Following riots in Bangui and the murder of between 50 and 200 schoolchildren, former President Dacko led a successful French-backed coup against Bokassa on September 20, 1979. Dacko's efforts to promote economic and political reforms proved ineffectual, and on September 1, 1981, he in turn was overthrown in a bloodless coup by Gen. Andre Kolingba. For 4 years, Kolingba led the country as head of the Military Committee for National Recovery (CRMN). In 1985 the CRMN was dissolved, and Kolingba named a new cabinet with increased civilian participation, signaling the start of a return to civilian rule. The process of democratization quickened in 1986 with the creation of a new political party, the Rassemblement Democratique Centrafricain (RDC), and the drafting of a new constitution that subsequently was ratified in a national referendum. General Kolingba was sworn in as constitutional President on November 29, 1986. The constitution established a National Assembly made up of 52 elected deputies, elected in July 1987. Due to mounting political pressure, in 1991 President Kolingba announced the creation of a national commission to rewrite the constitution to provide for a multi-party system. Multi-party presidential elections were conducted in 1992 but were later cancelled due to serious logistical and other irregularities. Ange Felix Patasse won a second-round victory in rescheduled elections held in October 1993, and was re-elected for another 6-year term in September 1999.

Salary arrears, labor unrest, and unequal treatment of military officers from different ethnic groups led to three mutinies against the Patasse government in 1996 and 1997. The French succeeded in quelling the disturbances, and an African peacekeeping force (MISAB) occupied Bangui until 1998 when they were relieved by a UN peacekeeping mission (MINURCA). Economic difficulties caused by the looting and destruction during the 1996 and 1997 mutinies, energy crises, and government mismanagement continued to trouble Patasse's government through 2000.

In March 2000 the last of the MINURCA forces departed Bangui. In May 2001 rebel forces within the C.A.R. military, led by former President and Army General Andre Kolingba, attempted a military coup. After several days of heavy fighting, forces loyal to the government, aided by a small number of troops from Libya and the Congolese rebel Movement for the Liberation of the Congo (MLC), were able to put down the coup attempt. In November 2001, there were several days of sporadic gunfire between members of the Presidential Security Unit and soldiers defending sacked Chief of Staff of the Armed Forces Francois Bozize, who fled to Chad. In mid-2002 there were skirmishes on the C.A.R.-Chad border.

In October 2002, former Army Chief of Staff Francois Bozize launched a coup attempt that culminated in the March 15, 2003 overthrow of President Patasse and the takeover of the capital. General Bozize declared himself President, suspended the constitution, and dissolved the National Assembly. Since seizing power, President Francois Bozize has made significant progress in restoring order to Bangui and parts of the country, and professed a desire to promote national reconciliation, strengthen the economy, and improve the human rights situation. A new constitution was passed by referendum in December 2004. In spring 2005, the country held its first elections since the March 2003 coup.

The first round of presidential and legislative elections were held in March 2005, and in May, President Bozize defeated former Prime Minister Martin Ziguele in a second-round runoff. On June 13, Bozize named Elie Dote, an agricultural engineer who had worked at the African Development Bank, his new Prime Minister. Following a country-wide strike, Elie Dote resigned on January 18, 2008. Humanitarian emergencies continued to plague the north of C.A.R., as unrest and fighting between rebel groups and government troops displaced nearly 300,000 citizens.

GOVERNMENT AND POLITICAL CONDITIONS

The government is a republic comprised of a strong executive branch (president, vice president, prime minister, and council of ministers), and weak legislative and judicial branches. Government and opposition party members, as well as civil society and the military are represented in the three branches, although the president appoints the vice president, prime minister, members of the cabinet (Council of Ministers), top military officials, and managers of national parastatals.

The National Assembly is made up of 109 members elected by popular vote to serve 5-year terms. Legislative elections were held in 1998; in contested results, the government's Movement for the Liberation of the Central African People (MLPC) won just over 50% control of the legislative body. Legislative elections were last held in spring 2005.

For administration purposes, the country is divided into 16 prefectures that are further divided into over 60 subprefectures; the commune of Bangui is administered separately. The president currently appoints heads of these administrative units, called "prefets" and "sous-prefets". There are 174 communes, each headed by a mayor and council appointed by the president. Suffrage is universal over the age of 21.

The judicial sector encompasses the Constitutional Court, Court of Cassation, Court of Appeals, criminal and civil courts, Labor Court, and Juvenile Court, although several of these courts have insufficient resources and trained personnel to operate on a regular basis. The Criminal Court of Bangui sits once or twice a year, usually for 1 or 2 months each session. Judges are appointed by the president; executive influence often impedes transparent handling of judicial affairs. Military courts exist but are currently only used to try military personnel for crimes committed in the course of duty. There are a limited number of formal courts currently functioning outside Bangui; traditional arbitration and negotiation play a major role in administering domestic, property, and probate law.

The Central African Republic has a vibrant civil society, with numerous professional, labor, and local development associations actively carrying out campaigns and gaining greater local and international credibility.

The C.A.R. Government's human rights record remains flawed. There are continued reports of arbitrary detainment, torture and, to a lesser degree, extra judicial killings. Journalists have occasionally been threatened, and prison conditions remain harsh.

Principal Government Officials

Last Updated: 11/12/08

President: **Francois BOZIZE**
Prime Minister: **Faustin-Archange TOUADERA**
Min. of Agriculture: **Parfait MBAYE**
Min. of Civil Service: **Jacques BOTI**
Min. of Defense: **Francois BOZIZE**
Min. of Economy: **Sylvain MALIKO**
Min. of Education: **Charles-Armel DOUBANE**
Min. of Equipment, Transport, & Civil Action: **Jean-Prospere WODOBODE**
Min. of Finance & Budget: **Sylvain NDOUTINGAI**
Min. of Foreign Affairs, Regional Integration, & Francophonie Affairs: **Come ZOUMARA**
Min. of Interior & Security: **Raymond Paul NDOUGOU, Brig. Gen.**
Min. of Justice: **Paul OTTO**
Min. of Mining & Energy: **Sylvain NDOUTINGAI**
Min. of Public Health: **Bernard Lala KONAMNA**
Min. of Social Affairs: **Solange Pagonendji N'DACKALA**
Min. of Tourism, Development, & Crafts: **Yvonne MBOISSONA**
Min. of Trade, Industry, & Small & Medium Size Enterprises: **Rosalie KOUDOUNGERE**
Min. of Transport & Equipment: **Charles MASSI**
Min. of Youth, Sports, and Culture: **Desire KOLINGBA**
Min. of State for Communications, National Reconciliation, Democratic Culture, & Human Rights: **Jabdoul Karim MECKASSOUA**
Min. of State for Rural Development: **Charles MASSI**
Min., Office of the Prime Min., & Government Spokesman: **Aurelian Simplice ZINGAS**
Governor, Regional Central Bank: **Alphonse KOYAMBA**
Ambassador to the US: **Emmanuel TOUABOY**
Permanent Representative to the UN, New York: **Fernand POUKRE-KONO**

The Central African Republic maintains an embassy in the United States at 1618-22nd Street, NW, Washington, DC (tel: 202-483-7800/01, fax: 202-332-9893).

ECONOMY

The Central African Republic is classified as one of the world's least developed countries, with a 2007 annual per capita income of $700 (purchasing power parity). Sparsely populated and landlocked, the nation is overwhelmingly agrarian, with the vast bulk of the population engaged in subsistence farming; 56% of the country's gross domestic product (GDP) came from agriculture in 2006. Principal crops include cotton, food crops (cassava, yams, bananas, maize), coffee, and tobacco. In 2002, timber accounted for about 30% of export earnings. The country also has rich but largely unexploited natural resources in the form of diamonds, gold, uranium, and other minerals. There may be oil deposits along the country's northern border with Chad. Diamonds are the only of these mineral resources currently being developed; in 2002, diamond exports made up close to 50% of the C.A.R.'s export earnings. Industry contributed only about 15% of the country's GDP in 2006, with artesian diamond mining, breweries, and sawmills making up the bulk of the sector. Services accounted for about 29% of GDP in 2006, largely because of the oversized government bureaucracy and high transportation costs arising from the country's landlocked position.

Hydroelectric plants based in Boali provide much of the country's limited electrical supply. Fuel supplies must be barged in via the Ubangui River or trucked overland through Cameroon, resulting in frequent shortages of gasoline, diesel, and jet fuel. The C.A.R.'s transportation and communication network is limited.

The country has only 650 kilometers of paved road, limited international and no domestic air service (except charters), and does not possess a railroad. Commercial traffic on the Ubangui River is impossible from December to May or June, and conflict in the region has sometimes prevented shipments from moving between Kinshasa and Bangui. The telephone system functions, albeit imperfectly. Four radio stations currently operate in the C.A.R., as well as one television station. Numerous newspapers and pamphlets are published on a regular basis, and at least one company has begun providing Internet service.

In the more than 40 years since independence, the C.A.R. has made slow progress toward economic development. Economic mismanagement, poor infrastructure, a limited tax base, scarce private investment, and adverse external conditions have led to deficits in both its budget and external trade. The country saw a 30-year decline in per capita gross national product (GNP), and its debt burden is considerable. Structural adjustment programs with the World Bank and International Monetary Fund (IMF) and interest-free credits to support investments in the agriculture, livestock, and transportation sectors have had limited impact. The World Bank and IMF are now encouraging the government to concentrate exclusively on implementing much-needed economic reforms to jump-start the economy and defining its fundamental priorities with the aim of alleviating poverty. As a result, many of the state-owned business entities have been privatized and limited efforts have been made to standardize and simplify labor and investment codes and to address problems of corruption. The C.A.R. Government has adopted the Central African Economic and Monetary Community (CEMAC) Charter of Investment, and is in the process of adopting a new labor code.

DEFENSE

Under military restructuring plans formulated 1999-2000, the civilian Minister of Defense controlled and directed all armed forces, including the Presidential Security Unit (UPS), which had previously been seen as a militia supporting the president. In April 2001, the C.A.R. armed forces numbered about 3,000, including army, navy, air force, gendarmerie, national police, Presidential Security Unit, and local police personnel. An estimated 1,200 members of the army and gendarmerie fled to the Democratic Republic of the Congo following the failed coup attempt of May 2001.

Following the 2003 coup, Central African Economic and Monetary Community (CEMAC-Communauté Économique et Monétaire de l'Afrique Centrale) and C.A.R. armed forces assumed responsibility for securing the capital city. CEMAC forces currently total approximately 400 soldiers, which are supported by an additional 200 French soldiers. The C.A.R. armed forces number approximately 2,000. Working with the French, the C.A.R. military is attempting to provide professional training and decentralize its troops in an effort to combat road bandits, thievery, and poaching throughout the C.A.R. territory.

FOREIGN RELATIONS

The Central African Republic is an active member in several Central African organizations, including the Economic and Monetary Union (CEMAC), the Economic Community of Central African States (CEEAC) Central African Peace and Security Council (COPAX—still under formation), and the Central Bank of Central African States (BEAC). Standardization of tax, customs, and security arrangements between the Central African states is a major foreign policy objective of the C.A.R. Government. The C.A.R. is a participant in the Community of Sahel-Saharan States (CEN-SAD), and the Organization of African Unity (OAU—now the African Union). Libya and, to a lesser degree, Sudan have shown increased interest in cooperation with the C.A.R. over the last year.

Outside of Africa, the C.A.R. maintains fairly close ties to France, albeit considerably reduced from previous years. In the late 1990s, France withdrew forces stationed in the C.A.R.; drops in its external assistance budget have reduced French military and social development aid to the country. Other multilateral organizations—including the World Bank, International Monetary Fund, UN agencies, European Union, and the African Development Bank—and bilateral donors—including Germany, Japan, the European Union, China, and the United States—are significant development partners for the C.A.R.

Seventeen countries have resident diplomatic or consular representatives in Bangui, and the C.A.R. maintains approximately the same number of missions abroad. Since early 1989 the government recognizes both Israel and the Palestinian state. The C.A.R. also maintains diplomatic relations with China. The C.A.R. generally joins other African and developing country states in consensus positions on major policy issues.

U.S.-C.A.R. RELATIONS

The U.S. and C.A.R. enjoy generally good relations, although concerns over the pace of political and economic liberalization and human rights have affected the degree of support provided by the U.S. to the country. The U.S. Embassy in Bangui was briefly closed as a result of the 1996-97 mutinies. It reopened in 1998 with limited staff, but U.S. Agency for International Development (USAID) and Peace Corps mis-

sions previously operating in Bangui did not return. The American Embassy in Bangui again temporarily suspended operations on November 2, 2002 in response to security concerns raised by the October 2002 launch of Francois Bozize's 2003 military coup.

The Embassy reopened in January 2005; however, there currently is limited U.S. diplomatic/consular representation in the C.A.R. As a result, the ability of the Embassy to provide services to American citizens remains extremely limited. The Department of State approved the lifting of Section 508 aid restrictions triggered by the coup; U.S. assistance to the Central African Republic had been prohibited except in the areas of humanitarian aid and support for democratization that have focused on strengthening the media and the parliament, which are largely inexperienced and remain susceptible to pressure from the executive branch.

In international fora, the United States has supported the mandates of the UN Peace-building Office in the Central African Republic (BONUCA) and of the Multinational Force of the Central African Monetary and Economic Community (also known as FOMUC) in order to promote stability in C.A.R. Both BONUCA and FOMUC, while constrained by their small sizes and budgets, have contributed considerably to the pursuit of peace in C.A.R. We also support C.A.R.'s upcoming national dialogue, in hopes that the C.A.R. Government, the political opposition, and the armed opposition will be better able to reach peace and move towards security in the countryside and in Bangui.

The U.S. Department of State continues to warn U.S. citizens against travel to the Central African Republic. Americans in the C.A.R. are urged to exercise caution and maintain security awareness at all times. U.S. citizens who travel to or remain in the Central African Republic and need emergency assistance should contact the U.S. Embassy in Yaounde, Cameroon at telephone (237) 2220 15 00, fax (237) 2220 16 20, and (237) 2220 16 03 (Consular). Americans may also contact the American Embassy in N'djamena, Chad at telephone (235) 51-70-09, 51-92-33 or 51-90-52 and fax (235) 51-56-54. As noted above, since the United States has a limited diplomatic presence in the Central African Republic, the ability to provide services to U.S. citizens in the C.A.R. is extremely limited.

TRAVEL

Consular Information Sheet

April 1, 2008

Country Description: The Central African Republic is a developing African nation that has experienced several periods of political instability since independence from France in 1960. Despite an on-going peace process and the presence of a democratically-elected government in the capital, Bangui, rebels still control large portions of the northern provinces in the country, and highway bandits prey on civilians and travelers in much of western CAR. In the country's Dzanga-Sangha National Park in the southwest, facilities for tourists are being developed but remain limited.

Entry Requirements: A valid passport, visa, and evidence of yellow fever vaccination are required for entry. Travelers should obtain the latest information and details from the Embassy of the Central African Republic, 1618 22nd Street NW, Washington, DC 20008, telephone: (202) 483—7800/7801, fax: (202) 332—9893. Overseas, inquiries should be made to the nearest Central African Republic Embassy or Consulate. Note: In any country where there is no Central African Republic diplomatic mission, the French Embassy has authorization to issue a visa for entry into the Central African Republic.

Safety and Security: The Central African Republic is one of the world's least developed nations, and much of the northern part of the country remains outside of central government control.

For the latest security information, Americans traveling abroad should regularly monitor the Department's web site, where the current Worldwide Caution Travel Alert, Travel Warnings and other Travel Alerts can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S. and Canada, or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: Crime remains a significant problem in the capital, Bangui, though it has decreased notably in recent years. Americans should exercise caution while traveling around the city and immediate environs. Petty theft remains a problem in large market areas, particularly in the crowded markets near KM 5 on the outskirts of the city. Armed gangs may operate in outlying residential areas. During previous periods of civil unrest and civil conflict, including most recently in 2002 and 2003, foreign mercenaries and citizens engaged in widespread looting and damaged much of the city's infrastructure. In the northern and western parts of the country, there are consistent reports of armed robbery and kidnapping by highway bandits (called "coupeurs de routes" or "zaraguinas"), especially during the December to May dry season. When a crime does occur in Bangui, the victim may have to pay to send a vehicle to pick up police officers due to the shortage of police vehicles and fuel.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

Medical Facilities and Health Information: Medical facilities are extremely limited in the CAR, and the quality of acute care is unreliable. Sanitation levels are low. Many medicines are not available; travelers should carry properly labeled prescription drugs and other medications with them.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's web site at http://wwwn.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith/en.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning CAR is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

In Bangui, road conditions vary, and many roads have large holes and degraded points that prevent the normal flow of traffic. Only a small portion of the roads in the country, including in the capital, are paved, and many of the compacted dirt roads have been degraded. Drivers tend to prefer to drive on the smoothest portion of the road and ignore basic traffic laws, thus slowing the flow of traffic and increasing the risk of collision. The city of Bangui does have a public transportation system consisting of green buses and yellow taxis, though these vehicles are often dangerously overcrowded and very badly maintained.

Due to the risk of armed attacks on motorists in the northern and western regions of the country, overland travel in these areas should be avoided. Any driving outside the capital should be only during daylight hours. Most remote areas in the CAR that are frequented by tourists are accessible only by four-wheel drive vehicles, although some roads are not passable at all during the rainy season, from May to October.

Aviation Safety Oversight: As there is no direct commercial air service between the United States and the Central African Republic, the U.S. Federal Aviation Administration (FAA) has not assessed the CAR's Civil Aviation Authority for compliance with International Civil Aviation Organization (ICAO) aviation safety standards. For more information, travelers may visit the FAA's internet web site at http://www.faa.gov.

Special Circumstances: Taking photographs of police or military installations, or any other government buildings, is prohibited. Unauthorized photography may result in the seizure of photographic equipment by CAR authorities. Police or other government authorities can provide information and grant permission for photographing a particular subject or location. Corruption remains a serious problem among CAR security forces, some members of which have harassed travelers for bribes and small amounts of money. At night, the roads in the capital are often manned with impromptu checkpoints, at which police or other military members ask motorists and travelers for money.

Banking infrastructure remains limited in the CAR, and facilities for monetary exchange exist only in the capital. There are no ATMs in the CAR, and exchange bureaus normally accept dollars and euros but not West African Francs (CFA).

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating Central Africanlaws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in the CARare severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: The U.S. Embassy in Bangui resumed operations in January 2005, following the evacuation of all American staff in 2002 during the civil conflict and looting in Bangui in 2002. The Embassy's American presence increased in 2006, and a new American Ambassador to the CAR presented his credentials to President Bozize in 2007. Nonetheless, the

Embassy continues to operate with limited staffing, and can only provide basic services to American citizens in the CAR.

Americans living or traveling in the CAR are encouraged to register with the U.S. Embassy through the State Department's travel registration web site so that they can obtain updated information on travel and security within the CAR. Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency. The U.S. Embassy is located on Avenue David Dacko, B.P. 924, Bangui, tel: 2161-0200; fax: 2161-4494.

Intercountry Adoption

March 2007

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is based on public sources and current understanding. Questions involving foreign and U.S. immigration laws and legal interpretation should be addressed respectively to qualified foreign or U.S. legal counsel.

Patterns of Immigration: Recent U.S. immigrant visa statistics reflect that there have been only two immigrant visas issued to Central African Republic ("C.A.R.") orphans in the past five fiscal years.

Adoption Authority: The "Adoption Committee," which is composed of technical experts from the Ministry of Justice, the Ministry of Family & Social Affairs and the Ministry of Interior, serves as the adoption authority in the Central African Republic. The Adoption Committee's recommendations are passed to the Tribunal (Court) of First Instance in Bangui.

Comité d'Adoption
Ministère de la Famille et des Affaires Sociales
B.P. 917

Bangui, République Centrafricaine
Chef de Service des Actions Sociales Jules Gueret
90 07 93

Assistant aux Services des Actions Sociales Bernard Azoumi
03 96 90

Eligibility Requirements for Adoptive Parents: The prospective adoptive parent must be at least 30 years old. A prospective adoptive couple must be married for at least 5 years, and both must consent to the adoption. In the Central African Republic, a single person or a married couple living together are both eligible to adopt.

Residency Requirements: Prospective adoptive parents need to provide an Acceptance Statement issued and signed by the Mayor where he/she live(s) (Agrément du Maire où l'Adoptant réside). There is no requirement regarding the format of the statement. There is no residency requirement in the Central African Republic for foreign prospective adoptive parents.

Prospective adoptive parents need to provide an Acceptance Statement issued and signed by the Mayor where he/she live(s) (Agrément du Maire où l'Adoptant réside). There is no requirement regarding the format of the statement.

Time Frame: The adoption process can take six months to one year to complete and two weeks to one month for the immigrant visa.

Adoption Agencies and Attorneys: There are no private adoption agencies in the Central African Republic. All adoption matters are processed through the Ministry of Social Affairs' Adoption Committee and the Courts. Prospective adoptive parents can engage lawyers to carry out adoption proceedings. The U.S. Embassy in Bangui maintains a list of attorneys who can handle intercountry adoptions which is available upon request.

Prospective adoptive parents are advised to fully research any adoption agency or facilitator they plan to use for adoption services.

Adoption Fees: CFA 500,000 or about US $1,000. This includes all services related to the adoption proceedings, but does not include immigrant visa fees.

Adoption Procedures: Prospective parents interested in adopting a child should send a letter directly to the Ministry of Family & Social Affairs with the appropriate documents. The committee will examine the request and contact an orphanage to identify a child for adoption. A social worker will conduct an investigation of the biological parents or relatives. After the birth parents' agreement and the screening of adoption documents submitted, the committee gives written authorization to the orphanage to release the child to the adoptive parent(s). The file is then forwarded to the court for adjudication. The judge sets up a hearing to verify the circumstances of the adoption as well as to hear the parties: biological and adoptive parents. The judge could also request an investigation on the morality of the adoptive parents.

In the event that a child has already been identified, the committee works with the biological parents. The biological parents play a crucial role in the process, because they must consent to the adoption in writing.

The written consent must be submitted to the court. In the case of an orphan, the judge would request consent from the extended family or from other relatives of the child if the biological parents are not available.

If adopted from an orphanage, authorities might seek consent from the child's home village or community in addition to the orphanage management.

After a satisfactory review of the documents and the written consent of the biological parents, the judge issues an Adoption Decree (Jugement d'adoption). This allows the adoptive parents to apply for a new birth certificate at the city hall's civil registry (Mairie de Bangui or the Mairie in any other province.)

The birth certificate is required for the issuance of a passport through the immigration office. There are two types of adoptions: simple adoption and plenary adoption (adoption plénière).

Plenary adoption severs the familial relationship between the child and the birth parents. This adoption gives the adopted child the same rights as a child born to the adoptive parent.

A simple adoption occurs when the biological parents die, abandon the child, or give the child up for adoption. Under this adoption procedure, the biological parents (if living) retain inheritance rights and other privileges of the child, and must be consulted if the prospective adoptive parents want to change the child's name or make significant changes in the life of the child.

A simple adoption does not meet the requirements of U.S. immigration law and therefore cannot be the basis for granting an immigrant visa to an adopted child.

Required Documents: All documents must be in the French language. Documents issued in a different language are returned to the sender for translation. The documents required for adoption in the Central African Republic are:

- A Motivation Letter explaining why the prospective adoptive parents want to adopt a child. There is no specific format;
- An Acceptance Statement issued and signed by the Mayor where the prospective adoptive child will reside. This document is issued by the Mayor's office of the prospective adoptive parents' residence;
- Certified copy of prospective adoptive parents' birth certificate(s);
- Certified copy of marriage certificate (if applicable);
- Police Clearance;
- Medical Certificate;
- Income documents (such as W-2 statements);
- A Notarized Statement of Net Worth issued by a bank;
- A Certificate of Infertility (if applicable);
- A Notarized Certificate from Next-of Kin or a Friend who is willing to take care of the child in the case of Death;
- An Agreement Letter about the care of the Child. This is a statement indicating the prospective adoptive parents' plans for caring for the child and also for his/her future;
- Photos of the adoptive parents.

In addition, a home-study will be carried out by a social worker or other individual certified to complete home studies in the state in which the prospective adoptive parents' reside in order to determine the prospective adoptive parent's suitability as parents.

Embassy of the Central African Republic
1618 22nd Street, N.W.
Washington, D.C. 20008
Telephone: (202) 483-7800, 7801

U.S. Immigration Requirements: Prospective adoptive parents are strongly encouraged to consult USCIS publication M-249, *The Immigration of Adopted and Prospective Adoptive Children*, as well as the Department of State publication, *Intercountry Adoptions*. Please see the *Intercountry Adoption* section of this book for more details and review current reports online at http://adoption.state.gov.

Fax: (236) 61-44-94.

Additional Information: Specific questions about adoption in the Central African Republic may be addressed to the U.S. Embassy in Bangui. Questions about immigrant visa processing for Central African children should be directed to the U.S. Embassy in Yaoundé, Cameroon. General questions regarding intercountry adoption may be addressed to the Office of Children's Issues, U.S. Department of State, CA/OCS/CI, SA-29, 4th Floor, 2201 C Street, NW, Washington, D.C. 20520-4818, toll-free Tel: 1-888-407-4747.

Travel Warning

March 25, 2008

This Travel Warning provides an update on the security situation in the Central African Republic (CAR). American citizens traveling to or residing in the CAR should exercise extreme caution. This supersedes the Travel Warning for the CAR issued August 9, 2007.

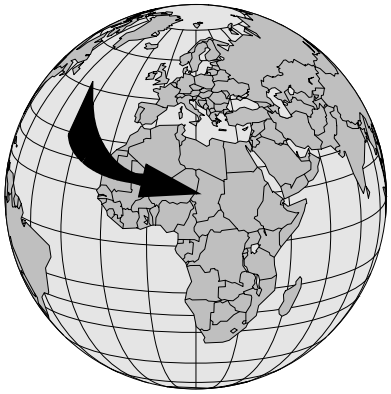
American citizens who travel to or reside in the Central African Republic (CAR) should exercise extreme caution, especially outside the capital city of Bangui. Armed rebel groups, bandits, and poachers present real dangers and the Central African government is unable to guarantee the safety of visitors in most parts of the country.

The U.S. Department of State advises American citizens who are not affiliated with humanitarian relief efforts to avoid travel to northwestern and northern CAR, particularly the areas bordering Chad, due to insecurity caused by banditry and clashes between government and rebel forces. In addition, the embassy recommends that Americans traveling outside the capital not travel with any armed escort, as an armed escort may cause problems with local authorities or draw fire from rebel troops. In the northwestern prefecture of Ouham

and Ouham-Pende, roadblocks by rebels and by government forces pose a serious and continuing threat to aid workers and travelers. Fighting between rebels and government forces continues sporadically, and efforts to broker a peace agreement or ceasefire between the parties have not succeeded to date. An expatriate aid worker was killed in an attack on a well-marked vehicle north of Bocaranga in June 2007, and local citizens continue to be kidnapped and held for ransom on a regular basis. Non-governmental organizations (NGOs) and UN agencies operating in that area share information on security incidents and the NGOs generally abide by the UN travel restrictions. U.S. Government employees on temporary duty and other contract visitors to the U.S. Embassy are allowed to visit the northwestern or northeastern CAR prefectures only on a case-by-case basis and with specific authorization of the Chief of Mission.

Rebels and armed men are also present in the northeastern Vakaga prefecture, and pose a threat to all travelers in that area. A peace agreement with one group of rebels is in place, but splinter groups and other armed men pose a threat to travelers. The firing on a medical convoy of well-marked NGO vehicles, which led to one patient's death in March 2008, resulted in the temporary suspension of most humanitarian activities in the Vakaga prefecture outside Birao.Highway bandits ("coupeurs de route" in French, "zaraguinas" in Sango) pose a serious threat to travelers throughout the country. Two World Health Organization physicians were murdered by unidentified assailants outside Bossembélé in April 2006. There have been repeated attacks on Central African and expatriate travelers on the Berberati-Carnot-Baoro-Bouar-Bozoum road.

Poachers and armed men also pose a threat to game hunters in the north central CAR, in and around the Parc National de Bamingui-Bangoran. A French hunter was murdered and three others wounded in an attack on a hunting party outside the town of Ndele in April 2007. The poachers in this area are heavily armed, often with automatic weapons, and outside local and national government authority.



There are approximately 300 peacekeeping troops from neighboring member countries of the Economic and Monetary Union of Central Africa (CEMAC) that move in and out of the capital. CAR military and civilian security forces, sometimes with French military assistance, staff checkpoints throughout the city. Central African security forces (and people posing as such) at those checkpoints frequently harass local and expatriate travelers for bribes or small amounts of money (described as "coffee" in French). American citizens should avoid public demonstrations, as even those intended to be peaceful can turn confrontational and possibly escalate into violence.

The U.S. Embassy in Bangui has just four American officers and can provide only limited services to U.S. citizens at this time.

U.S. citizens in the CAR are strongly urged to register on the State Department's web site at https://travelregistration.state.gov. Americans without internet access may register directly with the U.S. Embassy in Bangui. By registering, American citizens make it easier for the Embassy to contact them in case of emergency.

The U.S. Embassy in the CAR is located at Avenue David Dacko, B.P. 924, Bangui; tel. (236) 2161-0200; fax (236) 2161-4494. Americans may also obtain updated information from the American Embassy in N'djamena, Chad, at telephone (235) 51-70-09, 51-92-33 or 51-90-52; fax (235) 51-56-54; web site http://ndjamena.usembassy.gov.

U.S. citizens should also consult the Department of State's most recent Consular Specific Information Sheet for Central African Republic and the Worldwide Caution, which are located on the Department's web site at http://travel.state.gov. Up-to-date information on safety and security is also available at 1-888-407-4747 toll free in the U.S. and Canada, or for callers from other countries, on a regular toll-line at 1-202-501-4444. These numbers are available from 8:00 a.m. to 8:00 p.m. Eastern Time, Monday through Friday (except U.S. federal holidays).

CHAD

Compiled from the November 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Republic of Chad

PROFILE

Geography

Area: 1,284,634 sq. km. (496,000 sq. mi.); about twice the size of Texas.

Cities: Capital—N'Djamena (pop. 1 million est.). Other major cities—Moundou, Abeche, Sarh.

Terrain: Desert, mountainous north, large arid central plain, fertile lowlands in extreme southern regions.

Climate: Northern desert—very dry throughout the year; central plain—hot and dry, with brief rainy season mid-June to mid-September; southern lowlands—warm and more humid with seasonal rains from late May to early October.

People

Nationality: Noun and adjective—Chadian(s).

Population: (July 2008 est.) 10,111,337.

Annual growth rate: (2008 est.) 2.195%.

Population density: 6.6 per sq. km. (17 per sq. mi.).

Ethnic groups: 200 distinct groups. In the north and center, Gorane (Toubou, Daza, Kreda), Zaghawa, Kanembou, Ouaddai, Arabs, Baguirmi, Hadjerai, Fulbe, Kotoko, Hausa, Boulala, and Maba, most of whom are Muslim. In the south, Sara (Ngambaye, Mbaye, Goulaye), Moudang, Moussei, Massa, most of whom are Christian or animist. About 1,000 French citizens live in Chad.

Religions: Muslim 51%, Christian 35%, animist 7%, other indigenous beliefs 7%.

Languages: French and Arabic (official); Sara (in the south), more than 120 indigenous Chadian languages and dialects.

Education: Years compulsory—6. Attendance—primary school 68% (1998); secondary school 5.5% (1995); higher education n/a. Literacy (2003 est.)—48%.

Health: Life expectancy (2007 est.)—47.2 yrs. Infant mortality rate (2008 est.)—100.36 deaths/1,000 live births%.

Work force: (2006 est.)—3.747 million. Agriculture—more than 80%; largely subsistence agriculture.

Government

Type: Republic.

Independence: August 11, 1960 (from France).

Government branches: Executive—president (head of state), prime minister, Council of Ministers. Legislative—National Assembly (unicameral). Judicial—Supreme Court; Court of Appeals; criminal courts; magistrate courts president (head of state, president of the council of ministers), council of ministers.

Political parties: About 60, of which Patriotic Salvation Movement (MPS) is dominant. Other major parties include the Federation Action for the Republic (FAR); Party for Liberty and Development (PLD); Rally for Development and Progress (RNDP); Union for Democracy and the Republic (UDR); National Union for Development and Renewal (UNDR); Rally for Democracy and Progress (RDP); Viva Rally for Development and Progress, or Viva RNDP.

Suffrage: Universal over 18.

Political subdivisions: 18 regions.

Economy

GDP: current prices (2007 est.) $7.095 billion.

GDP per capita income: (2007 est.) $1,500.

Population living below poverty line: (2001 est.) 80%.

Natural resources: Petroleum, natron (sodium carbonate), kaolin, gold, bauxite, tin, tungsten, titanium, iron ore.

Agriculture: (2007 est., 21.5% of GDP): Products—cotton, gum arabic, livestock, fish, peanuts, millet, sorghum, rice, sweet potatoes, cassava, dates, manioc. Arable land—30%.

Industry: (2007 est., 47.8% of GDP): Types—meatpacking, beer brewing, soap, cigarettes, construction materials, natron mining, soft-drink bottling.

Services: (2007 est.): 30.6% of GDP.

Trade: Exports—$4.201 billion (f.o.b., 2007 est.): oil, cotton, livestock, gum arabic. Major markets (1999)—Portugal, Germany, Thailand, Costa Rica, South Africa, France, Nigeria, Cameroon. Imports—$1,157.3 million (f.o.b., 2007 est.): petroleum products, machinery and transportation equipment, foodstuffs, industrial goods, textiles. Major suppliers (2004)—U.S., France, Cameroon, Nigeria.

Budget: (2006 est.) Revenues—$617.3 million. Expenditures—$877.6 million.

Defense: (2002) $31 million.

National holidays: Independence Day, August 11.

Fiscal year: Calendar year.

U.S. aid received: (FY 2007): Total USAID and State humanitarian assistance to Chad—$19,970,000. Economic, food relief—$238 million from all sources (including $30 million committed by African Development Bank).

GEOGRAPHY

Chad is a landlocked country in north central Africa measuring 1,284,000 square kilometers (496,000 sq. mi.), roughly three times the size of California. Most of its ethnically and linguistically diverse population lives in the south, with densities ranging from 54 persons per square kilometers in the Logone River basin to 0.1 persons in the northern B.E.T. desert region, which is larger than France. The capital city of N'Djaména, situated at the confluence of the Chari and Logone Rivers, is cosmopolitan in nature, with a current population nearing one million people.

Chad has four bioclimatic zones. The northernmost Saharan zone averages less than 200 mm (8") of rainfall annually. The sparse human population is largely nomadic, with some livestock, mostly small ruminants and camels. The central Sahelian zone receives between 200 and 600 mm (24") rainfall and has vegetation ranging from grass/shrub steppe to thorny, open savanna. The southern zone, often referred to as the Sudanian zone, receives between 600 and 1,000 mm (39"), with woodland savanna and deciduous forests for vegetation. Rainfall in the Guinea zone, located in Chad's southwestern tip, ranges between 1,000 and 1,200 mm (47").

The country's topography is generally flat, with the elevation gradually rising as one moves north and east away from Lake Chad. The highest point in Chad is Emi Koussi, a mountain that rises 3,100 meters (10,200 ft.) in the northern Tibesti Mountains. The Ennedi Plateau and the Ouaddaï highlands in the east complete the image of a gradually sloping basin, which descends toward Lake Chad. There also are central highlands in the Guera region rising to 1,500 meters (4,900 ft.).

Lake Chad is the second-largest lake in West Africa and is one of the most important wetlands on the continent. Home to 120 species of fish and at least that many species of birds, the lake has shrunk dramatically in the last four decades due to the increased water use and low rainfall. Bordered by Chad, Niger, Nigeria, and Cameroon, Lake Chad currently covers only 1,350 square kilometers, down from 25,000 square kilometers in 1963. The Chari and Logone Rivers, both of which originate in the Central African Republic and flow northward, provide most of the water entering Lake Chad.

PEOPLE

There are more than 200 ethnic groups in Chad. Those in the north and east are generally Muslim; most southerners are Christians or animists. Through their long religious and commercial relationships with Sudan and Egypt, many of the peoples in Chad's eastern and central regions have become more or less Arabized, speaking Arabic and engaging in many other Arab cultural practices as well. More than three-quarters of the Chadian population is rural. Near the eastern border there are over 250,000 refugees from the Sudanese conflict in Darfur and 56,000 Central African Republic refugees in the south. Due to internal rebel activity, there are also approximately 185,000 internally displaced persons in Chad.

HISTORY

Chad has a long and rich history. A humanoid skull found in Borkou was dated to be more than 3 million years old. Because in ancient times the Saharan area was not totally arid, Chad's population was more evenly distributed than it is today. For example, 7,000 years ago, the north central basin, now in the Sahara, was still filled with water, and people lived and farmed around its shores. Cliff paintings in Borkou and Ennedi depict elephants, rhinoceroses, giraffes, cattle, and camels; only camels survive there today. The region has been known to traders and geographers since the late Middle Ages. Since then, Chad has served as a crossroads for the Muslim peoples of the desert and savanna regions, and the animist Bantu tribes of the tropical forests.

Sao people lived along the Chari River for thousands of years, but their relatively weak chiefdoms were overtaken by the powerful chiefs of what were to become the Kanem-Bornu and Baguirmi kingdoms. At their peak, these two kingdoms and the kingdom of Ouaddai controlled a good part of what is now Chad, as well as parts of Nigeria and Sudan. From 1500 to 1900, Arab slave raids were widespread. The French first penetrated Chad in 1891, establishing their authority through military expeditions primarily against the Muslim kingdoms. The first major colonial battle for Chad was fought in 1900 between the French Major Lamy and the African leader Rabah, both of whom were killed in the battle. Although the French won that battle, they did not declare the territory pacified until 1911; armed clashes between colonial troops and local bands continued for many years thereafter.

In 1905, administrative responsibility for Chad was placed under a

governor general stationed at Brazzaville in what is now Congo. Although Chad joined the French colonies of Gabon, Oubangui-Charo, and Moyen Congo to form the Federation of French Equatorial Africa (AEF) in 1910, it did not have colonial status until 1920. The northern region of Chad was occupied by the French in 1914. In 1959, the territory of French Equatorial Africa was dissolved, and four states—Gabon, the Central African Republic, Congo (Brazzaville), and Chad—became autonomous members of the French Community. On August 11, 1960 Chad became an independent nation under its first president, Francois Tombalbaye.

A long civil war began as a tax revolt in 1965 and soon set the Muslim north and east against the southern-led government. Even with the help of French combat forces, the Tombalbaye government was never able to quell the insurgency. Tombalbaye's rule became more irrational and brutal, leading the military to carry out a coup in 1975 and to install Gen. Felix Malloum, a southerner, as head of state. In 1978, Malloum's government was broadened to include more northerners. Internal dissent within

the government led the northern prime minister, Hissein Habre, to send his forces against the national army in the capital city of N'Djamena in February 1979. The resulting civil war amongst the 11 emergent factions was so widespread that it rendered the central government largely irrelevant. At that point, other African governments decided to intervene.

A series of four international conferences held first under Nigerian and then Organization of African Unity (OAU) sponsorship attempted to bring the Chadian factions together. At the fourth conference, held in Lagos, Nigeria, in August 1979, the Lagos accord was signed. This accord established a transitional government pending national elections. In November 1979, the National Union Transition Government (GUNT) was created with a mandate to govern for 18 months. Goukouni Oueddei, a northerner, was named President; Colonel Kamougue, a southerner, Vice President; and Habre, Minister of Defense. This coalition proved fragile; in January 1980, fighting broke out again between Goukouni's and Habre's forces. With assistance from Libya, Goukouni regained control of the capital and other urban centers by year's end. However, Goukouni's January 1981 statement that Chad and Libya had agreed to work for the realization of complete unity between the two countries generated intense international pressure and Goukouni's subsequent call for the complete withdrawal of external forces. Libya's partial withdrawal to the Aozou Strip in northern Chad cleared the way for Habre's forces to enter N'Djamena in June. French troops and an OAU peacekeeping force of 3,500 Nigerian, Senegalese, and Zairian troops (partially funded by the United States) remained neutral during the conflict.

Habre continued to face armed opposition on various fronts, and was brutal in his repression of suspected opponents, massacring and torturing many during his rule. In the summer of 1983, GUNT forces launched an offensive against government positions in northern and eastern Chad with Libyan support. In response to Libya's direct intervention, French and Zairian forces intervened to defend Habre, pushing Libyan and rebel forces north of the 16th parallel. In September 1984, the French and the Libyan governments announced an agreement for the mutual withdrawal of their forces from Chad. By the end of the year, all French and Zairian troops were withdrawn. Libya did not honor the withdrawal accord, and its forces continued to occupy the northern third of Chad.

Southern rebel commando groups (CODO) in southern Chad were broken up by government massacres in 1984. In 1985 Habre briefly reconciled with some of his most powerful opponents, including the Chadian Democratic Front and the Coordinating Action Committee of the Democratic Revolutionary Council. Goukouni also began to rally toward Habre, and with his support Habre successfully expelled Libyan forces from most of Chadian territory. A cease-fire between Chad and Libya held from 1987 to 1988, and negotiations over the next several years led to the 1994 International Court of Justice decision granting Chad sovereignty over the Aouzou strip, effectively ending Libyan occupation.

However, rivalry between Hadjerai, Zaghawa, and Gorane groups within the government grew in the late 1980s. In April 1989, Idriss Deby, one of Habre's leading generals and a Zaghawa, defected and fled to Darfur in Sudan, from which he mounted a Zaghawa-supported series of attacks on Habre (a Gorane). In December 1990, with Libyan assistance and no opposition from French troops stationed in Chad, Deby's forces successfully marched on N'Djamena. After 3 months of provisional government, Deby's Patriotic Salvation Movement (MPS) approved a national charter on February 28, 1991, with Deby as president.

In the following 2 years, Deby faced at least two coup attempts. Government forces clashed violently with rebel forces (including the Movement for Democracy and Development, MDD, National Revival Committee for Peace and Democracy (CSNPD), Chadian national Front (FNT), and the Western Armed Forces, FAO) near Lake Chad and in southern regions of the country. Earlier French demands for the country to hold a national conference resulted in the gathering of 750 delegates representing political parties (legalized in 1992), the government, trade unions, and the army to discuss creation of a pluralist democratic regime.

Unrest continued, however, sparked in part by large-scale killings of civilians in southern Chad. The CSNPD, led by Kette Moise and other southern groups, entered into a peace agreement with government forces in 1994, which later broke down. Two new groups, the Armed Forces for a Federal Republic (FARF) led by former Kette ally Laokein Barde and the Democratic Front for Renewal (FDR), and a reformulated MDD clashed with government forces 1994-95.

Talks with political opponents in early 1996 did not go well, but Deby announced his intent to hold presidential elections in June. Deby won the country's first multi-party presidential elections with support in the second round from opposition leader Kebzabo, defeating General Kamougue (leader of the 1975 coup against Tombalbaye). Deby's MPS party won 63 of 125 seats in the January 1997 legislative elections. International observers noted numerous serious irregularities in presidential and legislative election proceedings.

By mid-1997 the government signed peace deals with FARF and the MDD leadership and succeeded in cutting off the groups from their rear bases in the Central African Republic and Cameroon. Agreements also were struck with rebels from the National Front of Chad (FNT) and Movement for Social Justice and Democracy in October 1997. However, peace was short-lived, as FARF rebels clashed with government soldiers, finally surrendering to government forces in May 1998. Barde was killed in the fighting, as were hundreds of other southerners, most civilians.

From 1998 to 2003, Chadian Movement for Justice and Democracy (MDJT) rebels skirmished periodically with government troops in the Tibesti region, resulting in hundreds of civilian, government, and rebel casualties, but little ground won or lost.

Following an accord with the government in 2003, several hundred rebels rejoined the Chadian Army. Armed remnants of the MDJT linger in the Tibesti region, but no active armed opposition has emerged in other parts of Chad.

In May 2001, Deby won a flawed 63% first-round victory in presidential elections after legislative elections were postponed until spring 2002. Six opposition leaders were arrested (twice), and one opposition party activist was killed following the announcement of election results. However, despite claims of government corruption, favoritism of Zaghawas, and security forces abuses, opposition party and labor union calls for general strikes and more active demonstrations against the government were unsuccessful.

In May 2004, the National Assembly voted in favor of an amendment to the Constitution that would allow President Deby to run again. The amendment was approved in a national referendum June 2005 and abolished presidential term limits. In the last 3 years, Deby faced at least three coup attempts. In April 2006, the capital city of N'djamena was attacked by the United Front for Democratic Change—which was led by the Tama ethnic group—coordinating with another Chadian rebel organization from President Deby's Zaghawa ethnic group. The government put down the attacks. On May 3, 2006 Deby was elected to his third presidential term with a substantial majority, according to Chadian election officials. Provisional figures showed Deby receiving 77.6% of the vote. More than 60% of Chad's 5.8 million registered voters cast ballots. Frequent bouts of fighting between rebel groups characterized 2006. On October 26, 2007 a peace agreement was signed by four Chadian rebel groups and the Government of Chad. Hosted by Libyan leader Muammar Gaddafi, the talks took place in the Libyan city of Sirte.

GOVERNMENT AND POLITICAL CONDITIONS

The constitutional basis for the government is the 1996 Constitution. A strong executive branch headed by the president dominates the Chadian political system. Following his December 1990 military overthrow of Hissein Habre, Idriss Deby in the mid-1990s gradually restored basic functions of government and entered into agreements with the World Bank and the International Monetary Fund (IMF) intended to carry out substantial economic reforms, including the Doba Basin oil extraction project. The president has the power to appoint the prime minister and the Council of State (or cabinet), and exercises considerable influence over appointments of judges, generals, provincial officials and heads of Chad's parastatal firms. In cases of grave and immediate threat, the president, in consultation with the National Assembly President and Council of State, may declare a state of emergency. Most of the Deby's key advisers are members of the Zaghawa clan, although some southern and opposition personalities are represented in his government.

According to the 1996 Constitution, National Assembly deputies are elected by universal suffrage for 4-year terms. Parliamentary elections were last held in April 2002, with President Deby's MPS party winning a large majority. The Assembly holds regular sessions twice a year, starting in March and October, and can hold special sessions as necessary and called by the prime minister. Deputies elect a president of the National Assembly every 2 years. Assembly deputies or members of the executive branch may introduce legislation; once passed by the Assembly, the president must take action to either sign or reject the law within 15 days. The National Assembly must approve the prime minister's plan of government and may force the prime minister to resign through a majority vote of no confidence. However, if the National Assembly rejects the executive branch's program twice in one year, the president may disband the Assembly and call for new legislative elections. In practice, the president exercises considerable influence over the National Assembly through the MPS party structure.

Despite the Constitution's guarantee of judicial independence from the executive branch, the president names most key judicial officials. The Supreme Court is made up of a chief justice, named by the president, and 15 councilors chosen by the president and National Assembly; appointments are for life. The Constitutional Council, with nine judges elected to 9-year terms, has the power to review all legislation, treaties and international agreements prior to their adoption. The Constitution recognizes customary and traditional law in locales where it is recognized and to the extent it does not interfere with public order or constitutional guarantees of equality for all citizens.

Principal Government Officials

Last Updated: 11/12/08

Pres.: **Idriss DEBY**
Prime Min.: **Youssof Saleh ABBAS**
Min. of Agriculture: **M'Bailou Naimbaye LOSSIMIAN**
Min. of Civil Service, Labor, & Employment: **Fatime TCHOMBI**
Min. of Commerce & Artisans: **Mahamat Abdoulaye MAHAMAT**
Min. of Communications & Spokesperson for the Govt.: **Mahamat HISSEINE**
Min. of Culture, Youth, & Sports: **Djibert YOUNOUS**
Min. of Defense: **Wadal Abdelkader KAMOUGUE**
Min. of Economy & Urban Planning: **Ousman Matar BREME**
Min. of Environment, Water, & Fisheries: **Khadidja ABDELKHADER**
Min. of Finance & Budget: **Abakar Mallah MOURCHA**
Min. of Foreign Relations: **Moussa FAKI Mahamat**

Min. of Higher Learning, Scientific Research, & Professional Training: **Oumar Idriss AL-FAROUK**
Min. of Infrastructure: **Adoum YOUNOUSMI**
Min. of Interior & Public Security: **Ahmat Mahamat BACHIR**
Min. of Justice: **Jean Bawoyeu ALINGUE**
Min. of Livestock & Animal Husbandry: **Mahamat ALI Abdallah Nasseur**
Min. of Mines & Energy: **Emmanuel NADINGAR**
Min. of National Education: **Abderaman KOKO**
Min. of Petroleum: **Mahamat Nasser HASSANE**
Min. of Postal Service, New Technology, & Communications: **Albert Pahimi PADACKE**
Min. of Public Health: **Avocksouma DJONA**
Min. of Social Action, Solidarity, & Family: **Ngarmbatina Carmel SOU IV**
Min. of Territorial Development: **Hamid Mahamat DAHLOB**
Min. of Tourism Development: **Ahmat Barkai ANIMI**
Min. in Charge of Auditing Govt. Departments: **Mahamat Bechir OKORMI**
Min. in Charge of Decentralization: **Abderaman DJASNABAYE**
Min. in Charge of Human Rights: **Fatime Issa RAMADAN**
Min. & Sec. Gen. of the Govt., in Charge of Relations With the National Assembly: **Kalzeube Payimi DEUBET**
Dep. Sec. Gen. of the Govt., in Charge of Relations With the National Assembly: **Yaya DILLO**
Sec. of State for Agriculture: **Haoua Outman DJAME**
Sec. of State for the Economy & Urban Planning, in Charge of Microfinance & Poverty: **Azziza BAROUD**
Sec. of State for Environment, in Charge of Rural Hydraulics & Livestock: **Tahar SOUGOUDI**
Sec. of State for Finance, in Charge of the Budget: **Oumar Boukar GANA**
Sec. of State for Foreign Relations, Intl. Cooperation, & African Integration: **Djidda Moussa OUTMAN**
Sec. of State for Infrastructure, in Charge of Transport: **Hassan TERAP**
Sec. of State for National Defense, in Charge of War Veterans & Victims: **Hassan Saleh Al Gadam AL-DJINNEDI**
Sec. of State for National Education, in Charge of Basic Education: **Hapsita ALBOUKHARI**
Ambassador to the US: **Mahamoud Adam BECHIR**
Permanent Representative to the UN, New York: **Mahamat Ali ADOUM**

The Republic of Chad maintains an embassy in the United States at 2002 R Street, NW, Washington, DC 20009 (tel: 202-462-4009; fax 202-265-1937).

DEFENSE

Under President Hissein Habre, members of Gourane, Zaghawa, Kanembou, Hadjerai, and Massa ethnic groups dominated the military. Idriss Deby, a member of the minority Zaghawa-related Bidyate clan and a top military commander, revolted and fled to Sudan, taking with him many Zaghawa and Hadjerai soldiers in 1989. The forces that Deby led into N'Djamena on December 1, 1990 to oust President Habre were mainly Zaghawa (including a large number of Sudanese), many of whom were recruited while Deby was in the bush. Deby's coalition also included a small number of Hadjerais and southerners.

Chad's armed forces numbered about 36,000 at the end of the Habre regime but swelled to an estimated 50,000 in the early days of Idriss Deby. With French support, a reorganization of the armed forces was initiated early in 1991 with the goal of reducing the size of the armed forces. An essential element of this effort was to make the ethnic composition of the armed forces reflective of the country as a whole. While the military's size has been reduced to approximately 25,000 soldiers, leadership positions are still dominated by the Zaghawa.

Following Idriss Deby's rise to power, Habre loyalists continued to fight government troops and rob civilians around Lake Chad. In the mid- and late-1990s, a rebellion in the south by the FARF delayed the promised oil development until crushed by government forces. Most recently, the Movement for Democracy and Justice in Tchad (MDJT) launched the most serious threat to Deby's hold on power, but little progress was ever made on either side. In January 2002, the government and the MDJT signed a formal peace accord. Although remnants are still present in the North, active rebellion there has been negligible since late 2003. Long, porous borders continue to render Chad vulnerable to incursions. In March 2004, the Algerian terrorist organization, the Salafist Group for Preaching and Combat (GSPC), strayed into Chadian territory, where they were engaged by Chadian armed forces. Since the 2003 outbreak of the Darfur crisis in Sudan, armed militias have occasionally crossed into Chad, resulting in small-scale skirmishes. In response to such ongoing threats Chad has joined in the Pan Sahel Initiative (PSI), a U.S. Government military-to-military assistance program which helps participant countries counter terrorist operations, border incursions, and trafficking of people, illicit materials, and other goods. Initial PSI training was completed in Chad in July 2004.

ECONOMY

In 2007, Chad's GDP was estimated at approximately $7.095 billion. Oil, cotton, cattle, and gum arabic are Chad's major exports.

The effects on foreign investment of years of civil war are still felt today, as investors who left Chad between 1979-82 have only recently begun to regain confidence in the country's future. The most important economic venture to date is the Doba Basin oil extraction project in southern Chad. The project included unique mechanisms for World Bank, private sector, government, and civil society collaboration to guarantee that future oil revenues would benefit local populations and result in poverty alleviation.

Oil exploitation in the southern Doba region began in June 2000, with U.S.-based Exxon Mobil leading a consortium, with assisted funding from the World Bank, in a $3.7 billion project to export oil via a 1,000-km. buried pipeline through Cameroon to the Gulf of Guinea. Beginning in late 2000, development of Chad's petroleum sector stimulated economic growth by attracting major investment and increased levels of U.S.

trade. Oil revenue began trickling into the country in July 2004. It was hoped that this project would serve as a catalyst for the entire economy by helping to reduce energy costs and attracting additional trade and investment in other sectors. Following the government's decision to amend the oil revenue management law in 2006, the World Bank froze the escrow account that received the country's revenues. Later that year, a memorandum of understanding was signed between the World Bank and the Government of Chad that agreed on a new percentage of oil revenue to be used toward poverty reduction. Unfortunately, due to rebel attacks on N'djamena, Deby issued a "state of emergency" placing oil revenue funds into his direct command. The question remains whether Chad will continue to invest its oil revenues wisely or use the funds for other uses. This pipeline project was officially suspended in September 2008 following World Bank accusations that oil profits were not going toward poverty reduction efforts, as outlined in the initial agreement. Political controversy surrounding elections and a rebellion in northern Chad also dampen Chad's economic prospects somewhat by exposing the weaknesses in Chad's political institutions.

The U.S. Government expressed both concern and disappointment after the Government of Chad on August 26, 2006 ordered Chevron Oil Corporation and Petronas, members of the Exxon Mobil-led and operated oil consortium, to cease operations and leave Chad within 24 hours for alleged non-payment of income taxes.

Chevron and Petronas entered into a tax agreement in 2000 with the government, represented by Petroleum Minister Mahamat Hassan Nasser, when they replaced Elf and Shell as minority members of the consortium. The companies assert that the agreement authorizes them to use a special depreciation schedule allowing greater tax deductions than those afforded consortium partner Exxon Mobil. The Government of Chad, however, claimed that the 2000 tax agreement was illegal, because it was negotiated by officials without proper authority and was not vetted by the National Assembly. The Government of Chad also announced plans to press charges against negotiating officials, and on August 28, 2006 replaced Nasser, as well as Economic Minister Mahamat Ali Hassan and Farming Minister Moucktar Moussa. Chevron and Petronas consider the Government of Chad to have violated its contractual obligations and planned to seek recourse through all diplomatic and legal means. While the U.S. takes no position on the merits of the dispute, it has urged all parties involved to respect any binding contractual commitments.

Despite recent development of the petroleum sector, more than 80% of the work force is involved in agriculture (subsistence farming, herding, and fishing). Like many other developing countries, Chad has a small formal sector and a large, thriving informal sector. Statistics indicate the following distribution as percentage of GDP: Agriculture—21.5% (farming, livestock, fishing); industry—47.8%; and services—30.6%. Chad is highly dependent on foreign assistance. Its principal donors include the European Union, France, and the multilateral lending agencies.

Primary markets for Chadian exports include neighboring Cameroon and Nigeria and France, Germany, and Portugal. Aside from oil, cotton remains a primary export, although exact figures are not available. Rehabilitation of CotonTchad, the major cotton company that suffered from a decline in world cotton prices, has been financed by France, the Netherlands, the European Economic Community (EC), and the International Bank for Reconstruction and Development (IBRD). The parastatal is now being privatized.

The other major export is livestock, herded to neighboring countries. Herdsmen in the Sudanic and Sahelian zones raise cattle, sheep, goats, and, among the non-Muslims, a few pigs. In the Saharan region, only camels and a few hardy goats can survive. Chad also sells smoked and dried fish to its neighbors and exports several million dollars worth of gum arabic to Europe and the United States each year. Other food crops include millet, sorghum, peanuts, rice, sweet potatoes, manioc, cassava, and yams.

After averaging 0.8% in 1999-2000, Chad's real GDP growth was estimated at 8.9% in 2001, and 10% in 2002 and 2003 as the Doba oil project accelerated. Inflation rose from 3.7% in 2000 to 12.4% in 2001, dropped to 5.2% in 2002, and was estimated to level out at 3% in 2004. These fluctuations were due in large part to increasing demand from the Doba project but also to fluctuations in agricultural production. After a disappointing agricultural campaign in 2000, increased production during the 2001-02 timeframe helped reduce inflation in 2002. In 2003, the contraction in investments, the 7% appreciation in the CFA Franc exchange rate, and bumper harvests combined to generate a 1% deflation in place of the projected 4.3% inflation. Chad's economic performance, at least until the onset of oil exports, continued to depend on fluctuations in rainfall and in prices of its principal export commodities, especially cotton.

Since 1995, the Government of Chad has made incremental progress in implementing structural reforms and improving government finances under two successive structural adjustment programs. Most state enterprises have been partially or completely privatized, non-priority public spending has been lessened, and the government has gradually liberalized some key sectors of the economy. Liberalization of the telecommunications, cotton, and energy sectors is expected to proceed over the next several years. Chad reached the enhanced Heavily Indebted Poor Countries (HIPC) initiative completion point in May 2001.

FOREIGN RELATIONS

Chad is officially nonaligned but has close relations with France, the

former colonial power, and other members of the Western community. It receives economic aid from countries of the European Union, the United States, and various international organizations. Libya supplies aid and has an ambassador resident in N'Djamena.

Other resident diplomatic missions in N'Djamena include the embassies of Algeria, Cameroon, Central African Republic, China, Democratic Republic of the Congo, Egypt, France, Germany, Nigeria, Russia, Sovereign Military Order of Malta, South Africa, Sudan, Taiwan, the United States, and the European Economic Community. A number of other countries have nonresident ambassadors. In 1988, Chad recognized the State of Palestine, which maintains a mission in N'Djamena. Chad has not recognized the State of Israel.

Although relations with Libya improved with the advent of the Deby government, strains persist. Chad has been an active champion of regional cooperation through the Central African Economic and Customs Union, the Lake Chad and Niger River Basin Commissions, and the Interstate Commission for the Fight Against the Drought in the Sahel. On February 8, 2006 the Tripoli Agreement, an attempt to end border related disputes between Chad and Sudan, was signed by Deby and Sudanese leader Al-Bashir at a summit hosted by Libyan leader Gaddafi. Following several violent confrontations between Chadian Government troops and rebels in the east, Deby broke off diplomatic ties with Al-Bashir, who he accused of backing Chadian rebels. Due to the gravity of the humanitarian crisis caused by these violent conflicts, the UN authorized the deployment of an EU peacekeeping force of 3,700 on September 25, 2007. On February 2, 2008 rebels infiltrated N'Djamena, surrounding the Presidential Palace, forcing the evacuation of U.S. Embassy personnel, and stalling the arrival of the peacekeeping presence. A cease-fire agreement was tentatively reached on February 5, 2008. On March 12, both sides met in Dakar, Senegal and signed a peace accord agreeing that they would stop backing rebels hostile to each other. Following that agreement, Sudan accused Chad of continuing to back Sudanese rebels and then severed ties with Chad. While relations between the neighboring nations continued to deteriorate, Chad experienced further rebel attacks within its borders in June 2008. On July 18, President Al-Bashir expressed his desire to restore diplomatic ties with Chad. In early August, the Libyan Government helped to broker an agreement between the Governments of Chad and Sudan. In October 2008, representatives from Chad and Sudan met in Tripoli to formally restore diplomatic ties between their nations, and an exchange of ambassadors occurred in mid-November.

Chad belongs to the following international organizations: UN and some of its specialized and related agencies; African Union; Central African Customs and Economic Union (UDEAC); African Financial Community (Franc Zone); Agency for the Francophone Community; African, Caribbean and Pacific Group of States; African Development Bank; Central African States Development Bank; Economic and Monetary Union of Central African (CEMAC); Economic Community of Central African States (CEEAC); Economic Commission for Africa; G-77; International Civil Aviation Organization; International Confederation of Free Trade Unions; International Red Cross and Red Crescent Movement; International Development Association; Islamic Development Bank; International Fund for Agricultural Development; International Finance Corporation; International Federation of the Red Cross and Red Crescent Societies; International Labor Organization; International Monetary Fund; Interpol; International Olympic Committee; International Telecommunication Union; NAM; Organization of the Islamic Conference; Organization for the Prohibition of Chemical Weapons; Universal Postal Union; World Confederation of Labor; World Intellectual Property Organization; World Meteorological Organization; World Tourism Organization; World Trade Organization.

U.S.-CHAD RELATIONS

Relations between the United States and Chad are good. The American embassy in N'Djamena, established at Chadian independence in 1960, was closed from the onset of the heavy fighting in the city in 1980 until the withdrawal of the Libyan forces at the end of 1981. It was reopened in January 1982. The U.S. Agency for International Development (USAID) and the U.S. Information Service (USIS) offices resumed activities in Chad in September 1983.

The United States enjoys cordial relations with the Deby government. Chad has proved a valuable partner in the global war on terror, and in providing shelter to approximately 250,000 refugees of Sudan's Darfur crisis along its eastern border.

Before permanently closing its Chad mission in 1995 because of declining funds and security concerns, USAID's development program in Chad concentrated on the agricultural, health, and infrastructure sectors. It also included projects in road repair and maintenance, maternal and child health, famine early warning systems, and agricultural marketing. A number of American voluntary agencies (notably AFRICARE and VITA) continue to operate in Chad. Peace Corps has traditionally had a large presence in Chad, with volunteers arriving during the postwar period in September 1987, then withdrawing in 1998. Peace Corps operations resumed in September 2003, with a group of 20 new volunteers. The second class of 17 volunteers arrived in September 2004. Both groups focused on teaching English; expansion into other areas was planned for 2005. Currently the Peace Corps presence in Chad is inactive.

TRAVEL

Consular Information Sheet

April 1, 2008

Country Description: Chad is a developing country in north central Africa with one of the lowest per capita incomes in the world. Years of civil and foreign war, drought, and lack of economic growth have severely damaged the country's institutions and its infrastructure. The country continues to experience episodes of political instability, characterized by violent clashes between government and rebel groups primarily in eastern Chad, but also in the capitol, N'Djamena. These clashes pose serious risks to civilians. Facilities for tourism are limited. French and Arabic are the official languages.

Entry Requirements: A valid passport and visa are required. Visitors must check in with the National Police and obtain a registration stamp within 72 hours of arrival. Further entry information may be obtained from the Embassy of the Republic of Chad, 2002 R St. N.W., Washington D.C. 20009, telephone (202) 462-4009. Overseas, inquiries should be made at the nearest Chadian embassy or consulate. Some travelers originating in countries with no Chadian embassy or consulate can arrange for airport entry visas. This process is generally limited to business or official travelers, and arrangements must be made by the traveler's local contact in Chad several days in advance of arrival. The U.S. Embassy is not in a position to assist private U.S. citizens with their visa application for travel to Chad.

Safety and Security: For the latest security information, Americans traveling abroad should regularly monitor the Department's website where the current Travel Warnings and Travel Alerts, including the Worldwide Caution Travel Alert, can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S., or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: Americans and Europeans are perceived to be wealthy and certain precautions should be taken. Travelers are advised not to leave cash or valuables unsecured in their hotel room and not to wear expensive jewelry or show large amounts of cash. Travelers are also advised to dress modestly, not to walk outside after dark, and to lock their car doors. Petty crimes such as purse snatching, pick-pocketing and theft from vehicles do occur, particularly in areas frequented by expatriates. Violent crime is somewhat rare, but does occur. Burglary and vehicle thefts increase during times of political instability. Expatriate residences have been targeted for armed robbery, and some foreigners have been assaulted in the process. Travelers to northern Cameroon should contact the U.S. Embassy's Regional Security Officer in N'Djamena prior to crossing the Chad/Cameroon border because of a high incidence of road attacks there.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

Medical Facilities and Health Information: Medical facilities in Chad are extremely limited. Medicines are in short supply or unavailable, including many over-the-counter preparations sold in the United States. Travelers should carry any needed, properly labeled, medicines with them. In the event of major injury or illness, visitors generally will require medical evacuation.

There are two medical clinics in the capital of N'Djamena that offer "international standard" medical care: International SOS and Europ-Assistance. These are not walk in clinics and advance membership is required to access services (www.internationalsos.com and www.europ-assistance.co.uk). Both clinics were destroyed during the civil unrest in February 2008, and are not presently operating.

Malaria is a serious and sometimes fatal disease. Plasmodium falciparum malaria, the type that predominates in Chad, is resistant to the antimalarial drug chloroquine. Because travelers to Chad are at high risk for contracting malaria, the Centers for Disease Control and Prevention (CDC) advises that travelers should take one of the following antimalarial drugs: mefloquine (Lariam), doxycycline, or atovaquone/proguanil (Malarone).

Travelers who become ill with a fever or flu-like illness while traveling in a malaria-risk area and up to one year after returning home should seek prompt medical attention and tell the physician their travel history and what antimalarials they have been taking.

For additional information on malaria, including protective measures, visit the CDC Travelers' Health web site at http://wwwn.cdc.gov.

Other widespread diseases in Chad include diarrhea and upper respiratory infections. AIDS is becoming an increasingly serious problem as infection rates have risen to alarming levels (up to 25 percent in high-risk groups). Meningitis outbreaks usually occur annually and several other diseases (cholera, diphtheria, chicken pox, typhoid) periodically appear.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's internet site at http://www.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) website at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Chad is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

Roads are in poor condition and dangerous. In the capital city of N'Djamena, only the main roads are paved; the rest of the roads are either hard-packed dirt or looser dirt and sand. During the summer rainy season (mid-June to mid-September) many roads become impassable or are restricted by rain barriers, while during the drier season, clouds of dust rising from the roads reduce visibility.

Visitors should take great care while driving. Both paved and unpaved roads are poorly maintained, and often have large ruts and potholes. All drivers should adjust their speed accordingly. At night, streets are not lit; it is imperative to watch for pedestrians, bicyclists, motorcyclists, and livestock, as they may not become visible until they are in very close proximity.

Driving in Chad tends to be erratic both in cities and in rural areas. In cities, particularly N'Djamena, motorists share the roads with bicycles, motor scooters, pedestrians, and non-motorized wheelchairs. Lanes are not marked, and it is not uncommon for a normally two-lane thoroughfare to become a four-lane road during rush hours (generally 7:00 a.m.-9:00 a.m. and 3:00 p.m.-6:00 p.m. Monday-Thursday; 7:00 a.m.-9:00 a.m. and 11:00 a.m.-12:30 p.m. on Friday). Drivers are urged to be particularly observant at these times because motorists often attempt to overtake slower traffic by moving into oncoming lanes, usually at high speeds.There are only a few traffic lights in N'Djamena, and these are often out of service. Drivers yield to traffic on their right, particularly when entering the many traffic circles.

In rural areas, drivers should watch for livestock crossing the roads, and for large hawks that rest on the roads. These birds can be fearless, and cause damage by smashing into drivers' windshields; drivers may avoid this by slowing down when approaching the hawks, and allowing them sufficient time to fly away. Finally, drivers should be alert to older transport trucks traveling between cities, which do not always have functioning headlights.

No emergency services exist, so drivers should exercise extreme caution. Travelers should always wear seat belts. When traveling by car, be sure to carry a spare tire. Roadside service is limited to good Samaritans and children who will help push cars to the side or out of holes. When traveling outside the capital, it is imperative to carry sufficient quantities of drinking water. Drivers should ensure that their gas tanks are at least half-full at all times, as gas stations are not widely available. Gas may be purchased in an emergency in bottles from roadside stands, but it is generally of poor quality. Travelers on roads in all areas of the country are subject to attack by armed bandits.

Aviation Safety Oversight: As there is no direct commercial air service between the United States and Chad, the U.S. Federal Aviation Administration (FAA) has not assessed Chad's Civil Aviation Authority for compliance with International Civil Aviation Organization (ICAO) aviation safety standards. For more information, travelers may visit the FAA's internet website at http://www.faa.gov.

Special Circumstances: All photography requires a government permit. Taking photos of military sites, official buildings, and airports is strictly prohibited, even with a permit. Such sites are not always clearly marked. Film and cameras may be confiscated, often by undercover police.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating Chadian laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Chad are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: Embassy N'Djamena does not issue immigrant visas. Therefore, American citizens who adopt children in Chad are required to travel to the U.S. Embassy in Yaounde, Cameroon, or another Embassy for visa processing before return to the United States. For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in Chad are encouraged to register with the U.S. Embassy in Chad through the State Department's travel registration website, Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate. By registering, American citizens make it easier for the Embassy to contact them in case of emergency. The U.S. Embassy in Chad is located in N'Djamena on Avenue Felix Eboue; mailing address is B.P. 413; telephone (235) 51-62-11, 51-70-09, 51-77-59, 51-90-52, 51-92-18 and 51-92-33, fax (235) 51-56-54.

Travel Warning

November 14, 2008

The Department of State warns U.S. citizens of the risks of traveling to Chad and recommends that American citizens not affiliated with humanitarian relief efforts avoid all travel to eastern Chad and the Chad/Central African Republic border area due to insecurity caused by banditry and clashes between Government and rebel forces. American citizens residing in Chad should exercise extreme caution throughout the country. This replaces the Travel Warning for Chad dated June 23, 2008 to note the possibility of increased rebel activity.

Armed rebel groups are active in the region and present real dangers. Rebel activity tends to increase during the dry season, which lasts from late September to July. The security situation in general remains fluid and potentially dangerous. The Chadian government is unable to guarantee the safety of visitors in most parts of the country. If rebels approach the capital, N'djamena, the U.S. Embassy may on short notice decide to evacuate non-emergency personnel and family members of Embassy personnel to Cameroon, as was done in June 2008. Family members of Embassy personnel under the age of 21 are not authorized to reside in Chad. Commercial flights continue to operate from N'Djamena International Airport, but flights are subject to change when rebel activity intensifies.

Limited American citizen services are available at the Embassy, but visa services remain suspended until further notice - see contact information below. The U.S. Embassy is not able to support evacuation from eastern Chad. All Americans affiliated with humanitarian relief efforts in eastern Chad must have an evacuation plan developed with the UN which has aircraft and other logistical support. The Embassy strongly recommends that all U.S. citizens in Chad be prepared to implement their personal evacuation or safe haven plans on short notice should the situation warrant, and exercise extreme caution. Americans in Chad should closely monitor news media and the U.S. Embassy's website at http://ndjamena.usembassy.gov.

U.S. citizens affiliated with humanitarian relief efforts in eastern Chad are strongly urged to coordinate travel plans with UN High Commissioner for Refugees (UNHCR) security officers in Abeche and N'Djamena, and to follow UNHCR guidance regarding safety and security. The government of Chad requires all individuals traveling to or residing in refugee-affected areas in eastern Chad to obtain permits issued by the Ministry of Territorial Administration in N'Djamena, and to register in Abeche upon arrival in eastern Chad. American citizens who intend to enter Sudan from Chad despite the Department's Travel Warnings for both countries must obtain the appropriate visas and permits in advance of entry into Sudan. Further information is available in the Department's Travel Warning for Sudan at http://travel.state.gov/travel/cis_pa_tw/tw/tw_934.html.

American citizens traveling to or resident in Chad should register with the U.S. Embassy by completing a registration form online at https://travelregistration.state.gov and provide contact information and specific travel data if traveling outside the capital. Registration enables the Embassy to contact American citizens in case of emergency and provide updates on the security situation. The U.S. Embassy is located in N'Djamena on Avenue Felix Ebou; mailing address B.P. 413, telephone (including after hours): (235) 251-70-09; alternate numbers 251-62-11, 251-90-52, 251-92-33, 251-77-59, 251-92-18; fax (235) 251-56-54; website: http://ndjamena.usembassy.gov.

For additional information, consult the Department of State's latest Country Specific Information for Chad at http://travel.state.gov/travel/cis_pa_tw/cis/cis_1086.html and the Worldwide Caution at http://travel.state.gov, or call 1-888-407-4747 toll free in the United States and Canada, or 1-202-501-4444 from overseas.

CHILE

Compiled from the July 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Republic of Chile

PROFILE

Geography

Area: 756,945 sq. km. (302,778 sq. mi.); nearly twice the size of California.

Cities: Capital—Santiago (metropolitan area est. 6 million). Other cities—Concepcion-Talcahuano (840,000), Vina del Mar-Valparaiso (800,000), Antofagasta (245,000), Temuco (230,000).

Terrain: Desert in north; fertile central valley; volcanoes and lakes toward the south, giving way to rugged and complex coastline; Andes Mountains on the eastern border.

Climate: Arid in north, Mediterranean in the central portion, cool and damp in south.

People

Nationality: Noun and adjective—Chilean(s).

Population: (2007) 16.5 million.

Annual population growth rate: 1.0%.

Ethnic groups: Spanish-Native-American (mestizo), European, Native-American.

Religions: Roman Catholic 89%; Protestant 11%.

Languages: Spanish.

Education: Years compulsory—12. Attendance—3 million. Adult literacy rate—96%.

Health: Infant mortality rate—8.9/1,000. Life expectancy—76 yrs.

Work force: (6.94 million); employed 6.4 million: Community, social and individual services—26%; industry—14.4%; commerce—17.6%; agriculture, forestry, and fishing—13.9%; construction—7.1%; financial services—7.5%; transportation and communication—8.0%; electricity, gas and water—0.5%; mining—1.2%.

Government

Type: Republic.

Independence: September 18, 1810.

Constitution: Promulgated September 11, 1980; effective March 11, 1981; amended in 1989, 1993, 1997, and 2005.

Government branches: Executive—president. Legislative—bicameral legislature. Judicial—Constitutional Tribunal, Supreme Court, court of appeals, military courts.

Political subdivisions: 12 numbered regions plus two new functioning regions—Arica and Los Rios—that are not numbered, as well as the Santiago metropolitan region, administered by appointed "intendentes." Regions are divided into provinces, administered by appointed governors; provinces are divided into municipalities administered by elected mayors.

Political parties: Major parties are grouped into two large coalitions: 1) the center-left "Concertacion," which includes the Christian Democrat Party, the Socialist Party, the Party for Democracy, and the Radical Social Democratic Party; and 2) the center-right "Alliance for Chile," which includes the National Renewal Party and the Independent Democratic Union. The Communist Party joined the Humanistic Party and a number of smaller parties to form the "Together We Can" coalition in 2004, but none of these leftist parties have recently elected congressional representatives. A new center-left party, "Chile-First," was established in October 2007.

Suffrage: Universal at 18, including foreigners legally resident for more than 5 years.

Economy (2007)

GDP: (official exchange rate) $162.5 billion.

Annual real growth rate: 5.2%.

Per capita GDP: (PPP) $13,900.

Forestry, agriculture, and fisheries: (6% of GDP) Products—wheat, potatoes, corn, sugar beets, onions, beans, fruits, livestock, fish.

Commerce: (8% of GDP) Sales, restaurants, hotels.

Manufacturing: (17% of GDP) Types—mineral refining, metal manufacturing, food processing, fish pro-

cessing, paper and wood products, finished textiles.
Electricity, gas, and water: 3% of GDP.
Transportation and communication: 7% of GDP.
Construction: 8% of GDP.
Financial services: (12% of GDP) Insurance, leasing, consulting.
Mining: (13% of GDP) Copper, iron ore, nitrates, precious metals, and molybdenum.
Trade: Exports—$66.6 billion: copper, fishmeal, fruits, wood products, paper products, fish, wine. Major markets—U.S., Japan, China, Netherlands, South Korea, Brazil, Italy, Mexico. Imports—$46.2 billion: consumer goods, chemicals, motor vehicles, fuels, electrical machinery, heavy industrial machinery, food. Major suppliers—EU, Argentina, U.S., Brazil, China, South Korea.

GEOGRAPHY

The northern Chilean desert contains great mineral wealth, principally copper. The relatively small central area dominates the country in terms of population and agricultural resources. This area also is the cultural and political center from which Chile expanded in the late 19th century, when it incorporated its northern and southern regions. Southern Chile is rich in forests and grazing lands and features a string of volcanoes and lakes. The southern coast is a labyrinth of fjords, inlets, canals, twisting peninsulas, and islands. The Andes Mountains are located on the eastern border.

PEOPLE

About 85% of Chile's population lives in urban areas, with 40% living in greater Santiago. Most have Spanish ancestry. A small, yet influential number of Irish and English immigrants came to Chile during the colonial period. German immigration began in 1848 and lasted for 90 years; the southern provinces of Valdivia, Llanquihue, and Osorno show a strong German influence. Other significant immigrant groups are Italian, Croatian, Basque, and Palestinian. About 800,000 Native Americans, mostly of the Mapuche tribe, reside in the south-central area. The Aymara and Diaguita groups can be found mainly in Chile's northern desert valleys.

HISTORY

About 10,000 years ago, migrating Indians settled in fertile valleys and along the coast of what is now Chile. The Incas briefly extended their empire into what is now northern Chile, but the area's barrenness prevented extensive settlement. The first Europeans to arrive in Chile were Diego de Almagro and his band of Spanish conquistadors, who came from Peru seeking gold in 1535. The Spanish encountered hundreds of thousands of Indians from various cultures in the area that modern Chile now occupies. These cultures supported themselves principally through slash-and-burn agriculture and hunting. The conquest of Chile began in earnest in 1540 and was carried out by Pedro de Valdivia, one of Francisco Pizarro's lieutenants, who founded the city of Santiago on February 12, 1541. Although the Spanish did not find the extensive gold and silver they sought, they recognized the agricultural potential of Chile's central valley, and Chile became part of the Viceroyalty of Peru.

The drive for independence from Spain was precipitated by usurpation of the Spanish throne by Napoleon's brother Joseph in 1808. A national junta in the name of Ferdinand—heir to the deposed king—was formed on September 18, 1810. The junta proclaimed Chile an autonomous republic within the Spanish monarchy. A movement for total independence soon won a wide following. Spanish attempts to reimpose arbitrary rule during what was called the "Reconquista" led to a prolonged struggle.

Intermittent warfare continued until 1817, when an army led by Bernardo O'Higgins, Chile's most renowned patriot, and José San Martín, hero of Argentine independence, crossed the Andes into Chile and defeated the royalists. On February 12, 1818, Chile was proclaimed an independent republic under O'Higgins' leadership. The political revolt brought little social change, however, and 19th century Chilean society preserved the essence of the stratified colonial social structure, which was greatly influenced by family politics and the Roman Catholic Church. A strong presidency eventually emerged, but wealthy landowners remained extremely powerful. Toward the end of the 19th century, the government in Santiago consolidated its position in the south by ruthlessly suppressing the Mapuche Indians. In 1881, it signed a treaty with Argentina confirming Chilean sovereignty over the Strait of Magellan. As a result of the War of the Pacific with Peru and Bolivia (1879-83), Chile expanded its territory northward by almost one-third and acquired valuable nitrate deposits, the exploitation of which led to an era of national affluence. Chile established a parliamentary democracy in the late 19th century, but degenerated into a system protecting the interests of the ruling oligarchy. By the 1920s, the emerging middle and working classes were powerful enough to elect a reformist president, whose program was frustrated by a conservative congress. In the 1920s, Marxist groups with strong popular support arose.

Continuing political and economic instability resulted with the rule of the quasidictatorial Gen. Carlos Ibanez (1924-32). When constitutional rule was restored in 1932, a strong middle-class party, the Radicals, emerged. It became the key force in coalition governments for the next 20 years. During the period of Radical Party dominance (1932-52), the state increased its role in the economy.

The 1964 presidential election of Christian Democrat Eduardo Frei-Montalva by an absolute majority initiated a period of major reform. Under the slogan "Revolution in Liberty," the Frei administration embarked on far-reaching social and economic programs, particularly in education, housing, and agrarian reform, including rural unionization

of agricultural workers. By 1967, however, Frei encountered increasing opposition from leftists, who charged that his reforms were inadequate, and from conservatives, who found them excessive. At the end of his term, Frei had accomplished many noteworthy objectives, but he had not fully achieved his party's ambitious goals. In 1970, Senator Salvador Allende, a Marxist and member of Chile's Socialist Party, who headed the "Popular Unity" (UP) coalition of socialists, communists, radicals, and dissident Christian Democrats, won a plurality of votes in a three-way contest and was named President by the Chilean Congress. His program included the nationalization of private industries and banks, massive land expropriation, and collectivization. Allende's program also included the nationalization of U.S. interests in Chile's major copper mines.

Elected with only 36% of the vote and by a plurality of only 36,000 votes, Allende never enjoyed majority support in the Chilean Congress or broad popular support. Domestic production declined; severe shortages of consumer goods, food, and manufactured products were widespread; and inflation reached 1,000% per annum. Mass demonstrations, recurring strikes, violence by both government supporters and opponents, and widespread rural unrest ensued in response to the general deterioration of the economy. By 1973, Chilean society had split into two hostile camps.

A military coup overthrew Allende on September 11, 1973. As the armed forces bombarded the presidential palace, Allende reportedly committed suicide. A military government, led by General Augusto Pinochet, took over control of the country. The first years of the regime in particular were marked by serious human rights violations. A new Constitution was approved by a plebiscite on September 11, 1980, and General Pinochet became President of the Republic for an 8-year term. In its later years, the regime gradually permitted greater freedom of assembly, speech, and association, to include trade union activity. In contrast to its authoritarian political rule, the military government pursued decidedly laissez-faire economic policies. During its 16 years in power, Chile moved away from economic statism toward a largely free market economy that fostered an increase in domestic and foreign private investment. In a plebiscite on October 5, 1988, General Pinochet was denied a second 8-year term as

president. Chileans voted for elections to choose a new president and the majority of members of a two-chamber congress. On December 14, 1989, Christian Democrat Patricio Aylwin, the candidate of a coalition of 17 political parties called the Concertacion, was elected president. Aylwin served from 1990 to 1994 and was succeeded by another Christian Democrat, Eduardo Frei Ruiz-Tagle (son of the previous President), leading the same coalition, for a 6-year term. Ricardo Lagos Escobar of the Socialist Party and the Party for Democracy led the Concertacion to a narrower victory in 2000 presidential elections. His term ended on March 11, 2006, when President Michelle Bachelet Jeria, of the Socialist Party, took office.

GOVERNMENT AND POLITICAL CONDITIONS

Chile's Constitution was approved in a September 1980 national plebiscite. It entered into force in March 1981. After Pinochet's defeat in the 1988 plebiscite, the Constitution was amended to ease provisions for future amendments to the Constitution. In September 2005, President Ricardo Lagos signed into law several constitutional amendments passed by Congress. These include eliminating the positions of appointed senators and senators for life, granting the President authority to remove the commanders-in-chief of the armed forces, and reducing the presidential term from six to four years.

Presidential and congressional elections were held December 2005 and January 2006. In the first round of presidential elections, none of the four presidential candidates won more than 50% of the vote. As a result, the top two vote-getters—center-left Concertacion coalition's Michelle Bachelet and center-right Alianza coalition's Sebastian Pinera—competed in a run-off election on January 15, 2006, which Michelle Bachelet won. This was Chile's fourth presidential election since the end of the Pinochet era. All four have been judged free and fair. The President is constitutionally barred from serving consecutive terms. President Bachelet and the new members of Congress took office on March 11, 2006.

Chile has a bicameral Congress, which meets in the port city of Valparaiso, about 140 kilometers (84 mi.) west of the capital, Santiago. Deputies are elected every 4 years, and Senators serve 8-year terms. Chile's congressional elections are governed by a unique binomial system that rewards coalition slates. Each coalition can run two candidates for the two Senate and two Deputy seats apportioned to each electoral district. Historically, the two largest coalitions (Concertacion and Alianza) split most of the seats in a district. Only if the leading coalition ticket out-polls the second-place coalition by a margin of more than 2-to-1 does the winning coalition gain both seats.

In the December 11, 2005 congressional elections, the Concertacion coalition won a majority in both the Senate and the Chamber of Deputies. In the 38-member Senate, the Concertacion coalition holds 19 seats and the Alianza opposition holds 17. There are two independents. In the 120-member Chamber of Deputies, the Concertacion coalitions holds 62 seats and the Alianza holds 53. There are five independents.

Chile's judiciary is independent and includes a court of appeal, a system of military courts, a constitutional tribunal, and the Supreme Court. In June 2005, Chile completed a nationwide overhaul of its criminal justice system. The reform has replaced inquisitorial proceedings with an adversarial system more similar to that of the United States.

Principal Government Officials

DEFENSE

Chile's Armed Forces are subject to civilian control exercised by the President through the Minister of Defense. The President has the authority to remove the commanders-in-chief of the armed forces.

Army

The commander in chief of the Chilean Army is General Oscar Izurieta Ferrer. The Chilean Army is 45,000 strong and is organized with an Army headquarters in Santiago, seven divisions throughout its territory, an Air

Brigade in Rancagua, and a Special Forces Command in Colina. The Chilean Army is one of the most professional and technologically advanced armies in Latin America.

Navy

Admiral Rodolfo Codina directs the 23,000-person Navy, including 2,500 Marines. Of the fleet of 29 surface vessels, only eight are operational major combatants (frigates). Those ships are based in Valparaiso. The Navy operates its own aircraft for transport and patrol; there are no Navy fighter or bomber aircraft. The Navy also operates four submarines based in Talcahuano.

Air Force (FACH)

Gen. Ricardo Ortega Perrier heads a force of 12,500. Air assets are distributed among five air brigades headquartered in Iquique, Antofagasta, Santiago, Puerto Montt, and Punta Arenas. The Air Force also operates an airbase on King George Island, Antarctica. The FACH took delivery of the final 2 of 10 F-16s, all purchased from the U.S., in March 2007. Chile also took delivery in 2007 of a number of reconditioned Block 15 F-16s from the Netherlands, bringing to 18 the total of F-16s purchased from the Dutch.

Carabineros

After the military coup in September 1973, the Chilean national police (Carabineros) were incorporated into the Defense Ministry. With the return of democratic government, the police were placed under the operational control of the Interior Ministry but remained under the nominal control of the Defense Ministry. Gen. Jose Bernales is the head of the national police force of 30,000 men and women who are responsible for law enforcement, traffic management, narcotics suppression, border control, and counter-terrorism throughout Chile.

ECONOMY

After a decade of impressive growth rates, Chile began to experience a moderate economic downturn in 1999, brought on by unfavorable global economic conditions related to the Asian financial crisis, which began in 1997. The economy remained sluggish until 2003, when it began to show clear signs of recovery, achieving 3.3% real GDP growth. The Chilean economy finished 2004 with growth of 6.1%. Real GDP growth reached 6.3% in 2005, decreased to 4.0% in 2006, and rose once again to 5.2% in 2007. Higher energy prices as well as lagging consumer demand were drags on the economy in 2006. Higher Chilean Government spending and favorable external conditions (including record copper prices for much of 2006) were not enough to offset these drags. The year 2007 saw Chile recuperating from sluggish economic growth in 2006.

Chile has pursued generally sound economic policies for nearly three decades. The 1973-90 military government sold many state-owned companies, and the three democratic governments since 1990 have continued privatization, though at a slower pace. The government's role in the economy is mostly limited to regulation, although the state continues to operate copper giant CODELCO and a few other enterprises (there is one state-run bank). Chile is strongly committed to free trade and has welcomed large amounts of foreign investment. Chile has signed free trade agreements (FTAs) with a whole network of countries, including an FTA with the United States, which was signed in 2003 and implemented in January 2004. Over the last several years, Chile has signed FTAs with the European Union, South Korea, New Zealand, Singapore, Brunei, China, and Japan. It reached a partial trade agreement with India in 2005 and began negotiations for a full-fledged FTA with India in 2006. Chile conducted trade negotiations in 2007 with Australia, Malaysia, and Thailand, as well as with China to expand an existing agreement beyond just trade in goods. Chile hopes to conclude FTA negotiations with Australia and the expanded agreement with China in 2008. Negotiations with Malaysia and Thailand are scheduled to continue throughout 2008. The members of the P4 (Chile, Singapore, New Zealand, and Brunei) also plan to conclude a chapter on finance and investment in 2008.

High domestic savings and investment rates helped propel Chile's economy to average growth rates of 8% during the 1990s. The privatized national pension system (AFP) has encouraged domestic investment and contributed to an estimated total domestic savings rate of approximately 21% of GDP. However, the AFP is not without its critics, who cite low participation rates (only 55% of the working population is covered), with groups such as the self-employed outside the system. There has also been criticism of the inefficiency and high costs due to a lack of competition among pension funds. Critics cite loopholes in the use of pension savings through lump sum withdraws for the purchase of a second home or payment of university fees as fundamental weaknesses of the AFP. The Bachelet administration plans substantial reform, but not an overhaul, of the AFP during the next several years.

Unemployment stubbornly hovered in the 8%-10% range after the start of the economic slowdown in 1999, well above the 5%-6% average for the 1990s. Unemployment finally dipped to 7.8% at the end of 2007, due largely to the fact that fewer Chileans were entering the workforce rather than to a substantial and sustained creation of new jobs. The decrease in unemployment can also be attributed to a limited increase in jobs caused by foreign direct investment. Most international observers place some of the blame for Chile's consistently high unemployment rate on complicated and restrictive labor laws. Wages have risen faster than inflation as a result of higher productivity, boosting national living standards. The percentage of Chileans with incomes below the poverty line—defined as twice the cost of satisfying a family of

four's minimal nutritional needs—fell from 46% in 1987 to around 18.2% by 2005.

Chile's independent Central Bank pursues an inflation target of between 2% and 4%. However, within the year 2007, inflation inched towards 8%—the first time inflation has exceeded 5% since 1998. The Chilean peso's rapid appreciation against the U.S. dollar in recent years has helped dampen inflation. Most wage settlements and loans are indexed, reducing inflation's volatility. Under the compulsory private pension system, most formal sector employees pay 10% of their salaries into privately managed funds.

Total foreign direct investment (FDI) was only $3.4 billion in 2006, up 52% from a poor performance in 2005. However, 80% of FDI continues to go to only four sectors: electricity, gas, water and mining. Much of the jump in FDI in 2006 was also the result of acquisitions and mergers and has done little to create new employment in Chile. The Chilean Government has formed a Council on Innovation and Competition, which is tasked with identifying new sectors and industries to promote. It is hoped that this, combined with some tax reforms to encourage domestic and foreign investment in research and development, will bring in additional FDI and to new parts of the economy. As of 2006, Chile invested only 0.6% of its annual GDP in research and development (R&D). Even then, two-thirds of that was government spending. The fact that domestic and foreign companies spend almost nothing on R&D does not bode well for the Government of Chile's efforts to develop innovative, knowledge-based sectors. Additionally, on January 8, 2007, Chile was placed on the U.S. Trade Representative's Priority Watch List due to its poor record on protecting intellectual property rights. Chile is only the second U.S. FTA partner ever to be placed on the Priority Watch List. Chile has a poor and deteriorating record of protecting copyrighted music, films, and software. Combined with this is its institutional structure allowing local companies to produce and market pharmaceutical generics that violate existing patents. Beyond its general economic and political stability, the government also has encouraged the use of Chile as an "investment platform" for multinational corporations planning to operate in the region, but this will have limited value given the developing business climate in Chile itself. Chile's approach to foreign direct investment is codified in the country's Foreign Investment Law, which gives foreign investors the same treatment as Chileans. Registration is simple and transparent, and foreign investors are guaranteed access to the official foreign exchange market to repatriate their profits and capital. While Chile and the EU have signed a double taxation treaty, no such agreement exists between the U.S. and Chile.

Foreign Trade

2006 was a record year for Chilean trade. Total trade registered a 31% increase over 2005. During 2006, exports of goods and services totaled U.S. $58 billion, an increase of 41%. This figure was somewhat distorted by the skyrocketing price of copper. In 2006, copper exports reached a historical high of U.S. $33.3 billion. Imports totaled U.S. $35 billion, an increase of 17% compared to the previous year. Chile thus recorded a positive trade balance of U.S. $23 billion in 2006.

The main destinations for Chilean exports were the Americas (U.S. $39 billion), Asia (U.S. $27.8 billion) and Europe (U.S. $22.2 billion). Seen as shares of Chile's export markets, 42% of exports went to the Americas, 30% to Asia and 24% to Europe. Within Chile's diversified network of trade relationships, its most important partner remained the United States. Total trade with the U.S. was U.S. $15.7 billion in 2007 as compared to U.S. $14.8 billion in 2006. Since the U.S.-Chile Free Trade Agreement went into effect on January 1, 2004, U.S.-Chilean trade has increased by 154%. Internal Government of Chile figures show that even when factoring out inflation and the recent high price of copper, bilateral trade between the U.S. and Chile has grown over 60% since then. Total trade with Europe also grew in 2006, expanding by 42%. The Netherlands and Italy were Chile's main European trading partners. Total trade with Asia also grew significantly at nearly 31%. Trade with Korea and Japan grew significantly, but China remained Chile's most important trading partner in Asia. Chile's total trade with China reached U.S. $8.8 billion in 2006, representing nearly 66% of the value of its trade relationship with Asia.

The growth of exports in 2006 was due mainly to a strong increase in sales to the United States, the Netherlands, and Japan. These three markets alone accounted for an additional U.S. $5.5 billion worth of Chilean exports. In 2007, Chilean exports to the United States totaled U.S. $8.4 billion, representing a 10% decrease compared to 2006 (U.S. $9.3 billion). Within the same year, exports to China were U.S. $9.9 billion. Exports to Japan and South Korea reached U.S. $7.1 billion and U.S. $3.8 billion respectively.

During 2006, Chile imported U.S. $26 billion from the Americas, representing 54% of total imports, followed by Asia at 22%, and Europe at 16%. Mercosur members were the main suppliers of imports to Chile at U.S. $9.1 billion, followed by the United States with U.S. $5.5 billion and the European Union with U.S. $5.2 billion. From Asia, China was the most important exporter to Chile, with goods valued at U.S. $3.6 billion. Year-on-year growth in imports was especially strong from a number of countries—Ecuador (123.9%), Thailand (72.1%), Korea (52.6%), and China (36.9%).

Chile's overall trade profile has traditionally been dependent upon copper exports. The state-owned firm CODELCO is the world's largest copper-producing company, with recorded copper reserves of 200 years. Chile has made an effort to expand nontraditional exports. The most important non-mineral exports are forestry and wood products, fresh fruit and processed food, fishmeal and seafood, and wine.

Successive Chilean governments have actively pursued trade-liberalizing agreements. During the 1990s, Chile signed FTAs with Canada, Mexico, and Central America. Chile also concluded preferential trade agreements with Venezuela, Colombia, and Ecuador. An association agreement with Mercosur—Argentina, Brazil, Paraguay, and Uruguay—went into effect in October 1996. Continuing its export-oriented development strategy, Chile completed landmark free trade agreements in 2002 with the European Union and South Korea. Chile, as a member of the Asia-Pacific Economic Cooperation (APEC) organization, is seeking to boost commercial ties to Asian markets. To that end, it has signed trade agreements in recent years with New Zealand, Singapore, Brunei, India, China, and most recently Japan. In 2007, Chile held trade negotiations with Australia, Thailand, Malaysia, and China. In 2008, Chile hopes to conclude an FTA with Australia, and finalize an expanded agreement (covering trade in services and investment) with China. The P4 (Chile, Singapore, New Zealand, and Brunei) also plan to expand ties through adding a finance and investment chapter to the existing P4 agreement. Chile's trade talks with Malaysia and Thailand are also scheduled to continue in 2008.

After two years of negotiations, the United States and Chile signed an agreement in June 2003 that will lead to completely duty-free bilateral trade within 12 years. The U.S.-Chile FTA entered into force January 1, 2004 following approval by the U.S. and Chilean congresses. The bilateral FTA has inaugurated greatly expanded U.S.-Chilean trade ties, with total bilateral trade jumping by 154% during the FTA's first three years.

Chile unilaterally lowered its across-the-board import tariff for all countries with which it does not have a trade agreement to 6% in 2003. Higher effective tariffs are charged only on imports of wheat, wheat flour, and sugar as a result of a system of import price bands. The price bands were ruled inconsistent with Chile's World Trade Organization (WTO) obligations in 2002, and the government has introduced legislation to modify them. Under the terms of the U.S.-Chile FTA, the price bands will be completely phased out for U.S. imports of wheat, wheat flour, and sugar within 12 years.

Chile is a strong proponent of pressing ahead on negotiations for a Free Trade Area of the Americas (FTAA) and is active in the WTO's Doha round of negotiations, principally through its membership in the G-20 and Cairns Group.

Finance

Chile's financial sector has grown quickly in recent years, with a banking reform law approved in 1997 that broadened the scope of permissible foreign activity for Chilean banks. The Chilean Government implemented a further liberalization of capital markets in 2001, and there is further pending legislation proposing further liberalization. Over the last ten years, Chileans have enjoyed the introduction of new financial tools such as home equity loans, currency futures and options, factoring, leasing, and debit cards.

The introduction of these new products has also been accompanied by an increased use of traditional instruments such as loans and credit cards. Chile's private pension system, with assets worth roughly $70 billion at the end of 2006, has been an important source of investment capital for the capital market. Chile maintains one of the best credit ratings (S&P A+) in Latin America.

There are three main ways for Chilean firms to raise funds abroad: bank loans, issuance of bonds, and the selling of stocks on U.S. markets through American Depository Receipts (ADRs). Nearly all of the funds raised through these means go to finance domestic Chilean investment. The government is required by law to run a fiscal surplus of at least 1% of GDP. In 2006, the Government of Chile ran a surplus of $11.3 billion, equal to almost 8% of GDP. The Government of Chile continues to pay down its foreign debt, with public debt only 2.25% of GDP at the end of 2007.

FOREIGN RELATIONS

Since its return to democracy in 1990, Chile has been an active participant in the international political arena. Chile completed a 2-year non-permanent position on the UN Security Council in January 2005. Jose Miguel Insulza, a Chilean national, was elected Secretary General of the Organization of American States in May 2005. Chile is currently serving on the International Atomic Energy Agency (IAEA) Board of Governors, and the 2007-2008 chair of the board is Chile's ambassador to the IAEA, Milenko E. Skoknic. The country is an active member of the UN family of agencies and participates in UN peacekeeping activities. It is currently bidding for a seat on the UN Human Rights Council. Chile hosted the Defense Ministerial of the Americas in 2002 and the APEC summit and related meetings in 2004. It also hosted the Community of Democracies ministerial in April 2005 and the Ibero-American Summit in November 2007. An associate member of Mercosur and a full member of APEC, Chile has been an important actor on international economic issues and hemispheric free trade.

The Chilean Government has diplomatic relations with most countries. It settled its territorial disputes with Argentina during the 1990s. Chile and Bolivia severed diplomatic ties in 1978 over Bolivia's desire to reacquire territory it lost to Chile in 1879-83 War of the Pacific. The two countries maintain consular relations and are represented at the Consul General level.

U.S.-CHILEAN RELATIONS

Relations between the United States and Chile are better now than at any other time in history. The U.S. Government applauded the rebirth of

democratic practices in Chile in the late 1980s and early 1990s and sees the maintenance of a vibrant democracy and a healthy and sustainable economy as among the most important U.S. interests in Chile. Besides the landmark 2003 U.S.-Chile FTA, the two governments consult frequently on issues of mutual concern, including in the areas of multilateral diplomacy, security, culture, and science.

U.S. Embassy Functions

In addition to working closely with Chilean Government officials to strengthen our bilateral relationship, the U.S. Embassy in Santiago provides a wide range of services to U.S. citizens and businesses in Chile. (Please see the embassy's home page for details of these services.) The Embassy also is the locus for a number of American community activities in the Santiago area.

The Public Affairs Section cooperates with universities and non-governmental organizations (NGOs) on a variety of programs of bilateral interest. Of special note are extensive U.S. Speaker, International Visitor, and Fulbright programs. Themes of particular interest include trade, international security, democratic governance in the region, judicial reform, law enforcement, environmental issues, and the teaching of English. The Public Affairs Section works daily with Chilean media, which has a keen interest in bilateral and regional relations. It also assists visiting foreign media, including U.S. journalists, and is regularly involved in press events for high-level visitors. Attachés at the Embassy from the Foreign Commercial Service, Foreign Agricultural Service, and the Animal and Plant Health Inspection Service (APHIS) work closely with the hundreds of U.S. companies who export to or maintain offices in Chile. These officers provide information on Chilean trade and industry regulations and administer several programs intended to support U.S. companies' sales in Chile.

The Consular Section of the Embassy provides vital services to the more than 12,000 U.S. citizens residing in Chile. It assists Americans who wish to vote in U.S. elections while abroad, provides U.S. tax information, and facilitates government benefits/social security payments. Besides those U.S. citizens resident in Chile, about 170,000 U.S. citizens visit Chile annually. The Consular Section offers passport and emergency services to U.S. tourists during their stay in Chile. It also issues about 40,000 visitor visas annually to Chilean citizens who plan to travel to the United States.

TRAVEL

Consular Information Sheet

August 20, 2008

Country Description: Chile is a rapidly developing country with a large, educated middle class and a robust free-market economy. Tourist facilities are generally good and are continuously improving.

Entry Requirements: U.S. citizens entering Chile must have a valid passport. U.S. visitors will be charged a reciprocity fee at the port of entry, and a small receipt for the fee will be stapled in the last page of the pass-

port. This visa is valid for multiple entries and remains valid until the expiration of the passport. In addition, visitors will be issued a tourist visa consisting of a single sheet of paper placed in the passport. This visa is valid for a stay of up to 90 days. An extension of stay for an additional 90 days is possible, but requires payment of an extension fee. The visa document must be surrendered to immigration authorities upon departure.

Chilean entry and exit control laws require that a minor child under age 18 traveling unaccompanied must have permission from the parents or legal guardians. The document must be notarized and, if issued in the United States, authenticated by a Chilean consul in the United States.

If the child is traveling in the company of only one parent or guardian, the non-traveling parent or guardian will also be required to grant permission for travel. In this case, the document will also need to be notarized and authenticated by a Chilean consul. The permission to travel may also be notarized by a Chilean notary in Chile.

Parents are required to have documentary evidence of their relationship to the child. An original birth certificate or certified copy of an original birth certificate is required. This requirement applies to all foreigners as well as Chileans. This requirement is increasingly being enforced by Chilean immigration officers. When traveling with a minor child in Chile on a tourist visa, having such documentation on hand will facilitate entry and departure.

Visit the Embassy of Chile web site www.chile-usa.org for the most current visa information and entry/exit requirements. Visitors should be aware of the severe Chilean restrictions on the importation of fruit, vegetables & agricultural products. Check the Ministry of Agriculture web site www.sag.gob.cl for current requirements.

Safety and Security: The potential for terrorist activity is low. There has been some politically-motivated violence among indigenous communities in southern Chile, none of which has affected Americans. Potential for civil disturbance is low, although demonstrations, sometimes violent, do occur. Particularly violent days are March 29, the Day of the Young Combatant, and the anniversary of the September 11, 1973, coup against the government of President Salvador Allende.

For the latest security information, Americans traveling abroad should regularly monitor the Department's Internet web site where the current Worldwide Caution Travel Alert, Travel Warnings and Travel Alerts can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S., or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: Crime rates are low to moderate throughout Chile and are moderate in Santiago, Valparaiso, and other major cities. American citizens visiting Chile should be as careful in cities as they would be in any city in the United States. There have been few violent crimes committed against Americans. However, American tourists are at a heightened risk for pickpocketing, purse or camera snatching, and theft from backpacks and rental cars. Such crimes have been reported in all areas of Chile frequented by tourists. In Santiago, visitors should be especially alert to the possibility of crime at the Plaza de Armas and the Mercado Central; at major hotels and restaurants in the Las Condes, Vitacura, and Providencia areas, and in the Suecia and Bellavista entertainment districts. In Valparaiso, visitors should be especially alert in the port and adjoining tourist areas. Tourists using taxis in Santiago should be alert to possible scams involving currency switching. Tourists should also be especially alert while using public transportation, such as the Santiago Metro Subway and public buses and while in the vicinity of Metro stations and bus terminals. The emergency number for the police (Carabineros) is 133. In many countries around the world, counterfeit and pirated goods are widely available. Transactions involving such products may be illegal under local law. In addition, bringing them back to the United States may result in forfeitures and/or fines. More information on this serious problem is available at www.cybercrime.gov/18usc2320.htm.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

The local equivalent to the "911" emergency line in Chile is:

131–AMBULANCE (SAMU)
132–FIRE DEPARTMENT (BOMBEROS)
133–POLICE DEPARTMENT (CARABINEROS)

Medical Facilities and Health Information: Medical care, though generally good, may not meet U.S. standards, especially in remote areas. Although emergency rooms in some major hospitals accept credit cards, many doctors and hospitals in Chile expect immediate payment in cash. Prescriptions written by local doctors and over-the-counter medicines are widely available. Air pollution is a major source of health concern in Santiago, resulting in severe bronchial ailments affecting infants, small children and the elderly. The most severe air pollution occurs during the winter (May through August). Additional information on air quality levels is available at the National Air Quality Information Service (SINCA) web site—www.sinca.conama.cl. The

ozone layer is especially thin at the bottom of the world. Travelers should take proper precautions to protect themselves from ultraviolet radiation.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRI. (1-877-394-8747) or from the CDC's web site at http://wwn.cdc.gov/travel/default.aspx. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith/en.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Chile is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

Driving in Chile is on the right-hand side of the road. Traffic laws in Chile differ from traffic laws in the United States in some respects. Right-hand turns are generally prohibited at red lights unless otherwise posted. Seat belts are mandatory. Several modern toll highways have recently been opened in and around Santiago, dramatically improving transit into and through the city. Major roads are generally in good condition throughout the country. Some secondary roads, however, may be poorly maintained. At night, occasional heavy fog in rural areas may lead to vehicle accidents with occasional deaths and injuries. Care should be taken while driving in the mountains because the roads tend to have many tight switchbacks and may not have guardrails. Chains are often required and should be used on mountain roads during the winter. Many major highways in Chile are toll roads; drivers should carry a sufficient amount of local currency to cover the tolls. The new major highways in and around Santiago generally collect tolls through use of an electronic transmitter issued by the concessionaire and placed on the vehicle. "Day passes" may be purchased separately. Vehicles rented at Santiago airport generally are equipped with the electronic transmitter and the rental car companies charge a surcharge for its use. Some major arteries remain under construction in Santiago and drivers should be alert for detours and delays. Information on the major highways in the Metropolitan Region requiring an electronic transmitter is found at www.concesiones.cl.

Throughout Chile, care should be exercised when changing lanes or merging because many drivers do not signal lane changes and rarely yield to merging traffic. Many Chilean drivers exceed posted speed limits, do not maintain safe distances, and do not observe posted road signs. Buses are especially aggressive in moving between lanes. Speeding is common, including in urban areas. Traffic jams and detours in Santiago and other areas are common. Taxis are plentiful and relatively inexpensive. Drivers should drive with car doors locked at all times, especially in the southern parts of the city and near the airport, as there have been reports of thieves entering cars stopped at traffic lights or moving in slow traffic. In Santiago, certain major arteries switch directions during morning and evening rush hours. Visitors to Santiago should obtain up-to-date information on these changes from their auto rental company or the Chilean Automobile Association (please see below). Visitors that wish to use the public bus and subway system in Santiago should visit the following websites for information on purchasing a "BIP" card, a prepaid ticket required for public buses, routes and other helpful information regarding the public transportation systems: www.metrosantiago.cl and www.micros.cl. Driving under the influence of alcohol in Chile is severely punished, and can result in incarceration if the driver is involved in an accident. In accidents involving injuries or death, police may detain both drivers for many hours.

Visitors must have an international driver's permit in order to drive legally in Chile. The international driver's license must be obtained in the United States before traveling to Chile. Although car rental firms may rent to customers with only a U.S. driver's license, the police fine foreigners for driving without a valid international permit.

Aviation Safety Oversight: The U.S. Federal Aviation Administration (FAA) has assessed the Government of Chile's Civil Aviation Authority as being in compliance with International Civil Aviation Organization (ICAO) aviation safety standards for oversight of Chile's air carrier operations. For more information, travelers may visit the FAA's web site at http://www.faa.gov.

Special Circumstances: Visitors should take care to use only the services of government licensed tour operators throughout Chile as the Embassy is aware of at least one accident involving American fatalities with an unauthorized tour operator. Special care should be taken by arriving cruise ship passengers if arranging land tours not authorized by the cruise line.

Chile is an earthquake-prone country. Information on Chilean earthquake preparedness is available from the Oficina Nacional de Emergencia de Chile (ONEMI) at www.onemi.cl. General information about natural disaster preparedness is available via the Internet from the U.S. Federal Emergency Management Agency (FEMA) at www.fema.gov. Information about emergency preparedness is also available on the Embassy web site at http://santiago.usembassy.gov. The U.S. Geological Survey provides earthquake information on Chile at http://earthquake.

usgs.gov. Minefields are found in Chile's northern border with Peru and Bolivia and on the southern border with Argentina in Patagonia. Minefields are generally marked, but markers may have been shifted, become obscured or been vandalized. Travelers should pay attention to markers and follow clearly identified roads and trails when traveling in minefield areas. Border crossings should only be made at authorized locations. Persons visiting wilderness areas in the border regions mentioned above should check with park or other local officials concerning minefields and other potential hazards.

Chile is a popular destination for outdoors and adventure sports. Much of the country is mountain, forest, desert, or glacier. Despite the best efforts of local authorities, assisting persons lost or injured in such areas can be problematic. American citizens have been killed in recent years in mountain climbing and whitewater rafting accidents, and seriously injured while skiing. Persons planning to travel in isolated and wilderness areas should first learn about local hazards and weather conditions. Information about parks and wilderness areas can be obtained from the Chilean Forestry Service at www.conaf.cl. Information about mountain climbing in Chile can be obtained from the Federacion de Andinismo de Chile at www.feach.cl. Current weather forecasts are available from the Chilean Meteorological Service at www.meteochile.cl. Reports of missing or injured persons should be made immediately to the police so that a search can be mounted or assistance rendered. Travelers in isolated areas should always inform park rangers, police, or other local authorities of their itinerary before starting off.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating Chilean laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Chile are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States. Just as in the United States, foreigners in Chile must have proper immigration status and pay taxes on income earned in Chile. Recently, Americans have been deported for working in Chile without authorization. Please see our information on Criminal Penalties and ensure compliance with all Chilean immigration regulations; consult the web site of the U.S. Embassy in Chile for more information at http://santiago.usembassy.gov.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov. Chile has demonstrated patterns of noncompliance with the Hague Child Abduction Convention. Chile's patterns of noncompliance fall in its judicial performance. The courts continue to demonstrate a clear bias toward Chilean mothers.

Registration and Embassy Locations: Americans living or traveling in Chile are encouraged to register with the U.S. Embassy through the State Department's travel registration web site so that they can obtain updated information on travel and security within Chile. Americans without Internet access may register directly with the U.S. Embassy. By registering, American citizens make it easier for the Embassy to contact them in case of emergency.

The U.S. Embassy is located at Avenida Andres Bello 2800, Las Condes, Santiago, Chile. The telephone number is (56) (2) 330-3000. The Embassy web site is http://santiago.usembassy.gov, and the email address for the American Citizen Services Unit is Santiago AMCIT@state.gov. The Consular Section fax number is (56) (2) 330-3005. The American Citizen Services Unit is open to the public from 8:30am-11:30am, Monday through Friday, except U.S. and Chilean holidays and the first Friday of each month.

Intercountry Adoption

June 2008

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is based on public sources and our current understanding. Questions involving foreign and U.S. immigration laws and legal interpretation should be addressed respectively to qualified foreign or U.S. legal counsel.

The Hague Convention on Intercountry Adoption: The Hague Convention on Intercountry Adoption, to which the United States became a party on April 1, 2008, establishes legal and regulatory requirements for intercountry adoption. Chile is a party to The Hague Convention on Protection of Children and Co-operation in Respect of Intercountry Adoption (the Convention) and with which the Convention is in force for the United States.

Chilean adoption law gives priority to Chilean families over non-Chilean families. Most Chilean children available for intercountry adoption are at least four years old. Not all children eligible for adoption in Chile meet U.S. immigration requirements to receive an orphan visa, so it is important that adopting families consult with the U.S. Embassy in Santiago before beginning any adoption procedures to ensure that the adoption complies with U.S. law.

Under Chilean law, children to be adopted may not leave the country until the adoption is complete.

Patterns of Immigration: Please review current reports online at http://adoption.state.gov.

Adoption Authority: SENAME (Servicio Nacional de Menores) is the clearinghouse for adoptions and approves parents who wish to adopt. Prospective adopting families must contact SENAME first before beginning any adoption proceedings. SENAME can be reached at:

Servicio Nacional de Menores de Chile (SENAME)
Unidad de Adopción
Huerfanos 587
Santiago, Chile
Telephone: (56)(2) 398-4447
www.sename.cl

Eligibility Requirements for Adoptive Parents: Only married couples between the ages of 25 and 60 can adopt in Chile. The adoptive parents must both be at least 20 years older than the child being adopted.

Residency Requirements: There are no residency requirements to adopt in Chile.

Time Frame: Intercountry adoptions from Chile normally take about two (2) years from start to finish. This time is measured from the time the prospective adoptive parents contact SENAME expressing their intention to adopt until the time the adoption is completed. Reasons for this prolonged length of time vary from availability of children to length of time to obtain hearings.

Adoption Agencies and Attorneys: Because Chile is a Convention country, adoption services must be provided by an accredited agency, temporarily accredited agency, approved person, supervised provider, or exempted provider. It is essential that prospective adoptive parent(s) seeking to adopt from a Convention country use an accredited adoption service provider. The Department maintains a current list of accredited adoption service providers. The list of accredited adoption service providers is also provided on the website of The Hague Permanent Bureau at www.hcch.net.

Adoption Fees: The U.S. Embassy in Chile discourages the payment of any fees that are not properly receipted, "donations," or "expediting" fees, that may be requested from prospective adoptive parents. Such fees have the appearance of "buying" a baby and put all future adoptions in Chile at risk.

Fees vary, but prospective adoptive parents should expect to spend no more than $300. Prospective adoptive parents should report exorbitant fees to the U.S. Embassy or SENAME.

Adoption Procedures: Families interested in adopting in Chile must apply and be approved by SENAME, which keeps the national registry of children eligible for adoption. The first stage of the application process is to send SENAME, at the address above, a letter or email that includes both prospective adoptive parents' names, dates of birth, contact information and any preferences, including the reasons for these preferences, for a child or children.

The children on the national registry have been declared eligible for adoption (susceptible de ser adoptado) by a judge and all parental rights have been terminated. SENAME matches available children with prospective adoptive parents. Blood relatives are always given priority, followed by unrelated Chilean families, then non-Chilean families. Prospective adoptive parents do have the right to decline a specific match, which they would do by simply notifying SENAME.

Prospective adoptive parents should consider carefully declining a specific match as they will be required to begin the process again and will have to explain, in detail, the reason for their declination. After a child is successfully matched with a family, there is a wait to obtain a hearing with a judge. The normal wait time is between 6 to 12 months. At the hearing, the judge may determine that the prospective adoptive parents need to provide further documentation, but all of the stated required documents would have already been submitted and in the adoption file (see below "Documents for Adoption in Country"). Either SENAME or one of the approved adoption agencies must be present at the hearing, along with both prospective parents. The child is not normally present for the adoption hearing.

It is extremely hard to obtain a duplicate certified copy of the adoption decree–it is highly recommended that parents ask for an extra certified copy while present at the hearing.

Once the adoption is approved, the judge will inform the civil registry and provide the information for a new birth certificate, with the adoptive parents' names.

This part of the process can take between 15-30 working days. The new birth document is used to obtain a Chilean identification card (also known as a R.U.T. number), which is required to obtain a Chilean passport. This part of the process can take between 15-30 working days as well. Typically adoptive parents will remain in Chile for one to two months to complete the adoption process.

Required Documents: The following documents are required by SENAME after the initial letter or email from the prospective adoptive parents is received. They will not accept these documents with the initial letter or email.

Prospective parents will receive a letter from SENAME acknowledging receipt and asking for the following documents below. Once the package of documents is received, SENAME will begin the process of matching a child.

- Birth certificates and marriage certificate of the prospective adoptive parents;
- Certificate issued by a Chilean Consul in the U.S. that states that the parents have met all U.S. adoption requirements;

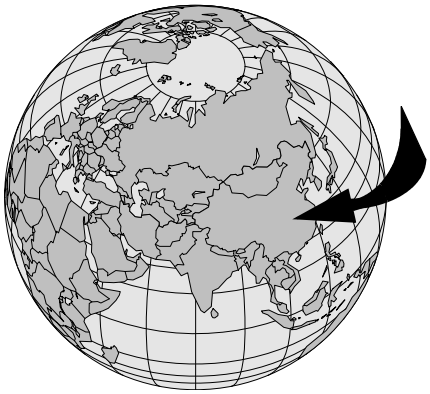
- Favorable home study conducted by an accredited agency in the U.S.;
- Physical and psychological exams demonstrating the well-being of the parents;
- Proof of parents' financial situation, i.e., ability to successfully support the child;
- Recent photographs of each of the prospective adoptive parent(s); and
- Three notarized letters of recommendation from U.S. community, religious or other governmental authorities.

Since all Immigrant Visas issued in Chile will be IR-3 visas, the U.S. Embassy will issue a certificate stating that the child is eligible for U.S. citizenship automatically after he/she legally enters the U.S. with an immigrant visa.

In order to obtain this certificate, adopting parents and/or their agent must come to the Embassy Monday, Wednesday or Friday morning between 8:30-11:00am.

Embassy of Chile
1732 Massachusetts Avenue, N.W.
Washington, DC 20036
Tel: (202) 785-1746
http://www.chile-usa.org

Chile also has consulates in Chicago, Houston, Los Angeles, Miami, New York, Philadelphia, San Francisco, and San Juan.



U.S. Immigration Requirements: As of April 1, 2008, U.S. citizens wishing to adopt in a Convention country must begin the process by filing with the U.S. Citizenship and Immigration Services (USCIS) a form I-800A *Application for Determination of Suitability to Adopt a Child from a Convention Country*.

Prospective adoptive parents are strongly encouraged to consult the Department of Homeland Security, USCIS website (www.uscis.gov) to download forms and filing instructions.

U.S. Embassy in Chile
Consular Section–Immigrant Visas
Avenida Andrés Bello 2800
Santiago, Chile
Tel: (56)(2) 335-6550
Fax: (56)(2) 330-3005
Web site: http://www.usembassy.cl
Email: SantiagoVisa@state.gov
Public Service Hours: Mondays and Thursdays, 8:30 a.m. to 11:30 a.m.
I-600 Petition filing: Monday through Friday, by appointment

Additional Information: For information on intercountry adoption and international parental child abduction, and security information for U.S. citizens traveling abroad, call Toll Free 1-888-407-4747.

This number is available from 8:00 a.m. to 8:00 p.m. EST/EDT, Monday through Friday (except U.S. federal holidays). Callers who are unable to use toll-free numbers, such as those calling from overseas, may obtain information and assistance during these hours by calling 1-202-501-4444.

CHINA

Compiled from the October 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
People's Republic of China

PROFILE

Geography

Total area: 9,596,960 sq. km. (about 3.7 million sq. mi.).
Cities: Capital—Beijing. Other major cities—Shanghai, Tianjin, Shenyang, Wuhan, Guangzhou, Chongqing, Harbin, Chengdu.
Terrain: Plains, deltas, and hills in east; mountains, high plateaus, deserts in west.
Climate: Tropical in south to subarctic in north.

People

Nationality: Noun and adjective—Chinese (singular and plural).
Population: (July 2007 est.) 1,321,851,888.
Population growth rate: (2007 est.) 0.606%.
Health: (2007 est.) Infant mortality rate—22.12/1,000. Life expectancy—72.88 years (overall); 71.13 years for males, 74.82 years for females.
Ethnic groups: Han Chinese—91.9%; Zhuang, Manchu, Hui, Miao, Uygur, Yi, Mongolian, Tibetan, Buyi, Korean, and other—8.1%.
Religions: Officially atheist; Taoism, Buddhism, Islam, Christianity.
Languages: Mandarin (Putonghua), plus many local dialects.
Education: Years compulsory—9. Literacy—90.9%.
Work force: (2006 est., 798 million) Agriculture and forestry—45%; industry—24%; services—31%.

Government

Type: Communist party-led state.
Constitution: December 4, 1982.
Independence: Unification under the Qin (Ch'in) Dynasty 221 BC; Qing (Ch'ing or Manchu) Dynasty replaced by a republic on February 12, 1912; People's Republic established October 1, 1949.
Government branches: Executive—president, vice president, State Council, premier. Legislative—unicameral National People's Congress. Judicial—Supreme People's Court.
Political subdivisions: 23 provinces (the P.R.C. considers Taiwan to be its 23rd province); 5 autonomous regions, including Tibet; 4 municipalities directly under the State Council.
Political parties: Chinese Communist Party, 70.8 million members; 8 minor parties under communist supervision.
Suffrage: Universal at 18.

Economy

GDP: (2007) $3.249 trillion (exchange rate-based).
Per capita GDP: (2007)$2,458 (exchange rate-based).
GDP real growth rate: (2007) 11.4%.
Natural resources: Coal, iron ore, crude oil, mercury, tin, tungsten, antimony, manganese, molybdenum, vanadium, magnetite, aluminum, lead, zinc, uranium, hydropower potential (world's largest).
Agriculture: Products—Among the world's largest producers of rice, wheat, potatoes, corn, peanuts, tea, millet, barley; commercial crops include cotton, other fibers, apples, oilseeds, pork and fish; produces variety of livestock products.
Industry: Types—mining and ore processing; iron; steel; aluminum; coal, machinery; textiles and apparel; armaments; petroleum; cement; chemicals; fertilizers; consumer products including footwear, toys, and electronics; automobiles and other transportation equipment including rail cars and locomotives, ships, and aircraft; and telecommunications.
Trade: (2007) Exports—$1.221 trillion: electronics; machinery; apparel; optical, photographic, and medical equipment; and furniture. Main partners—United States, Hong Kong, Japan, EU, South Korea, Singapore. Imports—$917.4 billion: electronics, machinery, mineral fuel and oil, chemicals, plastic. Main partners—Japan, EU, Taiwan, South Korea, United States, Malaysia, Australia.

PEOPLE

Ethnic Groups

The largest ethnic group is the Han Chinese, who constitute about 91.9% of the total population. The remaining 8.1% are Zhuang (16 million), Manchu (10 million), Hui (9 million), Miao (8 million), Uygur (7 million), Yi (7 million), Mongolian (5 million), Tibetan (5 million), Buyi (3 million), Korean (2 million), and other ethnic minorities.

Language

There are seven major Chinese dialects and many subdialects. Mandarin (or Putonghua), the predominant dialect, is spoken by over 70% of the population. It is taught in all schools and is the medium of government. About two-thirds of the Han ethnic group are native speakers of Mandarin; the rest, concentrated in southwest and southeast China, speak one of the six other major Chinese dialects. Non-Chinese languages spoken widely by ethnic minorities include Mongolian, Tibetan, Uygur and other Turkic languages (in Xinjiang), and Korean (in the northeast).

The Pinyin System of Romanization

On January 1, 1979, the Chinese Government officially adopted the pinyin system for spelling Chinese names and places in Roman letters. A system of Romanization invented by the Chinese, pinyin has long been widely used in China on street and commercial signs as well as in elementary Chinese textbooks as an aid in learning Chinese characters. Variations of pinyin also are used as the written forms of several minority languages.

Pinyin has now replaced other conventional spellings in China's English-language publications. The U.S. Government also has adopted the pinyin system for all names and places in China. For example, the capital of China is now spelled "Beijing" rather than "Peking."

Religion

Religion plays a significant part in the life of many Chinese. Buddhism is most widely practiced, with an estimated 100 million adherents. Traditional Taoism also is practiced. Official figures indicate there are 20 million Muslims, 5 million Catholics, and 15 million Protestants; unofficial estimates are much higher.

While the Chinese constitution affirms religious toleration, the Chinese Government places restrictions on religious practice outside officially recognized organizations. Only two Christian organizations—a Catholic church without official ties to Rome and the "Three-Self-Patriotic" Protestant church—are sanctioned by the Chinese Government. Unauthorized churches have sprung up in many parts of the country and unofficial religious practice is flourishing. In some regions authorities have tried to control activities of these unregistered churches. In other regions, registered and unregistered groups are treated similarly by authorities and congregations worship in both types of churches. Most Chinese Catholic bishops are recognized by the Pope, and official priests have Vatican approval to administer all the sacraments.

Population Policy

With a population officially just over 1.3 billion and an estimated growth rate of about 0.6%, China is very concerned about its population growth and has attempted with mixed results to implement a strict birth limitation policy. China's 2002 Population and Family Planning Law and policy permit one child per family, with allowance for a second child under certain circumstances, especially in rural areas, and with guidelines looser for ethnic minorities with small populations. Enforcement varies, and relies largely on "social compensation fees" to discourage extra births.

Official government policy opposes forced abortion or sterilization, but in some localities there are instances of forced abortion. The government's goal is to stabilize the population in the first half of the 21st century, and current projections are that the population will peak at around 1.6 billion by 2050.

HISTORY

Dynastic Period

China is the oldest continuous major world civilization, with records dating back about 3,500 years. Successive dynasties developed a system of bureaucratic control that gave the agrarian-based Chinese an advantage over neighboring nomadic and hill cultures. Chinese civilization was further strengthened by the development of a Confucian state ideology and a common written language that bridged the gaps among the country's many local languages and dialects. Whenever China was conquered by nomadic tribes, as it was by the Mongols in the 13th century, the conquerors sooner or later adopted the ways of the "higher" Chinese civilization and staffed the bureaucracy with Chinese.

The last dynasty was established in 1644, when the Manchus overthrew the native Ming dynasty and established the Qing (Ch'ing) dynasty with Beijing as its capital. At great expense in blood and treasure, the Manchus over the next half century gained control of many border areas, including Xinjiang, Yunnan, Tibet, Mongolia, and Taiwan. The success of the early Qing period was based on the combination of Manchu martial prowess and traditional Chinese bureaucratic skills.

During the 19th century, Qing control weakened, and prosperity diminished. China suffered massive social strife, economic stagnation, explosive population growth, and Western penetration and influence. The Taiping and Nian rebellions, along with a Russian-supported Muslim separatist movement in Xinjiang, drained Chinese resources and almost toppled the dynasty. Britain's desire to continue its illegal opium trade with China collided with imperial edicts

prohibiting the addictive drug, and the First Opium War erupted in 1840. China lost the war; subsequently, Britain and other Western powers, including the United States, forcibly occupied "concessions" and gained special commercial privileges. Hong Kong was ceded to Britain in 1842 under the Treaty of Nanking, and in 1898, when the Opium Wars finally ended, Britain executed a 99-year lease of the New Territories, significantly expanding the size of the Hong Kong colony.

As time went on, the Western powers, wielding superior military technology, gained more economic and political privileges. Reformist Chinese officials argued for the adoption of Western technology to strengthen the dynasty and counter Western advances, but the Qing court played down both the Western threat and the benefits of Western technology.

Early 20th Century China

Frustrated by the Qing court's resistance to reform, young officials, military officers, and students—inspired by the revolutionary ideas of Sun Yat-sen—began to advocate the overthrow of the Qing dynasty and creation of a republic. A revolutionary military uprising on October 10, 1911, led to the abdication of the last Qing monarch. As part of a compromise to overthrow the dynasty without a civil war, the revolutionaries and reformers allowed high Qing officials to retain prominent positions in the new republic. One of these figures, Gen. Yuan Shikai, was chosen as the republic's first president. Before his death in 1916, Yuan unsuccessfully attempted to name himself emperor. His death left the republican government all but shattered, ushering in the era of the "warlords" during which China was ruled and ravaged by shifting coalitions of competing provincial military leaders.

In the 1920s, Sun Yat-sen established a revolutionary base in south China and set out to unite the fragmented nation. With Soviet assistance, he organized the Kuomintang (KMT or "Chinese Nationalist People's Party"), and entered into an alliance with the fledgling Chinese Communist Party (CCP). After Sun's death in 1925, one of his proteges, Chiang Kai-shek, seized control of the KMT and succeeded in bringing most of south and central China under its rule.

