY 10017
Telephone: (212) 687-9766
Fax: (212) 972-1786

U.S. Immigration Requirements: Prospective adoptive parents are strongly encouraged to consult USCIS publication M-249, *The Immigration of Adopted and Prospective Adoptive Children*, as well as the Department of State publication, *Intercountry Adoptions*. Please see the *Intercountry Adoption* section of this book for more details and review current reports online at http://adoption.state.gov.

Embassy of the United States of America

Fax: (230) 208 9534

U.S. Embassy
P.O. Box 606
Village Market
00621 Nairobi, Kenya

Additional Information: Specific questions about adoption in Seychelles may be addressed to the U.S. Embassy in Mauritius. General questions regarding intercountry adoption may be addressed to the Office of Children's Issues, U.S. Department of State, CA/OCS/CI, SA-29, 4th Floor, 2201 C Street, NW, Washington, D.C. 20520-4818, toll-free Tel: 1-888-407-4747.

SIERRA LEONE

Compiled from the October 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Republic of Sierra Leone

PROFILE

Geography

Area: 71,740 sq. km. (29,925 sq. mi.); slightly smaller than South Carolina.

Cities: Capital—Freetown (est. 786,900). Provincial capitals—Southern Province, Bo; Eastern Province, Kenema; Northern Province, Makeni.

Terrain: Mangrove swamps and beaches and mostly shallow bays along the coast, wooded hills along the immediate interior, and a mountainous plateau in the interior.

People

Nationality: Noun and adjective—Sierra Leonean(s).

Population: (2007 est.) 6,144,562.

Annual growth rate: (2007 est.) 2.292%.

Ethnic groups: Temne 30%, Mende 30%, Krio 1%, balance spread over 15 other tribal groups, and a small Lebanese community.

Religions: (est.) Muslim 60%, Christian 30%, animist 10%.

Languages: English, Krio, Temne, Mende, and 15 other indigenous languages.

Education: (2002) Literacy—36%.

Health: Life expectancy (2007 est.)—40.58 years. Infant mortality rate—158.27 deaths/1,000 live births. HIV infection rate for adults, ages 15-49 years (2002 est.)—1.4%.

Work force: Agriculture—52.5%; industry—30.6%; services—16.9%.

Government

Type: Republic with a democratically elected president and unicameral parliament.

Independence: From Britain, April 27, 1961.

Constitution: October 1, 1991.

Political parties: The Political Parties Registration Commission was formed in late 2005 to review registered parties to see whether they still met registration requirements. Most of the parties are inactive. Major parties—Sierra Leone People's Party (SLPP), All People's Congress (APC), Peace and Liberation Party (PLP), and People's Movement for Democratic Change (PMDC).

Economy

GDP: (2006 est.) $1.233 billion.

GDP growth rate: (2006 est.) 6.8%.

Avg. annual inflation rate: (2005 IMF est.) 8.5%.

Natural resources: Diamonds, rutile, bauxite, gold, iron ore, ilmenorutile, platinum, chromite, manganese, cassiterite, molybdenite, as well as forests, abundant fresh water, and rich offshore fishing grounds.

Agriculture: Products—coffee, cocoa, ginger, palm kernels, cassava, bananas, citrus, peanuts, cashews, plantains, rice, sweet potatoes, vegetables. Land—30% potentially arable, 8% cultivated.

Industry: Types—diamonds, bauxite, and rutile mining; forestry; fishing; beverages; cigarettes; flour; cement and other construction goods; plastics; tourism.

Trade: (Oct. 2004-Oct. 2005) Exports—$158 million: rutile, diamonds, bauxite, coffee, cocoa, fishes. Major destinations of exports—Belgium, Germany, U.S., and India. Imports—$330 million: foodstuffs, machinery and equipment, fuel and lubricants, chemicals, pharmaceuticals, building materials, light consumer goods, used clothing, textiles. Main origins of imports—Germany, Cote d'Ivoire (fuel), U.K., U.S., China (manufactured goods).

PEOPLE

The indigenous population is made up of 18 ethnic groups. The Temne in the north and the Mende in the South are the largest. About 60,000 are Krio, the descendants of freed slaves who returned to Sierra Leone from Great Britain and North America and from slave ships captured on the high seas. In addition, about 4,000 Lebanese, 500 Indians, and 2,000 Europe-

ans reside in the country. In the past, Sierra Leoneans were noted for their educational achievements, trading activity, entrepreneurial skills, and arts and crafts work, particularly woodcarving. Many are part of larger ethnic networks extending into several countries, which link West African states in the area. However, the level of education and infrastructure has declined sharply over the last 30 years.

HISTORY

European contacts with Sierra Leone were among the first in West Africa. In 1652, the first slaves in North America were brought from Sierra Leone to the Sea Islands off the coast of the southern United States. During the 1700s there was a thriving trade bringing slaves from Sierra Leone to the plantations of South Carolina and Georgia where their rice-farming skills made them particularly valuable.

In 1787 the British helped 400 freed slaves from the United States, Nova Scotia, and Great Britain return to Sierra Leone to settle in what they called the "Province of Freedom." Disease and hostility from the indigenous people nearly eliminated the first group of returnees. This settlement was joined by other groups of freed slaves and soon became known as Freetown. In 1792, Freetown became one of Britain's first colonies in West Africa.

Thousands of slaves were returned to or liberated in Freetown. Most chose to remain in Sierra Leone. These returned Africans—or Krio as they came to be called—were from all areas of Africa. Cut off from their homes and traditions by the experience of slavery, they assimilated some aspects of British styles of life and built a flourishing trade on the West African coast.

In the early 19th century, Freetown served as the residence of the British governor who also ruled the Gold Coast (now Ghana) and The Gambia settlements. Sierra Leone served as the educational center of British West Africa as well. Fourah Bay College, established in 1827, rapidly became a magnet for English-speaking Africans on the West Coast. For more than a century, it was the only European-style university in western Sub-Saharan Africa.

The colonial history of Sierra Leone was not placid. The indigenous people mounted several unsuccessful revolts against British rule and Krio domination. Most of the 20th century history of the colony was peaceful, however, and independence was achieved without violence. The 1951 constitution provided a framework for decolonization. Local ministerial responsibility was introduced in 1953, when Sir Milton Margai was appointed Chief Minister. He became Prime Minister after successful completion of constitutional talks in London in 1960. Independence came in April 1961, and Sierra Leone opted for a parliamentary system within the British Commonwealth. Sir Milton's Sierra Leone Peoples Party (SLPP) led the country to independence and the first general election under universal adult franchise in May 1962. Upon Sir Milton's death in 1964, his half-brother, Sir Albert Margai, succeeded him as Prime Minister.

In closely contested elections in March 1967, the All Peoples Congress (APC) won a plurality of the parliamentary seats. Accordingly, the Governor General (representing the British Monarch) declared Siaka Stevens—APC leader and Mayor of Freetown—as the new Prime Minister. Within a few hours, Stevens and Margai were placed under house arrest by Brigadier David Lansana, the Commander of the Republic of Sierra Leone Military Forces (RSLMF), on grounds that the determination of office should await the election of the tribal representatives to the house. Another group of officers soon staged another coup, only to be later ousted in a third coup, the "sergeants' revolt," and Stevens at last, in April 1968, assumed the office of Prime Minister under the restored constitution. Siaka Stevens remained as head of state until 1985. Under his rule, in 1978, the constitution was amended and all political parties, other than the ruling APC, were banned.

In August 1985, the APC named military commander Maj. Gen. Joseph Saidu Momoh, Steven's own choice, as the party candidate. Momoh was elected President in a one-party referendum on October 1, 1985. In October 1991 Momoh had the constitution amended once again, re-establishing a multi-party system. Under Momoh, APC rule was increasingly marked by abuses of power. Earlier in 1991, in March, a small band of men who called themselves the Revolutionary United Front (RUF) under the leadership of a former-corporal, Foday Sankoh, began to attack villages in eastern Sierra Leone on the Liberian border. Fighting continued in the ensuing months, with the RUF gaining control of the diamond mines in the Kono district and pushing the Sierra Leone army back towards Freetown. On April 29, 1992, a group of young military officers, led by Capt. Valentine Strasser, launched a military coup, which sent Momoh into exile in Guinea and established the National Provisional Ruling Council (NPRC) as the ruling authority in Sierra Leone.

The NPRC proved to be nearly as ineffectual as the Momoh government in repelling the RUF. More and more of the country fell to RUF fighters, so that by 1995 they held much of the countryside and were on the doorsteps of Freetown. To retrieve the situation, the NPRC hired several hundred mercenaries from the private firm Executive Outcomes. Within a month they had driven RUF fighters back to enclaves along Sierra Leone's borders.

As a result of popular demand and mounting international pressure, the NPRC agreed to hand over power to a civilian government via presidential and parliamentary elections, which were held in April 1996. Ahmad Tejan Kabbah, a diplomat who had worked at the UN for more than 20 years, won the presidential election. Because of the prevailing war conditions, parliamentary elections were conducted, for the first time, under

the system of proportional representation. However, on May 25, 1997 the Armed Forces Revolutionary Council (AFRC), led by Maj. Johnny Paul Koroma, overthrew President Kabbah and later invited the RUF to join the government. In March 1998 the Nigerian-led ECOMOG forces ousted the AFRC junta after 10 months in office, and reinstated the democratically elected government of President Kabbah. The RUF's renewed attempts to overthrow the government in January 1999 brought the fighting to parts of Freetown, leaving thousands dead and wounded. ECOMOG forces drove back the RUF attack several weeks later.

After the events of May 2000, a new cease-fire was necessary to reinvigorate the peace process. This agreement was signed in Abuja in November of that year. However, Demobilization, Disarmament, Reintegration (DDR) did not resume, and fighting continued. In late 2000, Guinean forces entered Sierra Leone to attack RUF bases from which attacks had been launched against Liberian dissidents in Guinea. A second Abuja Agreement, in May 2001, set the stage for a resumption of DDR on a wide scale and a significant reduction in hostilities. As disarmament progressed, the government began to reassert its authority in formerly rebel-held areas. By early 2002, some 72,000 ex-combatants had been disarmed and demobilized, although many still awaited re-integration assistance. On January 18, 2002 President Kabbah declared the civil war officially over. In May 2002 President Kabbah was re-elected to a five-year term along with the SLPP, which also won a landslide victory. The RUF political wing, the RUFP, failed to win a single seat in parliament. The elections were marked by irregularities and allegations of fraud, but not to a degree to significantly affect the outcome. On July 28, 2002 the British withdrew a 200-man

With the assistance of the international community, President Kabbah and RUF leader Sankoh on July 7, 1999, signed the Lomé Peace Agreement, which made Sankoh Vice President and gave other RUF members positions in the government. The accord called for an international peacekeeping force run initially by both ECOMOG and the United Nations. The UN Security Council established the United Nations Mission in Sierra Leone (UNAMSIL) in 1999, with an initial force of 6,000. ECOMOG forces departed in April 2000. Almost immediately, however, the RUF began to violate the agreement, most notably by holding hundreds of UNAMSIL personnel hostage and capturing their arms and ammunition in the first half of 2000. On May 8, 2000, members of the RUF shot and killed as many as 20 people demonstrating against the RUF violations outside Sankoh's house in Freetown. As a result, Sankoh and other senior members of the RUF were arrested and the group was stripped of its positions in government.

military contingent that had been in country since the summer of 2000, leaving behind a 105-strong military training team to work to professionalize the Sierra Leonean army. In November 2002, UNAMSIL gradually began drawing down personnel until the end of its formal peacekeeping mission in December 2005. Following the end of the UNAMSIL mandate, the UN established the UN Integrated Office in Sierra Leone (UNIOSIL), which assumed a peacebuilding mandate.

In the summer of 2002, Sierra Leone's Truth and Reconciliation Commission (TRC) and the Special Court for Sierra Leone (SCSL) began operations. The Lomé Accord had called for the establishment of a TRC to provide a forum for both victims and perpetrators of human rights violations during the conflict to tell their stories and to facilitate genuine reconciliation. The Truth and Reconciliation Commission released its Final Report to the government in October 2004. In June 2005, the Government of Sierra Leone issued a White Paper on the Commission's final report which accepted some but not all of the Commission's recommendations. Members of civil society groups dismissed the government's response as too vague and continued to criticize the government for its failure to follow up on the report's recommendations.

The Special Court was established by an agreement between the United Nations and the Government of Sierra Leone pursuant to Security Council resolution 1315 (2000) of 14 August 2000. The Court's mandate is to try those who "bear the greatest responsibility for the commission of crimes against humanity, war crimes and serious violations of international humanitarian law, as well as crimes under relevant Sierra Leonean law within the territory of Sierra Leone since November 30, 1996." The Special Court has issued indictments against ## individuals representing all three warring factions of Sierra Leone's civil conflict in addition to the case against former Liberian President Charles Ghankay Taylor. On June 20, 2007, the Court issued its first verdicts in the trial of the AFRC accused Alex Tamba Brima, Brima Bazzy Kamara and Santigie Borbor Kanu all of whom were found guilty on 11 of 14 counts of war crimes and crimes against humanity.

The Court issued an indictment against a fourth AFRC defendant, former junta leader Johnny Paul Koroma, who is rumored to have been killed, though his death remains unconfirmed. In the trial against the leaders of the Civil Defense Forces (CDF) accused, on August 2, 2007, the court found Moinana Fofana and Allieu Kondewa guilty of war crimes and crimes against humanity. A third defendant in the CDF trial, Sam Hinga Norman, the former Minister of Interior and head of the CDF died in Dakar prior to the announcement of a judgment.

Five alleged leaders of the RUF, Foday Saybana Sankoh, Sam Bockarie, Issa Hassan Sesay, Morris Kallon, and Augustine Gbao, were indicted on 18 counts of war crimes, crimes against humanity, and other serious violations of international humanitarian law. The indictments against Sankoh and Bockarie were withdrawn on 8 December 2003 due to the deaths of the two accused. On March 25, 2006, with the election of Liberian President Ellen Johnson-Sirleaf, Nigerian President Olusegun Obasanjo permitted transfer of Charles Taylor, who had been living in exile in the Nigerian coastal town of Calobar, to Sierra Leone for prosecution.

Two days later, Taylor attempted to flee Nigeria, but he was apprehended by Nigerian authorities and transferred to Freetown under UN guard. Taylor is now being held in The Hague, where he awaits trial before the Special Court on 11 indictments of war crimes and crimes against humanity. Taylor is being tried before the Special Court on 11 indictments of war crimes and crimes against humanity.

GOVERNMENT AND POLITICAL CONDITIONS

Sierra Leone is a republic with an executive president and a multi-party system of government with a 124-seat parliament (112 elected members and 12 paramount chiefs). On August 11, 2007, Sierra Leone held nationwide presidential and parliamentary elections for the first time since the departure of UN peacekeepers. In the parliamentary elections, the National Election Commission reported the All People's Congress (APC) won a parliamentary majority taking 59 of 112 seats, while the ruling Sierra Leone's People's Party (SLPP) took 43 seats. The People's Movement for Democratic Change (PMDC) won 10 seats in Parliament. In addition to their peaceful administration, the 2007 parliamentary elections were notable for the return to a constituency-based system, as called for in the 1991 constitution. In preparation for the elections, Sierra Leone redrew parliament's constituency boundaries for the first time since 1985.

According to the NEC official results of the August 11 presidential election, APC presidential candidate Ernest Koroma won 44.3 percent of the total 1,839,208 votes cast, while former Vice President and SLPP presidential candidate, Solomon Berewa, finished with 38.9 percent. PMDC presidential candidate Charles Margai placed third receiving 13.9 of the vote. Because none of the candidates won the 55 percent of the vote needed to win in the first round, a run-off election was held on September 8, 2007. The two leading candidates, former Vice President Solomon Berewa of the SLPP and Ernest Bai Koroma of the APC contest the second round. On September 17 Sierra Leone's National Election Commission declared Ernest Bai Koroma the winner with 54.6 percent of the vote. President Koroma was sworn in later that day at the Sierra Leone Statehouse.

Sierra Leone's judicial system consists of the Supreme Court, Court of Appeals, High Court of Justice, and magistrate courts. The president appoints and parliament approves justices for the three courts. Local chieftaincy courts administer customary law with lay judges; appeals from these lower courts are heard by the superior courts. Judicial presence outside the capital district remains limited, which contributes to excessive delays in the justice system.

Although magistrate courts function in all 12 judicial districts, magistrates appointed to those courts did not reside there permanently and complained that they had insufficient resources to do their job. Justices of the peace or customary law partially fill the gap. Civil rights and religious freedom are respected. A critical press continues to operate, although journalists and editors are occasionally arrested for publishing articles the government considers inflammatory.

In 2000 the Government of Sierra Leone promulgated the Anti-Corruption Act to combat endemic corruption. The Anti Corruption Commission has not been able to secure convictions of high-level government officials, but has worked to raise national awareness of the problem and build in safeguards in "corruption hotspot" ministries.

The basic unit of local government outside the Western Area has generally been the chiefdom, headed by a paramount chief, who is elected for a life term. In May 2004, however, the first local government elections in 32 years were held in 311 wards nationwide. There are now 12 district councils and 5 town councils outside the Western Area. The Western Area has a rural area council and a city council for Freetown, the nation's capital. The local councils are gradually assuming responsibility for functions previously carried out by the central government. As devolution progresses, chiefdom and council authorities are starting to work together to collect taxes. While district and town councils are responsible for service delivery, chiefdom authorities maintain their own infrastructure of police and courts, which are also funded by local taxes.

Min. of State for Southern Region: **S. U. M. JAH**
Governor, Central Bank: **Samira KAMARA**
Ambassador to the US: **Ibrahim M. KAMARA**
Permanent Representative to the UN, New York: **Joe Robert PEMAGBI**

Sierra Leone maintains an embassy in the United States at 1701 19th Street, NW, Washington, DC, 20009, tel. 202-939-9261, www.embassyofsierraleone.org; and a permanent mission to the United Nations in New York at 245 East 49th Street, New York, New York 10017, tel. (212) 688-1656.

ECONOMY

Rich in minerals, Sierra Leone has relied on the mining sector in general, and diamonds in particular, for its economic base. In the 1970s and early 1980s, economic growth rate slowed because of a decline in the mining sector and increasing corruption among government officials. By the 1990s economic activity was declining and economic infrastructure had become seriously degraded. Over the next decade much of Sierra Leone's formal economy was destroyed in the country's civil war. Since the cessation of hostilities in January 2002, massive infusions of outside assistance have helped Sierra Leone begin to recover.

Full recovery to pre-war economic levels will require hundreds of millions of additional dollars and many more years of serious effort by the Government of Sierra Leone and donor governments. Much of Sierra Leone's recovery will depend on the success of Government of Sierra Leone efforts to limit official corruption, which many feel was the chief culprit for the country's descent into civil war. A key indicator of success will be the effectiveness of government management of its diamond sector. About two-thirds of the population engages in subsistence agriculture, which accounts for 52.5% of national income. The government is trying to increase food and cash crop production and upgrade small farmer skills. Also, the government works with several foreign donors to operate integrated rural development and agricultural projects.

Mineral exports remain Sierra Leone's principal foreign exchange earner. Sierra Leone is a major pro-

ducer of gem-quality diamonds. Though rich in this resource, the country has historically struggled to manage its exploitation and export. Annual production estimates range between $250-300 million. However, not all of that passes through formal export channels, although formal exports have dramatically improved since the days of civil war (1999: $1.2 million; 2000: $7 million; 2001: $26 million; 2002: $42 million; 2003: $76 million; 2004: $127 million; 2005: $142 million). The balance is smuggled, where it possibly is used for money laundering or financing illicit activities. Efforts to improve the management of the export trade have met with some success. In October 2000, a UN-approved export certification system for exporting diamonds from Sierra Leone was put into place that led to a dramatic increase in legal exports. In 2001, the Government of Sierra Leone created a mining community development fund, which returns a portion of diamond export taxes to diamond mining communities. The fund was created to raise local communities' stake in the legal diamond trade.

Sierra Leone has one of the world's largest deposits of rutile, a titanium ore used as paint pigment and welding rod coatings. Sierra Rutile Limited, owned by a consortium of U.S. and European investors, began commercial mining operations near Bonthe in early 1979. Sierra Rutile was then the largest nonpetroleum U.S. investment in West Africa. The export of 88,000 tons realized $75 million in export earnings in 1990. The company and the Government of Sierra Leone concluded a new agreement on the terms of the company's concession in Sierra Leone in 1990. Rutile and bauxite mining operations were suspended when rebels invaded the mining sites in 1995, but exports resumed in 2005.

Since independence, the Government of Sierra Leone has encouraged foreign investment, although the business climate has been hampered by a shortage of foreign exchange, corruption, and uncertainty resulting from civil conflicts. Investors are protected by an agreement that allows for arbitration under the 1965 World Bank Convention. Legislation provides for transfer of interest, dividends, and capital. The government passed the Investment Promotion Act in August 2004 to attract foreign investors and has been working with international financial institutions to lower its administrative barriers to trade.

Sierra Leone is a member of the Economic Community of West African States (ECOWAS). With Liberia and Guinea, it formed the Mano River Union (MRU) customs union, primarily designed to implement development projects and promote regional economic integration. However, the MRU has been inactive because of domestic problems and internal and cross-border conflicts in all three countries. The future of the MRU depends on the ability of its members to deal with the fallout from these internal and regional problems. Sierra Leone's latest International Monetary Fund (IMF) poverty reduction and growth facility (PRGF) expired in June 2005. A new agreement is not yet in place, but Sierra Leone's economic policy is expected to shift from post-conflict stabilization to poverty-reduction efforts, including good governance and fighting corruption; job creation; and food security.

Sierra Leone continues to rely on significant amounts of foreign assistance, principally from multilateral donors. The bilateral donors include the United States, Italy, and Germany, but the largest are the United Kingdom and the European Union.

FOREIGN RELATIONS

Sierra Leone has maintained cordial relations with the West, in particular with the United Kingdom. It also maintains diplomatic relations with China, Libya, Cuba, and Iran.

Sierra Leone is a member of the UN and its specialized agencies, the Commonwealth, the African Union (AU), the Economic Community of West African States (ECOWAS), the African Development Bank (AFDB), the Mano River Union (MRU), the Organization of the Islamic Conference (OIC), and the Non-Aligned Movement (NAM).

U.S.-SIERRA LEONE RELATIONS

U.S. relations with Sierra Leone began with missionary activities in the 19th century. In 1959, the U.S. opened a consulate in Freetown and elevated it to embassy status when Sierra Leone became independent in 1961. U.S.-Sierra Leone relations today are cordial, with ethnic ties between groups in the two countries receiving increasing historical interest. Many thousands of Sierra Leoneans reside in the United States. In fiscal year 2006, total U.S. bilateral aid to Sierra Leone in all categories was $29.538 million. U.S. assistance focused on the consolidation of peace, democracy and human rights, health education, particularly combating HIV/AIDS, and human resources development.

TRAVEL

Consular Information Sheet

June 10, 2008

Country Description: Sierra Leone is a developing country in western Africa still recovering from a ten-year civil war that ended in 2002. English is the official language, but Krio, an English-based language, is widely used. Tourist facilities in the capital, Freetown, are limited; elsewhere, they are rudimentary or nonexistent.

Entry Requirements: A passport and visa are required. Visitors are strongly encouraged to obtain visas in advance of travel to Sierra Leone. Visitors to Sierra Leone are required to show International Certificates of Vaccination (yellow card) upon arrival at the airport with a record of vaccination against yellow fever. The Embassy of Sierra Leone is located at 1701 19th Street NW, Washington, DC 20009; telephone (202) 939-9261.

The Embassy also maintains a web site at www.embassyofsierraleone.org. Information may also be obtained from the Sierra Leonean Mission to the United Nations, 245 East 49th St., New York, NY 10017; telephone (212) 688-1656 and from the website of the Sierra Leonean High Commission in London at www.slhc-uk.org.uk. Overseas, inquiries should be made at the nearest Sierra Leonean embassy or consulate.

Safety and Security: Security in Sierra Leone has improved significantly since the end of the civil war in 2002. The United Nations Peacekeeping Mission in Sierra Leone (UNAMSIL) withdrew in December 2005 and Sierra Leone resumed responsibilities for its own security. The Sierra Leonean police are working to improve their professionalism and capabilities, but fall short of American standards in response time, communications, and specialty skills.

Areas outside Freetown lack most basic services. Embassy employees are free to travel throughout Sierra Leone. Travelers are urged to exercise caution, however, especially when traveling beyond the capital. Road conditions are hazardous and serious vehicle accidents are common. Emergency response to vehicular and other accidents ranges from slow to nonexistent.

There are occasional unauthorized, possibly armed, roadblocks outside Freetown, where travelers might be asked to pay a small amount of money to the personnel manning the roadblock. Because many Sierra Leoneans do not speak English, especially outside of Freetown, it can be difficult for foreigners to communicate their identity. Public demonstrations are rare but can turn violent. U.S. citizens should are advised to avoid large crowds, political rallies, and street demonstrations, and maintain security awareness at all times.

For the latest security information, Americans traveling abroad should regularly monitor the Department's Internet web site where the current Worldwide Caution Travel Alert, Travel Warnings and Travel Alerts can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S., or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: Entrenched poverty in Sierra Leone has led to criminality. Visitors and resident Americans have experienced armed mugging, assault and burglary. Petty crime and pick pocketing of wallets, cell phones, and passports are very common especially on the ferry to and from Lungi International Airport. Law enforcement authorities usually respond to crimes slowly, if at all. Police investigative response is often incomplete and don't provide support to victims. Inefficiency and corruption is a serious problem at all levels within the government of Sierra Leone. Americans traveling to or residing in Sierra Leone should maintain a heightened sense of awareness of their surroundings to help avoid becoming the victims of crime.

Upon arrival in Sierra Leone, U.S. citizens are urged to register at the Embassy in Freetown (see Registration/Embassy Location section below) where they may obtain current safety information and advice on minimizing risks.

The Embassy receives regular reports from potential American investors who have been victims of fraud, often in the mining industry. While law enforcement authorities have been involved in investigating the cases, many remain unresolved. Investors are urged to proceed cautiously when engaging in business transactions with individuals presenting themselves as legitimate diamond/gold dealers. It is not uncommon for registered diamond/gold dealers to target foreigners using sophisticated scams resulting in significant financial loss.

Business fraud is rampant and the perpetrators often target foreigners, including Americans. Schemes previously associated with Nigeria are now prevalent throughout West Africa, including Sierra Leone, and pose a danger of grave financial loss. Typically these scams begin with unsolicited communication (usually e-mails) from strangers who promise quick financial gain, often by transferring large sums of money or valuables out of the country, but then require a series of "advance fees" to be paid, such as fees for legal documents or taxes. Of course, the final payoff does not exist; the purpose of the scam is simply to collect the advance fees. A common variation is the scammer's claim to be a refugee or émigré of a prominent West African family, or a relative of a present or former political leader who needs assistance in transferring large sums of cash. Still other variations appear to be legitimate business deals that require advance payments on contracts. Sometimes victims are convinced to provide bank account and credit card information and financial

authorization that drains their accounts, incurs large debts against their credit, and takes their life savings.

The best way to avoid becoming a victim of advance-fee fraud is common sense—if a proposition looks too good to be true, it probably is. You should carefully check and research any unsolicited business proposal before committing any funds, providing any goods or services, or undertaking any travel. It is virtually impossible to recover money lost through these scams. Please see the Department of State's brochure on International Financial Scams for more information.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

Medical Facilities and Health Information: Quality and comprehensive medical services are very limited in Freetown, and are almost nonexistent for all but most minor treatment outside of the capital. Persons with unstable chronic medical conditions that require on-going medical treatment or medications are discouraged from traveling to Sierra Leone. Medicines are in short supply and due to inadequate diagnostic equipment, lack of medical resources and limited medical specialty personnel, complex diagnosis and treatment are unavailable. The quality of medications in Sierra Leone is inconsistent and counterfeit drugs remain a problem. Local pharmacies are generally unreliable. In the event medications are needed, such as over-the-counter medication, antibiotics, allergy remedies, or malaria prophylaxis, travelers may contact U.S. Embassy Health Unit personnel to receive general information about reliable pharmacies.

Medical facilities in Sierra Leone are scarce and for the most part sub-standard; outside the capital, standards are even lower. There is no ambulance service in Sierra Leone, trauma care is extremely limited, and local hospitals should only be used in the event of an extreme medical emergency.

Many primary health care workers, especially in rural areas, lack adequate professional training. Instances of misdiagnosis, improper treatment, and the administration of improper drugs have been reported. Life-threatening emergencies often require evacuation by air ambulance at the patient's expense. For a list of hospitals, visit our web site at http://visitfreetown.usembassy.gov.

Gastrointestinal diseases and malaria pose serious risk to travelers in Sierra Leone. For additional information on malaria, including protective measures, see the CDC Travelers' Health web site at http://wwwn.cdc.gov/travel.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's Internet site at http://www.cdc.gov/travel.

For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Sierra Leone is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

Most main roads in Freetown are narrow and paved but have potholes; extremely narrow unpaved side streets are generally navigable. Most roads outside Freetown are unpaved and are generally passable with a 4-wheel drive vehicle. However, certain stretches of mapped road are often impassable during the rainy season, which usually lasts from May to September. During the rainy season, add several hours to travel time between Freetown and outlying areas. There is a major road repair and resurfacing program going on throughout the country that is slowly improving the quality of roads. Public transport (bus or group taxi) is erratic, unsafe, and not recommended. U.S. government employees are prohibited from using public transportation except for taxis that operate in conjunction with an approved hotel and that are rented on a daily basis.

Many vehicles on the road in Sierra Leone are unsafe and accidents resulting from the poor condition of these vehicles, including multi-vehicle accidents, are common. Many drivers on the road in Sierra Leone are inexperienced and often drive without proper license or training. Serious accidents are common, especially outside of Freetown, where the relative lack of traffic allows for greater speeds.

The chance of being involved in an accident increases greatly when traveling at night, and Embassy officials are not authorized to travel outside of major cities after dark.

Aviation Safety Oversight: As there is no direct commercial air service between the United States and Sierra Leone, the U.S. Federal Aviation Administration (FAA) has not assessed Sierra Leone's Civil Aviation Authority for compliance with International Civil Aviation Organization (ICAO) aviation safety standards. For more information, travelers may visit the FAA's Internet website at http://www.faa.gov.

Special Circumstances: Lungi Airport is located across a large body of water from Freetown. There are usually four travel options to/from Lungi airport: helicopter, ferry, hovercraft and by road. While none is without risk, all are used by Embassy personnel. The cost for the ferry service is minimal; however, the service experiences frequent delays, and the ferry terminal is located in East Freetown, which has a higher crime rate than other parts of the capital. When the hovercraft and helicopter services are operating, they charge approximately $50-70 each way (payable in U.S. currency). Passengers departing Freetown by air should expect to pay an airport tax of $40.00 (payable in U.S. Dollars).

Sierra Leone is a cash economy. However, an anti-money laundering law passed in July 2005 prohibits importing more than $10,000 in cash except through a financial institution. Travelers are advised not to use credit cards in Sierra Leone because very few facilities accept them and there is a serious risk that using a card will lead to the number being stolen for use in fraudulent transactions. There are no ATMs connected to international networks. Travelers' checks are not usually accepted as payment; however, they can be cashed at some banks including Sierra Leone Commercial Bank, Standard Chartered Bank and Rokel Commercial Bank. The traveler must have proof of identification and a signed receipt by the institution where the travelers' checks were purchased. Currency exchanges should be handled through a bank or established foreign exchange bureau. Exchanging money with street vendors is dangerous because criminals may "mark" such people for future attack and there is the risk of receiving counterfeit currency. Sierra Leone's customs authorities enforce strict regulations concerning the export of gems and precious minerals, such as diamonds and gold. All mineral resources, including gold and diamonds, belong to the State and only the government of Sierra Leone can issue mining and export licenses. The legal authority for the issuance of licenses is vested in the Ministry of Mines and Mineral Resources. Failure to comply with relevant legislation can lead to serious criminal penalties. For further information on mining activities in Sierra Leone, contact the Ministry of Mines and Mineral Resources: The Director of Mines, Ministry of Mines and Mineral Resources, Fifth Floor, Youyi Building, Brookfields, Freetown, Sierra Leone; tel. (232-22) 240-420 or 240-176; fax (232-22) 240-574.

Corruption is a problem in Sierra Leone. Travelers requesting service from government officials at any level may be asked for bribes. Corrupt government officials should be reported to the Anti-Corruption Commission at one of the following locations: The Sierra Leone Anti-Corruption Commission, 3 Gloucester Street, Freetown; 14a Lightfoot Boston Street, Freetown; 37 Kissy Town Road, Bo, Southern Province; Independence Square, Rogbaneh Road, Makeni; tel. (232- 22) 229-984 or 227-100 or 221-701; fax (232-22) 221-900; email: acc@sierratel.sl or info@anticorruption.sl, the web site for the Anti Corruption Commission in Sierra Leone at http://www.anticorruptionsl.org/anonymous.html.

Travelers must obtain official permission to photograph government buildings, airports, bridges, or official facilities including the Special Court for Sierra Leone and the United States Embassy. Areas where photography is prohibited may not be clearly marked or defined. People sometimes do not want to be photographed for religious reasons or may want to be paid for posing. Photographers should ask permission before taking someone's picture.

U.S. citizens who are also Sierra Leonean nationals must provide proof of payment of taxes on revenues earned in Sierra Leone before being granted clearance to depart the country. The Government of Sierra Leone now recognizes dual U.S.-Sierra Leonean citizenship. However; the U.S. Embassy may have difficulty assisting American citizens involved in legal or criminal proceedings if they entered the country on a Sierra Leonean passport.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Sierra Leone's judiciary is under-funded and overburdened, and offenders often must endure lengthy pre-trial or pre-hearing delays and detention. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating Sierra Leone laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Sierra Leone are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States. Travelers should carefully check their passport to see the length of time they are permitted to remain in the country and the validity of their visa. Travelers leaving the country with an expired visa may incur additional charges. Any Sierra Leonean visa issues can be regulated at the immigration office at Rawdon Street in Freetown.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov. A significant number of American prospective adoptive parents have found that Sierra Leonean children offered for adoption are not orphans under U.S. immigration law,

which has ultimately resulted in denials of U.S. immigrant visas for children they adopt in Sierra Leonean courts.

Registration and Embassy Locations: Americans living or traveling in Sierra Leone are encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration web site and to obtain updated information on travel and security within Sierra Leone. Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate.

By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency. The U.S. Embassy is located at Leicester Square, Regent; tel. (232) (22) 515 000 or (232) (76) 515 000; fax (232) (22) 515 355. The Embassy maintains a home page on the Internet at http://freetown.usembassy.gov.

Intercountry Adoption

December 2007

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is based on public sources and current understanding. Questions involving foreign and U.S. immigration laws and legal interpretation should be addressed respectively to qualified foreign or U.S. legal counsel.

Please Note: Under Sierra Leonean law, adoptive parents are currently required to be resident in Sierra Leone for six months and to attend the court hearing for the adoption. Although in the past the High Court of Sierra Leone would sometimes waive either the personal appearance of prospective adoptive parents at adoption proceedings or the six-month residency requirement, this was always at the Court's discretion and should not be considered the norm. The High Court is currently reviewing its application of the Adoption Act and practices may change without notice.

Patterns of Immigration: Please review current reports online at http://adoption.state.gov.

Adoption Authority: The Ministry of Social Welfare, Gender and Children's Affairs is the government office responsible for overseeing adoptions and child welfare issues in Sierra Leone. The High Court is the only authority in Sierra Leone that can issue an order granting an adoption or legal custody of minor children. The Ministry's address is:

Ministry of Social Welfare, Gender & Children's Affairs
New England, Freetown
Sierra Leone
Tel: (232) 22 241 256

Eligibility Requirements for Adoptive Parents: Any adult may adopt children. There are no marriage requirements or specific age requirements. The place of birth and residence of the adoptive parent are not determining factors.

Residency Requirements: Adoptive parents are currently required to be resident in Sierra Leone for six months and to attend the court hearing for the adoption. In the past, the High Court of Sierra Leone sometimes waived the six-month residency requirement required by the Sierra Leone Adoption Act of 1989. This was always at the Court's discretion, and should not be considered the norm. The High Court does continue to mandate that adoptive parents personally attend the court hearing for the adoption. The High Court is currently reviewing its application of the Adoption Act and practices may change without notice.

Time Frame: There are no fixed time lines or constraints on the Court's processing of adoptions. In the past, U.S. prospective adoptive parents have taken between six months to two years to complete the adoption procedures.

Adoption Agencies and Attorneys: The U.S. Embassy in Freetown maintains a list of local attorneys which is available upon request. There are no registered adoption agencies in Sierra Leone. There are organizations registered as non-governmental organizations (NGOs) or private voluntary organizations (PVOs) that provide assistance to children and facilitate intercountry adoptions. While the Government of Sierra Leone does not have a list of registered NGOs or PVOs, your adoption agency should be able to provide you with copies of a local organization's registration certificates. The U.S. Embassy cannot recommend the services of any specific attorney or organization.

Adoption Fees: Official government fees associated with adoptions in Sierra Leone are minimal and consist mainly of court filing costs. Such filing fees normally are less than U.S. $10. The cost of employing local counsel varies, but prospective adoptive parents can expect to pay several hundred dollars at a minimum for an attorney. Some adoption agencies charge prospective adoptive parents monthly maintenance fees that can be several hundred dollars per month. While monthly maintenance fees are legal in Sierra Leone, it appears that some local orphanages may have delayed adoption proceedings in order to continue payments of maintenance fees longer than necessary.

Adoption Procedures: Most prospective adoptive parents work through an adoption agency in the U.S., which in turn maintains a relationship with an orphanage or organization in Sierra Leone, throughout the adoption process. To initiate an adoption, an attorney in Sierra Leone sends a letter with relevant documents attached to the Social Development Officer in the Ministry of Social Welfare, Gender and Children's Affairs in Freetown. After the Social Development Officer approves the

prospective adoption the attorney files a petition for adoption with the High Court of the Sierra Leone. The petition usually contains the following information:

- name, age, residence, and marital status of the petitioners;
- name, date and place of birth of the child;
- the date and manner in which the petitioners or orphanage acquired physical custody of the child;
- facts (if any) that render consent of either birth parent unnecessary;
- the petitioners' desire to adopt the child; and
- the child's change of name, if any.

Following the filing of the petition, the High Court normally serves notice on all interested parties. The High Court may require written consent by the biological parents. If the child was born in wedlock, the consent of both parents may be required. If the child was born out of wedlock, only the mother must consent. The High Court will not require the consent of the biological parents if those parents have legally abandoned the child, if a Sierra Leonean governmental or judicial authority has terminated their parental rights or appointed a different legal guardian for the children, or if the parents are deceased. Birth parents who have granted consent to the adoption may withdraw this consent at any point during the adoption proceedings, with the High Court's permission.

The High Court may order an investigation by an investigator appointed by the Court. The investigator should file a written report of the investigation with the High Court within 30 days of issuance of the investigation order. The High Court will schedule a hearing. The High Court currently requires at least one prospect adopting parent and the adoptive children to attend the hearing. The High Court may waive the appearance of the child for good cause and will usually state this in the order of adoption. The High Court must be satisfied that the "moral and temporal interests" of the child will be served by the adoption. While the High Court usually makes a ruling after one hearing, in some cases it will request additional documentation and/or investigation and schedule another hearing. If the High Court approves the adoption, it will issue a court order that either grants a full and final adoption, or authorizes the leave to adopt. There are no fixed time-lines or constraints on the High Court's processing of adoptions.

Please see the *Intercountry Adoption* section of this book for more details and review current reports online at http://adoption.state.gov.

Required Documents:

- Petition for Adoption;
- Written consent of living biological parents;
- Affidavits concerning the prospective adoptive parents;
- Marriage certificate if appropriate;
- Evidence of finances such as bank statements and job letters;
- The High Court may also require additional documentation on a case-by-case basis.

Embassy of Sierra Leone

SINGAPORE

Compiled from the September 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Republic of Singapore

PROFILE

Geography

Area: 704 sq. km. (271 sq. mi.).
Cities: Capital—Singapore (country is a city-state).
Terrain: Lowland.
Climate: Tropical.

People

Population: (2007) 4.59 million (including permanent residents, foreign workers).
Annual growth rate: (2007) 4.3% (total); 1.6% (Singapore citizens and permanent residents).
Ethnic groups: Chinese 75.2%, Malays 13.7%, Indians 8.8%.
Religions: Buddhist, Taoist, Muslim, Christian, Hindu.
Languages: English, Mandarin and other Chinese dialects, Malay, Tamil.
Education: Years compulsory—six. Attendance—96.1%. Literacy—95.7%.
Health: (2007) Infant mortality rate—2.1/1,000. Life expectancy—78.2 yrs. male, 82.9 yrs. female.
Work force: (2007, 2.75 million) Manufacturing—20.8%; services—67.7%.

Government

Type: Parliamentary republic.
Constitution: June 3, 1959 (amended 1965 and 1991).
Independence: August 9, 1965.
Government branches: Executive—president (chief of state, 6-yr. term); prime minister (head of government). Legislative—unicameral 84-member Parliament (maximum 5-yr. term). Judicial—High Court, Court of Appeal, subordinate courts.
Political parties: People's Action Party (PAP), Workers' Party (WP), Singapore's Peoples Party (SPP), Singapore Democratic Party (SDP), Singapore Democratic Alliance.
Suffrage: Universal and compulsory at 21.
Budget: (FY 2008) $26.8 billion.
Defense: (FY 2008) 4.0% of gross domestic product.
National holidays: August 9.

Economy

GDP: (2007 real, 2000 prices) $168.7 billion.
Annual real growth rate: 7.3% (2005), 8.2% (2006), 7.7% (2007).
Per capita GNP: (2007) $36,771.
Natural resources: None.
Agriculture: (under 0.5% of GDP) Products—poultry, orchids, vegetables, fruits, ornamental fish.
Manufacturing: (26.2% of real GDP) Types—electronic and electrical products and components, petroleum products, machinery and metal products, chemical and pharmaceutical products, transport equipment (mainly aircraft repairs/maintenance, shipbuilding/repair and oil rigs), food and beverages, printing and publishing, textiles and garments, plastic products/modules, instrumentation equipment.
Trade: (2007) Exports—$313 billion: petroleum products, food/beverages, chemicals, pharmaceuticals, industrial machinery and equipment, electronic components, telecommunication apparatus, transport equipment. Major markets—Malaysia (12.9%), EU (10.7%), Hong Kong (10.5%), Indonesia (9.8%), China (9.7%), United States (8.8%), and Japan (4.8%). Imports—$275 billion: aircraft, crude oil and petroleum products, electronic components, radio and television receivers/parts, motor vehicles, chemicals, food/beverages, iron/steel, electricity generators. Major suppliers—Malaysia (13.1%), EU (12.4%), United States (12.3%), China (12.1%), and Japan (8.2%).

PEOPLE

Singapore is one of the most densely populated countries in the world. The annual growth rate for 2007 (mid-year) was 4.4%, including resident foreigners. Singapore has a varied linguistic, cultural, and religious heritage. Malay is the national language, but Chinese, English, and Tamil also are official languages. English is the language of administration and also

is widely used in the professions, businesses, and schools. The government has mandated that English be the primary language used at all levels of the school systems, and it aims to provide at least 10 years of education for every child. In 2007, primary and secondary school students totaled about 534,737, or 11.7% of the entire population. In 2007, enrollment at public universities was 65,746 (full-time/part-time) and 72,379 at the polytechnics. The Institute of Technical Education for basic technical and commerce skills has 23,465 students. The country's literacy rate is 95.7%.

Singapore generally allows religious freedom, although religious groups are subject to government scrutiny, and some religious sects are restricted or banned. Almost all Malays are Muslim; other Singaporeans are Taoists, Buddhists, Confucianists, Christians, Hindus, or Sikhs.

HISTORY

Although Singapore's history dates from the 11th century, the island was little known to the West until the 19th century, when in 1819, Sir Thomas Stamford Raffles arrived as an agent of the British East India Company. In 1824, the British purchased Singapore Island, and by 1825, the city of Singapore had become a major port, with trade exceeding that of Malaya's Malacca and Penang combined. In 1826, Singapore, Penang, and Malacca were combined as the Straits Settlements to form an outlying residency of the British East India Company; in 1867, the Straits Settlements were made a British Crown Colony, an arrangement that continued until 1946.

The opening of the Suez Canal in 1869 and the advent of steamships launched an era of prosperity for Singapore as transit trade expanded throughout Southeast Asia. In the 20th century, the automobile industry's demand for rubber from Southeast Asia and the packaging industry's need for tin helped make Singapore one of the world's major ports. In 1921, the British constructed a naval base, which was soon supplemented by an air base. But the Japanese captured the island in February 1942, and it remained under their control until September 1945, when the British returned.

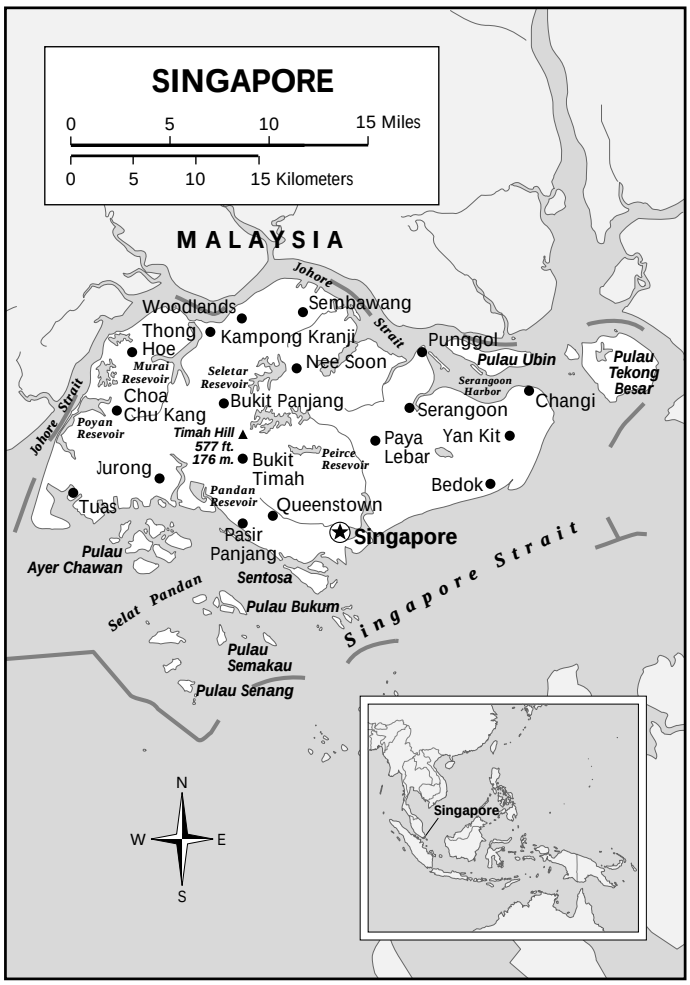
In 1946, the Straits Settlements was dissolved; Penang and Malacca became part of the Malayan Union, and Singapore became a separate British Crown Colony. In 1959, Singapore became self-governing, and, in 1963, it joined the newly independent Federation of Malaya, Sabah, and Sarawak—the latter two former British Borneo territories—to form Malaysia.

Indonesia adopted a policy of "confrontation" against the new federation, charging that it was a "British colonial creation," and severed trade with Malaysia. The move particularly affected Singapore, since Indonesia had been the island's second-largest trading partner. The political dispute was resolved in 1966, and Indonesia resumed trade with Singapore.

After a period of friction between Singapore and the central government in Kuala Lumpur, Singapore separated from Malaysia on August 9, 1965, and became an independent republic.

GOVERNMENT

According to the constitution, as amended in 1965, Singapore is a republic with a parliamentary system of government. Political authority rests with the prime minister and the cabinet. The prime minister is the leader of the political party or coalition of parties having the majority of seats in Parliament. The president, who is chief of state, previously exercised only ceremonial duties. As a result of 1991 constitutional changes, the president is now elected and exercises expanded powers over legislative appointments, government budgetary affairs, and internal security matters. The unicameral Parliament currently consists of 84 members elected on the basis of universal adult suffrage, and up to nine "nominated" members of Parliament. A constitutional provision assures at least three opposition members, even if fewer than three actually are elected. A "nonconstituency" seat held by the opposition under this provision since 1997 was again filled after the last election held on May 6, 2006. In the May 2006 general election, the governing People's Action Party (PAP) won 82 of the 84 seats.



The president appoints nominated members of Parliament from among nominations by a special select committee. Nominated members of Parliament (NMP's) enjoy the same privileges as members of Parliament but cannot vote on constitutional matters or expenditures of funds. The maximum term of anyone in Parliament is 5 years. NMP's serve for two-and-a-half-year terms. Voting has been compulsory since 1959.

Judicial power is vested in the High Court and the Court of Appeal. The High Court exercises original criminal and civil jurisdiction in serious cases as well as appellate jurisdiction from subordinate courts. Its chief justice, senior judge, and twelve judges are appointed by the president. Appeals from the High Court are heard by the Court of Appeal. The right of appeal to the Privy Council in London was abolished effective April 1994.

Principal Government Officials

Ambassador to the US: **CHAN Heng Chee**
Permanent Representative to the UN, New York: **Vanu Gopala MENON**

Singapore maintains an embassy in the United States at 3501 International Place NW, Washington, DC 20008 (tel. 202/537-3100, fax 202/537-0876).

POLITICAL CONDITIONS

The ruling political party in Singapore, reelected continuously since 1959, is the People's Action Party (PAP), headed by Prime Minister Lee Hsien Loong. The PAP has held the overwhelming majority of seats in Parliament since 1966, when the opposition Barisan Sosialis Party (Socialist Front), a left-wing group that split off from the PAP in 1961, resigned from Parliament, leaving the PAP as the sole representative party. In the general elections of 1968, 1972, 1976, and 1980, the PAP won all of the seats in an expanding Parliament.

Workers' Party Secretary General J.B. Jeyaretnam became the first opposition party member of Parliament in 15 years when he won a 1981 by-election. Opposition parties gained small numbers of seats in the general elections of 1984 (2 out of 79), 1988 (1 of 81), 1991 (4 of 81), 1997 (2 of 83), 2001 (2 of 84) and 2006 (2 of 84). Meanwhile, the PAP's share of the popular vote in contested seats decreased from 75% in 2001 to 66.6% in 2006. In the 2006 election, opposition parties together contested 47 of the 84 seats, the largest number in 18 years.

ECONOMY

Singapore's strategic location on major sea lanes and its industrious population have given the country an economic importance in Southeast Asia disproportionate to its small size. Upon independence in 1965, Singapore was faced with a lack of physical resources and a small domestic market. In response, the Singapore Government adopted a pro-business, pro-foreign investment, export-oriented economic policy framework, combined with state-directed investments in strategic government-owned corporations. Singapore's economic strategy proved a success, producing real growth that averaged 8.0% from 1960 to 1999. The economy picked up after the 1997 regional financial crisis, with a growth rate of 9.4% for 2000, but then fell back in tandem with the economic slowdown in the United States, Japan, and the European Union (EU), as well as the worldwide electronics slump, so that GDP shrank by 2.4% in 2001. The economy rebounded in 2002, expanding 4.0%; but it posted a slower 2.9% growth in

2003, due to the effect of severe acute respiratory syndrome (SARS) in the first half of the year. From 2004 to 2007, the economy expanded by 9.0%, 7.3%, 8.2%, and 7.7%, respectively, driven by the growth in world demand for electronics, pharmaceuticals, other manufactured goods and financial services, and in the economies of its major trading partners—the United States, European Union, Japan, and China, as well as expanding emerging markets such as India. Singapore's largely corruption-free government, skilled work force, and advanced and efficient infrastructure have attracted investments from more than 7,000 multinational corporations from the United States, Japan, and Europe. Also present are 1,500 companies from China and another 1,500 from India.

Foreign firms are found in almost all sectors of the economy. Multinational corporations account for more than two-thirds of manufacturing output and direct export sales, although certain services sectors remain dominated by government-linked companies.

Manufacturing and services are the twin engines of the Singapore economy and accounted for 26.2% and 63.3%, respectively, of Singapore's gross domestic product in 2007. The electronics and chemicals industries lead Singapore's manufacturing sector, accounting for 31.6% and 33.3%, respectively, of Singapore's manufacturing output in 2007. To inject new life to the tourism sector, which faced a 20% fall in receipts between 1993-2000 and a declining share of East Asia Pacific tourism receipts from 8.2% to 5.8%, the government in April 2005 approved the development of two casinos that should result in investments of more than U.S. $5 billion. Las Vegas Sands' Marina Bay Sands Resort is scheduled to be completed in late 2009, while Genting International's Resort World is scheduled to open by 2010.

To maintain its competitive position despite rising wages, the government seeks to promote higher value-added activities in the manufacturing and services sectors. It also has opened, or is in the process of opening, the financial services, telecommunications, and power generation and retailing sectors to foreign service-providers and greater competition. The government also has pursued cost-cutting measures, including tax cuts and wage and rent reductions, to lower the cost of doing business in Singapore. The government is actively negotiating five free trade agreements (FTAs) with emerging economic partners and has already concluded 12 FTAs with many of its key trade partners, including one with the United States that came into force January 1, 2004. As a member of the Association of Southeast Asian Nations (ASEAN), Singapore is part of the ASEAN Free Trade Area (AFTA), and is signatory to ASEAN FTAs with China, Korea, Japan, India, and a joint agreement with New Zealand and Australia.

Trade, Investment, and Aid

Singapore's total trade in 2007 amounted to $588 billion, an increase of 4.5% from 2006. In 2007, Singapore's imports totaled $275 billion, and exports totaled $313 billion. Malaysia was Singapore's main import source, as well as its largest export market, absorbing 12.9% of Singapore's exports, followed by the EU (10.7%), Hong Kong (10.5%), China (9.7%), and the United States (8.8%). Singapore was the 15th-largest trading partner of the United States. Re-exports accounted for 48.4% of Singapore's total sales to other countries in 2007. Singapore's principal exports are petroleum products, food and beverages, chemicals, pharmaceuticals, electronic components, telecommunication apparatus, and transport equipment. Singapore's main imports are aircraft, crude oil and petroleum products, electronic components, consumer electronics, industrial machinery and equipment, motor vehicles, chemicals, food and beverages, electricity generators, and iron and steel. Singapore continues to attract investment funds on a large scale despite its relatively high-cost operating environment. The United States leads in foreign investment, accounting for 19% of new commitments to the manufacturing sector in 2007. As of 2007, the stock of investment by U.S. companies in the manufacturing and services sectors in Singapore reached about $82.6 billion (total assets). The bulk of U.S. investment is in electronics manufacturing, oil refining and storage, and the chemical industry. About 1,500 U.S. firms operate in Singapore.

The government also has encouraged firms to invest outside Singapore, with the country's total direct investments abroad reaching $147.5 billion by the end of 2006. China was the top destination, accounting for 13.6% of total overseas investments, followed by Malaysia (7.7%), Indonesia (7.3%), United Kingdom (7.0%) Hong Kong (6.2%), Thailand (5.0%), Australia (4.2%) and the United States (3.8%).

Labor

As of end-2007, Singapore had a total labor force of about 2.75 million. The National Trades Union Congress (NTUC), the sole trade union federation, comprises almost 99% of total organized labor. Extensive legislation covers general labor and trade union matters. The Industrial Arbitration Court handles labor-management disputes that cannot be resolved informally through the Ministry of Labor. The Singapore Government has stressed the importance of cooperation between unions, management, and government ("tripartism"), as well as the early resolution of disputes. There has been only one strike in the past 15 years. Singapore has enjoyed virtually full employment for long periods of time. Amid slower economic growth in 2003, unemployment rose to 4.6%. As of the end of June 2008, the unemployment rate was 2.3%. Much of the unemployment is structural, as low-skill manufacturing operations move overseas. Since 1990, the number of foreign workers in Singapore has increased rapidly to cope with labor shortages. Foreign workers comprise 27.5% of the labor force; the great majority of these are unskilled workers.

Transportation and Communications

Situated at the crossroads of international shipping and air routes, Singapore is a center for transportation and communication in Southeast Asia. Singapore's Changi International Airport is a regional aviation hub served by 81 airlines. A third terminal opened in January 2008, and a dedicated low-cost terminal for budget airlines has operated since 2006. The Port of Singapore is among the world's busiest, and was the busiest for containerized transshipment traffic in 2007. The country also is linked by road and rail to Malaysia and Thailand.

Telecommunications and Internet facilities are state-of-the-art, providing high-quality communications with the rest of the world. Radio and television stations are all ultimately government-owned or government-linked. The print media is dominated by a company with close ties to the government. Daily newspapers are published in English, Chinese, Malay, and Tamil.

DEFENSE

Singapore relies primarily on its own defense forces, which are continuously being modernized. The defense budget accounts for approximately 30% of government operating expenditures (or 4% of GDP). A career military force of 55,000 is supplemented by 300,000 persons, either on active National Service, which is compulsory for able-bodied young men, or on Reserve. The Singapore Armed Forces engage in joint training with Association of Southeast Asian Nations (ASEAN) countries and with the United States, Australia, New Zealand, and India. Singapore also conducts military training on Taiwan.

Singapore is a member of the Five-Power Defense Arrangement together with the United Kingdom, Australia, New Zealand, and Malaysia. The arrangement obligates members to consult in the event of external threat and provides for stationing Commonwealth forces in Singapore. Singapore has consistently supported a strong U.S. military presence in the Asia-Pacific region. In 1990, the United States and Singapore signed a Memorandum of Understanding (MOU) which allows United States access to Singapore facilities at Paya Lebar Airbase and the Sembawang wharves. Under the MOU, a U.S. Navy logistics unit was established in Singapore in 1992; U.S. fighter aircraft deploy periodically to Singapore for exercises, and a number of U.S. military vessels visit Singapore. The MOU was amended in 1999 to permit U.S. naval vessels to berth at the Changi Naval Base, which was completed in early 2001. In July 2005, the United States and Singapore signed a Strategic Framework Agreement to expand cooperation in defense and security.

FOREIGN RELATIONS

Singapore is nonaligned. It is a member of the United Nations—it occupied a rotational seat on the Security Council 2001-02—and several of its specialized and related agencies, and also of the Non-Aligned Movement and the Commonwealth. Singapore has participated in UN peacekeeping/observer missions in Kuwait, Angola, Namibia, Cambodia, and East Timor. It provided a training unit to assist in training Iraqi police, and Singapore has deployed naval ships, air force transport planes, and refueling tankers to the Persian Gulf to support the multinational coalition effort to bring stability and security to Iraq. Singapore supports the concept of Southeast Asian regionalism and plays an active role in ASEAN and the Asia Pacific Economic Cooperation (APEC) forum.

U.S.-SINGAPORE RELATIONS

The United States has maintained formal diplomatic relations with Singapore since that country became independent in 1965. Singapore's efforts to maintain economic growth and political stability and its support for regional cooperation harmonize with U.S. policy in the region and form a solid basis for amicable relations between the two countries. The United States and Singapore signed a bilateral free trade agreement on May 6, 2003; the agreement entered into force on January 1, 2004. The growth of U.S. investment in Singapore and the large number of Americans living there enhance opportunities for contact between Singapore and the United States. Many Singaporeans visit and study in the United States. Singapore is a Visa Waiver Program country.

The U.S. Government sponsors visitors from Singapore each year under the International Visitor Program. The U.S. Government provides Fulbright awards to enable selected American professors to teach or conduct research at the National University of Singapore and the Institute of Southeast Asian Studies. It awards scholarships to outstanding Singaporean students for graduate studies at American universities and to American students to study in Singapore. The U.S. Government also sponsors occasional cultural presentations in Singapore. The East-West Center and private American organizations, such as the Asia and Ford Foundations, also sponsor exchanges involving Singaporeans.

TRAVEL

Consular Information Sheet

May 12, 2008

Country Description: Singapore is a small, stable, highly developed country with an elected parliamentary system of government. Tourist facilities are modern and widely available. Singapore's resident population of over 4.6 million inhabitants (including permanent residents and foreign workers) comprises 75% Chinese, 14% Malay, 9% Indian and 2% others. English is widely spoken. Criminal penalties are strict and law enforcement rigorous; see sections on "Entry/Exit Requirements," "Special Circumstances," and "Criminal Penalties," below, for further details.

Entry Requirements: A valid passport is required. U.S. citizens do not need a visa if their visit is for business or social purposes and their stay is for 90 days or less. Travelers to the region should note that Singapore and some neighboring countries do not allow Americans to enter under any circumstances with fewer than six months of validity remaining on their passport. Female U.S. citizens who are pregnant when they apply to enter Singapore for a social visit are no longer required to make prior application through the nearest Singapore overseas mission or to provide documentation from a U.S. embassy concerning the nationality the child will acquire at birth.

Specific information about entry requirements for Singapore may be obtained from the Embassy of the Republic of Singapore at 3501 International Place NW, Washington, DC 20008, tel. (202) 537-3100. Visit the Embassy of Singapore's web site at http://www.mfa.gov.sg/washington for the most current visa information.

Safety and Security: In 2001, Jemaah Islamiyah (JI), a terrorist organization with links to Al Qaeda, planned attacks in Singapore against government and private targets associated with the United States, Singapore and other countries. These plans were disrupted and the JI organization in Singapore was dismantled. On February 27, 2008 suspected JI leader Mas Selamat Kastari escaped from detention in Singapore. His current whereabouts are unknown. Singapore remains a target of interest for terrorist groups. The Department of State remains concerned because extremist groups in Southeast Asia continue to demonstrate the desire and capability to carry out attacks against locations where Westerners congregate. Terrorist groups do not distinguish between official and civilian targets. Americans residing in or traveling to Singapore and neighboring countries should therefore exercise caution, especially in locations where Americans and other Westerners live, work, congregate, shop or visit. U.S. citizens should remain vigilant about their personal security and surroundings.

For the latest security information, Americans traveling abroad should regularly monitor the Department's Internet web site at http://travel.state.gov, where the current Worldwide Caution Travel Alert, Travel Warnings and Travel Alerts can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S., or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: Major crimes against tourists in Singapore are uncommon. Petty crimes such as pick pocketing and purse or briefcase snatching occur in tourist areas, hotels and at the airport. Travelers should exercise the same caution that they would in any large city.

Credit cards are widely accepted in Singapore. Visitors should be aware that credit card fraud is on the rise and should practice standard precautions to avoid falling victim of credit card fraud: do not carry multiple credit cards on your person; do not allow credit cards to be removed from your line of sight; avoid giving credit card information over the phone and use only secure internet connections for financial transactions.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. embassy or consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. embassy or consulate for assistance. The embassy/consulate staff can, for example, assist you to find appropriate medical care, contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

Medical Facilities and Health Information: Good medical care is widely available in Singapore. Doctors and hospitals expect immediate payment for health services by credit card or cash and generally do not accept U.S. health insurance. Recipients of health care should be aware that Ministry of Health auditors in certain circumstances may be granted access to patient medical records without the consent of the patient, and, in certain circumstances, physicians may be required to provide information relating to the diagnosis or treatment without the patient's consent.

Despite vigorous mosquito eradication efforts in Singapore, from time to time Singapore experiences a spike in the number of dengue fever cases. Outbreaks tend to be clustered in res-

idential areas, but there have been no reports of clusters in primary tourist areas, such as the Night Safari, the Singapore zoo, or Orchard Road.

In January 2008, a new strain of the viral disease Chikungunya was detected in Singapore. A dozen cases of the disease, which like Dengue Fever is transmitted by the Aedes aegypti mosquito, were documented. There were no deaths. Unlike prior cases in Singapore, these cases were contracted locally and the outbreak centered around guest worker housing on Clive Street.

Information on dengue fever, vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747); fax 1-888-CDC-FAXX (1-888-232-3299), or via the CDC's Internet site at http://wwwn.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Singapore is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

Singapore has a highly developed and well-maintained road and highway network. Driving is done on the left-hand side of the road. Motorists should be particularly aware of motorcyclists, who often ignore lane markings. Lanes are frequently closed without warning due to construction throughout the city. Public transportation and taxis are abundant, inexpensive, and reliable. Visitors should consider using this form of transportation. The Automobile Association of Singapore provides roadside assistance, and the Land Transport Authority has rescue vehicles on the road at all hours. In addition, closed circuit cameras monitor all major roads. As with all laws in Singapore, those involving traffic rules, vehicle registration, and liability in case of accident are strictly enforced, and failure to follow them may result in criminal penalties.

Singapore has one of the worst road-fatality records among developed countries. In 2006, 2.4 deaths were logged for every 10,000 vehicles in Singapore, compared to 0.8 in Japan, 1.2 in Australia and 1.8 in the United States. For specific information concerning Singaporean driver's permits, vehicle inspection, road tax and mandatory insurance, please contact the Singaporean National Tourist Board located at 590 Fifth Ave., Twelfth Floor, New York, NY 10036, tel. 1-212-302-4861 or fax: 1-212-302-4801.

Aviation Safety Oversight: The U.S. Federal Aviation Administration (FAA) has assessed the Government ofSingapore's Civil Aviation Authorityas being in compliance with International Civil Aviation Organization (ICAO) aviation safety standards for oversight of Singapore's air carrier operations. For more information, travelers may visit the FAA's internet web site at http://www.faa.gov.

Special Circumstances: Singapore customs authorities enforce strict regulations concerning temporary import and export of items such as weapons, illegal drugs, certain religious materials, pornographic material, videotapes, CDs, DVDs, and software (for censorship or pirating reasons). Singapore customs authorities' definition of "weapon" is very broad, and, in addition to firearms, includes many items which are not necessarily seen as weapons in the United States, such as dive knives, kitchen knives, handcuffs, and expended shell casings. Carrying any of these items without permission may result in your immediate arrest. All baggage is x-rayed at every port of entry, so placing such items in checked baggage will also be inspected for regulated items.

It is advisable to contact the Embassy of Singapore in Washington, D.C. at 3501 International Place, N.W., Washington, D.C. 20008, tel. (202) 537-3100, http://www.mfa.gov.sg/washington/ for specific information regarding customs requirements. You may also visit Singapore Customs' web site, http://www.customs.gov.sg. Singapore customs officials encourage the use of an ATA (Admission Temporaire/Temporary Admission) carnet for the temporary admission of professional equipment, commercial samples, and/or goods for exhibitions and fair purposes. ATA carnet headquarters located at the U.S. Council for International Business, 1212 Avenue of the Americas, New York, N.Y. 10036, issues and guarantees the ATA carnet in the United States. For additional information, please call 1-212- 354-4480, or send an e-mail to atacarnet@uscib.org or visit http://www.uscib.org for details.

In many countries around the world, counterfeit and pirated goods are widely available. Transactions involving such products are illegal and bringing them back to the United States may result in forfeitures and/or fines. A current list of those countries with serious problems in this regard can be found at http://www.ustr.gov.

Automated teller machines (ATMs) are plentiful in Singapore, and they are the best method of obtaining cash. Bank transfers generally take weeks, and surcharges are steep. Transfers from commercial services such as American Express and Western Union are generally efficient. Americans may be asked by police or employers to surrender their passports in lieu of surety (guaranteed) bonds. Americans should carefully consider whether they wish to surrender their passport rather than seek some other type of surety, particularly if the passport is requested by someone who is not a government

official (e.g., an employer). Note that Singapore does not recognize dual nationality beyond the age of 21, and it strictly enforces universal national service (NS) for all male citizens and permanent residents. Male U.S. citizens who automatically acquired Singaporean citizenship and continue to reside in Singapore are liable for Singapore national service once they reach the age of 18. Travel abroad of Singaporean males may require Singapore Government approval as they approach national service age and may be restricted when they reach sixteen-and-a-half years of age. Under Singaporean law, an individual who automatically acquires Singaporean citizenship at birth retains that status even after acquiring the citizenship of another country, including U.S. citizenship. Males may renounce Singaporean citizenship only after having completed at least two years of national service. U.S. citizenship are subject to this law. Dual nationals, Singapore Permanent Residents, and their parents should contact the Ministry of Defense in Singapore to determine if there will be a national service obligation.

National-service-liable males who migrated from Singapore before age 11 and have not enjoyed significant socio-economic benefits of citizenship (e.g., applied for a Singapore identity card or studied in Singapore beyond the age of 11) are allowed to renounce their Singapore citizenship if they do not wish to fulfill their NS obligations. They will be required to register for national service with Central Manpower Base and apply for deferment from full-time NS until the age of 21, pending the renunciation of their Singapore citizenship. They can continue to make short social visits to Singapore and will not be required to serve NS if they renounced their citizenship at age 21.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe in Singapore than for similar offenses in the United States, and persons violating Singapore laws, even unknowingly, may be expelled, arrested or imprisoned.

There are strict penalties for possession and use of drugs as well as for trafficking in illegal drugs. Trafficking charges may be brought based on the quantity of illegal drugs in a subject's possession, regardless of whether there is any proven or demonstrated intent to distribute the drugs. Singapore has a mandatory death penalty for many narcotics offenses. Convicted offenders can expect long jail sentences and heavy fines. Singapore police have the authority to compel both residents and non-residents to submit to random drug analysis, and do not distinguish between drugs consumed before or after entering Singapore in applying local laws.

Visitors should be aware of Singapore's strict laws and penalties for a variety of actions that might not be illegal or might be considered minor offenses in the United States. These include jaywalking, littering, and spitting. Singapore has a mandatory caning sentence for vandalism offenses and caning may also be imposed for immigration violations and other offenses. Commercial disputes that may be handled as civil suits in the United States can escalate to criminal cases in Singapore, and result in heavy fines and prison sentences. There are no jury trials in Singapore, judges hear cases and decide sentencing. The Government of Singapore does not provide legal assistance except in capital cases; legal assistance may be available in some other cases through the Law Society.

There are strict penalties for those who possess or carry arms, or who commit crimes with arms. Singaporean authorities define "arm" as any firearm, air-gun, air-pistol, automatic gun, automatic pistol and any other kind of gun or pistol from which any shot, bullet or other missile can be discharged or from which noxious liquid, flame or fumes can be emitted, and any component part thereof. This definition also includes any bomb or grenade and any component part thereof. The unlawful possession of any arm or ammunition could result in imprisonment and caning. Any person convicted of committing a crime with an arm could receive punishment which could result in the maximum penalty of imprisonment for life and caning. Engaging in illicit sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States. In Singapore, local law prohibits causing or encouraging prostitution of, or engaging in sexual relations with, a female below the age of 16. An indecent assault against anyone, male or female, regardless of age, is also prohibited. Those convicted of causing or encouraging the prostitution of, or the commission of unlawful sexual relations with, or the indecent assault on, a female below the age of 16 years could be sentenced to imprisonment of up to 3 years and a fine of $2,000 or both. Singapore enforces strict laws pertaining to the propriety of behavior between people, and the modesty of individuals. The Singaporean law "Outrage of Modesty" is defined as an assault, or use of criminal force on any person, intended to, or knowing it to be likely to, outrage the modesty of that person. Penalties may include imprisonment for up to 2 years, a fine, caning, or a combination thereof. Men are sometimes accused of inappropriately touching other people, often women, resulting in their prosecution and punishment under this Singaporean law.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in Singapore are encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration web site and obtain updated information on travel and security within Singapore. Americans without Internet access

may register directly with the nearest U.S. Embassy or Consulate. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency. The U.S. Embassy is located at 27 Napier Road, Singapore 258508, tel. [65] 6476-9100, fax [65] 6476-9340; web site, http://singapore.usembassy.gov. In case of emergencies after working hours, the duty officer at the Embassy may be contacted by calling tel. [65] 6476-9100.

Intercountry Adoption

February 2007

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is based on public sources and current understanding. Questions involving foreign and U.S. immigration laws and legal interpretation should be addressed respectively to qualified foreign or U.S. legal counsel.

Adoptions Of Non-Singaporean Children: The U.S. Embassy in Singapore is aware of cases in which American families have concluded adoptions in Singapore involving children of other nationalities. It is critical that prospective adoptive parents understand that the laws of the child's country of birth may remain relevant, even if the child has departed that country and is now residing in Singapore. It is doubly important, therefore, that American prospective adoptive parents resident in Singapore and considering adopting a child born outside Singapore first consult with the U.S. Embassy prior to proceeding.

Patterns of Immigration: The U.S. Embassy in Singapore has not processed an adoption case involving a Singapore-born child and an American citizen adoptive parent in at least the past five years. This reflects the fact that, for social and cultural reasons, orphaned Singaporean children are usually taken in by family members or adopted by Singaporeans. In addition, Singaporean law gives preference to prospective adoptive parents who are citizens of Singapore, and children available for adoption by foreigners may be more likely to have physical or mental disabilities.

Adoption Authority: The government office with overall responsibility for adoptions in Singapore is the

Ministry of Community
Development, Youth and Sports
Family Development Division
Telephone: 6355-6388
Fax: 6258-4823
Email:
mcys_family_town@mcys.gov.sg

Mailing Address:
Adoption Services
510 Thomson Road
13th Storey SLF Building
Singapore 298135
Web sites: www.mcys.gov.sg or
www.familytown.gov.sg

Additional legal information regarding adoptions can be found at: www.familycourtofsingapore.gov.sg

Eligibility Requirements for Adoptive Parents: Under Singaporean law, prospective adoptive parents must be residents of Singapore and at least 25 years old. They must also be at least 21 years older than the child whom they plan to adopt.

These age restrictions may be waived in certain circumstances, including if there is a blood relationship between the child and the prospective parent(s).

Married couples must adopt jointly unless the non-adopting spouse cannot be found, is unable to give consent, or is separated from the adopting spouse and the separation is likely to become permanent. Single men may not adopt female children except in rare cases as determined by the court.

Residency Requirements: Singapore law requires an applicant to have a "settled abode" in Singapore. Applicants must therefore show they have a "home" in Singapore and have legal immigration status (e.g., employment pass, permanent residency, etc.) that would allow them to have some basis for residency.

Time Frame: In a case with no complications (e.g., no documents need to checked, home studies have been completed, etc.) adoptions in Singapore can generally be finalized within 4-6 months. After the child has been legally adopted in Singapore, processing time for a U.S. immigrant visa will take on average another 1-2 months for an uncomplicated case.

Adoption Fees: Adopting a child in Singapore is a complex legal process requiring several court appearances. The Government of Singapore recommends the use of a lawyer, and prospective adoptive parents would have to pay for the lawyer costs., which vary by firm.

Although the prospective adoptive parents will not pay any fees directly to the court, the lawyer's fee will include court costs In addition, adoptive parents will have to pay approximately $900 for a home study report performed by an agency licensed by the Ministry of Community Development, Youth and Sports.

Singaporean society is virtually corruption-free and "additional" or "hidden" fees are not likely to be encountered in the adoption process. Furthermore, it is illegal for a person giving up a child for adoption to receive or ask for monetary payment in exchange for the child.

It is also illegal for the petitioner (applicant) to make any monetary payment for adopting a child, unless approved by the court.

Adoption Procedures: The Singaporean adoption process consists of five basic steps, outlined in detail below, including court appearances at which the applicants and/or the applicants' attorneys will need to

appear. As Singapore requires adoptive parents to be residents of Singapore, applicants are presumed to be in the country and available to file applications and appear as required by Singaporean authorities. In brief, prospective adoptive parents petition the Family Court for adoption of the child. This can be done through an attorney or in person.

The Family Court will then appoint the Director of Social Welfare, Ministry of Community Development, Youth and Sports (MCYS) as the child's Guardian ad litem (temporary legal guardian). MCYS then conducts the necessary investigations and prepares an affidavit and investigation report.

Finally, the Family Court grants the Adoption Order and a new birth certificate is issued for the child. Foreigners wishing to adopt a child in Singapore must complete a Home Study Report (HSR) before proceeding with immigration and legal procedures for adoption.

The HSR is an assessment of a family's readiness to care for an adopted child, bearing in mind the child's best interests and the appropriateness of the prospective home. The Home Study Report is also designed to help prospective parents prepare for the adoption process and subsequent raising of an adopted child.

The HSR must be completed by an agency accredited by MCYS, and takes approximately five weeks to be completed. The process typically includes a series of home visits and interviews with relevant family members and friends. Please see the *Intercountry Adoption* section of this book for more details and review current reports online at http://adoption.state.gov.

Documentary Requirements: The petitioners (the persons making the application) are required to stamp and file the following documents at the Family Court Registry at the outset of the process:

- 2 copies of the adoption petition;
- the original consent of the birth parents / guardian (together with the original translation if the consent is not in the English language);
- the original consent of the parent or guardian of the birth parent of the infant if the birth parent is a minor (together with the original translation if the consent is not in the English language);
- the original birth certificate of the infant to be adopted (together with the original translation if the birth certificate is not in the English language);
- an affidavit exhibiting the endorsement of the child's Dependants' Pass if the child is not a Singapore citizen or permanent resident;
- certified true copies of the petitioners' work permits / employment passes / dependants' passes if the petitioners are not Singapore citizens or permanent residents;
- the original marriage certificate of the petitioners;
- 2 copies of the Application for Dispensation of Consent and supporting affidavit to dispense with the consent of the birth parents and/or service of documents on the birth parents, if such consent cannot be obtained; and
- A copy of the death certificate of the birth parent who had passed away (if applicable).

Singaporean Embassy
3501 International Place, NW,

(attn: IV Unit)

Additional Information: Specific questions about adoption in Singapore may be addressed to the U.S. Embassy in Singapore at the address, phone and fax numbers provided earlier in this flyer. General questions regarding intercountry adoption may be addressed to the Office of Children's Issues, U.S. Department of State, CA/OCS/CI, SA-29, 4th Floor, 2201 C Street, NW, Washington, D.C. 20520-4818, toll-free Tel: 1-888-407-4747.

International Parental Child Abduction

November 2008

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *International Child Abduction* section of this book and review current reports online at www.travel.state.gov/childabduction.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is provided for general information only. Questions involving interpretation of specific foreign laws should be addressed to foreign legal counsel.

General Information: Singapore is not a party to the Hague Convention

on the Civil Aspects of International Child Abduction, nor are there any international or bilateral treaties in force between Singapore and the United States dealing with international parental child abduction. American citizens who travel to Singapore place themselves under the jurisdiction of local courts. American citizens planning a trip to Singapore with dual-national children should bear this in mind.

Custody Disputes: In Singapore, parents who are legally married share the custody of their children. If they are not married, by law the custody is granted to the mother unless there are known facts of inappropriate behavior, mental or social problems.

Enforcement of Foreign Judgments: Custody orders and judgments of foreign courts are not enforceable in Singapore, unless a Singaporean court formally recognizes them.