In 1927, Chiang turned on the CCP and executed many of its leaders. The remnants fled into the mountains of eastern China. In 1934, driven out of their mountain bases, the CCP's forces embarked on a "Long March" across some of China's most desolate terrain to the northwestern province of Shaanxi, where they established a guerrilla base at Yan'an.

During the "Long March," the communists reorganized under a new leader, Mao Zedong (Mao Tse-tung). The bitter struggle between the KMT and the CCP continued openly or clandestinely through the 14-year long Japanese invasion (1931-45), even though the two parties nominally formed a united front to oppose the Japanese invaders in 1937. The war between the two parties resumed after the Japanese defeat in 1945. By 1949, the CCP occupied most of the country.

Chiang Kai-shek fled with the remnants of his KMT government and military forces to Taiwan, where he proclaimed Taipei to be China's "provisional capital" and vowed to re-conquer the Chinese mainland. Taiwan still calls itself the "Republic of China."

The People's Republic of China

In Beijing, on October 1, 1949, Mao Zedong proclaimed the founding of the People's Republic of China (P.R.C.). The new government assumed control of a people exhausted by two generations of war and social conflict, and an economy ravaged by high inflation and disrupted transportation links. A new political and economic order modeled on the Soviet example was quickly installed.

In the early 1950s, China undertook a massive economic and social reconstruction program. The new leaders gained popular support by curbing inflation, restoring the economy, and rebuilding many war-damaged industrial plants. The CCP's authority reached into almost every aspect of Chinese life. Party control was assured by large, politically loyal security and military forces; a government apparatus responsive to party direction; and the placement of party members into leadership positions in labor, women's, and other mass organizations.

The "Great Leap Forward" and the Sino-Soviet Split

In 1958, Mao broke with the Soviet model and announced a new economic program, the "Great Leap Forward," aimed at rapidly raising industrial and agricultural production. Giant cooperatives (communes) were formed, and "backyard factories" dotted the Chinese landscape. The results were disastrous. Normal market mechanisms were disrupted, agricultural production fell behind, and China's people exhausted themselves producing what turned out to be shoddy, un-salable goods. Within a year, starvation appeared even in fertile agricultural areas. From 1960 to 1961, the combination of poor planning during the Great Leap Forward and bad weather resulted in one of the deadliest famines in human history.

The already strained Sino-Soviet relationship deteriorated sharply in 1959, when the Soviets started to restrict the flow of scientific and technological information to China. The dispute escalated, and the Soviets withdrew all of their personnel from China in August 1960. In 1960, the Soviets and the Chinese began to have disputes openly in international forums.

The Cultural Revolution

In the early 1960s, State President Liu Shaoqi and his protege, Party General Secretary Deng Xiaoping, took over direction of the party and adopted pragmatic economic policies at odds with Mao's revolutionary vision. Dissatisfied with China's new direction and his own reduced authority, Party Chairman Mao launched a massive political attack on Liu, Deng, and other pragmatists in the spring of 1966. The new movement, the "Great Proletarian Cultural Revolution," was unprecedented in communist history. For the first time, a section of the Chinese communist leadership sought to rally popular opposition against another leadership group. China was set on a course of political and social anarchy that lasted the better part of a decade.

In the early stages of the Cultural Revolution, Mao and his "closest comrade in arms," National Defense Minister Lin Biao, charged Liu, Deng, and other top party leaders with dragging China back toward capitalism. Radical youth organizations, called Red Guards, attacked party and state organizations at all levels, seeking out leaders who would not bend to the radical wind. In reaction to this turmoil, some local People's Liberation Army (PLA) commanders and other officials maneuvered to outwardly back Mao and the radicals while actually taking steps to rein in local radical activity.

Gradually, Red Guard and other radical activity subsided, and the Chinese political situation stabilized along complex factional lines. The leadership conflict came to a head in September 1971, when Party Vice Chairman and Defense Minister Lin Biao reportedly tried to stage a coup against Mao; Lin Biao allegedly later died in a plane crash in Mongolia.

In the aftermath of the Lin Biao incident, many officials criticized and dismissed during 1966-69 were reinstated. Chief among these was Deng Xiaoping, who reemerged in 1973 and was confirmed in 1975 in the concurrent posts of Politburo Standing Committee member, PLA Chief of Staff,

and Vice Premier. The ideological struggle between more pragmatic, veteran party officials and the radicals re-emerged with a vengeance in late 1975. Mao's wife, Jiang Qing, and three close Cultural Revolution associates (later dubbed the "Gang of Four") launched a media campaign against Deng. In January 1976, Premier Zhou Enlai, a popular political figure, died of cancer. On April 5, Beijing citizens staged a spontaneous demonstration in Tiananmen Square in Zhou's memory, with strong political overtones of support for Deng. The authorities forcibly suppressed the demonstration. Deng was blamed for the disorder and stripped of all official positions, although he retained his party membership.

The Post-Mao Era

Mao's death in September 1976 removed a towering figure from Chinese politics and set off a scramble for succession. Former Minister of Public Security Hua Guofeng was quickly confirmed as Party Chairman and Premier. A month after Mao's death, Hua, backed by the PLA, arrested Jiang Qing and other members of the "Gang of Four." After extensive deliberations, the Chinese Communist Party leadership reinstated Deng Xiaoping to all of his previous posts at the 11th Party Congress in August 1977. Deng then led the effort to place government control in the hands of veteran party officials opposed to the radical excesses of the previous two decades.

The new, pragmatic leadership emphasized economic development and renounced mass political movements. At the pivotal December 1978 Third Plenum (of the 11th Party Congress Central Committee), the leadership adopted economic reform policies aimed at expanding rural income and incentives, encouraging experiments in enterprise autonomy, reducing central planning, and attracting foreign direct investment into China. The plenum also decided to accelerate the pace of legal reform, culminating in the passage of several new legal codes by the National People's Congress in June 1979.

After 1979, the Chinese leadership moved toward more pragmatic positions in almost all fields. The party encouraged artists, writers, and journalists to adopt more critical approaches, although open attacks on party authority were not permitted. In late 1980, Mao's Cultural Revolution was officially proclaimed a catastrophe. Hua Guofeng, a protege of Mao, was replaced as premier in 1980 by reformist Sichuan party chief Zhao Ziyang and as party General Secretary in 1981 by the even more reformist Communist Youth League chairman Hu Yaobang.

Reform policies brought great improvements in the standard of living, especially for urban workers and for farmers who took advantage of opportunities to diversify crops and establish village industries. Literature and the arts blossomed, and Chinese intellectuals established extensive links with scholars in other countries.

At the same time, however, political dissent as well as social problems such as inflation, urban migration, and prostitution emerged. Although students and intellectuals urged greater reforms, some party elders increasingly questioned the pace and the ultimate goals of the reform program. In December 1986, student demonstrators, taking advantage of the loosening political atmosphere, staged protests against the slow pace of reform, confirming party elders' fear that the current reform program was leading to social instability. Hu Yaobang, a protege of Deng and a leading advocate of reform, was blamed for the protests and forced to resign as CCP General Secretary in January 1987. Premier Zhao Ziyang was made General Secretary and Li Peng, former Vice Premier and Minister of Electric Power and Water Conservancy, was made Premier.

1989 Student Movement and Tiananmen Square

After Zhao became the party General Secretary, the economic and political reforms he had championed came under increasing attack. His proposal in May 1988 to accelerate price reform led to widespread popular complaints about rampant inflation and gave opponents of rapid reform the opening to call for greater centralization of economic controls and stricter prohibitions against Western influence. This precipitated a political debate, which grew more heated through the winter of 1988-89.

The death of Hu Yaobang on April 15, 1989, coupled with growing economic hardship caused by high inflation, provided the backdrop for a large-scale protest movement by students, intellectuals, and other parts of a disaffected urban population. University students and other citizens camped out in Beijing's Tiananmen Square to mourn Hu's death and to protest against those who would slow reform. Their protests, which grew despite government efforts to contain them, called for an end to official corruption and for defense of freedoms guaranteed by the Chinese constitution. Protests also spread to many other cities, including Shanghai, Chengdu, and Guangzhou.

Martial law was declared on May 20, 1989. Late on June 3 and early on the morning of June 4, military units were brought into Beijing. They used armed force to clear demonstrators from the streets. There are no official estimates of deaths in Beijing, but most observers believe that casualties numbered in the hundreds.

After June 4, while foreign governments expressed horror at the brutal suppression of the demonstrators, the central government eliminated remaining sources of organized opposition, detained large numbers of protesters, and required political reeducation not only for students but also for large numbers of party cadre and government officials.

Following the resurgence of conservatives in the aftermath of June 4, economic reform slowed until given new impetus by Deng Xiaoping's dramatic visit to southern China in early 1992. Deng's renewed push for a market-oriented economy received official sanction at the 14th Party Congress later in the year as a number of younger, reform-minded leaders

began their rise to top positions. Deng and his supporters argued that managing the economy in a way that increased living standards should be China's primary policy objective, even if "capitalist" measures were adopted. Subsequent to the visit, the Communist Party Politburo publicly issued an endorsement of Deng's policies of economic openness. Though not completely eschewing political reform, China has consistently placed overwhelming priority on the opening of its economy.

Post Deng Leadership

Deng's health deteriorated in the years prior to his death in 1997. During that time, President Jiang Zemin and other members of his generation gradually assumed control of the day-to-day functions of government. This "third generation" leadership governed collectively with President Jiang at the center. In March 1998, Jiang was re-elected President during the 9th National People's Congress. Premier Li Peng was constitutionally required to step down from that post. He was elected to the chairmanship of the National People's Congress. Zhu Rongji was selected to replace Li as Premier.

In November 2002, the 16th Communist Party Congress elected Hu Jintao, who in 1992 was designated by Deng Xiaoping as the "core" of the fourth generation leaders, the new General Secretary. A new Politburo and Politburo Standing Committee was also elected in November. In March 2003, General Secretary Hu Jintao was elected President at the 10th National People's Congress. Jiang Zemin retained the chairmanship of the Central Military Commission. At the Fourth Party Plenum in September 2004, Jiang Zemin retired from the Central Military Commission, passing the Chairmanship and control of the People's Liberation Army to President Hu Jintao.

China is firmly committed to economic reform and opening to the outside world. The Chinese leadership has identified reform of state industries and the establishment of a social safety net as government priorities. Government strategies for achieving these goals include large-scale privatization of unprofitable state-owned enterprises and development of a pension system for workers. The leadership has also downsized the government bureaucracy.

The Chinese Communist Party's 17th Party Congress, held in October 2007, saw the elevation of key "fifth generation" leaders to the Politburo and Standing Committee, including Xi Jinping, Li Keqiang and Wang Yang. At the National People's Congress plenary held in March 2008, Xi was elected Vice President of the government, and Li was elected Vice Premier.

GOVERNMENT

Chinese Communist Party

The 70.8 million member CCP, authoritarian in structure and ideology, continues to dominate government. Nevertheless, China's population, geographical vastness, and social diversity frustrate attempts to rule by fiat from Beijing. Central leaders must increasingly build consensus for new policies among party members, local and regional leaders, influential non-party members, and the population at large. In periods of greater openness, the influence of people and organizations outside the formal party structure has tended to increase, particularly in the economic realm. This phenomenon is most apparent today in the rapidly developing coastal region. Nevertheless, in all important government, economic, and cultural institutions in China, party committees work to see that party and state policy guidance is followed and that non-party members do not create autonomous organizations that could challenge party rule. Party control is tightest in government offices and in urban economic, industrial, and cultural settings; it is considerably looser in the rural areas, where the majority of the people live.

Theoretically, the party's highest body is the Party Congress, which traditionally meets at least once every 5 years. The 17th Party Congress took place in fall 2007. The primary organs of power in the Communist Party include:

- The Politburo Standing Committee, which currently consists of nine members;
- The Politburo, consisting of 25 full members, including the members of the Politburo Standing Committee;
- The Secretariat, the principal administrative mechanism of the CCP, headed by the General Secretary;
- The Central Military Commission;
- The Discipline Inspection Commission, which is charged with rooting out corruption and malfeasance among party cadres.

State Structure

The Chinese Government has always been subordinate to the Chinese Communist Party (CCP); its role is to implement party policies. The primary organs of state power are the National People's Congress (NPC), the President (the head of state), and the State Council. Members of the State Council include Premier Wen Jiabao (the head of government), a variable number of vice premiers (now four), five state councilors (protocol equivalents of vice premiers but with narrower portfolios), and 25 ministers, the central bank governor, and the auditor-general.

Under the Chinese constitution, the NPC is the highest organ of state power in China. It meets annually for about two weeks to review and approve major new policy directions, laws, the budget, and major personnel changes. These initiatives are presented to the NPC for consideration by the State Council after previous endorsement by the Communist Party's Central Committee. Although the NPC generally approves State

Council policy and personnel recommendations, various NPC committees hold active debate in closed sessions, and changes may be made to accommodate alternate views.

When the NPC is not in session, its permanent organ, the Standing Committee, exercises state power.

Principal Government Officials

Last Updated: 11/12/08

Pres.: **HU Jintao**
Vice Pres.: **XI Jinping**
Premier, State Council: **WEN Jiabao**
Executive Vice Premier, State Council: **LI Keqiang**
Vice Premier, State Council: **HUI Liangyu**
Vice Premier, State Council: **ZHANG Dejiang**
Vice Premier, State Council: **WANG Qishan**
State Councilor, State Council: **LIU Yandong**
State Councilor, State Council: **LIANG Guanglie**
State Councilor, State Council: **MA Kai**
State Councilor, State Council: **MENG Jianzhu**
State Councilor, State Council: **DAI Bingguo**
Sec. Gen., State Council: **MA Kai**
Chmn., Central Military Commission: **HU Jintao**
Chmn., National Development & Reform Commission: **ZHANG Ping**
Min. in Charge of the State Population & Family Planning Commission: **LI Bin**
Min. in Charge of the State Ethnic Affairs Commission: **YANG Jing**
Min. of Agriculture: **SUN Zhengcai**
Min. of Civil Affairs: **LI Xueju**
Min. of Commerce: **CHEN Deming**
Min. of Culture: **CAI Wu**
Min. of Education: **ZHOU Ji**
Min. of Environmental Protection: **ZHOU Shengxian**
Min. of Finance: **XIE Xuren**
Min. of Foreign Affairs: **YANG Jiechi**
Min. of Health: **CHEN Zhu**
Min. of Housing & Urban-Rural Construction: **JIANG Weixin**
Min. of Human Resources & Social Security: **YIN Weimin**
Min. of Industry & Information Technology LI Yizhong:
Min. of Justice: **WU Aiying**
Min. of Land & Resources: **XU Shaoshi**
Min. of National Defense: **LIANG Guanglie**
Min. of Public Security: **MENG Jianzhu**
Min. of Railways: **LIU Zhijun**
Min. of Science & Technology: **WAN Gang**
Min. of State Security: **GENG Huichang**
Min. of Supervision: **MA Wen**
Min. of Transportation: **LI Shenglin**
Min. of Water Resources: **CHEN Lei**
Auditor Gen., National Audit Office: **LIU Jiayi**
Governor, People's Bank of China: **ZHOU Xiaochuan**
Ambassador to the US: **ZHOU Wenzhong**
Permanent Representative to the UN, New York: **WANG Guangya**

POLITICAL CONDITIONS

Legal System

The government's efforts to promote rule of law are significant and ongoing. After the Cultural Revolution, China's leaders aimed to develop a legal system to restrain abuses of official authority and revolutionary excesses. In 1982, the National People's Congress adopted a new state constitution that emphasized the rule of law under which even party leaders are theoretically held accountable.

Since 1979, when the drive to establish a functioning legal system began, more than 300 laws and regulations, most of them in the economic area, have been promulgated. The use of mediation committees—informed groups of citizens who resolve about 90% of China's civil disputes and some minor criminal cases at no cost to the parties—is one innovative device. There are more than 800,000 such committees in both rural and urban areas.

Legal reform became a government priority in the 1990s. Legislation designed to modernize and professionalize the nation's lawyers, judges, and prisons was enacted. The 1994 Administrative Procedure Law allows citizens to sue officials for abuse of authority or malfeasance. In addition, the criminal law and the criminal procedures laws were amended to introduce significant reforms. The criminal law amendments abolished the crime of "counter-revolutionary" activity, although many persons are still incarcerated for that crime. Criminal procedures reforms also encouraged establishment of a more transparent, adversarial trial process. The Chinese constitution and laws provide for fundamental human rights, including due process, but these are often ignored in practice.

In addition to other judicial reforms, the Constitution was amended in 2004 to include the protection of individual human rights and legally-obtained private property, but it is unclear how those provisions will be implemented. Although new criminal and civil laws have provided additional safeguards to citizens, previously debated political reforms, including expanding elections to the township level, and other legal reforms, including the reform of the reeducation through labor system, have been put on hold.

Human Rights

The China country reports in the State Department's 2007 Human Rights Practices and International Religious Freedom Reports noted China's well-documented and continuing abuses of human rights in violation of internationally recognized norms, stemming both from the authorities' intolerance of dissent and the inadequacy of legal safeguards for basic freedoms.

Reported abuses have included arbitrary and lengthy incommunicado detention, forced confessions, torture, and mistreatment of prisoners as well as severe restrictions on freedom of speech, the press, assembly, association, religion, privacy, worker rights, and coercive birth limitation. In 2006, China continued the monitoring, harassment, intimidation, and arrest of journalists, Internet writers, defense lawyers, religious activists, and political dissidents.

The activities of non-governmental organizations (NGOs), especially those relating to the rule of law and expansion of judicial review, continue to be restricted. The Chinese Government recognizes five official reli-

gions—Buddhism, Islam, Taoism, Catholicism, and Protestantism—and seeks to regulate religious groups and worship. Religious believers who seek to practice their faith outside of state-controlled religious venues and unregistered religious groups and spiritual movements are subject to intimidation, harassment, and detention. In 2006, the Secretary of State again designated China as a "Country of Particular Concern" under the International Religious Freedom Act for particularly severe violations of religious freedom.

At the same time, China's economic growth and reform since 1978 has improved dramatically the lives of hundreds of millions of Chinese, increased social mobility, and expanded the scope of personal freedom. This has meant substantially greater freedom of travel, employment opportunity, educational and cultural pursuits, job and housing choices, and access to information. In recent years, China has also passed new criminal and civil laws that provide additional safeguards to citizens. Village elections have been carried out in over 90% of China's one million villages.

We have conducted 12 rounds of human rights dialogue with China since Tiananmen. During 2003 and 2004, no progress was made on the commitments China made at the 2002 dialogue, and we declined to schedule another round at that time.

In February 2008, the United States and China agreed to resume our formal human rights dialogue, with the understanding that the discussions need to be constructive. Outside the formal human rights dialogue, the U.S. Government regularly raises human rights concerns with Chinese officials at all levels of government. In his September 2007 meeting with President Hu and in subsequent discussions, President Bush has emphasized U.S. interest in human rights and religious freedom in China.

ECONOMY

Economic Reforms

Since 1979, China has reformed and opened its economy. The Chinese leadership has adopted a more pragmatic perspective on many political and socioeconomic problems, and has reduced the role of ideology in economic policy. China's ongoing economic transformation has had a profound impact not only on China but on the world.

The market-oriented reforms China has implemented over the past two decades have unleashed individual initiative and entrepreneurship. The result has been the largest reduction of poverty and one of the fastest increases in income levels ever seen. China today is the fourth-largest economy in the world. It has sustained average economic growth of over 9.5% for the past 26 years. In 2006 its $2.68 trillion economy was about one-fifth the size of the U.S. economy.

In the 1980s, China tried to combine central planning with market-oriented reforms to increase productivity, living standards, and technological quality without exacerbating inflation, unemployment, and budget deficits. China pursued agricultural reforms, dismantling the commune system and introducing a household-based system that provided peasants greater decision-making in agricultural activities.

The government also encouraged nonagricultural activities such as village enterprises in rural areas, and promoted more self-management for state-owned enterprises, increased competition in the marketplace, and facilitated direct contact between Chinese and foreign trading enterprises. China also relied more upon foreign financing and imports.

During the 1980s, these reforms led to average annual rates of growth of 10% in agricultural and industrial output. Rural per capita real income doubled. China became self-sufficient in grain production; rural industries accounted for 23% of agricultural output, helping absorb surplus labor in the countryside. The variety of light industrial and consumer goods increased. Reforms began in the fiscal, financial, banking, price-setting, and labor systems.

By the late 1980s, however, the economy had become overheated with increasing rates of inflation. At the end of 1988, in reaction to a surge of inflation caused by accelerated price reforms, the leadership introduced an austerity program.

China's economy regained momentum in the early 1990s. During a visit to southern China in early 1992, China's paramount leader at the time, Deng Xiaoping, made a series of political pronouncements designed to reinvigorate the process of economic reform.

The 14th Party Congress later in the year backed Deng's renewed push for market reforms, stating that China's key task in the 1990s was to create a "socialist market economy." The 10-year development plan for the 1990s stressed continuity in the political system with bolder reform of the economic system.

Following the Chinese Communist Party's Third Plenum, held in October 2003, Chinese legislators unveiled several proposed amendments to the state constitution. One of the most significant was a proposal to provide protection for private property rights. Legislators also indicated there would be a new emphasis on certain aspects of overall government economic policy, including efforts to reduce unemployment (now in the 8-10% range in urban areas), to rebalance income distribution between urban and rural regions, and to maintain economic growth while protecting the environment and improving social equity.

The National People's Congress approved the amendments when it met in March 2004. The Fifth Plenum in October 2005 approved the 11th Five-Year Economic Program aimed at building a "harmonious society"

through more balanced wealth distribution and improved education, medical care, and social security.

Agriculture

China is the world's most populous country and one of the largest producers and consumers of agricultural products. Over 40% of China's labor force is engaged in agriculture, even though only 10% of the land is suitable for cultivation and agriculture contributes only 13% of China's GDP. China's cropland area is only 75% of the U.S. total, but China still produces about 30% more crops and livestock than the United States because of intensive cultivation, China is among the world's largest producers of rice, corn, wheat, soybeans, vegetables, tea, and pork.

Major non-food crops include cotton, other fibers, and oilseeds. China hopes to further increase agricultural production through improved plant stocks, fertilizers, and technology. Incomes for Chinese farmers are stagnating, leading to an increasing wealth gap between the cities and countryside. Government policies that continue to emphasize grain self-sufficiency and the fact that farmers do not own—and cannot buy or sell—the land they work have contributed to this situation. In addition, inadequate port facilities and lack of warehousing and cold storage facilities impede both domestic and international agricultural trade.

Industry

Industry and construction account for about 46% of China's GDP. Major industries are mining and ore processing; iron; steel; aluminum; coal, machinery; textiles and apparel; armaments; petroleum; cement; chemicals; fertilizers; consumer products including footwear, toys, and electronics; automobiles and other transportation equipment including rail cars and locomotives, ships, and aircraft; and telecommunications.

China has become a preferred destination for the relocation of global manufacturing facilities. Its strength as an export platform has contributed to incomes and employment in China. The state-owned sector still accounts for about 40% of GDP. In recent years, authorities have been giving greater attention to the management of state assets—both in the financial market as well as among state-owned-enterprises—and progress has been noteworthy.

Regulatory Environment

Though China's economy has expanded rapidly, its regulatory environment has not kept pace. Since Deng Xiaoping's open market reforms, the growth of new businesses has outpaced the government's ability to regulate them. This has created a situation where businesses, faced with mounting competition and poor oversight, will be willing to take drastic measures to increase profit margins, often at the expense of consumer safety. This issue acquired more prominence in 2007, with the United States placing a number of restrictions on problematic Chinese exports.

The Chinese Government recognizes the severity of the problem, recently concluding that up to 20% of the country's products are substandard or tainted, and undertaking efforts in coordination with the United States and others to better regulate the problem.

Energy

Together with strong economic growth, China's demand for energy is surging rapidly. In 2003, China surpassed Japan to become the second-largest consumer of primary energy, after the United States. China is the world's second-largest consumer of oil, after the United States, and for 2006, China's increase in oil demand represented 38% of the world total increase in oil demand. China is also the third-largest energy producer in the world, after the United States and Russia. China's electricity consumption is expected to grow by over 4% a year through 2030, which will require more than $2 trillion in electricity infrastructure investment to meet the demand. China expects to add approximately 15,000 megawatts of generating capacity a year, with 20% of that coming from foreign suppliers.

Coal makes up the bulk of China's energy consumption (70% in 2005), and China is the largest producer and consumer of coal in the world. As China's economy continues to grow, China's coal demand is projected to rise significantly. Although coal's share of China's overall energy consumption will decrease, coal consumption will continue to rise in absolute terms. China's continued and increasing reliance on coal as a power source has contributed significantly to putting China on the path to becoming the world's largest emitter of acid rain-causing sulfur dioxide and green house gases, including carbon dioxide.

The 11th Five-Year Program, announced in 2005, calls for greater energy conservation measures, including development of renewable energy sources and increased attention to environmental protection. Moving away from coal towards cleaner energy sources including oil, natural gas, renewable energy, and nuclear power is an important component of China's development program. China has abundant hydroelectric resources; the Three Gorges Dam, for example, will have a total capacity of 18 gigawatts when fully on-line (projected for 2009). In addition, the share of electricity generated by nuclear power is projected to grow from 1% in 2000 to 5% in 2030. China's renewable energy law, which went into effect in 2006, calls for 10% of its energy to come from renewable energy sources by 2020.

Since 1993, China has been a net importer of oil, a large portion of which comes from the Middle East. Net imports are expected to rise to 3.5 million barrels per day by 2010. China is interested in diversifying the sources of its oil imports and has invested in oil fields around the world.

Beijing also plans to increase China's natural gas production, which currently accounts for only 3% of China's

total energy consumption. Analysts expect China's consumption of natural gas to more than double by 2010.

In May 2004, then-Secretary of Energy Spencer Abraham signed a Memorandum of Understanding (MOU) with China's National Development and Reform Commission (NDRC) that launched the U.S.-China Energy Policy Dialogue. The Dialogue has strengthened energy-related interactions between China and the United States, the world's two largest energy consumers.

The U.S.-China Energy Policy Dialogue builds upon the two countries' existing cooperative ventures in high energy nuclear physics, fossil energy, energy efficiency and renewable energy and energy information exchanges. The NDRC and the Department of Energy also exchange views and expertise on Peaceful Uses of Nuclear Technologies, and we convene an annual Oil and Gas Industry Forum with China.

Environment

One of the serious negative consequences of China's rapid industrial development has been increased pollution and degradation of natural resources. Some analysts estimate that China surpassed the United States as the world's largest emitter of carbon dioxide and other greenhouse gases in 2007; many others project it will do so in 2008. A World Health Organization report on air quality in 272 cities worldwide concluded that seven of the world's 10 most polluted cities were in China. According to China's own evaluation, two-thirds of the 338 cities for which air-quality data are available are considered polluted—two-thirds of them moderately or severely so. Respiratory and heart diseases related to air pollution are the leading cause of death in China.

Almost all of the nation's rivers are considered polluted to some degree, and half of the population lacks access to clean water. By some estimates, every day approximately 300 million residents drink contaminated water. Ninety percent of urban water bodies are severely polluted. Water scarcity also is an issue; for example, severe water scarcity in Northern China is a serious threat to sustained economic growth and the government has begun working on a project for a large-scale diversion of water from the Yangtze River to northern cities, including Beijing and Tianjin. Acid rain falls on 30% of the country. Various studies estimate pollution costs the Chinese economy 7%-10% of GDP each year.

China's leaders are increasingly paying attention to the country's severe environmental problems. In 1998, the State Environmental Protection Administration (SEPA) was officially upgraded to a ministry-level agency, reflecting the growing importance the Chinese Government places on environmental protection. In recent years, China has strengthened its environmental legislation and made some progress in stemming environmental deterioration. In 2005, China joined the Asia Pacific Partnership on Clean Development, which brings industries and governments together to implement strategies that reduce pollution and address climate change. During the 10th Five-Year Plan, China plans to reduce total emissions by 10%. Beijing in particular is investing heavily in pollution control as part of its campaign to host a successful Olympiad in 2008. Some cities have seen improvement in air quality in recent years. Additionally, China has pledged to hold the first-ever carbon-neutral Olympic Games.

China is an active participant in climate change talks and other multilateral environmental negotiations, taking environmental challenges seriously but pushing for the developed world to help developing countries to a greater extent. It is a signatory to the Basel Convention governing the transport and disposal of hazardous waste and the Montreal Protocol for the Protection of the Ozone Layer, as well as the Convention on International Trade in Endangered Species and other major environmental agreements.

The question of environmental impacts associated with the Three Gorges Dam project has generated controversy among environmentalists inside and outside China. Critics claim that erosion and silting of the Yangtze River threaten several endangered species, while Chinese officials say the dam will help prevent devastating floods and generate clean hydroelectric power that will enable the region to lower its dependence on coal, thus lessening air pollution.

The United States and China are members of the Asia Pacific Partnership on Clean Development and Climate (APP). The APP is a public-private partnership of six nations—Australia, China, India, Japan, the Republic of Korea, and the United States—committed to explore new mechanisms to meet national pollution reduction, energy security and climate change goals in ways that reduce poverty and promote economic development. APP members have undertaken cooperative activities involving deployment of clean technology in partner countries in eight areas: cleaner fossil energy, renewable energy and distributed generation, power generation and transmission, steel, aluminum, cement, coal mining, and buildings and appliances.

The United States and China have been engaged in an active program of bilateral environmental cooperation since the mid-1990s, with an emphasis on clean energy technology and the design of effective environmental policy. While both governments view this cooperation positively, China has often compared the U.S. program, which lacks a foreign assistance component, with those of Japan and several European Union (EU) countries that include generous levels of aid.

Science and Technology

Science and technology have always preoccupied China's leaders; indeed, China's political leadership comes almost exclusively from technical backgrounds and has a high regard for science. Deng called it "the first productive force." Distortions in the economy and society created by party rule have severely hurt Chinese sci-

ence, according to some Chinese science policy experts. The Chinese Academy of Sciences, modeled on the Soviet system, puts much of China's greatest scientific talent in a large, under-funded apparatus that remains largely isolated from industry, although the reforms of the past decade have begun to address this problem.

Chinese science strategists see China's greatest opportunities in newly emerging fields such as biotechnology and computers, where there is still a chance for China to become a significant player. Most Chinese students who went abroad have not returned, but they have built a dense network of trans-Pacific contacts that will greatly facilitate U.S.-China scientific cooperation in coming years. The U.S. space program is often held up as the standard of scientific modernity in China. China's small but growing space program, which successfully completed their second manned orbit in October 2005, is a focus of national pride.

The U.S.-China Science and Technology Agreement remains the framework for bilateral cooperation in this field. A 5-year agreement to extend the Science and Technology Agreement was signed in April 2006. The Agreement is among the longest-standing U.S.-China accords, and includes over eleven U.S. Federal agencies and numerous branches that participate in cooperative exchanges under the S&T Agreement and its nearly 60 protocols, memoranda of understanding, agreements and annexes. The Agreement covers cooperation in areas such as marine conservation, renewable energy, and health. Biennial Joint Commission Meetings on Science and Technology bring together policy makers from both sides to coordinate joint science and technology cooperation. Executive Secretaries meetings are held biennially to implement specific cooperation programs. Japan and the European Union also have high profile science and technology cooperative relationships with China.

Trade

The U.S. trade deficit with China reached $256.3 billion in 2007, as imports grew 12%. China's share of total U.S. imports has grown from 7% to 16% since 1997. At the same time, the share of many other Asian countries' imports to the United States and the U.S. trade deficit with the Asia-Pacific region as a whole have fallen.

U.S. goods exports to China in 2007 accounted for 5.7% of total U.S. goods exports, up from 1.9% in 1997. The top five U.S. exports to China in 2007 were electrical machinery and equipment (up 4.8% over 2006 levels), power generation equipment (up 15%), air and spacecraft (up 18.2%), oil seeds and oleaginous fruits (up 61.7%), and plastics and plastic articles (up 32.6%).

In December 2007, Treasury Secretary Paulson met with P.R.C. Vice Premier Wu Yi in Beijing for the third round of the Strategic Economic Dialogue (SED), which addresses bilateral issues such as trade, currency, and foreign investment. In November 1991, China joined the Asia-Pacific Economic Cooperation (APEC) group, which promotes free trade and cooperation in the economic, trade, investment, and technology spheres. China served as APEC chair in 2001, and Shanghai hosted the annual APEC leaders meeting in October of that year.

China formally joined the WTO in December 2001. As part of this far-reaching trade liberalization agreement, China agreed to lower tariffs and abolish market impediments. Chinese and foreign businessmen, for example, gained the right to import and export on their own, and to sell their products without going through a government middleman.

By 2005, average tariff rates on key U.S. agricultural exports dropped from 31% to 14% and on industrial products from 25% to 9%. The agreement also opens up new opportunities for U.S. providers of services like banking, insurance, and telecommunications. China has made significant progress implementing its WTO commitments, but serious concerns remain, particularly in the realm of intellectual property rights protection.

China is now one of the most important markets for U.S. exports: in 2007, U.S. exports to China totaled $65.2 billion, more than triple the $19 billion when China joined the WTO in 2001. U.S. agricultural exports have increased dramatically, making China our fourth-largest agricultural export market (after Canada, Japan, and Mexico). Over the same period (2001-2007), U.S. imports from China rose from $102 billion to $321.5 billion.

Export growth continues to be a major driver of China's rapid economic growth. To increase exports, China has pursued policies such as fostering the rapid development of foreign-invested factories, which assemble imported components into consumer goods for export, and liberalizing trading rights. In its eleventh Five-Year Program, adopted in 2005, China placed greater emphasis on developing a consumer demand-driven economy to sustain economic growth and address global imbalances.

The United States is one of China's primary suppliers of power generating equipment, aircraft and parts, computers and industrial machinery, raw materials, and chemical and agricultural products. However, U.S. exporters continue to have concerns about fair market access due to strict testing and standards requirements for some imported products. In addition, a lack of transparency in the regulatory process makes it difficult for businesses to plan for changes in the domestic market structure. The April 11, 2006 U.S.-China Joint Commission on Commerce and Trade (JCCT) produced agreements on key U.S. trade concerns ranging from market access to U.S. beef, medical devices, and telecommunications; to the enforcement of intellectual property rights, including, significantly, software.

The JCCT also produced an agreement to establish a U.S.-China High

Technology and Strategic Trade Working Group to review export control cooperation and facilitate high technology trade.

Foreign Investment

China's investment climate has changed dramatically in a quarter-century of reform. In the early 1980s, China restricted foreign investments to export-oriented operations and required foreign investors to form joint-venture partnerships with Chinese firms. Foreign direct investment (FDI) grew quickly during the 1980s, but slowed in late 1989 in the aftermath of Tiananmen. In response, the government introduced legislation and regulations designed to encourage foreigners to invest in high-priority sectors and regions. Since the early 1990s, China has allowed foreign investors to manufacture and sell a wide range of goods on the domestic market, and authorized the establishment of wholly foreign-owned enterprises, now the preferred form of FDI. However, the Chinese Government's emphasis on guiding FDI into manufacturing has led to market saturation in some industries, while leaving China's services sectors underdeveloped. China is now one of the leading FDI recipients in the world, receiving over $80 billion in 2007 according to the Chinese Ministry of Commerce.

As part of its WTO accession, China undertook to eliminate certain trade-related investment measures and to open up specified sectors that had previously been closed to foreign investment. New laws, regulations, and administrative measures to implement these commitments are being issued. Major remaining barriers to foreign investment include opaque and inconsistently enforced laws and regulations and the lack of a rules-based legal infrastructure.

Opening to the outside remains central to China's development. Foreign-invested enterprises produce about half of China's exports, and China continues to attract large investment inflows. Foreign exchange and gold reserves were $1.493 trillion at the end of 2007, and have now surpassed those of Japan, making China's foreign exchange reserves the largest in the world.

FOREIGN RELATIONS

Since its establishment, the People's Republic has worked vigorously to win international support for its position that it is the sole legitimate government of all China, including Hong Kong, Macau, and Taiwan. In the early 1970s, Beijing was recognized diplomatically by most world powers. Beijing assumed the China seat in the United Nations in 1971 and has since become increasingly active in multilateral organizations. Japan established diplomatic relations with China in 1972, and the United States did so in 1979. As of March 2008, the number of countries that had diplomatic relations with Beijing had risen to 171, while 23 maintained diplomatic relations with Taiwan.

After the founding of the P.R.C., China's foreign policy initially focused on solidarity with the Soviet Union and other communist countries. In 1950, China sent the People's Liberation Army into North Korea to help North Korea halt the UN offensive that was approaching the Yalu River. After the conclusion of the Korean conflict, China sought to balance its identification as a member of the Soviet bloc by establishing friendly relations with Pakistan and other Third World countries, particularly in Southeast Asia.

In the 1960s, Beijing competed with Moscow for political influence among communist parties and in the developing world generally. Following the 1968 Soviet invasion of Czechoslovakia and clashes in 1969 on the Sino-Soviet border, Chinese competition with the Soviet Union increasingly reflected concern over China's own strategic position.

In late 1978, the Chinese also became concerned over Vietnam's efforts to establish open control over Laos and Cambodia. In response to the Vietnamese invasion of Cambodia, China fought a brief border war with Vietnam (February-March 1979) with the stated purpose of "teaching Vietnam a lesson."

Chinese anxiety about Soviet strategic advances was heightened following the Soviet Union's December 1979 invasion of Afghanistan. Sharp differences between China and the Soviet Union persisted over Soviet support for Vietnam's continued occupation of Cambodia, the Soviet invasion of Afghanistan, and Soviet troops along the Sino-Soviet border and in Mongolia—the so-called "three obstacles" to improved Sino-Soviet relations.

In the 1970s and 1980s China sought to create a secure regional and global environment for itself and to foster good relations with countries that could aid its economic development. To this end, China looked to the West for assistance with its modernization drive and for help in countering Soviet expansionism, which it characterized as the greatest threat to its national security and to world peace. China maintained its consistent opposition to "superpower hegemony," focusing almost exclusively on the expansionist actions of the Soviet Union and Soviet proxies such as Vietnam and Cuba, but it also placed growing emphasis on a foreign policy independent of both the United States and the Soviet Union. While improving ties with the West, China continued to follow closely economic and other positions of the Third World nonaligned movement, although China was not a formal member.

In the immediate aftermath of Tiananmen crackdown in June 1989, many countries reduced their diplomatic contacts with China as well as their economic assistance programs. In response, China worked vigorously to expand its relations with foreign countries, and by late 1990, had reestablished normal relations with almost all nations. Following the collapse of the Soviet Union in late 1991, China also opened diplomatic relations with the republics of the former Soviet Union.

In recent years, Chinese leaders have been regular travelers to all parts of the globe, and China has sought a higher profile in the UN through its permanent seat on the United Nations Security Council and other multilateral organizations. Closer to home, China has made efforts to reduce tensions in Asia, hosting the Six-Party Talks on North Korea's nuclear weapons program, cultivating a more cooperative relationship with members of the Association of Southeast Asian Nations (ASEAN), and participating in the ASEAN Regional Forum. China has also taken steps to improve relations with countries in South Asia, including India. Following Premier Wen's 2005 visit to India, the two sides moved to increase commercial and cultural ties, as well as to resolve longstanding border disputes. The November 2006 visit of President Hu was the first state visit by a Chinese head of state to India in 10 years.

China has likewise improved ties with Russia, with Presidents Putin and Hu exchanging visits to Beijing and Moscow in April 2006 and March 2007. A second round of Russia-China joint military exercises was scheduled for fall 2007. China has played a prominent role in the Shanghai Cooperation Organization (SCO), a regional grouping that includes Russia and the Central Asian nations of Kazakhstan, Kyrgyzstan, Tajikistan, and Uzbekistan. Beijing has resolved many of its border and maritime disputes, notably including a November 1997 agreement with Russia that resolved almost all outstanding border issues and a 2000 agreement with Vietnam to resolve differences over their maritime border, though disagreements remain over islands in the South China Sea. Relations with Japan improved following Japanese Prime Minister Shinzo Abe's October 2006 visit to Beijing, and continued to improve under Prime Minister Yasuo Fukuda until his resignation in September 2008., Longstanding and emotionally charged disputes over history and competing claims to portions of the East China Sea remain sources of tension.

While in many ways Sudan's primary diplomatic patron, China has played a constructive role in support of peacekeeping operations in Southern Sudan and pledged 315 engineering troops in support of UN operations in Darfur, all of whom have been deployed China has stated publicly that it shares the international community's concern over Iran's nuclear program and has voted in support of UN sanctions resolutions on Iran. Set against these positive developments has been an effort on the part of China to maintain close ties to countries such as Iran, Sudan, Zimbabwe, and Venezuela, which are sources of oil and other resources and which welcome China's non-conditional assistance and investment.

DEFENSE

Establishment of a professional military force equipped with modern weapons and doctrine was the last of the "Four Modernizations" announced by Zhou Enlai and supported by Deng Xiaoping. In keeping with Deng's mandate to reform, the People's Liberation Army (PLA), which includes the strategic nuclear forces, army, navy, and air force, has demobilized millions of men and women since 1978 and introduced modern methods in such areas as recruitment and manpower, strategy, and education and training.

Following the June 1989 Tiananmen crackdown, ideological correctness was temporarily revived as the dominant theme in Chinese military affairs. Reform and modernization appear to have since resumed their position as the PLA's priority objectives, although the armed forces' political loyalty to the CCP remains a leading concern.

The Chinese military is in the process of transforming itself from a land-based power, centered on a vast ground force, to a smaller, mobile, high-tech military eventually capable of mounting limited operations beyond its coastal borders.

China's power-projection capability is limited but has grown over recent years. China has acquired some advanced weapons systems from abroad, including Sovremmeny destroyers, SU-27 and SU-30 aircraft, and Kilo-class diesel submarines from Russia, and continued to develop domestic production capabilities, such as for the domestically-developed J-10 fighter aircraft. However, much of its air and naval forces continues to be based on 1960s-era technology. As the Defense Department's Quadrennial Defense Review, released February 2006, noted, the United States shares with other countries a concern about the pace, scope, and direction of China's military modernization. We view military exchanges, visits, and other forms of engagement are useful tools in promoting transparency, provided they have substance and are fully reciprocal. Regularized exchanges and contact also have the significant benefit of building confidence, reducing the possibility of accidents, and providing the lines of communication that are essential in ensuring that episodes such as the April 2001 EP-3 aircraft incident do not escalate into major crises. During their April 2006 meeting, President Bush and President Hu agreed to increase officer exchanges and to begin a strategic nuclear dialogue between STRATCOM and the Chinese military's strategic missile command. U.S. and Chinese militaries are also considering ways in which we might cooperate on disaster assistance relief.

Nuclear Weapons. In 1955, Mao Zedong's Chinese Communist Party decided to proceed with a nuclear weapons program; it was developed with Soviet assistance until 1960. After its first nuclear test in October 1964, Beijing deployed a modest but potent ballistic missile force, including land- and sea-based intermediate-range and intercontinental ballistic missiles.

China became a major international arms exporter during the 1980s. Beijing joined the Middle East arms control talks, which began in July 1991 to establish global guidelines for conventional arms transfers, but

announced in September 1992 that it would no longer participate because of the U.S. decision to sell F-16A/B aircraft to Taiwan. China was the first state to pledge "no first use" of nuclear weapons. It joined the International Atomic Energy Agency (IAEA) in 1984 and pledged to abstain from further atmospheric testing of nuclear weapons in 1986. China acceded to the nuclear Non-Proliferation Treaty (NPT) in 1992 and supported its indefinite and unconditional extension in 1995. In 1996, it signed the Comprehensive Test Ban Treaty (CTBT) and agreed to seek an international ban on the production of fissile nuclear weapons material. To date, China has not ratified the CTBT.

In 1996, China committed not to provide assistance to un-safeguarded nuclear facilities. China became a full member of the NPT Exporters (Zangger) Committee, a group that determines items subject to IAEA inspections if exported by NPT signatories.

In September 1997, China issued detailed nuclear export control regulations. China began implementing regulations establishing controls over nuclear-related dual-use items in 1998. China also has committed not to engage in new nuclear cooperation with Iran (even under safeguards), and will complete existing cooperation, which is not of proliferation concern, within a relatively short period. In May 2004, with the support of the United States, China became a member of the Nuclear Suppliers Group. Based on significant, tangible progress with China on nuclear nonproliferation, President Clinton in 1998 took steps to bring into force the 1985 U.S.-China Agreement on Peaceful Nuclear Cooperation.

Chemical Weapons. China is not a member of the Australia Group, an informal and voluntary arrangement made in 1985 to monitor developments in the proliferation of dual-use chemicals and to coordinate export controls on key dual-use chemicals and equipment with weapons applications. In April 1997, however, China ratified the Chemical Weapons Convention (CWC) and, in September 1997, promulgated a new chemical weapons export control directive. In October 2002, China promulgated updated regulations on dual-use chemical agents, and now controls all the major items on the Australia Group control list.

Missiles. Although it is not a member of the Missile Technology Control Regime (MTCR), the multinational effort to restrict the proliferation of missiles, in March 1992 China undertook to abide by MTCR guidelines and parameters. China reaffirmed this commitment in 1994, and pledged not to transfer MTCR-class ground-to-ground missiles. In November 2000, China committed not to assist in any way the development by other countries of MTCR-class missiles.

However, in August 29, 2003, the U.S. Government imposed missile proliferation sanctions lasting two years on the Chinese company China North Industries Corporation (NORINCO) after determining that it was knowingly involved in the transfer of equipment and technology controlled under Category II of the Missile Technology Control Regime (MTCR) Annex that contributed to MTCR-class missiles in a non-MTCR country. In December 2003, the P.R.C. promulgated comprehensive new export control regulations governing exports of all categories of sensitive technologies.

U.S.-CHINA RELATIONS

From Revolution to the Shanghai Communique

As the PLA armies moved south to complete the communist conquest of China in 1949, the American Embassy followed the Nationalist government headed by Chiang Kai-shek, finally moving to Taipei later that year. U.S. consular officials remained in mainland China. The new P.R.C. Government was hostile to this official American presence, and all U.S. personnel were withdrawn from the mainland in early 1950. Any remaining hope of normalizing relations ended when U.S. and Chinese communist forces fought on opposing sides in the Korean conflict.

Beginning in 1954 and continuing until 1970, the United States and China held 136 meetings at the ambassadorial level, first at Geneva and later at Warsaw. In the late 1960s, U.S. and Chinese political leaders decided that improved bilateral relations were in their common interest. In 1969, the United States initiated measures to relax trade restrictions and other impediments to bilateral contact. On July 15, 1971, President Nixon announced that his Assistant for National Security Affairs, Dr. Henry Kissinger, had made a secret trip to Beijing to initiate direct contact with the Chinese leadership and that he, the President, had been invited to visit China.

In February 1972, President Nixon traveled to Beijing, Hangzhou, and Shanghai. At the conclusion of his trip, the U.S. and Chinese Governments issued the "Shanghai Communique," a statement of their foreign policy views. (For the complete text of the Shanghai Communique, see the Department of State Bulletin, March 20, 1972.)

In the Communique, both nations pledged to work toward the full normalization of diplomatic relations. The United States acknowledged the Chinese position that all Chinese on both sides of the Taiwan Strait maintain that there is only one China and that Taiwan is part of China. The statement enabled the United States and China to temporarily set aside the "crucial question obstructing the normalization of relations"—Taiwan—and to open trade and other contacts.

Liaison Office, 1973-78

In May 1973, in an effort to build toward the establishment of formal diplomatic relations, the United States and China established the United States Liaison Office (USLO)

in Beijing and a counterpart Chinese office in Washington, DC. In the years between 1973 and 1978, such distinguished Americans as David Bruce, George H.W. Bush, Thomas Gates, and Leonard Woodcock served as chiefs of the USLO with the personal rank of Ambassador.

President Ford visited China in 1975 and reaffirmed the U.S. interest in normalizing relations with Beijing. Shortly after taking office in 1977, President Carter again reaffirmed the interest expressed in the Shanghai Communique. The United States and China announced on December 15, 1978, that the two governments would establish diplomatic relations on January 1, 1979.

Normalization

In the Joint Communique on the Establishment of Diplomatic Relations dated January 1, 1979, the United States transferred diplomatic recognition from Taipei to Beijing. The United States reiterated the Shanghai Communique's acknowledgment of the Chinese position that there is only one China and that Taiwan is a part of China; Beijing acknowledged that the American people would continue to carry on commercial, cultural, and other unofficial contacts with the people of Taiwan. The Taiwan Relations Act made the necessary changes in U.S. domestic law to permit such unofficial relations with Taiwan to flourish.

U.S.-China Relations Since Normalization

Vice Premier Deng Xiaoping's January 1979 visit to Washington, DC, initiated a series of important, high-level exchanges, which continued until the spring of 1989. This resulted in many bilateral agreements—especially in the fields of scientific, technological, and cultural interchange and trade relations. Since early 1979, the United States and China have initiated hundreds of joint research projects and cooperative programs under the Agreement on Cooperation in Science and Technology, the largest bilateral program.

On March 1, 1979, the United States and China formally established embassies in Beijing and Washington, DC. During 1979, outstanding private claims were resolved, and a bilateral trade agreement was concluded. Vice President Walter Mondale reciprocated Vice Premier Deng's visit with an August 1979 trip to China. This visit led to agreements in September 1980 on maritime affairs, civil aviation links, and textile matters, as well as a bilateral consular convention.

As a consequence of high-level and working-level contacts initiated in 1980, U.S. dialogue with China broadened to cover a wide range of issues, including global and regional strategic problems, political-military questions, including arms control, UN and other multilateral organization affairs, and international narcotics matters. The expanding relationship that followed normalization was threatened in 1981 by Chinese objections to the level of U.S. arms sales to Taiwan. Secretary of State Alexander Haig visited China in June 1981 in an effort to resolve Chinese questions about America's unofficial relations with Taiwan.

Eight months of negotiations produced the U.S.-China joint communique of August 17, 1982. In this third communique, the United States stated its intention to reduce gradually the level of arms sales to Taiwan, and the Chinese described as a fundamental policy their effort to strive for a peaceful resolution to the Taiwan question. Meanwhile, Vice President Bush visited China in May 1982.

High-level exchanges continued to be a significant means for developing U.S.-China relations in the 1980s. President Reagan and Premier Zhao Ziyang made reciprocal visits in 1984. In July 1985, President Li Xiannian traveled to the United States, the first such visit by a Chinese head of state. Vice President Bush visited China in October 1985 and opened the U.S. Consulate General in Chengdu, the fourth U.S. consular post in China. Further exchanges of cabinet-level officials occurred between 1985-89, capped by President Bush's visit to Beijing in February 1989. In the period before the June 3-4, 1989 crackdown, a large and growing number of cultural exchange activities undertaken at all levels gave the American and Chinese peoples broad exposure to each other's cultural, artistic, and educational achievements. Numerous Chinese professional and official delegations visited the United States each month. Many of these exchanges continued after Tiananmen.

Bilateral Relations After Tiananmen

Following the Chinese authorities' brutal suppression of demonstrators in June 1989, the United States and other governments enacted a number of measures to express their condemnation of China's blatant violation of the basic human rights of its citizens. The United States suspended high-level official exchanges with China and weapons exports from the United States to China. The United States also imposed a number of economic sanctions. In the summer of 1990, at the G-7 Houston summit, Western nations called for renewed political and economic reforms in China, particularly in the field of human rights.

Tiananmen disrupted the U.S.-China trade relationship, and U.S. investors' interest in China dropped dramatically. The U.S. Government also responded to the political repression by suspending certain trade and investment programs on June 5 and 20, 1989. Some sanctions were legislated; others were executive actions. Examples include:

- The U.S. Trade and Development Agency (TDA)—new activities in China were suspended from June 1989 until January 2001, when then-President Clinton lifted this suspension.
- Overseas Private Insurance Corporation (OPIC)—new activities suspended since June 1989.
- Development Bank Lending/IMF Credits—the United States does not support development bank lending and will not support IMF

credits to China except for projects that address basic human needs.

- Munitions List Exports—subject to certain exceptions, no licenses may be issued for the export of any defense article on the U.S. Munitions List. This restriction may be waived upon a presidential national interest determination.

- Arms Imports—import of defense articles from China was banned after the imposition of the ban on arms exports to China. The import ban was subsequently waived by the Administration and re-imposed on May 26, 1994. It covers all items on the Bureau of Alcohol, Tobacco, Firearms, and Explosives' Munitions Import List.

In 1996, the P.R.C. conducted military exercises in waters close to Taiwan in an apparent effort at intimidation, after Taiwan's former President, Lee Teng-huei made a private visit to the United States. The United States dispatched two aircraft carrier battle groups to the region. Subsequently, tensions in the Taiwan Strait diminished, and relations between the United States and China have improved, with increased high-level exchanges and progress on numerous bilateral issues, including human rights, nonproliferation, and trade. Former Chinese president Jiang Zemin visited the United States in the fall of 1997, the first state visit to the United States by a Chinese president since 1985. In connection with that visit, the two sides reached agreement on implementation of their 1985 agreement on peaceful nuclear cooperation, as well as a number of other issues. Former President Clinton visited China in June 1998. He traveled extensively in China, and direct interaction with the Chinese people included live speeches, press conference and a radio show, allowing the President to convey first-hand to the Chinese people a sense of American ideals and values.

Relations between the United States and China were severely strained by the tragic accidental bombing of the Chinese Embassy in Belgrade in May 1999. By the end of 1999, relations began to gradually improve. In October 1999, the two sides reached agreement on humanitarian payments for families of those who died and those who were injured as well as payments for damages to respective diplomatic properties in Belgrade and China. Relations further cooled when, in April 2001, a Chinese F-8 fighter collided with a U.S. EP-3 reconnaissance aircraft flying over international waters south of China. The EP-3 was able to make an emergency landing on China's Hainan Island despite extensive damage; the P.R.C. aircraft crashed with the loss of its pilot. Following extensive negotiations, the crew of the EP-3 was allowed to leave China 11 days later, but the U.S. aircraft was not permitted to depart for another 3 months.

Subsequently, the relationship gradually improved. President George W. Bush visited China in February 2002 and met with President Jiang Zemin in Crawford, Texas in October. President Bush hosted Premier Wen Jiabao in Washington in December 2003. President Bush first met Hu Jintao in his new capacity as P.R.C. President on the margins of the G-8 Summit in Evian in June 2003, and at subsequent international fora, such as the September 2004 APEC meeting in Chile, the July 2005 G-8 summit in Scotland, and the September 2005 UN General Assembly meetings in New York. President Bush traveled to China in November 2005, an official visit that was reciprocated in April 2006 when President Hu met with President Bush in Washington.

U.S. China policy has been consistent. For seven consecutive administrations, U.S. policy has been to encourage China's opening and integration into the global system. As a result, China has moved from being a relatively isolated and poor country to one that is a key participant in international institutions and a major trading nation. The United States encourages China to play an active role as a responsible stakeholder in the international community, working with the United States and other countries to support and strengthen the international system that has enabled China's success. As Secretary of State Condoleezza Rice has noted, "America has reason to welcome a confident, peaceful, and prosperous China. We want China as a global partner, able and willing to match its growing capabilities to its international responsibilities." Deputy Secretary John D. Negroponte and other senior State Department officials engage in regular and intensive discussions with their P.R.C. counterparts through the U.S.-China Senior Dialogue. The Senior Dialogue covers the entire range of issues in the bilateral relationship, as well as global issues of shared concern.

China has an important role to play in global, regional, and bilateral counterterrorism efforts, and has supported coalition efforts in Afghanistan and Iraq. Following the September 11, 2001 terrorist attacks (9-11) in New York City and Washington, DC, China offered strong public support for the war on terrorism and has been an important partner in U.S. counterterrorism efforts. Shortly after 9-11, the United States and China also commenced a counterterrorism dialogue, the most recent round of which was held in Washington in November 2005 and focused on the threat of WMD falling into the hands of terrorists. Inspections under the Container Security Initiative (CSI) are now underway at the major ports of Shenzhen, Shanghai, and Hong Kong. China has also agreed to participate in the Department of Energy's Megaports Initiative, a critical part of our efforts to detect the flow of nuclear materials. China voted in favor of UN Security Council Resolution 1373, publicly supported the coalition campaign in Afghanistan, and contributed $150 million of bilateral assistance to Afghan reconstruction following the defeat of the Taliban. China participated in both the Iraq Neighbors and International Compact with Iraq meetings in 2007 and has voiced strong support for the Government of Iraq following the country's December 2005 parliamentary elections. China has pledged $25

million to Iraqi reconstruction and taken measures to forgive Iraq's sovereign debt to China.

The United States and China have cooperated with growing effectiveness on various aspects of law enforcement, including computer crime, intellectual property rights enforcement, human smuggling, and corruption. The most recent meeting of the U.S.-China Joint Liaison Group on law enforcement cooperation took place in Washington in June 2007.

China and the United States have also been working closely with the international community to address threats to global security, such as those posed by North Korea and Iran's nuclear programs. China has played a constructive role in hosting the Six-Party Talks and in brokering the February 2007 agreement on Initial Actions. The United States looks to Beijing to use its unique influence with Pyongyang to ensure that North Korea implements fully its commitments under the September 2005 Statement of Principles. China has publicly stated that it does not want Iran to acquire nuclear weapons and has voted in support of sanctions resolutions on Iran at UN Security Council. On these and other important issues, such as the ongoing humanitarian crisis in Darfur, the United States expects China to join with the international community in finding solutions. China's participation is critical to efforts to combat transnational health threats such as avian influenza and HIV/AIDS, and both the United States and China play an important role in new multilateral energy initiatives, such as the Asia-Pacific Partnership.

While the United States looks forward to a constructive and broad-based relationship with China—a message reiterated by President Bush when he met with President Hu in April 2006 in Washington—there remain areas of potential disagreement. The United States does not support Taiwan independence and opposes unilateral steps, by either side, to change the status quo. At the same time, the United States has made it clear that cross-strait differences should be resolved peacefully and in a manner acceptable to people on both sides of the Strait.

At various points in the past several years, China's has expressed concern about the United States making statements on the political evolution of Hong Kong and has stressed that political stability there is paramount for economic growth. The NPC's passage of an Anti-Secession law in March 2005 was viewed as unhelpful to the cause of promoting cross-Strait and regional stability by the United States and precipitated critical high-level statements by both sides.

U.S.-China Economic Relations

U.S. direct investment in China covers a wide range of manufacturing sectors, several large hotel projects, restaurant chains, and petrochemicals. U.S. companies have entered agreements establishing more than 20,000 equity joint ventures, contractual joint ventures, and wholly foreign-owned enterprises in China. More than 100 U.S.-based multinationals have projects in China, some with multiple investments. Cumulative U.S. investment in China is estimated at $57 billion, through the end of 2007, making the United States the sixth-largest foreign investor in China.

Total two-way trade between China and the United States grew from $33 billion in 1992 to over $386 billion in 2007. The United States is China's second-largest trading partner, and China is now the third-largest trading partner for the United States (after Canada and Mexico). U.S. exports to China have been growing more rapidly than to any other market (up 21% in 2005, 32% in 2006, and 18% in 2007). U.S. imports from China grew 12% in 2007, bringing the U.S. trade deficit with China to $256 billion. Some of the factors that influence the U.S. trade deficit with China include:

- A shift of low-end assembly industries to China from the newly industrialized economies (NIEs) in Asia. China has increasingly become the last link in a long chain of value-added production. Because U.S. trade data attributes the full value of a product to the final assembler, Chinese value-added gets overcounted.

- Strong U.S. demand for Chinese goods.

- China's restrictive trade practices, which have included an array of barriers to foreign goods and services, often aimed at protecting state-owned enterprises. Under its WTO accession agreement, China is reducing tariffs and eliminating import licensing requirements, as well as addressing other trade barriers.

The U.S. approach to its economic relations with China has two main elements.

First, the United States seeks to fully integrate China into the global, rules-based economic and trading system. China's participation in the global economy will nurture the process of economic reform, encourage China to take on responsibilities commensurate with its growing influence, and increase China's stake in the stability and prosperity of East Asia.

Second, the United States seeks to expand U.S. exporters' and investors' access to the Chinese market. As China grows and develops, its needs for imported goods and services will grow even more rapidly. The U.S. Government will continue to work with China's leadership to ensure full and timely conformity with China's WTO commitments—including effective protection of intellectual property rights—and to encourage China to move to a flexible, market-based exchange rate in order to further increase U.S. exports of goods, agricultural products, and services to the P.R.C.

In order to achieve these objectives, the United States has engaged with China in the Strategic Economic Dialogue (SED). The SED is a biannual event, focusing on three major themes:

- Maintaining sustainable growth without large trade imbalances;
- Continued opening of markets to trade, competition, and investment;
- Cooperation on energy security, energy efficiency, and the environmental and health impacts.

The SED is based on recognition by both China and the United States of our mutual interest in strengthening the global economy, addressing global imbalances, and promoting energy security and environmentally sustainable growth. Secretary of the Treasury Hank Paulson led the U.S. delegation during both previous SEDs, while Vice Premier Wu Yi led the Chinese delegation. The third SED is expected to take place in Beijing in December 2007.

TRAVEL

Consular Information Sheet

November 26, 2008

Country Description: The People's Republic of China was established on October 1, 1949, with Beijing as its capital city. With well over 1.3 billion citizens, China is the world's most populous country and the third largest country in the world in terms of territory. China is undergoing rapid, profound economic and social change and development.

Political power remains centralized in the Chinese Communist Party. Modern tourist facilities are available in major cities, but many facilities in

smaller provincial cities and rural areas are frequently below international standards.

Entry Requirements: A valid passport and visa are required to enter and exit China and must be obtained from Chinese Embassies and Consulates before traveling to China. Americans arriving without valid passports and the appropriate Chinese visa are not permitted to enter and will be subject to a fine and immediate deportation at the traveler's expense. Travelers should not rely on Chinese host organizations claiming to be able to arrange a visa upon arrival. Chinese authorities have recently tightened their visa issuance policy, in some cases requiring personal interviews of American citizens. Although a bilateral United States-China agreement provides for issuance of multiple-entry visas with validity of up to one year for tourists and business visitors, Chinese consulates often limit visas to only one entry. Visit the Embassy of China web site at http://www.china-embassy.org/eng/ for the most current visa information.

Visas are not required of aliens who hold air tickets to the final destination, have booked seats on international airliners flying directly through China, and will stay in a transit city for less than 24 hours without leaving the airport. Persons transiting China on the way to and from Mongolia or North Korea or who plan to re-enter China from the Hong Kong or Macau Special Administrative Regions should be sure to obtain visas allowing more than one entry. Permits are required to visit Tibet as well as many remote areas not normally open to foreigners. A travel permit for Tibet can be obtained through local travel agents. Permits cost approximately renminbi (RMB) 100, are single-entry and valid for at most three months. Most areas in Tibet are not open for foreigners except Lhasa City and part of Shan Nan. Foreigners can be fined up to RMB 500, taken into custody, and deported for visiting restricted areas. For information about entry requirements and restricted areas, travelers may consult the Visa Office of the Embassy of China (PRC) at Room 110, 2201 Wisconsin Avenue, NW, Washington DC 20007, or telephone (202) 338-6688 and (202) 588-9760. For a list of services and frequently asked visa questions and answers, travelers can view the Chinese Embassy's web site at http://www.china-embassy.org/eng. There are Chinese consulates general in Chicago, Houston, Los Angeles, New York, and San Francisco. Since the run-up to the Olympics, some Americans have reported having difficulty getting visas in Seoul, South Korea or Hong Kong.

In July 2007, the Chinese government tightened its regulations for altering or renewing visas for individuals already in China. Visitors can no longer change tourist (L) and exchange (F) -type visas to other types and many applications must now be completed in person. There have also been reports that entry and exit violations are being more strictly enforced, with recent reports of police, school administrators and hotel staff checking to ensure that individuals have not overstayed their visas. Visitors are expected to register with the police within 24 hours of arrival in China. While hotels generally do this automatically with no additional action being required from the guest, Americans planning on staying in private homes with family or friends must go to their local police station to register. The police have been stricter in the enforcement of this rule and have fined apartment companies, hotels and Americans for violations.

Americans who overstay or otherwise violate the terms of their Chinese visas will be subject to a maximum fine of 5,000 RMB, departure delays and may be subject to detention. Travelers should note that international flights departing China are routinely overbooked, making reconfirmation of departure reservations and early airport check-in essential. An airport user fee for both international and domestic flights is now included in the cost of the ticket price. Americans are also required to have an exit visa to leave China. Americans who lose a passport must take into consideration the time needed to get a new passport and a new visa. Visa issuances can take as long as 7 business days.

In an effort to prevent international child abduction, many governments have initiated new procedures at entry/ exit points. These often include requiring documentary evidence of relationship and permission for the child's travel from the parent(s) or legal guardian if they are not present. Having such documentation on hand, even if not required, may facilitate entry/departure.

Dual national Americans, particularly those with dual Chinese and American nationality, should realize that entering China using their non-U.S. passport could mean that the Chinese Government may not afford them the consular protections to which they are entitled. While the U.S. Government will offer consular services to all U.S. citizens regardless of dual nationality, use of other than a U.S. passport to enter China can make it difficult for U.S. Consuls to assist dual national Americans who have been arrested or who have other concerns with the Chinese Government.

China does not recognize dual citizenship. U.S. Embassy and Consulate officials are often denied access to arrested or detained Americans who do not enter China using their U.S. passport. Lawful Permanent Residents of the United States who do not carry unexpired or otherwise clear evidence that they may re-enter the United States will encounter delays departing from China. Lawful Permanent Residents should renew and update U.S. residence documentation prior to their departure from the United States.

Safety and Security: Americans visiting or residing in China are advised to take routine safety precautions; that is, travelers should remain aware of their surroundings and of events happening around them. Travelers should respect local police requirements to avoid travel in some areas. In light of the greatly increased numbers of older Americans traveling to China, Americans

should verify with U.S. tour operators that local guides being used are familiar with medical facilities and emergency medical evacuation procedures. American citizens who rent apartments with gas appliances should be aware that, in some areas, natural gas is not scented to warn occupants of gas leaks or concentrations. In addition, heaters may not always be well vented, thereby allowing excess carbon monoxide to build up in living spaces. Due to fatal accidents involving American citizens, travelers are advised to ensure all gas appliances are properly vented or to install gas and carbon monoxide detectors in their residences. These devices are not widely available in China and should be purchased prior to arrival.

Security personnel may at times place foreign visitors under surveillance. Hotel rooms, telephones, and fax machines may be monitored, and personal possessions in hotel rooms, including computers, may be searched without the consent or knowledge of the traveler. Taking photographs of anything that could be perceived as being of military or security interest may result in problems with authorities. Foreign government officials, journalists, and business people with access to advanced proprietary technology are particularly likely to be under surveillance.

Terrorism is rare in China, although a small number of bombings have occurred in areas throughout China. Recent bombings have generally been criminal in nature, frequently the result of commercial disputes. The vast majority of these local incidents related to disputes over land seizures, social issues or environmental problems. While some incidents have grown to larger scales and involved some violence, these incidents have not been directed against foreigners.

Business disputes in China are not always handled through the courts. Sometimes the foreign partner has been held hostage, threatened with violence, or beaten up. Anyone entering into a contract in China should have it thoroughly examined, both in the United States and in China. Contracts entered into in the United States are not enforced by Chinese courts. Care should also be taken when entering into a lease for an apartment or house. There have been instances of foreigners being ejected from their apartments because of lease disputes, and being prevented from re-entering, even to retrieve their belongings.

Americans doing business in China should be aware that if they become involved in a business and/or civil dispute, the Chinese government may prohibit them from leaving China until the matter is resolved. Civil cases may sometimes be regarded as criminal cases and the defendant may be placed in custody. Civil law disputes may take years to resolve. There are many cases of American citizens being prevented from leaving China for months and even years while their civil cases are resolved. U.S. citizens and business owners should be aware that many intending migrants from China will try to enlist their assistance to secure a U.S. visa. In one common scheme, a PRC national contacts a U.S. business feigning interest in a particular product or service. The PRC national then asks for a formal letter from the U.S. company inviting him or her (alone or with colleagues) to come to the United States to discuss or finalize a purchase, or establish formal cooperation between the two companies. The PRC national will then use the invitation letter when he or she applies for a U.S. visa to show he/ she has a legitimate purpose of travel. While many such requests may be legitimate, some are not. Oftentimes, the PRC national initiating the contact has no relationship to his/her claimed Chinese employer. In fact, it is not unusual for these individuals to be part of elaborate human smuggling syndicates. Visa Sections at the U.S. Embassy and Consulates in China are regularly contacted by U.S. businesses that unwittingly have been used to facilitate illicit migration schemes.

For the latest security information, Americans traveling abroad should regularly monitor the Department's web site, where the current Worldwide Caution Travel Alert, Middle East and North Africa Travel Alert, Travel Warnings and other Travel Alerts can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S. and Canada, or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: China has a low crime rate. Pickpockets target tourists at sightseeing destinations, open-air markets, airports, and in stores, often with the complicity of low-paid security guards. Americans are perceived as wealthy and may be specifically targeted by petty criminals. Violence against foreigners, while rare, is on the increase. Over the past year, incidents of violence against foreigners, including sexual assaults, have taken place, usually in urban areas where bars and nightclubs are located. Robberies, sometimes at gunpoint, have occurred in western China and more recently in Beijing. There have been some reports of robberies and assaults along remote mountain highways near China's border with Nepal. Travelers are sometimes asked by locals to exchange money at a preferential rate. It is illegal to exchange dollars for RMB except at banks, hotels, and official exchange offices. Due to the large volume of counterfeit currency in China, unofficial exchanges usually result in travelers losing their money and possibly facing charges of breaking foreign exchange laws. If detained by police under suspicion of committing an economic crime involving currency, travelers may be delayed for weeks or months while police investigate the allegations.

Recently, there have been instances in Beijing and elsewhere of mobs in bar districts attacking foreigners. Nationalism is on the rise, and disputes among Chinese citizens or between Chinese and foreigners can quickly escalate. Caution should be exercised when visiting bar districts late at night, especially on weekends. There have been reports of bar fights in which Americans have been specifically targeted due their nationality.

Simple arguments can turn into mob scenes and many times have resulted in the American being detained for hours for questioning with no right to an attorney or consular officer at that stage. Bar fights are often punished by administrative detention in a local jail for up to two weeks, usually followed by deportation.

Travelers should have small bills (RMB 10, 20 and 50 notes) for travel by taxi. Reports of taxi drivers using counterfeit money to make change for large bills are increasingly common, especially in Guangzhou. Arguments with taxi drivers over fares or over choice of route usually are not easily resolved on the scene. In some cases, Americans who instigate such arguments have been detained for questioning and have not been released until the fare is paid or a settlement is reached and the American offers an apology. There has been an increase in the number of Americans falling victim to scams involving the inflation of prices for tea and other drinks. Normally, the scam involves young people who approach English speaking tourists and ask to have a cup of tea with them to practice their English. When the bill comes for the tea, the charge has been inflated to an exorbitant amount. When the tourist complains, enforcers arrive to collect the money. A similar scam involves buying drinks for young women at local bars.

Throughout China, women outside hotels in tourist districts frequently use the prospect of companionship or sex to lure foreign men to isolated locations where accomplices are waiting for the purpose of robbery. Travelers should not allow themselves to be driven to bars or an individual's home unless they know the person making the offer. Hotel guests should refuse to open their room doors to anyone they do not know personally.

The Embassy has received some reports of fraud committed against U.S. citizens through the Internet with the intent of securing a visa to the United States or money. A common scenario involves a Chinese national who hires a consulting company to communicate with an American citizen on his/her behalf. The intent of the Chinese national is not always clear; however, the business models of many of these companies are reliant on the American citizen ultimately sending money to the Chinese national for expenses, such as English study, not knowing that the money is going to the "consultant" instead. The American citizen may unwittingly carry on telephone conversations with a paid consultant posing as the romantic interest. In some cases, the American citizen may travel to China to meet his/her Internet friend in person, a visa consultant accompanies the Chinese friend and presents the American with a demand for payment of thousands of dollars in fees. At times, when the American citizen has refused to pay, s/he has been threatened with physical violence or unlawful detention. Another common scenario involves a Chinese person who will claim he/she or a close family member has been kidnapped or had a large sum of money stolen and asks the American to wire them money. We want to remind American citizens that no one should provide personal or financial information to unknown parties. For additional information on these types of scams, see the Department of State's publication, International Financial Scams.

Relationship fraud via the Internet is also a growing industry. While many Chinese citizens are sincere in their desire to marry and live with Americans they meet over the Internet, some are not. It is important to remember that immigrant visas to the United States are viewed by many Chinese as having a great deal of value, and it is not uncommon for people to enter into relationships for the sole purpose of obtaining a visa.

Unfortunately, the Embassy is unable to carry out investigations of relationships of this sort, but all Americans are urged to approach such Internet relationships with caution, and to be wary of situations which appear similar to that described above.

Recently, American visitors have encountered scams at the international airports in China whereby individuals appearing to work for the airport offer to take American tourists' bags to the departure area, but instead they carry the bags to another area and insist that the visitor pay an airport tax. Travelers should be advised that the airport tax is now included in the price of the airline ticket. The airport police or security officers should be contacted if this happens.

The U.S. Embassy is aware of reports that airport thefts and robberies of travelers in China are on the rise, specifically in the domestic airports of Beijing, Zhengzhou, Shenyang, Dalian, Qingdao and Taiyuan. Additionally, some Americans report that they have been the victims of robberies while in their hotel rooms in tourist areas and some have been assaulted during these robberies. American visitors to China should carry their passports with them out of reach of pickpockets. Americans with Chinese residence permits (juliuzheng) should carry these documents, and leave their passports in a secure location except when traveling. All Americans are encouraged to make photocopies of their passport bio-data pages and Chinese visas and to keep these in a separate, secure location, and to register with the U.S. Embassy or nearest Consulate General.

In many countries around the world, counterfeit and pirated goods are widely available. Transactions involving such products may be illegal under local law. In addition, bringing them back to the United States may result in forfeitures and/or fines. More information on this serious problem is available at http://www.cybercrime.gov/18usc2320.htm.

Information for Victims of Crime:
The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropri-

ate medical care, contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

China has a system similar to "911" in the United States which the Chinese can use to contact police or other emergency services. Americans can call 110 while in China to reach this service; however, there are few to no English speakers working for this hotline.

English Teachers/Secondary School Teachers: Many Americans have enjoyed their teaching experience in China; others have encountered significant problems. Prospective teachers are encouraged to read the Teaching in China Guide on Embassy Beijing's American Citizen Services web site at http://beijing.usembassy-china.org.cn/teach.html. To assist the Embassy in providing up-to-date information to prospective teachers, Americans experiencing problems should inform the Embassy by contacting the American Citizens Services Unit at telephone (86) (10) 8531-4000, or via e-mail at: AmCitBeijing@state.gov.

Medical Facilities and Health Information: The standards standards of medical care in China are not equivalent to those in the United States. Medical facilities with international staffs are available in Beijing, Shanghai, Guangzhou and a few other large cities. Many other hospitals in major Chinese cities have so-called VIP wards (gaogan bingfang). These feature reasonably up-to-date laboratory and imaging facilities. The physicians in these centers are generally well-trained. Most VIP wards also provide medical services to foreigners and have English-speaking doctors and nurses. Most hospitals in China will not accept medical insurance from the United States, with the exception of the following hospitals, which are on the Blue Cross Blue Shield's worldwide network providers - overseas network hospitals' list (http://www.bcbs.com/bluecardworldwide/index.html): Hong Kong Adventist Hospital, Beijing United Family Hospital, Beijing Friendship Hospital, International Medical Center in Beijing, and Peking Union Medical Center. Cash payment for services is often demanded before a patient is seen and treated, sometimes even in cases of emergency. Travelers will be asked to post a deposit prior to admission to cover the expected cost of treatment. Hospitals in major cities may accept credit cards for payment. Even in the VIP/foreigner wards of major hospitals, however, American patients have frequently encountered difficulty due to cultural, language, and regulatory differences. Physicians and hospitals have sometimes refused to supply American patients with complete copies of their Chinese hospital medical records, including laboratory test results, scans, and x-rays. Travelers should note that commonly used American medication is generally not available in China. Medications that bear the same or similar name to prescription medication from the United States are not always the same. Americans should make sure to carry their prescriptions from their doctors if carrying prescription medication into China for personal use.

Ambulances do not carry sophisticated medical equipment. Injured or seriously ill Americans may be required to take taxis or other immediately available vehicles to the nearest major hospital rather than waiting for ambulances to arrive. Generally, in rural areas, only rudimentary medical facilities are available, often with poorly trained medical personnel who have little medical equipment and medications. Rural clinics are often reluctant to accept responsibility for treating foreigners, even in emergency situations.

International SOS operates modern medical and dental clinics and provides medical evacuation and medical escort services in Beijing, Nanjing, Tianjin, Shekou and Ulaanbaatar, as well as 24hr Alarm Centers in Beijing and Hong Kong. Through its clinics in Beijing (24 hours), Tianjin, Nanjing and Shekou, International SOS offers international standard family practice services, emergency medical services and a range of clinical services. For medical emergencies anywhere in mainland China, Americans can call the International SOS 24-hour "Alarm Center" in Beijing at telephone: (86) (10) 6462-9100 for advice and referrals to local facilities. International SOS "Alarm Centers" can also be contacted in Hong Kong at telephone: (852) 2528-9900 and in the United States at: (215) 942-8226. For a full list of International SOS locations and phone numbers, consult the SOS web site at http://www.internationalsos.com. The U.S. Embassy and Consulates in China maintain lists of local English-speaking doctors and hospitals, all of which are published on their respective ACS web pages at http://beijing.usembassy-china.org.cn. Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's website at http://wwwn. cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith/en.

Tuberculosis is an increasingly serious health concern in China. For further information, please consult the CDC's Travel Notice on TB http://wwwn.cdc.gov.

Alternative Medical Treatments: There have been increasing numbers of foreigners coming to China to receive alternative medical treatments or procedures prohibited in the United States relating specifically to stem-cell research. Any person contemplating these treatments should be fully aware of the risks of such procedures. The treatments can be dangerous and untested. The results are not guaranteed. In many instances, patients going for treatment develop

secondary infections that cannot be handled by these facilities. They are transferred to hospitals for treatment and are responsible for all additional costs, including repatriation back to the United States. In some cases, these treatments have resulted in death.

Medical Insurance: China has no public healthcare system to provide for people without insurance or money. If you become sick or injured, you will be expected to pay for your bills, sometimes even before treatment is offered. The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning China is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

The rate of traffic accidents in China, including fatal accidents, is among the highest in the world. Driving etiquette in China is still developing. As a result, traffic is often chaotic, and right-of-way and other courtesies are often ignored. Travelers should note that cars and buses traveling in the wrong lanes frequently hit pedestrians and bicyclists. Pedestrians should always be careful while walking near traffic. Road/traffic conditions are generally safe if occupants of modern passenger vehicles wear seatbelts. Most traffic accident injuries involve pedestrians or cyclists who are involved in collisions or who encounter unexpected road hazards (e.g., unmarked open manholes). Foreigners with resident permits can apply for PRC driver licenses; however, liability issues often make it preferable to employ a local driver. Child safety seats are not widely available in China. Americans who wish to ride bicycles in China are urged to wear safety helmets meeting U.S. standards. The number of American citizens involved in serious and deadly traffic accidents in Beijing is increasing. The Embassy strongly encourages travelers to exercise special caution when crossing streets in China's cities as pedestrians do not have the right-of-way. Please note that many taxi cabs do not have functioning seatbelts for passengers. All drivers should be aware of the Chinese regulations regarding traffic accidents. Although a recent law states that drivers involved in a traffic accident should move their cars to the side of the road as soon as possible, in practice, the police often conduct investigations on the scene of the accident with the cars in their original positions. Americans who cannot express themselves clearly in Chinese should call the police as soon as possible after an accident and wait to move the cars until the police permit it. If called to an accident, the police may take 20 minutes or longer to arrive. Once the police arrive, they will complete a preliminary investigation and arrange a time for you to report to the police station responsible for the accident scene. The police will prepare a written report, in Chinese, describing the circumstances of the accident. They will present the report to you either at the scene, or more likely at the police station, and ask you to sign it verifying the details of the accident. Do not sign the report as is unless your Chinese is good enough to completely understand the report and you find it totally accurate. If you either do not understand it or believe it is partly or wholly inaccurate, you may either:

- Write a disclaimer on the report to the effect that you cannot read and understand the report and cannot attest to the accuracy thereof, but are signing it because of the police requirement that you do so, and then sign, or

- Write your own version of the accident, in English, on the police form and indicate that your signature only attests to the accuracy of the English version.

Most incidents (such as an accident) will draw a crowd. Drivers should remain calm. A crowd will usually move in very close to the accident and participants. In many cases the bystanders consider themselves to be an ad hoc jury. They may call for money, usually from RMB 100 to 1,000, to be paid by the party they consider at fault. The amount is not necessarily relevant to the amount of damage. A certain amount of bargaining is normal, even at accidents involving two Chinese parties. Though a crowd may seem threatening, crowd assaults on foreigners at accidents have not been reported. If a traffic police booth is nearby, you may wish to leave the vehicle and walk there to await the arrival of the police accident team. Alternatively, you may walk to a shop, restaurant, or other location nearby in the immediate vicinity and wait for police.

Your vehicle should not leave the scene of an accident. Your actions may serve to further incite the crowd if they perceive that you are fleeing to evade responsibility for your share of blame or payment of damages. The crowd may attempt to keep your vehicle at the accident scene by standing in the way or blocking the roadway with vehicles, bicycles and other objects.

Aviation Safety Oversight: The U.S. Federal Aviation Administration (FAA) has assessed the Government ofChina's Civil Aviation Authority as being in compliance with International Civil Aviation Organization (ICAO) aviation safety standards for oversight of China's air carrier operations. For more information, travelers may visit the FAA's web site at http://www.faa.gov.

The Chinese have recently changed their security regulations for international and domestic travel. Please check with the airlines and the airports for the most up-to-date information, or check the Beijing Capital Airport website at http://en.bcia.com.cn.

Special Circumstances: Chinese customs authorities may enforce strict regulations concerning temporary importation into or export from China of items such as antiquities,

banned publications, religious literature (which may be imported for the visitor's personal use only), or vehicles not conforming to Chinese standards. It is advisable to contact the Embassy of China in Washington or one of China's consulates in the United States for specific information regarding customs requirements.

Some Americans report that items purchased in China and believed to be antiques or genuine gems are often later determined to be reproductions. Some travelers report that this occurs even at state-owned stores and museum stores.

Travel agencies and tour guides will often escort tour groups to particular shops at which the travel agency or tour guide will share in the profit, and may claim to guarantee the "authenticity" of items sold in those shops. Travelers are warned to be vigilant when purchasing items in China. China's customs authorities encourage the use of an ATA (Admission Temporaire/Temporary Admission) Carnet for the temporary admission of professional equipment, commercial samples, and/or goods for exhibitions and fair purposes. ATA Carnet Headquarters, located at the U.S. Council for International Business, 1212 Avenue of the Americas, New York, NY 10036, issues and guarantees the ATA Carnet in the United States. For additional information call (212) 354-4480, send an e-mail to atacarnet@uscib.org, or visit www.uscib.org for details.

Disaster Preparedness: The southeast coast of China is vulnerable to strong typhoons, usually from July to September. Travelers planning a trip to China can obtain general information about natural disaster preparedness on the Internet from the U.S. Federal Emergency Management Agency (FEMA) at http://www.fema.gov. Additional information about currently active typhoons can be obtained on the University of Hawaii tropical storm page at http://www.solar.ifa.hawaii.edu/Tropical/tropical.html.

On May 12, 2008, China's Sichuan province experienced a severe earthquake resulting in the deaths of the tens of thousands of people. The region continues to experience aftershocks, and Americans should continue to avoid the areas of Sichuan province most severely affected by the earthquake and be prepared for travel delays in other parts of the province. Recovery and restoration operations in the area are ongoing; infrastructure has been damaged and road, air and rail transportation disrupted.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which, in China, differ significantly from those in the United States and do not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating China's laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession of, use of, or trafficking in illegal drugs in China are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

On March 1, 2006, a new Public Security Law went into effect that gives police new powers relating to the commission of a wide range of offenses, including the authority to detain and deport foreigners. The list of offenses has been expanded to include certain religious activities and prostitution-related crimes.

Americans in China, who are not staying at hotels, including Americans who are staying with friends or relatives, must register with local police as soon as they arrive. Otherwise, they may be fined up to 500 RMB per day.

Americans who are questioned by police should immediately notify the U.S. Embassy or the nearest consulate. Foreigners detained for questioning may not be allowed to contact their national authorities until the questioning is concluded. Foreigners who are detained pending trial have often waited over a year for their trial to begin. Foreigners suspected of committing a crime are rarely granted bail. Criminal punishments, especially prison terms, are much more severe than those in the United States. Several Americans currently incarcerated in China have been implicated in financial fraud schemes involving falsified bank or business documents, tax evasion schemes and assisting alien smuggling, including selling passports to provide aliens with travel documents.

In the past, protesters detained for engaging in pro-Falun Gong activities have been quickly deported from China after being questioned. Several of these protesters alleged they were physically abused during their detention. In addition, they allege that personal property, including clothing, cameras, and computers have not always been returned to them upon their deportation. Chinese authorities report that while they have deported these foreigners quickly after public demonstrations in favor of the Falun Gong, future adherents who intentionally arrive in China to protest against Chinese policy may receive longer terms of detention and possibly face prison sentences. In one instance, an American Falun Gong practitioner who was traveling in China on personal business was detained and asked to provide information on other Falun Gong sympathizers in the United States.

Several Americans have been detained and expelled for passing out non-authorized Christian literature. Sentences for distributing this material may range from three to five years imprisonment, if someone is convicted. Chinese customs authorities have enforced strict regulations concerning importation into China of religious literature, including bibles. Foreigners may import only a "reasonable" amount of religious literature, which is for personal use only. Larger quantities will likely be confiscated and other penalties may apply.

Children's Issues: Americans involved in child custody disputes with Chinese national spouses should be aware that Chinese courts may give preference to the Chinese citizen spouse and that Americans may encounter limited appeal opportunities under the current legal system. For information on international adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov/family.

Registration and Embassy Locations: Americans living or traveling in China are encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration web site so that they can obtain updated information on travel and security within China. Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency.

Beijing: The U.S. Embassy is located at No. 2 Xiu Shui Dong Jie, Chaoyang District, Beijing. The American Citizen Services section can be reached at (86)(10) 6532-3431 (8:30-12:00 a.m. and 2:00-4:00 p.m., Mon-Fri) or after hours at (86)(10) 6532-1910. For detailed information please visit the U.S. Embassy's web site at http://beijing.usembassy-china.org.cn. The Embassy consular district includes the following provinces/regions of China: Beijing, Tianjin, Shandong, Shanxi, Inner Mongolia, Ningxia, Shaanxi, Qinghai, Xinjiang, Hebei, Henan, Hubei, Hunan, and Jiangxi.

Chengdu: The U.S. Consulate General in Chengdu is located at Number 4, Lingshiguan Road, Section 4, Renmin Nanlu, Chengdu 610041, tel. (86)(28) 8558-3992, 8555-3119, after hours (86)(28) 1370 8001 422, and email at consularchengdu@state.gov. This consular district includes the following provinces/regions of China: Guizhou, Sichuan Xizang (Tibet), and Yunnan, as well as the municipality of Chongqing.

Guangzhou: The main office of the U.S. Consulate General in Guangzhou is located at Number 1 South Shamian Street, Shamian Island 200S1, Guangzhou 510133The Consular Section, including the American Citizens Services Unit, is now located at 5th Floor, Tianyu Garden (II phase), 136-146 Lin He Zhong Lu, Tianhe District, tel. (86) (20) 8518-7605; after hours (86) (20) 8121-6077, and email GuangzhouACS@state.gov. This consular district includes the following provinces/regions of China: Guangdong, Guangxi, Hainan, and Fujian.

Shanghai: The Consular Section of the U.S. Consulate General in Shanghai is located in the Westgate Mall, 8 th Floor, 1038 Nanjing Xi Lu, Shanghai 200031; tel. (86)(21) 3217-4650, ext. 2102, 2013, or 2134, after hours (86)(21) 6433-3936; email shanghaiacs@state.gov This consular district includes the following provinces/regions of China: Shanghai, Anhui, Jiangsu and Zhejiang.

Shenyang: The U.S. Consulate General in Shenyang is located at No. 52, 14 th Wei Road, Heping District, Shenyang 110003; tel. (86)(24) 2322-2374; email ShenyangACS@state.gov. This consular district includes the following provinces/regions of China: Liaoning, Heilongjiang, and Jilin.

International Adoption

November 2008

The information in this section has been edited from a report available through the U.S. Department of State Office of Children's Issues. For more information detailed, please read the *International Adoption* section of this book and review current reports online at http://adoption.state.gov.

China is party to The Hague Convention on Protection of Children and Cooperation in Respect of Intercountry Adoption (Hague Adoption Convention). Therefore all adoptions between China and the United States must meet the requirements of the Convention and United States law implementing the Convention. For detailed and updated information on these requirements, please review the *International Adoption* section of this publication and visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

Chinese authorities are extremely sensitive about the operation of foreign entities in China. Moreover, adoption is also a sensitive subject in China. It is therefore advisable for any person interested in adopting a child from China to act with discretion and decorum. High-profile attention to adoption in China could curtail or eliminate altogether adoption of Chinese children by persons from countries, including the United States, that have caused adoption to become the subject of public attention.

Who Can Adopt? Adoption between the United States and China is governed by The Hague Adoption Convention. Therefore to adopt from China, you must first be found eligible to adopt by the United States Government. In addition to the United States requirements for adoptive parents, the China Center for Adoption Affairs (CCAA) has issued the following new regulations for foreigners who wish to adopt children in China. These regulations become effective for all application received after May 1, 2007.

Residency Requirements: China does not require that prospective adoptive parents reside in China for a specified period prior to completing an adoption. However, in order to finalize an adoption, at least one adopting parent must travel to China to execute the required documents in person before the appropriate Chinese authorities.

If only one member of an adopting married couple travels to China, that person must have in his/her possession a power of attorney from the other spouse, notarized and authenticated by the Chinese Embassy in Washington or one of the Chinese Consulates General elsewhere in the United States.

Age Requirements: Both parents must be between the ages of 30 and

50. Those couples who apply to adopt a special needs child must be between the ages of 30 and 55.

Marriage Requirements: Chinese law permits adoption by married couples, defined as one man and one woman.

They must adopt the child jointly. In addition, they must have been married at least two years. If either person has previously divorced, the couple must have been married at least five years. No more than two divorces are allowed.

Income Requirements: At least one member of the couple must have stable employment. The total value of family assets must be at least $80,000. The family's annual income equals at least $10,000 for each family member in the household (including the child to be adopted). Annual income excludes welfare, pensions, unemployment insurance, Government subsidies, and the like.

Both prospective parents must be high school graduates or have vocational training equivalent to a high school education.

Health Requirements: Both partners must be physically and mentally fit, with none of the following conditions:

- AIDS;
- Mental disability;
- Infectious disease that is actively contagious;
- Blind in either eye;
- Hearing loss in both ears or loss of language function (those adopting children with hearing or language function loss are exempted from this requirement);
- Non-function or dysfunction of limbs or trunk caused by impairment, incomplete limbs, paralysis or deformation;
- Severe facial deformation;
- Severe diseases that require long-term treatment and that may affect life expectancy, including malignant tumors, lupus, nephrosis, epilepsy, etc.;
- Major organ transplant within ten years;
- Schizophrenia;
- Severe mental disorders requiring medication for more than two years, including depression, mania, or anxiety neurosis; and
- Body Mass Index (BMI) of 40 or more.

Other Requirements: The family must have fewer than five children under the age of 18, and the youngest is at least one year old (those adopting special needs children are exempted from this requirement).

Neither partner may have a significant criminal record, and both must have a history of honorable behavior and good moral character with no evidence of:

- Domestic violence, sexual abuse, abandonment or abuse of children;
- Use of narcotics or any potentially addictive medication prescribed for mental illness; or
- Alcohol abuse, unless the individual can show she/he has been sober for at least ten years.

Applications from persons with past criminal records will be considered on a case-by-case basis if the individual has fewer than three minor criminal convictions (none in the last ten years) and fewer than five minor traffic violations.

The prospective parents must demonstrate the ability to provide a warm family environment capable of meeting the needs of an orphaned child and providing for her/his development, and an understanding of the special risks (including potential diseases, developmental delays, and post-placement maladjustment) that could come with inter-country adoption. The couple must provide an adoption application letter that makes clear the applicants' willingness to allow post-placement follow-ups and provide post-placement reports as required.

In each instance above where a specific age or time span is cited, it will be computed from the time that the CCAA officially logs the adoption application documents.

Who Can Be Adopted? Because China is party to The Hague Adoption Convention, children from China must meet the requirements of the Convention in order to be eligible for adoption. In addition to China's requirements, a child must meet the definition of a Convention adoptee for you to bring him or her back to the United States.

Age Requirements: Chinese law allows for the adoption of children up to and including age 13; children ages 14 and up may not be adopted.

Requirements for Special Needs or Medical Conditions: Once prospective adoptive parents decide to accept a special needs referral, they have 48 hours to fill out the necessary forms to complete the dossier. Cases of children with special needs who are available for international adoption are posted on the CCAA website. Prospective adoptive parents can view the case, including the medical and growth records and a photo of the child. The reason the child is considered special needs is documented and the prospective parents can decide if this child would fit into their family, if their insurance would cover the medical needs, and whether they themselves are able to provide any educational or rehabilitative needs, etc. After they decide they want this child, they click a button and from that point onward they have 48 hours to fill out the necessary forms to complete the dossier. The reason this short time limit is set is so that the child is not taken off the list unless the family truly wants to adopt it. If the prospective parents have not completed the forms and submitted them within 48 hours, the child's

name goes back on the list and another family could possibly select it.

Waiting Period: It is hard to predict with certainty how much time is required to complete an adoption in China. The time frames provided in this flyer are intended as guidelines only, and the specific circumstances of each case could affect significantly how long it takes.

The most recent reports indicate that waiting periods are approximately 32 months from the time the United States adoption agency submitted the paperwork of the prospective adopter to CCAA to the time the CCAA gave the prospective adoptive parent(s) their initial referral. Cases involving children with special needs are generally shorter.

After the referral is sent and the prospective parent(s) accept the child (see the step-by-step description of the Chinese adoption process, below), four to eight more weeks are likely to elapse before the CCAA gives the prospective adoptive parents final approval to travel to China.

With regard to time required in China, the CCAA has advised local officials to try to complete the process within 15 days after the arrival of the prospective parent(s) in China. The Chinese passport, exit permits, and United States visa process can take another 7-10 days after the adoption is finalized. Some United States families have been able to complete the in-country process, including obtaining the United States immigrant visa for the adoptive child, in approximately two weeks.

Chinese Adoption Authority: The China Centre of Adoption Affairs (CCAA)**.**

The Process: The first step in adopting a child from China is to select an adoption service provider in the United States that has been accredited. Only these agencies and attorneys can provide adoption services between the United States and China.

Many United States adoption agencies are very familiar with Chinese adoption procedures and may have specific advice for their own clients, such as on how best to submit applications to the CCAA or when to travel to China. In addition to reading the information here for a basic outline of Chinese and United States procedures, check with your particular adoption agency to obtain more information about its own procedures during the Chinese adoption process.

A CCAA-licensed agency may submit adoption applications directly to the CCAA for consideration. A listing of CCAA-licensed agencies can be found on http://www.china-ccaa.org/. Included with the application should be all the required documents along with authentications and translations.

After you choose an accredited adoption service provider, you apply to be found eligible to adopt (Form I-800A) by the USCIS. Once the United States Government determines that you are "eligible" and "suitable" to adopt, you or your agency will forward your information to the adoption authority in China. China's adoption authority will review your application to determine whether you are also eligible to adopt under Chinese law.

The CCAA-licensed provider will submit the adoption application to the CCAA, including any preferences the prospective adoptive parents may have about the child's age, sex, physical/medical condition, or region of origin within China.

The CCAA reviews the documents and advises the prospective adoptive parent(s), either directly or through their adoption agency, whether additional documents or authentications are required. Once the CCAA approves the application, it matches the application with a specific child. The CCAA then sends the prospective adoptive parent(s) a letter of introduction about the child, including photographs and the child's health record. This document is commonly called a 'referral.' Prospective adoptive parents who still have questions about the child after reviewing this information may follow up with the CCAA either directly or via their adoption agency.

Prospective adoptive parent(s) then either accept or refuse the referral and send the document to their agency, which forwards it to CCAA. CCAA requires a response on a referral within 45 days of sending a referral to a family. If prospective adoptive parent(s) are considering refusing a referral they should discuss with their agency the possibility of getting a second referral. (Please note that all communications with CCAA must be done via the adoption agency.) CCAA will only accept referral rejections if there is a justified explanation provided.

If the reason for the rejection is considered justifiable, such as a medical problem, the CCAA will refer the second child to the prospective adoptive parents within a month's time. If CCAA regards the rejection as unreasonable, the prospective adoptive parents will have difficulty obtaining a second referral and CCAA is more likely to suggest that the parents withdraw their application for adoption in China.

Prospective adoptive parents who have accepted a specific referred child will receive an approval notice from the CCAA ("Notice of Coming to China for Adoption"). This document will bear the "chops," or red-inked seals of the CCAA. Prospective parents must have this approval notice in hand before departing for China to finalize the adoption.

With the CCAA's sealed approval notice in hand, prospective adoptive parents arriving in China may proceed directly to the city in China where the Civil Affairs Bureau with jurisdiction over the appropriate Children's Welfare Institute is located.

Although the CCAA is headquartered in Beijing, prospective adoptive parents will not be required to travel to Beijing during this process. The CCAA will have already forwarded a copy of the adoption approval notice

to the locality where the child resides. Local Child Welfare Institutes, provincial Civil Affairs officials and Chinese notary offices will not process adoptions unless they have seen this notice allowing the prospective adoptive parents take legal custody of the child.

The process for finalizing the adoption (or gaining legal custody) in China generally includes the following.

Role of the Adoption Authority: The provincial Notarial offices, which are administered by the Ministry of Justice, Department of Notarization Division (No. 10 Chaoyangmen Nandajie, Beijing 100020 China) issue the final adoption certificate.

Time Frame: It is hard to predict with certainty how much time is required to complete an adoption in China. The time frames provided in this flyer are intended as guidelines only, and the specific circumstances of each case could affect significantly how long it takes.

The most recent reports indicate that waiting periods are approximately 32 months from the time the United States adoption agency submitted the paperwork of the prospective adopter to CCAA to the time the CCAA gave the prospective adoptive parent(s) their initial referral. Cases involving children with special needs are generally shorter. After the referral is sent and the prospective parent(s) accept the child (see the step-by-step description of the Chinese adoption process, below), four to eight more weeks are likely to elapse before the CCAA gives the prospective adoptive parents final approval to travel to China.

With regard to time required in China, the CCAA has advised local officials to try to complete the process within 15 days after the arrival of the prospective parent(s) in China. The Chinese passport, exit permits, and United States visa process can take another 7-10 days after the adoption is finalized. Some United States families have been able to complete the in-country process, including obtaining the United States immigrant visa for the adoptive child, in approximately two weeks.

Adoption Fees: Fees charged by Chinese authorities in connection with foreign adoptions may vary depending on the province where the child is adopted. However, for each adoption, there are standard fees that adoptive parents must pay.

The authentication/legalization of documents by the Chinese Embassy or Consulate in the United States costs $10 USD per document, whether the document is one or multiple pages. The fee is for authentication of the seal.

The initial CCAA fee is $365 USD, plus $200 USD for translation of the documents submitted in the dossier. The translations can be done in the United States or China, however, the CCAA advises that the translations must be “correct” and that CCAA will “rectify,” and charge for correcting any errors.

Issuance of the registration of the adoption by the Civil Affairs Bureau, $30 USD Charges for expedited service differs by province. Fees for issuance of the Chinese-notarized certificate approving the adoption, birth certificate and abandonment certificate may vary based on province.

These documents normally come together in a packet notarized by the provincial notary office. The Guangzhou Consulate no longer requests the notarized adoption certificate but still requires the birth certificate and abandonment certificate to be notarized. Many provincial notary offices still issue these three notaries as a package. Additional documents such as death certificates, for the orphan's parents, or additional investigation is not included in this fee.

Chinese passports cost $25 USD for the normal 15-working-day issuance. Charges for expedited service differ by province.

Individual Children's Welfare Institutes (where the child lived prior to adoption) may charge from $3000 USD to $5000 USD as a combined donation to the institution and a fee for caring for the child. It is the experience of the United States Consulate General in Guangzhou that the assessed fees are reasonable based on the local economy and the costs associated with raising a child in China. Some United States families who have adopted in China have reported being required to pay additional charges of up to $500 USD for transportation (if the orphanage staff travels to the capital with the child) or expedited processing of documents.

United States adoptive parent(s) who believe that they were compelled at any point during the adoption process to pay exorbitant fees out of keeping with the general outline provided in this flyer should notify the United States Consulate General in Guangzhou.

In the adoption services contract that you sign at the beginning of the adoption process, your agency will itemize the fees and estimated expenses related to your adoption process.

Documents Required: The following documents should be submitted in the original dossier:

- Adoption application letter;
- Birth certificate(s) of the prospective adoptive parent(s);
- Marital status statement–Either a marriage certificate, divorce or death certificate (if applicable) or statement of single status is required;
- Certificates of profession, income and property including; verification of employment and salary notarized and authenticated; a certified and authenticated copy of your property trust deeds, if applicable;
- Bank statements notarized/certified and authenticated;
- Health examination certificate(s) of the prospective adoptive parent(s);

- Certificate(s) of criminal or no-criminal record—A certificate of good conduct for the adoptive parent(s) from a local police department notarized or bearing the police department seal and authenticated. An FBI report is acceptable in lieu of a local police record. This is separate from the FBI check conducted by USCIS as part of the petition process. You can request an FBI record check by sending two sets of fingerprints, an $18 money order, your full name, date and place of birth, social security number and letter of request explaining purpose for clearance to: FBI ID Division, Room 10104, Washington, DC 20537-9700;

- Home study report;

- Certificate of child adoption approval by the competent department of the adopter's country of residence, also known as the Department of Homeland Security Bureau of Citizenship and Immigration Services I-171H Notice of Approval of an I-600A petition) along with copies of the United States passport(s) of the prospective adoptive parent(s); and

- Each applicant parent should also submit two front-view photos and several other photos reflecting the family's life in the United States.

The prospective adoptive parents should take these additional documents with them to China:

- Power of attorney notarized and authenticated (if only one spouse will travel to China). In case of married couples, if only one adopting parent comes to China, Chinese law requires that the spouse traveling bring a power of attorney from his/her spouse, notarized and properly authenticated by Chinese Embassy or one of the Chinese Consulates General in the United States.

- A copy of the I-171H form (I-600A approval notice from USCIS).

For updates on document requirements and information on how to authenticate documents, visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

Bringing Your Child Home: Once your adoption is complete (or you have obtained legal custody of the child), there are a few more steps to take before you can head home. Specifically, you need to apply for several documents for your child before he or she can travel to the United States, such as a birth certificate, a passport or travel document for your child from the country in which he or she was born, and a U.S. Immigration Visa. For detailed and updated information on how to obtain these documents, review the *International Adoption* section on this publication and visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

Child Citizenship Act: For adoptions finalized abroad: The Child Citizenship Act of 2000 allows your new child to acquire American citizenship automatically when he or she enters the United States as lawful permanent residents. For adoptions finalized in the United States: The Child Citizenship Act of 2000 allows your new child to acquire American citizenship automatically when the court in the United States issues the final adoption decree. To learn more, review the *International Adoption* section on this publication and visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

After Adoption: Prospective Adoptive Parents must provide an adoption application letter that makes clear the applicants' willingness to allow post-placement follow-ups and provide post-placement reports as required.

International Parental Child Abduction

November 2008

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *International Child Abduction* section of this book and review current reports online www.travel.state.gov/childabduction.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is provided for general information only. Questions involving interpretation of specific foreign laws should be addressed to foreign legal counsel.

General Information: The Peoples Republic of China (PRC) is not a party to the Hague Convention on the Civil Aspects of International Child Abduction, nor are there any international or bilateral treaties in force between China and the United States dealing with international parental child abduction.

American citizens who travel to China place themselves under the jurisdiction of local courts. American citizens planning a trip to China with dual national children should bear this in mind.

Custody Disputes: In China, parents who are legally married share the custody of their children. If they are not married and the parents cannot reach an agreement, custody is granted by the courts in the best interests of the child.

Enforcement of Foreign Judgments: Custody orders and judgments of foreign courts are not enforceable in China. Such judgments must be presented to a Chinese court for that courts consideration and decision. In China, there is a limited process to appeal a lower court's decision.

Visitation Rights: In cases where legal custody has been granted and the judgment has been rendered, the non-custodial parent's visitation rights are normally incorporated within the court ordered decision.

Dual Nationality: Dual nationality is not recognized under Chinese law. Some U.S. citizens who are also Chinese nationals (mostly U.S.-born children of Chinese nationals or Legal permanent Permanent Residents) have experienced difficulty entering and departing China on U.S. passports. In some cases, such dual nationals are required to use Chinese travel documents to depart China. Normally this causes inconvenience but no significant problems for affected persons; however, in child custody disputes, the ability of dual national children to depart from China could be affected. Generally, children who are Chinese nationals according to Chinese law are not permitted to depart China if one parent refuses to allow the travel requested by one parent, even if that parent is considered an abducting parent by United States courts. In those cases, children abducted to China are only permitted to return to the United States if both parents agree to their return, or if a Chinese court upholds a United States Court's decision to allow the left-behind parent sole custody.

For more information, please read the *International Parental Child Abduction* section of this book and review current reports online at www.travel.state.gov/childabduction.

Travel Restrictions: While no exit visas are required to leave China, persons who replace passports are required to get an exit permit from the entry and exit police. The U.S. Embassy and Consulates will assist a traveler with a new passport in obtaining this document.

Criminal Remedies: For information on possible criminal remedies, please contact your local law enforcement authorities or the nearest office of the Federal Bureau of Investigation (FBI). Information is also available on the Internet at the web site of the U.S. Department of Justice, Office of Juvenile Justice and Delinquency Prevention (OJJDP) at http://www.ojjdp.ncjrs.org.

For further information on international parental child abduction, contact the Office of Children's Issues, U.S. Department of State at 1-888-407-4747 or visit its web site on the Internet at http://travel.state.gov/family. You may also direct inquiries to: Office of Children's Issues, U.S. Department of State, Washington, DC 20520-4811; Phone: (202) 736-9090; Fax: (202) 312-9743.

Travel Alert

July 3, 2008

This Travel Alert updates U.S. citizens on the effects of the earthquake that struck China's Sichuan province on May 12. U.S. citizens should continue to avoid the areas of Sichuan province most severely affected by the earthquake and be prepared for travel delays in other parts of the province. Areas outside of Sichuan province are not experiencing earthquake-related damage or delays. This supersedes the Travel Alert dated May 16, 2008, and expires on January 15, 2009.

Cities and towns to the north and northwest of Sichuan's provincial capital, Chengdu, are the areas most seriously damaged by the earthquake. These include Wenchuan County near the earthquake's epicenter, Beichuan, Dujiangyan, Mianzhu, Mianyang, and Maoxian. Recovery and restoration operations in these areas are ongoing; infrastructure has been damaged, and road, air and rail transportation disrupted. Travelers may experience road blocks as far north as the popular tourist site, Jiuzhaigou, and as far west as Maerkang. Some secondary roads are dangerous or impassible in these areas as well. Aftershocks continue to occur, causing further damage, occasionally blocking roads, and complicating the significant recovery and restoration efforts now under way. The possibility of landslides exists throughout the affected area.

Other areas of Sichuan province, such as the large metropolitan area of Chengdu, suffered less damage, but continue to experience light aftershocks. Areas outside of Sichuan are not experiencing earthquake-related travel delays.

For information on earthquakes and earthquake preparedness, see www.ready.gov/america/beinformed/earthquakes.html, and www.fema.gov/hazard/earthquake/index.shtm. Family members and friends unable to verify the safety and welfare of U.S. citizens in the affected area should call 1-888-407-4747 toll-free in the U.S. and Canada, or from other

areas via a regular toll line at 1-202-501-4444. U.S. citizens in the area are urged to monitor the local news. Those residing or traveling in China are reminded to register with the U.S. Embassy or the closest U.S. Consulate, either online at https://travelregistration.state.gov/ibrs or in person at U.S. Embassy Beijing or at one of the following consulates:

U.S. Consulate General Chengdu: Number 4, Lingshiguan Road, Section 4, Renmin Nanlu, Chengdu 610041, tel. 86-28-8558-3992 Email: consularchengdu@state.gov. The U.S. Consulate in Chengdu is open for full consular services and is assisting U.S. citizens in the region.

U.S. Embassy Beijing: No. 2 Xiu Shui Dong Jie, Chaoyang District. tel: 86-10-6532-3431 Email: amcitbeijing@state.gov. Embassy's website: beijing.usembassy-china.org.cn. U.S. Embassy Beijing can be reached 24 hours per day at 86-10-6532-3431.

U.S. Consulate General Guangzhou: 5th Floor, Tianyu Garden (II phase), 136-146 Lin He Zhong Lu, Tianhe District, tel. (86-20) 8518-7605 or 86-20-8121-8000; Email: GuangzhouACS@state.gov. Guangzhou adoptions Email: GuangzhouA@state.gov.

U.S. Consulate General Shanghai: Westgate Mall, 8th Floor, 1038 Nanjing Xi Lu, Shanghai 200041; tel. (86-21) 3217-4650, Email: Shanghaiacs @state.gov.

U.S. Consulate General Shenyang: No. 52, 14th Wei Road, Heping District, Shenyang 110003; tel. (86-24) 2322-1198, Email: Shenyang ACS@state.gov.

COLOMBIA

Compiled from the November 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Republic of Colombia

PROFILE

Geography

Area: 1.14 million sq. km. (440,000 sq. mi.); about three times the size of Montana; fourth-largest country in South America.

Cities: Capital—Bogota (pop. 2005 projected: 7.1 million). Other major cities include Medellin, Cali, Barranquilla and Cartagena.

Terrain: Flat coastal areas, with extensive coastlines on the Pacific Ocean and Caribbean Sea, three rugged parallel mountain chains, central highlands and flat eastern grasslands.

Climate: Tropical on coast and eastern plains, cooler in highlands.

People

Nationality: Noun and adjective—Colombian(s).

Population: (July 2007) 44.38 million.

Annual population growth: 1.4%.

Religions: Roman Catholic 90%.

Languages: Spanish.

Education: Years compulsory—9. Attendance—80% of children enter school. Only 5 years of primary school are offered in many rural areas. Literacy—93% in urban areas, 67% in rural areas.

Health: Infant mortality rate—25/1,000. Life expectancy—total population 72.27 yrs., men 68.44 yrs., women 76.24 yrs.

Ethnic groups: Mestizo (58%), white (20%), Afro-Colombian (18%) mixed black-Amerindian (3%) and Amerindian (1%).

Government

Type: Republic.

Independence: July 20, 1810.

Constitution: July 1991.

Government branches: Executive—President (chief of state and head of government). egislative—Bicameral Congress.Judicial—Supreme Court, Constitutional Court, Council of State, Superior Judicial Council.

Political subdivisions: 32 departments; Bogota, capital district.

Political parties: Conservative Party of Colombia, Liberal, National Unity, Radical Change, Alternative Democratic Pole, and numerous small political movements.

Suffrage: Universal, age 18 and over.

Economy

GDP: (2007) $131 billion; base year 2000: $93.7 billion.

Annual growth rate: (2007) 7.7%.

Per capita GDP: (2007) $3,867.

Government expenditures: (2007) 26.1% of GDP.

Natural resources: Coal, petroleum, natural gas, iron ore, nickel, gold, silver, copper, platinum, emeralds.

Manufacturing: (14.58% of GDP): Types—textiles and garments, chemicals, metal products, cement, cardboard containers, plastic resins and manufactures, beverages, wood products, pharmaceuticals, machinery, electrical equipment.

Agriculture: (8.34% of GDP): Products—coffee, bananas, cut flowers, cotton, sugarcane, livestock, rice, corn, tobacco, potatoes, soybeans, sorghum. Cultivated land—8.2% of total area.

Other sectors: (by percentage of GDP): Government, personal and other services—17.3%; financial services—17.5%; commerce—13.82%; transportation and communications services—6.81%; construction and public works—5.3%; mining and quarrying—4.55%; electricity, gas, and water—2.77%.

Trade: Exports (2006)—$29.9 billion: petroleum, coal, coffee, flowers, textiles and garments, ferronickel, bananas, chemicals, pharmaceuticals, gold, sugar, cardboard containers, printed material, cement, plastic resins and manufactures, emeralds. Major markets—U.S., Venezuela, Ecuador, Germany, Netherlands, Japan. Imports (2007)—$32.8 billion: machinery/equipment, grains, chemicals, transportation equipment, mineral products, consumer products, metals/metal products, plastic/rubber, paper products, aircraft, oil and

gas industry equipment, supplies. Major suppliers—U.S., China, Mexico, Brazil, Venezuela.

PEOPLE

Colombia is the third-most populous country in Latin America, after Brazil and Mexico. Thirty cities have a population of 100,000 or more. The nine eastern lowlands departments, constituting about 54% of Colombia's area, have less than 3% of the population and a density of less than one person per square kilometer (two persons per sq. mi.). Ethnic diversity in Colombia is a result of the intermingling of indigenous peoples, Europeans and Africans. Today, only about 1% of the people can be identified as fully indigenous on the basis of language and customs.

HISTORY AND POLITICAL CONDITIONS

During the pre-Columbian period, the area now known as Colombia was inhabited by indigenous societies situated at different stages of socio-economic development, ranging from hunters and nomadic farmers to the highly structured Chibchas, who are considered to be one of the most developed indigenous groups in South America.

Santa Marta was the first permanent Spanish settlement founded in 1525. Santa Fe de Bogota was founded in 1538 and, in 1717, became the capital of the Viceroyalty of New Granada, which included what are now Venezuela, Ecuador, and Panama. Bogota was one of three principal administrative centers of the Spanish possessions in the New World.

On July 20, 1810, the citizens of Bogota created the first representative council to defy Spanish authority. Full independence was proclaimed in 1813, and in 1819 the Republic of Greater Colombia was formed to include all the territory of the former Viceroyalty (Colombia, Venezuela, Ecuador and Panama). Simon Bolivar was elected its first president with Francisco de Paula Santander as vice president. Conflicts between followers of Bolivar and Santander led to the formation of two political parties that have since dominated Colombian politics. Bolivar's supporters, who later formed the nucleus of the Conservative Party, sought strong centralized government, alliance with the Roman Catholic Church and a limited franchise. Santander's followers, forerunners of the Liberals, wanted a decentralized government, state control over education and other civil matters, and a broader suffrage.

Throughout the 19th and early 20th centuries, each party held the presidency for roughly equal periods of time. Colombia maintained a tradition of civilian government and regular, free, elections. Notwithstanding the country's commitment to democratic institutions, Colombia's history also has been characterized by widespread, violent conflict. Two civil wars resulted from bitter rivalry between the Conservative and Liberal parties: The War of a Thousand Days (1899-1903) claimed an estimated 100,000 lives and La Violencia (the Violence) (1946-1957) claimed about 300,000 lives.

La Violencia (The Violence) and the National Front

The assassination of Liberal leader Jorge Eliecer Gaitan in 1948 sparked the bloody conflict known as La Violencia. Conservative Party leader Laureano Gomez came to power in 1950, but was ousted by a military coup led by General Gustavo Rojas Pinilla in 1953. When Rojas failed to restore democratic rule and became implicated in corrupt schemes, he was overthrown by the military with the support of the Liberal and Conservative Parties.

In July 1957, an alliance between former Conservative President Laureano Gomez (1950-53) and former Liberal President Alberto Lleras Camargo (1945-46) led to the creation of the National Front. It established a power-sharing agreement between the two parties and brought an end to "La Violencia." The presidency would be determined by regular elections every 4 years and the two parties would have parity in all other elective and appointive offices. This system was phased out by 1978.

Post-National Front Years

During the post-National Front years, the Colombian Government made efforts to negotiate a peace with the persistent guerrilla organizations that flourished in Colombia's remote and undeveloped rural areas. In 1984, President Belisario Betancur, a Conservative, negotiated a cease-fire with the Revolutionary Armed Forces of Colombia (FARC) and the Democratic Alliance/M-19 (M-19) that included the release of many imprisoned guerrillas. The National Liberation Army (ELN) rejected the government's cease fire proposal at that time. The M-19 pulled out of the cease-fire when it resumed fighting in 1985. The army suppressed an M-19 attack on the Palace of Justice in Bogota in November 1985, during which 115 people were killed, including 11 Supreme Court justices. The government and the M-19 renewed their truce in March 1989, which led to a peace agreement and the M-19's reintegration into society and political life. The M-19 was one of the parties that participated in the process to enact a new constitution (see below), which took effect in 1991. The FARC ended the truce in 1990 after some 2,000-3,000 of its members who had demobilized had been murdered.

A new constitution in 1991 brought about major reforms to Colombia's political institutions. While the new constitution preserved a presidential, three-branch system of government, it created new institutions such as the Inspector General, a Human Rights Ombudsman, a Constitutional Court and a Superior Judicial Council. The new constitution also reestablished the position of Vice President. Other significant constitutional reforms provide for civil divorce, dual nationality and the establishment of

a legal mechanism ("tutela") that allows individuals to appeal government decisions affecting their constitutional rights. The constitution also authorized the introduction of an accusatory system of criminal justice that is gradually being instituted throughout the country, replacing the previous written inquisitorial system. A constitutional amendment approved in 2005 allows the president to hold office for two consecutive 4-year terms.

Colombian governments have had to contend with the combined terrorist activities of left-wing guerrillas, the rise of paramilitary self-defense forces in the 1990s and the drug cartels. Narco-terrorists assassinated three presidential candidates during the election campaign of 1990. After Colombian security forces killed Medellin cartel leader Pablo Escobar in December 1993, indiscriminate acts of violence associated with his organization abated as the "cartels" were broken into multiple and smaller trafficking organizations that competed against each other in the drug trade. Guerrillas and paramilitary groups also entered into drug trafficking as a way to finance their military operations.

Pastrana Administration

The administration of Andres Pastrana (1998-2002), a Conservative, faced increased countrywide attacks by the FARC and ELN, widespread drug production and the expansion of paramilitary groups. The Pastrana administration unveiled its "Plan Colombia" in 1999 as a strategy to deal with these longstanding problems, and sought support from the international community. Plan Colombia is a comprehensive program to combat narco-terrorism; spur economic recovery; strengthen democratic institutions and respect for human rights; and provide humanitarian assistance to internally displaced persons.

In November 1998, Pastrana ceded a sparsely populated area the size of Switzerland in south-central Colombia to the FARC's control to serve as a neutral zone where peace negotiations could take place. The FARC negotiated with the government only fitfully while continuing to mount attacks and expand coca production, seriously undermining the government's efforts to reach an agreement. Negotiations with the rebels in 2000 and 2001 were marred by rebel attacks, kidnappings and fighting between rebels and paramilitaries for control of coca-growing areas in Colombia. In February 2002, after the FARC hijacked a commercial aircraft and kidnapped a senator, Pastrana ordered the military to attack rebel positions and reassert control over the neutral zone. FARC withdrew into the jungle and increased attacks against Colombia's infrastructure, while avoiding large-scale direct conflicts with the military.

Uribe Administration

Alvaro Uribe, an independent, was elected president in May 2002 on a platform to restore security to the country. Among his promises was to continue to pursue the broad goals of Plan Colombia within the framework of a long-term security strategy. In the fall of 2002, Uribe released a national security strategy that employed political, economic and military means to weaken all illegal narco-terrorist groups. The Uribe government offered to negotiate a peace agreement with these groups with the condition that they agree to a unilateral cease fire and to end drug trafficking and kidnapping.

In December 2003, the Colombian Self-Defense Forces (AUC) paramilitary group entered into a peace agreement with the government that has led to the collective demobilization of over 31,000 AUC members. In addition, over 10,000 members of the AUC and other illegal armed groups have individually surrendered their arms. In July 2005, President Uribe signed the Justice and Peace Law, which provides reduced punishments for the demobilized if they renounce violence and return illegal assets, which are to provide reparations to victims.

The ELN and the government began a round of talks with the Colombian Government mediated by the Mexican Government in mid-2004. The ELN withdrew from the talks after the Mexican Government voted to condemn Cuba's human rights record at the United Nations in April 2005. In December 2005, the ELN began a new round of talks with the Colombian Government in Cuba that led to two more meetings, the latest one being held in July 2007. The dialogue is expected to continue.

As a result of the government's military and police operations, the strength of the FARC has been reduced in all urban areas and mostly limited to the most remote areas of the country. Since 2000, the FARC has not carried out large scale multifront attacks, although it has mounted some operations that indicate it has not yet been broken. The FARC has rejected several government proposals and numerous international efforts—including a high-profile effort in late 2007 by Venezuelan President Hugo Chavez—aimed at bringing about an exchange of some 45 high-value FARC hostages. On July 2, 2008, an audacious Colombian military operation led to the rescue of three U.S. contractors, the French-Colombian politician Ingrid Betancourt, and eleven Colombians being held by the FARC. The three Americans were captured by the FARC in February 2003, and were the longest-held U.S. hostages in the world at the time of their rescue. Colombian security forces killed several members of the FARC Secretariat in 2008, severely weakening its leadership. Additionally, a record number of FARC members deserted in 2008, yet another sign of the organization's deteriorating power.

Colombia maintains an excellent extradition relationship with the United States. The Uribe administration has extradited more than 800 fugitives to the United States. Among those extradited were Cali Cartel leaders Gilberto Rodriguez Orejuela and his brother Miguel; FARC leaders Juvenal Ovidio Palmera Pineda (aka "Simon Trinidad") and Omaira Rojas Cabrera (aka "Sonia"); and former AUC leaders Salvatore Mancuso and Diego Murillo. In 2008, a

record 170 have been extradited to the U.S., including 15 members of the former AUC and several members of FARC.

In 2004, the Uribe government established, for the first time in recent Colombian history, a government presence in all of the country's 1,099 municipalities (county seats). Attacks conducted by illegally armed groups against rural towns decreased by 91% from 2002 to 2005. Between 2002 and 2007, Colombia saw a decrease in homicides by 40%, kidnappings by 82%, terrorist attacks by 76%, and attacks on the country's infrastructure by 60%.

Although much attention has been focused on the security aspects of Colombia's situation, the Uribe government also is making significant efforts on issues such as expanding international trade, supporting alternate means of development, reforming Colombia's judicial system, and reducing poverty.

President Uribe was reelected with 62% of the vote in May 2006. In congressional elections in March 2006, the three leading pro-Uribe parties (National Unity, Conservative Party, and Radical Change) won clear majorities in both houses of Congress. In late 2006, the Supreme Court began investigations and ordered the arrest of some members of Congress for actions on behalf of paramilitary groups. Those investigations have continued throughout 2008, with several dozen politicians at both the national and local level implicated.

In January 2007, Colombian leaders presented a new strategy to consolidate and build a progressive program under Plan Colombia, called the "Strategy to Strengthen Democracy and Social Development." The new strategy continues successful Plan Colombia programs while increasing state presence by improving access to social services, and supporting economic development through sustainable growth and trade.

Principal Government Officials

Last Updated: 11/12/08

Pres.: **Alvaro URIBE Velez**
Vice Pres.: **Francisco SANTOS Calderon**
Min. of Agriculture & Rural Development: **Andres Felipe ARIAS Leiva**

Pres., Bank of the Republic: **Jose Dario URIBE Escobar**
Ambassador to the US: **Carolina BARCO Isakson**
Permanent Representative to the UN, New York: **Claudia BLUM de Barberi**

Colombia maintains an embassy in the United States at 2118 Leroy Place NW, Washington, DC 20008 (tel. 202-387-8338). Consulates are located in Atlanta, Boston, Chicago, Houston, Los Angeles, Miami, New York, San Francisco, San Juan and Washington DC.

DEFENSE

Colombia's Ministry of Defense is charged with the country's internal and external defense and security, and exercises jurisdiction over an army, navy—including marines and coast guard—air force, and national police under the leadership of a civilian Minister of Defense. Real spending on defense has increased every year since 2000, but especially so under President Uribe. Colombian spending on defense more than doubled to U.S. $5.6 billion in 2007 from U.S. $2.6 billion in 2001. The security forces number about 390,000 uniformed personnel: 260,000 military and 130,000 police. President Uribe instituted a wealth tax in 2002, which raised over U.S. $800 million, with 70% used to increase 2002-2003 defense spending. A similar tax imposed from 2007-2011 and levied on the country's wealthiest individuals and enterprises is expected to raise up to U.S. $3.7 billion.

Many Colombian military personnel receive training in the United States or from U.S. instructors in Colombia. The United States provides equipment to the Colombian military and police through the military assistance program, foreign military sales and the international narcotics control program.

NARCOTICS AND TERRORISM

The U.S. Drug Enforcement Administration estimates that more than 80% of the worldwide cocaine supply and as much as 90% of the cocaine smuggled into the United States is produced in Colombia.

The Colombian Government is committed to the eradication of all illicit crops, interdiction of illegal drug shipments and financial controls to prevent money laundering. Between 2004 and 2008, Colombian security forces interdicted almost 900 metric tons of cocaine, coca base, and heroin. Coca cultivation decreased by 10% from 2001 to 2007, while opium poppy cultivation decreased by 67% from 2001 to 2007. Terrorist groups in Colombia are actively engaged in narcotics production and trafficking. The FARC is believed responsible for more than half of the cocaine entering the United States.

ECONOMY

Colombia is a free market economy with major commercial and investment ties to the United States. Transition from a highly regulated economy has been underway for more than 15 years. In 1990, the administration of President Cesar Gaviria (1990-94) initiated economic liberalization or "apertura," with tariff reductions, financial deregulation, privatization of state-owned enterprises and adoption of a more liberal foreign exchange rate. These policies eased import restrictions and opened most sectors to foreign investment, although agricultural products remained protected.

The Uribe administration seeks to maintain prudent fiscal policies and has pursued tough economic reforms including tax, pension and budget reforms. A U.S. Agency for International Development (USAID) study shows that Colombian tax rates (both personal and corporate) are among the highest in Latin America. The unemployment rate in August 2008 was 11.42%, down from 15.1% in December 2002.

The sustained growth of the Colombian economy can be attributed to an increase in domestic security; the policy of keeping inflation under control; petroleum price increases; and an increase in exports to Venezuela, Ecuador, and the United States as a result of trade liberalization. The Andean Trade Preference Act, which was extended through December 2009, also plays a pivotal role in Colombia's economic growth. The signing of a trade promotion agreement with the U.S. in November 2006 provides further opportunity for growth once it is approved by the U.S. Congress and implemented.

Industry and Agriculture

The most industrially diverse member of the Andean Community, Colombia has four major industrial centers—Bogota, Medellin, Cali, and Barranquilla—each located in a distinct geographical region. Colombia's industries include textiles and clothing, leather products, processed foods and beverages, paper and paper products, chemicals and petrochemicals, cement, construction, iron and steel products and metalworking.

Colombia's diverse climate and topography permit the cultivation of a wide variety of crops. In addition, all regions yield forest products, ranging from tropical hardwoods in the lowlands, to pine and eucalyptus in the colder areas. Cacao, sugarcane, coconuts, bananas, plantains, rice, cotton, tobacco, cassava and most of the nation's beef cattle are produced in the hot regions from sea level to 1,000 meters elevation. The temperate regions—between 1,000 and 2,000 meters—are better suited for coffee, flowers, corn and other vegetables, pears, pineapples, and tomatoes. The cooler elevations—between 2,000 and 3,000 meters—produce wheat, barley, potatoes, cold-climate vegetables, flowers, dairy cattle and poultry.

Trade

In 2007, Colombia was the United States' fifth-largest export market in the Western Hemisphere behind Canada, Mexico, Brazil, and Venezuela and the largest agricultural export market in the hemisphere after the North American Free Trade Agreement (NAFTA) countries. U.S. exports to Colombia in 2007 were U.S. $8.6 billion, up 28% from the previous year. U.S. imports from Colombia were U.S. $9.4 billion, up 2%. Colombia's major exports are petroleum, coffee, coal, nickel, and nontraditional exports (e.g., cut flowers, gold, bananas, semiprecious stones, sugar, and tropical fruits). The United States is Colombia's largest trading partner, representing about 35% of Colombia's exports and 26% of its imports.

Colombia has improved protection of intellectual property rights overall, but the United States remains concerned over deficiencies in licensing and copyright protection.

Mining and Energy

Colombia has considerable mineral and energy resources, especially coal and natural gas reserves. New security measures and increased drilling activity have slowed the drop in petroleum production, allowing Colombia to continue to export through 2015, given current production estimates. In 2007, gas reserves totaled 6,859 billion cubic feet. Gas production totaled 922 million cubic feet per day. The country's current refining capacity is 323,000 barrels per day. Mining and energy related investments have grown because of higher oil prices, increased demand and improved output. Colombia has significantly liberalized its petroleum sector, leading to an increase in exploration and production contracts from both large and small hydrocarbon industries.

Colombia is presently the 5th-largest coal exporting country, accounting for about 1.1% of the world's total annual coal production, and the largest producer in Latin America (71.7 million tons in 2007). Colombia has proven recoverable coal reserves of about 7.4 billion short tons, the majority of which are located in the north of the country. Colombia historically has been the world's leading producer of emeralds, although production has fallen in recent years. Emerald production fell from 5.73 million carats in 2006 to 3.39 million carats in 2007. Colombia is also a significant producer of gold, silver, and platinum.

Foreign Investment

The United States is the largest source of new foreign direct investment (FDI) in Colombia, particularly in the areas of coal and petroleum. In 2007, new FDI totaled U.S. $9 billion, more than triple the amount in 2002. The bulk of the new investment is in the manufacturing, mining, and energy sectors.

The only activities closed to foreign direct investment are defense and national security, and disposal of hazardous wastes. In October 2008, Colombia eliminated controls on foreign investment in fixed income securities to increase access to capital and

investment inflows. The controls were imposed in May 2007 to stem appreciation of the Colombian peso.

FOREIGN RELATIONS

In 1969, Colombia, along with Bolivia, Chile, Ecuador and Peru, formed what is now the Andean Community. (Venezuela joined in 1973 and announced its departure in 2005; Chile left in 1976 and returned in 2006.) In the 1980s, Colombia broadened its bilateral and multilateral relations, joining the Contadora Group, the Group of Eight (now the Rio Group) and the Non-Aligned Movement, which it chaired from 1994 until September 1998. In addition, it has signed free trade agreements with Chile, Mexico, and Venezuela. The U.S.-Colombia Trade Promotion Agreement (U.S.-CTPA) was signed by President Bush in November 2006, and was passed by the Colombian Congress in 2007. It was awaiting U.S. congressional approval as of late October 2008.

Colombia has traditionally played an active role in the United Nations and the Organization of American States and in their subsidiary agencies. Former President Gaviria became Secretary General of the Organization of American States (OAS) in September 1994 and was re-elected in 1999. Colombia hosted the 38th OAS General Assembly in Medellin in early June 2008. Colombia has participated in all five Summits of the Americas, most recently in November 2005, and followed up on initiatives developed at the first two summits by hosting two post-summit, ministerial-level meetings on trade and science and technology. In March 2006, Bogota hosted the Sixth Regular Session of the Inter-American Committee against Terrorism.

U.S.-COLOMBIAN RELATIONS

In 1822, the United States became one of the first countries to recognize the new republic and to establish a resident diplomatic mission. The U.S. Government estimates that 30,000 U.S. citizens are visiting or living in Colombia at any given time. Currently, there are approximately 250 American businesses conducting operations in Colombia. During 1995-96, the United States and Colombia signed important agreements on environmental protection and civil aviation. The two countries have also signed agreements on asset sharing and chemical control. In 1997, the United States and Colombia signed an important maritime ship-boarding agreement to allow for search of suspected drug-running vessels. In September 2008, both countries signed a memorandum of understanding on renewable and clean energy. During the Pastrana administration, relations with the United States improved significantly. The United States responded to the Colombian Government's request for international support for Plan Colombia by providing substantial assistance designed to increase Colombia's counter-narcotics capabilities and support human rights, humanitarian assistance, alternative development, and economic and judicial reforms.

The U.S. has continued close cooperation with Colombia under the Uribe administration. Recognizing that terrorism and the illicit narcotics trade in Colombia are inextricably linked, the U.S. Congress granted new expanded statutory authorities in 2002 making U.S. assistance to Colombia more flexible in order to better support President Uribe's unified campaign against narcotics and terrorism. The results thus far have been impressive, but much remains to be done. U.S. policy toward Colombia supports the Colombian Government's efforts to strengthen its democratic institutions, promote respect for human rights and the rule of law, intensify counter-narcotics efforts, foster socioeconomic development, address immediate humanitarian needs, and end the threats to democracy posed by narcotics trafficking and terrorism. Promoting security, stability, and prosperity in Colombia will continue as long-term American interests in the region.

TRAVEL

Consular Information Sheet

August 13, 2008

Country Description: Colombia is a medium-income nation of some 44 million inhabitants. Its geography is very diverse, ranging from tropical coastal areas and rainforests to rugged mountainous terrain. Tourist facilities in Colombia vary in quality and safety, according to price and location. Security is a significant concern for travelers, as described in the Department of State's Travel Warning for Colombia.

Entry Requirements: All U.S. citizens who are not also Colombian citizens must present a valid U.S. passport to enter and depart Colombia, and to return to the United States. Dual U.S-Colombian citizens must present a Colombian passport to enter and exit Colombia, and a U.S. passport to return to the United States. Be aware that any person born in Colombia may be considered a Colombian citizen, even if never documented as such. U.S. citizens born in Colombia or who otherwise have Colombian citizenship, will need both a Colombian passport and a U.S. passport for the trip.

U.S. citizens traveling to Colombia do not need a Colombian visa for a tourist stay of 60 days or less. Travelers entering Colombia are sometimes asked to present evidence of return or onward travel, usually in the form of a round-trip plane ticket. Americans traveling overland must enter Colombia at an official border crossing. Travelers arriving by bus should ensure, prior to boarding, that their bus will cross the border at an official entry point. Entering Colombia at unauthorized crossings may result in fines or incarceration. Travelers planning to enter Colombia over a land border should carefully read our information on Traffic Safety and Road Conditions below.

The length of stay granted to travelers is determined by the Colombian immigration officer at the point of entry and will be stamped in your passport. Extensions may be requested by visiting an office of the Colombian immigration authority, known as the Departamento Administrativo de Seguridad, or DAS, after arrival in Colombia. Fines are levied if a traveler remains in Colombia longer than authorized, and the traveler cannot leave Colombia until the fine is paid. Any traveler possessing a Colombian visa with more than three months' validity must register the visa at a DAS immigration office within 15 days of arrival in Colombia or face fines. The DAS immigration office in Bogota is located at Calle 100 and Carrera 11B.

No arrival tax is collected upon entry into Colombia, but travelers leaving by plane must pay an exit tax at the airport, in cash. The tax varies with the dollar/peso exchange rate, but is usually between $50 and $70. Some airlines include all or a portion of this tax in the cost of your airline ticket; check with your airline to find out how much you will have to pay at the airport.

U.S. citizens whose U.S. passports are lost or stolen in Colombia must obtain a new U.S. passport before departing. They must then present the new passport, along with a police report describing the loss or theft, to a DAS office. Information about obtaining a replacement U.S. passport in Colombia is available on the U.S. Embassy's website at http://bogota.usembassy.gov. Contact information for DAS is available in Spanish at http://www.das.gov.co. The Embassy in Bogotá or the U.S. Consular Agency in Barranquilla can provide guidance on contacting DAS when you apply for your replacement passport. For further, specific guidance on Colombian entry requirements, including information about Colombian visas, travelers should contact the Colombian Embassy at 2118 Leroy Place NW, Washington, DC 20008; telephone (202) 387-8338; website: http://www.colombiaemb.org; or the nearest Colombian consulate. Consulates are located in Atlanta, Boston, Chicago, Houston, Los Angeles, Miami, New Orleans, New York, San Francisco, and San Juan, Puerto Rico.

Additional Requirements for Minors: To prevent international child abduction, Colombia has implemented special exit procedures for Colombian children under 18 who are departing the country without both their mother and their father or a legal guardian. These procedures apply even if the child is also a U.S. citizen. Complying with the procedures can be complex and time-consuming, especially if an absent parent is outside Colombia at the time. Advance planning is essential.

The procedures are as follows. Upon exiting the country, the person traveling with the child (or the child him/herself) must present a certified copy of the child's birth certificate, along with written, signed authorization from the absent parent(s) or legal guardian. The authorization must explicitly grant permission for the child to travel alone, with one parent, or with a third party, by name. When a parent is deceased, a notarized copy of a death certificate is required instead of written authorization. When one parent has sole custody of the child, that parent may present a custody decree instead of the other parent's written authorization.

If the documents to be presented originated in the United States, they must first be translated into Spanish and then signed in front of a Colombian consul at a Colombian consulate. Then, upon arrival in Colombia, the documents must be presented to the Colombian Ministry of Foreign Affairs for certification of the consul's signature.

Alternatively, the documents can be translated into Spanish, then notarized by a notary public in the United States, and authenticated by request-

ing an apostille from the competent authority in the state where the documents were prepared. The document, translation, and apostille can then be presented to immigration officers at the airport when the child travels.

If the documents originated in Colombia and are written in Spanish, only notarization by a Colombian notary is required. For documents originating in countries other than the United States or Colombia, please inquire with the Colombian embassy serving that country.

In cases where the absent parent refuses or is unable to provide consent, the other parent can request assistance from the Colombian child protective service, Instituto Colombiano de Bienestar Familiar (ICBF). In appropriate cases, ICBF will investigate and may issue a document that will allow the child to travel without both parents' consent. This process may take a significant amount of time and is not within the control of the U.S. government.

Safety and Security: Violence has decreased markedly in many urban destinations, including the cities of Bogota, Medellin, Barranquilla, and Cartagena. Cali has made less progress combating crime than most other large cities. The level of violence in Buenaventura remains high. Small towns and rural areas of Colombia can be extremely dangerous due to the presence of narco-terrorists. Common crime remains a significant problem in many urban and rural areas, as described in the section on crime below.

The incidence of kidnapping in Colombia has diminished significantly from its peak at the beginning of this decade. Nevertheless, terrorist groups, including the Revolutionary Armed Forces of Colombia (FARC), and other criminal organizations, continue to kidnap and hold civilians for ransom or as political bargaining chips. No one is immune from kidnapping on the basis of occupation, nationality, or other factors. On July 2, 2008, the GOC effected a successful military rescue of three Americans, Ingrid Betancourt, and eleven members of the Colombia security forces. President Uribe called on the FARC to release the remaining hostages and seek peace. Although the U.S. government places the highest priority on the safe recovery of kidnapped Americans, it is U.S. policy not to make concessions to kidnappers. Consequently, the U.S. government's ability to assist kidnap victims is limited.

Official and personal travel by U.S. Embassy employees outside most urban areas is subject to strict limitations and reviewed by security officers on a case-by-case basis. U.S. Embassy employees are allowed to travel by air, but inter- and intra-city bus transportation is off limits to them.

For the latest security information, Americans traveling abroad should regularly monitor the Department's Internet web site, where the current Travel Warnings and Travel Alerts, including the Worldwide Caution Travel Alert Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S. and Canada, or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: Although the threat of terrorism has decreased in most of Colombia's cities, they nevertheless experience much of the same crime that is seen in comparably sized cities throughout the region. Robbery and other violent crimes, as well as scams against unsuspecting tourists, are common in urban areas. Generally speaking, if you are the victim of a robbery, you should not resist.

Some of the most common methods used by criminals in Colombia are noted below.

Tourists and others have been robbed after using automatic teller machines (ATMs) on the street. In some cases, robbers have used motorcycles to approach their victims and later flee the scene. Americans are urged to use ATMs only inside shopping malls or other protected locations. Driving to and from the location—rather than walking—provides added protection. When using an ATM, you should be on the lookout for anyone watching or following you.

Robbery of taxi passengers is a serious problem in Bogota. Typically, the driver—who is one of the conspirators—will pick up the passenger and then stop to pick up two or more armed cohorts, who enter the cab, overpower the passenger, and take his/her belongings. If the passenger has an ATM card, the perpetrators may force the passenger to withdraw money from various ATM locations. Such ordeals can last for hours.

In almost every case of taxi-related crime, the victims have been riding alone and have hailed taxis off the street. Rather than hailing a taxi, you should use the telephone dispatch service that most taxi companies offer. Many hotels, restaurants, and stores will call a taxi for you, and the taxi usually arrives within minutes. When a taxi is dispatched by telephone, the dispatcher creates a record of the call and the responding taxi.

U.S. citizens arriving at major Colombian airports have occasionally been victimized by armed robbery while en route from the airport to their hotel or home. The perpetrators typically scout out victims at the airport and then follow their vehicles before robbing the occupants at a stoplight. Travelers should remain vigilant at airports and report to local airport police if they suspect they are being observed.

Several U.S. citizens were robbed in 2007 while hiking on nature trails in and around Bogota. Because hiking trips generally take place in isolated settings, participants are especially vulnerable. Hikers in Colombia are more protected if they travel in large groups.

The Embassy continues to receive reports of criminals in Colombia using disabling drugs to temporarily incapacitate tourists and others. At bars, restaurants, and other public areas, perpetrators may offer tainted drinks, cigarettes, or gum. Typically, victims become disoriented or uncon-

scious, and are thus vulnerable to robbery, sexual assault, and other crimes. Avoid leaving food or drinks unattended at a bar or restaurant, and be suspicious if a stranger offers you something to eat or drink.

U.S. citizens in Colombia routinely fall victim to a scam in which purported undercover police officers approach them on the street and request to examine their money, supposedly to determine if it is counterfeit. The "officers," who are in fact criminals, then flee with the money. In a variation of this scam, the thieves may ask to see jewelry. Legitimate Colombian police officers do not make such requests.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

The local equivalent to the "911" emergency line in Colombia is 112 for police and 119 for fire. There will not be an English speaker answering the phone.

Medical Facilities and Health Information: Medical care is adequate in major cities but varies greatly in quality elsewhere. Emergency rooms in Colombia, even at top-quality facilities, are frequently overcrowded and ambulance service can be slow. Many private health care providers in Colombia require that patients pay for care before treatment, even in an emergency. Some providers in major cities may accept credit cards, but those that do not may request advance payment in cash. Uninsured travelers without financial resources may be unable to obtain care, or relegated to seeking treatment in public hospitals where care is far below U.S. standards.

The Embassy regularly receives reports of U.S. citizens in Colombia who have died or suffered complications from liposuction and other elective surgeries intended to treat obesity. Before undergoing such a procedure in Colombia, the Department of State recommends that you consult with your personal physician, research the credentials of the provider in Colombia, and carefully consider your ability to access emergency medical care if complications arise. It is important to confirm that your medical insurance provides coverage in Colombia, to include treatment of complications from elective procedures or medical evacuation if necessary. Should you suffer complications as a result of medical malpractice, collecting damages from your surgeon may be difficult.

Colombia has seen a recent increase in the use of unregulated drugs that purport to enhance sexual performance. Several American tourists recently died after using these substances, which come in liquid, powder, or tablet form. You are urged to seek guidance from a physician before ingesting any such substances in Colombia.

Travelers to the capital city of Bogota may need time to adjust to the altitude of 8,600 feet, which can affect blood pressure, digestion, and energy level, and cause mild dyspnea with exercise, headaches, sleeplessness, and other discomfort. Travelers should drink liberal fluids to maintain hydration,, and should avoid strenuous exercise unti they have acclimated to the altitude. Travelers with circulatory or respiratory problems should consult a physician before traveling to Bogota or other high-altitude locations.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's internet site at http://www.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) website at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith/en.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Colombia is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

Due to the security environment in Colombia, U.S. government officials and their families are not permitted to travel by road between most major cities. They also cannot use inter- or intra-city bus transportation, or travel by road outside urban areas at night. All Americans in Colombia are encouraged to follow these same precautions.

Traffic laws in Colombia, including speed limits, are often ignored and rarely enforced, creating dangerous conditions for drivers and pedestrians in major cities. Under Colombian law, seat belts are mandatory for front-seat passengers in a private vehicle. Car seats are not mandatory for children, but a child under ten is not permitted to ride in a front seat. It is against the law to talk on a cellular phone while driving in Colombia, and violators may be fined. While driving outside major cities, it is mandatory to drive with your lights on. If an accident occurs, the involved parties must remain at the scene and not move their vehicles until the

authorities arrive; this rule is strictly enforced, and moving a vehicle or leaving the scene of an accident may constitute an admission of guilt under Colombian law.

Americans seeking to import their own vehicles into Colombia should consult with their

Aviation Safety Oversight: The U.S. Federal Aviation Administration (FAA) has assessed the Government of Colombia's Civil Aviation Authority as being in compliance with International Civil Aviation Organization (ICAO) aviation safety standards for oversight of Colombia's air carrier operations. For more information, travelers may visit the FAA's website at http://www.faa.gov.

Special Circumstances: Colombia employs strict screening procedures for detecting narcotics smuggling at its international airports. Americans and other travelers are occasionally questioned, searched, fingerprinted, and/or asked to submit to an abdominal x-ray upon arrival or departure. Most airport inspectors do not speak English, and travelers who do not speak Spanish may have difficulty understanding what is asked of them. Please refer to the section on Criminal Penalties for further information on the strict enforcement of Colombia's drug laws.

Customs Regulations: Travelers generally must not enter or exit Colombia while carrying cash or other financial instruments worth more than 10,000 U.S. dollars. Colombian authorities may confiscate any amount over $10,000, and may initiate a criminal investigation into the source of the money and the traveler's reasons for carrying it. Recovery of the confiscated amount requires a lengthy, expensive legal process and may not always be possible. Americans wishing to send large sums of money to or from Colombia should contact their nearest Colombian consulate, or speak with Colombian customs officials, and should also consider seeking advice from an attorney or financial professional.

Colombian law prohibits tourists and business travelers from bringing firearms into Colombia. Illegal importation or possession of firearms may result in incarceration.

In many countries around the world, counterfeit and pirated goods are widely available. Buying or selling them is illegal in Colombia, and bringing them back to the United States may result in forfeitures and fines.

Colombian law forbids the export of pre-Columbian objects and other artifacts protected by cultural patrimony statutes. Under an agreement between the United States and Colombia, U.S. customs officials are obligated to seize pre-Columbian objects and certain colonial religious artwork when they are brought into the United States.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating Colombia's laws, even unknowingly, may be expelled, arrested, or imprisoned. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States. Please see our information on Criminal Penalties.

If you are arrested, the U.S. government cannot request your release. Colombia and the United States do not have a prisoner transfer agreement, and so any sentence for a crime committed in Colombia is ordinarily served in a Colombian prison.

Penalties for possession, use, or trafficking of illegal drugs in Colombia are severe, and convicted offenders can expect long prison sentences under harsh conditions, with significant expense and great hardship for themselves and their families. Colombian police make multiple arrests daily for drug trafficking at major airports, and have sophisticated means for detecting illegal drugs in baggage or on your person. Travelers are sometimes requested to undergo an x-ray to ensure that they are not smuggling narcotics within their own bodies. There are more than 30 Americans incarcerated in Colombia for attempting to smuggle drugs out of the country.

The hardships resulting from imprisonment do not end even after release from prison: Colombian law requires that serious offenders remain in the country to serve a lengthy period of parole, during which the offender is given no housing and may lack permission to work. As a result, family members must often support the offender, sometimes for more than a year, until the parole period expires.

State of Emergency: On occasion, the Colombian government has declared a state of emergency in portions of the country. During such times, American citizens may find their movements or civil liberties restricted due to curfews, registration requirements, or other security-related measures. American citizens are advised to stay alert to any announcements declaring emergency status.

Disaster Preparedness: Colombia is an earthquake-prone country. Flooding and mudslides also sometimes occur in parts of the country. U.S. citizens in Colombia can find information on coping with natural disasters on the U.S. Embassy's web site at http://Bogota.usembassy.gov. General information about natural disaster preparedness is available via the Internet from the U.S. Federal Emergency Management Agency (FEMA) at http://www.fema.gov.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans residing or traveling in Colombia are encouraged to

register with the nearest U.S. Embassy or Consulate through the State Department's travel registration website so that they can obtain updated information on travel and security within Colombia. Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency. The U.S. Embassy is located at Calle 24 Bis No. 48-50 Bogotá, D.C. Colombia. Mailing address: Carrera 45 No. 24B-27 Bogotá, D.C. Colombia.

In case of a serious emergency that jeopardizes the health or safety of an American citizen in Colombia, please call the Embassy at (571) 315-0811; Embassy fax: (571) 315-2197; Consular Section phone: (571) 315-1566. The Embassy's American Citizens Services office provides routine information at http://bogota.usembassy.gov. For questions not answered there, inquiries may be sent by email to ACSBogota@state.gov. Email messages are answered by the next business day.

The Embassy's American Citizens Services office is open for passport applications, notary services, and routine in-person inquiries from 8:30 a.m. to 12:00 noon Monday through Thursday, excluding U.S. and Colombian holidays. Inquiries concerning Social Security and other federal benefits can be made in-person from 2:00 to 3:00 p.m. Monday through Thursday, except holidays. The American Citizens Services fax number is (571) 3152196/7.

The U.S. Consular Agency in Barranquilla, which accepts passport applications and performs notarial services, is located at Calle 77B, No. 57-141, Piso 5, Centro Empresarial Las Americas, Barranquilla, Atlantico, Colombia; telephone (575) 353-2001; fax (011-57-5) 353-5216. The Consular Agency is not staffed to respond to after-hours emergencies; in case of an emergency in the Barranquilla/north coast area, please contact the Embassy in Bogota at (571) 315-0811.

Intercountry Adoption

November 2008

The information in this section has been edited from a report available through the U.S. Department of State Office of Children's Issues. For more information detailed, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Colombia is party to The Hague Convention on Protection of Children and Co-operation in Respect of Intercountry Adoption (Hague Adoption Convention). Therefore, all adoptions between Colombia and the United States must meet the requirements of the Convention and United States law and regulations implementing the Convention.

For detailed and updated information on these requirements, please review the *Intercountry Adoption* section of this publication and visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

Colombia's Central Authority for adoptions, the Colombian Family Welfare Institute (ICBF), is the only means of adopting a Colombian child; Colombian law prohibits private adoptions. Please note ICBF does not allow for a Colombian child to travel to the United States to be adopted. Therefore, prospective adoptive parents must obtain a full and final adoption under Colombian law before the child can immigrate to the United States. Adopting parents are required to be physically present before a "family judge" at the time of adoption. No exceptions are made to this requirement.

Who Can Adopt? Adoption between the United States and Colombia is governed by The Hague Adoption Convention. Therefore to adopt from Colombia, you must first be found eligible to adopt by the United States Government. In addition to the United States requirements for prospective adoptive parents, Colombia also has the following eligibility requirements for prospective adoptive parents.

Residency Requirements: There are no residency requirements for intercountry adoptions from Colombia.

Age Requirements: Both parents are required to be 25 years old. In practice, newborns are assigned to younger couples and older children to older couples.

Marriage Requirements: Colombian law allows adoptions by a married man and woman and common law spouses of more than three years. Single men and women are only allowed to adopt children over the age of seven on a case-by-case basis.

Income Requirements: Prospective adoptive parents are required to submit documentation confirming their ability to provide for the adopted child. This requirement may be met by only one parent.

Other Requirements: Gay or Lesbian individuals or couples may not adopt children from Colombia. In addition, according to Colombian law, both parents must be found "physically and emotionally capable" to adopt.

Who Can Be Adopted? Because Colombia is a member of The Hague Adoption Convention, children from Colombia must meet the requirements of the Convention in order to be eligible for adoption. In addition to Colombia's requirements, a child must meet the definition of a Convention adoptee for you to bring him or her back to the United States.

Colombian Central Authority: Bienestar Familiar (ICBF)

The Process: The first step in adopting a child from Colombia is to select an accredited or approved adoption service provider in the United States. Only these agencies and attorneys can provide adoption services between the United States and Colombia.

Once prospective adoptive parents decide that Colombia is the nation from which they wish to adopt, they must first contact the ICBF, or an

accredited adoption service provider in Colombia, in order to obtain a list of adoption service provider in the United States, nearest to the couple's place of residence, that are accredited by both the Colombian and United States Governments. An accredited adoption service provider will conduct the home study and assist the prospective adoptive parents in preparing the paperwork necessary for Homeland Security, Citizenship and Immigration Services (USCIS).

After you choose an accredited adoption agency, you apply to be found eligible to adopt (Form I-800A) by the USCIS. Please note that if you reside in Colombia, you should contact the United States Embassy in Bogotá for instructions. Anyone with questions may contact the embassy any working day from 2:00 p.m. to 3:30 p.m. and ask for the person responsible for processing visas for adopted children.

Required Documents: Once USCIS has approved the documentation, parents must compile the following list of documents for submission to the ICBF:

- Application Form for adoption (this can be provided by the ICBF or found on the ICBF Website);
- Birth certificate(s)of the prospective adoptive parent(s);
- Marriage certificate or proof of common law relationship of prospective adoptive parents;
- Medical examination(s) by Board-certified physicians clearly stating that prospective adoptive parent(s) is (are) mentally and physically capable of caring for a child (or children);
- National law enforcement clearance issued by a competent police authority. For United States citizens, this consists of a set of fingerprints, and their results, issued by the Federal Bureau of Investigation (FBI). These cards may be requested from the Department of Homeland Security;
- Birth certificates of any children previously adopted by the prospective adoptive parent(s);
- Certificate of financial ability and employment letters explaining time of service and monthly salary received in United States dollars;
- If self-employed, a certified document regarding the parent's(s') financial resources or last income tax return with supporting documents;
- Social and psychological study of the prospective adoptive family that establishes physical, mental, moral and social capacity. The home study required by USCIS can fulfill both the United States and the Colombian requirements;
- If there were previous marriages or partners of the prospective adoptive parent(s), proof of divorce and reasons for such dissolutions should be presented; and
- Notarized statement clarifying any changes in name or indicating, "also known as." Generally, Colombian women do not change their names to that of their husbands. As a result, Colombian courts are accustomed to birth certificates, marriage certificates, and passports with no variation in name. If you have documents in both maiden and marriage names, you must submit a notarized statement indicating the reasons for the discrepancies in your documents.

Once the ICBF approves the package of documents, it will be in a position to inform prospective adoptive parents, through their adoption service providers, about the availability of children in need of a family placement and the amount of time it is likely to take to complete an adoption.

If both the United States and Colombia determine that you are eligible to adopt, and a child is available for intercountry adoption, the Central Authority in Colombia may provide you with a referral for a child. ICBF will inform the parents, through the adoption service provider, once a child has officially been assigned to them. Medical, social, psychological, and nutritional assessments are provided to the prospective adoptive parents, as well as photographs of the child. Prospective adoptive parents are given two months to make a decision as to whether to adopt that particular child.

After you accept a match with a child, you will apply to the USCIS for permission to adopt that child (Form I-800). USCIS will determine whether the child is eligible under United States immigration law to be adopted and enter the United States. After this, your adoption service provider or you will submit a visa application for to a Consular officer at the United States Embassy in Bogota. If the Consular office determines that the child appears eligible to immigrate to the United States, he or she will notify the ICBF (Article 5 letter). For Convention country adoptions, prospective adoptive parent(s) may not proceed with the adoption until this takes place. At this point, you may travel to Colombia to begin the legal process with Colombian authorities. The ICBF or the Colombian adoption agency will assist with obtaining the documents needed to complete Colombian legal procedures.

Role of the Central Authority: Colombian law does not allow for private adoptions. Children may be adopted only through the Colombian Family Welfare Institute (ICBF) and approved adoption agencies. The ICBF will match the child with the prospective adoptive parent(s) and help with obtaining paperwork before the case moves to the Colombian courts.

Role of the Court: The Colombian courts require a letter from the United States Embassy in Bogota stating that they will issue an immigrant visa to the child if all adoption and United States immigrant requirements are met. When all documentation is completed, the courts will provide the adoption decree, a

new Colombian birth certificate, and a new Colombian passport. Colombian law requires that both adopting parents be physically present when the adoption is presented to a "family judge." No exceptions are made to this requirement.

Role of Adoption Service Providers: Because Colombia is a Convention country, adoption services must be provided by an accredited agency, temporarily accredited agency, approved person, supervised provider, or exempted provider. It is essential that prospective adoptive parent(s) seeking to adopt from a Convention country use an accredited adoption service provider. The Department of State maintains a current list of accredited adoption service providers. The list of accredited adoption service providers is also provided on the website of The Hague Permanent Bureau at www.hcch.net.

Time Frame: There is no set time frame for completing an intercountry adoption from Colombia. There are many factors that determine how long the adoption and visa process takes, including paperwork approval times, desired sex and age of the child, and the age of the prospective adoptive parent(s). Adoptive parents have reported the entire process taking 18 to 30 months.

Adoption Application: Prospective adoptive parents must first contact the ICBF or an accredited adoption agency in Colombia in order to obtain a list of adoption service providers in the United States that are accredited by both the Colombian and United States Governments.

Adoption Fees: It is difficult to predict how much the entire adoption process will cost as each case has unique circumstances. Adoptive parents have reported spending between $12,000 USD and $20,000 USD. The Colombian passport fee is approximately $30 USD. These expenses should have been itemized in the fees and estimated expenses section of your adoption services contract.

Bringing Your Child Home: Once your adoption is complete (or you have obtained legal custody of the child), there are a few more steps to take before you can head home. Specifically, you need to apply for several documents for your child before he or she can travel to the United States, such as a birth certificate, a passport or travel document for your child from the country in which he or she was born, and a U.S. Immigration Visa.

For detailed and updated information on how to obtain these documents, review the *Intercountry Adoption* section on this publication and visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

Child Citizenship Act: For adoptions finalized abroad: The Child Citizenship Act of 2000 allows your new child to acquire American citizenship automatically when he or she enters the United States as lawful permanent residents. For adoptions finalized in the United States: The Child Citizenship Act of 2000 allows your new child to acquire American citizenship automatically when the court in the United States issues the final adoption decree. To learn more, review the *Intercountry Adoption* section on this publication and visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

After Adoption: Colombian law does not currently have any post-adoption requirements.

International Parental Child Abduction

November 2008

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *International Parental Child Abduction* section of this book and review current reports online at www.travel.state.gov/childabduction.

Disclaimer: The information below relating to the legal requirements of Colombia is provided for general information only. Questions involving interpretation of specific foreign laws should be addressed to foreign legal counsel.

General Information: Colombia is in the process of transforming its criminal justice system into an accusatorial one, with oral trials, in a way that resembles the U.S. justice system. For non-criminal matters, however, including divorce and custody cases, Colombia remains a civil law country.

Judicial proceedings in a civil law country generally differ from those in the United States, a common law country, in several significant ways.

For example, juries are not used. Legal cases are heard and decided by a judge or panel of judges. Evidence can be presented and arguments can be made in oral hearings, but such hearings tend to play a secondary role, supplementing extensive written submissions to the judge.

The judge normally can play a more active role in proceedings than is common in U.S. courts. A judge in a civil law country is free to seek evidence independently of what either side presents.

In Colombia, family court judges handle divorce and custody cases. In cases involving the Hague Convention on the Civil Aspects of International Child Abduction, recent legislation by the Colombian Congress has placed jurisdiction with family courts as well. In more remote areas of the country where there are no family courts, Hague cases are to be heard by civil court circuit judges. While Colombian courts can recognize or enforce U.S. custody orders, they generally refuse to do so. In a Colombian court, Colombian law takes precedence over U.S. law. A Colombian court order granting custody to one parent will prevail over an order issued by a U.S. court.

Custody and Rights of Visitation: In Colombia, married parents share equal rights of custody to their minor children. Under Colombian law, if a father acknowledges on a child's birth certificate that he is the father, then he shares equal custody rights with the mother, even if the child was born out of wedlock. A father who has acknowledged paternity may seek assistance from administrative or judicial authorities for a remedy if the mother interferes with his rights to custody or visitation. Custody cases are first assigned to family protection officers within the Colombian Institute of Family Welfare and then custody and/or visitation are determined before a family court judge. Family courts have heavy caseloads and cases involving a U.S. parent disputing custody with a Colombian parent take a long time to resolve. The U.S. Embassy in Bogota notes that Colombian courts favor parents of Colombian nationality and that it is very rare for a court in Colombia to grant custody to a parent residing in the U.S. when there is a parent residing in Colombia.

Criminal Aspects: The crime of international parental abduction is covered in the Colombian Penal Code as simple kidnapping, with circumstances that can increase or reduce the punishment. Colombia does not consider international parental kidnapping as an extraditable offense.

Colombian Citizenship: The Colombian Constitution provides that a child born abroad to a Colombian mother or father acquires Colombian citizenship once the birth is registered in a consular office or the child later becomes domiciled in Colombia. If a child is born in Colombia, he/she will obtain Colombian citizenship automatically as long as one parent is a Colombian national or one of the child's parents has legal resident status in Colombia.

Colombian Passports: In contrast to U.S. requirements, a Colombian passport for a minor child can be obtained with only one parent's consent. However, Colombian authorities have rules that restrict the departure of Colombian children from the country when they are not in the company of both parents.

Preventing Issuance of a Colombian Passport: If a parent wishes to prevent the issuance of a passport to their minor child, he or she must submit a request to the Ministerio de la Proteccion Social, Instituto Colombiano de Bienstar Familiar (ICBF). If ICBF concurs with the parent's request, it will notify the Colombian passport office to place a hold on issuance of a passport to the minor child. The Colombian passport agency will then notify Colombian Embassies and Consulates of the hold. Parents may only submit a request through ICBF, not through a Colombian Embassy or Consulate. Further information can be found at www.bienestarfamiliar.gov.co.

The Hague Convention: The United States is a party to the Hague Convention on the Civil Aspects of International Child Abduction. The Hague Convention is an international treaty. Its purpose is to discourage international parental abduction and to ensure that children who are abducted or wrongfully retained are returned to their country of habitual residence. The Hague Convention does not govern who should get custody of a child, but only the jurisdiction where custody should be adjudicated.

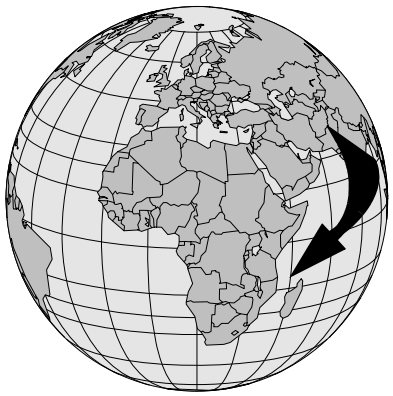
The Hague Convention took effect between the United States and Colombia on June 1, 1996. Therefore, Hague Convention provisions for return apply only to children abducted or retained after that date. Parents and legal guardians of children taken to Colombia prior to June 1, 1996 may still submit applications for access to the child under the Hague Convention. All countries party to the Hague Convention have a Central Authority that is responsible for processing Hague applications.

The Colombian Central Authority performs an administrative role in processing Hague applications. The Central Authority is the Instituto Colombiano de Bienstar Familiar (ICBF), which is located within the Ministry of Social Protection. The address is Sede Nacional Avenida 68 No 64-01, PBX 4377630, Bogota, DC, Colombia. The international telephone number is 011-57-1-437-7630. The Central Authority's email address is churtado1@icbf.gov.co.

More Information: The State Department has general information about hiring a foreign attorney, service of process, and enforcement of child support and the international enforcement of judgments, which supplement the country-specific information provided in this flyer. When situations in a country are sufficiently serious, the State Department issues Travel Alerts or Travel Warnings that may recommend U.S. citizens defer travel to that country. These documents are available on the Internet at: http://travel.state.gov or by the toll-free number, 1-888-407-4747, between 8:00 a.m.—8:00 p.m.

eastern time, Monday thru Friday (except U.S. holidays). Callers who are unable to use the toll-free numbers, such as those calling from overseas, may obtain information and assistance during these hours by calling 1-317-472-2328.

Travel Warning



August 7, 2008

This Travel Warning updates and reminds American citizens of ongoing security concerns in Colombia. The Department of State continues to warn U.S. citizens of the dangers of travel to Colombia. While security in Colombia has improved significantly in recent years, violence by narco-terrorist groups continues to affect some rural areas and cities. The potential for violence by terrorists and other criminal elements exists in all parts of the country. This Travel Warning supersedes the Travel Warning for Colombia issued February 05, 2008.

Violence has decreased markedly in many urban areas; however, the level of violence in Buenaventura remains high. Small towns and rural areas of Colombia can still be extremely dangerous due to the presence of narco-terrorists. Common crime remains a significant problem in many urban and rural areas. For additional details about the general criminal threat, please see the Department of State's Country Specific Information for Colombia.

The incidence of kidnapping in Colombia has diminished significantly from its peak at the beginning of this decade. Nevertheless, terrorist groups such as the Revolutionary Armed Forces of Colombia (FARC), the National Liberation Army (ELN), and other criminal organizations continue to kidnap and hold civilians for ransom or as political bargaining chips. No one is immune from kidnapping on the basis of occupation, nationality, or other factors. Kidnapping in rural areas is of particular concern. On July 2, 2008, the Government of Colombia rescued 15 hostages, including three Americans, who had been held for more than 5 years. Although the U.S. government places the highest priority on the safe recovery of kidnapped Americans, it is U.S. policy not to make concessions to or strike deals with kidnappers. Consequently, the U.S. government's ability to assist kidnapping victims is limited. U.S. government officials and their families in Colombia are permitted to travel to major cities in the country, but normally only by air. They cannot use inter- or intra-city bus transportation, or travel by road outside urban areas at night. All Americans in Colombia are urged to follow these precautions.

As the Department develops information on potential security threats to U.S. citizens overseas, it shares credible threats through its Consular Information Program documents, available on the Internet at http://travel.state.gov. U.S. citizens should consult warden messages for Colombia at http://bogota.usembassy.gov/acs_wardenmessage.html, as well as the Department of State's Country Specific Information for Colombia and the Worldwide Caution at http://travel.state.gov. U.S. travelers can also get up-to-date information on security conditions by calling 1-888-407-4747 toll-free in the U.S. and Canada or for overseas callers, on a regular toll line at 1-202-501-4444.

COMOROS

Compiled from the September 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Union of the Comoros

PROFILE

Geography

Area: 2,171 sq. km. (838 sq. mi.); slightly less than half the size of Delaware. Major islands—Grande Comore (1,025 sq. km.), Anjouan (424 sq. km.), Mayotte (374 sq. km.), and Moheli (211 sq. km.).

Cities: Capital—Moroni (pop. 30,000); Mutsamudu (pop. 20,000).

Terrain: Rugged.

Climate: Tropical marine.

People

Nationality: Noun and adjective—Comoran(s).

Population: (2006 est.) 690,948. Mayotte (1990 est.)—70,000.

Annual growth rate: (2006 est.) 2.87%.

Ethnic groups: Antalote, Cafre, Makoa, Oimatsaha, Sakalava.

Religions: Sunni Muslim 98%, Roman Catholic 2%.

Languages: Shikomoro (a Swahili-Arabic blend), Arabic (official), French (official).

Education: Attendance—60% primary, 34% secondary. Literacy—56.5%.

Health: Life expectancy—62.33yrs. Infant mortality rate—72.85/1,000.

Work force: (1996) 144,500. Agriculture—80%.

Government

Type: Republic.

Independence: July 6, 1975 (Mayotte remains under French administration).

Constitution: Adopted by referendum on December 23, 2001.

Government branches: Executive—national president; regional island presidents. Legislative—National Assembly. Judicial—traditional Muslim and codified law from French sources.

Political parties: 17 political parties.

Suffrage: Universal adult.

Economy

GDP: (purchasing power parity) $419 million.

Annual growth rate: 0.5%.

Per capita income: $720.

Agriculture: (40% of GDP) Products—vanilla, cloves, perfume essences, copra, banana, cassava, coconuts.

Services: (56% of GDP) Commerce, tourism.

Industry: (4% of GDP) Types—perfume distillation.

Trade: Exports (1999 est.)—$7.9 million: vanilla, cloves, perfume essences, copra. Major markets—France, Germany. Imports (1998 est.)—$35.84 million: rice, petroleum, meat, wheat flour, cotton textiles, cement. Major suppliers—France 38%, Pakistan 13%, Kenya 8%, South Africa 8%.

PEOPLE

The Comorans inhabiting Grande Comore, Anjouan, and Moheli (86% of the population) share African-Arab origins. Islam is the dominant religion, and Koranic schools for children reinforce its influence. Although Arab culture is firmly established throughout the archipelago, a substantial minority of the citizens of Mayotte (the Mahorais) are Catholic and have been strongly influenced by French culture.

The most common language is Shikomoro, a Swahili dialect. French and Arabic also are spoken. About 57% of the population is literate.

HISTORY

Over the centuries, the islands were invaded by a succession of diverse groups from the coast of Africa, the Persian Gulf, Indonesia, and Madagascar. Portuguese explorers visited the archipelago in 1505. “Shirazi” Arab migrants introduced Islam at about the same time. Between 1841 and 1912, France established colonial rule over Grande Comore, Anjouan, Mayotte, and Moheli and placed the islands under the administration of the governor general of Madagascar. Later, French settlers, French-owned companies, and wealthy Arab merchants established a plantation-

based economy that now uses about one-third of the land for export crops. After World War II, the islands became a French overseas territory and were represented in France's National Assembly. Internal political autonomy was granted in 1961. Agreement was reached with France in 1973 for Comoros to become independent in 1978. On July 6, 1975, however, the Comoranparliament passed a resolution declaring unilateral independence. The deputies of Mayotte abstained. As a result, the Comoran Government has effective control over only Grande Comore, Anjouan, and Moheli. Mayotte remains under French administration.

GOVERNMENT AND POLITICAL CONDITIONS

The Union of Comoros is ruled by President Ahmed Abdallah Sambi. Comoros has been plagued by political instability and civil strife following numerous coups and secession attempts since independence from France in 1975. Former President Azali seized power in a bloodless coup in April 1999, overthrowing interim President Tadijiddine Ben Said Massounde, who himself had held the office since the death of democratically elected President Mohamed Taki Abdoulkarim in November 1998. In May 1999, Azali decreed a constitution that gave him both executive and legislative powers. When Azali took power he had pledged to step down in 2000 and relinquish control to a democratically elected president. Instead, in 2001, Azali resigned from the military and ran as a civilian candidate for the national presidency. He was elected in 2002 in flawed but fair elections.

On May 26, 2006, following a two-stage electoral process that was generally free and fair, Ahmed Abdallah Mohamed Sambi was installed as the new President of the Union of the Comoros. The inauguration of President Sambi in June 2006 marked the first democratic transition of power in Comoran history. In June 2007, individual island elections on Grande Comore and Moheli were held on schedule and judged to have been free and fair.

On the Anjouan, however, island governor Mohamed Bacar refused to step down, held a sham election and declared himself Island Governor for another term. In March of this year, Comoran and African Union (AU) forces restored constitutional rule on Anjouan. A new election for island governor was held on June 15.

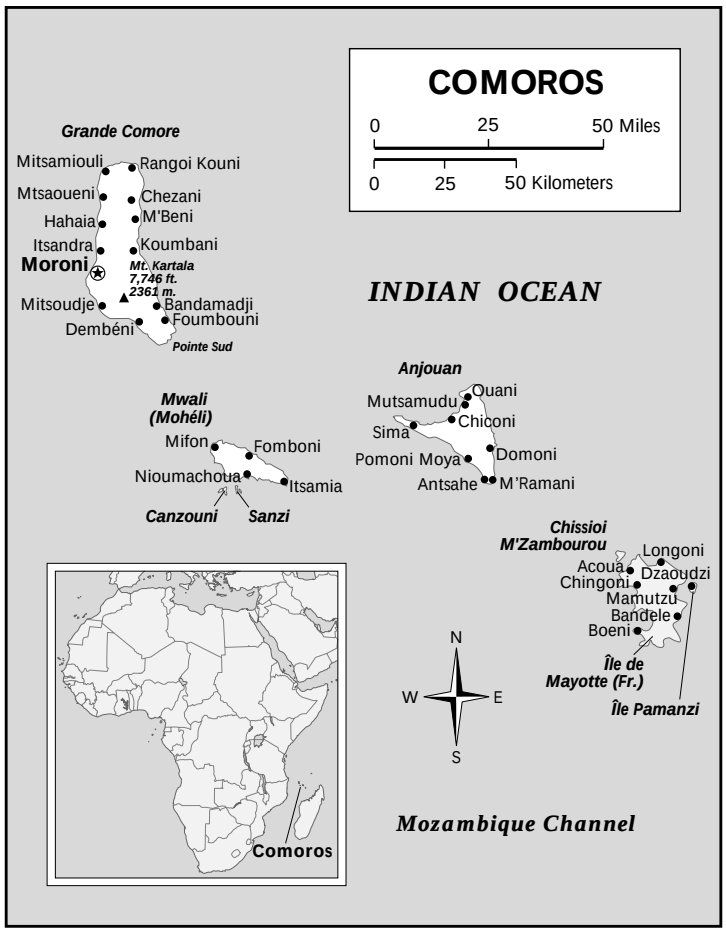
Principal Government Officials

Last Updated: 11/12/08

Three main islands have been unified into the Union of Comoros, and the presidency of the Union will rotate between the different islands every four years. Presidential elections were held in May 2006, and each island elected its own president.

Pres. of the Union: **Ahmed Abdallah SAMBI**
Vice Pres. for Health, Solidarity, & Promotion: **Ikililou DHOININE**
Vice Pres. for Transportation, Post & Telecommunications,:
Communication, & Tourism: **Idi NADHOIM**
Min. of Agriculture, Fishing, Industrial Development, Artisan Artifacts, & Environment: **Siti KASSIM**
Min. of Defense: **Mohamed Bacar DOSSAR**
Min. of Finance, Budget, Economy, & Plans Responsible for the Promotion of Employment: **Hassan HAMADI**
Min. of Foreign Relations & Cooperation, the Diaspora, & the Francophone & Arab Worlds: **Ahmed Ben Sa'id JAFFAR**
Min. of Justice, Public Office, Prison Admin., & Admin. Reforms & Guard of the Seal: **M'Madi ALI**
Min. of Territorial Management, Urbanization, Housing, & Energy: **Nailane MAHADJI**
Min. for National Education, Research, Arts & Culture, Youth, & Sports & Spokesperson for the Govt.: **Abdouroihim Sa'id BACAR**
Pres. of Anjouan: **Moussa TOYBOU**
Pres. of Grande Comore: **Mohamed ABDOULWAHABI**
Pres. of Moheli: **Mohamed Ali SAID**
Ambassador to the US: **Mohamed TOIHIRI**
Permanent Representative to the UN, NY: **Mohamed TOIHIRI**

Comoros maintains a mission to the United States at 336 E. 45th St., 2d floor, New York, NY 10017 (tel. 212-750-1637).



ECONOMY

Comoros, with an estimated gross domestic product (GDP) per capita income of about $700, is among the world's poorest and least developed nations. Although the quality of the land differs from island to island, most of the widespread lava-encrusted soil formations are unsuited to agriculture. As a result, most of the inhabitants make their living from subsistence agriculture and fishing.

Agriculture, involving more than 80% of the population and 40% of the gross domestic product, provides virtually all foreign exchange earnings. Services including tourism, construction, and commercial activities constitute the remainder of the GDP. Plantations engage a large proportion of the population in producing the islands' major cash crops for export: vanilla, cloves, perfume essences, and copra. Comoros is the world's leading producer of essence of ylang-ylang, used in manufacturing perfume. It also is the world's second-largest producer of vanilla. Principal food crops are coconuts, bananas, and cassava. Foodstuffs constitute 32% of total imports.

The country lacks the infrastructure necessary for development. Some villages are not linked to the main road system or at best are connected by tracks usable only by four-wheel-drive vehicles. The islands' ports are rudimentary, although a deepwater facility functions in Anjouan.

Only small vessels can approach the existing quays in Moroni on Grande Comore, despite improvements. Long-distance, ocean-going ships must lie offshore and be unloaded by

smaller boats; during the cyclone season, this procedure is dangerous, and ships are reluctant to call at the island. Most freight is sent first to Mombasa, Kenya or the island of Reunion and transshipped from there. France, Comoros' major trading partner, finances small projects only. The United States receives a growing percentage of Comoros' exports but supplies only a negligible fraction of its imports (less than 1%). Comoros has an international airport at Hahaya on Grande Comore. Comoros has its own currency, the Comorian Franc, which is currently valued at 557 CF = U.S. $1.

NATIONAL SECURITY

The military resources of the Comoros consist of a small standing army and a 500-member police force, as well as a 500-member defense force. A defense treaty with France provides naval resources for protection of territorial waters, training of Comorian military personnel, and air surveillance. France maintains a small maritime base and a Foreign Legion contingent on Mayotte.

FOREIGN RELATIONS

In November 1975, Comoros became the 143rd member of the United Nations. The new nation was defined as consisting of the entire archipelago, despite the fact that France maintains control over Mayotte. Comoros also is a member of the African Union, the European Development Fund, the World Bank, the International Monetary Fund, the Indian Ocean Commission, and the African Development Bank.

U.S.-COMORIAN RELATIONS

The United States recognized the Comorian Government in 1977. The two countries enjoy friendly relations. The U.S. closed its Embassy in Moroni in 1993 and is now represented by a nonresident Ambassador in neighboring Madagascar.

TRAVEL

Consular Information Sheet

May 21, 2008

Country Description: The Union of the Comoros is a developing nation located in the Indian Ocean off the east coast of Africa. Comoros consists of three islands, Ngazidja (also known as Grand Comore), Moheli, and Anjouan, that cover about 900 square miles. A fourth island, Mayotte, is claimed by Comoros but remains a territory of France. Ngazidja is home to the capital city, Moroni, and is the most developed of the three islands. Facilities for tourism are limited and telecommunication links are unreliable. The government of the island of Anjouan currently is in a state of de facto separation from the other islands. French, Arabic, Swahili, and Comorian Creole are spoken.

Entry Requirements: A passport and onward/return ticket are required. Visas are available from the Comoran Mission to the United Nations in New York; American citizens visiting Comoros can obtain a free, 24-hour transit visa upon entry. The following day, visitors are required to go to the immigration office in Moroni to change their visa status. A fee is charged, depending on length of stay. Travelers should obtain the latest details from the Mission of the Union of Comoros, 420 East 50th Street, New York, NY 10022; telephone number (212) 972-8010, fax (212) 983-4712.

Safety and Security: Comoros has experienced frequent strikes and civil unrest, resulting in violent clashes between police and demonstrators. The most recent unrest involved the de facto separation of Anjouan from the Union government. In March 2008, Union forces re-took Anjouan and are preparing the island for elections. The former leader of Anjouan, Mohamed Bacar, has applied for asylum with France and is being held on the French Island of Reunion while his asylum claims is adjudicated. As the government completes the transition to constitutional federalism and as Bacar's asylum claim is pending, periodic strikes and protests will likely continue to occur. U.S. citizens should avoid political rallies and street demonstrations as even demonstrations intended to be peaceful can turn confrontational and possibly escalate into violence. American citizens are therefore urged to avoid the areas of demonstrations if possible, and to exercise caution if within the vicinity of any demonstrations. Conditions are subject to rapid change on each of the three islands of the Comoros due to weak political institutions and a lack of economic development. In a rare, apparently religious-based attack, a clinic run by a foreign Christian organization was firebombed on the island of Grande Comore in August 2007. Religious intolerance and religious-based violence remain very unusual in Comoros.

Although foreign residents and visitors have not been targeted, the potential for further outbreaks of civil disorder remains high, and Americans should exercise caution and good judgment, keep a low profile, and remain vigilant with regard to their personal security. U.S. citizens are encouraged to register with the U.S. Embassy in Antananarivo, Madagascar, if visiting or residing in Comoros.

Although foreign residents and visitors have not been targeted, the potential for further outbreaks of civil disorder remains high, and Americans should exercise caution and good judgment, keep a low profile, and remain vigilant with regard to their personal security. U.S. citizens are encouraged to register with the U.S. Embassy in Antananarivo, Madagascar, if visiting or residing in Comoros. Embassy contact information is provided below.

For the latest security information, Americans traveling abroad should regularly monitor the Department's Internet web site, where the current Travel Warnings and Travel Alerts, including the Worldwide Caution Travel Alert, can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S. and Canada, or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: U.S. travelers are advised to be vigilant against pick-pocketing and other forms of petty crime when visiting crowded market areas, parks, and at the beaches. Violent crime is uncommon. The most commonly reported crime is breaking into homes.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, help you find appropriate medical care, to contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

Medical Facilities and Health Information: Medical facilities in Comoros are poorly equipped. Travelers should bring their own supplies of prescription drugs and preventive medicines. Malaria is prevalent in Comoros. Travelers to Comoros should take malaria prophylaxis. The serious and sometimes fatal strain of malaria, P. falciparum, is resistant to the anti-malarial drug chloroquine. Because travelers to Comoros are at high risk for contracting malaria, the Center for Disease Control and Prevention (CDC) advises that travelers should take one of the following antimalarial drugs: mefloquine (Lariam), doxycycline, or atovaquone/proguanil (Malarone). The CDC has determined that a traveler who is on an appropriate antimalarial drug has a greatly reduced chance of contracting the disease. In addition, other personal protective measures, such as the use of insect repellents, help to reduce

malaria risk. Travelers who become ill with a fever or flu-like illness while traveling in a malaria-risk area and up to one year after returning home should seek prompt medical attention and tell the physician their travel history and what antimalarials they have been taking. For additional information on malaria, protection from insect bites, and anitmalarial drugs, please visit the CDC Travelers' Health web pages. The East African Indian Ocean islands have seen a rise in the cases of Chikungunya, a viral dengue-like ailment, and dengue itself. As with Malaria, Chikungunya and Dengue are transmitted by mosquitoes. Every effort should be made to use repellants, proper clothing and barriers that discourage/prevent mosquito bites. The CDC web site contains further information on Chikungunya and Dengue.

There have been occurrences of measles in Comoros, with outbreaks of greater severity on the islands of Anjouan and Moheli. Travelers are advised to ensure that their measles vaccinations are up to date.

Further, information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's Internet site at http://wwwn.cdc.gov/travel.

For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and if it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Comoros is provided for general reference only, and may not be totally accurate in a particular location or circumstance. In Comoros, one drives on the right side of the street. Roads are ill-maintained, congested, very narrow and poorly lit at night. Travelers should exercise extreme caution when driving after dark.

Most urban roads are paved, but many rural roads are not. Many roads are full of potholes and dangerous curves. Most roads have no posted speed limits, but road conditions limit speeds to below 30 miles an hour. Drivers and front seat passengers are required to wear seat belts. There are no laws regarding child safety seats.

There are no organizations in Comoros that provide emergency or roadside assistance. Individuals involved in accidents rely on passersby for assistance. Taxis or a rental car with driver are preferable to public transportation.

Aviation Safety Oversight: As there is no direct commercial air service between the United States and Comoros, the U.S. Federal Aviation Administration (FAA) has not assessed Comoros' Civil Aviation Authority for compliance with International Civil Aviation Organization (ICAO) aviation safety standards.

For more information, travelers may visit the FAA's Internet web site at http://www.faa.gov. Due to the dispute with Anjouan, air traffic to the island of Anjouan is subject to frequent disruption. The Anjouan airport may be closed without prior warning and remain closed for extended periods of time. As a result, American citizens are urged to avoid travel to Anjouan until the crisis is resolved.

Special Circumstances: While religions other than Islam are permitted in Comoros, evangelization is illegal. Violators of this law can be fined or imprisoned. Few establishments accept credit cards in the Comoros and most prefer Comoran Francs or Euros to dollars.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law.

Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating the laws of Comoros, even unknowingly, may be expelled, arrested, or imprisoned. Penalties for possession, use or trafficking in illegal drugs in Comoros are strict, with convicted offenders receiving a mandatory minimum five-year jail sentence and heavy fines. Engaging in sex with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: The United States has no Embassy in Comoros. Americans living or traveling in Comoros are encouraged to register with the U.S. Embassy in Antananarivo, Madagascar through the State Department's travel registration web site, and to obtain updated information on travel and security within Comoros. Americans without Internet access may register in person at the U.S. Embassy in Antananarivo.

By registering, American citizens make it easier for the Embassy to contact them in case of emergency. The U.S. Embassy is located at 14-16 Rue Rainitovo, Antsahavola, Antananarivo. The mailing address is B.P. 620, Antsahavola, Antananarivo, Madagascar; telephone [261] (20) 22-212-57; fax [261] (20) 22-345-39. The Embassy web site is http://www.usmission.mg.

Intercountry Adoption

September 2006

Adoption is illegal under the laws and Constitution of Comoros. Comoran law recognizes a "Delegation de l'autorite parental," which delegates parental authority to someone other than the child's parent, but this is only available to Comoran citizens. While Comoran citizens can use this process to emigrate a child from Comoros, Comoran law forbids them to adopt the child after leaving Comoros. The Embassy is not aware of any mechanism in Comoran law that would allow non-Comoran citizens to assume guardianship of a child for the purpose of taking him/her to the another country to conclude a full and final adoption. Thus, there appears to be no legal mechanism for a Comoran child to qualify for an immigrant visa as an adopted child or a child to be adopted internationally.

CONGO

Compiled from the October 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Democratic Republic of the Congo

PROFILE

Geography

Location: Central Africa. Bordering nations—Angola, Burundi, Central African Republic, Republic of the Congo, Sudan, Rwanda, Tanzania, Uganda, Zambia.

Area: 2.345 sq. km. (905,063 sq. mi.; about the size of the U.S. east of the Mississippi).

Cities: Capital—Kinshasa (pop. 8 million). Regional capitals—Bandundu, Bukavu, Goma, Kananga, Kindu, Kisangani, Lubumbashi, Matadi, Mbandaka, Mbuji-Mayi.

Terrain: Varies from tropical rainforests to mountainous terraces, plateau, savannas, dense grasslands, and mountains.

Climate: Equatorial; ranges from tropical rainforest in the Congo River basin, hot and humid in much of the north and west, cooler and drier in the south central area and the east.

People

Nationality: Noun and adjective—Congolese.

Population: (2008 est.) 66 million.

Annual growth rate: (2008 est.) 3.24%.

Ethnic groups: More than 200 African ethnic groups; the Luba, Kongo, and Anamongo are some of the larger groupings of tribes.

Religions: Christian 70% (Catholic 50%, Protestant 20%); Kimbanguist 10%; other sects and traditional beliefs 10%; Muslim 10%.

Languages: Official—French. National languages—Lingala, Swahili, Kikongo, Tshiluba.

Education: Literacy (2004 est.)—65.5% in French or local language. Schooling (2000 est.)—none 41.7%, primary 42.2%, secondary 15.4%, university 0.7%.

Health: (2006 est.) Infant mortality rate—129/1,000 live births. Life expectancy—46.1 yrs.

Government

Type: Republic; highly centralized with executive power vested in the president.

Independence: June 30, 1960 (from Belgium).

Constitution: June 24, 1967; amended August 1974; revised February 15, 1978; amended April 1990; transitional constitution promulgated April 1994; Constitutional Act promulgated May 1997; draft constitution proposed but not finalized March 1998; transitional constitution adopted on April 2, 2003. A new constitution was passed by the transitional parliament on May 2005. The D.R.C. held a constitutional referendum on December 18-19, 2005. Official results indicated that 84% of voters approved the constitution. The new constitution was promulgated in a ceremony on February 18, 2006.

Government branches: Executive—President is head of state. Cabinet is appointed by the ruling party in the parliament. Prime minister is elected by the parliament. Legislative—The 500-member lower house of parliament was elected in July 30, 2006 national elections. Provincial Assemblies elected the Senate in October 29, 2006 elections. The Senate elected provincial governors. Judicial—Supreme Court (Cour Supreme).

Political subdivisions: Ten provinces and the capital city, Kinshasa.

Political parties: President Joseph Kabila's party is Parti du Peuple pour la Reconstruction et le Developpement (PPRD). Two main coalitions represent President Kabila and his presidential run-off challenger, former Transitional Vice President Jean-Pierre Bemba. Other opposition parties include Union pour la Democratie et le Progres Social (UDPS), Forces du Futur (FDF), Forces Novatrices pour l'Union et la Solidarite (FONUS), Parti Democrate Social Chretien (PDSC), Mouvement Social Democratie et Developpement (MSDD), Mouvement Populaire de la Revolution—Fait Prive (MPR-FP), Union des Nationalistes et des Federalistes Congolais (UNAFEC), and Mouvement National Congolais/ Lumumba (MNC/L). Former rebel movements-

turned-political parties include the Rassemblement Congolais pour la Democratie (RCD), Mouvement pour la Liberation du Congo (MLC), and independent splinter groups of the RCD (RCD-ML, RCD-N).
Suffrage: 18 years of age; universal and compulsory.

Economy

GDP: (2007) $9.85 billion.
Annual GDP growth rate: (2007) 7%.
Per capita GDP: (2007) $300.
Natural resources: Copper, cobalt, diamonds, gold, other minerals; petroleum; wood; hydroelectric potential.
Agriculture: Cash crops—coffee, rubber, palm oil, cotton, cocoa, sugar, tea. Food crops—manioc, corn, legumes, plantains, peanuts.
Land use: Agriculture 3%; pasture 7%; forest/woodland 77%; other 13%.
Industry: Types—processed and unprocessed minerals; consumer products, including textiles, plastics, footwear, cigarettes, metal products; processed foods and beverages, cement, timber.
Currency: Congolese franc (FC).
Trade: Exports (2006)—$1.587 billion. Products—diamonds, cobalt, copper, coffee, petroleum. Partners—EU, Japan, South Africa, U.S., China. Imports (2006)—$2.263 billion. Products—consumer goods (food, textiles), capital equipment, refined petroleum products. Partners—EU, China, South Africa, U.S.
Total external debt: (2006) $11 billion

GEOGRAPHY

The Democratic Republic of the Congo (D.R.C.) includes the greater part of the Congo River basin, which covers an area of almost 1 million square kilometers (400,000 sq. mi.). The country's only outlet to the Atlantic Ocean is a narrow strip of land on the north bank of the Congo River.

The vast, low-lying central area is a basin-shaped plateau sloping toward the west and covered by tropical rainforest. This area is surrounded by mountainous terraces in the west, plateaus merging into savannas in the south and southwest, and dense grasslands extending beyond the Congo River in the north. High mountains are found in the extreme eastern region.

D.R.C. lies on the Equator, with one-third of the country to the north and two-thirds to the south. The climate is hot and humid in the river basin and cool and dry in the southern highlands. South of the Equator, the rainy season lasts from October to May and north of the Equator, from April to November. Along the Equator, rainfall is fairly regular throughout the year. During the wet season, thunderstorms often are violent but seldom last more than a few hours. The average rainfall for the entire country is about 107 centimeters (42 in.).

PEOPLE

The population of D.R.C. was estimated at 66 million in 2008. As many as 250 ethnic groups have been distinguished and named. Some of the larger groups are the Kongo, Luba, and Anamongo. Although 700 local languages and dialects are spoken, the linguistic variety is bridged both by the use of French and the intermediary languages Kikongo, Tshiluba, Swahili, and Lingala.

About 70% of the Congolese population is Christian, predominantly Roman Catholic. Most of the non-Christians adhere to either traditional religions or syncretic sects. Traditional religions include concepts such as monotheism, animism, vitalism, spirit and ancestor worship, witchcraft, and sorcery and vary widely among ethnic groups; none is formalized. The syncretic sects often merge Christianity with traditional beliefs and rituals. The most popular of these sects, Kimbanguism, was seen as a threat to the colonial regime and was banned by the Belgians. Kimbanguism, officially "the church of Christ on Earth by the prophet Simon Kimbangu," now claims about 3 million members, primarily among the Bakongo tribe of Bas-Congo and Kinshasa. In 1969, it was the first independent African church admitted to the World Council of Churches.

Before independence in 1960, education was largely in the hands of religious groups. The primary school system was well developed at independence; however, the secondary school system was limited, and higher education was almost nonexistent in most regions of the country. The principal objective of this system was to train low-level administrators and clerks. Since independence, efforts have been made to increase access to education, and secondary and higher education have been made available to many more Congolese. According to estimates made in 2000, 41.7% of the population has no schooling, 42.2% has primary schooling, 15.4% has secondary schooling, and 0.7% has university schooling. At all levels of education, males greatly outnumber females. The largest state-run universities are the University of Kinshasa, the University of Lubumbashi, and the University of Kisangani. The elite continue to send their children abroad to be educated, primarily in Western Europe.

HISTORY

The area known as the Democratic Republic of the Congo was populated as early as 10,000 years ago and settled in the 7th and 8th centuries A.D. by Bantus from present-day Nigeria.

Discovered in 1482 by Portuguese navigator Diego Cao and later explored by English journalist Henry Morton Stanley, the area was officially colonized in 1885 as a personal possession of Belgian King Leopold II as the Congo Free State. In 1907, administration shifted to the Belgian Government, which renamed the country the Belgian Congo.

Following a series of riots and unrest, the Belgian Congo was granted its independence on June 30, 1960. Parliamentary elections in 1960 produced Patrice Lumumba as prime

minister and Joseph Kasavubu as president of the renamed Democratic Republic of the Congo.

GOVERNMENT AND POLITICAL CONDITIONS

The Mobutu Era

Within the first year of independence, several events destabilized the country: the army mutinied; the governor of Katanga province attempted secession; a UN peacekeeping force was called in to restore order; Prime Minister Lumumba died under mysterious circumstances; and Col. Joseph Désiré Mobutu (later Mobutu Sese Seko) took over the government and ceded it again to President Kasavubu.

Unrest and rebellion plagued the government until 1965, when Lieutenant General Mobutu, by then commander in chief of the national army, again seized control of the country and declared himself president for 5 years. Mobutu quickly centralized power into his own hands and was elected unopposed as president in 1970.

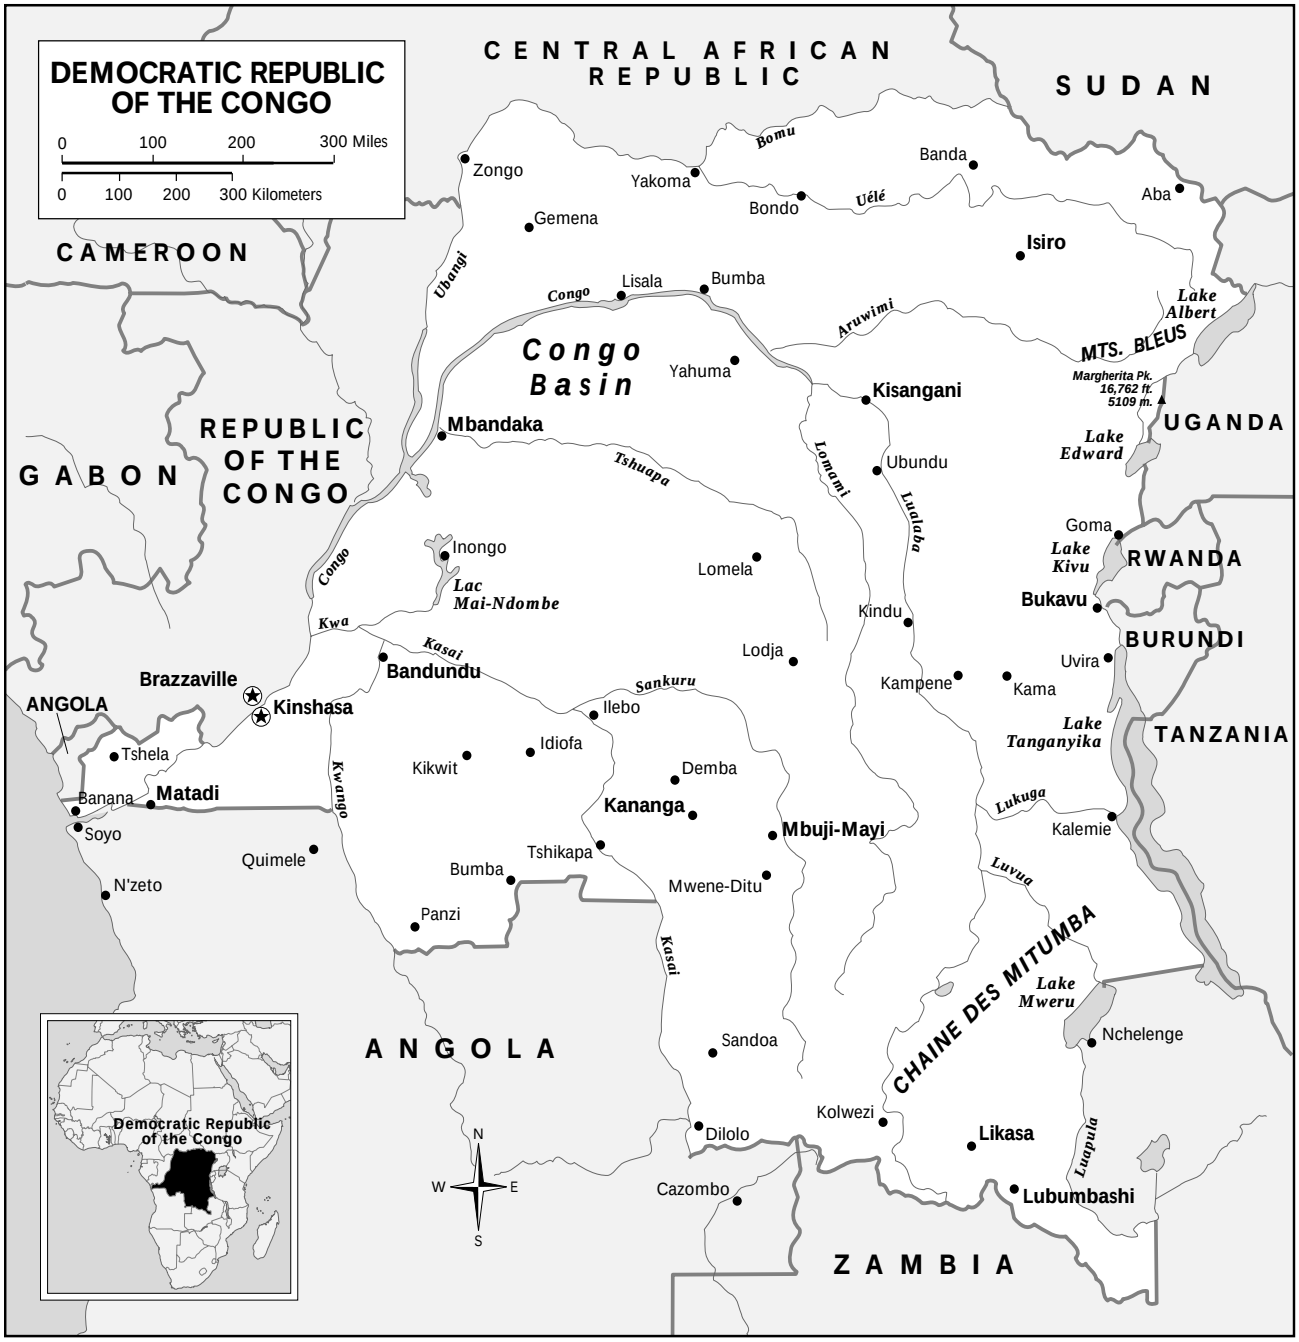
Embarking on a campaign of cultural awareness, Mobutu renamed the country the Republic of Zaire and required citizens to adopt African names. Relative peace and stability prevailed until 1977 and 1978 when Katangan rebels, staged in Angola, launched a series of invasions into the Katanga region. The rebels were driven out with the aid of Belgian paratroopers.

During the 1980s, Mobutu continued to enforce his one-party system of rule. Although Mobutu successfully maintained control during this period, opposition parties, most notably the Union pour la Démocratie et le Progrès Social (UDPS), were active. Mobutu's attempts to quell these groups drew significant international criticism.

As the Cold War came to a close, internal and external pressures on Mobutu increased. In late 1989 and early 1990, Mobutu was weakened by a series of domestic protests, by heightened international criticism of his regime's human rights practices, and by a faltering economy. In April 1990 Mobutu agreed to the principle of a multi-party system with elections and a constitution. As details of a reform package were delayed, soldiers in September 1991 began looting Kinshasa to protest their unpaid wages. Two thousand French and Belgian troops, some of whom were flown in on U.S. Air Force planes, arrived to evacuate the 20,000 endangered foreign nationals in Kinshasa.

In 1992, after previous similar attempts, the long-promised Sovereign National Conference was staged, encompassing more than 2,000 representatives from various political parties. The conference gave itself a legislative mandate and elected Archbishop Laurent Monsengwo as its chairman, along with Etienne Tshisekedi, leader of the UDPS, as prime minister. By the end of the year Mobutu had created a rival government with its own prime minister. The ensuing stalemate produced a compromise merger of the two governments into the High Council of Republic-Parliament of Transition (HCR-PT) in 1994, with Mobutu as head of state and Kengo Wa Dondo as prime minister. Although presidential and legislative elections were scheduled repeatedly over the next 2 years, they never took place.

By 1996, the war and genocide in neighboring Rwanda had spilled over to Zaire. Rwandan Hutu militia forces (Interahamwe), who fled Rwanda following the ascension of a Tutsi-led government, were using Hutu refugee camps in eastern Zaire as bases for incursions against Rwanda.



In October 1996, Rwandan troops (RPA) entered Zaire, simultaneously with the formation of an armed coalition led by Laurent-Désiré Kabila known as the Alliance des Forces Démocratiques pour la Libération du Congo-Zaire (AFDL). With the goal of forcibly ousting Mobutu, the AFDL, supported by Rwanda and Uganda, began a military campaign toward Kinshasa. Following failed peace talks between Mobutu and Kabila in May 1997, Mobutu left the country.

From Dictatorship to Disintegration

Laurent-Désiré Kabila marched into Kinshasa on May 17, 1997 and declared himself president. He consolidated power around himself and the AFDL and renamed the country the Democratic Republic of Congo (D.R.C.). Kabila's Army Chief and the Secretary General of the AFDL were Rwandan, and RPA units continued to operate tangentially with the D.R.C.'s military, which was renamed the Forces Armées Congolaises (FAC).

Over the next year, relations between Kabila and his foreign backers deteriorated. In July 1998, Kabila ordered all foreign troops to leave the D.R.C. Most refused to leave. On August 2, fighting erupted throughout the D.R.C. as Rwandan troops in the D.R.C. "mutinied," and fresh Rwandan and Ugandan troops entered the D.R.C. Two days later, Rwandan troops flew to Bas-Congo, with the intention of marching on Kinshasa, ousting Laurent Kabila, and replacing him with the newly formed Rwandan-backed rebel group called the Rassemblement Congolais pour la Démocratie (RCD). The Rwandan campaign was thwarted at the last minute when Angolan, Zimbabwean, and Namibian troops intervened on behalf of the D.R.C. Government. The Rwandans and the RCD withdrew to eastern D.R.C., where they established de facto control over portions of eastern D.R.C. and continued to fight the Congolese Army and its foreign allies.

In February 1999, Uganda backed the formation of a rebel group called the Mouvement pour la Libération du Congo (MLC), which drew support from among ex-Mobutuists and ex-FAZ soldiers in Equateur province (Mobutu's home province). Together, Uganda and the MLC established control over the northern third of the

D.R.C. At this stage, the D.R.C. was divided de facto into three segments—one controlled by Laurent Kabila, one controlled by Rwanda, and one controlled by Uganda—and the parties had reached military deadlock. In July 1999, a cease-fire was proposed in Lusaka, Zambia, which all parties signed by the end of August. The Lusaka Accord called for a cease-fire, the deployment of a UN peacekeeping operation, MONUC, the withdrawal of foreign troops, and the launching of an "Inter-Congolese Dialogue" to form a transitional government leading to elections.

The parties to the Lusaka Accord failed to fully implement its provisions in 1999 and 2000. Laurent Kabila drew increasing international criticism for blocking full deployment of UN troops, hindering progress toward an Inter-Congolese Dialogue, and suppressing internal political activity.

On January 16, 2001, Laurent Kabila was assassinated. He was succeeded by his son Joseph, who reversed many of his father's negative policies. Over the next year, MONUC deployed throughout the country, and the Inter-Congolese Dialogue proceeded. By the end of 2002, all Angolan, Namibian, and Zimbabwean troops had withdrawn from the D.R.C. Following D.R.C.-Rwanda talks in South Africa that culminated in the Pretoria Accord in July 2002,

Rwandan troops officially withdrew from the D.R.C. in October 2002, although there were continued, unconfirmed reports that Rwandan soldiers and military advisers remained integrated with RCD/G forces in eastern D.R.C. Ugandan troops officially withdrew from the D.R.C. in May 2003.

National Dialogue, Transitional Government, and Nascent Democracy

In October 2001, the Inter-Congolese Dialogue began in Addis Ababa under the auspices of Facilitator Ketumile Masire (former president of Botswana). The initial meetings made little progress and were adjourned. On February 25, 2002, the dialogue was reconvened in South Africa. It included representatives from the government, rebel groups, political opposition, civil society, and Mai-Mai (Congolese local defense militias). The talks ended inconclusively on April 19, 2002, when the government and the MLC brokered an agreement that was signed by the majority of delegates at the dialogue but left out the RCD/G and opposition UDPS party, among others.

This partial agreement was never implemented, and negotiations resumed in South Africa in October 2002. This time, the talks led to an all-inclusive agreement, which was signed by delegates in Pretoria on December 17, 2002, and formally ratified by all parties on April 2, 2003.

Following nominations by each of the various signatory groups, President Kabila on June 30, 2003 issued a decree that formally announced the transitional government lineup. The four vice presidents took the oath of office on July 17, 2003, and most incoming ministers assumed their new functions within days thereafter.

A transitional constitution was adopted on April 2, 2003; a new constitution was promulgated February 2006. Extensive executive, legislative, and military powers are vested in the president. The legislature does not have the power to overturn the government through a vote of no confidence. The judiciary is nominally independent; the president has the power to dismiss and appoint judges. The president is head of a 35-member cabinet of ministers.

President Joseph Kabila has made significant progress in liberalizing domestic political activity, establishing a transitional government, and undertaking economic reforms in cooperation with the World Bank and International Monetary Fund (IMF). However, serious human rights problems remain in the security services and justice system. The eastern part of the country is characterized by ongoing violence and armed conflict, which has created a humanitarian disaster and contributed to civilian deaths (more than 3.8 million, according to a prominent international non-governmental organization). MONUC continues to play an important peacekeeping role in the D.R.C., and in October 2004, its authorized force strength increased to 16,700.

On July 30, 2006 the D.R.C. held its first free, democratic, multi-party elections in more than 40 years. The D.R.C.'s 25 million registered voters were charged with electing a president (from a field of 33 candidates) and 500 deputies to the National Assembly (out of a total of 9,709 candidates). Despite technical and logistical difficulties, coupled with isolated incidents of violence and intimidation, the elections were held in a largely calm and orderly fashion. Voter turnout nationwide was high, particularly in the eastern provinces, compared to the December 2005 constitutional referendum.

The Independent Electoral Commission (CEI) on August 20, 2006 announced official provisional results from the July 30 presidential elections. According to CEI figures, incumbent Joseph Kabila won 44.81% of the votes cast versus Vice President Jean-Pierre Bemba's 20.3%. As no candidate won a majority of votes in the first round and in accordance with the country's electoral law, the top two recipients, Kabila and Bemba, faced off in a second round of balloting. The D.R.C.'s transitional process was threatened by military clashes in Kinshasa just hours after provisional election results were announced. This crisis was exclusively confined to the Gombe area of central Kinshasa and was essentially a clash between Vice President Bemba and President Kabila's militias. The runoff presidential elections were held on October 29, 2006. On November 27, 2006 the Congolese Supreme Court declared President Kabila the winner over Vice President Bemba by a margin of 58% to 42%. Kabila was inaugurated on December 6, 2006.

Voters in July 2006 also chose from among 9,709 legislative candidates to fill 500 seats in the National Assembly, representing 169 electoral districts. Approximately one-third of these districts elected one deputy by a simple majority. The rest were multiple-seat districts, ranging from two representatives to a maximum of 17 (in one of Kinshasa's voting districts). In these areas, deputies were chosen by proportional representation using open party lists. To select the winners in multiple-seat districts, all valid votes cast were first divided according to political party. Next, an "electoral quotient" was determined by dividing the number of votes cast by the number of representatives to be elected. Finally, the number of votes a party received was divided by this "electoral quotient" to determine how many seats the party would win. The candidates ultimately elected were those who received the highest number of votes within their particular party lists. National Assembly deputies serve five-year terms and there is no restriction on the number of times they can be re-elected.

Organizing the D.R.C.'s July 2006 elections presented significant logistical challenges. Supported in large part by the MONUC peacekeeping mission, the Independent Electoral Commission opened more than 50,000 polling stations nationwide and employed some 300,000 poll workers on election day and to oversee the ballot counting process. The presidential and legislative ballots

were printed in South Africa and altogether weighed nearly 1,800 tons, requiring 75 round-trip flights between the D.R.C. and South Africa.

For the July 2006 elections, the CEI reported that there were approximately 25.42 million voters registered and a voter participation rate of 70.54%. Of the 17.9 million ballots cast, 993,704 (approximately 5%) were disqualified due to empty ballots or marking errors. In 2005, approximately 25.7 million Congolese registered as voters (out of an original estimate of 28 million eligible to do so). In the D.R.C.'s December 2005 constitutional referendum, roughly two-thirds of all registered voters participated.

The D.R.C. legislature held its first session on September 22, 2006. On February 26, 2007, Prime Minister Antoine Gizenga and the new Congolese cabinet formally took office. In May 2007, Kengo wa Dongo was elected Senate President.

The Continuing Search for a Lasting Peace

On September 8, 2007, the Governments of the D.R.C. and Uganda reached an agreement in Ngurdoto, Tanzania, in which they mutually agreed to strengthen bilateral efforts to eliminate all "negative forces" (illegal armed groups) operating in and from the two countries.

On November 9, 2007, the Governments of the D.R.C. and Rwanda, with facilitation by the UN and witness of the United States and the European Union, signed the Nairobi Communiqué, which was designed to put an end to the presence in the D.R.C. of all foreign armed groups, particularly the ex-FAR/Interahamwe (later the Forces Démocratique de Libération du Rwanda, FDLR). These groups were to be disarmed, demobilized, and repatriated.

On January 23, 2008, the Government of the D.R.C. and over 20 armed groups signed a peace accord in Goma, D.R.C., under which the parties agreed on the need for immediate cessation of hostilities, the disengagement of troops, improved adherence to human rights standards, and the creation of UN buffer zones between and among the various factions.

As of October 1, 2008, none of these agreements had been fully implemented, and the eastern part of the country in particular continues to suffer from the activities of numerous illegal armed groups that operate largely with impunity.

Principal Government Officials

Last Updated: 11/12/08

Pres.: **Joseph KABILA**
Prime Min.: **Antoine GIZENGA**
Min. of State for Agriculture: **Francois Joseph MOBUTU NZANGA Ngbangawe**
Min. of State for Interior, Decentralization, & Security: **Denis KALUME Numbi**
Min. of State at the Presidency: **Nkulu MITUMBA Kilombo**
Min. of Budget: **Adolphe MUZITO**
Min. of Civil Service: **Laurent-Simon IKENGE Lisambola**
Min. of Communications & Media: **Emile BONGELI**
Min. of Culture & Arts: **Esdras KAMBALE**
Min. of Defense & Veterans Affairs: **Guyslain CHIKEZ Diemu**
Min. of Economy & External Trade: **Andre-Phillipe FUTA**
Min. of Energy: **Salomon BANAMUHERE Baliene**
Min. of the Environment & Tourism: **Jose ENDUNDU Bononge**
Min. of Finance: **Athanase MATENDA Kyelu**
Min. of Foreign Affairs & Intl. Cooperation: **Antipas MBUSA Nyamwisi**
Min. of Gender, Women, & Children's Affairs: **Philomene Omatuku ATSHAKAWO Akatshi**
Min. of Health: **Victorienne MELENGE**
Min. of Higher Education & Scientific Research: **Leonard MASUGA**
Min. of Hydrocarbons: **Lambert MENDE Omalanga**
Min. of Industry: **Simon MBOSO Kiamputu**
Min. of Infrastructure, Public Works, & Reconstruction: **Pierre LUMBI Okongo**
Min. of Justice: **Mutombo BAKAFWA Nsenda**
Min. of Labor & Social Security: **Marie-Ange LUKIANA Mufwankolo**
Min. of Lands: **Edouard KABUKABWA Bitangilay**
Min. of Mines: **Martin KABWELULU Labilo**
Min. of National Economy: **Sylvain Joel BIFWILA Tchamwala**
Min. of Plan: **Olivier KAMITATU Etsu**
Min. of Post, Telephones, & Telecommunications: **Louisa MUNGA**
Min. of Primary & Secondary Education: **Maker MWANGU Famba**
Min. at the Prime Min.'s Office: **Godefroid Mayobo MPWENE Ngantien**
Min. of Public Enterprises: **Jeannine MABUNDA Lioko**
Min. of Relations With Parliament: **Adolphe LUMANU**
Min. of Social & Humanitarian Affairs: **Jean-Claude MUYAMBO**
Min. of Transportation: **Charles MWANDO Nsimba**
Min. of Urban Planning & Housing: **Sylvain NGABU Chumbu**
Min. of Youth & Sports: **Willy BAKONGA**
Governor, Central Bank: **Jean-Claude MASANGU Mulango**
Ambassador to the US: **Faida Maramuke MITIFU**
Permanent Representative to the UN, New York: **Atoki Christian ILEKA**

ECONOMY

Sparsely populated in relation to its area, the Democratic Republic of the Congo is home to a vast potential of natural resources and mineral wealth. Nevertheless, the D.R.C. is one of the poorest countries in the world, with per capita annual income of about $300 in 2007. This is the result of years of mismanagement, corruption, and war.

In 2001, the Government of the D.R.C. under Joseph Kabila undertook a series of economic reforms aimed at stabilizing the macroeconomic situation and promoting economic growth. Reforms were monitored by the IMF and included liberalization of petroleum prices and exchange rates and adoption of disciplined fiscal and monetary policies. The reform program reduced inflation from over 500% per year in 2000 to only about 7% per year in 2003. Inflation rose to 15-20% percent in 2006.

In June 2002, the World Bank and IMF approved new credits for the D.R.C. for the first time in over a decade. Bilateral donors, whose assistance has been almost entirely dedicated to humanitarian interventions in recent years, also are beginning to fund development projects in the D.R.C. In October 2003, the World Bank launched a multi-sector plan for development and reconstruction.

In July 2003, the D.R.C. became eligible for external debt relief ("decision point") under the Heavily Indebted Poor Countries (HIPC) Initiative. However, the D.R.C. lost its eligibility for interim debt relief when it failed to make its sixth IMF review in 2006 due to fiscal slippages and slow implementation of key structural reforms. If the D.R.C. successfully completes its current non-disbursing staff-monitored program with the IMF and qualifies for a new IMF disbursement program, it will be back on track for HIPC debt relief. This debt relief will help alleviate the D.R.C.'s external sovereign debt burden and provide critically needed resources for poverty reduction programs.

In early 2008, the D.R.C. concluded an agreement with a consortium of Chinese companies to create a joint venture to exploit mining resources and develop Congolese infrastructure. The project will be financed by a $9 billion loan arranged by the consortium. To ensure debt sustainability, some of the loan agreement's provisions must be clarified in order to qualify the D.R.C. for a new IMF Poverty Reduction and Growth Facility (PRGF) program.

The D.R.C. Government is working to implement the Poverty Reduction Strategy Paper (PRSP) approved in mid-2006 by the IMF and World Bank boards. The government's five-year program, approved by the National Assembly in February 2007, is based on the PRSP and focuses heavily on President Kabila's five priority areas: infrastructure, employment, education, water/electricity, and health.

Agriculture is the mainstay of the Congolese economy, accounting for 45.7% of GDP in 2006. The main cash crops include coffee, palm oil, rubber, cotton, sugar, tea, and cocoa. Food crops include cassava, plantains, maize, groundnuts, and rice. Industry, especially the mining sector, is underdeveloped relative to its potential in the D.R.C. In 2006, industry accounted for only 27.7% of GDP, with 6.5% attributed to manufacturing. Services reached 26.6% of GDP. The D.R.C. was the world's fourth-largest producer of industrial diamonds during the 1980s, and diamonds continue to dominate exports, accounting for over half of exports ($642 million) in 2003. The D.R.C.'s main copper and cobalt interests are dominated by Gecamines, the state-owned mining giant. Gecamines production has been severely affected by corruption, civil unrest, world market trends, and failure to reinvest.

For decades, corruption and misguided policy have created a dual economy in the D.R.C. Individuals and businesses in the formal sector operated with high costs under arbitrarily enforced laws. As a consequence, the informal sector now dominates the economy. In 2002, with the population of the D.R.C. estimated at 56 million, only 230,000 Congolese working in private enterprise in the formal sector were enrolled in the social security system.

In recent years, the Congolese Government approved a new investment code and a new mining code and designed a new commercial court. The goal of these initiatives was to attract investment by promising fair and transparent treatment to private business. In 2007, shortly after the Joseph Kabila administration took office, the government launched a wholesale review of mining contracts that had been entered into under previous governments. In theory, the purpose of this contract review was to determine which negotiations may have been colored by corruption and revisit/renegotiate their terms as need be. In practice, this process has itself been opaque, with little information provided by the government to foreign (including American) investors. The World Bank also is supporting efforts to restructure the D.R.C.'s large parastatal sector, including Gecamines, and to rehabilitate the D.R.C.'s neglected infrastructure, including the Inga Dam hydroelectric system.

The outbreak of war in the early days of August 1998 caused a major decline in economic activity. As was noted above, the country was divided de facto into different territories, and commerce among these territories had halted. With the installation of the transitional government in July 2003, the country was reunified, and economic and commercial links began to reconnect. Economic growth resumed in 2002 with a 3% growth rate, continuing in 2007 at 7%.

In June 2000, the United Nations established a Panel of Experts on the Illegal Exploitation of Congolese Resources to examine links between the wars and natural resource exploitation. Reports issued by the panel indicate that countries involved in the war in Congo developed significant economic interests in the D.R.C. that complicated Congolese Government efforts to control its resources and the mining sector. Although the original Panel of Experts was disbanded when its mandate ended in late 2003, a separate UN Group of Experts continues to look into these issues due to the apparent links between the illegal armed groups in the eastern part of the D.R.C. and natural resource exploitation. The Group of Experts is scheduled to issue a final report on these issues by the end of 2008.

FOREIGN RELATIONS

The D.R.C.'s location in the center of Africa has made the country a key player in the region since even before independence. Because of its size, mineral wealth, and strategic location, Zaire under Mobutu was able to capitalize on Cold War tensions to garner support from the West. In the early 1990s, however, Cold War-era tolerance of human rights abuses faded, and the mounting evidence of

such abuses led Western support for the Mobutu regime to wane just as internal pressure for reform increased.

D.R.C.'s relations with neighboring countries have often been driven by security concerns, leading to intricate, interlocking, and shifting alliances. Domestic conflicts in the Central African Republic, Sudan, Uganda, Angola, Rwanda, and Burundi have at various times created bilateral and regional tensions. The current situation in eastern D.R.C. arose from foreign insurgents' use of D.R.C. territory as a base for attacking their home countries as well as the Congolese Government's inability to secure its own borders.

U.S.-CONGOLESE RELATIONS

In December 2006, the D.R.C. inaugurated its first democratically elected president in over 40 years, the culmination of both the Congolese people's efforts to choose their leaders through a peaceful, democratic process and international support for numerous domestic and international peace agreements. The United States is proud to have played a role in the peace process in the D.R.C., and continues to encourage Congolese peace, prosperity, democracy, and respect for human rights.

The United States remains a partner with the D.R.C. and other central African nations in their quest for stability and growth on the continent. The United States facilitated the signing of a tripartite agreement on regional security in the Great Lakes region among the D.R.C., Rwanda, and Uganda in October 2004. (Burundi formally joined the Tripartite Commission in September 2005, and the Tripartite Commission is now Tripartite Plus.) The United States also strongly supported UN efforts to create a Joint Verification Mechanism to monitor the border between the D.R.C. and Rwanda. The United States has pursued an active diplomatic strategy in support of these objectives. The United States seeks to strengthen the process of internal reconciliation and democratization in D.R.C., as in all the states of the region, so that the D.R.C. and its neighbors can jointly address mutual security interests and develop mutually beneficial economic relations.

The United States appointed its current ambassador to the D.R.C. in November 2007. The D.R.C. appointed its current ambassador to the United States in 2000. The State Department has consistently issued cautionary travel information about Zaire/D.R.C. since 1977.

TRAVEL

Consular Information Sheet

September 23, 2008

Country Description: The Democratic Republic of the Congo (Congo-Kinshasa) located in central Africa, is the third largest country on the continent. The capital is Kinshasa. French is the official language. Years of civil war and corruption have badly damaged the country's infrastructure.

Entry Requirements: A passport, visa and evidence of yellow fever vaccination are required for entry. Some travelers arriving in the DRC without proper proof of yellow fever vaccination have been temporarily detained, had their passports confiscated, or been required to pay a fine. Information about yellow fever vaccination clinics in the U.S. may be found at http://www2.ncid.cdc.gov/travel/yellowfever. Visas must be obtained from an embassy of the DRC prior to arrival.

Travelers to the DRC frequently experience difficulties at the airport and other ports of entry, such as temporary detention, passport confiscation and demands by immigration and security personnel for unofficial "special fees." All resident foreigners, including Americans, are required to register at the office of the Direction General de Migration (DGM) in the commune of their place of residence. Visitors who wish to travel in any mining areas must first obtain government approval from various government agencies or ministries, an often cumbersome and time consuming process.

Dual nationals arriving in the DRC should carefully consider which passport they use to enter the DRC. For departure from the DRC, airlines will require a valid visa for all destination countries before they will issue a ticket or allow a passenger to board. Airlines also require that the passenger have the correct entry stamp in the passport they wish to use to exit

the country. Passengers who are unable to leave the country on the passport they used to enter the DRC may not be able to continue on their travel itinerary.

Additional information about visas may be obtained from the Embassy of the Democratic Republic of the Congo, 1726 M Street NW, Washington, DC 20036, tel. (202) 234-7690, or the DRC's Permanent Mission to the UN, 866 United Nations Plaza, Room 511, New York, NY 10017, tel. 212-319-8061, fax: 212-319-8232, web site http://www.un.int/drcongo. Overseas, inquiries should be made at the nearest Congolese embassy or consulate.

Safety and Security: See the Department of State's Travel Warning for the Democratic Republic of the Congo.

Though the DRC is now significantly more stable than it has been over the past decade, security remains problematic. The first democratic elections in more than forty years were held in 2006, and a new government is now in place. Post-election disturbances occurred as recently as March 2007 in Kinshasa, resulting in deaths of civilians and military personnel. During civil disturbances in 2007 there were incidents of hostility towards U.S. citizens and other expatriates.

Both inside and outside Kinshasa, there can be roadblocks, especially after dark. Vehicles are often searched for weapons and valuables, and travelers are checked for identity papers. Security forces regularly seek bribes. If confronted with such a situation, it is suggested that U.S. citizens remain courteous and calm. If detained, report the incident to the U.S. Embassy in Kinshasa as soon as possible.

The United Nations has its largest peacekeeping operation in the world in the DRC. Known by its French acronym of MONUC, it has close to 17,000 peacekeepers deployed in the country—primarily in the east. Violence nevertheless persists in the eastern DRC due to the presence of several militias and foreign armed groups, with sporadic outbreaks occurring in North Kivu, South Kivu, and northern Katanga provinces, as well as in the Ituri District of Orientale province. Members of the Lord's Resistance Army entered into northeastern DRC from Sudan in 2005, and have camps in an isolated region of the DRC, Garamba National Park, where they killed eight MONUC peacekeepers in January 2006.

For the latest security information, Americans traveling abroad should regularly monitor the Department of State, Bureau of Consular Affairs' web site at http://travel.state.gov, where the current Travel Warnings and Travel Alerts, as well as the Worldwide Caution, can be found.

For the latest security information, Americans traveling abroad should regularly monitor the Department of State, Bureau of Consular Affairs' web site, where the current Travel Warnings and Travel Alerts including the Worldwide Caution Travel Alert, can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S. and Canada, or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

The Department of State strongly urges American citizens to take responsibility for their own personal security while traveling overseas.

Crime: In the DRC, poor economic conditions continue to foster crime, especially in urban areas. Travel in many sections of Kinshasa, Kisangani, Lubumbashi and most other major cities, is generally safe during daylight hours, but travelers are urged to be vigilant against criminal activity which targets non-Congolese, particularly in highly congested traffic and areas surrounding hotels and stores. Outlying, remote areas are less secure due to high levels of criminal activity and the lack of adequate training, supervision, and salary payments to the security forces present.

Vehicle thefts, burglaries, and armed robbery occur throughout the country; there have been recent reports of after-dark carjackings, resulting in deaths in the North Kivu area. It is recommended to drive with doors locked and windows closed at all times. If confronted by members of the military or security forces, visitors should not permit soldiers or police officers to enter their vehicles nor get into the vehicle of anyone purporting to be a security official. It is recommended that in such instances U.S. citizens remain courteous and calm and, if threatened, not resist. All incidents should be reported to the U.S. Embassy in Kinshasa.

Consistency in administering laws and regulations is notably absent. Travelers should note that in cases of theft and robbery, legal recourse is limited. Therefore, valuable items may be safer if kept at home or another secure location. Security officials and/or individuals purporting to be security officials have detained and later robbed American citizens and other foreigners in the city of Kinshasa. This type of crime has increased in recent months, but generally occurs more frequently during the Christmas and New Year's holidays.

Travelers using public transportation or visiting high pedestrian traffic areas of any type are advised to be vigilant against robbery and pickpocketing which is a persistent problem in all major cities in the DRC. The presence of "street children," who can be persistent and sometimes aggressive, remains a problem particularly in Kinshasa.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, contact family members or friends and explain how funds could be transferred.

Although the investigation and prosecution of the crime is solely the responsibility of local authorities,

consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

Medical Facilities and Health Information: In the DRC, medical facilities are severely limited, and medical materials are in short supply. Travelers should carry properly labeled prescription drugs and other medications with them and should not expect to find an adequate supply of prescription or over-the-counter drugs in local stores or pharmacies. Payment for any medical services required is expected in cash, in advance of treatment.

Malaria is common throughout the DRC and outbreaks of cholera, typhoid, yellow fever, the Ebola virus, and hemorrhagic fever occur. Travelers should take appropriate precautions to prevent the spread of HIV/AIDS. Tuberculosis is an increasingly serious health concern in the DRC. For further information, please consult the CDC's Travel Notice on TB at: http://wwwn.cdc.gov.

The U.S. Department of State is unaware of any HIV/AIDS entry restrictions for visitors to or foreign residents of the DRC.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's web site at http://wwwn.cdc.gov/travel.

Tuberculosis is an increasingly serious health concern in Democratic Republic of Congo. For further information, please consult the CDC's Travel Notice on TB at http://wwwn.cdc.gov/travel.

For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith/en.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation. For planning purposes, the minimum estimated cost of medical air evacuation to the nearest suitable health care facility (in South Africa) is $35,000.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning the DRC is provided for general reference only, and may vary according to location or circumstance.

Inter-city roads are scarce, and throughout the DRC roads are generally in poor condition, and often impassable in the rainy season. When driving in cities, keep windows up and doors locked. At roadblocks or checkpoints, documents should be shown through closed windows. In the event of a traffic incident involving bodily injury to a third party or pedestrian, do not stop to offer assistance under any circumstances. Proceed directly to the nearest police station or gendarmerie to report the incident and request official government intervention. Attempting to provide assistance may further aggravate the incident, resulting in a hostile mob reaction such as stoning or beating.

Presidential and other official motorcades pose serious risks to drivers and pedestrians in Kinshasa. When hearing sirens or seeing security forces announcing the motorcade's approach, drivers should pull off the road as far as possible, stop their vehicles, and extinguish headlights. Vehicles should not attempt to move until the entire motorcade has passed by; the security forces will physically indicate when this has occurred. Failure to comply may result in arrest, and/or vehicle damage with possible personal injury.

Public transportation of all forms is unregulated and is generally unsafe and unreliable. Taxis, mini-buses, and trains are in poor mechanical condition and are invariably filled beyond capacity.

Visitors who wish to travel in any mining areas must first obtain government approval from various government agencies or ministries, an often cumbersome and time consuming process.

Drivers should stop their cars and pedestrians should stand still when passing a government installation during the raising and lowering of the Congolese flag. This ceremony occurs at roughly 7:30 a.m. and 6:00 p.m.

Aviation Safety Oversight: The U.S. Federal Aviation Administration (FAA) has assessed the Government of the DRC's Civil Aviation Authority as not being in compliance with International Civil Aviation Organization (ICAO) aviation safety standards for the oversight of the DRC's air carrier operations. For more information, travelers may visit the FAA's web site at http://www.faa.gov.

Civil aviation in the DRC continues to experience air incidents and accidents; more than a dozen crashes and in-flight accidents resulted in more than 300 fatalities between 2000 and August 2008. Incidents included hard landings, engine failures, collapsed landing gear, and planes veering off the runway. In-country air travel schedules are unreliable and planes are frequently overloaded with passengers and/or cargo.

The U.S. Embassy in the DRC has prohibited official travel by U.S. government employees and contractors on all DRC-owned and -operated commercial air transportation services due to concerns regarding safety and maintenance. International flights on foreign-owned and -operated carriers are not affected by this notice.

Photography: Travelers should note that photography in public places in Kinshasa and around any public or government building or monument in the DRC is strictly forbidden. Persons

caught photographing such sites will likely have their photographic equipment confiscated and risk detention and possible arrest.

Travel to and From Congo-Brazzaville (Republic of Congo): Ferry service to and from Kinshasa and Brazzaville stops running in the late afternoon, does not operate on Sundays, and may close completely with minimal notice. If ferry service is functioning, a special exit permit from the DRC's Immigration Service and a visa from the Republic of the Congo (Congo-Brazzaville) are required for U.S. citizens to cross the Congo River from Kinshasa to Brazzaville.

Ferry and riverboat service to the Central African Republic is suspended due to rebel control of the Ubangui River.

Phone Service: In the DRC, cellular phones are the norm, as other telephone service is unreliable. Depending on the type of phone, it may be possible to locally purchase a SIM card to use an American-compatible cell phone in the DRC.

Currency: U.S. currency is widely accepted in the urban areas, but most vendors and banking institutions will accept only Series 1996 bills or newer, with the large, off-center portraits, that provide stronger protection against counterfeiting. In addition, bills must be in near perfect condition; even those with minor stains or small tears will be rejected. One dollar bills are rarely accepted, even if in mint condition. U.S. bills should be examined before they are accepted to ensure that they are legitimate, as counterfeit currency is widely circulated. It is recommended that currency exchange be conducted at reputable banks and not on the street where several schemes exist to either short-change the unwitting customer or to pass counterfeit bills.

Criminal Penalties: While in any foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Penalties for breaking the law can be more severe in the DRC than in the United States for similar offenses. Persons violating Congolese laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in the DRC are severe, and convicted offenders can expect long jail sentences and heavy fines. Accusations of engaging in crimes against the security of the State, which are loosely defined, often result in detention for prolonged periods without being formally arrested. The DRC's justice system remains plagued by corruption and uneven application of the law. Attorney fees can be expensive and are expected to be paid in advance of services rendered.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov. The DRC is not a signatory to the Hague Convention; potential adoptive parents are cautioned to thoroughly understand existing DRC Family Code with respect to adoption before beginning adoption proceedings.

Registration and Embassy Locations: Americans living or traveling in the DRC are encouraged to register with the U.S. Embassy through the State Department's travel registration web site, so that they can obtain updated information on travel and security within the Congo. Americans without Internet access may register directly with the U.S. Embassy. By registering, American citizens make it easier for the Embassy to contact them in case of emergency. The U.S. Embassy is located at 310 Avenue des Aviateurs; tel. 243-081-225-5872 (do not dial the zero when calling from abroad). Entrance to the Consular Section of the Embassy is on Avenue Dumi, opposite the Ste. Anne residence. The Consular Section of the Embassy may be reached at tel. 243-081-884-6859 or 243-081-884-4609; fax 243-081-301-0560 (do not dial the first zero when calling from abroad).

Intercountry Adoption

June 2006

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is based on public sources and current understanding. Questions involving foreign and U.S. immigration laws and legal interpretation should be addressed respectively to qualified foreign or U.S. legal counsel.

Patterns of Immigration: Please review current reports online at http://adoption.state.gov.

Adoption Authority: Although the Ministry of Justice has jurisdiction over adoptions, individual cases are handled by the Tribunal de Paix in the region where a prospective adoptive child resides. Mailing addresses do not exist as there is no mail service. Attorneys have current contacts at appropriate courts.

Eligibility Requirements for Adoptive Parents: Adopting parents may be married, single, widowed or divorced. Persons in these last three groups may not adopt a child of the opposite sex unless the court grants an exemption. Couples should have been married for at least five years and be at least 15 years older than the intended adoptee. This "15-year rule" may be waived if the adoptee is a biological child of one of the

parents. Any person who has a prior history of child abuse is not permitted to adopt. There is no age limit for adopting parents. No couple may adopt more than three children unless a subsequent prospective adoptee is the biological child of one of the parents. Parents may not already have more than two children when they adopt. No adoptive parent may marry the adopted child. There is no medical ineligibility for adoptive parents.

Residency Requirements: Prospective adoptive parents do not need be permanent or long-term residents of the DRC.

Time Frame: It can take from a minimum of three months to a maximum of one year to complete the adoption process from child placement to visa issuance.

Adoption Agencies and Attorneys: There are no adoption agencies in DRC. However, orphanages must be licensed or accredited by the Congolese government. It is customary and accepted practice to engage Congolese lawyers to carry out adoption proceedings. Lawyers are automatically accredited by the government by virtue of their professional training. The U.S. Embassy in Kinshasa maintains a list of attorneys known to work with U.S. citizens on its web site. http://kinshasa.usembassy.gov/attorneys_in_congo.html. This list does not imply an endorsement of specific attorneys by the Embassy.

Adoption Fees: Court fees for an adoption case average between $100 and $300. Lawyer fees can range from $1,000 to $2,500. Fees can be kept to a minimum if, prior to the first consultation, adopting parents secure any required documents such as birth, death, marriage and relevant court records on their own.

Adoption Procedures: Prospective parents apply for permission to adopt by sending a letter to the Tribunal de Paix in the region where the child resides. Postal delivery is very limited, so a letter should be sent by messenger or delivered by hand. There is no application form. The Judge from the Tribunal de Paix approves foreign adoptive parents for adoption. If the adoptive parents choose the adoptive child at an orphanage, they do so according to their own criteria (age, gender, etc.). A lawyer may represent the adoptive parents, but adoptive parents' criteria are taken into consideration, rather than a governmental agency or social organization.

The court will require consent to the adoption be settled before granting a judgment. Biological parents, or other family members if one or both parents are deceased, must give their consent. If no family members are identified, the court will step in to determine consent. Any child over the age of 15 and over must give his or her own consent. Please bear in that U.S. immigration law states only adopted orphans under the age of sixteen are eligible for immigrant visas; sixteen and seventeen year olds are eligible only when adopted with a sibling group.

After obtaining the proper consent, the prospective adoptive parents request a hearing in open court at the Tribunal de Paix in the area where the child resides. Along with the request for hearing, the prospective adoptive parents must submit copies of their birth certificates and the birth certificate of the prospective adoptee. The court will require proof that any and all interested family members of the child have been informed of the adoption and have received notice of the court hearing. The adoptive parents and prospective adopted child (if over age 10) must appear personally in court before the judge. Other interested parties may attend or submit documents to the court. After the initial hearing, the court conducts an investigation to determine that all conditions for placement or final adoption have been met and that all documents are legitimate. Adopting parents are not required to remain in DRC after the hearing while waiting for the judgment.

Once the investigation is completed and all requirements have been satisfied, the court will issue a judgment of adoption. The date of the adoption will be retroactive to the date of the first court appearance. The adopted child's name on the judgment will incorporate his/her original name along with the newly adopted family name. At the time of adoption, choices concerning citizenship will be made by the adoptive parent (in the case of minors) or by the adoptee (if 18 years or older). The adoptive parents must register the judgment at the local city hall or magistrate within one month or the adoption is null and void. This is done either where the adoptive parents live (if they live within DRC) or where the child resides (if the adoptive parents do not live in the DRC).

Required Documents: The adopting parents must submit copies of their own birth certificates, the birth certificate of the prospective adoptee, police certificates from the adoptive parents place of birth and attestations of good conduct from their city hall or local embassy or consulate.

Embassy of the Democratic Republic of Congo
1726 M Street, N.W.
Washington, D.C. 20036
Telephone: (202) 234-7690

U.S. Immigration Requirements: Prospective adopting parents are strongly encouraged to consult USCIS publication M-249, *The Immigration of Adopted and Prospective Adoptive Children*, as well as the Department of State publication, *Intercountry Adoptions*. Please see the *Intercountry Adoption* section of this book for more details and review current reports online at http://adoption.state.gov.

U.S. Embassy: The U.S. Embassy in Kinshasa is located on 310 Avenue des Aviateurs.

Additional Information: Specific questions about intercountry adoption in the Democratic Republic of Congo may be addressed to the U.S. Embassy in Kinshasa. General questions regarding intercountry adoption may be addressed to the Office of Children's Issues, U.S. Department of State, CA/OCS/CI, SA-29, 4th Floor,

2201 C Street, NW, Washington, D.C. 20520-4818, toll-free Tel: 1-888-407-4747.

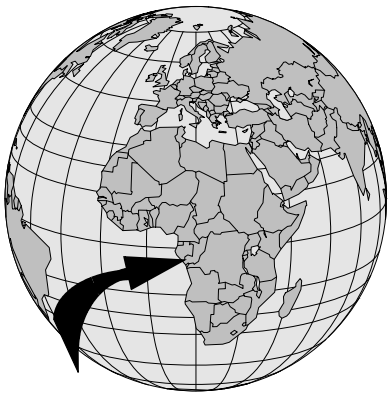
Travel Warning

October 30, 2008

The Department of State warns U.S. citizens of the risks of traveling to the Democratic Republic of the Congo (Congo-Kinshasa), and recommends against all travel to North Kivu province. This replaces the Travel Warning dated July 23, 2008 to note the deterioration in the security situation in North Kivu.

Conditions within certain regions of the Democratic Republic of the Congo (DRC), particularly in the east, remain dangerous. Official personnel from the U.S. Embassy in Kinshasa are restricted from travel to North Kivu unless the travel is for official business and has been specifically authorized by the Embassy. On October 29, 2008, all U.S. Government personnel who had been present in the city of Goma relocated temporarily to the Rwandan town of Gisenyi, directly across the border. American citizens should avoid travel to Goma and surrounding areas, and those who are there are urged to depart. Fighting between armed rebels, Congolese military forces, and U.N. peacekeeping troops has increased in the province of North Kivu and continues in the provinces of South Kivu, Orientale, northern Katanga, and sporadically in Bas Congo. Armed groups as well as active duty and demobilized Congolese troops in parts of the country are known to pillage, carjack, and steal vehicles, kill extra-judicially, rape, kidnap, and carry out military or paramilitary operations. Government soldiers, as well as rebel fighters expected to be demobilized as a result of ongoing peace processes, remain a security concern. Travelers are frequently detained and questioned by poorly disciplined security forces at numerous roadblocks and border crossings throughout the country.

Travelers to the DRC frequently experience difficulties at the airport and other ports of entry, such as temporary detention, passport confiscation, and demands by immigration and security personnel for unofficial "special fees." Visas are not available at ports of entry. All resident foreigners, including Americans, are required to register at the office of the Direction General de Migration (DGM) in the commune of their place of residence. Border closures of 24-48 hour durations can occur without much advance notice.



Enforcement of aviation safety standards in the DRC is uneven, with frequent incidents and crashes. The U.S. Embassy has prohibited official travel by U.S. government employees and contractors on all DRC-owned and operated commercial airlines due to safety and maintenance concerns. International flights on foreign-owned and –operated carriers are not affected by this notice.

American citizens should avoid all public demonstrations and areas where crowds have gathered, exercise caution, and closely monitor local and international news from reliable sources. Radio Okapi broadcasts in French on 103.5 FM at 0700, 0800, 1200, and 1800 as well as "flash" updates throughout the day. English-language news can be found on BBC at 92.7 FM. In times of emergency, the Belgian Embassy operates a French-language radio broadcast system at FM 98.8. Changes in security conditions may occasionally restrict the travel of U.S. Mission personnel.

Public Health concerns also pose a hazard to U.S. citizen travelers due to outbreaks of deadly viruses and other diseases, which can occur without warning and often are not rapidly reported by local health authorities. Information on personal protection for international travelers, including children, can be found at http://wwwn.cdc.gov/travel.

U.S. citizens who travel to or remain in the DRC despite this Travel Warning are strongly urged to register with the Embassy in Kinshasa or through the State Department's travel registration website at https://travelregistration.state.gov. By registering, American citizens make it easier for the Embassy to contact them in case of emergency. The U.S. Embassy is located at 310 Avenue des Aviateurs; the Consular Section entrance is located on Avenue Dumi, opposite Saint Anne's Residence. The Embassy's 24-hour phone number is 243-81-225-5872; callers within DRC should dial 081-225-5872. All Embassy telephone numbers are cellular phones as landlines are unreliable. The Embassy website is http://kinshasa.usembassy.gov.

U.S. citizens should also consult the Department of State's Country Specific Information for the Democratic Republic of the Congo and the Worldwide Caution, both located on the Department's Internet website at http://travel.state.gov. Up-to-date information on safety and security is available toll-free at 1-888-407-4747 from within the United States and Canada, or at regular toll rates at 1-202-501-4444 for callers outside the United States and Canada, from 8:00 a.m. to 8:00 p.m. Eastern Time, Monday through Friday (except U.S. federal holidays).

CONGO

Compiled from the November 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Republic of the Congo

PROFILE

Geography

Area: 342,000 sq. km (132,000 sq. mi.); slightly larger than New Mexico.
Cities: Capital—Brazzaville (pop. 800,000). Other cities—Pointe-Noire (450,000), Dolisie (150,000).
Climate: Tropical. Tropical jungle in the North (country seasonally split—half lies above the Equator; half below the Equator).
Terrain: Coastal plains, fertile valleys, central plateau, forested flood plains.

People

Nationality: Noun and adjective—Congolese (sing. and pl.).
Population: (July 2007 est.) 3,800,610.
Annual growth rate: (2007 est.) 2.639%.
Ethnic groups: 15 principal Bantu groups; more than 70 subgroups. Largest groups are Bacongo, Vili, Bateke, M'Bochi, and Sangha. Also present is a small population (less than 100,000) of Pygmies, ethnically unrelated to the Bantu majority.
Religions: Traditional beliefs 50%, Roman Catholic 35%, other Christian 15%, Muslim 2%.
Languages: French (official), Lingala and Munukutuba (national).
Health: Infant mortality rate (2007 est.)—83.26 deaths/1,000 live births. Life expectancy (2007 est.)—53.29 yrs.
Work force: About 40% of population, two-thirds of whom work in agriculture.

Government

Type: Republic.
Independence: August 15, 1960.
Constitution: New constitution adopted in nationwide referendum on January 20, 2002.
Government branches: Executive—president (chief of state), Council of Ministers (cabinet). Legislative—bicameral legislature made up of a Senate and a National Assembly. Judicial—Supreme Court, Court of Accounts and Budgetary Discipline, Courts of Appeal (Title VIII of the 2002 constitution), and the Constitutional Court (Title IX of the 2002 constitution). Other—Economic Council and Human Rights Commission.
Political subdivisions: 10 departments, divided into districts, plus the capital district.
Political parties: More than 100 new parties formed (but not all function) since multi-party democracy was introduced in 1990. The largest are the Pan-African Union for Social Democracy (UPADS), Congolese Labor Party (PCT), Congolese Movement for Democracy and Integral Development (MCDDI), Coalition for Democracy and Social Progress (RDPS), Coalition for Democracy and Development (RDD), Union of Democratic Forces (UFD), Union of Democratic Renewal (URD), Union for Development and Social Progress (UDPS). Following the June-October 1997 war and the 1998-99 civil conflict, many parties, including UPADS and MCDDI, were left in disarray as their leadership fled the country. By 2007, many of the leaders had returned, with the notable exception of former President Pascal Lissouba.
Suffrage: Universal adult.

Economy

GDP: (2007 est.) $7.6 billion.
Real GDP growth rate: (2007 est.) -1.6%.
Per capita income: (2007 est.) $2,159.
Inflation: (2007 est.) 2.6%.
Natural resources: Petroleum, wood, potash, lead, zinc, uranium, phosphates, natural gas, hydropower.
Structure of production: (2001) Government and services—40.3%; petroleum sector—38.9%; agriculture and forestry—10.5%; utilities and industry—6.0%; other—4.3%.
Agriculture: Products—manioc, sugar, rice, corn, peanuts, vegetables, coffee, cocoa, forest products. Land—less than 2% cultivated.
Trade: (2006 est.) Exports—$5.996 billion (f.o.b.) petroleum (89% of

export earnings), lumber, plywood, sugar, cocoa, coffee, diamonds. Imports—$1.964 billion (f.o.b.) capital equipment, construction materials, foodstuffs.

PEOPLE

Congo's sparse population is concentrated in the southwestern portion of the country, leaving the vast areas of tropical jungle in the north virtually uninhabited. Thus, Congo is one of the most urbanized countries in Africa, with 70% of its total population living in Brazzaville, Pointe-Noire, or along the 332-mile railway that connects them. In southern rural areas, industrial and commercial activity suffered as a consequence of the civil wars in the late 1990s. Except in Kouilou province and Pointe Noire, commercial activity other than subsistence activity came nearly to a halt. A slow recovery began in 2000 and continues in 2008.

Before the 1997 war, about 9,000 Europeans and other non-Africans lived in Congo, most of whom were French. Only a fraction of this number remains. The number of American citizens residing in Congo typically hovers around 100.

HISTORY

First inhabited by Pygmies, Congo was later settled by Bantu groups that also occupied parts of present-day Angola, Gabon, and Democratic Republic of the Congo (formerly Zaire), forming the basis for ethnic affinities and rivalries among those states. Several Bantu kingdoms—notably those of the Kongo, the Loango, and the Teke—built trade links leading into the Congo River basin. The first European contacts came in the late 15th century, and commercial relationships were quickly established with the kingdoms—trading for slaves captured in the interior. The coastal area was a major source for the transatlantic slave trade, and when that commerce ended in the early 19th century, the power of the Bantu kingdoms eroded. The area came under French sovereignty in the 1880s. Pierre Savorgnon de Brazza, a French empire builder, competed with agents of Belgian King Leopold's International Congo Association (later Zaire) for control of the Congo River basin. Between 1882 and 1891, treaties were secured with all the main local rulers on the river's right bank, placing their lands under French protection. In 1908, France organized French Equatorial Africa (AEF), comprising its colonies of Middle Congo (modern Congo), Gabon, Chad, and Oubangui-Chari (modern Central African Republic). Brazzaville was selected as the federal capital.

Economic development during the first 50 years of colonial rule in Congo centered on natural resource extraction by private companies. In 1924-34, the Congo-Ocean Railway (CFCO) was built at a considerable human and financial cost, opening the way for growth of the ocean port of Pointe-Noire and towns along its route.

During World War II, the AEF administration sided with Charles DeGaulle, and Brazzaville became the symbolic capital of Free France during 1940-43. The Brazzaville Conference of 1944 heralded a period of major reform in French colonial policy, including the abolition of forced labor, granting of French citizenship to colonial subjects, decentralization of certain powers, and election of local advisory assemblies. Congo benefited from the postwar expansion of colonial administrative and infrastructure spending as a result of its central geographic location within AEF and the federal capital at Brazzaville.

The Loi Cadre (framework law) of 1956 ended dual voting roles and provided for partial self-government for the individual overseas territories. Ethnic rivalries then produced sharp struggles among the emerging Congolese political parties and sparked severe riots in Brazzaville in 1959. After the September 1958 referendum approving the new French Constitution, AEF was dissolved. Its four territories became autonomous members of the French Community, and Middle Congo was renamed the Congo Republic. Formal independence was granted in August 1960. Congo's first President was Fulbert Youlou, a former Catholic priest from the Pool region in the southeast. He rose to political prominence after 1956, and was narrowly elected President by the National Assembly at independence. Youlou's 3 years in power were marked by ethnic tensions and political rivalry. In August 1963, Youlou was overthrown in a 3-day popular uprising (Les Trois Glorieuses) led by labor elements and joined by rival political parties. All members of the Youlou government were arrested or removed from office. The Congolese military took charge of the country briefly and installed a civilian provisional government headed by Alphonse Massamba-Debat.

Under the 1963 constitution, Massamba-Debat was elected President for a 5-year term and named Pascal Lissouba to serve as Prime Minister. However, President Massamba-Debat's term ended abruptly in August 1968, when Capt. Marien Ngouabi and other army officers toppled the government in a coup. After a period of consolidation under the newly formed National Revolutionary Council, Major Ngouabi assumed the presidency on December 31, 1968. One year later, President Ngouabi proclaimed Congo to be Africa's first "people's republic" and announced the decision of the National Revolutionary Movement to change its name to the Congolese Labor Party (PCT).

On March 18, 1977, President Ngouabi was assassinated. Although the persons accused of shooting Ngouabi were tried and some of them executed, the motivation behind the assassination is still not clear. An 11-member Military Committee of the Party (CMP) was named to head an interim government with Colonel (later General) Joachim Yhomby-Opango to serve as President of the Republic. Accused of corruption and deviation from party directives, Yhomby-Opango was removed from office on February 5, 1979, by the Central Committee of the PCT, which then simultaneously designated Vice President and Defense Minister Col.

Denis Sassou-Nguesso as interim President. The Central Committee directed Sassou-Nguesso to take charge of preparations for the Third Extraordinary Congress of the PCT, which proceeded to elect him President of the Central Committee and President of the Republic. Under a congressional resolution, Yhomby-Opango was stripped of all powers, rank, and possessions and placed under arrest to await trial for high treason. He was released from house arrest in late 1984 and ordered back to his native village of Owando.

After two decades of turbulent politics bolstered by Marxist-Leninist rhetoric, and with the collapse of the Soviet Union, the Congolese gradually moderated their economic and political views to the point that, in 1992, Congo completed a transition to multi-party democracy. Ending a long history of one-party Marxist rule, a specific agenda for this transition was laid out during Congo's national conference of 1991 and culminated in August 1992 with multi-party presidential elections. Sassou-Nguesso conceded defeat and Congo's new President, Prof. Pascal Lissouba, was inaugurated on August 31, 1992.

Congolese democracy experienced severe trials in 1993 and early 1994.

President Lissouba dissolved the National Assembly in November 1992, calling for new elections in May 1993. The results of those elections were disputed, touching off violent civil unrest in June and again in November. In February 1994, all parties accepted the decisions of an international board of arbiters, and the risk of large-scale insurrection subsided.

However, Congo's democratic progress was derailed in 1997. As presidential elections scheduled for July 1997 approached, tensions between the Lissouba and Sassou-Nguesso camps mounted. When President Lissouba's government forces surrounded Sassou-Nguesso's compound in Brazzaville with armored vehicles on June 5, Sassou-Nguesso ordered his militia to resist. Thus began a 4-month conflict that destroyed or damaged much of Brazzaville. In early October, Angolan troops invaded Congo on the side of Sassou-Nguesso and, in mid-October, the Lissouba government fell. Soon thereafter, Sassou-Nguesso declared himself President and named a 33-member government.

In January 1998, the Sassou-Nguesso regime held a National Forum for Reconciliation to determine the nature and duration of the transition period. The forum, tightly controlled by the government, decided elections should be held in about 3 years, elected a transition advisory legislature, and announced that a constitutional convention would finalize a draft constitution. However, the eruption in late 1998 of fighting between Sassou-Nguesso's government forces and a pro-Lissouba and pro-Kolelas armed opposition disrupted the transition to democracy. This new violence also closed the economically vital Brazzaville-Pointe Noire railroad, caused great destruction and loss of life in southern Brazzaville and in the Pool, Bouenza, and Niari regions, and displaced hundreds of thousands of persons. In November and December 1999, the government signed agreements with representatives of many, though not all, of the rebel groups.

The December accord, mediated by President Omar Bongo of Gabon, called for follow-on, inclusive political negotiations between the government and the opposition. During the years 2000-01, Sassou-Nguesso's government conducted a national dialogue (Dialogue Sans Exclusif), in which the opposition parties and the government agreed to continue on the path to peace. Ex-President Lissouba and ex-Prime Minister Kolelas refused to agree and were exiled. They were tried in absentia and convicted in Brazzaville of charges ranging from treason to misappropriation of government funds. Ex-militiamen were granted amnesty, and many were provided micro-loans to aid their reintegration into civil society. Not all opposition members participated. One group, referred to as "Ninjas," actively opposed the government in a low-level guerrilla war in the Pool region of the country. Other members of opposition parties have returned and have opted to participate to some degree in political life.

A new constitution was drafted in 2001, approved by the provisional legislature (National Transition Council), and approved by the people of Congo in a national referendum in January 2002. Presidential elections were held in March 2002, and Sassou-Nguesso was declared the winner. Legislative elections were held in May and June 2002. In March 2003 the government signed a peace accord with the Ninjas, and the country has remained stable and calm since the signing. Internally displaced persons are returning to the Pool region. President Sassou-Nguesso allowed Kolelas to return to Congo for his wife's funeral in October 2005 and subsequently asked that Parliament grant Kolelas amnesty. Parliament complied with Sassou-Nguesso's request in December 2005.

In 2007, Sassou-Nguesso announced he would allow the return of former president Pascal Lissouba, along with a pardon for the 2001 in absentia conviction for "economic crimes" for which Lissouba had been sentenced to 30 years. By early 2008, however, Lissouba had not returned to the country. Former prime minister Joachim Yhombi-Opango, returned to the country in August 2007 after the Council of Ministers granted him amnesty in May for a 2001 conviction in absentia for allegedly improperly selling the country's oil while in office. Legislative elections were held in June and August 2007 and were widely viewed as disorganized and marred by irregularities, with low voter turnout. Presidential elections are scheduled for 2009.

GOVERNMENT AND POLITICAL CONDITIONS

Before the 1997 war, the Congolese system of government was similar to that of the French. However, after taking power, Sassou-Nguesso suspended the constitution approved in 1992 upon which this system was based. The 2002 constitution provides for a 7-year presidential term. There is a parliament of two houses, whose members serve for 5 years.

Principal Government Officials

Last Updated: 11/12/08

Pres.: **Denis SASSOU-Nguesso**
Prime Min.: **Isidore MVOUBA**
Min. of State, Min. of Civil Service & State Reform: **Jean-Martin MBEMBA**
Min. of State, Min. of Hydrocarbons: **Jean-Baptiste TATY LOUTARD**
Min. of State, Min. of Justice & Human Rights & Keeper of the Seals: **Aime Emmanuel YOKA**
Min. of State, Min. of Planning & Territory Improvement: **Pierre MOUSSA**
Min. at the Presidency in Charge of Cooperation, Humanitarian Action, & Solidarity: **Charles Zacharie BOWAO**
Min. at the Presidency in Charge of Land Reform & Conservation of the Public Domain: **Lamyr NGUELET**
Min. at the Presidency in Charge of National Defense, Veterans, & Disabled War Veterans: **Jacques Yvon NDOLOU, Maj. Gen.**
Min. at the Presidency in Charge of Subregional Integration & the New Partnership for Africa's Development (NEPAD): **Justin Ballay MEGOT**
Min. of Agriculture & Livestock: **Rigobert MABOUNDOU**

Min. of Commerce, Consumption, & Supplies: **Jeanne DAMBENZET**
Min. of Communications in Charge of Relations With Parliament: **Alain AKOUALA-ATIPAULT**
Min. of Construction, Town Planning, Housing, & Land Reform: **Claude Alphonse NSILOU**
Min. of Culture, Arts, & Tourism: **Jean-Claude GAKOSSO**
Min. of Economy, Finance, & Budget: **Pacifique ISSOIKBEKA**
Min. of Energy & Water: **Bruno Jean Richard ITOUA**
Min. of Equipment & Public Works: **Florent NTSIBA, Brig. Gen.**
Min. of Foreign Affairs, Intl. Cooperation, & Relations With Francophone Countries: **Basile IKOUEBE**
Min. of Forestry Economy: **Henri DJOMBO**
Min. of Health, Social Affairs, & the Family: **Emilienne RAOUL**
Min. of Higher Education & Scientific Research: **Henri OSSEBI**
Min. of Industrial Development & the Promotion of the Private Sector: **Emile MABONZO**
Min. of Labor, Employment, & Social Security: **Gilbert ODONGO**
Min. of Maritime & Inland Fisheries, in Charge of Aquaculture: **Guy Brice Parfait KOLELAS**
Min. of Maritime Transportation & the Merchant Marine: **Martin Parfait Aime COUSSOUD-MAVOUNGOU**
Min. of Mines, Mineral Industries, & Geology: **Pierre OBA**
Min. of Posts & Technology, in Charge of New Technologies: **Thierry MOUNGALA**
Min. of Primary & Secondary Education, in Charge of Literacy: **Rosalie KAMA**
Min. for the Promotion of Women & the Integration of Women in Development: **Jeanne Francois LECKOMBA LOUMETOPOMBO**
Min. of Scientific Research & Technical Innovation: **Hellot MAMPOUYA MANTSON**
Min. of Security & Public Order: **Paul MBOT, Gen.**
Min. of Small & Medium-Size Enterprises, in Charge of Cottage Industry: **Adelaide MOUNDELE-NGOLLO**
Min. of Sports & Youth: **Serge Michel ODZOKI**
Min. of Technical Education & Professional Training: **Pierre Michel NGUIMBI**
Min. of Territory Admin. & Decentralization: **Raymond MBOULOU**
Min. of Tourism & Environment: **Andri Okombi SALISSA**
Min. of Transportation & Civil Aviation: **Emile OUOSSO**
Min.-Del. for Territorial Development, Attached to the Min. of Planning & Territory Improvement: **Gaston GAPO**
Dir., Central Bank:
Ambassador to the US: **Serge MOMBOULI**
Permanent Representative to the UN, New York:

The Congo maintains an embassy in the United States at 4891 Colorado Avenue, NW, Washington, DC 20011 (tel: 202-726-5500). The Congolese Mission to the United Nations is at 14 East 65th Street, New York, NY 10021 (tel: 212-744-7840).