Visitation Rights: In cases where legal custody has been granted and the judgment has been rendered, the non-custodial parent can petition the court for visitation rights within the court-ordered decision or come to a verbal agreement with the custodial parent.

Dual Nationality: Dual nationality is not recognized under Singaporean law beyond the age of 21.

Travel Restrictions: No exit visas are required to leave Singapore.

Criminal Remedies: For information on possible criminal remedies, please contact your local law enforcement authorities or the nearest office of the Federal Bureau of Investigation (FBI). Information is also available on the Internet at the web site of the U.S. Department of Justice, Office of Juvenile Justice and Delinquency Prevention (OJJDP) at http://www.ojjdp.ncjrs.org.

Persons who wish to pursue a child custody claim in a Singaporean court should retain an attorney in Singapore. The American Embassy in Singapore maintains a list of attorneys willing to represent American clients. A copy of this list may be obtained by requesting one from the Embassy or at http://singapore.usembassy.gov/consular/amcit/attorneys.shtml.

SLOVAKIA

Compiled from the October 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
The Slovak Republic

PROFILE

Geography

Area: 48,845 sq. km. (about twice the size of New Hampshire).

Land boundaries: (total) 1,524 km. Austria 91 km.; Czech Republic 215 km.; Hungary 677 km.; Poland 444 km.; Ukraine 97 km.

Cities: Capital—Bratislava.

Terrain: Landlocked with high mountains in the north, low mountains in the center, hills to the west, Danube River basin in the south.

Climate: Temperate; average temperature in January 26.5ºF; in July 68ºF. Annual precipitation 24”-40”.

Elevation: Lowest point, Bodrog River 94 m. Highest point, Gerlachovsky 2,655 m.

People

Nationality: Noun and adjective—Slovak(s).

Population: (May 2001 census*) 5,379,455. Bratislava (428,672), Kosice (236,093), Zilina (156,361), Nitra (163,540), Presov (161,782), Banska Bystrica (111,984).

Annual population growth rate: (2001 est.) 0.13%.

Ethnic groups: (2001) Slovaks 85.8%, Hungarians 9.7%, Roma 1.7%, Czechs 0.8%, Ruthenians 0.4%, Ukranians 0.2%, other 1.4%. Unofficial estimates place the Roma population between 6%-10%.

Religions: (2001) Roman Catholic 69%, Protestant 9%, Greek Catholic 4%, Orthodox 0.9%, other 0.6%, unknown 3.5%, 13% report no affiliation.

Languages: Slovak (official), Hungarian, Ruthenian, Romany, and Ukrainian.

Education: Literacy—99%.

Health: Life expectancy (2001)—78 yrs. females; 70 yrs. males.

Work force: (2.1 million in 2001) Industry, construction, commerce—61%; financial, commercial, health services—18%; government and education—15%; agriculture—6%.

Government

Type: Parliamentary democracy.

Independence: The Slovak Republic was established January 1, 1993 (former Czechoslovak Republic established 1918).

Constitution: Signed September 3, 1992.

Government branches: Executive—president (head of state), prime minister (head of government), cabinet. Legislative—National Council of the Slovak Republic (150 seats). Judicial—Supreme Court, Constitutional Court.

Political parties: Distribution of the 150 parliamentary seats is SMER (Direction) 50 seats; Slovak Democratic and Christian Union (SDKU) 28 seats; Slovak National Party (SNS) 19 seats; Hungarian Coalition Party (SMK) 20 seats; Movement for a Democratic Slovakia (HZDS) 15 seats; Christian-Democratic Movement (KDH) 9 seats, Slovak Conservative Democrats (KDS) 4 seats; Unaffiliated 5 seats. Other parties include Alliance of New Citizens; Communist Party of Slovakia (KSS); Freedom Forum (SF); People’s Union (LU).

Suffrage: Universal at 18 years.

Political subdivisions: Eight administrative regions, 79 districts.

Economy

GDP: (2007) $92.6 billion.

GDP growth rate: (2007) 10.4%.

Nominal GDP per capita: (2007) $17,110 (International Monetary Fund).

Unemployment: (May 2007) 7.6%.

Natural resources: Antimony, mercury, iron, copper, lead, zinc, magnesite, limestone, lignite, uranium (not yet in production).

Agriculture: Products—grains, potatoes, poultry, cattle, hogs, sugar, beets, hops, fruit, forest products.

Industry: Types—iron and steel, chemicals, automobiles, light industry, food processing, back-office support, engineering, building materials.

Trade: (2007) Exports—$71.1 billion: vehicles, iron and steel, machinery and energy equipment, plastics, fiber optics. Imports (2007)—$72.1

billion: mineral fuels and oils, machinery, audio/video equipment, vehicles. Partners (2006)—Germany 23.7%, Czech Republic 14.1%, Italy 6.5%, Poland 6.2%, Austria 6%, Hungary 5.8%, France 4.3%, Netherlands 4.2%.

Foreign investment: (1989-2006, OECD data) Cumulative—$17.3 billion, FDI inflow $4.2 billion in 2006 (highest-ever FDI inflows). Sources of direct foreign investment—Netherlands 19.5%, Germany 18.2%, Austria14.8%, Italy 12.4%, Hungary 6.1%, U.K. 5.3%, Czech Republic 4.1%, Republic of Korea 3.6%, U.S. 3.3% (9th largest investor)**, Cyprus 2.7%. Sectors of direct foreign investment—industrial production, financial services, energy production and distribution, wholesale and retail trade, transportation and telecommunications.

*Figures are based on immediate city's (not region) permanent resident population.

**Government of Slovakia official statistic. A recent U.S. Embassy survey found that, taking into account investments of U.S. subsidiaries in Europe, U.S. investment is more than 15% of the total.

PEOPLE

The majority of the 5.4 million inhabitants of the Slovak Republic are Slovak (85.8%). Hungarians are the largest ethnic minority (9.7%) and are concentrated in the southern and eastern regions of Slovakia. Up to 7% of the population is thought to be Roma, although the last official census (2001) put their number at 1.7%. Other ethnic groups include Czechs, Ruthenians, Ukrainians, Germans, and Poles. The Slovak constitution guarantees freedom of religion. The majority of Slovak citizens (69%) are Roman Catholic; the second-largest group is Protestants (9%). About 3, 000 Jews remain of the estimated pre-WWII population of 120,000. The official state language is Slovak, and Hungarian is widely spoken in the southern region.

Despite its modern European economy and society, Slovakia has a significant rural element. About 45% of Slovaks live in villages of less than 5,000 people, and 14% in villages of less than 1,000.

HISTORY

Slovak history can find its roots in the Great Moravian Empire, founded in the early ninth century. The territory of Great Moravia included all of present western and central Slovakia, the Czech Republic, and parts of neighboring Poland, Hungary, and Germany. Saint Cyril and Methodius, known for the creation of a Cyrillic alphabet, came to Great Moravia in the early tenth century as missionaries to spread Christianity upon the invitation of the king. The empire collapsed after only eighty years as a result of the political intrigues and external pressures from invading forces. Slovaks then became part of the Hungarian Kingdom, where they remained for the next 1,000 years. Bratislava became the Hungarian capital for nearly two and a half centuries when the Turks overran Hungary in the early 16th century.

Revolutions inspired by nationalism swept through Central Europe in 1848, which led to the codification of the Slovak language by Ludovit Stur in 1846 and later the formation of the dual Austro-Hungarian monarchy in 1867. As language and education policies favoring the use of Hungarian, which came to be known as Magyarization, grew stricter, Slovak nationalism grew stronger. Slovak intellectuals cultivated closer cultural ties with the Czechs, who were themselves ruled by the Austrians. After the dissolution of the Austro-Hungarian State after WWI, the concept of a single Czecho-Slovakian unified state came to fruition. Tomas Masaryk signed the Pittsburgh Agreement, declaring the intent of the Czech and Slovaks to found a new state in May 1918, and a year later become Czechoslovakia's first president.

After the 1938 Munich agreement that forced Czechoslovakia to cede territory to Germany, Slovakia declared its autonomy. Slovakia became a Nazi puppet state led by the Catholic priest Jozef Tiso. During this period, approximately 70,000 Slovak Jews were sent to concentration camps to perish in the Holocaust. Roma, while persecuted under the Tiso regime, were not deported by the Slovak Hlinka guards. An undetermined number of Roma were deported from the southern part of Slovakia when it was occupied by Hungary in 1944. The Slovak National Uprising, a resistance movement against the fascist Slovak state, occurred in 1944 with the participation of Slovaks, Russians, Jews, and some allied forces but was put down by Nazi forces.

At the conclusion of WWII, the reunified Czechoslovakia was considered within the sphere of influence of the Soviet Union. The communist party, supported by the U.S.S.R., took over political power in February 1948 and began to centralize power. The next four decades were characterized by strict communist rule, interrupted only briefly during the Prague Spring of 1968. The Slovak born Communist leader Alexander Dubcek presided over a thawing of communist power and proposed political, social, and economic reforms in his effort to make "socialism with a human face" a reality. Concern among other Warsaw Pact governments that Dubcek had gone too far prompted an invasion and Dubcek's removal from his position.

The 1970s were characterized by the development of a dissident movement. On January 1, 1977 more than 250 human rights activists signed a manifesto called Charter 77, which criticized the government for failing to meet its human rights obligation. The so-called "Candle Demonstration," which took place in Bratislava in March 1988, was the first mass demonstration of the 1980s against the communist regime in Czechoslovakia. The Demonstration, organized by Roman Catholic groups asking for religious freedom in Czechoslovakia, was brutally suppressed by the police.

On November 17, 1989, a series of public protests, known as the "Velvet Revolution," began and led to the downfall of communist rule in Czechoslovakia. Dissident groups, such as Charter 77 in the Czech Republic and Public Against Violence in Slovakia, united to form a transitional government and assist with the first democratic elections since 1948. Several new parties emerged to fill the political spectrum.

After the 1992 elections, Vladimir Meciar's Movement for a Democratic Slovakia (HZDS), based on its appeal on fairness to Slovak demands for autonomy, emerged as the leading party in Slovakia. In June 1992, the Slovak parliament voted to declare sovereignty and the federation dissolved peacefully on January 1, 1993. Meciar's party—the Movement for a Democratic Slovakia (HZDS)—ruled Slovakia the first 5 years as an independent state. His authoritarian style as Prime Minister created international concerns about the democratic development of Slovakia. In the 1998 elections, Movement for a Democratic Slovakia (HZDS) received about 27% of the vote, but went into the opposition, unable to find coalition partners.

A reform-oriented coalition formed a government led by Mikulas Dzurinda, the chairman of the Slovak Democratic and Christian Union (SDKU). The first Dzurinda government made political and economic reforms that enabled Slovakia to enter the Organization for Economic Cooperation and Development (OECD), close virtually all chapters in European Union (EU) negotiations, and make the country a strong candidate for North Atlantic Treaty Organization (NATO) accession. However, the popularity of the governing parties declined sharply, and several new parties gained relatively high levels of support in public opinion polls.

In the September 2002 parliamentary election, a last-minute surge in support for the Slovak Democratic and Christian Union (SDKU) gave Dzurinda a mandate for a second term. He formed a government with three other center-right parties: the Hungarian Coalition Party (SMK), Christian Democrats (KDH), and Alliance of New Citizens (ANO).

The main priorities of the coalition were ensuring a strong Slovak performance within NATO and the EU, fighting corruption, attracting foreign investment, and reforming social services, such as the health care system. Following a summer 2003 parliamentary shake-up, the government lost its narrow parliamentary majority and controlled only 69 of the 150 seats; however, the coalition was relatively stable because of the parties' similar political philosophies and conflicts between opposition parties.

Slovakia officially became a member of NATO on March 29, 2004 and joined the EU on May 1, 2004. The government strongly supported Slovakia's NATO and EU accession and continued the democratic and free market-oriented reforms begun by the first Dzurinda government.

Parliamentary elections were held June 17, 2006. Robert Fico became Prime Minister, leading a coalition of SMER (Direction), the Slovak National Party (SNS), and the Movement for a Democratic Slovakia (HZDS).

GOVERNMENT AND POLITICAL CONDITIONS

Slovakia's highest legislative body is the 150-seat unicameral National Council of the Slovak Republic. Delegates are elected for 4-year terms on the basis of proportional representation. The Slovak political scene supports a wide spectrum of political parties, including several social democratic parties and the nationalistic Slovak National Party.

In January 1999, Parliament passed a constitutional amendment allowing for direct election of the president. Kosice Mayor Rudolf Schuster was elected president in a May 1999 runoff with former Prime Minister Meciar and took office on June 15, 1999. On April 17, 2004, Ivan Gasparovic, a former Meciar deputy, was elected president; he was inaugurated on June 15, 2004. Virtually all executive powers of government belong to the prime minister, but the president does serve as commander-in-chief of the armed forces, can grant pardons, and has the right to return legislation to Parliament. Parliament, however, can override this veto with a simple majority of the 150 members of Parliament.

The country's highest appellate forum is the Supreme Court; below that are regional, district, and military courts. In certain cases the law provides for decisions of tribunals of judges to be attended by lay judges from the citizenry. Slovakia also has a special Constitutional Court, which rules on constitutional issues. The 13 members of this court are appointed by the president from a slate of candidates nominated by Parliament.

In 2002, Parliament passed legislation that created a Judicial Council. This 18-member council, composed of judges, law professors, and other legal experts, is now responsible for the nomination of judges. All judges, except those of the Constitutional Court, are appointed by the president from a list proposed by the Judicial Council. The Council also is responsible for appointing Disciplinary Senates in cases of judicial misconduct.

Permanent Representative to the UN, New York: **Peter BURIAN**

The Slovak Republic has an embassy in the United States, located at 3523 International Court, NW, Washington, DC, 20008.

Slovakia maintains a permanent mission to the United Nations in New York and 11 honorary consulates in Chicago, Cleveland, Detroit, Denver, Kansas City, Indianapolis, Miami, Minneapolis, Pittsburgh, and San Francisco. Slovakia opened consulates general in New York in September 2003 and in Los Angeles in April 2005.

ECONOMY

Since the establishment of the Slovak Republic in January 1993, Slovakia has continued the difficult transformation from a centrally-planned to a modern market-oriented economy. This reform slowed in the 1994-98 period due to the crony capitalism and irresponsible fiscal policies of Prime Minister Vladimir Meciar's government. While economic growth and other fundamentals improved steadily during Meciar's term, public and private debt and trade deficits soared, and privatization, often tarnished by corrupt insider deals, progressed only in fits and starts. Real annual GDP growth peaked at 6.5% in 1995 but declined to 1.3% in 1999. Much of the growth in the Meciar era, however, was attributable to high government spending and over-borrowing rather than productive economic activity.

The pace of economic reforms picked up during the second administration of Prime Minister Mikulas Dzurinda, which oversaw the simplification of the tax system, reforms of the labor code and pension systems, and a large number of privatizations. The economy grew 8.3% in 2006 (the highest economic growth among OECD members and third highest growth in Central Europe), and 10.4 in 2007, and was predicted to continue at this pace through the remainder of 2007.

Slovakia entered into the European Exchange Rate Mechanism in November 2005, and will join the Euro Zone on January 1, 2009 having met the Maastricht Criteria. Headline consumer price inflation dropped from 26% in 1993 to 4.5% in 2006, and fell below 2.4% in the first

months of 2007, supported by falling world energy prices and exchange rate appreciation. The current account deficit, including the cost of the second pension pillar, reached 3.3% in 2006, but the general government deficit for 2007 is forecast at 2.9%. Government debt was 33% of GDP in 2006.

The exchange rate has remained within the 15% fluctuation bands around the central ERM2 rate, but the central parity rate of the Slovak koruna against the Euro was revalued by 8.5% to SKK 35.4424 in March 2007 in view of significant inflows of foreign direct investment followed by the progressive acceleration of economic growth and substantial appreciation of the estimated equilibrium real exchange rate.

Foreign direct investment (FDI) in Slovakia has increased dramatically. Cheap and skilled labor force, low taxes, a 19% flat tax for corporations and individuals, no dividend taxes, a relatively liberal labor code and a favorable geographical location are Slovakia's main advantages for foreign investors. Major pillars of sound economic reforms remain untouched even after the 2006 elections. FDI inflow grew more than 600% from 2000 and cumulatively reached an all-time high of $17.3 billion in 2006, or around $18,000 per capita by the end of 2006. The total inflow of FDI in 2006 was $1.31 billion.

Germany is Slovakia's largest trading partner, purchasing 23.52% of Slovakia's exports and supplying 20.48% of its imports in 2006. Other major partners include the Czech Republic (13.9% imports and 12.3% exports), Italy (6.48% and 4.52%), Russia (1.64% and 11.24%), and Austria (5.98% and 3.37%). Slovakia imports nearly all of its oil and gas from Russia and its export markets are primarily OECD and EU countries. More than 85.1% of its trade is with EU members and with OECD countries (89.7%). Slovakia's exports to the United States made up 3.16% of its overall exports in 2006 ($1,319.2 million), while imports from the U.S. account for 1.25% of its total purchases abroad ($559.1 million).

NATIONAL SECURITY

The armed forces of the Slovak Republic number about 14,000 uniformed personnel and are made up of Land Forces, Air Forces (which includes air defense forces) and a Joint Training and Doctrine Command. Land forces consist of two mechanized infantry brigades, one with two mech battalions (BMP-1), a tank battalion (T-72), and a combined artillery battalion. The other brigade has three mech battalions (BMP-2). Each maneuver brigade is or is planned to be task organized with combat support units, such as an artillery battalion, an engineer battalion, a logistics support battalion, and an air defense battery. Other land forces include a separate NBC battalion, engineer battalion, ISTAR company, signal battalion and command support battalion. Air and Air Defense Forces are comprised of a fighter wing of MiG-29s, a wing of Mi-24 attack and Mi-17 utility helicopters, and a SAM brigade. Military police are under the command of the Ministry of Defense and a special operations regiment falls under the Land Forces Command. The armed forces are among the most respected national institutions according to national opinion polls.

Slovakia's ambitious roadmap for defense reform is the Force 2015 Long-Term Plan, which strikes a well-reasoned balance between requirements and resources and envisions a professionalized, combat-capable force of 18,000 uniformed personnel. Slovakia has about 480 personnel deployed to coalition and NATO-led operations in Afghanistan and Kosovo, as well as UN-led peace support operations (PSOs) worldwide. Defense spending was 1.6% of GDP in 2006.

FOREIGN RELATIONS

Slovakia officially became a member of the NATO on March 29, 2004 and joined the EU in May 2004. Slovakia has been an active participant in U.S. and NATO-led military actions and a partner in the war on terrorism. A military engineering brigade on the ground in Iraq from August 2003 departed in February 2007. A 57-man military engineering brigade is present at Kadahar airbase in Afghanistan, and the Slovak Parliament approved in December 2007 an increase in Slovakia's commitment to ISAF that will bring the total deployment to 115 in 2008. Slovakia participates in a joint Czech-Slovak peacekeeping force in Kosovo.

Slovakia is a member of the United Nations and participates in its specialized agencies. It is a member of the Organization for Security and Cooperation in Europe (OSCE), the World Trade Organization (WTO), and the OECD. It also is part of the Visegrad Four (Slovakia, Hungary, Czech Republic, and Poland), a forum for discussing areas of common concern. Upon the division of Czechoslovakia in 1993, Slovakia and the Czech Republic entered into a customs union, which facilitates a relatively free flow of goods and services. On December 21, 2007, Slovakia joined the Schengen zone. Slovakia maintains diplomatic relations with 134 countries. There are 35 embassies and 26 honorary consulates in Bratislava.

U.S.-SLOVAKIA RELATIONS

The fall of the communist regime in Czechoslovakia in 1989 and the subsequent split of the two republics on January 1, 1993, allowed for renewed cooperation between the United States and Slovakia. The election of a pro-Western, reformist government in late 1998 further boosted close ties between the countries. The United States delivered more than $200 million after 1990 to support the rebuilding of a healthy democracy and market economy in Slovakia, primarily through programs administered by the U.S. Agency for International Development (USAID).

Slovakia and the United States retain strong diplomatic ties and cooperate in the military and law

enforcement areas. The U.S. Department of Defense programs have contributed significantly to Slovak military reforms.

Millions of Americans have their roots in Slovakia, and many retain strong cultural and familial ties to the Slovak Republic. President Woodrow Wilson and the United States played a major role in the establishment of the original Czechoslovak state on October 28, 1918, and President Wilson's Fourteen Points were the basis for the union of the Czechs and Slovaks. Tomas Masaryk, the father of the Czechoslovak state and its first president, visited the United States during World War I and used the U.S. Constitution as a model for the first Czechoslovak Constitution.

TRAVEL

Consular Information Sheet

July 9, 2008

Country Description: The Slovak Republic is a rapidly developing European nation. Tourist facilities are not as developed as those found in Western Europe, particularly outside the major cities, and some goods and services taken for granted in other European countries are occasionally unavailable.

Entry Requirements: A passport is required. A visa is not required for stays for tourism or business up to 90 days within six months of the date of first entry into the Slovak Republic.All foreigners seeking entry into the Slovak Republic must carry proof of a medical insurance policy contracted for payment of all costs for hospitalization and medical treatment in the Slovak Republic. Border police have the right to request evidence of finances sufficient to pay for the proposed stay in the Slovak Republic in the amount of $50 per person per day. Current information can be found on the Slovak Embassy's web site at www.slovakembassy-us.org.

All persons in Slovakia over the age of 15 must carry official identification at all times. American citizens staying overnight in Slovakia must register with the local Border and Aliens Police within three working days. Persons staying hotels are registered automatically.

Note: On December 21, 2007, Slovakia became a member of a group of countries collectively known as "Schengen countries" or the "Schengen zone". Americans may enter and remain within the entire Schengen zone without a visa for no more than 90 days in any six-month period. If an American has just spent 60 days in another Schengen country, for example, he or she would be permitted to enter Slovakia only for the remaining 30 days. It is not possible to extend a tourist stay beyond 90 days in the Schengen zone. Once an American has used his/her 90 days, he/she cannot reenter Slovakia until he/she has spent at least three months outside the Schengen zone.

Although European Union regulations require that non-EU visitors obtain a stamp in their passport upon initial entry to a Schengen country, many borders are not staffed with officers carrying out this function. If an American citizen wishes to ensure that his or her entry is properly documented, it may be necessary to request a stamp at an official point of entry. Under local law, travelers without a stamp in their passport may be questioned and asked to document the length of their stay in Schengen countries, and could face possible fines or other repercussions if unable to do so.

Persons wishing to remain in Slovakia longer than 90 days or arriving for purposes other than tourism or business travel may apply for temporary residency and/or work permits shortly after arrival in Slovakia. However, it is strongly recommended that such persons review the requirements and begin preparing their applications prior to travel, as many documents required of U.S. citizens are more easily obtained in the United States. For example, U.S. citizens must submit a certificate not older than 90 days showing the result of a fingerprint records check by the FBI. As authorities in Slovakia cannot take fingerprints for this purpose, it is extremely difficult to obtain this certificate after arrival in Slovakia. In addition, Slovakia requires all documents (birth certificates, etc) intended for official use in Slovakia to be authenticated (e.g. to have an apostille).

Safety and Security: Taking photographs of security/military installations (for example, military bases, government buildings, nuclear power plants, etc.) is prohibited. Violation of this law may result in confiscation of the film, a reprimand or fine, or even expulsion from the country. Serious cases may be reported to and handled by local and/or military police.

For the latest security information, Americans traveling abroad should regularly monitor the Department's web site, where the current Worldwide Caution Travel Alert, Travel Warnings and other Travel Alerts can be found. Up-to-date information on security can also be obtained by calling 1-888-407-4747 toll free in the U.S., or, for callers outside the U.S. and Canada, a regular toll line at 1-202-501-4444. These numbers are available from 8:00 a.m. to 8:00 p.m. Eastern Time, Monday through Friday (except U.S. federal holidays.

Crime: The Slovak Republic has a high rate of crime. Police forces suffer from a lack of manpower resources and equipment. Local police are not likely to speak English. Western visitors, especially short-term visitors such as tourist and students, are the primary foreign targets of street crime. The majority of street crime is non-violent and ranges from pickpocketing (particularly in the summer) and purse and cellular telephone snatchings to mugging, armed robbery, shooting, drugging and robbing of unsuspecting victims at nightspots and bars. Most reported thefts occur at crowded tourist sites (such as Bratislava's Old Town area) or on public buses or trains. Thieves in the Slovak Republic often work in groups or pairs. In most cases, one thief distracts the victim another performs the robbery, and then hands off the stolen item to a nearby accomplice. Groups of street children are known to divert tourists' attention so that a member of their group can pickpocket the tourists while they are distracted. Do not leave personal items in unattended vehicles, even if locked.

Reports of racially motivated incidents against foreigners and minorities, particularly perpetrated by groups with a history of targeting persons of Roma, African, or Asian descent, have occurred in the Slovak Republic and are occurring with a greater frequency across most of Central and Eastern Europe. In addition to incidents of assault, persons of Roma, African, or Asian heritage may be subject to various types of harassment, such as verbal abuse.

Both indigenous and foreign organized crime groups are well-established in the Slovak Republic. They do not target U.S. or other foreign individuals and tend to co-exist peacefully in the tourist district so as not to scare away tourist dollars. Though not common, violent incidents sometimes do occur outside of Old Town Bratislava.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy or Consulate staff can, for example, assist you to find appropriate medical care, to contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

Medical Facilities and Health Information: Medical facilities are available in the Slovak Republic, although the quality and availability varies within the country. Ambulances are only a means of transportation to the hospital; they may not have life support stabilization equipment on board. Only a limited number of doctors speak English.Doctors and hospitals expect cash payment for health services unless the patient can present an insurance number from the Slovak National Insurance Company. Serious medical problems requiring hospitalization and/or medical evacuation to the United States can cost tens of thousands of dollars or more.

Medical prescriptions issued in the U.S. are not valid in the Slovak Republic. If needed, a local doctor must issue a prescription. Medicines are generally available locally, if not under the American name the doctor can be consulted for a substitute. The Ministry of Health of Slovak Republic administers the use of medicines and medicine brought to the Slovak Republic for personal use may become subject to comparison against the list of those authorized for use in the Slovak Republic.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's web site at http://wwwn.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning the Slovak Republic is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

Roads in the Slovak Republic typically are safe and well maintained. Four-lane highways exist in and around Bratislava. However, most roads outside of built-up areas are two lanes only, and aggressive drivers attempting to pass at unsafe speeds pose a serious hazard. Due to poor lighting and narrow, winding roads, nighttime driving outside of built-up areas is not recommended.

From November through March there is often heavy snowfall, which is not adequately cleared from many rural roads. Roads in the mountainous northern part of the country are particularly prone to hazardous con-

ditions during winter months. Winter tires are recommended and chains are necessary in certain mountainous areas.

In the Slovak Republic, vehicles travel on the right side of the road. Headlights must be used at all times (day and night) from October 15 until March 15. The maximum legal speed on highways is 130 kilometers per hour (78 mph). On smaller roads the maximum speed in 90 kph (54 mph). The limit in towns is 60 kph (36 mph). Use of cellular phones while driving is strictly prohibited. Safety reflection vests and first aid kits are compulsory equipment of each vehicle.

Drivers must yield the right of way to all vehicles with flashing blue lights (police, ambulances, fire trucks, motorcades).Vehicles with yellow or orange lights usually means that traffic must slow down. Drivers must always be cautious, however, as many slowly moving vehicles, such as agricultural vehicles, are not well marked.

Driving under the influence of alcohol is strictly prohibited. The blood alcohol tolerance level is zero percent.

Penalties for drivers involved in car accidents involving injury of death are decided by a court of law. Penalties for minor offenses are not generally large, but foreigners are sometimes targeted for additional sums. Anyone suspecting this has occurred should ask for a written receipt and note the name and number of the traffic officer imposing the fine.

Gasoline is readily available, although many gas stations are closed on Sunday, especially in rural areas. Gas stations typically do not offer repair service; private mechanics must be found. Most gas stations accept credit cards, but mechanics less frequently accept them, so travelers should expect to pay for these services in cash.

A highway user decal must be purchased for travel on most major roads outside of Bratislava. The decal is valid for the calendar year in which it is purchased, and is available at gas stations, post offices and some newspaper kiosks. The cost is 1100 Sk (Slovak crowns) for all vehicles up to 3.5 tons. A short-term decal valid for 30 days may be purchased for 300 Sk and for 7 days for 150Sk.

Taxi companies provide generally reliable, safe, and economical services. Avoid independent cabs that do not prominently display a company name. Visitors should be alert to the potential for substantial overcharging by taxis, particularly in areas frequented by tourists. Radio-dispatched taxis are often much more reliable.

Buses, trolleys, and trams are mechanically safe, but there have been reports of thefts on city transportation and of harassment by the transport police. On public transportation it is obligatory to have a time-ticket validated after entering the vehicle (valid for 10, 20, 60 minutes), or a prepaid zone ticket (24-.48-.168-hour, 1-month, 3-month and 1-year). Children from 6 to 15 years of age pay reduced fares. Passengers who are traveling without a valid ticket will be fined by the ticker inspector. The ticket inspector has to have an identification card and must provide a ticket for the fine. More information is provided in English at http://www.imhd.sk/ba.

Inter-city travel is widely available by bus, train, or taxi and is generally safe (inquire about taxi fares in advance). There are regular international trains and buses which are mechanically safe. However, there is a danger of theft, even from locked compartments, particularly on international night trains serving Warsaw, Prague and Budapest. Taxi drivers with special permits may provide international taxi service. A motorcycle driver's license and helmet are required. Small motorcycles are not allowed on highways. All traffic regulations apply.

Tourists coming to the Slovak Republic are required to have an International Drivers' Permit. A U.S. driver's license alone is not sufficient to drive in Slovakia. The U.S. driver's license must be accompanied by an International Driver's Permit, obtainable in the United States from the American Automobile Association and the American Automobile Touring Alliance.

A Slovak Driver's License can be applied for at the Dopravny Inpsektorat in the district of the applicant's place of residence in the Slovak Republic. Completion of the regular driving course and a written examination (in Slovak) are required for issuance of a Slovak driver's license. For specific information concerning Slovak driver's permit, vehicle inspection, road tax and mandatory insurance, contact the Slovak Embassy in Washington, DC.

Aviation Safety Oversight: As there is no direct commercial air service to the United States by carriers registered in the Slovak Republic, the U.S. Federal Aviation Administration (FAA) has not assessed the Slovak Republic's Civil Aviation Authority for compliance with the International Civil Aviation Organization (ICAO) aviation safety standards. For more information, travelers may visit the FAA's web site at www.faa.gov.

Special Circumstances: Slovak customs authorities enforce strict regulations concerning temporary importation into or export from the Slovak Republic of items such as firearms, antiquities, medications, business equipment, etc. It is advisable to contact the Embassy of the Slovak Republic in Washington, D.C, or one of the Slovak consulates in the United States for specific information regarding customs requirements.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating Slovak laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or traf-

ficking in illegal drugs in Slovakia are strict and convicted offenders can expect jail sentences and heavy fines. Engaging in illicit sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy and Consulate Locations: Americans living in the Slovak Republic are encouraged to register with the nearest U.S. Embassy of Consulate through the State Department's travel registration web site, https://travelregistration.state.gov/ibrs/ui/, and to obtain updated information on travel and security within the Slovak Republic.

Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency. The U.S. Embassy in Bratislava is located at Hviezdoslavov 4, Bratislava telephone (421)(2)5443 0861; (421)(2) 5443 3338, fax (421)(2) 5441 8861; mailing address: U.S. Embassy, PO Box 309, 814 99 Bratislava, Slovak Republic; e-mail: cons@ueembassy.sk; web site: http://slovakia.usembassy.gov.

Intercountry Adoption

August 2006

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is based on public sources and current understanding. Questions involving foreign and U.S. immigration laws and legal interpretation should be addressed respectively to qualified foreign or U.S. legal counsel.

Patterns of Immigration: Please review current reports online at http://adoption.state.gov.

Adoption Authority:
Centrum Pre Medzinárodnoprávnu Ochranu Detí a Mládeže
(Center for the International Legal Protection of Children and Youth)
Župné nám. č. 6
P. O. Box 57
814 99 Bratislava
Tel: +4212/59330501
Tel 2: +4212/59330502
Fax: +4212/5933 0698
Open for walk-in public: 8:00 do 16:00, Wednesdays only
E-mail: cipc@employment.gov.sk

The Center for the International Legal Protection of Children and Youth ("the Center") primarily communicates with the partnership centers in other member countries of the Hague Convention. It will respond to private calls only if the caller is a long-term resident of Slovakia.

Eligibility Requirements for Adoptive Parents: Slovak law sets no age limits for adoptive parents. The law does recommend, however, that the age difference between child and adoptive parents be "adequate." U.S. Embassy officials have been told that the age difference should be at least 15 years, and no more than 40 years. Both couples and single persons may apply to adopt Slovak children.

Residency Requirements: Prospective adoptive parents (prospective adoptive parents) must, during the whole adoption procedure, have the status of long-term or permanent residents of Slovakia or another country that is party to the Hague Convention, and must be physically present in that country.

Time Frame: Prospective adoptive parents are required to reside with their adoptive child for 6 months to a year before an adoption is finalized. An adoption may take up to two years to complete.

Adoption Agencies and Attorneys: There are no government-approved adoption agencies; individual cases are handled directly by the Center and by the court. This means that an adoption cannot be mediated by any adoption agency.

An application from a prospective adoptive parents residing in another Hague country must be filed directly with the Center or, if the prospective adoptive parents resides in Slovakia, with the local Office of Employment, Social Affairs and Family in the prospective adoptive parents' district of residence. A local attorney may be of assistance. A list of English speaking attorneys is available at www.sak.sk.

Court fees: If the case is processed under the Hague Convention, there are no fees. If the case is pursued by prospective parents who are residents of Slovakia, the maximum fee is 5000 Slovak crowns (SK). Administrative fees for translation of documents and authentication of documents can be charged, usually about $15 per page. Issuance of Birth Certificate and authentication: 600 SK; Issuance of passport to minor under 5 years of age: 250 SK; minor under 15 years of age: 400 SK; expedited issuance within 24 hours is 2000 SK.

If an attorney is hired, the fees for provided services are paid to the attorney directly and should be negotiated directly with the attorney.

Adoption Procedures: Slovak orphanages for children up to age 3 are administered by the Slovak Ministry of Health; orphanages for children of ages 3-18 are administered by the Ministry of Education.

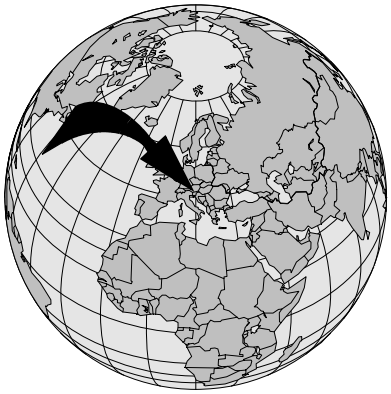
Slovak law requires that the child reside from six months to one year with the prospective adoptive parents (prospective adoptive parents) before a court may issue a final adoption decree.

The child would live with the prospective adoptive parents in a pre-adoption foster care situation. During this period the family would be observed by social workers representing the child. In Hague Convention adoptions, all documents should be prepared in accordance with requirements of the Central Authority of the prospective adoptive parents' country of residence. prospective adoptive parents residing in Slovakia should contact the Office of the Social Affairs, Employment and Family having jurisdiction over their place of residence. In their case, all documents must be from Slovakia.

They will need proof of a sound financial situation as well as good physical and mental health. They will be required to obtain a home study and a psychological assessment. prospective adoptive parents who are not citizens of Slovakia will also be required to present a good-conduct statement from their country of origin,

Required Documents: Applications for adoption must be supported by the following basic documents:

- Home study from an accredited social agency in Slovakia
- Good conduct statement (police report from the country of the adoptive parent)
- Proof of financial situation
- Good health condition report
- Psychological assessment test



Slovak Embassy In The United States:
3523 International Court N.W.

Additional Information: Specific questions about adoption in Slovakia may be addressed to the U.S. Embassy in Bratislava. Questions concerning the U.S. immigrant visa process for Slovak children should be directed to the U.S. Embassy in Prague, Czech Republic, via the web site provided above. General questions regarding intercountry adoption may be addressed to the Office of Children's Issues, U.S. Department of State, CA/OCS/CI, SA-29, 4th Floor, 2201 C Street, NW, Washington, D.C. 20520-4818, toll-free Tel: 1-888-407-4747.

SLOVENIA

Compiled from the August 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Republic of Slovenia

PROFILE

Geography

Area: 20,273 square kilometers (7,906 sq. mi.) slightly smaller than New Jersey.

Cities: Capital—Ljubljana (2002 census pop. 265,881). Other cities—Maribor (110,668), Kranj (51,225), Celje (48,081), Koper (47,539).

Terrain: Mountains rising to more than 2,500 meters (8,200 ft.) in the north, wide plateaus over 1,000 meters (3,280 ft.) high in the southeast, Karst limestone region of caves in the south-southwest, hills in the east, and approximately 50 kilometers (39 mi.) of coastline on the Adriatic Sea.

Land use: (2006) 63.3% forests, 24.2% agricultural land, 12.5% noncultivated land.

Climate: Temperate, with regional variations. Average temperature in the mountain region in January is below 0°C (32°F), in the interior from 0°C -2°C (32°F-36°F), and along the coast from 2°C -4°C (36°F-39°F); in July, average temperature in the interior is 20°C -22°C (68°F-72°F), along the coast 22°C -24°C (72°F-75°F). Average annual rainfall is from 800 mm (31 in.) in the east to 3,000 mm (117 in.) in the northwest.

People

Nationality: Noun—Slovene(s). Adjective—Slovenian.

Population: (March 2008): 2,028,630.

Annual growth rate: (2007) 0.8%.

Ethnic groups: (2002 census) Slovenes 83.06%, Croats 1.81%, Serbs 1.98%, Bosniaks 1.10%, Hungarians 0.32%, Montenegrins 0.14%, Macedonians 0.20%, Albanians 0.31%, Italians 0.11%, Roma 0.17%.

Religions: (2002 census) Roman Catholic 57.8%, refused to reply 15.7%, atheist 10.1%, Orthodox Christian 2.3%, Muslim 2.4%.

Languages: The official language is Slovene. Hungarian and Italian are spoken in the border regions, and German fluency is common near the Austrian border. Bosnian, Croatian, and Serbian are spoken by a sizable (6% of the population) minority. English is widely understood by business people and students.

Education: Elementary school (26.1%), high school (54.1%), 2, and 4-year university degree (13%). Data according to 2002 census.

Health: Infant mortality rate: (2007)—2.1/1,000 births. Life expectancy (2006)—74.84 years for men, 81.89 years for women.

Work force: (2006) 1,032,000.

Government

Type: Parliamentary democracy.

Independence: On June 25, 1991, the Republic of Slovenia declared independence from Yugoslavia. The United States and the European Union recognized Slovenia in 1992.

Constitution: Adopted on December 23, 1991.

Government branches: Executive—president, head of state, directly elected for a maximum of two consecutive 5-year terms. Legislative—bicameral legislature (Parliament is composed of the National Assembly, with 90 deputies directly elected on party basis for 4-year terms, and the National Council, with 40 members elected by the National Assembly to represent social, economic, professional, and local interests for 5-year terms); prime minister, head of government, nominated by the president and elected by the National Assembly. Judicial—Constitutional Court, regular courts, and a public prosecutor.

Political parties: National Assembly seats—Slovenian Democratic Party (SDS) 29 seats; Social Democrats (SD) 14; Liberal Democracy of Slovenia (LDS) 11; New Slovenia - Christian People's Party (NSi) 9; Slovene People's Party (SLS) 7; Zares 7; Slovene National Party (SNS) 3, Lipa (new party established by three former SNS members) 3; Democratic

Party of Slovenian Pensioners (DeSUS) 4; Italian minority 1; Hungarian minority 1.

Suffrage: Universal over 18 years of age; permanent residents may vote in local elections.

Political subdivisions: 201 local administrative units.

Government Budget: $21.568 billion (2007); defense, 1.65% GDP (2007).

Economy

GDP: (2007) $51.99 million.

Real GDP growth rate: (2007) 6.1%.

GDP per capita in PPP: (2007) $25,755.

Natural resources: Coal, mercury, timber.

Agriculture/forestry/fishing: (approx. 2% of GDP) Products—wheat, corn, poultry, beef, pork, milk, potatoes, orchard fruits, wine.

Industry: (approx. 34% of GDP) Types—electrical equipment, chemical products, textiles, food products, electricity, metal products, wood products, transportation equipment.

Services: (approx. 63% of GDP) Types—retail, transportation, communications, real estate and other business activities.

Trade: Exports (2007) $30.047 billion)—machinery, transportation equipment, manufactured articles, chemical products. To U.S.—$506 million (2006). Imports (2007: $33.305 billion)—machinery, transportation equipment, manufactured articles, mineral fuels and lubricants. From U.S.—$289 million (2004). Major trading partners—Germany, Italy, Croatia, Austria, France, and Russia. Trade with the U.S. accounts for about 1.5% of total trade. Foreign direct investment in 2005: $144.2 million (1.6% of total FDI in Slovenia).

Foreign direct investment: in 2005 $93 million (1.6% of total FDI in Slovenia).

GEOGRAPHY AND PEOPLE

Slovenia is situated at the crossroads of central Europe, the Mediterranean, and the Balkans. The Alps—including the Julian Alps, the Kamnik-Savinja Alps, the Karavanke chain, and the Pohorje Massif—dominate northern Slovenia near Austria. Slovenia's Adriatic coastline extends for approximately 48 kilometers (30 mi.) from Italy to Croatia. The term "karst"—a limestone region of underground rivers, gorges, and caves—originated in Slovenia's Karst plateau between Ljubljana and the Italian border. On the Pannonian plain to the east and northeast, toward the Croatian and Hungarian borders, the landscape is essentially flat. However, the majority of Slovenian terrain is hilly or mountainous, with around 90% of the surface 200 meters or more above sea level.

The majority of Slovenia's population is Slovene (over 83%). Hungarians and Italians have the status of indigenous minorities under the Slovenian constitution, which guarantees them seats in the National Assembly. Most other minority groups, particularly those from the former Yugoslavia, immigrated after World War II for economic reasons. Slovenes are predominantly Roman Catholic, though the country also has a small number of Protestants, Orthodox Christians, Muslims, and Jews. Slovene is a Slavic language, written in the Roman script.

HISTORY

Slovenia is today a vibrant democracy, but the roots of this democracy go back deep in Slovene history. According to the 16th century French political philosopher, Jean Bodin, Slovenes practiced the unique custom of the Installation of the Dukes of Carinthia for almost 1,000 years, until the late 14th century. According to some scholars, Bodin's account of how Slovene farmers contractually consented to be governed by the Duke influenced Thomas Jefferson's drafting of the Declaration of Independence. From as early as the 9th century, Slovenia had fallen under foreign rulers, including partial control by Bavarian dukes and the Republic of Venice. With the exception of Napoleon's 4-year tutelage of parts of Slovenia and Croatia—the "Illyrian Provinces"—Slovenia was part of the Habsburg Empire from the 14th century until 1918. Nevertheless, Slovenia resisted Germanizing influences and retained its unique Slavic language and culture.

In 1918, Slovenia joined with other southern Slav states in forming the Kingdom of Serbs, Croats, and Slovenes as part of the peace plan at the end of World War I. Renamed in 1929 under a Serbian monarch, the Kingdom of Yugoslavia fell to the Axis powers during World War II. Following communist partisan resistance to German, Hungarian, and Italian occupation and elimination of rival resistance groups, socialist Yugoslavia was born under the helm of Josip Broz Tito. During the communist era, Slovenia became Yugoslavia's most prosperous republic, at the forefront of Yugoslavia's unique version of communism. Within a few years of Tito's death in 1980, Belgrade initiated plans to further concentrate political and economic power in its hands.

Defying the politicians in Belgrade, Slovenia underwent a flowering of democracy and an opening of its society in cultural, civic, and economic realms to a degree almost unprecedented in the communist world. In September 1989, the General Assembly of the Yugoslav Republic of Slovenia adopted an amendment to its constitution asserting Slovenia's right to secede from Yugoslavia. On December 23, 1990, 88% of Slovenia's population voted for independence in a referendum, and on June 25, 1991, the Republic of Slovenia declared its independence. A nearly bloodless 10-day war with Yugoslavia followed. Yugoslav forces withdrew after Slovenia demonstrated stiff resistance to Belgrade.

As a young independent republic, Slovenia pursued economic stabilization and further political openness, while

emphasizing its Western outlook and central European heritage. Reflecting its success in these goals, Slovenia became a member both of the North Atlantic Treaty Organization (NATO) and the European Union (EU) in March and May, respectively, of 2004. Today Slovenia is a stable democracy that is increasing its international engagement. Slovenia is one of the top foreign investors in the former Yugoslavia, and a charter World Trade Organization (WTO) member. Members of the Slovenian Armed Forces are participating in NATO, EU, and UN operations in Iraq, Afghanistan, Bosnia, Kosovo, and elsewhere. Slovenia served as the Organization for Security and Cooperation in Europe (OSCE) Chairman-in-Office in 2005, was the Chairman of the International Atomic Energy Agency Board of Governors in 2006-2007, and was the first of the ten 2004 EU newcomers to hold the EU's rotating presidency in the first half of 2008. Though small in size, Slovenia enjoys a growing regional profile and plays a role on the world stage that is out of proportion to its size.

GOVERNMENT AND POLITICAL CONDITIONS

Slovenia enjoys excellent relations with the United States and cooperates with it actively on a number of fronts. From 1998 to 2000, Slovenia occupied a non-permanent seat on the United Nations (UN) Security Council and in that capacity distinguished itself with a constructive, creative, and consensus-oriented activism. Slovenia has been a member of the UN since May 1992 and of the Council of Europe since May 1993. Slovenia signed an association agreement with the EU in 1996 and became a full EU member state on May 1, 2004. Slovenia officially became a member of NATO on March 29, 2004. Slovenia is a member of all major international financial institutions—the International Monetary Fund, the World Bank Group, and the European Bank for Reconstruction and Development—as well as 40 other international organizations, among them the WTO, of which it is a founding member.

Since the breakup of the former Yugoslavia, Slovenia has instituted a stable, multi-party, democratic political system, characterized by regular elections, a free press, and an excellent human rights record. Slovenia is a parliamentary democracy and constitutional republic. Within its government, power is shared between a directly elected president, a prime

minister, and a bicameral legislature (Parliament). Parliament is composed of the 90-member National Assembly—which takes the lead on virtually all legislative issues—and the National Council, a largely advisory body composed of representatives from social, economic, professional, and local interests. The Constitutional Court has the highest power of review of legislation to ensure its consistency with Slovenia's constitution. Its nine judges are elected by the National Assembly for a single 9-year term.

Slovenia's first President, Milan Kucan, concluded his second and final term in December 2002. Prime Minister Janez Drnovšek defeated opposition candidate Barbara Brezigar in the 2002 presidential elections by a comfortable margin and was inaugurated as Kucan's successor on December 22, 2002. Finance Minister Anton Rop succeeded Drnovšek as Prime Minister in December 2002, and his center-left governing coalition commanded an almost two-thirds majority in the National Assembly until October 2004. In the October 2004 election, Janez Jansa's center-right Slovenian Democratic Party (SDS) made a strong showing, winning a relative majority with over 29% of the vote. Janez Jansa was sworn in as Prime Minister on November 9, 2004 and the National Assembly confirmed the new cabinet on December 3. In November 2007 elections, Danilo Turk succeeded Janez Drnovsek as President of the Republic of Slovenia with 68% of the vote.

The government and most of the Slovenian polity share a common view of the desirability of a close association with the West, specifically of membership in both the EU and NATO. For all the apparent bitterness that divides left and right wings, there are few fundamental philosophical differences between them in the area of public policy. Slovenian society is built on consensus, which has converged on a social-democrat model. Political differences tend to have their roots in the roles that groups and individuals played during the years of communist rule and the struggle for independence. As the most prosperous republic of the former Yugoslavia, Slovenia emerged from its brief 10-day war of secession in 1991 as an independent nation for the first time in its history. Since that time, the country has made steady but cautious progress toward developing a market economy. Economic reforms introduced shortly after independence led to healthy economic growth. Despite the halting pace of reform and signs of slowing gross domestic product (GDP) growth today, Slovenes now enjoy the highest per capita income of all the transition economies of central Europe.

The Slovenes have pursued internal economic restructuring with caution. The Jansa government, elected on a platform supporting widespread economic reform, has found delivering on its ambitious promises more challenging than expected. The first phase of privatization (socially-owned property under the Socialist Federal Republic of Yugoslavia, or S.F.R.Y., system) is now complete. However, sales of several remaining large state holdings, planned for several years now, have yet to come to fruition. The Jansa government has said that it is committed to seeing this final stage of privatization happen under its administration.

Foreign trade is very important to the Slovenian economy. Nearly two-thirds of Slovenia's overall trade is with the EU and the vast majority of this is with Germany, Italy, Austria, and France. While the service sector is the largest part of the economy as a percentage of GDP, manufacturing accounts for most employment, with machinery and other manufactured products comprising the major exports. Labor force surveys put unemployment at 5.7% (2007). Inflation, after declining from 3.6% in 2004 to 2.5% in 2005 and 2006, returned to 3.6% for 2007. The average annual inflation index through June 2008 was 7.6%. Gross domestic product grew by about 6.1% in 2007. Slovenia joined the Euro Zone in January 2007.

In the 15 years since independence, Slovenia has made tremendous progress establishing democratic institutions, enshrining respect for human rights, establishing a market economy, and adapting its military to Western norms and standards. In contrast to its southern neighbors, civil tranquility and strong economic growth have marked this period. Upon achieving independence, Slovenia offered citizenship to all residents, regardless of ethnicity or origin, avoiding a sectarian trap that has caught out many central European countries. However, debate continues on how best to accommodate an estimated 18,000 undocumented non-Slovenes who were resident in Slovenia at the time of independence, but whose records were "erased" when they did not take citizenship. Many in this group have regularized their status or left the country; however, it is estimated that around 4000 cases remain unresolved. Slovenia willingly accepted nearly 100,000 refugees from the fighting in Bosnia and has since participated in international stabilization efforts in the region.

On the international front, Slovenia has rapidly integrated into the Euro-Atlantic community of nations. With successful NATO (66% in favor) and EU (91% in favor) referenda in March 2003, Slovenia achieved upon accession in 2004 its two primary foreign policy goals—membership in the EU and NATO. In 2005, Slovenia served as the Organization for Security and Cooperation in Europe (OSCE) Chairman-in-Office. Slovenia also participates in the Stability Pact and the Southeast Europe Cooperation Initiative (SECI). Slovenia is one of the focus countries for the U.S. southeast European policy aimed at reinforcing regional stability and integration. The Slovenian Government is well-positioned to be an influential partner for other southeast European governments at different stages of reform and integration, and has introduced initiatives towards this goal, including the establishment of the Center for European Perspective and the Bled Strategic Forum.

To these ends, the U.S. urges Slovenia to maintain momentum on internal economic, political, and legal reforms,

while expanding their international cooperation as resources allow. U.S. and allied efforts to assist Slovenia's military restructuring and modernization efforts are ongoing. Slovenia successfully faced its largest organizational challenge since independence when it was the first of the ten 2004 EU newcomers to hold the EU's rotating presidency from January through June 2008.

Slovenia maintains an embassy in the United States at 2410 California Ave, NW, Washington, DC 20008 (tel.: (202) 386-6601; fax: (202) 386-6633). The embassy webpage is http://washington.embassy.si/index.php?id=51&L=1.

ECONOMY

Slovenia's economic success clearly illustrates the benefits of embracing liberal trade, following the rule of law, and rewarding enterprise. This success, however, is not unprecedented for Slovenia. Although it comprised only about one-thirteenth of Yugoslavia's total population, it was the most productive of the Yugoslav republics, accounting for one-fifth of its GDP and one-third of its exports. The country already enjoyed a relatively prosperous economy and strong market ties to the West when it gained independence in 1991. Since independence, Slovenia has pursued diversification of its trade toward the West and integration into Western and transatlantic institutions vigorously. In so doing, it has made substantial progress in its transition to a market economy, particularly becoming party to a number of bilateral and regional free trade agreements. Slovenia is a founding member of the WTO and joined the Central European Free Trade Agreement (CEFTA) in 1996. Slovenia also participates in SECI, as well as in the Central European Initiative, the Royaumont Process, and the Black Sea Economic Council. Slovenia became a new EU member state on May 1, 2004.

Today, Slovenia is one the best economic performers in central and eastern Europe, with a GDP per capita in PPP in 2007 at $25,755. Slovenia benefits from a well-educated and productive work force as well as dynamic and effective political and economic institutions. Although Slovenia has taken a cautious, deliberate approach to economic management and reform, with heavy emphasis on achieving consensus before proceeding, its overall record is one of relative success.

Slovenia has enjoyed healthy growth figures for the past 8 years, averaging over 4.0% annual GDP growth. The European economic slowdown reduced the pace of growth somewhat beginning in 2001. GDP grew by 6.1% in 2007. Slovenia's economy is highly dependent on foreign trade. About two-thirds of Slovenia's trade is with the EU. Additionally, the country has penetrated successfully the south and east markets, including the former Soviet Union region. This high level of openness makes Slovenia extremely sensitive to economic conditions in its main trading partners and changes in its international price competitiveness. Keeping labor costs in line with productivity is thus a key challenge for Slovenia's economic well-being. Services contributed the most to the national output in 2007, accounting for 63.5% of GDP. Industry and construction comprised 34.4% of GDP; and, agriculture, forestry, and fishing accounted for 2% of GDP.

Economic management in Slovenia is relatively good. Public finances showed modest deficit of 0.1% of GDP in 2007. The government policy is aimed toward maintaining the deficit at or below 1% of GDP. The budget of 2008 constrains public deficit to 0.9% of GDP, well within Maastricht parameters. The current account balance has improved significantly as a result of stronger exports and a changed composition of imports by economic purpose. In 2007, the current account balance showed a deficit of $2.222 billion. After the adoption of the Euro, controlling inflation remains a top government priority.

Due to its macroeconomic stability, favorable foreign debt position, and successful accession to the EU, Slovenia consistently receives the highest credit rating of all transition economies—receiving the top regional honors in a recent Dunn & Bradstreet survey. Slovenia's ability to meet its growth rate objectives will largely depend on the state of the world economy, since exports demand in Slovenia's primary market has stalled. Foreign direct investment (FDI) will take up the slack to some extent, as analysts forecast FDI levels will continue to increase with further privatization of state assets, including portions of the telecommunications, financial, and energy sectors. Slovenia must carefully address fiscal, monetary, and FDI policy, in light of the high deficit in pension accounts, its vulnerable Western export markets, and inflation concerns. Slovenian enterprises have a tradition of

market orientation that has served them well in the transition period, as they moved energetically to reorient trade from former Yugoslav markets to those of central and eastern Europe. However, in many cases under the Slovenian brand of privatization, managers and workers in formerly "socially owned" enterprises have become the majority shareholders, perpetuating the practices of "worker management" that were the hallmark of the Yugoslav brand of socialism. Difficulties associated with that model are expected to decrease under competitive pressures, as shares in these firms change hands, and as EU reforms introduce more Western-oriented governance practices.

Slovenia has taken some important steps in recent years to free up its financial markets. This sector historically has been one of the most protected, reflecting Slovenian concerns over limited capacity to face global competition and a desire to maintain domestic control over finance. A combination of market forces, changes in Bank of Slovenia regulations, and national legislation are moving this sector increasingly in a more globally oriented direction. In 2003, several measures were introduced to make both portfolio and direct investments easier and more transparent in Slovenia and to conduct many financial operations, including banking, securities brokering, and undertaking various credit transactions. Most remaining barriers were removed by May 1, 2004—for instance, marketing of foreign mutual investment funds is now allowed. The banking sector also is showing signs of stirring from its relative inactivity, as pressures build to consolidate Slovenia's myriad banks and as privatization of two of the largest banks proceeds. While Belgian KBC is the main owner of Nova Ljubljanska Banka (NLB) with 34%, little progress has been made in the privatization of NKBM bank, Slovenia's largest bank, which is still 100% state owned. The government continues to downsize state shares in the insurance sector; however, the government-owned Triglav still controls nearly half of the insurance market. Other insurance companies have been privatized or are foreign-owned. Government efforts and reforms designed to attract foreign direct investment (FDI) have proven somewhat successful—FDI is continuing to slowly grow. However, FDI fell sharply in 2003 due to a lack of any major privatization deal or foreign acquisition. Slovenia's traditional anti-inflation policy in the past relied heavily on capital inflow restrictions. Its slow privatization process favored domestic investors and prescribed long lag time on share trading, complicated by a cultural wariness of being "bought up" by foreigners. As such, Slovenia has had a number of impediments to full foreign participation in its economy. However, a number of these barriers to FDI were fully removed in 2002. As a result, expected foreign takeovers of Slovenian blue chip companies, as well as EU membership, have fueled investors' interest in the country. Acquisitions by multinational companies—KBC of Belgium's takeover of significant share of Nova Ljubljanska Banka, Swiss Novartis' takeover of Lek Pharmaceuticals, and recent interest of foreigners in national telecom—clearly demonstrate the attractiveness of the Slovenian economy, particularly to European investors seeking a platform to support expansion into southeastern Europe. U.S. investments in Slovenia have been more modest; Goodyear is the largest American investor. Even with these successes, much of the economy remains in state hands and foreign direct investment in Slovenia is one of the lowest in the EU on a per capita basis.

The current government's ability to follow through on pledges to accelerate privatization of a number of large state holdings and increase FDI will be key to Slovenia's economic future. In late 2005, the government's new Committee for Economic Reforms was elevated to cabinet-level status with a program including plans for lowering the tax burden, privatizing state-controlled firms, improving the flexibility of the labor market, and increasing the government's efficiency. Many of the committee members and heads have resigned due to inability to make any significant progress. Though progress has been stalled on the program, the Jansa government has pledged to move forward with the planned reforms, which also in the vast majority have not been realized thus far. Slovenia's position with respect to other central and eastern European (CEE) countries will decline without vigorous pursuit of economic reform.

DEFENSE

Slovenian Armed Forces

After successful resistance to the Yugoslav National Army (JNA) following the 10-day war of independence in 1991, Slovenia faced the challenge of establishing independent armed forces. The Slovene Armed Forces underwent a major reorganization from 2003 to 2005, with the goal of changing from a conscription-based territorial defense force to a professional, deployable, and combat capable military with NATO. Conscription ended earlier than expected, in October 2003, and compulsory reserve service will end by 2010. As of March 2008, Slovenia's professional force included 7,050 soldiers and 7,359 reservists. The current force structure consists of one fully professional motorized infantry brigade and two cadre/reserve force mechanized brigades. The professional brigade represents Slovenia's deployable reaction force. The Slovene Armed Forces also include a small air force, equipped with helicopters and turbo-prop fixed wing aircraft, and a naval attachment, including a coastal patrol boat. The United States provides bilateral military assistance to Slovenia, including through the International Military Education and Training (IMET) program, the Foreign Military Financing (FMF) program, the State Partnership Program (aligned with Colorado), the George C. Marshall European Center for Security Studies, the EUCOM Joint Contact Team Program, and the Regional Counterterrorism Fellowship Program (CTFP).

NATO

After receiving an invitation to join NATO at the NATO Prague Summit in November 2002, Slovenes approved NATO accession with a vote of 66% in a March 2003 referendum. The National Assembly ratified accession to the North Atlantic Treaty in February 2004, and Slovenia officially became a member of the Alliance on March 29, 2004. After gaining independence, Slovenia avidly sought NATO membership as part of its overall strategy of integration into the most important international economic, financial, and security organizations.

Slovenia's current international commitments show its willingness to become a co-provider of security in the region. Slovenia contributed helicopters, medical personnel, military police, and an infantry company to the NATO Stabilization Force in Bosnia and Herzegovina (SFOR) and continues to be very active in the European Union Force (EUFOR). As of June 2008, Slovenia had 34 troops deployed in Bosnia and Herzegovina (ALTHEA, EUFOR, Joint Enterprise, NATO). In Kosovo, Slovenia actively participates in the NATO Kosovo Force (KFOR) with 363 troops.

There are 65 Slovenian personnel with the International Security Assistance Force (ISAF) mission in Afghanistan, 2 instructors to the NATO Training Mission in Iraq, 14 troops in Lebanon (UNIFIL), 3 in Syria (UNTSO), 15 at the EU Mission in Chad, and 1 in the U.S. (CENTCOM, NATO).

The Government of Slovenia has diligently pursued its restructuring, reorganization, modernization, and procurement with the paramount goal of NATO interoperability. The United States has encouraged Slovenia to maintain the pace of reform—including the establishment of closer links with regional partners—even following its attainment of full membership in NATO.

FOREIGN RELATIONS AND REGIONAL COOPERATION

In regular public statements, Slovenia's highest politicians underscore their government's commitment to expanding cooperative arrangements with neighbors and active contributions to international efforts aimed at bringing stability to southeast Europe. Resource limitations are a concern for the government, which does not wish to see itself spread too thin. Nonetheless, the Slovenes are taking concrete steps toward a more outward looking and constructive role in regional and international security arrangements, as resources allow.

Multilateral

The Slovenian Armed Forces has over 500 troops deployed to support the International Security Assistance Force (ISAF) in Afghanistan, the NATO Training Mission (NTM-I) in Iraq, EU Mission Althea in Bosnia and Herzegovina, the NATO Kosovo Force (KFOR), and other multilateral operations.

Slovenia takes an active role in humanitarian assistance with donations to the victims of the Southeast Asian tsunami, the Pakistani earthquake, and Hurricane Katrina, as well as ongoing assistance to refugees in Darfur and support for the World Food Program.

Through its International Trust Fund for Demining and Mine Victims Assistance (ITF), Slovenia has created the demining instrument of choice for the international community in Bosnia and Herzegovina, the rest of the Balkans, and now even further afield in Central Asia and Cyprus. The organization has raised over $203 million since its inception in 1998 (with the United States contributing over $92 million).

Slovenia served as Chairman-in-Office of the OSCE in 2005 and the Chairman of the International Atomic Energy Agency's Board of Governors for 2006-2007.

Slovenia is engaged with 29 countries in bilateral military exchange—most actively with the U.S.—and in regional cooperative arrangements in central and southeast Europe; it participates in or intends to contribute forces for five major multinational regional peacekeeping bodies.

Slovenia participates in the Proliferation Security Initiative (PSI) to halt the proliferation of weapons of mass destruction (WMD), their delivery systems, and related materials worldwide.

Slovenia has ratified all 13 international anti-terrorism conventions.

Slovenia is party to the Wassenaar arrangement controlling exports of weapons and sensitive technology to countries of concern

Slovenia is an active participant in Southeast European Defense Ministerial (SEDM) activities.

Relations with Neighbors

Slovenia's bilateral relations with its neighbors are generally harmonious and cooperative. However, there remain a few unresolved disputes with Croatia related to the succession of the former Yugoslavia, including demarcation of their common border. In addition, unlike the other successor states of the former Yugoslavia, Slovenia did not normalize relations with Serbia and Montenegro until after the passing from power of Slobodan Milosevic (although the Slovenes did open a representative office in Podgorica to work with Montenegrin President Djukanovic's government).

With its entry into the European Union, Slovenia has become a strong advocate for the inclusion of other former Yugoslav republics into Euro-Atlantic institutions. Slovenia's strong political ties to the region are complemented by strong economic ties. Slovenia is among the largest foreign investors in the region.

Italy. Italian-Slovenian bilateral relations are also very good. By mid-

1996, property restitution disputes derived from World War II had been set aside, allowing a dramatic improvement in relations. In 2001, the Italian Senate voted final approval of legislation resolving some minor differences remaining over minority rights issues and over the compensation for property abandoned by Italian refugees fleeing communist Yugoslavia in the postwar period. Recently there have been some accusations of Italians not consulting with Slovenia regarding their plans with gas terminals in the middle of the bay and near the Slovene-Italian land border, which could have an environmental impact on Slovenia as well.

Hungary. Relations are excellent with Hungary. Hungarian (as well as Italian) minorities in Slovenia are accorded special treatment under the Slovenian constitution, including a permanent parliamentary seat. Within the Multilateral Cooperation Initiative between Slovenia, Italy, Hungary, and Croatia, cooperation exists in numerous fields, including military (Multinational Land Force peacekeeping brigade), transportation, combating money laundering and organized crime, non-proliferation, border crossings, and environmental issues.

Austria. Austro-Slovenian relations are close with occasional disputes related to support for the other country's minorities. In 2005 and 2006 this was dominated by an ongoing question about whether to allow bilingual (German and Slovenian) signage on Austrian territory near the Slovenian border. Questions regarding nuclear power in Slovenia and the basis for the settlement of the Austrian State Treaty appear to have been solved. Economic cooperation is expanding, including a joint project for development of border regions.

Croatia. Though somewhat rocky at times, Croatian-Slovenian relations are solid. Outstanding issues include a few remaining maritime and land border disputes, property rights, Croatian depositors' savings in the Ljubljanska Banka from Yugoslav times, and Krsko nuclear plant. In 2003, Croatia declared its intention to claim a 200-mile exclusive economic zone in the Adriatic Sea, which would effectively cut off Slovenia's use of international waters. Multilateral discussions among Slovenia, Croatia, and Italy on this issue continue with the European Commission's participation. In a series of high-level meetings since the latter half of 1998, Slovenia and Croatia have been engaged in settling bilateral differences, a process that accelerated after the death of Croatian President Franjo Tudjman in 1999 and has intensified under the government of Prime Minister Janez Jansa elected in October 2004. In order to aid the stabilization of this part of Europe, Slovenia has supported Croatia's efforts to draw closer to European institutions.

Slovenia and Croatia most recently made an effort to improve relations during a joint government session on June 10, 2005 where three bilateral agreements were signed: Joint Statement on Avoiding of Conflicts, Bilateral Agreement on Avoiding Double Taxation, and an establishment of a joint Historical Commission for the border issue. Though several nagging issues remain to be solved, less formal meetings between Slovenian and Croatian sides occur regularly.

U.S.-SLOVENIAN RELATIONS

Since Slovenia achieved its independence in 1991 the United States and Slovenia have developed strong, cooperative relations on a broad range of issues, from promoting regional security to developing closer bilateral trade and investment ties. The U.S. was very supportive of Slovenia's entrance into NATO and other Euro-Atlantic agreements and institutions.

The first official U.S. presence in Slovenia dates from the early 1970s, when the United States Information Service (USIS) opened a library and American press and cultural center in Ljubljana. From its opening through 1992, the American Center worked to develop closer grassroots relations between the United States and the people of the then-Slovenian Republic of Yugoslavia. On December 23, 1990, the Slovene people voted in a plebiscite to separate from greater Yugoslavia. On June 25, 1991, the new Republic of Slovenia officially declared its independence from the Federal Republic of Yugoslavia. A 10-day war commenced, during which Slovenian territorial troops fought off incursions by the Yugoslav National Army. The United States formally recognized the new republic on April 7, 1992. To develop U.S. diplomatic relations with the new state, the United States opened a new Embassy in Ljubljana in August 1992.

Since 1992, the United States and the Republic of Slovenia have developed an impressive track record of cooperation on bilateral, regional, and global issues. The United States has worked closely with the Slovenes to resolve succession issues stemming from the breakup of Yugoslavia. Slovenia provided invaluable assistance to the United States and NATO by facilitating the deployment of the Implementation Force (IFOR)—and subsequently SFOR—to Bosnia after the conclusion of the Dayton accords. With strong U.S. support, Slovenia has developed the International Trust Fund as the demining instrument of choice in the Balkans and is expanding operations to include the Caucasus.

On the economic front, the United States has worked to develop bilateral trade and investment with Slovenia. U.S. trade (imports and exports) with Slovenia for 2006 was $883.5 million. Under the Support for Eastern European Democracy (SEED) Act, the U.S. provided technical assistance on enterprise competitiveness, banking and pension reform, competition policy, and debt restructuring. Reflecting the progress Slovenia has made in these areas, Slovenia was among the first transition countries to "graduate" from the SEED program.

The United States supported Slovenia's accession to the North Atlantic Alliance and continues to work with

the Slovenian military to promote greater cooperation and interoperability with NATO forces. The United States and Slovenia hold periodic high-level security consultations to help Slovenia achieve this national objective. The U.S. European Command provides a liaison team that works with the Ministry of Defense full-time to develop greater familiarity with NATO structures and procedures.

In October 1997, Slovenia joined the group of countries—now numbering 27—whose citizens enjoy the privilege of visa-free travel to the United States.

Given Slovenia's economic success and location, its history, language, business ties, and insights into the region, Slovenia is an important partner in advancing the shared goal of regional political and economic stability. The utility of this partnership was demonstrated by effective U.S.-Slovenian cooperation on a broad mix of issues at the U.S.-EU Summit held in Ljubljana in June 2008. More than geographically, Slovenia is a bridge from developed Europe into the Balkans, an area of the continent where significant diplomatic and security challenges remain.

TRAVEL

Consular Information Sheet

July 29, 2008

Country Description: Slovenia operates under a parliamentary democracy. In May 2004, Slovenia became a member of the European Union. Tourist facilities are widely available throughout the country.

Entry Requirements: Slovenia is a party to the Schengen agreement. As such, U.S. citizens may enter Slovenia for up to 90 days for tourist or business purposes without a visa. The passport should be valid for at least three months beyond the period of stay. For further details about travel into and within Schengen countries, please see our fact sheet. Slovene authorities may confiscate passports with signs of damage, such as missing pages, as suspicious documents, potentially causing travel delays.

All non-EU citizens staying longer than 3 days in Slovenia must register with the local police within 3 days of arrival and inform the office about any change in their address. Registration of foreign visitors staying in hotels or accommodations rented through an accommodation company is done automatically by the hotelier or accommodation company, but visitors staying with family members must register themselves. Registration is available 24 hours a day at police stations and is free of charge. Failure to register can result in a significant fine of up to 400 euros.

Americans are permitted up to 90 days stay within any six-month period. For further information on entry requirements for Slovenia, travelers may contact the Embassy of Slovenia at 2410 California Street NW, Washington, DC 20008, tel. (202) 386-6610; the Consulate General of Slovenia in New York City, tel. (2l2) 370-3006; or the Consulate General in Cleveland, Ohio, tel. (216) 589-9220. Visit the Embassy of Slovenia's web site at http://washington.embassy.si/index.php?id=51&L=1 for the most current visa information.

Safety and Security: Slovenia remains largely free of terrorist incidents. This assessment takes into account historical data relevant to terrorist activities and recent reporting indicating whether acts could be conducted without prior advance warnings. However, like other countries in the Schengen area, Slovenia shares open borders with its Western European neighbors, allowing the possibility of terrorist groups entering/exiting the country with anonymity. Americans are reminded to remain vigilant with regard to their personal security and to exercise caution.

There are occasional political demonstrations in city centers in Slovenia. They occur most often in central Ljubljana in areas around Kongresni Trg (Congress Square), in front of the Parliament building, around other government facilities, and, at times, near the American Embassy. These demonstrations are usually peaceful and generally are not anti-American in nature. However, there have been demonstrations that voiced anti-American sentiments. American citizens should keep in mind that even demonstrations intended to be peaceful can turn confrontational and possibly escalate into violence. American citizens are therefore urged to avoid the areas of demonstrations if possible, and to exercise caution if within the vicinity of any demonstrations. For additional information, Americans are encouraged to check the U.S. Embassy web site at http://slovenia.usembassy.gov or call the Embassy at 386-1-200-5595 or 200-5599 (200-5556 after hours and on weekends/ holidays).

For the latest security information, Americans traveling abroad should regularly monitor the Department of State, Bureau of Consular Affair's

Internet site at http://travel.state.gov, where the current Travel Warnings and Travel Alerts, including the Worldwide Caution Travel Alert, can be found. Up-to-date information on security can also be obtained by calling 1-888-407-4747 toll free in the U.S., or, for callers outside the U.S. and Canada, a regular toll line at 1-202-501-4444.

Crime: Slovenia's overall crime rate is low and violent crimes are relatively uncommon. Most crimes tend to be non-violent and directed towards obtaining personal property, such as purse-snatching, pick-pocketing, and residential and vehicle break-ins. Visitors should take normal security precautions and are requested to report any incidents to the local police.

Vehicle break-in/theft is a continuous problem in Slovenia. Individuals should always lock vehicles, use vehicle anti-theft devices, park in well-lighted areas, and secure vehicles in residential or hotel garages.

Residential burglaries occur where there are security vulnerabilities and/or where residents are not implementing residential security practices. Recent burglary reports indicate access was gained when doors were not properly secured with an appropriate lock.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

Medical Facilities and Health Information: Adequate medical care is readily available. Travelers to Slovenia may obtain a list of English-speaking physicians at the U.S. Embassy or online at http://slovenia.usembassy.gov/medical_ass-istance.html. Antibiotics, as well as other American-equivalent prescription medications are available at local pharmacies. In Slovenia all medications, including drugs considered over-the–counter and first aid supplies, are dispensed through pharmacies ("lekarna"). For those persons who engage in outdoor activities, a vaccine to prevent tick-borne encephalitis is recommended. Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's web site at http://wwwn.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at www.who.int/en. Further health information for travelers is available at www.who.int/ith/en.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Slovenia is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

Slovenia has a well-developed road network that is safe for travel. Highways connect to neighboring cities and countries and are clearly signposted; road signs and traffic rules are consistent with those used throughout Europe. As the number of cars in Slovenia continues to rise, roads are becoming more heavily congested during the weekends on major routes and during rush hours. Parking is difficult and can be expensive in the center of Ljubljana. Traffic moves on the right. Third party liability insurance is required for all vehicles; coverage is purchased locally. Travelers should be alert to aggressive drivers both in cities and on highways. Many of the serious accidents in Slovenia occur as a result of high-speed driving. Emergency roadside help and information may be found by dialing 1-987 for vehicle assistance and towing services, 112 for an ambulance or fire brigade, and 113 for police. By Slovene law, the maximum legal blood-alcohol limit for drivers is 0.05.

U.S. visitors or U.S. residents in Slovenia must be in possession of both a valid U.S. driver's license and an International Driver's License in order to drive in Slovenia. International Driver's Licenses are valid for a maximum of one year, after which residents of Slovenia are required to obtain a Slovene driver's license. Note that applying for and obtaining a Slovene drivers license is far easier if undertaken during the first year of residence in Slovenia rather than after the first year has elapsed. Current information about traffic and road conditions is available in English by calling (01) 530-5300 and online at http://www.amzs.si/?jezik=1033.

The speed limit is 50kph/30 mph in urban areas, 130 kph/80 mph on expressways (the "avtocesta"). Motorists are required to have their headlights on during the daytime; drivers and passengers alike must wear seat belts; motorcyclists and their passengers must wear approved helmets. The use of handheld cellular telephones while driving is prohibited in Slovenia. For more specific information, visit the web site of Slovenia's national tourist office and national authority for road safety at http://www.slovenia-tourism.si.

Aviation Safety Oversight: As there is no direct commercial air service between the United States and Slovenia, the U.S. Federal Aviation

Administration (FAA) has not assessed Slovenia's Civil Aviation Authority for compliance with International Civil Aviation Organization (ICAO) aviation safety standards. For more information, travelers may visit the FAA's web site at http://www.faa.gov.

Special Circumstances: Slovenia became a member of the European Union in May 2004. Its customs regulations have been fully harmonized with those of the E.U.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating Slovenian laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Slovenia are strict and convicted offenders can expect jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in both Slovenia and the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in Sloveniaare encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration website so that they can obtain updated information on travel and security within Slovenia. Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate. By registering, American citizens make it easier for the Embassy to contact them in case of emergency. The U.S. Embassy is located at Presernova 31, Ljubljana 1000, Tel: (386)(1) 200-5500 or Fax: (386)(1) 200-5535. The Embassy's web site is http://slovenia.usembassy.gov.

Intercountry Adoption

December 2006

The adoption authority for Slovenia, the Ministry of Labor, Family and Social Affairs, has advised the U.S. Embassy in Ljubljana that Slovene law only permits intercountry adoption if no Slovene adoptive parents can be found. The number of Slovene adoptive parents waiting to adopt is very long as there are few children eligible for adoption.

SOLOMON ISLANDS

Compiled from the September 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Solomon Islands

PROFILE

Geography

Area: Land—27,556 sq. km. (11,599 sq. mi.). Archipelago—725,197 sq. km. (280,000 sq. mi.).
Cities: Capital—Honiara (on the island of Guadalcanal), pop. 54,600. Other towns—Gizo, Auki, Kirakira.
Terrain: Mountainous islands.
Climate: Tropical monsoon.

People

Nationality: Noun and adjective—Solomon Islander(s).
Population: (2006) 552,438.
Annual growth rate: 2.8%.
Ethnic groups: (2002) Melanesian 93%, Polynesian 4%, Micronesian 1.5%, other 1.5%.
Religions: Christian 95%—more than one-third Anglican (Archdiocese of Melanesia), Roman Catholic 19%, South Sea Evangelical 17%, United Church (Methodist) 11%, Seventh-day Adventist 10%.
Languages: English (official); about 120 vernaculars, including Solomon Islands pidgin.
Education: (2003) Years compulsory—none. Attendance—79.6% primary school; 14% secondary school. Adult literacy—76.6%.
Health: (2003) Infant mortality rate—19/1,000. Life expectancy—62.3 yrs.
Work force: (264,900, 2002) Agriculture—75%. Industry and commerce—5%. Services—20%.

Government

Type: Parliamentary democracy within the Commonwealth.
Constitution: May 1978.
Independence: July 7, 1978.
Government branches: Executive—British monarch represented by a governor general (head of state); prime minister (head of government). Legislative—50-member Parliament elected every 4 years. Judicial—high court plus magistrates court; system of custom land courts throughout islands.
Political subdivisions: Nine provinces and Honiara town.
Political parties: Association of Independent Members (AIM), People's Alliance Party (PAP), Socred, Rural Advancement Party (RAP), Lafari Party, Christian Alliance Party, Democratic Party, National Party, Liberal Party, Labor Party.
Suffrage: Universal over 18.
National holidays: July 7.