ECONOMY

The Congo's economy is based primarily on its petroleum sector, which is by far the country's major revenue earner. The Congolese oil sector is dominated by the French oil company TotalFinaElf. In second position is the Italian oil firm Agip. Chevron Overseas Limited (in partnership with TotalFinaElf) is the primary American oil company active in petroleum exploration or production. Murphy Oil has signed a contract but has not begun exploration or production; that project should begin in 2008. Congo's oil production is expected to decline over the next 15 years with fields yielding less. However, based on an agreement with Angola signed in 2002 to jointly administer certain Congo-Cabinda border areas, Congo's production could rise if exploration is successful. Murphy Oil signed a Production Sharing Agreement (PSA) with Congo in 2003 for two deepwater off-shore permits and expects to begin work in 2008. Congo hopes to offset declining production in other fields with these new PSAs.

The country's abundant northern rain forests are the source of timber. Forestry, which led Congolese exports before the discovery of oil, now generates less than 7% of export earnings. Wood production came to a standstill during the war years but has recommenced, and new concessions were leased in 2001.

Earlier in the decade, Congo's major employer was the state bureaucracy, which had 80,000 employees on its payroll—enormous for a country of Congo's size. The World Bank and other international financial institutions pressured Congo to institute sweeping civil service reforms in order to reduce the size of the state bureaucracy and pare back a civil service payroll that amounted to more than 20% of GDP in 1993. The effort to cut back began in 1994 with a 50% devaluation that cut the payroll in half in dollar terms. By the middle of 1994, there was a reduction of nearly 8,000 in civil service employees.

Between 1994-96, the Congolese economy underwent a difficult transition. The prospects for building the foundation of a healthy economy, however, were better than at any time in the previous 15 years. Congo took a number of measures to liberalize its economy, including reforming the tax, investment, labor, timber, and hydrocarbon codes. In 2002-03 Congo privatized key parastatals, primarily banks, telecommunications, and transportation monopolies, to help improve a dilapidated and unreliable infrastructure. By the end of 1996, Congo had made substantial progress in various areas targeted for reform. It made significant strides toward macroeconomic stabilization through improving public finances and restructuring external debt. This change was accompanied by improvements in the structure of expenditures, with a reduction in personnel expenditures. Further, Congo benefited from debt restructuring from a Paris Club agreement in July 1996.

This reform program came to a halt, however, in early June 1997 when war broke out, and the return of armed conflict in 1998-99 hindered economic reform and recovery. President Sassou-Nguesso has moved forward on improved governance, economic reforms, and privatization, as well as on cooperation with international financial institutions. President Sassou-Nguesso also has made speeches outlining the need for good governance and transparency in the Congo, particularly during his 2003 and 2004 National Day Addresses.

Before June 1997, Congo and the United States ratified a bilateral investment treaty designed to facilitate and protect foreign investment. The country also adopted a new investment code intended to attract foreign capital. The country has made some commendable efforts at political and economic reform, but despite these successes, Congo's investment climate has challenges, offering few meaningful incentives for new investors. High costs for labor, energy, raw materials, and transportation; a restrictive labor code; low productivity and high production costs; and a deteriorating transportation infrastructure have been among the factors discouraging investment. Five years of civil conflict (1997-2003) further damaged infrastructure, though the privatization of some statal and parastatal enterprises has generated some interest from U.S. companies.

In March 2006, the World Bank and International Monetary Fund (IMF) approved Heavily Indebted Poor Countries (HIPC) decision point treatment for Congo, noting that Congo has performed satisfactorily on an IMF-supported program and developed an interim Poverty Reduction Strategy. The IMF and World Bank also noted, however, that Congo needed to address serious concerns about governance and financial transparency in order to qualify for completion point and irrevocable debt relief. Specifically, Congo needs to bring the internal controls and accounting system of the state-owned oil company (SNPC) up to internationally recognized standards; prevent conflicts of interests in the marketing of oil; require SNPC officials to publicly declare and divest any interests in companies having a business relationship with SNPC; and implement an anti-corruption action plan with international support. Any resources that are freed by interim debt relief granted to Congo must be used for poverty reduction under a reform program closely monitored by the international financial institutions. The poverty reduction program has been marked by continued delays, and progress in 2007 was incremental at best.

In November 2007, Congo was readmitted to the Kimberley Process, an international multi-stakeholder initiative designed to stem the trade of conflict diamonds. Congo had been suspended from the Kimberley Process in 2004 after reviews showed its diamond exports vastly outnumbered its production capacity. Congo's government estimates current diamond capacity to be 5,000 carats, with a potential for 50,000 to 70,000 carats.

The London Club and Congolese Government also signed an agreement in November 2007 forgiving 77% of the country's London Club debt. The agreement followed similar measures with the Paris Club, which has now forgiven up to 90% to 100% of the country's debt. The Congo Government continues to face lawsuits from companies who purchase the country's debt on the secondary markets and attempt to reclaim the debt through Western legal systems.

FOREIGN RELATIONS

For the two decades preceding Congo's 1991 national conference, the country was firmly in the socialist camp, allied principally with the Soviet Union and other Eastern bloc nations. Educational, economic, and foreign aid links between Congo and its Eastern bloc allies were extensive, with the Congolese military and security forces receiving significant Soviet, East German, and Cuban assistance.

France, the former colonial power, maintained a continuing but somewhat subdued relationship with Congo, offering a variety of cultural, educational, and economic assistance. The principal element in the French-Congolese relationship was the highly successful oil sector investment of the French petroleum parastatal Elf-Aquitaine (now called TotalFinaElf), which entered the Congo in 1968 and has continued to grow.

After the worldwide collapse of communism and Congo's adoption of multi-party democracy in 1991, Congo's bilateral relations with its former socialist allies became relatively less important. France is now by far Congo's principal external partner, contributing significant amounts of economic assistance, while playing a highly influential role. However, there is a growing interest in attracting American investors.

Congo is a member of the United Nations, African Union, African Development Bank, World Trade Organization (WTO), Central African Economic and Monetary Community (CEMAC), Central African Customs and Economic Union (UDEAC), International Coffee Organization, Economic Community of Central African States ECCAS/CEEAC), INTERPOL, the Nonaligned Movement, and the Group of 77. Congo holds a seat on the United Nations Security Council during 2006-2007. In January 2006, President Sassou-Nguesso was elected Chairman of the African Union.

U.S.-CONGOLESE RELATIONS

Diplomatic relations between the United States and Congo were broken during the most radical Congolese-Marxist period, 1965-77. The U.S. Embassy reopened in 1977 with the restoration of relations, which remained distant until the end of the socialist era. The late 1980s were marked by a progressive warming of Congolese relations with Western countries, including the United States. Congolese President Denis Sassou-Nguesso made a state visit to Washington in 1990, where he was received by President George H.W. Bush.

With the advent of democracy in 1991, Congo's relations with the United States improved and were cooperative. The United States has enthusiastically supported Congolese democratization efforts, contributing aid to the country's electoral process. The Congolese Government demonstrated an active interest in deepen-

ing and broadening its relations with the United States. Transition Prime Minister Andre Milongo made an official visit to Washington in 1992, where President Bush received him at the White House.

Then-presidential candidate Pascal Lissouba traveled to Washington in 1992, meeting with a variety of officials, including Assistant Secretary of State for African Affairs Herman J. Cohen. After his election in August 1992, President Lissouba expressed interest in expanding U.S.-Congo links, seeking increased U.S. development aid, university exchanges, and greater U.S. investment in Congo. With the outbreak of the 1997 war, the U.S. Embassy was evacuated. The Embassy was closed, and its personnel became resident in Kinshasa, Democratic Republic of the Congo.

In 2001 Embassy-suspended operations were lifted, and Embassy personnel were allowed to travel to Brazzaville for periods of extended temporary duty from the U.S. Embassy in Kinshasa. As a result, U.S.-Congo bilateral relations were reinvigorated. In 2003 and 2004 this practice continued, and a site for construction of a new Embassy was acquired in July 2004. Construction is well underway on the new Embassy compound, with a scheduled completion in February 2009. Embassy Brazzaville now operates from temporary offices in a commercial bank building in downtown Brazzaville. Relations between the United States and the government of President Denis Sassou-Nguesso are strong, positive, and cooperative.

TRAVEL

Consular Information Sheet

August 29, 2008

Country Description: The Republic of the Congo (Congo-Brazzaville) is a developing nation in central Africa. The official language is French. The largest cities are the capital, Brazzaville, on the Congo River, and Pointe Noire on the coast. Civil conflict in 1997 and again in 1998-99 damaged parts of the capital and large areas in the south of the country.

The last rebel group still engaged in armed struggled signed a cease-fire accord with the government in March 2003. Facilities for tourism are very limited.

Entry Requirements: A passport, visa and evidence of yellow fever vaccination are required for entry. Additional information on entry requirements may be obtained from the Embassy of the Republic of Congo, 4891 Colorado Avenue NW, Washington, DC 20011, telephone (202) 726-5500, or from the Permanent Mission of the Republic of Congo to the United Nations, 14 E. 65th St., New York, NY, 10021, telephone (212) 744-7840. Overseas, inquiries should be made at the nearest Congolese embassy or consulate.

Safety and Security: As a result of past conflicts, there is extensive damage to the infrastructure in Brazzaville and in the southern part of the country, and the government is working to reconstruct roads and buildings. Fighting broke out in March and June of 2002 when rebel groups launched attacks first in the Pool region, and later, at the Brazzaville airport. The fighting in Brazzaville was quickly contained and the rebels were repulsed. In March 2003, the rebels and the government signed a cease-fire accord, which remains in effect, although there was some violence in Brazzaville in December 2003.

Occasionally, political unrest in neighboring Kinshasa can affect Brazzaville on the other side of the Congo River. For example, in 2007, stray small arms fire originating in Kinshasa landed in Brazzaville.

Continued security awareness remains a key consideration for all visitors. Night travel outside of cities should be avoided. U.S. citizens should avoid political rallies and street demonstrations and maintain security awareness at all times.

In the event of a fire, call the fire brigade at 81-53-87.

The Department of State suspended operations at the U.S. Embassy in Brazzaville in 1997. The Brazzaville U.S. Embassy interim offices are located in the B.D.E.A.C (Central African Development Bank) building in Brazzaville. A new embassy compound is under construction and slated to open in 2009. While Brazzaville is still not fully open for normal operations, Embassy personnel are present in Brazzaville to provide information and guidance to American citizens.

Staff can be contacted through the Embassy's interim offices (see Registration/Embassy Location section below). The reduced staff in Brazzaville has limited ability to provide

emergency services and non-emergency services generally take a few days to coordinate through Embassy Kinshasa.

For the latest security information, Americans traveling abroad should regularly monitor the Department's web site, where the current Worldwide Caution Travel Alert, Travel Warnings and other Travel Alerts can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S. and Canada, or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: In the Congo, petty street crime targeting foreigners is rare. Incidents of mugging and pick pocketing happen frequently near the ports in Pointe Noire and Brazzaville, and sometimes in the Congolese neighborhoods surrounding Brazzaville's city center.

Criminal elements are known to target middle-class and affluent residences without 24-hour guards for burglary. Roadblocks and robberies by armed groups targeting travelers occur in the Pool region south of Brazzaville. Travel to the Pool region is discouraged due to these elements.

Travelers should note that in the case of theft and robbery, legal recourse is limited and therefore, they may wish to leave all valuable items at home.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

While there is no local equivalent to the "911" emergency line in Republic of the Congo, the Rapid Response Police Team can be reached at 665-4804. However, police resources are limited and response to emergency calls is often slow (15 minutes or longer).

Medical Facilities and Health Information: Medical facilities are extremely limited. Some medicines are in short supply, particularly outside the larger cities. Travelers should carry their own supply of properly labeled medications.

Malaria is a serious and sometimes fatal disease. Plasmodium falciparum malaria, the type that predominates in the Congo, is resistant to the antimalarial drug chloroquine. Because travelers to the Republic of Congo are at high risk for contracting malaria, the Centers for Disease Control and Prevention (CDC) advises that travelers should take one of the following antimalarial drugs: mefloquine (Lariam), doxycycline, or atovaquone/proguanil (Malarone). Travelers who become ill with a fever or flu-like illness while traveling in a malaria-risk area and up to one year after returning home should seek prompt medical attention and tell the physician their travel history and what antimalarials they have been taking. For additional information on malaria, including protective measures, see the CDC Travelers' Health web site at http://wwwn.cdc.gov/travel.

The U.S. Department of State is unaware of any HIV/AIDS entry restrictions for visitors to or foreign residents of the DRC.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's web site at http://wwwn.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith/en.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning the Republic of the Congo is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

Road conditions are generally poor and deteriorate significantly during the rainy season, November-May. Maintenance of the few paved roads is limited. Overland travel off the main roads requires a four-wheel drive vehicle. Poorly marked checkpoints, sometimes manned by undisciplined soldiers, exist in many areas of the countryside.

Taxis are considered an acceptable mode of transport due to availability and low cost. Registered public transportation vehicles are painted green with white roofs and striping. Security is not generally an issue with taxis but buses are often overcrowded and thus less secure. Mechanical reliability of both vehicle types remains in question.

Traffic safety in general is hazardous due to high speeds, aggressive driving, poorly maintained vehicles and general apathy for pedestrians and cyclists.

Roads are narrow, dangerously potholed, frequently wash out during rainy season and are often full of debris, and pedestrians.

Emergency services are limited. Please refer to the medical section above.

Aviation Safety Oversight: As there is no direct commercial air service between the United States and the Republic of the Congo, the U.S. Federal Aviation Administration (FAA) has not assessed the Republic of the Congo's Civil Aviation Authority for compliance with International Civil Aviation Organization (ICAO) aviation safety standards. For more information, travelers may visit the FAA's web site at http://www.faa.gov.

Special Circumstances: Ferry service between Brazzaville and Kinshasa normally operates from 8 A.M. to 4 P.M. Monday through Saturday and 8 A.M. to 12 P.M. Sunday, but it may close completely with minimal notice. A special exit permit from the Republic of the Congo's Immigration Service and a visa from the Democratic Republic of the Congo's embassy/consulate are required to cross the Congo River from Brazzaville to Kinshasa. Passenger travel on the railroad is discouraged, as there are frequent reports of extortion by undisciplined security forces and robberies by criminal elements along the route.

The Congo is primarily a cash economy and uses the Central African Franc (CFA), a common currency with Gabon, Chad, Cameroon, the Central African Republic, and Equatorial Guinea. U.S. dollars may be exchanged for local currency. Traveler's checks can be cashed for a fee at some hotels. Two hotels in Brazzaville, and several in Pointe Noire, accept major credit cards, but prefer payment in cash. Prices are usually quoted in CFA or Euros. Other businesses do not normally accept credit cards. Personal checks drawn on foreign accounts are not accepted. Western Union has offices in Brazzaville and Pointe Noire, and one bank in Brazzaville has an ATM.

Airport police and customs officials routinely inspect incoming and outgoing luggage, even for internal travel. For a complete list of prohibited items, please contact the nearest Congolese embassy or consulate.

Local security forces in areas outside Brazzaville and Pointe Noire may detain foreigners to solicit bribes. Detention of U.S. citizens, particularly in remote areas, may not always be promptly reported to the U.S. Government by Congolese authorities. U.S. citizens are encouraged to carry a copy of their passports with them at all times so that, if questioned by local officials, proof of identity and U.S. citizenship is readily available. If detained or arrested, U.S. citizens should always ask to be allowed to contact the U.S. Embassy.

In general there are no restrictions on photography; however photographs of government buildings or military installations, port facilities or the airport should not be taken. When photographing human beings in remote areas where populations adhere to traditional beliefs, it is best to request permission first. If permission is refused, the photo should not be taken.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating Congolese laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in the Republic of the Congo are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in the Republic of the Congo are encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration web site so that they can obtain updated information on travel and security within the Republic of the Congo. Americans without Internet access may register directly with the U.S. Embassy in Kinshasa or at the interim offices in Brazzaville. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency.

The Embassy in Brazzaville has interim offices located in the B.D.E.A.C Building, 4th Floor, Place du Gouvernement, Plateau de Centre Ville, Brazzaville. The cellular telephone number during regular business hours (7:30 am until 4:30 pm, Monday through Friday) is 242-81-14-81; email is Consular.Brazzaville@state.gov. The Embassy in Kinshasa is located at 310 Avenue des Aviateurs, Gombe; tel. 243-(0)81-225-5872 (do not dial the zero when calling from abroad into the Congo), and the mailing address from the U.S. is Brazzaville Embassy Office, American Embassy Kinshasa, Unite 31550, APO AE, 09828-1550. Entrance to the Consular Section of the U.S. Embassy in Kinshasa is on Avenue Dumi, opposite Ste. Anne residence. The Consular Section of the Embassy in Kinshasa may be reached at cellular tel. 243-(0)81-884-4609, 243-(0)81-884-6859 or 243-(0)81-225-5872; fax 243-(0)81-301-0560. For after-hours emergencies, use 243-81-225-5872. (Cellular phones are the norm, as other telephone service is often unreliable). Web sites are http://brazzaville.usembassy.gov and http://kinshasa.usembassy.gov.

Intercountry Adoption

November 2008

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is based on public sources and our current understanding. Questions involving foreign and U.S. immigration laws and legal interpretation should be addressed respectively to qualified foreign or U.S. legal counsel.

American citizens adopting from the Republic of Congo will need to travel to both the Republic of Congo and neighboring Democratic Republic of Congo. Despite the similarity of names, these are two different countries, each with a U.S. Embassy. The adoption will take place in Republic of Congo, in keeping with the laws and procedures outlined in this flyer. The U.S. immigrant visa interview for the child will take place at the U.S. Embassy in the Democratic Republic of Congo, since that office processes immigrant visa cases for children from both countries.

It should also be noted that there are currently no physicians or medical clinics in Congo Brazzaville authorized to perform the mandatory medical clearance examination for prospective adoptive children. All medical clearance examinations must be performed in Kinshasa where the current wait time for such appointments is approximately 4-6 weeks. The Embassy in Kinshasa will assist prospective adoptive parents with obtaining an expedited medical exam but cannot guarantee the availability of expedited processing.

Patterns of Immigration: Recent statistics reflect that only two orphans from the Republic of Congo have received U.S. immigrant visas within the last five fiscal years.

Adoption Authority: The Civil Magistrate's Court has jurisdiction over adoptions. Mailing addresses do not exist as there is no reliable mail service. Local attorneys have current contacts in the courts.

Eligibility Requirements for Adoptive Parents: Prospective adoptive parents (PAPs) may be married, single, widowed or divorced. For the last three categories, the adoptive parent must be at least 35 years old. In the case of couples, they must have been married for at least five years, be living in the same household, and at least one spouse must be over 30 years old. All PAPs must be able to demonstrate to the court that the child will benefit from the adoption and that they have no criminal record or other characteristics that would make them unsuitable as parents. The age difference between the parent(s) and the child must be at least 20 years, except in the case of adoption of a spouse's child, where the age difference need only be 10 years. The court does consider exceptions to the age difference requirement on a case-by-case basis. In the cases of children over 15 years old, the child must agree to the adoption. Where the adoptive child is not an orphan, parental or family agreement is necessary (please note, however, that in order to qualify for immediate immigration to the United States, the adoptive child must meet the definition of orphan as defined by the Immigration and Nationality Act of 1952, as amended).

Residency Requirements: Prospective adoptive parents do not need to be permanent or long-term residents of the Republic of Congo.

Time Frame: The court process normally takes several weeks. Processing a Congolese passport application for the child (needed for international travel as well as the U.S. immigrant visa process) takes an additional one to two weeks. Once the adoptive child's immigrant visa has been approved, it is usually issued within 48 to 72 hours. Prospective adoptive parents therefore should not make reservations to depart the ROC on the same day as the immigrant visa interview.

Prospective adoptive parents should remember that all visa processing is done in Congo Kinshasa and all parties must be physically present in Kinshasa for the visa interview.

Adoption Agencies and Attorneys: Prospective adoptive parents are advised to fully research any adoption agency or facilitator they plan to use for adoption services. For U.S.-based agencies, it is suggested that prospective adoptive parents contact the Better Business Bureau and/or the licensing office of the appropriate state government agency in the U.S. state where the agency is located or licensed.

Adoption Fees: 10,000 CFA (about $20) is due with the initial adoption request and a fee of 46,000 CFA (about $92) is due once the court decision is given. Lawyer fees can range from $1,000 to $2,500. Fees can be kept to a minimum if, prior to the first consultation, adopting parents secure any required documents such as birth, death, marriage and relevant court records on their own.

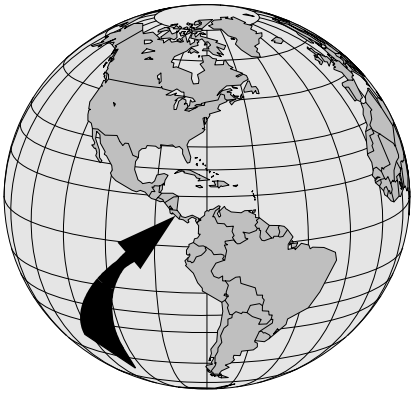
Adoption Procedures: First, the letter of request to adopt and the child's birth certificate is submitted to the office of the President of the Magistrate's Court. The court will conduct an investigation and render a decision regarding the adoption at a public hearing.

Required Documents:

- Letter of request to adopt;
- Proof of adequate financial resources;
- Proof of country of residency;
- Birth certificate of the child; and
- Parental authorization or, in the case of an orphan, court authorization.

Embassy of the Republic of Congo
4891 Colorado Ave., NW
Washington, DC 20011
Telephone: (202) 726-5500

Permanent Mission of the Republic of Congo to the United Nations
14 E. 65th Street
New York, NY 10021
Telephone: (212) 744-7840



U.S. Immigration Requirements: Prospective adopting parents are strongly encouraged to consult

USCIS publication M-249, *The Immigration of Adopted and Prospective Adoptive Children*, as well as the Department of State publication, *Intercountry Adoptions.*

Please see the *Intercountry Adoption* section of this book for more details and review current reports online at http://adoption.state.gov.

The U.S. Embassy in Brazzaville has limited operations at this time. Consular staff is available in Brazzaville for questions via email at consular.brazzaville@state.gov.

Additional Information: Specific questions about adoption in the Republic of Congo may be addressed to the U.S. Embassy in Brazzaville. Questions about orphan immigrant visa processing for children from the Republic of Congo should be directed to the U.S. Embassy in Kinshasa. General questions regarding intercountry adoption may be addressed to the Office of Children's Issues, U.S. Department of State, CA/OCS/CI, SA-29, 4th Floor, 2201 C Street, NW, Washington, D.C. 20520-4818, toll-free Tel: 1-888-407-4747.

COSTA RICA

Compiled from the August 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Republic of Costa Rica

PROFILE

Geography

Area: 51,100 sq. km (19,730 sq. mi.) about the size of the states of Vermont and New Hampshire combined.

Cities: Capital—San Jose (greater metropolitan area pop. 2.1 million, the greater metropolitan area as defined by the Ministry of Planning and Economic Policy includes the cities of Alajuela, Cartago, and Heredia). Other major cities outside the San Jose capital area—Puntarenas, Limon, and Liberia.

Terrain: A rugged, central range separates the eastern and western coastal plains.

Climate: Mild in the central highlands, tropical and subtropical in coastal areas.

People

Nationality: Noun and adjective—Costa Rican(s).

Population: (2006) 4.299 million.

Annual growth rate: (2006 est.) 1.3%.

Ethnic groups: European and some mestizo 94%, African origin 3%, Chinese 1%, Amerindian 1%, other 1%.

Religions: Roman Catholic 76.3%, Evangelical 13.7%, Jehovah's Witnesses 1.3%, other Protestant 0.7%, other 4.8%, none 3.2%.

Languages: Spanish, with a southwestern Caribbean Creole dialect of English spoken around the Limon area.

Education: Years compulsory—9. Attendance—99% grades 1-6, 71% grades 7-9. Literacy—96%.

Health: Infant mortality rate—9.45/1,000. Life expectancy—men 74.61 yrs., women 79.94 yrs.

Work force: (2006 est., 1.866 million; this official estimate excludes Nicaraguans living in Costa Rica legally and illegally) Agriculture—13%; industry—22%; services—64%.

Government

Type: Democratic republic.

Independence: September 15, 1821.

Constitution: November 7, 1949.

Government branches: Executive—president (head of government and chief of state) elected for one 4-year term, two vice presidents, Cabinet (15 ministers, two of whom are also vice presidents). Legislative—57-deputy unicameral Legislative Assembly elected at 4-year intervals. Judicial—Supreme Court of Justice (22 magistrates elected by Legislative Assembly for renewable 8-year terms). The offices of the Ombudsman, Comptroller General, and Procurator General assert autonomous oversight of the government.

Political subdivisions: Seven provinces, divided into 81 cantons, subdivided into 421 districts.

Political parties: National Liberation Party (PLN), Citizen's Action Party (PAC), Libertarian Movement Party (PML), Social Christian Unity Party (PUSC), and other smaller parties.

Suffrage: Universal and compulsory at age 18.

Economy

GDP: (2007) $26.23 billion.

GDP PPP: (2006 est.) $52.22 billion.

Inflation: (2007 est.) 10.81%.

Real growth rate: (2007 est.) 7.3%.

Per capita income: (2006) $5,100. (PPP $11,862, 2006 est.)

Unemployment: (2007 est.) 4.6%.

Currency: Costa Rica Colon (CRC).

Natural resources: Hydroelectric power, forest products, fisheries products.

Agriculture: (8.7% of GDP) Products—bananas, pineapples, coffee, beef, sugar, rice, dairy products, vegetables, fruits and ornamental plants.

Industry: (28.9% of GDP) Types—electronic components, food processing, textiles and apparel, construction materials, fertilizer, medical equipment.

Commerce, tourism, and services: (62.4% of GDP) Hotels, restaurants, tourist services, banks, and insurance.

Trade: (2006 est.) Exports—$8.198 billion: integrated circuits, medical equipment, bananas, pineapples, coffee, melons, ornamental plants, sugar, textiles, electronic components, medical equipment. Major markets—U.S. 38.6%, China 6.8%, Hong Kong 6.4%, Netherlands 6.1%, Guatemala 4.0%. Imports—$11.576 billion: raw materials, consumer goods, capital equipment, petroleum. Major suppliers—U.S. 39.3%, Japan 5.1%, Venezuela 5.0%, Mexico 5.2%, China 4.8%, Ireland 4.5%, Brazil 3.4%.

PEOPLE

Unlike many of their Central American neighbors, present-day Costa Ricans are largely of European rather than mestizo descent; Spain was the primary country of origin. However, an estimated 10% to 15% of the population is Nicaraguan, of fairly recent arrival and primarily of mestizo origin. Descendants of 19th-century Jamaican immigrant workers constitute an English-speaking minority and—at 3% of the population—number about 119,000. Few of the native Indians survived European contact; the indigenous population today numbers about 29,000 or less than 1% of the population.

HISTORY

In 1502, on his fourth and last voyage to the New World, Christopher Columbus made the first European landfall in the area. Settlement of Costa Rica began in 1522. For nearly three centuries, Spain administered the region as part of the Captaincy General of Guatemala under a military governor. The Spanish optimistically called the country "Rich Coast." Finding little gold or other valuable minerals in Costa Rica, however, the Spanish turned to agriculture.

The small landowners' relative poverty, the lack of a large indigenous labor force, the population's ethnic and linguistic homogeneity, and Costa Rica's isolation from the Spanish colonial centers in Mexico and the Andes all contributed to the development of an autonomous and individualistic agrarian society. An egalitarian tradition also arose. This tradition survived the widened class distinctions brought on by the 19th-century introduction of banana and coffee cultivation and consequent accumulations of local wealth.

Costa Rica joined other Central American provinces in 1821 in a joint declaration of independence from Spain. Although the newly independent provinces formed a Federation, border disputes broke out among them, adding to the region's turbulent history and conditions. Costa Rica's northern Guanacaste Province was annexed from Nicaragua in one such regional dispute. In 1838, long after the Central American Federation ceased to function in practice, Costa Rica formally withdrew and proclaimed itself sovereign.

An era of peaceful democracy in Costa Rica began in 1899 with elections considered the first truly free and honest ones in the country's history. This began a trend that continued until today with only two lapses: in 1917-19, Federico Tinoco ruled as a dictator, and, in 1948, Jose Figueres led an armed uprising in the wake of a disputed presidential election.

With more than 2,000 dead, the 44-day civil war resulting from this uprising was the bloodiest event in 20th-century Costa Rican history, but the victorious junta drafted a constitution guaranteeing free elections with universal suffrage and the abolition of the military. Figueres became a national hero, winning the first election under the new constitution in 1953. Since then, Costa Rica has held 14 presidential elections, the latest in 2006.

GOVERNMENT

Costa Rica is a democratic republic with a very strong system of constitutional checks and balances. Executive responsibilities are vested in a president, who is the country's center of power. There also are two vice presidents and a 15-member cabinet. The president and 57 Legislative Assembly deputies are elected for 4-year terms. In April 2003, the Costa Rican Constitutional Court annulled a 1969 constitutional reform which had barred presidents from running for reelection. As a result, the law reverted back to the 1949 Constitution, which permits ex-presidents to run for reelection after they have been out of office for two presidential terms, or eight years. Deputies may run for reelection after sitting out one term, or four years. In October 2007, the country ratified the U.S.-Central American-Dominican Republic Free Trade Agreement (CAFTA-DR) by a slender margin in its first national referendum.

The electoral process is supervised by an independent Supreme Electoral Tribunal—a commission of three principal magistrates and six alternates selected by the Supreme Court of Justice. Judicial power is exercised by the Supreme Court of Justice, composed of 22 magistrates selected for renewable 8-year terms by the Legislative Assembly, and subsidiary courts. A Constitutional Chamber of the Supreme Court (Sala IV), established in 1989, reviews the constitutionality of legislation and executive decrees and all habeas corpus warrants. The next national elections will take place in February 2010.

The offices of the Comptroller General of the Republic, the Solicitor General, and the Ombudsman exercise oversight of the government. The Comptroller General's office has a statutory responsibility to scrutinize all but the smallest public sector contracts and strictly enforces procedural requirements. Along with the Sala IV, these institutions are playing an increasingly prominent role in governing Costa Rica.

There are provincial boundaries for administrative purposes, but no elected provincial officials. Costa Rica held its first mayoral elections in December 2002, whereby mayors were elected to 4-year terms by popular vote through general elections. Prior to 2002, the office of mayor did not exist, and the president of each

municipal council was responsible for the administration of his/her municipality. The most recent nationwide mayoral elections took place in December 2006. Autonomous state agencies enjoy considerable operational independence; they include the telecommunications and electrical power monopoly, the state petroleum refinery, the nationalized commercial banks, the state insurance monopoly, and the social security agency.

Costa Rica has no military and maintains only domestic police and security forces. A professional Coast Guard was established in 2000.

Principal Government Officials

Last Updated: 11/12/08

Pres.: **Oscar ARIAS Sanchez**
First Vice Pres.: **Laura CHINCHILLA**
Second Vice Pres.:
Min. of Culture, Youth, & Sports: **Maria Elena CARBALLO**
Min. of Education: **Leonardo GARNIER**
Min. of Environment & Energy: **Roberto DOBLES**
Min. of Finance: **Guillermo ZUNIGA**
Min. of Foreign Relations: **Bruno STAGNO Ugarte**
Min. of Foreign Trade: **Marco Vinicio RUIZ**
Min. of Health: **Maria Luisa AVILA**
Min. of Housing: **Fernando ZUMBADO**
Min. of Justice: **Laura CHINCHILLA**
Min. of Labor & Social Security: **Francisco MORALES**
Min. of Planning & Economic Policy: **Roberto GALLARDO**
Min. of the Presidency: **Rodrigo ARIAS**
Min. of Production: **Alfredo VOLIO Perez**
Min. of Public Security, Govt., & Police: **Janina DEL VECCHIO**
Min. of Public Works & Transportation: **Karla GONZALES**
Min. of Science & Technology: **Eugenia FLORES**
Min. of Tourism: **Carlos Ricardo BENAVIDES**
Pres., Central Bank: **Francisco DE PAUL Gutierrez**
Ambassador to the US: **Tomas DUENAS**
Permanent Representative to the UN, New York: **Jorge URBINA Ortega**

Costa Rica maintains an embassy in the United States at 2114 S Street NW, Washington, DC 20008 (tel. 202-234-2945 and 202-234-2946).

POLITICAL CONDITIONS

Costa Rica has long emphasized the development of democracy and respect for human rights. The country's political system has steadily developed, maintaining democratic institutions and an orderly, constitutional scheme for government succession. Several factors have contributed to this trend, including enlightened leadership, comparative prosperity, flexible class lines, educational opportunities that have created a stable middle class, and high social indicators. Also, because Costa Rica has no armed forces, it has avoided military involvement in political affairs, unlike other countries in the region. In May 2006, President Oscar Arias of the National Liberation Party

(PLN) assumed office, defeating principal rival Ottón Solis of the Civil Action Party by roughly 2% of the vote. Arias listed passage of the CAFTA-DR, along with fiscal reform, infrastructure improvements, improving education, and improving security as primary goals for his presidency. The 57-member unicameral Legislative Assembly has four principal party factions, with the governing party, PLN, having a 25-seat plurality.

ECONOMY

After experiencing 8.8% growth in 2006, the Costa Rican economy settled down to an estimated 7.3% in 2007. Compared with its Central American neighbors, Costa Rica has achieved a high standard of living, with a per capita income of about U.S. $5,800, and an unemployment rate of 4.6%. Consumer price inflation is high but relatively constant at about a 10% annual rate in the last decade. Both the central government and the overall public sector ran fiscal surpluses in 2007.

Implementing CAFTA-DR, passing fiscal reform, and creating an effective concessions process are the biggest challenges for the country's economic policymakers. Costa Rica ranks 115th out of 175 countries in the World Bank's Doing Business Index. This hampers the flow of investment and resources badly needed to repair and rebuild the country's deteriorated public infrastructure.

Costa Rica's major economic resources are its fertile land and frequent rainfall, its well-educated population, and its location in the Central American isthmus, which provides easy access to North and South American markets and direct ocean access to the European and Asian Continents.

One-fourth of Costa Rica's land is dedicated to national forests, often adjoining picturesque beaches, which has made the country a popular destination for affluent retirees and ecotourists despite increasing crime. Costa Rica used to be known principally as a producer of bananas and coffee, but pineapples have surpassed coffee as the number two agricultural export. In recent years, Costa Rica has successfully attracted important investments by such companies as Intel Corporation, which employs nearly 2,000 people at its $300 million microprocessor plant; Proctor and Gamble, which employs nearly 1,000 people in its administrative center for the Western Hemisphere; and Hospira and Baxter Healthcare from the health care products industry. Manufacturing and industry's contribution to GDP overtook agriculture over the course of the 1990s, led by foreign investment in Costa Rica's free trade zone. Well over half of that investment has come from the United States. Dole and Chiquita have a large presence in the banana and pineapple industries. Two-way trade between the U.S. and Costa Rica exceeded $8 billion in 2007.

Costa Rica has oil deposits off its Atlantic Coast, but the Pacheco administration (2002-2006) decided not to develop the deposits for environmental reasons. The country's mountainous terrain and abundant rainfall have permitted the construction of a dozen hydroelectric power plants, making it largely self-sufficient in electricity, but it is completely reliant on imports for liquid fuels. Costa Rica has the potential to become a major electricity exporter if plans for new generating plants and a regional distribution grid are realized. Its mild climate and trade winds make neither heating nor cooling necessary, particularly in the highland cities and towns where some 90% of the population lives.

Costa Rica's public infrastructure has suffered from a lack of maintenance and new investment. Most parts of the country are accessible through an extensive road system of more than 30,000 kilometers, although much of the system has fallen into disrepair. An antiquated infrastructure system results in treatment of less than 3% of the country's sewage and the possibility of infectious outbreaks near the contaminated lakes, rivers, and beaches where waste is disposed. In 2007, Costa Rica experienced nationwide blackouts resulting from a severe dry season (which limited hydroelectric resources) and the state electricity monopoly's inadequate investment in maintenance and capacity increases.

Costa Rica has sought to widen its economic and trade ties within and outside the region. Costa Rica signed a bilateral trade agreement with Mexico in 1994, which was later amended to cover a wider range of products. Costa Rica joined other Central American countries, and the Dominican Republic, in establishing a Trade and Investment Council with the United States in March 1998. Costa Rica has signed trade agreements with Canada, Chile, the Dominican Republic, Mexico, Panama, and several Caribbean Community countries. It began negotiating a regional Central American-EU trade agreement in October 2007. Costa Rica was an active participant in the negotiation of the hemispheric Free Trade Area of the Americas and is active in the Cairns Group, which is pursuing global agricultural trade liberalization within the World Trade Organization.

Costa Rica concluded negotiations with the U.S. to participate in CAFTA-DR in January 2004 but is the only CAFTA-DR partner not to have yet entered the agreement into force. In October 2007, a slender majority of Costa Ricans voted to ratify the agreement, which will enter into force after the Legislative Assembly passes corresponding legislation. Once implemented, CAFTA will partially open the state telecommunications monopoly and substantially open the state-run insurance sector.

FOREIGN RELATIONS

Costa Rica is an active member of the international community and, in 1993, proclaimed its permanent neutrality. Its record on the environment and human rights and advocacy of peaceful settlement of disputes give it

a weight in world affairs far beyond its size. The country lobbied aggressively for the establishment of the UN High Commissioner for Human Rights and became the first nation to recognize the jurisdiction of the Inter-American Human Rights Court, based in San Jose. In 2007 Costa Rica was elected for the third time to serve as a non-permanent member of the United Nations Security Council (January 2008-December 2009).

During the tumultuous 1980s, then-President Oscar Arias authored a regional peace plan that served as the basis for the Esquipulas Peace Agreement. Arias' efforts earned him the 1987 Nobel Peace Prize. Subsequent agreements, supported by the United States, led to the Nicaraguan election of 1990 and the end of civil war in Nicaragua. Costa Rica also hosted several rounds of negotiations between the Salvadoran Government and the Farabundo Marti National Liberation Front (FMLN), aiding El Salvador's efforts to emerge from civil war and culminating in that country's 1994 free and fair elections. Costa Rica has been a strong proponent of regional arms limitation agreements. President Arias has publicly supported self-determination in Cuba and expressed concern about eroding democratic institutions in Venezuela. In 2007 Costa Rica established diplomatic ties with China, ending nearly 60 years of diplomatic relations with Taiwan.

U.S.-COSTA RICAN RELATIONS

The United States and Costa Rica have a history of close and friendly relations based on respect for democratic government, human freedoms, free trade, and other shared values. The country generally supports the U.S. in international fora, especially in the areas of democracy and human rights.

The United States is Costa Rica's most important trading partner. The U.S. accounts for almost half of Costa Rica's exports, imports, and tourism, and more than two-thirds of its foreign investment. The two countries share growing concerns for the environment and want to preserve Costa Rica's important tropical resources and prevent environmental degradation. In 2007, the United States reduced Costa Rica's debt in exchange for protection and conservation of Costa Rican forests through a debt for nature swap under the auspices of the Tropical Forest Conservation Act. This is the largest such agreement of its kind to date.

The United States responded to Costa Rica's economic needs in the 1980s with significant economic and development assistance programs. Through provision of more than $1.1 billion in assistance, the U.S. Agency for International Development (USAID) supported Costa Rican efforts to stabilize its economy and broaden and accelerate economic growth through policy reforms and trade liberalization. Assistance initiatives in the 1990s concentrated on democratic policies, modernizing the administration of justice, and sustainable development. Once the country had graduated from most forms of U.S. assistance, the USAID Mission in Costa Rica closed in 1996. However, USAID completed a $9 million project in 2000-01 to support refugees of Hurricane Mitch residing in Costa Rica.

For decades, Peace Corps Volunteers have provided technical assistance in the areas of environmental education, natural resources, management, small business development, microfinance, basic business education, urban youth, and community education. Between 30,000-50,000 private American citizens, including many retirees, reside in the country and more than 700,000 American citizens visit Costa Rica annually. A few vexing expropriation and U.S. citizen investment disputes have hurt Costa Rica's investment climate and have occasionally produced bilateral friction. The U.S.-Costa Rica Maritime Cooperation Agreement, the first of its kind in Central America, entered into force in late 1999. The agreement, which facilitates cooperation between the Coast Guard of Costa Rica and the U.S. Coast Guard, has resulted in a growing number of narcotics seizures, illegal migrant rescues, illegal fishing seizures, and search-and-rescue missions. Bilateral Costa Rican law enforcement cooperation, particularly against narcotrafficking, has been exemplary.

TRAVEL

Consular Information Sheet

June 5, 2008

Country Description: Costa Rica is a middle-income, developing country with a strong democratic tradition. Tourist facilities are extensive and generally adequate. The capital is San Jose. English is a second language for many Costa Ricans.

Entry Requirements: For entry into Costa Rica, U.S. citizens must present valid passports that will not expire for at least thirty days after arrival, and a roundtrip/outbound ticket. Some U.S. airlines may not permit passengers to board flights to Costa Rica without such a ticket. Passports should be in good condition; Costa Rican immigration will deny entry if the passport is damaged in any way. Costa Rican authorities generally permit U.S. citizens to stay up to ninety days; to stay beyond the period granted, travelers must submit an application for an extension to the Office of Temporary Permits in the Costa Rican Department of Immigration. Tourist visas are usually not extended except under special circumstances, and extension requests are evaluated on a case-by-case basis. There is a departure tax for short-term visitors. Tourists who stay over ninety days may experience a delay at the airport when departing. Persons who overstayed previously may be denied entry to Costa Rica.

Persons traveling to Costa Rica from some countries in South America and Sub-Saharan Africa must provide evidence of a valid yellow fever vaccination prior to entry. The South American countries include Bolivia, Brazil, Colombia, Ecuador and Venezuela.

The most authoritative and up-to-date information on Costa Rican entry and exit requirements, including visa information, may be obtained from the Consular Section of the Embassy of Costa Rica at 2114 "S" Street, NW, Washington, DC 20008, telephone (202) 234-2945/46, fax (202) 265-4795, e-mail consulate @costarica-embassy.org, web site http://www.costarica-embassy.org, or from the Costa Rican consulates in Atlanta, Chicago, Houston, Los Angeles, Miami, New Orleans, New York, San Juan (Puerto Rico), San Francisco, and Tampa. The Costa Rican immigration agency maintains a web site at: http://www.migracion.go.cr. It is advisable to contact the Embassy of Costa Rica in Washington or one of Costa Rica's consulates in the United States for specific information regarding customs requirements before shipping any items.

Safety and Security: There have been no recent acts of terrorism in Costa Rica. Visitors to Costa Rica may experience the effects of civil disturbances such as work stoppages and strikes. Although infrequent, these acts can create inconveniences for visitors. On both the Caribbean and Pacific coasts, currents are swift and dangerous, and there are few lifeguards or signs warning of dangerous beaches. Every year eight to twelve American citizens drown in Costa Rica due to riptides or sudden drop-offs while in shallow water. Extreme caution is advised.

Adventure tourism is popular in Costa Rica, and many companies offer white-water rafting, bungee jumping, jungle canopy tours, deep sea diving, and other outdoor attractions. Americans are urged to use caution in selecting adventure tourism companies. The government of Costa Rica regulates and monitors the safety of adventure tourism companies; enforcement of safety laws is overseen by the Ministry of Health. Registered tourism companies with operating permits must meet safety standards and have insurance coverage. The safety regulations enforced in Costa Rica are not the same as safety regulations enforced in the United States.

For the latest security information, Americans traveling abroad should regularly monitor the Department's Internet web site at http://travel.state.gov, where the current Worldwide Caution Travel Alert, Travel Warnings and Travel Alerts can be found.

Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S., or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: Over one and a half million foreign tourists, the majority American, visit Costa Rica annually. All are potential targets for criminals, primarily thieves looking for cash, jewelry, credit cards, electronic items and passports. U.S. citizens are encouraged to exercise the same level of caution they would in major cities or tourist areas throughout the world. Local law enforcement agencies have limited capabilities and do not act according to U.S. standards. Travelers should minimize driving at night, especially outside urban areas.

Americans should avoid areas with high concentrations of bars and nightclubs, especially at night, and steer clear of deserted properties or undeveloped land. For safety reasons, the Embassy does not place its official visitors in hotels in the San Jose city center, but instead puts them at the larger hotels in the outlying suburbs. Americans should walk or exercise with a companion, bearing in mind that crowded tourist attractions and resort areas popular with foreign tourists are common venues for criminal activities. Travelers should ignore any verbal harassment, and avoid carrying passports, large amounts of cash, jewelry or expensive photographic equipment. Tourists are encouraged to carry photocopies of the passport data page and Costa Rican entry stamp on their persons, and leave the original passport in a hotel safe or other secure place.

Travelers should purchase an adequate level of locally valid theft insurance when renting vehicles, park in secured lots whenever possible, and never leave valuables in the vehicle. The U.S. Embassy receives several reports daily of valuables, identity documents, and other items stolen from locked vehicles, primarily rental

vehicles. Thefts from parked cars occur in downtown San Jose, at beaches, in the airport and bus station parking lots, and at national parks and other tourist attractions. Travelers should use licensed taxis, which are red with medallions (yellow triangles containing numbers) painted on the side. Licensed taxis at the airport are painted orange. All licensed taxis should have working door handles, locks, seatbelts and meters (called "marias"); passengers are required to use seatbelts. When traveling by bus, avoid putting bags or other personal belongings in the storage bins. At all times have your belongings in your line of sight or in your possession.

Thieves usually work in groups of two to four. A common scam has one person drop change in a crowded area, such as on a bus, and when the victim tries to assist, a wallet or other item is taken. The most common scam involves the surreptitious puncturing of tires of rental cars, often near restaurants, tourist attractions, airports, or close to the car rental agencies themselves.

When the travelers pull over, "good Samaritans" quickly appear to change the tire and just as quickly remove valuables from the car, sometimes brandishing weapons. Drivers with flat tires are advised to drive, if at all possible, to the nearest service station or other public area, and change the tire themselves, watching valuables at all times.

In late 2006, the government of Costa Rica established a Tourist Police force, and units were established in popular tourist areas throughout the country. The Tourist Police can assist with the reporting of a crime, which can be difficult for victims due to language barriers and the requirement that only investigative police can accept crime reports.

In many countries around the world, counterfeit and pirated goods are widely available. Transactions involving such products may be illegal under local law. In addition, bringing them back to the United States may result in forfeitures and/or fines. More information on this serious problem is available at www.cybercrime.gov/18usc2320.htm.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

Medical Facilities and Health Information: Medical care in San Jose is adequate, but is limited in areas outside of San Jose. Most prescription and over-the-counter medications are available throughout Costa Rica. Doctors and hospitals often expect immediate cash payment for health services, and U.S. medical insurance is not always valid outside the United States. A list of local doctors and medical facilities can be found at the website of the U.S. Embassy in San Jose, at http://sanjose.usembassy.gov. An ambulance may be summoned by calling 911. The best-equipped ambulances are called "unidad avanzada." Ambulance service in Costa Rica does not meet U.S. standards, and response time is unreliable.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's Internet site at http://wwwn.cdc.gov/travel.

For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Costa Rica is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

Costa Rica has one of the highest vehicle accident rates in the world. The fatality rate for pedestrians and those riding bicycles and motorcycles is disproportionately high. Traffic laws and speed limits are often ignored, turns across one or two lanes of traffic are common, turn signals are rarely used, passing on dangerous stretches of highway is common, and pedestrians are not given the right of way. Roads are often in poor condition, and large potholes with the potential to cause significant damage to vehicles are common. Pedestrians, cyclists, and farm animals may use the main roads.

Traffic signs, even on major highways, are inadequate and few roads are lined. Shoulders are narrow or consist of drainage ditches. All of the above, in addition to poor visibility due to heavy fog or rain, makes driving at night especially treacherous. Landslides are common in the rainy season. All types of motor vehicles are appropriate for the main highways and principal roads in the major cities.

However, some roads to beaches and other rural locations are not paved, and many destinations are accessible only with high clearance, rugged suspension four-wheel drive vehicles. Travelers are advised to call ahead to

their hotels to ask about the current status of access roads. Costa Rica has a 911 system for reporting emergencies. In the event of a traffic accident, vehicles must/must be left where they are. Both the Transito (Traffic Police) and the Insurance Investigator must make accident reports before the vehicles are moved.

Aviation Safety Oversight: The U.S. Federal Aviation Administration (FAA) has assessed the Government of Costa Rica's Civil Aviation Authority as being in compliance with International Civil Aviation Organization (ICAO) aviation safety standards for oversight of Costa Rica's air carrier operations. For more information, travelers may visit the FAA's website at http://www.faa.gov.

Land Ownership and Shoreline Property: U.S. citizens are urged to use caution when making real estate purchases, and consult reputable legal counsel and investigate thoroughly all aspects before entering into a contract. Coastal land within fifty meters of the high tide line is open to the public, and construction on the next one hundred fifty meters inland is possible only with the approval of the local municipality.

Squatters: Organized squatter groups have invaded properties in various parts of the country. These squatter groups, often supported by politically active persons and nongovernmental organizations, take advantage of legal provisions that allow people without land to gain title to unused agricultural property. Local courts may show considerable sympathy for the squatters. Victims of squatters have reported threats, harassment, and violence.

Documentation Requirements: Visitors are required to carry appropriate documentation at all times. However, due to the high incidence of passport theft, tourists are permitted and encouraged to carry photocopies of the datapage and entry stamp from the passport, leaving the passport in a hotel safe or other secure place. However, as noted under CRIME, Costa Rican immigration authorities conduct routine checks for illegal immigrants, especially in bars located in downtown San Jose and in beach communities. An American citizen detained during one of these checks and carrying only the copy of the passport will be required to produce the original passport. Tourists should consider carrying their passports when traveling overnight or a considerable distance from their hotel. Tourists who carry passports are urged to place them securely in an inside pocket.

Exit Procedures for Costa Rican Citizens: Costa Rican children may only depart the country upon presentation of an exit permit issued by immigration authorities. This policy, designed to prevent international child abduction, applies to dual national U.S./Costa Rican citizens. Parents of minors who obtained Costa Rican citizenship through a parent or through birth in Costa Rica are advised to consult with appropriate Costa Rican authorities prior to travel to Costa Rica, especially if one (or both) parent(s) is not accompanying the child.

Disaster Preparedness: Costa Rica is located in an earthquake and volcanic zone. Serious flooding occurs annually on the Caribbean side near the port city of Limon, but flooding occurs in other parts of Costa Rica as well, depending on the time of year and rainfall. General information about natural disaster preparedness is available via the Internet from the U.S. Federal Emergency Management Agency (FEMA) at http://www.fema.gov.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating Costa Rican laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Costa Rica are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in Costa Rica are encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration web site so that they can obtain updated information on travel and security within Costa Rica. Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency. The U.S. Embassy is located in Pavas, San Jose, and may be reached at (506) 2519-2000; the extension for the Consular Section is 2453. The Embassy is open Monday through Friday, and is closed on Costa Rican and U.S. holidays. Those seeking information are strongly encouraged to utilize the embassy web site http://sanjose.usembassy.gov, and can email consularsanjose@state.gov with any questions/concerns. For emergencies arising outside normal business hours, U.S. citizens may call (506) 2220-3127 and ask for the duty officer.

Intercountry Adoption- June 2008

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is

based on public sources and our current understanding. Questions involving foreign and U.S. immigration laws and legal interpretation should be addressed respectively to qualified foreign or U.S. legal counsel.

The Hague Convention on Intercountry Adoption: Costa Rica is a party to The Hague Convention on Protection of Children and Co-operation in Respect of Intercountry Adoption (the Convention) and with which the Convention is in force for the United States. Costa Rica 's adoption procedures are in flux, due to a moratorium on some intercountry adoptions processed through the child welfare office. Please review current reports online at http://adoption.state.gov.

Patterns of Immigration: Please review current reports online at http://adoption.state.gov.

Adoption Authority: The Patronato Nacional de la Infancia (PANI), the Costa Rican child welfare authority, oversees adoptions of abandoned orphans who are in public institutions, and plays a consultative role in private adoptions, as well. PANI may be contacted as follows:

Patronato Nacional de La Infancia
P.O. Box 5000
San Jose, Costa Rica
phone: (506) 233-0005 or
(506) 222-0443
fax: (506) 233-2414
e-mail: paniadop@racsa.co.cr

PANI contacts a prospective adoptive family when PANI identifies a child for adoption, even calling collect if authorized by the family. Pictures and related information about the child will be sent by airmail. Note that there is a backlog in pending cases.

Eligibility Requirements for Adoptive Parents: Costa Rican law permits adoption by married and single persons. A foreign couple must have been married for at least five years. Prospective adoptive parents must be at least 25 and under 60 years of age.

Residency Requirements: Costa Rican law requires that, at the initial stage of the adoption process, both prospective adoptive parents must be in Costa Rica to sign the official consent documents before the Costa Rican court. In the case of adoption by a single prospective adoptive parent, that individual must be present to sign the documents.

At least 15 days should be allowed for this initial trip. At the end of the process, one of the adoptive parents, or the sole parent if it is a single-parent adoption, must be in Costa Rica to finish the paperwork for the adoption, obtain a travel document for the child, and complete immigration procedures at the U.S. Embassy. Since the length of time for the entire adoption process may vary (from four months to a year), many prospective adoptive parents make two trips to Costa Rica; others prefer to remain in Costa Rica for the entire process.

While in Costa Rica, the adopting parents need to take the following steps to satisfy local adoption requirements:

- Meet the child;
- Give formal consent for the adoption at the court;
- Obtain a decree of abandonment;
- Obtain a certified copy of the final adoption decree from the court;
- Register the adoption at the local Civil Registry;
- Obtain a birth certificate from the Civil Registry with the new name of the child;
- Obtain PANI authorization for the child to leave the country; and
- Obtain a passport for the child.

Time Frame: An adoption in Costa Rica generally takes from four to twelve months from the time a decree of abandonment has been issued or an official request for adoption of a specific child is placed before the court.

Adoption Agencies and Attorneys: Prospective adoptive parents are advised to fully research any adoption agency or facilitator they plan to use for adoption services. Because Costa Rica is a Convention country, adoption services must be provided by an accredited agency, temporarily accredited agency, approved person, supervised provider, or exempted provider. It is essential that prospective adoptive parent(s) seeking to adopt from a Convention country use an accredited adoption service provider. The U.S. Department of State maintains a current list of accredited adoption service providers. The list of accredited adoption service providers is also provided on the website of The Hague Permanent Bureau at www.hcch.net.

Adoption Fees: The U.S. Embassy in Costa Rica discourages the payment of any fees that are not properly receipted, "donations," or "expediting" fees, that may be requested from prospective adoptive parents. Such fees have the appearance of "buying" a baby and put all future adoptions in Costa Rica.

Official fees for an adoption are set at a minimum of $250, which represents the total court costs when an adoption is processed through PANI. Payments to parents or guardians are illegal under Costa Rican law and prospective adoptive parents who make such payments could be subject to investigation and possible prosecution. The fees generally charged in private adoptions can be very high, running into the thousands of dollars. American adoptive parents may want to notify the Embassy and the Department of State if they feel they are being charged excessive fees.

Adoption Procedures: Costa Rican adoption law provides for two types of adoptions: those arranged through PANI, and private adoptions. In foreign adoptions overseen by PANI, current Costa Rican law prohibits adoption of children less than four years of age, except in cases in which the child is part of a family group, or is difficult to place.

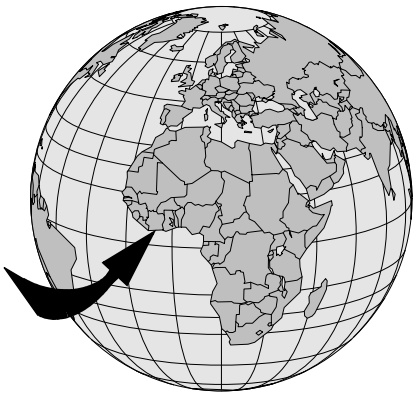
In private adoptions, there is no limit on the age of the children. A child is released to a private attorney, who then arranges the adoption. The court reviews the qualifications of the prospective adoptive parents, with PANI playing a consultative role.

Foreigners, including U.S. citizens, must complete the adoption process in Costa Rica and the adoption must be formally registered in the civil registry before the Costa Rican authorities will grant permission for the child to leave the country. Because of Costa Rican government concerns about child smuggling and the need for follow-up in the adoption process, permission is rarely granted for a child to leave Costa Rica in the custody of a prospective adoptive parent for the purpose of being finally adopted in another country.

Under Costa Rican law, adopted children do not need to be orphans (both birth parents deceased). They must, however, be abandoned or irrevocably surrendered for adoption. Abandoned children may be living in a government facility, in a private orphanage or foster home or in the custody of a relative or friend. Children may also remain in the custody of a biological parent prior to formal relinquishment of custody before a judge.

Important: The preceding relates only to Costa Rican legal requirements. See the section of this flyer on U.S. immigration requirements regarding the definition of an orphan for U.S. visa purposes; a child who does not meet the U.S. legal definition will not be permitted to immigrate to the U.S. even if Costa Rica permits the adoption to take place, and even if the adoptive parents are U.S. citizens.

Required Documents: The following documentation is normally required:



- Certified and authenticated copies of the adoptive parent(s)' birth certificate(s);
- Certified and authenticated copy of the adoptive parent(s)' marriage certificate (if applicable) and proof of termination of any previous marriages (certified copy of spouse's death certificate or divorce decree);
- Medical certificate(s) for adoptive parent(s) notarized by physician and authenticated;
- A certificate of good conduct/no criminal record for each adoptive parent from a local police department, notarized or bearing police department seal and authenticated. An FBI report is acceptable in lieu of local police record. This is separate from the FBI check conducted by USCIS as part of the petition process;
- Verification of employment and salary, notarized and authenticated;
- Two letters of reference notarized and authenticated;
- A certified and authenticated copy of property trusts deeds, if applicable;
- A home study prepared by an authorized and licensed social agency, certified and authenticated, may be required in some cases by the Costa Rican authorities if necessary information was not included on the USCIS (I-600A);
- Bank statements, notarized/certified and authenticated; and
- Family letter of intent to adopt, which states any general preferences requested by the family, i.e. a certain age, sex, etc. notarized and authenticated.

Additional documentation and procedures may be required.

The Costa Rican Embassy in the United States is located at 2112–S Street, N.W., Washington, D.C. 20008 (telephone (202) 234-2945/46, fax (202) 265-4795). Costa Rican consulates are located in Atlanta, Chicago, Houston, Los Angeles, Miami, New York, San Juan, San Francisco, and Tampa. The Embassy of Costa Rica also maintains a web site at http://www.costarica-embassy.org.

U.S. Immigration Requirements: As of April 1, 2008, U.S. citizens wishing to adopt in a Convention country must begin the process by filing with the U.S. Citizenship and Immigration Services (USCIS) a form I-800A *Application for Determination of Suitability to Adopt a Child from a Convention Country*. Prospective adoptive parents are strongly encouraged to consult the Department of Homeland Security, USCIS website (www.uscis.gov) to download forms and filing instructions.

Additional Information: For information on intercountry adoption and international parental child abduction, and security information for U.S. citizens traveling abroad, call Toll Free 1-888-407-4747. This number is available from 8:00 a.m. to 8:00 p.m. EST/EDT, Monday through Friday (except U.S. federal holidays). Callers who are unable to use toll-free numbers, such as those calling from overseas, may obtain information and assistance during these hours by calling 1-202-501-4444.

CÔTE D'IVOIRE

Compiled from the July 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Republic of Côte d'Ivoire

PROFILE

Geography

Area: 322,500 sq. km. (124,500 sq. mi.); slightly larger than New Mexico.

Cities: Principal city—Abidjan (economic capital, de facto political capital). Capital—Yamoussoukro (official). Other cities—Bouake, Daloa, Gagnoa, Korhogo, Man, San Pedro.

Terrain: Forested, undulating, hilly in the west.

Climate: Tropical.

People

Nationality: Noun and adjective—Ivoirian(s).

Population: (2004 est.) 18,700,000.

Annual growth rate: 3.8%, with immigration.

Ethnic groups: More than 60.

Religions: Indigenous 10%-20%, Muslim 35%-40%, and Christian (Catholic, Protestant, and other denominations) 25%-35%.

Languages: French (official); five principal language groups.

Education: Years compulsory—school is not compulsory at this time. Attendance—57%. Literacy—51%.

Health: Infant mortality rate—111/1,000. Life expectancy—46 years.

Government

Type: Republic.

Independence: August 7, 1960.

Government branches: Executive—president (chief of state and head of government). Legislative—unicameral National Assembly. Judicial—Supreme Court (3 chambers: judicial, administrative, auditing); Constitutional Council.

Political subdivisions: 19 regions, 58 departments, 196 communes.

Political parties: Front Populaire Ivoirien (FPI), Parti Democratique de la Cote d'Ivoire (PDCI), Rassemblement des Republicaines (RDR), Union pour la Democratie et pour la Paix en Cote d'Ivoire (UDPCI), numerous other smaller political parties operate in Cote d'Ivoire.

Suffrage: Universal at 18.

Economy

GDP: (official exchange rate, 2007 est.) $18.66 billion.

GDP: (purchasing power parity, 2007 est.) $32.86 billion.

Annual real growth rate: (2007 est.) 1.7%. Real GDP grew by 1.8% in 2006 and rose by 1.7% in 2007.

Natural resources: Petroleum (offshore) discovered in 1977, production began in 1980; earnings from oil and refined products were $1.3 billion in 2006. Gold mining began in the early 1990s.

Agriculture: (22.7% of GDP, 2006) Products—cocoa, coffee, timber, rubber, corn, rice, tropical foods.

Industry: (26.3% of GDP, 2006) Types—food processing, textiles.

Services: (51% of GDP, 2006).

Trade: (2007) Exports ($8.5 billion f.o.b.)—petroleum, cocoa, coffee, timber, cotton, palm oil, pineapples, bananas, fish. Major markets—France, Netherlands, U.S., Germany. Total imports ($5.2 billion f.o.b.)—fuel, consumer goods, basic foodstuffs (rice, wheat), capital goods. Major suppliers—France, Nigeria, China.

PEOPLE

Cote d'Ivoire has more than 60 ethnic groups, usually classified into five principal divisions: Akan (east and center, including Lagoon peoples of the southeast), Krou (southwest), Southern Mande (west), Northern Mande (northwest), Senoufo/Lobi (north center and northeast). The Baoules, in the Akan division, probably comprise the single largest subgroup with 15%-20% of the population. They are based in the central region around Bouake and Yamoussoukro. The Betes in the Krou division, the Senoufos in the north, and the Malinkes in the northwest and the cities are the next largest groups, with 10%-15% each of the national population. Most of the prin-

cipal divisions have a significant presence in neighboring countries. Of the more than 5 million non-Ivoirian Africans living in Cote d'Ivoire, one-third to one-half are from Burkina Faso; the rest are from Ghana, Guinea, Mali, Nigeria, Benin, Senegal, Liberia, and Mauritania.

The non-African expatriate community includes roughly 10,000 French and possibly 60,000 Lebanese. As of mid-November 2004, thousands of expatriates, African and non-African, had fled from the violence in Cote d'Ivoire. The number of elementary school-aged children attending classes increased from 22% in 1960 to 67% in 1995.

HISTORY

The early history of Cote d'Ivoire is virtually unknown, although it is thought that a Neolithic culture existed. France made its initial contact with Cote d'Ivoire in 1637, when missionaries landed at Assinie near the Gold Coast (now Ghana) border. Early contacts were limited to a few missionaries because of the inhospitable coastline and settlers' fear of the inhabitants.

In the 18th century, the country was invaded from present-day Ghana by two related Akan groups—the Agni, who occupied the southeast, and the Baoule, who settled in the central section. In 1843-44, Admiral Bouet-Williaumez signed treaties with the kings of the Grand Bassam and Assinie regions, placing their territories under a French protectorate. French explorers, missionaries, trading companies, and soldiers gradually extended the area under French control inland from the lagoon region. However, complete pacification was not accomplished until 1915.

French Period

Cote d'Ivoire officially became a French colony in 1893. Captain Binger, who had explored the Gold Coast frontier, was named the first governor. He negotiated boundary treaties with Liberia and the United Kingdom (for the Gold Coast) and later started the campaign against Almany Samory, a Malinke chief, who fought against the French until 1898. From 1904 to 1958, Cote d'Ivoire was a constituent unit of the Federation of French West Africa. It was a colony and an overseas territory under the French Third Republic. Until the period following World War II, governmental affairs in French West Africa were administered from Paris. France's policy in West Africa was reflected mainly in its philosophy of "association," meaning that all Africans in Cote d'Ivoire were officially French "subjects" without rights to citizenship or representation in Africa or France.

During World War II, France's Vichy regime remained in control until 1943, when members of Gen. Charles de Gaulle's provisional government assumed control of all French West Africa. The Brazzaville Conference in 1944, the first Constituent Assembly of the French Fourth Republic in 1946, and France's gratitude for African loyalty during World War II led to far-reaching governmental reforms in 1946. French citizenship was granted to all African "subjects," the right to organize politically was recognized, and various forms of forced labor were abolished.

A turning point in relations with France was reached with the 1956 Overseas Reform Act (Loi Cadre), which transferred a number of powers from Paris to elected territorial governments in French West Africa and also removed remaining voting inequalities.

Independence

In December 1958, Cote d'Ivoire became an autonomous republic within the French community as a result of a referendum that brought community status to all members of the old Federation of French West Africa except Guinea, which had voted against association. Cote d'Ivoire became independent on August 7, 1960, and permitted its community membership to lapse.

Cote d'Ivoire's contemporary political history is closely associated with the career of Felix Houphouet-Boigny, President of the republic and leader of the Parti Democratique de la Cote d'Ivoire (PDCI) until his death on December 7, 1993. He was one of the founders of the Rassemblement Democratique Africain (RDA), the leading pre-independence inter-territorial political party in French West African territories (except Mauritania).

Houphouet-Boigny first came to political prominence in 1944 as founder of the Syndicat Agricole Africain, an organization that won improved conditions for African farmers and formed a nucleus for the PDCI. After World War II, he was elected by a narrow margin to the first Constituent Assembly. Representing Cote d'Ivoire in the French National Assembly from 1946 to 1959, he devoted much of his effort to inter-territorial political organization and further amelioration of labor conditions. After his 13-year service in the French National Assembly, including almost 3 years as a minister in the French Government, he became Cote d'Ivoire's first Prime Minister in April 1959, and the following year was elected its first President.

In May 1959, Houphouet-Boigny reinforced his position as a dominant figure in West Africa by leading Cote d'Ivoire, Niger, Upper Volta (Burkina), and Dahomey (Benin) into the Council of the Entente, a regional organization promoting economic development. He maintained that the road to African solidarity was through step-by-step economic and political cooperation, recognizing the principle of nonintervention in the internal affairs of other African states.

1999 Coup and Aftermath

In a region where many political systems are unstable, Cote d'Ivoire showed remarkable political stability from its independence from France in 1960 until late 1999. Under Felix Houphouet-Boigny, President from independence until his death in

December 1993, Cote d'Ivoire maintained a close political allegiance to the West while many countries in the region were undergoing repeated military coups, experimenting with Marxism, and developing ties with the Soviet Union and China. His successor, President Henri Konan Bedie, was familiar with the U.S., having served as Cote d'Ivoire's first ambassador to the U.S. Falling world market prices for Cote d'Ivoire's primary export crops of cocoa and coffee put pressure on the economy and the Bedie presidency. Government corruption and mismanagement led to steep reductions in foreign aid in 1998 and 1999, and eventually to the country's first coup on December 24, 1999.

Following the bloodless coup, General Guei formed a government of national unity and promised open elections. A new constitution was drafted and ratified by the population in the summer of 2000. It retained clauses that underscored national divisions between north and south, Christian and Muslim, that had been growing since Houphouet's death.

Elections were scheduled for fall 2000, but when the general's hand-picked Supreme Court disqualified all of the candidates from the two

major parties—the PDCI and Rassemblement des Republicaines (RDR)—Western election support and monitors were withdrawn. The RDR called for a boycott, setting the stage for low election turnout in a race between Guei and Front Populaire Ivoirien (FPI) candidate Laurent Gbagbo.

When early polling results showed Gbagbo in the lead, Guei stopped the process—claiming polling fraud—disbanded the election commission, and declared himself the winner. Within hours Gbagbo supporters took to the streets of Abidjan. A bloody fight followed as crowds attacked the guards protecting the presidential palace. Many gendarmes and soldiers joined the fight against the junta government, forcing Guei to flee. Having gained the most votes, Gbagbo was declared President. The RDR then took the streets, calling for new elections because the Supreme Court had declared their presidential candidate and all the candidates of the PDCI ineligible. More violence erupted as forces loyal to the new government joined the FPI youth to attack RDR demonstrators. Hundreds were killed in the few days that followed before RDR party leader Alassane Ouattara called for peace and recognized the Gbagbo presidency.

2001 Attempted Coup

On January 7, 2001, another coup attempt shattered the temporary calm. However, some weeks later, in the spring, local municipal elections were conducted without violence and with the full participation of all political parties. The RDR, which had boycotted the presidential and legislative elections, won the most local seats, followed by the PDCI and FPI. Some economic aid from the European Union began to return by the summer of 2001, and the International Monetary Fund (IMF) re-engaged the government. Questions surrounding severe human rights abuses by the government during the presidential and legislative elections of 2000 remain unresolved (e.g., the mass grave at Yopougon), but day-to-day life began to return to normal. In August 2002, President Gbagbo formed a de facto government of national unity that included the RDR party.

2002 Country Divides

On September 19, 2002, rebellious exiled military personnel and co-conspirators in Abidjan simultaneously attacked government ministers and government and military/security facilities in Abidjan, Bouake, and Korhogo. In Abidjan, government forces stopped the coup attempt within hours, but the attacks resulted in the deaths of Minister of Interior Emile Boga Doudou and several high-ranking military officers. General Guei was killed under still-unclear circumstances. Almost immediately after the coup attempt, the government launched an aggressive security operation in Abidjan, whereby shantytowns—occupied by thousands of immigrants and Ivoirians—were searched for weapons and rebels. Government security forces burned down or demolished a number of these shantytowns, which displaced over 12,000 people.

The failed coup attempt quickly evolved into a rebellion, splitting the country in two and escalating into the country's worst crisis since independence in 1960. The rebel group, calling itself the "Patriotic Movement of Cote d'Ivoire" (MPCI), retained control in Bouake and Korhogo, and within 2 weeks moved to take the remainder of the northern half of the country. In mid-October 2002, government and MPCI representatives signed a ceasefire and French military forces already present in the country agreed to monitor the ceasefire line.

In late November 2002, the western part of the country became a new military front with the emergence of two new rebel groups—the Ivoirian Popular Movement for the Great West (MPIGO) and the Movement for Justice and Peace (MJP). MPIGO and MJP were allied with the MPCI, and the three groups subsequently called themselves the "New Forces." In January 2003, the Economic Community of West African States (ECOWAS) placed approximately 1,500 peacekeeping troops from five countries—Senegal (commander), Ghana, Benin, Togo, and Niger—on the ground beside the 4,000 French peacekeepers. The troops maintained the east-west ceasefire line, known as the Zone of Confidence, dividing the country.

Reunification Attempts

In late January 2003, the country's major political parties and the New Forces signed the French-brokered Linas-Marcoussis Accord (LMA), agreeing to a power-sharing national reconciliation government to include rebel New Forces representatives. The parties agreed to work together on modifying national identity, eligibility for citizenship, and land tenure laws which many observers see as among the root causes of the conflict. The LMA also stipulated a UN Monitoring Committee to report on implementation of the accord. Also in January 2003, President Gbagbo appointed Seydou Diarra as the consensus Prime Minister. In March 2003, Prime Minister Diarra formed a government of national reconciliation of 41 ministers. The full government did not meet until mid-April, when UN peacekeepers (UN Operation in Cote d'Ivoire, or UNOCI) were in place to provide security for rebel New Forces ministers. On July 4, 2003, the government and New Forces militaries signed an "End of the War" declaration, recognized President Gbagbo's authority, and vowed to work for the implementation of the LMA and a program of Demobilization, Disarmament and Reintegration (DDR). On September 13, 2003, six months after the formation of the reconciliation government, President Gbagbo named politically neutral Defense and Security Ministers, after consulting with the political parties and New Forces.

2004 saw serious challenges to the Linas-Marcoussis Accord. Violent flare-ups and political deadlock in the spring and summer led to the Accra III talks in Ghana. Signed on July 30, 2004, the Accra III Agreement reaffirmed the goals of the LMA with specific deadlines and benchmarks for progress. Unfortunately, those dead-

lines—late September for legislative reform and October 15 for rebel disarmament—were not met by the parties. The ensuing political and military deadlock was not broken until November 4, when government forces initiated a bombing campaign of rebel targets in the north. On November 6, a government aircraft bombed a French military installation in Bouake, killing nine French soldiers and one American civilian. Claiming that the attack was deliberate (the Ivoirian Government claimed it was a mistake), French forces retaliated by destroying most of the small Ivoirian air force. Mayhem ensued for several days as anti-French mobs rioted in Abidjan and violence flared elsewhere. On November 15, 2004 the United Nations Security Council issued an immediate arms embargo on Cote d'Ivoire and gave leaders one month to get the peace process back on track or face a travel ban and a freeze on their assets. In April 2005, South African President Thabo Mbeki invited the leaders to South Africa for an African Union-sponsored mediation effort. The result was the Pretoria Agreement, signed April 6, 2005. The Pretoria Agreement formally ended the country's state of war, and addressed issues such as Disarmament, Demobilization and Reintegration, the return of New Forces Ministers to government, and the reorganization of the Independent Electoral Commission. A follow-up agreement in June 2005 laid out another framework for disarmament, elections, and the adoption of legislation required under the Linas-Marcoussis Accord.

In September 2005, the government postponed presidential elections scheduled for October 30, 2005. In October 2005, the UN Security Council, via UN Security Council Resolution (UNSCR) 1633, endorsed an African Union decision to extend the Linas-Marcouissis peace process for an additional 12 months. As called for under 1633, a new Prime Minister, Charles Konan Banny, was selected by the international community and given broad powers designed to reunify the country. Banny selected a new cabinet in December 2005 in collaboration with the opposition, the President and the New Forces. Violent protests mounted by militias loyal to President Gbagbo in January 2006 against statements by UNOCI regarding the role of the National Assembly during the ongoing transition period threatened the independence of the Banny government and the ability of UNOCI and the International Working Group (created by the UN Security Council to oversee the peace process) to help the country achieve a stable, lasting reconciliation.

Initial steps toward disarmament and elections began in May 2006. The government began a pilot identification program for citizens and foreign residents lacking birth and nationality certificates. Government and rebel New Forces military formations began pre-groupment activities as a prelude to actual disarmament. Neither initiative was completed, and elections did not take place on October 31, 2006, as mandated by UN Security Council Resolution 1633. In November 2006, the UN Security Council issued a new resolution, 1721, which extended Prime Minister Banny's mandate for an additional 12 months. Prime Minister Banny was effectively blocked, however, from exercising control over the government as envisioned by the international community. President Gbagbo closed out 2006 with a speech to the nation in which he called for direct talks with the New Forces and the elimination of the Zone of Confidence.

Ouagadougou Political Agreement

On March 4, 2007, after weeks of closed-door negotiations led by Burkinabe President Compaore in Ouagadougou, Burkina Faso, President Gbagbo and New Forces leader Guillaume Soro announced they had agreed to a peace agreement aimed at reunifying the country and holding new elections. The Ouagadougou Accord foresaw a new transitional government and the re-launch of the stalled voter registration and identification process to enable elections to be held within 10 months. It also called for the near-immediate elimination of the Zone of Confidence; the disarmament, demobilization, and reintegration of former combatants; and for ex-rebel and government forces to partially merge before the formation of a new army.

At the end of March, Soro was named Prime Minister, and several days later, a new cabinet—consisting of most of the ministers from the previous cabinet—was named. Since then, UNOCI has withdrawn from the Zone of Confidence and several mixed brigades of New Forces, national army soldiers, and impartial forces carry out joint patrols in its place. Government ministries (particularly Health, Education, Finance, and Interior) and officials are returning to their posts in the northern part of the country, as are important economic actors, such as banks and utilities. In September 2007, the first step in the identification of voters commenced when a series of mobile courts began issuing birth certificates to those who never had them. In April 2008, the government announced elections would be held on November 30, 2008. The disarmament, demobilizaton, and reintegration (DDR) of former combatants has begun on a limited, primarily symbolic scale. Both the government's armed forces and New Forces leadership no longer believe DDR will be completed before elections. An integrated command center has been created, but is not fully functioning and suffers from a lack of funding and direction.

GOVERNMENT

Cote d'Ivoire's constitution of the Second Republic (2000) provides for a strong presidency within the framework of a separation of powers. The executive is personified in the president, elected for a 5-year term. The president is the head of state and commander in chief of the armed forces, may negotiate and ratify certain treaties, and may submit a bill to a national referendum or to the National Assembly.

According to the constitution, the president of the National Assembly assumes the presidency for 45-90

days in the event of a vacancy and organizes new elections in which the winner completes the remainder of the deceased president's term. The president selects the prime minister, who is the head of government. The cabinet is selected by and is responsible to the prime minister.

The unicameral National Assembly is composed of 225 members elected by direct universal suffrage for a 5-year term concurrently with the president. It passes on legislation typically introduced by the president, although it also can introduce legislation.

The judicial system culminates in the Supreme Court. The High Court of Justice is competent to try government officials for major offenses. There is also an independent Constitutional Council which has seven members appointed by the president that is responsible for, inter alia, the determination of candidate eligibility in presidential and legislative elections, the announcement of final election results, the conduct of referendums, and the constitutionality of legislation.

For administrative purposes, Cote d'Ivoire is divided into 19 regions and 58 departments. Each region and department is headed by a prefect appointed by the central government. In 2002, the country held its first departmental elections to select departmental councils to oversee local infrastructure development and maintenance as well as economic and social development plans and projects. There are 196 communes, each headed by an elected mayor, plus the city of Abidjan with 10 mayors.

Principal Government Officials

Last Updated: 11/12/08

Pres.: **Laurent GBAGBO**
Prime Min.: **Guillaume SORO**
Min. of African Integration & Spokesperson of the Govt.: **Amadou KONE**
Min. of Agriculture: **Amadou Gon COULIBALY**
Min. of Animal Production & Fisheries: **Alphonse DOUATI**
Min. of Communications: **Ibrahim Sy SAVANE**
Min. of Construction, Urban Development, & Housing: **Marcel Benoit Amon TANOH**
Min. of Culture & Francophony: **Komoe Augustin KOUADIO**
Min. of Defense: **Michel AMANI**
Min. of Economic Infrastructure: **Patrick ACHI**
Min. of Economy & Finance: **Charles Koffi DIBY**
Min. of Employment & Civil Service: **Hubert OULAYE**
Min. of Environment, Water Resources, & Forests: **Daniel Ayissi AKA**
Min. of Family, Women, & Social Affairs: **Adjoua Jeanne Brou PEUHMOND**
Min. of the Fight Against HIV/AIDS: **Christine ADJOBI**
Min. of Foreign Affairs: **Youssouf BAKAYOKO**
Min. of Higher Education & Scientific Research: **Ibrahima CISSE**
Min. of Industry & Private Sector Promotion: **Amah Marie TEHOUA**
Min. of Interior: **Desire TAGRO**
Min. of Justice & Human Rights & Keeper of the Seal: **Mamadou KONE**
Min. of Mines & Energy: **Leon Emmanuel MONNET**
Min. of National Education: **Gilbert BLEU-LAINE**
Min. of National Reconciliation & Institutional Relations: **Sebastien Dano DJEDJE**
Min. of New Technologies, Information, & Communication: **Hamed BAKAYOKO**
Min. of Planning & Development: **Paul Antoine Bohoun BOUABRE**
Min. of Public Health: **Remi Allah KOUADIO**
Min. of Reconstruction & Reintegration: **Fatoumata BAMBA-HAMZA**
Min. of Solidarity & War Victims: **Louis Andre DAKOURY-TABLEY**
Min. of Technical Education & Vocational Training: **Moussa DOSSO**
Min. of Territorial Admin.: **Daniel Cheik BAMBA**
Min. of Tourism & Handicrafts: **Sidike KONATE**
Min. of Trade & Commerce: **Youssouf SOUMAHORO**
Min. of Transportation: **Albert Mabri TOIKEUSSE**
Min. of Urban Development & Hygiene: **Theodore Mel EG**
Min. of Youth, Sports, & Leisure: **Dagobert BANZIO**
Ambassador to the US: **Yao Charles KOFFI**
Permanent Representative to the UN, New York: **Alcide Ilahiri DJEDJE**

Cote d'Ivoire maintains an embassy at 3421 Massachusetts Avenue, NW, Washington, DC 20007; tel: 202-797-0300.

POLITICAL CONDITIONS

Laurent Gbagbo has been President since October 26, 2000. Gbagbo took power following a popular uprising supporting his election victory after junta leader Gen. Robert Guei claimed a dubious victory in the 2000 presidential elections. General Guei had assumed power on December 25, 1999, following a military coup d'etat against the government of former President Henri Konan Bedie. Coup attempts in 2001 and 2002 escalated into a rebellion and crisis which culminated in the January 2003 signing of an accord for a power-sharing national reconciliation government. Implementation of the 2003 accord has made halting progress, and Cote d'Ivoire remains divided, with rebels occupying the northern half of the country. French Licorne and UNOCI peacekeeping troops observe a green line between government and New Forces positions.

Cote d'Ivoire's relations with the U.S. have traditionally been excellent, but have been somewhat strained since Section 508 restrictions curtailed nonhumanitarian aid following the December 1999 military coup. The restrictions were not lifted following the 2000 elections due to questionable governmental interference before and during the election.

Looking toward the country's future, the fundamental issue is whether its political system following the upheavals of recent years will provide for enduring stability, which is critical for investor confidence and further economic development. The political system in Cote d'Ivoire is president-dominated. The prime minister concentrates principally on coordinating and implementing the 2007 Ouagadougou Political Agreement.

However, political dialogue is much freer today than prior to 1990, especially due to the opposition press, which vocalizes its criticism of the regime. Beginning in 1990, Cote d'Ivoire evolved, with relatively little violence or dislocation, from a single-party state. Opposition parties, independent newspapers, and independent trade unions were made legal at that time. Since those major changes occurred, the country's pace of political change had been slow, prior to the period of turmoil ushered in by the December 1999 coup.

Whether further democratic reform will take place, adequate to meet future challenges, is unknown. As is generally true in the region, the business environment is one in which personal contact and connections remain important, where rule of law does not prevail with assurance, and where the legislative and judicial branches of the government remain weak. The political system is becoming less centralized, with the president stepping out of his role as ruling party leader, while attempting to decentralize many legislative functions. President Gbagbo has promised less executive interference in the judicial system, but it still lacks basic strength and independence.

Cote d'Ivoire has a high population growth rate, a high crime rate (particularly in Abidjan), a high incidence of AIDS, a multiplicity of tribes, sporadic student unrest, a differential rate of in-country development according to region, and a dichotomy of religion associated with region and ethnic group. These factors put stress on the political system and could become more of a problem if the government does not succeed in implementing the Ouagadougou Political Agreement and if the economy does not return to consistent growth.

Political Parties

The Ivoirian constitution affords the legislature some independence, but it has not been widely exercised. Until 1990, all legislators were from the PDCI. The December 2000 National Assembly election was marred by violence, irregularities, and a very low participation rate. Largely because of the RDR boycott of the election to protest the invalidation of the candidacy of party president Alassane Ouattara, the participation rate was only 33%. In addition, the election could not take place in 26 electoral districts in the north because RDR activists disrupted polling places, burned ballots, and threatened the security of election officials. Following the legislative by-elections in January 2001, 223 of the 225 seats of the National Assembly were filled. The FPI held 96 seats, the PDCI 94 seats, the PIT 4 seats, very small parties 2 seats, independent candidates 22 seats, and the RDR—in spite of its boycott of the legislative elections—5 seats.

Until it took the reins of government in the 2000 elections, the FPI party was the oldest opposition party. Moderate in outlook, it has a socialist coloration but one which was more concerned with democratic reform than radical economic change. It is strongest in the Bete ethnic areas (southwest) of President Laurent Gbagbo. The PDCI's "core" region may be described as the terrain of the Baoule ethnic group in the country's center and east, home of both Houphouet-Boigny and Bedie; however, the PDCI is represented in all parts of Cote d'Ivoire. Former members of the PDCI's reformist wing formed the originally non-ideological RDR in September 1994. They hoped that former Prime Minister Alassane Ouattara would run and prevail in the 1995 presidential election, but Ouattara was subsequently disqualified by Bedie-sponsored legislation requiring 5-year residency. The RDR is now strongest in the mostly Muslim north. The FPI and RDR boycotted the presidential election of October 1995 because of Ouattara's disqualification and the absence of an independent electoral commission, among other grievances. Their "active boycott" produced a certain amount of violence and hundreds of arrests, with a number of those arrested not tried for 2-1/2 years. These grievances remained unresolved, adding to the political instability leading to the 1999 coup and 2002 rebellion.

ECONOMY

The Ivoirian economy is largely market-based and depends heavily on the agricultural sector. Between 60% and 70% of the Ivoirian people are engaged in some form of agricultural activity. The economy performed poorly in the 1980s and early 1990s, and high population growth coupled with economic decline resulted in a steady fall in living standards. A majority of the population remains dependent on smallholder cash crop production. Principal exports are petroleum, cocoa, coffee, cotton, pineapples, tuna, and tropical woods. Principal U.S. exports are rice and wheat, plastic materials and resins, kraft paper, agricultural chemicals, telecommunications, and oil and gas equipment. Principal U.S. imports are cocoa and cocoa products, petroleum, rubber, and coffee.

Foreign Direct Investment Statistics

Direct foreign investment plays a key role in the Ivoirian economy, accounting for between 40% and 45% of total capital in Ivoirian firms. France is overwhelmingly the most important foreign investor. In recent years, French investment has accounted for about one-quarter of the total capital in Ivoirian enterprises, and between 55% and 60% of the total stock of foreign investment capital.

Infrastructure

By developing country standards, Cote d'Ivoire has an outstanding infrastructure. There is an excellent network of more than 8,000 miles of paved roads; good telecommunications services, including a public data communications network, cellular phones, and Internet access. There are two active ports. Abidjan's is the most modern in West Africa and the largest between Casablanca and Cape Town. There is regular air service within the region and to and from Europe and modern real estate developments for commercial, industrial, retail, and residential use. Abidjan remains one of the most modern and livable cities in the region. Its

school system is good by regional standards and includes an international school—whose enrollment dropped sharply due to the November 2004 crisis—based on U.S. curriculum and several excellent French-based schools.

Recent political and economic problems have delayed Cote d'Ivoire's planned public investment program. The government's public investment plan accords priority to investment in human capital, but it also will provide for significant spending on economic infrastructure needed to sustain growth. Continued infrastructure development has been brought into question because of private sector uncertainty. In the new environment of government disengagement from productive activities and in the wake of recent privatization, anticipated investments in the petroleum, electricity, water, and telecommunications sectors, and in part in the transportation sector, will be financed without any direct government intervention. A return to political and economic stability is critical if Cote d'Ivoire is to realize its potential in the region.

Major Trends and Outlooks

Since the colonial period, Cote d'Ivoire's economy has been based on the production and export of tropical products. Agriculture, forestry, and fisheries account for a substantial part of GDP and of exports. Cote d'Ivoire produces 40% of the world's cocoa crop and is a major exporter of bananas, coffee, cotton, palm oil, pineapples, rubber, tropical wood products, and tuna. The 1994 devaluation of the CFA franc and accompanying structural adjustment measures increased the international competitiveness of the agricultural, light industrial, and service sectors. However, reliance on commodity exports exposes the economy to the ups and downs of international price swings. To reduce the economic exposure to price variability, the government encourages export diversification and intermediate processing of cocoa beans. In recent years, petroleum exports have risen significantly, and petroleum is now the country's largest foreign exchange earner.

The 1994 devaluation of the CFA franc helped return Cote d'Ivoire to rapid economic growth until the slowdown evident by 1999. Increased aid flows, rigorous macroeconomic policies, and high international commodity prices, along with devaluation, yielded 6%-7% annual GDP growth rates from 1994-98. Cote d'Ivoire also benefited from Paris Club debt rescheduling in 1994, a London Club agreement in 1996, and the 1997 G-7 decision to include Cote d'Ivoire in the IMF-World Bank debt forgiveness initiative for highly indebted poor countries.

In the past several years, economic decline has resulted in declining living standards. Falling commodity prices along with government corruption and fiscal mismanagement brought the economy to its knees by the end of 1999. At that point, the coup d'etat and the subsequent institution of the military junta government caused the loss of foreign assistance. Private foreign investment declined precipitously. Government internal and external debt ballooned. As a result, the Ivoirian economy contracted 2.3% in 2000. The government signed a Staff Monitoring Program with the IMF in July 2001, but plans for a subsequent Poverty Reduction and Growth Facility were disrupted by the onset of the crisis in September 2002. The signs of economic and business recovery were encouraging in the mid-year of 2002, but the political and social crisis that began in September 2002 undermined all the efforts to resume cooperation with international donors. The economy has been in a slow decline since the outbreak of the armed rebellion in late 2002, with a cutoff of most external assistance (except humanitarian aid), mounting domestic and foreign arrearages, and a drastic slowdown in foreign and domestic investment.

The World Bank announced in April 2008 that Cote d'Ivoire had paid fully its arrears, paving the way for new assistance. GDP growth reached 1.7% in 2007, buoyed largely by growing oil and gas revenues, along with steady cocoa exports. Strong economic growth is not expected until peace is firmly reestablished and international financial institutions conclude agreements to reduce the country's large debt profile. However, with the gradual reintegration of the country, the economy in the north may begin to revive after a prolonged slump caused by the four-year-long division of the country.

SECURITY FORCES

Since the outbreak of the rebellion in September 2002 that split the country, the military has reorganized. The former system that broke down the country into four military regions no longer exists. The 21,000-man Ivoirian armed forces (formerly FANCI, now called the Ivorian Defense and Security Forces—FDS) include an army, navy, air force, gendarmerie, and specialized forces. The Joint Staff is assigned to the FDS headquarters in Abidjan.

The gendarmerie has 8,000 men. It is a national police force which is responsible for territorial security, especially in rural areas. In times of national crisis the gendarmerie could be used to reinforce the army. The gendarmerie is commanded by a brigadier-general.

Cote d'Ivoire has a brown-water navy whose mission is coastal surveillance and security for the nation's 340-mile coastline. It has patrol craft that operate in limited fashion along the coast and smaller vessels used to control immigration and contraband within the lagoon system. The operational capability of naval vessels has degraded since the war began.

The Ivoirian Air Force's mission is to defend the nation's airspace and provide transportation support to the other services. As noted above, in response to an FDS attack on a French base in Bouake in November 2004, French Licorne peacekeeping troops destroyed most of the Air Force on the ground. Currently, the Air

Force has one transport/utility aircraft, two utility helicopters, and one attack helicopter.

A mutual defense accord signed with France in 1961 provides for the stationing of French forces in Cote d'Ivoire. The 43rd Marine Infantry Battalion is based in Port Bouet adjacent to the Abidjan Airport. Shortly after the beginning of hostilities in September 2002, France established a stabilization force, currently 3,000 troops, under "Operation Licorne." Previously, France had approximately 500 troops stationed in Cote d'Ivoire. In January 2003, the Economic Community of West African States (ECOWAS) placed approximately 1,500 peacekeeping troops from five countries—Senegal (commander), Ghana, Benin, Togo, and Niger—on the ground beside the French peacekeepers. The troops maintained the east-west ceasefire line dividing the country. On April 4, 2004, ECOWAS troops became part of the UN Operation in Cote d'Ivoire (UNOCI) which was authorized under UN Security Council Resolution (UNSCR) 1528. The authorized strength of the UNOCI operation is 8,115 troops. UNOCI and Operation Licorne coordinate closely to fulfill the terms of UNSCR 1528 and subsequent resolutions. UNSCR 1739 extended the UNOCI and Licorne mandate until June 2007, UNSCR 1765 extended the mandate until January 2008, and UNSCR 1795 extended the mandate until July 2008.

FOREIGN RELATIONS

Throughout the Cold War, Cote d'Ivoire's foreign policy was generally favorable toward the West. The country became a member of the United Nations in 1960 and participates in most of its specialized agencies. It maintains a wide variety of diplomatic contacts. It sought change in South Africa through dialogue and was the first country accredited to post-apartheid South Africa. In 1986, Cote d'Ivoire announced the reestablishment of diplomatic relations with Israel.

France remains Cote d'Ivoire's single most important foreign partner. President Houphouet-Boigny, who was a minister in the French Government prior to independence, insisted that the connection with France remain strong. Concrete examples of Franco-Ivoirian cooperation are numerous: French is Cote d'Ivoire's official language; Cote d'Ivoire adopted the French legal system; a French marine infantry brigade stationed in Abidjan augmented security; thousands of French expatriates continue to work and live in Cote d'Ivoire; and the CFA franc currency is tied to the euro. However, the September 2002 events injected strain into the relationship, as the Ivoirian Government criticized France for its perceived failure to uphold its commitment under the 1961 mutual defense treaty by helping government forces recapture rebel-held areas. However, the French did send additional forces—reaching a total of around 4,000 troops as of fall 2003—to secure the ceasefire line between regular government and rebel forces. The French contingent was joined by a force provided by various member states of ECOWAS that totaled over 3,000 as of fall 2003. Anti-French riots erupted in Abidjan in late January-early February 2003, but bilateral relations subsequently improved amidst ongoing French military and diplomatic efforts to promote a peaceful resolution of the crisis. As noted above, relations with France deteriorated substantially after the events of November 2004.

The Ivoirian Government has traditionally played a constructive role in Africa. President Houphouet-Boigny was active in the mediation of regional disputes, most notably in Liberia and Angola, and had considerable stature throughout the continent. In 1996-97 Cote d'Ivoire sent a medical unit to participate in regional peacekeeping in Liberia, its first peacekeeping effort. Cote d'Ivoire's hopes to expand its involvement in regional peacekeeping efforts were derailed by the December 1999 coup. Still a regional economic powerhouse, Cote d'Ivoire hopes to retake its place in promoting regional stability when the resolution of its current crisis permits. In May 2004, Cote d'Ivoire joined the Community of Sahel and Saharan States (CENSAD).

Cote d'Ivoire belongs to the UN and most of its specialized agencies; the African Union; West African Economic and Monetary Union; ECOWAS; African Mauritian Common Organization; Council of Entente Communaute Financiere Africane; Non-aggression and Defense Agreement; Nonaligned Movement; African Regional Satellite Organization; InterAfrican Coffee Organizations; International Cocoa Organization; Alliance of Cocoa Producers; African, Caribbean and Pacific Countries; and Association of Coffee Producing Countries. Cote d'Ivoire also belongs to the European Investment Bank and the African Development Bank; it is an associate member of the European Union.

U.S.-IVOIRIAN RELATIONS

U.S.-Ivoirian relations have traditionally been friendly and close. Some strain has resulted from the Section 508 restrictions on nonhumanitarian aid imposed on Cote d'Ivoire following the December 1999 coup. Because of Ivoirian governmental interference in the 2000 presidential elections, the Section 508 restrictions were not lifted. The U.S. participates in the international effort to assist Cote d'Ivoire in overcoming its current crisis, providing more than a quarter of the funding for the UN peacekeeping mission that helps to maintain the ceasefire. The U.S. has also provided modest economic support fund (ESF) assistance to promote democracy. The U.S. is sympathetic to Cote d'Ivoire's desire for rapid, orderly economic development as well as its moderate stance on international issues. Bilateral U.S. Agency for International Development funding, with the exception of self-help and democracy and human rights funds, has been phased out, although Cote d'Ivoire continues to benefit to a limited extent from regional West African programs. The country remains a

major beneficiary of U.S. assistance in combating HIV/AIDS, as it is one of 15 focus countries under the President's Emergency Plan for AIDS Relief (PEPFAR). With assistance under PEPFAR likely to total some $85 million in FY 2007, this is by far the largest U.S. assistance program in Cote d'Ivoire. Ivoirian eligibility for the African Growth and Opportunity Act (AGOA) has been withdrawn, following the political impasse resulting from the 2002 rebellion.

The U.S. and Cote d'Ivoire maintain an active cultural exchange program, through which prominent Ivoirian Government officials, media representatives, educators, and scholars visit the U.S. to become better acquainted with the American people and to exchange ideas and views with their American colleagues. This cooperative effort is furthered through frequent visits to Cote d'Ivoire by representatives of U.S. business and educational institutions, and by visits of Fulbright-Hays scholars and specialists in various fields. A new U.S. Embassy chancery compound opened in July 2005.

A modest security assistance program that provides professional training for Ivoirian military officers in the U.S. has been suspended by the Section 508 restrictions.

TRAVEL

Consular Information Sheet

December 11, 2008

Country Description: Cote d'Ivoire (Ivory Coast) is a developing country on the western coast of Africa. The official capital is Yamoussoukro, but Abidjan is the largest city, the main commercial center, and where the Ivorian government and the U.S. Embassy are located. Cote d'Ivoire is a republic whose constitution provides for separate branches of government under a strong president.

The country has experienced continued, periodic episodes of political unrest and violence, sometimes directed against foreigners, since 2002 when a failed coup attempt evolved into an armed rebellion that split the country in two. Ivorian President Laurent Gbagbo and New Forces leader Guillaume Soro signed the Ouagadougou Political Agreement (OPA) in March 2007 and a new government was formed with Soro as Prime Minister. Implementation of the accord has been slow and although the political situation has improved, it still has not returned to normal. UN and French peacekeepers remain in the country.

Tourist facilities in and near Abidjan, the commercial capital, are good; accommodations in many other locations are limited in quality and availability.

Entry Requirements: A passport is required, but U.S. citizens traveling to Cote d'ivoire for business or tourism do not currently require visas for stays of 90 days or less. The Ivorian government, however, is planning to implement a biometric visa requirement for citizens of all nations, and this information will be published as soon details are known. To stay longer than 90 days, a visitor may still enter without a visa, but then must apply for a "visa de séjour" at the National Police Headquarters within 90 days of arrival. If the intent is to establish a residence in Cote d'Ivoire, the visitor must apply for a "carte de séjour" at the Office d'Identification Nationale (Note: "Cartes de séjour" are not issued to children under the age of 16, who are documented on their parents' visas). An international health certificate showing current yellow fever immunization is required for entry into Cote d'ivoire. Without it, the traveler may be required to submit to vaccination at entry before clearing immigration, at a cost of 5,000 CFA (a little over $10). Travelers may obtain the latest information and details on entry requirements from the Embassy of the Republic of Cote d'ivoire, 2424 Massachusetts Avenue NW, Washington, DC 20007, tel. (202) 797-0300. There are honorary consulates for Cote d'ivoire in San Francisco, Stamford, Orlando, Houston and Detroit. Overseas, travelers should inquire at the nearest Ivorian embassy or consulate.

Foreign travelers are sometimes approached at ports of entry by individuals with offers to expedite passport control and customs, and are then asked to pay an exorbitant fee, both for the service and for the passport and customs officers. Travelers to Cote d'ivoire are advised that there is no need to pay a police officer or customs officer for any service rendered during an arrival or departure, and that they should not surrender their passports or other important documents to anyone except easily identifiable government officials in uniform.

Safety and Security: Cote d'Ivoire has been unstable since a coup in 1999, and territorially divided since 2002. Although the Zone of Confidence dividing the country was abolished following the signing of the OPA, the New Forces effectively still control the northern and some west-

ern parts of the country. There are many road checkpoints manned by security forces and militia in both the government-controlled and New Forces-controlled portions of the country. Soldiers and militia members check documents and frequently demand cash for permission to pass. Cote d'Ivoire's border with Liberia is open, but border controls are extensive.

Political instability has contributed to economic stagnation and high unemployment, exacerbating social tensions and creating the potential for labor unrest and civil disorder. There have been recurring episodes of violence, some of them severe. In November 2004, there was a brief resumption of hostilities followed by widespread attacks against people and property in Abidjan and elsewhere. Many of these attacks were directed against French and other expatriates, and thousands fled the country. Brief episodes of significant civil unrest in Abidjan and some of the other population centers occurred in late 2005 and again in late 2006. Americans should avoid crowds and demonstrations, be aware of their surroundings, and use common sense to avoid situations and locations that could be dangerous. While the OPA serves as a roadmap to steer the country out of its political crisis, coup attempts or the resumption of hostilities, although unlikely, could occur.

Swimming in coastal waters is dangerous and strongly discouraged, even for excellent swimmers. The ocean currents along the coast are powerful and treacherous, and numerous people drown each year.

For the latest security information, Americans traveling abroad should regularly monitor the Department of State, Bureau of Consular Affairs' web site at http://travel.state.gov, where the current Travel Warnings and Travel Alerts, as well as the Worldwide Caution, can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S., or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: Crime continues to be a major security threat for Americans living in Cote d'ivoire. Grab-and-run street crime and pick-pocketing in crowded areas are widespread. Armed carjacking, robberies of businesses and restaurants, and home invasions occur frequently and have targeted residents, including expatriates, who are perceived as wealthy. American citizens have been stopped after dark, threatened, and robbed at gun point. Travelers should avoid road travel after dark and at night when these incidents are prevalent. Armed criminals use force when faced with resistance. Travelers displaying jewelry and other valuables, such as cameras, are especially at risk. Travelers are advised to carry limited amounts of cash and only photocopies of key documents. While there have been relatively few reported cases of sexual assault against foreigners, given the general climate of criminality, the actual rate of assault may be much higher than that which is reported. There were allegations of sexual assaults during the November 2004 civil strife. Although Americans are highly regarded, given the strong anti-French sentiment, people of non-African appearance may be specifically targeted for violence. Avoid large gatherings and political demonstrations, as they can turn violent quickly.

When traveling outside of Abidjan, moving between towns after dark is discouraged. Travelers are advised to use caution when traveling anywhere after dark. It is particularly dangerous to visit Abidjan's Treichville, Adjame, and Abobo districts after dark. The DeGaulle and Houphouet-Boigny bridges in Abidjan are dangerous areas for pedestrians. Inadequate resources and training limit the ability of the police to combat crime. Many hotels, restaurants, nightclubs, and supermarkets provide security guards to protect clients and vehicles.

Take the same common sense precautions in Abidjan that you would in any metropolitan area in the United States. Stay in well-lit areas and walk confidently at a steady pace on the side of the street facing traffic close to the curb. Avoid crowds, mass transit, doorways, bushes, alleys and sparsely populated areas. If you go out at night and need transportation, take an Orange metered taxi. Be discreet about your transactions, especially on the street. Normal spending habits of Westerners appear extravagant to local Ivorians.

Credit card use in Cote d'ivoire is limited, particularly outside Abidjan, but credit card fraud is an increasing problem. Business fraud is rampant and the perpetrators often target foreigners, including Americans. Schemes previously associated with Nigeria are now prevalent throughout West Africa, including Cote d'ivoire, and pose a danger of grave financial loss. Typically these scams begin with unsolicited communication (usually e-mails) from strangers who promise quick financial gain, often by transferring large sums of money or valuables out of the country, but then require a series of "advance fees" to be paid, such as fees for legal documents or taxes. Of course, the final payoff does not exist; the purpose of the scam is simply to collect the advance fees. A common variation is the scammer's claim to be a refugee or émigré of a prominent West African family, or a relative of a present or former political leader who needs assistance in transferring large sums of cash. Still other variations appear to be legitimate business deals that require advance payments on contracts. Sometimes victims are convinced to provide bank account and credit card information, and authorize financial transactions that drain their accounts, cause them to incur large debts and drain their life savings.

The best way to avoid becoming a victim of advance-fee fraud is common sense—if a proposition looks too good to be true, it is probably a scam, particularly if one has never met the correspondent. You should carefully check and research any unsolicited business proposal before committing funds, providing goods or services, or undertaking travel. A good clue to a scam is the phone number given to the victim; legitimate businesses and

offices provide fixed line numbers, while scams typically use only cellular (cell) phones. In Cote d'ivoire, most cell phone numbers start with zero. It is virtually impossible to recover money lost through these scams.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

The local equivalent to the "911" emergency line in Cote d'Ivoire is: 111.

Medical Facilities and Health Information: Abidjan Abidjan has privately-run medical and dental facilities that are adequate, but do not fully meet U.S. standards. Good physician specialists can be found, though few speak English. While pharmacies are well stocked with medications produced in Europe, newer drugs may not be available. Medical care outside of Abidjan is extremely limited. Malaria is a serious health problem in Cote d'Ivoire. For more information on malaria, including protective measures, see the Centers for Disease Control Travelers' Health web site at http://www.cdc.gov/malaria.

The avian influenza or "Bird Flu" virus (H5N1) has been confirmed in animals in Cote d'Ivoire as of June 2006. For more information regarding Avian Influenza, please visit the CDC's web site at http://wwwn.cdc.gov.

The U.S. Department of State is unaware of any HIV/AIDS entry restrictions for visitors to or foreign residents of Cote d'Ivoire.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's internet site at http://wwwn.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Cote d'Ivoire is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

Serious traffic accidents, one of the greatest threats to U.S. citizens in Cote d'Ivoire, occur regularly in Abidjan. Unsafe road conditions, unskilled drivers, and poorly maintained and overloaded vehicles create very poor driving conditions. Speed limits, signals, and yielding for pedestrians and cyclists are not respected. Drive defensively, watch out for public transportation vehicles that stop and start without warning, and be especially cautious at intersections because traffic lights often malfunction.

If you must drive at night, beware of vehicles without headlights and/or taillights, and pedestrians and bicycles along the roadside. In case of an accident, do not move your vehicle until a police officer tells you to do so. However, if there is no other vehicle to take the injured to a hospital, or if you believe your life is in danger from others at the site of the accident, go to the nearest hospital or police station.

Abidjan has a poor public transportation system; if you travel by bus, use only the "Express" line. In Abidjan, taxis are readily available, inexpensive (metered), but poorly maintained and notorious for not respecting the rules of the road. Communal taxis ("woro-woros"), used only within the limits of each commune, are not metered and are dangerous. Local vans ("Gbaka") should not be used because they are frequently involved in accidents.

Criminals usually steal vehicles when the driver is in or near the vehicle, so car doors and windows should be kept locked. While stopped in traffic, allow enough room between your car and the one in front to maneuver out if needed. Before getting into your car, look around to see if there is anyone paying unusual attention, and if someone appears to be watching, don't go to your vehicle, but go get assistance. When getting into or out of your vehicle, do so as quickly as possible as this is when you are most vulnerable to carjacking.

If you are the victim of a carjacking, do not resist. Try to remain calm and give the carjackers what they want, which is usually the vehicle and any valuables that you may possess. Experience shows that criminals usually don't use violence unless they are confronted with resistance. Furthermore, it is not uncommon to take an occupant, usually a woman or child, as hostage to ensure their safe escape; the hostage is usually released unharmed. This is a very difficult situation, so use your best judgment at the time to decide your course of action.

A newer phenomenon is the staged accidental "bumping" accident. If your vehicle is "bumped" from the rear or the side, stay locked inside because this ruse is used to get the

driver out and leave the vehicle free for carjacking. If you have a cell phone, call for assistance. If you feel your safety is in jeopardy, report the accident at the nearest police station as soon as possible. Try to get the license number for any other vehicle involved.

Emergency services such as ambulance service (SAMU) exist in Abidjan and larger towns, but such service is unreliable. Call 185 or 22-44-55-53. In smaller towns there is usually no ambulance service available, but ambulances may be dispatched from larger towns.

Aviation Safety Oversight: The U.S. Federal Aviation Administration (FAA) has assessed the Government of Cote d'Ivoire's Civil Aviation Authority as not being in compliance with International Civil Aviation Organization (ICAO) aviation safety standards for the oversight of Cote d'Ivoire's air carrier operations. For more information, travelers may visit the FAA's web site at http://www.faa.gov.

Special Circumstances: Ivorian customs authorities encourage the use of an ATA (Admission Temporaire/Temporary Admission) Carnet for the temporary admission of professional equipment, commercial samples, and/or goods for exhibitions and fair purposes. ATA Carnet Headquarters, at the U.S. Council for International Business, 1212 Avenue of the Americas, New York, NY 10036, issues and guarantees the ATA Carnet in the United States. For additional information, call (212) 354-4480, e-mail atacarnet@uscib.org, or visit http://www. uscib.org.

If traveling to another West African Economic and Monetary Union (WAEMU) country, expatriate residents leaving Cote d'Ivoire must declare the amount of currency being taken out of the country; if going to any other country, tourists are prohibited from taking more than 500,000 CFA francs (approximately $1,000), and business operators two million CFA francs (approximately $4,000), without government approval. Even with authorization, there is a cash limit of $4,000 for tourists and $5,500 for business people, with any surplus in travelers or bank checks.

Carry a photocopy of your U.S. passport, visa, and entry stamps. Also, carry your international driver's license with you, especially if you drive. An American driver's license is not valid for driving in Cote d'Ivoire.

Government corruption remains a serious problem in Cote d'Ivoire, and has an impact on judicial proceedings, contract awards, customs, and tax issues. Security forces (police, military, gendarmes) routinely stop vehicles for traffic violations and security checks. If you are stopped, politely present your identification. If you are stopped at one of these check points for any reason and asked to pay a "fine" to these uniformed officials, politely refuse and present your photocopy of your U.S. passport, visa, and entry stamp. Taking pictures is prohibited near sensitive installations, including military sites, government buildings such as the radio and television stations, the Presidency building, the airport, and the DeGaulle and Houphouet-Boigny bridges in Abidjan.

Cote d'Ivoire recognizes dual nationality if acquired at birth. Americans who also are Ivorian nationals may be subject, while in Côte d'Ivoire, to certain aspects of Ivorian law that impose special obligations on citizens of that country.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating Cote d'Ivoire's laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Cote d'Ivoire are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in Cote d'Ivoire are urged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration web site and to obtain updated information on travel and security within Cote d'Ivoire. Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate. By registering, American citizens make it easier for the Embassy to contact them in case of emergency. The U.S. Embassy is located in the Riviera Golf neighborhood of the Cocody section of Abidjan, east of the downtown area. The Embassy's postal address is 01 B.P. 1712 Abidjan 01, and the main telephone number is 22-49-40-00. The Consular Section fax number is 22-49-42-02, and more information is on the Consular pages of the Embassy's web site at http://abidjan.usembassy.gov.

Intercountry Adoption

June 2006

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is based on public sources and current understanding. Questions involving foreign and U.S. immigration laws and legal interpretation should be addressed respectively to qualified foreign or U.S. legal counsel.

Patterns of Immigration: Please review current reports online at http://adoption.state.gov.

Adoption Authority: The government offices responsible for adoption in Côte d'Ivoire are the Ministry of Family and Social Affairs and the Ministry of Justice. The Department

of Social Welfare, sub-unit of the Ministry of Family and Social Affairs has jurisdiction over the child's identification process, the home study and the issuance of a certificate authorizing the orphanage to release the child to the adoptive parent(s). Any request related to an adoption issue should be directed to:

Mme La Directrice
Direction de la Protection et Promotion Sociales
Ministère de la Famille et Des Affaires Sociales
BP V 124, Abidjan, Cote d'Ivoire.
Tel: (225) 20 217 626 or 20 213 348

The Ministry of Justice handles the second and final part of the adoption process. Once the child is in the adoptive parent's custody, the adoptive parents must request the legal guardianship and thereafter, either the simple adoption or the plenary adoption. This procedure must be initiated through the Court of First Instance of Abidjan. However please note that only a full adoption is considered a valid adoption for U.S. immigration purposes. Request for information should be directed to:

Monsieur le Président
Tribunal de Première Instance d'Abidjan
BP V 33 Abidjan, Cote d'Ivoire
Tel: (225) 20 223 586

Eligibility Requirements for Adoptive Parents: In Cote d'Ivoire, a single person and a married couple are both eligible to adopt, providing the following requirements are met, the prospective adoptive parent (s) must be thirty (30) years old and must be 15 years older than the adoptive child; a prospective adoptive couple must be married for at least five years, and both individuals must consent to the adoption.

Residency Requirements: The adoption process requires a mandatory home study and an six-month integration period. Therefore, the court expects the prospective adoptive parent(s) to establish residency in Côte d'Ivoire. However, the prospective parent(s) may be from a foreign country. In such cases, they must explain the circumstances preventing them from establishing a temporary residency abroad and should submit proof that they visit the child regularly and provide for his/her care.

Time Frame: The process may be finalized within a year.

Adoption Agencies and Attorneys: There are no private adoption agencies in Côte d'Ivoire. All adoption matters are processed through the Ministry of Family and Social Affairs and the Ministry of Justice. The Consular Section of the U.S. Embassy in Abidjan maintains a list of attorneys who handle inter-country adoptions.

Printed copies of this list are available at the U.S. Embassy, however it is important to note that the Embassy cannot recommend the services of any private attorney.

Adoption Fees: The adoption process involves fees associated with the medical examination as well as for court procedures. As of June, 2006, the average cost of the medical examination ranges from US$ 69.00 in public medical facilities to US$93.00 in private clinics. Court fees consist of US$59.00, which must be paid by the adoptive parent(s) to register the case for a hearing. The total cost for issuance of a new birth certificate and a passport, is approximately US$50.00. This fee includes the purchase of a revenue stamp of US$0.97 for issuance of the birth certificate, and a revenue stamp of USS 49.00 for an Ivorian passport.

Adoption Procedures: Persons interested in adopting a child from Côte d'Ivoire must first identify a child. This can be done with the assistance of the Department of Social Welfare, which is a sub-unit of the Ministry of Family and Social Affairs, or by directly contacting the administration of an orphanage. Once the prospective adoptive parent(s) have identified a child for adoption, the orphanage's administrator transmits the case to the Department of Social Welfare, which will conduct a home study. Upon completion of the home study, the Department drafts its recommendation and gives a written authorization (Autorisation de Sortie de la Pouponnière) to the orphanage to release the child to the adoptive parent(s). The file is then forwarded to the court for adjudication. A first hearing is scheduled by the "Judge of Guardianship" to verify the circumstances surrounding the adoption as well as to hear the intent for adoption by both the biological and adoptive parent(s). The biological parent(s) plays a crucial role in the process, because they must consent to the adoption in writing. The written consent is a required document, and must be submitted when the request for adoption is submitted to the Court.

There are two types of adoptions in Cote d'Ivoire: the simple adoption and the full adoption ("Adoption Plénière"). The full adoption awards complete custody to the adoptive parents and breaks any existing familial relationship between the adopted child and the birth parent(s).

Once the birth parents have, in writing, irrevocably released the child for adoption, a permanent parent-child relationship is created and this adoption gives the adopted child the same rights as a child born to the adoptive parent. On the contrary, the simple adoption can be compared to a court decision granting legal custody of the child, to the adoptive parent. It would be, for instance, a case where the biological parent is incapable of providing proper care and partly delegates his/her parental rights to a third party. After a satisfactory review of the six-month integration period, a second hearing is scheduled where the judge issues a preliminary decree called the legal guardianship or "Ordonnance de Garde Juridique en vue d'Adoption." A simple adoption or the final adoption request may be requested by the adoptive parents upon the completion of the compulsory six-month period during which they have lived with the adopted child.

Once the adoption decree is issued, the adoptive parents will apply for a new birth certificate by contacting the civil registry ("Mairie") which has jurisdiction over their place of

residence. The birth certificate is required for the issuance of a passport.

Required Documents: The documentary requirements for foreign adoptions in Côte d'Ivoire are as follows.

- The prospective parent(s) should address a written request either to the Ministry of Family and Social Affairs, Department of Social Welfare or directly to the court having jurisdiction if the child has already been identified. In the request, the adoptive parent(s) must give the reasons for their desire to adopt and must indicate the age and the gender of the child.
- Birth certificates of the adoptive parent(s).
- Marriage certificate for married couples.
- Proof of income.
- Consent for adoption in writing with the signature(s) of the biological parent(s), if known, duly attested by a Notary Public.
- Medical certificate confirming sterility if this is the basis for adoption.
- Recommendation of the social welfare service of the local administration (following a home study at the place of residence), with details about the prospective adoptive parents, history of their marriage, living conditions, family and personal motivation for adoption, and income. A U.S. home study may be useful if translated in into French; however, it will not waive the local home study requirement.

Embassy of the Republic of Cote d'Ivoire
2424 Massachusetts Avenue, NW,
Washington, D.C. 20007,
Telephone: (202) 797-0300.

There are honorary consulates for Cote d'Ivoire in San Francisco, Stamford (CT), Orlando, Houston and Detroit.

U.S. Immigration Requirements: Prospective adopting parents are strongly encouraged to consult USCIS publication M-249, *The Immigration of Adopted and Prospective Adoptive Children*, as well as the Department of State publication, *Intercountry Adoptions*. Please see the *Intercountry Adoption* section of this book for more details and review current reports online at http://adoption.state.gov.

U.S. Embassy Abidjan
01 B.P. 1712, Abidjan 01
Côte d'Ivoire
Tel: (225) 22-49-40-00
Fax: (225) 22-49-42-02

Additional Information: Specific questions about intercountry adoption in Côte d'Ivoire may be addressed to the U.S. Embassy in Abidjan. General questions regarding intercountry adoption may be addressed to the Office of Children's Issues, U.S. Department of State, CA/OCS/CI, SA-29, 4th Floor, 2201 C Street, NW, Washington, D.C. 20520-4818, toll-free Tel: 1-888-407-4747.

Travel Warning

December 15, 2008

The Department of State warns U.S. citizens of the risks of traveling to Cote d'Ivoire and urges U.S. citizens to exercise extreme caution while traveling in Cote d'Ivoire. This replaces the Travel Warning for Cote d'Ivoire dated June 09, 2008, updates information on the security and political situation, and advises all U.S. citizens to maintain an adequate supply of water, food, and fuel.

Cote d'Ivoire continues to experience periodic episodes of political unrest and violence since a 2002 failed coup attempt evolved into an armed rebellion that split the country in two. Ivorian President Laurent Gbagbo and New Forces leader Guillaume Soro signed the Ouagadougou Political Agreement (OPA) in March 2007 and a new government was formed with Soro as Prime Minister (PM). Although implementation of the accord is ongoing, the political situation has not fully returned to normal. In December 2007, Bouake, the largest city under the control of the New Forces, experienced rioting by disaffected rebel soldiers and paramilitary forces, as well as fighting between opposing factions within the rebel movement, amid rumors of another coup attempt. Travel for the local population was severely restricted during this period, and two employees of the U.S. Embassy were evacuated by United Nations (UN) forces to a safehaven. Both UN and French peacekeepers remain in the country.

Given the sometimes tense and potentially volatile security situation, the Department of State urges American citizens to exercise extreme caution should they travel to Cote d'Ivoire, and to take special care when traveling outside Abidjan. In February 2008, Embassy personnel and other international organizations were prevented from traveling to and from western Cote d'Ivoire due to rioting by government soldiers. Americans planning travel to Cote d'Ivoire despite this Travel Warning should consult the Embassy or their host organization(s) for the most recent security assessment of the areas where they plan to travel. Increases in food and oil prices could provoke impromptu strikes or demonstrations, as occurred in Abidjan in July 2008. Crimes such as mugging, robbery, burglary, and carjacking pose the highest risk for foreign visitors in Abidjan. Visitors should be careful when stopped in heavy traffic or at impromptu roadblocks due to the threat of violent robbery, and should avoid travel outside of the city after dark. Land routes to neighboring countries are open, although overland travel to Liberia and Guinea is strongly discouraged, and caution is urged when crossing into Mali, Burkina Faso, and Ghana.

Long-delayed presidential elections scheduled for November 30, 2008 have been postponed and a new date has not yet been set. Americans traveling to Cote d'Ivoire should follow political developments carefully, as there is potential for violence in the run-up to, and aftermath of, the elections.

The Department of State continues to prohibit minor dependents under the age of 18 from accompanying U.S. government employees assigned to the Embassy in Abidjan. Embassy employees are asked to be cautious when traveling within Abidjan and to avoid travel outside of the city at night. Private Americans are urged to follow the same guidelines. U.S. Embassy personnel must obtain prior approval before traveling more than 35 kilometers outside Abidjan. Some of those requests may be denied, or multi-vehicle convoys may be required for security reasons. Americans resident in Cote d'Ivoire should maintain several days' supply of cooking fuel, food, and water at home, and ensure that their vehicles are fully fueled at all times. The U.S. Embassy is located in the Riviera Golf neighborhood of the Cocody section of Abidjan. The Embassy may close to the public temporarily from time to time in response to security developments. U.S. citizens who remain in, or travel to, Cote d'Ivoire despite this Travel Warning should consult the Department of State's latest Country Specific Information for Cote d'Ivoire and the Worldwide Caution at http://www.travel.state.gov. Americans should register with the U.S. Embassy by completing a registration form on-line at https://travelregistration.state.gov/ibrs/ui/, or by calling (225) 22-49-40-00, or faxing (225) 22-49-42-02. Americans in Cote d'Ivoire who need assistance should contact the Embassy at (225) 22-49-40-00.

Current information on safety and security can also be obtained by calling 1-888-407-4747 toll-free within the United States and Canada, or, for callers outside of the United States and Canada, by calling a regular toll line at 1-202-501-4444. These numbers are available from 8:00 a.m. to 8:00 p.m. Eastern Time, Monday through Friday (except U.S. federal holidays).

CROATIA

Compiled from the December 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name
Republic of Croatia

PROFILE

Geography

Area: 56,542 sq. km. land area (slightly smaller than West Virginia), 31,067 sq. km. coastal sea area.

Cities: (2002 est.) Capital—Zagreb (779,145). Others—Split (188,694), Rijeka (144,043), Osijek (114,616).

Terrain: Croatia is situated between central and eastern Europe. Its terrain is diverse, containing rocky coastlines, densely wooded mountains, plains, lakes, and rolling hills.

Climate: Croatia has a mixture of climates. In the north it is continental, Mediterranean along the coast, and a semi-highland and highland climate in the central region.

People

Population: (July 2008 est.) 4,491,543.

Growth rate: (2005 est.) -0.02%.

Ethnic groups: Croat 89.6%, Serb 4.5%, other 5.9% (including Bosniak, Hungarian, Slovene, Czech, and Roma) (2001 census).

Religions: Catholic 87.8%, Orthodox 4.4%, Slavic Muslim 1.28%, others 6.52%.

Languages: Croatian (South Slavic language, using the Roman script).

Health: (2005 est.) Life expectancy—male 70.79 years; female 78.31 years. Infant mortality rate—6.84 deaths/1,000 live births.

Government

Type: Parliamentary democracy.

Constitution: Adopted December 22, 1990.

Independence (from Yugoslavia) June 25, 1991.

Government branches: Executive—president (chief of state), prime minister (head of government), cabinet of ministers. Legislative—unicameral Parliament or Sabor. Judicial—three-tiered system.

Suffrage: Universal at 18.

Political parties: (represented in Parliament) Croatian Democratic Union (HDZ), Social Democratic Party of Croatia (SDP), Croatian People's Party-Liberal Democrats (HNS), Croatian Peasant Party (HSS), Croatian Party of Rights (HSP), Istrian Democratic Assembly (IDS), Croatian Social Liberal Party (HSLS), Independent Democratic Serb Party (SDSS), Croatian Party of Pensioners (HSU), Croatian Democratic Alliance of Slavonia and Baranja (HDSSB), Party of Democratic Action of Croatia (SDAH).

Economy

Real GDP growth: (2007) 5.6%.

Inflation rate: (2007) 2.9%.

Unemployment rate: (International Labor Organization method, 2007) 9.6%.

Natural resources: Oil, bauxite, low-grade iron ore, calcium, natural asphalt, mica, clays, salt, and hydropower.

GEOGRAPHY

Croatia serves as a gateway to eastern Europe. It lies along the east coast of the Adriatic Sea and shares a border with Serbia, Montenegro, Bosnia and Herzegovina, Hungary, and Slovenia.

The republic swings around like a boomerang from the Pannonian Plains of Slavonia between the Sava, Drava, and Danube Rivers, across hilly, central Croatia to the Istrian Peninsula, then south through Dalmatia along the rugged Adriatic coast. Croatia is made up of 20 counties plus the city of Zagreb and controls 1,185 islands in the Adriatic Sea, 67 of which are inhabited.

PEOPLE AND HISTORY

The Croats are believed to be a purely Slavic people who migrated from Ukraine and settled in present-day Croatia during the 6th century. After a period of self-rule, Croatians agreed to the Pacta Conventa in 1091, submitting themselves to Hungarian authority. By the mid-1400s, concerns over Ottoman expansion led the Croatian Assembly to invite the Habsburgs, under Archduke Ferdinand, to assume control over Croatia. Habsburg rule proved successful in thwarting the Ottomans, and by the 18th century, much of Croatia was free of Turkish control.

In 1868, Croatia gained domestic autonomy while remaining under Hungarian authority. Following World War I and the demise of the Austro-Hungarian Empire, Croatia joined the Kingdom of Serbs, Croats, and Slovenes (the Kingdom of Serbs, Croats, and Slovenes became Yugoslavia in 1929). Yugoslavia changed its name once again after World War II. The new state became the Federal Socialist Republic of Yugoslavia and united Croatia and several other states together under the communistic leadership of Marshall Tito (born Josip Broz).

After the death of Tito and with the fall of communism throughout eastern Europe, the Yugoslav federation began to unravel. Croatia held its first multi-party elections since World War II in 1990. Long-time Croatian nationalist Franjo Tudjman was elected President, and one year later, Croatians declared independence from Yugoslavia. Conflict between Serbs and Croats in Croatia escalated, and one month after Croatia declared independence, civil war erupted.

The United Nations mediated a cease-fire in January 1992, but hostilities resumed the next year when Croatia fought to regain one-third of the territory lost the previous year. A second cease-fire was enacted in May 1993, followed by a joint declaration the next January between Croatia and Yugoslavia. However, in September 1993, the Croatian Army led an offensive against the Serb-held Republic of Krajina. A third cease-fire was called in March 1994, but it, too, was broken in May and August 1995 after Croatian forces regained large portions of Krajina, prompting an exodus of Serbs from this area. In November 1995, Croatia agreed to peacefully reintegrate Eastern Slavonia, Baranja, and Western Dirmium under terms of the Erdut Agreement. In December 1995, Croatia signed the Dayton peace agreement, committing itself to a permanent cease-fire and the return of all refugees.

The death of President Tudjman in December 1999, followed by the election of a coalition government and President in early 2000, brought significant changes to Croatia. The government, under the leadership of then-Prime Minister Racan, progressed in implementation of the Dayton Peace Accords, regional cooperation, refugee returns, national reconciliation, and democratization. On November 23, 2003, national elections were held for Parliament. The current government, headed by Prime Minister Ivo Sanader, took office in December 2003. The Sanader government has made membership for Croatia in the European Union and in NATO its top priorities. Elections for Parliament are not expected again until November 2007. Presidential elections were held in January 2005. President Mesic was re-elected to a second term in office, defeating Croatian Democratic Union (HDZ) candidate Jadranka Kosor in two rounds of balloting. President Mesic was inaugurated for a second term on February 18, 2005. Presidential elections will next be held in January 2010.

GOVERNMENT AND POLITICAL CONDITIONS

The Croatian Parliament, also known as the Sabor, became a unicameral body after its upper house (Chamber of Counties) was eliminated by constitutional amendment in March 2001. The remaining body, the Chamber of Representatives, consists of 152 members who serve 4-year terms elected by direct vote. The Sabor meets twice a year—from January 15 to July 15 and from September 15 to December 15. The powers of the legislature include enactment and amendment of the constitution, passage of laws, adoption of the state budget, declarations of war and peace, alteration of the boundaries of the republic, and carrying out elections and appointments to office.

Stjepan Mesic was re-elected President in February 2005. The president is the head of state and is elected by direct popular vote for a term of 5 years. The president is limited to serving no more than two terms. In addition to being the commander in chief, the president appoints the prime minister and cabinet members with the consent of Parliament. Following the death of President Tudjman, the powers of the presidency were curtailed and greater responsibility was vested in Parliament.

HDZ President Ivo Sanader assumed the office of Prime Minister in December 2003. The prime minister, who is nominated by the president, assumes office following a parliamentary vote of confidence in the new government. The prime minister and government are responsible for proposing legislation and a budget, executing the laws, and guiding the foreign and internal policies of the republic.

The HDZ-led government that assumed office in January 2008 represents a coalition agreement between the HDZ (66 seats), the HSS (6 seats), the HSLS (2 seats), the SDSS (3 seats), other minority representatives and the lone representative of the HSU. The current government has, in addition to Prime Minister Sanader, 17 ministers, including four deputy prime ministers. Thirteen of the ministers come from the ranks of the HDZ. Coalition partners hold four cabinet seats: agriculture, tourism, and two deputy

prime minister seats, including one responsible for regional development and returns held by a representative of the Croatian Serb SDSS party. This is the highest ranking government position held by a Croatian Serb since Croatia's independence in 1991.

Croatia has a three-tiered judicial system, consisting of the Supreme Court, county courts, and municipal courts. Croatia's Supreme Court is the highest court in the republic. The Supreme Court assures the uniform application of laws. Members of the high court are appointed by the National Judicial Council, a body of 11 members, and justices on the Supreme Court are appointed for life.

The court's hearings are generally open to the public. The Constitutional Court is a body of 13 judges appointed by Parliament for an 8-year term. The Constitutional Court works to assure the conformity of all laws to the constitution.

Croatia maintains an embassy in the United States at 2343 Massachusetts Avenue NW, Washington DC, 20008-2853, tel. (202) 588-5899, fax: (202) 588-8936. Consulates General of the Republic of Croatia are located in New York City, Chicago, and Los Angeles. Honorary consulates are located in St. Paul, New Orleans, Seattle, Pittsburgh, and Kansas City.

ECONOMY

Following World War II, rapid industrialization and diversification occurred within Croatia. Decentralization came in 1965, allowing growth of certain sectors, particularly the tourist industry. Profits from Croatian industry were used to develop poorer regions in the former Yugoslavia. This, coupled with austerity programs and hyperinflation in the 1980s, contributed to discontent in Croatia.

Privatization and the drive toward a market economy had barely begun under the new Croatian Government when war broke out in 1991. As a result of the war, the economic infrastructure sustained massive damage, particularly the revenue-rich tourism industry. From 1989 to 1993, GDP fell 40.5%. With the end of the war in 1995, tourism and Croatia's economy recovered moderately. However, corruption, cronyism, and a general lack of transparency stymied meaningful economic reform, as well as much-needed foreign investment.

Croatia's economy turned the corner in 2000 as tourism rebounded. The economy expanded by 5.6% in 2002, stimulated by a credit boom led by newly privatized and foreign-capitalized banks, some capital investment (most importantly road construction), further growth in tourism, and gains by small and medium-sized private enterprises. These trends have continued, with credit growth fueling strong demand in construction and services, resulting in 4.8% GDP growth in 2006. Unemployment, although still high, began a steady decline over this period that has continued to the present day. Croatia has also benefited from macroeconomic stability over the past several years with a stable exchange rate, low inflation, and shrinking government deficits. The start of European Union accession talks in 2005 and the prospect of NATO membership have also helped to attract higher levels of foreign investment.

Despite these gains, however, substantial challenges remain, particularly in reforming the judicial system and reducing corruption. The privatization process, begun in the 1990s, has been unsteady, largely as a result of public mistrust engendered when many state-owned companies were sold to the politically well-connected at below-market prices. The government sold three large metals plants in early 2007, but the Croatian state still controls a significant part of the economy, with government spending accounting for as much as 40% of GDP. Some large, state-owned industries, such as the country's shipyards, continue to rely on government subsidies, crowding out investment in education and technology needed to ensure the economy's long-term competitiveness.

Croatia has so far weathered the global financial crisis reasonably well, but faces significant challenges in 2009. GDP growth is forecast to slow to between 2% and 3%, largely due to an expected downturn in Croatia's top export commodity, tourism. Croatia's external imbalances and high foreign debt present risks as well, as continued access to foreign credit in 2009 may be severely limited.

FOREIGN RELATIONS

Croatia is in the midst of pursuing a policy of greater Euro-Atlantic integration. In October 2001, Croatia and the European Union (EU) signed a Stabilization and Association Agreement. In February 2003 Croatia formally presented its EU membership application, and in April 2004 the European Commission agreed to open EU accession negotiations with Croatia. The opening of talks was delayed in March 2005 when the EU decided that Croatia was not fully cooperating with the International Criminal Tribunal for the Former Yugoslavia (ICTY), but talks finally got underway in October 2005, after the ICTY's Chief Prosecutor, Carla del Ponte confirmed that Croatia was fully cooperating.

In December 2005 General Ante Gotovina, indicted by the ICTY for war crimes and a fugitive since 2002, was arrested by Spanish authorities in the Canary Islands, partially as a result of intelligence information provided by the Croatian Government. Since the arrest and transfer of Gotovina to The Hague in late 2005, Croatia continues to cooperate fully with the ICTY.

Croatia was admitted on May 25, 2000 into the Partnership for Peace program—which was designed by North Atlantic Treaty Organization (NATO) member states in 1994 to strengthen Euro-Atlantic security—and, in May 2002, was welcomed into NATO's Membership Action Program, a key step toward NATO membership. On May 2, 2003, the United States joined Croatia, Albania, and

Macedonia to sign the Adriatic Charter, in which the three NATO aspirants pledged their commitment to NATO values and their cooperative efforts to further their collective NATO aspirations. In 2008, the Adriatic Charter expanded to include two new countries, Bosnia and Herzegovina and Montenegro. Croatia received an invitation to join NATO at the NATO Summit in Bucharest, Romania in April 2008 and hopes to become a full member of the alliance by the next NATO Summit in April 2009.

Croatia has been a member of the United Nations since 1992, and contributes troops to 13 UN operations including those in Haiti, Cyprus, Georgia, Ethiopia and Eritrea, and Kashmir. In January 2008, Croatia began a two-year term as a non-permanent member of the UN Security Council. Since 2003, Croatia has contributed troops to support the International Stabilization Assistance Force (ISAF) in Afghanistan. Croatia's contribution to ISAF rose to approximately 300 personnel in 2008, and Croatia also approved its participation in ISAF for 2009. Croatia is a member of the World Trade Organization and the Central European Free Trade Organization.

While Croatia has made progress on dealing with a number of post-conflict issues, the status of refugees displaced during the 1991-95 war and resolution of border disputes with Slovenia remain key issues influencing Croatia's relations with its neighbors and the international community.

U.S.-CROATIAN RELATIONS

The United States opened its Embassy in Zagreb in 1992. U.S. engagement in Croatia is aimed at fostering a democratic, secure, and market-oriented society that will be a strong partner in Euro-Atlantic institutions. In an effort to promote regional stability through refugee returns, the United States has given more than $18 million since 1998 in humanitarian demining assistance. Croatia hopes to remove an estimated one million remaining mines by 2010.

The United States also has provided additional financial assistance to Croatia through the Southeastern European Economic Development Program (SEED) to facilitate democratization and restructuring of Croatia's financial sector, largely through programs managed by the U.S. Agency for International Development (USAID). Most SEED funding and USAID programs in Croatia concluded in 2008.

TRAVEL

Consular Information Sheet

October 14, 2008

Country Description: Croatia is an increasingly well-developed nation in the process of accession to the EU. Facilities for tourism are available throughout the country, and the Adriatic coast is an increasingly popular tourist destination.

Entry Requirements: A passport is required for travel to Croatia. A visa is not required for U.S. passport holders for tourist or business trips of fewer than 90 days within a six-month period. All foreign citizens must register with the local police within 24 hours of arrival as well as inform them of any change in their address. Registration of foreign visitors staying in hotels or accommodations rented through an accommodation company is done automatically by the hotelier or accommodation company. Failure to register is a misdemeanor offense; some Americans have been fined for failing to register.

U.S. citizens already in Croatia who wish to remain in Croatia for more than 90 days must obtain a temporary residence permit: Note that the first temporary stay permit must be obtained from the Croatian Embassy or Consulate in the United States.

For further information on entry requirements for Croatia, including information regarding requirements for residency and work permits, travelers may also contact the Embassy of Croatia at 2343 Massachusetts Avenue NW, Washington, DC 20008, tel. (202) 588-5899, the Croatian Consulates in New York City, Chicago, and Los Angeles or the Croatian Ministry of Internal Affairs' Office for Foreigners, tel. +385 (1) 456-3111 or http://www.mup.hr and http://www.mvpei.hr/MVP.asp?pcpid=1123.

In support of a residency application, applicants will need to provide a copy of their birth and marriage certificates, if applicable, obtained no more than 90 days before application, as well as an FBI Identification Record Request authenticated for use abroad. All documents should be translated into Croatian and have an "apostille" stamp certifying their authenticity. Information on apostilles and authentication of documents is available from the Bureau of Consular Affairs web site.

For information on obtaining FBI Identification Record Requests, please see http://www.fbi.gov/hq/cjisd/fprequest.htm.

If an extension of an approved temporary stay is needed, U.S. citizens should submit a request to the local police having jurisdiction over their place of residence in Croatia no later than 30 days in advance of the last day of authorized stay. For the latest information on procedures for obtaining residence or work permits, please see http://zagreb.usembassy.gov/service/other/entry.html.

Safety and Security: Although hostilities in all parts of the country ended in 1995, de-mining of areas along former confrontation lines is not complete. It is estimated that demining operations will continue at least until 2010. Mine-affected areas are well-marked with the Croatian-language warning signs using the international symbol for mines. Travelers in former conflict areas, including Eastern Slavonija, Brodsko-Posavska county, Karlovac county, areas around Zadar, and in more remote areas of the Plitvice Lakes National Park should exercise caution and not stray from known safe roads and areas. Mine clearance work may lead to the closure of roads in former conflict areas. For more information about mine-affected areas and de-mining operations in Croatia, please see the Croatian Mine Action Center's web site at www.hcr.hr/en/minskaSituacija.asp.

For the latest security information, Americans traveling abroad should regularly monitor the Department of State, Bureau of Consular Affairs' web site at http://travel.state.gov, where the current Travel Warnings and Travel Alerts, as well as the Worldwide Caution, can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S., or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: Croatia has a relatively low crime rate, and violent crime is rare. Foreigners do not appear to be singled out. However, in tandem with increased numbers of American tourists visiting Croatia, the Embassy is receiving increased reports of thefts. Travelers are advised to safeguard their belongings in public areas, especially in bus or railroad stations, airports and on public transportation. As in many countries, outward displays of wealth may increase a traveler's chances of being targeted by thieves.

While violent crime is rare, there have been isolated attacks targeted at specific persons or property, which may have been racially motivated or prompted by lingering ethnic tensions from Croatia's war for independence.

Additionally, American citizens are cautioned to be mindful that Croatia is predominantly Catholic and, in some regions, quite conservative. Behavior that may be generally acceptable by American standards may offend local sensitivities and be met with hostility and, in a few cases, even violence.

American citizens are urged to be cautious when frequenting so called "gentlemen's clubs." A few such establishments have presented foreign patrons with grossly inflated bar bills, sometimes in the thousands of dollars, and threatened those customers who refuse to pay.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

Medical Facilities and Health Information: Health facilities in Croatia, although generally of western caliber, are under severe budgetary strains. Some medicines are in short supply in public hospitals and clinics. The number of private medical and dental practitioners is substantial, and private pharmacies stock a variety of medicines not readily available through public health facilities. Croatian health care facilities, doctors and hospitals may expect immediate cash payment for health services and generally will not accept credit cards. Tick-borne encephalitis, a disease preventable with a three-shot vaccination series, is found throughout inland Croatia but is not prevalent along the coast. Travelers to Croatia may obtain a list of English-speaking physicians and dentists at the Embassy's web site at www.usembassy.hr/acs/medical.htm or by calling: (385) (1) 661-2376 during working hours, or (385) (1) 661-2400 after working hours. Ambulance services can be reached by dialing 94. Ambulance services are effective; however, response times may be longer to more isolated areas.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's web site at http://wwwn. cdc.gov/travel. For information about outbreaks of infectious diseases abroad, consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith/en.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation. Americans who plan to stay in Croatia for more than 90 days may be required by Croatian authorities to pay into the Croatian health insurance system for the period of their stay in Croatia, regardless of whether they hold private American insurance or not.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Croatia is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

Road conditions and maintenance in Croatia vary widely. Two modern highways linking Zagreb with Rijeka and Split opened in 2004. Construction is complete between Zagreb and Split and Zagreb and Rijeka, but work is still ongoing between Split and Dubrovnik; this work may cause delays and road closures. Additionally, there are stretches of highway with average travel speeds up to 130 km/hour that are only one lane in each direction. Opposing traffic may not be separated by a divider. Highway tolls are higher than in the United States and must be paid by cash or credit card. Primary roads, including roads along the coast, are generally adequate, but most have only one lane in each direction. Coastal roads are narrow and congested, and tend to be slippery when wet. Rock slides are also possible on roads along the coast, as well as through the mountain regions of Lika and Gorski Kotar. There is heavy congestion on major routes on weekends (towards the coast, for example) and in major cities during rush hours. Congestion on coastal routes, at border crossings, and at tunnels is especially heavy in the summer months. Drivers should be prepared for sudden slowdowns when approaching tunnels at any time of year. Drivers tend to be aggressive in Croatia. Passing on curves or in oncoming lanes is common on highways and poses a higher risk of accidents. Accidents, when they do happen, very often involve fatalities. Drivers traveling though former conflict areas should stay on paved roads to reduce the risk of encountering unmarked mines and unexploded ordnance left over from the 1991-1995 war. In Zagreb, motorists and pedestrians alike should also pay special attention to trams (streetcars), which in downtown areas may travel at a high rate of speed through the narrow, congested streets. Right turns on red lights are strictly forbidden in Croatia, unless an additional green light (in the shape of an arrow) allows it. At unmarked intersections, right of way is always given to the vehicle entering from the right. The use of front seat belts is obligatory and passengers in vehicles equipped with rear seat belts are required to use them. Special seats are required for infants, and children under age 12 may not sit in the front seat of an automobile. The use of cellular phones while operating a motor vehicle is prohibited unless the driver is using a hands-free device. By law, headlights of vehicles must be used during the winter, during fog, and/or during inclement weather.

According to Croatian law a driver may drive with a blood alcohol level of up to 0.05 percent, however it is illegal for a professional driver and those younger than 24 years of age to drive with a blood alcohol level greater than 0.00 percent. A driver involved in an accident is also forbidden to have a blood alcohol level greater than 0.00 percent. Police routinely spot-check motorists for drinking and driving administering breath-analyzer tests at even the most minor accident. Drivers who refuse to submit to a breath-analyzer are automatically presumed to have admitted to driving while intoxicated. In case of accidents resulting in death or serious injury, Croatian law requires police to take blood samples to test blood alcohol levels. This new law also introduced significantly tougher fines for traffic violations of up to 2,000 euros and prison sentences.

Within Croatia, emergency road help and information may be reached by dialing 987, a service of the Croatian Automobile Association (HAK), staffed by English speaking operators. The police can be reached by dialing 112 or 92 and the ambulance service by dialing 94. Additional road condition and safety information may be obtained from HAK at tel. + 385 (1) 464-0800 ext. 0 (English speaking operators available 24 hours), or + 385 (1) 455-4433 or +385 (1) 661-1999, or via their web site, www.hak.hr. During the tourist season, traffic information in English is also available at 98.5 FM on Croatian radio thirty minutes past the hour between 6:30 a.m. and 8:30 p.m.

According to Croatian law, U.S. citizens visiting Croatia for tourism or business may use a U.S. driver's license for up to three months. U.S. citizens with an approved extended tourist visa or a permit for permanent residence may continue to use a U.S. driver's license for up to twelve months. However, a Croatian driver's license is required for stays longer than twelve months.

Foreigners who have been granted temporary residence in the Republic of Croatia and who are in possession of a vehicle registered abroad (with valid registration documents and insurance), may use their car a maximum of three months following the day of entry into Croatia, after which period the vehicle must be re-registered in Croatia. For specific information concerning Croatian driver's permits, vehicle inspection, road tax and mandatory insurance, please contact the Croatian National Tourist Office, 350 Fifth Avenue, Suite 4003, New York, NY 10118; phone 1-800-829-4416 or 212-278-8672; fax 212-279-8683.

In cases of traffic accidents involving a foreign-registered vehicle, the investigating police officer on the scene is required to issue a vehicle damage certificate to the owner of the foreign-registered vehicle. This certificate is necessary to cross the border. Upon written request, the police station in the area where the accident occurred will issue a Traffic Accident Investigation Record. For further information, please visit http://www.mup.hr/1266.aspx.

For travelers arriving by private marine craft, please refer to the nautical information and regulations available at www.mmtpr.hr.

Aviation Safety Oversight: The U.S. Federal Aviation Administration (FAA) has assessed the Government of Croatia's Civil Aviation Authority as not being in compliance with International Civil Aviation Organization

(ICAO) aviation safety standards for oversight of Croatia's air carrier operations. For more information, travelers may visit the FAA's web site at http://www.faa.gov.

Special Circumstances: With numerous automated teller machines and ever-wider acceptance of credit cards in Croatia, traveler's checks are accepted less frequently or exchanged at an unfavorable rate. Western Union money transfer is available. For information on money transfers, call (385)(1) 4839-166 or fax (385)(1) 4839-122.

Recreational Boating: The Government of Croatia adopted a law (effective January 1, 2006) requiring all recreational skippers chartering Croatian flagged vessels to have a certificate of competence. Under the law, the Ministry of Sea, Tourism and Transport will only recognize licenses issued by national authorities of other states. As no such national licensing regime exists in the U.S., Americans wishing to charter and pilot a Croatian-flagged vessel may be required to pass a certification test at the Ministry in Zagreb or a designated harbormaster's office on the coast.

Tourists can be certified in Croatia at harbormasters' offices in Pula, Rijeka, Senj, Zadar, Sibenik, Split, Ploce and Dubrovnik, as well as at the Ministry in Zagreb. Candidates need to contact the harbormaster's office or the Ministry to schedule the test. Please note that the test will be administered only to groups, so individuals may need to wait until a sufficient number of interested applicants apply. The certification costs 850 kuna (roughly $165) and is valid indefinitely. A study guide is available and the test can be taken in Croatian, English, German, and Italian.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses.

Persons violating Croatian laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Croatia are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable also in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in Croatia are encouraged to register with the U.S. Embassy through the State Department's travel registration web site so that they can obtain updated information on travel and security within Croatia.Americans without Internet access may register directly with the U.S. Embassy. By registering, American citizens make it easier for the Embassy to contact them in case of emergency. The U.S. Embassy in Zagreb is located at ul. Thomasa Jeffersona 2, 10010 Zagreb, tel. (385) (1) 661-2200. The Embassy is located in the southern outskirts of Zagreb near the airport. For emergencies on weekends, holidays and after hours, an embassy duty officer can be reached at tel. (385) (1) 661-2400 or (385) (91) 455-2247.

Intercountry Adoption

June 2006

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is based on public sources and current understanding. Questions involving foreign and U.S. immigration laws and legal interpretation should be addressed respectively to qualified foreign or U.S. legal counsel.

Please Note: Croatian law gives absolute priority to adoptions by Croatian citizens. While there is nothing in Croatian law that specifically prohibits foreigners from adopting Croatian children, the law stresses that there must be overwhelming justification and exceptionally compelling reasons. The Ministry of Health and Social Welfare must approve such adoptions. Foreign adoption and removal of Croatian children from their homeland is a sensitive subject to Croatian authorities and to the Croatian people. In practice, it is extremely difficult, if not impossible, to obtain this approval, as the government does not consider it beneficial to a child to be uprooted, to lose contact with relatives, or to lose his/her Croatian identity.

The number of prospective parents in Croatia is significantly higher than the number of children available for adoption. There are relatively few adoptable children among the total number of children who are without parental care on a temporary or permanent basis. Traditionally, relatives take in orphan children.

Patterns of Immigration: Please review current reports online at http://adoption.state.gov.

Adoption Authority: The government office responsible for adoptions in Croatia is the Ministarstvo zdravstva i sociajlne skrbi (Ministry of Health and Social Welfare), the address is Ksaver 200A 14, 10000 Zagreb.

In Croatia, the application for adoption must be submitted to the Centar za socialnu skrb (Center for Social Welfare, equivalent to a U.S. county or municipal social services department). The Center for Social Welfare

prepares an adoption case for submission to the Ministry, the ultimate authority to approve adoptions by foreigners.

Eligibility Requirements for Adoptive Parents: Adults between the ages of 21 and 35 years old, who are at least eighteen years older than the adopted child, may adopt a child in Croatia. If there are some particularly justified reasons, an adoptive parent may be a person older than 35 years, but the age difference between the adoptive parent and the adopted child may not be greater than 45 years. If the adoptive parents adopt sisters and brothers, half sisters and half brothers, it is enough that one of the adoptive parents meets the age condition for only one of the children.

If the adoptive parents have adopted a child and subsequently wish to adopt the child's sister, brother, half-sister or half-brother, they may adopt such a child without reference to their age. Also, as an exception, an adoptive parent may be a foreigner if this is of particular benefit to the child. If the adoptive parent is a foreigner, the adoption can take place only with the prior approval of the Ministry of Health and Social Welfare. The law makes no distinction between single or married adoptive parents; however, in practice, when a baby is in question, preference is given to married petitioners.

Residency Requirements: Prospective adoptive parents do not have to reside in Croatia during the adoption process, but the Center for Social Welfare should be aware when they are and are not in the country. A Power of Attorney would be required during adoptive parents' absence so that someone can act legally on their behalf.

Time Frame: According to Croatian law, adoptions should be either approved or disapproved within 60 days of receipt of the submission of the completed application to Ministry of Health and Social Welfare.

Adoption Agencies and Attorneys: All adoptions must be approved through the Ministry of Health and Social Welfare, the address is Ksaver 200A, 10000 Zagreb.

The U.S. Embassy Zagreb can provide a list of English-speaking attorneys and court translators in Croatia. Provision of the list is not an endorsement of the attorneys whose contact information is provided. The list can be located at: http://www.usembassy.hr.

Adoption Fees: The Croatian government charges no fee for its role in the adoption process.

Adoption Procedures: Persons who wish to apply to adopt a particular child can do so by directly contacting the Center for Social Welfare of the municipality in which the child resides. If the prospective parents have not identified a particular child, they should contact the Ministry of Health and Social Welfare to ask if any municipal Centers for Social Welfare have a child available for adoption. In both cases, when prospective children have been identified, the next step is for parents to submit the documents listed below to the municipal Centers for Social Welfare. After reviewing the case, the Center for Social Welfare forwards the application package to the Ministry of Health and Social Welfare with a recommendation as to whether the adoption should proceed. The Ministry then reviews the case and makes a final decision on the adoption within 60 days of receipt.

The Ministry then notifies the Center where the application was filed as of its recommendation and the Center in turn notifies the prospective adoptive parent(s) as to the final decision. The adoption is considered final when the adoptive parents receive the notification from the Center. No court appearance is required for finalization.

Required Documents: There is no specific application form. A request for adoption takes the form of a letter, written by the prospective adoptive parent(s), detailing their circumstances and their desire for adoption, and bearing original signature(s). It can be submitted by mail or through an authorized representative with Power of Attorney. The application must be accompanied by the following documents:

- Certified birth certificate(s) of the prospective parents;
- Certified marriage certificate (if applicable);
- Medical certificate of good health preferably provided by a hospital or general practice clinic rather than a private physician;
- Proof of citizenship (certified copy of a birth certificate, naturalization certificate, or passport);
- Proof of employment in the form of a letter from the parent(s) employer(s) stating their position, length of employment, and salary;
- Criminal Background Check: All prospective parents must submit a U.S. Federal Bureau of Investigation Criminal Justice information Services (CJIS) identification record;
- Federal Income Tax return(s) from the preceding year;
- Home study (social worker's analysis) about the adoptive family and other circumstances of the application, including his or her ability to care for a child.

All original documents and the application letter must be in English and each must be accompanied by a translation in Croatian by an authorized court translator. It is easier and less expensive to have the translations done in Croatia by an authorized court translator rather than in the United States.

The U.S. Embassy in Zagreb can provide a list of court interpreters, but cannot endorse the services or qualifications of anyone on the list www.usembassy.hr. Any official documents (birth certificates, passports, social service reports, home studies,

etc) should be certified by an apostille from the designated authority in the United States.

Embassy of the Republic of Croatia
2343 Massachusetts Ave. NW
Washington, DC 20008
Tel: (202) 588-5943
Fax: (202) 588-8937
Internet: http://us.mfa.hr
E-mail: consular@croatiaemb.org

Croatia has consulates in Chicago, Kansas City, Los Angeles, New Orleans, New York, Pittsburgh, Seattle, and St. Paul, Minnesota.

U.S. Immigration Requirements: Prospective adopting parents are strongly encouraged to consult USCIS publication M-249, *The Immigration of Adopted and Prospective Adoptive Children*, as well as the Department of State publication, *Intercountry Adoptions.*

Please see the *Intercountry Adoption* section of this book for more details and review current reports online at http://adoption.state.gov.

U.S. Embassy
2 Thomas Jefferson Street
10010 Zagreb, Croatia

Telephone: 385-1-661-2200

Consular Services: 385-1-661-2300

Embassy Hours: 8 AM—4:30 PM

Additional Information: Specific questions about adoption in Croatia may be addressed to the U.S. Embassy in Zagreb, Croatia (385-1-661-2200 or http://www.usembassy.hr). General questions regarding intercountry adoption may be addressed to the Office of Children's Issues, U.S. Department of State, CA/OCS/CI, SA-29, 4th Floor, 2201 C Street, NW, Washington, D.C. 20520-4818, toll-free Tel: 1-888-407-4747.

CUBA

Compiled from the August 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Republic of Cuba

PROFILE

Geography

Area: 110,860 sq. km. (44,200 sq. mi.); about the size of Pennsylvania.

Cities: Capital—Havana (pop. 2 million). Other major cities—Santiago de Cuba, Camaguey, Santa Clara, Holguin, Guantanamo, Matanzas, Cienfuegos, Pinar del Rio.

Terrain: Flat or gently rolling plains, hills; mountains up to 2,000 meters (6,000 ft.) in the southeast.

Climate: Tropical, moderated by trade winds; dry season (November-April); rainy season (May-October).

People

Population: 11.2 million; 70% urban, 30% rural.

Ethnic groups: 51% mulatto, 37% white, 11% black, 1% Chinese (according to Cuban census data).

Languages: Spanish. Literacy—97% (according to Cuban government sources).

Work force: (4.87 million) Services—4%; industry—13%; agriculture—20%; science and technology—1%; construction—5%; education—12%; health and social services—12%.

Government

Type: Totalitarian Communist state; current government assumed power by force January 1, 1959.

Independence: May 20, 1902.

Political parties: Cuban Communist Party (PCC); only one party allowed.

Political subdivisions: 14 provinces, including the city of Havana, and one special municipality (Isle of Youth).

Economy

GDP: (2007 est., based on constant 1997 prices) $47.35 billion.

Real annual growth rate: 3.0% (2001); 1.5% (2002); 2.9% (2003); 3.0% (2004 est.); 7.8% (2005 est.); 9.5% (2006 est.); 5.8% (2007 est.).

GDP per capita income: (2007 est., based on constant 1997 prices) $4,200.

Average monthly salary: $17.

Natural resources: Nickel, cobalt, iron ore, copper, manganese, salt, timber, oil, natural gas.

Agriculture: Products—sugar, citrus and tropical fruits, tobacco, coffee, rice, beans, meat, vegetables.

Industry: Types—sugar and food processing, oil refining, cement, electric power, light consumer and industrial products, pharmaceutical and biotech products.

Trade: Exports (2007)—$3.701 billion f.o.b.: nickel/cobalt, pharmaceutical and biotech products, sugar and its byproducts, tobacco, seafood, citrus, tropical fruits, coffee. Major export markets (2006)—Netherlands $774 million (28%); Canada $546 million (20%); Venezuela $296 million (11%); China $246 million (9%); Spain $149 million (5%); Russia $137 million (5%); Singapore $79 million (3%); France $51 million (2%); Bolivia $40 million (1%); Mexico $39 million (1%); others $402 million (15%). Imports (2007)—$10.083 billion f.o.b.: petroleum, food, machinery, chemicals. Major import suppliers (2006)—Venezuela $2.209 billion (24%); China $1.569 billion (17%); Spain $846 million (9%); Germany $616 million (7%);United States $484 (5%); Brazil $429 million (5%); Italy $409 million (4%); Canada $340 million (4%); Mexico $234 million (3%); Algeria $228 million (2%); France $197 million (2%); Vietnam $190 million (2%); Japan $175 million (2%); Russia $152 million (2%); Argentina $115 million (1%); others $1.227 billion (13%).

Exchange rate: Convertible pesos per U.S.$1 = 0.93. Cuba has two currencies in circulation: the Cuban peso (CUP), and the convertible peso (CUC). In April 2005, the official exchange rate changed from $1 per CUC to $1.08 per CUC (0.93 CUC per $1), both for individuals and enterprises. Individuals can buy 24 Cuban pesos (CUP) for each CUC sold, or sell 25 Cuban pesos for each CUC bought; enterprises, however, must

exchange CUP and CUC at a 1:1 ratio. It is also important to note that the Cuban regime taxes and receives approximately 10% of each conversion of U.S. dollars into CUCs.

PEOPLE AND RELIGION

Cuba is a multiracial society with a population of mainly Spanish and African origins. The largest organized religion is the Roman Catholic Church, but evangelical protestant denominations continue to grow rapidly. Afro-Cuban religions, a blend of native African religions and Roman Catholicism, are widely practiced in Cuba. Officially, Cuba has been an atheist state for most of the Castro era. In 1962, the government of Fidel Castro seized and shut down more than 400 Catholic schools, charging that they spread dangerous beliefs among the people. In 1991, however, the Communist Party lifted its prohibition against religious believers seeking membership, and a year later the constitution was amended to characterize the state as secular instead of atheist.

While the Cuban constitution recognizes the right of citizens to freedom of religion, the government de facto restricts that freedom. Twenty-two denominations, including Presbyterians, Episcopalians, and Methodists, are members of the Cuban Council of Churches (CCC). Most CCC members are officially recognized by the State, though several, including the Evangelical Lutheran Church, are not registered and are recognized only through their membership in the CCC. Another 31 officially recognized denominations, including Jehovah's Witnesses and the small Jewish community, do not belong to the CCC. The government does not favor any one particular religion or church; however, the government appears to be most tolerant of those churches that maintain close relations to the State through the CCC. Unregistered religious groups experience various degrees of official interference, harassment, and repression. The Ministry of Interior engages in active efforts to control and monitor the country's religious institutions, including through surveillance, infiltration and harassment of religious professionals and practitioners. The most independent religious organizations—including the Catholic Church, the largest independent institution in Cuba today—continue to operate under significant restrictions and pressure imposed on them by the Cuban regime. The Cuban Government continues to refuse to allow the church to have independent printing press capabilities; full access to the media; to train enough priests for its needs or allow adequate numbers of foreign priests to work in the country; or to establish socially useful institutions, including schools and universities, hospitals and clinics, and nursing homes. All registered denominations must report to the Ministry of Interior's Office of Religious Affairs.

The visit of Pope John Paul II in January 1998 was seen as an important, positive event for bringing a message of hope and the need for respect of human rights. Unfortunately, these improvements did not continue once the Pope left the island. While some visas were issued for additional priests to enter Cuba around the time of the visit, the regime has again sharply restricted issuance of visas. Moreover, despite explicit regime guarantees and repeated follow-up requests, the regime has refused to permit the Catholic Church to establish Internet connections or an intranet among dioceses on the Island. In a pastoral letter entitled "There is No Country Without Virtue" ("No Hay Patria Sin Virtud"), the Cuban Conference of Catholic Bishops in February 2003 openly criticized the government's strict control over the activities of the Catholic Church, especially state restrictions on religious education and Church access to mass media, as well as the increasingly amoral and irreligious character of Cuban society under Communist rule. In 2007-2008 the government permitted the Catholic Church to broadcast Christmas and Holy Week messages. The Vatican and the Catholic Church are still pressing for more access to the media. The Cuban Government in 2007, for the first time since the revolution, declared Christmas Day a holiday.

Other Cuban religious groups—including evangelical Christians, whose numbers continue to grow rapidly—also have benefited from the relative relaxation of official restrictions on religious organizations and activities. Although particularly hard hit by emigration, Cuba's small Jewish community continues to hold services in Havana and has members in Santiago, Camaguey, and other parts of the island.

HISTORY

Spanish settlers established the raising of cattle, sugarcane, and tobacco as Cuba's primary economic pursuits. As the native Indian population died out, African slaves were imported to work the ranches and plantations. Slavery was abolished in 1886.

Cuba was the last major Spanish colony to gain independence, following a lengthy struggle begun in 1868. Jose Marti, Cuba's national hero, helped initiate the final push for independence in 1895. In 1898, the United States entered the conflict after the USS Maine sank in Havana Harbor on February 15 due to an explosion of undetermined origin. In December of that year, Spain relinquished control of Cuba to the United States with the Treaty of Paris. On May 20, 1902, the United States granted Cuba its independence but retained the right to intervene to preserve Cuban independence and stability in accordance with the Platt Amendment. In 1934, the Platt Amendment was repealed. The United States and Cuba concluded a Treaty of Relations in 1934 which, among other things, continued the 1903 agreements that leased the Guantanamo Bay naval base to the United States.

Independent Cuba was often ruled by authoritarian political and military figures who either obtained or remained in power by force. Fulgencio Batista, an army sergeant, orga-

nized a non-commissioned officer revolt in September 1933 and wielded significant power behind the scenes until he was elected president in 1940. Batista was voted out of office in 1944 and did not run in 1948. Both those elections were won by civilian political figures with the support of party organizations. Running for president again in 1952, Batista seized power in a bloodless coup 3 months before the election was to take place, suspended the balloting, and began ruling by decree. Many political figures and movements that wanted a return to the government according to the Constitution of 1940 disputed Batista's undemocratic rule.

On July 26, 1953, Fidel Castro, who had been involved in increasingly violent political activity before Batista's coup, led a failed attack on the Moncada army barracks in Santiago de Cuba in which more than 100 died. After defending himself in a trial open to national and international media, he was convicted and jailed, and subsequently was freed in an act of clemency, before going into exile in Mexico. There he organized the "26th of July Movement" with the goal of overthrowing Batista, and the group sailed to Cuba on board the yacht Granma, landing in the eastern part of the island in December 1956.

Batista's dictatorial rule fueled increasing popular discontent and the rise of many active urban and rural resistance groups, a fertile political environment for Castro's 26th of July Movement. Faced with a corrupt and ineffective military—itself dispirited by a U.S. Government embargo on weapons sales to Cuba—and public indignation and revulsion at his brutality toward opponents, Batista fled on January 1, 1959. Although he had promised a return to constitutional rule and democratic elections along with social reforms, Castro used his control of the military to consolidate his power by repressing all dissent from his decisions, marginalizing other resistance figures, and imprisoning or executing thousands of opponents. An estimated 3,200 people were executed by the Castro regime between 1959-62 alone. As the revolution became more radical, hundreds of thousands of Cubans fled the island.

Castro declared Cuba a socialist state on April 16, 1961. For the next 30 years, Castro pursued close relations with the Soviet Union and worked in concert with the geopolitical goals of Soviet communism, funding and fomenting violent subversive and insurrectional activities, as well as military adventurism, until the demise of the U.S.S.R. in 1991. Relations between the United States and

Cuba deteriorated rapidly as the Cuban regime expropriated U.S. properties and moved toward adoption of a one-party communist system. In response, the United States imposed an embargo on Cuba in October 1960, and, in response to Castro's provocations, broke diplomatic relations on January 3, 1961. Tensions between the two governments peaked during the October 1962 missile crisis.

GOVERNMENT

Cuba is a totalitarian communist state controlled by General Raul Castro and a cadre of party loyalists. Raul Castro replaced his brother Fidel Castro as chief of state, president of Cuba, and commander-in-chief of the armed forces on February 24, 2008. In March 2003, Fidel Castro had announced his intention to remain in power for life, but he became incapacitated on July 31, 2006. While Fidel Castro is still nominally the First Secretary of the Cuban Communist Party (PCC), Raul Castro, as its Second Secretary, is fully in charge of this political body and has announced that a new party congress will be held toward the end of 2009, the first to be held since 1997. The Ministry of Interior is the principal organ of state security and control. The Castro regime seeks to control most aspects of Cuban life through the Communist Party and its affiliated mass organizations, the government bureaucracy, and the state security apparatus.

According to the Soviet-style Cuban constitution of 1976, the National Assembly of People's Power, and its Council of State when the body is not in session, has supreme authority in the Cuban system. Since the National Assembly meets only twice a year for a few days each time, the 31-member Council of State wields power. The Council of Ministers, through its 9-member executive committee, handles the administration of the economy, which is state-controlled except for a tiny open-market sector. Raul Castro is President of the Council of State and Council of Ministers, and Jose Ramon Machado Ventura serves as First Vice President of both bodies. Although the constitution theoretically provides for independent courts, it explicitly subordinates them to the National Assembly and to the Council of State.

The People's Supreme Court is the highest judicial body. Due process is routinely denied to Cuban citizens, particularly in cases involving political offenses. The constitution states that all legally recognized civil liberties can be denied to anyone who opposes the "decision of the Cuban people to build socialism." Citizens can be and have been jailed for terms of 3 years or more for simply criticizing the communist system or Fidel Castro. Under the law of "dangerousness," citizens can be jailed for up to 4 years if a police official thinks that they show "anti-social behavior."

The Communist Party is constitutionally recognized as Cuba's only legal political party. The party monopolizes all government positions, including judicial offices. Though not a formal requirement, party membership is a de facto prerequisite for high-level official positions and professional advancement in most areas. A small number of non-party members have been permitted by the controlling Communist authorities to serve in the National Assembly. The Communist Party or one of its front organizations approves candidates for all elected offices. Citizens do not have the right to change their government.

In March 2003, the government carried out one of the most brutal crackdowns on peaceful opposition in the history of Cuba when it arrested 75 human rights activists, independent journalists and opposition figures on various charges, ranging from aiding a foreign power to violating national security laws. Authorities subjected the detainees to summary trials and sentenced them to prison terms ranging from 6 to 28 years. Amnesty International identified all 75 as "prisoners of conscience." As of August 2008, 55 of the original 75 prisoners remained incarcerated. See also the Department's Country Report on Human Rights Practices for Cuba.

Although the constitution allows legislative proposals backed by at least 10,000 citizens to be submitted directly to the National Assembly, in 2002 the government rejected a petition known as the Varela Project, supporters of which submitted 11,000 signatures calling for a national referendum on political and economic reforms. Many of the 75 activists arrested in March 2003 participated in the Varela Project. In October 2003, Project Varela organizers submitted a second petition to the National Assembly with an additional 14,000 signatures. Since April 2004, some prisoners of conscience have been released, 20 of whom were in the group of 75 and four of whom along with their families were exiled to Spain. All suffered from moderate to severe medical conditions and many of them continue to be harassed by state security even after their release from prison. In April 2008, a government-sponsored mob assaulted a group of Damas de Blanco (Women in White) who were peacefully demanding the release of political prisoners. The following month, the government broke up a dissident-led, symbolic funeral honoring the death Pedro Luis Boitel, a student activist.

Principal Government Officials

Last Updated: 11/12/08

Pres. of the Council of State: **Raul CASTRO Ruz, Gen.**
First Vice Pres. of the Council of State: **Jose Ramon MACHADO Ventura**
Vice Pres. of the Council of State: **Juan ALMEIDA Bosque**
Vice Pres. of the Council of State: **Julio CASAS Reguiero, Corps Gen.**
Vice Pres. of the Council of State: **Abelardo COLOME Ibarra, Corps Gen.**
Vice Pres. of the Council of State: **Carlos LAGE Davila**
Vice Pres. of the Council of State: **Esteban LAZO Hernandez**
Min. Sec. of the Council of State: **Jose M. MIYAR Barruecos**
Pres. of the Council of Ministers: **Raul CASTRO Ruz, Gen.**
First Vice Pres. of the Council of Ministers: **Jose Ramon MACHADO Ventura**
Vice Pres. of the Council of Ministers: **Osmani CIENFUEGOS Gorriaran**

Vice Pres. of the Council of Ministers: **Jose Ramon FERNANDEZ Alvarez**
Vice Pres. of the Council of Ministers: **Pedro MIRET Prieto**
Vice Pres. of the Council of Ministers: **Otto RIVERO Torres**
Vice Pres. of the Council of Ministers: **Jose Luis RODRIGUEZ Garcia**
Sec. of the Executive Committee of the Council of Ministers: **Carlos LAGE Davila**
Min. of Agriculture:
Min. of Auditing & Control: **Gladys Maria BEJERANO Portela**
Min. of Basic Industries: **Yadira GARCIA Vera**
Min. of Construction: **Fidel FIGUEROA de la Paz**
Min. of Culture: **Abel PRIETO Jimenez**
Min. of Domestic Trade: **Marino MURILLO Jorge**
Min. of Economy & Planning: **Jose Luis RODRIGUEZ Garcia**
Min. of Education: **Ena Elsa VELAZQUEZ Cobiella**
Min. of Finance & Prices: **Georgina BARREIRO Fajardo**
Min. of the Fishing Industry: **Alfredo LOPEZ Valdes**
Min. of the Food Industry: **Alejandro ROCA Iglesias**
Min. of Foreign Investment & Economic Cooperation: **Marta LOMAS Morales**
Min. of Foreign Relations: **Felipe PEREZ ROQUE**
Min. of Foreign Trade: **Raul DE LA NUEZ Ramirez**
Min. of Higher Education: **Juan VELA Valdes**
Min. of Information Science & Communication: **Ramiro VALDES Menendez**
Min. of Interior: **Abelardo COLOME Ibarra, Corps Gen.**
Min. of Justice: **Maria Esther REUS Gonzalez**
Min. of Labor & Social Security: **Alfredo MORALES Cartaya**
Min. of Light Industry: **Jose HERNANDEZ Bernardez**
Min. of Public Health: **Jose Ramon BALAGUER Cabrera**
Min. of the Revolutionary Armed Forces: **Julio CASAS Reguiero, Corps Gen.**
Min. of Science, Technology, & Environment:**.**
Min. of the Steelworking Industry: **Fernando ACOSTA Santana**
Min. of the Sugar Industry: **Ulises ROSALES del Toro**
Min. of Tourism: **Manuel MARRERO Cruz**
Min. of Transportation: **Jorge Luis SIERRA Cruz**
Min. Without Portfolio: **Ricardo CABRISAS Ruiz**
Attorney Gen.: **Juan ESCALONA Reguera**
Pres., Central Bank of Cuba: **Francisco SOBERON Valdes**
Permanent Representative to the UN, New York: **Rodrigo MALMIERCA Diaz**

NATIONAL SECURITY

Cuba is a highly militarized society. From 1975 until the late 1980s, massive Soviet military assistance enabled Cuba to upgrade its military capabilities and project power abroad. The tonnage of Soviet military deliveries to Cuba throughout most of the 1980s exceeded deliveries in any year since the military build-up during the 1962 missile crisis.

With the loss of Soviet-era subsidies in the early 1990s, Cuba's armed forces have shrunk considerably, both in terms of numbers and assets. Combined active duty troop strength for all three services is estimated at 50,000 to 55,000 personnel (compared to some 235,000 on active duty 10 years ago) and much of Cuba's weaponry appears to be in storage. Cuba's air force, once considered among the best equipped in Latin America, no longer merits that distinction, though it still possesses advanced aircraft and weapons systems; the navy has become primarily a coastal defense force with no blue water capability. The Cuban army is still one of the region's more formidable, but it also is much reduced and no longer has the considerable resources necessary to project power abroad.

The military plays a dominant role in the economy and manages a number of hotels in the tourist sector. The country's two paramilitary organizations, the Territorial Militia Troops and the Youth Labor Army, have a reduced training capability. Cuba also adopted a "war of the people" strategy that highlights the defensive nature of its capabilities. The government continues to maintain a large state security apparatus under the Ministry of Interior to repress dissent within Cuba, and in the last decade has formed special forces units to confront indications of popular unrest.

ECONOMY

The Cuban Government continues to adhere to socialist principles in organizing its state-controlled economy. Most of the means of production are owned and run by the government and, according to Cuban Government statistics, about 75% of the labor force is employed by the state. The actual figure is closer to 93%, with some 150,000 small farmers and another 150,000 "cuentapropistas," or holders of licenses for self-employment, representing a mere 2.1% of the nearly 4.87 million-person workforce.

The Cuban economy is still recovering from a decline in gross domestic product of at least 35% between 1989 and 1993 as the loss of Soviet subsidies laid bare the economy's fundamental weaknesses. To alleviate the economic crisis, in 1993 and 1994 the government introduced a few market-oriented reforms, including opening to tourism, allowing foreign investment, legalizing the dollar, and authorizing self-employment for some 150 occupations. These measures resulted in modest economic growth; the official statistics, however, are deficient and as a result provide an incomplete measure of Cuba's real economic situation. Living conditions at the end of the decade remained well below the 1989 level. Lower sugar and nickel prices, increases in petroleum costs, a post-September 11, 2001 decline in tourism, devastating hurricanes in November 2001 and August 2004, and a major drought in the eastern half of the island caused severe economic disruptions. Growth rates continued to stagnate in 2002 and 2003, while 2004 and 2005 showed some renewed growth. Moreover, the gap in the standard of living has widened between those with access to dollars and those without. Jobs that can earn dollar salaries or tips from foreign businesses and tourists have become highly desirable. It is not uncommon to see doctors, engineers, scientists, and other professionals working in restaurants or as taxi drivers.

The government of Raul Castro announced several initiatives designed to increase revenues to the Cuban state by formalizing some business activities which were previously conducted in informal and illegal markets. Even in doing so, the Cuban Government is seeking tighter state control over the economy. The Cuban Government is aggressively pursuing a policy of recentralization, making it increasingly difficult for foreigners to conduct business on the island. Likewise, Cuban citizens are adversely affected by reversion to a peso economy and the dual currency regime in which Cubans are paid in pesos, but many goods are sold in "convertible pesos," worth approximately 23 times the regular peso.

In his February 24, 2008, inaugural address, Raul Castro said the Cuban Government would "advance in an articulate, sound and well-thought out manner" a series of measures that would raise the Cuban standard of living and tie individual prosperity to individual initiative and work performance. Castro also referred to excess "prohibitions and regulations," the simplest of which the Cuban Government would start removing "in the next few weeks." More complex "reforms," he said, could only be introduced after changes to certain legal regulations. This followed Castro's July 26, 2007, speech on economic development, in which he asserted that tackling problems in milk production would address some of Cuba's main economic challenges. On July 12, 2008, Raul Castro placed caveats on many of these initiatives by noting that global economic factors may delay implementation, including for wage increases for Cubans. In his speech marking the 55th anniversary of the start of the Cuban revolution on July 26, 2008, Raul Castro further tamped down expectations for change by warning that the global economy could delay his economic adjustments.

Since February 24, Raul Castro's government has announced it would pursue the following initiatives: Expanding access to public land for private farmers; permitting some Cubans to own their homes, increasing wages and retirement pensions; raising the retirement age; upgrading public transportation systems and infrastructure; licensing private taxis to operate; limited deregulation of the construction industry; expanding access to certain previously restricted consumer goods (like cell phones, computers, microwaves, toasters, DVD players, motorcycles, air conditioners, electric ovens, and agricultural supplies and tools), consolidation and modernization of Cuba's family doctor program, and launching a new 24-hour television station to include mostly foreign-produced content. Many of these initiatives, if implemented, would authorize activities that are already underway in Cuba's informal economy.

Prolonged austerity and the state-controlled economy's inefficiency in providing adequate goods and services have created conditions for a flourishing informal economy in Cuba. As the variety and amount of goods available in state-run peso stores has declined, Cubans have turned increasingly to the black market to obtain needed food, clothing, and household items. Pilferage of items from the work place to sell on the black market or illegally offering services on the sidelines of official employment is common, and Cuban companies regularly figure 15% in losses into their production plans to cover this. Recognizing that Cubans must engage in such activity to make ends meet and that attempts to shut the informal economy down would be futile, the government concentrates its control efforts on ideological appeals against theft and shutting down large organized operations. A report by an independent economist and opposition leader speculates that more than 40% of the Cuban economy operates in the informal sector. Since 2005, the government has carried out a large anti-corruption campaign as it continues efforts to recentralize much of the economy under the regime's control.

Sugar, which has been the mainstay of the island's economy for most of its history, has fallen upon troubled times. In 1989, production was more than 8 million tons, but by the mid-1990s, it had fallen to around 3.5 million tons. Inefficient planting and cultivation methods, poor management, shortages of spare parts, and poor transportation infrastructure combined to deter the recovery of the sector. In June 2002, the government announced its intention to implement a "comprehensive transformation" of this declining sector. Almost half the existing sugar mills were closed, and more than 100,000 workers were laid off. The government has promised that these workers will be "retrained" in other fields, though it is unlikely they will find new jobs in Cuba's stagnant economy. Moreover, despite such efforts, the sugar harvest continued to decline, falling to 2.1 million tons in 2003, the smallest since 1933. According to government reports, the harvest was not much better in 2004 (2.3 million tons), and continued to slide in 2005 (1.3 million tons), 2006 (1.2 million tons), and 2007 (approximately 1 million tons). According to government projections, Cuba expects to meet domestic sugar demand in 2009 for the first time after a major restructuring in 2002.

Tourism figures prominently in the Cuban Government's plans for development, and a top official cast it as at the "heart of the economy." Havana devotes significant resources to building new tourist facilities and renovating historic structures for use in the tourism sector. Roughly 1.7 million tourists visited Cuba in 2001, generating about $1.85 billion in gross revenues; in 2003, the number rose to 1.9 million tourists, predominantly from Canada and the European Union (EU), generating revenue of $2.1 billion. In 2004, the number of tourists to Cuba crossed the 2 million mark (2.05 million), including the so-called "medical tourists" from other Latin American countries seeking medical treatment at Cuban facilities. Since 2004, the volume of tourists has remained relatively consistent, at 2.32 million (2005), 2.2 million (2006), and 2.1 million (2007). During the first quarter of 2008 there was a 15% increase in tourists compared to the first quarter of 2007, according to the Caribbean Tourism Organization.

According to the Cuban Ministry of the Basic Industry (MINBAS), nickel became the leading export and the top foreign exchange earner in 2007, valued at approximately $2.7 billion. Nickel extraction in 2007 was 2.2% higher than in 2006. The main market for nickel exports is China. Cuba produced between 75,000 and 76,000 tons of nickel in 2007. The Cuban Government predicted that nickel and cobalt production would reach a record 80,000 tons in 2008. Cuba's pharmaceutical industry generated $350 million in exports in 2007, ranking second in foreign sales behind nickel and ahead of traditional products such as tobacco, rum, and sugar.

Remittances also play a large role in Cuba's economy. Cuba does not publish accurate economic statistics, but academic sources estimate that remittances total from $600 million to $1 billion per year, with most coming from families in the United States. U.S. regulation changes announced in June 2004 allow remittances to be sent only to the remitter's immediate family; they cannot be remitted to certain Cuban Government officials and members of the Cuban Communist Party; and the total amount of family remittances that an authorized traveler may carry to Cuba is now $300, reduced from $3,000. (See also the Commission on Assistance to a Free Cuba report at www.cafc.gov, cited below.) The Cuban Government captures these dollar remittances by allowing Cuban citizens to shop in state-run "dollar stores," which sell food, household, and clothing items at a high mark-up averaging over 240% of face value.

Beginning in November 2004, the government mandated that U.S. dollars be exchanged for "convertible pesos"—a local currency that can be used in special shops on the island but has no value internationally—for a 10% charge. The 10% conversion fee disproportionately affects Cubans who receive remittances from relatives in the U.S.

To help keep the economy afloat, Cuba has actively courted foreign investment, which often takes the form of joint ventures with the Cuban Government holding half of the equity, management contracts for tourism facilities, or financing for the sugar harvest. A new legal framework laid out in 1995 allowed for majority foreign ownership in joint ventures with the Cuban Government. In practice, majority ownership by the foreign partner is nonexistent. Of the 540 joint ventures formed since the Cuban Government issued the first legislation on foreign investment in 1982, 397 remained at the end of 2002, and 287 at the close of 2005. Due in large part to the government's recentralization efforts, it is estimated that one joint venture and two small cooperative production ventures have closed each week since 2000. Responding to this decline in the number of joint ventures, a spokesperson for the Ministry of Foreign Investment explained that foreign investment is not a pillar of development in and of itself. Moreover, the hostile investment climate, characterized by inefficient and overpriced labor imposed by the Communist government, dense regulations, and an impenetrable bureaucracy, continue to deter foreign investment. Foreign direct investment flows decreased from $448 million in 2000 to $39 million in 2001 and were at zero in 2002. In July 2002, the European Union, through its embassies in Havana, transmitted to the Cuban Government a document that outlined the problems encountered in operating joint ventures in Cuba. Titled "The Legal and Administrative Framework for Foreign Trade and Investment by European Companies in Cuba," the paper noted the difficulty in obtaining such basic necessities as work and residence permits for foreign employees—even exit visas and drivers licenses. It complained that the Government of Cuba gave EU joint venture partners little or no say in hiring Cuban staff, often forced the joint venture to contract employees who were not professionally suitable, and yet reserved to itself the right to fire any worker at any time without cause. It noted administrative difficulties in securing financing and warned that "the difficulties of state firms in meeting their payment obligations are seriously threatening some firms and increasing the risk premium which all operators have to pay for their operations with Cuba." The Cuban Government offered no response.

Investors are also constrained by the U.S.-Cuban Liberty and Democratic Solidarity (Libertad) Act that provides sanctions for those who "traffic" in property expropriated from U.S. citizens. More than a dozen companies have pulled out of Cuba or altered their plans to invest there due to the threat of action under the Libertad Act.

In an attempt to provide jobs for workers laid off due to the economic crisis and bring some forms of black market activity into more controllable channels, the Cuban Government in 1993 legalized self-employment for some 150 occupations. This small private sector is tightly controlled and regulated. Set monthly fees must be paid regardless of income earned, and frequent inspections yield stiff fines when any of the many self-employment regulations are violated. Rather than expanding private sector opportunities, in recent years, the government has been attempting to squeeze more of these private sector entrepreneurs out of business and back to the public sector. Many have opted to enter the informal economy or black market, and others have closed. These measures reduced private sector employment from a peak of 209,000 to less than 100,000. Moreover, a large number of those people who nominally are self-employed in reality are well-connected fronts for military officials. No recent figures have been made available, but the Government of Cuba reported at the end of 2001 that tax receipts from the self-employed fell 8.1% due to the decrease in the number of these taxpayers. Since October 1, 2004, the Cuban Government no longer issues new licenses for 40 of the approximately 150 categories of self-employment, including for the most popular ones, such as private restaurants.

In June 2005, 2,000 more licenses were revoked from self-employed workers as a means to reassert government control over the economy

and to stem growing inequalities associated with self-employment. The licenses for self-employed workers were typically for service-oriented work, allowing the Cuban people to eke out a small living in an otherwise impoverished state. Moreover, workers in Cuba's tourist sector—at resorts where native Cubans are prohibited unless they are on the job—have been prohibited by a Ministry of Tourism regulation from accepting gifts, tips, or even food from foreigners, in a further attempt at increasing the tourist apartheid that exists on the island.

A 2004 UN Economic Commission on Latin America and the Caribbean (ECLAC) report recommended that Cuba "redesign the parameters of competition in the public, private and cooperative sectors [and] redefine the role of the state in the economy." It recommended more flexibility in self-employment regulations, property diversification, economic decentralization, and a role for the market. The Cuban Government, however, is today reversing the economic liberalization of the 1990s and re-centralizing its economy. Evidence of this is found in the decline in the number of firms participating in the perfeccionamiento empresarial, or entrepreneurial improvement (EI), program, which is based on capitalist management techniques. EI was instituted in the 1980s as a military-led pilot project, and in 1998, the Cuban Government extended it from military to civilian "parastatals," reportedly to foster capitalist competitiveness. At first, the government highlighted participating companies' achievements in cutting costs and boosting profitability and quality and suggested that the increased autonomy of state managers under EI was producing an efficient form of socialism with a strong link between pay and performance. However, many in the Communist Party, even Fidel Castro himself, resisted EI. Many of the original participants have since left the program and participating firms have seen little growth in revenue. The EI program has fallen far short of expectations and the Cuban Government no longer heralds its successes or its future prospects. In 2003 the Cuban Government also tightened foreign exchange controls, requiring that state companies hold money in convertible pesos and obtain special authorization from the central bank before making hard currency transactions. Practically speaking, this restricted companies from using the dollar for internal trade. Following this, in 2004 the government announced that all state entities must stop charging in U.S. dollars and charge only in pesos for any products and services not considered a part of a company's "fundamental social objective." It also recently implemented new requirements to channel imports through monopolistic Soviet-style wholesale distribution companies.

Cuba's precarious economic position is complicated by the high price it must pay for foreign financing. The Cuban Government defaulted on most of its international debt in 1986 and does not have access to credit from international financial institutions like the World Bank, which means Havana must rely heavily on short-term loans to finance imports, chiefly food and fuel. Because of its poor credit rating, an $11 billion hard currency debt, and the risks associated with Cuban investment, interest rates have reportedly been as high as 22%. In 2002, citing chronic delinquencies and mounting short-term debts, Moody's lowered Cuba's credit rating to Caa1—"speculative grade, very poor." Dunn and Bradstreet rate Cuba as one of the riskiest economies in the world.

HUMAN RIGHTS

Cuba's totalitarian regime controls all aspects of life through the Communist Party and its affiliated mass organizations, the government bureaucracy, and State Security Department. The latter is tasked with monitoring, infiltrating, and controlling the country's beleaguered human rights community. Despite having signed the International Covenant on Civil and Political Rights and the International Covenant on Economic, Social, and Cultural Rights in February 2008, Cuba ignores the obligations assumed in these treaties, continuing to commit serious abuses and denying its citizens the right to change their government. Cuba is also a signatory of the Universal Declaration of Human Rights and sits on the UN Human Rights Council, yet routinely arrests citizens who seek to exercise internationally recognized fundamental freedoms.

The government incarcerates people for their peaceful political beliefs or activities. The total number of political prisoners and detainees is unknown, because the government does not disclose such information and keeps its prisons off-limits to human rights organizations and international human rights monitors. There are an estimated 225 prisoners of conscience currently detained in Cuba in addition to as many as 5,000 people sentenced for "dangerousness."

The government places severe limitations on freedom of speech and press, as noted by international non-governmental organizations (NGOs) such as Reporters Without Borders. The constitution provides for freedom of speech and press insofar as views "conform to the aims of a socialist society." In March 2008, demonstrators distributing copies of the Universal Declaration of Human Rights were attacked by an orchestrated mob and later detained. Despite the government's decision to permit Cubans to purchase personal computers, access to the Internet is strictly controlled and given only to those deemed ideologically trustworthy; Internet restrictions were tightened further in March and April 2008 to block access by Cuban citizens to certain independent websites.

Freedom of assembly is not constitutionally guaranteed in Cuba. The law punishes unauthorized assembly of more than three persons. The government also restricts freedom of movement and prevents some citizens from emigrating because of their political views. Cubans need explicit "exit permission" from their government to leave their country, and

many people are denied exit permission by the Cuban Government, despite the fact that they have received travel documents issued by other countries.

Although Raul Castro has encouraged controlled forms of "constructive criticism," the Cuban Government continues to show little tolerance for unauthorized dissent. It often utilizes short-term detentions to break up peaceful marches and demonstrations. It sometimes harasses dissidents by directing militants from the Communist Party, the Communist Youth League, Committees for the Defense of the Revolution, the Federation of Cuban Women, the Association of Veterans of the Cuban Revolution, and other groups to stage public protests against the dissident, usually in front of his/her residence. These protests, called "acts of repudiation," involve the shouting of insults and the occasional use of violence. The events generate intense fear and are aimed at ostracizing and intimidating those who challenge the government's policies.

Prison conditions are harsh and life-threatening. Although physical torture is rare, cruel treatment of prisoners—particularly political prisoners and detainees—is common. Prison authorities frequently beat, neglect, isolate, and deny medical treatment to inmates. Authorities often deny family visits, adequate nutrition, exposure to sunshine, and pay for work. Overcrowding is rife.

The Cuban Government routinely violates international core labor standards. The law does not allow Cuban workers to form and join unions of their choice. The government-approved unions do not act as trade unions, promote worker rights or protect the right to strike; rather, they are geared toward ensuring that production goals are met. Some workers lose their jobs because of their political beliefs. Salaries are not high enough to meet food and clothing costs; consequently, many Cubans resort to small-scale embezzlement or pilfering from their employers.

FOREIGN RELATIONS

Cuba's once-ambitious foreign policy has been scaled back and redirected as a result of economic hardship and the end of the Cold War. Cuba aims to find new sources of trade, aid, and foreign investment and to promote opposition to U.S. policy, especially the trade embargo and the 1996 Libertad Act. Cuba has relations with over 160 countries and has civilian assistance workers—principally physicians and nurses—in more than 20 nations.

Since the end of Soviet backing, Cuba appears to have largely abandoned monetary support for guerrilla movements that typified its involvement in regional politics in Latin America and Africa, though it maintains relations with several guerrilla and terrorist groups and provides refuge for some of their members in Cuba. Cuba's support for Latin guerrilla movements, its Marxist-Leninist government, and its alignment with the U.S.S.R. led to its isolation in the hemisphere. Cuba is a member of the Organization of American States (OAS), although its present government has been excluded from participation since 1962 for incompatibility with the principles of the inter-American system. Cuba hosted the Non-Aligned Movement (NAM) summit in September 2006 and will hold the NAM presidency until 2009. In the context of the NAM and its ordinary diplomacy, Cuba has developed friendly relations with Iran, North Korea and other rogue states.

Throughout the 1970s and 1980s, Cuba expanded its military presence abroad, spending millions of dollars in exporting revolutions; deployments reached 50,000 troops in Angola, 24,000 in Ethiopia, 1,500 in Nicaragua, and hundreds more elsewhere. In Angola, Cuban troops, supported logistically by the U.S.S.R., backed the Popular Movement for the Liberation of Angola (MPLA) in its effort to take power after Portugal granted Angola its independence.

Cuban forces played a key role in Ethiopia's war against Somalia and remained there in substantial numbers as a garrison force for a decade. Cubans served in a non-combat advisory role in Mozambique and the Congo. Cuba also used the Congo as a logistical support center for Cuba's Angola mission. In the late 1980s, Cuba began to pull back militarily. Cuba unilaterally removed its forces from Ethiopia, met the timetable of the 1988 Angola-Namibia accords by completing the withdrawal of its forces from Angola before July 1991, and ended military assistance to Nicaragua following the Sandinistas' 1990 electoral defeat.

EU-Cuban diplomatic relations have suffered as a result of the March 2003 crackdown on dissidents. In June 2004, EU members imposed restrictive measures on Cuba including inviting dissidents to national day celebrations and suspending high-level meetings between EU members and the Cuban Government. In January 2005, though, the restrictions were suspended in an effort to re-engage the regime as a means of advancing the EU's policy of encouraging reform while preparing for the transition. The restrictive measures were formally dropped in June 2008, but the EU established a set of benchmarks to track the Cuban Government's performance on human rights.

Canada maintains a robust trade and investment relationship with Cuba, with a large presence by the Sherritt Corp. in nickel mining. Some Sherritt operations take place on property confiscated from American investors, subjecting officers of Sherritt to Libertad Act sanctions. Canada is also the source of the largest number of foreign tourists who visit Cuba each year.

Spain is among the most important foreign investors in Cuba. The ruling Zapatero government continues Spain's longstanding policy of encouraging further investment and trade with Cuba. Cuba imports more goods from Spain (almost 13% of total imports) than from any other country. Spanish economic involvement with Cuba is exclusively centered on joint venture enterprises that provide financial benefit to the Cuban Gov-

ernment through state-owned firms. Spain's desire to provide support to its business community often impedes its willingness to pressure the Cuban Government on political reform and human rights issues.

Cuba's bilateral relationship with Venezuela has helped keep the Cuban economy afloat. The "Integral Cooperation Accord" signed by Fidel Castro and Venezuelan President Hugo Chavez in October 2000 laid the groundwork for a quasi-barter exchange of Venezuelan oil for Cuban goods and services that has since become a lifeline for Cuba. For Cuba, the benefits of the cooperation accord are subsidized petroleum and increased hard currency flows. The original agreement allowed for the sale, at market prices, of up to 53,000 barrels per day of crude oil and derivatives (diesel, gasoline, jet fuel, etc.) by PDVSA, Venezuela's state-owned petroleum company, to its Cuban counterpart, CUPET. The number of barrels of oil Venezuela began selling to Cuba has risen to over 90,000 barrels daily. Under the accord, PDVSA extended preferential payment terms to CUPET, including 90-day short-term financing instead of the 30 days offered to its other customers and, in lieu of a standard letter of credit backed by an international bank, PDVSA accepted IOUs from Cuba's Banco Nacional, the central banking entity responsible for servicing Havana's foreign debt. In August 2001, Venezuelan President Hugo Chavez amended the 2000 accord to allow Venezuela to compensate the Cuban Government in hard currency for any and all Cuban products and services originally intended as in-kind payment for Venezuelan oil. As a result, Cuban exports of goods and services to Venezuela climbed from $34 million in 2001 to more than $150 million in 2003. Venezuelan ministries are contracting with Cuba for everything from generic pharmaceuticals to pre-fabricated housing and dismantled sugar mill equipment. On April 28, 2005, Chavez and Castro signed 49 economic agreements in Havana, covering areas as diverse as oil, nickel, agriculture, furniture, shoes, textiles, toys, lingerie, tires, construction materials, electricity, transportation, health, and education. Venezuela is also committed to sending more than $400 million in various products duty-free to Cuba and plans to open an office of state-owned commercial Venezuelan Industrial Bank (BIV) in Havana to finance imports and exports between the two countries, while Cuba will open an official Banco Exterior de Cuba in Caracas. Increased economic engagement along with the rapid growth in Cuban sales to Caracas has established Venezuela as one of the island's largest export markets.

A series of recent economic agreements between Cuba and China have strengthened trade between the two countries. Sino-Cuban trade totaled more than $525 million in 2004, according to China Customs statistics. This represents an increase of more than 47% over 2003. Most of China's aid involves in-kind supply of goods or technical assistance. During President Hu-Jintao's visit to Cuba in November 2004, China signed investment-related memorandums of understanding (MOUs) estimated at more than $500 million, according to press reports. If these MOUs are fully realized, they would represent a sharp increase in known Chinese investments in Cuba. In addition to these MOUs, a number of commercial accords were signed at the first-ever Cuba-China Investment and Trade Forum. China also plans to invest approximately $500 million in a nickel operation in Moa in the eastern province of Holguin. According to the MOU, Cuba will own 51% of the enterprise and Chinese-owned Minmetals the remaining 49%. Chinese and Venezuelan economic support, including investment and direct aid, have given Cuba the space to eliminate many of the tentative open market reforms Cuba put in place during the depth of its mid-1990s economic crisis.

The Russian prime minister visited Cuba in October 2006, signaling a new effort to expand trade and investment, albeit financed by Russian credit. Russia set aside, for the moment, more than U.S. $20 billion in Soviet-era debt, restructured post-1991 debt, and extended a new credit line to Cuba. The new credit line is for U.S. $355 million repayable over 10 years at an interest rate of 5%. The new credit is conditioned in that it must be used to purchase Russian cars, trucks, and planes, as well as to finance Cuban energy and transport infrastructure projects, including air navigation systems. Russia further agreed to restructure U.S. $166 million in debt accumulated since 1993. Both nations also signed an agreement on military equipment and technical services.

U.S.-CUBAN RELATIONS

On May 20, 2002, President Bush announced the Initiative for a New Cuba that called on the Cuban Government to undertake political and economic reforms and conduct free and fair elections for the National Assembly. The initiative challenged the Cuban Government to open its economy, allow independent trade unions, and end discriminatory practices against Cuban workers. President Bush made clear that his response to such concrete reforms would be to work with the U.S. Congress to ease the restrictions on trade and travel between the United States and Cuba. The Cuban Government did not enact any such reforms. Instead, elections for the National Assembly were held in January 2003, with 609 government-approved candidates running for 609 seats. That was followed by the March crackdown on members of civil society.

In October 2003, President Bush created the Commission for Assistance to a Free Cuba to help the Cuban people achieve the goal of a rapid, peaceful transition to democracy that is strongly supportive of fundamental political and economic freedoms. Its mandate is to identify additional measures to help bring an end to the dictatorship and to lay out a plan for effective and decisive U.S. assistance to a post-dictatorship Cuba, should such be requested by a free Cuba. The commission report outlines how the United States would be prepared to

help a free Cuba improve infrastructure and the environment; consolidate the transition and help build democracy; meet the basic needs of the Cuban people in health, education, housing, and social services; and create the core institutions of a free economy. These recommendations are not a prescription for Cuba's future, but an indication of the kind of assistance the United States and the international community should be prepared to offer a free Cuba.

The commission also sought a more proactive, integrated, and disciplined approach to undermine the survival strategies of the Castro regime and contribute to conditions that will help the Cuban people hasten the dictatorship's end. The recommendations focus on actions available to the United States Government, allowing it to establish a strong foundation on which to build supportive international efforts. This comprehensive framework is composed of six interrelated tasks considered central to hastening change: empowering Cuban civil society; breaking the Cuban Government's information blockade on the Cuban people; denying resources to the regime; illuminating the reality of Castro's Cuba to the rest of the world; encouraging international diplomatic efforts to support Cuban civil society and challenge the Castro regime; and finally, undermining the regime's "succession strategy."

The Commission released its latest report in July 2006 (www.cafc.gov) as well as the "Compact with the Cuban People." The Compact with the Cuban People is a message of hope from the United States to the people of Cuba and a clear statement of principles to reassure Cubans that the U.S. stands with them in their desire for freedom.

The Second Report of the Commission for Assistance to a Free Cuba (CAFC II) sets forth specific assistance and programs the United States can offer to advance freedom and democracy in Cuba. The recommendations include $80 million over the following two fiscal years to support these activities. Over the past decade, the regime has built an apparatus designed to exploit humanitarian aspects of U.S. policy, specifically to siphon off hundreds of millions of dollars for itself. To deny resources to the regime, U.S. law enforcement authorities have been directed to conduct "sting" operations against "mule" networks and others who illegally carry money and to offer rewards to those who report on illegal remittances that lead to enforcement actions; family visits to Cuba have been limited to one trip every 3 years under a specific license (individuals are eligible to apply for a specific license 3 years after their last visit to Cuba); and the current authorized per diem amount (the authorized amount allowed for food and lodging expenses for travel in Cuba) has been reduced from $164 per day to $50 per day (i.e., approximately eight times what a Cuban national would expect to earn during a 14-day visit) for all family visits to Cuba, based on the presumption that travelers will stay with family in Cuba.

U.S. policy also pursues a multilateral effort to press for democratic change by urging its friends and allies to actively promote a democratic transition and respect for human rights. The United States opposes consideration of Cuba's return to the OAS or inclusion in the Summit of the Americas process until there is a democratic Cuban Government. The United States has repeatedly made clear, however, that it is prepared to respond reciprocally if the Cuban Government initiates fundamental, systematic, democratic change and respect for human rights. Cuba is on the State Department's worldwide list of state sponsors of terrorism, and as a result is subject to additional sanctions.

All U.S. travel to Cuba must be licensed by the Department of Treasury's Office of Foreign Asset Control (OFAC), and must fall into one of ten categories. Further information on the licensing process can be obtained from OFAC or at their website. All exports to Cuba must also be licensed by the Commerce Department's Bureau of Industry and Security (BIS).

TRAVEL

Consular Information Sheet

November 7, 2008

Country Description: Cuba is a totalitarian police state, which relies on repressive methods to maintain control. These methods, including intense physical and electronic surveillance of Cubans, are also extended to foreign travelers. Americans visiting Cuba should be aware that any encounter with a Cuban could be subject to surreptitious scrutiny by the Castro regime's secret police, the General Directorate for State Security (DGSE). Also, any interactions with average Cubans, regardless how well intentioned the American is, can subject that Cuban to harassment and/or detention, and other forms of repressive actions, by state security elements. The regime is strongly anti-American yet desperate for U.S. dollars to prop itself up. The United States does not have full

diplomatic relations with Cuba, but provides consular and other services through the U.S. Interests Section in Havana. The U.S. Interests Section operates under the legal protection of the Swiss government but is not co-located with the Swiss Embassy.

Entry And Exit Requirements And Travel Transaction Limitations: The Cuban Assets Control Regulations are enforced by the U.S. Treasury Department and affect all U.S. citizens and permanent residents wherever they are located, all people and organizations physically in the United States, and all branches and subsidiaries of U.S. organizations throughout the world.

The Regulations require that persons subject to U.S. jurisdiction be licensed to engage in any travel-related transactions pursuant to travel to, from, and within Cuba. Transactions related to tourist travel are not licensable. This restriction includes tourist travel to Cuba from or through a third country such as Mexico or Canada.

U.S. law enforcement authorities have increased enforcement of these regulations at U.S. airports and preclearance facilities in third countries. Travelers who fail to comply with Department of Treasury regulations could face civil penalties and criminal prosecution upon return to the United States.

General licenses are granted to the following categories of travelers, and they are permitted to spend money for Cuban travel and to engage in other transactions directly incident to the purpose of their travel, without the need to obtain a specific license from the U.S. Treasury Department's Office of Foreign Assets Control (OFAC):

- Journalists and supporting broadcasting or technical personnel (regularly employed in that capacity by a news reporting organization and traveling for journalistic activities).
- Official government travelers on official business.
- Members of international organizations of which the United States is also a member (traveling on official business).
- Full-time professionals whose travel transactions are directly related to research in their professional areas, provided that their research: 1) is of a noncommercial, academic nature; 2) comprises a full work schedule in Cuba; and 3) has a substantial likelihood of public dissemination.
- Full-time professionals whose travel transactions are directly related to attendance at professional meetings or conferences in Cuba organized by an international professional organization, institution, or association that regularly sponsors such meetings or conferences in other countries. An organization, institution, or association headquartered in the United States may not sponsor such a meeting or conference unless it has been specifically licensed to sponsor it. The purpose of the meeting or conference cannot be the promotion of tourism in Cuba or other commercial activities involving Cuba, or to foster production of any bio-technological products.

Travelers who do not qualify for a general license may be eligible for a specific OFAC license if their travel falls under one of the following categories.

Specific Licenses to Visit Immediate Family Members in Cuba: OFAC will issue specific licenses authorizing travel-related transactions incident to one visit lasting no more than 14 days to immediate family members who are nationals of Cuba per three-year period. For those who emigrated to the United States from Cuba, and have not since that time visited a family member in Cuba, the three-year period will be counted from the date they left Cuba. For all others, the three-year period will be counted from the date they last left Cuba pursuant to the pre-existing family visit general license, or from the date their family visit specific license was issued. Travelers wishing to visit an immediate family member in Cuba who is authorized to be in Cuba, but is not a national of Cuba, may be granted a specific license in exigent circumstances provided that the U.S. Interests Section in Havana concurs in the issuance of such a license.

Specific Licenses for Educational Institutions: Specific licenses may be issued by OFAC to authorize travel transactions related to certain educational activities by students or employees at U.S. undergraduate or graduate institutions. Such licenses must be renewed after a period of one year. Once an academic institution has applied for and received such a specific license, the following categories of travelers affiliated with that academic institution are authorized to engage in travel-related transactions incident to the following activities without seeking further authorization from OFAC:

- Undergraduate or graduate students participating in a structured educational program lasting at least 10 weeks as part of a course offered at a U.S. undergraduate or graduate institution. Students planning to engage in such transactions must carry a letter from the licensed institution stating: 1) the institution's license number; 2) that the student is enrolled in an undergraduate or graduate degree program at the institution; and 3) that the travel is part of an educational program of that institution.
- Persons doing noncommercial Cuba-related academic research in Cuba for the purpose of qualifying academically as a professional (e.g., research toward a graduate degree). Students planning to engage in such transactions must carry a letter from the licensed institution stating: 1) the institution's license number; 2) that the student is enrolled in a graduate degree program at the institution; and 3) that the Cuba research will be accepted for credit toward that degree.

- Undergraduate or graduate students participating in a formal course of study lasting at least 10 weeks at a Cuban academic institution, provided that the Cuban study will be accepted for credit toward a degree at the licensed U.S. institution. A student planning to engage in such transactions must carry a letter from the licensed U.S. institution stating: 1) the institution's license number; 2) that the individual is a student currently enrolled in an undergraduate or graduate degree program, or a full-time permanent employee at the institution; and 3) that the Cuba-related travel is part of a structured educational program of that institution that will last at least 10 weeks.

- Persons regularly employed in a teaching capacity at a licensed U.S. undergraduate or graduate institution who plan to teach part or all of an academic program at a Cuban academic institution for at least 10 weeks. An individual planning to engage in such transactions must carry a letter from the licensed institution stating: 1) the institution's license number; and 2) that the individual is regularly employed by the licensed institution in a teaching capacity.

- Cuban scholars teaching or engaging in other scholarly activities at a licensed college or university in the United States. Licensed institutions may sponsor such Cuban scholars, including payment of a stipend or salary. The Cuban scholar may remit all such stipends or salary payments back to Cuba.

- Full-time employees of a licensed institution organizing or preparing for the educational activities described above. An individual engaging in such transactions must carry a letter from the licensed institution stating: 1) the institution's license number; and 2) that the individual is regularly employed by the institution.

Specific Licenses for Religious Organizations: Specific licenses may be issued by OFAC to religious organizations to authorize individuals affiliated with the organization to engage in travel transactions under the auspices of the religious organization. Applications by religious organizations for such licenses should include examples of the religious activities to be undertaken in Cuba. All individuals traveling pursuant to a religious organization's license must carry with them a letter from the licensed organization citing the number of the license and confirming that they are affiliated with the organization and that they are traveling to Cuba to engage in religious activities under the auspices of the organization.

Other Specific Licenses: Specific licenses may be issued by OFAC, on a case-by-case basis, authorizing travel transactions by the following categories of persons in connection with the following activities.

Humanitarian Projects and Support for the Cuban People—1) Persons traveling in connection with activities that are intended to provide support for the Cuban people, such as activities of recognized human rights organizations; and 2) Persons whose travel transactions are directly related to certain humanitarian projects in or related to Cuba that are designed to directly benefit the Cuban people. Licenses authorizing transactions for multiple trips over an extended period of time are available.

Free-Lance Journalism—Persons with a suitable record of publication who are traveling to Cuba to do research for a free-lance article. Licenses authorizing transactions for multiple trips over an extended period of time are available for applicants demonstrating a significant record of free-lance journalism.

Professional Research and Professional Meetings—Persons traveling to Cuba to do professional research or to attend a professional meeting that does not meet the requirements of the relevant general license (described above). Licenses authorizing transactions for multiple trips over an extended period of time are available.

Religious Activities—Persons traveling to Cuba to engage in religious activities that are not authorized pursuant to a religious organization's specific license. Licenses authorizing transactions for multiple trips over an extended period of time are available.

Public Performances, Athletic or Other Competitions, and Exhibitions—Persons traveling to participate in a public performance, athletic or other competition (that does not meet the requirements of the general license described above), or exhibition. The event must be open for attendance, and in relevant situations participation, by the Cuban public, and all profits from the event after costs must be donated to an independent nongovernmental organization in Cuba or a U.S.-based charity with the objective, to the extent possible, of benefiting the Cuban people.

Amateur or semi-professional athletes or teams traveling to participate in Cuba in an athletic competition held under the auspices of the relevant international sports federation. The athletes must have been selected for the competition by the relevant U.S. sports federation, and the competition must be one that is open for attendance, and in relevant situations participation, by the Cuban people.

Activities of Private Foundations or Research or Educational Institutions—Persons traveling to Cuba on behalf of private foundations or research or educational institutes that have an established interest in international relations to collect information related to Cuba for non-commercial purposes. Licenses authorizing transactions for multiple trips over an extended period of time are available.

Exportation, Importation, or Transmission of Information or Informational Materials—Persons traveling

to engage in activities directly related to the exportation, importation, or transmission of information or informational materials.

Licensed Exportation—Persons traveling to Cuba to engage in activities directly related to marketing, sales negotiation, accompanied delivery, or servicing of exports of health care products or other exports that may be considered for authorization under existing Department of Commerce regulations and guidelines with respect to Cuba or engaged in by U.S.-owned or controlled foreign firms.

Applying for a Specific License: Persons wishing to travel to Cuba under a specific license should send a letter specifying the details of the proposed travel, including any accompanying documentation, to the Licensing Division, Office of Foreign Assets Control, U.S. Department of the Treasury, 1500 Pennsylvania Ave, NW, Washington, DC 20220. Academic institutions wishing to obtain one of the two-year specific licenses described above should send a letter to the same address requesting such a license and establishing that the institution is accredited by an appropriate national or regional accrediting association. Religious organizations wishing to obtain one of the specific licenses described above should send a letter to the same address requesting such a license and setting forth examples of religious activities to be undertaken in Cuba.

The United States maintains a broad embargo against trading with Cuba, and most commercial imports from Cuba are prohibited by law. The sale of certain items, including medicine and medical supplies, and agricultural commodities have been approved for export by specific legislation. The Department of the Treasury may issue licenses on a case-by-case basis authorizing Cuba travel-related transactions directly incident to marketing, sales negotiation, accompanied delivery, and servicing of exports and re-exports that appear consistent with the licensing policy of the Department of Commerce. The sectors in which U.S. citizens may sell and service products to Cuba include agricultural commodities, medicine, and medical devices.

The Treasury Department will also consider requests for specific licenses for humanitarian travel not covered by the general license, educational exchanges (of at least 10 weeks in duration), and religious activities by individuals or groups affiliated with a religious organization. Unless otherwise exempted or authorized, any person subject to U.S. jurisdiction who engages in any travel-related transaction in Cuba violates the regulations. Failure to comply with Department of Treasury regulations may result in civil penalties and criminal prosecution upon return to the United States.

Additional information may be obtained by contacting:

Licensing Division
Office of Foreign Assets Control
U.S. Department of the Treasury
1500 Pennsylvania Avenue NW
Treasury Annex
Washington, DC 20220
Telephone (202) 622-2480
Fax (202) 622-1657
Internet users can log onto the web site at http://www.treas.gov/offices/enforcement/ofac.

Should a traveler receive a license, a valid passport is required for entry into Cuba. The Cuban government requires that the traveler obtain a visa prior to arrival. Attempts to enter or exit Cuba illegally, or to aid the irregular exit of Cuban nationals or other persons, are contrary to Cuban law and are punishable by stiff jail terms. Entering Cuban territory, territorial waters or airspace (within 12 miles of the Cuban coast) without prior authorization from the Cuban government may result in arrest or other enforcement action by Cuban authorities.

Immigration violators are subject to prison terms ranging from four years for illegal entry or exit to as many as 30 years for aggravated cases of alien smuggling. For current information on Cuban entry and customs requirements, travelers should contact:

Cuban Interests Section (an office of the Cuban government)
2630 16th Street NW
Washington, DC 20009
Telephone (202) 797-8518
Fax (202) 797-8521

Consular Section
(part of Cuban Interests Section)
2639 16th Street NW
Washington, DC 20009
Telephone (202) 797-8609/8610/8615
Fax (202) 986-7283

In an effort to prevent international child abduction, many governments have initiated procedures at entry/exit points. These often include requiring documentary evidence of relationship and permission for the child's travel from the parent(s) or legal guardian not present. Having such documentation on hand, even if not required, may facilitate entry/departure.

The Cuban Air Force shot down two U.S.-registered civilian aircraft in international airspace in 1996. As a result of this action, the President of the United States and the Federal Aviation Administration (FAA) issued an "Emergency Cease and Desist Order and Statement of Policy," which allows for vigorous enforcement action against U.S.-registered aircraft that violate Cuban airspace. Additional information is available through the FAA's web site at http://www.intl.faa.gov.

In addition to the appropriate general or specific license, aircraft and vessels seeking to travel to Cuba must obtain a temporary sojourn license from the Department of Commerce. Temporary sojourn licenses are not available for pleasure boaters. Additional information is available at http://www.bis.doc.gov.

Pursuant to an Executive Order issued after the 1996 shoot-down incident, boaters departing south Florida ports with the intention of entering Cuban territorial waters also must obtain permission in advance from the U.S. Coast Guard. The U.S. Coast Guard provides automated information at 1-800-582-5943.

Safety and Security: In May 2007, three Cuban military recruits were arrested after a firefight with Cuban police on the tarmac of Terminal 2 of Jose Martí International Airport. The heavily armed conscripts were attempting to hijack one of the planes at the terminal, which handles special charter flights between Havana and Miami. While this was the first attempted hijacking in several years, in November 2002 and in the first few months of 2003 there were numerous hijack attempts against aircraft and ocean-going vessels, several of which involved the use of weapons. Cuban authorities failed in their efforts to prevent two of these attempts. U.S. citizens, although not necessarily targets, may be caught up in any violence during an attempted hijacking. Accordingly, U.S. citizens should exercise caution when traveling in Cuba.

The United States Government has publicly and repeatedly announced that any person who hijacks (or attempts to hijack) an aircraft or vessel (whether common carrier or other) will face the maximum penalties pursuant to U.S. law, regardless of that person's nationality. In Cuba, hijackers will be sentenced to lengthy prison terms at a minimum, and may be subject to the death penalty; on April 11, 2003, the Government of Cuba executed three suspected hijackers, nine days after taking them into custody.

The waters around Cuba can be dangerous to navigate. Several U.S. boaters run aground in Cuba each year. U.S. boaters who have encountered problems that required repairs in Cuba have found repair and salvage services to be more expensive than comparable services in the U.S. or elsewhere in the Caribbean; for example, docking fees of up to ten dollars an hour have been reported. Cuban authorities typically hold boats as collateral for payment. The quality of repairs in Cuba is frequently not up to U.S. standards. Repairs take significantly longer in Cuba than they would in the U.S. due to lack of materials and bureaucratic impediments. Boaters are often confined to their boats while repairs are made; some boaters have been imprisoned while Cuban authorities investigate the circumstances of their entry to Cuba. The ability of the U.S. Interests Section to assist in such situations is extremely limited.

The transfer of funds from the U.S. to Cuba to pay for boat repair and salvage is subject to restrictions codified in U.S. law relating to commercial transactions with the Government of Cuba. A Treasury license is required for such payments and applicants should be prepared to provide documentary evidence demonstrating the emergency nature of the repairs.

For the latest security information, Americans traveling abroad should regularly monitor the Department of State, Bureau of Consular Affairs' web site at http://travel.state.gov, where the current Travel Warnings and Travel Alerts, as well as the Worldwide Caution, can be found.

For the latest security information, Americans traveling abroad should regularly monitor the Department's web site, where the current Worldwide Caution Travel Alert, Travel Warnings and other Travel Alerts can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S., or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: Crime statistics are significantly under-reported by the Cuban government. Although crime against American and other foreign travelers in Cuba has generally been limited to pick pocketing, purse snatching, or the taking of unattended items, the U.S. Interests Section has received increased reports of violent assaults against individuals in connection with robberies. In cases of violent crime, Americans should not resist if confronted, as perpetrators are usually armed with a knife or machete and often work with partners.

Pick pocketings and purse snatchings usually occur in crowded areas such as markets, beaches, and other gathering points, including Old Town Havana and the Prado neighborhood. Travelers should use caution in all such areas and are advised not to leave belongings unattended, nor to carry purses and bags loosely over one's shoulder. Visitors should avoid wearing flashy jewelry or displaying large amounts of cash. When possible, visitors should carry a copy of their passport with them and leave the original at a secure location. U.S. visitors should also beware of Cuban jineteros, or street "jockeys," who specialize in swindling tourists. While most jineteros speak English and go out of their way to appear friendly, e.g. by offering to serve as tour guides or to facilitate the purchase of cheap cigars, many are in fact professional criminals who will not hesitate to use violence in their efforts to acquire tourists' money and other valuables.

Thefts of property from air travelers' baggage have become increasingly common. All travelers should ensure that valuables remain under their personal control at all times, and are never put into checked baggage.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the U.S. Interests Section. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the American Citizen Services office of the U.S. Interests Section for assistance.

The staff in this office can, for example, assist you in finding appropriate medical care, facilitate contact with family members or friends in the U.S., and explain how funds could be transferred from the U.S. to Cuba.

Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

Medical Facilities and Health Information: Medical care does not meet U.S. standards. While medical professionals are generally competent, many health facilities face shortages of medical supplies and bed

space. Many medications are unavailable so travelers to Cuba should bring with them any prescribed medicine in its original container and in amounts commensurate with personal use. Travelers may also consider bringing additional amounts of prescribed medicines and over-the-counter remedies in the event that a return to the U.S. is delayed for unforeseen reasons. A copy of the prescription and a letter from the prescribing physician explaining the need for prescription drugs facilitates their entry into the country.

Travelers to the Havana area should be aware that U.S. and other foreign visitors are generally limited to using only the "tourist" Cira Garcia Hospital located in the Miramar neighborhood of Havana. Treatment at Cira Garcia and any other medical consultation would require that U.S. travelers pay in cash.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's web site at http://wwwn.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith/en.

Medical Insurance: No medical facility in Cuba will accept U.S.-issued insurance cards and medical services must be paid for in cash. The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below regarding traffic safety in Cuba is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

Driving is on the right-hand side of the road; speed limits are sometimes posted and generally respected. Passengers in automobiles are generally required to wear seatbelts and a recent law requires all motorcyclists to wear helmets.

Reports suggest that accidents involving motor vehicles are now the leading cause of accidental death in Cuba. Many accidents involve motorists striking pedestrians or bicyclists. Drivers found responsible for accidents resulting in serious injury or death are subject to prison terms of up to 10 years, and Cuban authorities may prohibit drivers of rental cars who are involved in accidents from leaving the country until all claims associated with an accident are settled. Additionally, the U.S. Interests Section notes that mere witnesses to vehicular accidents may not be permitted to leave Cuba until an investigation into the accident has been completed. Taxis are available in busy commercial and tourist areas; radio-dispatched taxis are generally clean and reliable. Travelers should be aware that licensed taxis available near hotel areas are often driven by DGSE agents or the drivers report to the DGSE, as part of the regime's efforts to follow the activities of foreign visitors. Travelers should not accept rides in unlicensed taxis as they may be used by thieves to rob passengers. Buses designated for tourist travel, both between and within cities, generally meet international standards for both cleanliness and safety. Public buses used by Cubans, known as "guaguas" or "camellos," are crowded, unreliable and havens for pickpockets. These public buses will usually not offer rides to foreign visitors.

Although popular with tourists, the three-wheeled, yellow-hooded "Co-Co" taxis are highly unsafe and should be avoided. "Co-Co" taxis are modified motorcycles that reach speeds of up to 40 mph, but have no seat belts or other safety features. Although the main arteries of Havana are generally well-maintained, secondary streets often are not. Many roads and city streets are unlit, making night driving dangerous, especially as some cars and most bicycles lack running lights or reflectors. Street signage tends to be insufficient and confusing. Many Cuban cars are old, in poor condition and lack turn signals and other standard safety equipment. Drivers should exercise extreme care.

The principal Cuban east-west highway is in good condition but lacks lights and extends only two-thirds of the way from Havana to the eastern tip of the island. The extension of that highway on to the east is in poor condition in many areas, with washed out sections and deep potholes. Night driving should be strictly avoided outside urban areas. Secondary rural roads are narrow, and some are in such bad condition as to be impassable by cars. Due to the rarity of cars on rural roads, pedestrians, bicycles, horse-drawn carts, and farm equipment operators wander onto the roads without any regard to possible automobile traffic. Unfenced livestock constitute another serious road hazard.

Rental car agencies provide roadside assistance to their clients as a condition of the rental contract. Cuban authorities may prohibit drivers of rental cars who are involved in accidents from leaving the country, even if they are injured and require medical evacuation, until all claims associated with an accident are settled. Travelers should not permit unauthorized persons to drive the rental vehicle. Automobile renters are provided telephone numbers to call in Havana or in other places where they might be motoring; agencies generally respond as needed with tow trucks and/or mechanics.

A similar service is available to foreigners resident in Cuba who insure cars with the National Insurance Company.

Aviation Safety Oversight: As there is no direct scheduled commer-

cial air service between the United States and Cuba, the U.S. Federal Aviation Administration (FAA) has not assessed Cuba's Civil Aviation Authority for compliance with International Civil Aviation Organization (ICAO) aviation safety standards. For more information, travelers may visit the FAA's web site at http://www.faa.gov.

The U.S. Interests Section has instructed its employees and official visitors to avoid domestic or international travel on Cuban air carriers, including the Cuban flag carrier Cubana de Aviación, whenever possible due to serious concerns regarding Cuba's ability to meet international safety and security oversight standards and its long history of hijackings, including the incidents noted above. Americans considering travel on any Cuban airline may wish to defer their travel or pursue an alternative means of transportation.

Special Circumstances: Photographing military or police installations or personnel, or harbor, rail, and airport facilities is forbidden.

Dual Nationality: The Government of Cuba does not recognize the U.S. nationality of U.S. citizens who are Cuban-born or are the children of Cuban parents. These individuals will be treated solely as Cuban citizens and may be subject to a range of restrictions and obligations, including military service. The Cuban government may require U.S. citizens, whom the Government of Cuba considers to be Cuban, to enter and depart Cuba using a Cuban passport. Using a Cuban passport for this purpose does not jeopardize one's U.S. citizenship; however, such persons must use their U.S. passports to enter and depart the United States. In some instances, dual nationals may be required to obtain exit permission from the Cuban government in order to return to the United States. There have been cases of Cuban-American dual nationals being forced by the Cuban government to surrender their U.S. passports. Despite these restrictions, Cuban-American dual nationals who fall ill may only be treated at hospitals for foreigners (except in emergencies). Cuban-American dual nationals should be especially wary of any attempt by Cuban authorities to compel them to sign "repatriation" documents. The Government of Cuba views a declaration of repatriation as a legal statement on the part of the dual national that she/he intends to resettle permanently in Cuba. In several instances, the Government of Cuba has seized the U.S. passport of dual nationals signing declarations of repatriation and has denied these individuals permission to return to the United States.

Consular Access: U.S. citizens are encouraged to carry a copy of their U.S. passport with them at all times, so that, if questioned by local officials, proof of identity and U.S. citizenship is readily available. The original should be kept in a secure location, preferably in a safe or locked suitcase.

Cuba does not recognize the right or obligation of the U.S. Government to protect Cuban-born American citizens, whom the Cuban government views as Cuban citizens only. Cuban authorities consistently refuse to notify the U.S. Interests Section of the arrest of Cuban-American dual nationals and deny U.S. consular officers access to them. They also withhold information concerning their welfare and treatment.

Currency: Since November 2004, the U.S. dollar has not been accepted for commercial transactions. U.S. issued debit and credit cards are also not accepted in Cuba. The Cuban government requires the use of convertible Cuban pesos ("chavitos") for all transactions. The current exchange rate for convertible Cuban pesos (CUC) is 1 CUC: 1.20 USD.

Cuba-Related Travel Transactions: Only persons whose travel falls into the categories mentioned above may be authorized to spend money related to travel to, from, or within Cuba. Persons traveling to Cuba to visit immediate family members (a "member of the immediate family" is defined as a spouse, child, grandchild, parent, grandparent, or sibling of the remitter or that remitter's spouse, as well as any spouse, widow or widower of any of the foregoing) pursuant to a specific-license may spend no more than $50 per day on non-transportation-related expenses in Cuba, and up to an additional $50 per trip to pay for transportation-related expenses in Cuba. Persons licensed to engage in other travel-related transactions in Cuba may spend up to the State Department Travel Per Diem Allowance for Havana, Cuba, for purchases directly related to travel in Cuba, such as hotel accommodations, meals, local transportation, and goods personally used by the traveler in Cuba. Most licensed travelers may also spend additional money for transactions directly related to the activities for which they received their license. For example, journalists traveling in Cuba under the journalism general license (described above) may spend money over and above the current per diem for extensive local transportation, the hiring of cable layers, and other costs that are directly related to covering a story in Cuba. Purchases of services unrelated to travel or a licensed activity, such as non-emergency medical services, are prohibited. The purchase of publications and other information materials is not restricted.

Sending or Carrying Money to Cuba: U.S. persons aged 18 or older may send to members of the remitter's immediate family in Cuba or to a Cuban national in a third country "family" cash remittances of up to $300 per household in any consecutive three-month period, provided that no member of the household is a prohibited official of the Government of Cuba or a prohibited member of the Cuban Communist Party. (The term "prohibited official of the Government of Cuba" means: Ministers and Vice-Ministers, members of the Council of State, and the Council of Ministers; members and employees of the National Assembly of People's Power; members of any provincial assembly; local sector chiefs of the Committees for the Defense of the Revolution; Director Generals and sub-Director Generals and higher of all Cuban ministries and state agencies; employees of the Ministry of the Inte-

rior (MININT); employees of the Ministry of Defense (MINFAR); secretaries and first secretaries of the Confederation of Labor of Cuba (CTC) and its component unions; chief editors, editors, and deputy editors of Cuban state-run media organizations and programs, including newspapers, television, and radio; and members and employees of the Supreme Court (Tribuno Supremo Nacional).

The term "prohibited members of the Cuban Communist Party" means: members of the Politburo, the Central Committee, Department Heads of the Central Committee; employees of the Central Committee; and secretaries and first secretaries of the provincial Party central committees.) No more than a combined total of $300 of family remittances may be sent by a remitter to any one household in any consecutive three-month period, regardless of the number of members of the remitter's immediate family residing in that household. A licensed traveler may carry up to $300 of his own family remittances to Cuba.

U.S. persons also may send up to $1,000 per payee on a one-time basis as an "emigration-related" remittance to a Cuban national to enable the payee to emigrate from Cuba to the United States. Specifically, up to $500 may be remitted to a Cuban national prior to the payee's receipt of a valid U.S. visa or other U.S. immigration document, and up to $500 may be remitted to the Cuban national after the payee receives a valid U.S. visa or other U.S. immigration document. A licensed traveler may only carry immigration remittances to Cuba if the visa has already been issued.

Remittances must be transferred through an OFAC-licensed depository institution or remittance forwarder. These OFAC-licensed entities originating transfers on behalf of non-aggregating customers must obtain an affidavit from the remitter certifying that each family remittance does not exceed $300 in any consecutive three-month period and that each emigration-related remittance meets the requirement of the Regulations. Remitters can expect to have their identity, date of birth, address, and telephone number verified.

U.S. citizens and permanent resident aliens are prohibited from using credit cards in Cuba. U.S. credit card companies do not accept vouchers from Cuba, and Cuban shops, hotels and other places of business do not accept U.S. credit cards. Neither personal checks nor travelers' checks drawn on U.S. banks are accepted in Cuba.

Exportation of Accompanied Baggage: Authorized travelers to Cuba are limited to 44 pounds of accompanied baggage per traveler unless a specific license from OFAC or the Department of Commerce's Bureau of Industry and Security authorizes a higher amount.

What Can Be Brought Back: If U.S. travelers return from Cuba with Cuban origin goods, such goods, with the exception of informational materials, may be seized at Customs' discretion. Cuban cigars and rum are routinely confiscated at U.S. ports of entry. The fact that Cuban cigars and rum are purchased in a "duty free" shop at the Havana Airport does not exempt them from seizure by US customs. There are no limits on the import or export of informational materials. Such materials, for example books, films, tapes and CDs, are statutorily exempt from regulation under the embargo and may be transported freely. However, blank tapes and CDs are not considered informational materials and may be seized.

Fair Business Practices: Anyone authorized by the U.S. Department of the Treasury to provide Cuban travel services or services in connection with sending money to Cuba is prohibited from participating in the discriminatory practices of the Cuban government against individuals or particular classes of travelers. The assessment of consular fees by the Cuban government, which are applicable worldwide, is not considered to be a discriminatory practice. However, requiring the purchase of services not desired by the traveler is not permitted. Persons wishing to provide information to the U.S. Treasury Department regarding arbitrary fees, payments for unauthorized purposes, or other possible violations furnished to the U.S. Treasury Department will be handled confidentially.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offences. Persons violating Cuba's laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Cuba are severe, and convicted offenders can expect long jail sentences and heavy fines. Those accused of drug-related and other crimes face long legal proceedings and delayed due process. In one recent drug arrest, two American citizens were sentenced to terms of 25 and 30 years. In another recent criminal case, the accused was detained for more than 18 months without a trial.

Criminal penalties are also harsh for foreigners or dual nationals suspected of assisting Cuban migrants who attempt to leave Cuba illegally. Average jail sentences for individuals charged with migrant smuggling range from 10 to 20 years. In a recent case, a U.S. citizen was arrested for attempting to facilitate the illegal departure of his Cuban family members via raft. He was charged with migrant smuggling and faces a jail sentence of up to 15 years.

Cuba's Law of Protection of National Independence and the Cuban Economy contains a series of measures aimed at discouraging contact between foreign nationals and Cuban citizens. These measures are aimed particularly at the press and media representatives, but may be used against any foreign national coming into contact with a Cuban. The law provides for jail terms of up to 30 years in aggravated cases. U.S. citizens traveling in Cuba are subject to

this law, and they may unwittingly cause the arrest and imprisonment of any Cuban with whom they come into contact.

For more information, please contact the U.S. Interests Section's American Citizens Services Unit at:

U.S. Interests Section
American Citizen Services Unit
Calzada, entre L y M
Vedado, Havana, Cuba
Phone: 53-7-833-3551 (through 3559)
Fax: 53-7-833-1653

Engaging in sexual conduct with children (persons under the age of 18) or using or disseminating child pornography in a foreign country is a crime, prosecutable in both the United States and Cuba.

Children's Issues: Cuba does not allow adoption of children by U.S. citizens. Additionally, children who maintain both Cuban and U.S. citizenship are considered to be Cuban citizens by the Government of Cuba because dual nationality is not recognized. Consequently, it is often difficult for U.S. consular officers to ascertain the welfare and whereabouts of U.S. citizen children living with their Cuban parents or relatives. In the event of a custody dispute, the American parent may need to pursue a legal hearing in Cuba with the assistance of a Cuban attorney. The U.S. Interests Section can provide a list of attorneys practicing in the Havana area to interested parties.

For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://adoption.state.gov.

Registration: The U.S. Interests Section (USINT) represents American citizens and the U.S. Government in Cuba, and operates under the legal protection of the Swiss government. The Interests Section staff provides the full range of American citizen consular services. U.S. citizens who travel to Cuba are encouraged to contact and register with USINT's American Citizen Services section. U.S. citizens who register at the U.S. Interests Section in Havana may obtain updated information on travel and security within the country. There is no access to the U.S. Naval Base at Guantanamo Bay from within Cuba.

The U.S. Embassy in Kingston, Jamaica handles consular issues for Guantanamo Bay. For further information on Guantanamo Bay, please contact the U.S. Embassy in Kingston at telephone (876) 929-5374.

The U.S. Interests Section is located in Havana at Calzada between L and M Streets, Vedado; telephone (537) 833-3551 through 833-3559. Hours are Monday through Thursday, 8:00 a.m. to 4:30 p.m., and Friday, 8:00 a.m. to 3:30 p.m. For emergency assistance after hours and on weekends, individuals should call (537) 833-3026 or (535) 280-5791 and request to speak with the duty officer.

USINT staff members provide briefings on U.S.-Cuba policy to American individuals and groups visiting Cuba. These briefings or meetings can be arranged through USINT's Public Diplomacy office.

International Parental Child Abduction

November 2008

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *International Parental Child Abduction* section of this book and review current reports online at www.travel.state.gov/childabduction

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is provided for general information only. Questions involving interpretation of specific foreign laws should be addressed to foreign legal counsel.

General Information: Cuba is not a party to the Hague Convention on the Civil Aspects of International Child Abduction, nor are there any international or bilateral treaties in force between Cuba and the United States dealing with international parental child abduction.

American citizens who travel to Cuba place themselves under the jurisdiction of local courts. American citizens planning a trip to Cuba with dual national children should bear this in mind.

Custody Disputes: In Cuba, if parents are legally married they share the custody of their children. If they are not married and the parents cannot reach an agreement, custody is granted by the courts in the best interests of the child. Foreign court orders are not automatically recognized.

Enforcement of Foreign Judgments: Custody orders and judgments of foreign courts are not enforceable in Cuba.

Visitation Rights: In cases where one parent has been granted custody of a child, the other parent is usually granted visitation rights.

If a custodial parent fails to allow visitation, the non-custodial parent may appeal to the court.

Dual Nationality: Dual nationality is not recognized under Cuban law.

Travel Restrictions: Cuban citizen children (including dual nationals) are required to have exit visas to depart Cuba.

Criminal Remedies: For information on possible criminal remedies, please contact your local law enforcement authorities or the nearest office of the Federal Bureau of Investigation (FBI). Information is also available on the Internet at the web site of the U.S. Department of Justice, Office of Juvenile Justice and Delinquency Prevention (OJJDP) at http://www.ojjdp.ncjrs.org.

Persons who wish to pursue a child custody claim in a Cuban court should retain an attorney in Cuba.

The U.S. Interests Section at the Embassy of Switzerland in Cuba maintains a list of attorneys willing to represent American clients. A copy of this list may be obtained by requesting one from the U.S. Interests Section of the Embassy at:

Embassy of Switzerland
U.S. Interests Section
Calzada between L & M Streets
Vedado
Havana
Cuba
Telephone: 011-53-7-33-3551/59
Fax: 011-53-7-33-3700
Web site: www.usembassy. state.gov

Questions involving Cuban law should be addressed to a Cuban attorney or to the Cuban Interests Section of the Embassy of Switzerland in the United States at:

Embassy of Switzerland
Cuban Interests Section
2630 16th Street, NW
Washington, DC 20009
Telephone: (202) 797-8518

For further information on international parental child abduction, contact the Office of Children's Issues, U.S. Department of State at 1-888-407-4747 or visit its web site on the Internet at http://travel.state.gov.

Intercountry Adoption

November 2006

The U.S. Interest Section in Havana has been advised that Cuban law does not allow for intercountry adoption. Adoptions of Cuban children are reserved for adoptive parents who are Cuban citizens.

Dual nationality is also not recognized under Cuban law. The U.S. Interest Section in Havana has issued no immigrant visas to Cuban orphans for a at least the past five fiscal years.

CYPRUS

Compiled from the October 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Republic of Cyprus

PROFILE

Geography

Area: 9,251 sq. km. (3,572 sq. mi.); about the size of Connecticut.
Cities: Capital—Nicosia (pop. 197,800, 2000 fig.). Other cities—Limassol, Larnaca, Famagusta, Paphos, Kyrenia, Morphou.
Terrain: Central plain with mountain ranges to the north and south.
Climate: Mediterranean with hot, dry summers and cool, wet winters.

People

Nationality: Noun and adjective—Cypriot(s).
Population: (2007 est.) government-controlled area 788,000; area administered by Turkish Cypriots 260,819.
Annual population growth rate: (2007 est.) government-controlled area: 1.2%; area administered by Turkish Cypriots: 1.3%
Ethnic groups: (1960 census) Greek (77%), Turkish (18%), Armenian and other (4%).
Religions: Greek Orthodox, Muslim, Maronite, Roman Catholic, Armenian Orthodox.
Languages: Greek, Turkish, English.
Education: Years compulsory—6 in elementary; 3 in high school. Attendance—almost 100%. Literacy—about 99%.
Health: Infant mortality rate—7.04/1,000. Life expectancy—77 yrs.; males 75 yrs.; females 80 years.
Work force: Government-controlled area (2007), 379,900: agriculture and mining—8.5%; industry and construction—20.5%; and services—71.0%. Turkish Cypriot-administered area (2006), 91,815: agriculture—11.0%; industry and construction—38.3%; and services—72.2%.

Government

Type: Republic.
Independence: August 16, 1960.
Constitution: August 16, 1960.
Government branches: Executive—President elected to 5-yr. term. Legislative—unicameral House of Representatives, members elected to 5-yr. terms. Judicial—Supreme Court; six district courts.
Political subdivisions: Six.
Political parties: Greek Cypriots—Progressive Party of Working People or Anorthotikon Komma Ergazomenou Laou—AKEL (communist); Democratic Party or Dimokratikon Komma—DIKO (center-right); Democratic Rally or Dimokratikos Synagermos—DISY (right); Movement for Social Democracy or Eleftheron Dimokratikon—EDEK (socialist); United Democrats or Enomeni Dimokrates—ED (center-left). Turkish Cypriots—National Unity Party or Ulusal Birlik Partisi—UBP (right); Democrat Party or Demokrat Partisi—DP (center-right); Republican Turkish Party or Cumhuriyetci Turk Partisi—CTP (center-left); Freedom and Reform Party or Free Party—Ozgurluk ve Reform Partisi—OP (center-right); Peace and Democracy Movement or Baris ve Demokrasi Hareketi—BDH (center-left); Communal Liberation Party or Toplumcu Kurtulus Partisi—TKP (center-left); New Party or Yeni Parti; Communal Democracy Party or Toplumcu Demokrasi Partisi—TDP.
Suffrage: Universal at age 18.

Economy

Section refers to the government-controlled area unless otherwise specified.
GDP: (2007) $20.98 billion.
Annual GDP real growth rate: (2007) government-controlled area: 3.8%.
Per capita GDP income: Greek Cypriots (2007)—$26,652; Turkish Cypriots (2007)—$13,133.
Agriculture and natural resources: (2007) 3.1% of GDP. Products—potatoes and other vegetables, citrus fruits, olives, grapes, wheat, carob seeds. Resources—pyrites, copper, asbestos, gypsum, lumber, salt, marble, clay, earth pigment.
Industry and construction: (2006) 19.2% of GDP. Types—mining, cement, construction, utilities, manufacturing, chemicals, non-electric

machinery, textiles, footwear, food, beverages, tobacco.

Services and tourism: (2007) 18.6% of GDP. Types—mining, cement, construction, utilities, manufacturing, chemicals, non-electric machinery, textiles, footwear, food, beverages, tobacco.

Trade: (2007) Exports—$1,494 billion: citrus, grapes, wine, potatoes, pharmaceuticals, clothing, and footwear. Major markets—EU (especially the U.K. and Greece), Middle East, Russia. Imports—$7,274 billion: consumer goods, raw materials for industry, petroleum and lubricants, food and feed grains. Major suppliers—Greece, Italy, Germany, U.K. (U.S. trade surplus—for 2007: $100.5 million.)

PEOPLE AND HISTORY

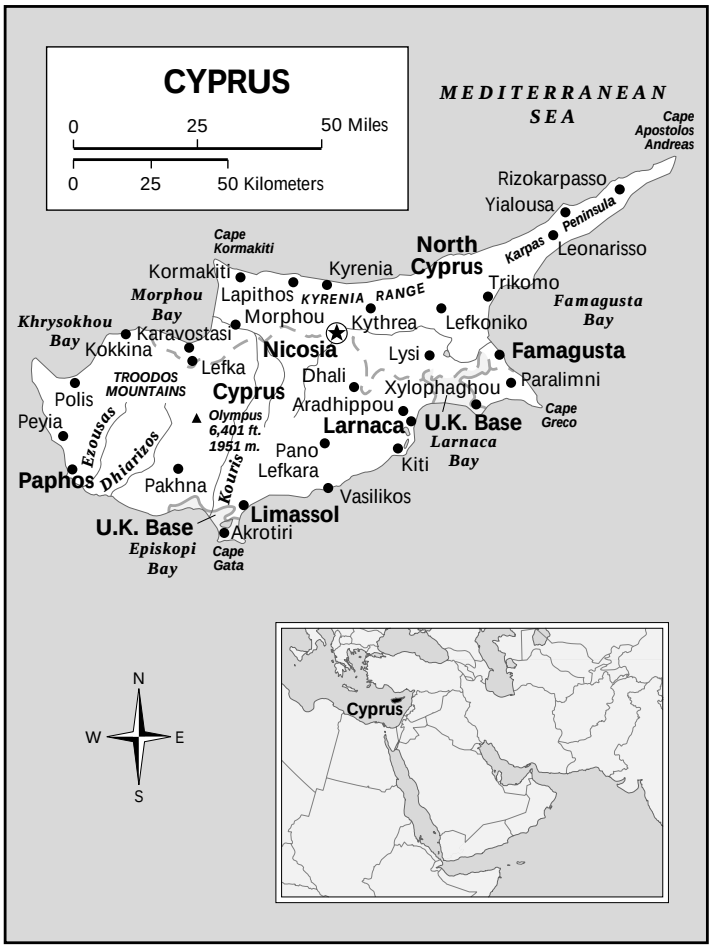
Since 1974, Cyprus has been divided de facto into the government-controlled two-thirds of the island and the remaining one-third of the island, which is administered by Turkish Cypriots. Greek and Turkish Cypriots share many customs but maintain distinct identities based on religion, language, and close ties with their respective "motherlands." Greek is predominantly spoken in the south, Turkish in the north. English is widely used. Cyprus has a well-developed system of primary and secondary education. The majority of Cypriots earn their higher education at Greek, Turkish, British, and other European or American universities. Both the Greek Cypriot and Turkish Cypriot communities have developed private colleges and state-supported universities.

Human settlement on Cyprus stretches back nearly eight millennia and by 3700 BC, the island was a crossroads between East and West. The island fell successively under Assyrian, Egyptian, Persian, Greek, and Roman domination. For 800 years, beginning in 364 AD, Cyprus was ruled by Byzantium. After brief possession by King Richard I (the Lion-Hearted) of England during the Crusades, the island came under Frankish control in the late 12th century. It was ceded to the Venetian Republic in 1489 and conquered by the Ottoman Turks in 1571. The Ottomans applied the millet system to Cyprus, which allowed religious authorities to govern their own non-Muslim minorities. This system reinforced the position of the Orthodox Church and the cohesion of the ethnic Greek population. Most of the Turks who settled on the island during the three centuries of Ottoman rule remained when control of Cyprus—although not sovereignty—was ceded to Great Britain in 1878. Many left for Turkey during the 1920s, however. The island was annexed formally by the United Kingdom in 1914 at the outbreak of World War I and became a crown colony in 1925.

Cyprus gained its independence from the United Kingdom and established a constitutional republic in 1960, after an anti-British campaign by the Greek Cypriot EOKA (National Organization of Cypriot Fighters), a guerrilla group that desired political union, or enosis, with Greece. Archbishop Makarios, a charismatic religious and political leader, was elected president.

Shortly after the founding of the republic, serious differences arose between the two communities about the implementation and interpretation of the constitution. The Greek Cypriots argued that the complex mechanisms introduced to protect Turkish Cypriot interests were obstacles to efficient government. In November 1963, President Makarios advanced a series of constitutional amendments designed to eliminate some of these special provisions. The Turkish Cypriots opposed such changes. The confrontation prompted widespread intercommunal fighting in December 1963, after which Turkish Cypriots ceased to participate in the government. Following the outbreak of intercommunal violence, many Turkish Cypriots (and some Greek Cypriots) living in mixed villages began to move into enclaved villages or elsewhere. UN peacekeepers were deployed on the island in 1964. Following another outbreak of intercommunal violence in 1967-68, a Turkish Cypriot provisional administration was formed.

In July 1974, the military junta in Athens sponsored a coup led by extremist Greek Cypriots against the government of President Makarios, citing his alleged pro-communist leanings and his perceived abandonment of enosis. Turkey, citing the 1960 Treaty of Guarantee, intervened militarily to protect Turkish Cypriots.



In a two-stage offensive, Turkish troops took control of 38% of the island. Almost all Greek Cypriots fled south while almost all Turkish Cypriots fled north. Since the events of 1974, UN peacekeeping forces have maintained a buffer zone between the two sides. Except for occasional demonstrations or infrequent incidents between soldiers in the buffer zone, the island was free of violent conflict from 1974 until August 1996, when violent clashes led to the death of two demonstrators and escalated tension. The situation has been quiet since 1996.

GOVERNMENT

Since 1974, Cyprus has been divided de facto into the government-controlled two-thirds of the island and the Turkish Cypriot-administered one-third. The Government of the Republic of Cyprus has continued to be the only internationally recognized authority; in practice, its authority extends only to the government-controlled area.

The 1960 Cypriot constitution provided for a presidential system of government with independent executive, legislative, and judicial branches, as well as a complex system of checks and balances, including a weighted power-sharing ratio designed to protect the interests of the Turkish Cypriots.

The executive, for example, was headed by a Greek Cypriot president and a Turkish Cypriot vice president, elected by their respective communi-

ties for 5-year terms, and each possessing a right of veto over certain types of legislation and executive decisions. The Greek Cypriot-controlled Republic of Cyprus retains most elements of the presidential system of government expressed in the constitution, although it has cited the Turkish Cypriots' "withdrawal from government" and the "law of necessity" to enact structural changes that allow "effective governance."

Following the 1974 hostilities, the Turkish Cypriots set up their own institutions in the area they administered with an elected "president" and a "prime minister" responsible to the "National Assembly" exercising joint executive powers. In 1983, the Turkish Cypriots declared an independent "Turkish Republic of Northern Cyprus" ("TRNC"). The United States does not recognize the "TRNC," nor does any country other than Turkey.

POLITICAL CONDITIONS

Historically, none of the Greek Cypriot parties has been able to elect a president by itself or dominate the 56-seat House of Representatives. The 165,000 Greek Cypriot refugees from the area now administered by Turkish Cypriots are a potent political force, along with the independent Orthodox Church of Cyprus, which has some influence in secular as well as religious matters. In February 2008, Demetris Christofias defeated incumbent Tassos Papadopoulos and challenger Ioannis Kassoulides in two rounds of voting to become the first AKEL president of the Republic of Cyprus. All major parties hold seats in the National Council, the top advisory board to the president on Cyprus settlement issues.

Parliamentary elections last took place in May 2006. AKEL emerged the leading party, garnering 31% of votes cast, with DISY a close second with 30%; each is represented in parliament by 18 MPs. Other parties represented in parliament include DIKO (11 seats), EDEK (5), EUROKO (3) and the Greens (1).

Mehmet Ali Talat was elected in April 2005 as leader of the Turkish Cypriot community (as the so-called "President of the TRNC"), replacing longtime nationalist leader Rauf Denktash. Talat's political rise was due largely to his support of the UN Settlement Plan for Cyprus (the "Annan Plan"), which Rauf Denktash opposed, but which was supported by a majority of Turkish Cypriots in a 2004 referendum. Talat's political allies in the Republican Turkish Party (CTP) currently hold 25 of the 50 seats in the "TRNC National Assembly," and have had to establish a series of coalitions, the latest one formed with the Freedom and Reform Party (Free Party, OP), with CTP leader Soyer as "PM" and OP party leader Turgay Avci as "Deputy Prime Minister" and "Foreign Minister."

Attempts To Achieve a Cyprus Settlement

The first UN-sponsored negotiations to develop institutional arrangements acceptable to both communities began in 1968; several sets of negotiations and other initiatives followed. Turkish Cypriots focus on bizonality, security guarantees, and political equality between the two communities. Greek Cypriots emphasize the rights of movement, property, settlement, and the return of territory. Turkish Cypriots favor a loose grouping of two nearly autonomous societies living side by side with limited contact. Greek Cypriots envision a more integrated structure.

The last major UN-led effort to deliver a Cyprus solution commenced in January 2002 with Secretary General Kofi Annan orchestrating direct talks between the Greek and Turkish Cypriot community leaders. Nine months later Annan released a comprehensive settlement proposal,

informally called "the Annan Plan". Intensive efforts were made to gain both sides' support for the plan prior to the December 2002 European Union (EU) Summit in Copenhagen, where member states would determine the island's future status vis-a-vis the union. Neither side agreed to the Annan Plan before the summit.

UN-sponsored talks continued following Copenhagen. In February 2003, Tassos Papadopoulos was elected president of the Republic of Cyprus. A year later, President Papadopoulos and then-Turkish Cypriot leader Rauf Denktash resumed negotiations on the Annan Plan. A comprehensive settlement package was put to both sides in simultaneous referenda on April 24, 2004. Sixty-five percent of Turkish Cypriots endorsed the Annan Plan, but a larger majority of Greek Cypriots (76%) voted "no." The Secretary General later suspended his Good Offices Mission. Nonetheless, the EU invited the Republic of Cyprus (with Cyprus still divided) to join; the Republic of Cyprus became a full member on May 1, 2004, with the EU's acquis communautaire suspended in the area administered by Turkish Cypriots. In 2008, the EU started work on harmonization of T/C "laws" and practices with twelve chapters of the aquis in the event of a solution and reunification.

For two years following the Annan Plan referenda, the island saw little progress toward reunification. However, Under Secretary for Political Affairs Ibrahim Gambari, in his July 2006 visit to Cyprus, succeeded in securing commitment from both sides to commence exploratory talks, and on July 8, community leaders President Papadopoulos and Mr. Talat and met for the first time since 2004. They agreed to a UN-brokered negotiating framework that envisioned the establishment of technical committees to tackle everyday life issues and expert working groups to discuss substantive matters. Following his election in February 2008, President Demetris Christofias pledged to renew settlement efforts through UN auspices. President Christofias met Mr. Talat on March 21 to discuss the formation of 13 working groups and technical committees which were to meet for a fixed period prior to the commencement of full-fledged negotiations. The committees met through July and on July 25 the two leaders announced the decision to commence negotiations beginning in September. The talks began on September 3 with the focus on governance and power sharing. As of October 2008, negotiations are ongoing.

Bi-Communal Contact, Crossing Procedures

In April 2003, then-leader of the Turkish Cypriots Denktash relaxed many restrictions on individuals crossing between the two communities leading to relatively unimpeded bi-communal contact for the first time since 1974. Since the relaxation, there have been nearly 12,000,000 buffer zone crossings in both directions. Under the current regulations, Greek Cypriots must present identity documents to cross to the area administered by Turkish Cypriots, something many are reluctant to do. They are able to drive their personal vehicles in the area administered by Turkish Cypriots, provided they first obtain a policy from a Turkish Cypriot insurance provider. Turkish Cypriots are permitted to cross into the government-controlled area upon presentation of a Turkish Cypriot ID card or other identity documentation acceptable to Republic of Cyprus authorities. They must also obtain car insurance from an insurer in the government-controlled area to drive their personal vehicles there.

Until recently, visitors choosing to arrive at non-designated airports and seaports in the area administered by Turkish Cypriots were not allowed to cross the United Nations-patrolled "green line" to the government-controlled area. In June of 2004, however, Cypriot authorities implemented new EU-related crossing regulations that allowed Americans (and citizens of most other countries) to cross freely regardless of their port of entry into Cyprus. Visitors arriving in the government-controlled area are normally able to cross the green line without hindrance, although on occasion difficulties are encountered at both the Greek Cypriot and Turkish Cypriot checkpoints. The Government of Cyprus considers ports in the area administered by Turkish Cypriots to be illegal. Policy and procedures regarding such travel are subject to change.

Principal Government Officials

Last Updated: 11/12/08

Pres.: **Demetris CHRISTOFIAS**
Min. of Agriculture, Natural Resources, & Environment: **Michalis POLYNIKIS**

Cyprus maintains an embassy in the United States at 2211 R Street NW, Washington, DC 20008 (tel. 202-462-5772) and a Consulate General in New York City. Cyprus also maintains a trade center at 13 East 40th Street, New York, NY 10016 (tel. 212-686-6016). Turkish Cypriots maintain offices in Washington (tel. 202-887-6198) and at the Republic of Turkey's Mission to the United Nations.

ECONOMY

Cyprus has an open, free-market, services-based economy with some light manufacturing. Cyprus' accession as a full member to the European Union as of May 1, 2004, has been an important milestone in its recent economic development. The Cypriots are among the most prosperous people in

the Mediterranean region. Internationally, Cyprus promotes its geographical location as a "bridge" between three continents, along with its educated English-speaking population, moderate local costs, good airline connections, and telecommunications.

In the past 20 years, the economy has shifted from agriculture to light manufacturing and services. Currently, agriculture makes up only 3.1% of the GDP and employs 8.5% of the labor force. Industry and construction contribute 18.6% and employ 20.5% of the labor force. The services sector, including tourism, contributes 78.3% to the GDP and employs 71.0% of the labor force. In recent years, the services sector, and financial services in particular, have provided the main impetus for growth, while the traditional growth sector, tourism, has leveled off. Manufactured goods account for 58.5% of domestic exports, while potatoes and citrus constitute the principal export crops. The island has few proven natural resources. Trade is vital to the Cypriot economy and most goods are imported. The trade deficit increased in 2007, reaching $5.8 billion. Cyprus must import fuels, food, most raw materials, heavy machinery, and transportation equipment. More than 67% of its imports come from the European Union, particularly Greece, Italy and the United Kingdom, while 1.2% come from the United States.

GNP growth rates have gradually begun to decline as the Cypriot economy has matured over the years. The average rate of growth went from 6.1% in the 1980s, to 4.4% in the 1990s to 3.6% from 2000 to 2007. In the last couple of years (2006 and 2007) growth has remained fairly strong at around 3.8% and 4.2%, respectively and is forecast to remain so for 2008, albeit the financial turmoil of the last months has caused estimates of 2008 growth to be reduced to 3%. Inflation had remained in check up until 2007 (less than 2.5%) but it surged to around 4.8% in 2008. Cyprus has the third-lowest unemployment rate in the EU27 at around 3.9%. Public finances have also improved considerably in recent years. The fiscal deficit, which had peaked at 6.3% of GDP in 2003, was gradually eliminated by 2006. A fiscal surplus of 3.3% of GDP took its place in 2007, likely to be followed by a 1.0% surplus in 2008. Concurrently, the public debt declined from 65.2% in 2006, to around 60% of GDP in 2007, and is forecast to drop further to 49% in 2008.

These developments helped pave the way for the Euro, which replaced the Cyprus Pound as Cyprus' national currency as of January 1, 2008. Joining the Eurozone was a major accomplishment for the Cypriot economy, resulting in such benefits as a higher degree of price stability, lower interest rates, reduction of currency conversion costs and exchange rate risk, and increased competition through greater price transparency. The final conversion exchange rate between the Cypriot pound and the Euro was one Euro per 0.585274 Cyprus pounds. The following website offers additional information on the mechanics of Cyprus's adoption of the Euro: http://www.euro.cy.

Investment Climate

In the run-up to EU accession (May 1, 2004), Cyprus dismantled most investment restrictions, attracting increased flows of Foreign Direct Investment (FDI), particularly from the EU. Cyprus has good business and financial services, modern telecommunications, an educated labor force, good airline connections, a sound legal system, and a low crime rate. Cyprus' geographic location, tax incentives and modern infrastructure also make it a natural hub for companies looking to do business with the Middle East, Eastern Europe, the former Soviet Union, the European Union, and North Africa. As a result, Cyprus has developed into an important regional and international business center. According to the latest United Nations Conference on Trade and Development (UNCTAD) "World Investment Report 2008," Cyprus ranks among the world's leading countries per capita in terms of attracting FDI. Non-EU investors (both natural and legal persons) may now invest freely in Cyprus in most sectors, either directly or indirectly (including all types of portfolio investment in the Cyprus Stock Exchange). The only exceptions concern primarily the acquisition of property and, to a lesser extent, restrictions on investment in the sectors of tertiary education, banking, and mass media.

In 2007, the inflow of FDI reached $2.17 billion, compared with $1.82 billion in 2006. The geographic origin of new investment in 2007 was primarily the EU, with 61.0% of the total, followed by non-EU countries in Europe with 34.4%. In terms of sectoral allocation, incoming FDI in 2007 went to the following sectors: manufacturing 1%; construction 3.0%; trade and repairs 24.9%; transport and communication 3.7%; financial intermediation 14.8%; real estate and business activities 47.6%; and other services 4.6%.

The flow of U.S. investment in Cyprus reached $37.4 million in 2007 or 1.7% of Cyprus' total inward FDI. The stock of U.S. investment in the island was $338.4 million at the end of 2007. Projects involving U.S. investment in recent years have included a well-known U.S. coffee retailing franchise, a university, an information technology firm, an equestrian center, a hair products manufacturing unit, a firm trading in health and natural foodstuffs, and a financial services company. U.S. investors may benefit from Cyprus's abolition of EU-origin investment restrictions, provided they operate through EU subsidiaries.