Economy

GDP: (December 2007) $270 million.
Annual growth rate: (December 2007) 10%.
Per capita income: (2005) $474.
Avg. inflation rate: (December 2007) 10%.
Natural resources: Forests, fish, agricultural land, marine products, gold.
Agriculture: Products—copra, cocoa, palm oil, palm kernels and subsistence crops of yams, taro, bananas, pineapple.
Industry: Types—fish canning, sawmilling, boats, rattan and wood furniture, fiberglass products, shell jewelry, tobacco, beer, clothing, soap, nails, handicrafts.
Trade: (2007) Exports—$432 million: timber, fish, cocoa, copra, palm oil. Major markets—China 28.2%, South Korea 15.7%, Thailand 15.7%, Japan 9.7%, Philippines 5.1%, Vietnam 3.1%. Imports—$614 million: mineral fuels, food, machinery and transport equipment, and basic manufactures. Major suppliers—Australia 25.3%, Singapore 23.8%, New Zealand 5.3%, India 4.8%, Japan 3.9%.
Exchange rate: (2005 average) Solomon Islands $1=about U.S.$0.13.

GEOGRAPHY

The Solomon Islands form an archipelago in the Southwest Pacific about 1,900 kilometers (1,200 mi.) northeast of Australia. With terrain ranging from ruggedly mountainous islands to low-lying coral atolls, the Solomon Islands stretch in a 1,450-kilometer (900 mi.) chain southeast

from Papua New Guinea across the Coral Sea to Vanuatu. The main islands of Choiseul, New Georgia, Santa Isabel, Guadalcanal, Malaita, and Makira have rainforested mountain ranges of mainly volcanic origin, deep narrow valleys, and coastal belts lined with coconut palms and ringed by reefs. The smaller islands are atolls and raised coral reefs, often spectacularly beautiful. The Solomon Islands region is geologically active, and earth tremors are frequent.

The islands' ocean-equatorial climate is extremely humid throughout the year, with a mean temperature of 27ºC (80ºF) and few extremes of temperature or weather. June through August is the cooler period. Though seasons are not pronounced, the northwesterly winds of November through April bring more frequent rainfall and occasional squalls or cyclones. The annual rainfall is about 305 centimeters (120 in.). More than 90% of the islands traditionally were forested, but this has come under severe pressure from current logging operations. The coastal strips are sheltered by mangrove and coconut trees. Luxuriant rainforest covers the interiors of the large islands. Soil quality ranges from extremely rich volcanic to relatively infertile limestone. More than 230 varieties of orchids and other tropical flowers brighten the landscape.

PEOPLE

The Solomon Islanders comprise diverse cultures, languages, and customs. Ninety-three percent are Melanesian, 4% Polynesian, and 1.5% Micronesian. In addition, small numbers of Europeans and Chinese are registered. About 120 vernacular languages are spoken.

Most people reside in small, widely dispersed settlements along the coasts. Sixty percent live in localities with fewer than 200 persons, and only 17% reside in urban areas.

The capital city of Honiara, situated on Guadalcanal, the largest island, has 54,600 inhabitants. The other principal towns are Gizo, Auki, and Kirakira. Most Solomon Islanders are Christian, with the Anglican, Roman Catholic, South Seas Evangelical, and Seventh-day Adventist faiths predominating. About 5% of the population maintains traditional beliefs.

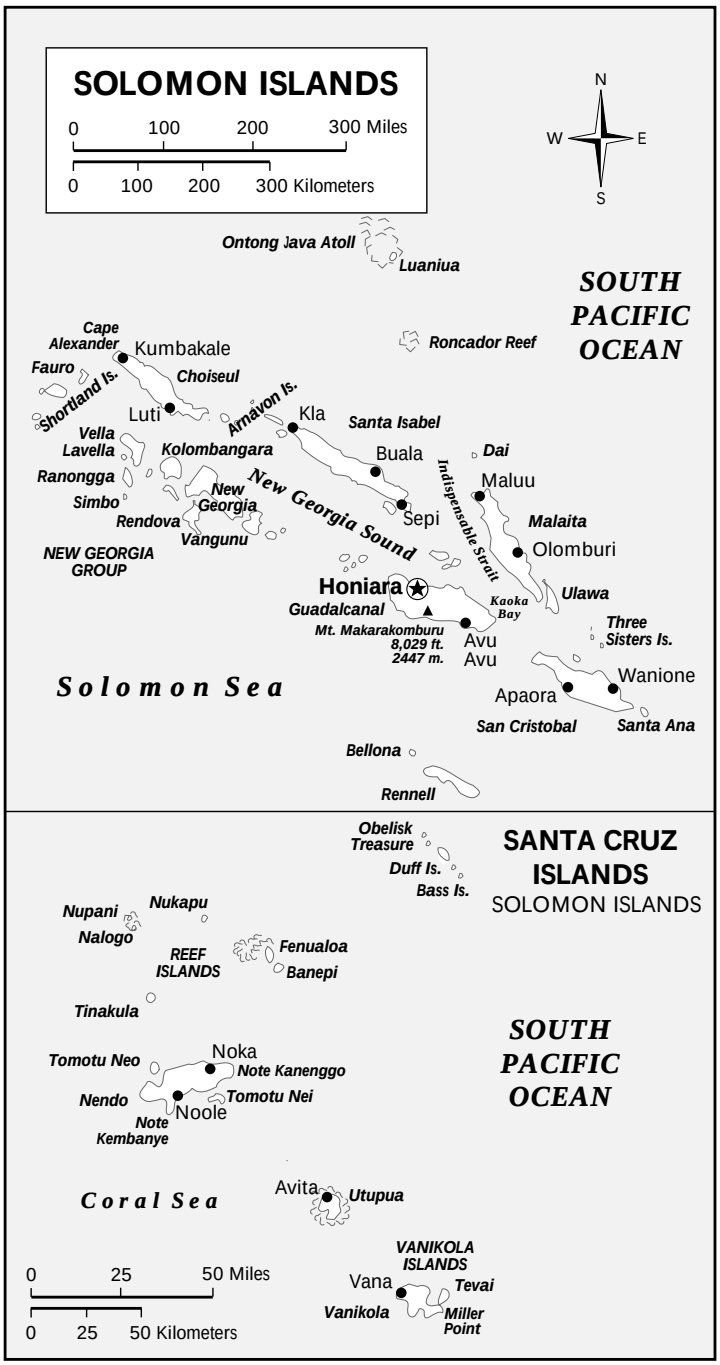
The chief characteristics of the traditional Melanesian social structure are:

- The practice of subsistence economy;
- The recognition of bonds of kinship, with important obligations extending beyond the immediate family group; local and clan loyalties far outweigh regional or national affiliations;
- Generally egalitarian relationships, emphasizing acquired rather than inherited status; and
- A strong attachment of the people to the land.

Most Solomon Islanders maintain this traditional social structure and find their roots in village life.

HISTORY

Although little prehistory of the Solomon Islands is known, material excavated on Santa Ana, Guadalcanal, and Gawa indicates that a hunter-gatherer people lived on the larger islands as early as 1000 B.C. Some Solomon Islanders are descendants of Neolithic Austronesian-speaking peoples who migrated from Southeast Asia.



The European discoverer of the Solomons was the Spanish explorer Alvaro de Mendana Y Neyra, who set out from Peru in 1567 to seek the legendary Isles of Solomon. British mariner Philip Carteret entered Solomon waters in 1767. In the years that followed, visits by explorers were more frequent. Missionaries began visiting the Solomons in the mid-1800s. They made little progress at first, because "blackbirding"—the often brutal recruitment of laborers for the sugar plantations in Queensland and Fiji—led to a series of reprisals and massacres. The evils of the labor trade prompted the United Kingdom to declare a protectorate over the southern Solomons in 1893. In 1898 and 1899, more outlying islands were added to the protectorate; in 1900 the remainder of the archipelago, an area previously under German jurisdiction, was transferred to British administration. Under the protectorate, missionaries settled in the Solomons, converting most of the population to Christianity.

In the early 20th century, several British and Australian firms began large-scale coconut planting. Economic growth was slow, however, and the islanders benefited little. With the outbreak of World War II, most planters and traders were evacuated to Australia, and most cultivation ceased.

From May 1942, when the Battle of the Coral Sea was fought, until December 1943, the Solomons were almost constantly a scene of combat. Although U.S. forces landed on Guadalcanal virtually unopposed in August 1942, they were soon engaged in a bloody fight for control of the islands' airstrip, which the U.S. forces named Henderson Field. One of the most furious sea battles ever fought took place off Savo Island, near Guadalcanal, also in August 1942. Before the Japanese completely withdrew from Guadalcanal in February 1943, over 7,000 Americans and 21,000 Japanese died. By December 1943, the Allies were in command of the entire Solomon chain. The large-scale American presence toward the end of the war, which dwarfed anything seen before in the islands, triggered various millennial movements and left a lasting legacy of friendship.

Postwar Developments

Following the end of World War II, the British colonial government returned. The capital was moved from Tulagi to Honiara to take advantage of the infrastructure left behind by the U.S. military. A native movement known as the Marching Rule defied government authority.

There was much disorder until some of the leaders were jailed in late 1948. Throughout the 1950s, other indigenous dissident groups appeared and disappeared without gaining strength. In 1960, an advisory council of Solomon Islanders was superseded by a legislative council, and an executive council was created as the protectorate's policymaking body. The council was given progressively more authority. In 1974, a new constitution was adopted establishing a parliamentary democracy and ministerial system of government. In mid-1975, the name Solomon Islands officially replaced that of British Solomon Islands Protectorate.

On January 2, 1976, the Solomons became self-governing, and independence followed on July 7, 1978.

GOVERNMENT

The Solomon Islands is a parliamentary democracy within the Commonwealth, with a unicameral Parliament and a ministerial system of government. The British monarch is represented by a governor general, chosen by the Parliament for a 5-year term. The national Parliament has 50 members, elected for 4-year terms. However, Parliament may be dissolved by majority vote of its members before the completion of its term. Parliamentary representation is based on single-member constituencies. Suffrage is universal for citizens over age 18. The prime minister, elected by Parliament, chooses the other members of the cabinet. Each ministry is headed by a cabinet member, who is assisted by a permanent secretary, a career public servant, who directs the staff of the ministry. For local government, the country is divided into 10 administrative areas, of which nine are provinces administered by elected provincial assemblies, and the 10th is the town of Honiara, administered by the Honiara Town Council.

Land ownership is reserved for Solomon Islanders. At the time of independence, citizenship was granted to all persons whose parents are or were both British protected persons and members of a group, tribe, or line indigenous to the Solomon Islands. The law provides that resident expatriates, such as the Chinese and Kiribati, may obtain citizenship through naturalization. Land generally is still held on a family or village basis and may be handed down from mother or father according to local custom. The islanders are reluctant to provide land for nontraditional economic undertakings, and this has resulted in continual disputes over land ownership. No military forces are maintained by the Solomon Islands, although the police force of nearly 500 includes a border protection element. The police also have responsibility for fire service, disaster relief, and maritime surveillance. The police force is headed by a commissioner, appointed by the Governor General and responsible to the

prime minister. Peter Marshall, a New Zealander, was appointed as police commissioner In May 2008.

POLITICAL CONDITIONS

Solomon Islands governments are characterized by weak political parties and highly unstable parliamentary coalitions. They are subject to frequent votes of no confidence, and government leadership changes frequently as a result. Cabinet changes are common.

The first post-independence government was elected in August 1980. Prime Minister Peter Kenilorea was head of government until September 1981, when he was succeeded by Solomon Mamaloni as the result of a realignment within the parliamentary coalitions. Following the November 1984 elections, Kenilorea was again elected Prime Minister, to be replaced in 1986 by his former deputy Ezekiel Alebua following shifts within the parliamentary coalitions. The next election, held in early 1989, returned Solomon Mamaloni as Prime Minister. Francis Billy Hilly was elected Prime Minister following the national elections in June 1993, and headed the government until November 1994 when a shift in parliamentary loyalties brought Solomon Mamaloni back to power.

The national election of August 6, 1997 resulted in Bartholomew Ulufa'alu's election as Prime Minister, heading a coalition government, which christened itself the Solomon Islands Alliance for Change. However, governance was slipping as the performance of the police and other government agencies deteriorated due to ethnic rivalries. The capital of Honiara on Guadalcanal was increasingly populated by migrants from the island of Malaita. In June 2000, an insurrection mounted by militants from the island of Malaita resulted in the brief detention of Ulufa'alu and his subsequent forced resignation. Manasseh Sogavare, leader of the People's Progressive Party, was chosen Prime Minister by a loose coalition of parties. Guadalcanal militants retaliated and sought to drive Malaitan settlers from Guadalcanal, resulting in the closure of a large oil-palm estate and gold mine which were vital to exports but whose workforce was largely Malaitan.

New elections in December 2001 brought Sir Allan Kemakeza into the Prime Minister's chair with the support of a coalition of parties. Kemakeza attempted to address the deteriorating law and order situation in the country, but the prevailing atmosphere of lawlessness, widespread extortion, and ineffective police prompted a formal request by the Solomon Islands Government for outside help. With the country bankrupt and the capital in chaos, the request was unanimously supported in Parliament.

The Regional Assistance Mission to the Solomon Islands (RAMSI), a multinational police-centered force organized by Australia, arrived in the country in 2003 at the government's invitation to assist in restoring law and order and rebuilding the country's institutions. The peace proved to be fragile, and fierce rioting occurred soon after the April 2006 general election and the election of Snyder Rini as Prime Minister in mid-April. Most of the violence was directed against businesses owned by ethnic Chinese in Honiara, with the almost complete destruction of the Chinatown commercial district. Mr. Rini resigned shortly after the riots, and a parliamentary vote saw Manasseh Sogavare elected as the new Prime Minister in May 2006. The civilian authorities generally maintained effective control of the security forces.

Relations between RAMSI and the Sogavare government were increasingly strained after the controversial July 2007 appointment of Julian Moti, wanted by Australia on child sex offense charges, as attorney general. On December 13, Prime Minister Manasseh Sogavare's coalition government lost a parliamentary vote of no confidence, and on December 20, Parliament elected Derek Sikua as Prime Minister. In December 2007 the Sikua government dismissed Moti and deported him to Australia. Australian Prime Minister Kevin Rudd's visit to the Solomon Islands in March 2008 began a new era of bilateral relations.

The Solomon Islands mission to the United Nations is located at 800 Second Avenue, Suite 400L, New York, NY 10017 (tel: 212-599-6192/93; fax: 212-661-8925).

ECONOMY

Its per capita GDP of $474 ranks Solomon Islands as a lesser developed nation, and more than 75% of its labor force is engaged in subsistence farming and fishing. Until 1998, when world prices for tropical timber fell steeply, timber was Solomon Islands main export product, and, in recent years, Solomon Islands forests were dangerously overexploited. Other important cash crops and exports include copra and palm oil. In 1998 Ross Mining of Australia began producing gold at Gold Ridge on Guadalcanal. Minerals exploration in other areas continued. However in the wake of the ethnic violence in June 2000, exports of palm oil and gold ceased while exports of timber fell. Exports are just now beginning to recover.

Exploitation of Solomon Islands' rich fisheries offers the best prospect for further export and domestic economic expansion. However, a Japanese joint venture, Solomon Taiyo Ltd., which operated the only fish cannery in the country, closed in mid-2000 as a result of the ethnic disturbances. Though the plant has reopened under local management, the export of tuna has not resumed. Negotiations are underway which may lead to the eventual reopening of the Gold Ridge mine and the major oil-palm plantation.

Tourism, particularly diving, is an important service industry for Solomon Islands. Growth in that industry is hampered, however, by political instability, security issues, lack of infrastructure, and transportation limitations.

Solomon Islands was particularly hard hit by the Asian economic crisis even before the ethnic violence of June 2000. The Asian Development Bank estimates that the crash of the market for tropical timber reduced Solomon Island's GDP by between 15%-25%. About one-half of all jobs in the timber industry were lost. The government has said it will reform timber harvesting policies with the aim of resuming logging on a more sustainable basis.

The Solomon Islands Government was insolvent by 2002. Since the RAMSI intervention in 2003, the government has recast its budget, and has taken a hard look at priorities. It has consolidated and renegotiated its domestic debt and with Australian backing, is now seeking to renegotiate its foreign obligations. Much work remains to be done. Ongoing political instability continues to negatively impact economic development.

Principal aid donors are Australia, New Zealand, the European Union, Japan, and the Republic of China.

FOREIGN RELATIONS

Countries with diplomatic missions in the Solomon Islands are Australia, United Kingdom, New Zealand, Papua New Guinea, and Japan. The Solomon Islands also has diplomatic relations with the Republic of China, which has a resident representative in Honiara.

The U.S. Ambassador resident in Port Moresby, Papua New Guinea is accredited to the Solomon Islands. The Solomon Islands' Permanent Representative to the United Nations also is accredited as its ambassador to the United States and Canada.

Relations with Papua New Guinea, which had become strained because of an influx of refugees from the Bougainville rebellion and attacks on the northern islands of the Solomon Islands by elements pursuing Bougainvillean rebels, have been repaired. A peace accord on Bougainville confirmed in 1998 has removed the armed threat, and the two nations regularized border operations in a 2004 agreement.

Relations with Australia, which plays a major role in the RAMSI mission, have been strained. The Solomon Islands Government declared the former Australian High Commissioner persona non grata, and delayed the credentialing of his replacement for several weeks.

Membership in International Organizations

Solomon Islands is a member of the United Nations, the Commonwealth, Pacific Community, Pacific Islands Forum (PIF), Melanesian Spearhead Group (MSG), International Monetary Fund, and the European Economic Community/African, Caribbean, Pacific Group (EEC/ACP)/ (Lome Convention).

U.S.-SOLOMON ISLANDS RELATIONS

The United States and Solomon Islands established diplomatic relations following its independence on July 7, 1978. U.S. representation is handled by the United States Embassy at Port Moresby where the Ambassador is resident. In recognition of the close ties forged between the United States and the people of the Solomon Islands during World War II, the U.S. Congress financed the construction of the Solomon Islands Parliament building. There are approximately 95 American citizens residing permanently in Solomon Islands. The two nations belong to a variety of regional organizations, including the Pacific Community and the Pacific Regional Environmental Program. The United States and Solomon Islands also cooperate under the U.S.-Pacific Islands multilateral Tuna Fisheries Treaty, under which the U.S. grants $18 million per year to Pacific island parties and the latter provide access to U.S. fishing vessels.

The U.S. coast guard provides training to Solomon Islands border protection officers, and the U.S. military also provides appropriate military

education and training courses to national security officials. The U.S. Peace Corps suspended its program in June 2000 due to the ethnic violence and breakdown in governance. More than 70 volunteers, serving throughout the country in rural community development, education, environmental management, and youth programs, were evacuated. U.S. trade with Solomon Islands is very limited. In 2001 U.S. exports to Solomon Islands were less than 5% of all exports, while Solomon Islands exports to the United States in that year were negligible. Following the April 2, 2007 earthquake and tsunami, the United States provided $250,000 in humanitarian assistance grants and deployed the USNS Stockham with helicopter support to the affected area.

TRAVEL

Consular Information Sheet

August 13, 2008

Country Description: The Solomon Islands form an Archipelago in the southwest Pacific Ocean about 1,200 miles northeast of Australia. The capital, Honiara, is located on the Island of Guadalcanal. The Solomon Islands are a parliamentary democracy within the British Commonwealth. Tourism facilities are limited, particularly outside Honiara.

Entry Requirements: U.S. passport holders do not require visas to enter the Solomon Islands. Passports, onward/return tickets and proof of sufficient funds for the duration of stay are required. Visitor permits are granted upon arrival at Henderson International Airport in Honiara. Visitors may enter any number of times provided the total period in the Solomon Islands does not exceed 90 days in a 12-month period. Persons arriving on one-way airline tickets must have documentation stating their business, for example, a work permit if taking if taking up employment in the Solomon Islands. The Solomon Islands government strictly enforces immigration laws, and travelers may face fines and other penalties if they remain in the country beyond the authorized period of stay.

Persons arriving on yachts should visit the nearest immigration office to complete arrival forms for issuance of visitors' permits.

Travelers who plan to depart on a yacht should apply for a visitor's permit before their arrival in the Solomon Islands, to the Director of Immigration (via fax to the U.S. Consular Agent in Honiara at 677-27429). The application should state the traveler's arrival date, vessel name and registration details, vessel's arrival date, approximate time traveler will spend in the Solomon Islands, and it should request entry on a one-way (arrival only) airline ticket. The Director will issue a permit to be presented at airline check-in. If the traveler does not have this permit, she/he may be denied boarding.

For more information about entry requirements, travelers may contact the Solomon Islands Mission to the United Nations at 800 Second Avenue, Suite 8008, New York, NY 10017-4709; Tel: (212) 599-6192 or 6193. Travelers who anticipate the possibility of transiting or visiting Australia are advised to obtain an electronic travel authority (ETA) or visa for Australia before leaving the United States. An ETA may be obtained for a small service fee at http://www.eta.immi.gov.au. Airlines and many travel agents in the United States are also able to issue ETAs.

Safety and Security: Since July 24, 2003, the Regional Assistance Mission in the Solomon Islands (RAMSI), a coalition of Pacific Island states that includes military and police forces from Australia and several other Pacific Island nations, has helped the Solomon Islands improve law and order. The Solomon Islands government and the vast majority of its citizens have welcomed the intervention.

Relations between the Solomon Islands government and Australia and RAMSI are strained, resulting in increased racial tensions. Americans should be aware that the public does not distinguish between Australians and Americans. It is generally safe to walk alone during the day; however, walking alone at night is discouraged.

For the latest security information, Americans traveling abroad should regularly monitor the Department of State, Bureau of Consular Affairs' web site at http://travel.state.gov, where the current Travel Warnings and Travel Alerts, as well as the Worldwide Caution, can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S. and Canada, or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444. The U.S. Consular Agent in Honiara also has available up-to-date safety and security information at (677) 23426 and (677) 94731, or Fax (677) 27429.

Crime: Major crimes against travelers are uncommon, although incidences of theft, mugging, and extortion are increasing. Some 350 RAMSI Police are working alongside Royal Solomon Islands Police (RSIP) to respond to any situation requiring police. Lawlessness is increasing in

Honiara, mostly in the form of petty crime (theft and harassment for money). The isolated incidents of harassment of expatriates that have increased in Honiara since April 2006 are generally minor and associated with alcohol and fringe elements of the community. House and vehicle break-ins occur, with expatriates particularly targeted. Some recent episodes have involved violence and the use or threatened use of knives.

Gang-based criminal activity has increased in and around the Burns Creek area in East Honiara, and in the Borderline area, which is close to the Japanese memorial. It is not advisable to go alone to the Japanese memorial.

Americans should be aware that the public does not distinguish between Australians and Americans.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and to the nearest U.S. Consular Agent in Honiara, or the U.S. Embassy in Port Moresby, Papua New Guinea. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the U.S. Consular Agent or the U.S. Embassy for assistance. The Consular Agent or Embassy staff can, for example, assist you to find appropriate medical care, to contact family members or friends, and explain how funds may be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed. The local equivalent to the "911" emergency line in the Solomon Islands is: 999.

Other emergency numbers are:

Ambulance, Hospital —911
National Disaster—955
Fire—988

Medical Facilities and Health Information: Hospitals has deteriorated seriously, although it is expected to improve as the country's overall economic condition continues to improve. The nearest reliable medical facilities are in Australia or New Zealand. There is a hyperbaric recompression chamber in Honiara at the In-the-Zone Medical Centre, phone (677) 23485 or (677) 23482; however, medical conditions resulting from diving accidents may require medical evacuation to Australia or New Zealand. Serious medical conditions requiring hospitalization and/or medical evacuation to Australia, New Zealand or the United States can cost thousands of dollars. The incidence of malaria is high. Doctors and hospitals often expect immediate cash payment for health services.

Travelers who anticipate the possible need for medical treatment in Australia should obtain entry permission for Australia in advance. Entry permission for Australia can be granted by the Australian High Commission in Honiara, but it is easier to obtain it prior to leaving the United States (see section above on Entry/Exit Requirements).

Some HIV/AIDS entry restrictions exist for visitors to and foreign residents of Solomon Islands. Per Solomon Islands Immigration Act Cap 60, Section 4 (1) (d) and section 11, subsection (2), an immigration officer can bar a visitor from entering the country or deport an immigrant if he or she refuses to submit to an examination by a government medical officer after being required to do so.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's website at http://wwwn.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith/en.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerningthe Solomon Islandsis provided for general reference only, and may not be totally accurate in a particular location or circumstance.

Vehicular traffic in the Solomon Islands moves on the left. Paved roads are found only in and around Honiara, located on Guadalcanal Island. These two-lane paved roads are poorly marked and have many potholes. Roads are not well lit at night. The remaining roads in the Solomon Islands are made of coral or gravel, or are dirt tracks. Travelers must take care when driving off main roads to avoid trespassing on communal land. For information concerning the rental and operation of motor vehicles in the Solomon Islands, contact our Consular Agent in Honiara. For specific information concerning Solomon Islands driving permits, vehicle inspection, road tax and mandatory insurance, visit the Solomon Islands Department of Commerce web site at http://www.commerce.gov.sb.

Aviation Safety Oversight: As there is no direct commercial air service between the United States and the Solomon Islands, the U.S. Federal Aviation Administration (FAA) has not assessed the Solomon Islands' Civil Aviation Authority for compliance with International Civil Aviation Organization (ICAO) aviation safety standards. For more information, travelers may visit the FAA's web site at http://www.faa.gov.

Special Circumstances: The Solomon Islands' customs authorities enforce strict regulations concerning temporary importation into or export

from the Solomon Islands of items such as firearms and ammunition, sexually explicit material, and certain prescription drugs. Other items may be subject to quarantine regulations or import duty. The Solomon Islands' government prohibits the export of military artifacts from World War II. It is advisable to contact the Solomon Islands' Mission to the United Nations for specific information regarding customs requirements.

Disaster Preparedness: The Solomon Islands lie in the South Pacific cyclonic trajectory, and are vulnerable to earthquakes, volcanic eruptions, and sudden tidal movements. The Pacific cyclone season extends from November through March. General information regarding disaster preparedness is available via the Internet from the U.S. Federal Emergency Management Agency (FEMA) at http://www.fema.gov.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating the Solomon Islandslaws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession of, use of, or trafficking in illegal drugs in the Solomon Islands are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: There is no U.S. Embassy in the Solomon Islands. However, there is a U.S. Consular Agent in Honiara. The Consular Agent has general information and forms, such as passport applications, and can be contacted at the United States Consular Agency, Commonwealth Avenue, Point Cruz, telephone number is (677) 23426 or (677) 98367, cell number is (677) 94731, home number is (677) 22539; fax (677) 27429; e-mail keithieusa@solomon.com.sb or us_consular@solomon.com.sb. For additional information and to download forms, please visit our Virtual Embassy for the Solomon Islands at http://www.usvpp-solomonislands.org.

The U.S. Embassy in Papua New Guinea provides primary assistance for U.S. citizens in the Solomon Islands. The Embassy is located on Douglas Street, adjacent to the Bank of Papua New Guinea, in Port Moresby.

Use that address for courier service deliveries. The mailing address is PO Box 1492, Port Moresby, N.C.D. 121, Papua New Guinea; the telephone number is (675) 321-1455; after hours duty officer telephone number is (675) 683-7943; Fax (675) 321-1593. American citizens may submit consular inquiries via e-mail to ConsularPortMoresby@state.gov. The web site for the U.S. Embassy in Port Moresby is http://portmoresby.usembassy.gov.

Americans living or traveling in the Solomon Islands are encouraged to register with the U.S. Embassy in Port Moresby through the State Department's travel registration web site, and to visit the Consular Agency in Honiara to obtain updated information on travel and security within the Solomon Islands. Americans without Internet access may register directly with the Embassy or Consular Agency. By registering, American citizens make it easier for the Embassy to contact them in case of emergency.

Intercountry Adoption

October 2006

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is based on public sources and current understanding. Questions involving foreign and U.S. immigration laws and legal interpretation should be addressed respectively to qualified foreign or U.S. legal counsel.

Please Note: Solomon Islands law states that prospective adoptive parents who wish to adopt a child from the Solomon Islands MUST be domiciled in the Solomon Islands at the time of the adoption.

Patterns of Immigration: Recent U.S. immigrant visa statistics indicate that no orphans from the Solomon Islands have received an adoption-based immigrant visa in the past five years.

Adoption Authority: Adoptions are processed through the High Court of the Solomon Islands based on an application prepared by the prospective adoptive parents and a Home Study. The Home Study Report is prepared by the Social Welfare Department and is submitted to the High Court during the adoption application process.

Eligibility Requirements for Adoptive Parents: Prospective adoptive parents must be 25 years of age or older (or 21 years or older, if related to the child) and can be either single or married. Although there are no income requirements, prospective adoptive parents must satisfy the Social Welfare Office of the Solomon Islands that they are financially secure.

Residency Requirements: Prospective adoptive parents must be domiciled in the Solomon Islands. The child has to have lived with the prospective adoptive parents for three months before the adoption

may be finalized. Also, prospective adoptive parents cannot apply to the court for an adoption order before the child has attained the age of six weeks.

Time Frame: The estimated time for an adoption to be processed is at least four to five months.

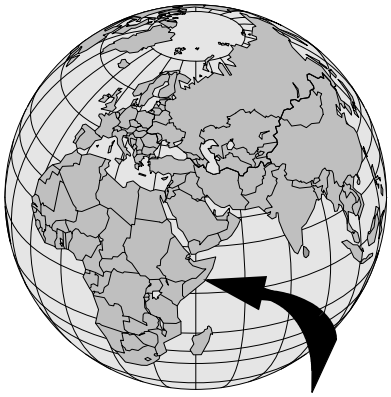
Adoption Agencies and Attorneys: There are no adoption agencies in the Solomon Islands. However, American prospective adoptive parents may still wish to enlist the services of an American adoption agency to assist them with the overall intercountry adoption process.

Adoption Fees: American prospective adoptive parents should expect to pay adoption-related fees of less than $300 to the Solomon Islands government. It may or may not be necessary for prospective parents to pay additional fees to lawyers, depending on the services rendered.

Adoption Procedures: Applications for adoption are obtained from private attorneys in the Solomon Islands. The completed dossiers are then sent to the High Court with a notice to the Provincial Secretary.

Prospective adoptive parents must also submit to an interview with a Social Welfare Officer. The Social Welfare Office will perform a Home Study and a Home Study report will be submitted to the High Court. In addition, the birth mother of the child must sign a consent form no earlier than six weeks after the child's birth allowing for adoption of the child. The Social Welfare Office will obtain the birth mother's written consent to adopt.

Required Documents: When submitted to the Solomon Islands authorities, the adoption dossier must contain:



- A completed adoption application,
- Birth Certificate,
- Medical Reports (for both the child and the prospective adoptive parents),
- Home Study,
- Bank Statements of prospective adopting parents,
- Marriage License, if applicable.

Permanent Representative of Solomon Islands to the United Nations
800 Second Avenue,
Suite 400L,
New York, NY 10017-4709
Tel: (212) 599-6192/6193,
Fax: (212) 661-8925

U.S. Immigration Requirements: Prospective adopting parents are strongly encouraged to consult USCIS publication M-249, *The Immigration of Adopted and Prospective Adoptive Children*, as well as the Department of State publication, *Intercountry Adoptions*. Please see the *Intercountry Adoption* section of this book for more details and review current reports online at http://adoption.state.gov.

U.S. Embassy, Port Moresby, Papua New Guinea
Douglas Street,
P.O. Box 1492,
Port Moresby, N.C.D. 121,
Papua New Guinea
Telephone: (675) 321-1455;
Fax: (675) 321-1593.
E-mail:
ConsularPortMoresby@state.gov.

Additional Information: Specific questions about adoption in the Solomon Islands may be addressed to the U.S. Embassy in Port Moresby, Papua New Guinea, via the contact information listed above. General questions regarding intercountry adoption may be addressed to the Office of Children's Issues, U.S. Department of State, CA/OCS/CI, SA-29, 4th Floor, 2201 C Street, NW, Washington, D.C. 20520-4818, toll-free Tel: 1-888-407-4747.

SOMALIA

Compiled from the November 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Somalia

NOTE: There is no official U.S. representation in Somalia. Statistical data on Somalia in this report are subject to dispute and error.

PROFILE

Geography

Area: 637,657 sq. km.; slightly smaller than Texas.

Cities: Capital—Mogadishu. Other cities—Beledweyne, Kismayo, Baidoa, Jowhar, Merca, Gaalkayo, Bosasso, Hargeisa, Berbera.

Terrain: Mostly flat to undulating plateau rising to hills in the north.

Climate: Principally desert; December to February—northeast monsoon, moderate temperatures in north, and very hot in the south; May to October—southwest monsoon, torrid in the north, and hot in the south; irregular rainfall; hot and humid periods (tangambili) between monsoons.

People

Nationality: Noun—Somali(s). Adjective—Somali.

Population: (2006 est., no census exists) 8.8 million (of which an estimated 2 million in Somaliland).

Annual growth rate: (2006 est.) 2.85%.

Ethnic groups: Somali, with a small non-Somali minority (mostly Bantu and Arabs).

Religions: 99.9% Muslim.

Languages: Somali (official), Arabic, Italian, English.

Education: Literacy—total population that can read and write, 37.8%: male 49.7%; female 25.8%.

Health: Infant mortality rate—114.9/1,000 live births. Life expectancy at birth—total population: 48.7 yrs.

Work force: (3.7 million; very few are skilled workers) Pastoral nomad—60%. Agriculture, government, trading, fishing, industry, handicrafts, and other—40%.

Government

Type: Transitional government, known as the Transitional Federal Government, established in October 2004 with a 5-year mandate leading to the establishment of a permanent government following national elections in 2009.

Independence: July 1, 1960 (from a merger between the former Somaliland Protectorate under British rule, which became independent from the U.K. on June 26, 1960, and Italian Somaliland, which became independent from the Italian-administered UN trusteeship on July 1, 1960, to form the Somali Republic).

Constitution: None in force. Note: A Transitional Federal Charter was established in February 2004 and is expected to serve as the basis for a future constitution in Somalia. In August 2004, the Somali Transitional Federal Assembly (TFA) was established as part of the IGAD-led Somalia National Reconciliation Conference in accordance with the Charter. The Somalia National Reconciliation Conference concluded following the election of a Transitional President in October 2004.

Government branches: Executive—On October 10, 2004, Abdullahi Yusuf Ahmed was elected Transitional Federal President of Somalia for a five-year period. On October 29, 2007, Ali Mohamed Gedi resigned as Prime Minister of the Transitional Federal Government. On November 22, 2007, President Yusuf appointed Nur "Adde" Hassan Hussein as the new Prime Minister of the Transitional Federal Government. A cabinet, known as the Council of Ministers, also exists. Legislative—parliamentary: Transitional Federal Assembly, established in August 2004. Sheikh Adan Mohamed Nur was elected Speaker of the Assembly on January 31, 2007. Judicial—Supreme Court not functioning; no functioning nationwide legal system; informal legal system based on previously codified law, Islamic (shari'a) law, customary practices, and the provisions of the Transitional Federal Charter.

Political parties: None.

Note: In 1991, a congress drawn from the inhabitants of the former Somaliland Protectorate declared withdrawal from the 1960 union with Somalia to form the self-declared

Republic of Somaliland. Somaliland has not received international recognition, but has maintained a de jure separate status since that time. Its form of government is republican, with a bicameral legislature including an elected elders chamber and a house of representatives.

The judiciary is independent, and various political parties exist. In line with the Somaliland Constitution, Vice President Dahir Riyale Kahin assumed the presidency following the death of former president Mohamed Ibrahim Egal in 2002.

Kahin was elected President of Somaliland in elections determined to be free and fair by international observers in May 2003.

Elections for the 84-member lower house of parliament took place on September 29, 2005 and were described as transparent and credible by international observers.

Suffrage: 18 years of age; universal (no nationwide elections).

Political subdivisions: 18 regions (plural—NA; singular—Gobolka). Awdal, Bakool, Banaadir, Bari, Bay, Galguduud, Gedo, Hiraan, Jubbada Dhexe, Jubbada Hoose, Mudug, Nugaal, Sanaag, Shabeellaha Dhexe, Shabeellah Hoose, Sool, Togdheer, Woqooyi Galbeed.

Budget: N/A.

Defense: N/A.

National holidays: July 1 (June 26 in Somaliland).

Economy

GDP: (2005 est.) U.S. $4.809 billion.

Annual growth rate: (2005 est.) 2.4%.

Per capita GDP: (2005 est.) $600.

Avg. inflation rate: N/A.

Natural resources: Largely unexploited reserves of iron ore, tin, gypsum, bauxite, uranium, copper, and salt; likely petroleum and natural gas reserves.

Agriculture: Products—livestock, fish, bananas, corn, sorghum, sugar. Arable land—13%, of which 2% is cultivated.

Industry: Types—Telecommunications, livestock, fishing, textiles, transportation, and limited financial services.

Somalia's surprisingly innovative private sector has continued to function despite the lack of a functioning central government since 1991.

Trade: Exports—$241 million (f.o.b., 2004 est.) livestock, bananas, hides, fish, charcoal, scrap metal. Major markets—United Arab Emirates, Yemen, Oman. Imports—$576 million (f.o.b., 2004 est.) food grains, animal and vegetable oils, petroleum products, construction materials, manufactured products, qat. Major suppliers—Djibouti, Kenya, Brazil, India, United Arab Emirates, Oman.

Aid disbursed: N/A. Primary aid donors—United States, European Union, Australia, Canada, Denmark, France, Germany, Italy, Japan, Netherlands, Norway, Sweden, Switzerland, United Kingdom.

Remittances: (2006 est.) $800 million to $1 billion.

GEOGRAPHY

Somalia is located on the east coast of Africa on and north of the Equator and, with Ethiopia, Eritrea, Djibouti, and Kenya, is often referred to as the Horn of Africa. It comprises Italy's former Trust Territory of Somalia and the former British Protectorate of Somaliland (now seeking recognition as an independent state). The coastline extends 2,720 kilometers (1,700 mi.).

The northern part of the country is hilly, and in many places the altitude ranges between 900 and 2,100 meters (3,000 ft.-7,000 ft.) above sea level. The central and southern areas are flat, with an average altitude of less than 180 meters (600 ft.). The Juba and the Shabelle Rivers rise in Ethiopia and flow south across the country toward the Indian Ocean. The Shabelle, however, does not reach the sea.

Major climatic factors are a year-round hot climate, seasonal monsoon winds, and irregular rainfall with recurring droughts. Mean daily maximum temperatures range from 30ºC to 40ºC (85o F-105ºF), except at higher elevations and along the east coast. Mean daily minimums usually vary from about 15ºC to 30ºC (60ºF-85ºF). The southwest monsoon, a sea breeze, makes the period from about May to October the mildest season in Somalia. The December-February period of the northeast monsoon also is relatively mild, although prevailing climatic conditions in Somalia are rarely pleasant. The "tangambili" periods that intervene between the two rainy seasons (October-November and March-May) are hot and humid.

PEOPLE

The Cushitic populations of the Somali Coast in the Horn of Africa have an ancient history. Known by ancient Arabs as the Berberi, archaeological evidence indicates their presence in the Horn of Africa by A.D. 100 and possibly earlier. As early as the seventh century A.D., the indigenous Cushitic peoples began to mingle with Arab and Persian traders who had settled along the coast. Interaction over the centuries led to the emergence of a Somali culture bound by common traditions, a single language, and the Islamic faith.

The Somali-populated region of the Horn of Africa stretches from the Gulf of Tadjoura in modern-day Djibouti through Dire Dawa, Ethiopia, and down to the coastal regions of southern Kenya. Unlike many countries in Africa, the Somali nation extends beyond its national borders. Since gaining independence in 1960, the goal of Somali nationalism, also known as Pan-Somalism, has been the unification of all Somali populations, forming a Greater Somalia. This issue has been a major cause of past crises between Somalia and its neighbors—Ethiopia, Kenya, and Djibouti.

Today, about 60% of all Somalis are nomadic or semi-nomadic pastoralists who raise cattle, camels, sheep, and goats. About 25% of the population is settled farmers who live mainly in the fertile agricultural zone between the Juba and Shabelle Rivers in southern Somalia. The remainder of the population (15%-20%) is urban.

Sizable ethnic groups in the country include Bantu agricultural workers, several thousand Arabs and some hundreds of Indians and Pakistanis. Nearly all inhabitants speak the Somali language, which remained unwritten until October 1973, when the Supreme Revolutionary Council (SRC) proclaimed it the nation's official language and decreed an orthography using Latin letters. Somali is now the language of instruction in schools, although Arabic, English, and Italian also are used extensively.

HISTORY

Early history traces the development of the Somali state to an Arab sultanate, which was founded in the seventh century A.D. by Koreishite immigrants from Yemen. During the 15th and 16th centuries, Portuguese traders landed in present Somali territory and ruled several coastal towns. The sultan of Oman and Zanzibar subsequently took control of these towns and their surrounding territory.

Somalia's modern history began in the late 19th century, when various European powers began to trade and establish themselves in the area. The British East India Company's desire for unrestricted harbor facilities led to the conclusion of treaties with the sultan of Tajura as early as 1840. It was not until 1886, however, that the British gained control over northern Somalia through treaties with various Somali chiefs who were guaranteed British protection. British objectives centered on safeguarding trade links to the east and securing

local sources of food and provisions for its coaling station in Aden. The boundary between Ethiopia and British Somaliland was established in 1897 through treaty negotiations between British negotiators and King Menelik.

During the first two decades of this century, British rule was challenged through persistent attacks by a dervish rebellion led by Mohamed Abdullah, known as the "Mad Mullah" by the British. A long series of intermittent engagements and truces ended in 1920 when British warplanes bombed Abdullah's stronghold at Taleex. Although Abdullah was defeated as much by rival Somali factions as by British forces, he was lauded as a popular hero and stands as a major figure of national identity to many Somalis.

In 1885, Italy obtained commercial advantages in the area from the sultan of Zanzibar and in 1889 concluded agreements with the sultans of Obbia and Aluula, who placed their territories under Italy's protection. Between 1897 and 1908, Italy made agreements with the Ethiopians and the British that marked out the boundaries of Italian Somaliland. The Italian Government assumed direct administration, giving the territory colonial status.

Italian occupation gradually extended inland. In 1924, the Jubaland Province of Kenya, including the town and port of Kismayo, was ceded to Italy by the United Kingdom. The subjugation and occupation of the independent sultanates of Obbia and Mijertein, begun in 1925, were completed in 1927. In the late 1920s, Italian and Somali influence expanded into the Ogaden region of eastern Ethiopia. Continuing incursions climaxed in 1935 when Italian forces launched an offensive that led to the capture of Addis Ababa and the Italian annexation of Ethiopia in 1936.

Following Italy's declaration of war on the United Kingdom in June 1940, Italian troops overran British Somaliland and drove out the British garrison. In 1941, British forces began operations against the Italian East African Empire and quickly brought the greater part of Italian Somaliland under British control. From 1941 to 1950, while Somalia was under British military administration, transition toward self-government was begun through the establishment of local courts, planning committees, and the Protectorate Advisory Council. In 1948 Britain turned the Ogaden and neighboring Somali territories over to Ethiopia.

In Article 23 of the 1947 peace treaty, Italy renounced all rights and titles to Italian Somaliland. In accordance with treaty stipulations, on September 15, 1948, the Four Powers referred the question of disposal of former Italian colonies to the UN General Assembly. On November 21, 1949, the General Assembly adopted a resolution recommending that Italian Somaliland be placed under an international trusteeship system for 10 years, with Italy as the administering authority, followed by independence for Italian Somaliland. In 1959, at the request of the Somali Government, the UN General Assembly advanced the date of independence from December 2 to July 1, 1960.

Meanwhile, rapid progress toward self-government was being made in British Somaliland. Elections for the Legislative Assembly were held in February 1960, and one of the first acts of the new legislature was to request that the United Kingdom grant the area independence so that it could be united with Italian Somaliland when the latter became independent. The protectorate became independent on June 26, 1960; five days later, on July 1, it joined Italian Somaliland to form the Somali Republic.

In June 1961, Somalia adopted its first national constitution in a countrywide referendum, which provided for a democratic state with a parliamentary form of government based on European models. During the early post-independence period, political parties were a fluid concept, with one-person political parties forming before an election, only to defect to the winning party following the election. A constitutional conference in Mogadishu in April 1960, which made the system of government in the southern Somali trust territory the basis for the future government structure of the Somali Republic, resulted in the concentration of political power in the former Italian Somalia capital of Mogadishu and a southern-dominated central government, with most key government positions occupied by southern Somalis, producing increased disenchantment with the union in the former British-controlled north. Pan-Somali nationalism, with the goal of uniting the Somali-populated regions of French Somaliland (Djibouti), Kenya and Ethiopia into a Greater Somalia, remained the driving political ideology in the initial post-independence period.

Under the leadership of Mohamed Ibrahim Egal (prime minister from 1967 to 1969), however, Somalia renounced its claims to the Somali-populated regions of Ethiopia and Kenya, greatly improving its relations with both countries. Egal attempted a similar approach with Ethiopia, but the move towards reconciliation with Ethiopia, which had been a traditional enemy of Somalia since the 16th century, made many Somalis furious, including the army. Egal's reconciliation effort toward Ethiopia is argued to be one of the principal factors that provoked a bloodless coup on October 21, 1969 and subsequent installation of Maj. Gen. Mohamed Siad Barre as president, bringing an abrupt end to the process of party-based constitutional democracy in Somalia.

Following the coup, executive and legislative power was vested in the 20-member Supreme Revolutionary Council (SRC), headed by Barre. The SRC pursued a course of "scientific socialism" that reflected both ideological and economic dependence on the Soviet Union. The government instituted a national security service, centralized control over information, and initiated a number of grassroots development projects. Barre reduced political freedoms and used military force to seize and redistribute rich farmlands in the interriverine areas of southern Somalia, relying on the

use of force and terror against the Somali population to consolidate his political power base.

The SRC became increasingly radical in foreign affairs, and in 1974, Somalia and the Soviet Union concluded a treaty of friendship and cooperation. As early as 1972, tensions began increasing along the Somali-Ethiopian border; these tensions heightened after the accession to power in Ethiopia in 1973 of the Mengistu Haile Mariam regime, which turned increasingly toward the Soviet Union. In the mid-1970s, the Western Somali Liberation Front (WSLF) began guerrilla operations in the Ogaden region of Ethiopia. Following the overthrow of the Ethiopian Emperor in 1975, Somalia invaded Ethiopia in 1977 in a second attempt to regain the Ogaden, and the second attempt initially appeared to be in Somalia's favor. The SNA moved quickly toward Harer, Jijiga, and Dire Dawa, the principal cities of the region. However, following the Ethiopian revolution, the new Ethiopian government shifted its alliance from the West to the Soviet Union, and the Soviet Union supplied Ethiopia with 10,000-15,000 Cuban troops and Soviet military advisors during the 1977-78 Ogaden war, shifting the advantage to Ethiopia and resulting in Somalia's defeat. In November 1977, Barre expelled all Soviet advisers and abrogated the friendship agreement with the U.S.S.R. In March 1978, Somali forces retreated into Somalia; however, the WSLF continued to carry out sporadic but greatly reduced guerrilla activity in the Ogaden. Such activities also were subsequently undertaken by another dissident group, the Ogaden National Liberation Front (ONLF).

Following the 1977-1978 Ogaden war, desperate to find a strong external alliance to replace the Soviet Union, Somalia abandoned its Socialist ideology and turned to the West for international support, military equipment, and economic aid. In 1978, the United States reopened the U.S. Agency for International Development mission in Somalia. Two years later, an agreement was concluded that gave U.S. forces access to military facilities at the port of Berbera in northwestern Somalia. In the summer of 1982, Ethiopian forces invaded Somalia along the central border, and the United States provided two emergency airlifts to help Somalia defend its territorial integrity. From 1982 to 1988, the United States viewed Somalia as a partner in defense in the context of the Cold War. Somali officers of the National Armed Forces were trained in U.S. military schools in civilian as well as military subjects.

Following the Ogaden war, the Barre regime violently suppressed opposition movements and ethnic groups, particularly the Isaaq clan in the northern region, using the military and elite security forces to quash any hint of rebellion. By the 1980s, an all-out civil war developed in Somalia. Opposition groups began to form following the end of the Ogaden war, beginning in 1979 with a group of dissatisfied army officers known as the Somali Salvation Democratic Front (SSDF). In 1981, as a result of increased northern discontent with the Barre regime, the Somali National Movement (SNM), composed mainly of the Isaaq clan, was formed in Hargeisa with the stated goal of overthrowing of the Barre regime. In January 1989, the United Somali Congress (USC), an opposition group of Somalis from the Hawiye clan, was formed as a political movement in Rome. A military wing of the USC was formed in Ethiopia in late 1989 under the leadership of Mohamed Farah "Aideed," a former political prisoner imprisoned by Barre from 1969-75. Aideed also formed alliances with other opposition groups, including the SNM and the Somali Patriotic Movement (SPM), an Ogadeen sub-clan force under Colonel Ahmed Omar Jess in the Bakool and Bay regions of Southern Somalia. In 1988, at the President's order, aircraft from the Somali National Air Force bombed the city of Hargeisa in northwestern Somalia, the former capital of British Somaliland, killing nearly 10,000 civilians and insurgents. The warfare in the northwest sped up the decay already evident elsewhere in the republic. Economic crisis, brought on by the cost of anti-insurgency activities, caused further hardship as Siad Barre and his cronies looted the national treasury.

By the end of the 1980s, armed opposition to Barre's government, fully operational in the northern regions, had spread to the central and southern regions. Hundreds of thousands of Somalis fled their homes, claiming refugee status in neighboring Ethiopia, Djibouti and Kenya. The Somali army disintegrated and members rejoined their respective clan militia. Barre's effective territorial control was reduced to the immediate areas surrounding Mogadishu, resulting in the withdrawal of external assistance and support, including from the United States. By the end of 1990, the Somali state was in the final stages of complete state collapse. In the first week of December 1990, Barre declared a state of emergency as USC and SNM forces advanced toward Mogadishu. In January 1991, armed opposition factions drove Barre out of power, resulting in the complete collapse of the central government. Barre later died in exile in Nigeria. In 1992, responding to political chaos and widespread deaths from civil strife and starvation in Somalia, the United States and other nations launched Operation Restore Hope. Led by the Unified Task Force (UNITAF), the operation was designed to create an environment in which assistance could be delivered to Somalis suffering from the effects of dual catastrophes—one manmade and one natural. UNITAF was followed by the United Nations Operation in Somalia (UNOSOM). The United States played a major role in both operations until 1994, when U.S. forces withdrew.

Following the collapse of the Barre regime in 1991, various groupings of Somali factions sought to control the national territory (or portions thereof) and fought small wars with one another. Approximately 14 national reconciliation conferences were convened over the succeeding decade. Efforts at mediation of the Somali internal dispute were also undertaken by many regional states. In the mid-1990s, Ethiopia played

host to several Somali peace conferences and initiated talks at the Ethiopian city of Sodere, which led to some degree of agreement between competing factions. The Governments of Egypt, Yemen, Kenya, and Italy also have attempted to bring the Somali factions together. In 1997, the Organization of African Unity and the Intergovernmental Authority on Development (IGAD) gave Ethiopia the mandate to pursue Somali reconciliation. In 2000, Djibouti hosted a major reconciliation conference (the 13th such effort), which in August resulted in creation of the Transitional National Government (TNG), whose 3-year mandate expired in August 2003. The absence of a central government in Somalia also allowed outside forces to become more influential by supporting various groups and persons in Somalia, particularly Djibouti, Eritrea, Ethiopia, Egypt, Yemen, and Libya, all of which have supported various Somali factions and transitional governments.

GOVERNMENT

A transitional government, the components of which are known as the Transitional Federal Institutions (TFIs) was formed in 2004 following the conclusion of a 2-year reconciliation conference. The TFIs include a transitional parliament, known as the Transitional Federal Assembly (formed in August 2004), as well as a Transitional Federal Government (TFG) that includes a transitional President, Prime Minister and a cabinet known as the "Council of Ministers." For administrative purposes, Somalia is divided into 18 regions; the nature, authority, and structure of regional governments vary, where they exist.

Abdullahi Yusuf Ahmed was elected as Transitional Federal President of Somalia in October 2004. On October 29, 2007, Ali Mohamed Gedi resigned as Prime Minister of the TFG; Nur "Adde" Hassan Hussein was appointed Prime Minister on November 22 and confirmed by the Parliament on November 24, 2007. Following a no-confidence motion against former Speaker of Parliament Shariff Hassan Sheikh Adan on January 17, Sheikh Adan Mohamed Nur was elected the new Speaker on January 31, 2007. A cabinet known as the Council of Ministers also exists; a new cabinet of 15 ministers was appointed on January 8, 2008 and approved by Parliament on January 11, 2008.

Principal Government Officials

Last Updated: 11/12/08

Pres.: **Abdullahi YUSUF Ahmed**

Prime Min.: **Nur HASSAN Hussein**

Dep. Prime Min.: **SALIM Aliyow Ibrow**

Dep. Prime Min.: **Aydid Abdullahi Ilka HANAF**

Dep. Prime Min.: **Ahmad ABDISALAM**

Min. of Agriculture, Water, & Urban Development: **Mustafa Ali DHUHULOW**

Min. of Air & Land Transport: **Mohamed Ibrahim Mohamed HABSADE**

Min. of Defense: **MUHYADIN Muhammad Ali Ibrahim**

Min. of Education & Culture: **Aydid Abdullahi Ilka HANAF**

Min. of Finance & Planning: **Muhammad Ali HAMUD**

Min. of Foreign Affairs & Intl. Cooperation: **Ali Ahmed JAMA Jangeli**

Min. of Information & Youth: **Ahmad ABDISALAM**

Min. of Internal Affairs & National Security: **MUSE Nur Amin**

Min. of Justice & Religious Affairs: **SALIM Aliyow Ibrow**

Min. of Minerals & Energy: **Muhammad Ali SALAH**

Min. of Posts & Communications: **ABDI MOHAMED Tarrah**

Min. of Public Works & Construction: **Nur Idow BEYLE**

Min. of Regional Development, Federal Affairs, & Reconciliation: **ABDIRIZAL Ashkir Abdi**

Min. of Trade, Industry, & Tourism: **Hussein Elabe FAHIYE**

Min. of Gender Development & Family Affairs: **Khadija Muhammad DIRIYE**

Governor, Central Bank:

Permanent Representative to the UN, New York: **Elmi Ahmed DUALE**

POLITICAL CONDITIONS

In early 2002, Kenya organized a reconciliation effort under IGAD auspices known as the Somalia National Reconciliation Conference, which concluded in October 2004. In August 2004, the Somali Transitional Federal Assembly (TFA) was established as part of the IGAD-led process. Abdullahi Yusuf Ahmed was elected President of the Transitional Federal Government (TFG) of Somalia on October 10, 2004. The components of the TFG, including the Parliament and Executive, are known as the Transitional Federal Institutions (TFIs).

Two regional administrations exist in northern Somalia—the self-declared "Republic of Somaliland" in the northwest and the semi-autonomous region of Puntland in the northeast. In Somaliland, which is made up of the former British protectorate, Dahir Riyale Kahin was elected President in presidential elections deemed free and fair by international observers in May 2003. The area of Puntland declared itself autonomous (although not independent) in 1998 with its capital at Garowe. General Mohamed Adde Muse was elected President by the Puntland parliament in January 2005. Puntland declared it would remain autonomous until a federated Somalia state was established.

ECONOMY

Somalia lacks natural resources and faces major development challenges, and recent economic reverses have left its people increasingly dependent on remittances from abroad. Its economy is pastoral and agricultural, with livestock—principally camels, cattle, sheep, and goats—representing the main form of wealth. Livestock exports in recent years have been severely reduced by periodic bans, ostensibly for concerns of animal health, by Arabian Peninsula states. Drought has also impaired agricultural and livestock production.

Because rainfall is scanty and irregular, farming generally is limited to certain coastal districts, areas near Hargeisa, and the Juba and Shabelle River valleys. The agricultural sector of the economy consists mainly of banana plantations located in the south, which has used modern irrigation systems and up-to-date farm machinery.

A small fishing industry exists in the north where tuna, shark, and other warm-water fish are caught, although fishing production is seriously affected by poaching. Aromatic woods—frankincense and myrrh—from a small and diminishing forest also contribute to the country's exports. Minerals, including uranium and likely deposits of petroleum and natural gas, are found throughout the country, but have not been exploited commercially. Petroleum exploration efforts have ceased due to insecurity and instability. Illegal production in the south of charcoal for export has led to widespread deforestation. With the help of foreign aid, small industries such as textiles, handicrafts, meat processing, and printing are being established. The absence of central government authority, as well as profiteering from counterfeiting, has rapidly debased Somalia's currency. By the spring of 2002, the Somali shilling had fallen to over 30,000 shillings to the U.S. dollar. The self-declared Republic of Somaliland issues its own currency, the Somaliland shilling, which is not accepted outside of the self-declared republic.

There are no railways in Somalia; internal transportation is by truck and bus. The national road system nominally comprises 22,100 kilometers (13,702 mi.) of roads that include about 2,600 kilometers (1,612 mi.) of all-weather roads, although most roads have received little maintenance for years and have seriously deteriorated.

Air transportation is provided by small air charter firms and craft used by drug smugglers. A number of airlines operate from Hargeisa. Some private airlines, including Daallo Airlines, serve several domestic locations as well as Djibouti and the United Arab Emirates. The UN and other NGOs operate air service for their missions.

The European Community and the World Bank jointly financed construction of a deepwater port at Mogadishu (currently closed). The Soviet Union improved Somalia's deepwater port at Berbera in 1969. Facilities at Berbera were further improved by a U.S. military construction program completed in 1985, but they have since become dilapidated. During the 1990s the United States renovated a deepwater port at Kismayo that serves the fertile Juba River basin and is vital to Somalia's banana export industry. Smaller ports are located at Merca, Brava, and Bossaso. Absence of security and lack of maintenance and improvement are major issues at most Somali ports.

Radiotelephone service is available to both to regional and international locations. The public telecommunications system has been destroyed or dismantled, but cellular phone service is readily available throughout the country. Somalia is linked to the outside world via ship-to-shore communications (INMARSAT) as well as links to overseas satellite operators by private telecommunications operators (including cellular telephone systems) in major towns. Radio broadcasting stations operate at Mogadishu, Hargeisa, and Galkaiyo, with programs in Somali and some other languages. There are two television broadcast stations in Mogadishu and one in Hargeisa.

DEFENSE

The Transitional Federal Government and other various groups throughout Somalia are estimated to control militias ranging in strength from hundreds to thousands. Some groups possess limited inventories of older armored vehicles and other heavy weapons, and small arms are prevalent throughout Somalia.

FOREIGN RELATIONS

Somalia followed a foreign policy of nonalignment for a brief period following independence. In 1970, the Siad Barre regime declared a national ideology based on scientific Socialism and aligned its foreign policy with the Soviet Union and China.

In the 1980s, Somalia shifted its alignment to the West following a territorial conflict with Ethiopia over the disputed Somali-populated region of the Ogaden from 1977-78, which was supported by the Soviet Union. The central government also sought ties with many Arab countries, and continued to receive financial and military support from several Arab countries prior to its collapse in 1991.

In 1963, Somalia severed diplomatic relations with the United Kingdom for a period following a dispute over Kenya's Somali-populated northeastern region (Northern Frontier District), an area inhabited mainly by Somalis. Related problems have arisen from the boundary with Ethiopia and the large-scale migrations of Somali nomads between Ethiopia and Somalia.

In the aftermath of the 1977-78 war between Somalia and Ethiopia, the Government of Somalia continued to call for self-determination for ethnic Somalis living in the Ogaden region of eastern Ethiopia. At the March 1983 Nonaligned Movement summit in New Delhi, President Siad Barre stated that Somalia harbored no expansionist aims and was willing to negotiate with Ethiopia over the disputed Ogaden region.

Following the collapse of the Barre regime, the foreign policy of the various entities in Somalia, including the Transitional Federal Government, has centered on gaining international recognition, winning international support for national reconciliation, and obtaining international economic assistance.

U.S.-SOMALI RELATIONS

Although the U.S. never formally severed diplomatic relations with Somalia, the U.S. Embassy in Somalia has been closed since the collapse of the Siad Barre government in 1991. The United States maintains regular dialogue with the Transitional Federal Government and other key stakeholders in Somalia through the U.S. Embassy in Nairobi, Kenya. Consular coverage for Somalia also is maintained by U.S. Embassy Nairobi, while American Citizens Services in the self-declared Republic of Somaliland are provided by the U.S. Embassy in Djibouti.

TRAVEL

Consular Information Sheet

November 4, 2008

Country Description: Since the collapse of the central government in 1991, Somalia has been subject to widespread violence and instability. A Transitional Federal Government (TFG) was established in 2004 to guide the country through a transitional process designed to—result in a new constitution and elections in 2009. However, the TFG lacks governance capacity and exercises only limited control of Mogadishu and parts of southern and central Somalia. General insecurity and inter- and intra-clan violence frequently occur throughout the country, and attacks and fighting between anti-government elements and TFG and Ethiopian forces take place regularly in Mogadishu. The United States has no official representation in Somalia.

In 1991, the northwest part of the country proclaimed itself the Republic of Somaliland, and it now has its own regional governing authority; however, Somaliland has not received international recognition as an independent state. The northeastern section of Somalia, known as the semi-autonomous region of Puntland, has also made efforts to establish a regional governing authority. Somalia's economy was seriously damaged by the civil war and its aftermath, but the private sector is trying to reemerge. Tourist facilities are nonexistent.

Entry Requirements: A passport is required for travel to Somaliland and Puntland. Both regions require a visa and issue their own at their respective ports of entry. For travel to other parts of Somalia, including Mogadishu, a passport is required; however, there is no established governing authority capable of issuing a universally recognized visa. Air and seaports are under the control of local authorities that make varying determinations of what is required of travelers who attempt to use these ports of entry.

Travelers may obtain the latest information on visas as well as any additional details regarding entry requirements from the Permanent Representative of the Somali Republic to the United Nations, telephone (212) 688-9410/5046; fax (212) 759-0651, located at 425 East 61st Street, Suite 702, New York, NY 10021. Persons outside the United States may attempt to contact the nearest Somali embassy or consulate. All such establishments, where they exist, are affiliated with the TFG, whose authority is not established throughout Somalia.

Safety and Security: Since the U.S. does not have an Embassy or any other diplomatic presence in any part of Somalia, including Somaliland and Puntland, the U.S. government cannot provide any consular services to U.S. citizens in Somalia. Limited American Citizen Services are available for travelers to Somalia at the U.S. Embassies in Nairobi and Djibouti.

While Somaliland has experienced a level of stability that has not been present in other parts of Somalia,

please note that the Department of State continues to warn U.S. citizens against all travel to Somalia, including the self-proclaimed "independent Republic of Somaliland"—see Department's Travel Warning for Somalia. Travelers insisting on traveling to Somaliland despite this warning should nevertheless always check current conditions in Somaliland before traveling. Terrorist attacks have occurred against international relief workers, including Westerners, throughout Somalia, Puntland, and Somaliland. In early 2006, an American citizen living and working in southern Somalia was kidnapped and held for ransom before being released. In July 2007, kidnapping threats were issued against international humanitarian assistance workers in Puntland. In 2007 and 2008, there were several violent kidnappings and eight assassinations of staff working for international organizations. Additionally, there have been threats against Westerners in Somalia, including Somaliland. Terrorist operatives and armed groups in Somalia have demonstrated the intent to attack air operations at Mogadishu International Airport. Additionally, a foreign terrorist organization is ostensibly in control of the southern port city of Kismayo and has openly threatened air traffic out of the local airport. Armed conflict is commonplace in the capital city of Mogadishu. All visitors are urged to restrict their movements in the region. Persons traveling to or through this area should also be aware that incidents such as armed banditry, road assaults, kidnappings for ransom, shootings and grenade attacks on public markets, and detonations of anti-personnel and-vehicle land mines regularly occur. Sporadic outbreaks of civil unrest persist and armed conflict also occurs in the rest of the country. Also, illegal roadblocks remain common throughout Somalia and have resulted in serious injury or death.

Cross-border violence occurs periodically. The area near Somalia's border with Kenya has been the site of numerous incidents of violent criminal activity, including kidnappings and grenade attacks on hostels used by international aid workers. U.S. citizens who decide to visit the area should be aware that they could encounter such criminal activity.

Americans considering seaborne travel around Somalia's coastal waters should exercise extreme caution, given numerous recent incidents of vessel hijacking and/or piracy. Since 2005 there have been numerous acts and attempted acts of piracy in Somalia's coastal waters, especially off of the Horn of Africa. Piracy remains rampant off the shores of south central Somalia and Puntland. Seaborne travelers should exercise extreme caution, as these groups have proven themselves well armed and dangerous. When transiting in and around the Horn of Africa and/or in the Red Sea, it is strongly recommended that vessels convoy and maintain good communications contact at all times. Marine channels 13 and 16 VHF-FM are international call-up and emergency channels and are commonly monitored by ships at sea. 2182 MHz is the HF international call-up and emergency channel. In the Gulf of Aden, transit routes farther offshore reduce, but do not eliminate, the risk of contact with suspected assailants. Wherever possible, travel in trafficked sea-lanes. Avoid loitering in or transiting isolated or remote areas. In the event of an attack, consider activating the "Emergency Position Indicating Radio Beacons (EPIRB)." Vessels may also contact the Yemeni Coast Guard 24-hour Operations Center at (967) 1-562-402. The Operations Center staff speaks English. Due to distances involved, there may be a considerable delay before assistance arrives.

For the latest security information, Americans traveling abroad should regularly monitor the Department of State, Bureau of Consular Affair's Internet site at http://travel.state.gov, where the current Travel Warnings and Travel Alerts, including the Worldwide Caution Travel Alert, can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S. and Canada, or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: Pervasive and violent crime is an extension of the general state of insecurity in Somalia. Serious, brutal, and often fatal crimes are very common. Kidnapping and robbery are a particular problem in Mogadishu and other areas of the south.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

Medical Facilities and Health Information: Medical facilities in Somalia are extremely limited. Travelers who insist on ignoring the warnings above should carry personal supplies of medications with them.

Malaria is endemic in many areas. There have been outbreaks of cholera in Mogadishu, Kismayo in the south, and Puntland in the northeast. For additional information on malaria and cholera, including protective measures, see the CDC travelers' health web page at http://wwwn.cdc.gov/travel. Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's web site at http://wwwn.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith/en.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation. Travelers are strongly encouraged to purchase such insurance prior to traveling to East Africa if not already covered under their current medical plan.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Somalia is provided for general reference only, and it may not be totally accurate in a particular location or circumstance.

There are no traffic lights in the country except in Hargeisa in Somaliland. The poor condition of most roads makes driving hazardous. Night driving can be dangerous due to the absence of lighting.

Recent occurrences of land mine detonations on roads point to a potentially fatal risk for drivers.

Aviation Safety Oversight: As there is no direct commercial air service between the United States and Somalia, the U.S. Federal Aviation Administration (FAA) has not assessed Somalia's Civil Aviation Authority for compliance with International Civil Aviation Organization (ICAO) aviation safety standards. For more information, travelers may visit the FAA's internet web site at http://www.faa.gov.

Special Circumstances: Water and electricity systems are poor. Functioning telecommunications systems exist in major towns in Somalia.

There is no organized system of criminal justice in Somalia, nor is there any recognized or established authority to administer a uniform application of due process. Enforcement of criminal laws is, therefore, haphazard to nonexistent. Locally established courts operate throughout Somalia under a combination of Somali customary and Islamic Shari'a law, some of which may be hostile towards foreigners.

The Somali shilling is the unit of currency except in Somaliland, which uses the Somaliland shilling. U.S. dollars are accepted everywhere. Credit cards are not accepted in Somalia.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating laws in Somalia, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Somalia are severe, and convicted offenders can expect long jail sentences and heavy fines.

Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

In accordance with Somali customary law, any child whose father is a Somali citizen is also considered to be a Somali citizen. Somali children require their father's permission to leave the country.

Registration and Embassy Locations: There is no U.S. Embassy in Somalia. U.S. citizens who plan to enter Somalia despite the Travel Warning are encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration web site and to obtain updated information on travel and security within Somalia. Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency. Travelers to Somaliland should register with the U.S. Embassy in Djibouti, and travelers to Puntland or southern Somalia should register with the U.S. Embassy in Nairobi.

The U.S. Embassy in Djibouti is located at Plateau du Serpent, Boulevard Marechal Joffre, Djibouti City; telephone (253) 35-39-95. The after-hours telephone number is (253) 35-13-43. The mailing address is Ambassade Americaine, B.P. 185, Djibouti, Republique de Djibouti. The workweek in Djibouti is Sunday through Thursday. The U.S. Embassy in Nairobi is located on United Nations Avenue, Gigiri, Nairobi, Kenya; telephone (254)(20) 363-6000; fax (254)(20) 363-6410. In the event of an after-hours emergency, the Embassy duty officer is available at (254)(20) 363-6170. The Embassy's mailing address is P.O. Box 606 Village Market, 00621 Nairobi, Kenya, or mail using U.S. domestic postage may be addressed to Unit 64100, APO AE 09831, USA.

Travel Warning

November 15, 2008

The State Department warns U.S. citizens of the risks of travel to Somalia and recommends that American citizens avoid all travel to Somalia. This replaces the Travel Warning dated October 24, 2008 to note terrorist attacks in the regions of Somaliland and Puntland.

The Department of State warns U.S. citizens against all travel to Somalia, including northern Somalia. On October 29, 2008, terrorists launched several coordinated and near-simultaneous attacks involving multiple car bombs against local and international targets in the regions of Somaliland and Puntland. There is no U.S. Embassy or other U.S. diplomatic presence in Somalia. Consequently, the U.S. government is not in a position to assist or effectively provide services to U.S. citizens in

Somalia. Terrorist operatives and armed groups in Somalia have demonstrated their intent and capability to attack air operations at Mogadishu International Airport. Kidnapping, murder, illegal roadblocks, banditry, and other violent incidents and threats to U.S. citizens and other foreigners can occur in many regions. Inter-clan and inter-factional fighting flares up with little or no warning. Unpredictable armed conflicts among rival militias are prevalent in southern Somalia, particularly in and around Mogadishu. This has resulted in the deaths of hundreds of Somali nationals and the displacement of nearly one million people. In December 2006, Ethiopian military forces entered Somalia in support of the Somali Transitional Federal Government. The continuing Ethiopian military presence and support for the Transitional Federal Government has heightened tensions among rival political and clan factions within Somalia.

The Sanaag and Sool Regions in eastern Somaliland, bordering on Puntland (northeastern Somalia), are subject to insecurity due to ongoing border disputes and inter-clan fighting. There also have been several fatal attacks and violent kidnappings against international relief workers, including Westerners, throughout Somalia, Somaliland, and Puntland. Lines of control in Mogadishu are unclear and frequently shift, making movement within Mogadishu extremely hazardous. Violent riots have recently occurred in Mogadishu, as thousands of civilians protested rising food prices and the devaluation of the Somali currency.

Recently, insurgents and extremist elements opposed to the Somali government conducted hit-and-run attacks on several towns in central and southern Somalia, to include the districts of Gedo and Bay (especially the vicinity of Baidoa) in the south.

U.S. citizens also are urged to use extreme caution when sailing near the coast of Somalia. Merchant vessels, fishing boats, and recreational craft all risk seizure by pirates and having their crews held for ransom in the waters off the Horn of Africa, most especially in the international waters near Somalia. There have been numerous such incidents, highlighting the continuing danger of maritime travel near the Horn of Africa. If transit around the Horn of Africa is necessary, it is strongly recommended that vessels travel in convoys, and maintain good communications contact at all times.

U.S. citizens who travel to Somalia despite this Travel Warning are urged to register through the State Department's travel registration website, https://travelregistration.state.gov and obtain updated information on travel and security from the U.S. Embassies in neighboring countries. Travelers to the self-declared "Republic of Somaliland" should register with the U.S. Embassy in Djibouti, and travelers to Puntland or southern Somalia should register with the U.S. Embassy in Nairobi.

The U.S. Embassy in Djibouti is located at Plateau du Serpent, Boulevard Marechal Joffre, Djibouti City; telephone (253) 35-39-95; after-hours telephone number (253) 35-13-43. The mailing address is Ambassade Americaine, B.P. 185, Djibouti, Republique de Djibouti, and their workweek is Sunday through Thursday. The U.S. Embassy in Nairobi is located on United Nations Avenue, Gigiri, Nairobi, Kenya; telephone (254)(20) 363-6000; after-hours emergencies (254)(20) 363-6170. The mailing address is P.O. Box 606 Village Market 00621, Nairobi, Kenya.

U.S. citizens should also consult the Department of State's Country Specific Information for Somalia and the Worldwide Caution, which are located on the Department's internet website at http://travel.state.gov. Travelers may obtain up-to-date information on security conditions by calling 1-888-407-4747 toll-free in the U.S. or outside the U.S. and Canada on a regular toll line at 1-202-501-4444.

SOUTH AFRICA

Compiled from the November 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Republic of South Africa

PROFILE

Geography

Area: 1.2 million sq. km. (470,462 sq. mi.).

Cities: Capitals—Administrative, Pretoria; Legislative, Cape Town; Judicial, Bloemfontein. Other cities—Johannesburg, Durban, Port Elizabeth.

Terrain: Plateau, savanna, desert, mountains, coastal plains.

Climate: moderate; similar to southern California.

People

Nationality: Noun and adjective—South African(s).

Annual growth rate: (2006 World Bank Group) 1.1%.

Population: (2007, 47.9 million) Composition—black 79.7%; white 9.1%; colored 8.8%; Asian (Indian) 2.2%. Official figures from 2007 South African Census at http://www.statssa.gov.za.

Languages: Afrikaans, English, isiNdebele, isiXhosa, isiZulu, Sepedi, Sesotho, Setswana, siSwati, Tshivenda, and Xitsonga (all official languages).

Religions: Predominantly Christian; traditional African, Hindu, Muslim, Jewish.

Education: Years compulsory—7-15 years of age for all children. The South African Schools Act, Act 84 of 1996, passed by Parliament in 1996, aims to achieve greater educational opportunities for black children, mandating a single syllabus and more equitable funding for schools.

Health: Infant mortality rate: (2007)—58 per 1,000 live births. Life expectancy—52 yrs. women; 49 yrs. men. Health data from 2007 Census Report: http://www.statssa.gov.za.

Government

Type: Parliamentary democracy.

Independence: The Union of South Africa was created on May 31, 1910; became sovereign state within British Empire in 1934; became a republic on May 31, 1961; left the Commonwealth in October 1968; rejoined the Commonwealth in June 1994.

Constitution: Entered into force February 3, 1997.

Government branches: Executive—president (chief of state) elected to a 5-year term by the National Assembly. Legislative—bicameral Parliament consisting of 490 members in two chambers. National Assembly (400 members) elected by a system of proportional representation. National Council of Provinces consisting of 90 delegates (10 from each province) and 10 nonvoting delegates representing local government. Judicial—Constitutional Court interprets and decides constitutional issues; Supreme Court of Appeal is the highest court for interpreting and deciding nonconstitutional matters.

Political subdivisions: Nine provinces: Eastern Cape, Free State, Gauteng, KwaZulu-Natal, Mpumalanga, North-West, Northern Cape, Limpopo, Western Cape.

Political parties: African National Congress (ANC), Democratic Alliance (DA), Inkatha Freedom Party (IFP), Vryheidsfront Plus/Freedom Front Plus (FF+), Pan-African Congress (PAC), African Christian Democratic Party (ACDP), United Democratic Movement (UDM), and Azanian Peoples Organization (Azapo).

Suffrage: Citizens and permanent residents 18 and older.

Economy

GDP: (2007) $283 billion.

Real GDP growth rate: (2007) 5.1%.

GDP per capita: (2007) $5,900.

Unemployment: (September 2007) 23%.

Natural resources: Almost all essential commodities, except petroleum products and bauxite. Only country in the world that manufactures fuel from coal.

Industry: Types—minerals, mining, motor vehicles and parts, machinery, textiles, chemicals, fertilizer, information technology, electronics, other manufacturing, and agro-processing.

Trade: (2007) Exports—$69.7 billion; merchandise exports: gold, other minerals and metals, agricultural products, motor vehicles and parts. Major markets—U.S., Japan, Germany, U.K., East Asia, Sub-Saharan Africa. Imports—$79.7 billion: machinery, transport equipment, chemicals, petroleum products, textiles, and scientific instruments. Major suppliers—Germany, China, U.S., Japan, U.K.

GDP composition: (2007) Agriculture and mining (primary sector)—8%; industry (secondary sector)—22%; services (tertiary sector)—70%. World's largest producer of platinum, gold, and chromium; also significant coal production.

PEOPLE

Until 1991, South African law divided the population into four major racial categories: Africans (black), whites, coloreds, and Asians. Although this law has been abolished, many South Africans still view themselves and each other according to these categories. Black Africans comprise about 79% of the population and are divided into a number of different ethnic groups. Whites comprise about 10% of the population. They are primarily descendants of Dutch, French, English, and German settlers who began arriving at the Cape of Good Hope in the late 17th century. Coloreds are mixed-race people primarily descending from the earliest settlers and the indigenous peoples. They comprise about 9% of the total population. Asians descend from Indian workers brought to South Africa in the mid-19th century to work on the sugar estates in Natal. They constitute about 2.5% of the population and are concentrated in the KwaZulu-Natal Province.

Education is in transition. Under the apartheid system schools were segregated, and the quantity and quality of education varied significantly across racial groups. The laws governing this segregation have been abolished. The long and arduous process of restructuring the country's educational system has begun and is ongoing. The challenge is to create a single, nondiscriminatory, nonracial system that offers the same standards of education to all people.

HISTORY

People have inhabited southern Africa for thousands of years. Members of the Khoisan language groups are the oldest surviving inhabitants of the land, but only a few are left in South Africa today—and they are located in the western sections. Most of today's black South Africans belong to the Bantu language group, which migrated south from central Africa, settling in the Transvaal region sometime before AD 100. The Nguni, ancestors of the Zulu and Xhosa, occupied most of the eastern coast by 1500.

The Portuguese were the first Europeans to reach the Cape of Good Hope, arriving in 1488. However, permanent white settlement did not begin until 1652 when the Dutch East India Company established a provisioning station on the Cape. In subsequent decades, French Huguenot refugees, the Dutch, and Germans began to settle in the Cape. Collectively, they form the Afrikaner segment of today's population. The establishment of these settlements had far-reaching social and political effects on the groups already settled in the area, leading to upheaval in these societies and the subjugation of their people.

By 1779, European settlements extended throughout the southern part of the Cape and east toward the Great Fish River. It was here that Dutch authorities and the Xhosa fought the first frontier war. The British gained control of the Cape of Good Hope at the end of the 18th century. Subsequent British settlement and rule marked the beginning of a long conflict between the Afrikaners and the English.