European Union (EU)

Along with the Czech Republic, Estonia, Hungary, Latvia, Lithuania, Malta, Poland, Slovakia, and Slovenia, the Republic of Cyprus entered the EU on May 1, 2004. The EU acquis communautaire is suspended in the area administered by Turkish Cypriots pending a Cyprus settlement.

Export Opportunities

Best prospects for U.S. firms generally lie in services, high technology

sectors, such as computer equipment and data processing services, financial services, environmental protection technology, medical and telecommunications equipment, desalination and water purification equipment and services, and tourism development projects such as casinos, marinas, and golf courses. Moreover, alternative energy sources and the energy sector in general, are attracting an increasing amount of attention, while the possible existence of natural gas and petroleum reserves off the southern and eastern coast of Cyprus opens up new prospects. U.S. food franchises and apparel licensors are also finding fertile ground for expansion in Cyprus.

Trade Between Cyprus and the United States

The U.S. Embassy in Nicosia sponsors a popular pavilion for American products at the annual Cyprus International State Fair and organizes other events to promote U.S. products throughout the year. The U.S. runs a significant trade surplus with Cyprus, on the order of $100.6 million in 2006 (exports of $111.0 million versus imports of $10.5 million—according to Republic of Cyprus statistics).

Principal U.S. goods exports to Cyprus include office machines and data processing equipment; electrical appliances; optical, measuring, and medical equipment; tobacco and cigarettes; passenger cars; and wheat. Principal U.S. imports from Cyprus consist of dairy products, fresh fish, and mineral substances.

Bilateral business ties also encompass a healthy exchange in services. In 2007, the inflow of services (from the United States to Cyprus) was $749.1 million, against an outflow (from Cyprus to the United States) of $275.7 million, according to Republic of Cyprus statistics.

Turkish Cypriot Economy

The economy of the Turkish Cypriot-administered area is dominated by the services sector including the public sector, trade, tourism and education, with smaller agriculture and light manufacturing sectors. The economy operates on a free-market basis, although it continues to be handicapped by the political isolation of Turkish Cypriots, the lack of private and public investment, high freight costs, and shortages of skilled labor. Despite these constraints, the Turkish Cypriot economy turned in an impressive performance from 2003 to 2006, with estimated growth rates of 13.2% in 2006, 13.5% in 2005, 15.4% in 2004, and 11.4% in 2003. This pattern was overturned in 2007, when the economy reportedly shrank by 2.5%. Negative growth is expected again in 2008 as the construction sector continued to contract and tourism from countries other than Turkey declined The economy in recent years has been fuelled by the relative stability of the Turkish Lira, the employment of around 6,000 Turkish Cypriots in the Greek Cypriot economy where wages are significantly higher, and by a boom in the education and construction sectors. In 2007, the services sector accounted for 78.5% of GDP, industry and construction accounted for 14.6% of GDP, and agriculture 7.0%, according to Turkish Cypriot statistics. The partial lifting of travel restrictions between the two parts of the island in April 2003 has allowed movement of persons—over 12 million crossings to date—between the two parts of the island with no significant interethnic incidents.

Turkey remains, by far, the main trading partner of the area administered by Turkish Cypriots, supplying 65% of imports and absorbing around 50% of exports. In a landmark case, the European Court of Justice (ECJ) ruled on July 5, 1994 against the British practice of importing produce from the area based on certificates of origin and phytosanitary certificates granted by "TRNC" authorities. The ECJ decision resulted in a considerable decrease of Turkish Cypriot exports to the EU—from $36.4 million (or 66.7% of total Turkish Cypriot exports) in 1993 to $12.9 million in 2006 (or 19% of total exports). In August 2004, new EU rules allowed goods produced or substantially transformed in the area administered by Turkish Cypriots to be sold duty-free to consumers in the government-controlled area and through that area to the rest of the EU. To qualify, goods must also meet EU sanitary/phytosanitary requirements. Animal products are excluded from this arrangement. In May 2005, Turkish Cypriot authorities adopted a new regulation "mirroring" the EU rules and allowing certain goods produced in the government-controlled areas to be sold in the area administered by Turkish Cypriots. (However, suppliers cannot legally transport imported products over the green line in either direction.) Despite these efforts, direct trade between the two communities remains limited.

The EU continues to be the second-largest trading partner of the area administered by Turkish Cypriots, with a 17.9% share of total imports and 18.9% share of total exports. Total imports increased to $1.3 billion in 2006, while total exports remained at $68 million. Imports from the U.S. reached $9.8 million in 2006, while exports to the U.S. were less than $100,000.

Assistance from Turkey is crucial to the Turkish Cypriot economy. Under the latest economic protocol (signed in 2006), Turkey undertakes to provide Turkish Cypriots financial assistance totaling 1.875 billion New Turkish Lira (YTL—roughly $1.34 billion) over a three-year period (600 million YTL in 2007, 625 million YTL in 2008 and 650 million YTL in 2009). Turkey also provides millions of dollars annually in the form of low-interest loans to mostly Turkish entrepreneurs in support of export-oriented industrial production and tourism.

Total stock Turkish assistance to Turkish Cypriots since 1974 is estimated to have exceeded $4 billion.

FOREIGN RELATIONS

The Republic of Cyprus aligns itself with European positions within the EU's Common Foreign and Security Policy. Cyprus has long identified

with the West in its cultural affinities and trade patterns, and maintains close relations with Greece. Since 1974, the foreign policy of the Republic of Cyprus has sought the withdrawal of Turkish forces and the most favorable constitutional and territorial settlement possible. This campaign has been pursued primarily through international forums such as the United Nations. Turkey does not recognize the Republic of Cyprus.

The Republic of Cyprus enjoys close relations with many countries, including Greece, Russia, China, France, Israel, Egypt, Lebanon, and other countries in the region. Cyprus is a member of the United Nations and most of its agencies, as well as the World Trade Organization, the World Bank, International Monetary Fund, Council of Europe and the British Commonwealth. In addition, the government has signed the Multilateral Investment Guarantee Agency Agreement (MIGA).

U.S.-CYPRUS RELATIONS

The United States regards the status quo on Cyprus as unacceptable. Successive administrations have viewed UN-led inter-communal negotiations as the best means to achieve a fair and permanent settlement.

The United States is working closely with Cyprus in the war on terrorism. A Mutual Legal Assistance Treaty, which has been in force since September 18, 2002, facilitates bilateral cooperation. Cyprus also signed a Proliferation Security Initiative Ship Boarding Agreement with the United States on July 25, 2005, which reinforces bilateral counter-terrorism cooperation. The United States has channeled more than $300 million in assistance to the two communities since the mid-1970s. The United States now provides approximately $15 million annually to reduce tensions and promote peace and cooperation between the two communities. In 2004, following the Annan Plan process, the U.S. appropriated an additional $30.5 million to assist economic development in the Turkish Cypriot community, aiming to reduce the economic costs of any future settlement.

TRAVEL

Consular Information Sheet

June 27, 2008

Country Description: Since 1974, Cyprus, a developed Mediterranean island nation, has been divided de facto into a government-controlled area comprising the southern two-thirds of the island, and a northern third, (the self-declared "Turkish Republic of Northern Cyprus"), administered by Turkish Cypriots. The United States does not recognize the " Turkish Republic of Northern Cyprus" nor does any country other than Turkey. Facilities for tourism in Cyprus are highly developed. Cyprus joined the European Union in 2004.

Entry Requirements: A passport is required for travel to Cyprus. A visa is not required for a stay of up to 90 days. For longer stays, a visa or residence permit is required. U.S. citizens should be mindful that the Government of Cyprus does not recognize the residence permits issued by Turkish Cypriot authorities for the portions of the island under Turkish Cypriot administration. The Government of Cyprus does not issue residency permits to individuals who live in the areas outside government control. On occasion, Americans who resided in the area administered by Turkish Cypriots for more than 90 days without a Republic of Cyprus residence permit have been detained by officials at Larnaca airport and denied entry into the government-controlled area. They also may be subject to prosecution.

For further information on entry requirements for Cyprus, travelers can contact the Embassy of the Republic of Cyprus at 2211 R Street NW, Washington, DC 20008-4082, tel. (202) 462-5772, or the Cypriot Consulate in New York at 13 East 40th St., 5th Floor, New York, NY 10016, tel. (212) 686-6016/17. Visit the Embassy of Cyprus' web site at http://www.cyprusembassy.net for the most current visa information.

Safety and Security: Do not, under any circumstances, attempt to enter the U.N. buffer zone at any place other than a designated crossing point. This area is mined and militarized. Never photograph military installations or anything that could be perceived as being of security interest (especially in the area administered by Turkish Cypriots). Pay particular attention to areas marked with "no photography" signs. Police on both sides strictly enforce these restrictions.

For the latest security information, Americans traveling abroad should

regularly monitor the Department's Internet web site where the current Worldwide Caution Travel Alert, Travel Warnings and Travel Alerts can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S., or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: The crime rate in Cyprus is low but rising. Visitors in urban areas should take the normal precautions they would take in a large city. Americans frequenting bars should avoid so -called "cabarets" which sometimes employ women brought to Cyprus for sexual exploitation. These establishments can also present foreign patrons with grossly inflated bar tabs, threatening those customers who refuse to pay.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you in finding appropriate medical care, contacting family members or friends, and explaining how funds can be transferred. Although the investigation and prosecution of a crime in Cyprus is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed. The local equivalent to the "911" emergency line in Cyprus is 199 or 112. Emergency assistance is available in the area administered by Turkish Cypriots by calling 155.

Medical Facilities and Health Information: Medical care is available at both government hospitals and private clinics. Emergency rooms offer adequate care to stabilize patients, most of whom are then transferred to private hospitals. Many of the private-sector doctors have been trained in the United Kingdom or the United States. While fees are generally lower than those in the United States, medical supplies are often more expensive. Paramedics do not staff ambulances. The standard of medical care in the area administered by Turkish Cypriots is improving but still falls below that found in the government-controlled area. The World Health Organization considers Cyprus to be one of the healthiest areas of the Mediterranean. Water supplies are potable, and the refuse collection/sewage disposal system is adequate. Communicable diseases such as typhoid are rare. Respiratory ailments and allergies are sometimes exacerbated by the dry and dusty climate.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's site at http://wwwn.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith/en.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Cyprus is provided for general reference only, and it may not be totally accurate in a particular location or circumstance.

In recent years Cyprus has ranked among the top three countries in Europe, on a per capita basis, in traffic fatalities. Speeding, tailgating, overtaking, and the running of caution lights are commonplace and major causes of accidents. Emergency assistance is available in the Republic of Cyprus by calling 112 or 199. There are few public buses and no rail lines. Taxis are widely available. Traffic moves on the left side of the road, British style, and modern motorways link the major cities. Secondary roads, especially in mountainous areas, tend to be narrow and winding, and they are not as well maintained as major highways. Traffic laws, signs and speed limits are consistent with the standards used throughout Europe. Traffic circles (roundabouts) are often utilized at major intersections. The use of seat belts (in front seats) and child car seats is compulsory. Motorcyclists are required to wear helmets and the use of cellular phones while driving is prohibited unless used with some form of hands-free kit. Liability insurance is mandatory.

Road safety conditions in the area administered by Turkish Cypriots are similar to conditions in the south, except that the road network is less developed. Insurance purchased in the government-controlled areais not valid in the area administered by Turkish Cypriots, but insurance for that area may be purchased near the U.N. "buffer zone" checkpoints. Emergency assistance is available in the area administered by Turkish Cypriots by calling 155.

For specific information concerning driving permits, vehicle inspection, road tax and mandatory insurance in Cyprus, contact the Cyprus Tourism Organization at 13 East 40th Street, New York, NY 10016, tel. (212) 683-5280, email: gocyprus@aol.com, web site: http://www.cyprustourism.org.

Aviation Safety Oversight: As there is no direct commercial air service between the United States and Cyprus, the U.S. Federal Aviation Administration (FAA) has not assessed Cyprus' Civil Aviation Authority for compliance with International Civil Aviation Organization (ICAO) aviation safety standards. For more information, travelers may visit the FAA's Internet web site at http://www.faa.gov.

Special Circumstances: Since 1974, the Republic of Cyprus has designated Larnaca and Paphos international airports, and the seaports of Limassol, Larnaca, and Paphos, as the only legal points of entry into and exit from Cyprus. These ports are all in the government-controlled southern part of the island. Entry or exit via any other air or seaport is considered an illegal act by the Republic of Cyprus. Formerly, visitors choosing to arrive at non-designated airports and seaports in the area administered by Turkish Cypriots were not allowed to cross the U.N.-patrolled "buffer zone" to the government-controlled area in the south. Since June of 2004, when the Republic of Cyprus implemented new EU-related crossing regulations, Americans (and citizens of other non-EU countries not requiring visas) have been able to cross regardless of their port of entry into Cyprus.

Most American visitors to Cyprus are able to cross the "buffer zone" without hindrance, although on occasion difficulties are encountered at both the government and Turkish Cypriot checkpoints. Cypriot officials at the "buffer zone" checkpoints or at airports and seaports in the government-controlled area may detain and prosecute Americans who have been present for more than 90 days in the area administered by Turkish Cypriots if they do not possess a residency permit issued by the Government of Cyprus.

Policy and procedures regarding travel across the "buffer zone" are subject to change. More information on current procedures may be obtained at the U.N. "buffer zone" Ledra Palace checkpoint in Nicosia.

In an effort to prevent international child abduction, many governments have initiated strict identification procedures at entry/exit points. These often include requiring documentary evidence of relationship and permission for the child's travel from the parent(s) or legal guardian, if not present. Having such documentation on hand, even if not required, may facilitate entry and departure. Although Cyprus is party to the Hague Convention on the Civil Aspects of International Child Abduction, the Convention cannot be used effectively to recover a child abducted to the area administered by Turkish Cypriots.

Cyprus customs authorities enforce strict regulations concerning temporary importation into or export from Cyprus of items such as firearms. There are no restrictions on religious materials and medication for personal use. It is advisable to contact the Embassy of the Republic of Cyprus in Washington, DC for specific information regarding customs requirements or visit http://www.mof.gov.cy/mof/customs/ced.nsf/DMLindex_en/DMLindex_en?OpenDocument. In many countries around the world, counterfeit and pirated goods are widely available. Transactions involving such products are illegal and bringing them back to the United States may result in forfeitures and/or fines. Cyprus restricts the export of Byzantine period ecclesiastical material and all archaeological material, including ancient coins. The U.S. Customs Service may impose corresponding import restrictions in accordance with the Convention on Cultural Property Implementation Act.

In addition to being subject to all Cypriot laws affecting American citizens, individuals who also possess Cypriot nationality may be subject to laws that impose special obligations on citizens of Cyprus. For example, American citizens whom the Republic of Cyprus considers to be Cypriot citizens may be subject to compulsory military service and other aspects of Cypriot law while in Cyprus. American citizen males between the ages of 16 and 26 years who reside in the United States and whose parents or grandfather were Greek Cypriots or have Greek Cypriot names are advised to obtain a written confirmation that they reside permanently outside of Cyprus from the Cypriot Embassy in Washington, D.C. before they travel to Cyprus. After their arrival in Cyprus, the young men should present their foreign residency confirmation statement to the Cypriot National Guard Registration office to obtain an exit permit. Those who believe they may be affected should inquire at the Embassy of the Republic of Cyprus regarding their status. American citizens whom the Turkish Cypriot authorities consider to be "citizens" may also be subject to compulsory military service in the area administered by Turkish Cypriots. The U.S. Embassy is unable to exempt dual nationals from such service.

American Citizens who buy or lease property, particularly in the area administered by Turkish Cypriots, may find their ownership challenged by people displaced as a result of the 1974 conflict. Prospective property buyers should always seek legal advice before buying. On October 20, 2006, the government of the Republic of Cyprus passed Article 303A of the Criminal Code which makes it a felony to buy, rent or sell property in Cyprus without the consent of the registered owner. Cypriot courts have used the law to prosecute people involved in the sale or purchase of property in the area administered by the Turkish Cypriots. The government of Cyprus has also attempted to enforce Cypriot legal judgments in property matters in other EU countries. Cypriot customs authorities routinely detain anyone arriving in Cyprus or crossing the buffer zone found to be in possession of documents relating to property purchases in the area administered by Turkish Cypriots.

In June 2006 the "Turkish Republic of Northern Cyprus" amended the laws governing its "Immovable Property Commission" to enable the Commission to accept claims for compensation or restitution from Greek Cypriots for property in the north. The Government of the Republic of Cyprus does not recognize the legitimacy of the "Immovable Property Commission." Some Greek Cypriots who have filed claims with the Commission have been subjected to intensive governmental and public pressure to withdraw their claims.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ signifi-

cantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating Cyprus' laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Cyprus are strict, and convicted offenders can expect jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in Cyprus are encouraged to register with the U.S. Embassy through the State Department's travel registration web site, and to obtain updated information on travel and security within Cyprus. Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency. The U.S. Embassy is located at Metochiou and Ploutarchou Streets, Engomi, Nicosia, tel. 357-22-393-939. The fax number of the Embassy's American Citizens Services section is 357-22-393344. The e-mail address is consularnicosia@state.gov and the Embassy's web site is http://nicosia.usembassy.gov.

The U.S. Government also maintains an office in the area administered by Turkish Cypriots. The office is located at 6 Serif Arzik Street, Kosk-luciftlik, Nicosia, tel. 357-22-669-965, fax: 357-22-679-014. When calling within the area administered by Turkish Cypriots, please dial 2273930.

Intercountry Adoption
April 2006

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is based on public sources and current understanding. Questions involving foreign and U.S. immigration laws and legal interpretation should be addressed respectively to qualified foreign or U.S. legal counsel.

Please Note: There are no children available for adoption in Cyprus. Cypriot couples who wish to adopt usually look to other countries for adoption possibilities. No Cypriot orphans have received U.S. immigrant visas in the past five years. U.S. citizens living in Cyprus who are considering adopting from another country should consult with the appropriate authorities in all three countries (Cyprus, the U.S., and the child's country of origin) before proceeding with an adoption case. Questions concerning the effect of a third-country adoption on U.S. visa qualifications, U.S. citizenship and related issues may be directed to the U.S. Embassy in Nicosia.

Adoption Authority: The Department of Welfare at the Ministry of Labor & Social Insurance oversees adoptions in Cyprus.

Ministry of Labor & Social Insurance
Department of Welfare
63 Prodromou Street
1468 Nicosia
Cyprus
Tel: 357-22-406650/406609
Fax: 357-22-667907
E-mail: central.sws@sws.mlsi.gov.cy
or mrossidou@sws.mlsi.gov.cy

Eligibility Requirements for Adoptive Parents: At least one parent must be 25 years old. If the adopting parents are relatives of the child, one of them must be at least 21 years old. Married couples must adopt jointly unless one spouse is incapable of giving consent or cannot be located. Unmarried couples may not adopt jointly. The court may approve adoptions by single adoptive parents if that person has applied alone and if the court determines that special reasons exist. "Special reasons" are not listed or defined in the Cypriot adoption code, but the prevailing view in Cyprus is that a family with two parents is in children's best interests.

Residency Requirements: Prospective adoptive parents must be permanent residents of Cyprus or have resided in Cyprus for at least two years prior to the submission of the application.

Time Frame: Since there are no children available for adoption in Cyprus, all times are related to the requirements of the child's country of birth. American citizens resident in Cyprus and considering adopting from another country should consult the Department of State's flyer for that country, available at http://adoption.state.gov.

Adoption Agencies and Attorneys: There are no adoption agencies in Cyprus. The Consular Section at the U.S. Embassy in Nicosia maintains a list of English-speaking lawyers who are licensed to practice in Cyprus.

The U.S. Embassy cannot recommend the services of any specific attorney. Prospective adopting parents are advised to fully research any adoption agency or facilitator they plan to use for adoption services.

Adoption Fees: Attorneys in Cyprus provide legal services only when Cypriot families adopt children from abroad. Fees vary from case to case.

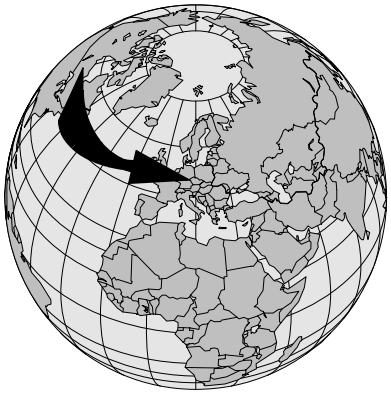
Adoption Procedures: This information is for those adopting a child from another country who will then immigrate to Cyprus. Prospective adoptive parents must be approved for intercountry adoption by a local Cypriot welfare officer. The actual

adoption of the child is governed by the laws of the child's country of origin. Once the information listed below has been submitted to the Cypriot Central Authority for the Hague Adoption Convention, the Central Authority will guarantee to the government of the child's country of origin that the child will be permitted to enter and reside permanently in Cyprus.

- Information on the child's identity, adoptability, background, social environment, family and medical histories, and any special needs.
- Proof that the necessary consents have been obtained and the reasons for the placement.
- A determination that the placement of the child with the prospective adoptive parents is in the best interests of the child.
- Confirmation from the Central Authority of Cyprus agreeing that the adoption may proceed.

The child will be authorized to enter and reside permanently in Cyprus as soon as a certificate is issued and presented to the Immigration Office of Cyprus stating that the adoption has been done in accordance with the Convention. Please see the Cypriot Department of Welfare web site at http://www.mlsi. gov.cy/sws and search the word adoption for detailed information.

Documents Required for Adoption: Prospective adopting parents need only to submit a written application signed by both spouses to the District Welfare officer of the district of their habitual residence. During the eligibility study they will be requested to undergo full medical tests.



Embassy of the Republic of Cyprus
2211 R St., NW
Washington, D.C. 20008-4082
Tel: (202) 462-5772
E-mail: info@cyprusembassy.net
Web: http://www.cyprusembassy.net

Cyprus also has a Consulate in New York City, which may be reached at (212) 686-6016.

U.S. Immigration Requirements: U.S. citizens residing in Cyprus who have adopted children from third countries are advised to contact the U.S. Embassy in Nicosia for information on how to apply for an immigrant visa on their child's behalf. Prospective adopting parents are strongly encouraged to consult USCIS publication M-249, *The Immigration of Adopted and Prospective Adoptive Children,* as well as the Department of State publication, *Intercountry Adoptions.* Please see the *Intercountry Adoption* section of this book for more details and review current reports online at http://adoption. state. gov.

Additional Information: Specific questions about adoption in Cyprus may be addressed to the U.S. Embassy in Nicosia. General questions regarding intercountry adoption may be addressed to the Office of Children's Issues, U.S. Department of State, CA/OCS/CI, SA-29, 4th Floor, 2201 C Street, NW, Washington, D.C. 20520-4818, toll-free Tel: 1-888-407-4747.

CZECH REPUBLIC

Compiled from the July 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Czech Republic

PROFILE

Geography

Area: 78,864 sq. kilometers; about the size of Virginia.
Cities: Capital—Prague (pop. 1.16 million). Other cities—Brno (376,172), Ostrava (314,744), Plzen (165,529).
Terrain: Low mountains to the north and south, hills in the west.
Climate: Temperate.

People

Nationality: Noun and adjective—Czech(s).
Population: (est.) 10.3 million.
Annual growth rate: 0.1%.
Ethnic groups: Czech (94% or 9.6 million); Slovak (193,000); Roma (200,000); Silesian (11,000); Polish (52,000); German (39,000); Ukrainian (22,000); and Vietnamese (40,000).
Religions: Roman Catholic, Protestant.
Languages: Czech.
Education: Literacy—99.8%.
Health: Life expectancy—males 73.34 yrs., females 79.7 yrs.
Work force: (5.17 million) Industry, construction, and commerce—40%; government and other services—56%; agriculture—4%.

Government

Type: Parliamentary republic.
Independence: The Czech Republic was established January 1, 1993 (former Czechoslovak state established 1918).
Constitution: Signed December 16, 1992.
Government branches: Executive—president (chief of state), prime minister (head of government), cabinet. Legislative—Chamber of Deputies, Senate. Judicial—Supreme Court, Constitutional Court.
Political parties: (June 2006 election) Civic Democratic Party (ODS), 81 seats; Czech Social Democratic Party (CSSD), 74 seats; Communist Party of Bohemia and Moravia (KSCM), 26 seats; Christian and Democratic Union-Czechoslovak Peoples Party (KDU-CSL), 13 seats; Green Party (SZ), 6 seats.
Suffrage: Universal at 18.
Political subdivisions: Two regions—Bohemia and Moravia; 13 administrative districts and Prague.

Economy

GDP: (2007) $176.5 billion.
Per capita income: $20,229.
Natural resources: Coal, coke, timber, lignite, uranium, magnesite.
Agriculture: Products—wheat, rye, oats, corn, barley, hops, potatoes, sugar beets, hogs, cattle, horses.
Industry: Types—motor vehicles, machinery and equipment, iron, steel, cement, sheet glass, armaments, chemicals, ceramics, wood, paper products, and footwear.
Trade: (2007) Exports—$113 billion (est.): motor vehicles, machinery, iron, steel, chemicals, raw materials, consumer goods. Imports—$109.8 billion (est.). Trading partners—Germany (32%), Slovakia, Poland, France, Austria, Italy, the Netherlands, Russia, U.K., China, United States

PEOPLE

The majority of the 10.3 million inhabitants of the Czech Republic are ethnically and linguistically Czech (95%). Other ethnic groups include Germans, Roma, and Poles. After the 1993 division of the Czech and Slovak Federal Republic, some Slovaks remained in the Czech Republic and comprise roughly 3% of the current population. The border between the Czech Republic and Slovakia is open for citizens of the former Czechoslovakia. Laws establishing religious freedom were passed shortly after the revolution of 1989, lifting oppressive regulations enacted by the former communist regime. Major denominations and their estimated percentage populations are Roman Catholic (39%) and Protestant (3%). A large percentage of the Czech population claim to be atheists (40%), and 16% describe themselves as uncertain.

The Jewish community numbers a few thousand today; a synagogue in Prague memorializes the names of more than 80,000 Czechoslovak Jews who perished in World War II.

HISTORY

The Czech Republic was the western part of the Czech and Slovak Federal Republic. Formed into a common state after World War I (October 28, 1918), the Czechs, Moravians, and Slovaks remained united for almost 75 years. On January 1, 1993, the two republics split to form two separate states.

The Czechs lost their national independence to the Hapsburgs Empire in 1620 at the Battle of White Mountain and for the next 300 years were ruled by the Austrian Monarchy. With the collapse of the monarchy at the end of World War I, the independent country of Czechoslovakia was formed, encouraged by, among others, U.S. President Woodrow Wilson.

Despite cultural differences, the Slovaks shared with the Czechs similar aspirations for independence from the Hapsburg state and voluntarily united with the Czechs. For historical reasons, Slovaks were not at the same level of economic and technological development as the Czechs, but the freedom and opportunity found in Czechoslovakia enabled them to make strides toward overcoming these inequalities. However, the gap never was fully bridged, and the discrepancy played a continuing role throughout the 75 years of the union.

Although Czechoslovakia was the only east European country to remain a parliamentary democracy from 1918 to 1938, it was plagued with minority problems, the most important of which concerned the country's large German population. Constituting more than 22% of the interwar state's population and largely concentrated in the Bohemian and Moravian border regions (the Sudetenland), members of this minority, including some who were sympathetic to Nazi Germany, undermined the new Czechoslovak state. Internal and external pressures culminated in September 1938, when France and the United Kingdom yielded to Nazi pressures at Munich and agreed to force Czechoslovakia to cede the Sudetenland to Germany.

Fulfilling Hitler's aggressive designs on all of Czechoslovakia, Germany invaded what remained of Bohemia and Moravia in March 1939, establishing a German "protectorate." By this time, Slovakia had already declared independence and had become a puppet state of the Germans. Hitler's occupation of the Czech lands was a clear betrayal of the Munich Pact and still stirs passions in modern-day Czech society, but at the time it was met by muted resistance; the brunt of Nazi aggression was felt by Czech Jews and other minorities who were rounded up and deported to concentration camps in systematic waves. Over 100,000 Jews lived in the Czech lands in 1939. Only several thousand remained or returned after the Holocaust in 1945.

At the close of World War II, Soviet troops overran all of Slovakia, Moravia, and much of Bohemia, including Prague. In May 1945, U.S. forces liberated the city of Plzen and most of western Bohemia. A civilian uprising against the German garrison took place in Prague in May 1945. Following Germany's surrender, some 2.9 million ethnic Germans were expelled from Czechoslovakia with Allied approval under the Benes Decrees.

Reunited after the war, the Czechs and Slovaks set national elections for the spring of 1946. The democratic elements, led by President Eduard Benes, hoped the Soviet Union would allow Czechoslovakia the freedom to choose its own form of government and aspired to a Czechoslovakia that would act as a bridge between East and West. The Czechoslovak Communist Party, which won 38% of the vote, held most of the key positions in the government and gradually managed to neutralize or silence the anti-communist forces. Although the communist-led government initially intended to participate in the Marshall Plan, it was forced by Moscow to back out. Under the cover of superficial legality, the Communist Party seized power in February 1948.

After extensive purges modeled on the Stalinist pattern in other east European states, the Communist Party tried 14 of its former leaders in November 1952 and sentenced 11 to death. For more than a decade thereafter, the Czechoslovak communist political structure was characterized by the orthodoxy of the leadership of party chief Antonin Novotny.

The 1968 Soviet Invasion

The communist leadership allowed token reforms in the early 1960s, but discontent arose within the ranks of the Communist Party central committee, stemming from dissatisfaction with the slow pace of the economic reforms, resistance to cultural liberalization, and the desire of the Slovaks within the leadership for greater autonomy for their republic. This discontent expressed itself with the removal of Novotny from party leadership in January 1968 and from the presidency in March. He was replaced as party leader by a Slovak, Alexander Dubcek.

After January 1968, the Dubcek leadership took practical steps toward political, social, and economic reforms. In addition, it called for politico-military changes in the Soviet-dominated Warsaw Pact and Council for Mutual Economic Assistance. The leadership affirmed its loyalty to socialism and the Warsaw Pact but also expressed the desire to improve relations with all countries of the world regardless of their social systems.

A program adopted in April 1968 set guidelines for a modern, humanistic socialist democracy that would guarantee, among other things, freedom of religion, press, assembly, speech, and travel; a program that, in Dubcek's words, would give socialism "a human face." After 20 years of little public participation, the population gradually started to take interest in the government, and Dubcek became a truly popular national figure. The

internal reforms and foreign policy statements of the Dubcek leadership created great concern among some other Warsaw Pact governments. On the night of August 20, 1968, Soviet, Hungarian, Bulgarian, East German, and Polish troops invaded and occupied Czechoslovakia. The Czechoslovak Government immediately declared that the troops had not been invited into the country and that their invasion was a violation of socialist principles, international law, and the UN Charter.

The principal Czechoslovak reformers were forcibly and secretly taken to the Soviet Union. Under obvious Soviet duress, they were compelled to sign a treaty that provided for the "temporary stationing" of an unspecified number of Soviet troops in Czechoslovakia. Dubcek was removed as party First Secretary on April 17, 1969, and replaced by another Slovak, Gustav Husak. Later, Dubcek and many of his allies within the party were stripped of their party positions in a purge that lasted until 1971 and reduced party membership by almost one-third.

The 1970s and 1980s became known as the period of "normalization," in which the apologists for the 1968 Soviet invasion prevented, as best they could, any opposition to their conservative regime. Political, social, and economic life stagnated. The population, cowed by the "normalization," was quiet.

The Velvet Revolution

The roots of the 1989 Civic Forum movement that came to power during the "Velvet Revolution" lie in human rights activism. On January 1, 1977, more than 250 human rights activists signed a manifesto called the Charter 77, which criticized the government for failing to implement human rights provisions of documents it had signed, including the state's own constitution; international covenants on political, civil, economic, social, and cultural rights; and the Final Act of the Conference for Security and Cooperation in Europe.

Although not organized in any real sense, the signatories of Charter 77 constituted a citizens' initiative aimed at inducing the Czechoslovak

Government to observe formal obligations to respect the human rights of its citizens.

On November 17, 1989, the communist police violently broke up a peaceful pro-democracy demonstration and brutally beat many student participants. In the days that followed, Charter 77 and other groups united to become the Civic Forum, an umbrella group championing bureaucratic reform and civil liberties. Its leader was the dissident playwright Vaclav Havel. Intentionally eschewing the label "party," a word given a negative connotation during the previous regime, Civic Forum quickly gained the support of millions of Czechs, as did its Slovak counterpart, Public Against Violence.

Faced with an overwhelming popular repudiation, the Communist Party all but collapsed. Its leaders, Husak and party chief Milos Jakes, resigned in December 1989, and Havel was elected President of Czechoslovakia on December 29. The astonishing quickness of these events was in part due to the unpopularity of the communist regime and changes in the policies of its Soviet guarantor as well as to the rapid, effective organization of these public initiatives into a viable opposition.

A coalition government, in which the Communist Party had a minority of ministerial positions, was formed in December 1989. The first free elections in Czechoslovakia since 1946 took place in June 1990 without incident and with more than 95% of the population voting. As anticipated, Civic Forum and Public Against Violence won landslide victories in their respective republics and gained a comfortable majority in the federal parliament. The parliament undertook substantial steps toward securing the democratic evolution of Czechoslovakia. It successfully moved toward fair local elections in November 1990, ensuring fundamental change at the county and town level.

Civic Forum found, however, that although it had successfully completed its primary objective—the overthrow of the communist regime—it was ineffectual as a governing party. The demise of Civic Forum was viewed by most as necessary and inevitable.

By the end of 1990, unofficial parliamentary "clubs" had evolved with distinct political agendas. Most influential was the Civic Democratic Party, headed by Vaclav Klaus, who later became Prime Minister. Other notable parties that came to the fore after the split were the Czech Social Democratic Party, Civic Movement, and Civic Democratic Alliance.

By 1992, Slovak calls for greater autonomy effectively blocked the daily functioning of the federal government. In the election of June 1992, Klaus's Civic Democratic Party won handily in the Czech lands on a platform of economic reform. Vladimir Meciar's Movement for a Democratic Slovakia emerged as the leading party in Slovakia, basing its appeal on fairness to Slovak demands for autonomy.

Federalists, like Havel, were unable to contain the trend toward the split. In July 1992, President Havel resigned. In the latter half of 1992, Klaus and Meciar hammered out an agreement that the two republics would go their separate ways by the end of the year.

Members of the federal parliament, divided along national lines, barely cooperated enough to pass the law officially separating the two nations. The law was passed on December 27, 1992. On January 1, 1993, the Czech Republic and the Republic of Slovakia were simultaneously and peacefully founded.

Relationships between the two states, despite occasional disputes about the division of federal property and governing of the border, have been peaceful. Both states attained immediate recognition from the U.S. and their European neighbors.

GOVERNMENT AND POLITICAL CONDITIONS

The President of the Czech Republic is Vaclav Klaus. He was elected on February 28, 2003 and sworn into office on March 7, 2003. As formal head of state, the president is granted specific powers such as the right to nominate Constitutional Court judges, dissolve parliament under certain conditions, and enact a veto on legislation. Presidents are elected by the parliament for 5-year terms.

The legislature is bicameral, with a Chamber of Deputies (200 seats) and a Senate (81 seats). With the split of the former Czechoslovakia, the powers and responsibilities of the now-defunct federal parliament were transferred to the Czech National Council, which renamed itself the Chamber of Deputies. Chamber delegates are elected from 14 regions—including the capital, Prague—for 4-year terms, on the basis of proportional representation. The Czech Senate is patterned after the U.S. Senate and was first elected in 1996; its members serve for 6-year terms with one-third being elected every 2 years.

The country's highest court of appeal is the Supreme Court. The Constitutional Court, which rules on constitutional issues, is appointed by the president. Its members serve 10-year terms.

The June 2-3, 2006 general election resulted in the Chamber of Deputies' 200 seats being evenly divided 100-100 between three center-right parties and two parties on the left, with neither side able to form a majority government. The impasse led to months of protracted negotiations during which Prime Minister Mirek Topolanek formed a three-party coalition with the Christian Democrats (KDU-CSL) and the Greens (SZ).

The coalition lost its first vote of confidence 96-99 on October 4, 2006. But some seven months after the election, on January 19, 2007, the coalition

succeeded in its second attempt when two renegade parliamentarians from the opposition Social Democrats (CSSD) abstained.

ECONOMY

Of the former communist countries in central and eastern Europe, the Czech Republic has one of the most developed and industrialized economies. Its strong industrial tradition dates to the 19th century, when Bohemia and Moravia were the industrial heartland of the Austro-Hungarian Empire. The Czech Republic has a well-educated population and a well-developed infrastructure. The country's strategic location in Europe, low-cost structure, and skilled work force have attracted strong inflows of foreign direct investment (FDI). This investment is rapidly modernizing its industrial base and increasing productivity.

The principal industries are motor vehicles, machine-building, iron and steel production, metalworking, chemicals, electronics, transportation equipment, textiles, glass, brewing, china, ceramics, and pharmaceuticals. The main agricultural products are sugar beets, fodder roots, potatoes, wheat, and hops. As a small, open economy in the heart of Europe, economic growth is strongly influenced by demand for Czech exports and flows of foreign direct investment.

At the time of the 1948 communist takeover, Czechoslovakia had a balanced economy and one of the higher levels of industrialization on the continent. In 1948, however, the government began to stress heavy industry over agricultural and consumer goods and services. Many basic industries and foreign trade, as well as domestic wholesale trade, had been nationalized before the communists took power. Nationalization of most of the retail trade was completed in 1950-51.

Heavy industry received major economic support during the 1950s, but central planning resulted in waste and inefficient use of industrial resources. Although the labor force was traditionally skilled and efficient, inadequate incentives for labor and management contributed to high labor turnover, low productivity, and poor product quality. Economic failures reached a critical stage in the 1960s, after which various reform measures were sought with no satisfactory results.

Hope for wide-ranging economic reform came with Alexander Dubcek's rise in January 1968. Despite renewed efforts, however, Czechoslovakia could not come to grips with inflationary forces, much less begin the immense task of correcting the economy's basic problems.

The economy saw growth during the 1970s but then stagnated between 1978-82. Attempts at revitalizing it in the 1980s with management and worker incentive programs were largely unsuccessful. The economy grew after 1982, achieving an annual average output growth of more than 3% between 1983-85. Imports from the West were curtailed, exports boosted, and hard currency debt reduced substantially. New investment was made in the electronic, chemical, and pharmaceutical sectors, which were industry leaders in eastern Europe in the mid-1980s.

The "Velvet Revolution" in 1989 offered a chance for profound and sustained economic reform. Signs of economic resurgence began to appear in the wake of the shock therapy that the International Monetary Fund (IMF) labeled the "big bang" of January 1991. Since then, astute economic management has led to the elimination of 95% of all price controls, large inflows of foreign investment, increasing domestic consumption and industrial production, and a stable exchange rate. Exports to former communist economic bloc markets have shifted to western Europe. Thanks to foreign investment, the country enjoys a positive balance-of-payments position. Despite a general trend over the last 10 years toward rising budget deficits, the Czech Government's domestic and foreign indebtedness remains relatively low.

The Czech koruna (crown) became fully convertible for most business purposes in late 1995. Following a currency crisis and recession in 1998-99, the crown exchange rate was allowed to float. Recently, strong capital inflows have resulted in a steady increase in the value of the crown against the euro and the dollar. The strong crown helped to keep inflation low. In 2004, inflation was about 2.8%, mainly due to increases in value added tax rates and higher fuel costs, and dropped to 1.9% in 2005. It hovered around 2.5% in 2006. The Ministry of Finance reported an inflation rate of 2.8% for 2007. The Czech Republic will not adopt the euro earlier than 2012.

The Czech Republic is gradually reducing its dependence on highly polluting low-grade brown coal as a source of energy, in part because of EU environmental requirements. In 2005, according to the Czech Statistical Office, 65.4% of electricity was

produced in steam, combined, and combustion power plants; 30% in nuclear plants; and 4.6% from renewable sources, including hydropower. Russia (via pipelines through Ukraine) and, to a lesser extent, Norway (via pipelines through Germany) supply the Czech Republic with liquid and natural gas.

The government has offered investment incentives in order to enhance the Czech Republic's natural advantages, thereby attracting foreign partners and stimulating the economy. Shifting emphasis from the East to the West has necessitated adjustment of commercial laws and accounting practices to fit Western standards. Formerly state-owned banks have all been privatized into the hands of west European banks and oversight by the central bank has improved. The telecommunications infrastructure has been upgraded and the sector is privatized. The Czech Republic has made significant progress toward creating a stable and attractive climate for investment, although continuing reports of corruption are troubling to investors.

Its success allowed the Czech Republic to become the first post-communist country to receive an investment-grade credit rating by international credit institutions. Successive Czech governments have welcomed U.S. investment in addition to the strong economic influence of Western Europe and increasing investment from Asian auto manufacturers. Inflows of foreign direct investment in 2007 were roughly $9.2 billion. By U.S. Embassy estimates, the United States is among the top six investors in the Czech Republic since the revolution.

The Czech Republic boasts a flourishing consumer production sector. In the early 1990s most state-owned industries were privatized through a voucher privatization system. Every citizen was given the opportunity to buy, for a moderate price, a book of vouchers that he or she could exchange for shares in state-owned companies. State ownership of businesses was estimated to be about 97% under communism. The non-private sector is less than 20% today. Unemployment declined to 5.0% in May 2008. Rates of unemployment are higher in the coal and steel producing regions of Northern Moravia and Northern Bohemia, and among less-skilled and older workers.

The economy grew 5.7% in 2007 and similar growth is expected in 2008. The current right-of-center coalition government has committed itself to reducing the deficit to 3% of GDP by 2008, from 4.7% in 2006. Planned reforms involving reduction of currently mandatory expenditures to meet Maastricht criteria for adoption of the euro will prepare the Czech Republic for accession to the euro zone in 2012 at the earliest.

The Czech Republic became a European Union (EU) member on May 1, 2004. Most barriers to trade in industrial goods with the EU fell in the course of the accession process. The process of accession had a positive impact on reform in the Czech Republic, and new EU directives and regulations continue to shape the business environment. Free trade in services and agricultural goods, as well as stronger regulation and rising labor costs, will mean tougher competition for Czech producers. Future levels of EU structural funding and agricultural supports were key issues in the accession negotiations. Even before accession, policy set in Brussels had a strong influence on Czech domestic and foreign policy, particularly in the area of trade.

The Czech Republic's economic transformation is not yet complete. The government still faces serious challenges in completing industrial restructuring, increasing transparency in capital market transactions, transforming the housing sector, reforming the pension and health care systems, and solving serious environmental problems.

NATIONAL SECURITY

The Czech Republic continues to make significant contributions to international allied coalitions in Afghanistan, Iraq, and Kosovo. In early 2008, the Czech Republic established a 200-person Provincial Reconstruction Team (PRT) in Logar Province, Afghanistan. In addition, an Operational Mentoring and Liaison Team (OMLT) was deployed to work alongside the Afghanistan National Air Corps. The deployment of this Czech OMLT complements the ongoing donation of 12 excess fully overhauled Czech military helicopters to Afghanistan, six of which have been delivered. Additionally, in mid-2008, the Czechs will redeploy a Special Forces unit to Afghanistan for a third time as well as a 65-person security detachment to support Dutch forces. These new contributions add to ongoing deployments to Afghanistan, including a large military field hospital in Kabul and a Special Purpose Military Police unit operating in Helmand Province. This increased commitment of support deployments to Afghanistan has not diminished the Czech Republic's continued commitment to support other coalition efforts, including providing a maneuver battalion to Kosovo in support of the Kosovo Force (KFOR) on a continual rotational basis as well as a limited number of personnel to Iraq.

The Czech Republic became a member of the North Atlantic Treaty Organization (NATO) on March 12, 1999. A major overhaul of the Czechoslovak defense forces began in 1990 and continues in the Czech Republic. Czech forces have been successfully downsized from 200,000 to approximately 30,000, and at the same time reoriented into a more mobile, deployable force. The Czechs have made good progress in reforming the military personnel structure, and a strong commitment to English-language training is paying off. Compulsory military service ended in December 2004. Public support for NATO remains high. The Czech Government currently spends slightly less than 1.5% of GDP on defense.

The Czech Republic has good relations with all of its neighbors, and none of its borders are in question. The Czech Republic is a member of the EU, UN, and Organization for

Security and Cooperation in Europe (OSCE), and will lead a European Union Battle Group (EUBG) in the second half of 2009.

FOREIGN RELATIONS

From 1948 until 1989, the foreign policy of Czechoslovakia followed that of the Soviet Union. Since independence, the Czechs have made integration into Western institutions their chief foreign policy objective.

The Czech Republic became a member of the North Atlantic Treaty Organization, along with Poland and Hungary, on March 12, 1999. The Czech Republic became a full member of the European Union on May 1, 2004. Both events are milestones in the country's foreign policy and security orientation. The Czech Republic is scheduled to host the rotating EU Presidency during the first half of 2009.

The Czech Republic is a member of the United Nations and participates in its specialized agencies. It is a member of the World Trade Organization. It maintains diplomatic relations with more than 85 countries, of which 80 have permanent representation in Prague.

U.S.-CZECH RELATIONS

Millions of Americans have their roots in Bohemia and Moravia, and a large community in the United States has strong cultural and familial ties with the Czech Republic. President Woodrow Wilson and the United States played a major role in the establishment of the original Czechoslovak state on October 28, 1918. President Wilson's 14 Points, including the right of ethnic groups to form their own states, were the basis for the union of the Czechs and Slovaks. Tomas Masaryk, the father of the state and its first President, visited the United States during World War I and worked with U.S. officials in developing the basis of the new country. Masaryk used the U.S. Constitution as a model for the first Czechoslovak constitution.

After World War II, and the return of the Czechoslovak Government in exile, normal relations continued until 1948, when the communists seized power. Relations cooled rapidly. The Soviet invasion of Czechoslovakia in August 1968 further complicated U.S.-Czechoslovak relations. The United States referred the matter to the UN Security Council as a violation of the UN Charter, but no action was taken against the Soviets.

Since the "Velvet Revolution" of 1989, bilateral relations have improved immensely. Dissidents once sustained by U.S. encouragement and human rights policies reached high levels in the government. President Havel, in his first official visit as head of Czechoslovakia, addressed the U.S. Congress and was interrupted 21 times by standing ovations. In 1990, on the first anniversary of the revolution, President George H.W. Bush, in front of an enthusiastic crowd on Prague's Wenceslas Square, pledged U.S. support in building a democratic Czechoslovakia. Toward this end, the U.S. Government has actively encouraged political and economic transformation.

The U.S. Government was originally opposed to the idea of Czechoslovakia forming two separate states, due to concerns that a split might aggravate existing regional political tensions. However, the U.S. recognized both the Czech Republic and Slovakia on January 1, 1993. Since then, U.S.-Czech relations have remained strong economically, politically, and culturally.

Relations between the U.S. and the Czech Republic are excellent and reflect the common approach both have to the many challenges facing the world at present. The U.S. looks to the Czech Republic as a partner in issues ranging from Afghanistan to the Balkans, and seeks opportunities to continue to deepen this relationship.

TRAVEL

Consular Information Sheet

July 21, 2008

Country Description: The Czech Republic is located in the heart of Europe. Tourist facilities in Prague are at the level of those found in most European capitals, while travelers can expect lower standards outside of Prague. Travelers are encouraged to be vigilant as pick-pocketing and petty theft occurs often in crowded tourist areas, restaurants and on public transportation.

Entry Requirements: The Czech Republic is a party to the Schengen agreement. As such, U.S. citizens may enter the Czech Republic for up to 90 days for tourist or business purposes without a visa. The passport should be valid for at least three months beyond the period of stay.

Visas are required for U.S. citizens for longer stays and in order to work in the Czech Republic. In such cases, it is recommended that travelers obtain a visa in advance of entering the Czech Republic. The Embassy of the Czech Republic's web site at http://www.mzv.cz/washington provides for the most current visa information. The Czech Government requires travelers to the Czech Republic to have proof of finances to pay for their stay and proof of travel/health insurance. Minimum coverage of the insurance has to be at least $35,000.

According to the Czech Government, a health insurance card or an internationally recognized credit card with health insurance included will generally be accepted as proof of insurance to enter the Republic. The health insurance requirement does not apply to those who have visas permitting them to work.

Safety and Security: Civil disorder is rare in the Czech Republic, although strikes and demonstrations may occur. U.S. citizens should be vigilant in protecting their security, bearing in mind that even demonstrations meant to be peaceful may turn violent. Americans are advised to avoid street demonstrations.

For the latest security information, Americans traveling abroad should regularly monitor the Department of State, Bureau of Consular Affair's Internet site at http://travel.state.gov, where the current Travel Warnings and Travel Alerts, including the Worldwide Caution Travel Alert, can be found. Up to date information on security can also be obtained by calling 1-888-407-4747 toll-free in the U.S., or, for callers outside the U.S. and Canada, a regular toll line at 1-202-501-4444. These numbers are available from 8:00 a.m. to 8:00 p.m. Eastern Time, Monday through Friday (except U.S. federal holidays.

Crime: The Czech Republic generally has a low rate of crime. However, street crime –particularly pick-pocketing and occasional mugging –is a problem, especially in major tourist areas in Prague. Travelers are encouraged to be especially vigilant in Prague's restaurants, train stations, and on public transportation around the city center. Incidents of pick-pocketing were reported in significant numbers during 2007. Incidents of violent crime, while still relatively infrequent, are becoming more common in Prague. Travelers should be aware of the reported use of Rohypnol and other "date rape" drugs in the Czech Republic. Caution should be used when accepting open drinks at bars or clubs. Travelers should be very careful while riding trains, trams or metro, where most crime occurs. Keep a copy of your passport in a safe place separate from the passport itself; this copy can help you to apply for a new passport if yours is lost or stolen. Visitors should be alert to the potential for substantial overcharging by taxis, particularly in areas frequented by tourists. Radio-dispatched taxis are often much more reliable. It is also advisable to set the price in advance.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to both the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please also contact the nearest U.S. Embassy or Consulate for assistance. The Embassy or Consulate staff can, for example, assist you in finding appropriate medical care, contacting family members or friends and explaining how funds could be transferred. Although the investigation and prosecution of the crime overseas is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

The local equivalent to the "911" emergency line in the Czech Republic is 112. English-speaking assistance is not always available from the local police, but the police headquarters at 9 Jungmannovo Namesti in New Town usually has an English-speaker available.

Medical Facilities and Health Information: Prague has good Western style medical clinics with English-speaking doctors and dentists. However, staff members at the majority of Czech medical facilities do not speak English. Doctors and hospitals often expect cash payment for health services, though some facilities do accept credit cards, Hospitalization in the Czech Republic is much more liberal that in the United States; conditions that would be treated on an outpatient basis in the United States are often treated on an inpatient basis in the Czech Republic. Ambulance services are not on a par with U.S. standards. Response time can sometimes be slow, and different ambulances are dispatched depending on the perceived severity of the patient's condition. Many ambulance companies expect payment at the time of delivery. Serious medical problems requiring hospitalization and/or medical evacuation to the United States can cost thousands of dollars or more. Please note that because euthanasia is not permitted under Czech law, U.S. living wills providing for no exceptional interventions to prolong life cannot be honored in the Czech Republic.

People traveling from April-October who plan to participate in camping or hiking in long grass or woodlands run the risk of both tick-borne encephalitis and Lyme disease. All travelers should take precautions to prevent tick bites. There is a vaccine for the former, but not for Lyme disease.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRTP (1-877-394-8747) or via the CDC's web site at http://wwwn.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling

abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning the Czech Republic is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

Travelers should note that road fatalities are occurring at an increasing rate in the Czech Republic, placing it amongst the most lethal places to drive in Europe. First-class roads in the Czech Republic generally meet European standards. However, on side roads, drivers should be prepared to encounter uneven surfaces, irregular lane markings, and sign placements that are not clear. Streets in towns are not always in good condition. U.S. drivers should pay special attention to driving on cobblestone and among streetcars in historic city centers. Traffic lights are placed before the intersection and not after as in the United States. Speed limits are 50 km/h in towns, 90 km/h outside of towns and 130 km/h on highways. An International Driving Permit (IDP), available from AAA (in the United States only), must accompany a U.S. driver's license; failure to have the IDP with a valid license may result in denial of an insurance claim after an accident.

Passengers on public transportation should buy a ticket prior to boarding to avoid being fined. The ticket must be validated at the outset of the trip by inserting it into the yellow box found on trams and buses and in the entry halls of subway stations.

Persons driving into the Czech Republic should be aware that a road usage tax sticker is required to drive legally on major highways. Signs stating this requirement are posted near the border, but they are easy to miss. The stickers are available at gasoline stations. The fine for failing to display a motorways toll sticker is assessed on the spot. For specific information concerning Czech requirements for driver's permits, vehicle inspection, road tax and mandatory insurance, please contact the Czech Tourist Authority offices in New York by telephone at (212)288-0830 or via email at infor@czechcenter.com.

Visit the web sites of the Czech Republic's national tourist office and national authority responsible for road safety at http://www.turistik.cz and http://www.mdcr.cz.

Aviation Safety Oversight: The U.S. Federal Aviation Administration (FAA) has assessed the Government of the Czech Republic's Civil Aviation Authority as being in compliance with International Civil Aviation Organization (ICAO) aviation safety standards for oversight of the Czech Republic's air carrier operations. For more information, travelers may visit the FAA's web site at www.faa.gov.

Special Circumstances: Czech customs authorities enforce strict regulations concerning temporary importation into or export from the Czech Republic of items such as firearms, antiquities, medications, business equipment, etc. It is advisable to contact the Embassy of the Czech Republic in Washington, D.C, or the Consulates General of the Czech Republic in New York and Los Angeles for specific information regarding customs requirements.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses.

Persons violating Czech Republic laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in the Czech Republic are strict and convicted offenders can expect jail sentences and heavy fines. Engaging in illicit sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration And Embassy And Consulate Locations: Americans living in the Czech Republic are encouraged to register with the U.S. Embassy through the State Department's travel registration web site at https://travelregistration.state.gov, and to obtain updated information on travel and security within the Czech Republic. Americans without Internet access may register directly with the U.S. Embassy. By registering, American citizens make it easier for the Embassy to contact them in case of emergency. The U.S. Embassy in Prague is located at Trziste 15, 118 01 Prague, Czech Republic; telephone (420)257 530 663; for after-hours emergencies only, telephone (420 257 532 716; Consular Section's fax (420) 257 534 028; web page: http://prague.usembassy.gov

Intercountry Adoption

June 2008

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is based on public sources and our current understanding. Questions involving foreign and U.S. immigration laws and legal interpretation should be addressed respectively to qualified foreign or U.S. legal counsel.

The Hague Convention on Intercountry Adoption: The Hague Convention on Intercountry Adoption, to which the United States became a party on April 1, 2008, establishes legal and regulatory requirements for intercountry adoption. The Czech Republic is a party to The Hague Convention on Protection of Children and Co-operation in Respect of Intercountry Adoption (the Convention) and with which the Convention is in force for the United States.

Patterns of Immigration: Please review current reports online at http://adoption.state.gov.

Adoption Authority:
Central Office for International Legal Protection of Juveniles
Benesova 22,
60200 Brno, Czech Republic
Tel: (420) 54221 5443 through 5.

Eligibility to Adopt: Both married and single persons may adopt Czech children. There can be a maximum of 40 years between the prospective adoptive parents and the child.

Residency Requirements: Prospective adoptive parents must be legal residents of the Czech Republic or reside in a country that is also party to The Hague Adoption Convention. In addition, Czech authorities may require prospective adoptive parents to care for the child for up to two years prior to approving an adoption.

Time Frame: It takes about two years from original application to the end of process.

Adoption Agencies and Attorneys: There are no private adoption agencies in the Czech Republic. Prospective adoptive parents may locate an adoptable child either by contacting a local social service office or by hiring an attorney familiar with the Czech social services system. The U.S. Embassy in Prague maintains a list of Czech attorneys; this list may be obtained in person from the consular section of the U.S. Embassy or via the Embassy's web site at: http://prague.usembassy.gov.

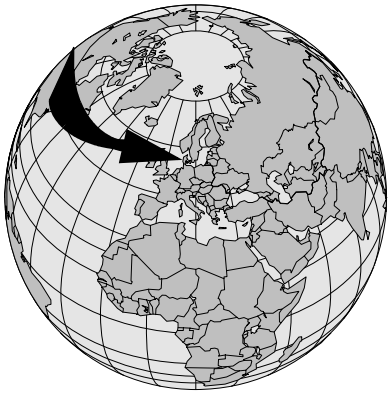
Adoption Fees: There are officially no fees for adoption. There are fees for court papers and new birth certificate in the range of tens of dollars. Prospective adoptive parents can expect to pay attorneys fees for services rendered.

The U.S. Embassy in Prague discourages the payment of any fees that are not properly receipted, "donations," or "expediting" fees, that may be requested from prospective adoptive parents. Such fees have the appearance of "buying" a baby and put all future adoptions in the Czech Republic at risk.

Adoption Procedures: Once a child is located for adoption, the following requirements must be met. A written request from the Central Authority of the prospective adoptive parents must be mailed to the Central Office for International Legal Protection of Juveniles. The request is forwarded to the appropriate guardian authority (usually the Department of Youth of the local town hall). Often a period of 3-24 months of pre-adoption care of the child by the adoptive parents is required. Czech district Court have jurisdiction on decisions in adoption cases of children to be adopted on the Czech territory. The Czech Central Authority for Adoption must approve adoptions to foreign countries. Czech district courts have jurisdiction on decisions in adoption cases.

Required Documents: Adopting parents are also required to present the following supporting documents translated into the Czech language by a court translator and certified by the Czech Embassy in Washington, D.C.:

- Parents' Birth Certificates;
- Marriage Certificate, if applicable;
- Police Certificates/Clearances for all countries where prospective adoptive parents have resided for extended periods of time;
- Parents' Medical Certificates/ Clearances;
- Evidence of Employment and Financial Status; and
- Completed Home Study by competent authority in prospective adoptive parents' country of residence.



Embassy of the Czech Republic
3900 Spring of Freedom Street, NW
Washington, DC 20008
tel. (202) 274-9103
Fax: (202) 363-6308
Web site:
http://www.mzv.cz/washington

The Czech Republic also has consulates in Los Angeles and New York.

U.S. Immigration Requirements: As of April 1, 2008, U.S. citizens wishing to adopt in a Convention country must begin the process by filing with the U.S. Citizenship and Immigration Services (USCIS) a form I-800A *Application for Determination of Suitability to Adopt a Child from a Convention Country*. Prospective adoptive parents are strongly encouraged to consult the Department of Homeland Security, USCIS website to download forms and filing instructions.

U.S. Embassy
Trziste 15
118 01 Prague 1
Czech Republic
Tel. (420) (25702-2000)
Fax: (420) (25753-4028)
Web site: http://www.usembassy.cz

Additional Information: For information on intercountry adoption and international parental child abduction, and security information for U.S. citizens traveling abroad, call Toll Free 1-888-407-4747. This number is available from 8:00 a.m. to 8:00 p.m. EST/EDT, Monday through Friday (except U.S. federal holidays). Callers who are unable to use toll-free numbers, such as those calling from overseas, may obtain information and assistance during these hours by calling 1-202-501-4444.

DENMARK

Compiled from the May 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Kingdom of Denmark

PROFILE

Geography

Excluding Greenland and the Faroe Islands

Area: 43,094 sq. km. (16,639 sq. mi.); slightly smaller than Vermont and New Hampshire combined.

Cities: Capital—Copenhagen (pop. 0.5 million in Copenhagen and 1.1 million in the Copenhagen Region). Other cities—Arhus (293,510), Odense (185,206), Aalborg (163,231).

Terrain: Low and flat or slightly rolling; highest elevation is 173 m. (568 ft.).

Climate: Temperate. The terrain, location, and prevailing westerly winds make the weather changeable.

People

Nationality: Noun—Dane(s). Adjective—Danish.

Population: (Dec 2007) 5,475,791.

Annual growth rate: (Dec. 2006–Dec. 2007) 0.53%.

Ethnic groups: Scandinavian, Inuit, Faroese, German, Turkish, Iranian, Somali.

Religions: Evangelical Lutheran 95%; other Protestant denominations and Roman Catholics 3%; Muslim 2%.

Languages: Danish, Faroese, Greenlandic (Inuit dialect), some German. English is the predominant second language.

Education: Years compulsory—9. Attendance—100%. Literacy—100%.

Health: Infant mortality rate (2006)—4.4/1,000. Life expectancy—men 75.9 years, women 80.5 years.

Work force: (2007) 2.9 million. Employment: Industry, construction, mining and utilities—23%; government—35%; private services—37%; agriculture and fisheries—2%.

Government

Type: Constitutional monarchy.

Constitution: June 5, 1953.

Government branches: Executive—queen (chief of state), prime minister (head of government), cabinet. Legislative—unicameral parliament (Folketing). Judicial—appointed Supreme Court.

Political parties: (represented in parliament) Venstre (Liberal), Social Democratic, Konservative, Socialist People's, Social Liberal, Unity List, Danish People's, New Alliance.

Suffrage: Universal adult (18 years of age).

Political subdivisions: 13 counties and 271 municipalities.

Economy

GDP: (2006) $311.5 billion.

Annual growth rate: (real terms, 2007 est.) 1.8%.

Per capita GDP: $56,895.

Agriculture and fisheries: (1.3% of GDP at gross value added) Products—meat, milk, grains, seeds, hides, fur skin, fish and shellfish.

Industry: (20% of GDP at gross value added) Types—industrial and construction equipment, food processing, electronics, chemicals, pharmaceuticals, furniture, textiles, windmills, and ships.

Natural resources: North Sea—oil and gas, fish. Greenland—fish and shrimp, potential for hydrocarbons and minerals, including zinc, lead, molybdenum, uranium, gold, platinum. The Faroe Islands—fish, potential for hydrocarbons.

Trade: (2007, goods): Exports—$101.885 billion: manufactured goods 75% (of which machinery and instruments were 35%); agricultural products 9% (of which pork and pork products cover 48%); fuels, etc. 10%; fish and fish products 1%; other 5%. Imports—$98.861 billion: raw materials and semi-manufactures 44%; consumer goods 30%; capital equipment 12%; transport equipment 7%; fuels 5%; other 1%. Partners (percent of total trade in goods)—Germany 17%, Sweden 15%, U.K. 8%, Norway 6%, U.S. 5%.

Exchange rate: 4.70 kroner=U.S. $1 as of end March 2008.

PEOPLE AND HISTORY

The Danes, a homogenous Gothic-Germanic people, have inhabited Denmark since prehistoric times. Danish is the principal language. English is a required school subject, and fluency is high. A small German-speaking minority lives in southern Jutland; a mostly Inuit population inhabits Greenland; and the Faroe Islands have a Nordic population with its own language. Education is compulsory from ages seven to 16 and is free through the university level.

Although religious freedom is guaranteed, the state-supported Evangelical Lutheran Church accounts for about 95% of those persons claiming religious affiliation. Several other Christian denominations, as well as other major religions, find adherents in Denmark. Islam is now the second-largest religion in Denmark.

During the Viking period (9th-11th centuries), Denmark was a great power based on the Jutland Peninsula, the Island of Zealand, and the southern part of what is now Sweden. In the early 11th century, King Canute united Denmark and England for almost 30 years.

Viking raids brought Denmark into contact with Christianity, and in the 12th century, crown and church influence increased. By the late 13th century, royal power had waned, and the nobility forced the king to grant a charter, considered Denmark's first constitution. Although the struggle between crown and nobility continued into the 14th century, Queen Margrethe I succeeded in uniting Denmark, Norway, Sweden, Finland, the Faroe Islands, Iceland, and Greenland under the Danish crown. Sweden and Finland left the union in 1520; however, Norway remained until 1814. Iceland, in a "personal union" under the king of Denmark after 1918, became independent in 1944.

The Reformation was introduced in Denmark in 1536. Denmark's provinces in today's southwestern Sweden were lost in 1658, and Norway was transferred from the Danish to the Swedish crown in 1814, following the defeat of Napoleon, with whom Denmark was allied.

The Danish liberal movement gained momentum in the 1830s, and in 1849 Denmark became a constitutional monarchy. After the war with Prussia and Austria in 1864, Denmark was forced to cede Schleswig-Holstein to Prussia and adopt a policy of neutrality. Toward the end of the 19th century, Denmark inaugurated important social and labor market reforms, laying the basis for the present welfare state.

Denmark remained neutral during World War I. Despite its declaration of neutrality at the beginning of World War II, it was invaded by the Germans in 1940 and occupied until liberated by the Allied forces in May 1945. Resistance against the Germans was sporadic until late 1943. By then better organized, the resistance movement and other volunteers undertook a successful rescue mission in which nearly the entire Jewish population of Denmark was shipped to Sweden (whose neutrality was honored by Germany). However, extensive studies are still being undertaken for the purpose of establishing a clearer picture of the degree of Danish cooperation—official and corporate—with the occupying power. Denmark became a charter member of the United Nations and was one of the original signers of the North Atlantic Treaty.

Cultural Achievements

Denmark's rich intellectual heritage has made multifaceted contributions to modern culture the world over. The discoveries of astronomer Tycho Brahe (1546-1601), geologist and anatomist Niels Steensen (1639-86), and the brilliant contributions of Nobel laureates Niels Bohr (1885-1962) to atomic physics and Niels Finsen (1860-1904) to medical research indicate the range of Danish scientific achievement. The fairy tales of Hans Christian Andersen (1805-75), the philosophical essays of Soeren Kierkegaard (1813-55), and the short stories of Karen Blixen (pseudonym Isak Dinesen; 1885-1962) have earned international recognition, as have the symphonies of Carl Nielsen (1865-1931). Danish applied art and industrial design have won so many awards for excellence that the term "Danish Design" has become synonymous with high quality, craftsmanship, and functionalism. Among the leading lights of architecture and design was Arne Jacobsen (1902-1971), the "father of modern Danish design." The name of Georg Jensen (1866-1935) is known worldwide for outstanding modern design in silver, and "Royal Copenhagen" is among the finest porcelains. No 'short list' of famous Danes would be complete without the entertainer and pianist Victor Borge (1909-2000), who emigrated to the United States under Nazi threat in 1940, and had a worldwide following when he died a naturalized U.S. citizen in Greenwich, Connecticut, at the age of 91.

Visitors to Denmark will discover a wealth of cultural activity. The Royal Danish Ballet specializes in the work of the great Danish choreographer August Bournonville (1805-79). Danish dancers also feature regularly on the U.S. ballet scene, notably Peter Martins as head of New York City Ballet.

The Danish Film Institute, one of the oldest in Scandinavia, offers daily public screenings of Danish and international movies in their original language and plays an active role in the maintenance and restoration of important archival prints. Over the decades, movie directors like Gabriel Axel (Babette's Feast, 1987 Oscar for Best Foreign Film), Bille August (Buster's World, 1984; Pelle the Conqueror, 1988 Oscar for Best Foreign Film; The House of the Spirits, 1993) and Lars von Trier (Breaking the Waves, 1996; Dancer in the Dark, 2000 Cannes Golden Palm) have all won international acclaim. In addition, Denmark has been involved virtually from the start in development of the "Dogma film" genre, where small, hand-held digital cameras have permitted greater rapport

between director and actor and given a documentary film feel to their increasingly realistic works. Besides von Trier's Dogville (2003) starring Nicole Kidman, and The Idiots (1998), The Celebration (1998 Cannes Special Jury prize) by Thomas Vinterberg, Mifune's Last Song (1999 Berlin Silver Bear award) by Soeren Kragh-Jacobsen, and Italian for Beginners (2000 Berlin Silver Bear award) by Lone Scherfig all are prime examples of the Dogma concept. International collections of modern art enjoy unusually attractive settings at the Louisiana Museum north of Copenhagen, "Arken" south of Copenhagen, and the North Jutland Art Museum in Aalborg. The State Museum of Art and the Glyptotek, both in Copenhagen, contain masterpieces of Danish and international art. Denmark's National Museum building in central Copenhagen harbors most of the state's anthropological and archeological treasures with especially fine prehistoric and Viking Age collections; two of its finest satellite collections are the Viking Ship Museum in Roskilde west of the metropolis and the Open Air Museum in a near northern suburb where original buildings have

been transported from their original locations around the country and reassembled on plots specially landscaped to evoke the original site. The Museum of Applied Art and Industrial Design in Copenhagen exhibits the best in Danish design. The world-renowned Royal Copenhagen Porcelain Factory exports worldwide. The ceramic tradition is carried on by designers such as Bjoern Wiinblad, whose whimsical creations remain as popular today as when they burst on the scene in the 1950s, and is carried on by younger talents such as Gertrude Vasegaard and Michael Geertsen.

Denmark has more than its share of impressive castles, many of which have been converted to museums. Frederiksborg Castle, on a manmade island in a lake north of Copenhagen, was restored after a catastrophic fire in the 1800s and now houses important collections in awe-inspiring splendor amidst impeccably manicured gardens. In Elsinore, Kronborg (or Hamlet's) Castle that once exacted tribute from passing ships now houses important furniture and art collections of the period, while hosting in its courtyard many touring summer productions of Shakespearean works. In Copenhagen, Rosenborg Castle houses the kingdom's crown jewels and boasts spectacular public gardens in the heart of the city.

Among today's Danish writers, probably the best-known to American readers is Peter Hoeg (Smilla's Sense of Snow; Borderliners), while the most prolific is Klaus Rifbjerg—poet, novelist, playwright, and screenwriter. Benny Andersen writes poems, short stories, and music. Poems by both writers have been translated into English by the Curbstone Press. Suzanne Broegger focuses on the changing roles of women in society. Kirsten Thorup's "Baby" won the 1980 Pegasus Prize and is printed in English by the University of Louisiana Press. The psychological thrillers of Anders Bodelsen and political thrillers by Leif Davidsen also appear in English.

In music, Hans Abrahamsen and Per Noergaard are the two most famous living composers. Abrahamsen's works have been performed by the National Symphony Orchestra in Washington, DC. Other international names are Poul Ruders, Bo Holten, and Karl Aage Rasmussen. Danes such as bass player Niels Henning Oersted Petersen have won broad international recognition, and the Copenhagen Jazz Festival held each year in July has acquired a firm place on the calendar of international jazz enthusiasts.

Cultural Policy

The Ministry of Cultural Affairs was created in 1961. Cultural life and meaningful leisure time were then and remain now subjects of debate by politicians and parliament as well as the general public. The democratization of cultural life promoted by the government's 1960s cultural policy recently has come to terms with the older "genteel culture;" broader concepts of culture now generally accepted include amateur and professional cultural, media, sports, and leisure-time activities.

Denmark's cultural policy is characterized by decentralized funding, program responsibility, and institutions. Danish cultural direction differs from that of other countries with a Ministry of Culture and a stated policy in that special laws govern each cultural field—e.g., the Theater Act of 1990 (as amended) and the Music Law of 1976 (as amended).

The Ministry of Cultural Affairs includes among its responsibilities international cultural relations; training of librarians and architects; copyright legislation; and subsidies to archives, libraries, museums, literature, music, arts and crafts, theater, and film production. During 1970-82, the Ministry also recognized protest movements and street manifestations as cultural events, because social change was viewed as an important goal of Danish cultural policy.

Different governments exercise caution in moderating this policy and practice. Radio and TV broadcasting also fall under the Ministry of Culture. Although government expenditures for culture totaled about 1.0% of the budget in 1996, in 2006 government expenditures for culture totaled 0.66% of gross domestic product (GDP). Viewed against the new government's firm objective to limit public expenditures, contributions are unlikely to increase in the future. Municipal and county governments assume a relatively large share of the costs for cultural activities in their respective districts. Most support goes to libraries and archives, theater, museums, arts and crafts training, and films.

GOVERNMENT

Denmark is a constitutional monarchy. Queen Margrethe II has largely ceremonial functions; probably her most significant formal power lies in her right to appoint the prime minister and cabinet ministers, who are responsible for administration of the government. However, she must consult with parliamentary leaders to determine the public's will, since the cabinet may be dismissed by a vote of no confidence in the Folketing (parliament). Cabinet members are occasionally recruited from outside the Folketing.

The 1953 constitution established a unicameral Folketing of not more than 179 members, of whom two are elected from the Faroe Islands and two from Greenland. Elections are held at least every 4 years, but the prime minister can dissolve the Folketing at any time and call for new elections. Folketing members are elected by a complicated system of proportional representation; any party receiving at least 2% of the total national vote receives representation. The result is a multiplicity of parties (seven represented in the Folketing after the February 2005 general election), none of which holds a majority. Electorate participation normally is around 80-85%.

The judicial branch consists of about 100 local courts, two high courts, several special courts (e.g., arbitration and maritime), and a Supreme

Court of 15 judges appointed by the crown on the government's recommendation.

Since a structural reform of local government was passed by the Folketing in 2004 and 2005, Denmark has been divided into five regions and 98 municipalities. The regions and municipalities are both led by councils elected every four years, but only the municipal councils have the power to levy taxes. Regional councils are responsible for health services and regional development, while the municipal councils are responsible for day care, elementary schools, care for the elderly, culture, environment and roads.

The Faroe Islands and Greenland enjoy home rule, with the Danish Government represented locally by high commissioners. These home rule governments are responsible for most domestic affairs, with foreign relations, monetary affairs, and defense falling to the Danish Government.

Principal Government Officials

Last Updated: 11/12/08

Queen: **MARGRETHE II**
Prime Min.: **Anders Fogh RASMUSSEN**
Min. of Climate & Energy: **Connie HEDEGAARD**
Min. of Cultural Affairs: **Carina CHRISTENSEN**
Min. of Defense: **Soren GADE**
Min. of Development Cooperation: **Ulla TORNAES**
Min. of Economic Affairs, Business, & Trade: **Lene ESPERSEN**
Min. of Education & Nordic Cooperation: **Bertel HAARDER**
Min. of Employment: **Claus Hjort FREDERIKSEN**
Min. of Environment: **Troels Lund POULSEN**
Min. of Finance: **Lars Loekke RASMUSSEN**
Min. of Food, Agriculture, & Fisheries: **Eva Kjer HANSEN**
Min. of Foreign Affairs: **Per Stig MOLLER**
Min. of Health & Prevention: **Jakob Axel NIELSEN**
Min. of Justice: **Brian MIKKELSEN**
Min. of Refugees, Immigration, Integration, & Ecclesiastical Affairs: **Birthe Roenn HORNBECH**
Min. of Science, Technology, & Innovation: **Helge SANDER**
Min. of Social Welfare & Gender Equality: **Karen JESPERSEN**
Min. of Taxation: **Kristian JENSEN**
Min. of Transport: **Lars BARFOED**
Chmn., Board of Governors, Danish National Bank: **Soeren BJERRE-NIELSEN**
Ambassador to the US: **Friis Arne PETERSEN**
Permanent Representative to the UN, New York: **Carsten STAUR**

Denmark maintains an embassy at 3200 Whitehaven Street NW, Washington, DC 20008-3683 (tel. 202-234-4300). Consulates general are in Chicago and New York.

POLITICAL CONDITIONS

Political life in Denmark is orderly and democratic. Political changes occur gradually through a process of consensus, and political methods and attitudes are generally moderate. Growing numbers of immigrants and refugees throughout the 1990s, and less than successful integration policies, however, have in recent years led to growing support for populist anti-immigrant sentiments in addition to several revisions of already tight immigration laws, with the latest revision taking effect July 1, 2002.

The Social Democratic Party, historically identified with a well-organized labor movement but today appealing more broadly to the middle class, held power either alone or in coalition for most of the postwar period except from 1982 to 1993. From February 1993 to November 2001, Social Democratic Party chairman Poul Nyrup Rasmussen led a series of different minority coalition governments, which all included the centrist Social Liberal Party. However, with immigration high on the November 2001 election campaign agenda, the Danish People's Party doubled its number of parliamentary seats; this was a key factor in bringing into power a new minority right-of-center coalition government led by Liberal Party chief Anders Fogh Rasmussen (no relation to Nyrup Rasmussen). Parliamentary elections held November 13, 2007 returned the coalition to government for another term of up to four years. The coalition consists of the Liberal Party ("Venstre") and the Konservative Party, holding 64 of the 179 seats in the Folketing, and has the parliamentary support of the Danish People's Party, holding another 25 seats. The opposition Social Democrats hold 45 seats, and the Social Liberals hold 9 seats. Addressing the costs and benefits of the Denmark's comprehensive social welfare system, restraining taxes, and immigration are among the key issues on the current domestic political agenda.

Denmark's role in the European Union (EU) remains an important political issue. Denmark emerged from two referenda (June 2, 1992 and May 18, 1993) on the Maastricht Treaty on the European Union with four exemptions (or "opt-outs"): common defense, common currency, EU citizenship, and certain aspects of legal cooperation, including law enforcement. The Amsterdam Treaty was approved in a referendum May 28, 1998, by a 55% majority. Still, the electorate's fear of losing national identity in an integrated Europe and lack of confidence in long-term stability of European economies run deep. These concerns were at the forefront of the September 28, 2000 referendum on Denmark's participation in the third phase of the Economic and Monetary Union, particularly the common currency, the euro; more than 53% voted "no," and Denmark retained its "krone" currency unit. The government and the pro-EU opposition have agreed, and Denmark has received an EU green light to maintain the four opt-outs throughout the process of approving and ratifying a new EU constitutional treaty, with the ambition to eliminate several opt-outs in late 2008.

Denmark's relatively quiet and neutral role in international affairs was abruptly changed on September 30, 2005, when the Danish newspaper Jyllands-Posten printed 12 caricatures of Mohammed. Islamic law prohibits any visual portrayal of

Mohammed, and Muslims viewed the caricatures as offensive. Muslims worldwide were infuriated with the Danes, beginning a boycott of Danish products and burning several Danish embassies. The Danish Government defended freedom of expression while it chastised the newspaper for inconsideration. The newspaper apologized, and the Danish Government repeatedly reiterated its support for freedom of religion, but the Islamic community still holds much animosity toward the Danes.

ECONOMY

Denmark's industrialized market economy depends on imported raw materials and foreign trade. Within the European Union, Denmark advocates a liberal trade policy. Its standard of living is among the highest in the world, and the Danes devote about 1% of gross national product (GNP) to foreign aid to less developed countries. In addition, Denmark in 2006 devoted 0.81% of GNP for overseas development, including for peace and stability purposes, refugee pre-asylum costs, and for environmental purposes in central and eastern Europe and developing countries.

Denmark is a net exporter of food and energy. Its principal exports are machinery, instruments, and food products. The United States is Denmark's largest non-European trading partner, accounting for about 6% of total Danish merchandise trade. Aircraft, computers, machinery, and instruments are among the major U.S. exports to Denmark. Among major Danish exports to the United States are industrial machinery, chemical products, furniture, pharmaceuticals, canned ham and pork, windmills, and plastic toy blocks (Lego). In addition, Denmark has a significant services trade with the U.S., a major share of it stemming from Danish-controlled ships engaged in container traffic to and from the United States (notably by Maersk-SeaLand). There are some 375 U.S.-owned companies in Denmark.

The Danish economy is fundamentally strong. Since the mid-1990s, economic growth rates have averaged close to 3%, the formerly high official unemployment rate stands at around 2%, and public finances are in surplus. Except for one year—1998—Denmark since 1989 has had comfortable balance-of-payments current account surpluses, in 2007 corresponding to 1.1% of GDP. Denmark has maintained a stable currency policy since the early 1980s, with the krone formerly linked to the Deutschmark and since January 1, 1999, to the euro. Denmark meets, and even exceeds, the economic convergence criteria for participating in the third phase (a common European currency—the euro) of the European Monetary Union (EMU). Although a referendum on EMU participation held on September 28, 2000 resulted in a firm "no" and Denmark, therefore, has not yet adopted the euro, opinion polls show a majority in favor of EMU. It is uncertain when the government will have another referendum on the EMU/euro. Danes are generally proud of their welfare safety net, which ensures that all Danes receive basic health care and need not fear real poverty. However, at present the number of working-age Danes living mostly on government transfer payments amounts to more than 680,000 persons (roughly 20% of the working-age population). Although this number has been reduced in recent years, the heavy load of government transfer payments burdens other parts of the system. Health care, other than for acute problems, and care for the elderly and children have particularly suffered, while taxes remain at a painful level. More than one-fourth of the labor force is employed in the public sector.

Greenland and the Faroe Islands

The Greenland economy has increased by an average of some 3% to 4% annually since 1993, the result of increasing catches and exports of shrimp, Greenland halibut and, more recently, crab. However, it was not until 1999 that the economy had fully recovered from the economic downturn in the early 1990s. During the last decade the Greenland Home Rule Government (GHRG) has pursued a fiscal policy with mostly small budget surpluses and low inflation. The GHRG has taken initiatives to increase the labor force and thus employment by, among other things, raising the retirement age from 60 to 63 years. However, structural reforms are still needed in order to create a broader business base and economic growth through more efficient use of existing resources in both the public and the private sector. Due to the continued critical dependence on exports of fish, the economy remains very vulnerable to foreign developments. The public sector, including publicly owned enterprises and the municipalities, plays the dominant role in Greenland's economy. Close to one-half of the government revenues come from Danish Government grants, an important supplement of GDP. Greenland has registered a foreign trade deficit since the closure of the last remaining lead and zinc mine in 1989. Despite several interesting hydrocarbon and mineral exploration activities, it will take several years before production can materialize. The U.S. aluminum producer Alcoa is in negotiations with Greenland Home Rule to build smelters in Greenland to take advantage of abundant hydropower potential. Besides a continued increase in local content, i.e., using a Greenlandic rather than Danish work force in both the public and private sectors, tourism appears to be the sector that offers the best near-term potential, and even this is limited due to a short season and high costs. Politically, the Greenland Home Rule Government has had increasing autonomy since its creation in 1979. An independent commission from Greenland made recommendations for greater self-rule in 2003. In May 2003, the Danish and Greenland Home Rule governments reached agreement on a set of power-sharing principles on Greenland's involvement in Danish foreign and security policy. The so-called Itilleq Declaration provides that Greenland will have foreign policy involvement with a view toward having equal status on questions of concern to both Denmark and Greenland. A Danish-Greenlandic

Commission will make joint recommendations in 2008 to the Danish parliament on ways to update the Home Rule Act of 1979.

The Faroese economy has performed strongly since the mid-1990s with annual growth rates averaging close to 6%, mostly as a result of increasing fish landings and salmon farming and high and stable export prices. Unemployment is insignificant and there are labor shortages in several sectors. Most of the Faroese who emigrated in the early 1990s (some 10% of the population) due to the economic recession have now returned. The positive economic development also has helped the Faroese Home Rule Government produce increasing budget surpluses that in turn help to reduce the large public debt, most of it to Denmark. However, the total dependence on fishing and salmon farming makes the Faroese economy very vulnerable, and the present fishing efforts appear in excess of what is required to ensure a sustainable level of fishing in the long term. Initial discoveries of oil in the Faroese area give hope for eventual oil production, which may lay the basis for a more diversified economy and thus less dependence on Denmark and Danish economic assistance. Aided by an annual subsidy from Denmark corresponding to about 6% of Faroese GDP, the Faroese have a standard of living comparable to that of the Danes and other Scandinavians.

Politically, the present Faroese Home Rule Government has initiated a process toward greater independence from Denmark, if not complete secession from the realm. In that respect, agreement on how to phase out the Danish subsidy plays a crucial role.

NATIONAL SECURITY

Although Denmark remained neutral during the First World War, its rapid occupation by Nazi Germany in 1940 persuaded most Danes that neutrality was no longer a reliable guarantee of Danish security. Danish security policy is founded on its membership in NATO. Since 1988, Danish budgets and security policy have been set by multi-year agreements supported by a wide parliamentary majority, including government and opposition parties. In 2006, Danish defense expenditures were 1.4% of GDP according to a NATO estimate.

FOREIGN RELATIONS

Danish foreign policy is founded upon four cornerstones: the United Nations, NATO, the EU, and Nordic cooperation. Denmark also is a member of, among others, the World Bank and the International Monetary Fund; the World Trade Organization (WTO); the Organization for Security and Cooperation in Europe (OSCE); the Organization for Economic Cooperation and Development (OECD); the Council of Europe; the Nordic Council; the Baltic Council; and the Barents Council. Denmark emphasizes its relations with developing nations. Although the government has moved to tighten foreign assistance expenditures, it remains a significant donor and one of the few countries to exceed the UN goal of contributing 0.7% of GNP to development assistance.

In the wake of the Cold War, Denmark has been active in international efforts to integrate the countries of Central and Eastern Europe into the West. It has played a leadership role in coordinating Western assistance to the Baltic states (Estonia, Latvia, and Lithuania). The country is a strong supporter of international peacekeeping. Danish forces were heavily engaged in the former Yugoslavia in the UN Protection Force (UNPROFOR), as well as in NATO's Operation Joint Endeavor/Stabilization Force in Bosnia and Herzegovina (IFOR/SFOR), and currently in the Kosovo Force (KFOR).

Denmark has been a member of NATO since its founding in 1949, and membership in NATO remains highly popular. There were several serious confrontations between the U.S. and Denmark on security policy in the so-called "footnote era" (1982-88), when a hostile parliamentary majority forced the government to adopt specific national positions on nuclear and arms control issues. With the end of the Cold War, however, Denmark has been supportive of U.S. policy objectives in the Alliance.

Danes have had a reputation as "reluctant" Europeans. When they rejected ratification of the Maastricht Treaty on June 2, 1992, they put the European Community's (EC) plans for the European Union on hold. In December 1992, the rest of the EC agreed to exempt Denmark from certain aspects of the European Union, including a common defense, a common currency, EU citizenship, and certain aspects of legal cooperation. On this revised basis, a clear majority of Danes approved continued participation in the EU in a second referendum on May 18, 1993, and again in a referendum on the Amsterdam Treaty on May 28, 1998.

Since September 11, 2001, Denmark has been highly proactive in endorsing and implementing United States, UN, and EU-initiated counter-terrorism measures, just as Denmark has contributed substantially to the International Security Assistance Force (ISAF) in Afghanistan and the neighboring countries. In 2003, Denmark was among the first countries to join the "Coalition of the Willing" and supplied a submarine, Corvette-class ship, and military personnel to the coalition's effort in Iraq to enforce UN Security Council Resolution 1441. Since that time it has provided 500 troops to assist with stabilization efforts in Iraq. Prime Minister Rasmussen announced in February 2007 that most Danish troops would be withdrawn from Iraq by August 2007, as Iraqi forces had become capable of taking over security responsibilities in the Basra area, where the Danish troops had been concentrated.

U.S.-DANISH RELATIONS

Denmark is a close NATO ally, and overall U.S.-Danish relations are excellent. Denmark is active in

Afghanistan and Kosovo, as well as a leader in the Baltic region. Prime Minister Rasmussen reaffirmed that Denmark would remain engaged in Iraq even as its troop levels there decline. Denmark and the United States consult closely on European political and security matters. Denmark shares U.S. views on the positive ramifications of NATO enlargement.

Denmark is an active coalition partner in the War on Terrorism, and Danish troops are supporting U.S.-led stabilization efforts in Afghanistan and Iraq. The U.S. also engages Denmark in a broad cooperative agenda through the Enhanced Partnership in Northern Europe (EPINE)—the U.S. policy structure to strengthen U.S.-Nordic-Baltic policy and program coordination. President Bush made an official working visit to Copenhagen in July 2005, and Prime Minister Rasmussen met with the President at Camp David in June 2006 and in Crawford, Texas in March 2008.

Denmark's active liberal trade policy in the EU, OECD, and WTO largely coincides with U.S. interests. The U.S. is Denmark's largest non-European trade partner with about 5% of Danish merchandise trade. Denmark's role in European environmental and agricultural issues and its strategic location at the entrance to the Baltic Sea have made Copenhagen a center for U.S. agencies and the private sector dealing with the Nordic/Baltic region.

American culture—and particularly popular culture, from jazz, rock, and rap to television shows and literature— is very popular in Denmark. Some 311,000 U.S. tourists visit the country annually.

The U.S. Air Force (USAF) base and early warning radar at Thule, Greenland—a Danish self-governing territory—serve as a vital link in Western defenses. In August 2004, the Danish and Greenland Home Rule governments gave permission for the early warning radar to be updated in connection with a role in the U.S. ballistic missile defense system. At the same time, agreements were signed to enhance economic, technical, and environmental cooperation between the United States and Greenland.

TRAVEL

Consular Information Sheet

November 26, 2008

Country Description: Denmark is a highly developed stable democracy with a modern economy. Greenland is a self-governing dependency of Denmark. The Faroe Islands are a self-governing overseas administrative division of Denmark.

Entry Requirements: Denmark is a party to the Schengen agreement. As such, U.S. citizens may enter Denmark for up to 90 days for tourist or business purposes without a visa. The passport should be valid for at least three months beyond the period of stay. For further details about travel into and within Schengen countries, please see our fact sheet. Passport and visa regulations are similar for Denmark, Greenland, and the Faroes. Contact the Royal Danish Embassy at 3200 Whitehaven Street, NW, Washington, DC 20008, telephone (202) 234-4300 or visit its web site at http://www.denmarkemb.org for the most current visa information. Another source of useful information, available in both English and Danish, is the Danish Immigration Service web site at http://www.nyidanmark.dk/da-dk.

Safety and Security: Denmark remains largely free of terrorist incidents, however the country shares, with the rest of Western Europe, an increased threat of Islamic terrorism. Like other countries in the Schengen area, Denmark's open borders with its Western European neighbors allow the possibility of terrorist groups entering and exiting the country with anonymity. Americans are reminded to remain vigilant with regard to their personal security and to exercise caution.

Public demonstrations occasionally occur in Copenhagen and other Danish cities and are generally peaceful events. Prior police approval is required for public demonstrations, and police oversight is routinely provided to ensure adequate security for participants and passers-by. Nonetheless, as with any large crowd comprised of diverse groups, situations may develop which could pose a threat to public safety. U.S. citizens are advised to avoid areas where public demonstrations are taking place.

From time to time Copenhagen may experience protest activities from young people in their attempt to defend their self-proclaimed rights to either property (club activity buildings) or other privileges provided by Danish public means. American citizens should be aware that participation in illegal demonstrations or

street riots may result in immediate imprisonment and long term bans on re-entering Denmark.

For the latest security information, Americans traveling abroad should regularly monitor the Department's Internet website at http://travel.state.gov, where the current Worldwide Caution Travel Alert, Travel Warnings, and Travel Alerts can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll-free in the United States, or, for callers outside the United States and Canada, a regular toll line at 1-202-501-4444.

Crime: Denmark, Greenland, and the Faroes all have very low violent crime rates, however, non-violent crimes of opportunity have increased over the last few years. Embassy Copenhagen has observed a significant increase in the number of passport thefts during the last few years. Especially in Copenhagen and other major Danish cities, tourists can become targets for pickpockets and sophisticated thieves. Criminals frequent airports, train stations, and cruise ship quays to take advantage of weary, luggage-burdened travelers. Thieves also operate at popular tourist attractions, shopping streets and restaurants. In hotel lobbies and breakfast areas, thieves take advantage of even a brief lapse in attention to snatch jackets, purses, and backpacks. Women's purses placed either on the backs of chairs or on the floor are typical targets for thieves. You should secure your personal possessions at all times. Car and home break-ins are more prevalent than a few years ago.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, to contact family members or friends, and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

Denmark has a program to provide financial compensation to victims who suffer serious criminal injuries. According to existing regulations, the victim must report the incident to the police within 24 hours. Danish police routinely inform victims of serious crime of their rights to seek compensation. The relevant forms can be obtained from the police or the Danish Victims' Compensation Board: Civilstyrelsen, Erstatningsnaevnet, Gyldenløvesgade 11, 1600 Copenhagen V, tel.: (45) 33-92- 3334; fax: (45) 39-20-45-05; www.erstatningsnaevnet.dk; email: erstatningsnaevnet@erstatningsnaevnet.dk. Claim processing time is a minimum of 3 months. There is no maximum award limit.

The local equivalent to the "911" emergency line in Denmark is 112.

Medical Facilities and Health Information: Excellent medical facilities are widely available in Denmark. In Greenland and the Faroe Islands, medical facilities are limited and evacuation is required for serious illness or injury. Although emergency medical treatment is free of charge, the patient is charged for follow-up care.

The U.S. Department of State is unaware of any HIV/AIDS entry restrictions for visitors to or foreign residents of Denmark.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's (CDC) hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's web site at http://cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int.en. Further health information for travelers is available at http://www.who.int/ith.

Medical Insurance: The Department strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Denmark is provided for general reference only, and may not be totally accurate in a particular location or circumstance. A valid U.S. driver's license may be used while visiting Denmark, but the driver must be at least 18 years old. Driving in Denmark is on the right side of the road. Road signs use standard international symbols. Many urban streets have traffic lanes reserved for public transport only. Unless otherwise noted on traffic signs, the speed limit is 50 km/h in urban areas, 80 km/h on open roads, and 130 km/h on expressways.

Use of seat belts is mandatory for drivers and all passengers. Children under three years of age must be secured with approved safety equipment appropriate to the child's age, size, and weight. Children from three to six years of age may use approved child or booster seats instead of seat belts.

Driving under the influence of alcohol or drugs is considered a very serious offense. The rules are stringently enforced, and violations can result in stiff fines and possible jail sentences.

Copenhagen, the capital and largest city in Denmark, has an extensive and efficient public transportation system. Trains and buses connect Copenhagen with other major cities in Denmark and to Norway, Sweden, and Germany. Bicycles are also a common mode of transportation in Denmark. Passengers exiting public or tourist buses, as well as tourists

driving rental cars, should watch for bicycles on their designated paths, which are usually located between the pedestrian sidewalks and the traffic lanes.

Danish expressways, highways, and secondary roads are of high quality and connect all areas of the country. It is possible to drive from the northern tip of Denmark to the German border in the south in just four hours. Greenland has no established road system, and domestic travel is performed by foot, boat, or by air. The majority of the Faroe Islands are connected by bridges or serviced by boat. Although the largest islands have roads, most domestic travel is done on foot, horseback, boat, or by air.

The emergency telephone number for police/fire/ambulance in Denmark and the Faroe Islands is 112. In Greenland contact the local police.

Visit the website of the country's national tourist office and national authority responsible for road safety at http://www.denmark.org. See also additional information on driving in Denmark at http://www.trafikken.dk.

Aviation Safety Oversight: The U.S. Federal Aviation Administration (FAA) has assessed the Government of Denmark's Civil Aviation Authority as being in compliance with International Civil Aviation Organization (ICAO) aviation safety standards for the oversight of Denmark's air carrier operations. This rating applies to Greenland and the Faroe Islands as well. For more information, travelers may visit the FAA's internet web site at www.faa.gov.

Special Circumstances: The official unit of currency in Denmark is the Danish krone. ATM machines are widely available throughout Denmark. For information concerning the importation of pets into Denmark, please visit the following website: http://www.foedevarestyrelsen.dk.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protection available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating Denmark's laws, even unknowingly, may be expelled, arrested, or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Denmark are severe and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in Denmark are encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration web site, https://travelregistration.state.gov, and to obtain updated information on travel and security within Denmark. Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency.

The U.S. Embassy is located at Dag Hammarskjolds Alle 24; 2100 Copenhagen, telephone: (45) 33-41-71-00; Embassy fax: (45) 35-43-02-23; Consular Section fax: (45) 35-38-96-16; After-hours emergency telephone: (45) 35-55-92-70. Information is also available via the U.S. Embassy's website at http://www.usembassy.dk. The United States has no consular presence in Greenland or the Faroe Islands.

Intercountry Adoption

July 2008

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is based on public sources and our current understanding. Questions involving foreign and U.S. immigration laws and legal interpretation should be addressed respectively to qualified foreign or U.S. legal counsel.

The Hague Convention on Intercountry Adoption: The Hague Convention on Intercountry Adoption, to which the United States became a party on April 1, 2008, establishes legal and regulatory requirements for intercountry adoption. Denmark is a party to The Hague Convention on Protection of Children and Co-operation in Respect of Intercountry Adoption (the Convention) and with which the Convention is in force for the United States.

There are few children eligible for intercountry adoption from Denmark, with a long waiting list of Danish prospective adoptive parents. While legally possible, intercountry adoption of a Danish orphan by foreigners is unlikely.

Patterns of Immigration: No Danish orphans have received U.S. immigrant visas in the past five fiscal years.

Adoption Authority: The Danish Ministry of Family & Consumer Affairs, Department of Family Affairs is the adoption law-making branch of the Danish government and is also the Central Authority for The Hague Intercountry Adoption Convention. The Department certifies adoption agencies and monitors their work to ensure that they comply with the law.

Danish Ministry of Family & Consumer Affairs
Department of Family Affairs
Stormgade 2-6
1470 Copenhagen

Tel: +45-3392 3302
Fax: +45-3927 1889
Email: familiestyrelsen@famstyr.dk
Web site:
http://www.familiestyrelsen.dk

Joint Councils are established at the five Regional State Administrations (Statsforvaltning) in Denmark. The Regional State Administration mainly concentrates on family issues: divorce, child custody, maintenance. The prospective parents file their initial application with the local Joint Council of the Regional State Administration in the jurisdiction where they reside. A Joint Council consists of three members–a social worker, a lawyer, and a medical officer. The Joint Council determines whether the initial application for adoption may be approved for further processing. Decisions reached by the Joint Councils may be appealed to the Danish National Board of Adoption, which is a department of the Ministry of Justice at:

Danish National Board of Adoption
Stormgade 2-6
1470 Copenhagen
Tel: +45-3392 3302
Fax: +45-3927 1889
Email: an@adoptionsnaevnet.dk
Web site:
http://www.adoptionsnaevnet.dk

The Danish National Board of Adoption supervises the Joint Councils, observes national and international developments in adoption matters, collects information concerning adoption, negotiates with authorities and organizations in other countries, and supplies general information.

A complete list of Joint Councils can be found at http://www.statsforvaltning.dk

Eligibility to Adopt: The age difference between the applicant and the prospective child should not be more than 40 years. Married couples must adopt as a couple. Single people can also adopt. Danish law prohibits same-sex couples from adopting in Denmark.

Residency Requirements: Adoptive parents must be legally admitted residents of Denmark to adopt domestically or intercountry. Temporary visitors without an established home in Denmark cannot apply.

Time Frame: From the initial contact with the Joint Council at the Regional State Administration until the adoptive parents can be united with the child, the time frame is a minimum of 18 months, but may be as long as 2½ years.

Adoption Agencies and Attorneys: Because Denmark is a Convention country, adoption services must be provided by an accredited agency, temporarily accredited agency, approved person, supervised provider, or exempted provider. It is essential that prospective adoptive parent(s) seeking to adopt from a Convention country use an accredited adoption service provider. The Department maintains a current list of U.S. accredited adoption service providers. The list of accredited adoption service providers is also provided on the website of The Hague Permanent Bureau at www.hcch.net.

Domestic adoptions in Denmark are processed via the five Regional State Administrations in the jurisdiction where the prospective parents reside. Private adoption agencies are accredited by the Danish government to provide adoption services. For a list of these adoption agencies, please visit: http://www.familiestyrelsen.dk.

Adoption Fees: Domestic adoptions of Danish children are free of charge. The cost of an intercountry adoption (adopting a child in a third country and then taking him or her to Denmark to reside) is approximately Danish Kroner 74,000 (USD $15,800), depending on the country of the child's origin. Travel expenses must be added to this amount. Once the adoption has been finalized, the adoptive parents are entitled to a Danish Government lump-sum relief benefit of Danish Kroner 42,000 (USD $8,950) to help reduce their overall expenses.

Adoption Procedures: Prospective adoptive parents file an application with their Regional State Administration. The application is processed in three phases. The first phase determines whether the applicants meet the following general conditions for adoptive parents: the age difference between the applicants and the child should not in general be more than 40 years; couples must be married and have lived in the same household for at least 2½ years; the physical and psychological health of the applicants must meet certain criteria, the applicants' home must be suitable to house a child; the applicants must be of proper financial standing; and the applicants cannot have a criminal record that would make them unfit to become adoptive parents. Applicants cannot proceed to phase two without approval by the Joint Council.

The second phase is a pre-adoption counseling training program, mandatory for all applicants who have not previously adopted a child from abroad. The purpose of the training is to supply applicants with information concerning different aspects of adoption, and to provide a basis for the applicants themselves to determine whether or not they possess the necessary resources (financial as well as parenting abilities) to adopt a foreign child. The training course runs over a weekend and a half (one weekend session, followed by one Saturday or Sunday session). Participation in a pre-adoption training program costs Danish Kroner 1,500 (USD $325.

The third phase includes one or more interviews with the secretariat of the Joint Council. At the end of the third phase, a home study report is presented to the Joint Council for final decision and approval. The prospective parents proceed by submitting their approval to one of the Danish government-authorized adoption agencies.

Adoption of a child is governed by the laws of the child's country of origin. The Department of State produces intercountry adoption flyers for every country in the world, and U.S. prospective adoptive parents, even if they are residing outside the United States, should consult the flyer for the country from which they plan to

adopt. The U.S. Embassy in the child's country of origin will also be able to provide additional information.

Required Documents: The initial application form, which can be obtained from the Regional State Administration, must be accompanied by the following documents: birth certificate, marriage certificate, latest tax return showing financial status and documentation whether outstanding arrears exist, and a certificate of health. An application to participate in the pre-adoption counseling program must be filed with the Department of Family Affairs, Office of Training Programs. If the applicants wish to continue the process after they complete the counseling program, a third application must be filed to start phase three. When the child arrives in Denmark from his or her country of origin (after that country's adoption procedures have been completed), the adoptive parents must apply to the Regional State Administration for an Adoption Certificate. With the Adoption Certificate, the adoption is finalized, and pursuant to Danish law, the adopted child has the same rights as a biological child.

Additional Information: For information on intercountry adoption and international parental child abduction, and security information for U.S. citizens traveling abroad, call Toll Free 1-888-407-4747. This number is available from 8:00 a.m. to 8:00 p.m. EST/EDT, Monday through Friday (except U.S. federal holidays). Callers who are unable to use toll-free numbers, such as those calling from overseas, may obtain information and assistance during these hours by calling 1-202-501-4444.

DJIBOUTI

Compiled from the November 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Republic of Djibouti

PROFILE

Geography

Area: 21,883 sq. km. (8,450 sq. mi.); about the size of Massachusetts.
Cities: Capital—Djibouti. Other cities—Dikhil, Arta, Ali-Sabieh, Obock, Tadjoura.
Terrain: Coastal desert.
Climate: Torrid and dry.

People

Nationality: Noun and adjective—Djiboutian(s).
Population: (est.) Between 466,900 and 650,000.
Annual growth rate: (2005 est.) 2.6%.
Ethnic groups: Somali, Afar, Ethiopian, Arab, French, and Italian.
Religions: Muslim 94%, Christian 6%.
Languages: French and Arabic (official); Somali and Afar widely used.
Education: Literacy—46.2%.
Health: Infant mortality rate—100 to 150/1,000. Life expectancy (2005 est.)—43.1 years.
Work force: Low employment rate; estimates run well under 50% of the work force. The largest employers are the Government of Djibouti, including telecommunications and electricity; Port of Djibouti; and airport. The U.S. Government, including the military camp and the embassy, is the second largest employer. Able-bodied unemployed population (est. 2006)—60%.

Government

Type: Republic.
Constitution: Ratified September 1992 by referendum.
Independence: June 27, 1977.
Government branches: Executive—president. Legislative—65-member parliament, cabinet, prime minister. Judicial—based on French civil law system, traditional practices, and Islamic law.
Political subdivisions: 6 cercles (districts)—Ali-Sabieh, Arta, Dikhil, Djibouti, Obock, and Tadjoura.
Political parties: People's Rally for Progress (RPP) established in 1981; New Democratic Party (PRD) and the National Democratic Party (PND) were both established in 1992; and the Front For The Restoration of Unity and Democracy (FRUD) was legally recognized in 1994. Five additional parties were established in 2002: Djibouti Development Party (PDD); Peoples Social Democratic Party (PPSD); Republican Alliance for Democracy (ARD); Union for Democracy and Justice (UDJ); Movement for Democratic Renewal (MRD).
Suffrage: Universal at 18.
National holidays: Independence Day, June 27 (1977).

Economy

GDP: (2006 est.) $768 million.
Adjusted per capita income: $850 per capita for expatriates, $450 for Djiboutians.
Natural resources: Minerals (salt, perlite, gypsum, limestone) and energy resources (geothermal and solar).
Agriculture: (less than 3% of GDP) Products—livestock, fishing, and limited commercial crops, including fruits and vegetables.
Industry: Types—banking and insurance (12.5% of GDP), public administration (22% of GDP), construction and public works, manufacturing, commerce, and agriculture.
Trade: (2004 est.) Imports—$987 million: consists of basic commodities, including food and beverages, pharmaceutical drugs, transport equipment, chemicals, and petroleum products. Exports—$250 million: re-exports, hides and skins, and coffee (in-transit). Major markets (2004)—France, Ethiopia, Somalia, India, China, and Saudi Arabia and other Arabian peninsula countries.

PEOPLE

About two-thirds of the Republic of Djibouti's 650,000 inhabitants live in the capital city. The indigenous population is divided between the majority Somalis (predominantly of the Issa

tribe, with minority Issaq and Gadabursi representation) and the Afars (Danakils). All are Cushitic-speaking peoples, and nearly all are Muslim. Among the 15,000 foreigners residing in Djibouti, the French are the most numerous. Among the French are 3,000 troops.

HISTORY

The Republic of Djibouti gained its independence on June 27, 1977. It is the successor to French Somaliland (later called the French Territory of the Afars and Issas), which was created in the first half of the 19th century as a result of French interest in the Horn of Africa. However, the history of Djibouti, recorded in poetry and songs of its nomadic peoples, goes back thousands of years to a time when Djiboutians traded hides and skins for the perfumes and spices of ancient Egypt, India, and China. Through close contacts with the Arabian Peninsula for more than 1,000 years, the Somali and Afar tribes in this region became the first on the African continent to adopt Islam.

It was Rochet d'Hericourt's exploration into Shoa (1839-42) that marked the beginning of French interest in the African shores of the Red Sea. Further exploration by Henri Lambert, French Consular Agent at Aden, and Captain Fleuriot de Langle led to a treaty of friendship and assistance between France and the sultans of Raheita, Tadjoura, and Gobaad, from whom the French purchased the anchorage of Obock (1862).

Growing French interest in the area took place against a backdrop of British activity in Egypt and the opening of the Suez Canal in 1869. In 1884-85, France expanded its protectorate to include the shores of the Gulf of Tadjoura and the Somaliland. Boundaries of the protectorate, marked out in 1897 by France and Emperor Menelik II of Ethiopia, were affirmed further by agreements with Ethiopian Emperor Haile Selassie I in 1945 and 1954.

The administrative capital was moved from Obock to Djibouti in 1892. In 1896, Djibouti was named French Somaliland. Djibouti, which has a good natural harbor and ready access to the Ethiopian highlands, attracted trade caravans crossing East Africa as well as Somali settlers from the south. The Franco-Ethiopian railway, linking Djibouti to the heart of Ethiopia, was begun in 1897 and reached Addis Ababa in June 1917, further facilitating the increase of trade.

During the Italian invasion and occupation of Ethiopia in the 1930s and during World War II, constant border skirmishes occurred between French and Italian forces. The area was ruled by the Vichy (French) government from the fall of France until December 1942, and fell under British blockade during that period. Free French and the Allied forces recaptured Djibouti at the end of 1942. A local battalion from Djibouti participated in the liberation of France in 1944.

On July 22, 1957, the colony was reorganized to give the people considerable self-government. On the same day, a decree applying the Overseas Reform Act (Loi Cadre) of June 23, 1956, established a territorial assembly that elected eight of its members to an executive council. Members of the executive council were responsible for one or more of the territorial services and carried the title of minister. The council advised the French-appointed governor general.

In a September 1958 constitutional referendum, French Somaliland opted to join the French community as an overseas territory. This act entitled the region to representation by one deputy and one senator in the French Parliament, and one counselor in the French Union Assembly.

The first elections to the territorial assembly were held on November 23, 1958, under a system of proportional representation. In the next assembly elections (1963), a new electoral law was enacted. Representation was abolished in exchange for a system of straight plurality vote based on lists submitted by political parties in seven designated districts. Ali Aref Bourhan, allegedly of Turkish origin, was selected to be the president of the executive council. French President Charles de Gaulle's August 1966 visit to Djibouti was marked by 2 days of public demonstrations by Somalis demanding independence. On September 21, 1966, Louis Saget, appointed governor general of the territory after the demonstrations, announced the French Government's decision to hold a referendum to determine whether the people would remain within the French Republic or become independent. In March 1967, 60% chose to continue the territory's association with France.

In July of that year, a directive from Paris formally changed the name of the region to the French Territory of Afars and Issas. The directive also reorganized the governmental structure of the territory, making the senior French representative, formerly the governor general, a high commissioner. In addition, the executive council was redesignated as the council of government, with nine members.

In 1975, the French Government began to accommodate increasingly insistent demands for independence. In June 1976, the territory's citizenship law, which favored the Afar minority, was revised to reflect more closely the weight of the Issa Somali. The electorate voted for independence in a May 1977 referendum. The Republic of Djibouti was established on June 27, 1977, and Hassan Gouled Aptidon became the country's first president. In 1981, he was again elected president of Djibouti. He was re-elected, unopposed, to a second 6-year term in April 1987 and to a third 6-year term in May 1993 multiparty elections.

In early 1992, the constitution permitted the legalization of four political parties for a period of 10 years, after which a complete multiparty system would be installed. By the time of the December 1992 national assembly elections, only three had qualified. They were the Rassemblement Populaire Pour le Progres (Peo-

ple's Rally for Progress—RPP), which was the only legal party from 1981 until 1992; the Parti du Renouveau Democratique (The Party for Democratic Renewal—PRD); and the Parti National Democratique (National Democratic Party—PND). Only the RPP and the PRD contested the national assembly elections, and the PND withdrew, claiming that there were too many unanswered questions on the conduct of the elections and too many opportunities for government fraud. The RPP won all 65 seats in the national assembly, with a turnout of less than 50% of the electorate.

In early November 1991, civil war erupted in Djibouti between the government and a predominantly Afar rebel group, the Front for the Restoration of Unity and Democracy (FRUD). The FRUD signed a peace accord with the government in December 1994, ending the conflict. Two FRUD members were made cabinet members, and in the presidential elections of 1999 the FRUD campaigned in support of the RPP.

In 1999, Ismail Omar Guelleh—President Hassan Gouled Aptidon's chief of staff, head of security, and key adviser for over 20 years—was elected to the presidency as the RPP candidate. He received 74% of the vote, with the other 26% going to opposition candidate Moussa Ahmed Idriss, of the Unified Djiboutian Opposition (ODU). For the first time since independence, no group boycotted the election. Moussa Ahmed Idriss and the ODU later challenged the results based on election "irregularities" and the assertion that "foreigners" had voted in various districts of the capital; however, international and locally based observers considered the election to be generally fair, and cited only minor technical difficulties. Ismail Omar Guelleh took the oath of office as the second President of the Republic of Djibouti on May 8, 1999, with the support of an alliance between the RPP and the government-recognized section of the Afar-led FRUD. In February 2000, another branch of FRUD signed a peace accord with the government. On May 12, 2001, President Ismail Omar Guelleh presided over the signing of what was termed the final peace accord officially ending the decade-long civil war between the government and the armed faction of the FRUD. The peace accord successfully completed the peace process begun on February 7, 2000 in Paris. Ahmed Dini Ahmed represented the FRUD.

GOVERNMENT AND POLITICAL CONDITIONS

Djibouti is a republic whose electorate approved the current constitution in September 1992. Many laws and decrees from before independence remain in effect. In the presidential election held April 8, 2005 Ismail Omar Guelleh was re-elected to a second 6-year term at the head of a multi-party coalition that included the FRUD and other major parties.

A loose coalition of opposition parties again boycotted the election. Currently, political power is shared by a Somali president and an Afar prime minister, with an Afar career diplomat as Foreign Minister and other cabinet posts roughly divided. However, Issas are predominate in the government, civil service, and the ruling party. That, together with a short-

age of non-government employment, has bred resentment and continued political competition between the Somali Issas and the Afars. In March 2006, Djibouti held its first regional elections and began implementing a decentralization plan. The broad pro-government coalition, including FRUD candidates, again ran unopposed when the government refused to meet opposition preconditions for participation. Parliamentary elections were held in February 2008.

Djibouti has its own armed forces, including a small army, which grew significantly with the start of the civil war in 1991. With the 2001 final peace accord between the government and the Afar-dominated FRUD, the armed forces have been downsized. The country's security is supplemented by a formal security accord with the Government of France, which guarantees Djibouti's territorial integrity against foreign incursions. France maintains one of its largest military bases outside France in Djibouti. There are some 3,000 French troops stationed in Djibouti, including units of the famed French Foreign Legion.

The right to own property is respected in Djibouti. The government has reorganized the labor unions. While there have been open elections of union leaders in the past, some labor leaders allege interference in their internal elections. Others voice opposition to newly-implemented labor laws that apply to new jobs created in free zones and that are less favorable to labor.

In 2002, following a broad national debate, Djibouti enacted a new "Family Law" enhancing the protection of women and children, unifying legal treatment of all women, and replacing Sharia. The government established a minister-designate for women's affairs and is engaged in an ongoing effort to increase public recognition of women's rights and to ensure enforcement. In 2007, it began establishing a network of new counseling offices to assist women seeking to understand and protect their rights. Women in Djibouti enjoy a higher public status than in many other Islamic countries. The government is leading efforts to stop illegal and abusive traditional practices, including female genital mutilation. As the result of a three-year effort, the percentage of girls attending primary school increased significantly and is now more than 50%. However, women's rights and family planning continue to face difficult challenges, many stemming from acute poverty in both rural and urban areas. With female ministers and members of parliament, the presence of women in government has increased. Despite the gains, education of girls still lags behind boys, and employment opportunities are better for male applicants.

Principal Government Officials

Last Updated: 11/12/08

Pres.: **Ismail Omar GUELLEH**
Prime Min.: **Mohamed Dileita DILEITA**
Min. of Agriculture, Livestock, & the Sea: **Dini Abdallah BILILIS**

Min. of Communication & Culture: **Rifki Abdoulkader BAMAKHRAMA**
Min. of Defense: **OUGOUREH KIFLEH Ahmed**
Min. of Economy, Finance, & Privatization: **Yacin Elmi BOUH**
Min. of Education: **Abdi Ibrahim ABSIEH**
Min. of Employment & National Solidarity: **Mohamed Barkat ABDILLAHI**
Min. of Energy & Natural Resources: **Mohamed Ali MOHAMED**
Min. of Equipment & Transport: **Elmi Obsieh WAISS**
Min. of Foreign Affairs, Intl. Cooperation, & Parliamentary Relations: **Mahamoud Ali YOUSSOUF**
Min. of Health: **Banoita Tourab SALEH, Dr.**
Min. of Housing, Town Planning, Environment, & National & Regional Development: **Abdallah Adillahi MIGUIL**
Min. of Interior & Decentralization: **Aboulkader Du'ale WAISS**
Min. of Justice & Penal & Muslim Affairs: **Ismael Ibrahim HEMED**
Min. of Presidential Affairs & Investment Promotion: **Osman Ahmed MOUSSA**
Min. of Trade & Industry: **Saleban Omar OUDIN**
Min. of Urban Planning, Housing, Environment, National, & Regional Development: **Souleiman Omar OUDINE**
Min. of Youth, Sports, Leisure, & Tourism: **Akban Goita MOUSSA**
Min.-Del. to the Prime Min. for Mosque Properties & Muslim Affairs: **Cheik Mogueh DIRIR**
Min.-Del. to the Prime Min. for the Promotion of Women, Family Well-Being, & Social Affairs: **Hawa Ahmed YOUSSOUF**
Governor, Central Bank: **Mahamoud Haid DJAMA**
Ambassador to the US: **Roble OLHAYE Oudine**
Permanent Representative to the UN, New York: **Roble OLHAYE Oudine**

Djibouti's mission to the UN is located at 866 UN Plaza, Suite 4011, New York, NY 10017 (tel. 212-753-3163). Djibouti's embassy in Washington is located at Suite 515, 1156 15th Street, NW, Washington, DC 20005 (tel. 202- 331-0270; fax 202-331-0302).

ECONOMY

Djibouti's economy depends largely on its proximity to the large Ethiopian market and a large foreign expatriate community. Its main economic activities are the Port of Djibouti, the banking sector, the airport, and the operation of the Addis Ababa-Djibouti railroad. During the "lost decade" following the brunt of its civil war (1991-94), there was a significant diversion of government budgetary resources from developmental and social services to military needs. However, from 2001 on, Djibouti has become a magnet for private sector capital investment, attracting inflows that now average more than $200 million. It has also significantly improved its finances, paying current salaries, maintaining reserves, and generating a growth rate in 2006 of approximately 4.5%. Djibouti has become a significant regional banking hub, with approximately $600 million in dollar deposits. Its currency, the Djiboutian Franc, was linked to the dollar (and to gold) in 1949 and appreciated twice over the interim when the dollar was devalued and then freed to float. Agriculture

and industry are little developed, in part due to the harsh climate, high production costs, unskilled labor, and limited natural resources. Mineral deposits exist in the country, but with the exception of an extraordinary salt deposit at Lac Asal, the lowest point in Africa, they have not been exploited. The arid soil is unproductive—89% is desert wasteland, 10% is pasture, and 1% is forested. Deforestation for charcoal is a significant problem, as it now replaces expensive imported cooking gas in many urban homes. Services and commerce provide most of the gross domestic product.

Djibouti's most important economic asset is its strategic location on the busy shipping route between the Mediterranean Sea and the Indian Ocean. Roughly 60% of all commercial ships in the world use its waters from the Red Sea through the Bab-el-Mandeb strait and into the Gulf of Aden and the Indian Ocean. Its old port is an increasingly important transshipment point for containers as well as a destination port for Ethiopian trade. Last year alone, private investment in the old port totaled approximately $50 million. Djibouti is now in the second of three phases of a multi-year, $800 million, privately-financed project to build a new port with fueling, container, and free zone components. The old port will continue serving as a general shipping, bulk cargo, and break-bulk facility and also as the host of a small French naval facility.

Business soared at the Port of Djibouti when hostilities between Eritrea and Ethiopia denied Ethiopia access to the Eritrean Port of Assab. Djibouti became the only significant port for landlocked Ethiopia, handling all its imports and exports, including huge shipments of U.S. food aid in 2000 during the drought and famine. In 2000, Dubai Ports World took over management of Djibouti's port and later its customs and airport operations. The result has been a significant increase in investment, efficiency, activity, and port revenues. The Addis Ababa-Djibouti railroad is the only line serving central and southeastern Ethiopia. The single-track railway—a prime source of employment—occupies a prominent place in Ethiopia's internal distribution system for domestic commodities such as cement, cotton textiles, sugar, cereals, and charcoal. A weekly train from Ethiopia brings in most of Djibouti's fresh fruits and vegetables. In March 2006, the Governments of Ethiopia and Djibouti (which co-own the railway) selected the South African firm COMAZAR to manage the line. They are still in negotiations over the management agreement. In addition, the European Union is considering a $100 million project to upgrade a portion of the rail line.

Principal exports from the region transiting Djibouti are coffee, salt, live animals, hides, dried beans, cereals other agricultural products, and wax. Djibouti itself has few exports, and the majority of its imports come from France. Most imports are consumed in Djibouti, and the remainder go to Ethiopia and northwestern Somalia. Djibouti's unfavorable balance of trade is offset partially by invisible earnings such as transit taxes and harbor dues. In 2001, U.S. exports to Djibouti totaled $18.7 million, while U.S. imports from Djibouti were about $1 million.

The city of Djibouti has the only paved airport in the republic. Djibouti has one of the most liberal economic regimes in Africa, with almost unrestricted banking and commerce sectors.

FOREIGN RELATIONS

Military and economic agreements with France provide continued security and economic assistance. Links with Arab states and East Asian states, Japan and China in particular, also are welcome. Djibouti is a member of the Arab League, as well as the African Union, the Inter-Governmental Authority on Development (IGAD), and the Common Market for Eastern and Southern Africa (COMESA).

Djibouti is greatly affected by events in Somalia and Ethiopia, so relations are important and, at times, delicate. The 1991 falls of the Siad Barre and Mengistu governments in Somalia and Ethiopia, respectively, caused Djibouti to face national security threats due to instability in the neighboring states and a massive influx of refugees estimated at 100,000 from Somalia and Ethiopia.

In 2000, after 3 years of insufficient rain, 50,000 drought victims entered Djibouti. In 1996, a revitalized organization of seven East African states, the Inter-Governmental Authority on Development (IGAD), established its secretariat in Djibouti. IGAD's mandate is for regional cooperation and economic integration, and it has also sought to play a positive role promoting regional stability, including its efforts in support of Somalia's Transitional Federal Government. Djibouti seeks to play the role of neutral in the frequently tense regional politics of the Horn of Africa.

It became Ethiopia's sole link to the sea when fighting broke out between Ethiopia and Eritrea in 1998. Aside from a two-year break in relations from 1998-2000, Djibouti has maintained a cordial relationship with Eritrea. Eritrea's President Isaias and Djibouti's President Guelleh exchanged visits in 2001, and Isaias returned to Djibouti in 2006 for the regional summit of the Common Market for Eastern and Southern Africa (COMESA), hosted by President Guelleh in his capacity as incoming COMESA President.

Djibouti continues to cultivate cordial relations with Ethiopia, reflecting the fundamental economic ties between the two countries and a long tradition of interchanges. However, rising tensions in Somalia and Ethiopian military involvement in Somalia in 2007 fueled widespread criticism of Ethiopia among Djibouti's majority Somali-speaking population. President Guelleh attended the 2007 Africa Union summit in Ethiopia and supports the African Union peacekeeping operation for Somalia (AMISOM).

U.S.-DJIBOUTIAN RELATIONS

In April 1977, the United States established a Consulate General in Djibouti and upon independence in June 1977 raised the status of its mission to an embassy. The first U.S. Ambassador to the Republic of Djibouti arrived in October 1980. Over the past decade, the United States has been a principal provider of humanitarian assistance for famine relief, and has sponsored health care, education, good governance, and security assistance programs.

Djibouti has allowed the U.S. military, as well as other nations, access to its port and airport facilities. The Djiboutian Government has been very supportive of U.S. and Western interests, particularly during the Gulf crisis of 1990-91 and after the terrorist attacks of September 11, 2001. In 2002, Djibouti agreed to host a U.S. military presence at Camp Lemonier, a former French Foreign Legion base outside the capital that now houses approximately 1,800 American personnel. U.S. service members provide humanitarian support and development and security assistance to people and governments of the Horn of Africa and Yemen. They support freedom and oppose terrorism. As a victim of past international terrorist attacks, President Guelleh continues to take a very proactive position against terrorism.

TRAVEL

Consular Information Sheet

June 10, 2008

Country Description: Djibouti is a developing African country located at the juncture of the Red Sea and the Indian Ocean. It is a multi-party democracy with a legal system based on French civil law (Djibouti was a French colony until 1977), though modified by traditional practices and Islamic (Sharia) law.

Although exact statistics are unavailable, unemployment is estimated at greater than 50% of the working-age population. Over two-thirds of the country's 650,000 residents live in the capital, also called Djibouti. Modern tourist facilities and communications links are found in the city of Djibouti, but limited outside the capital.

Entry Requirements: A passport, visa, and evidence of yellow fever vaccination are required. Travelers may obtain the latest information on entry requirements from the Embassy of the Republic of Djibouti, 1156 15th Street, N.W., Washington, D.C. 20005, telephone (202) 331-0270, or at the Djibouti Mission to the United Nations, 866 United Nations Plaza, Suite 4011, New York, N.Y. 10017, telephone (212) 753-3163. Overseas, inquiries may be made at the nearest Djiboutian embassy or consulate. In countries where there is no Djiboutian diplomatic representation, travelers may sometimes obtain visas at the French Embassy. Visit the Embassy of Djibouti web site at www.embassy.org/embassies/dj.html for the most current visa information.

American journalists or any American connected with the media must contact the U.S. Embassy's Public Affairs section prior to travel to facilitate entry into Djibouti. If you are unclear whether this applies to you, please contact the U.S. Embassy for more information.

Safety and Security: Djibouti enjoys a stable political climate. However, its international borders are porous and lightly patrolled. In particular, Somalia, Djibouti's neighbor to the south, is a haven for terrorists and insurgent elements. Tensions exist between neighboring Ethiopia and Eritrea due to their long-running border dispute. Since April, 2008, there has been increased tension on Djibouti's border with Eritrea after an incursion by Eritreans in that area. Civil unrest or armed conflict in neighboring countries could disrupt air travel to and from Djibouti or otherwise negatively affect its security.

Terrorism continues to pose a threat in East Africa. U.S. citizens traveling in East Africa should be aware of the potential for indiscriminate attacks on civilian targets in public places, including tourist sites and other sites where Westerners are known to congregate. Visit the State Department web site for the most current travel warning on East Africa.

Travelers should exercise caution when traveling to any remote area of Djibouti, especially near the borders with Eritrea, Ethiopia, and Somalia. The recent Eritrean incursion underscores the importance of increased caution near that border.

Demonstrations have become more frequent due to power outages and the increase in energy prices. Americans are advised to avoid all demonstrations as they may become violent.

Americans considering seaborne travel should exercise extreme caution. There have been several recent incidents of armed attacks and robberies at sea by unknown groups on

ships transiting around the Horn of Africa. See the Country Specific Information (CSI) sheets on Yemen and Somalia for recent information on maritime conditions in Yemeni and Somali waters. It is strongly recommended that vessels convoy in groups and maintain good communications contact at all times. Marine channels 12, 13 and 16 VHF-FM are international call-up and emergency channels and are commonly monitored by ships at sea. 2182 Mhz is the HF international call-up and emergency channel. In the Gulf of Aden, use of transit routes farther offshore appears to reduce, but does not eliminate, the risk of contact with assailants. Wherever possible, travel in trafficked sea-lanes. Avoid loitering in or transiting isolated or remote areas. In the event of an attack, consider activating the Emergency Position Indicating Radio Beacon. Due to distances involved, there may be a considerable delay before assistance arrives. Vessels may also contact the Yemeni Coast Guard 24-hour Operations Center at 967 1 562-402. Operations Center staff members speak English.

U.S. citizens are encouraged to carry a copy of their U.S. passports with them at all times for ready proof of identity and U.S. citizenship if questioned by local officials. Police occasionally stop travelers on the main roads leading out of the capital to check identity documents.

For the latest security information, Americans traveling abroad should regularly monitor the Department's Internet web site where the current Worldwide Caution Travel Alert, Travel Warnings and Travel Alerts can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S., or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: Accurate crime statistics are not available, but crime appears to be on the rise. Most crimes are petty thefts, but there have also been home invasions and more serious crimes. Major crimes involving third country nationals (TCNs) are rare, but increasing in frequency. The number of murders involving Djiboutians and TCNS has increased.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, help you find appropriate medical care, contact family members or friends, and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you understand the local criminal justice process and find an attorney if needed.

Medical Facilities and Health Information: Adequate medical facilities in the capital of Djibouti are limited and medicines are often unavailable. Medicines that are available are extremely expensive. Medical services in some outlying areas may be completely nonexistent. Motorists especially should be aware that in case of an accident outside the capital, emergency medical treatment would depend almost exclusively on passersby. In addition, cell phone coverage in outlying areas is often unavailable, making it impossible to summon help.

Malaria and dengue fever are prevalent in Djibouti. Travelers who become ill with a fever or flu-like illness while traveling in a malaria-risk area and up to one year after returning home should seek prompt medical attention and tell the physician their travel history and what anti-malarial drugs they have been taking.

In 2005, polio was found in all of Djibouti's neighbors (Somalia, Ethiopia, Eritrea and Yemen) and health professionals strongly suspect it is present in Djibouti. The Advisory Committee on Immunization Practices (ACIP) recommends that all infants and children in the United States should receive four doses of inactivated poliovirus vaccine (IPV) at 2, 4, and 6–18 months and 4–6 years of age. Adults who are traveling to polio-endemic and epidemic areas and who have received a primary series with either IPV or oral polio vaccine should receive another dose of IPV. For adults, available data does not indicate the need for more than a single lifetime booster dose with IPV.

The prevalence of tuberculosis (TB) in Djibouti is very high, at over 100 cases per 100,000 population, the highest WHO risk category. Travelers planning to stay more than one month should have pre-departure PPD skin test status documented. Travelers should avoid crowded public places and public transportation whenever possible. Domestic help should be screened for TB.