Beginning in 1836, partly to escape British rule and cultural hegemony and partly out of resentment at the recent abolition of slavery, many Afrikaner farmers (Boers) undertook a northern migration that became known as the "Great Trek." This movement brought them into contact and conflict with African groups in the area, the most formidable of which were the Zulus. Under their powerful leader, Shaka (1787-1828), the Zulus conquered most of the territory between the Drakensberg Mountains and the sea (now KwaZulu-Natal).

In 1828, Shaka was assassinated and replaced by his half-brother Dingane. In 1838, Dingane was defeated and deported by the Voortrekkers (people of the Great Trek) at the battle of Blood River. The Zulus, nonetheless, remained a potent force, defeating the British in the historic battle of Isandhlwana before themselves being finally conquered in 1879.

In 1852 and 1854, the independent Boer Republics of the Transvaal and Orange Free State were created. Relations between the republics and the British Government were strained. The discovery of diamonds at Kimberley in 1870 and the discovery of large gold deposits in the Witwatersrand region of the Transvaal in 1886 caused an influx of European (mainly British) immigration and investment. In addition to resident black Africans, many blacks from neighboring countries also moved into the area to work in the mines. The construction by mine owners of hostels to house and control their workers set patterns that later extended throughout the region.

Boer reactions to this influx and British political intrigues led to the Anglo-Boer Wars of 1880-81 and 1899-1902. British forces prevailed in the conflict, and the republics were incorporated into the British Empire. In May 1910, the two republics and the British colonies of the Cape and Natal formed the Union of South Africa, a self-governing dominion of the British Empire. The Union's constitution kept all political power in the hands of whites.

In 1912, the South Africa Native National Congress was founded in Bloemfontein and eventually became

known as the African National Congress (ANC). Its goals were the elimination of restrictions based on color and the enfranchisement of and parliamentary representation for blacks. Despite these efforts the government continued to pass laws limiting the rights and freedoms of blacks.

In 1948, the National Party (NP) won the all-white elections and began passing legislation codifying and enforcing an even stricter policy of white domination and racial separation known as "apartheid" (separateness). In the early 1960s, following a protest in Sharpeville in which 69 protesters were killed by police and 180 injured, the ANC and Pan-African Congress (PAC) were banned. Nelson Mandela and many other anti-apartheid leaders were convicted and imprisoned on charges of treason.

The ANC and PAC were forced underground and fought apartheid through guerrilla warfare and sabotage. In May 1961, South Africa relinquished its dominion status and declared itself a republic. It withdrew from the Commonwealth in part because of international protests against apartheid. In 1984, a new constitution came into effect in which whites allowed coloreds and Asians a limited role in the national government and control over their own affairs in certain areas. Ultimately, however, all power remained in white hands. Blacks remained effectively disenfranchised.

Popular uprisings in black and colored townships in 1976 and 1985

helped to convince some NP members of the need for change. Secret discussions between those members and Nelson Mandela began in 1986. In February 1990, State President F.W. de Klerk, who had come to power in September 1989, announced the unbanning of the ANC, the PAC, and all other anti-apartheid groups. Two weeks later, Nelson Mandela was released from prison.

In 1991, the Group Areas Act, Land Acts, and the Population Registration Act—the last of the so-called "pillars of apartheid"—were abolished. A long series of negotiations ensued, resulting in a new constitution promulgated into law in December 1993. The country's first nonracial elections were held on April 26-28, 1994, resulting in the installation of Nelson Mandela as President on May 10, 1994.

Following the 1994 elections, South Africa was governed under an interim constitution establishing a Government of National Unity (GNU). This constitution required the Constitutional Assembly (CA) to draft and approve a permanent constitution by May 9, 1996. After review by the Constitutional Court and intensive negotiations within the CA, the Constitutional Court certified a revised draft on December 2, 1996. President Mandela signed the new constitution into law on December 10, and it entered into force on February 3, 1997. The GNU ostensibly remained in effect until the 1999 national elections. The parties originally comprising the GNU—the ANC, the NP, and the Inkatha Freedom Party (IFP)—shared executive power. On June 30, 1996, the NP withdrew from the GNU to become part of the opposition.

During Nelson Mandela's 5-year term as President of South Africa, the government committed itself to reforming the country. The ANC-led government focused on social issues that were neglected during the apartheid era such as unemployment, housing shortages, and crime. Mandela's administration began to reintroduce South Africa into the global economy by implementing a market-driven economic plan known as Growth, Employment and Redistribution (GEAR). In order to heal the wounds created by apartheid, the government created the Truth and Reconciliation Commission (TRC) under the leadership of Archbishop Desmond Tutu. During the first term of the ANC's post-apartheid rule, President Mandela concentrated on national reconciliation, seeking to forge a single South African identity and sense of purpose among a diverse and splintered populace, riven by years of conflict. The diminution of political violence after 1994 and its virtual disappearance by 1996 were testament to the abilities of Mandela to achieve this difficult goal.

Nelson Mandela stepped down as President of the ANC at the party's national congress in December 1997, when Thabo Mbeki assumed the mantle of leadership. Mbeki won the presidency of South Africa after national elections in 1999, when the ANC won just shy of a two-thirds majority in Parliament. President Mbeki shifted the focus of government from reconciliation to transformation, particularly on the economic front. With political transformation and the foundation of a strong democratic system in place after two free and fair national elections, the ANC recognized the need to focus on bringing economic power to the black majority in South Africa. In April 2004, the ANC won nearly 70% of the national vote, and Mbeki was reelected for his second 5-year term. In his 2004 State of the Nation address, Mbeki promised his government would reduce poverty, stimulate economic growth, and fight crime. Mbeki said that the government would play a more prominent role in economic development. Despite the fact that he was prevented by term limits from running for a third term as State President, Mbeki ran for a third term as ANC chair in party elections in December 2007. He was defeated by Jacob Zuma, an ANC stalwart with a populist following, a result that signaled widespread dissatisfaction with Mbeki's remote governing style, and his government's failure to adequately address poverty and other development issues. On September 20, 2008, Mbeki was "recalled" by the ANC and replaced by Kgalema Motlanthe as President on September 25. Motlanthe will serve the remainder of Mbeki's terms until national elections are held in April 2009.

GOVERNMENT AND POLITICAL CONDITIONS

South Africa is a multiparty parliamentary democracy in which constitutional power is shared between the president and the Parliament.

The Parliament consists of two houses, the National Assembly and the National Council of Provinces, which are responsible for drafting the laws of the republic. The National Assembly also has specific control over bills relating to monetary matters. The current 400-member National Assembly was retained under the 1997 constitution, although the constitution allows for a range of between 350 and 400 members. The Assembly is elected by a system of "list proportional representation." Each of the parties appearing on the ballot submits a rank-ordered list of candidates. The voters then cast their ballots for a party.

Seats in the Assembly are allocated based on the percentage of votes each party receives. In the 2004 elections, the ANC won 279 seats in the Assembly, more than a two-thirds majority and an increase of 13 seats from 1999; the Democratic Alliance (DA) won 50, the IFP 28, the New National Party (NNP) 7, the United Democratic Movement (UDM) 9, and other groups won the remaining 27. In the 2004 electoral campaign, the ANC aligned with the NNP, and the DA aligned with the IFP. Shortly afterward, the NNP announced that it would merge with the ANC. A new Assembly will be elected in 2009.

The National Council of Provinces (NCOP) consists of 90 members, 10 from each of the nine provinces. The NCOP replaced the former Senate as

the second chamber of Parliament and was created to give a greater voice to provincial interests. It must approve legislation that involves shared national and provincial competencies as defined by an annex to the constitution. Each provincial delegation consists of six permanent and four rotating delegates.

The president is the head of state. Following the April 14, 2004 elections, the National Assembly reelected Thabo Mbeki as President. The president's constitutional responsibilities include assigning cabinet portfolios, signing bills into law, and serving as commander in chief of the military. The president works closely with the deputy president and the cabinet. There are currently 28 posts in the cabinet. Of the 28 ministers, Mbeki appointed two from outside the ANC—one from the former NNP and one from the Azanian Peoples Organization (Azapo). On June 14, 2005, President Mbeki informed the South African Parliament that then-Deputy President Jacob Zuma was being "released" from his duties following the conviction of a close associate on corruption charges relating to monetary payments to Zuma. On June 22, Mbeki named former Minister for Minerals and Energy Phumzile Mlambo-Ngcuka to the position of Deputy President, the first woman to hold this office.

On December 18, 2007, the African National Congress elected Jacob Zuma to the post of ANC President after a hard-fought campaign between Zuma and Thabo Mbeki. Mbeki remains the country's President despite this victory and a shake-up in the composition of the ANC National Executive Committee membership.

The third arm of the central government is an independent judiciary. The Constitutional Court is the highest court for interpreting and deciding constitutional issues, while the Supreme Court of Appeal is the highest court for nonconstitutional matters. Most cases are heard in the extensive system of High Courts and Magistrates Courts. The constitution's bill of rights provides for due process including the right to a fair, public trial within a reasonable time of being charged and the right to appeal to a higher court. The bill of rights also guarantees fundamental political and social rights of South Africa's citizens.

Challenges Ahead

South Africa's post-apartheid governments have made remarkable progress in consolidating the nation's peaceful transition to democracy. Programs to improve the delivery of essential social services to the majority of the population are underway. Access to better opportunities in education and business is becoming more widespread. Nevertheless, transforming South Africa's society to remove the legacy of apartheid will be a long-term process requiring the sustained commitment of the leaders and people of the nation's disparate groups.

The Truth and Reconciliation Commission (TRC), chaired by 1984 Nobel Peace Prize winner Archbishop Desmond Tutu, helped to advance the reconciliation process. Constituted in 1996 and having completed its work by 2001, the TRC was empowered to investigate apartheid-era human rights abuses committed between 1960 and May 10, 1994; to grant amnesty to those who committed politically motivated crimes; and to recommend compensation to victims of abuses. In November 2003, the Government began allocation of $4,600 (R30,000) reparations to individual apartheid victims. The TRC's mandate was part of the larger process of reconciling the often conflicting political, economic, and cultural interests held by the many peoples that make up South Africa's diverse population. The ability of the government and people to agree on many basic questions of how to order the country's new society will remain a critical challenge.

One important issue continues to be the relationship of provincial and local administrative structures to the national government. Prior to April 27, 1994, South Africa was divided into four provinces and 10 black "homelands," four of which were considered independent by the South African Government. Both the interim constitution and the 1997 constitution abolished this system and substituted nine provinces. Each province has an elected legislature and chief executive—the provincial premier. Although in form a federal system, in practice the nature of the relationship between the central and provincial governments continues to be the subject of considerable debate, particularly among groups desiring a greater measure of autonomy from the central government. A key step in defining the relationship came in 1997 when provincial governments were given more than half of central government funding and permitted to develop and manage their own budgets. However, the national government exerts a measure of control over provinces by appointing provincial premiers.

Although South Africa's economy is in many areas highly developed, the exclusionary nature of apartheid and distortions caused in part by the country's international isolation until the 1990s have left major weaknesses. The economy is now in a process of transition as the government seeks to address the inequities of apartheid, stimulate growth, and create jobs. Business, meanwhile, is becoming more integrated into the international system, and foreign investment has increased dramatically over the past several years. Still, the economic disparities between population groups are expected to persist for many years, remaining an area of priority attention for the government.

Human Rights

The 1997 constitution's bill of rights provides extensive guarantees, including equality before the law and prohibitions against discrimination; the right to life, privacy, property, and freedom and security of the person; prohibition against slavery and forced labor; and freedom of speech, religion, assembly, and association. The legal rights of criminal suspects also are enumerated, as are citizens'

entitlements to a safe environment, housing, education, and health care. The constitution provides for an independent and impartial judiciary, and, in practice, these provisions are respected.

Since the abolition of apartheid, levels of political violence in South Africa have dropped dramatically. Violent crime and organized criminal activity are at high levels and are a grave concern. Partly as a result, vigilante action and mob justice sometimes occur.

Some members of the police commit abuses, and deaths in police custody as a result of excessive force remain a problem. The government has taken action to investigate and punish some of those who commit such abuses. In April 1997, the government established an Independent Complaints Directorate to investigate deaths in police custody and deaths resulting from police action.

Although South Africa's society is undergoing a rapid transformation, some discrimination against women continues, and discrimination against those living with HIV/AIDS remains. Violence against women and children also is a serious problem.

ECONOMY

South Africa has a two-tiered economy; one rivaling other developed countries and the other with only the most basic infrastructure. It therefore is a productive and industrialized economy that exhibits many characteristics associated with developing countries, including a division of labor between formal and informal sectors, and uneven distribution of wealth and income. The formal sector, based on mining, manufacturing, services, and agriculture, is well developed.

The transition to a democratic, nonracial government, begun in early 1990, stimulated a debate on the direction of economic policies to achieve sustained economic growth while at the same time redressing the socioeconomic disparities created by apartheid. The Government of National Unity's initial blueprint to address this problem was the Reconstruction and Development Program (RDP). The RDP was designed to create programs to improve the standard of living for the majority of the population by providing housing—a planned 1 million new homes in 5 years—basic services, education, and health care. While a specific "ministry" for the RDP no longer exists, a number of government ministries and offices are charged with supporting RDP programs and goals.

The Government of South Africa demonstrated its commitment to open markets, privatization, and a favorable investment climate with its release of the crucial Growth, Employment and Redistribution (GEAR) strategy—the neoliberal economic strategy to cover 1996-2000. The strategy had mixed success. It brought greater financial discipline and macroeconomic stability but has failed to deliver in key areas. Formal employment continued to decline, and despite the ongoing efforts of black empowerment and signs of a fledgling black middle class and social mobility, the country's wealth remains very unequally distributed along racial lines. However, South Africa's budgetary reforms such as the Medium-Term Expenditure Framework and the Public Finance Management Act—which aims at better reporting, auditing, and increased accountability—and the structural changes to its monetary policy framework—including inflation targeting—have created transparency and predictability and are widely acclaimed. Trade liberalization also has progressed substantially since the early 1990s. South Africa has reduced its import-weighted average tariff rate from more than 20% in 1994 to 7% in 2002. These efforts, together with South Africa's implementation of its World Trade Organization (WTO) obligations and its

constructive role in launching the Doha Development Round, show South Africa's acceptance of free market principles.

Financial Policy

South Africa has a sophisticated financial structure with a large and active stock exchange that ranks 17th in the world in terms of total market capitalization. The South African Reserve Bank (SARB) performs all central banking functions. The SARB is independent and operates in much the same way as Western central banks, influencing interest rates and controlling liquidity through its interest rates on funds provided to private sector banks. Quantitative credit controls and administrative control of deposit and lending rates have largely disappeared. South African banks adhere to the Bank of International Standards core standards.

The South African Government has taken steps to gradually reduce remaining foreign exchange controls, which apply only to South African residents. Private citizens are now allowed a one-time investment of up to 750,000 rand (R) in offshore accounts. Since 2001, South African companies may invest up to R750 million in Africa and R500 million elsewhere.

Trade and Investment

South Africa has rich mineral resources. It is the world's largest producer and exporter of gold and platinum and also exports a significant amount of coal. During 2000, platinum overtook gold as South Africa's largest foreign exchange earner. The value-added processing of minerals to produce ferroalloys, stainless steels, and similar products is a major industry and an important growth area. The country's diverse manufacturing industry is a world leader in several specialized sectors, including railway rolling stock, synthetic fuels, and mining equipment and machinery.

Primary agriculture accounts for about 4% of the gross domestic product. Major crops include citrus and deciduous fruits, corn, wheat, dairy products, sugarcane, tobacco, wine, and wool. South Africa has many developed irrigation schemes and is a net exporter of food.

South Africa's transportation infrastructure is well-developed, supporting both domestic and regional needs. The Johannesburg International Airport serves as a hub for flights to other southern African countries. The domestic telecommunications infrastructure provides modern and efficient service to urban areas, including cellular and Internet services. In 1997, Telkom, the South African telecommunications parastatal, was partly privatized and entered into a strategic equity partnership with a consortium of two companies, including SBC, a U.S. telecommunications company. In exchange for exclusivity to provide certain services for 5 years, Telkom assumed an obligation to facilitate network modernization and expansion into unserved areas. The government is evaluating a proposal to establish a second network operator to compete with Telkom across its spectrum of services. Three cellular companies provide service to over 9 million subscribers.

South Africa's GDP is expected to increase gradually during the next few years, and 2007 estimated growth was 5.1%. Annual GDP growth between 1994 and 2004 averaged 3.0%. In 2003, real GDP growth slowed to a rate of 2.8%, but increased to 3.7% in 2004. The government estimates that the economy must achieve growth at a minimum of 6% to offset unemployment, which was estimated at 23% in September 2007, although unofficial sources put it as high as 41%. In an effort to boost economic growth and spur job creation, the government has launched special investment corridors to promote development in specific regions and also is working to encourage small, medium, and microenterprise development. One of the great successes of the ANC government has been to get consumer inflation, which had been running in the double digits for over 20 years, under control. By 1998, inflation had fallen to 6.9%, and in 1999 and 2000 inflation was running at less than 6.0%. The rand's rapid depreciation in late 2001, however, led to greater inflationary pressure, causing 2002 inflation of 9.2%. The South African Government cut the inflation rate to 4% in 2004, and the rand appreciated 39% from 2002 to 2004. The South African Reserve Bank increased interest rates, which along with the 28% rand appreciation in 2003 led to a reduced consumer inflation of 5.8%. The government also has made inroads into reducing the fiscal deficit and increasing foreign currency reserves. The government deficit was 1.1% of GDP in 2002 and 2.6% in 2003. The government's 2005 budget called for a moderate increase in spending to promote faster growth and poverty alleviation, while curbing budget deficits.

Exports amounted to 24.6% of GDP in 2007. South Africa's major trading partners include the United Kingdom, the United States, Germany, Italy, Belgium, and Japan. South Africa's trade with other Sub-Saharan African countries, particularly those in the southern Africa region, has increased substantially. South Africa is a member of the Southern African Customs Union (SACU) and the Southern African Development Community (SADC). In August 1996, South Africa signed a regional trade protocol agreement with its SADC partners. The agreement was ratified in December 1999, and implementation began in September 2000. It aims to provide duty-free treatment for 85% of trade by 2008 and 100% by 2012.

South Africa has made great progress in dismantling its old economic system, which was based on import substitution, high tariffs and subsidies, anticompetitive behavior, and extensive government intervention in the economy. The leadership has moved to reduce the government's role in the economy and to promote private sector investment and competition. It has significantly reduced tariffs and export subsidies, loosened exchange controls, cut the secondary tax on corporate dividends, and improved enforcement of intellectual property

laws. A competition law was passed and became effective on September 1, 1999. A U.S.-South Africa bilateral tax treaty went into effect on January 1, 1998, and a bilateral trade and investment framework agreement was signed in February 1999.

South Africa is a member of the World Trade Organization (WTO). U.S. products qualify for South Africa's most-favored-nation tariff rates. South Africa also is an eligible country for the benefits under the African Growth and Opportunity Act (AGOA), and most of its products can enter the United States market duty free. South Africa has done away with most import permits except on used products and products regulated by international treaties. It also remains committed to the simplification and continued reduction of tariffs within the WTO framework and maintains active discussions with that body and its major trading partners.

As a result of a November 1993 bilateral agreement, the Overseas Private Investment Corporation (OPIC) can assist U.S. investors in the South African market with services such as political risk insurance and loans and loan guarantees. In July 1996, the United States and South Africa signed an investment fund protocol for a $120 million OPIC fund to make equity investments in South Africa and southern Africa. The Trade and Development Agency also has been actively involved in funding feasibility studies and identifying investment opportunities in South Africa for U.S. businesses.

HIV/AIDS

South Africa is one of the countries most affected by HIV, with 5.3 million HIV infected individuals. Nineteen percent of the 15-49 year old population is infected, and in parts of the country more than 35% of women of childbearing age are infected. Overall, 11-12% of the population is infected. About 1,700 new infections occur each day, and approximately 40% of deaths are believed to be AIDS-related. There are approximately 660,000 children who have lost one or both parents, and by 2008 1.6 million children will have been orphaned by AIDS. Without effective prevention and treatment 5-7 million cumulative AIDS deaths are anticipated by 2010 (with 1.5 million deaths in 2010 alone), and there will be over 1 million sick with AIDS. The epidemic could cost South Africa as much as 17% in GDP growth by 2010. The extraction industries, education, and health are among the sectors that will be severely affected. A 2003 national operational plan provides the structure for a comprehensive response to HIV and AIDS, including a national rollout of antiretroviral therapy.

Environment

South Africa's Government is committed to managing the country's rich and varied natural resources in a responsible and sustainable manner. In addition, numerous South African non-governmental organizations have emerged as a potent force in the public policy debate on the environment. In international environmental organizations, South Africa is seen as a key leader among developing countries on issues such as climate change, conservation, and biodiversity. This leading role was underscored by South Africa's selection to host the World Summit on Sustainable Development in 2002.

FOREIGN RELATIONS

South African forces fought on the Allied side in World Wars I and II and participated in the postwar UN force in Korea. South Africa was a founding member of the League of Nations and in 1927 established a Department of External Affairs with diplomatic missions in the main west European countries and in the United States. At the founding of the League of Nations, South Africa was given the mandate to govern Southwest Africa, now Namibia, which had been a German colony before World War I. In 1990, Namibia attained independence, with the exception of the enclave of Walvis Bay, which was reintegrated into Namibia in March 1994. After South Africa held its first nonracial election in April 1994, most sanctions imposed by the international community in opposition to the system of apartheid were lifted. On June 1, 1994, South Africa rejoined the Commonwealth, and on June 23, 1994, the UN General Assembly accepted its credentials. South Africa served as the African Union's (AU) first president from July 2003 to July 2004.

Having emerged from the international isolation of the apartheid era, South Africa has become a leading international actor. Its principal foreign policy objective is to promote the economic, political, and cultural regeneration of Africa, through the New Partnership for African Development (NEPAD); to promote the peaceful resolution of conflict in Africa; and to use multilateral bodies to insure that developing countries' voices are heard on international issues. South Africa has played a key role in seeking an end to various conflicts and political crises on the African continent, including in Burundi, the Democratic Republic of Congo, and the Comoros. South Africa has pursued "quiet diplomacy" in its approach to the crisis in Zimbabwe.

U.S.-SOUTH AFRICAN RELATIONS

The United States has maintained an official presence in South Africa since 1799, when an American consulate was opened in Cape Town. The U.S. Embassy is located in Pretoria, and Consulates General are in Johannesburg, Durban, and Cape Town. Americans and South Africans also have many nongovernmental ties; for example, black and white American missionaries have a long history of activity in South Africa. South Africans (particularly the ANC leadership) also acknowledge support from and ties to the anti-apartheid movement in the U.S. From the 1970s through the early 1990s, U.S.-South Africa relations were severely affected by South Africa's racial policies. However, since the abolition of apartheid and democratic elections of

April 1994, the United States has enjoyed an excellent bilateral relationship with South Africa. Although there are differences of position between the two governments—for example, regarding Iraq—they do not impede cooperation on a broad range of key issues. Bilateral cooperation in counter-terrorism, fighting HIV/AIDS, and military relations has been particularly positive. Through the U.S. Agency for International Development (USAID), the United States also provides assistance to South Africa to help it meet its development goals. Peace Corps volunteers began working in South Africa in 1997.

TRAVEL

Consular Information Sheet

June 26, 2008

Country Description: South Africa is in many respects a developed country, but much of its population lives in poverty. All major urban areas have modern, world-class hotels and tourist facilities. Game parks and areas most often visited by tourists have a wide range of facilities. Food and water are generally safe, and a wide variety of consumer goods and pharmaceuticals are readily available. The capital is Pretoria, while the seat of parliament is located in Cape Town. Johannesburg is the financial capital and largest city in South Africa. Durban is home to Africa's busiest port and is the number one tourist destination for South Africans.

Entry Requirements: It is recommended that the passports of all travelers to South Africa contain at least two completely blank (unstamped) visa pages each time entry is sought. These pages are in addition to the endorsement/amendment pages (as many as four) at the back of the passport. While South African statutes require one, completely blank visa page, this rule has been applied inconsistently by South African immigration officials. In addition, any trip to a neighboring country would necessitate another blank page upon return. Travelers lacking adequate blank pages in the passport may be refused entry into South Africa, fined, and returned to their point of origin at the traveler's expense. South African authorities have denied the diplomatic missions access to assist in these cases. As a general precaution, all travelers are advised to carry a photocopy of the photo/bio information page of their passport and keep it in a location separate from the passport.

Visitors to South Africa for tourism, short business meetings, or those in transit do not require visas for stays

of up to 90 days. In the event that a traveler overstays that period without a permit issued by the South African Department of Home Affairs, they may be subject to a fine of up to 3,000 rand (approximately 415 US dollars). All others, including academics, students on educational trips, and volunteers, may need visas. Americans who intend to work in South Africa must apply for work permits before arrival; otherwise they risk being refused admission and returned to their point of origin. It is strongly suggested that all travelers check the latest requirements with the nearest South African Embassy or Consulate before traveling.

Travelers entering South Africa from countries where yellow fever is endemic are often required to present their yellow World Health Organization (WHO) vaccination record or other proof of inoculation. If they are unable to do so, they must be inoculated at the airport in order to be permitted entry.

Visit the Embassy of South Africa web site at http://www.saembassy.org for the most current visa information.

Safety and Security: Travelers are encouraged to be vigilant and avoid any large gathering, particularly protests and demonstrations. The possibility of violence, including threats against American interests, should not be discounted, particularly in times of heightened world tension.

South Africa has seen a number of attacks directed at foreigners—particularly refugees or immigrants from other African nations. Many of the attacks were centered in Johannesburg and the province of Gauteng in low income neighborhoods and informal settlements, but incidents of mob violence have taken place throughout the country. Many individuals have been killed in these incidents and many more, both targeted victims and bystanders, have been injured. While there have been no reports of Americans or other non-African visitors being targeted, these incidents of mob violence have sprung up quickly and proven difficult for local authorities to control. American residents and visitors are advised to listen to local media for reports of such incidents and to avoid areas (including but not limited to townships) where they may be likely to occur.

For the latest security information, Americans traveling abroad should regularly monitor the Department of State, Bureau of Consular Affair's Internet site at http://travel.state.gov, where the current Travel Warnings and Travel Alerts, including the Worldwide Caution Travel Alert, can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S. and Canada, or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: Although the vast majority of visitors complete their travels in South Africa without incident, visitors should be aware that criminal activity, often violent, occurs routinely. Notwithstanding government anti-crime efforts, violent crimes such as armed robbery, carjacking, mugging, "smash and grab" attacks on vehicles, and other incidents are regularly reported by visitors and resident Americans.

Visitors and residents are advised of ongoing criminal activity involving organized crime gangs targeting individuals at shopping centers and in particular at the OR Tambo International Airport, Johannesburg. Once a victim has been identified, he/she is followed back to his/her residence and robbed, usually at gunpoint, although the use of force is generally reserved for those offering some form of resistance. These gangs tend to target more "affluent" individuals, including people driving expensive cars, wearing eye-catching jewelry, flashing large amounts of cash, and/or making high-value purchases. Criminals also gravitate towards "soft" targets—people who appear preoccupied and do not pay attention to their immediate surroundings. Tourists have been targeted in a similar fashion at the airport. It appears that criminals may view certain incoming travelers as suitable targets (due perhaps to dress, jewelry or use of an ATM) and notify confederates who follow the travelers to rob them at their destination or even en route. Visitors who believe they are being followed should drive directly to a police station or other public location.

Automated Teller Machines (ATMs) have increasingly been targeted by criminals. The use of commercial explosives to blow up ATMs is a relatively new phenomenon in South Africa. In 2006, 54 such attacks were recorded. In 2007, the number of ATM bombings jumped to 387. While statistically affecting only a small percentage of machines, in the first half of 2008, the number of attacks was nearly 200. ATM bombings have usually taken place in the early hours of the morning in remote or isolated areas although recent attacks have taken place at gas stations and shopping complexes. Criminals also loiter near ATM machines and target persons withdrawing cash. Based on these threats, the following security precautions are recommended: Avoid using ATMs in dark, remote, or isolated areas. ATMs located inside shopping malls, hotels, and banks are preferred since they are normally high-traffic areas, and monitored by security guards and cameras. Avoid using an ATM with a cord or other foreign object attached to it. Should you notice a suspicious device on an ATM, immediately leave the area; take cover, and notify the police. Shrapnel and debris from an explosion can travel long distances and cause serious injury or death. Before withdrawing money, scan the area for any suspicious persons or activity. Should anyone approach you while you are withdrawing money, immediately cancel the transaction and leave the area. Should you be confronted by an armed individual - immediately comply, avoid making sudden movements, and do not offer any form of resistance. Any hesitation on your part could be perceived as a threat which may result in unnecessary violence. Criminals do not discriminate. Members of the international diplomatic community have recently been included as targets of crime.

Motorists are urged to be extremely cautious when approaching intersec-

tions and to hide bags, cell phones, and other valuables from view. Criminals are on the lookout for valuable items they can see through the car windows (see mention of "smash and grab" under traffic safety). Doors should be kept locked and windows rolled up at all times.

Crimes against property, such as carjacking, have often been accompanied by violent acts, including murder, when victims resist or are slow to respond to attackers' demands. South Africa also has the highest incidence of reported rape in the world. Foreigners are not specifically targeted, but several have been the victims of rape. Victims of violent crime, especially rape, are strongly encouraged to seek immediate medical attention, including antiretroviral therapy against HIV/AIDS. Questions about how to receive such treatment should be directed to the nearest U.S. Embassy or Consulate.

Criminal activity, such as assault, armed robbery, and theft is particularly high in areas surrounding many hotels and public transportation centers, especially in major cities. Theft of passports and other valuables is most likely to occur at airports, bus terminals, and train stations. A number of Americans have been mugged or violently attacked on commuter and metro trains, especially between Johannesburg and Pretoria. Several American travelers also reported theft of personal belongings after strangers whom they invited into their hotel drugged them. In at least one instance, an American died after being drugged and robbed in this manner.

There is a serious baggage pilferage problem at OR Tambo, Johannesburg and Cape Town International airports, particularly affecting travelers changing airlines and those flying on smaller airlines—passengers flying on major international carriers may not be affected to the same degree. Travelers are encouraged to secure their luggage with Transportation Security Administration (TSA) approved locks, use an airport plastic wrapping service, and avoid placing electronics, jewelry, cameras or other valuables in checked luggage. Make an inventory of items in checked baggage to aid in claims processing if theft does occur.

In the Western Cape, police resources have been strained by continuing gang conflicts and vigilante violence in the low income areas and informal settlements in Cape Town. The Cape Flats area, surrounding townships, and squatter camps adjacent to the city center, should be avoided by people unfamiliar with the area. Additionally, travelers should be aware that muggings have become common along many popular routes on Table Mountain, a prime tourist destination in Cape Town. Visitors to Table Mountain should be vigilant, hike in groups, and not carry valuables.

Armed robbery of cash-in-transit vehicles and personnel occurs throughout South Africa and peaks during December and January due to the increase in cash flow from commercial stores to banks. These attacks have also included incidents at major malls and in large grocery stores. Individuals should raise their level of situational awareness while in the vicinity of cash-in-transit vehicles and personnel and should avoid areas where they are located to the maximum extent possible.

Credit card fraud, counterfeit U.S. currency, and various check-cashing scams are frequently reported. Do not accept "assistance" from anyone, or agree to assist others with ATM transactions. Travelers should try to avoid using ATMs after bank business hours or in remote locations. When giving your credit card to a store or restaurant employee for processing, do not let them take the card out of your sight. Visitors should also beware of telephone or email schemes, which attempt to win the confidence of an unsuspecting American who is persuaded either to provide privileged financial information or travel to South Africa to assist in a supposedly lucrative business venture.

To check on a business's legitimacy while in the U.S., contact the International Trade Administration, Room 3317, Department of Commerce, Washington, DC 20230, telephone: 1-800-USA-TRADE or 202-482-5149, fax: 202-482-5198. If you are abroad, contact the nearest U.S. Embassy or Consulate.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed. The local equivalent to the "911" emergency line in South Africa is 10111.

Medical Facilities and Health Information: Private medical facilities are good in urban areas and in the vicinity of game parks, but they may be limited elsewhere. Pharmacies are well stocked and equivalents to most American medicines are available.

While most of South Africa is malaria free, malaria risk exists throughout the year in rural low-altitude areas of Northern (Limpopo) and Mpumalanga provinces, including Kruger National Park and neighboring game reserves. Risk also exists in the coastal lowlands of KwaZulu-Natal north of the Tugela River (including in Zululand, but excluding urban areas of Richards Bay). In all risk areas, risk is much lower from June to September. Visitors should prepare accordingly and use malaria prophylaxis. For information on malaria, its prevention, protection from insect bites, and anti-malarial drugs, please visit the CDC travelers' health web site at http://wwwn.cdc.gov/travel.

Information on vaccinations and other health precautions, such as safe

food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's Internet site at http://wwwn.cdc.gov/travel. Tuberculosis is an increasingly serious health concern in South Africa. For further information, please consult the CDC's Travel Notice on TB at http://wwwn.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith/en.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning South Africa is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

Visitors intending to drive in South Africa are strongly encouraged to obtain an international driver's permit prior to their departure from the U.S. You may wish to contact the nearest South African Embassy or Consulate for up to date information about driver's license requirements. While South African law does not normally require International driver's licenses for stays of less than six months, insurance companies for both long-term residents and rental car customers often require proof of a South African or international drivers' license in order to honor an insurance claim, even when such proof was not requested at the time the policy was secured.

Unlike the United States, where traffic moves on the right hand side of the road, traffic in South Africa moves on the left. Care must also be taken when crossing streets as a pedestrian. Travelers should use caution at all times when driving, and especially avoid nighttime travel outside major cities. Road conditions are generally good in South Africa. However, excessive speed, poor lighting on rural roads, and insufficient regulatory control of vehicle maintenance and operator licensing have resulted in a high and rapidly increasing number of traffic fatalities. Drivers should also take care to avoid pedestrians crossing roads, which frequently occur on major highways.

'Smash and grab' robberies are common throughout South Africa, particularly in urban areas, at traffic lights, and on highway off-ramps. In these cases an individual, often appearing to be a vendor or beggar, will walk down between lines of vehicles waiting at an intersection, surveying the contents of vehicles, especially on the passenger seat, for targets of opportunity. Once a promising candidate is located, the perpetrator will quickly smash the window and grab the item off the seat, departing at a run, often before the driver can even decipher what has happened. In another scenario an individual (or two working in tandem) may indicate to a driver an apparent flat tire or other problem and wait for the driver to pull over or exit the car before grabbing exposed valuables. Drivers should be particularly careful of this problem and avoid carrying anything of value (e.g., briefcases, purses, cell phones, etc.) inside the car that could attract potential assailants.

Travelers are advised to carry mobile phones. U.S. mobile phones may not work in South Africa, but rental mobile phones are widely available and may be rented from kiosks at major airports. The nationwide emergency number for the police is 10111, and the nationwide number for ambulance service is 10177. It is not necessary to dial an area code for these numbers. Callers from mobile phones may not necessarily be connected immediately to the nearest emergency service. The rate of response varies from to area to area, but is generally slower than response to 911 calls in the United States.

Visit the website of the country's national tourist office and national authority responsible for road safety at www.nra.co.za. You may also contact South Africa's national tourist office at 1-800-593-1318.

Aviation Safety Oversight: The U.S. Federal Aviation Administration (FAA) has assessed the Government of South Africa's Civil Aviation Authority as being in compliance with International Civil Aviation Organization (ICAO) aviation safety standards for oversight of South Africa's air carrier operations. For more information, travelers may visit the FAA's web site at http://www.faa.gov.

Special Circumstances: Approximately one-quarter of the population of South Africa is infected with HIV, the virus that causes AIDS. Public awareness in the country as to how to protect against infection is increasing. However, travelers are advised to exercise appropriate precautions if engaging in sexual activity, or if they become exposed to a blood source other than that supplied by a hospital for transfusion purpose.

While visiting game parks and reserves, it is dangerous to leave one's vehicle or otherwise be on foot, even in the presence of a guide. Several incidents of wild animal attacks on tourists in the region have resulted in death or serious injury. If visiting South Africa's expansive coastline, be mindful of the possible presence of sharks when swimming or engaging in water sports. In 2005 and 2006, in the False Bay area of the Western Cape, several people were attacked by sharks; some of the attacks were fatal. Should a shark be spotted close to the shore, local authorities will sound a warning siren to notify the public.

Eskom, the major supplier of electricity in South Africa, has reported that the demand for electricity may exceed the available supply from time to

time. In order to manage the situation Eskom periodically interrupts the supply to certain areas in rolling blackouts termed "load shedding." Although information about possible outages is available on Eskom's web site http://www.eskom.co.za, they do not always adhere to the published schedule.

Unexpected power outages may strand individuals in extremely difficult or vulnerable circumstances such as in elevators or, in recent instances, on board the Table Mountain aerial cable car in Cape Town. Power failures may result in considerable inconvenience as most tourist sites are not equipped with generators and may be closed without prior notification. Blackouts may also contribute to traffic congestion, traffic signal failures and hazardous intersections. Please be mindful of any situation in which a sudden break in power could result in potential harm.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses.

Persons violating South African laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in South Africa are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in South Africa are encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration web site so that they can obtain updated information on travel and security within South Africa. Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency.

The U.S. Embassy is located at 877 Pretorius Street, Arcadia in Pretoria, telephone (27-12) 431-4000 (from South Africa 012-431-4000), fax (27-12) 431-5504 (from South Africa 012-431-5504). The U.S. Embassy web site is http://pretoria.usembassy.gov.

The U.S. Consulate General in Johannesburg provides consular services for Americans in the Pretoria area. The Consulate General in Johannesburg is located at No. 1 River Street (corner of River and Riviera Road), Killarney, Johannesburg telephone (27-11) 644-8000 (from South Africa 011-644-8000), fax (27-11) 646-6916 (from South Africa (011-646-6916). Its consular jurisdiction includes Gauteng, Mpumalanga, Limpopo, North West, and Free State provinces. The Consulate General in Cape Town is located at 2 Reddam Avenue, West Lake 7945, telephone (27-21) 702-7300 (from South Africa 021-702-7300), fax (27-21) 702-7493 (from South Africa 021-702-7493). Its consular jurisdiction includes Western Cape, Eastern Cape, and Northern Cape provinces. The Consulate General in Durban is located at the Old Mutual Building, 31st floor, 303 West Street, telephone (27-31) 305-7600 (from South Africa 031-305-7600), fax (27-31) 305-7691 (from South Africa 031-305-7691). Its consular jurisdiction is KwaZulu-Natal Province.

Intercountry Adoption

June 2006

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is based on public sources and current understanding. Questions involving foreign and U.S. immigration laws and legal interpretation should be addressed respectively to qualified foreign or U.S. legal counsel.

Please Note: South African law recognizes two kinds of adoptions by foreigners: 1) those completed by foreign residents of South Africa, and 2) intercountry adoptions where foreigners are given children to adopt in their home country. The first category requires the foreigners to be resident for five years in South Africa and the adoptions are handled by an accredited agency and finalized by the Department of Social Development. The second category is only available to citizens of countries with a working agreement between them and South Africa. At this time, the United States does not have a working agreement of this type.

Patterns of Immigration: Please review current reports online at http://adoption.state.gov.

Adoption Authority: The government offices responsible for adoptions in South Africa are the following:

Commissioner of Child Welfare
Private Bag X61
Pretoria 0001, South Africa
Tel: 012-328-4026

Department of Social Development
Registrar of Adoptions
Private Bag X901
Pretoria 0001, South Africa
Tel: 012-312-7592
Fax: 012-312-7837

The Commissioner of Child Welfare is responsible to the Department of Justice and is required for inter-country adoptions. The Department of Social Development is the central authority for all adoptions.

Eligibility Requirements for Adoptive Parents: For adoptive American parents living in South Africa, there is a 5-year residency requirement. Eligibility requirements beyond that change based on the circumstances of the case in question. For example, family members will be given preference over non-relatives regardless of age.

Residency Requirements: There is a five year residency requirement, which can include the two-year vetting process. South African authorities will approve adoptions by U.S. citizen families who have been residents in South Africa or in cases in which one spouse is South African.

Time Frame: It can take up to two years to complete South Africa adoption requirements.

Adoption Agencies and Attorneys: Prospective adoptive parents should seek out an accredited South African organization to facilitate the process. Unfortunately, there is not comprehensive list of agencies available at this time. Many of these organizations are faith-based and can be contacted directly.

Adoption Fees: There are no government fees for adoption services. Adoption agencies and social organizations charges fees for services which can vary depending on the organization.

Adoption Procedures: The adoption procedure is initiated by contacting an accredited welfare organization. After a home study has been completed by an accredited organization, the case is referred to a children's court for the final hearing. An order of adoption terminates all the rights and obligations existing between the child and any prior legally-recognized parents. The adopted child is thereafter deemed by law to be the legitimate child of the adoptive parent(s). The order of adoption confers the surname of the adoptive parent on the adopted child.

There have been a number of cases in which American Citizens have been issued "Guardianship Orders" from the South African High Court. These orders do not constitute "irrevocable release for adoption and immigration" as required by United States Immigration Law. As such, they cannot be used for immigration purposes, essentially eliminating the possibility of Immediate Relative-4 (IR-4) visas (immigrant visas for orphans who will emigrate and be adopted in the United States) from South Africa. The consent of the child's biological father, except in cases of rape or incest, must be obtained before a child born out of wedlock is placed for adoption. Unmarried fathers have the right to apply for access, custody or guardianship. Previously, only the consent of the biological mother was required. However, married or biological divorced fathers can prevent their wives or former wives from having their children adopted.

According to South African law, a child born to parents who are not married to each other at the time of birth is illegitimate. A child born to unmarried parents becomes legitimate as soon as they marry. Normally, the mother of an illegitimate child is not only the legal guardian of her child, but also has custody even if she herself is still a minor. Only if it is proven that she is unfit to have custody can the child be taken from her and placed in alternative custody. Under current laws, the birth of an illegitimate child must normally be registered in the surname of the mother; the illegitimate child may take the surname of its father only if the father has formally acknowledged them in the birth register. The mother alone has the right to decide what the child's first name or names should be.

Required Documents: Because of the South African order of precedence for adopting orphans, the document requirements are different for each case. Below are the South African documents the U.S. Consulate General requires in order to issue immigrant visas for children who are fully adopted under South African law.

- Evidence that the child is an orphan;
- A final decree of adoption that must reflect that both spouses (prospective adoptive parents) were parties to the adoption;
- Evidence of compliance with all relevant South African regulations;
- The orphan's long-form South African birth certificate showing the biological parent(s)'s name; also, a new full birth certificate is required showing the new adoptive parents' names.

Embassy of the Republic of South Africa

3051 Massachusetts Avenue, NW.

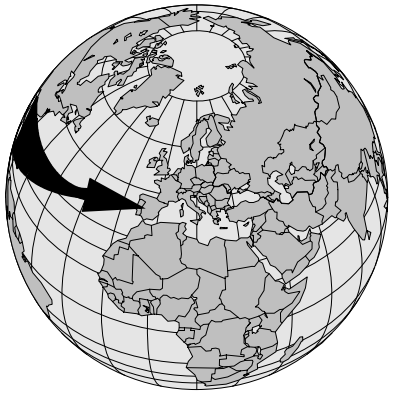
Washington, D.C. 20008

Telephone: 202-232-4400

South Africa has Consulates in Chicago, Los Angeles, and New York.

U.S. Immigration Requirements: Prospective adoptive parents are strongly encouraged to consult USCIS publication M-249, *The Immigration of Adopted and Prospective Adoptive Children*, as well as the Department of State publication, *Intercountry Adoptions*. Please see the *Intercountry Adoption* section of this book for more details and review current reports online at http://adoption.state.gov.

U.S. Consulate General



River Street, Killarney, Johannesburg 2193

Tel: 011-644-8000

Fax: 011-646-6916

The United States also has Consulates General in Westlake (Capetown) and Durban.

Additional Information: Specific questions about adoption in South Africa may be addressed to the U.S. Consulate General in Johannesburg. General questions regarding intercountry adoption may be addressed to the Office of Children's Issues, U.S. Department of State, CA/OCS/CI, SA-29, 4th Floor, 2201 C Street, NW, Washington, D.C. 20520-4818, toll-free Tel: 1-888-407-4747.

SPAIN

Compiled from the June 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Kingdom of Spain

PROFILE

Geography

Area: 504,750 sq. km. (194,884 sq. mi.), including the Balearic and Canary Islands; about the size of Arizona and Utah combined.

Cities: Capital—Madrid (5.5 million). Other cities—Barcelona (4.9 million), Valencia (2.3 million), Seville (1.8 million), Malaga (1.3 million), Zaragoza (871,000), Bilbao (353,950).

Terrain: High plateaus, lowland areas such as narrow coastal plains, and mountainous regions.

Climate: Temperate. Summers are hot in the interior and more moderate and cloudy along the coast; winters are cold in interior and partly cloudy and cool along the coast.

Time zone: Spanish mainland and Balearic Isles—local time is 1 hour ahead of Greenwich Mean Time (GMT) in winter and 2 hours ahead in summer. Canary Islands are on GMT.

People

Nationality: Noun—Spaniard(s). Adjective—Spanish.

Population: (2008 est.) 45,200,737.

Annual growth rate: (2007 est.) 0.116%.

Ethnic groups: Distinct ethnic groups within Spain include the Basques, Catalans, and Galicians.

Religions: Predominantly Roman Catholic; Protestant and Islamic faiths also have a significant presence.

Languages: Spanish (official) 74%, Catalan-Valenciana 17%, Galician 7%, Basque 2%.

Education: Years compulsory—to age 16. Literacy (2007 est.)—97%.

Work force: (20.4 million): Services—66.4%; agriculture—4.2%; construction—13.1%; industry—16.3% (2008 est.).

Government

Type: Constitutional monarchy (Juan Carlos I proclaimed King November 22, 1975).

Constitution: 1978.

Government branches: Executive—president of government nominated by monarch, subject to approval by democratically elected Congress of Deputies. Legislative—bicameral Cortes: a 350-seat Congress of Deputies (elected by the d'Hondt system of proportional representation) and a Senate. Four senators are elected in each of 47 peninsular provinces, 16 are elected from the three island provinces, and Ceuta and Melilla elect two each; this accounts for 208 senators. The parliaments of the 17 autonomous regions also elect one senator as well as one additional senator for every 1 million inhabitants within their territory (about 20 senators). Judicial—Constitutional Tribunal has jurisdiction over constitutional issues. Supreme Tribunal heads system comprising territorial, provincial, regional, and municipal courts.

Political subdivisions: 47 peninsular and three island provinces; two enclaves on the Mediterranean coast of Morocco (Ceuta and Melilla) and three island groups along that coast—Alhucemas, Penon de Velez de la Gomera, and the Chafarinas Islands.

Political parties: Spanish Socialist Workers Party (PSOE), Popular Party (PP), and the United Left (IU) coalition. Key regional parties are the Convergence and Union (CIU) in Catalonia and the Basque Nationalist Party (PNV) in the Basque country.

Economy

GDP: (2007) $1.439 trillion (seventh-largest Organization for Economic Cooperation and Development—OECD—economy).

Annual growth rate: (2007 est.) 3.8%.

Per capita GDP: (2007 est.) $31,831.

Natural resources: Coal, lignite, iron ore, uranium, mercury, pyrites, fluorspar, gypsum, zinc, lead, tungsten, copper, kaolin, hydroelectric power.

Agriculture and fisheries: (2.6% of GDP, 2007 est.): Products—grains, vegetables, citrus and deciduous

fruits, wine, olives and olive oil, sunflowers, livestock.

Industry: (13.51% of GDP, 2007 est.): Types—processed foods, textiles, footwear, petrochemicals, steel, automobiles, consumer goods, electronics.

Trade: (2007) Exports—$248.7 billion: automobiles, fruits, minerals, metals, clothing, footwear, textiles. Major markets—EU 70.1%, U.S. 4.17%. Imports—$289.8 billion: petroleum, oilseeds, aircraft, grains, chemicals, machinery, transportation equipment, fish, consumer goods. Major sources—EU 59.1%, U.S. 3.54%.

Exchange rate: (2007) 0.731 euros=U.S.$1.

PEOPLE

Spain's population density, lower than that of most European countries, is roughly equivalent to New England's. In recent years, following a longstanding pattern in the rest of Europe, rural populations are moving to cities. Urban areas are also experiencing a significant increase in immigrant populations, chiefly from North Africa, South America, and Eastern Europe.

Spain has no official religion. The constitution of 1978 disestablished the Roman Catholic Church as the official state religion, while recognizing the role it plays in Spanish society. More than 90% of the population is at least nominally Catholic. Among the remaining population, there are about 1.2 million evangelical Christians and other Protestants (2007 est.), 1 million Muslims (2007 est.), and 48,000 Jews (2007 est.).

Educational System

About 70% of Spain's student population attends public schools or universities. The remainder attend private schools or universities, the great majority of which are operated by the Catholic Church. Compulsory education begins with primary school or general basic education for ages 6-14. It is free in public schools and in many private schools, most of which receive government subsidies. Following graduation, students attend either a secondary school offering a general high school diploma or a school of professional education (corresponding to grades 9-12 in the United States) offering a vocational training program. The Spanish university system offers degree and postgraduate programs in all fields—law, sciences, humanities, and medicine—and the superior technical schools offer programs in engineering and architecture.

HISTORY

The Iberian Peninsula has been settled for millennia. In fact, some of Europe's most impressive Paleolithic cultural sites are located in Spain, including the famous caves at Altamira that contain spectacular paintings dating from about 15,000 to 25,000 years ago. The Basques, Europe's oldest surviving group, are also the first identifiable people of the peninsula.

Beginning in the ninth century BC, Phoenicians, Greeks, Carthaginians, and Celts entered the Iberian Peninsula. The Romans followed in the second century BC and laid the groundwork for Spain's present language, religion, and laws. Although the Visigoths arrived in the fifth century AD, the last Roman strongholds along the southern coast did not fall until the seventh century AD. In 711, North African Moors sailed across the straits, swept into Andalusia, and within a few years, pushed the Visigoths up the peninsula to the Cantabrian Mountains. The Reconquest—efforts to drive out the Moors—lasted until 1492. By 1512, the unification of present-day Spain was complete.

During the 16th century, Spain became the most powerful nation in Europe, due to the immense wealth derived from its presence in the Americas. But a series of long, costly wars and revolts, capped by the defeat by the English of the "Invincible Armada" in 1588, began a steady decline of Spanish power in Europe. Controversy over succession to the throne consumed the country during the 18th century, leading to an occupation by France during the Napoleonic era in the early 1800s and a series of armed conflicts throughout much of the 19th century.

The 19th century saw the revolt and independence of most of Spain's colonies in the Western Hemisphere; three wars over the succession issue; the brief ousting of the monarchy and establishment of the First Republic (1873-74); and, finally, the Spanish-American War (1898), in which Spain lost Cuba, Puerto Rico, and the Philippines to the United States. A period of dictatorial rule (1923-31) ended with the establishment of the Second Republic. It was dominated by increasing political polarization, culminating in the leftist Popular Front electoral victory in 1936. Pressures from all sides, coupled with growing and unchecked violence, led to the outbreak of the Spanish Civil War in July 1936.

Following the victory of his nationalist forces in 1939, General Francisco Franco ruled a nation exhausted politically and economically. Spain was officially neutral during World War II but followed a pro-Axis policy. Therefore, the victorious Allies isolated Spain at the beginning of the postwar period, and the country did not join the United Nations until 1955. In 1959, under an International Monetary Fund stabilization plan, the country began liberalizing trade and capital flows, particularly foreign direct investment.

Despite the success of economic liberalization, Spain remained the most closed economy in Western Europe—judged by the small measure of foreign trade to economic activity—and the pace of reform slackened during the 1960s as the state remained committed to "guiding" the economy. Nevertheless, in the 1960s and 1970s, Spain was transformed into a modern industrial economy with a thriving tourism sector. Its economic expansion led to improved income distribution and helped develop a large middle class. Social changes brought about by economic prosperity and the inflow of new ideas helped set

the stage for Spain's transition to democracy during the latter half of the 1970s. Upon the death of General Franco in November 1975, Franco's personally designated heir Prince Juan Carlos de Borbon y Borbon assumed the titles of king and chief of state. Dissatisfied with the slow pace of post-Franco liberalization, he replaced Franco's last Prime Minister with Adolfo Suarez in July 1976. Suarez entered office promising that elections would be held within one year, and his government moved to enact a series of laws to liberalize the new regime. Spain's first elections since 1936 to the Cortes (Parliament) were held on June 15, 1977.

Prime Minister Suarez's Union of the Democratic Center (UCD), a moderate center-right coalition, won 34% of the vote and the largest bloc of seats in the Cortes. Under Suarez, the new Cortes set about drafting a democratic constitution that was overwhelmingly approved by voters in a national referendum in December 1978.

GOVERNMENT AND POLITICAL CONDITIONS

Parliamentary democracy was restored following the death of General Franco in 1975, who had ruled since the end of the civil war in 1939. The 1978 constitution established Spain as a parliamentary monarchy, with the prime minister responsible to the bicameral Cortes (Congress of Deputies and Senate) elected every 4 years. On February 23, 1981, rebel elements among the security forces seized the Cortes and tried to impose a military-backed government. However, the great majority of the military forces remained loyal to King Juan Carlos, who used his personal authority to put down the bloodless coup attempt. In October 1982, the Spanish Socialist Workers Party (PSOE), led by Felipe Gonzalez, swept both the Congress of Deputies and Senate, winning an absolute majority. Gonzalez and the PSOE ruled for the next 13 years. During that period, Spain joined the North Atlantic Treaty Organization (NATO) and the European Community. In March 1996, Jose Maria Aznar's Popular Party (PP) won a plurality of

votes. Aznar moved to decentralize powers to the regions and liberalize the economy, with a program of privatization, labor market reform, and measures designed to increase competition in selected markets. During Aznar's first term, Spain fully integrated into European institutions, qualifying for the European Monetary Union. During this period, Spain participated, along with the United States and other NATO allies, in military operations in the former Yugoslavia. President Aznar and the PP won reelection in March 2000, obtaining absolute majorities in both houses of parliament.

After the terrorist attacks on the U.S. on September 11, 2001, President Aznar became a key ally in the fight against terrorism. Spain backed the military action against the Taliban in Afghanistan and took a leadership role within the European Union (EU) in pushing for increased international cooperation on terrorism. The Aznar government, with a rotating seat on the UN Security Council, supported the intervention in Iraq.

Spanish parliamentary elections on March 14, 2004 came only three days after a devastating terrorist attack on Madrid commuter rail lines that killed 191 and wounded over 1,400. With large voter turnout, PSOE won the election and its leader, Jose Luis Rodriguez Zapatero, took office on April 17, 2004. Carrying out campaign promises, the Zapatero government immediately withdrew Spanish forces from Iraq but has continued to support Iraq reconstruction efforts. The Zapatero government has supported coalition efforts in Afghanistan, including maintaining troop support for 2004 and 2005 elections, supported reconstruction efforts in Haiti, sent troops to UNIFIL in Lebanon, and cooperated on counterterrorism issues and many other issues of importance to the U.S. Zapatero was re-elected for a second term as President on March 9, 2008.

Local Government

The 1978 constitution authorized the creation of regional autonomous governments. By 1985, 17 regions covering all of peninsular Spain, the Canaries, and the Balearic Islands had negotiated autonomy statutes with the central government. In 1979, the first autonomous elections were held in the Basque and Catalan regions, which have the strongest regional traditions by virtue of their history and separate languages. Since then, autonomous governments have been created in the remainder of the 17 regions. The central government continues to devolve powers to the regional governments, which will eventually have full responsibility for health care and education, as well as other social programs.

Terrorism

The Government of Spain is involved in a long-running campaign against Basque Fatherland and Liberty (ETA), a terrorist organization founded in 1959 and dedicated to promoting Basque independence. ETA targets Spanish security forces, military personnel, Spanish Government officials, and politicians of the Popular Party and the Socialist Party (PSOE.) The group has carried out numerous bombings against Spanish Government facilities and economic targets, including a car bomb assassination attempt on then-opposition leader Aznar in 1995, in which his armored car was destroyed but he was unhurt. The Spanish Government attributes over 800 deaths to ETA terrorism since its campaign of violence began. In recent years, the government has had more success in controlling ETA, due in part to increased security cooperation with French authorities.

In November 1999, ETA ended a ceasefire it declared in September 1998. Following the end of that ceasefire, ETA conducted a campaign of violence and has been blamed for the deaths of some 46 Spanish citizens and officials. Each attack has been followed by massive anti-ETA demonstrations around the country, clearly demonstrating that the majority of Spaniards, including the majority of Spain's Basque populace, have no tolerance for continued ETA violence. In March 2006, ETA declared another ceasefire, which it ended in June 2007. In December 2007, two members of the Guardia Civil were murdered in Southern France while participating in an operation to locate the military head of ETA. Two ETA members suspected of the killings have been arrested. Days before Spain's general elections in March 2008, former councilman Isaias Carrasco was murdered outside of his home by an ETA gunman. It was seen by many as a political move by ETA to try and influence the elections.

The government continues to pursue vigorous counterterrorist policy and has worked closely with its international allies to foil several suspected ETA attacks. In May 2008, Francisco Javier Lopez Pena, the political-military head of ETA, was arrested in Bordeaux. His arrest was seen as a severe blow to the leadership of ETA. He had been a part of ETA since 1980 and was suspected of coordinating many bombings as well as pushing for an end to the 2006 ceasefire.

Spain also contends with GRAPO, an urban left-wing terrorist group that seeks to overthrow the Spanish Government and establish a Marxist state. It opposes Spanish participation in NATO and U.S. military presence in Spain and has a long history of assassinations, bombings, and kidnappings mostly against Spanish interests during the 1970s and 1980s.

In a June 2000 communiqué following the explosions of two small devices in Barcelona, GRAPO claimed responsibility for several terrorist attacks throughout Spain during the past year. These attacks included two failed armored car robberies, one in which two security officers died, and four bombings of political party offices during the 1999/2000 election campaign. In 2002 and 2003, Spanish and French authorities were successful in hampering the organization's activities through sweeping arrests, including some of the group's leadership.

Al Qaeda is known to operate cells in Spain. On March 11, 2004, only three days before national elections, 10 bombs were detonated on crowded commuter trains during rush hour.

Three were deactivated by security forces and one was found unexploded. Evidence quickly surfaced that jihadist terrorists with possible ties to the Al Qaeda network were responsible for the attack that killed 191 people. Spanish investigative services and the judicial system have aggressively sought to arrest and prosecute suspected Al Qaeda members and actively cooperate with foreign governments to diminish the transnational terrorist threat. A Spanish court convicted 18 individuals in September 2005 for their role in supporting Al Qaeda, and Spanish police disrupted numerous Islamist extremist cells operating in the country. The trial against 29 people for their alleged participation in the Madrid March 11, 2004 terrorist attack started in February 2007, and was declared ready for judgment at the end of June. One of the 29 was absolved during the trial. The prosecutor asked for sentences as high as 30,000 years of jail for some of them. In October 2007 three of the suspects were convicted of murder for their roles in the 2004 attack. The three combined received over 42,000 years in prison. Overall, 21 of 28 defendants were found guilty of some offense for their role in the bombings. In January 2008, Spanish authorities in Barcelona arrested 14 people believed to be connected to a Pakistani terrorist cell allegedly sympathetic to Al Qaeda. The group, potentially linked to Islamic terrorist activities, was believed to be on the verge of a terrorist bombing campaign in Spain and possibly other parts of Europe. An informant working for the French intelligence services notified Spanish authorities of the pending attack.

Principal Government Officials

Last Updated: 11/12/08

Chief of State: **JUAN CARLOS I, King**
Pres. of the Govt.: **Jose Luis RODRIGUEZ ZAPATERO**
First Vice Pres.: **Maria Teresa FERNANDEZ DE LA VEGA**
Second Vice Pres.: **Pedro SOLBES**
Min. of Culture: **Cesar Antonio MOLINA**
Min. of Defense: **Carme CHACON**

Min. of the Presidency: **Maria Teresa FERNANDEZ DE LA VEGA**
Min. of Public Admin.: **Elena SALGADO**
Min. of Science & Innovation: **Cristina GARMENDIA**
Governor, Bank of Spain: **Miguel Angel FERNANDEZ ORDONEZ**
Ambassador to the US: **Jorge DEZCALLAR**
Permanent Representative to the UN, New York: **Juan Antonio YANEZ-BARNUEVO**

Spain maintains an embassy in the United States at 2375 Pennsylvania Avenue NW, Washington, DC 20037 (tel. 202-452-0100) and consulates in many larger U.S. cities.

ECONOMY

Spain's accession to the European Community—now European Union (EU)—in January 1986 required the country to open its economy to trade and investment, modernize its industrial base, improve infrastructure, and revise economic legislation to conform to EU guidelines. In doing so, Spain increased gross domestic product (GDP) growth, reduced the public debt to GDP ratio, reduced unemployment from 23% in 1986 to 9.6% in first quarter 2008, and reduced inflation to under 3%, although it had risen to 4.7% as of May 2008. The fundamental challenges remaining for Spain include decreasing unemployment further, reforming labor laws lowering inflation, and raising per capita GDP. Following peak growth years in the late 1980s, the Spanish economy entered into recession in mid-1992. The economy recovered during the first Aznar administration (1996-2000), driven by a return of consumer confidence and increased private consumption, although growth has slowed in recent years.

Unemployment remains a problem at 8.47% (2007, first quarter), but this still represents a significant improvement from previous levels. Devaluations of the peseta during the 1990s made Spanish exports more competitive, but the strength of the euro since its adoption has raised recent concerns that Spanish exports are being priced out of the range of foreign buyers.

FOREIGN RELATIONS

After the return of democracy following the death of General Franco in 1975, Spain's foreign policy priorities were to break out of the diplomatic isolation of the Franco years and expand diplomatic relations, enter the European Community, and define security relations with the West.

As a member of NATO since 1982, Spain has established itself as a major participant in multilateral international security activities. Spain's EU membership represents an important part of its foreign policy. Even on many international issues beyond Western Europe, Spain prefers to coordinate its efforts with its EU partners through the European political cooperation mechanism.

With the normalization of diplomatic relations with Israel and Albania in 1986, Spain virtually completed the process of universalizing its diplomatic relations. The only country with which it now does not have diplomatic relations is North Korea.

Spain has maintained its special identification with Latin America. Its policy emphasizes the concept of Hispanidad, a mixture of linguistic, religious, ethnic, cultural, and historical

ties binding Spanish-speaking America to Spain. Spain has been an effective example of transition from authoritarianism to democracy, as shown in the many trips that Spain's King and Prime Ministers have made to the region. Spain maintains economic and technical cooperation programs and cultural exchanges with Latin America, both bilaterally and within the EU.

Spain also continues to focus attention on North Africa, especially on Morocco. This concern is dictated by geographic proximity and long historical contacts, as well as by the two Spanish enclave cities of Ceuta and Melilla on the northern coast of Africa. While Spain's departure from its former colony of Western Sahara ended direct Spanish participation in Morocco, it maintains an interest in the peaceful resolution of the conflict brought about there by decolonization. These issues were highlighted by a crisis in 2002, when Spanish forces evicted a small contingent of Moroccans from a tiny islet off Morocco's coast following that nation's attempt to assert sovereignty over the island.

Meanwhile, Spain has gradually begun to broaden its contacts with Sub-Saharan Africa. It has a particular interest in its former colony of Equatorial Guinea, where it maintains a large aid program. In relations with the Arab world, Spain has sought to promote European-Mediterranean dialogue. Spain strongly supports the EU's "Barcelona Process" which seeks to expand dialogue and trade between Europe and the nations of North Africa and the Middle East, including Israel.

It is seen by some as too greatly favoring the European Union. Other proposals are on the table, including one put forward by French President Nicolas Sarkozy in 2007. The latest meeting on the Barcelona initiative was held on November 29, 2005.

Spain has been successful in managing its relations with its two European neighbors, France and Portugal. The accession of Spain and Portugal to the EU has helped ease some of their periodic trade frictions by putting these into an EU context. Franco-Spanish bilateral cooperation is enhanced by joint action against Basque ETA terrorism. Ties with the United Kingdom are generally good, although the question of Gibraltar remains a sensitive issue.

U.S.-SPANISH RELATIONS

Spain and the United States have a long history of official relations and are closely associated in many fields. In addition to U.S. and Spanish cooperation in NATO, defense and security relations between the two countries are regulated by a 1989 Agreement on Defense Cooperation, revised in 2003. Under this agreement, Spain authorized the United States to use certain facilities at Spanish military installations.

The two countries also cooperate in several other important areas. Under a 1964 agreement (currently being renegotiated), the U.S. National Aeronautics and Space Administration (NASA) and the Spanish National Institute of Aerospace Technology (INTA) jointly operate the Madrid Deep Space Communications Complex in support of Earth orbital and solar system exploration missions. The Madrid Complex is one of the three-largest tracking and data acquisition complexes comprising NASA's Deep Space Network. An agreement on cultural and educational cooperation was signed on June 7, 1989.

A new element, supported by both the public and private sectors, gives a different dimension to the programs carried out by the joint committee for cultural and educational cooperation. These joint committee activities complement the binational Fulbright program for graduate students, postdoctoral researchers, and visiting professors, which became the largest in the world in 1989. Besides assisting in these exchange endeavors, the U.S. Embassy also conducts a program of official visits between Spain and the United States. Spain and the U.S. are strong allies in the fight against terrorism.

TRAVEL

Consular Information Sheet

July 15, 2008

Country Description: Spain and Andorra are both highly developed and stable democracies with modern economies. Spain is a member of NATO and the European Union.

Entry Requirements: A passport is required for both countries. U.S. citizens can stay without a visa for a tourist/business stay of up to 90 days. That period begins when you enter any of the Schengen countries: Austria, Belgium, Denmark, Finland, France, Germany, Greece, Iceland, Italy, Luxembourg, the Netherlands, Norway, Portugal, Spain, and Sweden. Individuals who enter Spain or Andorra without a visa are not authorized to work. American citizens planning to study in Spain should be aware that Spanish immigration regulations require applications for student visas to be submitted 60 days before anticipated travel to Spain.

Note: Although European Union regulations require that non-EU visitors obtain a stamp in their passport upon initial entry to a Schengen country, many borders are not staffed with officers carrying out this function. If an American citizen wishes to ensure that his or her entry is properly documented, it may be necessary to request a stamp at an official point of entry. Under local law, travelers without a stamp in their passport may be questioned and asked to document the length of their stay in Schengen countries at the time of departure or at any other point during their visit, and could face possible fines or other repercussions if unable to do so.

In an effort to prevent international child abduction, many governments have initiated procedures at entry/exit points. These often include requiring documentary evidence of relationship and permission for the child's travel from the parent(s) or legal guardian not present. Having such documentation on hand, even if not required, may facilitate entry/departure.

For further information concerning entry requirements for Spain, travelers should contact the Embassy of Spain at 2375 Pennsylvania Avenue NW, Washington, DC 20037, telephone (202) 452-0100, or the nearest Spanish Consulate in Boston, Chicago, Houston, Los Angeles, Miami, New Orleans, New York, San Francisco, or San Juan. Spanish government web sites with information about entry requirements (in Spanish) can be found at http://www.mae.es and http://www.mir.es. Additional information may be obtained from the Tourist Office of Spain in New York, telephone (212) 265-8822, or via the Internet at www.spain.info.

For further information on entry requirements to Andorra, travelers should contact the Andorran Mission to the UN, 2 U.N. Plaza, 25th floor, New York, NY 10018, telephone (212) 750-8064 or via the Internet at http://www.andorra.ad. Visit the Embassy of Spain and Andorra web sites for the most current visa information.

Safety and Security: Spain and Andorra share with the rest of the world an increased threat of international terrorist incidents. Like other countries in the Schengen area, Spain's open borders with its Western European neighbors allow the possibility of terrorist groups entering and exiting the country with anonymity. Spain's proximity to North Africa makes it vulnerable to attack from Al Qaeda of the Maghreb terrorists. Americans are reminded to remain vigilant with regard to their personal security and to exercise caution.

In the deadliest terrorist attack in recent European history, on March 11, 2004, Islamic extremists bombed four commuter trains entering Madrid, causing 191 deaths and over 1,400 injuries. Spanish authorities tried the suspected terrorists and their co-conspirators in February 2007 and convicted 21 in October 2007.

The Basque Fatherland and Liberty (ETA) terrorist organization remains active in Spain. ETA has historically avoided targeting foreigners, directing their attacks against the police, military, local politicians, and Spanish government targets as well as attempts to disrupt transportation and daily life. However, foreigners have been killed or injured collaterally in ETA attacks, as was the case with the Barajas Airport bombing in December 2006, in which two Ecuadorian nationals were killed. In addition, bombs have been used as part of criminal extortion of businesses, particularly in the Basque region. The risk of "being in the wrong place at the wrong time" in event of an ETA action is a concern for foreign visitors and tourists. U.S. tourists traveling to Spain should remain vigilant, exercise caution, monitor local developments, and avoid demonstrations and other potentially violent situations.

For the latest security information, Americans traveling abroad should regularly monitor the Department's web site, where the current Worldwide Caution Travel Alert, Travel Warnings and other Travel Alerts can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S. and Canada, or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: has a moderate rate of crime and most of the estimated one million American tourists have trouble free visits to Spain each year, street crimes against tourists occur in the principal tourist areas. Madrid and Barcelona, in particular, report incidents of pickpocketing, mugging and occasional violent attacks, some of which require the victim to seek medical attention. Although crimes occur at all times of day and night and to people of all ages, older tourists and Asian Americans seem to be particularly at risk. Criminals frequent tourist areas and major attractions such as museums, monuments, restaurants, outdoor cafes, Internet cafes, hotel lobbies, beach resorts, city buses, subways, trains, train stations, airports, and ATMs.

In Madrid, incidents have been reported in all major tourist areas, including the area near the Prado Museum, near Atocha train station, in Retiro Park, in areas of old Madrid including near the Royal Palace and in Plaza Mayor. There has been an increase in the number of passport and bag thefts reported at Madrid's Barajas Airport, local hotels, as well as in El Rastro (Madrid's flea market) and in the Metro.

In Barcelona, the largest number of incidents reported also occurred in major tourist areas, on Las Ramblas, Barcelona's El Prat airport, Sants train station, Metro stations, in the Sagrada Familia Area, in the Gothic Quarter, in Parc Güell, in Plaza Real, and along Barcelona's beaches. There has been a rise in the number of thefts reported at the Port Olimpic Area and nearby beaches.

Travelers should remain alert to their personal security and exercise caution. Travelers are encouraged to carry limited cash, only one credit card, and a copy of their passport; leaving extra cash, extra credit cards, passports and personal documents in a safe location. When carrying documents, credit cards or cash, you are encouraged to secure them in a hard-to-reach place and not to carry all valuables together in a purse or backpack.

Thieves often work in teams of two or more people. In many cases, one person distracts a victim while the accomplices perform the robbery. For example, someone might wave a map in your face and ask for directions, "inadvertently" spill something on you, or help you clean-up bird droppings thrown on by a third unseen accomplice. While your attention is diverted, an accomplice makes off with the valuables. Thieves may drop coins or keys at your feet to distract you and try to take your belongings while you are trying to help. Attacks are sometimes initiated from behind, with the victim being grabbed around the neck and choked by one assailant while others rifle through or grab the belongings. A group of assailants may surround the victim in a crowded popular tourist area or on public transportation, and only after the group has departed does the person discover he/she has been robbed. Purse-snatchers may grab purses or wallets and run away, or immediately pass the stolen item to an accomplice. A passenger on a passing motorcycle sometimes robs pedestrians. There have been increasing reports of thieves posing as plainclothes police officers, beckoning to pedestrians from cars and sometimes confronting them on the street and asking for documents or to inspect their cash for counterfeit bills, which they ultimately "confiscate" as evidence. The U.S. Embassy in Madrid has received several reports of cars on limited access motorways being pulled over by supposed unmarked police cars. The Spanish police do not operate in this fashion. American citizens are encouraged to ask for a uniformed law enforcement officer if approached.

Theft from vehicles is also common. "Good Samaritan" scams are unfortunately common, where a passing car or helpful stranger will attempt to divert the driver's attention by indicating there is a flat tire or mechanical problem. When the driver stops to check the vehicle, the "Good Samaritan" will appear to help the driver and passengers while the accomplice steals from the unlocked car. Drivers should be cautious about accepting help from anyone other than a uniformed Spanish police officer or Civil Guard. Items high in value like luggage, cameras, laptop computers, or briefcases are often stolen from cars. Travelers are advised not to leave valuables in parked cars, and to keep doors locked, windows rolled up, and valuables out of sight when driving.

While the incidence of sexual assault is statistically very low, attacks do occur. Spanish authorities have warned of availability of so-called "date-rape" drugs and other drugs, including "GBH" and liquid ecstasy. Americans should not lower their personal security awareness because they are on vacation.

A number of American citizens have been victims of lottery or advance fee scams in which a person is lured to Spain to finalize a financial transaction. Often the victims are initially contacted via internet or fax and informed they have won the Spanish Lottery (El Gordo), inherited money from a distant relative, or are needed to assist in a major financial transaction from one country to another. For more information, please see the Bureau of Consular Affairs web site on International Financial Scams.

Andorra has a low rate of crime.

In many countries around the world, counterfeit and pirated goods are widely available. Transactions involving such products may be illegal under local law. In addition, bringing them back to the United States may result in forfeitures and/or fines. More information on this serious problem is available at http://www.cybercrime.gov/18usc2320.htm.

The Embassy's U.S. Commercial Service has seen an upswing in a type of scam targeting U.S. businesses, utilizing the name of a legitimate Spanish concern and legitimate-appearing Spanish bank references. The scam usually involves a temptingly large order or business proposal. The U.S. Commercial Service in Spain at http://www.buyusa.gov/spain/en/ stands ready to counsel any U.S. firm which would like to verify the legitimacy of an unsolicited business proposal purporting to come from a Spanish firm.

Information for Victims of Crime:
The loss or theft abroad of a U.S. passport should be reported immediately to the local police and to the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance.

The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, to contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, Consular Officers can help you to understand the local criminal justice process and to find

an attorney if needed. Consular staff are prepared to assist victims of crime in anyway they can.

Medical Facilities and Health Information: Good medical care is available in both Spain and Andorra. Regulations regarding medications may vary from those in the U.S.; Americans with need for specific medications are encouraged to bring a supply sufficient for their anticipated period of stay as the medication may not be available and customs regulations may prohibit certain medications to be mailed from the United States to Spain or Andorra. The Department of State strongly urges Americans to consult with their medical insurance companies prior to traveling abroad to confirm whether their policy applies overseas and if it will cover emergency expenses such as a medical evacuation. U.S. medical insurance plans may not cover health costs incurred outside the United States unless supplemental coverage is purchased. Further, U.S. Medicare and Medicaid programs do not provide payment for medical services outside the United States. You should contact your insurance provider before departure so appropriate arrangements can be made. Many travel agents and private companies offer insurance plans that will cover health care expenses incurred overseas, including emergency services such as medical evacuations.

When making a decision regarding health insurance, Americans should consider that many foreign doctors and hospitals require payment in cash prior to providing service and that a medical evacuation to the United States may cost well in excess of $50,000. Uninsured travelers who require medical care overseas often face extreme difficulties, whereas travelers who have purchased overseas medical insurance have found it to be life saving when a medical emergency has occurred. When consulting with your insurer prior to your trip, please ascertain whether payment will be made to the overseas healthcare provider or if you will be reimbursed later for expenses that you incur. Some insurance policies also include coverage for psychiatric treatment and for disposition of remains in the event of death. Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's web site at http://wwwn.cdc. gov/travel.

For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith/en.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Spain and Andorra is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

Traffic in Madrid and Barcelona is faster-paced than in U.S. cities and can be unnerving due to unfamiliar signs or motorbikes weaving between traffic lanes. Drivers should always obey the closest traffic light, as there are separate pedestrian lights in the city. Drivers should be alert when driving at night in urban areas, due to the possibility of encountering drivers or pedestrians under the influence of alcohol. Night driving in isolated rural areas can be dangerous, because of farm animals and poorly marked roads. Rural traffic is generally heavier in July and August as well as during the Christmas and Easter seasons.

Traffic regulations in effect in Spain include the prohibition on the use of a mobile phone without a hands-free device while driving a car. There is a fine of 300 euros for violation of this regulation and loss of driving privileges. In addition, all drivers and passengers are required to carry a reflective vest and put it on if they need to stop on the roadside. A reflective triangle warning sign for a vehicle stopped on the side of the road is also mandatory. Those renting vehicles are encouraged to check with the rental company about traffic regulations and safety equipment. U.S. citizens using U.S. issued drivers licenses must obtain International Driving Permits prior to their arrival if they plan to drive in Spain. Pedestrians should use designated crossing areas when crossing streets and obey traffic lights.

Public transportation in large cities is generally excellent. All major cities have metered taxis, and extra charges must be posted in the vehicle. Travelers are advised to use only clearly identified cabs and to ensure that taxi drivers always switch on the meter. A green light on the roof indicates that the taxi is available. Rail service is comfortable and reliable, but varies in quality and speed. Intercity buses are usually comfortable and inexpensive.

For specific information concerning Spanish driving permits, vehicle inspection, road tax and mandatory insurance, please contact the Spanish National Tourist Organization offices in New York via the Internet at www.okspain.org. For information about driving in Andorra refer to the Andorran website at http://www.andorra.ad.

Aviation Safety Oversight: The U.S. Federal Aviation Administration (FAA) has assessed the Government of Spain's Civil Aviation Authority as being in compliance with International Civil Aviation Organization (ICAO) aviation safety standards for oversight of Spain's air carrier operations.

As there is no direct commercial air service between the United States and Andorra, the U.S. Federal Aviation Administration (FAA) has not

assessed Andorra's Civil Aviation Authority for compliance with ICAO aviation safety standards. For more information, travelers may visit the FAA's web site at http://www.faa.gov.

Special Circumstances: It is advisable to contact the Embassy of Spain in Washington, DC or one of Spain's consulates in the United States for specific information regarding customs requirements. Spain's customs authorities encourage the use of an ATA (Admission Temporaire/Temporary Admission) Carnet for the temporary admission of professional equipment, commercial samples, and/or goods for exhibitions and fair purposes. ATA Carnet Headquarters, located at the U.S. Council for International Business, 1212 Avenue of the Americas, New York, NY 10036, issues and guarantees the ATA Carnet in the United States. For additional information, please call (212) 354-4480, or send an e-mail to atacarnet@uscib.org, or visit www. uscib.org for details.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offences.

Persons violating Spain or Andorra's laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Spain and Andorra are severe, and convicted offenders can expect long jail sentences and heavy fines.

The cities of Madrid and Barcelona and The Balearics Regional Government have banned the consumption of alcohol in the street, other than in registered street cafes and bars. Visitors to Madrid, Barcelona, Mallorca, Ibiza, and Menorca should be aware that failure to respect this law might result in the imposition of fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in Spain or Andorra are encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration web site to obtain updated information on travel and security within Spain or Andorra.

Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency.

The U.S. Embassy is located at Serrano 75; telephone (34) (91) 587-2200, and fax (34) (91) 587-2303. U.S. citizens who register in the Consular Section at the U.S. Embassy, Consulate General, or one of the Consular Agencies listed below can obtain updated information on travel and security within Spain or Andorra. Additional information is available through the U.S. Embassy's home page at http://madrid.usembassy.gov. The U.S. Consulate in Barcelona is located at Paseo Reina Elisenda 23-25; telephone (34)(93) 280-2227 and fax (34)(93) 205-5206. Visitors to Barcelona can access additional information from the Consulate General's web page at http://madrid.usembassy.gov/barcelonaen.html.

There are six consular agencies in Spain, which provide limited services to American citizens, but are not authorized to issue passports. Anyone requesting service at one of the consular agencies should call ahead to verify that the service requested will be available on the day you expect to visit the agency.

Fuengirola (in Malaga Province), at Avenida Juan Gomez Juanito #8, Edificio Lucia 1C, Fuengirola 29640 Spain. Telephone (34)(952) 474-891 and fax (34)(952) 465-189. Hours 10:00 a.m. to 2:00 p.m.

La Coruna, at Canton Grande 6, La Coruna 15003 Spain. Telephone (34) (981) 213-233 and fax (34)(981 22 28 08). Hours 10:00 a.m. to 1:00 p.m.

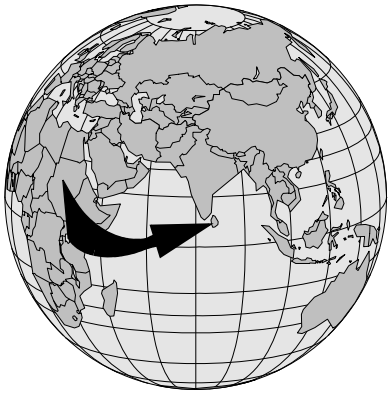
Las Palmas, at Edificio Arca, Calle Los Martinez de Escobar 3, Oficina 7, Las Palmas, Gran Canaria 35007 Spain. Telephone (34)(928) 222-552 and fax (34)(928) 225-863. Hours 10:00 a.m. to 1:00 p.m.

Palma de Mallorca, Edificio Reina Constanza, Porto Pi, 8, 9-D, 07015 Palma de Mallorca 07015 Spain. Telephone (34)(971) 40-3707 or 40-3905 and fax (34)(971) 40-3971. Hours 10:30 a.m. to 1:30 p.m.

Seville, at Plaza Nueva 8-8 duplicado, 2nd Floor, Office E-2 No.4, Sevilla, 41101 Spain. Telephone: (34)(65) 422-8751 and fax (34)(91) 422-0791. Hours: 10:00 a.m. to 1:00 p.m.

Valencia, at Doctor Romagosa #1, 2-J, 46002, Valencia 46002 Spain. Telephone (34)(96)-351-6973 and fax (34)(96) 352-9565. Hours 10:00 a.m. to 2:00 p.m. For Andorra, please contact the U.S. Consulate in Barcelona.

International Parental Child Abduction



November 2008

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *International Child Abduction* section of this book and review current reports online at www.travel.state.gov/childabduction.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is provided for general information only. Questions involving interpretation of specific foreign laws should be addressed to foreign legal counsel.

The Hague Convention on the Civil Aspects of International Child Abduction came into force between the United States and Spain on July 1, 1988. Therefore, Hague Convention provisions for return would apply to children abducted or retained after July 1, 1988. Please Note: Do not wait to get a custody order to begin the application process. Submit your completed, signed, application as soon as possible.

For more information on The Hague Convention, see the *International Parental Child Abduction* section of this publication and review current reports from the U.S. Department of State at www.travel.state.gov/child-abduction. For a list of contact names and addresses for Central Authorities, review current reports online at www.travel.state.gov/childabduction.

SRI LANKA

Compiled from the September 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Democratic Socialist Republic of Sri Lanka

PROFILE

Geography

Area: 65,610 sq. km. (25,332 sq. mi.); about the size of West Virginia.

Cities: Capital—Colombo (pop. est. 1.3 million—urban area). Sri Jayewardenepura-Kotte is the officially designated capital and is the site of Parliament, but it is currently only an administrative center. Other cities—Kandy (150,000), Galle (110,000), Jaffna (100,000).

Terrain: Coastal plains in the northern third of country; hills and mountains in south-central Sri Lanka rise to more than 2,133 meters (7,000 ft.).

Climate: Tropical. Rainy seasons—light in northeast, fall and winter, with average rainfall of 50 in.; heavy in southwest, summer and fall, with average rainfall of 200 in.

People

Nationality: Noun and adjective—Sri Lankan(s).

Population: 20.1 million.

Annual growth rate: 1.1%.

Ethnic groups: (2002) Sinhalese (74%), Tamils (18%), Muslims (7%), others (1%).

Religions: Buddhism, Hinduism, Islam, and Christianity.

Languages: Sinhala and Tamil (official), English.

Education: Years compulsory—to age 14. Primary school attendance—96.5%. Literacy—91%.

Health: Infant mortality rate—14/1,000. Life expectancy—72 yrs. (male); 77 yrs. (female).

Work force: 7.04 million (excluding Northern and Eastern provinces).

Government

Type: Republic.

Independence: February 4, 1948.

Constitution: August 31, 1978.

Suffrage: Universal over 18.

Government branches: Executive—president, chief of state and head of government, elected for a 6-year term. Legislative—unicameral 225-member Parliament. Judicial—Supreme Court, Court of Appeal, High Court, subordinate courts.

Political subdivisions: Nine provinces and 25 administrative districts.

Political parties: Janatha Vimukthi Peramuna, National Freedom Front, Jathika Hela Urumaya, Sri Lanka Freedom Party, Tamil National Alliance, United National Party, Tamileela Makkal Viduthalai Pulikal, Sri Lankan Muslim Congress, National Unity Alliance, Ceylon Workers' Congress, Up-Country People's Front, several small Tamil and Muslim parties, Marxists, and others.

Economy (2007)

GDP: $32.3 billion.

Annual growth rate: 6.8%.

Natural resources: Limestone, graphite, mineral sands, gems, and phosphate.

Agriculture: (12% of GDP) Major products—rice, tea, rubber, coconut, and spices.

Services: (60% of GDP) Major types—tourism, wholesale and retail trade, transport, telecom, financial services.

Industry: (28% of GDP) Major types—garments and leather goods, rubber products, food processing, chemicals, refined petroleum, gems and jewelry, non-metallic mineral-based products, and construction.

Trade: Exports—$7.7 billion: garments, tea, rubber products, jewelry and gems, refined petroleum, and coconuts. Major markets—U.S. ($2.1 billion), U.K., India. Imports—$11.3 billion. Major suppliers—India, Singapore, Hong Kong, China, Iran, Malaysia, Japan, U.K., U.A.E., Belgium, Indonesia, South Korea, U.S. ($227 million).

PEOPLE

The Democratic Socialist Republic of Sri Lanka (formerly known as Ceylon) is an island in the Indian Ocean about 28 kilometers (18 mi.) off the southeastern coast of India with a

population of about 19 million. Density is highest in the southwest where Colombo, the country's main port and industrial center, is located. The net population growth is about 1.3%. Sri Lanka is ethnically, linguistically, and religiously diverse. Sinhalese make up 74% of the population and are concentrated in the densely populated southwest. Sri Lankan Tamils, citizens whose South Indian ancestors have lived on the island for centuries, total about 12%, live throughout the country, and predominate in the Northern Province.

Indian Tamils, a distinct ethnic group, represent about 5% of the population. The British brought them to Sri Lanka in the 19th century as tea and rubber plantation workers, and they remain concentrated in the "tea country" of south-central Sri Lanka. In accordance with a 1964 agreement with India, Sri Lanka granted citizenship to 230,000 "stateless" Indian Tamils in 1988. Under the pact, India granted citizenship to the remainder, some 200,000 of whom now live in India. Another 75,000 Indian Tamils, who themselves or whose parents once applied for Indian citizenship, chose to remain in Sri Lanka and have since been granted Sri Lankan citizenship.

Other minorities include Muslims (both Moors and Malays), at about 7% of the population; Burghers, who are descendants of European colonists, principally from the Netherlands and the United Kingdom (U.K.); and aboriginal Veddahs. Most Sinhalese are Buddhist; most Tamils are Hindu. The majority of Sri Lanka's Muslims practice Sunni Islam. Sizable minorities of both Sinhalese and Tamils are Christians, most of whom are Roman Catholic. The 1978 constitution, while assuring freedom of religion, grants primacy to Buddhism.

Sinhala, an Indo-European language, is the native tongue of the Sinhalese. Tamils and most Muslims speak Tamil, part of the South Indian Dravidian linguistic group. Use of English has declined since independence, but it continues to be spoken by many in the middle and upper middle classes, particularly in Colombo. The government is seeking to reverse the decline in the use of English, mainly for economic but also for political reasons. Both Sinhala and Tamil are official languages.

HISTORY

The actual origins of the Sinhalese are shrouded in myth. Most believe they came to Sri Lanka from northern India during the 6th century BC. Buddhism arrived from the subcontinent 300 years later and spread rapidly. Buddhism and a sophisticated system of irrigation became the pillars of classical Sinhalese civilization (200 BC-1200 AD) that flourished in the north-central part of the island. Invasions from southern India, combined with internecine strife, pushed Sinhalese kingdoms southward.

The island's contact with the outside world began early. Roman sailors called the island Taprobane. Arab traders knew it as "Serendip," the root of the word "serendipity." Beginning in 1505, Portuguese traders, in search of cinnamon and other spices, seized the island's coastal areas and spread Catholicism. The Dutch supplanted the Portuguese in 1658. Although the British ejected the Dutch in 1796, Dutch law remains an important part of Sri Lankan jurisprudence. In 1815, the British defeated the king of Kandy, last of the native rulers, and created the Crown Colony of Ceylon. They established a plantation economy based on tea, rubber, and coconuts. In 1931, the British granted Ceylon limited self-rule and a universal franchise. Ceylon became independent on February 4, 1948.

Post-Independence Politics

Sri Lankan politics since independence have been strongly democratic. Two major parties, the United National Party (UNP) and the Sri Lanka Freedom Party (SLFP), have generally alternated rule.

The UNP ruled first from 1948-56 under three Prime Ministers—D.S. Senanayake, his son Dudley, and Sir John Kotelawala. The SLFP ruled from 1956-65, with a short hiatus in 1960, first under S.W.R.D. Bandaranaike and then, after his assassination in 1959, under his widow, Sirimavo, the world's first female chief executive in modern times. Dudley Senanayake and the UNP returned to power in 1965.

In 1970, Mrs. Bandaranaike again assumed the premiership. A year later, an insurrection by followers of the Maoist "Janatha Vimukthi Peramuna" (JVP, or "People's Liberation Front") broke out. The SLFP government suppressed the revolt and declared a state of emergency that lasted 6 years.

In 1972, Mrs. Bandaranaike's government introduced a new constitution, which changed the country's name from Ceylon to Sri Lanka, declared it a republic, made protection of Buddhism a constitutional principle, and created a weak president appointed by the prime minister. Its economic policies during this period were highly socialist and included the nationalization of large tea and rubber plantations and other private industries.

The UNP, under J.R. Jayewardene, returned to power in 1977. The Jayewardene government opened the economy and, in 1978, introduced a new constitution based on the French model, a key element of which was the creation of a strong executive presidency. J.R. Jayewardene was elected President by Parliament in 1978 and by nationwide election in 1982. In 1982, a national referendum extended the life of Parliament another 6 years.

The UNP's Ranasinghe Premadasa, Prime Minister in the Jayewardene government, narrowly defeated Mrs. Bandaranaike (SLFP) in the 1988 presidential elections. The UNP also won an absolute majority in the 1989 parliamentary elections. Mr. Premadasa was assassinated on May 1, 1993 by the Liberation Tigers of Tamil Eelam ("LTTE" or "Tigers"), and was replaced by then-Prime Minister Dingiri Banda Wijetunga, who

appointed Ranil Wickremesinghe Prime Minister. The SLFP, the main party in the People's Alliance (PA) coalition, returned to power in 1994 for the first time in 17 years. The PA won a plurality in the August 1994 parliamentary elections and formed a coalition government with Chandrika Bandaranaike Kumaratunga as Prime Minister. Prime Minister Kumaratunga later won the November 1994 presidential elections and appointed her mother (former Prime Minister Sirimavo Bandaranaike) to replace her as Prime Minister. President Kumaratunga won re-election to another 6-year term in December 1999. In August 2000, Mrs. Bandaranaike resigned as Prime Minister for health reasons, and Ratnasiri Wickramanayaka was appointed to take her place. In December 2001, the UNP assumed power, led by Prime Minister Ranil Wickremasinghe. Chandrika Kumaratunga remained as President. In November of 2003, President Kumaratunga suddenly took control of three key ministries, triggering a serious cohabitation crisis.

In January 2004, the SLFP and the JVP formed a political grouping known as the United People's Freedom Alliance (UPFA). In February, President Kumaratunga dissolved Parliament and called for fresh elections. In these elections, which took place in April 2004, the UPFA received 45% of the vote, with the UNP receiving 37% of the vote. While it did not win enough seats to command a majority in Parliament, the UPFA was able to form a government and appoint a cabinet headed by Prime Minister Mahinda Rajapaksa. The JVP later broke with the SLFP and left the government, but has often supported it from outside.

Presidential elections were held in November 2005. Mahinda Rajapaksa became President, and Ratnasiri Wickramanayake became Prime Minister. The current government has a majority in the Parliament through a coalition with a number of small minority parties and the backing of 17 dissident UNP members.

Communal Crisis

Historical divisions continue to have an impact on Sri Lankan society and politics. From independence, the Tamil minority has been uneasy with the country's unitary form of government and apprehensive that the Sinhalese majority would abuse Tamil rights. Those fears were reinforced when S.W.R.D. Bandaranaike triumphed in the 1956 elections after appealing to Sinhalese nationalism. His declaration that Sinhala was the country's official language—an act felt by Tamils to be a denigration of their own tongue—was the first in a series of steps over the following decades that appeared discriminatory to Tamils. Tamils also protested government educational policies and agriculture programs that

encouraged Sinhalese farmers from the south to move to newly irrigated lands in the east. The decades following 1956 saw intermittent outbreaks of communal violence and growing radicalization among Tamil groups. By the mid-1970s Tamil politicians were moving from support for federalism to a demand for a separate Tamil state—"Tamil Eelam"—in northern and eastern Sri Lanka, areas of traditional Tamil settlement. In the 1977 elections, the Tamil United Liberation Front (TULF) won all the seats in Tamil areas on a platform of separatism. Other groups—particularly the Liberation Tigers of Tamil Eelam (LTTE or Tamil Tigers)—sought an independent state by force.

In 1983, the death of 13 Sinhalese soldiers at the hands of the LTTE unleashed the largest outburst of communal violence in the country's history. Hundreds of Tamils were killed in Colombo and elsewhere, tens of thousands were left homeless, and more than 100,000 fled to south India. The north and east became the scene of bloodshed as security forces attempted to suppress the LTTE and other militant groups. Terrorist incidents occurred in Colombo and other cities. Each side in the conflict accused the other of violating human rights. The conflict assumed an international dimension when the Sri Lankan Government accused India of supporting the Tamil insurgents.

In October 1997, the U.S. Government designated the LTTE as a foreign terrorist organization under provisions of the Anti-Terrorism and Effective Death Penalty Act of 1996 and has maintained this designation since then, most recently redesignating the group in October of 2003. The U.S. Government in November 2007 froze the U.S.-held assets of the Tamils Rehabilitation Organisation, a charitable organization associated with the LTTE.

Indian Peacekeeping

By mid-1987, India intervened in the conflict by air-dropping supplies to prevent what it felt was harsh treatment and starvation of the Tamil population in the Jaffna Peninsula caused by an economic blockade by Colombo. Under a July 29, 1987, accord (the Indo-Lanka Accord) signed by Indian Prime Minister Rajiv Gandhi and President Jayewardene, the Sri Lankan Government made a number of concessions to Tamil demands, which included devolution of power to the provinces, merger—subject to later referendum—of the northern and eastern provinces, and official status for the Tamil language. India agreed to establish order in the north and east with an Indian Peace-Keeping Force (IPKF) and to cease assisting Tamil insurgents. Militant groups, although initially reluctant, agreed to surrender their arms to the IPKF.

Within weeks, however, the LTTE declared its intent to continue its armed struggle for an independent Tamil Eelam and refused to disarm. The IPKF found itself engaged in a bloody police action against the LTTE. Further complicating the return to peace was a burgeoning Sinhalese insurgency in the south. The JVP, relatively quiescent since the 1971 insurrection, began to reassert itself in 1987. Capitalizing on opposition to the Indo-Lankan Accord in the Sinhalese community, the JVP launched an intimidation campaign against supporters of the accord. Numerous UNP and other government supporters were assassinated. The government, relieved of its security burden by the IPKF in the north and east, intensified its efforts in the south. The JVP was crushed but at a high cost in human lives.

From April 1989 through June 1990, the government engaged in direct communications with the LTTE leadership. In the meantime, fighting between the LTTE and the IPKF escalated in the north. India withdrew the last of its forces from Sri Lanka in early 1990, and fighting between the LTTE and the government resumed. Both the LTTE and government forces committed serious human rights violations. In January 1995, the Sri Lankan Government and the LTTE agreed to a cessation of hostilities as a preliminary step in a government-initiated plan for peace negotiations. After 3 months, however, the LTTE unilaterally resumed hostilities. The government then adopted a policy of military engagement with the Tigers, with government forces liberating Jaffna from LTTE control by mid-1996 and moving against LTTE positions in the northern part of the country called the Vanni. An LTTE counteroffensive begun in October 1999 reversed most government gains and by May 2000 threatened government forces in Jaffna. Heavy fighting continued into 2001.

Peace Process and Resumption of Conflict

In December 2001, with the election of a new UNP government, the LTTE and government declared unilateral cease-fires. In February 2002, the Government of Sri Lanka (GSL) and LTTE signed a ceasefire agreement sponsored by peace process facilitator Norway. Peace talks began in Norway in December 2002. The Tigers dropped out of talks in February 2003, however, claiming they were being marginalized. In July 2004, the first suicide bomb since 2001 struck Colombo.

In March 2004, Eastern Tiger commander Karuna broke with the LTTE, going underground with his supporters. In March 2006, the Karuna faction registered a political party, the Tamil People's Liberation Tigers (TMVP). The LTTE and the Karuna faction have targeted each other in low-level attacks since that time. In late 2007, Sivanesethurai Chandrakanthan ("Pillaiyan") took over the leadership of the TMVP.

Over 30,000 Sri Lankans died in the December 2004 tsunami, and hundreds of thousands of others fled their homes. In June 2005, the GSL and LTTE reached an agreement to share $3 billion in international tsunami aid. However, the agreement was challenged in court and was never implemented. In August 2005, the LTTE assassinated Foreign Minister Lakshman Kadirgamar, an ethnic Tamil. Parliament passed a state of emergency regulation that has been renewed every month since then.

During the November 2005 presidential election, the LTTE enforced a voting boycott in areas under its control. As a result, perceived hard-liner Sri Lanka Freedom Party (SLFP) Mahinda Rajapaksa won by a narrow margin. Low-level violence between the LTTE and security forces escalated. In December 2005, pro-LTTE Tamil National Alliance MP Joseph Pararajasingham was assassinated within a GSL high security zone in the eastern town of Batticaloa.

In February 2006, exactly four years after the ceasefire agreement was signed, the GSL and LTTE renewed their commitment to the agreement at talks in Geneva. There was a lull in violence until April 2006, when an explosion rocked a Sinhalese market in Trincomalee, followed by limited Sinhalese backlash against Tamils. Several days later, an LTTE suicide bomber attacked the main army compound in Colombo, killing eight soldiers and seriously wounding Army Commander General Fonseka. The government retaliated with air strikes on Tiger targets. In June 2006, an LTTE suicide bomber succeeded in killing Army third-in-command General Kulatunga in a suburb of Colombo.

The European Union banned the LTTE as a terrorist organization on May 30, 2006. In June 2006, GSL and LTTE delegations flew to Oslo to discuss the future of the Scandinavian-led Sri Lanka Monitoring Mission (SLMM). The Tigers refused to sit for talks with the GSL and instead demanded the SLMM remove any monitors from EU-member nations.

Heavy fighting in August 2006, the worst since the 2002 ceasefire, killed hundreds of people and caused tens of thousands to flee their homes when the Tamil Tiger rebels clashed with government forces in the north and east. In September 2006, the government carried out the first major seizure of enemy territory by either side since the 2002 ceasefire when it drove Tamil Tiger rebels from the entrance of the strategic Trincomalee harbor.

In October 2006, the LTTE attacked a Navy bus convoy at a transit point in Habarana, killing 90 sailors, and a few days later, attacked the Sri Lankan Navy Headquarters in Galle, a major tourist destination in the far south. Peace talks in Geneva at the end of October ended with no progress. The LTTE attempted to assassinate the Defense Secretary by bombing his motorcade in December 2006, but he escaped unharmed. Government troops took control of the LTTE's eastern stronghold of Vakarai in January 2007, resulting in thousands more internally displaced persons. In March 2007, the Tamil Tiger rebels launched their first-ever air attack, which targeted the Katunayake Air Force base adjacent to Bandaranaike International Airport. By July 2007, however, the government had recaptured the remaining territory held in the Eastern Province from the Tigers. In November 2007, a Sri Lankan Air Force bomb killed LTTE political chief and number two leader, S.P. Tamilchelvan. Also during that month, the LTTE detonated a bomb in a busy Colombo shopping center, killing 17 and wounding many more.

In January 2008, the government announced that it was unilaterally abrogating the 2002 ceasefire agreement. Government forces stepped up their campaign to assert control over the northern areas still led by the LTTE. The LTTE resisted government advances into the north and carried out attacks on economic and civilian targets in the south.

In May 2008, elections were held for the first time to fill the newly created Eastern Provincial Council covering the Ampara, Batticaloa, and Trincomalee districts. Although opposition parties alleged widespread vote-rigging, the government's United People's Freedom Alliance in a coalition with the TMVP secured the majority in the new Provincial Council, and TMVP leader Sivanesethurai Chandrakanthan ("Pillaiyan") was sworn in by President Rajapaksa as Chief Minister.

GOVERNMENT

Under the 1978 constitution, the president of the republic, directly elected for a 6-year term, is chief of state, head of government, and commander in chief of the armed forces. Responsible to Parliament for the exercise of duties under the constitution and laws, the president may be removed from office by a two-thirds vote of Parliament with the concurrence of the Supreme Court.

The president appoints and heads a cabinet of ministers responsible to Parliament. The president's deputy is the prime minister, who leads the ruling party in Parliament. A parliamentary no-confidence vote requires dissolution of the cabinet and the appointment of a new one by the president.

Parliament is a unicameral 225-member legislature elected by universal suffrage and proportional representation to a 6-year term. The president may summon, suspend, or end a legislative session and dissolve Parliament. Parliament reserves the power to make all laws.

Sri Lanka's judiciary consists of a Supreme Court, Court of Appeal, High Court, and a number of subordinate courts. Sri Lanka's legal system reflects diverse cultural influences. Criminal law is fundamentally British. Basic civil law is Roman-Dutch. Laws pertaining to marriage, divorce, and inheritance are communal.

Under the Indo-Sri Lankan Accord of July 1987 and the 13th amendment to the constitution, the Government of Sri Lanka agreed to devolve significant authority to the provinces. Provincial Councils are directly elected for 5-year terms. The leader of the council majority serves as the province's chief minister; a provincial governor is appointed by the president. The councils possess limited powers in education, health, rural development, social services, agriculture, security, and local taxation. Many of these powers are shared or subject to central government oversight. As a result, the Provincial Councils have

never functioned effectively. Devolution proposals under consideration as a means of finding a political solution to the ethnic conflict foresee a strengthening of the Provincial Councils, with greater autonomy from central control. Predating the accord are municipal, urban, and rural councils with limited powers.

Principal Government Officials

Last Updated: 11/12/08

Pres.: **Mahinda RAJAPAKSA**
Prime Min.: **Ratnasiri WICKREMANAYAKE**
Min. of Agricultural Development & Agrarian Services Development: **Maithripala SIRISENA**
Min. of Child Development & Women's Empowerment: **Sumedha JAYASENA**
Min. of Community Development & Social Inequity Eradication: **P. CHANDRASEKARAN**
Min. of Constitutional Affairs & National Integration: **D. E. W. GUNASEKARA**
Min. of Construction & Engineering Services: **Rajitha SENARATNE**
Min. of Cultural Affairs: **Mahinda Yapa ABEYWARDENA**
Min. of Defense: **Mahinda RAJAPAKSA**
Min. of Disaster Management & Human Rights: **Mahinda SAMARASINGHE**
Min. of Education: **Susil PREMAJAYANTHA**
Min. of Enterprise Development & Investment Promotion: **Sarath AMUNUGAMA**
Min. of Environment: **Champika RANAWAKA**
Min. of Export Development & International Trade: **G. L. PEIRIS**
Min. of Finance & Planning: **Mahinda RAJAPAKSA**
Min. of Fisheries & Aquatic Resources: **Felix PERERA**
Min. of Foreign Affairs: **Rohitha BOGOLLAGAMA**
Min. of Foreign Employment Promotion & Welfare: **Kehelilya RAMBUKWELLA**
Min. of Heath Care & Nutrition: **Nimal Siripala DE SILVA**
Min. of Higher Education: **Wisva WARNAPALA**
Min. of Highways & Road Development: **Jeyaraj FERNANDOPULLE**
Min. of Housing & Common Amenities: **Ferial ASHRAFF**
Min. of Indigenous Medicine: **Tissa KARALLIYADDE**
Min. of Industrial Development: **Kumara WELGAMA**
Min. of Internal Admin.: **Ratnasiri WICKREMANAYAKE**
Min. of Irrigation & Water Management: **Chamal RAJAPAKSA**
Min. of Justice: **Amarasiri DODANGODA**
Min. of Labor Relations & Manpower: **Athauda SENAVIRATNE**
Min. of Land & Land Development: **Jeewan KUMARATUNGE**
Min. of Livestock Development: **R. M. C. B. RATNAYAKE**

Min. of Youth Affairs: **Pavithra WANNIARACHCHI**
Min. of Youth Empowerment & Socioeconomic Development: **Arumugam THONDAMAN**
Governor, Central Bank: **Ajith Nivard CABRAAL**
Ambassador to the US: **Bernard GOONETILLEKE**
Permanent Representative to the UN, New York: **Prasad KARIYAWASAM**

Sri Lanka maintains an embassy in the United States at 2148 Wyoming Avenue NW, Washington, DC 20008 (tel. 202-483-4025).

POLITICAL CONDITIONS

Sri Lanka's two major political parties—the UNP and the SLFP—embrace democratic values, international nonalignment, and encouragement of Sinhalese culture. Past differences between the two on foreign and economic policy have narrowed. The SLFP, however, envisions a broader role for the state in general.

Sri Lanka has a multi-party democracy that enjoys considerable stability despite relatively high levels of political violence. LTTE violence is largely confined to the Northern and Eastern provinces, which are 6 to 8 hours by road from the capital. Economic targets included the airport in July 2001, the Colombo World Trade Center in October 1997, and the central bank in January 1996. In January 1998, the LTTE detonated a truck bomb in Kandy, damaging the Temple of the Tooth relic, the holiest Buddhist shrine in the country. After a lull following the 2002 ceasefire, LTTE-perpetrated terrorist bombings directed against politicians and civilian targets have become more common in Colombo, Kandy, and elsewhere in the country. LTTE terrorist activities have generally been aimed at destabilizing Sri Lanka politically, economically, and socially. LTTE attacks on key political figures include the attempted assassinations of Social Affairs Minister Douglas Devananda in November 2007 and of Secretary of Defense Gothabaya Rajapaksa in December 2006, the assassination of Army General Kula-

tunga in June 2006, the attempted assassination of Army Commander General Fonseka in April 2006, the assassination of Foreign Minister Lakshman Kadirgamar in August 2005, the killing of the Industrial Development Minister by suicide bombing in June 2000, and the December 1999 attempted assassination of President Kumaratunga. The LTTE is also suspected of being behind the assassinations of two government ministers in early 2008.

ECONOMY

Sri Lanka is a lower-middle income developing nation with a gross domestic product of about $32 billion. This translates into a per capita income of $1,600. Sri Lanka's 91% literacy rate in local languages, and life expectancy of 72 years rank well above those of India, Bangladesh, and Pakistan. English language ability is relatively high but has declined significantly since the 1970s.

Sri Lanka's income inequality is severe, with striking differences between rural and urban areas. About 15% of the country's population of 20.1 million remains impoverished. Civil conflict, falling agricultural labor productivity, lack of income-earning opportunities for the rural population, high inflation and poor infrastructure outside the Western Province are impediments to poverty reduction.

In 1978, Sri Lanka shifted away from a socialist orientation and opened its economy to foreign investment. But the pace of reform has been uneven. A period of aggressive economic reform under the UNP-led government that ruled from 2002 to 2004 was followed by a more statist approach under former President Chandrika Kumaratunga and current President Mahinda Rajapaksa.

Despite a brutal civil war since 1983, economic growth has averaged around 4.5%. In 2001, however, GDP growth was negative 1.4%—the only contraction since independence. Growth recovered to 4.0% in 2002. Following the 2002 ceasefire and subsequent economic reforms, the economy grew more rapidly, recording growth rates of 6.0% in 2003 and 5.4% in 2004. The December 2004 Indian Ocean tsunami killed 32,000 people, displaced 443,000, and caused an estimated $1 billion in damage. The tsunami's overall economic impact was less severe than originally feared, with the economy growing by 6% in 2005 as the damage was offset by the reconstruction effort. The economic situation in Sri Lanka is stable, but hampered by the resumption of hostilities between the government and the LTTE, escalating oil prices, and high inflation and interest rates. GDP grew by 6.8% in 2007, down from 7.7% growth in 2006. Sri Lanka's key exports such as garments and tea performed well. Remittances from foreign workers, estimated at $2.5 billion, also helped the economy.

President Rajapaksa's broad economic strategy was outlined in his election manifesto "Mahinda Chintana" (Mahinda's Thoughts), which now guides government economic policy. Mahinda Chintana policies focus on poverty alleviation and steering investment to disadvantaged areas; developing the small and medium enterprise (SME) sector; promotion of agriculture; and expanding the already enormous civil service. The Rajapaksa government rejects the privatization of state enterprises, including "strategic" enterprises such as state-owned banks, airports, and electrical utilities. Instead, it plans to retain ownership and management of these enterprises and make them profitable.

The future of Sri Lanka's economic health primarily depends on political stability, return to peace, and continued policy reforms—particularly in the area of fiscal discipline and budget management. Rising oil costs and the 24-year conflict have contributed to Sri Lanka's high public debt load (86% of GDP in 2007). Sri Lanka needs economic growth rates of 7-8% and investment levels of about 30% of GDP for a sustainable reduction in unemployment and poverty. In the past 10 years, investment levels have averaged around 25% of GDP. Sri Lanka depends on a continued strong global economy for investment and for expansion of its export base. The government plans an ambitious infrastructure development program to boost growth. It hopes to diversify export products and destinations to make use of the Indo-Lanka and Pakistan-Sri Lanka Free Trade Agreements, GSP Plus treatment by the European Union and other regional and bilateral preferential trading agreements.

The service sector is the largest component of GDP at around 60%. In 2007, the service sector continued its strong expansion, fueled primarily by strong growth in telecom, trading, transport, and financial services. Public administration and defense expenditures increased in 2007 due to resumption of hostilities, expansion of public sector employment, and the expenses associated with maintaining a 106-minister cabinet. There also is a growing information technology sector, especially information technology training and software development. The tourism sector has been impeded by the volatile security situation.

Industry accounts for 28% of GDP. Manufacturing is the largest industrial subsector, accounting for 18% of GDP. The construction sector accounts for 6% of GDP. Mining and quarrying account for 2% of GDP. Electricity, gas and water account for 2% of GDP. Within the manufacturing sector, food, beverage, and tobacco is the largest subsector in terms of value addition, accounting for 46%. Textiles, apparel, and leather is the second-largest sector with 24% of value addition. The third-largest sector in value added terms is chemical, petroleum, rubber, and plastic products.

Agriculture has lost its relative importance to the Sri Lankan economy in recent decades. It employs 31% of the working population, but accounts for only about 12% of GDP. Rice, the staple cereal, is cultivated extensively.

The plantation sector consists of tea, rubber, and coconut; in recent years, the tea crop has made significant contributions to export earnings.

Trade and Foreign Assistance

Sri Lanka's exports (mainly apparel, tea, rubber, gems and jewelry) are estimated at $7.7 billion and imports (mainly oil, textiles, food, and machinery) were estimated at $11.3 billion for 2007. The resulting large trade deficit was financed primarily by remittances from Sri Lankan expatriate workers, foreign assistance, and commercial borrowing. Sri Lanka must diversify its exports beyond garments and tea. Garment exports face increased competition since the 2005 expiration of the worldwide Multifiber Arrangement. Sri Lanka's exports to the European Union (EU) increased sharply in 2006-2007 due to duty-free entry of goods under the EU GSP Plus program, granted in 2005 to help Sri Lanka rebuild after the 2004 tsunami. The GSP Plus program expires at the end of 2008 and its renewal is uncertain. The tea industry is challenged by a shortage of plantation labor and by growing competition.

Exports to the United States, Sri Lanka's most important single-country market, were estimated to be around $2.1 billion for 2007, or 27% of total exports. As a result of the GSP Plus program, the EU as a whole is Sri Lanka's biggest export market. For many years, the United States has been Sri Lanka's biggest market for garments, taking almost 50% of total garment exports. India is Sri Lanka's largest supplier, accounting for 21% of imports valued at over $2.6 billion. United States exports to Sri Lanka were estimated to be around $230 million for 2007, consisting primarily of wheat, electrical apparatus, textiles and specialized fabrics, medical and scientific equipment, plastics, and paper.

Sri Lanka is highly dependent on foreign assistance, with the World Bank, the Asian Development Bank, Japan, and other donors disbursing loans totaling $1.4 billion in 2007. Iran is becoming the largest provider of foreign assistance. During the Iranian President's visit in April 2008, Iran committed $450 million for the Uma Oya multipurpose irrigation project. Iran is also a major lender to Sri Lanka and has provided infrastructure project loans and an interest-free credit facility for oil imports. Under this facility, Sri Lanka has imported substantial amount of oil (valued at $700 million as of June 30, 2008). Iran promised assistance for modernization of Sri Lanka's only oil refinery, though no firm commitments are in place. China has also become a major lender for infrastructure projects, such as a new port and a coal power plant. Foreign grants amounted to $275 million in 2007. While implementation of aid projects has been spotty over the years, the government is trying to improve this record by streamlining tender processes and increasing project management skills.

Labor

The unemployment rate has declined in recent years to about 6.3% in 2007. The rate of unemployment among women and high school and college graduates, however, has been proportionally higher than the rate for less-educated workers. The government has embarked on educational reforms it hopes will lead to better preparation of students and better matches between graduates and jobs.

Approximately 20% of the 7.04 million-strong work force is unionized, but union membership is declining. There are more than 1,650 registered trade unions, many of which have 50 or fewer members, and 19 federations. Many unions have political affiliations. The Ceylon Workers Congress (CWC) and Lanka Jathika estate workers union are the two largest unions, representing workers in plantation sector. The president of the CWC also is Minister of Youth Empowerment and Socio Economic Development. Other strong and influential trade unions include the Ceylon Mercantile Union, Sri Lanka Nidhahas Sevaka Sangamaya, Jathika Sevaka Sangayama, Ceylon Federation of Trade Unions, Ceylon Bank Employees Union, Union of Post and Telecommunication Officers, Conference of Public Sector Independent Trade Unions, and the JVP-aligned Inter-Company Trade Union.

Public sector trade unions have recently resisted government moves to restructure the state-owned electrical utility board and the petroleum company.

There are 1.5 million Sri Lankan citizens working abroad. A majority are women working as housemaids. Remittances from migrant workers, estimated at around $2.5 billion in 2007, are an important source of foreign exchange for Sri Lanka, second only to earnings from apparel exports.

FOREIGN RELATIONS

Sri Lanka traditionally follows a nonaligned foreign policy but has been seeking closer relations with the United States since December 2001. It participates in multilateral diplomacy, particularly at the United Nations, where it seeks to promote sovereignty, independence, and development in the developing world. Sri Lanka was a founding member of the Non-Aligned Movement (NAM). It also is a member of the Commonwealth, the South Asian Association for Regional Cooperation (SAARC), the World Bank, International Monetary Fund, Asian Development Bank, and the Colombo Plan. Sri Lanka continues its active participation in the NAM, while also stressing the importance it places on regionalism by playing a strong role in SAARC.

U.S.-SRI LANKAN RELATIONS

The United States enjoys cordial relations with Sri Lanka that are based, in large part, on shared democratic traditions. U.S. policy toward Sri Lanka is characterized by respect for its independence, sovereignty, and moderate nonaligned foreign policy; support for the country's unity, terri-

torial integrity, and democratic institutions; and encouragement of its social and economic development. The United States is a strong supporter of ethnic reconciliation in Sri Lanka.

U.S. assistance has totaled more than $1.63 billion since Sri Lanka's independence in 1948. Through the U.S. Agency for International Development (USAID), it has contributed to Sri Lanka's economic growth with projects designed to reduce unemployment, improve housing, develop the Colombo Stock Exchange, modernize the judicial system, and improve competitiveness. At the June 2003 Tokyo Donors' Conference on Sri Lanka, the United States pledged $54 million, including $40.4 million of USAID funding. Following the 2004 tsunami, the United States is providing $135 million in relief and reconstruction assistance.

In addition, the International Broadcast Bureau (IBB)—formerly Voice of America (VOA)—operates a radio-transmitting station in Sri Lanka. The U.S. Armed Forces maintain a limited military-to-military relationship with the Sri Lanka defense establishment.

TRAVEL

Consular Information Sheet

December 30, 2008

Country Description: Sri Lanka is a presidential parliamentary democracy with a developing economy. Civil war and terrorism have seriously disrupted the country since 1983. On January 16, 2008, the government formally withdrew from the Ceasefire Agreement they signed with the Liberation Tigers of Tamil Eelam (LTTE) in 2002. Despite the armed insurgency, Sri Lanka's beaches, hill country, and archeological sites continue to attract thousands of visitors each year from around the world. The Asian Tsunami on December 26, 2004 caused severe damage and loss of life to several coastal areas of eastern, southern, and southwestern Sri Lanka. Most affected resorts have completely recovered. The capital city of Colombo, the Cultural Triangle (Kandy, Anuradhapura, and Polonnaruwa), and many southern beach towns have good tourist facilities.

Entry Requirements: A passport and onward/return ticket and proof of sufficient funds are required. A no-cost landing visa, valid for 30 days, will be granted only to tourists at the time of entry into Sri Lanka. Business travelers are required to have a visa prior to arrival. Individuals traveling to Sri Lanka for purposes other than tourism (i.e. religious work, volunteering or working) must obtain an entry visa from the nearest Sri Lankan Embassy or Consulate before their arrival in Sri Lanka. Foreigners entering Sri Lanka on a landing/tourist visa cannot convert their visa to a non-tourist one, and risk deportation if they engage in activities other than tourism without the appropriate visa. Visitors staying more than 30 days for any purpose must obtain a visa extension from the Department of Immigration and Emigration in Colombo and pay the relevant visa fees. Travelers need yellow fever and cholera immunizations if they are arriving from an infected area. Sri Lankan law requires all foreign guests in private households to register in person at the nearest local police station. Individuals who stay in private households without registering may be temporarily detained for questioning. This requirement does not apply to individuals staying in hotels or guesthouses.

Specific inquiries should be addressed to the Embassy of the Democratic Socialist Republic of Sri Lanka, 2148 Wyoming Avenue NW, Washington, DC 20008, telephone (202) 483-4025, fax numbers (202) 232-7181, e-mail address:consular@slembassyusa.org, the Sri Lankan Consulate General in Los Angeles at 3250 Wilshire Blvd., Suite 1405, Los Angeles, CA 90010, telephone (213) 387-0210, or the U.N. Mission in New York City, telephone (212) 986-7040. There are several honorary Sri Lankan consuls general and consuls in the United States. They can be located at the Sri Lankan Embassy web site. Visit the Embassy of Sri Lanka web site at http://www.slembassyusa.org for the most current visa information.

Safety and Security: The Department of State urges American citizens to carefully evaluate the risks of travel to Sri Lanka and specifically warns Americans against travel to the Northern Province and most of the Eastern Province of Sri Lanka. All of the Northern Province remains dangerous. In Anuradhapura District of the North Central Province, the areas north of Medawachchiya, the A14 road, and the road from Medawachchiya and Horowupatna are dangerous. Non-official travel by U.S. Government personnel to the Eastern Province, other than the A6 road corridor and Trincomalee Town in Trincomalee District, and areas in Ampara District south of the A4 road and west of Maha Oya is prohibited. Official travel by U.S. Government

personnel in the North and East is restricted. While the government has effectively controlled the eastern part of the country since July 2007, security in much of the province is not yet assured. Some LTTE members and larger numbers of armed paramilitary members remain active in the area, leading to instability and incidents of violence. Americans are particularly warned against travel to LTTE-controlled areas in the north, where ongoing conflict between government and LTTE forces poses severe hazards. Roads are substandard and areas recently affected by the conflict may contain both marked and unmarked mine fields, making travel there very dangerous. Police, medical and other emergency help is severely limited or unavailable. Communications within the eastern areas are also limited, with limited cell phone accessibility and very limited landline telephone access. The U.S. Embassy may not be able to provide consular services in a timely manner to American citizens who travel to the North and East. Americans should consider their personal security foremost before considering traveling or working in northern or eastern Sri Lanka.

Since fighting resumed in mid-2006, more than 5,000 persons have been killed. Since 1997, the State Department has included the Liberation Tigers of Tamil Eelam (LTTE) on its list of foreign terrorist organizations. Terrorist activities such as suicide bombings and targeted assassinations in the capital city of Colombo and other areas of the country remain a serious threat. The LTTE and other groups have targeted Sri Lankan security forces, government officials, and civilians. With military operations against the LTTE in northern Sri Lanka escalating, the U.S. Embassy expects that retaliation by the LTTE in the form of assassinations and bombings in the Colombo area and other parts of the country will continue and likely increase.

Throughout its history, the LTTE have engaged in numerous terrorist acts, including suicide bombings at political rallies, government buildings, major economic targets, and military installations. Although there is no indication that American citizens were targeted in these attacks, and none were injured, there is a heightened risk of American citizens being victims of violence by being in the wrong place at the wrong time. On October 28, 2008, an LTTE fixed-wing aircraft attack damaged the main power plant in Colombo. On October 6, 2008, 28 civilians were killed and 80 injured in a suspected suicide attack at the opening of a political party office in Anurdhapura. Sri Lanka's International Airport briefly curtailed operations following an April 2007 attack by LTTE aircraft against the adjacent Katunayake Air Force Base. Also in April, LTTE aircraft also attacked two oil facilities in the Colombo area. LTTE activity has also taken place in the vicinity of Colombo's harbor and port. In February 2007, Sri Lankan forces reported sinking LTTE boats as they attempted to enter Colombo.

LTTE have targeted civilians, in addition to military personnel and government officials. On June 6, 2008, an anti-personnel mine aimed at a passenger bus in Colombo killed 22 civilians and injured 70 others. The same day, another anti-personnel mine that detonated in a passenger bus in Kandy killed 2 civilians. On May 31, 2008, a grenade attack on a bus stop in Wellawatta killed two people and wounded 10. On May 26, a train bombing in Dehiwala killed nine civilians and injured 84. On February 3, 2008, a suicide attacker detonated an explosive device inside Colombo's main railway station, killing 14 civilians and wounding approximately 100 others. The same day, seven were injured when a grenade was detonated in the Dehiwala Zoo. On February 2, 2008, a bomb on a bus going from Kandy to Anuradhapura exploded in Dambulla, killing 20 civilians and injuring over 50. On January 16, 2008, a terrorist attack against civilians traveling on a bus in Uva Province killed at least 24 people, including many women and children, and more than 60 people were injured. In November 2007, a bomb exploded in a clothing store at Nugegoda Junction, a busy suburb of Colombo, killing at least 17 and injuring more than 30 civilians. In light of attacks against civilian buses and trains, American citizens are strongly cautioned against traveling by bus or train in Sri Lanka. U.S. Government personnel are currently prohibited from using these modes of transportation.

The Department of State strongly advises American tourists to avoid military bases and vehicles and VIP security convoys. On January 8, 2008 a fragmentation mine explosion fatally wounded a government minister in the vicinity of Ja-Ela, on the main road between Colombo and Sri Lanka's International Airport. The blast claimed two lives and injured more than 10 security personnel and civilians. In December 2006, the LTTE attacked the motorcade of Defense Secretary Gotabaya Rajapaksa in downtown Colombo. In April 2006, a female suicide bomber attacked the Commander of the Sri Lankan Army at army headquarters in Colombo, killing several members of his staff. Americans are also strongly advised to avoid political rallies and other mass gatherings, and to limit their exposure to government buildings if possible.

Non-Sri Lankan citizens of Tamil heritage have occasionally been detained during security operations. U.S. citizens of any ethnic heritage are encouraged to keep their passports with them at all times. In the event of a terrorist attack, Americans should monitor local radio and television, seek cover away from windows, and return to their homes or hotels when it is safe to do so. In the event of LTTE air attacks, Americans are advised to remain in their homes or hotels away from windows during air attacks to avoid falling shrapnel or bullets. If traveling, individuals should find a safe location inside a building as soon as possible. The Government of Sri Lanka has periodically imposed curfews in Colombo; Americans should strictly observe curfew regulations and monitor local radio and television. As security forces increase their vigilance, travelers in Colombo are often the subject of searches by the police. U.S. citizens should expect frequent delays in

travel due to the deteriorating security situation in Sri Lanka. American citizens should comply with instructions from the security forces. Americans are strongly advised against taking photographs of Sri Lankan military bases, foreign missions in Sri Lanka and government buildings, which could be a violation of the law under current security restrictions in the country.

Tourists should be aware that the LTTE has the capability to operate in several national parks in the North and East of Sri Lanka, including parks that remain open to the public. In October 2007, the LTTE attacked a Sri Lankan army camp in Yala National Wildlife Sanctuary, located in southeastern Sri Lanka, killing six soldiers and wounding three others. The incident took place in a tourist area of the wildlife park, but foreigners were not the object of the attack and none were injured. However, the incident highlights the prevailing risk to non-combatants of being in the wrong place at the wrong time.

For the latest security information, Americans traveling abroad should regularly monitor the Department of State, Bureau of Consular Affair's Internet site at http://travel.state.gov, where the current Travel Warnings and Travel Alerts, including the Worldwide Caution can be found.

Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S. and Canada, or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: While Sri Lanka has a high crime rate, relatively few incidents have been directed against the American community residing in Colombo. Most of the violent crimes occur within the local community, although violent crime directed at foreigners is not unheard of. Routine petty crime, especially theft of personal property and pick pocketing, is not uncommon if the traveler does not take appropriate safeguards. Street hustlers or "touts" are common around hotels, shopping centers and tourist sites. Incidents of credit card fraud are increasing, and travelers should consider paying in cash, whenever possible, and should carefully review billing statements to ensure that purchases displayed on the statements are accurate. Brawls in nightclubs and bars are not uncommon and sometimes involve foreigners.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. American citizens, who are victims of a crime while overseas, in addition to reporting to local police, should contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist with finding appropriate medical care, contact family members or friends, and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can provide information on the local criminal justice process and to find an attorney if needed.

The local equivalent to the "911" emergency line in Sri Lanka is:119 for the police (answered 24 hours); 112 if dialed from a cell phone.

Medical Facilities and Health Information: Medical facilities outside Colombo are limited. The U.S. Embassy maintains a list of private physicians who may be consulted. Medical supplies are uneven; travelers should carry any special medications with them. There are six large hospitals in the Colombo area, including three with emergency trauma service— Asiri Hospital, Apollo Hospital, and the government-run General Hospital. Serious medical problems may require evacuation to the United States or to the nearest country where adequate medical facilities or treatment is available, usually Thailand or Singapore. Neither Thailand nor Singapore requires American citizens to have an entry visa.

Several mosquito-borne diseases, including chikungunya, dengue fever, Japanese encephalitis and malaria, are present in Sri Lanka. Adequate mosquito protection is strongly advised. Some HIV/AIDS entry restrictions exist for visitors to and foreign residents of Sri Lanka. Although there are no specific entry barriers relating specifically to HIV/AIDS, Sri Lankan law does allow for immigration officers to refer travelers to a physician for examination if s/he judges them to pose a public health risk. In practice this is a rare occurrence, but travelers should be aware that Sri Lankan law allows for the denial of entry to any foreigner whom a physician, upon referral from an immigration officer, certifies as medically undesirable. Please verify this information with the Embassy of Sri Lanka at www.slembassyusa.org before you travel.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's web site at http://wwwn.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith/en.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Sri Lanka is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

Vehicular traffic moves on the left (British style). Traffic in Colombo is very congested. Narrow two-lane

highways, overloaded trucks, dangerously-driven buses and a variety of conveyances on the road, ranging from ox carts and bicycles to new four-wheel-drive jeeps, make driving a challenge and dangerous. Unexpected road blocks and one-way streets are common and may not be clearly marked.

Many visitors hire cars and drivers for long trips through the country. Individuals choosing to hire three-wheeled vehicles should negotiate prices beforehand to avoid confrontations. Please refer to our Road Safety page for more information. Visit the web site of Sri Lanka's national tourist office and national authority responsible for road safety at http://www.lanka.net.

Aviation Safety Oversight: As there is no direct commercial air service between the United States and Sri Lanka, the U.S. Federal Aviation Administration (FAA) has not assessed Sri Lanka's Civil Aviation Authority for compliance with International Civil Aviation Organization (ICAO) aviation safety standards. For more information, travelers may visit the FAA's web site at http://www.faa.gov.

Special Circumstances: Sri Lanka recognizes dual nationality in some cases. For further information, please contact the Sri Lankan Embassy in Washington DC, the Consulate General in Los Angeles, or the U.N. Mission in New York City.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating Sri Lanka's laws, even unknowingly, may be expelled, arrested, or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Sri Lanka are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in Sri Lanka are encouraged to register with the U.S. Embassy through the State Department's travel registration web site so that they can obtain updated information on travel and security within Sri Lanka. Americans without Internet access may register directly with the U.S. Embassy in Colombo. By registering, American citizens make it easier for the Embassy to contact them in case of emergency.

The U.S. Embassy in located at 210 Galle Road, Colombo 3, Sri Lanka. The Embassy's telephone number during normal business hours Monday through Friday is (94) (11) 249 8500. The after-hours and emergency telephone number is (94) (11) 249 8888. The Consular Section fax number is (94)-(11)-249 8590. The Embassy's Internet address is http://colombo.usembassy.gov. The Consular Section has a specific email address dedicated to American Citizens Services at ColomboACS@state.gov. The general email address for the consular section is consularcolombo@state.gov. The Embassy in Colombo also covers the Republic of Maldives.

Intercountry Adoption

March 2007

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *International sAdoption* section of this book and review current reports online at http://adoption.state.gov.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is based on public sources and current understanding. Questions involving foreign and U.S. immigration laws and legal interpretation should be addressed respectively to qualified foreign or U.S. legal counsel.

Important Notes: The Commissioner of Probation and Child Care Services in Colombo, Sri Lanka's capital, has advised the U.S. Embassy that foreign nationals residing in Sri Lanka are not permitted to adopt Sri Lankan children. In addition, foreign citizens may not adopt children under three months old. U.S. citizens interested in adopting from Sri Lanka are strongly encouraged to contact U.S. consular officials in Sri Lanka before formalizing an adoption agreement to ensure that appropriate procedures have been followed that will make it possible for the Embassy to issue a U.S. immigrant visa for the child.

Patterns of Immigration: Please review current reports online at http://adoption.state.gov.

Adoption Authority: The government office responsible for adoptions in Sri Lanka is:

Department of Probation and Child Care Services

LHP Building, 2nd floor

150/8 Nawala Rd.

Nugegoda, Sri Lanka

Telephone No. 94-11-285-3575 or 94-11-2853553

Fax No. 94-11-2852393

Website: usembassy.colombo.gov; email address: consularcolombo@state.gov

The Department's hours of operation are from 8.30 a.m. to 4.15 p.m.

Every application for adoption must be in conformity with the provisions of the Adoption of Children's Ordinance (Chapter 61), as amended. The Sri Lankan Department of Probation and Child Care Services may, as needed, amend the adoption procedures.

Eligibility Requirements for Adoptive Parents: Under Sri Lankan law, adoption by single persons is not permitted. An application for adoption must be made jointly by a husband and wife. Each of the applicants must be over the age of 25 years and not less than 21 years older than the child for whom the application is made. Both husband and wife must be present during the court proceedings unless the court waives personal appearances on the grounds of ill health (supported by a medical practitioner recognized by the U.S. Government). In such cases, a power of attorney will also be necessary.

Residency Requirements: As was noted earlier in this flyer, the Commissioner of Probation and Child Care Services has advised the U.S. Embassy in Colombo that foreign nationals residing in Sri Lanka are not permitted to adopt Sri Lankan children.

Time Frame: The process for adopting a child from Sri Lanka is lengthy. Under Sri Lankan procedures, an application from foreign prospective adoptive parents to adopt a Sri Lankan child must be registered with the Sri Lankan government for at least one year before a child may be matched with that family. This is even before the actual court process or any required travel by the prospective parents to Sri Lanka. Prospective adoptive parents should be prepared to stay for a period of about four weeks for the court procedures to be finalized. Once the child has received a U.S. immigrant visa, the family should be able to depart the country the following day.

Fees: Prospective adoptive parents should abstain from making any payment or giving any reward to any person in consideration of the adoption except such as the Court may sanction. Legal action would be taken against those who commit this offense. The fee a lawyer would charge for an adoption case is approximately about $500 and the court fees will be only $1 (Rs. 100/-).

The lawyers' fees could vary from lawyer to lawyer and the court does not have any control over this.

Adoption Agencies and Attorneys: Foreign prospective adoptive parents are not allowed, on their own, to locate children for adoption. Only the Sri Lankan State Receiving Homes and Voluntary Children's Homes that have been registered with the Department of Probation and Child Care Services for over five years may perform this function. These Homes (also referred to in this flyer as Sri Lankan adoption agencies) must also have specific authorization of the Commissioner of Probation.

Adoption Procedures: The District Court of Colombo and the District Court of Colombo South are empowered to make orders of adoption of Sri Lankan children by persons not resident and domiciled in Sri Lanka.

Foreigners who do not reside in Sri Lanka should note and follow the procedures below in order to pursue the adoption of a Sri Lankan child.

- Have a home study conducted in the United States.
- Collect other required documents.
- Send in the application. The application should be in the form of a letter, in duplicate, addressed to the Commissioner of Probation and Child Care Services.
- File I-600A Petition with U.S. Immigration.
- Wait for the "Letter of Allocation" from the Sri Lankan Adoption Agency.
- Make Arrangements to Travel.
- Immediately upon arrival in Sri Lanka, prospective adoptive parents should contact the U.S. Embassy in Colombo to ensure that everything is in order for the processing of an immigrant visa and to obtain additional information on adoption procedures.
- Contact the Social Worker. The Commissioner of Probation & Child Care Services will have assigned a social worker to the case.
- Visit the Child. After the interview, the prospective parents will be issued a letter from the Commissioner authorizing them to see the child at the specified children's home.
- Prospective adoptive parents must engage a Sri Lankan attorney for the legal proceedings. The U.S. Embassy in Colombo has a list of Sri Lankan attorneys who have indicated a willingness to assist U.S. citizens in Sri Lankan legal cases. This list may be found at: http:\\colombo.usembassy.gov. The attorney will petition for the adoption. If all is in accordance with the applicable laws and regulations, the court issues an order of adoption.
- Obtain the Certificate of Adoption.
- Obtain a Sri Lankan Passport for the Adopted Child.
- Apply for and Obtain a U.S. Immigrant Visa for the Child.
- Submit Post-Placement Reports.

Please see the *Intercountry Adoption* section of this book for more details and review current reports online at http://adoption.state.gov.

Additional Information: Specific questions regarding adoption in Sri Lanka may be addressed to the Consular Section of the U.S. Embassy in Colombo. General questions regarding intercountry adoption may be addressed to the Office of Children's Issues, U.S. Department of State, CA/OCS/CI, SA-29, 2201 C Street, NW, Washington, DC 20520-4818, toll-free Tel: 1-888-407-4747 with specific questions.

Travel Warning

December 22, 2008

The Department of State warns American citizens traveling to or living in Sri Lanka about the continuing danger of terrorist attacks throughout the country. This replaces the Travel Warning for Sri Lanka dated June 13, 2008 and highlights changes in locations of security concerns, and notes recent terrorist attacks.

The Department of State urges American citizens to evaluate carefully the risks of travel to Sri Lanka and specifically warns Americans against travel to the Northern Province and most of the Eastern Province of Sri Lanka. All of the Northern Province remains dangerous. In Anuradhapura District of the North Central Province, the areas north of Medawachchiya, the A14 road, and the road from Medawachchiya and Horowupatna are dangerous. Non-official travel by U.S. Government personnel to the Eastern Province, other than the A6 road corridor and Trincomalee Town in Trincomalee District, and areas in Ampara District south of the A4 road and west of Maha Oya, is prohibited. Since early January 2008, fighting between the Sri Lankan military, paramilitary groups and the Liberation Tigers of Tamil Eelam (LTTE) has increased, and bomb explosions in densely populated areas have killed dozens of civilians, including in some areas frequented by foreign tourists. Although there is no specific indication that American citizens or institutions have been targeted, there is a heightened risk of American citizens becoming victims of violence just by being in the wrong place at the wrong time. American citizens who decide to travel to Sri Lanka despite this Travel Warning should be aware of their personal surroundings and follow prudent security practices. Americans should avoid large crowds and public gatherings and should particularly avoid political rallies, military bases, and government and military vehicle convoys, which are frequent targets of LTTE attacks. Americans are also strongly advised against using public transportation in Sri Lanka, as civilian buses and trains have increasingly been the targets of terrorist bomb attacks in recent months. U.S. Government personnel are currently prohibited from using these modes of transportation.

Recent incidents include an October 28, 2008 LTTE aircraft attack that damaged the main power plant in Colombo, and a suicide bombing on October 6, 2008 that killed 28 civilians and injured 80 at the opening of a political party office in Anuradhapura.

On June 6, 2008, 22 civilians were killed and 70 injured by an anti-personnel mine aimed at a passenger bus in Colombo. The same day, two people were killed by another anti-personnel mine detonated in a passenger bus in Kandy. On May 31, 2008, a grenade attack on a bus stop in Wellawatta killed two people and wounded 10. On May 26, nine civilians were killed and 84 injured in a train bombing in Dehiwala. On February 3, 2008, 14 civilians were killed and approximately 100 were injured when a suicide attacker detonated an explosive device inside the main railway station in Colombo. The same day, seven were injured when a grenade was detonated at the Dehiwala Zoo in Colombo. On February 2, 2008, a bomb on a bus from Kandy, headed for Anuradhapura, exploded in Dambulla and killed 18 civilians and injured over 50.

Americans are also advised to avoid government buildings, military installations, and government vehicle convoys. On January 8, 2008, a government minister was killed and several persons were injured when his vehicle was attacked on the road between Colombo's international airport and central Colombo. In 2007, the LTTE also attacked an Army camp in Yala National Sanctuary, and the Katunayake Air Force Base in Colombo was attacked by LTTE aircraft, causing brief suspension of operations at the adjacent Bandaranaike International Airport. Foreign tourists were not specifically targeted in these attacks and none were injured.

While the government has effectively controlled the eastern part of the country since July 2007, security in much of the Eastern Province is not yet assured. Some LTTE members and larger numbers of armed paramilitary members are active in the area, leading to instability and incidents of violence. This situation is likely to continue for some time. Americans are particularly warned against travel to LTTE-controlled areas in the north, which may pose severe hazards.

Americans should comply with all instructions from security forces and police when traveling in Sri Lanka. American citizens, including those of Sri Lankan origin, whether living in Sri Lanka or traveling there even for only a few days, are strongly urged to register with the Embassy. Registration will allow the embassy to provide direct information on the security situation as necessary. Registration is done on-line and can be done in advance of travel at https://travelregistration.state.gov/ibrs. Information on registering can also be found at the Embassy website: http://srilanka.usembassy.gov or at the Department of State's Consular

Affairs website: http://travel.state.gov/travel. The U.S. Embassy is located at 210 Galle Road, Colombo 3, Sri Lanka. The Embassy's telephone number during normal business hours Monday through Friday is (94) (11) 249 8500. The after-hours emergency telephone number is (94) (11) 249 8888. The Consular Section fax number is (94) (11)-249 8590. The Embassy's web site is http://srilanka.usembassy.gov. The Consular Section has a specific email address dedicated to American Citizens Services at ColomboACS@state.gov. The general email address for the consular section is consularcolombo@state.gov. The Embassy in Colombo also covers the Republic of Maldives.

As the Department continues to develop information on any potential security threats to U.S. citizens overseas, it shares credible threat information through its consular information documents, including the Worldwide Caution, available on the Internet at http://travel.state.gov. In addition to information on the Internet, travelers may obtain up-to-date information on security conditions by calling 1-888-407-4747 toll-free in the U.S. and Canada or, outside the U.S. and Canada, on a regular toll line at 1-202-501-4444. These numbers are available from 8:00 a.m. to 8:00 p.m. Eastern Time, Monday through Friday (except U.S. federal holidays).

SUDAN

Compiled from the July 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Republic of the Sudan

PROFILE

Geography

Area: 2.5 million sq. km. (967,500 sq. mi.); the largest country in Africa and almost the size of continental U.S. east of the Mississippi River.

Cities: Capital—Khartoum (pop. 1.4 million). Other cities—Omdurman (2.1 million), Port Sudan (pop. 450,000), Kassala, Kosti, Juba (capital of southern region).

Land boundaries: Central African Republic, Chad, Democratic Republic of the Congo, Egypt, Eritrea, Ethiopia, Kenya, Libya, and Uganda.

Terrain: Generally flat with mountains in east and west. Khartoum is situated at the confluence of the Blue and White Nile Rivers. The southern regions are inundated during the annual floods of the Nile River system (the Suud or swamps).

Climate: Desert and savanna in the north and central regions and tropical in the south.

People

Nationality: Noun and adjective (sing. and pl.)—Sudanese.

Population: (2007 est.) 39.4 million; 30%-33% urban.

Annual growth rate: (2007 est.) 2.1%.

Ethnic groups: Arab/Muslim north and black African/Christian and animist south.

Religions: Islam (official), indigenous beliefs (southern Sudan), Christianity.

Languages: Arabic (official), English, tribal languages.

Education: Years compulsory—8. Attendance—35%-40%. Literacy—61%.

Health: Infant mortality rate—92/1,000. Life expectancy—49.1 yrs.

Work force: Agriculture—80%; industry and commerce—7%; government—13%.

Government

Independence: January 1, 1956.

Type: Provisional Government established by the Comprehensive Peace Agreement signed in January 2005 that provides for power sharing pending national elections. National elections are to occur no later than July 2009.

Constitution: The Interim National Constitution was adopted on July 6, 2005. It was drafted by the National Constitutional Review Commission, as mandated by the January 2005 Comprehensive Peace Agreement (CPA). The Government of Southern Sudan also has a constitution adopted in December 2005; it was certified by the Ministry of Justice to be in conformance with the Interim National Constitution and the Comprehensive Peace Agreement.

Government branches: Executive—executive authority is held by the president, who also is the prime minister, head of state, head of government, and commander in chief of the armed forces. Effective July 9, 2005, the executive branch includes a first vice president and a vice president. As stipulated by the Comprehensive Peace Agreement, the first vice president position is held by a person selected by the Sudan People's Liberation Movement (SPLM) who concurrently serves as President of the GOSS. Legislative—National Legislature. The National Assembly, the lower house, has 450 members with a power-sharing formula which allows the ruling National Congress Party 52% of seats, the SPLM 28%, and other Northern and Southern parties, 14% and 6% respectively. There is also an upper house, the Council of States, which is composed of two appointed representatives from each of the nation's 26 states, including two observers from Abyei. Judicial—High Court, Minister of Justice, Attorney General, civil and special tribunals.

Political subdivisions: Twenty-six states, each with a governor appointed by the president, along with a state cabinet and a state legislative assembly.

Political parties: Currently there are several political parties in both the nation's north and south. All political parties were banned following the June 30, 1989 military coup.

Political associations, which take the place of parties, were authorized in 2000. Some parties are in self-imposed exile.
Budget: (2007 est.) $9.7 billion.
Defense: (2004 est.) 40% of GNP.

Economy

GDP: (2007, PPP) $107.86 billion.
GDP annual growth rate: (2007) 12.8%.
Per capita income: GDP: (2007) $2,500.
Avg. annual inflation rate: (2007) 5.3%.
Natural resources: Modest reserves of oil, natural gas, gold, iron ore, copper, and other industrial metals.
Agriculture: Products—cotton, peanuts, sorghum, sesame seeds, gum arabic, sugarcane, millet, livestock.
Industry: Types—motor vehicle assembly, cement, cotton, edible oils and sugar refining.
Trade: (2007 est.) Exports—$9.156 billion: crude oil and petroleum products, cotton, gold, sorghum, peanuts, gum arabic, sugar, meat, hides, live animals, and sesame seeds. Major markets—Egypt, Persian Gulf states, Saudi Arabia, Malaysia, China, South Korea. Imports (2007 est.)—$8.262 billion: oil and petroleum products, oil pipeline, pumping and refining equipment, chemical products and equipment, wheat and wheat flour, transport equipment, foodstuffs, tea, agricultural inputs and machinery, industrial inputs and manufactured goods. Major suppliers—European Union, China, Malaysia, Canada, U.K., Italy, Germany, Saudi Arabia, Egypt, the Persian Gulf states, and surrounding East African nations.
Fiscal year: January 1-December 31.

PEOPLE

Sudan's population is one of the most diverse on the African continent. There are two distinct major cultures—"Arab" and black African—with hundreds of ethnic and tribal subdivisions and language groups, which make effective collaboration among them a major political challenge. The northern states cover most of the Sudan and include most of the urban centers. Most of the 22 million Sudanese who live in this region are Arabic-speaking Muslims, though the majority also uses a non-Arabic mother tongue—e.g., Nubian, Beja, Fur, Nuban, Ingessana, etc. Among these are several distinct tribal groups: the Kababish of northern Kordofan, a camel-raising people; the Ja'alin and Shaigiyya groups of settled tribes along the rivers; the seminomadic Baggara of Kordofan and Darfur; the Hamitic Beja in the Red Sea area and Nubians of the northern Nile areas, some of whom have been resettled on the Atbara River; and the Nuba of southern Kordofan and Fur in the western reaches of the country.

The southern region has a population of around 6 million and a predominantly rural, subsistence economy. Except for a ten-year hiatus, Southern Sudan has been embroiled in conflict since Sudan's independence in 1956, resulting in major destruction and displacement since independence. More than 2 million people died over the course of the war, and more than 4 million are internally displaced or became refugees as a result of the civil war and war-related impacts. The Southern Sudanese practice mainly indigenous traditional beliefs, although Christian missionaries have converted some. The South also contains many tribal groups and many more languages than are used in the North. The Dinka—whose population is estimated at more than 1 million—is the largest of the many black African tribes of the Sudan. Along with the Shilluk and the Nuer, they are among the Nilotic tribes. The Azande, Bor, and Jo Luo are "Sudanic" tribes in the west, and the Acholi and Lotuhu live in the extreme south, extending into Uganda.

In 2007, Sudan's population reached an estimated 39 million. With the establishment of the National Population Census Council, a population census began in April 2008 in preparation for national elections in 2009. The population of metropolitan Khartoum (including Khartoum, Omdurman, and North Khartoum) is growing rapidly and ranges from 6-7 million, including around 2 million internally displaced persons from the former southern war zone as well as western and eastern regions affected by drought, conflict, and marginalization. In Darfur, there are an estimated 2.4 million internally displaced persons, another 250,000 refugees in 12 camps in neighboring Chad, and an additional 5,000-7,000 in the border area.

HISTORY

Sudan was a collection of small, independent kingdoms and principalities from the beginning of the Christian era until 1820-21, when Egypt conquered and unified the northern portion of the country. However, neither the Egyptian nor the Mahdist state (1883-1898) had any effective control of the southern region outside of a few garrisons. Southern Sudan remained an area of fragmented tribes, subject to frequent attacks by slave raiders. In 1881, a religious leader named Muhammad ibn Abdalla proclaimed himself the Mahdi, or the "expected one," and began a religious crusade to unify the tribes in western and central Sudan. His followers took on the name "Ansars" (the followers) which they continue to use today and are associated with the single largest political grouping, the Umma Party, led by a descendant of the Mahdi, Sadiq al Mahdi. Taking advantage of dissatisfaction resulting from Ottoman-Egyptian exploitation and maladministration, the Mahdi led a nationalist revolt culminating in the fall of Khartoum in 1885. The Mahdi died shortly thereafter, but his state survived until overwhelmed by an invading Anglo-Egyptian force under Lord Kitchener in 1898. While nominally administered jointly by Egypt and Britain, Britain exercised control, formulated policies, and supplied most of the top administrators.

Independence

In February 1953, the United Kingdom and Egypt concluded an agreement providing for Sudanese self-government and self-determination. The transitional period toward independence began with the inauguration of the first parliament in 1954. With the consent of the British and Egyptian Governments, Sudan achieved independence on January 1, 1956, under a provisional constitution. This constitution was silent on two crucial issues for southern leaders—the secular or Islamic character of the state and its federal or unitary structure. However, the Arab-led Khartoum government reneged on promises to southerners to create a federal system, which led to a mutiny by southern army officers that launched 17 years of civil war (1955-72).

Sudan has been at war with itself for more than three quarters of its existence. Since independence, protracted conflict rooted in deep cultural and religious differences retarded Sudan's economic and political development and forced massive internal displacement of its people. Northerners, who have traditionally controlled the country, have sought to unify it along the lines of Arabism and Islam despite the opposition of non-Muslims, southerners, and marginalized peoples in the west and east. The resultant civil strife affected Sudan's neighbors, as they alternately sheltered fleeing refugees or served as operating bases for rebel movements.

In 1958, General Ibrahim Abboud seized power and pursued a policy of Arabization and Islamicization in the south that strengthened southern opposition. General Abboud was overthrown in 1964 and a civilian caretaker government assumed control. Southern leaders eventually divided into two factions, those who advocated a federal solution and those who argued for self-determination, a euphemism for secession since it was assumed the south would vote for independence if given the choice. Until 1969, there was a succession of governments that proved unable either to agree on a permanent constitution or to cope with problems of factionalism, economic stagnation, and ethnic dissidence. These regimes were dominated by "Arab" Muslims who asserted their Arab-Islamic agenda and refused any kind of self-determination for southern Sudan.

In May 1969, a group of communist and socialist officers led by Colonel Gaafar Muhammad Nimeiri, seized power. A month after coming to power, Nimeiri proclaimed socialism (instead of Islamism) for the country and outlined a policy of granting autonomy to the south. Nimeiri in turn was the target of a coup attempt by communist members of the government. It failed and Nimeiri ordered a massive purge of communists. This alienated the Soviet Union, which withdrew its support. Already lacking support from the Muslim parties he had chased from power, Nimeiri could no longer count on the communist faction. Having alienated the right and the left, Nimeiri turned to the south as a way of expanding his limited powerbase. He pursued peace initiatives with Sudan's hostile neighbors, Ethiopia and Uganda, signing agreements that committed each signatory to withdraw support for the other's rebel movements. He then initiated negotiations with the southern rebels and signed an agreement in Addis Ababa in 1972 that granted a measure of autonomy to the south. Southern support helped him put down two coup attempts, one initiated by officers from the western regions of Darfur and Kordofan who wanted for their region the same privileges granted to the south.

However, the Addis Ababa Agreement had no support from either the secularist or Islamic northern parties. Nimeiri concluded that their lack of support was more threatening to his regime than lack of support from the south so he announced a policy of national reconciliation with all the religious opposition forces. These parties did not feel bound to observe an agreement they perceived as an obstacle to furthering an Islamist state. The scales against the peace agreement were tipped in 1979 when Chevron discovered oil in the south. Northern pressure built to abrogate those provisions of the peace treaty granting financial autonomy to the south. Ultimately in 1983, Nimeiri abolished the southern region, declared Arabic the official language of the south (instead of English) and transferred control of southern armed forces to the central government. This was effectively a unilateral abrogation of the 1972 peace treaty. The second Sudan civil war effectively began in January 1983 when southern soldiers mutinied rather than follow orders transferring them to the north. In September 1983, as part of an Islamicization campaign, President Nimeiri announced that traditional Islamic punishments drawn from Shari'a (Islamic Law) would be incorporated into the penal code. This was controversial even among Muslim groups. Amputations for theft and public lashings for alcohol possession became common. Southerners and other non-Muslims living in the north were also subjected to these punishments. In April 1985, while out of the country, Nimeiri was overthrown by a popular uprising in Khartoum provoked by a collapsing economy, the war in the south, and political repression. Gen. Suwar al-Dahab headed the transitional government. One of its first acts was to suspend the 1983 constitution and disband Nimeiri's Sudan Socialist Union.

Elections were held in April 1986, and a civilian government took over after the April 1986 elections. There were tentative moves towards negotiating peace with the South. However, any proposal to exempt the South from Islamic law was unacceptable to those who supported Arabic supremacy. In 1989, an Islamic army faction, led by General Omar al-Bashir, mounted a coup and installed the National Islamic Front. The new government's commitment to the Islamic cause intensified the north-south conflict.

Meanwhile, the period of the 1990s saw a growing sense of alienation in the western and eastern regions of Sudan from the Arab center. The rulers in Khartoum were seen as less and less responsive to the concerns and grievances of both Muslim and

non-Muslim populations across the country. Alienation from the "Arab" center caused various groups to grow sympathetic to the southern rebels led by the Sudan People's Liberation Movement/Army (SPLM/A), and in some cases, prompted them to flight alongside it.

The Bashir government combined internal political repression with international Islamist activism. It supported radical Islamist groups in Algeria and supported Iraq's invasion of Kuwait. Khartoum was established as a base for militant Islamist groups: radical movements and terrorist organizations like Osama Bin Laden's al Qaida were provided a safe haven and logistical aid in return for financial support. In 1996, the U.N. imposed sanctions on Sudan for alleged connections to the assassination attempt on Egyptian President Mubarak. Its policy toward the South was to pursue the war against the rebels while trying to manipulate them by highlighting tribal divisions. Ultimately, this policy resulted in the rebels' uniting under the leadership of Colonel John Garang. During this period, the rebels also enjoyed support from Ethiopia, Eritrea, and Uganda. The Bashir government's "Pan-Islamic" foreign policy, which provided support for neighboring radical Islamist groups, was partly responsible for this support for the rebels.

The 1990s saw a succession of regional efforts to broker an end to

the Sudanese civil war. Beginning in 1993, the leaders of Eritrea, Ethiopia, Uganda, and Kenya pursued a peace initiative for the Sudan under the auspices of the Intergovernmental Authority for Development (IGAD), but results were mixed. Despite that record, the IGAD initiative promulgated the 1994 Declaration of Principles (DOP) that aimed to identify the essential elements necessary to a just and comprehensive peace settlement; i.e., the relationship between religion and the state, power sharing, wealth sharing, and the right of self-determination for the South. The Sudanese Government did not sign the DOP until 1997 after major battlefield losses to the SPLA. That year, the Khartoum government signed a series of agreements with rebel factions under the banner of "Peace from Within." These included the Khartoum, Nuba Mountains, and Fashoda Agreements that ended military conflict between the government and significant rebel factions. Many of those leaders then moved to Khartoum where they assumed marginal roles in the central government or collaborated with the government in military engagements against the SPLA. These three agreements paralleled the terms and conditions of the IGAD agreement, calling for a degree of autonomy for the South and the right of self-determination.

However, by mid-2001, prospects for peace in Sudan appeared fairly remote. A few days before the September 11, 2001, terrorist attacks in New York and Washington, the Bush Administration named former Senator John Danforth as its Presidential Envoy for Peace in the Sudan. His role was to explore the prospects that the U.S. could play a useful role in the search for a just end to the civil war, and enhance the delivery of humanitarian aid to reduce the suffering of the Sudanese people stemming from the effects of civil war. The terrorist attacks of September 11 dramatically impacted the bilateral relationship between the United States and the Khartoum government. (For "U.S.-Sudanese Relations," see below.)

End to the Civil War

In July 2002, the Government of Sudan and the SPLM/A reached a historic agreement on the role of state and religion and the right of southern Sudan to self-determination. This agreement, known as the Machakos Protocol and named after the town in Kenya where the peace talks were held, concluded the first round of talks sponsored by the IGAD. The effort was mediated by retired Kenyan General Lazaro Sumbeiywo. Peace talks resumed and continued during 2003, with discussions regarding wealth sharing and three contested areas.

On November 19, 2004, the Government of Sudan and the SPLM/A signed a declaration committing themselves to conclude a final comprehensive peace agreement by December 31, 2004, in the context of an extraordinary session of the United Nations Security Council (UNSC) in Nairobi, Kenya—only the fifth time the Council has met outside of New York since its founding. At this session, the UNSC unanimously adopted Resolution 1574, which welcomed the commitment of the government and the SPLM/A to achieve agreement by the end of 2004, and underscored the international community's intention to assist the Sudanese people and support implementation of the comprehensive peace agreement. It also demanded that the Government of Sudan and the Sudan Liberation Movement/Army (SLM/A) and the Justice and Equality Movement (JEM) halt all violence in Darfur.