In May 2006, avian influenza was confirmed in three chickens and one human in Djibouti.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's internet site at http://www.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) website at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Djibouti is provided for general reference only, and may not be totally accurate in a

particular location or circumstance. The Djiboutian Gendarmerie and the national police force share responsibility for road safety in Djibouti. While Djibouti has been declared a "mine-safe" country, this indicates landmines have been identified and marked, not that they have been removed. Landmines are known to be present in northern Tadjourah and Obock districts. In addition, there may be mines in the Ali Sabieh area of the south. Travelers should stay on paved roads and should check with local authorities before using unpaved roads.

Driving on Djibouti roads can be hazardous. Since most roads do not have shoulders or sidewalks, pedestrians and livestock use the roadways both day and night. Driving at night is extremely dangerous and strongly discouraged on all roads outside of Djibouti City. While some main roads in Djibouti are well maintained, roads are often narrow, poorly lit, or washed-out. Many secondary roads are in poor repair or completely washed-out. Drivers and pedestrians should exercise extreme caution. Minibuses and cars often break down; when breakdowns occur, local drivers usually place branches or rocks behind the vehicle to indicate trouble, but these warning signals are barely visible. Excessive speed, unpredictable local driving habits, pedestrians and livestock in the roadway, and the lack of basic safety equipment on many vehicles are daily hazards. Speed limits are posted occasionally but are not enforced. The leafy narcotic khat is widely used, particularly in the afternoons, creating other traffic hazards. Travelers should be aware that police set up wire coils as roadblocks on some of the major roads, and these may be difficult to see at night.

Drivers who do not have a four-wheel drive vehicle will encounter problems driving on rural roads. There are no emergency services for stranded drivers, and it is always advisable to carry a cell phone or satellite phone when undertaking a trip outside of town; however, many parts of the country do not have cell phone coverage. The two main international routes to the capital city, via Dire Dawa, Ethiopia, and Yoboki, Djibouti, both demand that drivers remain vigilant. The route towards Dire Dawa is in very poor condition. Both have a high volume of Ethiopian trucks transporting large cargo. Railroad crossings are often not clearly marked.

The only means of public inter-city travel is by bus. Buses are poorly maintained and their operators often drive erratically with little regard for passenger safety.

Visit the web site of Djibouti's national tourist office and national authority responsible for road safety at http://www.office-tourisme.dj.

Aviation Safety Oversight: As there is no direct commercial air service between the United States and Djibouti, the U.S. Federal Aviation Administration (FAA) has not assessed Djibouti's Civil Aviation Authority for compliance with International Civil Aviation Organization (ICAO) aviation safety standards. For more information, travelers may visit the FAA's internet website at http://www.faa.gov.

Special Circumstances: Although the narcotic khat is legal and widely chewed in Djibouti, it is considered an illegal substance in many countries, including the United States. Djiboutians are generally conservative in dress and manner, especially in rural areas.

Photography of public infrastructure (including, but not limited to, public buildings, seaports, the airport, bridges, military facilities or personnel) is not allowed in Djibouti. Use extreme caution when photographing anyone or anything near prohibited areas. Photographic equipment will be confiscated, and the photographer may be arrested.

Djibouti is a cash-based economy and credit cards are not widely accepted. Automated teller machines (ATMs) are limited. Changing money on the street is legal, but be aware of possible scams as well as personal safety considerations if people observe you carrying large amounts of cash. The exchange rate on the street will be similar to that at a bank or hotel. It is important that the U.S. banknotes that you carry have a date of 2003 or newer because many currency exchanges will not accept U.S. paper money older than 2003.

Djiboutian customs authorities may enforce strict regulations concerning temporary importation into or export from Djibouti of firearms. It is advisable to contact the Embassy of Djibouti in Washington, DC, for specific information regarding customs requirements.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating Djiboutian law, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Djibouti are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in Djibouti are encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration website and to obtain updated information on travel and security within Djibouti. Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate. By registering, American citizens make it easier for the Embassy or Consu-

late to contact them in case of emergency. The U.S. Embassy is located at Plateau du Serpent, Boulevard Marechal Joffre, Djibouti City. The mailing address is Ambassade Americaine, B.P. 185, Djibouti, Republique de Djibouti. The telephone number is (253) 35-39-95. The fax number is (253) 35-39-40. Normal working hours are Sunday through Thursday, 8:00 a.m. to 4:30 p.m.

Intercountry Adoption

July 2006

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is based on public sources and current understanding. Questions involving foreign and U.S. immigration laws and legal interpretation should be addressed respectively to qualified foreign or U.S. legal counsel.

Please Note: Adoption in Djibouti is a very complicated process, time consuming, and with many legal hurdles. Children with Djiboutian citizenship are not eligible for adoption.

Only children born and abandoned in Djibouti of foreign parentage are available for foreign adoption.

Patterns of Immigration: Please review current reports online at http://adoption.state.gov.

Adoption Authority: Tribunal de Première Instance de Djibouti, Office of the Secretary (253) 35-333-89.

Tribunal de Première Instance
Ministère de la Justice
B.P. 12
Djibouti
République de Djibouti

Eligibility Requirements for Adoptive Parents: Adoptive parents must be 25 years of age or older and must be at least 15 years older than the child. If the prospective adoptive parent is a relative, he/she need only be 21 years old. The prospective adoptive parent(s) must also be morally and physically sound to be able to care for the child.

Residency Requirements: The adopters must be physically present in Djibouti at the time of the proposed adoption, but need not be residents. The child must be both physically present in and a resident of Djibouti.

Time Frame: It may take a year or more from the time the adoption application is submitted to the Tribunal de Première Instance until the adoptive parents receive the final documents. Factors bearing on this time frame may include court-ordered investigations, parents' citizenship, court calendar, appeals, and individual case anomalies.

Adoption Agencies and Attorneys: There are no Djiboutian adoption agencies. According to court officials, adoptions do not require the participation of a lawyer, but it is practical to engage someone familiar with the process.

Adoption Fees: The Government of Djibouti processes all adoptions. All procedures undertaken by the court (Adoption Authority) are free of charge. Prospective adoptive parents should expect to pay for any/all required medical examinations for the child, as well as for their own travel expenses.

Adoption Procedures: Once a child has been identified, adoption procedures must be initiated with a written request from the prospective adoptive parent(s) to the President of Tribunal de Première Instance, requesting the court to open an adoption case on their behalf. The court has two responsibilities: first, that of verifying whether the legal conditions necessary for the requested adoption are met; and second, that the adoption is in the best interest of the child. To that effect, it is mandatory that adoptive parent(s) attach the U.S. documents listed in the section below with their application. The court can order an additional social investigation report to complement the one already attached to the initial request, and one or more types of specific medical examinations. The Clerk of the District Court will then forward the request to the police for a background check to be performed (if the prospective adoptive parents are resident in Djibouti).

Procedures for a child with identified biological parent(s): Prior to completing the Djiboutian adoption process, U.S. prospective adoptive parents who wish to adopt a child with identified birth parents should consult with the U.S. Embassy in Djibouti to verify whether the child will be meet the definition of "orphan" as defined by U.S. immigration law.

The birth parents must appear before the court with their I.D. and the child's birth certificate, and sign a consent document. A three-month appeal period is then allowed, during which time the birth parents may reclaim their parental rights or the adoptive parents can decide not to go through with the adoption. At the end of that period, if no appeal is made, the adoptive parents must submit a request to the court to continue the process, after which the court will fix a hearing date. At the hearing, the judge will rule whether to grant a delegation of parental authority, which technically shifts parental authority from birth to adoptive parents. If the adoptive parents are residents of Djibouti, or if they plan to stay for some time, they may be granted temporary custody over the child, to allow the child to physically live with them. The birth parents then have an additional two-month window within which they may reclaim the child. If they do not, the adoptive parents have to submit to the court a request for finalizing the adoption. At the hearing, the court will make a final ruling to grant the adoption. However, for an additional two months the opportunity is given to the Public Ministry (Office of District Attorney) or any other concerned individual (family member), excluding the natu-

ral parents, to appeal for reversal on serious grounds of evidence, if such can show that the adoption will adversely affect the child.

The court can refuse to grant an adoption, and may order the adoptive parents not to break the child's bonds with its biological family. The judgment is always given in a public hearing. Whether the adoption is approved or rejected, the decision can be appealed, and the ensuing appeal may also be subject to a final appeal at the Supreme Court.

Abandoned child with unknown parents: The process is similar to that of a child with identified birth parents, except that the steps pertaining to the birth parents will not be applicable here. Instead, after the adoptive parents have made a written request to the court, the latter will order a police investigation to try to find the birth parents and establish their identity (this may take up to a month). If birth parents cannot be found, or no one claims the child, the police will deliver to the court a certificate of abandonment, after which the court will proceed to consider the case.

Required Documents:

- A police clearance (indicating no arrest record);
- A home study report;
- Proof of adequate financial means and stability (last 3 pay slips, tax return, etc.).

Embassy of the Republic of Djibouti
1156 15th St., NW, Suite 515
Washington, DC 20005
Tel: 202/331-0270

U.S. Immigration Requirements: Prospective adoptive parents are strongly encouraged to consult USCIS publication M-249, *The Immigration of Adopted and Prospective Adoptive Children*, as well as the Department of State publication, *Intercountry Adoptions*. Please see the *Intercountry Adoption* section of this book for more details and review current reports online at http://adoption.state.gov.

Additional Information: Specific questions about adoption in Djibouti may be addressed to the U.S. Embassy in Djibouti. General questions regarding intercountry adoption may be addressed to the Office of Children's Issues, U.S. Department of State, CA/OCS/CI, SA-29, 4th Floor, 2201 C Street, NW, Washington, D.C. 20520-4818, toll-free Tel: 1-888-407-4747.

DOMINICA

Compiled from the July 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Commonwealth of Dominica

PROFILE

Geography

Area: 754 sq. km. (290 sq. mi.).

Cities: Capital—Roseau (population 14,500).

Terrain: Mountainous volcanic island with rainforest cover.

Climate: Tropical.

People

Nationality: Noun and adjective—Dominican (Dom-i-NEE-can).

Population: (2008) 69,000.

Annual growth rate: (2006) 0.55%.

Ethnic groups: Mainly of African descent, mixed Black and European, Syrian and some Carib Amerindians.

Religions: Roman Catholic, Protestant (Methodist, Pentecostal, Seventh-Day Adventist, and Baptist), Islam, Baha'I, Rastafarianism, Anglican, Jehovah's Witnesses, Nazarene, Church of Christ, and Brethren Christian Churches.

Languages: English (official); a French patois is widely spoken.

Education: (2005) Adult literacy—94%.

Health: (2006) Infant mortality rate—13/1,000. Life expectancy—men 72 years; women 77.9 years.

Work force: (2005) 24,370.

Unemployment: (2005) 13.1%.

Government

Type: Parliamentary democracy; republic within the Commonwealth.

Independence: November 3, 1978.

Constitution: November 1978.

Government branches: Executive—president (head of state), prime minister (head of government), cabinet. Legislative—unicameral House of Assembly. Judicial—magistrate and jury courts, Eastern Caribbean Supreme Court (High Court and Court of Appeals), Privy Council.

Political subdivisions: 10 parishes.

Political parties: Dominica Labour Party (incumbent), United Workers Party, and Dominica Freedom Party.

Suffrage: Universal at 18.

Economy

GDP: (2006) $318.5 million.

GDP growth rate: (2006) 4.0%.

Per capita GDP: (2006) $4,758.

Inflation: (2006) 2.4%.

Natural resources: timber, water (hydropower), copper.

Agriculture: (10% of GDP in 2005) Products—bananas, citrus, coconuts, cocoa, herbal oils and extracts.

Manufacturing: (3% of GDP in 2005) Types—agricultural processing, soap and other coconut-based products, apparel.

Trade: (2005) Exports—$39.0 million (merchandise) and $82.0 million (commercial services). Major markets—European Union (27.8%), Jamaica (12.7%), Antigua and Barbuda (11.3%), Trinidad and Tobago (9.0%), and Saint Lucia (6.8%). Imports—$165 million (merchandise) and $49 million (commercial services). Major suppliers—United States (36.6%), Trinidad and Tobago (20.5%), China (19.4%), European Union (13.4%), and Japan (4.6%).

PEOPLE

Almost all Dominicans are descendants of African slaves brought in by colonial planters in the 18th century. Dominica is the only island in the eastern Caribbean to retain some of its pre-Columbian population—the Carib Indians—about 3,000 of whom live on the island's east coast. The population growth rate is very low, due primarily to emigration to more prosperous Caribbean Islands, the United Kingdom, the United States, and Canada. English is the official language; however, because of historic French domination, the most widely spoken dialect is a French patois. Nearly 80% of the population is Catholic. In recent years, a number of Protestant churches have been established.

HISTORY

The island's indigenous Arawak people were expelled or exterminated by

Caribs in the 14th century. Columbus landed there in November 1493. Spanish ships frequently landed on Dominica during the 16th century, but fierce resistance by the Caribs discouraged Spain's efforts at settlement.

In 1635, France claimed Dominica. Shortly thereafter, French missionaries became the first European inhabitants of the island. Carib incursions continued, though, and in 1660, the French and British agreed that both Dominica and St. Vincent should be abandoned. Dominica was officially neutral for the next century, but the attraction of its resources remained; rival expeditions of British and French foresters were harvesting timber by the start of the 18th century.

Largely due to Dominica's position between Martinique and Guadeloupe, France eventually became predominant, and a French settlement was established and grew. As part of the 1763 Treaty of Paris that ended the Seven Years' War, the island became a British possession. In 1778, during the American Revolutionary War, the French mounted a successful invasion with the active cooperation of the population. The 1783 Treaty of Paris, which ended the war, returned the island to Britain. French invasions in 1795 and 1805 ended in failure.

In 1763, the British established a legislative assembly, representing only the white population. In 1831, reflecting a liberalization of official British racial attitudes, the Brown Privilege Bill conferred political and social rights on free nonwhites. Three Blacks were elected to the legislative assembly the following year. Following the abolition of slavery, in 1838 Dominica became the first and only British Caribbean colony to have a Black-controlled legislature in the 19th century. Most Black legislators were smallholders or merchants who held economic and social views diametrically opposed to the interests of the small, wealthy English planter class. Reacting to a perceived threat, the planters lobbied for more direct British rule.

In 1865, after much agitation and tension, the colonial office replaced the elective assembly with one comprised of one-half elected members and one-half appointed. Planters allied with colonial administrators outmaneuvered the elected legislators on numerous occasions.

In 1871, Dominica became part of the Leeward Island Federation. The power of the Black population progressively eroded. Crown Colony government was re-established in 1896. All political rights for the vast majority of the population were effectively curtailed. Development aid, offered as compensation for disenfranchisement, proved to have a negligible effect.

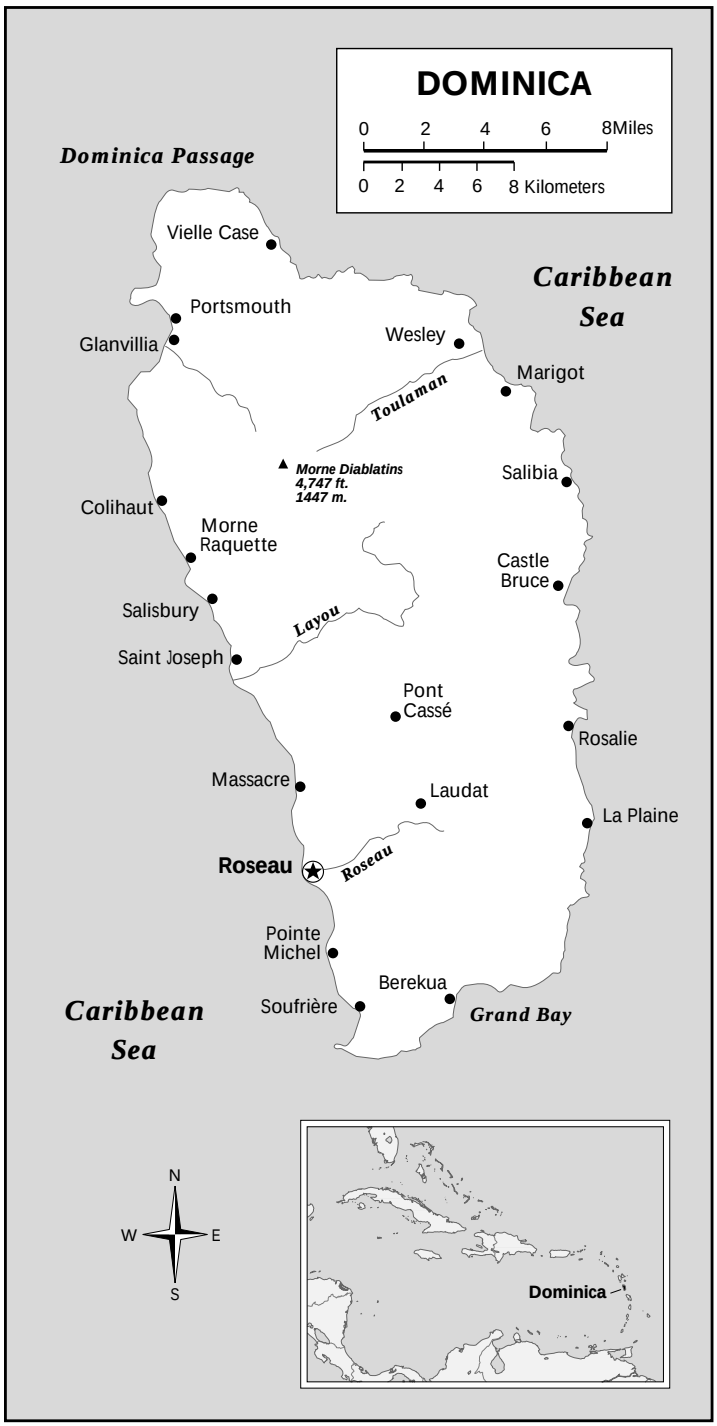
Following World War I, an upsurge of political consciousness throughout the Caribbean led to the formation of the Representative Government Association. Marshaling public frustration with the lack of a voice in the governing of Dominica, this group won one-third of the popularly elected seats of the legislative assembly in 1924 and one-half in 1936. Shortly thereafter, Dominica was transferred from the Leeward Island Administration and was governed as part of the Windwards until 1958, when it joined the short-lived West Indies Federation.

After the federation dissolved, Dominica became an associated state of the United Kingdom in 1967 and formally took responsibility for its internal affairs. On November 3, 1978, the Commonwealth of Dominica was granted independence by the United Kingdom.

Independence did little to solve problems stemming from centuries of economic underdevelopment, and in mid-1979, political discontent led to the formation of an interim government. It was replaced after the 1980 elections by a government led by the Dominica Freedom Party under Prime Minister Eugenia Charles, the Caribbean's first female prime minister. Chronic economic problems were compounded by the severe impact of hurricanes in 1979 and in 1980. By the end of the 1980s, the economy recovered, but weakened again in the 1990s due to a decrease in banana prices.

In the January 2000 elections, the Edison James United Workers Party (UWP) was defeated by the Dominican Labour Party (DLP), led by Roosevelt P. "Rosie" Douglas. Douglas died after only a few months in office and was replaced by Pierre Charles, who died in office in January 2004. Roosevelt Skerrit, also of the DLP, replaced Charles as Prime Minister. Under Prime Minister Skerrit's leadership, the DLP won elections in May 2005 that gave the party 12 seats in the 21-member Parliament to the UWP's 8 seats. An independent candidate affiliated with the DLP won a seat as well. Since that time, the independent candidate joined the government and one UWP member crossed the aisle, making the current total 14 seats for the DLP and 7 for the UWP.

GOVERNMENT AND POLITICAL CONDITIONS



Dominica has a Westminster-style parliamentary government, and there are three political parties—the Dominica Labour Party (the majority party), the Dominica United Workers Party, and the Dominica Freedom Party. A president and prime minister make up the executive branch. Nominated by the prime minister in consultation with the leader of the opposition party, the president is elected for a 5-year term by the parliament. The president appoints as prime minister the leader of the majority party in the parliament and also appoints, on the prime minister's recommendation, members of the parliament from the ruling party as cabinet ministers. The prime minister and cabinet are responsible to the parliament and can be removed on a no-confidence vote.

The unicameral parliament, called the House of Assembly, is composed of 21 regional representatives and nine senators. The regional representa-

tives are elected by universal suffrage and, in turn, decide whether senators are to be elected or appointed. If appointed, five are chosen by the president with the advice of the prime minister and four with the advice of the opposition leader. If elected, it is by vote of the regional representatives. Elections for representatives and senators must be held at least every 5 years, although the prime minister can call elections any time. The last election was held in May 2005.

Dominica's legal system is based on English common law. There are three magistrate's courts, with appeals made to the Eastern Caribbean Court of Appeal and, ultimately, to the Privy Council in London.

Councils elected by universal suffrage govern most towns. Supported largely by property taxation, the councils are responsible for the regulation of markets and sanitation and the maintenance of secondary roads and other municipal amenities. The island is also divided into 10 parishes, whose governance is unrelated to the town governments.

Principal Government Officials

Last Updated: 11/12/08

Pres.: **Nicholas J. O. LIVERPOOL**
Prime Min.: **Roosevelt SKERRIT**
Min. of Agriculture, Fisheries, & Forestry: **Matthew WALTER**
Min. for Carib Affairs: **Kelly GRANEAU**
Min. of Community Development, Culture, Gender Affairs, & Information: **Lorraine BANNIS-ROBERTS**
Min. of Economic Development & Urban Renewal: **Julius TIMOTHY**
Min. of Education, Human Resource Development, Sports, & Youth Affairs: **Vince HENDERSON**
Min. of Finance, Social Security, & Foreign Affairs: **Roosevelt SKERRIT**
Min. of Health & Environment: **John FABIEN**
Min. of Housing, Lands, & Telecommunications: **Reginald AUSTRIE**
Min. of National Security, Labor, & Immigration: **Rayburn BLACKMORE**
Min. of Public Utilities, Energy, Ports, & the Public Service: **Charles SAVARIN**
Min. of Public Works & Infrastructural Development: **Ambrose GEORGE**
Min. of Tourism, Legal Affairs, & Civil Aviation: **Ian DOUGLAS**
Min. of Trade, Industry, Consumer Affairs, Private-Sector Relations, CARICOM, OECS, & Diaspora Affairs: **Colin MCINTYRE**
Attorney Gen.: **Francine BARON-ROYER**
Permanent Representative to the UN, New York: **Crispin GREGOIRE**

Although the Dominican ambassador to the United States has customarily been resident in Dominica, the country maintains an embassy in the United States at 3216 New Mexico Ave., NW, Washington, D.C. 20016 (tel. 202-364-6781). Dominica also has a consulate general co-located with its UN mission in New York at Suite 900, 820 Second Avenue, New York, NY 10017 (tel: 212-599-8478).

ECONOMY

Many consider Dominica's economic situation the most challenging of all the Eastern Caribbean states. However, Dominica's economy grew by 3.5% in 2005 and 4.0% in 2006, following a decade of poor performance. The country nearly had a financial crisis in 2003 and 2004. Growth in 2006 was attributed to gains in tourism, construction, offshore and other services, and some sub-sectors of the banana industry. The International Monetary Fund (IMF) recently praised the Government of Dominica for its successful macroeconomic reforms. The IMF also pointed out remaining challenges, including further reductions in public debt, increased financial sector regulation, and market diversification.

Bananas and other agriculture dominate Dominica's economy, and nearly one-third of the labor force works in agriculture. This sector, however, is highly vulnerable to weather conditions and to external events affecting commodity prices. In 2007, Hurricane Dean caused significant damage to the agricultural sector as well as the country's infrastructure, especially roads. In response to reduced European Union (EU) banana trade preferences, the government has diversified the agricultural sector by introducing coffee, patchouli, aloe vera, cut flowers, and exotic fruits such as mangoes, guavas, and papayas. Dominica has had some success in increasing its manufactured exports, primarily soap.

Dominica is mostly volcanic and has few beaches; therefore, tourism has developed more slowly than on neighboring islands. Nevertheless, Dominica's high, rugged mountains, rainforests, freshwater lakes, hot springs, waterfalls, and diving spots make it an attractive eco-tourism destination. Cruise ship stopovers have increased following the development of modern docking and waterfront facilities in the capital.

Dominica's currency is the Eastern Caribbean Dollar (EC$), a regional currency shared among members of the Eastern Caribbean Currency Union (ECCU). The Eastern Caribbean Central Bank (ECCB) issues the EC$, manages monetary policy, and regulates and supervises commercial banking activities in its member countries. The ECCB has kept the EC$ pegged at EC$2.7=U.S. $1.

Dominica is a beneficiary of the U.S. Caribbean Basin Initiative that grants duty-free entry into the United States for many goods. Dominica also belongs to the predominantly English-speaking Caribbean Community and Common Market (CARICOM), the CARICOM Single Market and Economy (CSME), and the Organization of Eastern Caribbean States (OECS).

FOREIGN RELATIONS

Like its Eastern Caribbean neighbors, the main priority of Dominica's foreign relations is economic development. The country maintains missions in Washington, New York, London, and Brussels and is represented jointly with other Organization of Eastern Caribbean States (OECS) members in Canada. Dominica also is a member of the Caribbean Development Bank (CDB) and the British Commonwealth. It became a member of the United Nations and the International Monetary Fund (IMF) in 1978 and of the World Bank and Organization of American States (OAS) in 1979. in 1979. Unlike some of its neighbors in the Eastern Caribbean, Dominica has withheld recognition of Taiwan and has established relations with the People's Republic of China.

U.S.-DOMINICAN RELATIONS

The United States and Dominica have friendly bilateral relations. The United States supports the Dominican Government's efforts to expand its economic base and to provide a higher standard of living for its citizens. U.S. assistance is primarily channeled through multilateral agencies such as the World Bank and the Caribbean Development Bank (CDB), as well as through the U.S. Agency for International Development (USAID) office in Bridgetown, Barbados. The Peace Corps also provides technical assistance to Dominica, and has volunteers on the island working primarily in education, youth development, and health.

In addition, the United States and Dominica work together in the battle against illegal drugs. Dominica cooperates with U.S. agencies and participates in counternarcotics programs in an effort to curb narco-trafficking and marijuana cultivation. In 1995, the Dominican Government signed a maritime law enforcement agreement with the United States to strengthen counternarcotics coordination, and in 1996, the government signed mutual legal assistance and extradition treaties to enhance joint efforts in combating international crime.

The United States maintains no official presence in Dominica. The Ambassador and Embassy officers are resident in Barbados and frequently travel to Dominica.

TRAVEL

Consular Information Sheet

April 2, 2008

Country Description: Dominica is an English-speaking developing Caribbean island nation. The tourism industry in is the early stages of development; first-class tourist facilities are limited, but medium-range facilities are widely available.

Entry Requirements: All Americans traveling by air outside the United States are required to present a passport or other valid travel document to enter or re-enter the United States. This requirement will be extended to sea travel (except closed loop cruises), including ferry service, by the summer of 2009. Until then, U.S. citizens traveling by sea must have government-issued photo identification and a document showing their U.S. citizenship (for example, a birth certificate or certificate of nationalization), or other WHTI compliant document such as a passport card for entry or re-entry to the U.S. Sea travelers should also check with their cruise line and countries of destination for any foreign entry requirements.

Applications for the new U.S. Passport Card are now being accepted. Based on current projections, we expect the passport card to be in full production beginning in July 2008. The card may not be used to travel by air and is available only to U.S. citizens. Further information on the Passport Card is available at http://travel.state.gov/passport/ppt_card/ppt_card_3926.html and upcoming changes to U.S. passport policy can be found on the Bureau of Consular Affairs web site at http://travel.state.gov/travel/cbpmc/cbpmc_2223.html. We strongly encourage all American citizen travelers to apply for a U.S. passport well in advance of anticipated travel. American citizens can visit travel.state.gov or call 1-877-4USA-PPT (1-877-487-2778) for information on how to apply for their passports.

In addition to a valid passport, U.S. citizens may be asked to present a return or onward ticket. U.S. citizens should take special care to secure their passports while traveling as it can be time-consuming and difficult to acquire new proof of citizenship to facilitate return travel should the passport be lost or stolen. There is a departure tax assessed when leaving Dominica. Children under twelve years of age are exempt from the departure tax. For further information concerning entry requirements, travelers can contact the Embassy of the Commonwealth of Dominica, 3216 New Mexico Avenue NW, Washington, DC 20016, telephone (202) 364-6781, e-mail embdomdc@aol.com, or the Consulate General of Dominica in New York at (212) 768-2480. Visit the Dominica Division of Tourism offical web site at http://www.dominica.dm/site/index.cfm for more information.

Safety and Security: For the latest security information, Americans traveling abroad should regularly monitor the Department's Internet web site where the current Worldwide Caution Travel Alert, Travel Warnings and Travel Alerts can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S. and Canada, or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: Petty street crime occurs in Dominica. Valuables left unattended, especially on beaches, are vulnerable to theft.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, to contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

Medical Facilities and Health Information: Medical care is limited. The major hospital is Princess Margaret Hospital, telephone (767) 448-2231/5720. In addition, there is one other hospital in Dominica and several clinics. There is no operational hyperbaric chamber; divers requiring treatment for decompression illness must be evacuated to Martinique. Serious medical problems requiring hospitalization and/or medical evacuation to the United States can cost thousands of dollars. Doctors and hospitals often expect immediate cash payment for health services.

Information on vaccinations and other health precautions, such as safe food and water precautions and

insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's Internet site at http://www.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) website at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Dominica is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

Vehicles are driven on the left in Dominica. Seatbelt laws are not strictly enforced. Roads are narrow with steep inclines throughout the island. There are few guardrails in areas that have precipitous drop-offs from the road. Road signs are limited outside of the major towns. Drivers should be alert for minibus (taxi) drivers, who often make sudden stops or pull out into traffic without warning or signaling.

For specific information concerning Dominica driving permits, vehicle inspection, road tax and mandatory insurance, contact the Dominica national tourist organization offices in New York via telephone number (212) 949-1711, fax number (212) 949-1714, or e-mail dominicany@msn.com.

Aviation Safety Oversight: The U.S. Federal Aviation Administration (FAA) has assessed the Government of Dominica's Civil Aviation Authority as being in compliance with International Civil Aviation Organization (ICAO) aviation safety standards for the oversight of Dominica's air carrier operations. For more information, travelers may visit the FAA's internet website at http://www.faa.gov.

Special Circumstances: There is no U.S Embassy or Consulate in Dominica. The U.S. Embassy in Bridgetown, Barbados is responsible for American Citizens Services on the island of Dominica. U.S. citizens are encouraged to carry a copy of their U.S. passports with them at all times, so that, if questioned by local officials, proof of identity and U.S. citizenship is readily available. Like all Caribbean countries, Dominica can be affected by hurricanes. The hurricane season normally runs from June to the end of November, but there have been hurricanes in December in recent years. General information about natural disaster preparedness is available via the Internet from the U.S. Federal Emergency Management Agency (FEMA) at http://www.fema.gov.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offences. Persons violating Dominica's laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Dominica are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in Dominica are encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration website, and to obtain updated information on travel and security within Dominica Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency. The U.S. Embassy in Bridgetown is located in the Wildey Business Park in suburban Wildey, south and east of downtown Bridgetown. The main number for the Consular Section is (246) 431-0225; after hours, the Embassy duty officer can be reached by calling (246) 436-4950. The website for Embassy Bridgetown is http://bridgetown.usembassy.gov. Hours of operation are 8:30 a.m. to 4 p.m. Monday-Friday, except Barbados and U.S. holidays.

Intercountry Adoption

April 2008

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is based on public sources and our current understanding. Questions involving foreign and U.S. immigration laws and legal interpretation should be addressed respectively to qualified foreign or U.S. legal counsel.

Patterns of Immigration: Please review current reports online at http://adoption.state.gov.

Adoption Authority: The Welfare Division is the adoption authority in Dominica. It is part of the Ministry of Community Development and Gender Affairs. The address is:

Welfare Division
Government Head Quarters
Roseau, Dominica.
Telephone: 767-448-2401 extensions 3019, 3020, 3334 or 3254.

Eligibility Requirements for Adoptive Parents: Adoptive parents should not be under the age of twenty-five (25) years old. The adopting parent(s) should be employed or have means of supporting the child. There is no specific income requirement. The adopting parent(s) should submit a home study report from the appropriate office of his/her home country.

Residency Requirements: The Dominica government has no specific residency requirements for prospective adoptive parents.

Time Frame: There is no specified period. A short hearing is required after all requirements are met and all documents are in order.

Adoption Agencies and Attorneys: Prospective adoptive parents are advised to fully research any adoption agency or facilitator they plan to use for adoption services. Please also see Important Notice Regarding Adoption Agents and Facilitators at the Department of State, Bureau of Consular Affairs web site travel.state.gov.

Adoption Fees: The U.S. Embassy in Barbados discourages the payment of any fees that are not properly receipted, "donations," or "expediting" fees, that may be requested from prospective adoptive parents. Such fees have the appearance of "buying" a baby and put all future adoptions in Dominica at risk. Adoption fees vary from lawyer to lawyer but an adoptive parent can expect to pay at least US $700 to $1000 for an adoption, including stamp duty.

Adoption Procedures: Parents are not matched to children. An adoption process begins when a child has been identified for adoption. Prospective adoptive parents must submit to the Welfare Division a copy of their home study report and W2 tax form.

Required Documents:

- Petition for Adoption (from country of adoptive parents)
- Affidavit of support (from country of adoptive parents)
- Consent of biological parents
- Birth certificate of child
- Application to appoint Guardian Ad Litem
- Guardian Ad Litem Report
- Home study report from prospective adoptive parents' country if not a citizen of Dominica and W2 tax forms to be submitted to the Welfare Division
- If married a marriage certificate and if one spouse is adopting the consent of the other spouse
- Application for Adoption and Draft Adoption Order

Embassy of Dominica
3216 New Mexico Avenue, NW
Washington, DC 20016
Telephone: (202) 364-6781
Fax: (202) 364-6791

Consulate General of Dominica in New York: E-mail: Embdomdc@aol.com

U.S. Immigration Requirements: Prospective adopting parents are strongly encouraged to consult USCIS publication M-249, *The Immigration of Adopted and Prospective Adoptive Children*, as well as the Department of State publication, *Intercountry Adoptions.*

Please see the *Intercountry Adoption* section of this book for more details and review current reports online at http://adoption.state.gov.

U.S. Embassy
Wildey Business Park
Wildey
St. Michael, BB 14006
Barbados, W.I.
Phone: 246-431-0225

The mailing address is:

P.O. Box 302
Bridgetown BB 11000
Bridgetown, Barbados
Phone: 246-431-0225
Fax: 246-431-0179

Additional Information: For information on intercountry adoption and international parental child abduction, and security information for U.S. citizens traveling abroad, call Toll Free 1-888-407-4747. This number is available from 8:00 a.m. to 8:00 p.m. EST/EDT, Monday through Friday (except U.S. federal holidays). Callers who are unable to use toll-free numbers, such as those calling from overseas, may obtain information and assistance during these hours by calling 1-202-501-4444.

International Parental Child Abduction

November 2008

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *International Child Abduction* section of this book and review current reports online at www.travel.state.gov/childabduction.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is provided for general information only. Questions involving interpretation of specific foreign laws should be addressed to foreign legal counsel.

General Information: The Government of the Commonwealth of Dominica is not a party to the Hague Convention on the Civil Aspects of International Child Abduction, nor are there any international or bilateral treaties in force between Dominica and the United States dealing with international parental child abduction. Recommendations to be a signatory to the Hague Convention on Civil Aspects of International Child Abduction have been submitted to the Government for consideration. American citizens who travel to

Dominica place themselves under the jurisdiction of local courts. American citizens planning a trip to Dominica with dual national children should bear this in mind.

Custody Disputes: In Dominica if parents are legally married they share the custody of their children, in the sense that the children live with them and are taken care of by them in the matrimonial home. However, legal custody lies with the father. When parents are not married the custody of the child usually lies with the mother. Due to the death of the mother, mental problems, or a declaration made by the Court that the mother is unfit based on an application by the father, a father may apply to the court for custody of the child. Foreign court orders are not automatically recognized.

Enforcement of Foreign Judgments: Custody orders and judgments of foreign courts may be enforced in Dominica once there has been compliance with The Commonwealth Judgments Reciprocal Enforcements Act, which provides for reciprocal enforcement in the state of judgments in Courts of the United Kingdom and other Commonwealth Countries; or The Foreign Judgments Reciprocal Enforcement Act, which provides for judgments given in foreign countries that accord reciprocal treatment to judgments given in Dominica.

Visitation Rights: In cases where one parent has been granted custody of a child, the other parent is usually granted visitation rights. Under the Maintenance Act 15 of 2001, when a parent has been made to maintain a child under a Maintenance Order, a parent can apply to the court for access to the child at the time when the order is made or thereafter once the order is in force. The American Embassy in Bridgetown has reported few problems for non-custodial parents exercising their visitation rights. If a custodial parent fails to allow visitation, the non-custodial parent may appeal to the court.

Dual Nationality: Dual nationality is recognized under Dominican law.

Passports for Minors and the Children's Passport Issuance Alert Program: For more information on these topics, see the *International Parental Child Abduction* section of this publication and review current reports from the U.S. Department of State at www.travel.state.gov/childabduction.

Travel Restrictions: No exit visas are required to leave Dominica.

Criminal Remedies: For information on possible criminal remedies, please contact your local law enforcement authorities or the nearest office of the Federal Bureau of Investigation (FBI). Information is also available on the Internet at the web site of the U.S. Department of Justice, Office of Juvenile Justice and Delinquency Prevention (OJJDP) at http://www.ojjdp.ncjrs.org.

Persons who wish to pursue a child custody claim in a Dominican court should retain an attorney in Dominica. The U.S. Embassy in Barbados maintains a list of attorneys willing to represent American clients. A copy of this list may be obtained by requesting one from the Embassy at:

U.S. Embassy Bridgetown
Consular Section
ALICO Building, Cheapside
P O Box 302
Bridgetown
Barbados
Telephone: [246] 431-0225
Fax: [246] 431-0179

Web site:
http://www.usembassy.state.gov/bridgetown

The Consular Section is open M-F (except U.S. and Barbados holidays) 8:30-11:30 and 1-2 PM

Questions involving Dominican law should be addressed to a Dominican attorney or to the Embassy of Dominica in the United States at:

Embassy of the Commonwealth of Dominica
3216 New Mexico Avenue, NW
Washington, DC 20016
Telephone: (202) 364-6791

More Information: For further information and/or assistance in either preventing or responding to an international parental child abduction, contact the Office of Children's Issues, U.S. Department of State at (202) 736-9090 or visit its web site at www.travel.state.gov/childabduction.

DOMINICAN REPUBLIC

Compiled from the June 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Dominican Republic

PROFILE

Geography

Area: 48,442 sq. km. (18,704 sq. mi.), about the size of Vermont and New Hampshire combined.
Cities: Capital—Santo Domingo (pop. 2.25 million). Other city—Santiago de los Caballeros (908,230).
Terrain: Mountainous.
Climate: Maritime tropical.

People

Nationality: Noun and adjective—Dominican(s).
Population: (2007) 9.365 million.
Annual growth rate: (2007) 1.5%.
Ethnic groups: Mixed 73%, European 16%, African origin 11%.
Religions: Roman Catholic 95%.
Languages: Spanish.
Education: Years compulsory—6 Attendance—70%. Literacy—84.7%.
Health: Infant mortality rate: 28.3/1,000. Life expectancy—70.2 years for men, 73.3 years for women.
Work force: 60.2% services (tourism, transportation, communications, finances, others), 15.5% industry (manufacturing), 11.5% construction, 11.3% agriculture, 1.5% mining.

Government

Type: Representative democracy.
Independence: February 27, 1844. Restoration of independence, August 16, 1863.
Constitution: November 28, 1966; amended July 25, 2002.
Government branches: Executive—president (chief of state and head of government), vice president, cabinet. Legislative—bicameral Congress (Senate and House of Representatives). Judicial—Supreme Court of Justice.
Political subdivisions: 31 provinces and the National District of Santo Domingo.
Political parties: Dominican Liberation Party (PLD), Dominican Revolutionary Party (PRD), Social Christian Reformist Party (PRSC), and several others.
Suffrage: Universal and compulsory, over 18 or married.

Economy (2007)

GDP: $36.4 billion.
Growth rate: 8%
Per capita GDP: $4,147.
Non-fuel minerals: (1.4% of GDP) Nickel, gold, silver.
Agriculture: (6.5% of GDP) Products—sugarcane, coffee, cocoa, bananas, tobacco, rice, plantains, beef.
Industry: (27.4% of GDP) Types—sugar refining, pharmaceuticals, cement, light manufacturing, construction.
Services: (including tourism and transportation) 58.6% of GDP.
Trade: Exports ($6.484 billion (FOB), including processing zones: textiles, sugar, coffee, ferronickel, cacao, tobacco, meats and medical supplies. Markets—U.S. (75%), Canada, Western Europe, South Korea. Imports—$8.797 billion: food stuffs, petroleum, industrial raw materials, capital goods. Suppliers—U.S. (48%), Japan, Germany, Venezuela, Mexico, Colombia.

PEOPLE

About half of Dominicans live in rural areas; many are small landholders. Haitians form the largest foreign minority group. All religions are tolerated; the state religion is Roman Catholicism.

HISTORY

The island of Hispaniola, of which the Dominican Republic forms the eastern two-thirds and Haiti the remainder, was originally occupied by Tainos, an Arawak-speaking people. The Tainos welcomed Columbus in his first voyage in 1492, but subsequent colonizers were brutal, reducing the Taino population from about 1 million to about 500 in 50 years.

To ensure adequate labor for plantations, the Spanish brought African slaves to the island beginning in 1503.

In the next century, French settlers occupied the western end of the

island, which Spain ceded to France in 1697, and which, in 1804, became the Republic of Haiti. The Haitians conquered the whole island in 1822 and held it until 1844, when forces led by Juan Pablo Duarte, the hero of Dominican independence, drove them out and established the Dominican Republic as an independent state. In 1861, the Dominicans voluntarily returned to the Spanish Empire; in 1865, independence was restored. Economic difficulties, the threat of European intervention, and ongoing internal disorders led to a U.S. occupation in 1916 and the establishment of a military government in the Dominican Republic. The occupation ended in 1924, with a democratically elected Dominican Government.

In 1930, Rafael L. Trujillo, a prominent army commander, established absolute political control. Trujillo promoted economic development—from which he and his supporters benefited—and severe repression of domestic human rights. Mismanagement and corruption resulted in major economic problems. In August 1960, the Organization of American States (OAS) imposed diplomatic sanctions against the Dominican Republic as a result of Trujillo's complicity in an attempt to assassinate President Romulo Betancourt of Venezuela. These sanctions remained in force after Trujillo's death by assassination in May 1961. In November 1961, the Trujillo family was forced into exile.

In January 1962, a council of state that included moderate opposition elements with legislative and executive powers was formed. OAS sanctions were lifted January 4, and, after the resignation of President Joaquin Balaguer on January 16, the council under President Rafael E. Bonnelly headed the Dominican Government.

In 1963, Juan Bosch was inaugurated President. Bosch was overthrown in a military coup in September 1963. Another military coup, on April 24, 1965, led to violence between military elements favoring the return to government by Bosch and those who proposed a military junta committed to early general elections. On April 28, U.S. military forces landed to protect U.S. citizens and to evacuate U.S. and other foreign nationals.

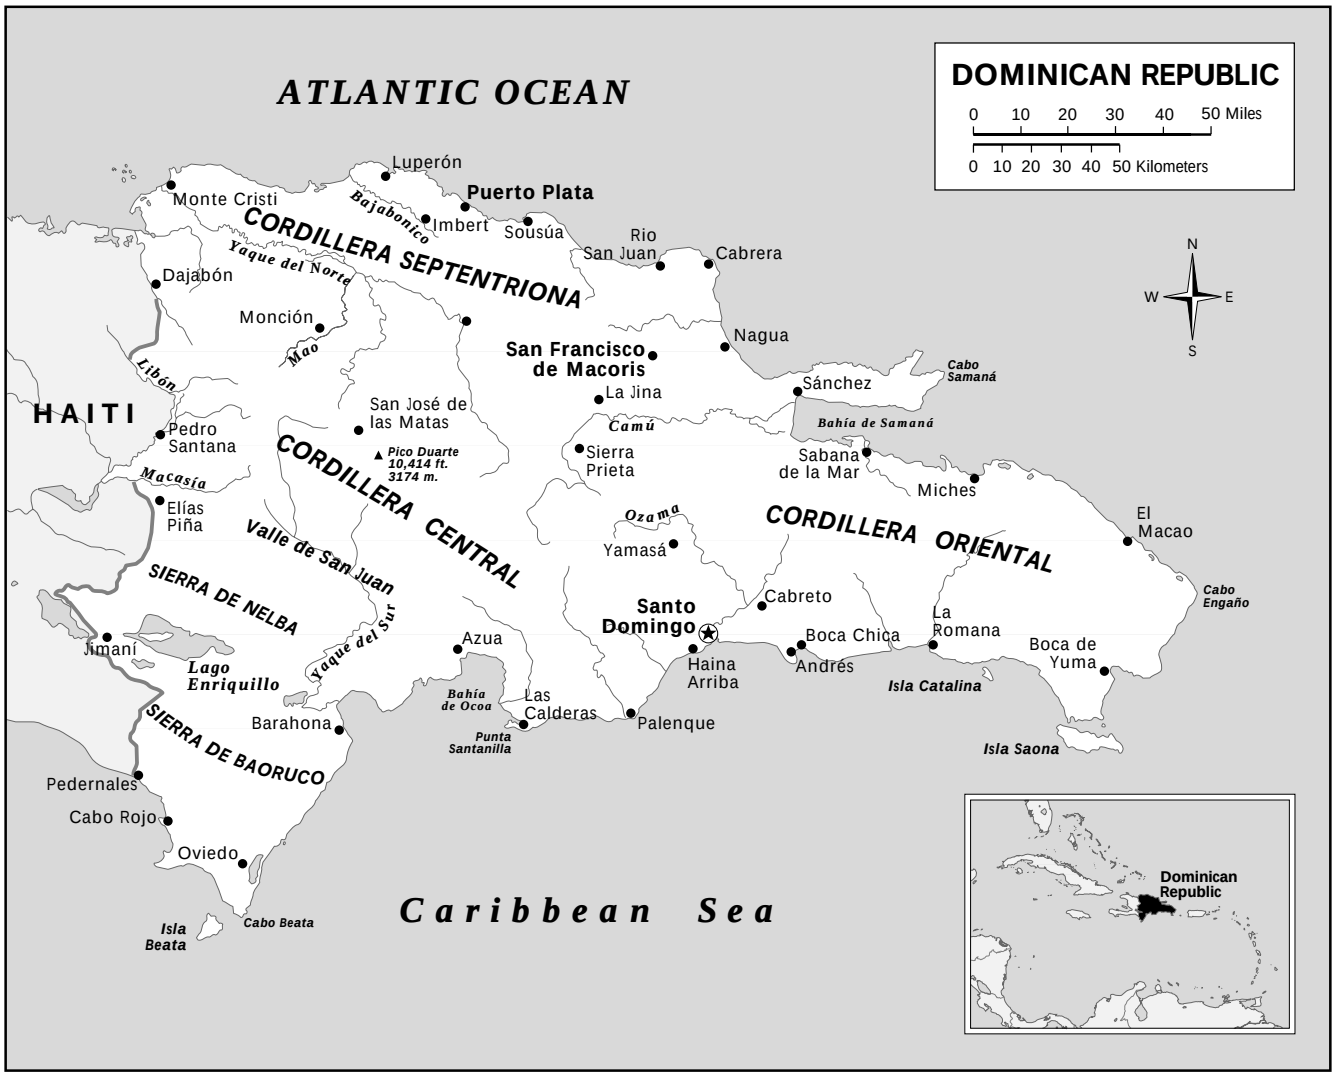
Additional U.S. forces subsequently established order. In June 1966, President Balaguer, leader of the Reformist Party (now called the Social Christian Reformist Party—PRSC), was elected and then re-elected to office in May 1970 and May 1974, both times after the major opposition parties withdrew late in the campaign.

In the May 1978 election, Balaguer was defeated in his bid for a fourth successive term by Antonio Guzman of the Dominican Revolutionary Party (PRD). Guzman's inauguration on August 16 marked the country's first peaceful transfer of power from one freely elected president to another.

The PRD's presidential candidate, Salvador Jorge Blanco, won the 1982 elections, and the PRD gained a majority in both houses of Congress. In an attempt to cure the ailing economy, the Jorge administration began to implement economic adjustment and recovery policies, including an austerity program in cooperation with the International Monetary Fund (IMF). In April 1984, rising prices of basic foodstuffs and uncertainty about austerity measures led to riots.

Balaguer was returned to the presidency with electoral victories in 1986 and 1990. Upon taking office in 1986, Balaguer tried to reactivate the economy through a public works construction program. Nonetheless, by 1988 the country had slid into a 2-year economic depression, characterized by high inflation and currency devaluation. Economic difficulties, coupled with problems in the delivery of basic services—e.g., electricity, water, transportation—generated popular discontent that resulted in frequent protests, occasionally violent, including a paralyzing nationwide strike in June 1989.

In 1990, Balaguer instituted a second set of economic reforms. After concluding an IMF agreement, balancing the budget, and curtailing inflation, the Dominican Republic experienced a period of economic growth marked by moderate inflation, a balance in external accounts, and a steadily increasing GDP that lasted through 2000.



The voting process in 1986 and 1990 was generally seen as fair, but allegations of electoral board fraud tainted both victories. The elections of 1994 were again marred by charges of fraud. Following a compromise calling for constitutional and electoral reform, President Balaguer assumed office for an abbreviated term and Congress amended the Constitution to bar presidential succession.

Since 1996, the Dominican electoral process has been seen as generally free and fair. In June 1996, Leonel Fernández Reyna of the Dominican Liberation Party (PLD) was elected to a 4-year term as president. Fernández's political agenda was one of economic and judicial reform. He helped enhance Dominican participation in hemispheric affairs, such as the OAS and the follow up to the Miami Summit. On May 16, 2000, Hipólito Mejía, the PRD candidate, was elected president in another free and fair election, soundly defeating PLD candidate Danilo Medina and former president Balaguer. Mejía championed the cause of free trade and Central American and Caribbean economic integration.

The Dominican Republic signed a free trade agreement (CAFTA-DR) with the United States and five Central American countries in August 2004, in the last weeks of the Mejía administration.

During the Mejía administration, the Constitution was amended to permit an incumbent president to seek a second successive term, and Mejía ran for re-election.

On May 16, 2004, Leonel Fernández was elected president, defeating Mejía 57.11% to 33.65%. Eduardo Estrella of the PRSC received 8.65% of the vote. Fernández took office on August 16, 2004, promising in his inaugural speech to promote fiscal

austerity, to fight corruption and to support social concerns. Fernández said the Dominican Republic would support policies favoring international peace and security through multilateral mechanisms in conformity with the United Nations and the OAS.

The Fernández administration works closely with the United States on law enforcement and immigration and counter-terrorism matters. In 2006 elections, Fernández' PLD won 60% of seats in the House of Representatives and 22 of 32 Senate seats, as well as a plurality of mayoral seats. On May 16, 2008, President Fernández was reelected President with 53.8% of the vote. His new term runs until 2012.

GOVERNMENT AND POLITICAL CONDITIONS

The Dominican Republic is a representative democracy with national powers divided among independent executive, legislative, and judicial branches. The president appoints the cabinet, executes laws passed by the legislative branch, and is commander in chief of the armed forces. The president and vice president run for office on the same ticket and are elected by direct vote for 4-year terms. Legislative power is exercised by a bicameral Congress—the Senate (32 members) and the House of Representatives (178 members).

The Dominican Republic has a multiparty political system with national elections every 2 years (alternating between presidential elections and congressional/municipal elections). Presidential elections are held in years evenly divisible by four. Congressional and municipal elections are held in even numbered years not divisible by four. International observers have found that presidential and congressional elections since 1996 have been generally free and fair.

Elections are supervised by a Central Elections Board (JCE) of 9 members chosen for a four-year term by the newly elected Senate. JCE decisions on electoral matters are final. Under the constitutional reforms negotiated after the 1994 elections, the 16-mem-

ber Supreme Court of Justice is appointed by a National Judicial Council, which is comprised of the President, the leaders of both houses of Congress, the President of the Supreme Court, and an opposition or non-governing-party member. One other Supreme Court Justice acts as secretary of the Council, a non-voting position. The Supreme Court has sole authority over managing the court system and in hearing actions against the president, designated members of his cabinet, and members of Congress when the legislature is in session.

The Supreme Court hears appeals from lower courts and chooses members of lower courts. Each of the 31 provinces is headed by a presidentially appointed governor. Mayors and municipal councils to administer the 124 municipal districts and the National District (Santo Domingo) are elected at the same time as congressional representatives.

Principal Government Officials

Last Updated: 11/12/08

Pres.: **Leonel FERNANDEZ Reyna**
Vice Pres.: **Rafael ALBURQUERQUE de Castro**
Sec. of State for Agriculture: **Salvador JIMENEZ**
Sec. of State for the Armed Forces: **Pedro Rafael PENA Antonio**
Sec. of State for Culture: **Jose RAFAEL Lantigua**
Sec. of State for Economy, Planning, & Development: **Juan Temistocles MONTAS Dominguez**
Sec. of State for Education: **Melanio PAREDES**
Sec. of State for the Environment & Natural Resources: **Jaime David FERNANDEZ Mirabal**

DEFENSE

Congress authorizes a combined military force of 44,000 active duty personnel. Actual active duty strength is approximately 32,000. However, approximately 50% of those are used for non-military activities such as security providers for government-owned non-military facilities, highway toll stations, prisons, forestry work, state enterprises, and private businesses. The Commander in Chief of the military is the President. The principal missions are to defend the nation and protect the territorial integrity of the country. The army, larger than the other services combined with approximately 20,000 active duty personnel, consists of six infantry brigades, a combat support brigade, and a combat service support brigade. The air force operates two main bases, one in the southern region near Santo Domingo and one in the northern region near Puerto Plata. The navy operates two major naval bases, one in Santo Domingo and one in Las Calderas on the southwestern coast, and maintains 12 operational vessels. In the Caribbean, only Cuba has a larger military force.

The armed forces have organized a Specialized Airport Security Corps (CESA) and a Specialized Port Security Corps (CESEP) to meet international security needs in these areas. The Secretary of the Armed Forces has also announced plans to form a specialized border corps (CESEF). Additionally, the armed forces provide 75% of personnel to the National Investigations Directorate (DNI) and the Counter-Drug Directorate (DNCD).

The Dominican National Police force contains 32,000 agents. The police are not part of the Dominican armed forces, but share some overlapping security functions. Sixty-three percent of the force serve in areas outside traditional police functions, similar to the situation of their military counterparts.

ECONOMY

After a decade of little to no growth in the 1980s, the Dominican Republic's economy boomed in the 1990s, expanding at an average rate of 7.7% per year from 1996 to 2000. Tourism (the leading foreign exchange earner), telecommunications, and free-trade-zone manufacturing are the most important sectors, although agriculture is still a major part of the economy. The Dominican Republic owed much of its success to the adoption of sound macroeconomic policies in the early 1990s and greater opening to foreign investment. Growth turned negative in 2003 (-0.4%) due to the effects of government handling of major bank frauds and to lower U.S. demand for Dominican manufacturers. The Mejía administration negotiated an IMF standby agreement in August 2003 but was unable to comply with fiscal targets. The

Fernández administration obtained required tax legislation and IMF board approval for the standby in January 2005. The Dominican peso fell to an unprecedented low in exchange markets in 2003-2004 but strengthened dramatically following the election and inauguration of Leonel Fernández. Since late 2004 it has traded at a rate considered to be overvalued on a purchasing power parity basis. Inflation fell sharply in late 2004 and was estimated at 9% for that calendar year. The Fernández administration successfully renegotiated official bilateral debt with Paris Club member governments, commercial bank debt with London Club members, and sovereign debt with a consortium of lenders. It met fiscal and financial targets of the standby agreement but fell short of goals for reforms in the electricity sector and financial markets. Central Bank statistics indicate 10.7% growth for 2006 with 5.0% inflation. The Central Bank estimates that the economy grew at 7.9% in the first six months of 2007 with an inflation rate of 5.9%.

The Dominican Republic's most important trading partner is the United States (75% of export revenues). Other markets include Canada, Western Europe, and Japan. The country exports free-trade-zone manufactured products (garments, medical devices, etc.), nickel, sugar, coffee, cacao, and tobacco. It imports petroleum, industrial raw materials, capital goods, and foodstuffs. On September 5, 2005, the Dominican Congress ratified a free trade agreement with the U.S. and five Central American countries, known as CAFTA-DR. The CAFTA-DR agreement entered into force for the Dominican Republic on March 1, 2007. The total stock of U.S. foreign direct investment (FDI) in Dominican Republic as of 2006 was U.S. $3.3 billion, much of it directed to the energy and tourism sectors, to free trade zones, and to the telecommunications sector. Remittances were close to $2.7 billion in 2006.

An important aspect of the Dominican economy is the Free Trade Zone industry (FTZ), which made up U.S. $4.55 billion in Dominican exports for 2006 (70% of total exports). Reports show, however, that the FTZs lost approximately 60,000 between 2005 and 2007 and suffered a 4% decrease in total exports in 2006. The textiles sector experienced an approximate 17% drop in exports due in part to the appreciation of the Dominican peso against the dollar, Asian competition following expiration of the quotas of the Multi-Fiber Arrangement, and a government-mandated increase in salaries, which should have occurred in 2005 but was postponed to January 2006. Lost Dominican business was captured by firms in Central America and Asia. The tobacco, jewelry, medical, and pharmaceutical sectors in the FTZs all reported increases for 2006, which somewhat offset textile and garment losses. Industry experts from the FTZs expect that entry into force of the CAFTA-DR agreement will promote substantial growth in the FTZ sector for 2008.

An ongoing concern in the Dominican Republic is the inability of participants in the electricity sector to establish financial viability for the system. Three regional electricity distribution systems were privatized in 1998 via sale of 50% of shares to foreign operators; the Mejía administration repurchased all foreign-owned shares in two of these systems in late 2003. The third, serving the eastern provinces, is operated by U.S. concerns and is 50% U.S.-owned. The World Bank records that electricity distribution losses for 2005 totaled about 38.2%, a rate of losses exceeded in only three other countries. Industry experts estimate distribution losses for 2006 will surpass 40%, primarily due to low collection rates, theft, infrastructure problems and corruption. At the close of 2006, the government had exceeded its budget for electricity subsidies, spending close to U.S. $650 million. The government plans to continue providing subsidies. Congress passed a law in 2007 that criminalizes the act of stealing electricity, but it has not yet been fully implemented. The electricity sector is a highly politicized sector and with 2008 presidential election campaigning already in motion, the prospect of further effective reforms of the electricity sector is poor. Debts in the sector, including government debt, amount to more than U.S. $500 million. Some generating companies are undercapitalized and at times unable to purchase adequate fuel supplies.

FOREIGN RELATIONS

The Dominican Republic has a close relationship with the United States and with the other states of the inter-American system. It has accredited diplomatic missions in most Western Hemisphere countries and in principal European capitals. Newly elected president of Haiti René Préval made a working visit to Santo Domingo in March 2006, reciprocating Leonel Fernández's call on the Interim Government of Haiti in December 2005. The Dominican Government has regularly appealed for international support for its island neighbor.

There is a sizeable Haitian migrant community in the Dominican Republic, many of whom lack residence permits and citizenship documentation. The Dominican Republic is a founding member of the United Nations and participates in many of its specialized and related agencies, including the World Bank, International Labor Organization, International Atomic Energy Agency, and International Civil Aviation Organization. It is a member of the OAS and of the Inter-American Development Bank.

U.S.-DOMINICAN REPUBLIC RELATIONS

The U.S. has a strong interest in a democratic, stable, and economically healthy Dominican Republic. The country's standing as the largest Caribbean economy, second-largest country in terms of population and land mass, with large bilateral trade with the United States, and its proximity to the United States and other smaller Caribbean nations make the Dominican Republic an important partner in hemispheric affairs. The

Embassy estimates that 100,000 U.S. citizens live in the Dominican Republic; many are dual nationals. An important element of the relationship between the two countries is the fact that more than 1 million individuals of Dominican origin reside in the United States, most of them in the metropolitan Northeast and some in Florida.

U.S. relations with the Dominican Republic are excellent, and the U.S. has been an outspoken supporter of that country's democratic and economic development. The Dominican Government has been supportive of many U.S. initiatives in the United Nations and related agencies. The two governments cooperate in the fight against the traffic in illegal substances. The Dominican Republic has worked closely with U.S. law enforcement officials on issues such as the extradition of fugitives and measures to hinder illegal migration.

The United States supports the Fernández administration's efforts to improve Dominican competitiveness, to attract foreign private investment, to fight corruption, and to modernize the tax system. Bilateral trade is important to both countries. U.S. firms, mostly manufacturers of apparel, footwear, and light electronics, as well as U.S. energy companies, account for much of the foreign private investment in the Dominican Republic.

Exports from the United States, including those from Puerto Rico and the U.S. Virgin Islands, to the Dominican Republic in 2007 totaled $6 billion. The Dominican Republic exported $4.2 billion to the United States in 2007. The Dominican Republic is the 31st-largest commercial partner of the U.S. The U.S. Embassy works closely with U.S. business firms and Dominican trade groups, both of which can take advantage of the new opportunities in this growing market. At the same time, the Embassy is working with the Dominican Government to resolve a range of ongoing commercial and investment disputes.

The Embassy counsels U.S. firms through its Country Commercial Guide and informally via meetings with business persons planning to invest or already investing in the Dominican Republic. This is a challenging business environment for U.S. firms, especially for medium to smaller sized businesses.

The U.S. Agency for International Development (USAID) mission is focused on improving access of underserved populations to quality health care and combating HIV/AIDS and tuberculosis (TB);, promoting economic growth through policy reform, support for CAFTA-DR implementation, and technical assistance to small producers and tourism groups; environmental protection and policy reform initiatives; improved access to quality primary, public education and assistance to at-risk youth; a model rural electrification program; and improving participation in democratic processes, while strengthening the judiciary and combating corruption across all sectors.

TRAVEL

Consular Information Sheet

June 16, 2008

Country Description: The Dominican Republic covers the eastern two-thirds of the Caribbean island of Hispaniola. The capital city is Santo Domingo, located on the south coast of the island. Tourist facilities vary according to price and location. Spanish is the official language.

Though English is widely spoken in major cities and tourist areas, it is much less common outside these areas.

Entry Requirements: All All Americans traveling by air outside of the United States are required to present a passport or other valid travel document to enter or re-enter the United States. This requirement will be extended to sea travel (except closed loop cruises), including ferry service, by the summer of 2009. Until then, U.S. citizens traveling by sea must have government-issued photo identification and a document showing their U.S. citizenship (for example, a birth certificate or certificate of nationalization), or other WHTI compliant document such as a passport card for entry or re-entry to the U.S. Sea travelers should also check with their cruise line and countries of destination for any foreign entry requirements.

Applications for the new U.S. Passport Card are now being accepted. Based on current projections, we expect the passport card to be in full production beginning in July 2008. The card may not be used to travel by air and is available only to U.S. citizens. Further information on the Passport Card and on upcoming changes to U.S. passport policy can be found on the Bureau of Consular Affairs web site. We strongly encourage all American citizen travelers to apply for a U.S. passport well in advance of anticipated travel. American citizens can visit travel.state.gov or call 1-877-4USA-PPT (1-877-487-2778) for information on how to apply for their passports.

For information concerning entry and exit requirements, travelers may contact the Embassy of the Dominican Republic at 1715 22nd Street NW, Washington, DC 20008, tel. (202) 332-6280. There are also Dominican consulates in Boston, Chicago (Northfield, IL), Mayaguez, Miami, New Orleans, New York, and San Juan. Visit the Embassy of the Dominican Republic web site at http://www.domrep.org for the most current visa information.

Visas: Visitors who do not obtain a Dominican visa prior to entry must purchase a tourist card upon arrival to enter the country. Tourist cards cost ten U.S. dollars, which must be paid in U.S. currency. Tourist cards may be purchased at the Dominican Embassy in Washington or Dominican Consulates prior to arrival, as well as at Dominican airports at the time of entry. Tourist cards normally permit a legal stay of up to 60 days. Visitors who would like to extend their time in the Dominican Republic should visit the Migration Department in Santo Domingo and request an extension. Failure to request an extension will subject the visitor to a surcharge at the airport upon departure.

Travel Of Children And Exit Requirements: Strict exit requirements apply to minors under 18 years of age (of any nationality) who are residents in the Dominican Republic. Such children traveling alone, without one parent, or with anyone other than the parent(s), must present written authorization from a parent or legal guardian. This authorization must be in Spanish, and it must be notarized at a Dominican consulate in the United States or notarized and then certified at the Dominican Attorney General's office (Procuraduria de la Republica) if done in the Dominican Republic. Though not a requirement for non-resident minors (in the Dominican Republic), the U.S. Embassy recommends that any minor traveling to the Dominican Republic without one or both parents have a notarized document from the parent(s). In addition to clarifying the reason for travel, this will facilitate departure from the Dominican Republic.

The specific guidelines on the Dominican regulations governing the travel of children in the Dominican Republic can be found (in Spanish) at http://www.migracion.gov.do.

Visit the Embassy of the Dominican Republic web site at http://www.domrep.org for the most current visa information.

Safety and Security: American citizens should be aware that foreign tourists are often considered attractive targets for criminal activity, and should maintain a low profile to avoid becoming victims of violence or crime. In dealing with local police, U.S. citizens should be aware that the standard of professionalism might vary. Police attempts to solicit bribes have been reported, as have incidents of police using excessive force.

Protests, demonstrations, and general strikes occur periodically. Previous political demonstrations have sometimes turned violent, with participants rioting and erecting roadblocks, and police sometimes using deadly force in response. Political demonstrations do not generally occur in areas frequented by tourists and are generally not targeted at foreigners. However, it is advisable to exercise caution when traveling throughout the country. Street crowds should be avoided. In urban areas, travel should be conducted on main routes whenever possible. Power outages occur frequently throughout the Dominican Republic, and travelers should remain alert during blackout periods, as crime rates often increase during these outages.

U.S. citizens considering overland travel between the Dominican Republic and Haiti should first consult the Country Specific Information Sheet for Haiti as well as the Internet site of the U.S. Embassy in Port-au-Prince for information about travel conditions in Haiti. Santo Domingo and the majority of tourist destinations within the Dominican Republic are located several hours from the Haitian border, and recent events in Haiti have generally not directly affected these areas.

For the latest security information, Americans traveling abroad should regularly monitor the Department's Internet web site where the current Travel Warnings and Travel Alerts, including the Worldwide Caution Travel Alert, can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S. and

Canada, or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444. These numbers are available from 8:00 a.m. to 8:00 p.m. Eastern Standard Time, Monday through Friday (except U.S. federal holidays).

Crime: Crime continues to be a problem throughout the Dominican Republic. Street crime and petty theft involving U.S. tourists does occur, and precautions should be taken to avoid becoming a target. While pick pocketing and mugging are the most common crimes against tourists, reports of violence against both foreigners and locals are growing. Criminals can be dangerous and visitors walking the streets should always be aware of their surroundings. Valuables left unattended in parked automobiles, on beaches and in other public places are vulnerable to theft, and reports of car theft have increased. Cellular telephones should be carried in a pocket rather than on a belt or in a purse. One common method of street robbery is for at least one person on a moped (often coasting with the engine turned off so as not to draw attention) to approach a pedestrian, grab his or her cell phone, purse or backpack, and then speed away. This type of robbery is particularly dangerous because the motorcyclist reaches the intended victim at 15–20 miles per hour and often knocks the victim to the ground.

Many criminals have weapons and are likely to use them if they meet resistance. Be wary of strangers, especially those who seek you out at celebrations or nightspots. Traveling and moving about in a group is advisable. The dangers present in the Dominican Republic, even in resort areas, are similar to those of many major U.S. cities. Expensive jewelry attracts attention and could prompt a robbery attempt. Limiting the cash and credit cards carried on your person and storing valuables, wallet items, and passports in a safe place is recommended.

Burglaries of private residences continue to be reported as well as crimes of violence. Criminals may also misrepresent themselves in an effort to gain access to your residence or hotel room. In one 2005 homicide, a U.S. citizen was murdered by two men who posed as repairmen to gain access to the apartment. In another, the Dominican police arrested the building's actual maintenance man and an accomplice for the crime.

The U.S. Embassy continues to receive reports from Americans who have been stopped while driving and asked for "donations" by someone who may appear to be a police officer before they would be allowed to continue on their way. Usually, the person(s) stopping the American drivers had approached from behind on a motorcycle; several of these motorcyclists pulled up alongside the driver's window and indicated that they were carrying a firearm. In some cases, the perpetrators were dressed in the light green uniform of "AMET," the Dominican traffic police; however, they often seemed too young to be police officers or wore ill-fitting uniforms that might have been stolen. In another incident, individuals dressed in military fatigues told the victim they were police and requested the victim to follow them to the police station prior to robbing him. Such incidents should be reported to the police and the Consular Section. If Dominican police stop an American driver for a traffic violation, the driver should request a traffic ticket rather than paying an on-the-spot fine. The driver also has the right to ask police for identification. New regulations require police to wear a nametag with their last name. While everyone driving in the Dominican Republic should abide by traffic laws and the instructions of legitimate authorities, Americans finding themselves in the aforementioned scenarios should exercise caution. In general, drivers should keep their doors locked and windows closed at all times and leave themselves an escape route when stopping in traffic in the event of an accident or other threat. Incidents involving police may be reported to the Internal Affairs Department of the National Police at 809 688-1777 or 809 688-0777.

In 2006, the U.S. Embassy received reports of Americans and others who were victims of vehicular-armed robberies in the northern provinces of the Dominican Republic. At least three of the reports indicate the victims were intercepted during the morning hours, when there was little other traffic, while driving on rural highways connecting Santiago and Puerto Plata. Drivers should exercise extreme caution when driving at night and use major highways when possible.

Although kidnappings are not common in the Dominican Republic, in 2007, two American citizens were kidnapped and held for ransom, in separate instances.

Many public transportation vehicles are unsafe, especially the route taxis or "carros publicos" in urban areas. These are privately owned vehicles that run along certain routes, can take up to six or more passengers, and are inexpensive. Passengers in "carros publicos" are frequently the victims of pick pocketing, and passengers have on occasion been robbed by "carro publico" drivers. Urban buses ("guaguas") are only marginally better. The U.S. Embassy is also aware of at least one incident in which the driver of a "motoconcho" (motorcycle taxi) robbed an American passenger. The U.S. Embassy cautions its staff not to use these modes of transportation. As an alternative, some scheduled interurban bus services use modern buses and run on reliable timetables. These are generally the safest means of intercity travel. With respect to taxis, visitors to the Dominican Republic are strongly advised to take only hotel taxis or taxis operated by services whose cabs are arranged in advance by phone and can subsequently be identified and tracked. There are continuing reports of thefts that target Americans as they leave the airport in a taxi that lacks air-conditioning. The driver rolls down the windows and when the taxi stops at a traffic light, a motorcyclist reaches in and steals a purse or anything they can grab. Travelers are advised to utilize the taxi service authorized by the airport if they have made no arrangements before arrival. Credit card fraud is common and recent reports indicate

that its incidence has increased significantly. The U.S. Embassy strongly advises Americans to restrict severely the use of credit/debit cards in the Dominican Republic. The increase in credit card fraud is particularly pronounced in the eastern resort areas of the Dominican Republic. According to reports, store workers, restaurant service staff and hotel employees may conceal devices that can instantly record the credit card information. Often, this device appears to be a normal card reader used by businesses. Credit or debit cards should be carefully protected and never allowed out of the owner's sight. Stolen cards are often used to the maximum amount before the victims are able to contact the bank. Victims of credit card fraud should contact the bank that issued the credit card immediately. It is advisable to pay close attention to credit card bills following time spent in the Dominican Republic. There have been reports of fraudulent charges appearing months after card usage in the Dominican Republic.

Automated Teller Machines (ATMs) are present throughout Santo Domingo and other major cities. However, as with credit cards, the use of ATMs should be minimized as a means of avoiding theft or misuse. One local ATM fraud scheme involves sticking photographic film or pieces of paper in the card feeder of the ATM so that an inserted card becomes jammed. Once the card owner has concluded the card is irretrievable, the thieves extract both the jamming material and the card, which they then use. There are other ATM scams as well. Exercise caution and be aware of your surroundings when using an ATM card.

The overall level of crime tends to rise during the Christmas season, and visitors to the Dominican Republic should take extra precautions when visiting the country between November and January.

In many countries around the world, counterfeit and pirated goods are widely available. Transactions involving such products may be illegal under local law. In addition, bringing them back to the United States may result in forfeitures and/or fines. More information on this serious problem is available at http://www.cybercrime.gov/18usc2320.htm.

Beaches and Resorts: The Embassy regularly receives reports of individuals and families who have become victims of crime while within the boundaries of their resort hotel. A growing number of these crimes involve the burglary of their room and even the removal of the room safe. While in general the criminals do not commit their crime in the presence of the guest it is not unheard of for guests to be victimized in their own room. Vigilance is strongly recommended.

Travelers to the Dominican Republic should strongly consider leaving valuable property at home. The Embassy recommends bringing no item on your trip that cannot be easily replaced and to make contingency plans in case of theft. These precautions include: making photocopies of all credit cards and licenses which include the numbers to call in order to report theft; photocopies of passports and birth certificates; and leaving emergency funds with someone at home in case it is necessary for money to be sent on short notice.

The Embassy occasionally receives reports of instances of sexual assault at the resorts, particularly while at the beach. "All-inclusives" are well known for serving abundant quantities of alcohol. Excessive alcohol consumption may decrease a person's ability to be aware of their surroundings, making them an easy target for crime. As such, the Embassy strongly encourages vigilance at all times.

The Embassy also receives reports of individuals who have suffered accidents or medical crisis at resorts. American citizens are advised to check their own insurance coverage when overseas or consider travelers' insurance. Hospitalization in the Dominican Republic can be extremely expensive and patients are expected to pay for services immediately. For additional information see the below section on medical insurance.

Tourist Police: The Dominican Republic does have police that are specially trained to assist tourists who require assistance. This public institution is called Politur and represents a cooperative effort between the National Police, Secretary of the Armed Forces, and the Secretary of Tourism. Politur typically has personnel in tourist areas to provide first responder type assistance to tourists. If you are the victim of a crime, Politur can help you get to a police station so that you may file a police report and seek further assistance. For more information on Politur and contact information, use the following link: http://www.politur.gov.do. Politur is located at the corner of 30 de Marzo and Mexico, Bloque D, Governmental Building, Santo Domingo. The general phone number is 809-686-8639.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, contact family members or friends, and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice system and to find an attorney if needed.

Medical Facilities and Health Information: Medical care is limited, especially outside Santo Domingo, and the quality of care varies widely among facilities. There is an emergency 911 service within Santo Domingo, but its reliability is questionable. Outside the capital, emergency services range from extremely limited to nonexistent. Blood supplies at both public and private hospitals are often limited, and not all facilities have blood on hand even for emergencies. Many medical facilities throughout the country do not have staff members who speak or understand English. A private nationwide ambu-

lance service, ProMed, operates in Santo Domingo, Santiago, Puerto Plata and La Romana; Telephone number is 809-548-7200. ProMed expects full payment at the time of transport. The U.S. Embassy maintains a non-comprehensive list of providers of medical care in the Dominican Republic, which can be found at http://www.usemb.gov.do/Consular/ACS/medical_assistance-e.htm.

Tap water is unsafe to drink and should be avoided. Bottled water and beverages are safe.

Dengue: Dengue is endemic to the Dominican Republic. To reduce the risk of contracting dengue, the U.S. Center for Disease Control (CDC) recommends wearing clothing that exposes as little skin as possible and applying a repellent containing the insecticide DEET (concentration 30 to 35 percent) or Picaridin (concentration 20 percent or greater for tropical travelers). Because of the increased risk of dengue fever and the ongoing risk of malaria in the Dominican Republic, practicing preventative measures is recommended by the CDC. For further information on dengue fever, please visit the Centers for Disease Control and Prevention's (CDC) website at http://www.cdc.gov/ncidod/dvbid/dengue.

Malaria: Since October 2004, there have been several reported cases of malaria in areas frequented by U.S. and European tourists including La Altagracia Province, the easternmost province in which many beach resorts are located. Malaria risk is significantly higher for travelers who go on some of the excursions to the countryside offered by many resorts. Prior to coming to the Dominican Republic, travelers should consult the CDC web site at http://www.cdc.gov/malaria/index.htm for more information and recommendations on malarial prophylaxis.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's Internet site at http://www.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith.

The U.S. Embassy in Santo Domingo and the CDC are aware of several cases in which U.S. citizens experienced serious complications or died following elective (cosmetic) surgery in the Dominican Republic. The CDC's web site at http://www.cdc.gov/mmwr/preview/mmwrhtml/mm5323a4.htm contains a report on patients who suffered postoperative infections following cosmetic surgery in the Dominican Republic. Patients considering travel to the Dominican Republic for cosmetic surgery may also wish to contact the Dominican Society of Plastic Surgeons (tel. 809-688-8451) to verify the training, qualifications, and reputation of specific doctors.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation. Americans traveling in the Dominican Republic should be aware that Dominican hospitals often require payment at the time of service and may take legal measures to prevent patients from departing the country prior to payment. American citizens are reminded that the U.S. Social Security Medicare Program does not provide coverage for hospital or medical costs outside the United States.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning the Dominican Republic is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

Traffic in the Dominican Republic moves on the right side of the road. Speed limits vary from 25 mph in the city to 50 mph on rural roads, but they are generally not enforced. Drivers are required to carry liability insurance.

If you do drive in the Dominican Republic, you should be aware that the utmost caution and defensive driving are necessary. Traffic laws are similar to those in the United States, but undisciplined driving is common, due to a lack of adequate traffic controls. Many drivers will not use turn indicators. Rather, it is common for a vehicle operator to stick his hand out the window to signal a turn. Drivers can also be aggressive and erratic, often failing to yield the right-of-way even when road signs or signals indicate that they should. Travel at night on intercity highways and in rural areas should be avoided, due to animals on the road, poor road conditions, and other vehicles being driven at excessive speeds, often with malfunctioning headlights or taillights. Blackouts also increase the danger of night travel. Turning right on red lights is permitted, but should be done with caution.

Traffic accidents often result in serious injury or death. This is often the case when heavy vehicles, such as buses or trucks, are involved. Traditionally, vehicles involved in accidents in the Dominican Republic are not moved (even to clear traffic), until authorized by a police officer. Drivers who violate this norm may be held legally liable for the accident.

Dominican law requires that a driver be taken into custody for driving under the influence or being involved in an accident that causes serious injury or death, even if the driver is insured and appears not to have been at fault. The minimum detention period is 48 hours; however, detentions frequently last until a judicial decision is reached (often weeks or months), or until a waiver is signed by the injured party (usually as the result of a cash settlement). Visitors to the Dominican Republic might want to consider hiring a professional driver during their stay in lieu of

driving themselves. Licensed drivers who are familiar with local roads can be hired through local car rental agencies. In case of accidents, only the driver will be taken into custody.

Pedestrians tend to step out into traffic without regard to corners, crosswalks, or traffic signals. Many pedestrians die every year crossing the street (including major, multilane highways) at seemingly random locations. Pedestrians do not have the right-of-way, and walking along or crossing busy streets—even at intersections with traffic lights or traffic police present—can be very dangerous.

Seat belts are required by law, and those caught not wearing them will be fined. There are no child car seat laws. The law also requires the use of hands-free cellular devices while driving. Police stop drivers using cell phones without the benefit of these devices. Penalties for those driving under the influence and those involved in accidents resulting in injury or death can be severe.

Motorcycles and motor scooters are common in the Dominican Republic, and they are often driven erratically. Dominican law requires that motorcyclists wear helmets, but local authorities rarely enforce this law. As noted previously in this report, public transportation vehicles such as the route taxis ("carros publicos") and urban buses ("guaguas") are unsafe.

Please see the Crime section of this information sheet for more information regarding crimes involving road safety.

Aviation Safety Oversight: The U.S. Federal Aviation Administration (FAA) has assessed the Government of the Dominican Republic's Civil Aviation Authority (CAA) as being in compliance with International Civil Aviation Organization (ICAO) aviation safety standards for oversight of the Dominican Republic's air carrier operations. For more information, travelers may visit the FAA's Internet website at http://www.faa.gov.

Currency: It is legal to exchange currency at commercial banks, exchange booths in hotels and exchange houses. The exchange rate is set by the Central Bank, based on prevailing market conditions. The market determines the exchange rate. No more than USD $10,000 or its equivalent in another currency, including Dominican pesos, may be taken out of the Dominican Republic at the time of departure.

Real Estate: Real estate investments in the Dominican Republic require a high level of caution, as property rights are irregularly enforced and investors often encounter problems in receiving clear title to land. Consultation with an attorney is recommended before signing documents or closing on any real estate transactions. Real estate investments by U.S. citizens have been the subject of both legal and physical takeover attempts. Absentee landlords and absentee owners of undeveloped land are particularly vulnerable. Investors should seek solid property title and not just a "carta de constancia," which is often confused by foreigners with a title. An official land registry measurement (also known as 'deslinde' or 'mensura catastral') is also desirable for the cautious overseas investor. Investors should also consider purchasing title insurance. Squatters, sometimes supported by governmental or non-governmental organizations, have invaded properties belonging to U.S. citizens, threatening violence and blocking the owners from entering their property. In at least one instance, the U.S. citizen landowner was physically assaulted. Several U.S. citizens with long-standing expropriation disputes with the Dominican Government are still without compensation.

Gambling: Many Americans have reported losing large amounts of money at Dominican casinos by playing a game (or variations thereof) known as "Super Keno," "Caribbean Keno," "Progressive Keno," or "Progressive Roulette." Players have complained that the game's rules are unclear and/or misleading. Any complaints arising from a casino should be directed to the Office of Casinos at the Secretary of Finance. To register a complaint with this office, call 809-687-5131, ext. 2120.

Divorce: In recent years, there have been a number of businesses, primarily on the Internet, which advertise "Quickie Dominican Divorces." The services of these businesses should be used with caution, as they may misrepresent the process of obtaining a divorce in the Dominican Republic. While it is relatively simple for foreigners to obtain a divorce in the Dominican Republic, such divorces are only valid if specific steps are taken. Those seeking information regarding divorce should first consult with an attorney in their home state.

Alien Smuggling: Dominican authorities may prosecute anyone arrested for organizing the smuggling of aliens into or out of the Dominican Republic. This is in addition to any charges individuals may face in the other country involved, including the United States.

Hurricanes: The Dominican Republic is situated in an area of the Caribbean prone to hurricanes. In the event of a hurricane alert, a notice will be posted on the U.S. Embassy in Santo Domingo's web page at http://www.usemb.gov.do. Further information can be obtained by visiting the National Weather Service's web site at http://www.nhc.noaa.gov. General information about natural disaster preparedness is available via the Internet from the U.S. Federal Emergency Management Agency at http://www.fema.gov.

Water Sports: Visitors to the Dominican Republic, including to local resort areas, should carefully assess the potential risk of recreational activities. Some of the swimming areas at popular beaches around the Dominican Republic are subject to dangerous undertows. Many beaches lack life guards and/or warnings of unsafe conditions. Resort managers usually offer current information on local swimming & surf conditions. Americans are cautioned not to swim alone, particularly at isolated beaches.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating Dominican laws, even unknowingly, may be expelled, arrested, or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in the Dominican Republic are severe, and convicted offenders can expect long jail sentences and heavy fines. For more information on the Dominican judicial system, procedures, and penalties, please visit the Consular Section's web page at http://www.usemb.gov.do. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in the Dominican Republic are encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration web site, and to obtain updated information on travel and security within the Dominican Republic. Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency. The Consular Section of the U.S. Embassy is located at the corner of Calle César Nicolás Penson and Avenida Máximo Gómez. The American Citizens Services (ACS) Unit can be reached by telephone at 809-731-4294, or via the Internet at http://www.usemb.gov.do/Consular/ACS/acs-e-contact.htm. ACS Unit office hours are 7:30 a.m. to 4:30 p.m., Monday through Thursday, Friday 7:30-12:15, except on U.S. and Dominican holidays. The Chancery of the U.S. Embassy is located a half-mile away from the Consular Section, at the corner of Calle César Nicolás Penson and Calle Leopoldo Navarro. The telephone number is 809-221-2171.

There is a Consular Agency in the north coast city of Puerto Plata at Calle Villanueva esq. Avenida John F. Kennedy, Edificio Abraxa Libraria, 2nd floor, telephone 809-586-4204, 809-586-8017, 809-586-8023; office hours are 9:00 a.m. to 12:00 p.m., and 2:30 p.m. to 5:00 p.m., Monday through Friday, except holidays. The Consular Agency has a secondary office in Sosua, also on the north coast. That office may be reached at: "Sea Horse Ranch Project" Administrative Office, Carretera Sosua Cabarete, Sosua, D.R., telephone 809-571-3880, fax 809-571-2374.

Intercountry Adoption

November 2008

The information in this section has been edited from a report available through the U.S. Department of State Office of Children's Issues. For more information detailed, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

The Dominican Republic is party to The Hague Convention on Protection of Children and Co-operation in Respect of Intercountry Adoption (Hague Adoption Convention). Therefore, all adoptions between the Dominican Republic and the United States must meet the requirements of the Convention and United States law and regulations implementing the Convention.

For detailed and updated information on these requirements, please review the *Intercountry Adoption* section of this publication and visit the USCIS Intercountry Adoption website at http://adoption.state.gov. Dominican adoption law is governed by the Dominican Code of Fundamental Protection and Rights for Children and Adolescents, Law 136-03, Articles 111-167. The adoption process is comprised of an administrative and judicial phase. The Dominican authorities will not allow a child to exit the country until the adoption is completed under Dominican law.

Who Can Adopt? Adoption between the United States and the Dominican Republic is governed by The Hague Adoption Convention. Therefore to adopt from the Dominican Republic, you must first be found eligible to adopt by the United States Government. In addition to the United States requirements for prospective adoptive parents, the Dominican Republic also has the following eligibility requirements for prospective adoptive parents.

Residency Requirements: One prospective adoptive parent must meet the specific residency requirements. If the child is under 12 years of age, the parent must reside with the child in the Dominican Republic for 60 days. If the child is 12 years of age or older, the parent must reside with the child for 30 days.

Age Requirements: The prospective adoptive parents must be between 30 and 60 years of age and at least 15 years older than the child they wish to adopt.

Marriage Requirements: Only heterosexual couples who have been married for five years or more are allowed to adopt from the Dominican Republic. Single individuals and unmarried couples are no longer permitted to adopt.

Who Can Be Adopted? Because the Dominican Republic is party to The Hague Adoption Convention, children from the Dominican Republic must meet the requirements of the Convention in order to be eligible for adoption.

In addition to the Dominican Republic's requirements, a child must meet the definition of a Convention adoptee for you to bring him or her back to the United States.

Dominican Republic's Central Authority: Consejo Nacional para la Niñez y la Adolescencia (CONANI)

The Process: The first step in adopting a child from the Dominican Republic is to select an accredited or approved adoption service provider in the United States. To begin the administrative phase, prospective adoptive parents should hire a Dominican attorney to initiate contact with CONANI and begin the process of locating a child who meets the definition of "Convention adoptee" under both Dominican and United States law. Learn more about Convention adoption service providers.

After you choose an accredited or approved adoption service provider, you must apply to be found eligible to adopt (Form I-800A) by the Department of Homeland Security, United States Citizenship and Immigration Services (USCIS).

Once the United States Government determines that you are "eligible" and "suitable" to adopt, you or your adoption service provider will forward your information to the Central Authority in the Dominican Republic. The Dominican Republic's Central Authority will review your application to determine whether you are also eligible to adopt under Dominican law. CONANI reviews the prospective adoptive family's file of required documents (see below) and, if satisfied, issues a Certificate of Suitability.

If both the United States and the Dominican Republic determine that you are eligible to adopt, and a child is available for intercountry adoption, the Central Authority in the Dominican Republic may provide you with a referral for a child.

After you accept a match with a child, you will apply to the USCIS for provisional approval to adopt that particular child (Form I-800). After this, your adoption service provider or you will submit a visa application for to a Consular officer at the United States Embassy. If the Consular office determines that the child appears eligible to immigrate to the United States, he or she will notify the Dominican Republic's Central Authority (Article 5 letter). For Convention country adoptions, prospective adoptive parent(s) may not proceed with the adoption or obtain custody for the purpose of adoption until this takes place.

Role of the Central Authority: After the prospective adoptive parents receives and accepts the referral of a child, CONANI reviews the prospective adoptive parents' file of required documents and, if satisfied, issues a Certificate of Suitability.

Role of the Court: Dominican adoption law is governed by the Dominican Code of Fundamental Protection and Rights for Children and Adolescents, Law 136-03, Articles 111-167. The Dominican Court of Minors receives the formal, legal application for adoption. If the application is approved, the Court issues a Final Order of Adoption.

Role of Adoption Service Providers: The adoption service provider forwards the prospective adoptive parents' application to CONANI.

Time Frame: An adoption can be completed within nine to ten months of United States and Dominican requirements being met. It should be noted that many variables can affect the total time it takes to complete the intercountry adoption of a Dominican child.

Adoption Application: The prospective adoptive parents initiate contact with CONANI (via their attorney) and begin the process of locating a child who meets the definition of "Convention adoptee" under both Dominican and United States law.

Adoption Fees: Attorney fees for the adoption of a Dominican child range from $5,000 to $8,000 USD. All adoption-related expenses, including court costs and document fees, are included in this estimate. These expenses should have been itemized in the fees and estimated expenses section of your adoption services contract. Learn more about adoption service provider responsibilities.

Documents Required: The following is a list of documents required for adoption in the Dominican Republic:

- Biopsychosocial study of the adoptive parents;
- Legalized adoption consent;
- Adoptive parents' birth certificates;
- Adoptive parents' marriage certificate;
- Declaration of the loss of authority of the biological parents or authorization for adoption;
- Certificate of Suitability, no more than six months old, issued by CONANI;
- Certificate issued by a civic, community, or religious entity/organization attesting to the physical, mental, social, and moral suitability of the adoptive parents;
- Certificate confirming that the adoptive parents have fulfilled the residency requirements, issued by CONANI;
- Certificate of completion of all criteria for the assignment of the child, issued by CONANI;
- Prospective adoptive parents' police certificates issued by a competent authority;
- Prospective adoptive parents' medical certificates;
- Power of attorney from the adoptive parents to their lawyer, legalized by the Dominican "Procuraduría General";
- Copy of the identification documents or passports of the adoptive parents;
- Act of No Opposition in the case of the existence of older children;
- Certification issued by a competent authority that will provide follow-up on the minor's adjustment; and

- Authorization or visa from the country where the child will live.

For updates on document requirements and information on how to authenticate documents, visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

Bringing Your Child Home: Once your adoption is complete (or you have obtained legal custody of the child), there are a few more steps to take before you can head home.

Specifically, you need to apply for several documents for your child before he or she can travel to the United States, such as a birth certificate, a passport or travel document for your child from the country in which he or she was born, and a U.S. Immigration Visa.

For detailed and updated information on how to obtain these documents, review the *Intercountry Adoption* section on this publication and visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

Child Citizenship Act: For adoptions finalized abroad: The Child Citizenship Act of 2000 allows your new child to acquire American citizenship automatically when he or she enters the United States as lawful permanent residents. For adoptions finalized in the United States: The Child Citizenship Act of 2000 allows your new child to acquire American citizenship automatically when the court in the United States issues the final adoption decree. To learn more, review the *Intercountry Adoption* section on this publication and visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

ECUADOR

Compiled from the August 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Republic of Ecuador

PROFILE

Geography

Area: 276,840 sq. km; about the size of Colorado.

Cities: Capital—Quito (pop. 1.6 million). Other major cities—Guayaquil (2.4 million).

Terrain: Jungle east of the Andes, a rich agricultural coastal plain west of the Andes, high-elevation valleys through the mountainous center of the country and an archipelago of volcanic islands in the Pacific Ocean.

Climate: Varied, mild year-round in the mountain valleys; hot and humid in coastal and Amazonian jungle lowlands.

People

Nationality: Noun and adjective—Ecuadorian(s).

Population: (July 2007 est.) 13,755,680.

Annual population growth rate: (July 2007 est.) 1.55%.

Ethnic groups: Indigenous 25%, mestizo (mixed Indian and Spanish) 65%, Caucasian and others 7%, African 3%.

Religions: Predominantly Roman Catholic (95%), but religious freedom recognized.

Languages: Spanish (official), indigenous languages, especially Quichua, the Ecuadorian dialect of Quechua.

Education: Years compulsory—ages 6-14, but enforcement varies. Attendance (through 6th grade)—76% urban, 33% rural. Literacy—92%.

Health: Infant mortality rate—22.1/1,000. Life expectancy—76.62 yrs.

Government

Type: Republic.

Independence: May 24, 1822 (from Spain).

Constitution: August 10, 1998.

Government branches: Executive—President and 15 cabinet ministers. Legislative—unicameral Congress. Judicial—Supreme Court, Constitutional Court, Supreme Electoral Tribunal, Provincial Courts, and ordinary civil and criminal judges.

Political subdivisions: 22 provinces.

Political parties: Over a dozen political parties; none predominates, although President Correa's Alianza Pais is ascendant.

Suffrage: Obligatory for literate citizens 18-65 yrs. of age; optional for other eligible voters; active duty military personnel and police may not vote.

Economy

GDP: (2008 est.) $48.5 billion;(2007 preliminary) 2.65%; (2006) 3.9%.

Real annual growth rate: 2008 est.) 4.25%; (2007 preliminary) 2.65%; (2006) 3.9%.

Per capita GDP: (2007) $3,270; (2006) $3,088.

Natural resources: Petroleum, fish, shrimp, timber, gold.

Agriculture: (including seafood) (6.7% of GDP in 2007): Products—bananas, seafood, flowers, coffee, cacao, sugar, tropical fruits, palm oil, palm hearts, rice, corn, and livestock.

Industry: (9.1% of GDP in 2007; oil and mining 21.9% in 2007): Types—petroleum extraction, food processing, wood products, textiles, chemicals, and pharmaceuticals.

Other major contributors to GDP: $12.48 billion (Jan.-Nov. 2007); $12.7 billion (2006). Types—petroleum, bananas, shrimp, coffee, cut flowers cacao, hemp, wood, fish. Major markets (2007)—U.S. 42%, Latin America 26%, Andean Community 20%, European Union (EU) 13%, and Asia 3%. Imports—$11.2 billion (Jan.-Nov. 2007); $11.3 billion (2006). Types—industrial materials, fuels and lubricants, nondurable consumer goods. Major suppliers (Jan.-Nov. 2007)—Latin America 40%, Andean Community 24%, U.S. 21%, Asia 20%, and EU 9%.

Trade: Exports—$7.7 billion (2004); $10.1 billion (2005); $12.4 billion (2006). Types—petroleum, bananas, shrimp, coffee, cut flowers cacao, hemp, wood, fish. Major markets

(2006)—U.S. 54%, Latin America 24%, European Union (EU) 12%, and Asia 4%. Imports—$7. 5 billion (2004); $9.5 billion (2005); $11.2 billion (2006). Types—industrial materials, nondurable consumer goods, agricultural products. Major suppliers (2006)—Latin America 39%, U.S. 23%, Asia 19%, and EU 9%.
Currency: U.S. dollar

PEOPLE

Ecuador's population is ethnically mixed. The largest ethnic groups are indigenous and mestizo (mixed Indian-Caucasian). Although Ecuadorians were heavily concentrated in the mountainous central highland region a few decades ago, today's population is divided about equally between that area and the coastal lowlands. Migration toward cities—particularly larger cities—in all regions has increased the urban population to over 60%. The tropical forest region (or Amazon region) to the east of the mountains remains sparsely populated and contains only about 3% of the population. Due to an economic crisis in the late 1990s, more than 600,000 Ecuadorians emigrated to the U.S. and Europe from 2000 to 2001. It is estimated that there are over two million Ecuadorians currently residing in the U.S.

HISTORY

The Inca Empire and Spanish Conquest

Advanced indigenous cultures flourished in Ecuador long before the area was conquered by the Inca Empire in the 15th century. In 1534, the Spanish arrived and defeated the Inca armies, and Spanish colonists became the new elite. The indigenous population was decimated by disease in the first decades of Spanish rule—a time when the natives also were forced into the "encomienda" labor system for Spanish landlords. In 1563, Quito became the seat of a royal "audiencia" (administrative district) of Spain.

Independence

After independence forces defeated the royalist army in 1822, Ecuador joined Simon Bolivar's Republic of Gran Colombia, only to become a separate republic in 1830. The 19th century was marked by instability, with a rapid succession of rulers. The conservative Gabriel Garcia Moreno unified the country in the 1860s with the support of the Catholic Church. In the late 1800s, world demand for cocoa tied the economy to commodity exports and led to migrations from the highlands to the agricultural frontier on the coast.

A coastal-based liberal revolution in 1895 under Eloy Alfaro reduced the power of the clergy and opened the way for capitalist development. The end of the cocoa boom produced renewed political instability and a military coup in 1925. The 1930s and 1940s were marked by populist politicians such as five-time President Jose Velasco Ibarra. In January 1942, Ecuador signed the Rio Protocol to end a brief war with Peru the year before. Ecuador agreed to a border that conceded to Peru much territory Ecuador had previously claimed in the Amazon region. After World War II, a recovery in the market for agricultural commodities and the growth of the banana industry helped restore prosperity and political peace. From 1948-60, three presidents—beginning with Galo Plaza—were freely elected and completed their terms. Political turbulence returned in the 1960's, followed by a period of military dictatorship between 1972 and 1979. The 1980's and beginning of the 90's saw a return to democracy, but instability returned by the middle of the decade.

Political Instability (1997-2007)

Abdul Buckram, from the Guayaquil-based Ecuadorian Roldosista Party (PRE), won the presidency in 1996 on a platform that promised populist economic and social policies, and challenged what Buckram termed as the power of the nation's oligarchy. During his short term of office, Buckram's administration was severely criticized for corruption. Buckram was deposed by the Congress in February 1997 on grounds of alleged mental incompetence. In his place, Congress named Fabian Alarcon interim president. Alarcon's presidency was endorsed by a May 1997 popular referendum.

Quito Mayor Jamil Mahuad of the Popular Democracy party was elected president by a narrow margin In July 1998. Mahuad concluded an historic peace agreement with Peru on October 26, 1998, but increasing economic, fiscal, and financial difficulties drove his popularity steadily lower. On January 21, 2000, during demonstrations in Quito by indigenous groups, the military and police refused to enforce public order. Demonstrators entered the National Assembly building and declared a three-person "junta" in charge of the country. Field-grade military officers declared their support for the concept. During a night of confusion and negotiations, President Mahuad fled the presidential palace. Vice President Gustavo Noboa took charge and Mahuad went on national television to endorse Noboa as his successor. Congress met in emergency session in Guayaquil the same day, January 22, and ratified Noboa as President of the Republic.

Completing Mahuad's term, Noboa restored some stability to Ecuador. He implemented the dollarization of the economy that Mahuad had announced and obtained congressional authorization for the construction of Ecuador's second major oil pipeline, this one financed by a private consortium. Noboa turned over the government on January 15, 2003, to his successor, Lucio Gutierrez, a former army colonel who first came to public attention as a member of the short-lived "junta" of January 21, 2000. Gutierrez' campaign featured an anti-corruption and leftist, populist platform. After taking office, however, Gutierrez adopted relatively conservative fiscal policies and defensive tactics, including replacing the Supreme Court and declaring a state of emergency in the capital to combat mounting opposition. The situation came to a head on April 20, 2005,

when political opponents and popular uprisings in Quito prompted Congress to strip Gutierrez of the presidency for allegedly "abandoning his post." When the military withdrew its support, Gutierrez went into temporary exile. Congress declared Vice President Alfredo Palacio the new president. A semblance of stability returned, but the Palacio administration failed to achieve major reforms.

In presidential elections on October 15, 2006, third-time candidate Alvaro Noboa won the first round. However, Rafael Correa, Palacio's former finance minister, running on an anti-establishment reform platform, bested Noboa in the second round presidential runoff on November 26. Election observers characterized the elections as generally free, fair, and transparent. Noboa's National Institutional Renovation and Action Party won the largest bloc in Congress in 2006 elections, followed by Gutierrez's Patriotic Society Party; Correa's Proud and Sovereign Fatherland Alliance movement did not field any congressional candidates. Traditional parties saw their congressional representation cut in half. The new Congress took office January 5, 2007 and Correa was sworn in as President on January 15, 2007. In March, 2007, 57 members of Congress were dismissed on the grounds that they violated campaign laws. Following that, the Congress was largely deadlocked and later effectively replaced by a constituent assembly that was voted into power on September 30, 2007. The assembly, which was inaugurated on November 29, 2007, approved a text for a new constitution on July 29, 2008. This constitutional text must be approved in a referendum scheduled for September 28, 2008. If approved, elections for a new Congress and president are expected in January 2009.

GOVERNMENT

The 1998 constitution provides for 4-year terms of office for the president, vice president, and members of Congress, although none of the last three democratically-elected presidents finished their terms. Presidents may be re-elected after an intervening term; legislators may be re-elected immediately. The executive branch currently includes 24 ministries (including coordinating ministries with intergovernmental responsibility).

Provincial leaders (called prefects) and councilors, like mayors, city councilors, and rural parish boards, are directly elected. Congress meets throughout the year except for recesses in July and December. Congress is divided into 20 seven-member subject committees.

Justices of the Supreme Court are appointed by the Congress for life; members of the Constitutional Court serve four years.

Principal Government Officials

Last Updated: 11/12/08

Pres.: **Rafael CORREA Delgado**
Vice Pres.: **Lenin MORENO Garces**
Min. of Agriculture, Livestock, Fisheries, & Aquaculture: **Walter POVEDA Ricaurte**
Min. of the Coast: **Carolina PORTALUPI Castro**

Ecuador maintains an embassy in the United States at 2535 15th Street NW, Washington, DC 20009 (tel. 202-234-7200). Consulates are located in Atlanta, Boston, Chicago, Dallas, Denver, Houston, Jersey City, Los Angeles, Miami, New Orleans, New York, San Francisco, and San Juan, Puerto Rico.

POLITICAL CONDITIONS

Ecuador's political parties have historically been small, loose organizations that depend more on populist, often charismatic, leaders to retain support than on programs or ideology. Frequent internal splits have produced great factionalism. No party has won the presidency more than once through elections since the return to civilian government in 1979. Although Ecuador's political elite is highly factionalized along regional, ideological, and personal lines, desire for consensus on major issues often leads to compromise. Opposition forces in Congress are loosely organized, but historically they often unite to block the administration's initiatives.

Beginning with the 1996 election, the indigenous population abandoned its traditional policy of shunning the official political system and participated actively. The indigenous population established itself as a force in Ecuadorian politics, and participated in the Gutierrez administration before joining the opposition. In the 2006 elections, the indigenous movement won six seats in Congress (down from 11 in 2002).

Constitutional changes enacted by a specially elected National Constitutional Assembly in 1998 took effect on August 10, 1998. The new constitution strengthened the executive branch by eliminating mid-term congressional elections and by circumscribing Congress' power to remove cabinet ministers. Party discipline varies, and many congressional deputies switch allegiance during each Congress On April 15, 2007, 82% of voters approved a referendum to convene a constituent assembly, a centerpiece of President Correa's political reform agenda. This will be Ecuador's seventh such assembly in the past 90 years, and, if successful, will produce Ecuador's 20th constitution since independence.

ECONOMY

The Ecuadorian economy is based on petroleum production, manufacturing primarily for the domestic market, and agricultural production for domestic consumption and export. Principal exports are petroleum, bananas, shrimp, flowers, and other primary agricultural products. In 2006, oil accounted for 59% of total export earnings. Ecuador is the world's largest exporter of bananas and plantains (about $1.2 billion in 2006) and a major exporter of shrimp ($588 million in 2006). Exports of nontraditional products such as flowers ($436 million in 2006, a three-fold increase in 10 years) and canned fish ($575 million in 2006) have grown in recent years.

Ecuador's economic performance has been solid since it adopted the dollar as its national currency in 2000, following a major banking crisis and recession in 1999. Since 2000, growth has averaged 4.6% per year, supported by the stability brought by dollarization, high oil prices, strong domestic consumer demand, increased non-traditional exports, and growing remittances ($3 billion a year) from Ecuadorians living abroad. In 2007, economic growth slowed to an estimated 2.65%, while inflation was 3.32% and petroleum and non-petroleum exports expanded. Growth was constrained in 2007 by declining petroleum production and reduced private sector investment. Per capita income has increased from $1,296 in 2000 to an estimated $3,270 in 2007, while the poverty rate fell from 51% in 2000 to 38% in 2006.

Ecuador did not improve its overall competitiveness during this period of economic and export growth. In 2006, it slipped three positions in both the World Bank's Doing Business Index (from 120 to 123) and the World Economic Forum's Competitiveness Index (from 87 to 90), as other nations have moved more aggressively to adapt to globalization.

Though Ecuador has a relative abundance of oil reserves, it has been

unable to take full advantage of those resources for its own development. Mismanagement, lack of investment, and corruption in the state-owned oil sector have caused declines in state oil production over the last decade. Overall oil production increased during that period because of growing production by private sector companies, but in the first half of 2007 production by the state oil company fell, while that by private sector companies was flat. Commercial disputes as well as judicial and contractual uncertainties have deterred private oil and other companies from investing in the country. The electricity and telecommunications sectors also have similar significant problems. Ecuador was in the final stages of negotiating a free trade agreement (FTA) with the United States, but that progress stalled with an April 2006 hydrocarbons law mandating revisions in contract terms, and the May 2006 seizure of the assets of Occidental Petroleum, at the time the country's largest U.S. investor. Resolution of the Occidental situation is currently pending international arbitration under the terms of the bilateral investment treaty.

President Correa has announced his opposition to resumption of FTA talks with the U.S., citing concerns that Ecuador is not yet sufficiently competitive, especially in sensitive agriculture sectors. Prior to taking office, he said that the Government of Ecuador would only service its external debt obligations after funding domestic social priorities; as of January 2008, the government had met its external debt obligations. In October 2007 the Correa administration decreed that many foreign oil companies operating in Ecuador pay 99% of extraordinary income to the government. The government increased income transfers to the poor and has increased spending on health, education, and basic infrastructure.

FOREIGN RELATIONS

Ecuador always has placed great emphasis on multilateral approaches to international problems. Ecuador is a member of the United Nations (and most of its specialized agencies), the Organization of American States (OAS), and many regional groups, including the Rio Group, the Latin American Economic System, the Latin American Energy Organization, the Latin American Integration Association, and the Community of Andean Nations.

In October 1998, Ecuador and Peru reached a peace agreement to settle their border differences, which had festered since the signing of the 1942 Rio Protocol. This long-running border dispute occasionally erupted into armed hostility along the undemarcated sections, with the last conflict occurring in 1995. The U.S. Government, as one of the four guarantor nations (the others are Argentina, Brazil and Chile), played an important role in bringing the conflict to an end. The peace agreement brokered by the four guarantors in February 1995 led to the cessation of hostilities and a Military Observers Mission to Ecuador-Peru (MOMEP), which monitored the zone. In addition to helping broker the peace accord, the U.S. has been active in demining the former area of conflict and supporting welfare and economic projects in the border area.

The ongoing conflict in Colombia and security along the 450-mile-long northern border are important issues in Ecuador's foreign relations with Colombia. The instability of border areas and frequent encroachments of Colombian guerillas into Ecuadorian territory has led the Ecuadorian army to deploy more troops to the region. Although Ecuadorian officials have stated that Colombian guerrilla activity will not be tolerated on the Ecuadorian side of the border, guerrilla bands have been known to intimidate the local population, demanding extortion payments and practicing vigilante justice. The close proximity of the border to northern oil fields also has resulted in kidnappings of foreign oil workers by Colombian-based criminals. The Correa administration is pursuing a policy known as Plan Ecuador to develop the northern border region and protect citizens from the drug threat.

U.S.-ECUADORIAN RELATIONS

The United States and Ecuador have maintained close ties based on mutual interests in maintaining democratic institutions; combating narcotrafficking; building trade, investment, and financial ties; cooperating in fostering Ecuador's economic development; and participating in inter-American organizations. Ties are further strengthened by the presence of an estimated two million Ecuadorians living in the United States, by 150,000 U.S. citizens visiting Ecuador annually, and by approximately 20,000 U.S. citizens residing in Ecuador. More than 100 U.S. companies are doing business in Ecuador.

The United States assists Ecuador's economic development directly through the Agency for International Development (USAID) and through multilateral organizations such as the Inter-American Development Bank and the World Bank. In addition, the U.S. Peace Corps operates a sizable program in Ecuador. Total U.S. assistance to Ecuador amounted to over $34 million in FY 2007.

The United States is Ecuador's principal trading partner. In 2006, Ecuador exported about $6.8 billion in products to the U.S. For over 10 years Ecuador has benefited from duty-free entry for certain of its exports under the Andean Trade Preferences Act (ATPA) and received additional trade benefits under the Andean Trade Promotion and Drug Eradication Act (ATPDEA) in 2002. The U.S. Congress approved a ten-month extension of those benefits, now set to expire on December 31, 2008. In May 2004 Ecuador entered into negotiations for an Andean free trade agreement with the U.S., Colombia, and Peru, but negotiations between the U.S. and Ecuador have not resumed since the Government of Ecuador announced controversial reforms to hydrocarbons legislation in April 2006.

Both nations are signatories of the Rio Treaty of 1947, the Western Hemisphere's regional mutual security treaty. Although there are problems with money laundering, border controls, and illegal immigration, Ecuador shares U.S. concerns over narcotrafficking and international terrorism, and has energetically condemned terrorist actions.

The government has maintained Ecuador virtually free of coca production since the mid-1980s, and is working to combat money laundering and the transshipment of drugs and chemicals essential to the processing of cocaine (with U.S. support). It has recently given greater priority to combating child labor and trafficking in persons.

Ecuador and the U.S. agreed in 1999 to a 10-year arrangement whereby U.S. military surveillance aircraft could use the airbase at Manta, Ecuador as a Forward Operating Location to detect drug trafficking flights through the region. President Correa has stated that he will not to renew the lease for the Forward Operating Location.

Ecuador claims a 320-kilometer-wide (200-mi.) territorial sea. The United States, in contrast, claims a 12-mile boundary and jurisdiction for the management of coastal fisheries up to 320 kilometers (200 mi.) from its coast, but excludes highly migratory species. Although successive Ecuadorian governments have declared a willingness to explore possible solutions to this issue, the U.S and Ecuador have yet to resolve fundamental differences concerning the recognition of territorial waters.

TRAVEL

Consular Information Sheet

November 5, 2008

Country Description: Ecuador is a Spanish-speaking country about the size of Colorado. It has a developing economy and a democratically elected government. Ecuador is geographically and ethnically diverse. In general, tourist facilities are adequate but vary in quality. Ecuador adopted the U.S. dollar in 2000. Both U.S. coins and Ecuadorian coins, which are equivalent to the value of the U.S. coins, are used.

Entry Requirements: A valid U.S. passport is required to enter and depart Ecuador. Tourists must also provide evidence of return or onward travel. U.S. citizens traveling on regular passports for tourism or business do not need a visa for a stay of 90 days or less. Those planning a longer visit must obtain a visa in advance of arrival. Travelers who stay in Ecuador beyond the allowed entry time are

charged a substantial fee and are barred from re-entering Ecuador for six months from the date of departure. An airport exit tax is required when departing Ecuador.

U.S. citizens whose passports are lost or stolen in Ecuador must obtain a new passport at the U.S. Embassy in Quito or the U.S. Consulate General in Guayaquil and present it, together with a police report of the loss or theft, to the main immigration offices in those cities prior to arriving at the airport in order to obtain permission to depart.

Ecuador's exit procedures mandate that minors (under the age of 18) who are citizens or residents of Ecuador and who are traveling alone, with one parent, or with a third party, must present a copy of their birth certificate and written authorization from the absent parent(s) or legal guardian. When a parent is deceased, a notarized copy of the death certificate is required in lieu of the written authorization. If documents are prepared in the United States, the authorization and the birth certificate must be translated into Spanish, notarized and authenticated by the Ecuadorian Embassy or an Ecuadorian consulate within the United States. It is not uncommon for some local authorities to insist these documents be apostilled (authenticated). Documents must be apostilled by the same State that issued the document. For a list of State Authentication Authorities go to http://travel.state.gov/about/info/customer/customer_312.html; if documents are prepared in Ecuador, only notarization by an Ecuadorian notary is required. This paragraph does not apply to children who enter Ecuador with U.S. passports as tourists, unless they hold dual U.S./Ecuadorian citizenship.

For further information regarding entry, exit, and customs requirements, travelers should contact the Ecuadorian Embassy at 2535 15th Street NW, Washington, DC 20009; telephone (202) 234-7166; web page http://www.ecuador.org/; or the Ecuadorian Consulate in Chicago (312) 338-1002/03; fax (312) 338-1004, Houston (713) 572-8731, Jersey City (201) 985-1700, Los Angeles (323) 658-5146; (323) 658-1068; fax (323) 658-1198, Miami (305) 539-8214, New Orleans (504) 523-3229, New York (212) 808-0211, or San Francisco (415) 982-1819. Visit the Embassy of Ecuador's web site at http://www.ecuador.org for the most current visa information.

Safety and Security: The U.S. Embassy in Quito advises caution when traveling to the northern border region of Ecuador, to include areas in the provinces of Sucumbios, Orellana and Carchi, northern Esmeraldas, and southern Esmeraldas, south of Atacames. U.S. government personnel are under limitations with respect to traveling alone and over-nighting in these areas due to the spread of organized crime, drug trafficking, small arms trafficking, and incursions by various Colombian terrorist organizations. Since 1998, at least ten U.S. citizens have been kidnapped near Ecuador's border with Colombia. One U.S. citizen was murdered in January 2001 by kidnappers holding him for ransom. Violent crime has significantly increased in 2007 and 2008 with American citizens being victims of crimes, to include but not limited to, homicides, armed assaults, robberies, sexual assaults, and home invasions. American citizens have also been the victims of violent crime on beaches regardless of whether the beach is a popular tourist destination or remote.

Political demonstrations occur frequently throughout Ecuador for various reasons. Protesters often block city streets and rural highways, including major arteries such as the Pan American Highway. Public transportation is often disrupted during these events. Protesters may burn tires, throw rocks and Molotov cocktails, engage in destruction of property and detonate small improvised explosive devices during demonstrations. Police response may include water cannons and tear gas. U.S. citizens and U.S. affiliated interests are not usually targeted, but U.S. citizens are advised to avoid areas where demonstrations are in progress and to be prepared with backup transportation plans. Although political demonstrations have not been directed at foreigners in the past, visitors are reminded that peaceful demonstrations can turn violent with little or no warning. Additionally, foreigners are prohibited from protesting in Ecuador and may be subject to arrest for participating in demonstrations of any kind. Please see the following links for the local information in Quito and Guayaquil's Consular Districts, respectively at http://ecuador.usembassy.gov/security-and-safety/warden-messages.html and http://guayaquil.usconsulate.gov/warden_messages.html. U.S. citizens may also keep informed of daily happenings by following the local news and police reports.

Ecuadorian authorities may declare states of emergency in provinces and regions affected by civil unrest, natural disaster, or other disruptions. During states of emergency, authorities have expanded powers to restore order, including suspension of some constitutional rights, expanded detention powers, and imposition of curfews.

Radicals in various locations in Ecuador, including Quito, Guayaquil, and Cuenca, have occasionally placed small explosive devices that release political literature, known locally as pamphlet bombs. Targets have included local and international businesses and various Government of Ecuador buildings. Although no foreign tourists have been injured in these explosions, American citizens visiting or residing in Ecuador are urged to take common-sense precautions and avoid suspicious looking packages.

U.S. citizens should carry identification at all times, including proof of U.S. citizenship. Travelers to Ecuador's beach areas should be aware that strong currents, undertow, and underwater hazards may exist and are not always posted. Most beaches lack staffed lifeguard stations.

Crime: Crime is a serious problem in Ecuador, and visitors should be alert and cautious. Non-violent crime is common: hundreds of Americans are

robbed every year in Ecuador. Violent crime has increased in recent years. Thieves and small gangs armed with guns or knives are now sometimes active even in smaller cities such as Otavalo, Manta, and Cuenca. Tourists have been robbed at gunpoint on beaches and along hiking trails, including on the well-populated trail to the summit of Pichincha Volcano in Quito. Incidents of rape have increased, even in well-traveled tourists areas and when the victims traveled in groups for safety. Shootings, kidnappings, and carjackings are still relatively rare, but American citizens have been victimized by those crimes. The Ecuadorian government has increased police patrols in tourist areas, but travelers should remain alert to their surroundings and maintain constant control of personal belongings.

Travelers should avoid wearing expensive-looking jewelry and watches. Avoid deserted beaches, hiking trails, and infrequently traveled roads, as well as the interior regions of large city parks, particularly at night. Robberies on public buses are a continuing problem. The Embassy recommends that visitors use legitimate taxicabs (yellow, with meters) to travel around the larger cities. Public buses can be dangerous—from both a traffic safety and a personal security point of view.

Pickpockets and other petty thieves are particularly active in public markets, airports, bus terminals, restaurants, and crowded streets. Backpackers are frequently targeted for robbery and "snatch and grabs"; business travelers carrying laptop computer bags are similarly targeted. Many travelers who travel by bus store their luggage below the bus, where it is sometimes stolen. Therefore, we recommend that you do not store your passport in your luggage. Always be aware of your surroundings, and try to not travel alone. Thefts from vehicles are common. Do not leave anything of value in plain view in a car, including sunglasses or sports equipment. Carjackings have occurred in both rural and urban areas. Visitors are advised to drive with doors locked and windows rolled up. In Quito, travelers should be particularly alert on the crowded streets of south Quito, at the Panecillo, in Old Quito, and in the areas of El Tejar, Parroquia San Sebastian, Avenida Cristobal Colon, and Gonzalez Suarez. The U.S. Embassy strongly discourages hiking to the summit of Pichincha as violent crime is sharply rising. Groups as large as eight have been robbed at gunpoint by masked men; female hikers have been sexually assaulted. The Mariscal Sucre District is a popular tourist area in Quito with numerous restaurants, bars, hotels, and shopping sites. Since 1999, U.S. government employees and private U.S. citizens have been victimized there, prompting the U.S. Embassy to put certain bars off-limits and to declare a nighttime curfew in the area for its employees. Increased police presence and better lighting in prime tourist squares of Old Quito have improved safety, but similar measures in the Mariscal district have not been as effective.

In Guayaquil, take extra caution in the downtown area at night, in the street market area of La Bahia, at the Christ Statue (Sagrado Corazon de Jesus) on Cerro del Carmen, in the airport area, and in the southern part of the city. The riverfront park area called the Malecon 2000 and the passage up to the lighthouse in the Las Penas area are generally safe and well patrolled although at night caution should be observed. There have been repeated instances of travelers followed from the airport and intercepted by robbers using two vehicles to cut off the traveler. There is some evidence that those most at risk are people who appear to be returning from family visits laden with gifts and large amounts of cash. There have been armed robberies of restaurants and their patrons, including in the fashionable areas of Guayaquil. Guayaquil has also experienced an increase in kidnappings for ransom, often in connection with hijackings, although tourists have not been targeted.

Criminals sometimes use incapacitating drugs such as scopolamine on unsuspecting tourists in order to rob them. These so-called date rape drugs are put into drinks in order to drug the unsuspecting victim. This drug can render the victim disoriented and can cause prolonged unconsciousness and serious medical problems. Never allow a stranger to "buy" you a drink and never leave your drink unattended. Several American citizens have reported thefts of property following ingestion of such substances.

Every year, 15 to 20 American citizens are arrested for attempting to traffic drugs between Ecuador and the United States, or between mainland Ecuador and the Galapagos. Suitcases with false bottoms and other packages are common methods of transporting illegal substances. Many of these citizens claim to have been unaware that they were transporting drugs. As in any other country, do not accept gifts, packages, or suitcases from other persons; even trusted travel companions have been known to take advantage of their friends and family to traffic drugs through Ecuador's airports. See the Criminal Penalties section below for more details about Ecuador strict laws and sentences regarding illegal drug trafficking.

In many countries around the world, counterfeit and pirated goods are widely available. Transactions involving such products may be illegal under local law. In addition, bringing them back to the United States may result in forfeitures and/or fines. More information on this serious problem is available at http://www.cybercrime.gov/18usc2320.htm.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of

local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed. Female victims of crime may receive assistance from the Comisaria de la Mujer at Ave. 24 de Mayo y Calle Loja, telephone 593 2 228 4016 or the Oficina de Derechos de la Mujer, Guayanas E-331 y Inglaterra, Quito 593 2 252 9909.

The local equivalent to the emergency line in Ecuador is the same as the U.S., dial "911". The operators typically speak Spanish only. Victims should also call the Embassy or Consulate to report the crime and for assistance.

Medical Facilities and Health Information: Adequate medical and dental care can be readily obtained in the major cities of Ecuador. In smaller communities and in the Galapagos Islands services are limited, and the quality is variable and generally below U.S. standards. Ambulances, with or without trained emergency staff, are in critically short supply. Acute surgical and cardiac services are not available on the Galapagos Islands. Serious cases must be evacuated to the Ecuadorian mainland or the United States for treatment. Pharmacies are readily available in any city. However, the availability of some medications is sporadic, and formulations and brand names will differ from products available in the U.S. Narcotics and tranquilizers are extremely limited in availability. "Pharmacists" sometimes prescribe and dispense medications. These individuals often have little training and prescribe broad-spectrum antibiotics and other inappropriate medications. Travelers should not seek their advice. Folk healers and traditional markets offer herbal and folk remedies which should be avoided as formulations are questionable and some components may interact with other prescription medications.

Travelers to Quito (close to 10,000 feet) and other highland areas may require some time to adjust to the altitude, which can adversely affect blood pressure, digestion, and energy level. Travelers are encouraged to consult with their personal health care providers before undertaking high-altitude travel. In particular, travelers with heart or lung problems and persons with sickle cell trait may develop serious health complications at high altitudes.

Scuba divers in the Galapagos Islands should be aware of limited facilities for decompression. A privately owned decompression chamber is available on Santa Cruz Island in the Galapagos Islands. The Ecuadorian Navy operates a second decompression chamber at the San Eduardo Naval Base in Guayaquil. Due to the high costs for these services and associated emergency transportation, divers are advised to obtain adequate medical evacuation and divers insurance.

Travelers should be aware of the presence of malaria, dengue fever, and yellow fever in areas of Ecuador below 4,500' elevation. Historically there has not been dengue or malaria in the Galapagos archipelago, and yellow fever has only occurred in the Amazon Basin. Travelers who are on an appropriate anti-malarial drug have a greatly reduced chance of contracting malaria, while vaccine can provide protection against yellow fever. Avoiding mosquito bites is the only effective prevention for dengue and personal protective measures, such as the use of insect repellents, help to reduce the risk of contracting all of these illnesses. Travelers who become ill with a fever or flu-like illness while traveling in a high-risk area, and for up to one year thereafter, should seek prompt medical attention. For additional information on malaria or dengue, protection from insect bites, and anti-malarials, consult the Center for Disease Control and World Health Organization web sites listed below.

The U.S. Department of State is unaware of any HIV/AIDS entry restrictions for visitors to or foreign residents of Ecuador.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's Internet site at http://wwwn.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Ecuador is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

Road travel throughout Ecuador can be dangerous, especially at night. Many roads are poorly maintained or unmarked. Heavy rains and mudslides often close or wash out roads. Heavy fog is common in mountainous areas. Driving practices differ from U.S. standards. Inter-urban and inter-provincial bus passengers are often targets of crime, including robbery and sexual assault.

Highways are often unmarked and do not have signs indicating destinations. Road safety features such as crash barriers and guardrails along steep mountainsides are rare. In the countryside livestock are often herded along roads or graze on roadsides. Many roads are used for pedestrian and animal traffic as well as vehicular traffic. Driving habits vary from region to region. In general, drivers in Quito and the mountain areas and the Oriente (eastern jungle) drive more slowly, observe traffic signals, and slow down for speed bumps. Vehicles are reasonably well maintained. On the coast, drivers

have a more liberal approach to vehicle maintenance and traffic regulations. In all areas buses, both intracity and intercity, will stop at any point on their route to pick up or drop off passengers. Speed bumps abound, even on major highways such as the Pan American Highway, to slow traffic. Drivers turn right and left from any lane and do not yield for pedestrians and cyclists.

Intoxicated drivers can be encountered at any time, but they are especially prevalent on weekends and holidays.

Ecuador's frontier regions are largely rural, poor, and lack police presence. Because drug traffickers, criminal organizations, and smugglers of all types use clandestine border crossings to move their goods, the U.S. Embassy advises against driving on all but the most traveled highways.

If you are the driver of a vehicle involved in an automobile accident, you will likely be taken into police custody, especially if injuries are involved. You are almost certain to spend some time in jail until all parties are satisfied that responsibility has been assigned and adequate financial satisfaction received.

Drivers may face criminal charges if injuries or damages are serious. When driving your own vehicle or a rented vehicle, be sure to have proper vehicle registration papers with you.

Visit the web site of the country's national tourist office at http://www.turismo.gov.ec/ and the Ministerio de Transporte y Obras Publicas, the national authority responsible for road safety, at http://www.mtop.gov.ec.

Aviation Safety Oversight: The U.S. Federal Aviation Administration (FAA) has assessed the Government of Ecuador's Civil Aviation Authority as being in compliance with International Civil Aviation Organization (ICAO) aviation safety standards for oversight of Ecuador's air carrier operations.

For more information, travelers may visit the FAA's web site at http://www.faa.gov.

Galapagos Islands: A significant number of Ecuadorian tour vessels operating in the Galapagos Islands are neither inspected nor operated in accordance with U.S. regulations, and do not meet U.S. safety standards. The Government of Ecuador requires that vessels carrying more than sixteen passengers comply with the International Safety Management (ISM) code established by the International Maritime Organization. However, the quality of inspections, oversight, crewmember proficiency evaluation, and other requisites for safe vessel operation may vary substantially. Tour boat accidents are more frequent among small vessels (those carrying fewer than sixteen passengers), but travelers should inquire about safety features of any vessel, regardless of size. When boarding vessels be sure to look for the life boats, floatation devices and if possible take a moment to inspect the life vest you would be using if there were an accident.

There have been at least three cases in 2004-2006 in which small quantities of drugs have been placed by unknown persons in unsecured pockets of tourists' checked bags, including backpacks, en route to the Galapagos. Upon arrival, these drugs have been detected by police canine units, and the owners of the bags have been arrested and detained for months while the cases are resolved. Travelers are advised to secure all parts of their bags thoroughly before checking them on flights to the Galapagos.

Strikes and disturbances by local fisherman in the Galapagos Islands have become violent on occasion. While tourists have not been targeted, the incidents affected their movement and access to some sites. Such disturbances have been minimal since April 2004, but the issue remains unsettled and could resurface at any time.

The islands are over 600 miles from the mainland and help may be slow in arriving in case of emergency. The Government of Ecuador has very limited search and rescue capabilities. Travelers to the Galapagos are encouraged to contact tour operators and visit the Bureau of Consular Affairs' web site for the most recent information when planning their trips to the Galapagos.

Other Legal Issues: Under Ecuadorian law, business disputes that normally would be handled by civil litigation in the United States may be converted into criminal proceedings. This provision of the law has been used to impose travel prohibitions against resident U.S. citizens, and it also has led to the arrest and incarceration of U.S. business people while they were awaiting a hearing on the civil matter.

When considering purchasing property in Ecuador, Americans should be aware that competing claims to property might only surface after an apparently legal sale has been made. Deficiencies in the Ecuadorian system for surveying and registering property and weaknesses in the judicial system mean that these disputes can last years.

The Mission is aware of several cases of American citizen land owners in Ecuador being threatened with physical harm and/or confiscation of their property by individuals claiming rights to the land, and, in at least one case, buildings have been razed. American citizens considering buying property in Ecuador should engage a competent attorney and carefully research land title issues before making a purchase.

Disaster Preparedness: Ecuador has 19 potentially active volcanoes, including nine that have shown recent activity. Earthquakes occur frequently. Three active volcanoes within 50 kilometers of Quito pose a significant threat to the city: Guagua Pichincha, Cotopaxi, and Reventador. The primary threat is from failures of transportation, water, communications, and power systems due to heavy ash fall and damage to infrastructure outside the city. Air transportation is especially vulnerable.