In keeping with their commitment to the UNSC, the Government of Sudan and the SPLM/A initialed the final elements of the comprehensive agreement on December 31, 2004. The two parties formally signed the Comprehensive Peace Agreement (CPA) on January 9, 2005. The U.S. and the international community have welcomed this decisive step forward for peace in Sudan.

GOVERNMENT AND POLITICAL CONDITIONS

Comprehensive Peace Agreement

The 2005 CPA established a new Government of National Unity (GNU) and the interim Government of Southern Sudan (GOSS) and called for wealth-sharing, power-sharing, and security arrangements between the two parties. The historic agreement provides for a ceasefire, withdrawal of troops from southern Sudan, and the repatriation and resettlement of refugees. It also stipulates that by the end of the six-year interim period, during which the various provisions of the CPA are implemented, there will be elections at all levels, including for president, state governors, and national and state legislatures.

On July 9, 2005, the Presidency was inaugurated with al-Bashir sworn in as President and John Garang, SPLM leader, installed as First Vice President. Ratification of the Interim National Constitution followed. The Constitution declares Sudan to be a "democratic, decentralized, multi-cultural, multi-ethnic, multi-religious, and multi-lingual State." On July 30, 2005, the charismatic and revered SPLM leader John Garang died in a helicopter crash. The SPLM immediately named Salva Kiir, Garang' s deputy, as First Vice President. As stipulated in the CPA, Kiir now holds the posts of President of the Government of Southern Sudan and Commander-in-Chief of the SPLA.

Implemented provisions of the CPA include the formation of the National Legislature, appointment of Cabinet members, establishment of the Government of Southern Sudan and the signing of the Southern Sudan Constitution, and the appointment of state governors and adoption of state constitutions.

A number of CPA-mandated commissions have also been created. Thus

far, those formed include the Assessment and Evaluation Commission, National Petroleum Commission, Fiscal and Financial Allocation and Monitoring Commission, and the North-South Border Commission. The Ceasefire Political Commission, Joint Defense Board, and Ceasefire Joint Military Committee were also established as part of the security arrangements of the CPA. Some commissions remain outstanding.

With the establishment of the National Population Census Council, a population census began in April 2008 in preparation for national elections in 2009. The CPA mandates that the Government of Southern Sudan hold a referendum at the end of a six-year interim period in 2011, allowing southerners to secede if they so wish. On January 9, 2007, commemoration of the second anniversary of the CPA was held in Juba. During the ceremony, President Bashir and First Vice President Kiir exchanged forceful accusations concerning the delays in the implementation of the agreement. In his remarks, Salva Kiir described the achievement of the CPA as the most important achievement in modern Sudanese history and confirmed that there would be no retreat from the path of peace. While some progress has been achieved during the last two years, meaningful implementation of key CPA requirements has faltered, and relations between the National Congress Party (NCP) and SPLM were at an all-time low at the end of 2007. In October 2007, a lack of progress on issues such as north-south border demarcation, certain security provisions, and north-south sharing of oil revenues threatened to erode the CPA as the SPLM threatened a permanent withdrawal from the Government of National Unity. International attention maintains focus on the CPA as the mainstay of peace in Sudan in response to calls for reinvigorated CPA implementation. Implementation of the CPA is moving forward slowly, but the return to peace in Southern Sudan has brought political, civil, and economic dividends.

Darfur

In 2003, while the historic north-south conflict was on its way to resolution, increasing reports of attacks on civilians, especially aimed at non-Arab tribes, began to surface. A rebellion broke out in Darfur, in the extremely marginalized western Sudan, led by two rebel groups—the SLM/A and the JEM. These groups represented agrarian farmers who are mostly non-Arabized black African Muslims. In seeking to defeat the rebel movements, the Government of Sudan increased arms and support to local tribal and other militias, which have come to be known as the "Janjaweed." Their members were composed mostly of Arabized black African Muslims who herded cattle, camels, and other livestock. Attacks on the civilian population by the Janjaweed, often with the direct support of Government of Sudan forces, have led to the death of tens of thousands of persons in Darfur, with an estimated 2.0 million internally displaced persons and another 234,000 refugees in neighboring Chad.

On September 9, 2004, Secretary of State Colin L. Powell told the Senate Foreign Relations Committee, "genocide has been committed in Darfur and that the Government of Sudan and the Janjaweed bear responsibility—and that genocide may still be occurring." President Bush echoed this in July 2005, when he stated that the situation in Darfur was "clearly genocide." A cease-fire between the parties was signed in N'Djamena, Chad, on April 8, 2004. However, despite the deployment of an African Union Military Mission to monitor implementation of the cease-fire and investigate violations, violence has continued. The SLM/A and JEM negotiated with the Government of Sudan under African Union auspices, resulting in additional protocols addressing the humanitarian and security aspects of the conflict on November 9, 2004. Like previous agreements, however, these were violated by both sides. Talks resumed in Abuja on June 10, 2005, resulting in a July 6 signing of a Declaration of Principles. Further talks were held in the fall and early winter of 2005 and covered power sharing, wealth sharing, and security arrangements. These negotiations were complicated by a split in SLM/A leadership.

The African Union, with the support of the UNSC, the U.S., and the rest of the international community, began deploying a larger monitoring and observer force in October 2004. The UNSC had passed three resolutions (1556, 1564, and 1574), all intended to move the Government of Sudan to rein in the Janjaweed, protect the civilian population and humanitarian participants, seek avenues toward a political settlement to the humanitarian and political crisis, and recognize the need for the rapid deployment of an expanded African Union mission in Darfur. The U.S. has been a leader in pressing for strong international action by the United Nations and its agencies.

A series of UNSC resolutions in late March 2005 underscored the concerns of the international community regarding Sudan's continuing conflicts. Resolution 1590 established the UN Mission in Sudan (UNMIS) for an initial period of six months and decided that UNMIS would consist of up to 10,000 military personnel and up to 715 civilian police personnel. It requested UNMIS to coordinate with the African Union Mission in Sudan (AMIS) to foster peace in Darfur, support implementation of the CPA, facilitate the voluntary return of refugees and internally displaced persons, provide humanitarian demining assistance, and protect human rights. The resolution also called on the Government of Sudan and rebel groups to resume the Abuja talks and support a peaceful settlement to the conflict in Darfur, including ensuring safe access for peacekeeping and humanitarian operations. Resolution 1591 criticized the Government of Sudan and rebels in Darfur for having failed to comply with several previous UNSC resolutions, for ceasefire violations, and for human rights abuses. The resolution also called on all parties to resume the Abuja talks and to support a peaceful settlement to the conflict in Darfur; it also forms a monitoring committee charged with enforcing a travel ban and asset freeze of those determined to impede

the peace process, or violate human rights. Additionally, the resolution demanded that the Government of Sudan cease conducting offensive military flights in and over the Darfur region. Finally, Resolution 1593 referred the situation in Darfur to the prosecutor of the International Criminal Court (ICC) and called on the Government of Sudan and all other parties to the conflict in Darfur to cooperate with the ICC.

On May 5, 2006, under strong pressure from the African Union (AU) and the international community, the government and an SLM/A faction led by Minni Minawi signed the Darfur Peace Agreement (DPA) in Abuja. Unfortunately, the conflict in Darfur intensified shortly thereafter, led by rebel groups who refused to sign. In late August government forces began a major offensive on rebel areas in Northern Darfur. On August 30, the Security Council adopted UNSCR 1706, authorizing the transition of AMIS to a larger more robust UN peacekeeping operation. To further facilitate an end to the conflict in Darfur, President Bush announced the appointment of Andrew S. Natsios as the Special Envoy for Sudan on September 19, 2006.

In an effort to resolve Sudan's opposition to a UN force, UN Secretary General Kofi Annan and African Union Commission Chair Alpha Oumar Konare convened a meeting of key international officials and representatives of several African and Arab states in Addis Ababa on November 16, 2006. The agreement reached with the Government of Sudan provided for UN support to AMIS in three phases—light, heavy, and a joint AU/UN hybrid support operation. On November 30, the African Union Peace and Security Council also endorsed the Addis Ababa conclusions.

International efforts in 2007 focused on rallying support for DPA signatory and non-signatory rebel movements for renewed peace talks, and on finalizing plans for the joint AU/UN hybrid peacekeeping operation. The UN Security Council adopted Resolution 1769 on July 31, 2007, providing a Chapter 7 mandate and authorizing a peacekeeping force of up to 26,000 uniformed personnel to deploy to Darfur. The UN African Mission in Darfur (UNAMID) transitioned smoothly from AMIS on December 31, 2007. UNAMID is an unprecedented force—it is the first hybrid force in UN history and once fully deployed, it will be the largest peacekeeping force in UN history.

Following the passage of UNSCR 1769, a conference was held August 3-5 in Arusha, Tanzania between key UN and AU officials and delegates from Darfur rebel groups. Many movements' political and military leaderships were brought into the discussion in preparation for earnest peace talks. Peace talks between the Government of Sudan and rebel factions took place in Sirte, Libya on October 27, 2007; however, limited rebel participation and continuing disagreement about objectives and processes limited the effectiveness of these talks. Following, the Sirte talks, the SPLM hosted workshops in Juba, Southern Sudan to unite the rebel groups and allow them to come together to present a common front during negotiations. The Juba talks led to a combination of rebel factions from an estimated 27 groups to 5 groups. The U.S. continues to support the efforts of the UN and AU to host workshops for the rebel groups as a foundation for future negotiations.

On December 21, 2007, President Bush announced the appointment of Ambassador Richard S. Williamson as Special Envoy for Sudan following Andrew S. Natsios' resignation.

Humanitarian Situation

In 2008, Sudan continues to cope with the countrywide effects of conflict, displacement, and insecurity. During more than 20 years of conflict between the Government of Sudan and the Sudan People's Liberation Movement/Army, violence, famine, and disease killed more than 2 million people, forced an estimated 600,000 people to seek refuge in neighboring countries, and displaced approximately 4 million others within Sudan, creating the world's largest population of internally displaced people. Since the 2005 signing of the Comprehensive Peace Agreement (CPA), which officially ended the North-South conflict, the UN estimates that nearly 2 million displaced people have returned to Southern Sudan and the Three Areas of Southern Kordofan, Blue Nile, and Abyei.

The conflict in the western region of Darfur entered its fifth year in 2008, despite a 2006 peace agreement between the Government of National Unity and one faction of the Sudan Liberation Army. Fighting among armed opposition group factions, the Sudanese Armed Forces, and militias continues, displacing hundreds of thousands of civilians. The complex emergency in Darfur affects approximately 4.2 million people, including more than 2.4 million internally displaced people.

The U.S. Government is the leading international donor to Sudan and has contributed more than $4 billion in humanitarian, development, peacekeeping, and reconstruction assistance for the people in Sudan and eastern Chad since fiscal year (FY) 2004, including more than $1 billion in FY 2007 alone. The U.S. Mission in Sudan has declared disasters due to the complex emergency on an annual basis since 1987. On October 16, 2007, U.S. Chargé d'Affaires Alberto M. Fernandez renewed the Sudan disaster declaration for FY 2008. The U.S. Government continues to lead the international effort to support implementation of the CPA, while providing for the humanitarian needs of conflict-affected populations throughout the country. U.S. Government humanitarian assistance to Sudan includes food aid, provision of health care, water, sanitation, and hygiene, as well as programs for nutrition, agriculture, protection, and economic recovery.

Principal Government Officials

Last Updated: 11/12/08

Pres.: **Umar Hassan Ahmad al-BASHIR, Fd. Mar.**
First Vice Pres.: **Salva KIIR Mayardit**

Vice Pres.: **Ali Osman TAHA**
Senior Asst. to the Pres.: **Minni Arkou MINNAWI**
Asst. to the Pres.: **Nafie Ali NAFIE**
Min. of Agriculture & Forestry: **Zubeir Beshir TAHA**
Min. of Animal & Resources: **Mohamed Ahmed al-Tahir Abu KALABISH**
Min. of Cabinet Affairs: **PAGAN Amum Okiech**
Min. of Culture, Youth, & Sport: **Mohammed Yusuf ABDALLAH**
Min. of Defense: **Abdel Rahim Mohammed HUSSEIN**
Min. of Energy & Mining: **Al Zubayr Ahmad al HASAN**
Min. of Environment & Urban Development: **Ahmed Babkir NAHAR**
Min. of Federal Govt.: **Abdalrahman SAID, Lt. Gen. (Ret.)**
Min. of Finance & National Economy: **Awad Ahmed AL-JAZ**
Min. of Finance & Planning: **Zubeir Mohammed HASSAN**
Min. of Foreign Affairs: **DENG Alor Kuol**
Min. of Foreign Trade: **James KOK Rio**
Min. of Gen. Education: **Hamid Muhammad IBRAHIM**
Min. of Health: **Tabita SOKAYA**
Min. of Higher Education: **George BORENG Niyami**
Min. of Humanitarian Affairs: **Harun Ron LUAL**
Min. of Industry: **Jalal AL-DUGAIR**
Min. of Information & Communication: **Zahawi Ibrahim MALEK**
Min. of Interior: **Ibrahim Mahmoud HAMID**
Min. of Intl. Cooperation: **AL-TIJANI Saleh Hudeib**
Min. of Investment: **KOSTI Manibe**
Min. of Justice & Prosecutor Gen.: **Abdel Basit Saleh SABDARAT**
Min. of Labor & Human Resources: **Alison MANANI Magaya**
Min. of Parliamentary Affairs: **Josheph OKELO**
Min. of the Presidency: **BAKRI Hassan Saleh**
Min. of Religious Affairs & Waqf: **Azhari Al-Tigani Awad AL-SID**
Min. of Science & Technology: **Ibrahim Ahmed OMER**
Min. of Tourism: **Josef MALWAL**
Min. of Transportation: **Philip Thon LIK**
Min. of Water Resources: **Kamal Ali MOHAMMED**
Attorney Gen.: **Ali Mohamed Osman YASSIN**
Governor, Central Bank of Sudan: **Muhammad al-Hasan SABIR**
Charge d'Affaires to the US: **John UKEC Leuth**
Permanent Representative to the UN, New York: **Abdalmahmood Abdalhaleem MOHAMAD**

Sudan maintains an embassy in the United States at 2210 Massachusetts Ave. NW, Washington, DC 20008 (tel: (202) 338-8565; fax: (202) 667-2406). The regional Government of Southern Sudan maintains a liaison office in the United States at 1233 20th St. NW, Suite 602, Washington, DC 20036 (tel: (202) 293-7940; fax: (202) 293-7941).

ECONOMY

Sudan's economy is booming on the back of increases in oil production, high oil prices, and large inflows of foreign direct investment. GDP growth registered more than 10% per year in 2006 and 2007. However, the Darfur conflict, the aftermath of two decades of civil war in the south, the lack of basic infrastructure in large areas, and a reliance by much of the population on subsistence agriculture ensure much of the population will remain at or below the poverty line for years despite rapid rises in average per capita income. The country continued taking some steps toward transitioning from a socialist to a market-based economy, although the government and governing party supporters remained heavily involved in the economy.

Sudan's primary resources are agricultural, but oil production and export have taken on greater importance since October 2000. Although the country is trying to diversify its cash crops, cotton, and gum arabic remain its major agricultural exports. Grain sorghum (dura) is the principal food crop, and millet and wheat are grown for domestic consumption. Sesame seeds and peanuts are cultivated for domestic consumption and increasingly for export. Livestock production has vast potential, and many animals, particularly camels and sheep, are exported to Egypt, Saudi Arabia, and other Arab countries. However, Sudan remains a net importer of food. Problems of irrigation and transportation remain the greatest constraints to a more dynamic agricultural economy.

The country's transportation facilities are heavily concentrated in the North and consist of one 4,800-kilometer (2,748-miles), single-track railroad with a feeder line, supplemented by limited river steamers, Sudan Airways, and about 1,900 kilometers (1,200 miles) of paved and gravel road—primarily in greater Khartoum, Port Sudan, and the North. Some north-south roads that serve the oil fields of central/south Sudan have been built; and a 1,400 kilometer. (840 miles) oil pipeline goes from the oil fields via the Nuba Mountains and Khartoum to the oil export terminal in Port Sudan on the Red Sea.

Sudan's limited industrial development consists of agricultural processing and various light industries located in Khartoum North. In recent years, the GIAD industrial complex introduced the assembly of small autos and trucks, and some heavy military equipment such as armored personnel carriers and the proposed "Bashir" main battle tank. Although Sudan is reputed to have great mineral resources, exploration has been quite limited, and the country's real potential is unknown. Small quantities of asbestos, chromium, and mica are exploited commercially.

Extensive petroleum exploration began in the mid-1970s and might cover all of Sudan's economic and energy needs. Significant finds were made in the Upper Nile region and commercial quantities of oil began to be exported in October 2000, reducing Sudan's outflow of foreign exchange for imported petroleum products. There are indications of significant potential reserves of oil and natural gas in Southern Sudan, the Kordofan region and the Red Sea province.

Sudan is seeking to expand its installed capacity of electrical generation of around 300 megawatts—of which 180 megawatts is hydroelectric and the rest, thermal. Considering the continuing U.S. economic, trade, and financial sanctions regime, European investors are the most likely providers of technology for this purpose. More than 70% of Sudan's hydropower comes from the Roseires

Dam on the Blue Nile grid. Various projects are proposed to expand hydropower, thermal generation, and other sources of energy, but so far the government has had difficulty arranging sufficient financing.

The Merowe dam project has received a boost from various Arab funds. The Arab Fund for Economic and Social Development donated $150 million, the Abu Dhabi Development Fund $100 million, the Kuwaiti Development Fund $150 million, and the Saudi Fund $150 million. The Sultanate of Oman may finance the dam power plant with $106 million. The Merowe dam, if built, would have a capacity of 1,250 megawatts. It would be built at the Nile's fourth cataract. Egypt has not voiced major objections on the issue of Nile water diversion, which Sudan's hydroelectric project would entail. The estimated total cost of the dam is $1.8 billion.

Historically, the U.S., the Netherlands, Italy, Germany, Saudi Arabia, Kuwait, and other Organization of Petroleum Exporting Countries (OPEC) have supplied most of Sudan's economic assistance. Sudan's role as an economic link between Arab and African countries is reflected by the presence in Khartoum of the Arab Bank for African Development. The World Bank had been the largest source of development loans.

Sudan will require extraordinary levels of program assistance and debt relief to manage a foreign debt exceeding $21 billion, more than the country's entire annual gross domestic product. During the late 1970s and 1980s, the International Monetary Fund (IMF), World Bank, and key donors worked closely to promote reforms to counter the effect of inefficient economic policies and practices. By 1984, a combination of factors—including drought, inflation, and confused application of Islamic law—reduced donor disbursements, and capital flight led to a serious foreign-exchange crisis and increased shortages of imported inputs and commodities. More significantly, the 1989 revolution caused many donors in Europe, the U.S., and Canada to suspend official development assistance, but not humanitarian aid. However, as Sudan became the world's largest debtor to the World Bank and IMF by 1993, its relationship with the international financial institutions soured in the mid-1990s and has yet to be fully rehabilitated. The government fell out of compliance with an IMF standby program and accumulated substantial arrearages on repurchase obligations. A 4-year economic reform plan was announced in 1988 but was not pursued.

An economic reform plan was announced in 1989 and implementation began on a 3-year economic restructuring program designed to reduce the public sector deficit, end subsidies, privatize state enterprises, and encourage new foreign and domestic investment. In 1993, the IMF suspended Sudan's voting rights and the World Bank suspended Sudan's right to make withdrawals under effective and fully disbursed loans and credits. Lome Funds and European Union agricultural credits, totaling more than 1 billion euros, also were suspended.

Sudan produces about 401,000 barrels per day (b/d) (2005 est.) of oil, which brought in about $1.9 billion in 2005 and provides 70% of the country's total export earnings. Although final figures are not yet available, these earnings may have risen to an estimated $2 billion as of the end of 2004. The oil production was expected to reach 500,000 barrels by 2005. With a resolution of its 21-year civil war, Sudan and its people can now begin to reap the benefit from its natural resources, rebuild its infrastructure, increase oil production and exports, and be able to attain its export and development potential.

In 2000-2001, Sudan's current account entered surplus for the first time since independence. In 1993, currency controls were imposed, making it illegal to possess foreign exchange without approval. In 1999, liberalization of foreign exchange markets ameliorated this constraint somewhat. Exports other than oil are largely stagnant. The small industrial sector remains in the doldrums, and Sudan's inadequate and declining infrastructure inhibits economic growth.

DEFENSE

The Sudan People's Armed Forces is a 100,000-member army supported by a small air force and navy. Irregular tribal and former rebel militias and Popular Defense Forces supplement the army's strength in the field. This is a mixed force, having the additional duty of maintaining internal security. Some SPLM and NDA troops are former army members. During the 1990s, periodic purges of the professional officer corps by the ruling Islamist regime eroded command authority as well as war-fighting capabilities. Indeed, the Sudanese Government admitted it was incapable of carrying out its war aims against the SPLA and NDA without employing former rebel and Arab militias to fight in support of regular troops.

Sudan's military forces historically have been hampered by limited and outdated equipment. In the 1980s, the U.S. worked with the Sudanese Government to upgrade equipment with special emphasis on airlift capacity and logistics. All U.S. military assistance was terminated following the military coup of 1989. Oil revenues have allowed the government to purchase modern weapons systems, including Hind helicopter gunships, Anatov medium bombers, MiG 23 fighter aircraft, mobile artillery pieces, and light assault weapons. Sudan now receives most of its military equipment from China, Russia, and Libya.

FOREIGN RELATIONS

Solidarity with other Arab countries has been a feature of Sudan's foreign policy. When the Arab-Israeli war began in June 1967, Sudan declared war on Israel. However, in the early 1970s, Sudan gradually shifted its stance and was supportive of the Camp David Accords.

Relations between Sudan and Libya deteriorated in the early 1970s and reached a low in October 1981, when Libya began a policy of cross-border raids into western Sudan. After the 1985 coup in Sudan, the military government resumed diplomatic relations with Libya, as part of a policy of improving relations with neighboring and Arab states. In early 1990, Libya and the Sudan announced that they would seek "unity, but this unity was not implemented. During the 1990s, as Sudan sought to steer a non-aligned course, courting Western aid and seeking rapprochement with Arab states, its relations with the U.S. grew increasingly strained. Sudan's ties with countries like North Korea and Libya and its support for regional insurgencies such as Egyptian Islamic Jihad, Eritrean Islamic Jihad, Ethiopian Islamic Jihad, Palestinian Islamic Jihad, Hamas, Hezbollah, and the Lord's Resistance Army generated great concern about its contribution to regional instability. Allegations of the government's complicity in the assassination attempt against the Egyptian President in Ethiopia in 1995 led to UNSC sanctions against the Sudan. By the late 1990s, Sudan experienced strained or broken diplomatic relations with most of its nine neighboring countries. However, since 2000, Sudan has actively sought regional rapprochement that has rehabilitated most of these relations.

U.S.-SUDANESE RELATIONS

The United States is a major donor of humanitarian aid to Sudan, and the U.S. has welcomed steps toward peace in the country. The U.S. also has been a leader in pressing for strong international action by the United Nations and its agencies in Darfur. The U.S. and the international community welcomed the January 9, 2005 signing of the Comprehensive Peace Agreement (CPA) and the May 5, 2006 signing of the Darfur Peace Agreement (DPA), while a series of UN Security Council resolutions in late March 2005 and 2006 underscored concerns about Sudan's continuing conflicts. On September 11, 2006 the U.S. linked improved relations to Sudanese acceptance of a UN peacekeeping operation in Darfur. Since that time, the U.S. has been successful in bringing new economic sanctions against Sudan, as well as ushering in the passage of UN Security Council Resolution 1769 on July 31, 2007, which mandated the rapid deployment of a joint African Union/United Nations hybrid peacekeeping force to Darfur.

A Review of Relations

Sudan broke diplomatic relations with the U.S. in June 1967, following the outbreak of the Arab-Israeli War. Relations improved after July 1971, when the Sudanese Communist Party attempted to overthrow President Nimeiri, and Nimeiri suspected Soviet involvement. U.S. assistance for resettlement of refugees following the 1972 peace settlement with the south added further improved relations.

On March 1, 1973, Palestinian terrorists of the "Black September" organization murdered U.S. Ambassador Cleo A. Noel and Deputy Chief of Mission Curtis G. Moore in Khartoum. Sudanese officials arrested the terrorists and tried them on murder charges. In June 1974, however, they were released to the custody of the Egyptian Government. The U.S. Ambassador to the Sudan was withdrawn in protest. Although the U.S. Ambassador returned to Khartoum in November, relations with the Sudan remained static until early 1976, when President Nimeiri mediated the release of 10 American hostages being held by Eritrean insurgents in rebel strongholds in northern Ethiopia. In 1976, the U.S. decided to resume economic assistance to the Sudan.

In late 1985, there was a reduction in staff at the U.S. Embassy in Khartoum because of the presence in Khartoum of a large contingent of Libyan terrorists. In April 1986, relations with Sudan deteriorated when the U.S. bombed Tripoli, Libya. A U.S. Embassy employee was shot on April 16, 1986. Immediately following this incident, all non-essential personnel and all dependents left for six months. At this time, Sudan was the single largest recipient of U.S. development and military assistance in sub-Saharan Africa. However, official U.S. development assistance was suspended in 1989 in the wake of the military coup against the elected government, which brought to power the National Islamist Front led by General Bashir.

U.S. relations with Sudan were further strained in the 1990s. Sudan backed Iraq in its invasion of Kuwait and provided sanctuary and assistance to Islamic terrorist groups. In the early and mid-1990s, Carlos the Jackal, Osama bin Laden, Abu Nidal, and other terrorist leaders resided in Khartoum. Sudan's role in the radical Pan-Arab Islamic Conference represented a matter of great concern to the security of American officials and dependents in Khartoum, resulting in several drawdowns and/or evacuations of U.S. personnel from Khartoum in the early-mid 1990s. Sudan's Islamist links with international terrorist organizations represented a special matter of concern for the U.S. Government, leading to Sudan's 1993 designation as a state sponsor of terrorism and a suspension of U.S. Embassy operations in Khartoum in 1996. In October 1997, the U.S. imposed comprehensive economic, trade, and financial sanctions against the Sudan. In August 1998, in the wake of the East Africa embassy bombings, the U.S. launched cruise missile strikes against Khartoum. The last U.S. Ambassador to the Sudan, Ambassador Tim Carney, departed post prior to this event and no new ambassador has been designated since. The U.S. Embassy is headed by a chargé d'affaires.

The U.S. and Sudan entered into a bilateral dialogue on counter-terrorism in May 2000. Sudan has provided concrete cooperation against international terrorism since the September 11, 2001, terrorism strikes on New York and Washington. However, although Sudan publicly supported the international coalition actions

against the al Qaida network and the Taliban in Afghanistan, the government criticized the U.S. strikes in that country and opposed a widening of the effort against international terrorism to other countries. Sudan remains on the state sponsors of terrorism list.

In response to the Government of Sudan's continued complicity in unabated violence occurring in Darfur, President Bush imposed new economic sanctions on Sudan in May 2007. The sanctions blocked assets of Sudanese citizens implicated in Darfur violence, and also sanctioned additional companies owned or controlled by the Government of Sudan. Sanctions continue to underscore U.S. efforts to end the suffering of the millions of Sudanese affected by the crisis in Darfur.

Despite policy differences, the U.S. has been a major donor of humanitarian aid to the Sudan throughout the last quarter century. The U.S. was a major donor in the March 1989 "Operation Lifeline Sudan," which delivered 100,000 metric tons of food into both government and SPLA-held areas of the Sudan, thus averting widespread starvation. In 1991, the U.S. made major donations to alleviate food shortages caused by a two-year drought. In a similar drought in 2000-01, the U.S. and the international community responded to avert mass starvation in the Sudan. In 2001 the Bush Administration named a Presidential Envoy for Peace in the Sudan to explore what role the U.S. could play in ending Sudan's civil war and enhancing the delivery of humanitarian aid. For fiscal years 2005-2007, the U.S. Government committed over $4 billion to Sudan for humanitarian assistance and peacekeeping in Darfur as well as support for implementation of the peace accord and reconstruction and development in Southern Sudan.

TRAVEL

Consular Information Sheet

August 29, 2008

Country Description: Sudan is a diverse, developing country in northeastern Africa. The capital city is Khartoum. The civil war between the northern and southern regions, which began in 1983, ended in 2005. A multi-party conflict continues in the west in Darfur, and the armed Ugandan group known as The Lord's Resistance Army is present in the south. Security conditions are adverse in these and some other regions. Transportation networks and other forms of infrastructure are poor and do not meet western standards. Even where available, water and electric services suffer frequent outages.

Entry Requirements: The Government of Sudan requires all travelers to present a passport and an entry visa. Most travelers must obtain the entry visa before arrival; only American citizens who also possess a Sudanese national identification document (such as a Sudanese passport or national identification card) may apply for an entry visa at Khartoum International Airport. The Government of Sudan routinely denies visas to travelers whose passports contain visas issued by the Government of Israel or other evidence of travel to Israel such as exit or entry stamps.

Travelers must obtain an exit visa before departure from Sudan as well as pay any airport departure tax not included in the traveler's airline ticket. Visitors may obtain the latest information and further details from the Embassy of Sudan, 2210 Massachusetts Avenue NW, Washington, DC 20008, tel.: 202-338-8565.

Travel permits issued by the semi-autonomous Government of Southern Sudan (GOSS) or by the South Sudan Relief and Rehabilitation Commission (SSRRC) are not adequate for entry to the country, although travelers may find these documents useful to present to local authorities when in the south. Personal baggage, including computers, is routinely searched upon arrival to and departure from Sudan. The authorities will seize material deemed objectionable, such as alcohol or pornography, and may detain or arrest the traveler. Travelers intending to bring electronic items should inquire about entry requirements when they apply for a visa; restrictions apply to many devices, including video cameras, satellite phones, facsimile machines, televisions, and telephones. Travelers are not allowed to depart Sudan with ivory, some other animal products, or large quantities of gold.

All visitors must register with the authorities within three days of arrival. Travelers must register within 72 hours of arrival in Sudan at the Ministry of Interior. All foreigners traveling more than 25 kilometers outside of Khartoum must obtain a travel permit from the Ministry of Humanitarian Affairs in Khartoum. This applies to all travel, including private, commercial, and humanitarian activities. Americans risk detention by Sudanese authorities when traveling more than 25 kilometers outside of Khartoum without a travel permit issued by the Ministry of Humanitarian Affairs. Travelers

must register again with the police within 24 hours of arrival. The government requires a separate travel permit for travel to Darfur. These regulations are strictly enforced and even travelers with proper documentation may expect delay or temporary detention from the security forces, especially outside the capital. Authorities expect travelers to strictly respect roadblocks and other checkpoints.

Travelers who wish to take any photographs must obtain a photography permit from the Government of Sudan, Ministry of Interior, Department of Aliens.

Safety and Security: On January 1, 2008, unknown assailants shot and killed two U.S. Embassy employees - an American USAID officer and a Sudanese national driver. Terrorists are known to operate in Sudan and continue to seek opportunities to carry out attacks against U.S. interests. Terrorist actions may include suicide operations, bombings, or kidnappings. U.S. citizens should be aware of the risk of indiscriminate attacks on civilian targets in public places, which include tourist sites and locations where westerners are known to congregate, and commercial operations associated with U.S. or Western interests. Terrorists are known to have targeted both official facilities and residential compounds. Anti-American sentiment is prevalent and Americans should exercise utmost caution at all times.

The U.S. Embassy's ability to provide consular services in Sudan, including emergency assistance, is severely limited. Many areas outside the capital of Khartoum are extremely difficult to access.

Travel in many parts of Sudan is hazardous. Outside the major cities infrastructure is extremely poor, medical care is limited, and very few facilities for tourists exist.

Conflict among various armed groups and government forces continues in western Sudan, in the states of North Darfur, South Darfur, and West Darfur. Banditry and lawlessness are also common in the west. Many local residents are in camps for internally-displaced persons, and receive humanitarian assistance for basic needs such as food, water, and shelter. Expatriate humanitarian workers have been the targets of carjackings and burglaries.

Land mines remain a major hazard in southern Sudan, especially south of the city of Juba. Visitors should travel only on main roads unless a competent de-mining authority such as the UN has marked an area as clear of mines. The armed Ugandan group known as The Lord's Resistance Army is present along the southern border and reportedly has announced it will target Americans.

Occasional clashes between armed groups representing communal interests continue to occur in the centrally-located states of Upper Nile, Blue Nile, and Bahr al Ghazal. Banditry also occurs.

Sudan shares porous land borders with nine other countries, including Chad, the Central African Republic, Uganda, Democratic Republic of Congo, Ethiopia, and Eritrea. Conflict in these countries occasionally spills over into Sudan.

Americans considering sea travel in Sudan's coastal waters should exercise caution as there have been incidents of armed attacks and robberies by unknown groups in recent years, including one involving two American vessels. Exercise extreme caution, as these groups are considered armed and dangerous. When transiting in and around the Horn of Africa and/or in the Red Sea near Yemen, it is strongly recommended that vessels convoy in groups and maintain good communications contact at all times. Marine channels 13 and 16 VHF-FM are international call-up and emergency channels, and are commonly monitored by ships at sea. 2182 Mhz is the HF international call-up and emergency channel. Wherever possible, travel in trafficked sea-lanes. Avoid loitering in or transiting isolated or remote areas. In case of emergency, contact the nearest U.S. Embassy or Consulate. In the event of an attack, consider activating Emergency Position Indicating Radio Beacons.

For the latest security information, Americans traveling abroad should regularly monitor the Department's Internet web site at http://travel.state.gov, where the current Worldwide Caution Travel Alert, Travel Warnings and Travel Alerts can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S. and Canada, or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: Crime is on the increase throughout Sudan. Additional security measures should be taken at places of residence to protect life and property. Anti-American sentiments can be found throughout the country. Americans should exercise caution by avoiding crowded public areas and public gatherings. Americans should avoid traveling alone. Report all instances of anti-American acts and crime targeting westerners to the American Embassy, and report incidents of crime to the Sudanese Police.

Americans should guard their backpacks or hand luggage. When traveling by air, travelers should maintain constant contact with their baggage and assure that they do not contain illicit items, such as alcohol or military ordinance. Americans have been removed from international airlines and detained when suspect items have been detected in checked baggage.

Carjacking and armed robbery continue to occur in western and southern Sudan. Sexual assault is more prevalent in the areas of armed conflict. Travelers who do not use the services of reputable travel firms or knowledgeable guides or drivers are especially at risk. Travel outside of Khartoum should be undertaken with a minimum of two vehicles so that there is a backup in case of mechanical failure or other emergency. Solo camping is always risky.

The Sudanese mail system can be unreliable. International couriers

provide the safest means of shipping envelopes and packages, although anything of value should be insured.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

Medical Facilities and Health Information: Individuals with medical conditions which may require treatment are discouraged from traveling to Sudan. Medical facilities in Khartoum fall short of U.S. standards; outside the capital, very few facilities exist and hospitals and clinics are poorly equipped. Travelers must pay cash in advance for any medical treatment. Ambulance services are not available. Medicines are available only intermittently; travelers should bring sufficient supplies of needed medicines in clearly-marked containers.

Malaria is prevalent in all areas of Sudan. The strain is resistant to chloroquine and can be fatal. Consult a health practitioner before traveling, obtain suitable anti-malarial drugs, and use protective measures, such as insect repellent, protective clothing, and mosquito nets. Travelers who become ill with a fever or a flu-like illness while in Sudan, or within a year after departure, should promptly seek medical care and inform their physician of their travel history and the kind of anti-malarial drugs used. For additional information about malaria and anti-malarial drugs please see the Center for Disease Control travelers' health web site, http://www.cdc.gov.

Officially, people with HIV are not granted a visa and are not permitted to enter Sudan. A negative HIV test result must be presented at a Sudanese embassy or at Khartoum airport in order to obtain a visa. However, anecdotal reports indicate this requirement is not enforced in practice. Please confirm this requirement with the Embassy of Sudan at www.sudanembassy.org.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's I nternet site at http://wwwn.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith/en.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Sudan is provided for general reference only, and may not be accurate in a particular location or circumstance.

Road conditions throughout Sudan are hazardous due to erratic driver behavior, pedestrians and animals in the roadways, and the lack of basic safety equipment on many vehicles. Only major highways and some streets in the cities are paved; many roads are narrow, rutted, and poorly maintained. Local drivers do not observe conventions for the right-of-way, stop in the road without warning, and frequently exceed safe speeds for road, traffic, and weather conditions. Driving at night is dangerous and should be avoided if possible; many vehicles operate without lights.

In the north and west, dust storms and sand storms, known locally as haboobs, greatly reduce visibility when they occur. Roads in these areas can be quickly covered with shifting sand at any season of the year. Roads in southern Sudan often are impassable during the rainy season, from March to October.

U.S. citizens are subject to the laws of the country in which they are traveling, including traffic laws. In Sudan vehicles have the steering wheel on the left side and drivers use the right side of the road.

Traffic from side streets on the right has the right-of-way when entering a cross street, including fast-moving main streets. Traffic on the right has the right-of-way at stops. Right turns on a red light are prohibited. Speed limits are not posted, but the legal speed limit for passenger cars on inter-city highways is 120 kph (about 70 mph), while in most urban areas the limit is 60 kph (about 35 mph.) The speed limit in congested areas and school zones is 40 kph (about 25 mph).

Many local drivers carry no insurance despite the legal requirement that all motor vehicle operators purchase third-party liability insurance from the government. Persons involved in an accident resulting in death or injury must report the incident to the nearest police station or police officer as soon as possible. Persons found at fault can expect fines, revocation of driving privileges, and jail sentences, depending on the nature and extent of the accident. Persons convicted of driving under the influence of alcohol face fines, jail sentences, and corporal punishment.

Americans may use their U.S. driver's licenses for up to 90 days after arrival in Sudan, and then must carry either an International Driving Permit (IDP) or a Sudanese driver's license. There are no restrictions on vehicle

types, including motorcycles and motorized tricycles. Public transportation is limited to within and between major urban areas. Passenger facilities are basic and crowded, especially during rush hours and periods of seasonal travel. Schedules are unpublished and subject to change without notice. Vehicle maintenance does not meet U.S. standards. There is routine passenger train service on the route from Khartoum to Wadi Halfa (on the border with Egypt) and to Port Sudan (on the Red Sea.) Bus service between major cities is regular and inexpensive. Intra-city bus service in the major urban areas is regular, but most buses and bus stops are privately-operated and unmarked. Taxis are available in the major cities at hotels, tourist sites, and government offices. The motorized rickshaws in common use in Khartoum are unsafe. Travelers are encouraged to hire cars and drivers from reputable sources with qualified drivers and safe vehicles. Irregularly-scheduled minibuses provide some public transit to rural communities; many areas lack any public transportation.

Aviation Safety Oversight: As there is no direct commercial air service between the United States and Sudan, the U.S. Federal Aviation Administration (FAA) has not assessed Sudan's Civil Aviation Authority for compliance with International Civil Aviation Organization (ICAO) aviation safety standards. For more information, travelers may visit the FAA's I nternet web site at http://www.faa.gov.

Enforcement of aviation safety standards in Sudan is uneven; civil aviation in Sudan continues to experience air incidents and accidents, including 5 crashes with at least 64 fatalities between November 8, 2007, and June 30, 2008. Incidents included engine failures, collapsed landing gear, and planes veering off the runway. Whenever possible, Americans traveling to Sudan despite the ongoing travel warning are advised to travel directly to their destinations on international carriers from countries whose civil aviation authorities meet international aviation safety standards for the oversight of their air carrier operations under the FAA's International Aviation Safety Assessment (IASA) program. Adverse seasonal weather conditions, such as dust or sand storms in the north between April and June and severe rain storms in the south between March and October, cause frequent flight cancellations.

Two hijackings originated in Sudan in 2007; no passengers were harmed.

Special Circumstances: In November 1997, the U.S. imposed comprehensive financial and commercial sanctions against Sudan, prohibiting U.S. transactions with Sudan. Travelers intending to visit Sudan despite the Travel Warning should contact the Department of the Treasury, Office of Foreign Assets Control (OFAC), Office of Compliance, telephone 1-800-540-6322 or 202-622-2490, regarding the effect of these sanctions.

Travelers must be prepared to pay cash for all purchases, including hotel bills, airfares purchased locally, and all other travel expenses. Major credit cards, including Visa, MasterCard, or American Express, cannot be used in Sudan due to U.S. sanctions. Sudan has no international ATMs. Local ATMs draw on local banks only.

Travelers, including journalists, must obtain a photography permit before taking any photographs. Even with a photography permit, photographing military areas, bridges, drainage stations, broadcast stations, public utilities, slum areas, and beggars is prohibited.

Sudan is a conservative society, particularly in the capital and other areas where the Muslim population is the majority. Alcohol is prohibited by law and modest dress is expected. Loose, long-sleeved shirts and full-length skirts or slacks are recommended attire for women visitors. Women who are not Muslim are not expected or required to cover their heads. Men may wear short-sleeved shirts but short pants are not acceptable in public.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating Sudanese laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in alcohol or illegal drugs in Sudan are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States as well in Sudan.

Sudan's Public Order Courts have continued to serve as the state mechanism for morality enforcement since the early 1980's. Today the court still issues punishments ranging from fines, to lashings, to lengthy prison sentences for offences such as drinking alcohol, wearing inappropriate clothing, or associating with unmarried women.

Children's Issues: Sudan does not permit foreigners to adopt children who are Sudanese citizens. For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues web page.

Registration and Embassy Locations: Americans living or traveling in Sudan are encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration website so that they can obtain updated information on travel and security within Sudan. Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency. The U.S. Embassy is located at Sharia Ali Abdel Latif, Khartoum, Sudan; tel: 249 1 83 774-701, http://khartoum.usembassy.gov.

Intercountry Adoption
June 2006

The Department of State has occasionally received inquiries from American citizens concerned about the plight of the children of Sudan and wondering about the possibility of adopting them. At this time, it is not generally possible to adopt Sudanese children, for several reasons. Intercountry adoptions are fundamentally private civil legal matters governed by the laws of the children's home country, which has the primary responsibility and jurisdiction for deciding what would be in the children's best interests.

The U.S. and international media have occasionally reported on the difficult situation faced by Sudanese children, and it is completely understandable that some American citizens want to respond to such stories by offering to open their homes and adopt these children in need. However, it is a generally agreed international principle that uprooting children during a war, natural disaster or other crisis may in fact exacerbate the children's situation. It can be extremely difficult in such circumstances to determine whether children who appear to be orphans truly are. It is also not uncommon in a hostile situation for parents to send their children out of the area, or for families to become separated during an evacuation. Even when it can be demonstrated that children are indeed orphaned or abandoned, they are often taken in by other relatives. Staying with relatives in extended family units is generally a better solution than uprooting a child completely.

There are still ways in which U.S. citizens can help the children of Sudan. Many American non-governmental organizations (NGOs) working in Sudan say that what is needed most at this time are financial contributions. Individuals who wish to assist can do the most good by making a financial contribution to an established NGO that will be well placed to respond to Sudan's most urgent needs, including those related to the children of Sudan.

Travel Warning
October 2, 2008

This Travel Warning updates U.S. citizens to security concerns in Sudan. The Department of State continues to warn against all travel to Sudan due to the threats from armed conflicts and from terrorism. American citizens who choose to remain in Sudan should review their security posture, and take appropriate precautions in light of the January 2008 murder of two American Embassy employees and ongoing violence in many regions of the country. This supersedes the Travel Warning for Sudan issued on March 14, 2008.

On January 1, 2008, two American Embassy employees were assassinated while traveling in their vehicle in Khartoum. In May 2008, the city of Omdurman, adjacent to Khartoum, was attacked by armed militias. The Embassy has implemented heightened security measures to protect Embassy personnel when traveling in Sudan, which include obtaining advance permission for all travel and modes of transportation to be used. American citizens residing in Sudan are urged to carefully review and assess their safety and security situations, take appropriate security precautions, and to practice situational awareness at all times to ensure personal safety.

The Department of State continues to warn U.S. citizens against all travel to Sudan, particularly in the Darfur area, where violence between government forces and various armed militias continues. Americans and other westerners have been victims of carjacking and armed robbery while traveling in Sudan. Land travel at night should be avoided.

Travelers are reminded that the U.S. Government has received indications of terrorist threats aimed at American and western interests in Sudan. Terrorist actions may include suicide operations, bombings, or kidnappings. U.S. citizens should be aware of the risk of indiscriminate attacks on civilian targets in public places, which include tourist sites and locations where westerners are known to congregate, and commercial operations associated with U.S. or western interests. Anti-western demonstrations periodically occur, mostly in the capital city of Khartoum.

Travel anywhere in Sudan, including Khartoum and the adjacent town of Omdurman, is potentially dangerous. Sporadic violence instigated by militias has occurred in South Sudan. Militia forces have also attacked locations in the south. Threats have been made against foreigners working in the oil industry in Upper Nile state.

Enforcement of aviation safety standards in Sudan is uneven; civil aviation in Sudan continues to experience air incidents and accidents, including five crashes with at least 64 fatalities between November 8, 2007, and September 21, 2008. Incidents included engine failures, collapsed landing gear, and planes veering off the runway. In August, 2008, a domestic plane originating in Nyala, Darfur was hijacked and forced to land in Libya.

Whenever possible, Americans traveling to Sudan despite the ongoing travel warning are advised to travel directly to their destinations on international carriers from countries whose civil aviation authorities meet international aviation safety standards for the oversight of their air carrier operations under the FAA's International Aviation Safety Assessment (IASA) program.

Americans who travel to Sudan despite this Travel Warning must possess a valid passport with at least six months of validity and a Sudanese visa. Travelers must apply for a visa in their own country of residence. In August 2006, five foreigners, including two Americans, were arrested and detained in Darfur after entering Sudan via the Chadian border town of Banal without the appropriate documentation. Several of these individuals had solicited and obtained escorts in Chad who allegedly promised to facilitate entry into Sudan but who were ultimately unable to follow through with their commitments. Without appropriate travel documents and permits, travelers may

face arrest and detention for crimes including illegal entry, publication of false information, and espionage. If convicted, sentences range from deportation to life in prison or the death penalty.

The Sudanese Government requires that anyone seeking to travel outside a 25 kilometer radius of Khartoum obtain a special travel permit. The Government has placed additional permit requirements for travel to Darfur. This includes humanitarian workers, journalists, photographers, and other media employees. Separate additional permits are required to take photographs, even for private use, and to conduct journalism anywhere in Sudan. Additional information about entry requirements for Sudan and other countries is located on the State Department's Bureau of Consular Affairs web site at http://travel.state.gov.

U.S. citizens are strongly urged to register with the Embassy in Khartoum or through the State Department's Travel Registration website, https://travelregistration.state.gov. By registering, American citizens make it easier for the Embassy to contact them in case of emergency. The U.S. Embassy is located at Sharia Ali Abdul Latif, Khartoum; tel. (249-183) 774-701/2/3 (outside Sudan); tel. (0183) 774-701/2/3 (inside Sudan.) For after-hours emergencies, please call 249-183-774-700 and ask to be connected to the Duty Officer.

SURINAME

Compiled from the October 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Republic of Suriname

PROFILE

Geography

Area: 163,194 sq. km. (63,037 sq. mi.); slightly larger than Georgia.

Cities: Capital—Paramaribo (pop. 242,946). Other cities—Nieuw Nickerie, Moengo, Brownsweg, Albina.

Terrain: Rain forest, savanna, coastal swamps, hills.

Climate: Tropical.

People

Nationality: Noun—Surinamer(s). Adjective—Surinamese.

Population: (2004 census) 492,829.

Annual growth rate: (2004) 1.30%.

Ethnic groups: Hindustani (East Indian) 27%, Creole 18%, Javanese 15%, Maroon 15%, Mixed 12.5%, Amerindians 3.7%, Chinese 1.8% (percentages from 2004 census).

Religions: Hindu, Muslim, Roman Catholic, Dutch Reformed, Moravian, several other Christian denominations, Jewish, Baha'i.

Languages: Dutch (official), English, Sranan Tongo (Creole language), Hindustani, Javanese.

Education: Years compulsory—ages 6-12. Literacy—90%.

Health: Infant mortality rate (2004)—7 per 1,000. Life expectancy (2003)—71 yrs.

Work force: (100,000) Government—35%; private sector—41%; parastatal companies—10%; unemployed—14%.

Government

Type: Constitutional democracy.

Constitution: September 30, 1987.

Independence: November 25, 1975.

Government branches: Executive—president, vice president, Council of Ministers. Legislative—elected 51-member National Assembly made up of representatives of political parties. Judicial—Court of Justice.

Political subdivisions: 10 districts.

Political parties: Governing coalition—National Party of Suriname (NPS); Progressive Reform Party (VHP); Pertjaja Luhur; A—Combination, a coalition of General Interior Development Party (ABOP), Brotherhood and Unity in Politics (BEP), and Seeka; Suriname Workers Party (SPA); Democratic Alternative '91 (DA' 91). Other parties in the National Assembly—National Democratic Party (NDP), Democratic National Platform 2000 (DNP 2000), Alternative 1 (A1), Party for Renewal and Development (BVD), Javanese Indonesian Peasants Party (KTPI).

Suffrage: Universal at 18.

Economy

GDP: (2008 est.) $2.81 billion (Source: IMF).

Annual growth rate real GDP: (2007 actual) 5.5%.

Per capita GDP: (2007 est.) $4,830.

Inflation: (2007) 7%.

Natural resources: Bauxite, gold, oil, iron ore, other minerals; forests; hydroelectric potential; fish and shrimp.

Agriculture: Products—rice, bananas, timber, and citrus fruits.

Industry: Types—alumina, oil, gold, fish, shrimp, lumber.

Trade: (Source: IMF) Exports (2007)— $1.542 billion: alumina, gold, crude oil, wood and wood products, rice, bananas, fish, and shrimp. Major markets (2007)—Canada (23%), Norway (14.4%), U.S. (12.1%), Trinidad (7.2%), France (5.4%), Iceland (2.1%). Imports (2007)—$1.242 billion: machinery and transport equipment, manufactured goods, mineral fuels including lubricants, food and live animals. Major suppliers (2007)—U.S. (31.7%), Netherlands (20.4%), Trinidad and Tobago (17.9%), Japan (3.6%), China (5.5%), Brazil (2.9%).

PEOPLE

Most Surinamese live in the narrow, northern coastal plain. The population is one of the most ethnically

diverse in the world. Each ethnic group preserves its own culture, and many institutions, including political parties, tend to follow ethnic lines. Informal relationships vary: the upper classes of all ethnic backgrounds mix freely; outside of the elite, social relations tend to remain within ethnic groupings. All groups may be found in schools and the workplace.

HISTORY

Arawak and Carib tribes lived in the region before Columbus sighted the coast in 1498. Spain officially claimed the area in 1593, but Spanish and Portuguese explorers of the time gave the area little attention. Dutch settlement began in 1616 at the mouths of several rivers between present-day Georgetown, Guyana, and Cayenne, French Guiana.

Suriname became a Dutch colony in 1667. The new colony, Dutch Guiana, did not thrive. Historians cite several reasons for this, including Holland's preoccupation with its more extensive (and profitable) East Indian territories, violent conflict between whites and native tribes, and frequent uprisings by the imported slave population, which was often treated with extraordinary cruelty. Barely, if at all, assimilated into plantation society, many of the slaves fled to the interior, where they maintained a West African culture and established the six major Bush Negro tribes in existence today: the Djuka, Saramaccaner, Matuwari, Paramaccaner, Quinti, and Aluku.

Plantations steadily declined in importance as labor costs rose. Rice, bananas, and citrus fruits replaced the traditional crops of sugar, coffee, and cocoa. Exports of gold rose beginning in 1900. The Dutch government gave little financial support to the colony. Suriname's economy was transformed in the years following World War I, when an American firm (ALCOA) began exploiting bauxite deposits in East Suriname. Bauxite processing and then alumina production began in 1916. During World War II, more than 75% of U.S. bauxite imports came from Suriname.

In 1951, Suriname began to acquire a growing measure of autonomy from the Netherlands. Suriname became an autonomous part of the Kingdom of the Netherlands on December 15, 1954, and gained independence, with Dutch consent, on November 25, 1975.

Most of Suriname's political parties took shape during the autonomy period and were overwhelmingly based on ethnicity. For example, the National Party of Suriname found its support among the Creoles, the Progressive Reform Party members came from the Hindustani population, and the Indonesian Peasant's Party was Javanese. Other smaller parties found support by appealing to voters on an ideological or pro-independence platform; the Partij Nationalistische Republiek (PNR) was among the most important. Its members pressed most strongly for independence and for the introduction of leftist political and economic measures. Many former PNR members would go on to play a key role following the coup of February 1980.

Suriname was a parliamentary democracy in the years immediately following independence. Henk Arron became the first Prime Minister and was re-elected in 1977. On February 25, 1980, 16 noncommissioned officers overthrew the elected government, which many accused of inefficiency and mismanagement. The military-dominated government then suspended the constitution, dissolved the legislature, and formed a regime that ruled by decree. Although a civilian filled the post of president, a military man, Desi Bouterse, actually ruled the country.

Throughout 1982, pressure grew for a return to civilian rule. In early December 1982, military authorities cracked down, arresting and killing 15 prominent opposition leaders, including journalists, lawyers, and trade union leaders. Following the murders, the United States and the Netherlands suspended economic and military cooperation with the Bouterse regime, which increasingly began to follow an erratic but often leftist-oriented political course. The regime restricted the press and limited the rights of its citizens. The economy declined rapidly after the suspension of economic aid from the Netherlands.

Continuing economic decline brought pressure for change. During the 1984-87 period, the Bouterse regime tried to end the crisis by appointing a succession of nominally civilian-led cabinets. Many figures in the government came from the traditional political parties that had been shoved aside during the coup. The military eventually agreed to free elections in 1987, a new constitution, and a civilian government.

Another pressure for change had erupted in July 1986, when a Maroon insurgency, led by former soldier Ronnie Brunswijk, began attacking economic targets in the country's interior. In response, the army ravaged villages and killed suspected Brunswijk supporters. Thousands of Maroons fled to nearby French Guiana. In an effort to end the bloodshed, the Surinamese Government negotiated a peace treaty, called the Kourou Accord, with Brunswijk in 1989. However, Bouterse and other military leaders blocked the accord's implementation.

On December 24, 1990, military officers forced the resignations of the civilian President and Vice President elected in 1987. Military-selected replacements were hastily approved by the National Assembly on December 29. Faced with mounting pressure from the U.S., other nations, the Organization of American States (OAS), and other international organizations, the government held new elections on May 25, 1991. The New Front (NF) Coalition, comprised of the Creole-based National Party of Suriname (NPS), the Hindustani-based Progressive Reform Party (VHP), the Javanese-based Indonesian Peasant's Party (KTPI), and the

labor-oriented Surinamese Workers Party (SPA) were able to win a majority in the National Assembly. On September 6, 1991, NPS candidate Ronald Venetiaan was elected President, and the VHP's Jules Ajodhia became Vice President.

The Venetiaan government was able to effect a settlement to Suriname's domestic insurgency through the August 1992 Peace Accord with Bush Negro and Amerindian rebels. In April 1993, Desi Bouterse left his position as commander of the armed forces and was replaced by Arthy Gorre, a military officer committed to bringing the armed forces under civilian government control. Economic reforms instituted by the Venetiaan government eventually helped curb inflation, unify the official and unofficial exchange rates, and improve the government's economic situation by re-establishing relations with the Dutch, thereby opening the way for a major influx of Dutch financial assistance. Despite these successes, the governing coalition lost support and failed to retain control of the government in the subsequent round of national elections.

The rival National Democratic Party (NDP), founded in the early 1990s by Desi Bouterse, benefited from the New Front government's loss of popularity. The NDP won more National Assembly seats (16 of 51) than any other party in the May 1996 national elections, and in September 1996, joined with the KTPI, dissenters from the VHP, and several smaller parties to elect NDP vice chairman Jules Wijdenbosch president of an NDP-led coalition government. Divisions and subsequent reshufflings of coalition members in the fall of 1997 and early 1998 weakened the coalition's mandate and slowed legislative action.

In May 1999, after mass demonstrations protesting poor economic conditions, the government was forced to call early elections. The elections in May 2000 returned Ronald Venetiaan and his New Front coalition to the presidency. The NF based its campaign on a platform to fix the faltering Surinamese economy. In the national election held on May 25, 2005, the ruling NF coalition suffered a significant setback due to widespread dissatisfaction with the state of the economy and the public perception that the NF had produced few tangible gains. The NF won just 23 seats, falling short of a majority in the National Assembly, and immediately entered into negotiations with the Maroon-based "A" Combination and the A-1 Coalition to form a working majority. Desi Bouterse's NDP more than doubled its representation in the National Assembly, winning 15 seats. Bouterse, the NDP's declared presidential candidate, withdrew from the race days before the National Assembly convened to vote for the next president and tapped his running mate, Rabin Parmessar, to run as the NDP's candidate. In the National Assembly, the NF challenged Parmessar's Surinamese citizenship, displaying copies of a Dutch passport issued to Parmessar in

2004. Parmessar was eventually allowed to stand for election, and parliament later confirmed his Surinamese citizenship. After two votes, no candidate received the required two-thirds majority, pushing the final decision in August 2005 to a special session of the United People's Assembly, where President Venetiaan was reelected with a significant majority of votes from the local, district, and national assembly members gathered. His running mate, Ramdien Sardjoe, was elected as vice president. While the Venetiaan administration has made progress in stabilizing the economy, tensions within the coalition have impeded progress and stymied legislative action.

Long-anticipated legal proceedings began in November 2007 with the issuance of summonses to 25 defendants accused of participating in the December 8, 1982 murders of 15 political opponents of the former military-dominated government. The court martial tribunal convened on November 30, 2007, with a series of preliminary motions. The actual trial, with judges hearing witness testimonies, started on July 4, 2008.

GOVERNMENT

The Republic of Suriname is a constitutional democracy based on the 1987 constitution. The legislative branch of government consists of a 51-member unicameral National Assembly, simultaneously and popularly elected for a 5-year term.

The executive branch is headed by the president, who is elected by a two-thirds majority of the National Assembly or, failing that, by a majority of the People's Assembly for a 5-year term. If at least two-thirds of the National Assembly cannot agree to vote for one presidential candidate, a People's Assembly is formed from all National Assembly delegates and regional and municipal representatives who were elected by popular vote in the most recent national election. A vice president, normally elected at the same time as the president, needs a simple majority in the National Assembly or People's Assembly to be elected for a 5-year term. As head of government, the president appoints a cabinet of ministers. There is no constitutional provision for removal or replacement of the president unless he resigns.

A 15-member State Advisory Council advises the president in the conduct of policy. Eleven of the 15 council seats are allotted by proportional representation of all political parties represented in the National Assembly. The president chairs the council; two seats are allotted to representatives of labor, and two are allotted to employers' organizations.

The judiciary is headed by the Court of Justice (Supreme Court). This court supervises the magistrate courts. Members are appointed for life by the president in consultation with the National Assembly, the State Advisory Council, and the National Order of Private Attorneys.

The country is divided into 10 administrative districts, each headed by a district commissioner appointed by the president. The commissioner is similar to the governor of a U.S. State but serves at the president's pleasure.

Principal Government Officials

Last Updated: 11/12/08

Pres.: **Ronald VENETIAAN**
Vice Pres.: **Ramdien SARDJOE**
Min. of Agriculture, Animal Husbandry, & Fisheries: **Kermechend RAGHOEBARSINGH**
Min. of Defense: **Ivan FERNALD**
Min. of Education & Human Development: **Edwin WOLF**
Min. of Finance: **Humphrey HILDENBERG**
Min. of Foreign Affairs: **Lygia KRAAG-KETELDIJK**
Min. of Health: **Celcius WATERBERG**
Min. of Home Affairs: **Urmila JOELLA-SEWNUNDUN**
Min. of Interior: **Maurits HASSANKHAN**
Min. of Justice & Police: **Chandrikapersad SANTOKHI**
Min. of Labor: **Joyce AMARELLO-WILLIAMS**
Min. of Natural Resources: **Gregory RUSLAND**
Min. of Planning & Development Cooperation: **Rick Van RAVENSWAAY**
Min. of Public Works: **Ganeshkoemar KANHAI**
Min. of Regional Development: **Michel FELISIE**
Min. of Social Affairs & Housing: **Hendrik SETROWIDJOJO**
Min. of Trade & Industry: **Clifford MARICA**
Min. of Transportation, Communication, & Tourism: **Guno CASTELEN**
Min. of Zoning: **Michael JONG TJIEN FA**
Pres., Central Bank: **Andre TELTING**
Ambassador to the US: **Jaques R. KROSS**
Permanent Representative to the UN, New York: **Henry Leonard MACDONALD**

Suriname maintains an embassy in the United States at 4301 Connecticut Ave, NW, Suite 460, Washington, DC 20008 (tel. 202-244-7488; fax 202-244-5878). There also is a Suriname consulate general at 7235 NW 19th St., Suite A, Miami, FL 33136 (tel. 305-593-2163).

NATIONAL SECURITY

Surinamese armed forces consist of the national army under the control of the Minister of Defense and a smaller civil police force, which is under the authority of the Minister of Justice and Police. The national armed forces comprise some 2,500 personnel, the majority of whom are deployed as light infantry security forces. A small air force, navy, and military police unit also exist. The Netherlands has provided limited military assistance to the Surinamese armed forces since the election of a democratic government in 1991. In recent years, the U.S. has provided training to military officers and policymakers to promote a better understanding of the role of the military in a civilian government, as well as to improve the professional capabilities of its officers and senior personnel. The U.S. also provides

assistance and training for disaster preparedness and mitigation as well as significant support for humanitarian aid projects. Since the mid-1990s, the People's Republic of China has provided small amounts of military equipment and logistical material to the Surinamese armed forces. The Netherlands, France, Venezuela, and Brazil also have working relationships with the Surinamese military.

Suriname's borders are porous; largely uninhabited, unguarded, and ungoverned rain forest and rivers make up the eastern, western, and southern borders, and the navy's capability to police Suriname's northern Atlantic coast is limited. Protecting natural resources from illegal exploitation such as unlicensed gold mining is difficult, and significant tax revenue is lost. Porous borders also make Suriname a target for transshipment of drugs. Since 2000, arrests and prosecutions of drug smugglers have increased, partially due to funding and training for police capacity through the U.S. State Department Bureau of International Narcotics and Law Enforcement.

ECONOMY

Suriname's economy has been dominated by the exports of alumina, oil, and gold. Other export products include bananas, shrimp and fish, rice, and lumber. In 2007, gold, alumina, and oil accounted for 31.7%, 41.9%, and 7%, respectively, of Suriname's exports. The government's income from oil, however, surpassed that of alumina with 13.5% of government revenues and grants coming from the oil sector, while alumina's contribution was 9.6%. In export revenues for 2007, alumina accounted for 26.7%, gold for 20.2%, and oil for 4.5% of GDP. According to the IMF, Suriname's economy was expected to continue its strong growth primarily due to strong commodity prices and improvements in policies. Even though some economic diversification has taken place, the country's economy remains dependent on its mineral resources.

Suriname's bauxite deposits have been among the world's richest. Active in Suriname since 1916, SURALCO, a subsidiary of the Aluminum Company of America (ALCOA), has had a long-standing working relationship with the Australian-owned BHPBilliton. The future of Suriname's bauxite industry has reached a critical point as SURALCO and BHPBilliton are in the final stages of their Moengo operations in Eastern Suriname, once the heart and soul of Suriname's bauxite industry. BHPBilliton officially shut down its operations in the Lelydorp mine, and the complete supply of bauxite to the SURALCO refinery hinges on the two transition mines of Kaaimangrasie and Klaverblad. Reserves in the two transition mines are projected to be depleted in 2010. Anticipating the depletion of bauxite reserves at its existing mines, the government and BHPBilliton signed a cooperation agreement to jointly exploit the proven bauxite reserves of 300 million tons in the Bakhuys region of Western Suriname. The government set up its own mining company, AlumSur, that the Minister of Natural Resources asserts will be a major stakeholder in any Bakhuys operation. To date SURALCO has not delivered a formal response to the Government of Suriname regarding its potential interest in also exploiting the Bakhuys Region. The government has also hinted at the existence of private negotiations with a third company. Other proven reserves, sufficient to last until 2045, exist in the east, west, and north of the country. However, distance and topography make their immediate development costly.

The severe shortage of affordable energy sources has hampered Suriname's ability to expand its industries. This goes for the bauxite sector as well. Currently running on diesel-fueled generators, SURALCO has indicated that any expansion of operations to include mining and refining reserves from West Suriname will depend on Suriname expanding its energy-generating sources. To alleviate some of Suriname's energy woes, the state-owned oil company, Staatsolie, built a 14 megawatt (MW) diesel-generated energy plant in 2006. In its most recently updated expansion plan, the company intends to expand the capacity of the plant to 18 MW. The electricity company recently completed the renovation and upgrade of the 45 MW diesel generator power plant in Paramaribo. Suriname and France recently signed an agreement that would connect the power grids of Suriname and French Guiana.

The gold mining sector is largely informal, unregulated, and small scale, but constitutes an important part of the informal economy (estimated at as much as 100% of GDP), and must be brought into the realm of tax and environmental authorities. In the official sector the Gross Rosebel Goldmines, wholly owned by the Canadian firm IAMGOLD, commenced its operations in 2004 and immediately positioned itself as the most productive and low-cost of all mines owned by IAMGOLD. Strikes leading to a 24% wage increase changed this rank, however, and the mine is currently ranked third. A new player in the Surinamese gold sector is the U.S. firm Newmont Mining Corporation. The company formed a joint venture with SURALCO, called Surgold, and commenced negotiations with the government for a production license. If approved, Surgold will establish the country's second gold refinery, to be operational in 2010. The reserves in the company's concession area are estimated to be 3 million troy ounces.

Suriname has also attracted the attention of international companies interested in extensive development of a tropical hardwoods industry and possible diamond mining. However, proposals for exploitation of the country's tropical forests and undeveloped regions of the interior traditionally inhabited by indigenous and Maroon communities have raised the concerns of environmentalists and human rights activists in Suriname and abroad.

The sector with the most promising outlook for rapid, near future expansion is the oil sector. A 2000 study by the U.S. Geological Survey suggests

that there may be up 15 billion barrels of oil in the Guyana Plateau. The state-owned oil company, Staatsolie, is by law the only company with the right to operate in Suriname's oil sector. Other companies can only access the market through production sharing agreements with Staatsolie. With its current output at 15,000 barrels per day (bpd), Staatsolie announced a robust expansion plan titled "Vision 2020" that would seek to expand output to 18,000 bpd by 2012. Staatsolie also plans to expand its onshore exploration research in order to increase reserves by 30 million barrels per 5-year period. In order to reach this goal, the company signed a production sharing agreement with the Australian company Hardman Resources. Staatsolie further intends to establish and develop near shore reserves. In its offshore activities, the company has production sharing agreements with the Spanish Repsol YPF (2004), the Danish Maersk Oil (2004), the American Occidental Petroleum Corporation (2005), and most recently the U.S. firm Murphy Oil. The much anticipated results from Repsol YPF's first test well were disappointing as it did not hit oil, and the evaluation of the drill results has postponed further test wells. The other companies operating offshore have not reached the test well drilling stage. Staatsolie plans to expand its refinery and capacity to 15,000 bpd. The company has also indicated that it wants to expand its downstream market to include more than diesel fuel. With reserves currently estimated at 88 million barrels, Staatsolie recently rolled out a $50 million onshore exploration program to expand its reserves.

In an effort to address the problem of Suriname's ailing 110 parastatals, the government has introduced a plan that would strengthen them, after which they would be privatized. The first parastatals chosen for this experiment were the banana company, Surland; the wood processing company, Bruynzeel; and the rice company, SML. After closing for more than 7 months in 2002, the banana company was reopened under the new name SBBS. With financial assistance from the European Union, the government completely restructured SBBS. The company is currently producing and exporting at record levels. The company is, however, not yet out of debt. The debt is primarily due to licensing fees SBBS paid for entry into the European market. In July 2008, the government announced an open tender for the privatization of SBBS. Both the Government of Suriname and the European Commission have indicated the need for SBBS to partner with a much larger company that has the international market access. The primary candidates could be the Univeg Group, an international fruits and vegetables conglomerate headquartered in Belgium, and Fyffes, Surland's former European partner headquartered in Ireland. Privatization attempts for the struggling wood parastatal Bruynzeel have failed. The government recently indicated it had no intention to hold an open tender and that it would develop the natural resources itself. In February 2008, the Ministry of Agriculture held a fourth bidding round for its ailing rice company SML. This round resulted in a division of the company's assets, which were sold to different bidders. The government has some significant outstanding debt from this company that remains to be paid.

FOREIGN RELATIONS

Since gaining independence, Suriname has become a member of the United Nations, the OAS, the Organization of the Islamic Conference, and the Non-Aligned Movement. Suriname is a member of the Caribbean Community and Common Market and the Association of Caribbean States; it is associated with the European Union through the Lome Convention. The Netherlands remains Suriname's biggest donor, but it has been surpassed by the U.S. as a trade partner. Suriname participates in the Amazonian Pact, a grouping of the countries of the Amazon Basin that focuses on protection of the Amazon region's natural resources from environmental degradation. Reflecting its status as a major bauxite producer, Suriname is also a member of the International Bauxite Association. The country also belongs to the Economic Commission for Latin America, the Inter-American Development Bank, the Islamic Development Bank, the International Finance Corporation, the World Bank, and the International Monetary Fund. In 2008, Suriname signed the Rome Statute of the International Criminal Court.

At independence, Suriname signed an agreement with the Netherlands providing for about $1.5 billion in development assistance grants and loans over a 10- to 15-year period. Initial disbursements amounted to about $100 million per year, but were discontinued during military rule. After the return to a democratically elected government in 1991, Dutch aid resumed. The Dutch relationship continued to be an important factor in the economy; with the Dutch insisting that Suriname undertake economic reforms and produce specific plans acceptable to the Dutch for projects on which aid funds could be spent. In 2000, the Dutch revised the structure of their aid package and signaled to the Surinamese authorities their decision to disburse aid by sectoral priorities as opposed to individual projects. In 2001 both governments agreed to spend the remaining development funds to finance programs in 6 different sectors: health care, education, environment, agriculture, housing, and governance.

Relations with the Dutch have been complicated by Dutch prosecution of Desi Bouterse in absentia on drug charges, and by legal maneuvering by Dutch prosecutors trying to bring charges relating to the December 1982 murders. (A Dutch appellate court in 2000 found Bouterse guilty of one drug-related charge; the decision was upheld on appeal.)

Bilateral cooperation agreements with several countries in the region have underscored the government's interest in strengthening regional ties. The return to Suriname from French Guiana of about 8,000 refugees from the 1986-91 Interior War between the military and domestic

insurgents has improved relations with French authorities. Longstanding border disputes with Guyana and French Guiana remain unresolved. Negotiations with the Government of Guyana brokered by the Jamaican Prime Minister in 2000 did not produce an agreement, but the countries agreed to restart talks after Guyanese national elections in 2001. In January 2002, the presidents of Suriname and Guyana met in Suriname and agreed to resume negotiations, establishing the Suriname-Guyana border commission. In 2004 Guyana brought a complaint against Suriname under the United Nations Convention on the Law of the Sea (UNCLOS) regarding their maritime border dispute. In 2007, the UN International Tribunal on the Law of the Sea (ITLOS) ruled that both Suriname and Guyana are entitled to their share of the disputed offshore basin which is believed to be rich in oil and gas deposits. Using the equidistance line, the tribunal awarded Suriname 6,900 sq. miles and Guyana 12,800 sq. miles of this basin. Suriname's earlier dispute with Brazil ended amicably after formal demarcation of their shared border.

U.S.-SURINAMESE RELATIONS

Since the reestablishment of a democratic, elected government in 1991, the United States has maintained positive and mutually beneficial relations with Suriname based on the principles of democracy, respect for human rights, rule of law, and civilian authority over the military. To further strengthen civil society and bolster democratic institutions, the U.S. has provided training regarding appropriate roles for the military in civil society to some of Suriname's military officers and decision makers. To assist Suriname in the fight against drugs and associated criminal activity, the U.S. has helped train Surinamese anti-drug squad personnel. The U.S. and Suriname also have significant partnerships in fighting trafficking in persons and money laundering.

Since 2000, the U.S. has donated a criminal records database to the police as well as computers, vehicles, and radio equipment. Projects through which the U.S. has supported the judicial system include case management and computer hardware donation. Along with training projects, these programs have led to a strong relationship with law enforcement entities in Suriname. The United States has also worked with the Surinamese Ministries of Health, Education, and Defense to execute humanitarian engineering and health projects throughout the country.

The U.S. Peace Corps in Suriname works with the Ministry of Regional Development and rural communities to encourage community development in Suriname's interior.

Suriname is densely forested, and increased interest in large-scale commercial logging and mining in Suriname's interior have raised environmental concerns. The U.S. Forest Service, the Smithsonian, and numerous non-governmental environmental organizations have promoted technical cooperation with Suriname's government to prevent destruction of the country's tropical rain forest, one of the most diverse ecosystems in the world. U.S. experts have worked closely with local natural resource officials to encourage sustainable development of the interior and alternatives such as ecotourism. On December 1, 2000, UNESCO designated the 1.6 million hectare Central Suriname Nature Reserve a World Heritage site. Suriname's tourism sector remains a minor part of the economy, and tourist infrastructure is limited (in 2004, some 145,000 foreign tourists visited Suriname).

Suriname's efforts in recent years to liberalize economic policy created new possibilities for U.S. exports and investments. The U.S. remains one of Suriname's principal trading partners, largely due to ALCOA's longstanding investment in Suriname's bauxite mining and processing industry. Several U.S. corporations represented by Surinamese firms acting as dealers are active in Suriname, largely in the mining, consumer goods, and service sectors. Principal U.S. exports to Suriname include chemicals, vehicles, machine parts, meat, and wheat. U.S. consumer products are increasingly available through Suriname's many trading companies. Opportunities for U.S. exporters, service companies, and engineering firms will probably expand over the next decade.

Suriname is looking to U.S. and other foreign investors to assist in the commercial development of its vast natural resources and to help finance infrastructure improvements. Enactment of a new investment code and intellectual property rights protection legislation which would strengthen Suriname's attractiveness to investors has been discussed; the investment law was approved by the National Assembly and is currently being revised by the Ministry of Finance.

TRAVEL

Consular Information Sheet

December 19, 2008

Country Description: The Republic of Suriname is a developing nation located on the northern coast of South America. Tourist facilities are widely available in the capital city of Paramaribo; they are less developed and in some cases non-existent in the country's rugged jungle interior. English is widely used, and most tourist arrangements can be made in English.

Entry Requirements: A passport, valid visa, and, if traveling by air, return ticket are required for travel to Suriname. There is a processing fee for business and tourist visas, and visas must be obtained before arrival in Suriname. A business visa requires a letter from the sponsoring company detailing the reason for the visit. There is an airport departure charge and a terminal fee, normally included in the price of airfare. Travelers arriving from Guyana, French Guiana, and Brazil are required to show proof of a yellow fever vaccination. For further information, travelers can contact the Embassy of the Republic of Suriname, 4301 Connecticut Avenue, NW, Suite 460, Washington, DC 20008, telephone (202) 244-7488, email: embsur@erols.com, or the Consulate of Suriname in Miami, 7235 NW 19th Street, Suite A, Miami, Fl 33126, telephone (305) 593-2697. Visit the Embassy of Suriname web site at www.surinameembassy.org for the most current visa information. Important information for foreigners who have the intention of staying longer than three months: s of October 1, 2008, persons who intend to stay longer than three months in Suriname must apply for an Authorization for Temporary Stay (MVK) before travel to Suriname. The above implies that foreigners who need a visa (with the exception of foreigners of Surinamese origin) who have traveled to Suriname on a tourist or business visa will not be able to apply for residence during their stay in Suriname.

Safety and Security: Demonstrations do occur, primarily in the capital or second cities, and are usually peaceful, but American citizens traveling to or residing in Suriname should take common-sense precautions and avoid large gatherings or other events where crowds have congregated to demonstrate or protest. Travelers proceeding to the interior may encounter difficulties due to limited government authority. Limited transportation and communications may hamper the ability of the U.S. Embassy to assist in an emergency situation.

For the latest security information, Americans traveling abroad should regularly monitor the Department's Internet web site, where the current Worldwide Caution Travel Alert, Travel Warnings and Travel Alerts can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S., or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: Criminal activity throughout the country is on the rise and foreigners, including Americans, may be viewed as targets of opportunity. Burglary, armed robbery, and violent crime occur with some frequency in Paramaribo and in outlying areas. Pick-pocketing and robbery are increasingly common in the major business and shopping districts of the capital. Visitors should avoid wearing expensive or flashy jewelry or displaying large amounts of money in public.

There have been several reports of criminal incidents in the vicinity of the major tourist hotels and night walks outside the immediate vicinity of the hotels are therefore to be avoided. Visitors should avoid the Palm Garden area ("Palmentuin" in Dutch) after dark, as there is no police presence and it is commonly the site of criminal activity.

Theft from vehicles is infrequent, but it does occur, especially in areas near the business district. Drivers are cautioned not to leave packages and other belongings in plain view in their vehicles. There have been reports of carjackings within Paramaribo, particularly in residential areas. When driving, car windows should be closed and doors locked. The use of public minibuses is discouraged, due to widespread unsafe driving and poor maintenance.

Travel to the interior is usually trouble-free, but there have been reports of tourists being robbed. Police presence outside Paramaribo is minimal, and banditry and lawlessness are occasionally of concern in the cities of Albina and Moengo and the district of Brokopondo, as well as along the East-West Highway between Paramaribo and Albina and the Afobakka Highway in the district of Para. There have been reports of attempted and actual carjackings committed by gangs of men along the East-West Highway. Travelers proceeding to the interior are advised to make use of well-established tour companies for a safer experience. The emergency number 115 is used for police, fire, and rescue and normally does not provide English-language services.

Fire and rescue services provide a relatively timely response, but police response, especially during nighttime hours, is a rarity for all but the most serious of crimes.

In many countries around the world, counterfeit and pirated goods are widely available. Transactions involving such products may be illegal under local law. In addition, bringing them back to the United States may result in forfeitures and/or fines. More information on this serious problem is available at http://www.cybercrime.gov/18usc2320.htm.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

Medical Facilities and Health Information: Medical care, including emergency medical care, is limited and does not meet U.S. standards. There is one public emergency room in Paramaribo with only a small ambulance fleet providing emergency transport with limited first response capabilities. The emergency room has no neurosurgeon, and other medical specialists may not always be available. As a rule, hospital facilities are not air-conditioned, although private rooms with individual air-conditioning are available at extra cost and on a space-available basis. Emergency medical care outside Paramaribo is limited and is virtually non-existent in the interior of the country.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's Internet site at http://wwwn.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Suriname is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

Traffic moves on the left in Suriname; left-hand-drive cars are allowed on the road. Excessive speed, unpredictable movements by vehicles, and motorcyclists/bicycles, unusual right of way patterns, poorly maintained roads, and a lack of basic safety equipment on many vehicles are daily hazards on Surinamese roads. As of January 2007, seatbelts are required for all passengers of automobiles, and drivers must use a hands-free device if using a mobile phone while driving. Visitors are encouraged to use automobiles equipped with seat belts and to avoid the use of motorcycles or scooters. An international driver's license is necessary to rent a car.

The major roads in Paramaribo are usually paved, but not always well maintained. Large potholes are common on city streets, especially during the rainy seasons, which last from approximately mid-November to January, and from April to July (rainy seasons can differ from year to year by as much as six weeks). Roads are often not marked with traffic lines. Many main thoroughfares do not have sidewalks, forcing pedestrians, motorcycles, and bicycle traffic to share the same space.

The East-West Highway, a paved road that stretches from Nieuw Nickerie in the west to Albina in the east, runs through extensive agriculture areas; it is not uncommon to encounter slow-moving farm traffic or animals on the road. Travelers should exercise caution when driving to and from Nieuw Nickerie at night due to poor lighting and sharp road turns without adequate warning signs. There are few service stations along the road, and western style rest stops are non-existent. The road is not always well maintained, and during the rainy season, large, sometimes impassable, sink holes develop along the road. Police recommend that travelers check with the police station in Albina for the latest safety information regarding travel between Paramaribo and Albina.

Roads in the interior are sporadically maintained dirt roads that pass through rugged, sparsely populated rain forest. Some roads are passable for sedans in the dry season, but they deteriorate rapidly during the rainy season. Interior roads are not lit, nor are there service stations or emergency call boxes. Bridges in the interior are in various states of repair. Travelers are advised to consult with local sources, including The Foundation for Nature Conservation in Suriname, or STINASU, at telephone (597) 421-683 or 476-579, or with their hotels regarding interior road conditions before proceeding.

For specific information concerning Suriname driving permits, vehicle inspection, road tax, and mandatory insurance, please contact the Embassy of Suriname in Washington, D.C., or the Consulate of Suriname in Miami. Visit the web site of Suriname Tourism Foundation for further information at www.suriname-tourism.org/cms.

Aviation Safety Oversight: The U.S. Federal Aviation Administration

(FAA) has assessed the Government of Suriname's Civil Aviation Authority as being in compliance with International Civil Aviation Organization (ICAO) aviation safety standards for oversight of Suriname's air carrier operations. For more information, travelers may visit the FAA's web site at http://www.faa.gov.

Special Circumstances: Credit cards are not widely accepted outside the major hotels and upscale restaurants. Travelers should contact their intended hotel or tour company to confirm that credit cards are accepted. Currently, only one bank, Royal Bank of Trinidad and Tobago (RBTT), has Automatic Teller Machines (ATMs) accepting foreign ATM cards. In order to withdraw money from the ATM machines of other banks, you must have a local Surinamese bank account and ATM card.

Visitors can exchange currency at banks, hotels and official exchange houses, which are called "cambios." Exchanging money outside of these locations is illegal and can be dangerous. Telephone service within Suriname can be problematic, especially during periods of heavy rains.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses.

Persons violating Suriname's laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Suriname are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans residing or traveling in Suriname are encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration web site so that they can obtain updated information on travel and security within Suriname. Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate.

By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency. The U.S. Embassy is located at Dr. Sophie Redmondstraat 129, telephone (011) (597) 472-900, web site http://suriname.usembassy.gov. The Consular Section hours of operation for routine American citizen services are Mondays and Wednesdays from 8:00 to 10:00 AM, or by appointment, except on American and Surinamese holidays. U.S. citizens requiring emergency assistance on evenings, weekends, and holidays may contact an Embassy duty officer by cell phone at (011) (597) 088-08302. The U.S. Embassy in Paramaribo also provides consular services for French Guiana.

Intercountry Adoption

April 2007

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is based on public sources and current understanding. Questions involving foreign and U.S. immigration laws and legal interpretation should be addressed respectively to qualified foreign or U.S. legal counsel.

Patterns of Immigration: Please review current reports online at http://adoption.state.gov.

Adoption Authority: The government office responsible for adoptions in Suriname is the Bureau of Family Rights and Affairs (Bureau Voor Familierechtelijke Zaken).

Address:
Bureau Voor Familerechtelijke Zaken
Grote Combeweg no. 7
Paramaribo, Suriname
Telephone Numbers:
+597 478759
+597 475763
+597 476485
Fax: +597 478759

Mailing Address:
Bureau Voor
Familierechtelijke Zaken
Aan Postbus 67
Paramaribo, Suriname
Email Address:
bufazsur@hotmail.com
bufazsur@yahoo.com

Eligibility Requirements for Adoptive Parents: Prospective adoptive parents who are married must be at least 18 years older than the child. Married prospective adoptive parents must be married for at least three years to adopt. Single prospective adoptive parents must be at least 25 years of age. The age difference between the parents and the child may not be more than 50 years for the father and 40 years for the mother.

Residency Requirements: The Surinamese government has no residency requirements for prospective adoptive parents.

Time Frame: The time frame for adoption processing varies. The local adoption authority states that processing is handled on a case-by-case basis and ranges from months to years for foreign-based adoptions.

Adoption Agencies and Attorneys: Prospective adoptive parents

are advised to fully research any adoption agency or facilitator they plan to use for adoption services. For U.S.-based agencies, it is suggested that prospective adoptive parents contact the Better Business Bureau and/or the licensing office of the appropriate state government agency in the U.S. state where the agency is located or licensed.

Adoption Fees: The Surinamese government has no fees for adoption services, but prospective adoptive parents may be responsible for some associated costs such as hospital and orphanage fees.

Adoption Procedures: Prospective adoptive parents interested in adopting from Suriname should first contact the Bureau of Family Rights and Affairs, which assists in identifying a child to be placed with the prospective adoptive parents. Once a specific child is identified, the adoption request is filed in quintuple with the Cantonal Judge in Suriname, together with the birth certificates of the adoptive child and the adoptive parent(s). The Bureau of Family Rights and Affairs conducts an investigation to determine whether the request of the prospective adoptive parents is in the best interest of the adoptive child. The investigation typically lasts three months, but can sometimes take much longer.

Court proceedings are held following the investigation. The biological parents of the child may participate in the proceedings. The proceedings are closed to the general public. The personal appearance of the prospective adoptive parents is not required. The custody decree is registered with the civil registry of births where the adopted child registered.

Required Documents:

- A home study;
- Proof that the prospective adoptive parent(s) is living abroad;
- Marriage certificate of prospective adoptive parent(s), if applicable;
- Birth certificates of the prospective adoptive parent(s);
- Medical clearance for the prospective parent(s);
- Job letter from the prospective parent(s)' employer;
- Statement from the judicial authorities that the couple has permission to bring the child into the U.S. or into a third country;
- Statement from the judicial authorities that the couple, according to U.S. law, can adopt the child.

Embassy Of Suriname

Additional Information: Specific questions about adoption in Suriname may be addressed to the U.S. Embassy in Paramaribo.

General questions regarding intercountry adoption may be addressed to the Office of Children's Issues, U.S. Department of State, CA/OCS/CI, SA-29, 4th Floor, 2201 C Street, NW, Washington, D.C. 20520-4818, toll-free Tel: 1-888-407-4747.

SWAZILAND

Compiled from the October 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Kingdom of Swaziland

PROFILE

Geography

Area: 17,363 sq. km. (6,704 sq. miles); slightly smaller than New Jersey.
Cities: Mbabane (capital, pop. 60,000), Manzini (principal commercial city, pop. 65,000).
Terrain: Mountainous plateau to savanna.
Climate: Near temperate to tropical.

People

Nationality: Noun and adjective—Swazi(s).
Population: 1,128,814.
Annual growth rate: -0.41%.
Ethnic groups: African 97%, European 3%
Religions: Zionist 40% (a blend of Christianity and indigenous ancestral worship), Roman Catholic 20%, Muslim 10%, other (includes Anglican, Baha'i, Methodist, Mormon, Jewish) 30%
Education: Years compulsory—none. Attendance—65% primary and 44% secondary. Literacy—81.6%
Health: Infant mortality rate (2007)—70/1,000. Life expectancy—40 years. The prevalence of HIV in Swaziland's adult population is 39%, the highest in the world.
Work force: Agriculture and forestry—21.4%; construction—6.1%; distribution—10.5%; finance—8.3%; manufacturing—20.1%; mining and quarry—1%; services—32.6%; transport—2.9%.

Government

Type: Monarchy.

Independence: September 6, 1968.

Constitution: On July 26, 2005, King Mswati III ratified Swaziland's constitution. This is Swaziland's first constitution in over 30 years. It went into effect February 8, 2006.

Government branches: Executive—monarch (head of state), prime minister (head of government), cabinet (appointed by the king at the recommendation of the prime minister). Legislative—Parliament consisting of the House of Assembly (65 members: 55 elected, 10 appointed by the king) and Senate (30 members: 10 appointed by the House of Assembly, 20 appointed by the king). Judicial—a dual court system of traditional courts under chiefs and a Roman-Dutch system comprising magistrates courts, High Court, Supreme Court (formerly Court of Appeals).

Political subdivisions: 4 regions, 9 municipal governments, and 55 tinkhundla centers (traditional administrative units).

Political parties: None registered, though the new Constitution does not forbid parties.

Suffrage: Universal after 18.

Economy

GDP: (2007) $2.9 billion.
GDP real growth rate: (2007) 2.4%.
Per capita income: (2007) $4,800.
Inflation: (2007) 8.2%.
Natural resources: Coal, diamonds, quarry stone, timber, talc.
Agriculture: (11.8% of GDP) Products—sugarcane, corn, citrus fruits, livestock, wood, pineapple, tobacco, rice, peanuts.
Manufacturing: (45.7% of GDP) Types—sugar refining, light manufactured goods, wood pulp, textiles, processed foods, consumer goods.
Trade: (2006) Exports—$1.93 billion: soft drink concentrates, sugar, pulp, canned fruits, cotton yarn. Major markets—South Africa, EU, Mozambique, U.S. Imports—$1.91 billion: chemicals, clothing, foodstuffs, machinery, motor vehicles, petroleum products.

PEOPLE

The majority of the population is ethnic Swazi, mixed with a small number of Zulus and non-Africans. Traditionally Swazis have been subsistence farmers and herders, but some now work in the growing urban formal economy and in government. Some Swazis work in the mines in South Africa. Christianity in Swaziland is sometimes mixed with tradi-

tional beliefs and practices. Most Swazis ascribe a special spiritual role to the monarch.

The country's official languages are Siswati (a language related to Zulu) and English. Government and commercial business is conducted mainly in English.

HISTORY

According to tradition, the people of the present Swazi nation migrated south before the 16th century to what is now Mozambique. Following a series of conflicts with people living in the area of modern Maputo, the Swazis settled in northern Zululand in about 1750. Unable to match the growing Zulu strength, the Swazis moved gradually northward in the 1800s and established themselves in the area of modern or present Swaziland.

They consolidated their hold under several able leaders. The most important was Mswati II, from whom the Swazis derive their name. Under his leadership in the 1840s, the Swazis expanded their territory to the northwest and stabilized the southern frontier with the Zulus.

Contact with the British came early in Mswati's reign, when he asked British authorities in South Africa for assistance against Zulu raids into Swaziland. It also was during Mswati's reign that the first whites settled in the country. Following Mswati's death, the Swazis reached agreements with British and South African authorities over a range of issues, including independence, claims on resources by Europeans, administrative authority, and security. South Africans administered the Swazi interests from 1894 to 1902. In 1902 the British assumed control.

In 1921, after more than 20 years of rule by Queen Regent Lobatsibeni, Sobhuza II became Ngwenyama (lion) or head of the Swazi nation. The same year, Swaziland established its first legislative body—an advisory council of elected European representatives mandated to advise the British high commissioner on non-Swazi affairs. In 1944, the high commissioner conceded that the council had no official status and recognized the paramount chief, or king, as the native authority for the territory to issue legally enforceable orders to the Swazis.

In the early years of colonial rule, the British had expected that Swaziland would eventually be incorporated into South Africa. After World War II, however, South Africa's intensification of racial discrimination induced the United Kingdom to prepare Swaziland for independence. Political activity intensified in the early 1960s. Several political parties were formed and jostled for independence and economic development. The largely urban parties had few ties to the rural areas, where the majority of Swazis lived. The traditional Swazi leaders, including King Sobhuza II and his Inner Council, formed the Imbokodvo National Movement (INM), a political group that capitalized on its close identification with the Swazi way of life. Responding to pressure for political change, the colonial government scheduled an election in mid-1964 for the first legislative council in which the Swazis would participate. In the election, the INM and four other parties, most having more radical platforms, competed in the election. The INM won all 24 elective seats.

Having solidified its political base, INM incorporated many demands of the more radical parties, especially that of immediate independence. In 1966, the U.K. Government agreed to discuss a new constitution. A constitutional committee agreed on a constitutional monarchy for Swaziland, with self-government to follow parliamentary elections in 1967. Swaziland became independent on September 6, 1968. Swaziland's post-independence elections were held in May 1972. The INM received close to 75% of the vote. The Ngwane National Liberatory Congress (NNLC) received slightly more than 20% of the vote, which gained the party three seats in parliament.

In response to the NNLC's showing, King Sobhuza repealed the 1968 constitution on April 12, 1973 and dissolved parliament. He assumed all powers of government and prohibited all political activities and trade unions from operating. He justified his actions as having removed alien and divisive political practices incompatible with the Swazi way of life. In January 1979, a new parliament was convened, chosen partly through indirect elections and partly through direct appointment by the King.

King Sobhuza II died in August 1982, and Queen Regent Dzeliwe assumed the duties of the head of state. In 1984, an internal dispute led to the replacement of the Prime Minister and eventual replacement of Dzeliwe by a new Queen Regent Ntombi. Ntombi's only child, Prince Makhosetive, was named heir to the Swazi throne. Real power at this time was concentrated in the Liqoqo, a supreme traditional advisory body that claimed to give binding advice to the Queen Regent. In October 1985, Queen Regent Ntombi demonstrated her power by dismissing the leading figures of the Liqoqo. Prince Makhosetive returned from school in England to ascend to the throne and help end the continuing internal disputes. He was enthroned as Mswati III on April 25, 1986. Shortly afterwards he abolished the Liqoqo. In November 1987, a new parliament was elected and a new cabinet appointed.

In 1988 and 1989, an underground political party, the People's United Democratic Movement (PUDEMO) criticized the King and his government, calling for democratic reforms. In response to this political threat and to growing popular calls for greater accountability within government, the King and the Prime Minister initiated an ongoing national debate on the constitutional and political future of Swaziland. This debate produced a handful of political reforms, approved by the King, including direct and indirect voting, in the 1993 national elections.

Although domestic groups and international observers criticized the gov-

ernment in late 2002 for interfering with the independence of the judiciary, parliament, and freedom of the press, significant improvements have been made concerning rule of law in the past two years. Swaziland's Court of Appeals resumed hearing cases in late 2004 after a two-year absence in protest of the government's refusal to abide by the court's decisions in two important rulings. In addition, the new Constitution went into effect in early 2006, and the 1973 proclamation, which, among other measures, banned political parties, lapsed at that time.

GOVERNMENT AND POLITICAL CONDITIONS

On July 26, 2005 King Mswati III ratified Swaziland's constitution. It went into effect February 8, 2006. This is Swaziland's first constitution in over 30 years.

According to Swazi law and custom, the monarch holds supreme executive, legislative, and judicial powers. In general practice, however, the monarch's power is delegated through a dualistic system: modern, statutory bodies, like the cabinet; and less formal traditional government structures. The king must approve legislation passed by parliament before it becomes law. The prime minister, who is head of government, and the cabinet, which is recommended by the prime minister and approved by the king, exercise executive authority. At present, parliament consists of a 65-seat House of Assembly (55 members are elected through popular vote; 10 are appointed by the king) and 30-seat Senate (10 members are appointed by the House of Assembly, and 20 are appointed by the king). House of Assembly elections were last on September 19, 2008. While King Mswati announced that Sibusiso Barnabas Dlamini would serve as his new Prime Minister on October 16, cabinet was officially dissolved immediately before the elections and all other ministers have yet to be named.

For local administration Swaziland is divided into four regions, each with an administrator appointed by the king. Parallel to the government structure is the traditional system consisting of the king and his advisers, traditional courts, 55 tinkhundla (subregional districts in which traditional chiefs are grouped), and 366 chiefdoms. Swaziland is a member of the Southern African Customs Union (SACU), with which the U.S. began negotiating a free trade agreement in May 2003. The other members of SACU are Botswana, Namibia, Lesotho, and South Africa.

Principal Government Officials

Last Updated: 11/12/08

King: **MSWATI III**
Prime Minister: **Absalom Themba DLAMINI**
Dep. Prime Min.: **Albert SHABANGU**

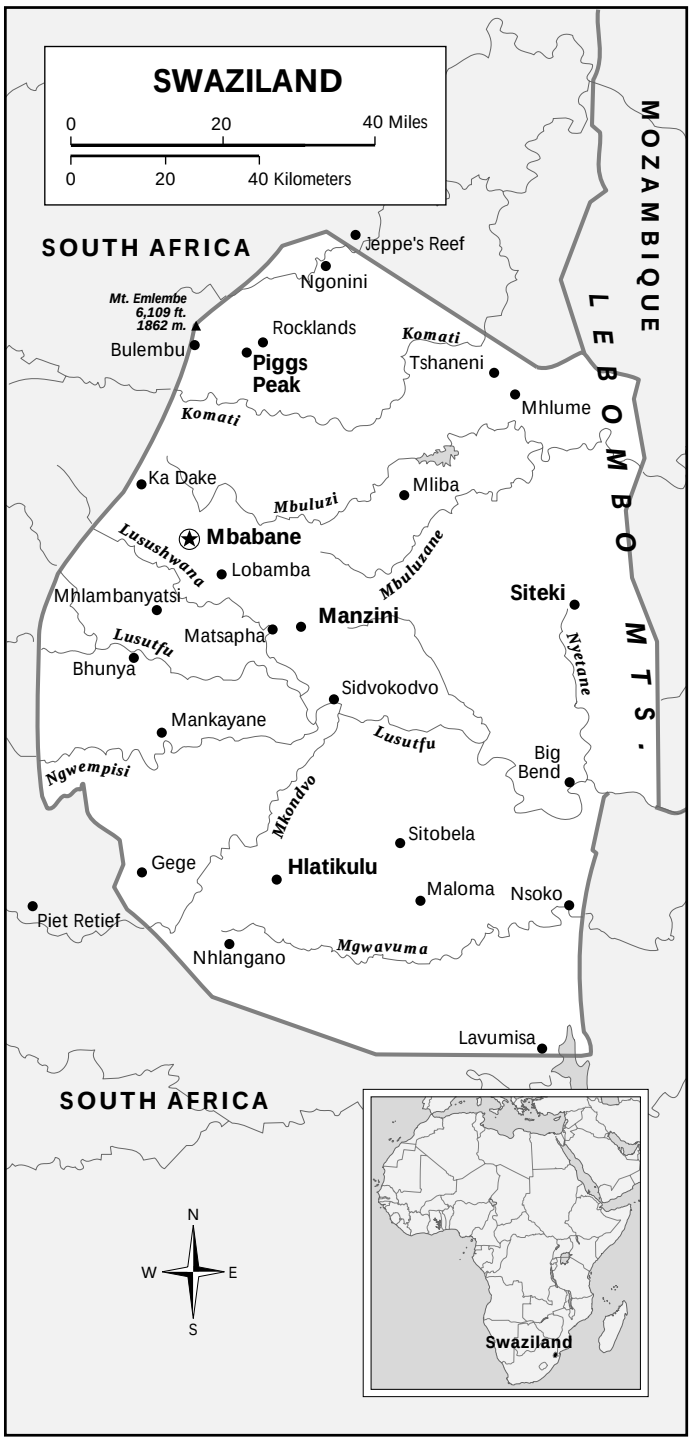
Governor, Central Bank: **Martin DLAMINI**
Ambassador to the US: **Mary Madzandza KANYA**
Permanent Representative to the UN, New York: **Phesheya Mbongeni DLAMINI**



Swaziland maintains an embassy in the United States at 1712 New Hampshire Avenue, NW, Washington, DC 20009 (tel: 202-234-5002; fax: 202-234-8254). Swaziland's UN Mission is located at 408 East 50th Street, New York, NY 10022 (tel: 212-371-8910; fax: 212-754-2755).

ECONOMY

Swaziland ranks as a lower middle income country but it's estimated that 69 percent of the population lives in poverty. Most of the high-level economic activity is in the hands of non-Africans, but ethnic Swazis are becoming more active. Small entrepreneurs are moving into middle management positions. Although 70% of Swazis live in rural areas, nearly every homestead has a wage earner. The past few years have seen wavering economic growth, which has been exacerbated by the economy's inability to create new jobs at the same rate that new job seekers enter the market. This is due in part to the country's population growth rate, which strains the natural heritage and the country's ability to provide adequate social services, such as health care and education. Overgrazing, soil depletion, drought, and floods are persistent problems.

Nearly 60% of Swazi territory is held by the Crown in trust of the Swazi nation. The balance is privately owned, much of it by foreigners. The question of land use and ownership remains a very sensitive one. For Swazis living on rural homesteads, the principal occupation is either subsistence farming or livestock herding. Culturally, cattle are important symbols of wealth and status, but they are being used increasingly for milk, meat, and profit.

Swaziland enjoys well-developed road links with South Africa. It also has railroads running east to west and north to south. The older east-west link, called the Goba line, makes it possible to export bulk goods from Swaziland through the Port of Maputo in Mozambique. Until recently, most of Swaziland's imports were shipped through this port. Conflict in Mozambique in the 1980s diverted many Swazi exports to ports in South Africa. A north-south rail link, completed in 1986, provides a

connection between the Eastern Transvaal rail network and the South African ports of Richard's Bay and Durban.

The sugar industry, based solely on irrigated cane, is Swaziland's leading export earner and private-sector employer. Soft drink concentrate (a U.S. investment) another large export earner, followed by wood pulp and lumber from cultivated pine forests. Pineapple and citrus fruit are other important agricultural exports.

Swaziland mines coal and diamonds for export. There also is a quarry industry for domestic consumption. Mining contributes about 1.8% of Swaziland's GDP each year but has been declining in importance in recent years. Recently, a number of industrial firms have located at the industrial estate at Matsapha near Manzini. In addition to processed agricultural and forestry products, the industrial sector at Matsapha also produces garments, textiles, and a variety of light manufactured products. The Swaziland Industrial Development Company (SIDC) and the Swaziland Investment Promotion Authority (SIPA) have assisted in bringing many of these industries to the country. Government programs encourage Swazi entrepreneurs to run small and medium-sized firms. Tourism also is important, attracting more than 424,000 visitors annually, mostly from Europe and South Africa.

From the mid-1980s, foreign investment in the manufacturing sector boosted economic growth rates significantly. Beginning in mid-1985, the depreciated value of the currency increased the competitiveness of Swazi exports and moderated the growth of imports, generating trade surpluses. During the 1990s, the country often ran small trade deficits. South Africa and the European Union are major customers for Swazi exports.

Swaziland became eligible for the African Growth and Opportunity Act (AGOA) in 2000 and qualified for the apparel provision in 2001. AGOA created over 30,000 jobs, mostly for women, in Swaziland's apparel industry. However, the industry suffered in 2005-2006, due to both increased global competition as a result of the end of the Agreement on Textiles and Clothing (ATC) on January 1, 2005, and the strong Rand (Swaziland's currency is linked to the South African Rand at par), which reduced exports. There are an estimated 16,000 people employed in the apparel industry.

Swaziland, Lesotho, Botswana, Namibia, and the Republic of South Africa form the Southern African Customs Union (SACU), where import duties apply uniformly to member countries. Swaziland, Lesotho, Namibia, and South Africa

also are members of the Common Monetary Area (CMA) in which repatriation and unrestricted funds are permitted. Swaziland issues its own currency, the lilangeni (plural: emalangeni).

FOREIGN RELATIONS

Swaziland is a member of the United Nations, the African Union, and the Common Market for Eastern and Southern Africa (COMESA). It is presently the chair of the Southern African Development Community's (SADC) Organ for Defense, Politics, and Security. Ten accredited ambassadors or honorary consuls are resident in the country. Swaziland maintains diplomatic missions in Brussels, Copenhagen, Kuala Lumpur, London, Maputo, Nairobi, Pretoria, Taipei, the United Nations, and Washington.

U.S.-SWAZILAND RELATIONS

The United States seeks to maintain and strengthen the good bilateral relations that have existed since the kingdom became independent in 1968. U.S. policy stresses continued economic and political reform and improved industrial relations. The United States assists Swaziland with a number of HIV/AIDS initiatives and programs implemented through the U.S. Agency for International Development (USAID), Centers for Disease Control (CDC), the Peace Corps, African Development Foundation, the Department of Labor, and the Department of Defense. In addition, the U.S. supports small enterprise development, education, military training, institutional and human resources development, agricultural development, and trade capacity building. The U.S. is also the largest bilateral donor to the Global Fund, Swaziland's principal HIV/AIDS funding source. The U.S. Government sends about 4 Swazi professionals to the United States each year, from both the public and private sectors, primarily for master's degrees, and about 5 others for three- to four-week International Visitor programs. About 6 military members are sent to the United States for education and training purposes. In 2003, Peace Corps volunteers returned to Swaziland after a nine-year absence. The current Peace Corps/Swaziland program, Community Health Project, focuses on HIV/AIDS and provides assistance in the execution of two components of the HIV/AIDS national strategy—risk reduction and mitigation of the impact of the disease. Volunteers encourage youth to engage in appropriate behaviors that will reduce the spread of HIV; they work with children orphaned by the HIV/AIDS pandemic; and they assist in capacity building for non-governmental organizations and community based organizations.

TRAVEL

Consular Information Sheet

August 6, 2008

Country Description: Swaziland is a small developing nation in southern Africa. Several well-developed facilities for tourism are available. The capital is Mbabane.

Entry Requirements: A passport is required. Visas are not required for tourists and business travelers arriving in Swaziland for short visits (less than 60 days) on standard U.S. passports. Most travelers visiting Swaziland enter through South Africa.

Please Note: All travelers traveling to South Africa are strongly encouraged to have several unstamped visa pages left in their passports. South Africa requires two unstamped visa pages, excluding amendment pages, to enter the country. Visitors who do not have enough free visa pages in their passport risk being denied entry and returned to the U.S. at their own expense.

For further information on Swaziland's visa requirements, contact the Embassy of the Kingdom of Swaziland, 1712 New Hampshire Avenue NW, Washington, DC 20009; phone (202) 234-5002.

Safety and Security: Public protests, demonstrations, and strikes occur from time to time in Swaziland and are mostly in response to ongoing labor relations/difficulties. When a strike is pending, armed soldiers may be called to augment the police force, and they have used force to disrupt such events. During the course of such events, police may not distinguish between "innocent bystanders" and protesters. Americans should avoid crowds, political rallies and street demonstrations. For the latest security information, Americans traveling abroad should regularly monitor the Department of State, Bureau of Consular Affairs' web site at http://travel.state.gov, where the current Travel Warnings and Travel Alerts, as well as the Worldwide Caution, can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S. and Canada, or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: Violent crime is a concern and is the most significant threat to American citizens visiting or working in Swaziland. Incidents of petty crime and occasionally violent crime are most prevalent in Mbabane, the capital city, and Manzini, Swaziland's urban industrial center, but also affect most other urban and rural areas. Criminals will resort to force if necessary, including deadly force, in order to accomplish their goal. Gangs are not deterred by confrontations with their intended victims. Carjacking occurs and, as with other crimes, can be potentially violent if victims do not immediately cooperate.

Congested dark urban areas are particularly dangerous at night and daytime attacks are not uncommon. The presence of others on the street should not be misinterpreted as an indication of security. Many victims report being robbed in the presence of large numbers of witnesses. Pedestrians are cautioned not to wear jewelry or carry expensive or unnecessary valuables in public. American citizens are also advised against displaying cell phones and large sums of cash, as they are targets for thieves. Money should only be converted at authorized currency exchanges and never with street vendors.

Crime victims should immediately report the incident to the nearest police station. If there is an emergency, the police can be contacted by dialing 999.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed. The local equivalent to the "911" emergency line in Swaziland is: 999.

Medical Facilities and Health Information: Medical facilities are limited throughout Swaziland. Although the Mbabane Clinic in the capital is small and currently undergoing building renovations, it is well equipped and well staffed for minor procedures. For advanced care, Americans often choose to go to South Africa where better facilities and specialists exist. Most prescription drugs are available locally or can be imported from South Africa, but travelers are advised to bring sufficient quantities of their own required medication. A doctor's note describing the medication may be helpful if questioned by authorities. The U.S. Department of State is unaware of any HIV/AIDS entry restrictions for visitors to or foreign residents of Swaziland. Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's website at http://wwwn.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith/en. The Swaziland Embassy site indicates that vaccination against yellow fever and cholera may be required, but can be secured in Swaziland.

Travelers should be aware that Swaziland suffers from one of the highest rates of TB and HIV/AIDS in the world, and take adequate precautions to avoid exposure.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Swaziland is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

Traffic accidents in Swaziland may pose an even greater hazard than crime. Visitors should use extreme caution when driving, given the relatively high rates of speed of drivers on major thoroughfares. Other hazards include poor lighting and traffic signals; presence of pedestrians, animals, and slower moving vehicles; aggressive driving behavior; and erratic stopping for pedestrian and animals. Traffic drives on the left in Swaziland, which requires U.S. drivers to exercise particular caution. Special care should be used in driving at night and in fog, especially in rural areas. Rural and suburban areas are poorly lit and pose additional safety hazards as pedestrians and animals cross the road. Many vehicles are poorly maintained and lack headlights.

Extreme caution is recommended if/when using mini-bus taxis, which follow fixed routes and are flagged down by passengers almost everywhere on the streets and roads of Swaziland. Many of these vehicles fail to meet minimal safety standards. Drivers frequently overload the vehicles and travel at excessive speeds. Fatal accidents involving these conveyances are very common.

Aviation Safety Oversight: The U.S. Federal Aviation Administration (FAA) has assessed the Government of Swaziland's Civil Aviation Authority as not being in compliance with International Civil Aviation Organization (ICAO) aviation safety standards for the oversight of Swaziland's air carrier operations. For more information, travelers may visit the FAA's web site at http://www.faa.gov.

Special Circumstances: It is illegal to photograph Swaziland's government buildings, members of the Swazi armed forces, royal residences

and official ceremonies without prior permission from government authorities.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating Swazilandlaws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Swaziland are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: Because Embassy Mbabane does not process immigrant visas, adoptions of Swazi children are processed at Consulate General Johannesburg, South Africa. For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in Swaziland are encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration web site so that they can obtain updated information on travel and security Swaziland. Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency. The U.S. Embassy is located in the Central Bank Building on Mahlokohla Street in the capital city of Mbabane. The mailing address is Box 199, Mbabane, Swaziland. The telephone number is (268) 404-6441/5; fax (268) 404-5959.

Intercountry Adoption

June 2006

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is based on public sources and current understanding. Questions involving foreign and U.S. immigration laws and legal interpretation should be addressed respectively to qualified foreign or U.S. legal counsel. Intercountry adoptions in Swaziland are governed by the Adoption of Children Act of 1952. Under this law, an adopted child cannot be removed from the Kingdom of Swaziland within one year of adoption unless permission has been obtained, in writing, from the Minister of Home Affairs.

Patterns of Immigration: Recent U.S. immigrant visa statistics indicate that only one immigrant visa was issued to an orphan from Swaziland in the last five fiscal years.

Adoption Authority: The government office responsible for adoptions in Swaziland is:

Department of Social Welfare
Ministry of Health and Social Welfare
Box 5
Mbabane, Swaziland
Tel: +268-404-2431
Fax: +268-404-2092

Eligibility Requirements for Adoptive Parents: Prospective adoptive parent(s) are required to undergo a home study by a Social Welfare Officer. The adoptive parent(s) must be at least 25 years old and at least 25 years older than the child, if the adopted child is over 16 years of age. In addition, the law requires that adoptive parent(s) be "qualified" and of "good repute." Note: U.S. immigration law requires that an adopted orphan be under the age of sixteen in order to qualify for a U.S. immigrant visa.

Residency Requirements: Swaziland has no residency requirements for prospective adoptive parents.

Time Frame: The time frame for adoption procedures differs widely and depends in large part on how quickly prospective adoptive parents(s) and their agents collect the necessary paperwork. From start to finish, the process can take up to three months. Applying for a Swaziland passport for the child (necessary for the U.S. immigrant visa application) can take additional time.

Adoption Agencies and Attorneys: There are no adoption agencies or adoption attorneys in Swaziland. Prospective adoptive parents apply directly to the Department of Social Welfare. However, prospective adoptive parents must hire a local attorney to assist them with some steps in the process. The U.S. Embassy in Swaziland has a list of lawyers known to work with U.S. citizens. Please contact the U.S. Embassy in Mbabane for a list of lawyers. Neither the U.S. Department of State nor the U.S. Embassy in Mbabane can vouch for the efficacy or professionalism of attorneys referenced on this list.

Adoption Fees: The Department of Social Welfare does not charge any fees for processing adoptions; nor does the Magistrate's Courts. Appropriate lawyers' fees will apply. All paperwork submitted to the Courts or to the Department of Social Welfare must get a "revenue stamp" (E10 or USD $1.50) and the fee for a passport is Emalangeni 150 (USD $25).

Adoption Procedures: Adoption procedures are initiated when a prospective adoptive parent(s), having first identified the child to be adopted, submits an adoption request to the Department of Social Welfare office in the district where the child resides. The Department will have one of its Social Welfare Officers conduct a home study, if the prospective adoptive parents reside in Swaziland.

In the case where the adoptive parents reside outside Swaziland, the Department of Social Welfare will generally accept a home study completed by a reputable adoption agency.

The prospective adoptive parents should hire a lawyer to refer the case to the Magistrate's Court for an adoption hearing. Amongst other considerations, the Court must decide that the adoption is in the best interests of the child. In addition, the Court must receive consent from the child's parents, from the guardian in the case where the parents are deceased, or from the child if he/she is over 10 years of age. An adoption order terminates all rights and legal responsibilities existing between the child and any legally recognized parent or extended family. The adopted child is thereafter deemed by law to be the legitimate child of the adoptive parents. Prospective parents can apply for a revised Swaziland birth certificate based on the official order of adoption.

An adopted child cannot be removed from the Kingdom of Swaziland within one year of adoption unless permission has been obtained, in writing, from the Minister of Home Affairs. Once permission has been obtained, the parents may apply to the Ministry of Home Affairs for the passport. The passport fee is E150 (USD $25).

Required Documents:

- Request for adoption to the Department of Social Welfare;
- Home study;
- Identification of prospective adoptive parents;
- Other documents may be requested as the case proceeds.

Embassy of the Kingdom of Swaziland
1712 New Hampshire Avenue, NW
Washington, DC 20009
Tel: +202-234-5002

U.S. Immigration Requirements: Prospective adoptive parents are strongly encouraged to consult USCIS publication M-249, *The Immigration of Adopted and Prospective Adoptive Children*, as well as the Department of State publication, *Intercountry Adoptions.*

Please see the *Intercountry Adoption* section of this book for more details and review current reports online at http://adoption.state.gov.

U.S. Embassy, Mbabane
Central Bank Building
Mahlokohla Street, Mbabane
Box 199
Mbabane, Swaziland
Tel: +268-404-6441/5
Fax: +268-404-5959
Email: consularmbaban@state.gov

The U.S. Embassy in Swaziland does not conduct immigrant visa interviews or make decisions in immigrant visa cases. All immigrant visa applications for citizens of Swaziland, including adopted children, are reviewed at the U.S. Consulate General in Johannesburg, South Africa.

Additional Information: Specific questions about adoption in Swaziland may be addressed to the U.S. Embassy in Swaziland. Questions about U.S. immigrant visas for adopted children from Swaziland should be directed to the U.S. Consulate General in Johannesburg at the address provided above. General questions regarding intercountry adoption may be addressed to the Office of Children's Issues, U.S. Department of State, CA/OCS/CI, SA-29, 4th Floor, 2201 C Street, NW, Washington, D.C. 20520-4818, toll-free Tel: 1-888-407-4747.

SWEDEN

Compiled from the August 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Kingdom of Sweden

PROFILE

Geography

Area: 449,964 sq. km. (173,731 sq. mi.)—slightly larger than California.

Cities: Capital—Stockholm (city population: 795,163). Other cities—Göteborg (city population: 493,498), Malmö (city population: 280,801).

Terrain: Generally flat or rolling. Three of the principal rivers, the Ume, the Torne and the Angerman, flow into the Gulf of Bothnia. The highest areas are found in the Kjolen mountain range along the border with Norway, where peaks rise to over 1,500 m; the highest point is at the northern tip of this range, at Kebnekaise, which reaches 2,111 m (6,926 ft.). South of the mountains is the lakeland area, where the Vanern, the largest lake in western Europe—over twice the size of Luxembourg—is situated. South of the lakes is the infertile Smaland plateau, surrounded by the lowland plains that border the sea. The mountainous regions and some northern parts of Sweden are covered in snow for much of the year, and only 8% of the country is given over to agriculture.

Climate: Temperate in south with cold, cloudy winters and cool, partly cloudy summers; sub-arctic in the north. The north of Sweden lies within the Arctic Circle, and continental influences also contribute to the cold climate. In northern areas winters are usually long and extremely cold. The south of Sweden benefits from maritime influences, however, and the climate is milder. In the capital, Stockholm, on the southeast coast, daily average temperatures only fall to -3.1ºC (27ºF) in February, the coldest month, and are as warm as 17.8ºC (64ºF) in July. The mean annual rainfall in Stockholm is 22 in., with the largest amount of rain falling between July and September.

People

Nationality: Noun—Swedes; adjective—Swedish.

Population: (May 2008) 9,208,034.

Annual population growth rate: (May 2008) 0.78%.

Ethnic groups: Indigenous Swedes, ethnic Finns, ethnic Sami.

Immigrants (2007): 1.2 million of Sweden's residents are foreign-born; 17.3% of all Swedes are either born abroad or have two parents born abroad. In 2007 99,485 people immigrated to Sweden. The immigrant groups are Finns, Iraqis, ex-Yugoslavia nationals, Somalis, Iranians, Norwegians, Danes, and Poles.

Religions: Lutheran (80%), Muslim (5%), Roman Catholic, Orthodox, Baptist, Jewish, Buddhist.

Education: Years compulsory—9. Literacy—99%.

Health: Infant mortality rate (2006)—2.78/1,000. Life expectancy—men 78.94 years, women 82.99 years.

Work force: (45.10 million, July 2008 est.): Services—70.7%; industry—28.2%; agriculture—1.1%. Unemployment (May 2008)—5.9%.

Unemployment: (2007)—5.2%.

National holidays: (2008): January 1 (New Year's Day); January 6 (Epiphany); March 21 (Good Friday); March 22 (Easter); March 23 (Easter Sunday); March 24 (Easter Monday); May 1 (May Day and Ascension Day); May 11 (Whit Sunday); June 6 (National Day); June 21 (Midsummer Holiday); November 1 (All Saints' Day); December 25 (Christmas); December 26 (Boxing Day).

The eve of a holiday is as important—or more so—than the holiday itself. Most Swedes have the day off, including those working in the civil service, banks, public transport, hospitals, shops, and the media. Others have at least a half-day. This applies especially to Midsummer's Eve, All Saints' Day Eve, and Christmas Eve. The eve of May Day is called Valborg Eve or St Walpurgis. When a holiday falls on a Thursday many Swedes have the following Friday off in addition. When a holiday falls on a Saturday or Sunday it is not taken on the following Monday.

Government

Type: Constitutional monarchy.
Constitution: The Swedish Constitution is based on four fundamental laws: the Instrument of Government (originally dating from June 6, 1809), the Act of Succession (1810), the Freedom of the Press Act (1949), and the Riksdag Act. Following partial reforms in 1968 and 1969, a new Instrument of Government and a new Riksdag Act were adopted in 1973 and 1974, and the revised Constitution came into force on January 1, 1975, replacing the Acts of 1809, 1866, and 1949.
Government branches: Executive—monarch (head of state); prime minister (head of government); Cabinet, responsible to parliament. Legislative—unicameral parliament (Riksdag—349 members). Judicial—84 district courts, 10 appeal courts and 2 superior courts.
Political subdivisions: 21 counties, 18 county councils, 290 municipalities, and two regions.
Political parties: The Moderate Party (conservative), the Liberal Party, the Center Party, the Christian Democratic Party, the Social Democratic Party, the Left Party, and the Green Party.
Suffrage: Universal, 18 years of age. After 3 years of legal residence, immigrants may vote in county and municipal elections (but not in national elections).

Economy

GDP: (2007, purchasing power parity) $308.9 billion.
GDP: (2007, official exchange rate) $384.1 billion.
Annual growth rate: (2007) 2.7%.
Per capita income: (2007, purchasing power parity) $36,500.
Inflation rate: (June 2008) 3.2%.
Natural resources: Forests, hydroelectric power, iron ore, copper, lead, zinc, gold, silver, tungsten, uranium, arsenic, feldspar, timber.
Agriculture: (2007, 1.4% of GDP) Products—dairy products, meat, grains (barley, wheat), sugar beets, potatoes, wood. Arable land—6 million acres.
Industry: (2007, 28.9% of GDP) Types—machinery/metal products (iron and steel), electrical equipment, aircraft, paper products, precision equipment (bearings, radio and telephone parts, armaments), wood pulp and paper products, processed foods.
Services: (2006, 69.8% of GDP) Types—telecommunications, computer equipment, biotech.
Trade: Exports (2007)—$170.2 billion. Types—machinery, transport equipment, motor vehicles, wood products, paper, pulp, chemicals, iron and steel products and manufactured goods. Major trading partners, exports (2008)—Germany 10.3%, Norway 9.1%, U.K. 7.7%, U.S. 7.0%, EU total 61.6%. Imports (2007)—$150.6 billion. Types—machinery, petroleum and petroleum products, chemicals, motor vehicles, iron and steel, foodstuffs, clothing. Major trading partners, imports (2008)—Germany 18.4%, Denmark 9.5%, Norway 8.8%, U.K. 6.9%, Netherlands 5.8%, Finland 5.5%, France 5.3%, EU total 70.9%.

PEOPLE

Sweden has one of the world's highest life expectancies and one of the lowest birth rates. The country counts at least 17,000 Sami among its population. About one-fifth of Sweden's population are immigrants or have at least one foreign-born parent. The largest immigrant groups are from Finland, Iraq, Serbia and Montenegro, Bosnia-Herzegovina, Iran, Norway, Denmark, and Poland. This reflects Nordic immigration, earlier periods of labor immigration, and later decades of refugee and family immigration.

Swedish is a Germanic language related to Danish and Norwegian but different in pronunciation and orthography. English is by far the leading foreign language, particularly among students and those under age 50.

Sweden has an extensive child-care system that guarantees a place for all young children from 2-6 years old in a public day-care facility. From ages 7-16, children attend compulsory comprehensive school. After completing the ninth grade, 90% attend upper secondary school for either academic or technical education. Swedes benefit from an extensive social welfare system, which provides childcare and maternity and paternity leave, a ceiling on health care costs, old-age pensions, and sick leave, among other benefits. Parents are entitled to a total of 480 days' paid leave at 80% of a government-determined salary cap between birth and the child's eighth birthday. The parents may split those days however they wish, but 60 of the days are reserved specifically for the father. The parents may also take an additional five months of unpaid leave.

HISTORY

During the seventh and eighth centuries, the Swedes were merchant seamen well known for their far-reaching trade. In the ninth century, Nordic Vikings raided and ravaged the European continent as far as the Black and Caspian Seas. During the 11th and 12th centuries, Sweden gradually became a unified Christian kingdom that later included Finland. Queen Margaret of Denmark united all the Nordic lands in the "Kalmar Union" in 1397. Continual tension within the countries and within the union gradually led to open conflict between the Swedes and the Danes in the 15th century. The union's final disintegration in the early 16th century brought on a long-lived rivalry between Norway and Denmark on one side and Sweden and Finland on the other.

In the 16th century, Gustav Vasa fought for an independent Sweden, crushing an attempt to restore the Kalmar Union and laying the foundation for modern Sweden. At the same time, he broke with the Catholic Church and established the Reformation. During the 17th century, after winning wars against Denmark, Russia, and Poland, Sweden-Finland (with scarcely more than 1 million inhabitants) emerged as a great power. Its contributions during the Thirty Years War under Gustav II Adolf (Gustavus Adolphus) determined the political as well as the reli-

gious balance of power in Europe. By 1658, Sweden ruled several provinces of Denmark as well as what is now Finland, Ingermanland (in which St. Petersburg is located), Estonia, Latvia, and important coastal towns and other areas of northern Germany. Russia, Saxony-Poland, and Denmark-Norway pooled their power in 1700 and attacked the Swedish-Finnish empire. Although the young Swedish King Karl XII (also known as Charles XII) won spectacular victories in the early years of the Great Northern War, his plan to attack Moscow and force Russia into peace proved too ambitious; he fell in battle in 1718. In the subsequent peace treaties, the allied powers, joined by Prussia and England-Hanover, ended Sweden's reign as a great power.

Sweden suffered further territorial losses during the Napoleonic wars and was forced to cede Finland to Russia in 1809. The following year, the Swedish King's adopted heir, French Marshal Bernadotte, was elected Crown Prince as Karl Johan by the Riksdag (parliament). In 1813, his forces joined the allies against Napoleon. The Congress of Vienna compensated Sweden for its lost German territory through a merger of the Swedish and Norwegian crowns in a dual monarchy. Sweden's last war was fought in 1814. It was a brief confrontation with Norway to restrain their demands for independence. The war resulted in Norway entering into union with Sweden, but with its own constitution and parliament. The Sweden-Norway union was peacefully dissolved at Norway's request in 1905.

Sweden's predominantly agricultural economy shifted gradually from village to private farm-based agriculture during the Industrial Revolution, but this change failed to bring economic and social improvements commensurate with the rate of population growth. About 1 million Swedes immigrated to the United States between 1850 and 1890.

favor of free enterprise, the introduction of taxation and voting reforms, the installation of a national military service, and the rise in the electorate of three major party groups—Social Democratic Party, Liberal Party, and Conservative Party. During and after World War I, in which Sweden remained neutral, the country benefited from the worldwide demand for

Swedish steel, ball bearings, wood pulp, and matches. Postwar prosperity provided the foundations for the social welfare policies characteristic of modern Sweden. Foreign policy concerns in the 1930s centered on Soviet and German expansionism, which stimulated abortive efforts at Nordic defense cooperation. Sweden followed a policy of armed neutrality during World War II and currently remains nonaligned.

Sweden became a member of the European Union (EU) in 1995. In September 2003 Sweden held a referendum on entering the European Monetary Union. The Swedish people rejected participation, with 56% voting against and 42% for. All parliamentary parties pledged to respect the outcome of the referendum. No new referendum is currently planned.

GOVERNMENT

Sweden's government is a limited constitutional monarchy with a parliamentary system. Popular government in Sweden rests upon ancient tradition. The Swedish Parliament (Riksdag) stems from tribal courts (Ting) and the election of kings during the Viking era. It became a permanent institution in the 15th century.

King Carl XVI Gustaf (Bernadotte) ascended to the throne on September 15, 1973. His authority is symbolic and representational. Executive authority is vested in the Cabinet, which consists of a prime minister and 22 ministers who run the governmental departments. The current "Alliance" government, led by Prime Minister Fredrik Reinfeldt, came to power in September 2006.

Sweden has three levels of government: national, regional, and local. In addition, there is a European level, which has acquired increasing importance following Sweden's entry into the EU. Parliamentary, municipal, and county council elections are held every four years. The 349-member unicameral Riksdag has legislative powers, and is in session generally from September through mid-June. Proposals for new laws are presented by the government, which also implements decisions made by the Riksdag. The government is assisted in its work by the Government Offices, comprising a number of ministries, and some 300 central government agencies and public administrations.

Sweden is divided into 21 counties (län), 18 county councils (landsting), 290 municipalities (kommuner), and two semi-independent regions. Each county is headed by a governor, who is appointed by the central government. The counties coordinate administration with national political goals for the county. The county council (landsting) is a regional government that is popularly elected with particular responsibility for health and medical care. The municipalities are local governments that deal with issues such as education, public transportation and social welfare. Elected municipal councils are headed by executive committees roughly analogous to the boards of commissioners found in some U.S. cities.

Swedish law draws upon Germanic and Roman traditions. It is neither as codified as French law nor as dependent on judicial precedent as U.S. law. Legislative and judicial institutions include, in addition to the Riksdag, the Supreme Court, the Supreme Administrative Court, the Labor Court, the Law Council, District Courts and Courts of Appeal, and the Public Prosecutor's Office. The parliamentary ombudsmen and the Chancellor of Justice oversee the application of laws with particular attention to abuses of authority.

Principal Government Officials

Last Updated: 11/12/08

King: **CARL XVI GUSTAF**
Prime Min.: **Fredrik REINFELDT**
Dep. Prime Min.: **Maud OLOFSSON**
Min. of Agriculture, Food, & Fisheries: **Eskil ERLANDSSON**
Min. of Culture: **Lena Adelsohn LILJEROTH**
Min. of Defense: **Sten TOLGFORS**
Min. of Education: **Lars LEIJONBORG**
Min. of Enterprise & Energy: **Maud OLOFSSON**
Min. of Environment: **Andreas CARLGREN**
Min. of European Affairs: **Cecila MALMSTROM**
Min. of Finance: **Anders BORG**
Min. of Foreign Affairs: **Carl BILDT**
Min. of Foreign Trade: **Ewa BJORLING**
Min. of Health & Elderly Care: **Maria LARSSON**
Min. of Infrastructure: **Asa TORSTENSSON**
Min. of Integration & Gender Equality Affairs: **Nyamko SABUNI**
Min. for International Development Cooperation: **Gunilla CARLSSON**
Min. of Justice: **Beatrice ASK**
Min. for Labor Market Issues: **Sven Otto LITTORIN**
Min. of Local Government & Financial Markets: **Mats ODELL**
Min. of Migration: **Tobias BILLSTROM**
Min. of Schools: **Jan BJORKLAND**
Min. of Social Affairs: **Goran HAGGLUND**
Min. of Social Benefits: **Cristina Husmark PEHRSSON**
Governor, Swedish Central Bank: **Stefan INGVES**
Ambassador to the US: **Jonas HAFSTROM**
Permanent Representative to the UN, New York: **Anders LIDEN**

Sweden maintains an embassy in the United States at 2900 K Street, NW, Washington, DC 20007. Telephone: 202-467-2600, Internet: http://www.swedenabroad.com/washington.

Consulates General are in New York and Los Angeles. There also are consulates in 31 other U.S. cities. Contact the embassy for locations and telephone numbers.

POLITICAL CONDITIONS

Ordinary general elections to the Swedish Parliament are held every fourth year on the third Sunday in September. County council and municipal council elections take place at the same time. A barrier rule exists to prevent very small parties from gaining representation in the Parliament. A party must thus

receive at least 4% of the votes in the entire country or 12% in a single electoral district to qualify for any seats.

The most recent elections were held on September 17, 2006. The Alliance for Sweden (a coalition of four center-right parties—the Moderate Party, the Liberal Party, the Christian Democrat, and the Center Party) won 178 of the 349 seats, securing Moderate Fredrik Reinfeldt the position of Prime Minister. The 2006 election results for Sweden's major parties were as follows: the Social Democratic Party (34.99%; 130 seats), the Moderate Party (26.23%; 97 seats), the Center Party (7.88%; 29 seats), the Liberal Party (7.54%; 28 seats), the Christian Democrats (6.59%; 24 seats), the Left Party (5.85%; 22 seats), and the Green Party (5.24%; 19 seats).

The Social Democratic Party (SDP) has a base of blue-collar workers and public sector employees. It derives much of its power from strong links with the National Swedish Confederation of Trade Unions (LO), which represents blue-collar workers. The party program combines a commitment to social welfare programs and government direction of the economy. The Social Democratic Party has led the government for 65 of the 76 years since 1932; the 2006 election ended its most recent term of 12 consecutive years in office.

The Moderate Party emphasizes personal freedom, free enterprise, and reduction of the public-sector growth rate, while still supporting most of the social benefits introduced since the 1930s. The party also supports a strong military and Sweden's membership in the EU. Its voter base is urban business people and professionals, but the party also attracts young voters, main-street shop owners, and, to some extent, blue-collar workers. Moderate Party Leader Reinfeldt followed an election strategy that remodeled his party as "New Moderates," moving away from the party's right-wing, upper-class roots to appeal to a large middle ground of voters and successfully winning over many who had until then supported the SDP, as well as others who had previously voted for the smaller, non-socialist parties. Reinfeldt was instrumental in uniting into one party the previously separate four center-right parties. The Alliance offered alternative policies on job creation that persuaded voters. The Center Party maintains close ties to rural Sweden. The main priorities of the party include providing a sound economic climate for business and job creation, rural development, climate change and environmental concerns (including nuclear power), and health and welfare issues.

The Left Party, formerly the Communist Party, focuses on feminist issues, employment in the public sector, and the environment. It opposes privatization, cuts in public expenditure, Swedish participation in NATO activities, and EU membership. Its voter base consists mainly of young people, public sector employees, feminists, journalists, and former social democrats.

The Christian Democrat Party is conservative and value-oriented. Its voter base is primarily among members of conservative churches and rural populations. Christian Democrats seek government support for families and better ethical practices to improve care for the elderly.

The Liberal Party's platform is "social responsibility without socialism," which includes a commitment to a free-market economy combined with comprehensive Swedish social welfare programs. Foreign aid, education and women's equality also are popular issues. The Liberal Party base is mainly centered in educated middle-class voters.

The Green Party is a leftist environmentalist party that attracts young people. The Greens support a phasing-out of nuclear energy in Sweden and hope to replace it with alternative, environmentally friendly energy sources.

The next Swedish election for Parliament is scheduled to be held in 2010. In 2009 Sweden will vote for its representatives to the European Parliament.

ECONOMY

Sweden is a highly industrialized country. Agriculture, once accounting for nearly all of Sweden's economy, now employs less than 2% of the labor force. Extensive forests, rich iron ore deposits, and hydroelectric power are the natural resources which, through the application of technology and efficient organization, have enabled Sweden to become a leading producing and exporting nation.

The Swedish economic picture has brightened significantly since the severe recession in the early 1990s, but has recently been showing signs of possibly heading toward a new recession. Growth has been strong in recent years, with an annual average GDP growth rate of 2.7% in 2005, 4.1% in 2006, 2.7% in 2007, and an expected drop in 2008 to 2.4%. The inflation rate was low in 2006, with an annual average of about 1.5%. The rate increased to 2.2% in 2007. Unemployment has been a stubborn problem, but is now improving. In 2006 the unemployment rate reached 7.1%, but in 2007 it fell to 6.2% and in 2008 it is expected to drop to 5.8%. Since the mid-1990s, Sweden's export sector has grown significantly as the information technology (IT), telecommunications, and services industries have overtaken traditional industries such as steel, paper, and pulp. The overall current-account surplus has traditionally been much smaller than the merchandise trade balance, as Sweden has generally run a deficit on trade in services, net income flows, and unrequited transfers. Since 2003, however, this has not been the case, as the services balance swung into surplus in 2003 and has improved further since then. The income account also shifted from deficit into surplus in 2003, before slipping back to register small deficits in the years through 2007. Although the transfers balance remained in deficit, mainly as a result of Sweden's contributions to the EU budget, the overall current-account surplus was larger than the trade surplus from 2003 to 2005. Most categories of services exports produced an improvement over this period, but the biggest contribution

came from business services exports, followed by transportation and royalties and license fees.

Central government debt rose from 2002-2005 but fell between 2005 and 2007, and the debt is expected to continue falling in 2008 and 2009. As a percentage of GDP, public debt was 57% in 2000 and is expected to fall to 27% in 2009. In 2007 the central government had a surplus of $17.2 billion. For 2008 and 2009, surpluses of $17.4 billion and $17.7 billion are estimated. These figures show great improvement of the Swedish economy since the crisis of the early 1990s. The government plans to sell $31 billion in state assets during the next three years to further stimulate growth and raise revenue to pay down the federal debt. The new, strict budget process calls for spending ceilings set by Parliament. In 2007 the ceiling was set at $159.8 billion. These budget reforms, in combination with a constitutional change to the Swedish Central Bank, an independent entity, have greatly improved policy credibility. The effects of this improved credibility can be seen in the long-term interest rate margin compared against the Euro, which is negligible. From the perspective of longer-term fiscal sustainability, the anticipated reform of old-age pensions entered into force in 1999. The pension reform entails a far more robust system vis-à-vis adverse demographic and economic trends, which should keep the ratio of total pension disbursements to the aggregate wage bill close to 20% in the decades ahead. Both fiscal consolidation and pension reform have put public finances back on sustainable footing.

Almost 80% of the Swedish labor force is unionized. For most unions there is a counterpart employers' organization for businesses. The unions and employer organizations are independent of both the government and political parties, although the largest federation of unions, the National Swedish Confederation of Trade Unions (LO), always has maintained close links to the largest political party, the Social Democrats. There is no national minimum wage. Instead, wages are set by collective bargaining. U.S. direct investment in Sweden in 2006 (January-September) was approximately $2.16 billion. Major investments were made in computer software and hardware, IT/telecommunications, industrial goods, and health care.

FOREIGN RELATIONS

Swedish foreign policy is based on the premise that national security is best served by staying out of military alliances in peacetime in order to remain neutral in the event of war. In 2002 Sweden redefined its security position from neutral to one of non-alignment in peacetime with the ability to cooperate with military alliances in peacekeeping and peace-building missions. Internationally, the Swedish Government gives special focus to disarmament, arms control, and nuclear nonproliferation. Sweden has greatly contributed to numerous international peacekeeping operations under UN, EU, and NATO auspices, including the NATO-led peacekeeping forces in the Balkans (KFOR). The country contributes to the International Security Assistance Force (ISAF) in Afghanistan, and in March 2006 assumed leadership of the Provincial Reconstruction Team in Mazar-e-Sharif. Sweden also is part of EUFOR's mission to create peace and stability in eastern Chad and the northeast part of the Central African Republic, the area bordering Darfur.

Sweden is an active and vocal participant in the United Nations, the World Bank, World Trade Organization (WTO), Food and Agriculture Organization (FAO), the International Labor Organization (ILO), International Atomic Energy Agency (IAEA), United Nations Educational, Scientific and Cultural Organization (UNESCO), World Health Organization (WHO), and other international institutions. In January 1995 Sweden became a full member of the European Union after a referendum was passed with a 52.3% majority. Sweden became a member partially because it was increasingly isolated outside the economic framework of the Maastricht Treaty. Sweden is a member of NATO's Partnership for Peace (PFP). Sweden also cooperates closely with its Nordic neighbors, formally in economic and social matters through the Nordic Council of Ministers and informally in political matters through direct consultation.

The Swedish Government does not consider its nonalignment status to preclude it from being outspoken on international issues. Government leaders focus political and financial attention on fostering democracy in developing countries, paying particular attention to key African nations. During the Cold War, Sweden was suspicious of the superpowers, which it saw as making decisions affecting small countries without always consulting those countries. With the end of the Cold War, that suspicion has lessened somewhat, although Sweden still chooses to remain nonaligned.

U.S.-SWEDEN RELATIONS

Friendship and cooperation between the United States and Sweden is strong and close. The United States welcomes Sweden's membership in NATO's PFP and our ongoing cooperation in promoting democracy and freedom. Swedish-American friendship is buttressed by the presence of nearly 14 million Americans of Swedish heritage. Both countries in 1988 celebrated the 350th anniversary of the first Swedish settlement in the United States.

Embassy Stockholm's "One Big Thing" Alternative Energy Initiative. In September 2006 Embassy Stockholm launched the "One Big Thing" initiative, a mission-wide project to collaborate with Sweden on achieving a breakthrough in alternative energy. As the Embassy's highest priority, the One Big Thing encompasses four goals focusing on technology/research and development; financing and investment; public awareness; and policy. Accomplishments to date include a $5 million

grant from the U.S. Government's Defense Advanced Research Projects Agency (DARPA) for Swedish Biofuels AB, a company that produces biofuels for jet engines. The Embassy assisted Volvo in bringing its public/private partnership funding proposal for research on improved efficiency for heavy trucks to the attention of senior Department of Energy (DOE) officials, resulting in a $12 million agreement between the two governments and Volvo to fund several different projects. The Embassy arranged for the Saab 9.5 Biofuel car to be sent to DOE for testing to validate performance claims. In April 2007 Ambassador Wood introduced 30 Swedish alternative energy companies to American venture capital firms at a California seminar. As of January 2008, this list of investible companies had grown to include 47 companies. In August 2008 the first holder of the Fulbright Distinguished Chair in Alternative Energy Technology arrived at Chalmers University in Goteborg. This new American Fulbright position was created through a donation from Sweden's Marianne and Marcus Wallenberg Foundation. The donation supports the One Big Thing in the short term with teaching and research projects, and in the long term by establishing linkages between universities and scholars. In May 2007 the Embassy and the State Department in Washington initiated a meeting between President Bush and Prime Minister Reinfeldt at the White House to discuss climate change and U.S.-Swedish cooperation, and facilitated the Prime Minister's visit to the National Renewable Energy Laboratory in Colorado. These meetings led to the conclusion and signing of a U.S.-Sweden biofuels cooperation agreement in June 2007.

TRAVEL

Consular Information Sheet

October 14, 2008

Country Description: Sweden is a highly developed stable democracy with a modern economy.

Entry Requirements: Sweden is a party to the Schengen agreement. As such, U.S. citizens may enter Sweden for up to 90 days for tourist or business purposes without a visa. The passport should be valid for at least three months beyond the period of stay. For further details about travel into and within Schengen countries, please see our Schengen Fact Sheet. Contact the Swedish Embassy at 901 30th Street, NW, Washington, DC 20007, tel: (202) 467-2600 (mailing address 2900 K Street, N.W., Washington, DC), or the Swedish Consulate General in New York at (212) 583-2550. Visit the Sweden Abroad web site at www.swedenabroad.com for the most current visa information. Sweden's immigration authorities (Migrationsverket) also maintain a home page at http://www.migrationsverket.se/english.jsp.

Safety and Security: Sweden remains largely free of terrorist incidents. However, like other countries in the Schengen area, Sweden's open borders with its Western European neighbors allow the possibility of terrorist groups entering/exiting the country with anonymity. Americans are reminded to remain vigilant with regard to their personal security and to exercise caution.

For the latest security information, Americans traveling abroad should regularly monitor the Department's Internet web site at http://travel.state.gov where the current Worldwide Caution Travel Alert, Travel Warnings, and Travel Alerts can be found. Up to date information on security can also be obtained by calling 1-888-407-4747 toll free in the United States, or, for callers outside the United States and Canada, a regular toll line at 1-202-501-4444.

Crime: Sweden has a low crime rate with rare, but increasing, instances of violent crime. Most crimes involve the theft of personal property from cars or residences or in public areas. Pickpockets and purse-snatchers are becoming more prevalent. Many American citizens fall victim to these highly skilled thieves, especially at the main train stations in Stockholm and Gothenburg and during bus or train transit to and from airports. Do not put any bags containing valuables, such as your passport, down on the ground. Computer bags are particularly desirable. Pickpockets and purse-snatchers often work in pairs or groups with one distracting the victim while another grabs valuables. Often they operate in or near major tourist attractions such as Stockholm's Old Town, restaurants, amusement parks, museums, bars, buses, long distance trains, subway trains, train and bus stations, and airports. Hotel breakfast rooms and lobbies attract professional, well-dressed thieves who blend in with guests and target purses and briefcases left unguarded by unsuspecting tourists and business travelers. Valuables should not be left in parked vehicles.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you

are the victim of a crime while overseas, in addition to reporting to local police, contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, to contact family members or friends, and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

Sweden has a limited criminal injuries compensation program for victims of violent, personal, and property crime. Foreign citizens who are victims of crime on Swedish territory are eligible to apply for compensation, but if the victim and offender's affiliation to Sweden is transitory in nature, compensation may not be awarded even though the crime occurred on Swedish soil.

Application forms in English are available at local police stations and other government agencies as well as on the Internet at http://www.brottsoffermyndigheten.se. Claimants are generally notified of the program's decision within four months.

The local equivalent to the "911" emergency line in Sweden is 112.

Medical Facilities and Health Information: Medical care is comparable to that found in the United States. The Swedish medical system is a state-run system, so instead of visiting a local private general practitioner, travelers can visit a local medical center or clinic, called an "Akutmottagning" or "Vardcentral." Patients should be prepared to present their passports. In case of a medical emergency, use the emergency telephone number "112" (see above) to contact the appropriate emergency service.

Travelers with special medical needs should consult with their personal physician and take appropriate precautions, including bringing adequate supplies of necessary medication. Medicines may be brought into the country as long as they are intended for the traveler's personal use. Medications categorized as narcotics may only be brought into the country to cover the traveler's personal use for a maximum of five days and must be accompanied by a medical certificate stating why the traveler needs them. In addition, stringent Swedish customs regulations prohibit travelers from receiving drugs from abroad after having arrived in the country.

Travelers may also find local physicians reluctant to prescribe equivalent quantities or dosages. Prescriptions are dispensed at state-run pharmacies called "Apotek" in Swedish. Most pharmacies are open during normal shopping hours but major cities have a 24-hour pharmacy.

The U.S. Department of State is unaware of any HIV/AIDS entry restrictions for visitors to or foreign residents of Sweden.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's Internet site at http://wwwn.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Sweden is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

A valid U.S. driver's license may be used while visiting Sweden, but drivers must be at least 18 years of age. Driving in Sweden is on the right. Road signs use standard international symbols and Swedish text. Many urban streets have traffic lanes reserved for public transportation only.

Swedish roads are comparable to those in the U.S., though secondary roads may be less heavily traveled. These secondary routes often narrow to two lanes with a wider shoulder. Slower vehicles are expected to move onto the shoulder to allow faster moving vehicles to pass. All vehicles must have headlights lit when on the road, no matter what time of day. The use of snow tires is mandatory between December 1 and March 31 and, experience in driving on ice and snow is recommended before navigating Sweden's winter roads.

Public transport in Sweden is of good quality and is the recommended method of travel. Passenger trains, intercity buses, and plane flights provide regular service over longer distances. Public transportation in urban centers includes buses, subways, trams, suburban trains, and taxis. Taxis are more expensive than in major U.S. cities. Most local residents use public transport in Stockholm as parking can be hard to find and expensive. The bus, train, and subway systems are relatively safe.

Use of seat belts is mandatory for drivers and all passengers, and children under the age of seven must be seated in approved child or booster seats. The maximum speed limit is 110 kilometers per hour. Driving under the influence of alcohol or drugs, including prescription drugs, is considered a very serious offense. The rules are stringently enforced and fines can be severe. Violations can result in severe fines and possible jail sentences.

Emergency services for traffic accidents can be reached by calling 112 (the equivalent to 911 in the U.S.).

Visit the web site of the country's national tourist office and national authority responsible for road safety at http://www.visitsweden.se and at http://www.vv.se.

Aviation Safety Oversight: The U.S. Federal Aviation Administration (FAA) has assessed the Government of Sweden's Civil Aviation Authority as being in compliance with International Civil Aviation Organization (ICAO) aviation safety standards for oversight of Sweden's air carrier operations. For more information, travelers may visit the FAA's Internet web site at http://www.faa.gov.

Special Circumstances: Please see http://www.tullverket.se/en for customs information specific to Sweden.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating Sweden's laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Sweden are severe, and convicted offenders can expect long jail sentences and heavy fines. There is no bail system in Sweden and non-resident Americans who are arrested may be held in custody until the trial is complete. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in Sweden are encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration web site at https://travelregistration.state.gov, and to obtain updated information on travel and security within Sweden. Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency. The U.S. Embassy is located at Dag Hammarskjoldsvag 31, telephone: (46) (8) 783-5300, fax: (46) (8) 783-5480 and after-hours telephone: (46) (8) 783-5310. The Embassy's web site is http://stockholm.usembassy. gov.

Intercountry Adoption

May 2006

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is based on public sources and current understanding. Questions involving foreign and U.S. immigration laws and legal interpretation should be addressed respectively to qualified foreign or U.S. legal counsel.

Please Note: Sweden is not considered a country of origin for parents seeking orphaned children to adopt. Very few Swedish children are available for adoption. Most intercountry adoptions in Sweden are by legal residents of Sweden who adopt in third countries. This flyer explains how to adopt in a third country as a Swedish resident.

In the rare case that a non-resident American citizen would be allowed to adopt a Swedish orphan (related family member for example), the District Court (Tingsratten, www.dom.se) for the area where the child resides would be the appropriate court to hear the case. Prospective adoptive parents who are considering such an adoption should contact an adoption agency in the United States to begin the process.

Patterns of Immigration: Recent U.S. immigrant visa statistics no immigrant visas have been issued to Swedish orphans in the last five fiscal years.

Adoption Authority: The government office responsible for adoptions in Sweden is the Swedish national Board for Intercountry Adoptions (MIA).

The Swedish National Board of Intercountry Adoptions (MIA)
Box 308
101 26 Stockholm
Tel: +46 (8) 54555680
Fax: +46 (8) 650 4110
info@mia.adopt.se
www.mia.adopt.se

Eligibility Requirements for Adoptive Parents: Any man or woman 25 years old or older, whether single or married, may adopt with the permission of the court. The right to adopt is also provided for persons ages 18-25 if the adoption involves a related child, e.g. a niece or a nephew, or the adoptive child of his or her spouse or if special circumstances exist. Spouses must adopt jointly. However, one of the spouses may adopt a child separately when the other spouse's whereabouts are unknown or is suffering from a serious mental illness. One spouse may also, with the consent of the other spouse, adopt that spouse's child as his or her own child.

Residency Requirements: Adoptive parents must be legally resident in Sweden to adopt in third countries.

Time Frame: The adoption process in Sweden can take from two to three years from when the Swedish authorities approve the application of the adoptive parents until the parents receive the child.

Adoption Agencies and Attorneys: A list of Swedish adoption agencies authorized to provide adoption services in third countries is available at www.mia.adopt.se.

Adoption Fees: Prospective adoptive parents can expect to pay from approximately US$10,000 to 20,000 for adoption services, a price that does not include the cost for the trip to pick up the child and return to Sweden. Most parents can qualify for a Swedish government grant of approximately US$5,000 when they return with the child to Sweden.

Adoption Procedures: The Swedish National Board for Intercountry Adoptions web site www.mia.adopt.se has detailed information about Swedish adoption law, policy and procedures. Information is provided in both Swedish and English.

Required Documents: A list of documents needed to apply for adoption in a third country as a Swedish resident can be found at:

Embassy of Sweden
1501 M. Street N.W., Suite 900
Washington, D.C. 20005-1702
Tel: +1-202-467 2600
Fax: +1-202-467 2699
Email: ambassaden.washington@foreign.ministry.se
http://www.swedenabroad.se

Sweden has Consulates General in Los Angeles, New York, San Diego, and San Francisco.

U.S. Immigration Requirements: Prospective adopting parents are strongly encouraged to consult USCIS publication M-249, *The Immigration of Adopted and Prospective Adoptive Children*, as well as the Department of State publication, *Intercountry Adoptions*. Please see the *Intercountry Adoption* section of this book for more details and review current reports online at http://adoption.state.gov.

U.S. Consulate in Sweden
Dag Hammarskjölds Väg 31,
SE-115 89 Stockholm, Sweden
Tel: (+46) 8 783 5300
StockholmWeb@state.gov

Additional Information: Specific questions about adoption in Sweden, including the adoption from third countries of children who will reside in Sweden, may be addressed to the U.S. Embassy in Stockholm. General questions regarding intercountry adoption may be addressed to the Office of Children's Issues, U.S. Department of State, CA/OCS/CI, SA-29, 4th Floor, 2201 C Street, NW, Washington, D.C. 20520-4818, toll-free Tel: 1-888-407-4747.

International Parental Child Abduction

February 2008

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *International Parental Child Abduction* section of this book and review current reports online at http://travel.state.gov.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is provided for general information only. Questions involving interpretation of specific foreign laws should be addressed to foreign legal counsel.

General Information: Sweden is a civil-law country. Judicial proceedings in a civil-law country generally differ from those in the United States, a common-law country, in several significant ways. For example, juries are not used. Legal cases are heard and decided by a judge or panel of judges that can include lay judges. Evidence can be presented and arguments can be made in oral hearings, but such hearings tend to play a secondary role, supplementing extensive written submissions to the judge. The judge normally can play a more active role in proceedings than is common in U.S. courts. In Sweden, the civil courts handle divorce and custody cases, while Hague cases are heard in Stockholm City Court.

Swedish courts do not generally recognize, register, or enforce foreign court orders regarding custody, although a U.S. statute or court order may be considered in adjudication of a Hague case to determine if a removal/retention was "wrongful." The Swedish government provides Legal Aid for individuals involved in Swedish custody proceedings and in Hague cases, depending on the level of income, but regardless of nationality.

Custody: In Sweden, married parents have joint custody of a child from birth until the child reaches the age of 18. Under Swedish law, a mother who bears a child out of wedlock is automatically initially granted sole custody of the child. Upon the birth of such a child, the Swedish Tax Authority (responsible for birth registrations in Sweden) informs the social welfare board that a child has been born out of wedlock. The social welfare board, in turn, contacts the mother and requests that both parents appear and execute an acknowledgement of paternity. The parents are given the opportunity to decide if they will agree to joint custody. The documents are then approved by the social welfare board and forwarded to the Tax Authority. The Tax Authority maintains up-to-date records on the child's custodial parent(s), known in Sweden as "vardnadshavare." Swedish authorities report that out-of-wedlock fathers have the same custody/access rights as every other father. The U.S. Embassy in Stockholm has found, in the cases known to it, that fathers of children born out of wedlock have rarely been able to obtain custody or visitation without the mother's consent.

The Swedish Children and Parents Code prescribes that the "best interests of the child" are of paramount consideration for any orders and decisions regarding custody, residence and contact. The Code also states that when deciding what constitutes a child's "best interests," special consideration should be given to a child's need for contact with both parents.

Access: Swedish courts have extremely wide latitude with respect to access orders. However, appeals may complicate a court's ability to enforce access/visitation orders. A

court may refuse to enforce an access order if the court is convinced that circumstances have manifestly changed since the order was made or that it is in the "best interests" of the child to revisit the order. It is important to note that Swedish courts do not have the equivalent of "contempt of court," a strong enforcement tool used by U.S. courts.

In the United States, a judge can order a party to comply with legal rulings or face arrest, imprisonment and/or a fine. In Sweden a parent who refuses to obey a Swedish court order may, if there are special reasons, risk penalty of a fine in order to secure that he or she will entrust the other parent with the child. The neglect to comply with the court order may also affect that parent's future possibilities to maintain custody of the child.

Swedish authorities report that gender bias is prohibited by the Swedish constitution. The U.S. Embassy in Stockholm notes that in non-Hague Convention cases involving American fathers and Swedish mothers, the Swedish courts have more often given custody to the Swedish mother. The Embassy has also found that the Swedish courts tend to favor Swedish mothers in cases involving visitation and access conflicts. Swedish courts have enforced very few of the rulings favorable to American fathers.

Criminal aspects: It is a crime under Swedish penal law to abduct children.

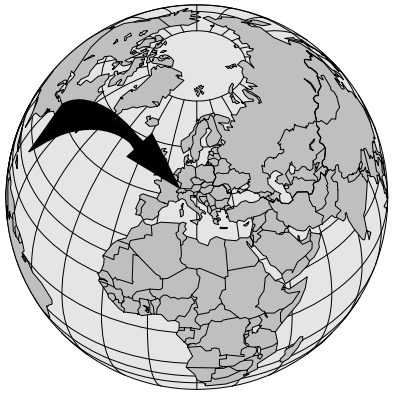
Swedish citizenship: A child always acquires Swedish citizenship through a Swedish-citizen mother, whether she is married or unmarried and whether the child is born in Sweden or in another country. To register a child who was born either in Sweden or abroad as a Swedish citizen, the mother shows proof of her Swedish citizenship and the child's birth certificate.

A child born in Sweden to a Swedish-citizen unmarried father and a foreign mother acquires Swedish citizenship. A child born in the U.S. to an unmarried Swedish citizen father can acquire Swedish citizenship through an application to the Swedish "Migrationsverket." The father must show proof of his Swedish citizenship, his tax registration (Personbevis), the child's birth certificate, and the non-Swedish citizen mother's consent. Swedish citizenship is documented by registering a child with the Swedish Tax Authority.

Swedish passports: In Sweden, a passport for a child under the age of 18 cannot be issued unless the child's custodians have agreed in writing. When applying for a passport for a child, the parents must provide the passport authority with documents regarding the child's identity, the identity of the custodians, the written consent of both custodians and a photograph of the child.

A photograph is not necessary if the child is under the age of five, but without a photograph, the passport is only valid until the child reaches the age of seven. When a photograph is added to the application, whether or not the child is over the age of five, the child must be present when the application is handed in. If the child can write, he/she must also sign the application.

A parent who has a Swedish sole or joint custody order can ask that the issuance of a Swedish passport to the child be blocked or that an already-issued passport be confiscated. Parents can also request lookouts at Swedish ports of departure to prevent the departure of a child if they have a Swedish court order that supports the request. If such a lookout is not in place, Swedish authorities will generally not ask for any document other than a valid passport or other travel document for a departing child.



Preventing issuance of a Swedish passport: If your child has a claim to Swedish citizenship, you may be able to prevent the issuance of a Swedish passport to your child. You will need documents showing that you have joint or sole custody of the child, identity documents, a marriage certificate (if applicable) and the child's birth certificate. If you are in Sweden and have a Swedish court order, the request should be made at a police station. If you are in the United States and you have a U.S. court order (one that prohibits the removal of the child and/or issuance of a passport may be the most effective), you should contact a consular officer at the Swedish Embassy in Washington, D.C. (202-467-2600), or the nearest Swedish Consulate (California [310-445-4008] or New York [212-583-2550]) to discuss restricting the issuance of a Swedish passport to a child.

The Hague Convention: The United States is a party to Hague Convention on the Civil Aspects of International Child Abduction. The Hague Convention is an international treaty. The Hague Convention does not deal with child custody itself, but determines the jurisdiction where those custody issues should be adjudicated.

The Hague Convention entered into force between the United States and Sweden on June 1, 1989. Therefore, Hague Convention provisions for return would apply to children abducted or retained after that date.

The Swedish Central Authority performs an administrative role in processing Hague applications. The Central Authority is located in the Swedish Ministry for Foreign Affairs, Department for Consular Affairs and Civil Law. The address is SE-103 39 Stockholm, Sweden.

The international telephone number is 011-46-8-405-1000 and the international telefax number is 011-46-8-723-1176. For further information on international parental child abduction, contact the Office of Children's Issues, U.S. Department of State at 1-888-407-4747 or visit its web site on the Internet at http://travel.state.gov. You may also direct inquiries to: Office of Children's Issues, U.S. Department of State, Washington, DC 20520-4811; Phone: (202) 736-9090; Fax: (202) 312-9743.

SWITZERLAND

Compiled from the June 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Swiss Confederation

PROFILE

Geography

Area: 41,285 sq. km. (15,941 sq. mi.); about the size of Vermont and New Hampshire combined.
Cities: Capital—Bern (population about 123,000). Other cities—Zurich (341,000), Geneva (176,000), Basel (165,000), Lausanne (116,000).
Terrain: 60% mountains, the remainder hills and plateau. Switzerland straddles the central ranges of the Alps.
Climate: Temperate, varying with altitude and season.

People

Nationality: Noun and adjective—Swiss (singular and plural).
Population: (2007 est.) 7,591,400.
Annual growth rate: 3.2%.
Ethnic groups: Mixed European.
Religions: Roman Catholic 42%, Protestant 33%, Muslim 4.3%, others 5.4%, no religion 11%.
Languages: German 63.7%, French 20.4%, Italian 6.5%, Romansch 0.5%, other 9.4%.
Education: Years compulsory—9. Attendance—100%. Literacy—100%.
Health: Infant mortality rate—3.9/1,000. Life expectancy—men 78.7 yrs., women 83.9 yrs.
Work force: (3.96 million) Agriculture and forestry—4.2%. Industry and business—25.6%. Services and government—70.2%.

Government

Type: Federal state.
Independence: The first Swiss Confederation was founded in August 1291 as a defensive alliance among three cantons. The Swiss Confederation established independence from the Holy Roman Empire in 1499.
Constitution: 1848; extensively amended in 1874; fully revised in 2000
Government branches: Executive—Federal Council, a collegium of seven members, headed by a rotating one-year presidency. Legislative—Federal Assembly (bicameral: Council of States, 46 members; National Council, 200 members). Judicial—Federal Tribunal.
Political subdivisions: 26 cantons (states) with considerable autonomy.
Political parties: Swiss People's Party (SVP), Social Democratic Party (SP), Free Democratic Party (FDP), Christian Democratic Party (CVP), and several smaller parties representing localities or views from extreme left to extreme right.
Suffrage: In federal matters, universal over 18.

Economy

GDP: (2007) $478 billion (478 billion Swiss francs [SFr]).
Government expenses: (in GDP%) 29.1% (federal, cantonal, and local).
Annual growth rate: (2007) 3.1%
Unemployment: (February 2008) 2.8%.
Per capita income: $63,196 (63,198 Swiss francs).
Avg. inflation rate: (June 2007) 0.6%.
Natural resources: Water power, timber, salt.
Agriculture: (1% of GDP) Products—dairy (24%), livestock (26%), grains (4%), fruit and vegetables, potatoes, wine (15%). Arable land (1999) 26%.
Industry: (est. 29% of GDP) Types—machinery, chemicals, pharmaceuticals, time pieces, precision instruments, textiles and clothing, pigment, transportation equipment.
Services: (70% of GDP).
Trade: (2006) Exports—$177.2 billion (177.2 billion Swiss francs): food, beverages, and tobacco (20.5%); metal and chemical industries (14.5%); precision instruments (12%); watches (11%); machinery and electronics (10%); clothing (7.5%). Major markets—EU, United States, Canada, CIS, India, Brazil, Japan. Imports (2007)—$189.6 billion (189.6 billion Swiss francs): consumer goods (8%); equipment (10%); energy (25%); raw materials (12%). Major suppliers—EU, U.S., Canada, CIS, South Africa.
Exchange rate: (April 2008) Swiss francs per U.S. dollar=1.0.

PEOPLE

Switzerland sits at the crossroads of several major European cultures, which have heavily influenced the country's languages and cultural practices. Switzerland has four official languages—German, French, Italian, and Romansch (based on Latin and spoken by a small minority in the Canton Graubunden). The German spoken is predominantly a Swiss dialect, but newspapers and some broadcasts use High German. Many Swiss speak more than one language. English is widely known, especially among professionals.

More than 75% of the population lives in the central plain, which stretches between the Alps and the Jura Mountains and from Geneva in the southwest to the Rhine River and Lake Constance in the northeast. Resident foreigners and temporary foreign workers make up about 20% of the population.

According to the Swiss Federal Office of Statistics, the population in Switzerland increased to 7,507,300 in 2006. Three-quarters of this growth was attributed to migration. Switzerland naturalized 22% more people in 2006 compared to 2005, totaling 46,700 persons. By the end of 2006, there were 850,000 foreigners working legally in Switzerland. The number of German immigrants, as confirmed in earlier reports, increased by 10.6% (+10,000). Portuguese workers also increased by 7.4% (+7000). On the other hand, the number of the Italians continued to drop by 3.2% (-5,000).

Almost all Swiss are literate. Switzerland's 13 university institutes enrolled 111,100 students in the academic year of 2004-05. About 25% of the adult population holds a diploma of higher learning.

The Constitution guarantees freedom of worship, and the different religious communities co-exist peacefully.

Switzerland consistently ranks high on quality of life indices, including highest per capita income, one of the highest concentrations of computer and Internet usage per capita, highest insurance coverage per individual, and high health care rates. For these and many other reasons, it serves as an excellent test market for businesses hoping to introduce new products into Europe.

HISTORY

Originally inhabited by the Helvetians, or Helvetic Celts, the territory comprising modern Switzerland came under Roman rule during the Gallic wars in the 1st century BC and remained a Roman province until the 4th century AD. Under Roman influence, the population reached a high level of civilization and enjoyed a flourishing commerce. Important cities, such as Geneva, Basel, and Zurich, were linked by military roads that also served as trade arteries between Rome and the northern tribes.

After the decline of the Roman Empire, Switzerland was invaded by Germanic tribes from the north and west. Some tribes, such as the Alemanni in central and northeastern Switzerland, and the Burgundians, who ruled western Switzerland, settled there. In 800, the country became part of Charlemagne's empire. It later passed under the dominion of the Holy Roman emperors in the form of small ecclesiastic and temporal holdings subject to imperial sovereignty.

With the opening of a new important north-south trade route across the Alps in the early 13th century, the Empire's rulers began to attach more importance to the remote Swiss mountain valleys, which were granted some degree of autonomy under direct imperial rule. Fearful of the popular disturbances flaring up following the death of the Holy Roman Emperor in 1291, the ruling families from Uri, Schwyz, and Unterwalden signed a charter to keep public peace and pledging mutual support in upholding autonomous administrative and judicial rule. The anniversary of the charter's signature (August 1, 1291) today is celebrated as Switzerland's National Day. Between 1315 and 1388 the Swiss Confederates inflicted three crushing defeats on the Habsburgs, whose aspiration to regional dominion clashed with Swiss self-determination. During that period, five other localities (cantons in modern-day parlance) joined the original three in the Swiss Confederation. Buoyed by their feats, the Swiss Confederates continuously expanded their borders by military means and gained formal independence from the Holy Roman Empire in 1499. Routed by the French and Venetians near Milan in 1515, they renounced expansionist policies. By then the Swiss Confederation had become a union of 13 localities with a regularly convening diet administering the subject territories. Swiss mercenaries continued for centuries to serve in other armies; the Swiss Guard of the Pope is a vestige of this tradition.

The Reformation led to a division between the Protestant followers of Zwingli and Calvin in the German and French parts of the country respectively, and the Catholics. Despite two centuries of civil strife, the common interest in the joint subject territories kept the Swiss Confederation from falling apart. The traffic in mercenaries as well as the alienation between the predominantly Protestant Swiss and their Catholic neighbors kept the Swiss Confederation out of the wars of the European powers, which formally recognized Swiss neutrality in the Treaty of Westphalia in 1648. The Swiss remained neutral during the War of the First Coalition against revolutionary France, but Napoleon, nonetheless, invaded and annexed much of the country in 1797-98, replacing the loose confederation with a centrally governed unitary state.

The Congress of Vienna in 1815 reestablished the old confederation of sovereign states and enshrined Switzerland's status of permanent armed neutrality in international law. In 1848, after a brief civil war between Protestant liberals seeking a centralized national state and Catholic conservatives clinging on to the old order,

the majority of Swiss Cantons opted for a Federal State, modeled in part on the U.S. Constitution. The Swiss Constitution established a range of civic liberties and made far-reaching provisions to maintain cantonal autonomy to placate the vanquished Catholic minority. The Swiss amended their Constitution extensively in 1874, establishing federal responsibility for defense, trade, and legal matters, as well as introducing direct democracy by popular referendum. To this day, cantonal autonomy and referendum democracy remain trademarks of the Swiss polity.

Switzerland industrialized rapidly during the 19th century and by 1850 had become the second most industrialized country in Europe after Great Britain. During World War I serious tension developed between the German, French, and Italian-speaking parts of the country, and Switzerland came close to violating its neutrality but managed to stay out of hostilities. Labor unrest culminating in a general strike in 1918 marked the interwar period, but in 1937 employers and the largest trade union concluded a formal agreement to settle disputes peacefully, which governs workplace relations to the present day. During World War II, Switzerland came under heavy pressure from the fascist powers, which after the fall of France in 1940 completely surrounded the country. Some political and economic leaders displayed a mood of appeasement, but a combination of tactical accommodation and demonstrative readiness to defend the country helped Switzerland survive unscathed.

The Cold War enhanced the role of neutral Switzerland and offered the country a way out of its diplomatic isolation after World War II. Economically, Switzerland integrated itself into the American-led Western postwar order, but it remained reluctant

to enter supranational bodies. Switzerland did not join the United Nations, even though Geneva became host to the UN's European headquarters, and the country played an active role in many of the UN's specialized agencies. Switzerland also remained aloof in the face of European integration efforts, waiting until 1963 to join the Council of Europe. It still remains outside the European Union. Instead, Switzerland in 1960 helped form the European Free Trade Area, which did not strive for political union. Following the Cold War, Switzerland joined the Bretton Woods institutions in 1992 and finally became a member of the United Nations in 2002.

GOVERNMENT

Switzerland is a federal state composed of 26 cantons (20 are "full" cantons and six "half" cantons for purposes of representation in the federal legislature) that retain attributes of sovereignty, such as fiscal autonomy and the right to manage internal cantonal affairs. Under the 2000 Constitution, cantons hold all powers not specifically delegated to the federation. Switzerland's federal institutions are:

- A bicameral legislature—the Federal Assembly;
- A collegial executive of seven members—the Federal Council; and
- A judiciary consisting of a regular court in Lausanne—the Federal Tribunal—and special military and administrative courts. The Federal Insurance Tribunal is an independent division of the Federal Tribunal that handles social security questions; its seat is in Lucerne. The Federal Criminal Court, located in Bellinzona, is the court of first instance for all criminal cases under federal jurisdiction.

The Constitution provides for separation of the three branches of government.

The Federal Assembly is the primary seat of power, although in practice the executive branch has been increasing its power at the expense of the legislative branch. The Federal Assembly has two houses—the Council of States and the National Council. These two houses have equal powers in all respects, including the right to introduce legislation. Legislation cannot be vetoed by the executive nor reviewed for constitutionality by the judiciary, but all laws (except the budget) can be reviewed by popular referendum before taking effect. The 46 members of the Council of States (two from each canton and one from each half canton) are directly elected in each canton by majority voting. The 200 members of the National Council are directly elected in each canton under a system of proportional representation. Members of both houses serve for 4 years.

The Federal Assembly meets quarterly for 3-week plenary sessions. The parliamentary committees of the two houses, which are often key in shaping legislation, meet behind closed doors, but both majority and minority positions are presented during the plenary sessions. The Federal Assembly is a militia parliament, and members commonly retain their traditional professions. Individual members of parliament have no personal staff.

The Assembly can be legally dissolved only after the adoption of a popular initiative calling for a complete revision of the Constitution. All citizens 18 or older have the right to vote and run for office in national, cantonal, and communal elections unless individually disqualified by the relevant legislature.

A strong emphasis on ballot votes arises out of the traditional Swiss belief that the will of the people is the final national authority. Every constitutional amendment adopted by parliament is automatically brought to the ballot and has to carry a double majority of votes and states in order to become effective. The voters themselves may actively seek changes to the Constitution by means of the popular initiative: 100,000 voters may with their signatures request a national vote on a proposed constitutional amendment. New federal legislation also is subject to popular review, under the so-called referendum: 50,000 signatures suffice to call a ballot vote on any federal law adopted by parliament. The Assembly can declare an act to be too urgent to allow time for popular consideration, but this is rare. At any rate, an act passed urgently must have a time limit and is later subject to the same constitutional provisions on popular review as other legislation.

The top executive body is the seven-member cabinet called the Federal Council. The Federal Assembly individually elects the seven Federal Councilors in a joint session of both houses at the opening of a new legislature. Federal Councilors are elected for 4-year terms; there are no term limits and no provision to recall the cabinet or individual members during the legislature. Each year, the Federal Assembly elects from among the seven Federal Councilors a president and vice president, following the principle of seniority. The member who is vice president one year traditionally is elected president the next. Although the Constitution provides that the Federal Assembly chooses and supervises the cabinet, the latter has gradually assumed a preeminent role in directing the legislative process as well as executing federal laws.

Under an arrangement between the four major parties called the "magic formula" which was introduced in 1959 but ended in December 2003, two Federal Councilors (ministers) were elected each from the Christian Democrats, the Social Democrats, and the Free Democrats and one from the Swiss People's Party. Under the new magic formula starting January 1, 2004, the new party composition of the cabinet changed to the following composition: 1 Christian Democrat, 2 Social Democrats, 2 Free Democrats, and 2 representatives of the Swiss People's Party.

The Constitution requires that Federal Councilors act collectively in all matters, not as individual ministers or as representatives of their parties.

Each Councilor heads one of seven federal departments and is responsible for preparing legislation pertaining to matters under its jurisdiction. The president, who remains responsible for the department he heads, has limited prerogatives and is first among equals (there is no formal prime minister).

The administration of justice is primarily a cantonal function. The Federal Tribunal is limited in its jurisdiction. Its principal function is to hear appeals of civil and criminal cases. It also hears complaints of violations of the constitutional rights of citizens and has authority to review cantonal court decisions involving federal law as well as certain administrative rulings of federal departments. However, it has no power to review federal legislation for constitutionality. The Tribunal's 30 full-time and 30 part-time judges are elected by the Federal Assembly for 6-year terms. The Federal Criminal Court is the court of first instance for criminal cases involving organized and white-collar crime, money laundering, and corruption, which are under federal jurisdiction. The Court's 11 judges are elected by the Federal Assembly for 6-year terms.

The cantons regulate local government. The basic unit of local government, which administers a village, town, or city, is the commune or municipality. Citizenship is derived from membership in a commune and can be conferred on non-Swiss by a commune. Cantons are subordinate to federal authority but keep autonomy in implementing federal law.

Principal Government Officials

Last Updated: 11/12/08

President: **Pascal COUCHEPIN**
Vice President: **Hans-Rudolf MERZ**
Chief, Federal Dept. of Defense, Civil Protection, & Sports: **Samuel SCHMID**
Chief, Federal Dept. of Economic Affairs: **Doris LEUTHARD**
Chief, Federal Dept. of Finance: **Hans-Rudolf MERZ**
Chief, Federal Dept. of Foreign Affairs: **Micheline CALMY-REY**
Chief, Federal Dept. of Home Affairs: **Pascal COUCHEPIN**
Chief, Federal Dept. of Justice & Police: **Eveline WIDMER-SCHLUMPF**
Chief, Federal Dept. of Transportation, Communications, & Energy: **Moritz LEUENBERGER**
Federal Chancellor: **Corina CASANOVA**
Chmn., Swiss National Bank: **Jean-Pierre ROTH**
Ambassador to the US: **Urs ZISWILER**
Permanent Representative to the UN, New York: **Peter MAURER**

Switzerland maintains an embassy in the United States at 2900 Cathedral Avenue NW, Washington, DC 20008. Consulates General are in Atlanta, Chicago, Houston, Los Angeles, New York, and San Francisco. Swiss national tourist offices are in Chicago, New York, and San Francisco.

POLITICAL CONDITIONS

Switzerland has a stable government and a diverse society. Quadrennial national elections typically produce only marginal changes in party representation. In recent years, Switzerland has seen a gradual shift in the party landscape. The rightist Swiss People's Party (SVP), traditionally the junior partner in the four-party coalition government, has almost tripled its share of the popular vote from 11% in 1987 to 22.5% in 1999, to 26.6% in 2003, and finally to 29% in October 2007, thus overtaking its three major rivals. In the 2007 parliamentary elections, the SVP picked up an additional seven seats in the 200-seat National Council (lower house). This brings the SVP to 62 seats total. The Greens gained more than 2% points and seven seats in the National Council, bringing their total shares to 9.6% and 20 respectively. They also for the first time gained seats in the Council of States (upper house). The Christian Democratic Party (CVP) booked modest gains of 0.2% and three seats, for a total of 14.6% and 31 seats in the National Council. This halted a downward trend that had cost the CVP a seat on the Federal Council to the SVP in 2003. The FDP lost 1.7% and five seats in the National Council, dropping to 15.6% of the votership and 31 seats in the National Council. Total voter turnout was 48%, a gain of 2.8% over the 2003 elections.

On December 12, 2007, the center-left parliamentary caucuses refused to re-elect the SVP's Christoph Blocher (then-Justice Minister) to the Federal Council, and instead elected Eveline Widmer-Schlumpf, a SVP cantonal minister from Graubunden. Christoph Blocher had been the SVP's candidate for the Federal Council seat. In reaction to this outcome, the SVP leadership called on Eveline Widmer-Schlumpf and Defense Minister Samuel Schmid (also of the SVP) not to accept their seats on the Federal Council, and the SVP announced that it was taking on the role of parliamentary opposition. Eveline Widmer-Schlumpf and Samuel Schmid, however, decided to accept their elections to serve on the Federal Council, and subsequently were excluded from the SVP parliamentary caucus.

The Constitution limits federal influence in the formulation of domestic policy and emphasizes the roles of private enterprise and cantonal government. However, the Confederation has been compelled to enlarge its policymaking powers in recent years to cope with national problems such as education, agriculture, energy, environment, organized crime, and narcotics.

ECONOMY

Despite a dearth of natural resources, the Swiss economy is among the world's most advanced and prosperous. Per capita income is virtually the highest in the world, as are wages. Trade has been the key to prosperity in Switzerland. The country is dependent upon export markets to generate income while dependent upon imports for raw materials and to expand the range of goods and services available in the country. Switzerland has liberal investment and trade policies, notwithstanding agriculture, and a conservative fiscal policy. The Swiss legal system is highly

developed, commercial law is well defined, and solid laws and policies protect investments. The Swiss franc is one of the world's soundest currencies, and the country is known for its high standard of banking and financial services. Switzerland is a member of a number of international economic organizations, including the World Trade Organization (WTO), the International Monetary Fund, the World Bank, and the Organization for Economic Cooperation and Development (OECD).

The Swiss economy expanded by 3.1% in 2007. GDP growth was primarily due to the positive evolution of private consumption and expansion of investment in fixed assets and software. For once, all export industries benefited from increased demand from foreign markets. Bilateral trade in goods grew 11% in 2007, and the U.S. ran a $2.2 billion bilateral surplus, up from $145 million in 2006. Overall, Switzerland's trade grew 11% in 2007, and its global trade surplus expanded to SFr. 14 billion. On the inflation side, import prices increased more rapidly than exports.

Switzerland was ranked as the second most competitive economy in the World Economic Forum's 2007 Global Competitiveness Report, reflecting the country's sound institutional environment, excellent infrastructure, efficient markets, competent macroeconomic management, world-class educational attainment, and high levels of technological innovation, which boost Switzerland's competitiveness in the global economy. The country has a well-developed infrastructure for scientific research, companies spend generously on research and development (R&D), and intellectual property protection is strong. Business activity benefits from a well-developed institutional framework, characterized by the rule of law, an efficient judicial system, and high levels of transparency and accountability within public institutions. Higher education and training are rapidly growing in importance as engines of productivity growth.

Being a nation that depends upon exports for economic growth, and due to the fact that it is so closely linked to the economies of Western Europe and the United States, Switzerland was not able to escape recent slowdowns experienced in these countries. During most of the 1990s, the Swiss economy was Western Europe's weakest, with annual GDP growth averaging 0% between 1991 and 1997. Beginning in late 1997, the economy steadily gained momentum until peaking in 2000 with 3% growth in real terms. The economy returned to lackluster growth during 2001-2003, but has been growing at or above potential since 2004—2.5% per annum. The Swiss Economic Ministry reports that strong global demand, particularly in the U.S. and Asia, and better Euro zone growth has helped Switzerland's economic recovery. Long-run economic growth, however, is predicated on structural reforms. In order to maximize its economic potential, Switzerland will need to push through difficult agrarian and competition policy reforms. These are essential if the government is to reduce its budget deficits and meet its 3% growth target.

The recent economic upswing had some positive impact on the labor market. Unemployment decreased from 4.1% in December 2003 to 2.7% in September 2007. Swiss in the 15-25 age bracket continue to fight unemployment numbers with a rate of 5.4%, and hotel and restaurant industry workers with 10.4%. One-fourth of the country's full-time workers are unionized. In general, labor/management relations are good, mostly characterized by a willingness on both sides to settle disputes by negotiations rather than by labor action. About 600 collective bargaining agreements exist today in Switzerland and are regularly renewed without major problems. However, the mood is changing. The massive layoffs that resulted from both the global economic slowdown and major management scandals have strained the traditional Swiss "labor peace." Swiss trade unions encouraged strikes against several companies. Nevertheless, total days lost to strikes remain among the lowest in the OECD.

Switzerland's machinery, metals, electronics, and chemicals sectors are world-renowned for precision and quality. Together they account for well over half of Swiss export revenues. In agriculture, Switzerland is about 60% self-sufficient. Only 7.5% of the remaining imports originated from the U.S. Swiss farmers are one of the most highly protected and subsidized producer groups in the world. OECD estimates show that Switzerland is subsidizing more than 70% of its agriculture, compared to 35% in the EU. The parliament agreed in 2007 to reduce the level of subsidies from SFr 14.1 billion (U.S. $14.1 billion) to SFr 13.6 billion (U.S. $13.6 billion) from 2008-2011, approved value-added tax (VAT) exemptions for local biofuel production, and accepted international parallel imports for fertilizers and tractors—Swiss farmers will be allowed to import tractors produced in China or India and sold in the EU, and could save up to $50 million (SFr 50 million) annually. German fertilizer imports could save another $25 million (SFr 25 million). The parliament also rejected the government's proposal to reduce the subsidized price for cheese production, and decided to keep the price at 15 centimes per liter.

Tourism, banking, engineering, and insurance are significant sectors of the economy and heavily influence the country's economic policies. Swiss trading companies have unique marketing expertise in many parts of the world, including Eastern Europe, the Far East, Africa, and the Middle East. Not only does Switzerland have a highly developed tourism infrastructure (making it a good market for tourism-related equipment and services), the Swiss also are intrepid travelers. Per capita, more Swiss visit the United States every year than from any other country. Tourism is the most important U.S. export to Switzerland (earning almost $1.5 billion). In 2004, more than 285,000 Swiss came to the United States as tourists.

The Swiss economy earns roughly half of its corporate earnings from the export industry, and 62% of Swiss exports are destined for the EU mar-

ket. The EU is Switzerland's largest trading partner, and economic and trade barriers between them are minimal. In the wake of the Swiss voters' rejection of the European Economic Area Agreement in 1992, the Swiss Government set its sights on negotiating bilateral sectoral agreements with the EU. After more than 4 years of negotiations, an agreement covering seven sectors (research, public procurement, technical barriers to trade, agriculture, civil aviation, land transport, and the free movement of persons) was achieved at the end of 1998. Parliament officially endorsed the so-called "Bilaterals I" in 1999, and the Swiss people approved them in a referendum in May 2000. The agreements, which had to be ratified by the European Parliament as well as legislatures in all 15 EU member states, entered into force on June 1, 2002. Switzerland has so far attempted to mitigate possible adverse effects of non-membership by conforming many of its regulations, standards, and practices to EU directives and norms. Full access to the Swiss market for the original 15 EU member states entered into force in June 2004, ending as a result the "national preference". The Swiss agreed to extend these preferences to the 10 new EU members on September 25, 2005 but restrictions will remain until 2011. A facultative referendum against the Bilaterals I and the extension of the free movement of persons to Romania and Bulgaria is likely until mid-2009, and the SVP has threatened to derail the extension of the agreement unless the EU drops its demands on Swiss cantonal taxation (see below). The political campaign, aimed at collecting the required 50,000 signatures to call for the referendum, is likely to start in 2008.

The Swiss Government embarked in July 2001 on a second round of bilateral negotiations with the EU known as "Bilaterals II". Talks focused on customs fraud, environment, statistics, trade in processed agricultural goods, media, the taxation of savings, and police/judicial cooperation (dubbed the Schengen-Dublin accords). Amid a fierce political debate over the essence of Swiss-EU relations and populist warnings against EU workers and criminals entering Switzerland, the Schengen-Dublin package was approved on June 5, 2005 by 54.6% of Swiss voters. Fears of cheap labor coming from new EU member states have prompted the government to provide for tripartite surveillance committees to ensure that decent wages are enforced. The EU still has to ratify the extension of Schengen to Switzerland, and implement the bilateral agreements on R&D and media cooperation. If ratified in time by EU member states, the Schengen agreement for Switzerland will enter into force on November 1, 2008.

The Swiss federal government remains deeply divided over EU membership as its long-term goal, and in a March 2001 referendum more than 70% of Swiss voters rejected rapid steps toward EU membership. Switzerland nevertheless expressed interest in reaching a third layer of bilateral agreements that would involve energy, the Galileo satellite navigation system, health, and agriculture. But recent harsh criticism by the European Commission against preferential cantonal tax treatment for foreign holdings cooled the political climate surrounding the EU.

The government also decided in November 2006 to once more consider adoption of the EU "Cassis-de-Dijon" principle for trade after a first setback in 2004. If adopted, EU products could be imported in Switzerland without having to go through the burdensome Swiss certification and Swiss language requirement process. Currently, Swiss retail prices are on average 20-40% higher than in the EU. If parallel imports are allowed under adoption of the Cassis-de-Dijon principle, prices could drop by 10%. Possible exceptions have been reduced from 129 products to 40, but hurdles remain on some products.

The government has reaffirmed its wish to strengthen ties with other non-EU trading partners in Asia and America. Exploratory talks on a Free Trade Agreement between the U.S. and Switzerland failed to result in negotiations, due to Swiss problems with free trade in agriculture, but the two sides did agree to a new framework for economic, trade, and investment discussions. This new agreement is the Swiss-U.S. Trade and Investment Cooperation Forum (the "Forum") and is currently assessing areas where the two governments could facilitate greater trade and investment flows.

Switzerland ranks 17th among the main trading partners of the U.S. worldwide. The United States is the second-largest importer (11.5%) of Swiss goods after Germany (20%). The U.S. exports more to Switzerland each year than to all the countries of the former Soviet Union and Eastern Europe combined, and Switzerland imports more U.S. products and services than does Spain. In addition, the United States is the largest foreign investor in Switzerland, and conversely, the primary destination of Swiss foreign investment. It is estimated that 200,000 American jobs depend on Swiss foreign investments. Total U.S.-Swiss bilateral trade increased from $15.33 billion during 2003 to $16 billion in 2004.

DEFENSE

On May 18, 2003, Swiss voters approved the military reform project "Army XXI" that will reduce the size of the Swiss Army by approximately half. In January 2004, the 524,000-strong militia started paring down to 220,000 conscripts, including 80,000 reservists. All able-bodied Swiss males aged 20 to 30 must serve. Thereafter, most personnel are assigned to civil protection duties until the age of 37.

A new category of soldiers called "single-term conscripts" will discharge the total time of active duty service of about 300 days in one stint. Recruiting is on a voluntary basis and should not exceed 20% of a year's draft. The armed forces have a small nucleus of about 3,600 professional staff, half of whom are either instructors or staff officers, with the remainder mostly being fortification guards. The army

has virtually no full-time active combat units but is capable of full mobilization within 72 hours. Women may volunteer to serve in the armed forces and may now join all units, including combat troops. About 2,000 women already serve in the army but, so far, have not been allowed to use weapons for purposes other than self-defense.

The armed forces are organized in four army corps and an air force and are equipped with modern, sophisticated, and well-maintained gear. In 1993, the Swiss Government procured 34 FA-18s from the United States.

FOREIGN RELATIONS

On September 10, 2002, Switzerland became a full member of the United Nations. Switzerland had previously been involved as party to the Statute of the International Court of Justice and member of most UN specialized agencies, as well as the International Atomic Energy Agency. Switzerland has long participated in many UN activities, including the Economic Commission for Europe, UN Environment Program, the UN High Commissioner for Refugees, UN Educational, Scientific and Cultural Organization, UN Conference for Trade and Development, UN Industrial Development Organization, and the Universal Postal Union (UPU). Prior to its formal accession, Switzerland had maintained a permanent observer mission at UN Headquarters since 1948.

Switzerland also is a member of the following international organizations: World Trade Organization, Organization for Economic Cooperation and Development, European Free Trade Association, Bank for International Settlements, Council of Europe, and Organization for Security and Cooperation in Europe (OSCE). In 1992, Swiss voters approved membership in the Bretton Woods organizations but later that year rejected the European Economic Area agreement, which the government viewed as a first step toward EU membership.

The Swiss Constitution declares the preservation of Switzerland's independence and welfare as the supreme objective of Swiss foreign policy. Below this overarching goal, the Constitution sets five specific foreign policy objectives: further the peaceful coexistence of nations; promote respect for human rights, democracy, and the rule of the law; promote Swiss economic interests abroad, alleviate need and poverty in the world; and the preservation of natural resources.

Traditionally, Switzerland has avoided alliances that might entail military, political, or direct economic action, but in recent years the Swiss have broadened the scope of activities in which they feel able to participate without compromising their neutrality. Swiss voters first rejected UN membership by a 3-to-1 margin in 1986 but in March 2002 adopted it, albeit in a very close election, making Switzerland the first country to join the UN based on a popular referendum decision. In similar fashion, the electorate rejected a government proposition to deploy Swiss troops as UN peacekeepers (Blue Helmets) in 1994, but Switzerland joined NATO's Partnership for Peace and the Euro-Atlantic Partnership Council in 1996 and 1997, respectively, and deployed Yellow Berets to support the OSCE in Bosnia. In June 2001, Swiss voters approved new legislation providing for the deployment of armed Swiss troops for international peacekeeping missions under UN or OSCE auspices as well as closer international cooperation in military training.

Switzerland maintains diplomatic relations with almost all countries and historically has served as a neutral intermediary and host to major international treaty conferences. The country has no major dispute in its bilateral relations. Since 1980, Switzerland has represented U.S. interests in Iran. Switzerland played a key role in brokering a truce agreement between the Sudanese Government and Sudan's Peoples Liberation Army (SPLA) for the Nuba Mountain region, signed after a week's negotiations taking place near Lucerne in January 2002.

Switzerland (mainly Geneva) is home to many international governmental and nongovernmental organizations, including the International Committee of the Red Cross (whose flag is essentially the Swiss flag with colors reversed—the Red Cross historically being a Swiss organization). One of the first international organizations, the Universal Postal Union, is located in Bern.

The Swiss Government on June 25, 2003, eased most of the sanctions against the Republic of Iraq in accord with UN Security Council Resolution (UNSCR) 1483. The government lifted the trade embargo, flight restrictions, and financial sanctions in place since August 1990. The weapons embargo and the asset freeze, the scope of which was extended, remain in force, and restrictions on the trade in Iraqi cultural goods were newly imposed. Though not a member at the time, Switzerland had joined UN sanctions against Iraq after the invasion of Kuwait. Switzerland in recent years joined UN and EU economic sanctions imposed on Sierra Leone, UNITA (Angola), Liberia, Serbia and Montenegro, Burma, Zimbabwe, Sudan, Democratic Republic of the Congo, and Cote d'Ivoire. On October 15, 2003, the Federal Council ended the import restrictions on raw diamonds from Sierra Leone and lifted sanctions against Libya.

Switzerland in October 2000 implemented an ordinance to enforce UN sanctions against the Taliban (UNSCR 1267), which it subsequently amended in April 2001 in accord with tighter UN regulations (UNSCR 1333). On May 2, 2002, the Swiss Government eased the sanctions regime in accord with UNSCR 1388 and 1390, lifting the ban on the sale of acetic acid (used in drug production), Afghani Airlines, and Afghani diplomatic representations. The weapons embargo, travel restrictions, and financial sanctions remain in force. The Swiss Government in November 2001 issued an ordinance declaring illegal the terrorist organization al Qaeda as well as possible successor or supporting organizations. More than 200 individuals or

companies linked to international terrorism have been blacklisted to have their assets frozen. Thus far, Swiss authorities have blocked about 72 accounts totaling 34 million francs.

Switzerland has furnished military observers and medical teams to several UN operations. Switzerland is an active participant in the OSCE, its foreign minister serving as Chairman-in-Office for 1996. Switzerland also is an active participant in the major nonproliferation and export control regimes.

Under a series of treaties concluded after World War I, Switzerland assumed responsibility for the diplomatic and consular representation of Liechtenstein, the protection of its borders, and the regulation of its customs.

U.S.-SWISS RELATIONS

Switzerland is a democratic country subscribing to most of the ideals with which the United States is identified. The country is politically stable with a fundamentally strong economy. It occupies an important strategic position within Europe and possesses a strong military capability. It has played an increasingly important role in supporting the spread of democratic institutions and values worldwide, as well as providing humanitarian relief and economic development assistance. U.S. policy toward Switzerland takes these factors into account and endeavors to cooperate with Switzerland to the extent consistent with Swiss neutrality.

The first 4 years of cooperation under the U.S.-Swiss Joint Economic Commission (JEC) invigorated bilateral ties by recording achievements in a number of areas, including consultations on anti-money laundering efforts, counter-terrorism, and pharmaceutical regulatory cooperation; an e-government conference; and the re-establishment of the Fulbright student/cultural exchange program. The United States and Switzerland signed three new agreements in 2006 that will complement the JEC and will deepen our cooperation and improve our relationship. The first of the new agreements is the Enhanced Political Framework and was signed by Under Secretary of State for Political Affairs Nicholas Burns and Swiss State Secretary Michael Ambahl. The second agreement is the Trade and Investment Cooperation Forum and was signed by then-U.S. Trade Representative Robert Portman and then-Economics and Trade Minister Joseph Deiss. The last agreement is the revised Operative Working Arrangement on Law Enforcement Cooperation on Counterterrorism and was signed by U.S. Attorney General Alberto Gonzalez and Swiss Justice Minister Christoph Blocher.

The first official U.S.-Swiss consular relations were established in the late 1820s. Diplomatic relations were established in 1853. The U.S. ambassador to Switzerland also is accredited to the Principality of Liechtenstein.

TRAVEL

Consular Information Sheet

December 10, 2008

Country Description: Switzerland is a highly developed democracy. Liechtenstein is a democratically run constitutional monarchy.

Entry Requirements: Switzerland is a party to the Schengen agreement. As such, U.S. citizens may enter Switzerland for up to 90 days for tourist or business purposes without a visa. The passport should be valid for at least three months beyond the period of stay.

Liechtenstein is not a party to the Schengen agreement. A visa is not required for stays up to 90 days.

For more information on entry requirements for both countries, travelers may contact the Embassy of Switzerland at 2900 Cathedral Avenue, N.W., Washington, D.C. 20008,

telephone (202) 745-7900, or the nearest Swiss Consulate General in Atlanta, Chicago, Los Angeles, New York, or San Francisco. Visit the Embassy of Switzerland's web site at http://www.swissemb.org for the most current visa information.

Safety and Security: Switzerland remains largely free of terrorist incidents. However, like other countries in the Schengen area, Switzerland'sopen borders with its Western European neighbors allow the possibility of terrorist groups entering/exiting the country with anonymity. Americans are reminded to remain vigilant with regard to their personal security and to exercise caution. Although there have been no recent terrorist attacks in Switzerland, violence by anti-globalization, anti-Semitic, and anti-establishment (anarchist) groups does occur from time to time. This violence is typically in the form of property damage and clashes between these groups and the police. The potential for specific threats of violence involving American citizens in Switzerland is remote. Nevertheless, the Consular Agencies in Zurich and Geneva may close periodically to assess their security situation.

For the latest security information, Americans traveling abroad should regularly monitor the Department's Internet web site where the current Travel Warnings and Travel Alerts, including the Worldwide Caution Travel Alert, can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S., or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: Switzerland has a low rate of violent crime. However, pick-pocketing and purse snatching do occur in the vicinity of train and bus stations, airports, and some public parks, especially during peak tourist periods (such as Summer and Christmas) and when conferences, shows, or exhibits are scheduled in major cities. Liechtenstein has a low crime rate. Travelers may wish to exercise caution on trains, especially on overnight trains to neighboring countries. Thieves, who steal from passengers while they sleep, can enter even locked sleeping compartments. Thieves have been known to work in pairs to target train passengers; while one member of the pair creates a diversion at a train window or on a platform, the other steals items left briefly unattended.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, contact family members or friends, and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

Switzerland, through its 26 cantons (states), has programs to assist victims of crime and their immediate relatives. Medical, psychological, social, financial, and legal assistance are available throughout the country. These programs also protect the rights of the victim during criminal proceedings. The victim may receive compensation for some damages, if requested during the criminal procedure. Information is available at the Swiss Department of Justice located on Bundesrain 20, 3003 Bern, telephone: 41-31-322-4750, as well as on the Internet at http://www.bj.admin.ch/bj/en/home.html.

The local equivalent to the "911" emergency line in Switzerland is fire 118; police 117; medical 144.

Medical Facilities and Health Information: Good medical care is widely available. Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's Internet site at http://wwwn.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith. The U.S. Department of State is unaware of any HIV/AIDS entry restrictions for visitors to or foreign residents of Switzerland.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Switzerland is provided for general reference only, and may not be totally accurate in a particular location or circumstance. Although many roads are mountainous and winding, road safety standards are high. In some mountain areas, vehicle snow chains are required in winter. Road travel can be more dangerous during summer, winter holidays, the Easter break, and Whitsunday weekend (late spring) because of increased traffic. Travel on expressways (indicated by green signs with a white expressway symbol) requires purchase of a sticker or "vignette," which must be affixed to the car's windshield. Vignettes can be purchased at most border crossings points, gas stations and at Swiss post offices. Drivers using the highway system without a vignette are subject to hefty fines levied on the spot. Public transportation in Switzerland and Liechtenstein is excellent.

Visit the website of Switzerland's national tourist office at http://www.myswitzerland.com.

Aviation Safety Oversight: The U.S. Federal Aviation Administration

(FAA) has assessed the Government of Switzerland's Civil Aviation Authority as being in compliance with International Civil Aviation Organization (ICAO) aviation safety standards for oversight of Switzerland's air carrier operations. For more information, travelers may visit the FAA's web site at http://www.faa.gov.

Special Circumstances: Travelers who plan to participate in mountain activities (summer and winter) are strongly encouraged to buy mountain search and rescue insurance. Costs of search and rescue operations are the responsibility of the victim. Search and rescue insurance is available inexpensively in Switzerland and may be purchased at many Swiss post offices. Information can be obtained from the Swiss National Tourist Office, at http://www.myswitzerland.com, at most tourist information offices or with the Swiss Air Rescue Organization at http://www/rega.ch. Such insurance has proved useful as uninsured rescues can easily cost $25,000.

Switzerland's customs authorities encourage the use of an ATA (Admission Temporaire/Admission) Carnet for the temporary admission of professional equipment, commercial samples, and/or goods for exhibitions and fair purposes. ATA Carnet Headquarters located at the U.S. Council for International Business, 1212 Avenue of the Americas, New York, N.Y. 10036, and issues and guarantees the ATA Carnet in the United States. For additional information call (212) 354-4480, send an email to atacarnet@uscib.org, or visit http://www.uscib.org for details.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating Switzerland's laws, even unknowingly, may be expelled, arrested, or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Switzerland are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in Switzerland are encouraged to register with the U.S. Embassy in Bern, with the Consular Agencies in Geneva or Zurich, or through the State Department's travel registration web site, and to obtain updated information on travel and security within Switzerland and Liechtenstein. Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate. By registering, American citizens make it easier for the Embassy, Consulate, or Consular Agent to contact them in case of emergency. The U.S. Embassy is located at Jubilaeumstrasse 93, 3005 Bern; Tel. (41)(31) 357-7011, fax (41)(31) 357-7280. The Embassy's email address is bernacs@state.gov. The U.S. Embassy web site at http://bern.usembassy.gov answers many questions of interest to Americans visiting and residing in Switzerland.

The U.S. Consular Agency in Zurich is located at the American Center of Zurich, Dufourstrasse 101, 8008 Zurich; Tel: (41)(43) 499-2960, fax (41)(43) 499-2961. The U.S. Consular Agency in Geneva is located at rue Versonnex 7, CH-1207 Geneva, Tel: 022-840-51 60; fax 022-840-51 62. There is no U.S. Embassy or Consulate in Liechtenstein.

For assistance and information on travel and security in Liechtenstein, U.S. citizens may contact or register at the U.S. Embassy in Bern at the address above.

Intercountry Adoption

May 2007

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is based on public sources and current understanding. Questions involving foreign and U.S. immigration laws and legal interpretation should be addressed respectively to qualified foreign or U.S. legal counsel.

Please **Note:** There are very few children eligible for intercountry adoption from Switzerland, with a long waiting list of Swiss prospective adoptive parents. While legally possible, intercountry adoption of a Swiss orphan by foreigners is unlikely. Most Swiss go overseas to adopt. Switzerland should be regarded as a receiving State only.

Patterns of Immigration: Recent U.S. immigrant visa statistics show that no Swiss orphans have been adopted by American citizens in the last five years.

Adoption Authority: The Government office responsible for adoptions in Switzerland is the Municipality (Gemeinde) and/or the local Guardianship Board, depending on where the adopting prospective adoptive parent(s) resides. Each of the 26 Cantons in Switzerland now has a Central Authority. The prospective adopting parents should contact the Cantonal Central Authority (CCA). A list of approved agencies is available from the Embassy or on the Internet at www.bj.admin.ch.

Eligibility Requirements for Adoptive Parents: Both spouses must be 35 years of age or older. If a couple has not met the age requirement, they have to have been married for at least 5 years. Single people

must be 35 years of age or older. Medical ineligibilities are decided on a case-by-case basis case taking the surrounding circumstances into consideration.

Switzerland does not, for example, disqualify prospective adoptive parents who are HIV positive. During the obligatory medical examination, the health and medical status of the adopting couple or individual will be analyzed and taken into consideration together with the pre-adoption home study report.

Residency Requirements: Adoptive parents are required to have their habitual residency in Switzerland. The prospective adoptive parents need to be generally involved in the Swiss way of life, such as social activities, friends, and interests. Prospective adoptive parents will be asked to attend a pre-adoption interview with the Cantonal Central Authority (CCA) where the adoption procedure and criteria will be discussed. The home study will also be organized by the CCA with the CCA's appointed social worker.

The above speaks of the prospective adoptive parents who are seeking to adopt from other countries (not Swiss orphans) although the same would also apply to Swiss prospective adoptive parents seeking to adopt Swiss orphans).

Time Frame: Adoption procedures take a minimum of six months to complete. Prospective adoptive parents are expected to remain in Switzerland the entire time. The time frame also depends very much upon the country of origin of the adoptive child. A social inquiry can take up to two years to complete, although two years is generally the maximum amount of time required.

Adoption Agencies and Attorneys: Adoption agencies must be licensed or accredited by the Swiss Government. Please review current reports online at http://adoption.state.gov for a list of agencies.

Adoption Fees: Fees vary from Canton to Canton. One can expect to pay an average of 1,000-2,500 Swiss Francs (or approximately USD 830-2,060 according to the exchange rate). There are also private agency fees to take into consideration.

Adoption Procedures: Adoption procedures (a child coming from abroad to Switzerland) are very complicated and depend upon the requirements of the child's country of origin. The Swiss procedure is for the prospective adoptive parents to go to the Cantonal Authority to apply for an adoption procedure and attend a session on adoption protocol, organized by the Cantonal Central Authority (CCA). The concept of the adoption procedure in general is to convey to the prospective adoptive parents the intricacy involved in an adoption procedure. Information is given on the various countries where the child or children originate from, legal formalities (in Switzerland), costs involved, home study information, and a chance for the prospective adoptive parents to ask about the adoption procedure. Thereafter, if the adoptive parents still wish to adopt a child, they must submit a formal application at the Cantonal Central Authority, and, if the application is accepted by the CCA, the Cantonal Authority will issue a formal decision and the procedure will go ahead with:

- Medical examination;
- Psychologist's opinion (if required by the country of origin);
- Request for a criminal record (if prospective parents are U.S. citizens, a criminal record from the United States);
- Salary and tax report, and;
- Any other formalities requested by the country of origin (if the country is already chosen).

A home study will be completed by a social worker in accordance with the CCA. (This could also be an appointed official of the CCA. Social workers sometimes work within the CCA but they are always under the responsibility of the CAA.)

Switzerland is a member of the Convention of 29 May 1993 on the Protection of Children and Co-operation in respect of Intercountry Adoption (Hague Convention). With regards to pitfalls, it is advisable to adopt a child from a country that is party to this Convention. This will ensure that certain procedures are followed in respect to the child's best interest and protection against abuses like trafficking, prostitution etc. Furthermore, if an adoption is proclaimed/accepted by the authorities of the country of origin which is a Contracting State to the Hague Convention, the adoption will automatically be recognized by Switzerland according to Article 23 of the Convention.

If the country is not party to the Hague Convention, the country of origin will apply their own specific procedure, meaning there is less chance of a guarantee. The country of origin will issue a judgment allowing the prospective adoptive parents to adopt.

Required Documents: The requirements of the child's country of origin have to be taken into consideration, including psychological analysis, medical report that may need to include certain tests such as HIV, sterility tests, and any other medical tests required by the country of origin.

- Home Study Report carried out by a social worker;
- Certificate that the applicants are qualified to adopt and that the child to be adopted is permitted to enter the Switzerland (i.e., the adoption has to be authorized by the Canton);
- Salary statement, proving a regular income;
- Tax report;
- Criminal record;
- Marriage certificate (for a couple).

Recognition of an adoption finalized in a non-Hague state in favor of an American couple living in Switzer-

land is quite complicated and may vary according to personal status (nationalities of both parents, place of residence, Swiss or American eligibility to adopt, etc.).

Prospective adoptive parents should contact legal counsel or the CCA to get proper information before they start an adoption procedure.

Non-Hague adoptions are not recognized by the Swiss Government. In such cases the child will not arrive in Switzerland as an adopted child. The child will arrive as a"Plegekind" or Foster Child.

Embassy of Switzerland

2900 Cathedral Avenue, N.W.

Washington, D.C. 20008

Tel: (202) 745-7900

Fax: (202) 387-2564

Internet: www.Swissemb.org

Switzerland also has consulates in Boston, Chicago, Los Angeles, New York and San Francisco.

U.S. Immigration Requirements: Prospective adoptive parents are strongly encouraged to consult USCIS publication M-249, *The Immigration of Adopted and Prospective Adoptive Children*, as well as the Department of State publication, *Intercountry Adoptions*. Please see the *Intercountry Adoption* section of this book for more details and review current reports online at http://adoption.state.gov.

U.S. Embassy

Jubilaumsstrasse 93-95

3005 Bern

Internet: http://bern.usembassy.gov

Additional Information: Specific questions about adoption in Switzerland may be addressed to the U.S. Embassy in Bern. General questions regarding intercountry adoption may be addressed to the Office of Children's Issues, U.S. Department of State, CA/OCS/CI, SA-29, 4th Floor, 2201 C Street, NW, Washington, D.C. 20520-4818, toll-free Tel: 1-888-407-4747.

International Parental Child Abduction

February 2008

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *International Parental Child Abduction* section of this book and review current reports online at http://travel.state.gov.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is provided for general information only. Questions involving interpretation of specific foreign laws should be addressed to foreign legal counsel.

The Swiss Central Authority of the Hague Convention on the Civil Aspects of International Child Abduction has informed the Department of State of the following general information concerning the operation of the Convention in Switzerland.

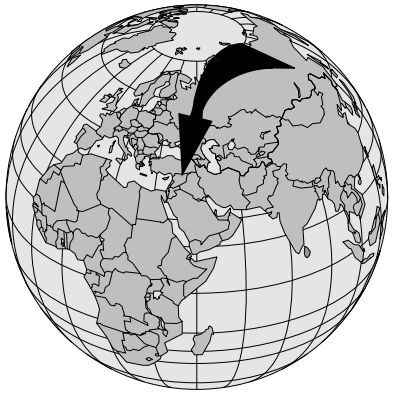
Judicial Procedure: Upon receipt of a Hague application, the Swiss Central Authority usually tries to get in touch with the abducting parent in order to find out if a mediated solution can be achieved. If this is not the case, or if the applicant requests to commence the judicial procedure immediately in view of obtaining a court order under the Hague Convention, the applicant is sent a list of attorneys from the respective canton who are willing to take Hague cases.

The applicant can also let the Central Authority choose the attorney for him/her. It is up to the attorney to commence the judicial procedure, to file the application of legal aid (if applicable) and to take the necessary steps in view of obtaining an enforcement of the final judgment.

Switzerland has no unified civil procedure law and no uniform court system, and the designation of the courts, rules of procedure and conditions for appeals vary considerably. A judgment rendered by the court of first instance (often called the District Court) can normally be reviewed by the court of second instance (called Superior Court, Court of Appeals, etc.). Finally, it is possible to file a further appeal with the Federal (Supreme) Court in Lausanne, Switzerland's highest judicial authority. No writ of certiorari must be obtained in order to get access to the Federal Court, but the complaints that can be raised in this stage of the lawsuit are normally limited to the violation of constitutional rights (including a violation of the European Convention on Human Rights). A final decision should usually not be expected in less than six months.

Attorneys: The applicant can choose an attorney from a list that will be provided by the Swiss Central Attorney, or he/she can let the Central Authority choose the attorney for him/her. There is a large number of attorneys who speak and write English fluently. The attorney must be paid only if the applicant is not entitled to legal aid. The attorney fees are ruled by cantonal law and differ widely. The fee normally can be negotiated between attorney and client, but no contingent fee is allowed.

Legal Aid: Switzerland has established a system of legal aid that is governed (in accordance with Article 42 of the Hague Convention) by cantonal law, although a minimal standard and guidelines are set by the case law of the Federal Court. Pursuant to this case law, an applicant is entitled to legal aid if he or she is indigent (unable to pay a living for him/herself and his/her family in addition to the legal fees) and if the chances of winning the case are greater than the chances of losing it. Legal aid covers both the court costs (which are considerably higher than those in the U.S.) as well as the attorney's fees.



It is up to the attorney to file the request for legal aid with the court or the competent authority before commencing the Hague procedure. There are no application forms available. In general, documents indicating the monthly or annual income and expenses as well as assets and debts are required. The quicker these docu-

ments are conveyed to the attorney, the quicker a preliminary decision regarding legal aid can be obtained.

Rights of Access: The Swiss Central Authority tries to help parents exercise their rights of access pursuant to Article 21 of the Hague Convention. This obligation normally is fulfilled through intermediaries, mostly local guardianship authorities or juvenile services. This includes proceedings in view of negotiating mediated solutions and organizing locations and supervision in order to permit the meeting of a child with the parent. The Central Authority furthermore helps to find an attorney if no mediated solution can be found and a court must resolve the dispute. If the child's habitual residence is in Switzerland, the conditions and requirements of such a decision are set forth by Swiss law. If the conditions of rights of access have already been determined in a decision rendered by a U.S. court in the habitual residence of the child, then the Swiss court organizes the protection of the rights of access pursuant to Article 21 of the Hague Convention.

Translation of Documents: The Swiss Central Authority accepts all documents in English. Translation into German, French or Italian, as the language of the court might be, will be required if the document must be presented to a court, but the translation need not be sent with the Hague application.

For further information on international parental child abduction, contact the Office of Children's Issues, U.S. Department of State at 1-888-407-4747 or visit its web site on the Internet at http://travel.state.gov. You may also direct inquiries to: Office of Children's Issues, U.S. Department of State, Washington, DC 20520-4811; Phone: (202) 736-9090; Fax: (202) 312-9743.

SYRIA

Compiled from the May 2007 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Syrian Arab Republic

PROFILE

Geography

Area: 185,170 sq. km. (71,504 sq. mi.), including 1,295 sq. km. of Israeli-occupied territory; about the size of North Dakota.

Cities: Capital—Damascus (pop. 4 million). Other cities—Aleppo (4.2 million), Homs (1.6 million), Hama (1.4 million), Idleb (1.3 million), al-Hasakeh (1.2 million), Dayr al-Zur (1.1), Latakia (0.9 million), Dar'a (0.9), al-Raqqa (0.8), and Tartous (0.7).

Terrain: Narrow coastal plain with a double mountain belt in the west; large, semiarid and desert plateau to the east.

Climate: Mostly desert; hot, dry, sunny summers (June to August) and mild, rainy winters (December to February) along coast.

People

Nationality: Noun and adjective—Syrian(s).

Population: (2005 est.)*: 18.6 million.

Growth rate: (2005 est.) 2.45%.

Ethnic groups: Arabs (90%), Kurds (9%), Armenians, Circassians, Turkomans.

Religions: Sunni Muslims (74%), Alawis (12%), Christians (10%), Druze (3%), and small numbers of other Muslim sects, Jews, and Yazidis.

Languages: Arabic (official), English (widely understood in major cities only), Kurdish, Armenian, Aramaic, Circassian.

Education: (2005 est.) Years compulsory—primary, 6 yrs. Attendance—97.9%. Literacy (2004)—79.6%; 86% male, 73.6% female.

Health: (2004) Infant mortality rate—17.1/1,000. Life expectancy—68.47 yrs. male, 71.02 yrs. female.

Work force: (6.1 million, 2004 est.) **Services:** (including government); agriculture; industry and commerce.

Government

Type: Republic, under Arab Socialist Ba'ath Party regimes since March 1963.

Independence: April 17, 1946.

Constitution: March 13, 1973.

Government branches: Executive—president, two vice presidents, prime minister, Council of Ministers (cabinet). Legislative—unicameral People's Council. Judicial—Supreme Constitutional Court, High Judicial Council, Court of Cassation, State Security Courts.

Political subdivisions: 13 provinces and city of Damascus (administered as a separate unit).

Political parties: Arab Socialist Resurrection (Ba'ath) Party, Syrian Arab Socialist Party, Arab Socialist Union, Syrian Communist Party, Arab Socialist Unionist Movement, Democratic Socialist Union Party, and some 15 very small quasi-tolerated political parties, generally considered opposition-oriented but enfeebled and reluctant to challenge the government.

Suffrage: Universal at 18.

Economy (2005 est.)

GDP: (2005 nominal)*: $27.3 billion.

Real growth rate: 2.9%.

Per capita GDP: $1464.

Natural resources: Crude oil and natural gas, phosphates, asphalt, rock salt, marble, gypsum, iron ore, chrome, and manganese ores.

Agriculture: Products—cotton, wheat, barley, sugar beets, fruits and vegetables. Arable land—32%.

Industry: Types—mining, manufacturing (textiles, food processing), construction, petroleum.

Trade: Exports—$10.2 billion: petroleum, textiles, phosphates, antiquities, fruits and vegetables, cotton. Major markets—EU, Arab countries, United States, New Independent States, Eastern Europe. Imports—$10.8 billion: foodstuffs, metal and metal products, machinery, textiles, petroleum. Major suppliers—Russia, Turkey, Ukraine, China, U.S., Japan.

*According to IMF statistics

PEOPLE

Ethnic Syrians are of Semitic stock. Syria's population is 90% Muslim—74% Sunni, and 16% other Muslim groups, including the Alawi, Shi'a, and Druze—and 10% Christian. There also is a tiny Syrian Jewish community.

Arabic is the official, and most widely spoken, language. Arabs, including some 500,000 Palestinian and up to 1.3 million Iraqi refugees, make up 90% of the population. Many educated Syrians also speak English or French, but English is the more widely understood. The Kurds, many of whom speak the banned Kurdish language, make up 9% of the population and live mostly in the northeast corner of Syria, though sizable Kurdish communities live in most major Syrian cities as well. Armenian and Turkic are spoken among the small Armenian and Turkoman populations.

Most people live in the Euphrates River valley and along the coastal plain, a fertile strip between the coastal mountains and the desert. Overall population density is about 140 per sq. mi. Education is free and compulsory from ages 6 to 11. Schooling consists of 6 years of primary education followed by a 3-year general or vocational training period and a 3-year academic or vocational program. The second 3-year period of academic training is required for university admission. Total enrollment at post-secondary schools is over 150,000. The literacy rate of Syrians aged 15 and older is 88% for males and 74% for females.

Ancient Syria's cultural and artistic achievements and contributions are many. Archaeologists have discovered extensive writings and evidence of a brilliant culture rivaling those of Mesopotamia and Egypt in and around the ancient city of Ebla. Later Syrian scholars and artists contributed to Hellenistic and Roman thought and culture. Zeno of Sidon founded the Epicurean school; Cicero was a pupil of Antiochus of Ascalon at Athens; and the writings of Posidonius of Apamea influenced Livy and Plutarch. Syrians have contributed to Arabic literature and music and have a proud tradition of oral and written poetry. Although declining, the world-famous handicraft industry still employs thousands.

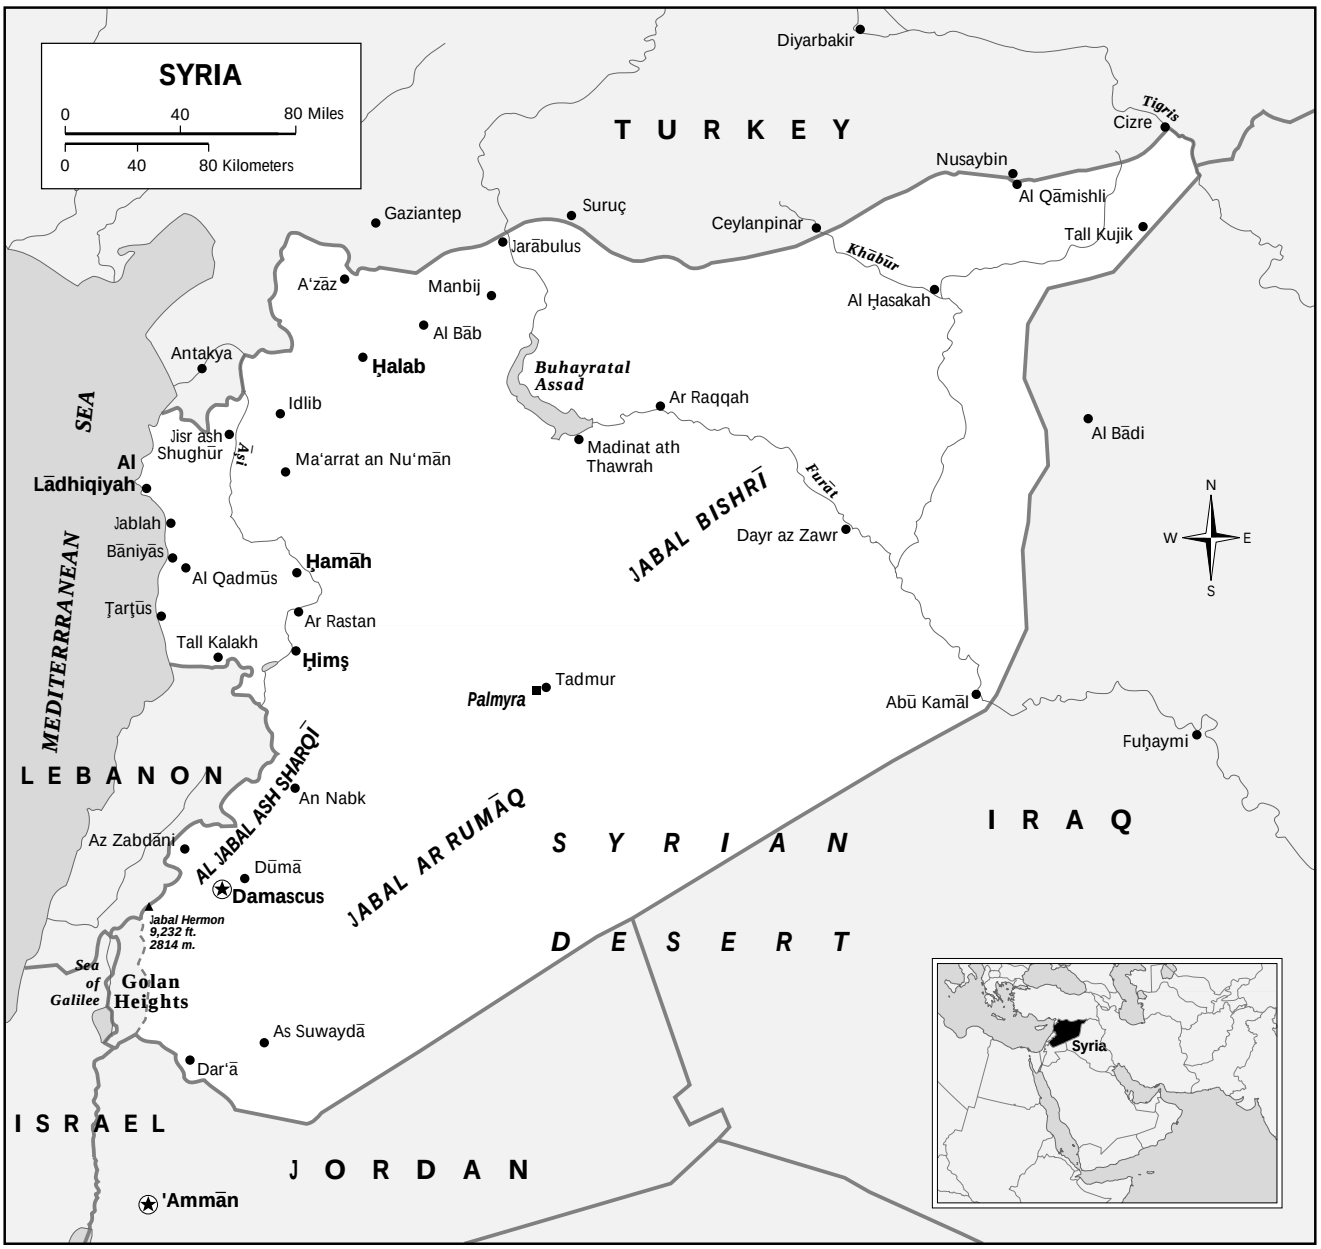
HISTORY

Archaeologists have demonstrated that Syria was the center of one of the most ancient civilizations on earth. Around the excavated city of Ebla in northern Syria, discovered in 1975, a great Semitic empire spread from the Red Sea north to Turkey and east to Mesopotamia from 2500 to 2400 B.C. The city of Ebla alone during that time had a population estimated at 260,000. Scholars believe the language of Ebla to be the oldest Semitic language.

Syria was occupied successively by Canaanites, Phoenicians, Hebrews, Arameans, Assyrians, Babylonians, Persians, Greeks, Romans, Nabataeans, Byzantines, and, in part, Crusaders before finally coming under the control of the Ottoman Turks. Syria is significant in the history of Christianity; Paul was converted on the road to Damascus and established the first organized Christian Church at Antioch in ancient Syria, from which he left on many of his missionary journeys.

Damascus, settled about 2500 B.C., is one of the oldest continuously inhabited cities in the world. It came under Muslim rule in A.D. 636. Immediately thereafter, the city's power and prestige reached its peak, and it became the capital of the Omayyad Empire, which extended from Spain to India from A.D. 661 to A.D. 750, when the Abbasid caliphate was established at Baghdad, Iraq.

Damascus became a provincial capital of the Mameluke Empire around 1260. It was largely destroyed in 1400 by Tamerlane, the Mongol conqueror, who removed many of its craftsmen to Samarkand. Rebuilt, it continued to serve as a capital until 1516. In 1517, it fell under Ottoman rule. The Ottomans remained for the next 400 years, except for a brief occupation by Ibrahim Pasha of Egypt from 1832 to 1840.



French Occupation

In 1920, an independent Arab Kingdom of Syria was established under King Faysal of the Hashemite family, who later became King of Iraq. However, his rule over Syria ended after only a few months, following the clash between his Syrian Arab forces and regular French forces at the battle of Maysalun. French troops occupied Syria later that year after the League of Nations put Syria under French mandate. With the fall of France in 1940, Syria came under the control of the Vichy Government until the British and Free French occupied the country in July 1941. Continuing pressure from Syrian nationalist groups forced the French to evacuate their troops in April 1946, leaving the country in the hands of a republican government that had been formed during the mandate.

Independence to 1970

Although rapid economic development followed the declaration of independence of April 17, 1946, Syrian politics from independence through the late 1960s were marked by upheaval. A series of military coups, begun in 1949, undermined civilian rule and led to army colonel Adib Shishakli's seizure of power in 1951. After the overthrow of President Shishakli in a 1954 coup, continued political maneuvering supported by competing factions in the military eventually brought Arab nationalist and socialist elements to power.

Syria's political instability during the years after the 1954 coup, the parallelism of Syrian and Egyptian policies, and the appeal of Egyptian President Gamal Abdel Nasser's leadership in the wake of the 1956 Suez crisis created support in Syria for union with Egypt. On February 1, 1958, the two countries merged to create the United Arab Republic, and all Syrian political parties ceased overt activities.

The union was not a success, however. Following a military coup on September 28, 1961, Syria seceded, reestablishing itself as the Syrian Arab Republic. Instability characterized the next 18 months, with various coups culminating on March 8, 1963, in the installation by leftist Syrian Army officers of the National Council of the Revolutionary Command (NCRC), a group of military and civilian officials who assumed control of all executive and legislative authority. The takeover was engineered by members of the Arab Socialist Resurrection Party (Ba'ath Party), which had been active in Syria and other Arab countries since the late 1940s. The new cabinet was dominated by Ba'ath members.

The Ba'ath takeover in Syria followed a Ba'ath coup in Iraq the previous month. The new Syrian Government explored the possibility of federation with Egypt and Ba'ath—controlled Iraq. An agreement was concluded in Cairo on April 17, 1963, for a referendum on unity to be held in September 1963. However, serious disagreements among the parties soon developed, and the tripartite federation failed to materialize. Thereafter, the Ba'ath regimes in Syria and Iraq began to work for bilateral unity. These plans foundered in November 1963, when the Ba'ath regime in Iraq was overthrown. In May 1964, President Amin Hafiz of the NCRC promulgated a provisional constitution providing for a National Council of the Revolution (NCR), an appointed legislature composed of representatives of mass organizations—labor, peasant, and professional unions—a

presidential council, in which executive power was vested, and a cabinet. On February 23, 1966, a group of army officers carried out a successful, intra-party coup, imprisoned President Hafiz, dissolved the cabinet and the NCR, abrogated the provisional constitution, and designated a regionalist, civilian Ba'ath government. The coup leaders described it as a "rectification" of Ba'ath Party principles. The defeat of the Syrians and Egyptians in the June 1967 war with Israel weakened the radical socialist regime established by the 1966 coup. Conflict developed between a moderate military wing and a more extremist civilian wing of the Ba'ath Party. The 1970 retreat of Syrian forces sent to aid the PLO during the "Black September" hostilities with Jordan reflected this political disagreement within the ruling Ba'ath leadership. On November 13, 1970, Minister of Defense Hafiz al-Asad affected a bloodless military coup, ousting the civilian party leadership and assuming the role of prime minister.

1970 to 2000

Upon assuming power, Hafiz al-Asad moved quickly to create an organizational infrastructure for his government and to consolidate control. The Provisional Regional Command of Asad's Arab Ba'ath Socialist Party nominated a 173-member legislature, the People's Council, in which the Ba'ath Party took 87 seats. The remaining seats were divided among "popular organizations" and other minor parties. In March 1971, the party held its regional congress and elected a new 21-member Regional Command headed by Asad. In the same month, a national referendum was held to confirm Asad as President for a 7-year term. In March 1972, to broaden the base of his government, Asad formed the National Progressive Front, a coalition of parties led by the Ba'ath Party, and elections were held to establish local councils in each of Syria's 14 governorates. In March 1973, a new Syrian constitution went into effect followed shortly thereafter by parliamentary elections for the People's Council, the first such elections since 1962.

The authoritarian regime was not without its critics, though most were quickly dealt with. A serious challenge arose in the late 1970s, however, from fundamentalist Sunni Muslims, who reject the basic values of the secular Ba'ath program and object to rule by the Alawis, whom they consider heretical. From 1976 until its suppression in 1982, the archconservative Muslim Brotherhood led an armed insurgency against the regime. In response to an attempted uprising by the brotherhood in February 1982, the government crushed the fundamentalist opposition centered in the city of Hama, leveling parts of the city with artillery fire and causing many thousands of dead and wounded. Since then, public manifestations of anti-regime activity have been very limited.

Syria's 1990 participation in the U.S.-led multinational coalition aligned against Saddam Hussein marked a dramatic watershed in Syria's relations both with other Arab states and with the West. Syria participated in the multilateral Middle East Peace Conference in Madrid in October 1991, and during the 1990s engaged in direct, face-to-face negotiations with Israel. These negotiations failed, and there have been no further Syrian-Israeli talks since President Hafiz Al-Asad's meeting with then President Bill Clinton in Geneva in March 2000.

Hafiz Al-Asad died on June 10, 2000, after 30 years in power. Immediately following Al-Asad's death, the Parliament amended the constitution, reducing the mandatory minimum age of the President from 40 to 34 years old, which allowed his son, Bashar Al-Asad legally to be eligible for nomination by the ruling Ba'ath party. On July 10, 2000, Bashar Al-Asad was elected President by referendum in which he ran unopposed, garnering 97.29% of the vote, according to Syrian Government statistics. He was inaugurated into office on July 17, 2000 for a 7-year term.

2000 to 2007

In the aftermath of September 11, 2001 the Syrian Government began limited cooperation with United States in the global war against terrorism. However, Syria opposed the Iraq war in March 2003, and bilateral relations with the United States swiftly deteriorated. In December 2003, President Bush signed into law the Syria Accountability and Lebanese Sovereignty Restoration Act of 2003, which provided for the imposition of a series of sanctions against Syria if Syria did not end its support for Palestinian terrorist groups, end its military and security interference in Lebanon, cease its pursuit of weapons of mass destruction, and meet its obligations under United Nations Security Council resolutions regarding the stabilization and reconstruction of Iraq. In May 2004, the President determined that Syria had not met these conditions and implemented sanctions that prohibit the export to Syria of U.S. products except for food and medicine, and the taking off from or landing in the United States of Syrian Government-owned aircraft. At the same time, the U.S. Department of the Treasury announced its intention to order U.S. financial institutions to sever correspondent accounts with the Commercial Bank of Syria based on money-laundering concerns, pursuant to Section 311 of the USA PATRIOT Act. Acting under the International Emergency Economic Powers Act (IEEPA), the President also authorized the Secretary of the Treasury, in consultation with the Secretary of State, to freeze assets belonging to certain Syrian individuals and entities.

Tensions between Syria and the United States intensified from late 2004 to 2007, primarily over issues relating to Iraq and Lebanon. The U.S. Government recalled its Ambassador to Syria in February 2005, after the assassination of Lebanese Prime Minister Hariri. Sensing its international isolation, the Syrians shored up their relations with Iran and radical Palestinians groups based in Damascus, and cracked down on any signs of internal dissent. There has been little movement on political

reform, with more public focus on limited economic liberalizations. The Syrian Government has provided some cooperation to the UN Independent International Investigation Commission, headed by Serge Brammertz, which is investigating the killing of Hariri. Since the 34-day conflict in Lebanon in July and August 2006, evidence of Syrian compliance with its obligations under UN Security Council Resolution 1701 not to rearm the Lebanese group Hezbollah is unpersuasive. On April 17, 2007, the United Nations Security Council welcomed the Secretary General's intention to evaluate the situation along the entire Syria-Lebanon border and invited the Secretary General to dispatch an independent mission to fully assess the monitoring of the border, and to report back on its findings and recommendations.

GOVERNMENT

The Syrian constitution vests the Arab Ba'ath Socialist Party with leadership functions in the state and society and provides broad powers to the president. The president, approved by referendum for a 7-year term, is also Secretary General of the Ba'ath Party and leader of the National Progressive Front, which is a coalition of 10 political parties authorized by the regime. The president has the right to appoint ministers, to declare war and states of emergency, to issue laws (which, except in the case of emergency, require ratification by the People's Council), to declare amnesty, to amend the constitution, and to appoint civil servants and military personnel. The Emergency Law, which effectively suspends most constitutional protections for Syrians, has been in effect since 1963.

The National Progressive Front also acts as a forum in which economic policies are debated and the country's political orientation is determined. However, because of Ba'ath Party dominance, the National Progressive Front has traditionally exercised little independent power.

The Syrian constitution of 1973 requires that the president be Muslim but does not make Islam the state religion. Islamic jurisprudence, however, is required to be a main source of legislation. The judicial system in Syria is an amalgam of Ottoman, French, and Islamic laws, with three levels of courts: courts of first instance, courts of appeals, and the constitutional court, the highest tribunal. In addition, religious courts handle questions of personal and family law.

The Ba'ath Party emphasizes socialism and secular Arabism. Although Ba'ath Party doctrine seeks to build pan-Arab rather than ethnic identity, ethnic, religious, and regional allegiances remain important in Syria.

Members of President Asad's own minority sect, the Alawis, hold most of the important military and security positions, while Sunnis (in 2006) controlled ten of 14 positions on the powerful Ba'ath Party Regional Command. In recent years there has been a gradual decline in the party's preeminence. The party also is heavily influenced by the security services and the military, the latter of which consumes a large share of Syria's economic resources.

Syria is divided administratively into 14 provinces, one of which is Damascus. A governor for each province is appointed by the President. The governor is assisted by an elected provincial council.

Principal Government Officials

Last Updated: 11/12/08

President: **Bashar al-ASAD**
Vice President: **Farouk al-SHARA**
Vice President: **Najah al-ATTAR**
Prime Minister: **Muhammad Naji al-UTRI**
Dep. Prime Min. for Economic Affairs: **Abdallah al-DARDARI**
Min. of Agriculture: **Adil SAFIR**
Min. of Construction & Housing: **Hamud al-HUSAYN**
Min. of Culture: **Riyad Nasan AGHA**
Min. of Defense: **Hassan Ali TURKMANI, Lt. Gen.**
Min. of Economy & Trade: **Amir Husni LUTFI**
Min. of Education: **Ali SAD**
Min. of Electricity: **Ahmad Khalid al-ALI**
Min. of Environment & Local Government: **Hilal al-ATRASH**
Min. of Expatriates: **Buthaynah SHABAAN**
Min. of Finance: **Muhammad al-HUSAYN**
Min. of Foreign Affairs: **Walid MUALEM**
Min. of Health: **Mahir HUSAMI, Dr.**
Min. of Higher Education: **Ghiath BARAKAT**
Min. of Industry: **Fuad Isa JUNI**
Min. of Information: **Muhsin BILAL, Dr.**
Min. of Interior: **Basam ABD AL-MAJID, Gen.**
Min. of Irrigation: **Nadir al-BUNI**
Min. of Justice: **Muhammad al-GHAFRI**
Min. of Labor & Social Affairs: **Dayala al-Haj ARIF**
Min. of Oil: **Sufiyan al-AW**
Min. of Presidency Affairs: **Ghasan LAHAM**
Min. of Religious Endowments: **Muhammad Abd al-Satar al-SAYID**
Min. of Telecommunications & Technology: **Imad Abd al-Ghani SABUNI**
Min. of Tourism: **Sadallah Agha al-QALA**
Min. of Transport: **Yarub Sulayman BADR**
Min. of State: **Yusuf Sulayman AHMAD**
Min. of State: **Husayn Mahmud FARZAT**
Min. of State: **Ghayth JARATLI**
Min. of State: **Muhammad Yahya KHARAT**
Min. of State: **Hasan al-SARI**
Min. of State: **Bashar SHAR**
Min. of State: **Yusuf SUWAYD**
Governor, Central Bank: **Adib MAYALA**
Ambassador to the US: **Imad MUSTAFA**
Permanent Representative to the UN, New York: **Bashar al-JAFARI**

Syria maintains an embassy in the United States at 2215 Wyoming Avenue, NW, Washington, DC 20008 (tel. 202-232-6313; fax: 202-234-9548). Consular section hours are 10:00 a.m.-2:00 p.m., Monday-Friday. Syria also has an honorary consul at 5433 Westheimer Rd., Suite 1020, Houston, TX 77056 (tel. 713-622-8860; fax. 713-965-9632).

POLITICAL CONDITIONS

Officially, Syria is a republic. In reality, however, it is an authoritarian regime that exhibits only the forms of a democratic system. Although citizens ostensibly vote for the President and members of Parliament, they do not have the right to change their government. The late President Hafiz Al-Asad was confirmed by unopposed referenda five times. His son, Bashar Al-Asad, also was confirmed by an unopposed referendum in July 2000. The President and his senior aides, particularly those in the military and security services, ultimately make most basic decisions in political and economic life, with a very limited degree of public accountability. Political opposition to the President is not tolerated. Syria has been under a state of emergency since 1963. Syrian governments have justified martial law by the state of war, which continues to exist with Israel and by continuing threats posed by terrorist groups.