Potentially serious respiratory problems are caused by inhalation of ash. The town of Banos, a popular tourist destination approximately 120 kilometers south of Quito, is at the base of the Tungurahua Volcano. Tungurahua has erupted explosively several times since 1999, most recently in February of 2008, causing deaths and forcing thousands to evacuate their homes. Explosive eruptions can occur with little warning. The resulting flows of mud and lava could pose a significant and immediate threat to Banos and other population centers in the vicinity. Travelers should to be aware of these conditions when choosing to stay overnight in Banos, especially on the western side of the town, and should be ready to evacuate on short notice.

Other volcanoes active in Ecuador include Reventador, 100 kilometers east of Quito, and Cotopaxi, 50 kilometers south of Quito. In 2002, lava and mudflows caused by Reventador volcano closed a major Quito/northern-border highway and volcanic ash blanketed Quito, shutting down the Quito airport for several days.

The Quito City Government and the Ecuadorian Geophysical Institute monitor these volcanoes and issue regular reports on their activity. In the event of eruptions, travelers should pay close attention to the news media for updates on the situation. Other volcanoes in Ecuador may also exhibit increased activity at any time. Further information is available via the Internet from the Ecuadorian Geophysical Institute at http://www.igepn.edu.ec/ and the National Oceanic and Atmospheric Administration at http://www.ssd.noaa.gov/VAAC/guag.html.

Customs Regulations: Ecuadorian customs authorities may enforce strict regulations concerning temporary importation into or export from Ecuador of items such as forearms, religious materials, antiquities, medications, electronic equipment and currency. Contact the Embassy of Ecuador in Washington, DC or one of Ecuador's consulates in the United States for specific information regarding customs requirements.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating Ecuadorian laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Ecuador are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

The Ecuadorian government is required by international law to notify the U.S. Embassy or the nearest U.S. Consulate promptly when an American citizen is arrested and requests such notification. Delays in notification can limit the assistance the U.S. Government can provide an arrested American citizen. Therefore, Americans should promptly identify themselves as such to arresting officers and request that the U.S. Embassy in Quito or the U.S. Consulate in Guayaquil be notified immediately.

Prison conditions in Ecuador are extremely poor. In many facilities food is insufficient in both quantity and quality, and prisoners must pay for adequate nutrition from their own funds. Most Ecuadorian prisons provide poor medical care, and urgent medical conditions may receive only minimal attention. The Guayaquil penitentiary medical clinic does not have medicine but is staffed with medical personnel. Prisoners must personally pay to have someone outside of the prison obtain medicine and prescriptions. Those accused of crimes in Ecuador can expect lengthy delays before trial and sentencing. The accused are usually incarcerated while awaiting trial and sentencing, and in the case of serious crimes, bail is generally not an option.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in Ecuador are encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration web site, https://travelregistration.state.gov and to obtain updated information on travel and security within Ecuador. Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency. The U.S. Embassy in Quito is located at the corner of Avenida 12 de Octubre and Avenida Patria (across from the Casa de la Cultura). The telephone during business hours (8:00a.m. to 5:00 p.m.) is (011) 593 2 256 2890 X4510. For after-hours emergencies use (011) 593 2 256 1749. The fax is (011) 593 2 256 1254. Within the same city use the last seven digits. Add the city code for intercity telephone calls. The Embassy's Internet address is: http://www.usembassy.org.ec.

The U.S. Consulate General in Guayaquil is located at the corner of 9 de Octubre and Garcia Moreno (near the Hotel Oro Verde); telephone (011-593-4) 232-3570 during business hours (8:00 a.m. to 5:00 p.m.) or 232-1152 for after-hours emergencies; fax (011-593-4) 232-0904. The Consulate General's Internet address is: http://guayaquil.usconsulate.gov.

Consular services for U.S. citizens in the Galapagos Islands are provided by the Consulate General in Guayaquil with assistance from a U.S. Consular Agent in Puerto Ayora, Galapagos, at 05) 526-330 or (05) 526-296.

The Consular Section in Quito is open for American citizen services, including registration, from 8:00 a.m. to 12:30 p.m. and 1:30 to 4:00 p.m., Monday through Thursday, excluding

U.S. and Ecuadorian holidays. The Consular Section in Guayaquil is open for those services from 8:00 a.m. to 12:00 noon, Tuesday through Friday, excluding U.S. and Ecuadorian holidays.

Intercountry Adoption

November 2008

The information in this section has been edited from a report available through the U.S. Department of State Office of Children's Issues. For more information detailed, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Ecuador is party to The Hague Convention on Protection of Children and Co-operation in Respect of Intercountry Adoption (Hague Adoption Convention). Therefore, all adoptions between Ecuador and the United States must meet the requirements of the Convention and United States law implementing the Convention. For detailed and updated information on these requirements, please review the *Intercountry Adoption* section of this publication and visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

Ecuadorian law does not allow for an Ecuadorian child to travel to the United States to be adopted. Therefore, prospective adoptive parents must obtain a full and final adoption under Ecuadorian law before the child can immigrate to the United States.

Who Can Adopt? Adoption between the United States and Ecuador is governed by The Hague Adoption Convention. Therefore to adopt from Ecuador, you must first be found eligible to adopt by the United States Government. In addition to the United States requirements for prospective adoptive parents, Ecuador also has the following eligibility requirements for prospective adoptive parents.

Residency Requirements: Prospective adoptive parent(s) must travel to Ecuador and expect to remain there for three to four weeks to finalize the adoption. Once an adoption decree is issued, only one parent needs to remain in Ecuador with the child, usually for an additional week.

Age Requirements: If married, both parents must be over 25 years of age. There must be an age difference of at least 14 years between the younger parent and the child. If the Unidad Técnica de Adopciones (Technical Adoptions Unit) allows for a non-married individual to adopt a child of the opposite sex, then there must be an age difference of 30 years between the prospective adoptive parent and the child.

Marriage Requirements: Both single and married individuals may adopt a child in Ecuador. An unmarried (single, widowed, divorced) adoptive parent may only adopt a child of the same sex, unless the Technical Adoptions Unit issues a favorable report for adoption of a child of the opposite sex.

Other Requirements: The Childhood and Adolescence Court, Juzgado de la Niñez y Adolescencia, must grant permission for the child to depart the country if only one member of the couple is present in Ecuador to travel with the child. This permission is only valid for one year. Additionally, prospective adoptive parents residing outside Ecuador may not adopt more than two children at a time, except in the case of sibling adoptions.

Who Can Be Adopted? Because Ecuador is a member of The Hague Adoption Convention, children from Ecuador must meet the requirements of the Convention in order to be eligible for adoption. In addition to Ecuador's requirements, a child must meet the definition of a Convention adoptee for you to bring him or her back to the United States.

Ecuadorian Adoption Authority: The Technical Adoptions Unit (Unidad Técnica de Adopciones) and the Family Assignment Committee (Comité de Asignación Familiar)

The Process: The first step in adopting a child from Ecuador is to select an accredited or approved adoption service provider in the United States that has signed an Agreement with the Government of Ecuador. Only these agencies and attorneys can provide adoption services between the United States and Ecuador. A list of United States accredited and approved adoption service providers may be obtained in person from the Consular Section of the United States Embassy in Quito or Consulate General in Guayaquil, or online from the Department of State.

After you choose an accredited or approved adoption service provider, you apply to be found eligible to adopt (Form I-800A) by the USCIS. Once the United States Government determines that you are "eligible" and "suitable" to be an adoptive parent, your information will be forwarded to the Central Authority in Ecuador. The Technical Adoptions Unit will review your application to determine whether you are also eligible to adopt under Ecuadorian law.

If both the United States and Ecuador determine that you are eligible to adopt, and a child is available for intercountry adoption, the Technical Adoptions Unit may provide you with a referral for a child. You cannot identify a specific child that you would like to adopt prior to the referral. Prospective adoptive parent(s) must express acceptance of the referral in writing, after which, they must travel to Ecuador to complete the judicial part of the process. If married, both spouses are required to travel to Ecuador for an adaptation period. The length of the adaptation period with the child depends on each orphanage's policy and program, but usually takes three or four days.

After this, based on the prospective adoptive parents' relationship with the child, the orphanage will send a report to the Technical Adoption Unit. That office will then give the report along with other adoption documents to the adoption service provider's representative. The documents will be filed at the Minor's Court along with the adoption peti-

tion, which must be signed (jointly by the petitioners if a married couple). The judge will then schedule an appointment (usually one or two days later) with the prospective adoptive parent(s) to acknowledge the signature(s) on the adoption request. The prospective adoptive parent(s) must go personally to that appointment and bring their passport(s). After you accept a match with a child, you will apply to the USCIS for provisional approval to adopt that child (Form I-800). If the Form I-800 is provisionally approved, your adoption service provider or you will submit a visa application for to a Consular officer at the United States Embassy. If the Consular officer determines that the child appears eligible to immigrate to the United States, he or she will notify the Technical Adoptions Unit (Article 5 letter). For Convention country adoptions, prospective adoptive parent(s) may not proceed with the adoption or obtain custody for the purpose of adoption until this takes place.

Role of the Court: The courts in Ecuador issue adoption decrees. The Childhood and Adolescence Court, Juzgado de la Niñez y Adolescencia, must grant permission for the child to depart the country if only one member of the couple is present in Ecuador to travel with the child. This permission is only valid for one year.

Role of Adoption Service Providers: The Government of Ecuador requires that prospective adoptive parents work through an accredited or approved United States adoption service provider that has signed an Agreement with the Government of Ecuador. The agency can give you an estimate of the cost of an adoption in Ecuador. A list of these agencies may be obtained in person from the Consular Section of the United States Embassy in Quito or Consulate General in Guayaquil.

Time Frame: The adoption process in Ecuador generally takes between nine and sixteen months to complete. Adopting families must first contact an Ecuadorian-approved United States adoption service provider that will provide general instructions about intercountry adoption procedures, and will assist prospective adoptive parents with the preparation and filing of preliminary United States immigration documentation. This process generally takes approximately three months (USCIS Form I-800A). An additional six months to one year is needed for further adjudication once these documents are forwarded to an agency or lawyer in Ecuador.

Adoption Fees: The cost of adoptions varies with different adoption service providers. In the adoption services contract that you sign at the beginning of the adoption process, your agency will itemize the fees and estimated expenses related to your adoption process.

Documents Required: Certifications, notarizations and apostilles must be completed in the United States before the prospective adoptive parents travel to Ecuador or the application for adoption is submitted. Translations can be completed in Ecuador. Documents must be apostilled in the United States.

The prospective adoptive parent(s) must present the following documents to the American adoption service provider which will represent them in Ecuador:

- Certified copies of birth certificates of prospective adoptive parent(s);
- Certified copy of marriage certificate and proof of termination of prior marriages (death certificates/divorce decrees), if applicable;
- Certified copy of the state law that regulates the adoption of minors (especially foreign minors) in the adoptive parent's(s') state of United States residence;
- Home study report on the adoptive parent(s) and institutional criteria on the suitability of the adoptive parent(s) from the entity performing the home study (all these documents are part of the I-800A);
- A sealed certificate of no criminal record for each adoptive parent from a local police department. An FBI report is acceptable in lieu of local police record;
- Verification of employment and salary;
- Notarized adoption authorization letter from the adoption service provider to the family certifying that the family is duly prepared to adopt an Ecuadorian child;
- Certificate of physical and mental health of prospective adoptive parent(s); and
- Photocopies of the passports of the prospective adoptive parent(s).

The adoption hearing will take place three or four days after the judge schedules the meeting to verify signature(s). The judge will review the parent's(s') qualifications, including psychological and financial situations. After the hearing, prospective adoptive parent(s) and the judge sign the minutes. The judge will issue the final adoption decree unless the judge identifies false statements or documents.

The adoption decree becomes final three days after issuance. At this point, the adoptive parent(s) can obtain a new birth certificate for their child from the Civil Registry office. The new birth certificate will include the name(s) of parent(s) and any change of name for the child. With the new birth certificate, the parent(s) (or the adoption service provider on their behalf) can obtain an Ecuadorian identity card and Ecuadorian passport for the child.

Bringing Your Child Home: Once your adoption is complete (or you have obtained legal custody of the child), there are a few more steps to take before you can head home.

Specifically, you need to apply for several documents for your child before he or she can travel to the United States, such as a birth certificate, a passport or travel document for your

child from the country in which he or she was born, and a U.S. Immigration Visa.

For detailed and updated information on how to obtain these documents, review the *Intercountry Adoption* section on this publication and visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

Child Citizenship Act: For adoptions finalized abroad: The Child Citizenship Act of 2000 allows your new child to acquire American citizenship automatically when he or she enters the United States as lawful permanent residents. For adoptions finalized in the United States: The Child Citizenship Act of 2000 allows your new child to acquire American citizenship automatically when the court in the United States issues the final adoption decree. To learn more, review the *Intercountry Adoption* section on this publication and visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

After Adoption: Ecuador does not have any post-adoption requirements.

EGYPT

Compiled from the March 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Arab Republic of Egypt

PROFILE

Geography

Area: 1,001,450 sq. km. (386,000 sq. mi.); approximately equal to Texas and New Mexico combined.

Cities: Capital—Cairo (pop. estimated at 16 million). Other cities—Alexandria (6 million), Aswan, Asyut, Port Said, Suez, Ismailia.

Terrain: Desert, except Nile valley and delta.

Climate: Dry, hot summers; moderate winters.

People

Nationality: Noun and adjective—Egyptian(s).

Population: (July 2007 est.) 80,335,036.

Annual growth rate: (July 2007 est.) 1.72%.

Ethnic groups: Egyptian, Bedouin Arab, Nubian.

Religions: Muslim 90%, Coptic Christian 9%, other Christian 1%.

Languages: Arabic (official), English, French.

Education: Years compulsory—ages 6-15. Literacy—total adult: 58%.

Health: Infant mortality rate (2006 est.)—31.33 deaths/1,000 live births. Life expectancy (2006 est.) 71 years.

Government

Type: Republic.
Independence: 1922.
Constitution: 1971.
Government branches: Executive—president, prime minister, cabinet. Legislative—People's Assembly (444 elected and 10 presidentially appointed members) and Shura (consultative) Council (176 elected members, 88 presidentially appointed). Judicial—Supreme Constitutional Court.
Political subdivisions: 26 governorates.
Political parties: National Democratic Party (ruling). Principal opposition parties—New Wafd Party, Liberal Party, National Progressive Unionist Grouping (Tagammau), and Nasserite Party.
Suffrage: Universal at 18.

Economy

GDP: (2007 est.) $118–120 billion.
Annual growth rate: (2007 est.) 7.2%.
Per capita GDP: (2007 est.) $5,400.
Natural resources: Petroleum and natural gas, iron ore, phosphates, manganese, limestone, gypsum, talc, asbestos, lead, zinc.
Agriculture: Products—cotton, rice, onions, beans, citrus fruits, wheat, corn, barley, sugar.
Industry: Types—food processing, textiles, chemicals, petrochemicals, construction, light manufacturing, iron and steel products, aluminum, cement, military equipment.
Trade: (FY 2005) Exports—$27.4 billion: petroleum, clothing and textiles, cotton, fruits and vegetables, manufactured goods. Major markets—EU, U.S., Middle East, Japan. Imports—$40.48 billion: machinery and transport equipment, petroleum products, livestock, food and beverages, paper and wood products, chemicals. Major suppliers—EU, U.S., China.

PEOPLE AND HISTORY

Egypt is the most populous country in the Arab world and the second-most populous on the African Continent. Nearly all of the country's 79 million people live in Cairo and Alexandria; elsewhere on the banks of the Nile; in the Nile delta, which fans out north of Cairo; and along the Suez Canal. These regions are among the world's most densely populated, containing an average of over 3,820 persons per square mile (1,540 per sq. km.), as compared to 181 persons per sq. mi. for the country as a whole.

Small communities spread throughout the desert regions of Egypt are clustered around oases and historic trade and transportation routes. The government has tried with mixed suc-

cess to encourage migration to newly irrigated land reclaimed from the desert. However, the proportion of the population living in rural areas has continued to decrease as people move to the cities in search of employment and a higher standard of living.

The Egyptians are a fairly homogeneous people of Hamitic origin. Mediterranean and Arab influences appear in the north, and there is some mixing in the south with the Nubians of northern Sudan. Ethnic minorities include a small number of Bedouin Arab nomads in the eastern and western deserts and in the Sinai, as well as some 50,000-100,000 Nubians clustered along the Nile in Upper (southern) Egypt.

The literacy rate is about 58% of the adult population. Education is free through university and compulsory from ages six through 15. Rates for primary and secondary education have strengthened in recent years. Ninety-three percent of children enter primary school today, compared with 87% in 1994. Major universities include Cairo University (100,000 students), Alexandria University, and the 1,000-year-old Al-Azhar University, one of the world's major centers of Islamic learning.

Egypt's vast and rich literature constitutes an important cultural element in the life of the country and in the Arab world as a whole. Egyptian novelists and poets were among the first to experiment with modern styles of Arabic literature, and the forms they developed have been widely imitated. Egyptian novelist Naguib Mahfouz was the first Arab to win the Nobel prize for literature. Egyptian books and films are available throughout the Middle East.

Egypt has endured as a unified state for more than 5,000 years, and archeological evidence indicates that a developed Egyptian society has existed for much longer. Egyptians take pride in their "pharaonic heritage" and in their descent from what they consider mankind's earliest civilization. The Arabic word for Egypt is Misr, which originally connoted "civilization" or "metropolis."

Archeological findings show that primitive tribes lived along the Nile long before the dynastic history of the pharaohs began. By 6000 B.C., organized agriculture had appeared.

In about 3100 B.C., Egypt was united under a ruler known as Mena, or Menes, who inaugurated the 30 pharaonic dynasties into which Egypt's ancient history is divided—the Old and the Middle Kingdoms and the New Empire. The pyramids at Giza (near Cairo), which were built in the fourth dynasty, testify to the power of the pharaonic religion and state. The Great Pyramid, the tomb of Pharaoh Khufu (also known as Cheops), is the only surviving monument of the Seven Wonders of the Ancient World. Ancient Egypt reached the peak of its power, wealth, and territorial extent in the period called the New Empire (1567-1085 B.C.).

Persian, Greek, Roman, and Arab Conquerors

In 525 BC, Cambyses, the son of Cyrus the Great, led a Persian invasion force that dethroned the last pharaoh of the 26th Dynasty. The country remained a Persian province until conquered by Alexander the Great in 322 BC, ushering in Ptolemeic rule Egypt that lasted for nearly 300 years.

Following a brief Persian reconquest, Egypt was invaded and conquered by Arab forces in 642. A process of Arabization and Islamization ensued. Although a Coptic Christian minority remained—and remains today, constituting about 10% of the population—the Arab language inexorably supplanted the indigenous Coptic tongue. For the next 1,300 years, a succession of Arab, Mameluke, and Ottoman caliphs, beys, and sultans ruled the country.

European Influence

The Ottoman Turks controlled Egypt from 1517 until 1882, except for a brief period of French rule under Napoleon Bonaparte. In 1805, Mohammed Ali, commander of an Albanian contingent of Ottoman troops, was appointed Pasha, founding the dynasty that ruled Egypt until his great-great grandson, Farouk I, was overthrown in 1952. Mohammed Ali the Great ruled Egypt until 1848, writing the first chapter in the modern history of Egypt. The growth of modern urban Cairo began in the reign of Ismail (1863-79). Eager to Westernize the capital, he ordered the construction of a European-style city to the west of the medieval core. The Suez Canal was completed in his reign in 1869, and its completion was celebrated by many events, including the commissioning of Verdi's "Aida" for the new opera house and the building of great palaces such as the Omar Khayyam (originally constructed to entertain the French Empress Eugenie, which is now the central section of the Cairo Marriott Hotel).

In 1882, British expeditionary forces crushed a revolt against the Ottoman rulers, marking the beginning of British occupation and the virtual inclusion of Egypt within the British Empire. In deference to growing nationalism, the U.K. unilaterally declared Egyptian independence in 1922. British influence, however, continued to dominate Egypt's political life and fostered fiscal, administrative, and governmental reforms.

In the pre-1952 revolution period, three political forces competed with one another: the Wafd, a broadly based nationalist political organization strongly opposed to British influence; King Fuad, whom the British had installed during World War II; and the British themselves, who were determined to maintain control over the Canal. Other political forces emerging in this period included the communist party (1925) and the Muslim Brotherhood (1928), which eventually became a potent political and religious force.

During World War II, British troops used Egypt as a base for Allied operations throughout the region. British troops were withdrawn to the Suez Canal area in 1947, but nationalist, anti-British feelings continued to grow after the war. On July 22-23, 1952, a group of disaffected army officers (the "free officers") led by Lt.

Col. Gamal Abdel Nasser overthrew King Farouk, whom the military blamed for Egypt's poor performance in the 1948 war with Israel. Following a brief experiment with civilian rule, they abrogated the 1923 constitution and declared Egypt a republic on June 19, 1953. Nasser evolved into a charismatic leader, not only of Egypt, but the Arab world, promoting and implementing "Arab socialism." He nationalized Egypt's economy.

Nasser helped establish the Non-Aligned Movement of developing countries in September 1961, and continued to be a leading force in the movement until his death in 1970. When the United States held up military sales in reaction to Egyptian neutrality vis-à-vis Moscow, Nasser concluded an arms deal with Czechoslovakia in September 1955.

When the U.S. and the World Bank withdrew their offer to help finance the Aswan High Dam in mid-1956, Nasser nationalized the privately owned Suez Canal Company. The crisis that followed, exacerbated by growing tensions with Israel over guerrilla attacks from Gaza and Israeli reprisals, resulted in the invasion of Egypt that October by France, Britain, and Israel.

Nasser's domestic policies were arbitrary and frequently oppressive, yet generally popular. All opposition was

stamped out, and opponents of the regime frequently were imprisoned without trial. Nasser's foreign and military policies helped provoke the Israeli attack of June 1967 that virtually destroyed Egypt's armed forces along with those of Jordan and Syria. Israel also occupied the Sinai Peninsula, the Gaza Strip, the West Bank, and the Golan Heights. Nasser, nonetheless, was revered by the masses in Egypt and elsewhere in the Arab world until his death in 1970.

After Nasser's death, another of the original "free officers," Vice President Anwar el-Sadat, was elected President. In 1971, Sadat concluded a treaty of friendship with the Soviet Union, but a year later, ordered Soviet advisers to leave. In 1973, he launched the October war with Israel, in which Egypt's armed forces achieved initial successes but were defeated in Israeli counterattacks.

Camp David and the Peace Process

In a momentous change from the Nasser era, President Sadat shifted Egypt from a policy of confrontation with Israel to one of peaceful accommodation through negotiations. Following the Sinai Disengagement Agreements of 1974 and 1975, Sadat created a fresh opening for progress by his dramatic visit to Jerusalem in November 1977. This led to President Jimmy Carter's invitation to President Sadat and Prime Minister Begin to join him in trilateral negotiations at Camp David.

The historic Camp David accords were signed by Egypt and Israel and witnessed by the U.S. on September 17, 1978. The accords led to the March 26, 1979 signing of the Egypt-Israel peace treaty, by which Egypt regained control of the Sinai in May 1982. Throughout this period, U.S.-Egyptian relations steadily improved, but Sadat's willingness to break ranks by making peace with Israel earned him the enmity of most other Arab states.

Domestic Change

Sadat introduced greater political freedom and a new economic policy, the most important aspect of which was the infitah or "open door." This relaxed government controls over the economy and encouraged private, including foreign, investment. Sadat dismantled much of the existing political machine and brought to trial a number of former government officials accused of criminal excesses during the Nasser era.

Liberalization also included the reinstitution of due process and the legal banning of torture. Sadat tried to expand participation in the political process in the mid-1970s but later abandoned this effort. In the last years of his life, Egypt was racked by violence arising from discontent with Sadat's rule and sectarian tensions, and it experienced a renewed measure of repression.

From Sadat to Mubarak

On October 6, 1981, Islamic extremists assassinated President Sadat. Hosni Mubarak, Vice President since 1975 and air force commander during the October 1973 war, was elected President later that month. He was subsequently confirmed by popular referendum for four more 6-year terms, most recently in September 2005. Mubarak has maintained Egypt's commitment to the Camp David peace process, while at the same time re-establishing Egypt's position as an Arab leader. Egypt was readmitted to the Arab League in 1989. Egypt also has played a moderating role in such international fora as the UN and the Non-Aligned Movement.

Since 1991, Mubarak has overseen a domestic economic reform program to reduce the size of the public sector and expand the role of the private sector. There has been less progress in political reform. The November 2000 People's Assembly elections saw 34 members of the opposition win seats in the 454-seat assembly, facing a clear majority of 388 ultimately affiliated with the ruling National Democratic Party (NDP). Opposition parties continue to face various difficulties in mounting credible electoral challenges to the NDP. The Muslim Brotherhood, founded in Egypt in 1928, remains an illegal organization and is not recognized as a political party (current Egyptian law prohibits the formation of political parties based on religion). Members are known publicly and openly speak their views, although they do not explicitly identify themselves as members of the organization. Members of the Brotherhood have been elected to the People's Assembly and local councils as independents, and most recently scored a major victory in 2005 parliamentary elections, winning 20% of the seats, thus forming the largest opposition group.

GOVERNMENT AND POLITICAL CONDITIONS

The Egyptian Constitution provides for a strong executive. Authority is vested in an elected president who can appoint one or more vice presidents, a prime minister, and a cabinet. The president's term runs for 6 years. Egypt's legislative body, the People's Assembly, has 454 members—444 popularly elected and 10 appointed by the president. The constitution reserves 50% of the assembly seats for "workers and peasants." The assembly sits for a 5-year term but can be dissolved earlier by the President. There also is a 264-member Shura (consultative) Council, in which 88 members are appointed and 174 elected for 6-year terms. Below the national level, authority is exercised by and through governors and mayors appointed by the central government and by popularly elected local councils.

Opposition party organizations make their views public and represent their followers at various levels in the political system, but power is concentrated in the hands of the President and the National Democratic Party majority in the People's Assembly and those institutions dominate the political system. In addition to the ruling National Democratic Party,

there are 18 other legally recognized parties, whereas in 2004 there were only 16 other legally recognized parties.

The November 2000 elections were generally considered to have been more transparent and better executed than past elections, because of universal judicial monitoring of polling stations. On the other hand, opposition parties continue to lodge credible complaints about electoral manipulation by the government. There are significant restrictions on the political process and freedom of expression for non-governmental organizations, including professional syndicates and organizations promoting respect for human rights.

Progress was seen in the September 2005 presidential elections when parties were allowed to field candidates against President Mubarak and his National Democratic Party. In early 2005, President Mubarak proposed amending the constitution to allow, for the first time in Egypt's history, competitive, multi-candidate elections. An amendment was drafted by parliament and approved by public referendum in late May 2005. In September 2005, President Mubarak was reelected, according to official results, with 88% of the vote. His two principal challengers, Ayman Nour and No'man Gom'a, took 7% and 3% of the vote respectively.

In March 2007, Mubarak introduced several constitutional amendments that would increase presidential powers and, more significantly, ban any political parties based on religion, race, or ethnicity. The amendments were put to a popular referendum and, despite low voter turnout and boycotts by opposition groups, passed with 75.9% approval.

Egypt's judicial system is based on European (primarily French) legal concepts and methods. Under the Mubarak government, the courts have demonstrated increasing independence, and the principles of due process and judicial review have gained greater respect. The legal code is derived largely from the Napoleonic Code. Marriage and personal status (family law) are primarily based on the religious law of the individual concerned, which for most Egyptians is Islamic Law (Sharia).

Principal Government Officials

Last Updated: 11/12/08

Pres.: **Mohamed Hosni MUBARAK**
Prime Min.: **Ahmed Mohamed NAZIF**
Min. of Agriculture & Land Reclamation: **Amin ABAZA**
Min. of Awqaf (Religious Affairs): **Mahmoud Hamdy ZAQZOUQ**
Min. of Civil Aviation: **Ahmed SHAFIQ**
Min. of Communications & Information Technology: **Tarek KAMEL**
Min. of Culture: **Farouk HOSNI**
Min. of Defense: **Mohamed Hussein TANTAWI, Fd. Mar.**
Min. of Education: **Yousri El-GAMAL**
Min. of Electricity & Energy: **Hassan Ahmed YOUNIS**
Min. of Finance: **Youssef BOUTROS-GHALI**
Min. of Foreign Affairs: **Ahmed Ali ABOUL GHEIT**
Min. of Foreign Trade & Industry: **Rachid Mohamed RACHID**
Min. of Health & Population: **Hatem El-GABALI**
Min. of Higher Education: **Hani HILAL**
Min. of Housing, Utilities, & Urban Communities: **Ahmed El-MAGHRABI**
Min. of Information: **Anas El-FIQQI**
Min. of Interior: **Habib El-ADLY**
Min. of Intl. Cooperation: **Fayza ABOUL NAGA**
Min. of Investment: **Mahmoud MOHIELDIN**
Min. of Irrigation & Water Resources: **Mahmoud ABU ZEID**
Min. of Justice: **Mamdouh MAREI**
Min. of Legal Affairs & Parliamentary Councils: **Moufed Mahmoud SHEHAB**
Min. of Local Development: **Abdel Salam al-MAHGOUB**
Min. of Manpower & Immigration: **Aisha ABDEL HADI**
Min. of Military Production: **Mohamed Hussein TANTAWI, Fd. Mar.**
Min. of Petroleum: **Sameh FAHMY**
Min. of Planning: **Osman Mohammed OSMAN**
Min. of Public Business Sector: **Mokhtar KHATTAB**
Min. of Social Security: **Ali MOSELHI**
Min. of Tourism: **Mohamed Zoheir GARANA**
Min. of Transport: **Mohamed Lotfi MANSOUR**
Min. of State for Admin. Development: **Ahmed DARWISH**
Min. of State for Economic Development: **Osman Mohammed OSMAN**
Min. of State for Environment Affairs: **Maged GEORGE**
Min. of State for Local Development: **Abdel-Rahim SHEHATA**
Min. of State for Military Production: **Sayed MESHAL**
Min. of State for Scientific Research: **Hani HILAL**
Governor, Central Bank: **Farouk Abdel Baky El-OKDA**
Ambassador to the US:
Permanent Representative to the UN, New York: **Maged ABDEL FATTAH**

Egypt maintains an embassy in the United States at 3521 International Court N.W., Washington, D.C., 20008 (tel. 202-895-5400). The Washington consulate has the same address (tel. 202-966-6342). The Egyptian Mission to the United Nations is located at 304 East 44th Street, New York, N.Y. (tel. 212-305-0300). Egyptian consulates general are located at: 1110 Second Avenue, New York, N.Y., 10022 (tel. 212-759-7120); 1990 Post Oak Boulevard, Suite 2180, Houston, TX, 77056 (tel. 713-961-4915); 500 N. Michigan Avenue, Suite 1900, Chicago, IL, 60611 (tel. 312-828-9162); and 3001 Pacific Avenue, San Francisco, CA, 94115 (tel. 415-346-9700).

NATIONAL SECURITY

Egypt's armed forces, among the largest in the region, include the army, air defense, air force, and navy. The armed forces inventory includes equipment from the United States, France, Italy, the United Kingdom, the former Soviet Union, and China. Equipment from the former Soviet Union is being progressively replaced by more modern American, French, and British equipment, a significant portion of which is built under license in Egypt. To bolster stability and moderation in the region, Egypt has provided military assistance and training to a number of African and Arab states. Egypt remains a strong military and strategic partner of the United States.

ECONOMY

With the installation of the 2004 Egyptian parliament, the Government of Egypt began a new reform movement, following a stalled economic reform program begun in 1991, but moribund since the mid-1990s. In the past year, the cabinet economic team has simplified and reduced tariffs and taxes, improved the transparency of the national budget, revived stalled privatizations of public enterprises and implemented economic legislation designed to foster private sector-driven economic growth and improve Egypt's competitiveness. Despite these achievements, the economy is still hampered by government intervention, substantial subsidies for food, housing, and energy, and bloated public sector payrolls. Moreover, the public sector still controls most heavy industry.

In sectoral terms, agriculture is mainly in private hands, and has been largely deregulated, with the exception of cotton and sugar production. Construction, non-financial services, and domestic marketing are also largely private. The Egyptian economy, however, relies heavily on tourism, oil and gas exports, and Suez Canal revenues, much of which is controlled by the public sector and is also vulnerable to outside factors.

The tourism sector suffered tremendously following a terrorist attack in Luxor in October 1997. The tourism sector feared a repeat of the downturn in tourist numbers when terrorists attacked resorts in the Sinai Peninsula in 2004 and 2005. So far, however, the sector has not suffered as greatly as expected.

The U.S. has a large assistance program in Egypt and provides funding for a variety of programs in addition to some cash transfers. A portion of U.S. assistance to Egypt under the 2003 Iraq war supplemental appropriations was provided in the form of bond guarantees, which were contingent upon Egyptian compliance with a series of economic conditions. Egypt met the conditions and in September 2005 issued $1.25 billion in 10-year bonds that were fully guaranteed by the United States. To support the Middle East peace process through regional economic integration, the United States permits products to be imported from Egypt without tariffs if they have been produced in Qualified Industrial Zones and 11.7% of the inputs of these products originate from Israel.

Agriculture

Approximately one-third of Egyptian labor is engaged directly in farming, and many others work in the processing or trading of agricultural products. Nearly all of Egypt's agricultural production takes place in some 2.5 million hectares (6 million acres) of fertile soil in the Nile Valley and Delta. Some desert lands are being developed for agriculture, including the ambitious Toshka project in Upper Egypt, but some other fertile lands in the Nile Valley and Delta are being lost to urbanization and erosion.

Warm weather and plentiful water permit several crops a year. Further improvement is possible, but land is worked intensively and yields are high. Cotton, rice, wheat, corn, sugarcane, sugar beets, onions, and beans are the principal crops. Increasingly, a few modern operations are producing fruits, vegetables and flowers, in addition to cotton, for export. While the desert hosts some large, modern farms, more common traditional farms occupy one acre each, typically in a canal-irrigated area along the banks of the Nile. Many small farmers also have cows, water buffaloes, and chicken, although larger modern farms are becoming more important.

The United States is a major supplier of wheat, corn, and soybean products to Egypt, almost all through commercial sales. Egypt is, in fact, traditionally the U.S.'s largest market for wheat sales. U.S. agricultural sales to Egypt average $1 billion annually. U.S. food assistance programs to Egypt ended in 1992 as Egypt became more prosperous. Egypt continues to receive modest food assistance through the World Food Program and from France.

"Egypt," wrote the Greek historian Herodotus 25 centuries ago, "is the gift of the Nile." The land's seemingly inexhaustible resources of water and soil carried by this mighty river created in the Nile Valley and Delta the world's most extensive oasis. Without the Nile, Egypt would be little more than a desert wasteland.

The river carves a narrow, cultivated floodplain, never more than 20 kilometers wide, as it travels northward toward Cairo from Lake Nasser on the Sudanese border, behind the Aswan High Dam. Just north of Cairo, the Nile spreads out over what was once a broad estuary that has been filled by riverine deposits to form a fertile delta about 250 kilometers wide (150 mi.) at the seaward base and about 160 kilometers (96 mi.) from south to north.

Before the construction of dams on the Nile, particularly the Aswan High Dam (started in 1952, completed in 1970), the fertility of the Nile Valley was sustained by the water flow and the silt deposited by the annual flood. Sediment is now obstructed by the Aswan High Dam and retained in Lake Nasser. The interruption of yearly, natural fertilization and the increasing salinity of the soil has been a manageable problem resulting from the dam. The benefits remain impressive: more intensive farming on millions of acres of land made possible by improved irrigation, prevention of flood damage, and the generation of billions of low-cost kilowatt hours of electricity.

The Western Desert accounts for about two-thirds of the country's land area. For the most part, it is a massive sandy plateau marked by seven major depressions. One of these, Fayoum, was connected about 3,600 years ago to the Nile by canals. Today, it is an important irrigated agricultural area.

Natural Resources

In addition to the agricultural capacity of the Nile Valley and Delta, Egypt's natural resources include petroleum, natural gas, phosphates, and iron ore. Crude oil is found pri-

marily in the Gulf of Suez and in the Western Desert. Natural gas is found mainly in the Nile Delta, off the Mediterranean seashore, and in the Western Desert. Oil and gas accounts for approximately 12% of GDP. Export of petroleum and related products (including bunker and aviation sales) amounted to $2.7 billion in fiscal year 2003-04.

Crude oil production has been in decline for several years, from a high of more than 920,000 barrels per day (BPD) in 1995 to less than 662,000 BPD as of April 2006. To minimize the growing domestic demand of petroleum products, currently estimated at 25 million metric tons per year, Egypt is encouraging the production of natural gas. Over a 5-year period, production of natural gas increased by approximately 75% to reach about 3.3 billion cubic feet per day (BCFD) by the end of FY 2003/04. Currently, gas accounts for almost 50% of all hydrocarbon usage in Egypt.

Over the last 22 years, more than 230 oil and gas exploration agreements have been signed and multinational oil companies spent more than $27 billion in exploration companions. As of September 2003, crude oil reserves were estimated at 2.8 billion barrels, and proven natural gas reserves were estimated at 62 trillion cubic feet (TCF) with probable additional reserves totaling another 40-60 TCF. Texas-based Apache Oil Company is the largest American investor in Egypt, with a total investment of more than $2.8 billion since 1996.

Egypt's excess of natural gas will more than meet its domestic demand for many years to come. The Ministry of Petroleum has determined that expanding the Egyptian petrochemical industry and increasing exports of natural gas as its most significant strategic objectives. As of September 2005, three liquefied natural gas (LNG) trains had been in operation. The first is in Damietta on the eastern side of the Delta and started exporting in early 2005. It is headed by the Spanish electric utility, Union Fenosa. The second LNG project is located at Idku on the western side of the Delta and started exporting in 2005. The first train started in April 2005, and the second in September. British Gas (BG) Group and the Malaysian state oil company Petronas are the major investors. Another project that will utilize gas for export and domestic consumption is the Mediterranean Gas Complex in Port Said where the Italian company AGIP and BP are the main shareholders. This facility will have a total cost of about $315 million and went on line in late 2004.

Egypt and Jordan established the Eastern Gas Company to export natural gas to Jordan, and then later to Syria and Lebanon. In summer 2003 Egypt began exporting gas to Jordan via a new pipeline from El Arish on Egypt's north Sinai cost to Taba on the Gulf of Aqaba, and then underwater to the Jordanian city of Aqaba. Gas exports to Jordan generated gross revenues of approximately $60 million in 2003/04 and are currently reaching $85-100 million.

Transportation and Communication

Transportation facilities in Egypt are centered in Cairo and largely follow the pattern of settlement along the Nile. The main line of the nation's 4,800-kilometer (2,800-mi.) railway network runs from Alexandria to Aswan. The well-maintained road network has expanded rapidly to over 21,000 miles, covering the Nile Valley and Delta, Mediterranean and Red Sea coasts, the Sinai, and the Western oases.

Egypt Air provides reliable domestic air service to major tourist destinations from its Cairo hub, in addition to overseas routes. The Nile River system (about 1,600 km. or 1,000 mi.) and the principal canals (1,600 km.) are important locally for transportation. The Suez Canal is a major waterway of international commerce and navigation, linking the Mediterranean and Red Seas. Major ports are Alexandria, Port Said, and Damietta on the Mediterranean, and Suez and Safraga on the Red Sea.

Egypt has long been the cultural and informational center of the Arab world, and Cairo is the region's largest publishing and broadcasting center. There are eight daily newspapers with a total circulation of more than 2 million, and a number of monthly newspapers, magazines, and journals. The majority of political parties have their own newspapers, and these papers conduct a lively, often highly partisan, debate on public issues.

Egyptian ground-broadcast television (ETV) is government controlled and depends heavily on commercial revenue. ETV sells its specially produced programs and soap operas to the entire Arab world. In addition to Egyptian programming, the Middle East Broadcast Company, a Saudi television station transmitting from London (MBC), Arab Radio and Television (ART), Al-Jazeera television, and other Gulf stations as well as Western networks such as CNN and BBC, provide access to more international programs to Egyptians who own satellite receivers.

ETV has two main channels, six regional channels, and three satellite channels. Of the two main channels, Channel I uses mainly Arabic, while Channel II is dedicated to foreigners and more cultured viewers, broadcasting news in English and French as well as Arabic.

Egyptian Satellite channels broadcast to the Middle East, Europe, and the U.S. East Coast. In April 1998, Egypt launched its own satellite known as NileSat 101. Seven specialized channels cover news, culture, sports, education, entertainment, health, and drama. A second, digital satellite, Nilesat 102, was launched in August 2000. Many of its channels are rented to other stations.

Three new private satellite-based TV stations were launched in November 2001, marking a great change in Egyptian government policy. Dream TV 1 and 2 produce cultural programming, broadcast contemporary video clips and films featuring Arab and international actors, as well as soap operas; another private station

focuses on business and general news. Both private channels transmit on NileSat.

Radio in Egypt almost all government controlled, using 44 short-wave frequencies, 18 medium-wave stations, and four FM stations. There are seven regional radio stations covering the country. Egyptian Radio transmits 60 hours daily overseas in 33 languages and three hundred hours daily within Egypt. In 2000, Radio Cairo introduced new specialized (thematic) channels on its FM station. So far, they include news, music, and sports. Radio enjoys more freedom than TV in its news programs, talk shows and analysis.

FOREIGN RELATIONS

Geography, population, history, military strength, and diplomatic expertise give Egypt extensive political influence in the Middle East and within the Non-Aligned Movement as a whole. Cairo has been a crossroads of Arab commerce and culture for millennia, and its intellectual and Islamic institutions are at the center of the region's social and cultural development.

The Arab League headquarters is in Cairo, and the Secretary General of the League is traditionally an Egyptian. Former Egyptian Foreign Minister Amre Moussa is the present Secretary General of the Arab League. President Mubarak has often chaired the African Union (formerly the Organization of African Unity). Former Egyptian Deputy Prime Minister Boutros Boutros-Ghali served as Secretary General of the United Nations from 1991 to 1996.

Egypt is a key partner in the search for peace in the Middle East and resolution of the Israeli-Palestinian conflict. Sadat's groundbreaking trip to Israel in 1977, the 1978 Camp David Accords, and the 1979 Egypt-Israel Peace Treaty represented a fundamental shift in the politics of the region—from a strategy of confrontation to one of peace as a strategic choice. Egypt was subsequently ostracized by other Arab states and ejected from the Arab League from 1979 to 1989. Egypt played an important role in the negotiations leading to the Madrid Peace Conference in 1991, which, under U.S. and Russian sponsorship, brought together all parties in the region to discuss Middle East peace. This support has continued to the present, with President Mubarak often intervening personally to promote peace negotiations. In 1996, he hosted the Sharm El-Sheikh "Summit of the Peacemakers" attended by President Clinton and other world leaders. In 2000, he hosted two summits at Sharm El-Sheikh and one at Taba in an effort to resume the Camp David negotiations suspended in July of 2000, and in June 2003, Mubarak hosted President Bush for another summit on the Middle East peace process.

Throughout mid-2004, Egypt worked closely with Israel and the Palestinian Authority to facilitate stability following Israel's withdrawal from Gaza, which occurred in August and September of 2005. Prior to this Egypt and Israel reached an agreement that allowed Egypt to deploy additional forces along the Philadelphi Corridor in an attempt to control the border and prevent the smuggling of weapons.

Egypt played a key role during the 1990-91 Gulf crisis. President Mubarak helped assemble the international coalition and deployed 35,000 Egyptian troops against Iraq to liberate Kuwait. The Egyptian contingent was the third-largest in the coalition forces, after the U.S. and U.K. In the aftermath of the Gulf war, Egypt signed the Damascus declaration with Syria and the Gulf states to strengthen Gulf security. Egypt continues to contribute regularly to UN peacekeeping missions, most recently in East Timor, Sierra Leone, and Liberia. In August 2004, Egypt was actively engaged in seeking a solution to the crisis in the Darfur region of Sudan, including the dispatch of military monitors. Following the September 11, 2001 terrorist attacks on the United States, Egypt, which has itself been the target of terrorist attacks, has been a key supporter of the U.S. war against terrorists and terrorist organizations such as Osama bin Ladin and al-Qaeda, and actively supported the Iraqi Governing Council, as well as the subsequent government of Prime Minister Allawi. In July 2005, terrorists attacked the Egyptian city of Sharm El Sheikh. In the same month, Egypt's envoy to Iraq was assassinated.

U.S.-EGYPTIAN RELATIONS

The United States and Egypt enjoy a strong and friendly relationship based on shared mutual interest in Middle East peace and stability, revitalizing the Egyptian economy and strengthening trade relations, and promoting regional security. Over the years, Egypt and the United States have worked together assiduously to expand Middle East peace negotiations, hosting talks, negotiations, and the Middle East and North Africa Economic (MENA) Conference. Multinational exercises, U.S. assistance to Egypt's military modernization program, and Egypt's role as a contributor to various UN peacekeeping operations continually reinforce the U.S.-Egyptian military relationship.

An important pillar of the bilateral relationship remains U.S. security and economic assistance to Egypt, which expanded significantly in the wake of the Egyptian-Israeli Peace Treaty in 1979. U.S. military aid to Egypt totals over $1.3 billion annually. In addition, the U.S. Agency for International Development (USAID) provided over $25 billion in economic and development assistance to Egypt between 1975 and 2002. A shift in assistance from infrastructure, health, food supply, and agriculture toward market-based economic development, good governance, and training programs is reflected in the motto, "From Aid to Trade." The Commodity Import Program, through which USAID provides hundreds of millions of dollars in financing to enable the Egyptian private sector to import U.S. goods, remains one of the largest and most popular USAID pro-

grams. Since 2003, U.S. assistance is also focusing more on economic reform, education, civil society, and other programs supported by the Middle East Partnership Initiative (MEPI).

U.S. military cooperation has helped Egypt modernize its armed forces and strengthen regional security and stability. Under Foreign Military Financing (FMF) programs, the U.S. has provided F-4 jet aircraft, F-16 jet fighters, M-60A3 and M1A1 tanks, armored personnel carriers, Apache helicopters, antiaircraft missile batteries, aerial surveillance aircraft, and other equipment. The U.S. and Egypt also participate in combined military exercises, including deployments of U.S. troops to Egypt. Every other year, Egypt hosts Operation Bright Star, a multilateral military exercise with the U.S., and the largest military exercise in the region. Units of the U.S. 6th Fleet are regular visitors to Egyptian ports.

TRAVEL

Consular Information Sheet

December 15, 2008

Country Description: Egypt is a republic with a developing economy. It has extensive facilities for tourists.

Entry Requirements: A passport and visa are required. Tourists can obtain a renewable thirty-day tourist visa on arrival at an Egyptian airport for a $15 fee, payable in U.S. dollars. Visitors arriving overland and/or those who previously experienced difficulty with their visa status in Egypt should obtain a visa prior to arrival. Travelers arriving from Israel at the Taba border crossing are advised to obtain a visa prior to their arrival, otherwise they are granted either a no-fee, fourteen-day visa valid for travel within Sinai only, or they may buy a thirty-day tourist visa for $15 upon submission of a travel agency support letter. The letters are obtainable from travel agents at the border; however, their fees for providing this service vary. Military personnel arriving on commercial flights are not exempt from passport and visa requirements. As of January 2009, Diplomatic and Official passport holders are required to have a visa before arrival in Egypt. The Egyptian Embassy in Washington is currently requiring 7-10 working days to process official visa requests, an expedite letter from the Department of State notwithstanding, so it is incumbent upon all travelers to submit their visa requests and passports to the Egyptian Embassy well in advance of travel. Foreigners can acquire a work permit from the Ministry of Manpower and Immigration offices in the district of the employer, and accordingly are authorized residency in the country. Work permits must be obtained through the employer. Foreigners are generally not allowed to change residency status from non-working to working status while in the country. Foreign workers must obtain a work permit and work visa before arrival in Egypt. Foreigners in Egypt on tourist visas are not permitted to work. Proof of yellow fever immunization is required if arriving from an infected area. Evidence of an AIDS test is required for everyone staying over thirty days, for the purpose of studying or working in Egypt. Visit the Egyptian Ministry of Foreign Affairs web site at http://www.mfa.gov.eg/mfa_portal/en-gb/ for the most current visa information.

Safety and Security: In September 2008, 11 foreign tourists and eight Egyptians were kidnapped for ransom in the remote south-western desert region, close to the Sudanese border. Tourists should avoid travel to the border region.

The Egyptian-Gaza border has been closed on a permanent basis since June 2007, and the Egyptian Government only re-opens the border temporarily for short periods of time. These re-openings are announced on short notice. Travelers who need to cross this border should contact the U.S. Embassy in Cairo for more information on the current status of the border crossing. Travelers should also refer to the Travel Warning for Israel, West Bank and Gaza, which advises against traveling to Gaza. Official U. S. government travel to the areas of Rafah and Al Arish in the North Sinai is restricted.

Egypt suffered a series of deadly terrorist attacks in or near tourist sites in 2004, 2005, and 2006—often coinciding with major local holidays. Americans should be especially vigilant in crowded tourist areas, practice good personal security measures,

and be alert to their surroundings. A heavy security presence is apparent to travelers throughout the country. U.S. citizens do not appear to have been targeted in any of these incidents.

Three explosions in the town of Dahab in April 2006 killed over 20 people and wounded at least 80 others, including five U.S. citizens. In July 2005, three explosions in Sharm el Sheikh killed over 60 people, including one American. In October 2004, three bombs detonated in Taba and two nearby tourist camps, killing 34 people, including one American. Evidence of instability in the Sinai has also been reflected in random attacks on vehicles transiting the interior and two bomb attacks on Multinational Force Observers near the Rafah border crossing in August 2005 and April 2006. While the Egyptian Government took measures against the perpetrators of the 2004 and 2005 attacks, the April 2006 bombings reflect a persistent, indigenous threat of terror activities in the Sinai.

U.S. citizens who still plan to visit the Sinai in spite of the persistent threat of terrorist attacks should exercise great caution. Travelers are reminded to remain alert to their surroundings and are reminded that crowded tourist areas have been the target of terrorist activities. Travelers should use caution when visiting destination resorts and hotels without significant physical setback and security procedures. Americans are encouraged to visit the U.S. Embassy in Cairo web site at http://cairo.usembassy.gov for the most up-to-date security information.

In addition to the Sinai attacks, there were three terror attacks on crowded tourist destinations in Cairo in April 2005. In one, a lone suicide bomber killed three foreigners, including an American, at Cairo's Khan el-Khalili Market. Three Americans were seriously injured in this incident.

There have been instances of instability and public disorder in some other areas of Egypt, most notably in the Nile Valley governorates of Assiut and Sohag, located between Cairo and Luxor. These governorates, along with the adjacent governorates of Minya and Qena, have been areas of extremist activity in the past. U.S. Embassy personnel traveling to these areas (apart from Luxor and adjacent tourist destinations) require advance approval. Egyptian authorities also restrict the travel of foreigners in these governorates. American citizens planning to travel in these areas should contact the Embassy prior to travel.

Public demonstrations occasionally take place in areas such as Tahrir Square in Cairo and in the vicinity of universities and mosques following the Friday noon prayers, including the Azhar mosque across from the Khan El Khalili Bazaar area. These demonstrations are typically accompanied by a heavy security presence. Roads in the vicinity are often closed. Americans should remain attuned to readily-available English-language media outlets and avoid all public demonstrations.

Travelers to Egypt's frontiers, including the borders with Libya, Sudan, and Israel and parts of the Sinai off the main, paved roads, must obtain permission from the Travel Permits Department of the Ministry of the Interior, located at the corner of Sheikh Rihan and Nubar Streets in downtown Cairo

Those wishing to visit areas near Egypt's frontiers, including oases near the border with Libya and off-road areas in the Sinai, must obtain permission from the Travel Permits Department of the Ministry of the Interior, located at the corner of Sheikh Rihan and Nubar Streets in downtown Cairo. Travelers should be aware of the possible dangers of off-road travel.

In addition, travelers should be aware that landmines have caused many casualties, including deaths of Americans, in Egypt. All travelers should check with local authorities before embarking on off-road travel. Known minefields are not reliably marked by signs, but are sometimes enclosed by barbed wire. After heavy rains, which can cause flooding and the consequent shifting of landmines, travelers should take care driving through build-ups of sand on roadways. Though mines are found in other parts of Egypt, the highest concentrations are in World War II battlefields along the Mediterranean coast west of Alexandria, the Eastern Desert between Cairo and the Suez Canal, and much of the Sinai Peninsula. Travelers are urged to be especially prudent in these areas.

For the latest security information, Americans traveling abroad should regularly monitor the Department's Internet web site, where the current Travel Warnings and Travel Alerts, including the Worldwide Caution Travel Alert and the Middle East and North Africa Travel Alert, can be found. Consular information is also available via the Internet on the U.S. Embassy Cairo's website. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S. and Canada, or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444. A recording of the most recent Embassy message to American citizens in Egypt concerning security can be heard on the U.S. Embassy in Cairo's number, 011-2-02-797-3000.

Crime: The crime rate in Egypt is low. While incidents of violence are rare, purse-snatching, pick-pocketing and petty theft does occur. Travelers are strongly cautioned not to leave valuables such as cash, jewelry, and electronic items unsecured in hotel rooms or unattended in public places. Unescorted women are vulnerable to sexual harassment and verbal abuse. The Embassy has received increasing reports over the last six months of foreigners being sexually groped in taxis and in public places. Travelers are cautioned to be aware of their surroundings and to be cautious going anywhere with a stranger alone.

Many marriages between Egyptians and Americans are successful. However, the Embassy warns against marriage fraud on the part of the American or the Egyptian. Entering

into a marriage contract for the principal purpose of facilitating immigration to the United States for an alien is against U.S. law and can result in serious penalties, including fines and imprisonment for the American citizen and the Egyptian. At the same time, it is not uncommon for Egyptians to enter into marriages with Americans solely for immigration purposes. Relationships developed via correspondence, particularly those begun on the Internet, are particularly susceptible to manipulation. The U.S. government urges Americans who meet Egyptians on the Internet or while touring the country, to take the time necessary to get to know them before considering marriage. Unfortunately, the Embassy sees many cases of abuse against American spouses and often the marriages end in divorce when the Egyptian acquires a green card or citizenship in the United States. These cases invariably occur when the relationship is based mostly on Internet communication and very little face-to-face interaction.

In many countries around the world, counterfeit and pirated goods are widely available. Transactions involving such products may be illegal under local law. In addition, bringing them back to the United States may result in forfeitures and/or fines. More information on this serious problem is available at http://www.cybercrime.gov/18usc2320.htm.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the U.S. Embassy in Cairo. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the U.S. Embassy for assistance. The Embassy consular staff can, for example, assist you to find appropriate medical care, to contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed. Consular officials can assist you to identify appropriate resources. The local equivalent to the "911" emergency line in Egypt is 122. U.S.-citizen tourists can forward their complaints for investigation by the Tourist Police Headquarters.

Medical Facilities and Health Information: Medical care in Egypt falls short of U.S. standards. The U.S. Embassy in Cairo can provide a list of local hospitals and English-speaking physicians. Emergency and intensive care facilities are limited. Most Nile cruise boats do not have a ship's doctor, but some employ a medical practitioner of uncertain qualification. Hospital facilities in Luxor and Aswan are inadequate, and they are nonexistent at most other ports-of-call. The Egyptian ambulance service hotline is 123, but Egyptian ambulance service is not reliable.

Beaches on the Mediterranean and Red Sea coasts are generally unpolluted. Persons who swim in the Nile or its canals, walk barefoot in stagnant water, or drink untreated water are at risk of exposure to bacterial and other infections and the parasitic disease schistosomiasis (bilharzia).

It is generally safe to eat properly-prepared, thoroughly-cooked meat and vegetables in tourist hotels, on Nile cruise boats, and in tourist restaurants. Eating uncooked vegetables should be avoided. Tap water is not potable. It is best to drink bottled water or water that has been boiled and filtered. Well-known brands of bottled beverages are generally considered to be safe.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's Internet site at http://www.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) website at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith.

The U.S. Department of State is unaware of any HIV/AIDS entry restrictions for visitors. Foreign residents and their dependents aged 15 or older who are in Egypt applying for work, study or training permits and staying longer than 30 days require HIV testing. A test performed in the U.S. may be accepted under certain conditions. Please verify this information with the Government of Egypt at http://www.mfa.gov.eg/mfa_portal/en-gb/ before you travel.

Avian Influenza: As of October 15, 2008, the Egyptian Ministry of Health has confirmed fifty human cases of the H5NI strain of avian influenza in Egypt since March 2006. Commonly known as "bird flu," the disease has resulted in twenty-two deaths. Travelers to Egypt and other countries affected by the virus are cautioned to avoid poultry farms, contact with animals in live food markets, and any surfaces that appear to be contaminated with feces from poultry or other animals. In addition, the CDC and WHO recommend eating only fully-cooked poultry and eggs. For the most current information and links on avian influenza see the State Department's Avian Influenza Fact Sheet and visit the web site of the U.S. Embassy in Cairo at http://cairo.usembassy.gov. For complete U.S. Government information on pandemic preparedness, please visit www.pandemicflu.gov.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Egypt is provided for general reference only, and may not be totally accurate in a particular location or circumstance. Driving in Egypt, a country with one of the world's highest rates of road fatalities per mile driven, is a chal-

lenge. Even seasoned residents of Cairo must use extraordinary care and situational awareness to navigate the hectic streets of the capital. Traffic rules appear to be routinely ignored by impatient drivers.

Any visiting Americans thinking about driving in Cairo should carefully consider their options, take the utmost precautions, and drive defensively. Drivers should be prepared for unlit vehicles at night; few, if any, road markings; vehicles traveling at high rates of speed; vehicles traveling the wrong way on one-way streets; divided highways and connecting ramps; pedestrians constantly dodging in and out of traffic; and a variety of animals on the roads. Most traffic lights in Cairo appear not to function, but rather intersections are staffed by policemen who use subtle finger movements to indicate which cars may move. Pedestrians should also exercise extreme caution when traversing roadways, especially in high-volume/high-velocity streets like Cairo's Corniche, which follows the east bank of the Nile River. Motorists in Egypt should be especially cautious during the rare winter rains, which can cause extremely slippery road surfaces or localized flooding.

Public mini- and microbuses are not safe; the Embassy strongly recommends that its personnel not use them. In 2006, there were two serious accidents involving international tourist buses on highways outside of Cairo in which a number of foreign tourists were killed. Intercity roads are generally in good condition, but unmarked surfaces, stray animals, and disabled vehicles without lights or reflectors are among the many hazards that can be encountered on highways, especially after dark. Embassy personnel in Egypt are prohibited from traveling outside Cairo on official business after sunset.

In addition, some roads, especially in the Sinai and southeastern part of the country, are off-limits to foreigners. Traffic warning signs should be respected. Trains are usually a safe means of transportation in Egypt. In 2006, there were several accidents involving the collision of third-class passenger trains in the Delta area in which a number of Egyptian nationals were killed or injured.

Aviation Safety Oversight: The U.S. Federal Aviation Administration (FAA) has assessed the Government of Egypt's Civil Aviation Authority as being in compliance with International Civil Aviation Organization (ICAO) aviation safety standards for oversight of Egypt's air carrier operations. For more information, travelers may visit the FAA's Internet web site at http://www.faa.gov.

Special Circumstances: There are restrictions on photographing military personnel and sites, bridges, and canals, including the Suez Canal. Egyptian authorities may broadly interpret these restrictions to include other potentially-sensitive structures, such as embassies, other public buildings with international associations, and some religious edifices. Visitors should also refrain from taking photographs of any uniformed personnel.

In addition to being subject to all Egyptian laws, U.S. citizens of Egyptian origin may also be subject to other laws that impose special obligations on Egyptian citizens. The Government of Egypt considers all children born to Egyptian fathers to be Egyptian citizens even if they were not issued an Egyptian birth certificate or a passport. American women married to Egyptians do not need their spouse's permission to depart Egypt as long as they have a valid Egyptian visa. Dual nationals residing in Egypt for more than six months from the date of arrival require proof of Egyptian citizenship, such as a family I.D. card. Male dual nationals staying in Egypt for more than six months from the date of arrival and who have not completed military service are not generally required to enlist in the armed forces. However, they must obtain an exemption certificate through the Ministry of Defense Draft Office before they can leave Egypt. Individuals who may be affected can inquire at an Egyptian consulate abroad before traveling to Egypt. Dual Egyptian-American nationals may enter and leave Egypt on their U.S. passports. Persons with dual nationality who travel to Egypt on their Egyptian passports are normally treated as Egyptian citizens by the local government. The ability to provide U.S. consular assistance to those traveling on Egyptian passports is extremely limited. For additional information, please see our dual nationality flyer.

Services for U.S. Companies: The U.S. Department of Commerce's Officers and Commercial Specialists are available for counseling U.S. business representatives on market-entry opportunities and techniques. They actively support U.S. companies who are bidding on projects, advocate on their behalf and assist in removing trade barriers. For specific questions, please contact American.Products@mail.doc.gov or visit http://www.buyusa.gov/egypt/en/ussvcs.html.

Marriage in Egypt: The Egyptian government allows Americans to marry in Egypt. For further information, please refer to the web site of the U.S. Embassy in Cairo at http://cairo.usembassy.gov/consular/acs12.htm.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating Egyptian laws, even unknowingly, may be expelled, arrested or imprisoned.

Penalties for possession, use, or trafficking in illegal drugs in Egypt are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child

abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in Egypt are encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration website and to obtain updated information on travel and security within Egypt. Americans without Internet access may register directly with the Embassy.

By registering, American citizens make it easier for the Embassy to contact them in case of emergency. The U.S. Embassy is located at 5 Tawfik Diab Street, Garden City, Cairo, telephone (20) 2 2797-2301. Walk-in working hours are 8:00 a.m. to 11:00 a.m. Sunday through Thursday. Phone inquiries are between 1:00 p.m. and 4:30 p.m. The latest Embassy warden message can be heard on (20) 2 2797-3000. For emergencies after-hours, U.S. citizens may reach the Embassy duty officer via (20) 2 2797-3300. The Consular Section American Citizens Services unit fax number is (20) 2 2797-3602.

The mailing address from the United States is: Consular Section, Unit 64900, Box 15, APO AE 09839-4900. Within Egypt or from a third country, it is 8 Kamal el-Din Salah Street, Garden City, Cairo. The Consular Section's e-mail address is consular cairoacs@state.gov. Consular information is available via the Internet on the Embassy website http://cairo.usembassy.gov.

Visa-related inquiries should be directed by e-mail to consular caironiv@state.gov. Once a month, American Citizens Services are available at the American Center, 3 Pharana Street, Azarita, Alexandria, and every five to ten weeks, American Citizens Services are available at the Cairo American College, Maadi. Please check the Embassy web site for dates and times of available services.

Intercountry Adoption

August 2008

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is based on public sources and our current understanding. Questions involving foreign and U.S. immigration laws and legal interpretation should be addressed respectively to qualified foreign or U.S. legal counsel.

Patterns of Immigration: Please review current reports online at http://adoption.state.gov.

Adoption Authority: Egyptian governmental authority for adoptions and guardianship is divided between the Ministry of Social Affairs (for Muslims) and the court system (for Christians). See below for further details.

Adoption for Muslims: The Egyptian judicial system and Egyptian family law are based on a strict interpretation of Islamic Sharia law, which restricts the distribution of inheritance to spouses, biological children, and certain blood relatives. It is not possible under Sharia law to create a parent-child relationship that offers the same rights and responsibilities as those between a biological parent and child, which is the definition of adoption as it is generally understood in the United States.

For Christians: Christians are not bound by Sharia law, are not generally under the jurisdiction of the Ministry of Social Affairs, and may adopt through the Egyptian court system. It is important to note that the U.S. Embassy in Cairo has no authority to intervene in Egyptian court proceedings. Therefore, prospective adoptive parents who will be processing their adoptions through the courts are strongly advised to hire an Egyptian attorney to assist in their cases and address questions involving the interpretation of Egyptian family law.

Guardianship can only be done by blood relatives, more specifically, the next of kin. **Fostering**, however, assumes no blood relationship, and can take two forms: the most common form is such that a person will benevolently agree to partially or fully support a child who remains in an orphanage. It is also possible to foster a child in one's home, in which case the foster parent will enter into a contract with the orphanage and agree to fully support the child. To begin this process, the foster family is asked to submit a fostering request to the Ministry of Social Affairs (MOSA) with all documentation with proof that they are capable to provide all types of support to the orphan. If the request is approved, the MOSA will issue permission to allow an orphanage to release a child to be fostered at the home of the foster family. There are no court proceedings involved in this process. There are both Muslim and Christian orphanages in Egypt and prospective guardians may foster a child of the same religion only.

Please review current reports online at http://adoption.state.gov.

Eligibility to Adopt: Obtaining permission to adopt or foster an Egyptian child is a difficult process. Prospective foster parents are required to undergo a pre-qualification process through the Ministry of Social Affairs. This is similar to the U.S. screening process for foster parents and includes, among other things, regular visits by a social worker to determine whether prospective parents are able to care for the child properly. The number of visits is determined by the social worker.

Residency Requirements: There is no residency requirement for adoption, provided the prospective parents had satisfied the requirement of the Egyptian law and are awarded legal custody with the right to remove the child from Egypt for immigration. For guardianship, a lawyer can move

the prospective parent's case through the court system without the guardians. However, at least one of the prospective parents applying for guardianship, adoption or fostering needs to be able to show proof of Egyptian citizenship (e.g. an Egyptian passport or national ID card).

Time Frame: To satisfy the requirements of the Egyptian family law and be awarded legal custody, adoption or permission to foster an orphan at home with an approval to remove the child for immigration is a long and difficult process. Therefore a time frame is impossible to predict. However, once a child has been identified, an I-600A application for advance processing of orphan petition has been approved by the U.S. Citizenship and Immigration Services (USCIS) office having jurisdiction over the prospective parents' place of residence, and the prospective parents have satisfied Egyptian law and been awarded legal custody, the immigration process takes between 1-2 weeks.

Adoption Agencies and Attorneys: Prospective adoptive parents are advised to fully research any adoption agency or facilitator they plan to use for adoption services. The U.S. Embassy in Cairo maintains a list of Egyptian attorneys whom U.S. citizens in Egypt may wish to consider contacting for assistance with legal issues in Egypt. That list is available at http://egypt.usembassy.gov/consular/acslist2.htm.

Adoption Fees: The U.S. Embassy in Egypt discourages the payment of any fees that are not properly receipted, "donations," or "expediting" fees, that may be requested from prospective adoptive parents. Such fees have the appearance of "buying" a baby and put all future adoptions in Egypt at risk. The U.S. Embassy in Cairo cannot predict the approximate fees for the process of being granted an adoption or guardianship, as they differ from case to case. While the orphanages themselves do not require payment in exchange for releasing a child, the prospective parents/guardians will need legal advice and/or facilitators in order to expedite the process and to obtain the required official documentation and approval. Attorneys and facilitators will charge fees.

Adoption Procedures: A social worker from the MOSA will visit the parents to make sure that the foster family will be capable to provide all types of support to an infant. Once all documents are complete, they will be sent to the MOSA Committee for adjudication. If all conditions are met, the MOSA will issue an approval or denial. Foster parents are notified and then are free to visit an orphanage to choose from children whose parents are unknown.

The foster family will sign a contract with the orphanage showing that the orphanage is officially releasing the child to the foster family and that the foster family will allow a social worker from the MOSA to visit the infant on a regular basis to determine whether the foster parents are able to care for the child properly.

Christians wishing to adopt in Egypt should seek legal counsel from an Egyptian attorney in order to receive the most updated information regarding the proper procedures and documentation for adopting or acquiring custody of an Egyptian orphan. All prospective parents are required to apply to the Ministry of Social Affairs (MOSA) to qualify to become foster parents.

Required Documents: To begin the process, foster parents need to submit the following documents:

- A copy of the marriage decree.
- Employment status and proof that they will be able financially to support a child (proof of income).
- Proof that one of the parents is infertile (cannot give birth).
- Proof that one of the foster parents is an Egyptian citizen.

Embassy of the
Arab Republic of Egypt
3521 International Court, NW.
Washington, D.C. 20008
(Phone 202-895-5400)
(FAX 202-244-4319/5131)
Consular Section: 202-966 6342.

U.S. Immigration Requirements: Prospective adopting parents are strongly encouraged to consult USCIS publication M-249, *The Immigration of Adopted and Prospective Adoptive Children*, as well as the Department of State publication, *Intercountry Adoptions*. Please see the *Intercountry Adoption* section of this book for more details and review current reports online at http://adoption.state.gov.

The **Consular Section in Cairo** has a call center that handles general questions, responds to case-specific inquiries, and schedules appointments for certain services (but not visa interviews). The number is 0900-70600. For a small fee, one may call the call center from a land line in Egypt. From a call center mobile in Egypt, call 2100.

Additional Information: For information on intercountry adoption and international parental child abduction, and security information for U.S. citizens traveling abroad, call Toll Free 1-888-407-4747. This number is available from 8:00 a.m. to 8:00 p.m. EST/EDT, Monday through Friday (except U.S. federal holidays). Callers who are unable to use toll-free numbers, such as those calling from overseas, may obtain information and assistance during these hours by calling 1-202-501-4444.

International Parental Child Abduction

November 2008

The information in this section has been edited from a report of the State Department Bureau of Consular

Affairs, Office of Overseas Citizens Services. For more information, please read the *International Child Abduction* section of this book and review current reports online at www.travel.state.gov/childabduction.

Disclaimer: The information in this circular relating to the legal requirements of specific foreign countries is provided for general information only. Questions involving interpretation of specific foreign laws should be addressed to foreign counsel.

The information contained in this flyer is intended as an introduction to the basic elements of children's issues in Egypt. It is not intended as a legal reference. Currently there are no international or bilateral treaties in force between Egypt and the United States dealing with international parental child abduction. The Hague Convention on the Civil Aspects of International Child Abduction cannot be invoked if a child is taken from the United States to Egypt, or vice versa, by one parent against the wishes of the other parent or in violation of a U.S. custody order.

Parental Kidnapping: The removal of a child by the non-custodial parent to or within Egypt is not a crime in Egypt unless the child is subject to Egyptian court-ordered travel restrictions. Additionally, parents should be aware that they must work within the Egyptian court system in order to obtain legal custody of the child in Egypt. Once the custody order is obtained, the parent must go to the district family court for its implementation. The president of the court has the authority to request that the police enforce the custody order and/or impose a penalty on the noncustodial parent for noncompliance with the custody order.

Dual Nationality: Egypt recognizes the concept of dual nationality. Under Egyptian law, children born to an Egyptian father are automatically considered citizens of Egypt. Egyptian mothers of children born to a non-Egyptian father, however, should submit requests to the Egyptian Passports, Immigration and Nationality Authority, Egyptian Embassies or Consulates overseas, and/or the Civil Registration Office to register their children as Egyptian citizens.

Enforcement of Foreign Court Orders: A parent can request that a foreign custody order be recognized in Egypt, but enforcement will result only if the order does not contravene Sharia law and "paternal rights." Therefore, as a practical matter, foreign custody orders are not generally automatically recognized in Egypt, and the parent must seek legal representation in Egypt.

Jurisdiction And Right Of Custody: Jurisdiction: Egyptian Family Courts within the jurisdiction of each summary court have legal jurisdiction to hear child custody petitions.

Presumptive Custody: Under Egyptian law, the courts generally favor the mother. Mothers are most commonly considered to be the appropriate custodians of children up to age 15. Normally, if custody disputes arise between parents, Egyptian courts uphold presumptive custody.

Conditions for "Presumptive Custody": Courts in Egypt generally uphold presumptive custody for the mother if she is a "person of the book" (i.e., Muslim, Christian or Jewish) and if she is deemed to be a "fit" mother. If the father is Muslim, the court generally requires that the mother commit herself to raise the child as a Muslim in Egypt.

If a non-Egyptian mother's custody is upheld in court, she generally must still request the permission of the court to take the children out of Egypt. Also, under Egyptian law, if the mother (Muslim or non-Muslim) remarries she may lose her claim to custody of her children, depending on the court's determination based on the best interests of the child. This law, however, does not apply to the father; he would normally retain custody rights if he remarries.

Order of Preference for Non-Parental Custody: The mother may lose presumptive custody due to remarriage or inability to counter court findings that she is an "unfit mother." In such cases, the courts recognize an order of preference of alternate adult custodians with priority given to the mother's family in the following order: maternal grandmother or great-grandmother; paternal grandmother or great-grandmother; maternal aunt; paternal aunt; maternal niece; paternal niece. If these relatives do not exist, the right of custody shifts to a male in the following order of priority: maternal grandfather; maternal brother; maternal nephew; paternal brother.

Right of Visitation: By law, visitation depends on the willingness of the custodial parent. If a father has custody and does not voluntarily agree to visitation, the local authorities will generally not force the issue without a court order. The parent will have to seek a court order to enforce visitation.

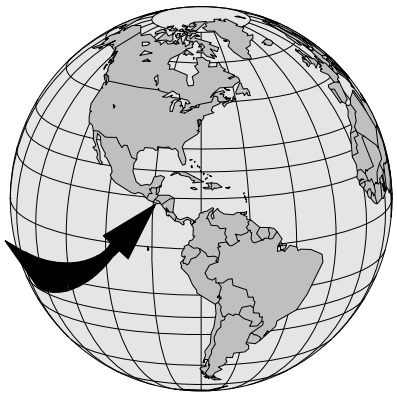
Egyptian/American MOU on Parental Access: In October 2003, the U.S. and Egypt signed a Memorandum of Understanding (MOU) that confirms both countries' commitment to facilitating parental access to children in the other country. Both the U.S. and Egypt agree that a left-behind parent should have meaningful access to his or her child or children. However, the MOU recognizes that facilitating parental access may occur in tandem with efforts to return children to their custodial parents.

Currently, however, there are no international or bilateral treaties in force between Egypt and the United States dealing with international parental child abduction. Egypt is not a signatory to the Hague Convention on the Civil Aspects of International Child Abduction. Thus, this treaty cannot be invoked if a child is taken from the U.S. to Egypt by one parent against the wishes of the other parent or in violation of a U.S. custody order.

Travel: Currently, the father's permission is not required for children to depart Egypt unless there is a custody order that explicitly grants custody to the father. Egyptian fathers no longer have absolute control over their children's right to travel abroad.

They can still prevent their children from traveling, but must do so by means of a court order.

Travel Restrictions (Wife): Due to a Supreme Court decision in March 2000, an Egyptian wife no longer requires the permission of her Egyptian husband to obtain a passport and depart the country. In the case of a child custody dispute, however, either spouse may obtain a court order preventing the other spouse from traveling until the dispute has been resolved.



Visas: Should a parent declare a child's passport stolen or lost, the new passport plus a police report of loss or theft is generally sufficient for the re-issuance of a tourist visa. If the Immigration Authority's records indicate the bearer has a prolonged stay in Egypt, however, issuance of the visa may halt pending issuance of an Egyptian birth certificate. For more information, please read the *International Parental Child Abduction* section of this book and review current reports online at http://travel.state.gov.

Issuance Of Egyptian Passports: Under Egyptian law, either parent may apply for an Egyptian passport for his/her child, provided there have been no court-ordered restrictions placed on the child's departure. In some recent cases, minors have been able to obtain Egyptian passports on their own behalf.

EL SALVADOR

Compiled from the July 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Republic of El Salvador

PROFILE

Geography

Area: 20,742 sq. km. (8,008 sq. mi.); about the size of Massachusetts.

Cities: Capital—San Salvador (pop. 2.2 million). Other cities—Santa Ana, San Miguel, Soyapango, and Apopa.

Terrain: Mountains separate country into three distinct regions—southern coastal belt, central valleys and plateaus, and northern mountains.

Climate: Semitropical, distinct wet and dry seasons.

People

Nationality: Noun and adjective—Salvadoran(s).

Population: (2007 est.) 5.7 million.

Annual growth rate: (2006 est.) 1.7%.

Ethnic groups: Mestizo 90%, indigenous 1%, Caucasian 9%.

Religions: About 52% Roman Catholic, with significant and growing numbers of Protestant groups.

Languages: Spanish.

Education: Free through ninth grade. Attendance (grades 1-9)—90.4%. Literacy—85.4% nationally; 77% in rural areas.

Health: Infant mortality rate (2005)—23/1,000 (source: UNICEF). Life expectancy at birth (2007)—70.8 years.

Work force: (about 1.7 million, 2007) Agriculture—17%; services—48.7%; industry—15.7%; construction—7.6%; government—4.5% (2006).

Government

Type: Republic.

Constitution: December 20, 1983.

Independence: September 15, 1821.

Government branches: Executive—president and vice president. Legislative—84-member Legislative Assembly. Judicial—independent (Supreme Court).

Political subdivisions: 14 departments.

Political parties: (represented in the legislature) Farabundo Marti National Liberation Front (FMLN), Nationalist Republican Alliance (ARENA), National Conciliation Party (PCN), Christian Democratic Party (PDC), and Democratic Change (CD).

Suffrage: Universal at 18.

Economy

GDP: (2007)$20.4 billion; PPP GDP $41.56 billion (2007 IMF estimate).

GDP annual real growth rate: (2007) 4.7%.

Per capita income: (2007) $3,547.21; PPP per capita income $5,842 (2007 IMF estimate).

Agriculture: (11.2% of GDP, 2007) Products—coffee, sugar, livestock, corn, poultry, and sorghum. Arable, cultivated, or pasture land—68% (2005).

Industry: (20.6% of GDP, 2007) Types—textiles and apparel, medicines, food and beverage processing, clothing, chemical products, petroleum products, electronics, call centers.

Trade: (2006) Exports—$4 billion: textiles and apparel, ethyl alcohol, coffee, sugar, medicines, iron and steel products, tuna, light manufacturing, and paper products. Major markets—U.S. 50.8%, Central American Common Market (CACM) 33.7%. Imports—$8.7 billion: petroleum, iron products, machines and mechanical devices, cars, medicines, consumer goods, foodstuffs, capital goods, and raw industrial materials. Major suppliers—U.S. 35.6%, CACM 16.8%, Mexico 9.8%.

PEOPLE

El Salvador's population numbers about 5.7 million. Almost 90% is of mixed Indian and Spanish extraction. About 1% is indigenous; very few Indians have retained their customs and traditions. The country's people

are largely Roman Catholic and Protestant. Spanish is the language spoken by virtually all inhabitants. The capital city of San Salvador has about 1.6 million people; an estimated 37.3% of El Salvador's population lives in rural areas.

HISTORY

The Pipil Indians, descendants of the Aztecs, and the Pocomames and Lencas were the original inhabitants of El Salvador.

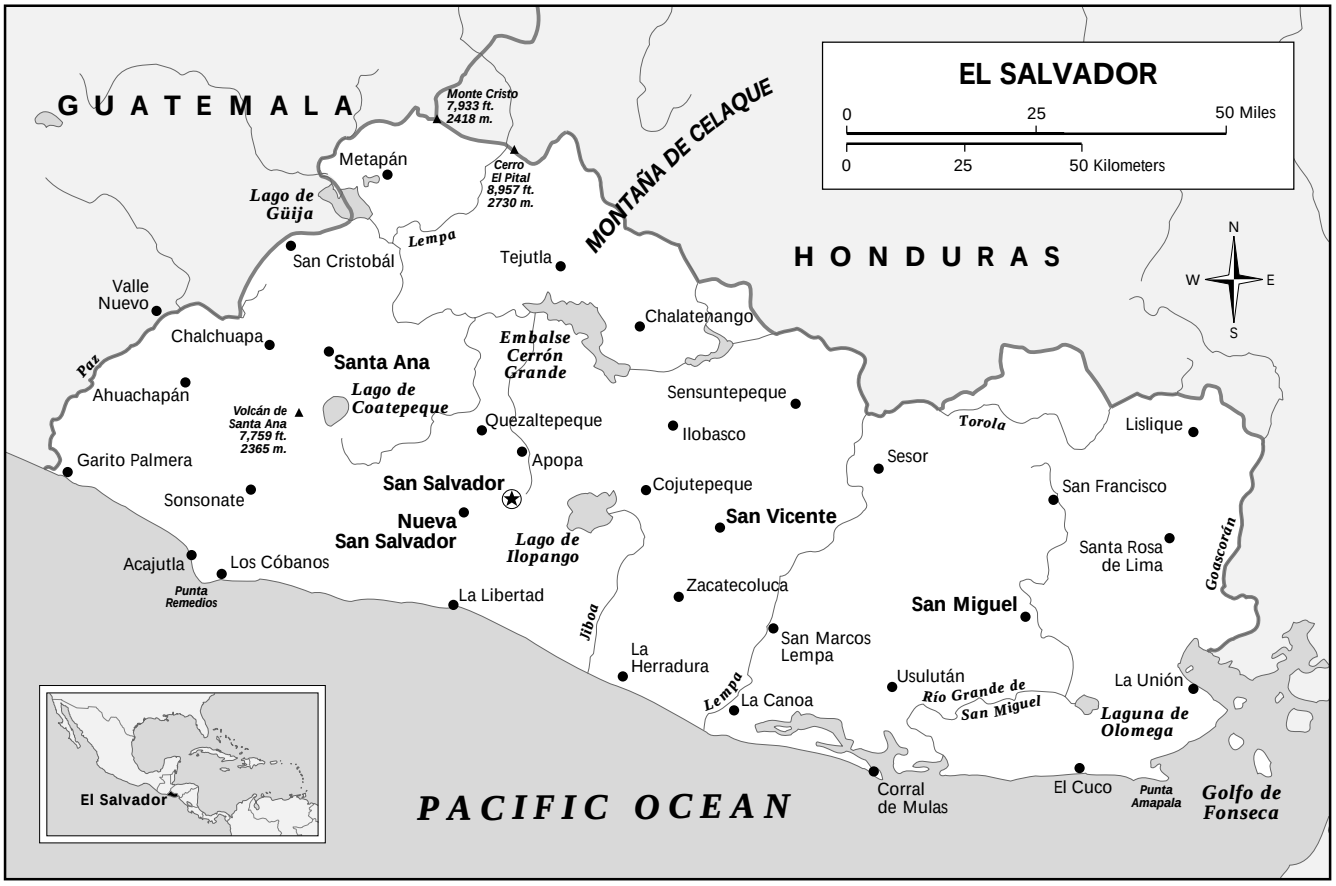
The first Salvadoran territory visited by Spaniards was on Meanguera Island, located in the Gulf of Fonseca, where Spanish Admiral Andrés Niño led an expedition to Central America and disembarked on May 31, 1522. In June 1524, the Spanish Captain Pedro de Alvarado started a war to conquer Cuscatlán. His cousin Diego de Alvarado established the village of San Salvador in April 1525. In 1546, Charles I of Spain granted San Salvador the title of city.

During the subsequent years, the country evolved under Spanish rule; however, toward the end of 1810 many people began to express discontent. On November 5, 1811, when the Priest José Matias Delgado rang the bells of La Merced Church in San Salvador calling for insurrection, the people began to band together for freedom.

In 1821, El Salvador and the other Central American provinces declared their independence from Spain. When these provinces were joined with Mexico in early 1822, El Salvador resisted, insisting on autonomy for the Central American countries. In 1823, the United Provinces of Central America was formed of the five Central American states under Gen. Manuel Jose Arce. When this federation was dissolved in 1838, El Salvador became an independent republic. El Salvador's early history as an independent state—as with others in Central America—was marked by frequent revolutions; not until the period 1900-30 was relative stability achieved. Following a deterioration in the country's democratic institutions in the 1970s a period of civil war followed from 1980-1992. More than 75,000 people are estimated to have died in the conflict. In January 1992, after prolonged negotiations, the opposing sides signed peace accords which ended the war, brought the military under civilian control, and allowed the former guerillas to form a legitimate political party and participate in elections.

GOVERNMENT AND POLITICAL CONDITIONS

El Salvador is a democratic republic governed by a president and an 84-member unicameral Legislative Assembly. The president is elected by universal suffrage by absolute majority vote and serves for a 5-year term. A second round runoff is required in the event that no candidate receives more than 50% of the first round vote. Members of the assembly are elected based on the number of votes that their parties obtain in each department (circumscriptive suffrage) and serve for 3-year terms. The country has an independent judiciary and Supreme Court. Legislative and municipal elections will be held in January 2009. Presidential elections will be held in March 2009.



Political Landscape

Hard-line conservatives, including some members of the military, created the Nationalist Republican Alliance party (ARENA) in 1981. ARENA almost won the election in 1984 with solid private sector and rural farmer support. By 1989, ARENA had attracted the support of business groups. Multiple factors contributed to ARENA victories in the 1988 legislative and 1989 presidential elections, including allegations of corruption in the ruling Christian Democratic party, poor relations with the private sector, and historically low prices for the nation's main agricultural exports.

The successes of Alfredo Cristiani's 1989-94 administration in achieving a peace agreement to end the civil war and in improving the nation's economy helped ARENA—led by former San Salvador mayor Armando Calderon Sol—keep both the presidency and a working majority in the Legislative Assembly in the 1994 elections. ARENA's legislative position was weakened in the 1997 elections, but it recovered its strength, helped by divisions in the opposition, in time for another victory in the 1999 presidential race, bringing President Francisco Guillermo Flores Perez to office. Flores concentrated on modernizing the economy and strengthening bilateral relations with the United States by becoming a committed partner in anti-terror efforts, sending troops to aid in the reconstruction of Iraq, and by playing a key role in negotiations for the Central American Free Trade Agreement (CAFTA-DR).

Taking advantage of both public apprehension of Flores' policies and ARENA infighting, the chief opposition party, the Farabundo Marti National Liberation Front (FMLN), was able to score a significant victory against ARENA in the March 2003 legislative and municipal elections. ARENA, left with only 29 seats in the 84-seat Legislative Assembly, was forced to court the right-wing National Conciliation Party (PCN) in order to form a majority voting bloc. However, in 2003 the PCN entered into a loose partnership with the FMLN, further limiting ARENA's ability to maneuver in the legislature.

Despite these constraints, ARENA made a strong showing in the March 2004 presidential election, which was marked by an unprecedented 67% voter turnout. ARENA candidate Elias Antonio "Tony" Saca handily defeated the FMLN candidate and party head Shafik Handal, garnering 57.71% of the votes cast. The defeat of the FMLN's presidential candidate rekindled an internal FMLN struggle between party hardliners and more moderate party members who saw the party's 2004 defeat as a call for reform. In addition, the PCN and the

two parties that comprise the center/center-left coalition, the United Democratic Center (CDU) and the Christian Democratic Party (PDC), faced dissolution for failing to each capture at least 3% of the votes.

In March 2006 Legislative Assembly and municipal elections, the ruling ARENA party garnered 34 Assembly deputies and 147 mayoralties, while the opposition FMLN won 32 legislative seats and 51 city halls (plus 8 additional mayoralties in which they participated as part of a coalition). The PCN, PDC, and CD carried 10, 6, and 2 Legislative Assembly seats, respectively.

As with the 2003-2006 Assembly, the combined 44 seats of ARENA and their center-right PCN allies are sufficient for all legislation requiring a 43-vote simple majority, while the FMLN can still block legislation requiring a two-thirds (56 vote) supermajority. El Salvador's political parties are preparing and planning for 2009, when presidential, legislative, and municipal elections will be held in the same year for the first time since 1994.

Human Rights and Post-War Reforms

During the 12-year civil war, human rights violations by both the government security forces and left-wing guerillas were rampant. The accords established a Truth Commission under UN auspices to investigate the most serious cases. The commission recommended that those identified as human rights violators be removed from all government and military posts. Thereafter, the Legislative Assembly granted amnesty for political crimes committed during the war. Among those freed as a result were the Salvadoran Armed Forces (ESAF) officers convicted in the November 1989 Jesuit murders and the FMLN ex-combatants held for the 1991 murders of two U.S. servicemen. The peace accords also established the Ad Hoc Commission to evaluate the human rights record of the ESAF officer corps.

In accordance with the peace agreements, the constitution was amended to prohibit the military from playing an internal security role except under extraordinary circumstances. Demobilization of Salvadoran military forces generally proceeded on schedule throughout the process. The Treasury Police, National Guard, and National Police were abolished, and military intelligence functions were transferred to civilian control. By 1993—9 months ahead of schedule—the military had cut personnel from a war-time high of 63,000 to the level of 32,000 required by the peace accords. By 1999, ESAF strength stood at less than 15,000, including uniformed and non-uniformed personnel, consisting of personnel in the army, navy, and air force. A purge of military officers accused of human rights abuses and corruption was completed in 1993 in compliance with the Ad Hoc

Commission's recommendations. The military's new doctrine, professionalism, and complete withdrawal from political and economic affairs leave it the most respected institution in El Salvador. More than 35,000 eligible beneficiaries from among the former guerrillas and soldiers who fought the war received land under the peace accord-mandated land transfer program, which ended in January 1997. The majority of them have received agricultural credits.

National Civilian Police

The civilian police force, created to replace the discredited public security forces, deployed its first officers in March 1993 and was present throughout the country by the end of 1994. The National Civilian Police (PNC) has about 16,000 officers. The United States, through the International Criminal Investigative Training Assistance Program (ICITAP), led international support for the PNC and the National Public Security Academy (ANSP), providing about $32 million in non-lethal equipment and training since 1992.

Judiciary

Following the peace accords, both the Truth Commission and the Joint Group identified weaknesses in the judiciary and recommended solutions, the most dramatic being the replacement of all the magistrates on the Supreme Court. This recommendation was fulfilled in 1994 when an entirely new court was elected, but weaknesses remain. The process of replacing incompetent judges in the lower courts, and of strengthening the attorney generals' and public defender's offices, has moved more slowly. The government continues to work in all of these areas with the help of international donors, including the United States. Action on peace accord-driven constitutional reforms designed to improve the administration of justice was largely completed in 1996 with legislative approval of several amendments and the revision of the Criminal Procedure Code—with broad political consensus.

Permanent Representative to the UN, New York: **Carmen Maria GALLARDO de Hernandez**

El Salvador maintains an Embassy in the United States at 1400 16th Street NW, Washington, DC, 20036 (tel: 202-265-9671). There are consulates in Atlanta, Boston, Chicago, Dallas, Houston, Las Vegas, Los Angeles, Miami, New York, and San Francisco.

ECONOMY

The Salvadoran economy continues to benefit from a commitment to free markets and careful fiscal management. The economy has been growing at a steady and moderate pace since the signing of peace accords in 1992, and poverty has been cut from 66% in 1991 to 30.7% in 2006. Much of the improvement in El Salvador's economy is a result of the privatization of the banking system, telecommunications, public pensions, electrical distribution and some electrical generation; reduction of import duties; elimination of price controls; and improved enforcement of intellectual property rights. Capping those reforms, on January 1, 2001, the U.S. dollar became legal tender in El Salvador. The economy is now fully dollarized.

The Salvadoran Government has maintained fiscal discipline during post-war reconstruction and reconstruction following earthquakes in 2001 and hurricanes in 1998 and 2005. Taxes levied by the government include a value added tax (VAT) of 13%, income tax of 20%, excise taxes on alcohol and cigarettes, and import duties. The VAT is the largest source of revenue, accounting for about 52.2% of total tax revenues in 2007. El Salvador's public external debt in May 2008 was about $5.5 billion, 27.02% of GDP.

Years of civil war, fought largely in the rural areas, had a devastating impact on agricultural production in El Salvador. The agricultural sector experienced significant recovery, buoyed in part by higher world prices for coffee and sugarcane and increased diversification into horticultural crops. Seeking to develop new growth sectors and employment opportunities, El Salvador created new export industries through fiscal incentives for free trade zones. The largest beneficiary has been the textile and apparel (maquila) sector, which directly provides approximately 70,000 jobs. Services, including retail and financial, have also shown strong employment growth, with about 48.7% of the total labor force now employed in the sector.

Remittances from Salvadorans working in the United States are an important source of income for many families in El Salvador. In 2007, the Central Bank estimated that remittances totaled $3.7 billion. UNDP surveys show that an estimated 22.3% of families receive remittances.

Under its export-led growth strategy, El Salvador has pursued economic integration with its Central American neighbors and negotiated trade agreements with the Dominican

Republic, Chile, Mexico, Panama, Taiwan, Colombia, and the United States. Central American countries began negotiating an Association Agreement with the European Union in 2007. Trade agreements with CARICOM and Canada are also under negotiation, while an agreement with Israel is being considered. Exports in 2007 grew 7.4% while imports grew 13.1%. As in previous years, the large trade deficit was offset by family remittances.

The U.S.-Central America-Dominican Republic Free Trade Agreement (CAFTA-DR), implemented between El Salvador and the United States on March 1, 2006, provides El Salvador preferential access to U.S. markets. Textiles and apparel, shoes, and processed foods are among the sectors that benefit. In addition to trade benefits, CAFTA-DR also provides trade capacity building, particularly in the environment and labor areas, and a framework for additional reforms on issues such as intellectual property rights, dispute resolution, and customs that will improve El Salvador's investment climate. For sensitive sectors such as agriculture, the agreement includes generous phase-in periods to allow Salvadoran producers an opportunity to become more competitive.

U.S. support for privatization of the electrical and telecommunications markets markedly expanded opportunities for U.S. investment in the country. More than 300 U.S. companies have established either a permanent commercial presence in El Salvador or work through representative offices in the country. The U.S. Department of Commerce maintains a Country Commercial Guide for U.S. businesses seeking detailed information on business opportunities in El Salvador.

On November 29, 2006, the Government of El Salvador and the Millennium Challenge Corporation (MCC) signed a five-year, $461 million anti-poverty Compact to stimulate economic growth and reduce poverty in the country's northern region. The grant seeks to improve the lives of approximately 850,000 Salvadorans through investments in education, public services, enterprise development, and transportation infrastructure. The Compact entered into force in September 2007 and it is expected that incomes in the region will increase by 20% over the five-year term of the Compact, and by 30% within ten years of the start of the Compact.

Natural Disasters

Located on the Pacific's earthquake-prone Ring of Fire and at latitudes plagued by hurricanes, El Salvador's history is a litany of catastrophe, including the Great Hurricane of 1780 that killed 22,000 in Central America and earthquakes in 1854 and 1917 that devastated El Salvador and destroyed most of the capital city. More recently, an October 1986 earthquake killed 1,400 and seriously damaged the nation's infrastructure; in 1998, Hurricane Mitch killed 10,000 in the region, although El Salvador—lacking a Caribbean coast—suffered less than Honduras and Nicaragua. Major earthquakes in January and February of 2001 took another 1,000 lives and left thousands more homeless and jobless. El Salvador's largest volcano, Santa Ana (also known by its indigenous name Ilamatepec), erupted in October 2005, spewing tons of sulfuric gas, ash, and rock on surrounding communities and coffee plantations, killing two people and permanently displacing 5,000. Also in October 2005, Hurricane Stan unleashed heavy rains that caused flooding throughout El Salvador. In all, the flooding caused 67 deaths, and more than 50,000 people were evacuated at some point during the crisis. Damages from the storm were estimated at $355.6 million.

FOREIGN RELATIONS

El Salvador is a member of the United Nations and several of its specialized agencies, the Organization of American States (OAS), the Central American Common Market (CACM), the Central American Parliament, and the Central American Integration System (SICA). It actively participates in the Central American Security Commission (CASC), which seeks to promote regional arms control. From 2002-03, El Salvador was chair of the OAS anti-terrorism coordinating body, CICTE. El Salvador also is a member of the World Trade Organization and is pursuing regional free trade agreements. An active participant in the Summit of the Americas process, El Salvador chairs a working group on market access under the Free Trade Area of the Americas initiative. El Salvador has joined its six Central American neighbors in signing the Alliance for Sustainable Development, known as the Conjunta Centroamerica-USA or CONCAUSA to promote sustainable economic development in the region.

El Salvador enjoys normal diplomatic and trade relations with all of its neighboring countries including Honduras, with which it has previously had territorial disputes. While the two nations continue to disagree over the status of their maritime borders in the Gulf of Fonseca, they have agreed to settle their land-border disputes with the International Court of Justice (ICJ). In September 1992, the Court awarded most of the territory in question to Honduras. In January 1998, Honduras and El Salvador signed a border demarcation treaty to implement the terms of the ICJ decree although delays continue due to technical difficulties.

U.S.-SALVADORAN RELATIONS

U.S.-Salvadoran relations remain close and strong. U.S. policy toward El Salvador promotes the strengthening of El Salvador's democratic institutions, rule of law, judicial reform, and civilian police; national reconciliation and reconstruction; and economic opportunity and growth. El Salvador has been a committed member of the coalition of nations fighting against terrorism and has sent 10 rotations of troops to Iraq to support Operation Iraqi Freedom.

U.S. ties to El Salvador are dynamic and growing. More than 19,000 American citizens live and work full-time in El Salvador. Most are private businesspersons and their families, but a small number of American citizen retirees have been drawn to El Salvador by favorable tax conditions.

The Embassy's consular section provides a full range of citizenship services to this community. The American Chamber of Commerce in El Salvador is located at World Trade Center, Torre 2, local No. 308, 89 Av. Nte. Col. Escalón, phone: 2263-9494.

TRAVEL

Consular Information Sheet

May 1, 2008

Country Description: El Salvador is a democratic country with a developing economy. Tourism facilities are not fully developed. The capital is San Salvador, accessible by El Salvador's International Airport at Comalapa. Although the American dollar and Colon are legal tender in El Salvador, in practice the Colon has fallen out of use, and Americans traveling with U.S. dollars should not exchange them for Colones.

Entry Requirements: To enter the country, U.S. citizens must present a current U.S. passport and either a Salvadoran visa or a one-entry tourist card. The tourist card may be obtained from immigration officials for a ten-dollar fee upon arrival in country. U.S. travelers who plan to remain in El Salvador for more than thirty days can apply in advance for a multiple-entry visa, issued free of charge, from the Embassy of El Salvador in Washington, DC or from a Salvadoran consulate in Boston, Chicago, Dallas, Houston, Las Vegas, Long Island, Los Angeles, Miami, New York City, or San Francisco. Travelers may contact the Embassy of El Salvador at 1400 16th Street NW, Washington, DC 20036, tel. (202) 265-9671, 265-9672; fax (202) 232-3763; e-mail: correo@elsalvador.org or visit the Embassy's web site at http://www.elsalvador.org. When applying for a visa, travelers may be asked to present evidence of U.S. employment and adequate finances for their visit at the time of visa application or upon arrival in El Salvador. For passengers departing by air, El Salvador has an exit tax of $32.00 which is usually included in the price of the airline ticket.

Travelers should be aware that El Salvador's entry requirements vary in accordance with agreements the country has with foreign governments. Citizens of several countries in addition to the United States may enter El Salvador with a current passport and either a visa or tourist card. Citizens of many other countries, including many Latin American and western European nations, may enter with only a current passport. However, citizens of most nations are required to present both a current passport and a visa to enter El Salvador. Non-U.S. citizen travelers are advised to contact a Salvadoran embassy or consulate to determine the entry requirements applicable to them.

In June 2006, El Salvador entered into the "Central America-4 (CA-4) Border Control Agreement" with Guatemala, Honduras, and Nicaragua. Under the terms of the agreement, citizens of the four countries may travel freely across land borders from one of the countries to any of the others without completing entry and exit formalities at immigration checkpoints. U.S. citizens and other eligible foreign nationals, who legally enter any of the four countries, may similarly travel among the four without obtaining additional visas or tourist entry permits for the other three countries. Immigration officials at the first port of entry determine the length of stay, up to a maximum period of 90 days. Foreign tourists who wish to remain in the four-country region beyond the period initially granted for their visit must request a

one-time extension of stay from local immigration authorities in the country where the traveler is physically present, or they must leave the CA-4 countries and reapply for admission to the region. Foreigners "expelled" from any of the four countries are excluded from the entire CA-4 region. In isolated cases, the lack of clarity in the implementing details of the CA-4 Border Control Agreement has caused temporary inconvenience to some travelers and has resulted in others being fined more than one hundred dollars or detained in custody for 72 hours or longer.

Airlines operating out of El Salvador International Airport require all U.S. citizen passengers boarding flights for the United States (including U.S.-Salvadoran dual nationals) to have a current U.S. passport. U.S. citizens applying for passports at the U.S. Embassy in San Salvador are reminded that proof of citizenship and identity are required before a passport can be issued. Photographic proof of identity is especially important for young children because of the high incidence of fraud involving children. Since non-emergency passports are printed in the United States, and not at the U.S. Embassy in El Salvador, citizens submitting applications in El Salvador should be prepared to wait approximately one week for receipt of their new passports.

The U.S. Embassy in El Salvador reminds U.S. citizen travelers that their activities in El Salvador are governed by Salvadoran law and the type of visa they are issued. Under Salvadoran law, all foreigners who participate directly or indirectly in the internal political affairs of the country (i.e. political rallies, protests) lose the right to remain in El Salvador, regardless of visa status or residency in El Salvador.

Visit the Embassy of El Salvador's web site at http://www.elsalvador.org for the most current visa information.

In an effort to prevent international child abduction, many governments have initiated procedures at entry/exit points. These often include requiring documentary evidence of relationship and permission for the child's travel from the parent(s) or legal guardian if not present. Having such documentation on hand, even if not required, may facilitate entry/departure. Minors traveling on Salvadoran passports and who are traveling alone, with one parent or with a third party must have the written permission of the absent parent(s) or legal guardian to depart El Salvador. A Salvadoran notary must notarize this document. If the absent parent(s) or legal guardian is (are) outside of El Salvador, the document must be notarized by a Salvadoran consul. If a court decree gives custody of the child traveling on a Salvadoran passport to one parent, the decree and a passport will allow the custodial parent to depart El Salvador with the child. Although Salvadoran officials generally do not require written permission for non-Salvadoran minors traveling on U.S. or other non-Salvadoran passports, it would be prudent for the parents of minor children traveling on U.S. passports to provide similar documentation if both parents are not traveling with their children.

Safety and Security: Most travelers to El Salvador experience no safety or security problems, but the criminal threat in El Salvador is critical. Random and organized violent crime is endemic throughout El Salvador. U.S. citizens have not been singled out by reason of their nationality, but are subject to the same threat as all other persons in El Salvador.

Political or economic issues in the country may give rise to demonstrations, sit-ins or protests at any time or place, but these activities are most frequent in the capital or on its main access roads. U.S. citizens are cautioned to avoid areas where demonstrations are being held and to follow local news media reports or call the U.S. Embassy for up-to-date information. Information about demonstrations also is available as "Security Alerts" on the U.S. Embassy home page at http://elsalvador.usembassy.gov.

Many Salvadorans are armed, and shootouts are not uncommon. Foreigners, however, may not carry guns even for their own protection without first procuring a firearms license from Salvadoran officials. Failure to do so will result in detention and confiscation of the firearm, even if it is licensed in the United States.

Armed holdups of vehicles traveling on El Salvador's roads appear to be increasing, and U.S. citizens have been victims in various incidents. In one robbery, an American family was stopped by gunmen while driving on the Pan American highway in Santa Ana Department in daylight. In another incident, an American citizen passenger was robbed after the van in which she was riding was carjacked by armed men. The van was stopped at a traffic light on the busy road between Comalapa International Airport and San Salvador shortly after dark.

Strong undertows and currents can make swimming short distances from El Salvador's Pacific coast beaches extremely dangerous for even strong and experienced swimmers. As an example of this hazard, during a single seven-day holiday period, nine Salvadoran citizens drowned while swimming at Pacific beaches. In one month alone, three U.S. citizens drowned while swimming at Pacific beaches in La Libertad and La Paz Departments.

For the latest security information, Americans traveling abroad should regularly monitor the Department of State, Bureau of Consular Affair's Internet site at http://travel.state.gov, where the current Travel Warnings and Travel Alerts, including the Worldwide Caution Travel Alert, can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S., or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: The U.S. Embassy considers El Salvador a critical crime-threat country. The homicide rate in the country increased 25 percent from 2004 to 2007, and El Salvador has

one of the highest homicide rates in the world. Violent crimes, as well as petty crimes are prevalent throughout El Salvador, and U.S. citizens have been among the victims. The Embassy is also aware that there has been at least one rape of an American minor and one attempted rape of an American adult in the past year. Travelers should avoid displaying or carrying valuables in public places. Passports and other important documents should not be left in private vehicles. Armed assaults and carjacking take place both in San Salvador and in the interior of the country, but are especially frequent on roads outside the capital where police patrols are scarce. Criminals have been known to follow travelers from the international airport to private residences or secluded stretches of road where they carry out assaults and robberies. Armed robbers are known to shoot if the vehicle does not come to a stop. Criminals often become violent quickly, especially when victims fail to cooperate immediately in surrendering valuables. Frequently, victims who argue with assailants or refuse to give up their valuables are shot. Kidnapping for ransom continues to occur, but has decreased in frequency since 2001. U.S. citizens in El Salvador should exercise caution at all times and practice good personal security procedures throughout their stay.

The U.S. Embassy warns its personnel to drive with their doors locked and windows raised, to avoid travel outside of major metropolitan areas after dark, and to avoid travel on unpaved roads at all times because of criminal assaults and lack of police and road service facilities. Travelers with conspicuous amounts of luggage, late-model cars or foreign license plates are particularly vulnerable to crime, even in the capital.

Travel on public transportation, especially buses, both within and outside the capital, is risky and not recommended. The Embassy advises official visitors to use radio-dispatched taxis or those stationed in front of major hotels.

U.S. citizens using banking services should be vigilant while conducting their financial exchanges either inside local banks or at automated teller machines. There have been several reports of armed robberies in which victims appear to have been followed from the bank after completing their transactions.

Visitors to El Salvador should use caution when climbing volcanoes or hiking in other remote locations. Armed robberies of climbers and hikers are common. Mine-removal efforts ceased several years ago, but land mines and unexploded ordnance in backcountry regions still pose a threat to off-road tourists, backpackers, and campers. The Embassy strongly recommends engaging the services of a local guide certified by the national or local tourist authority when hiking in backcountry areas, even when within the national parks.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the U.S. Embassy. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the U.S. Embassy for assistance. The Embassy staff can, for example, assist you to find appropriate medical care, contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of crime is solely the responsibility of local authorities, consular officers can help you understand the local criminal justice process and find an attorney if needed.

Victims of crime should bear in mind that law enforcement resources are limited and judicial processes are uneven in El Salvador. Many crimes in the country go unsolved and the likelihood for redress through the judicial system is limited.

Medical Facilities and Health Information: There are few private hospitals with an environment that would be acceptable to visiting Americans. The Embassy recommends that these hospitals be used only for emergency care, to stabilize a condition prior to returning to the U.S. for definitive evaluation and treatment. Private hospitals and physicians expect upfront payment (cash or, for hospitals, credit card) for all bills. Priority Ambulance (503-2264-7911) is the only ambulance service in San Salvador that has trained personnel and medical equipment to manage most emergencies. Not all medicines found in the U.S. are available in El Salvador. Medicines often have a different brand name and are frequently more expensive than in the U.S.

No specific vaccinations are required for entry into El Salvador from the United States. Travelers coming from countries where yellow fever is endemic must have had a yellow fever vaccination in order to enter the country. For more information visit El Salvador's Immigration web site at http://www.seguridad.gob.sv/Web-Seguridad/Migracion/migracion.htm.

Information on vaccinations and other health considerations, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's Internet site at http://wwwn.cdc.gov/travel.

For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation. It may be possible to purchase supplemental coverage for travel.

U.S. Medicare and Medicaid programs do not provide payment for medical services outside the United States. Separate insurance should be obtained for medical evacuation, as it

may cost in excess of $50,000. Many travel agents and private companies offer insurance plans that will cover health care expenses incurred overseas, including emergency medical services and even transportation of remains, in the event of death.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning El Salvador is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

Road conditions throughout El Salvador are not up to U.S. standards. However, the rebuilding of major roads following the earthquakes in 2001 is nearly completed. Mini-buses, buses, and taxis are often poorly maintained. Drivers are often not trained, and generally do not adhere to traffic rules and regulations. The U.S. Embassy recommends that its personnel avoid using mini-buses and buses, and use only taxis that are radio-dispatched or those stationed in front of major hotels. Robberies and assaults on buses are commonplace.

Because of inconsistent enforcement of traffic laws in El Salvador, safe drivers must make an extraordinary effort to drive defensively. Passing on blind corners is commonplace. Salvadoran law requires that the driver of a vehicle that injures or kills another person must be arrested and detained until a judge can determine responsibility for the accident. This law is uniformly enforced.

Visitors to El Salvador may drive on their U.S. license for up to thirty days. After that time, a visitor is required to obtain a Salvadoran license. Visit the web site of El Salvador's national tourist office and national authority responsible for road safety at http://www.elsalvadorturismo.gob.sv. Further information on traffic and road conditions is available in Spanish from Automovil Club de El Salvador, at telephone number 011-503-2221-0557 or via the Internet at http://www.aces.com.sv.

Aviation Safety Oversight: The U.S. Federal Aviation Administration (FAA) has assessed the Government of El Salvador as being in compliance with ICAO international aviation safety standards for oversight of El Salvador's air carrier operations. For more information, travelers may visit the FAA's web site at http://www.faa.gov.

Special Circumstances: Travelers intending to carry cell phones from the United States should check with their service provider to determine if the service will be available in El Salvador. Credit cards are acceptable for payment in many-but not all-retail stores and restaurants in major cities. Automatic teller machines with access to major U.S. bank networks are widely available in San Salvador, but less prevalent elsewhere in the country.

Disaster Preparedness: El Salvador is an earthquake-prone country. Flooding and landslides during the rainy season (June to November) also pose a risk. On October 4, 2005, the Government of El Salvador declared a nation-wide state of emergency following major flooding caused by a series of storms. More than 50 deaths were confirmed as attributed to landslides and flooding at that time and over 34,000 residents were evacuated to temporary shelter. The Llamatepec Volcano, located approximately 50 kilometers west of San Salvador, erupted briefly on October 1, 2005, casting rocks and volcanic ash onto neighboring regions and producing two confirmed deaths. General information about natural disaster preparedness is available via the Internet from the U.S. Federal Emergency Management Agency (FEMA) at http://www.fema.gov.

An earthquake measuring 7.6 on the Richter scale devastated much of El Salvador on January 13, 2001. A second earthquake on February 13, 2001, measured 6.6 on the Richter scale, and caused significant additional damage and loss of life. Reconstruction efforts are largely complete and the country has returned to normal. Additional information in Spanish about earthquakes (sismos) in El Salvador can be found on the Government of El Salvador's web page at http://www.snet.gob.sv.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offences. Persons violating El Salvador laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in El Salvador are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Guns: El Salvador has strict laws requiring a locally obtained license to possess or carry a firearm in the country. The Embassy strongly advises persons without a Salvadoran firearms license not to bring guns into the country or use a firearm while in El Salvador. During a three-month period in 2006, three U.S. citizens were arrested in separate incidents for firearms violations. In each instance, the individuals complied with airline procedures, declared the firearm on a Customs form upon arrival at El Salvador's Comalapa International Airport, and were allowed to depart the airport without hindrance. However, when the individuals returned to the airport and declared the weapons to airline employees, they were arrested by Salvadoran police, not for violating aviation regulations but for having carried an unlicensed firearm while in El Salvador. The Embassy cannot intervene in the judicial process when a U.S. citizen is charged with a firearms violation. Conviction for possessing an unlicensed firearm can carry a prison sentence of three-to-five years.

Children's Issues: For information on intercountry adoption of children

and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in El Salvador are encouraged to register with the U.S. Embassy through the State Department's travel registration web site, and to obtain updated information on travel and security within El Salvador. Americans without Internet access may register directly with the Embassy. By registering, American citizens make it easier for the Embassy to contact them in case of emergency.

The Consular Section of the U.S. Embassy in San Salvador is located at Final Boulevard Santa Elena Sur, Urbanizacion Santa Elena, Antiguo Cuscatlan, La Libertad, telephone 011-503-2501-2999, fax 011-503-2278-5522, e-mail: CongenSansal@state.gov. The Embassy's web site can be accessed at http://sansalvador.usembassy.gov. The Consular Section is open for U.S. citizens' services from 8:15 a.m. to 11:30 a.m. weekdays, excluding U.S. and Salvadoran holidays. After business hours, the Embassy can be contacted by telephone at 011-503-2501-2316 or 011-503-2501-2253.

For any questions concerning U.S. visas for either temporary travel to or permanent residence in the U.S., please contact our regional U.S. Visa Information Center. From El Salvador, the Visa Information Center may be reached by calling 900-6011 from any landline operated by Telecomm, or by purchasing a VISAS-USA calling card from any location that sells Telefonica phone cards. Calling instructions are on the back of the card. Calls using the 900 number cost approximately $2.15 per minute and will be charged to the caller's telephone bill. The Telefonica phone card costs $15.00 and permits a seven-minute call. From the U.S., the Visa Information Center can be contacted by dialing 866-730-2089 and charging the call to a Visa or MasterCard credit card.

Intercountry Adoption

August 2008

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is based on public sources and our current understanding. Questions involving foreign and U.S. immigration laws and legal interpretation should be addressed respectively to qualified foreign or U.S. legal counsel.

The Hague Convention on Intercountry Adoption: The Hague Convention on Intercountry Adoption, to which the United States became a party on April 1, 2008, establishes legal and regulatory requirements for intercountry adoption. El Salvador is a party to The Hague Convention on Protection of Children and Co-operation in Respect of Intercountry Adoption (the Convention) and with which the Convention is in force for the United States.

Patterns of Immigration: Please review current reports online at http://adoption.state.gov.

Adoption Authorities: Several Salvadoran governmental bodies are involved in the adoption process. These include the Family Courts, the Procuraduría General de la República (PGR or Public Defender's Office) and The Salvadoran Institute for the Development of Children and Adolescents (ISNA).

The PGR is responsible for family welfare law in El Salvador. ISNA is also responsible for the care of orphans and other children in government custody. Representatives from ISNA and the PGR oversee intercountry adoptions in El Salvador's adoption central authority, called the Oficina Para Adopciones (Office for Adoptions or OPA). Information regarding Salvadoran laws and procedures for the purposes of adoption may be obtained by contacting:

Oficina Para Adopciones
Coordinador OPA
Procuraduría General
de la República
9ª. Calle Poniente y 13 Ave.
Norte, Torre PGR,
Centro de Gobierno
San Salvador, El Salvador
Phone (503) 2231-9418–2231-9424 or 2231-9412

Eligibility Requirements for Adoptive Parents: Foreign, married couples wishing to adopt in El Salvador must both be over 25 years of age and be married for at least 5 years and the elder spouse must be at least 25 years of age.

There must be a minimum of 15 years difference in age between the adopting parents and the child. Parents adopting a child under one year of age cannot be older than 45. Single individual may adopt in El Salvador if they are at least 25 years old and at least 15 years older than the child to be adopted. Prospective parents must demonstrate that they are financially, morally, mentally, and physically able to provide for the adopted child. Each applicant for adoption in El Salvador must also provide documentation that includes, but is not limited to, the following:

- birth certificate;
- marriage certificate;
- criminal background check;
- evidence of the adopting parents' financial situation;
- health certificates for the adopting parents, and the child to be adopted;
- home and psychological studies by an authorized state agency addressing family relations, moral attitudes, social behavior, finances, and the physical and psychological health conditions of the adopting parents (the family

must also provide photos of the exterior and interior of their home);

- certification from the adoptive parents' state of residence stating that they meet the legal requirements to adopt and that the state will monitor the welfare of the child after adoption;
- proof of legal residence in the country of intended residence, as well as certified copies of the adopting parents' passports;
- a statement identifying who will be responsible for the adopted child in the absence of the adoptive parents due to illness, disability or death; and
- certified copies of the birth and health certificates of any biological or adopted children of the adopting parents.

Residency Requirements: Under Article 176 of the Salvadoran Family Code, adoptive parents who wish to adopt a particular child who is not related to them must be prepared to reside with the child in El Salvador for at least one year prior to finalization of the adoption. To satisfy this requirement, the adoptive parent(s) must be appointed the foster parent(s) of the child by ISNA prior to the beginning of the one year co-residency.

Although personnel at the U.S. Embassy in San Salvador are familiar with some cases in which this requirement was not applied, the Government of El Salvador is now enforcing the co-residency requirement in most cases involving the adoption of a particular child. U.S. citizen missionaries, Peace Corps Volunteers, contract employees and other relatively long-term residents in El Salvador are not exempted from the one year co-residency requirement as a formally decreed foster parent.

Time Frame: Salvadoran adoption procedures can take 18 to 36 months to complete. This does not include the time necessary for the U.S. Embassy to complete its own investigation, as required by immigration regulations. Because adoption fraud in El Salvador has taken a variety of forms, an investigation of each adoption is necessary to ensure that the child is an orphan, as defined by U.S. immigration law, and that the birth mother is aware that the child is being adopted irrevocably and will be taken from the country. Investigation times vary depending upon the complexity of each case.

Adoption Agencies and Attorneys: Prospective adoptive parents are advised to fully research any adoption agency or facilitator they plan to use for adoption services. Because El Salvador is a Convention country, adoption services must be provided by an accredited agency, temporarily accredited agency, approved person, supervised provider, or exempted provider. It is essential that prospective adoptive parent(s) seeking to adopt from a Convention country use an accredited adoption service provider. The list of accredited adoption service providers is also provided on the website of The Hague Permanent Bureau at www.hcch.net.

Adoption Fees: The U.S. Embassy in El Salvador discourages the payment of any fees that are not properly receipted, "donations," or "expediting" fees, that may be requested from prospective adoptive parents. Such fees have the appearance of " "buying" a baby and put all future adoptions in El Salvador at risk.

The costs of adopting a Salvadoran child and taking him or her to the United States can vary considerably, depending primarily on the length of time required to complete the adoption process and the fees charged by Salvadoran attorneys.

The costs listed below are neither comprehensive nor unchanging but are provided to give prospective adopting parents a general idea of the financial outlays required.

- Salvadoran Attorney's Fee: typically $3,000–$10,000
- Medical Examination for the Child: $250–$600 (includes vaccinations for all children and x-rays for children between 14 and 16 years of age)
- U.S. Immigrant Visa Fee: $400
- Salvadoran passport fee: $10
- Photos for U.S. Immigrant Visa: $5
- Room for two adults for one night at the Hilton Princess or Sheraton Presidente Hotel: approximately $170

(While the Salvadoran government charges no fees for the services it provides in the adoption process, municipal and other authorities do charge for the documents and services they provide. These fees typically are included in the Salvadoran lawyer's fee. The prospective adopting parents should confirm with their Salvadoran attorney whether the attorney's fees will cover these additional costs.)

Adoption Procedures: Salvadoran law states that a child under 18 years of age may be eligible for intercountry adoption if the child is abandoned or orphaned and a family court determines that the adoption is in the best interest of the child. Salvadoran law also permits the adoption of a child over 18 who is under the care of a parent or relatives if a court determines the adoption is in the child's best interest. However, prospective adopting parents should bear in mind that foreign adoptions of children over 16 years of age are not valid for immigration purpose for the U.S. Foreign adoptive parents must formally adopt Salvadoran children in El Salvador, in accordance with Salvadoran laws and procedures, before taking the children out of the country to live. The Supreme Court of El Salvador advises that the granting of guardianships to prospective foreign adoptive parents for the purpose of allowing children to leave El Salvador for subsequent adoption abroad is prohibited. OPA investigates the circumstances of an orphaned or neglected child's family and seeks to find a close relative who may be will-

ing to care for the child. Once satisfied that adoption is in the child's best interest, OPA determines which prospective adoptive parents are suitable matches for the child.

A committee composed of representatives of the Public Defender's Office, and ISNA then determines whether a specific child may be adopted by a particular set of parents. Once the committee makes an affirmative decision, the Public Defender signs the approved adoption petition. The case then goes to a Salvadoran judge, who rules on whether or not the court will issue a final adoption decree. In order for the adopted child to be eligible for a U.S. immigrant visa, the adoptive parents must obtain this decree.

Once the court issues a final adoption decree, municipal authorities in the town where the child's birth was registered cancel the original birth certificate and issue a new birth certificate naming the adoptive parents as the child's parents. The new birth certificate becomes part of a bound record book kept at the Alcaldia (city hall).

Required Documents: Each of the US Documents listed below must be either authenticated at a Salvadoran Embassy or a Salvadoran Consulate or apostilled by the competent authority of the adopting parents' country.

U.S. documents listed below must also be translated into Spanish by an individual appointed for that purpose by a Salvadoran notary public (as stipulated in Article 24 of the "Ley del Ejercicio Notarial de la Jurisdicción Voluntaria y de Otras Diligencias").

- Certified birth certificate for the adopting parents;
- Certified marriage certificate for the adopting parents;
- Police clearance from the adopting parents' municipality;
- Documentation of the adopting parents' financial situation (salary statements, bank accounts, etc.);
- Home study completed by an agency authorized to conduct such a study in the domicile of the parents. The home study completed for the I-600A/I-600 or I-800A/I-800 will fulfill this requirement;
- Health certificate for the adopting parents;
- Certification issued by the adoptive parents' state Department of Health and Human Services, or institution for the protection of children, or an equivalent public entity stating that the adopting parents meet the legal requirements of that state to adopt and that the state will monitor the welfare of the child after adoption;
- The adoptive parents must submit a statement identifying who will be responsible for the adopted child in the absence of the adoptive parents due to illness, disability or death;
- Certified copies of the adopting parents' passports;
- If the adopting parents have biological or adopted children, they must include certified copies of their birth and health certificates for each of them; and
- Photographs of the exterior and interior of the house of the adopting parents.

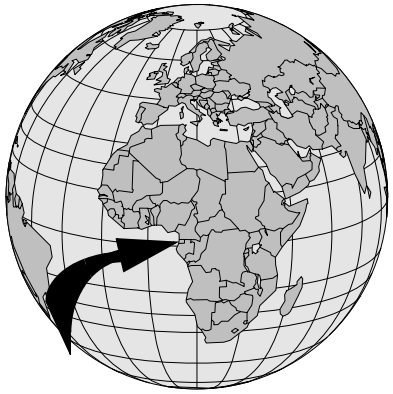
Salvadoran Documents:

- Photocopy of the identity card and certified birth certificate of the Salvadoran attorney;
- Health certificate for the child to be adopted;
- Photographs of the adopting parents, adopted child, attorney; and
- Power of attorney for a specified Salvadoran lawyer to represent the adopting parents. This power of attorney must be executed before a Salvadoran notary public or by a Salvadoran Consul at a Salvadoran Embassy or Consulate. The power of attorney must specifically authorize the attorney to perform all necessary steps in the adoption process from beginning to end before the Public Defender's Office (PGR) and the Salvadoran Institute for the Development of Children and Adolescents (ISNA). Including, but not limited to: the power to initiate judicial proceedings before a family court and having jurisdiction over the habitual residence of the adoptee. The power of attorney must also authorize the attorney to perform the registration of the corresponding adoption certificate and migration and visa paperwork of the minor once the adoption is approved.

The designated Salvadoran lawyer must present two files of all the documentation, (one with the originals and the other with copies certified by the above mentioned appropriate Salvadoran notary public. If the files exceed two hundred pages, both files must be divided in halves with a closing and opening statement from the notary attached to the divided files. The Salvadoran attorney must comply with the requirements stipulated in Article 42 of the Salvadoran Family Code of Proceedings.

Embassy of El Salvador
Consular Section
1400 16th Street, Suite 100, N.W.
Washington, D.C., 20036
Tel: (202) 595-7500
Fax: (202) 232 3763
Email: correo@elsalvador.org
http://www.rree.gob.sv/sitio/sitiowebrree.nsf/pages/sembajadasconsulados_norteamerica

Salvadoran Consulates are established in the following metropolitan areas: Atlanta, Boston, Chicago, Dallas, Elizabeth (NJ), Houston, Las Vegas, Los Angeles, Santa Ana-California, Woodbridge-Virginia, Duluth-Georgia, Miami, New York, Long Island-New York, Nogales (AZ), San Francisco, and Washington, D.C. Contact information for these consulates can be found at the web site listed above.



U.S. Immigration Requirements: As of April 1, 2008, U.S. citizens wishing to adopt in a Convention country must begin the process by filing with the U.S. Citizenship and Immigration Services (USCIS) a form I-800A *Application for Determination of Suitability to Adopt a Child from a Convention Country*. Prospective adoptive parents are strongly encouraged to consult the Department of Homeland Security, USCIS website (www.uscis.gov).

The U.S. Embassy in San Salvador is located at:

Final Boulevard y Urb. Santa Elena
Antiguo Cuscatlán, La Libertad
Tel. (outside the El Salvador): 011+503-2501-2999 within El Salvador: 2501-2999
Fax: (503) 2278-6020
E-mail: AdoptSanSal@state.gov

Additional Information: For information on intercountry adoption and international parental child abduction, and security information for U.S. citizens traveling abroad, call Toll Free 1-888-407-4747. This number is available from 8:00 a.m. to 8:00 p.m. EST/EDT, Monday through Friday (except U.S. federal holidays).

Callers who are unable to use toll-free numbers, such as those calling from overseas, may obtain information and assistance during these hours by calling 1-202-501-4444.

EQUATORIAL GUINEA

Compiled from the June 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Republic of Equatorial Guinea

PROFILE

Geography

Location: Western Africa, bordering the Bay of Biafra. Bordering nations—Cameroon, Gabon.

Area: 28,050 sq. km; slightly smaller than Maryland.

Cities: Capital—Malabo. Other cities—Bata (also capital of Littoral province on the mainland).

Terrain: Varies. Bioko Island is volcanic, with three major peaks of 9,876 feet, 7,416 feet and 6,885 feet. Behind the coastal plain, the mainland provinces are hilly at a level of approximately 2,000 feet, with some 4,000-foot peaks. Annobon Island is volcanic.

Climate: Tropical; always hot, humid. Bata on the mainland is somewhat drier and cooler.

People

Nationality: Noun—Equatorial Guinean(s), Equatoguinean(s) Adjective—Equatorial Guinean, Equatoguinean.

Population: (July 2008 est.) 616,459.

Annual growth rate: (2008 est.) 2.732%; (1975-2002) 2.8%.

Ethnic groups: The Fang ethnic group of the mainland constitutes the great majority of the population and dominates political life and business. The Bubi group comprises about 50,000 people living mainly in Bioko Island. The Annobonese on the island of Annobon are estimated at about 3,000 in number. The other three ethnic groups are found on the coast of Rio Muni and include the Ndowe and Kombe (about 3,000 each) and the Bujebas (about 2,000). The pygmy populations have long been integrated into the dominant Bantu-speaking cultures. Europeans number around 2,000, primarily Spanish and French. There is a thriving Lebanese community, other Arabs (primarily Egyptians), a large number of Filipinos, and a rapidly expanding Chinese presence.

Languages: Official—Spanish, French; other—pidgin English, Fang, Bubi, Ibo.

Religions: Nominally Christian and predominantly Roman Catholic; pagan practices.

Education: Primary school compulsory for ages 6-14. Attendance (2007 est.)—90%. Adult literacy (2005 est.)—87%.

Health: (2008 est.) Life expectancy—61.23 years. Infant mortality rate—83.75/1,000.

Government

Type: Nominally multi-party Republic with strong domination by the executive branch.

Independence: October 12, 1968 (from Spain).

Constitution: Approved by national referendum November 17, 1991; amended January 1995.

Government branches: Executive—President (Chief of State) and a Council of Ministers appointed by the president. Legislative—100-member Chamber of People's Representatives (members directly elected by universal suffrage to serve five-year terms). Judicial—Supreme Tribunal.

Political subdivisions: Seven provinces—Annobon, Bioko Norte, Bioko Sur, Centro Sur, Kie-Ntem, Littoral, Wele-Nzas.

Political parties: The ruling party is the Partido Democratico de Guinea Ecuatorial (PDGE), formed July 30, 1987. Numerous other parties were allowed to form in the early 1990s.

Suffrage: 18 years of age; universal adult.

Economy

GDP: (2007 est.) $10.4 billion.

Real GDP growth rate: (2007 est.) 9.1%.

Inflation rate: (2008 est. average) 5.5%.

Unemployment rate: (2007 est.) 8%.

Natural resources: Petroleum, natural gas, timber, small, unexploited deposits of gold, manganese, and uranium.

Agriculture: (2006 est.) 2.8% of GDP. Products—coffee, cocoa, rice, yams, cassava (tapioca), bananas,

palm oil nuts, manioc, livestock, and timber.

Industry: (2006 est.) 92.6% of GDP. Types—petroleum, fishing, saw milling, natural gas.

Services: (2006) 4.5% of GDP.

Trade: (2007 est.) Exports—$10.03 billion: hydrocarbons (97%), timber (2%), others (1%). Imports—$3.219 billion. Major trading partners—United States, Spain, China, Canada, France, United Kingdom, Cameroon, and Norway.

Currency: Communaute Financiere Africaine (CFA) Franc.

GEOGRAPHY

The Republic of Equatorial Guinea is located in west central Africa. Bioko Island lies about 40 kilometers (25 mi.) from Cameroon. Annobon Island lies about 595 kilometers (370 mi.) southwest of Bioko Island. The larger continental region of Rio Muni lies between Cameroon and Gabon on the mainland; it includes the islands of Corisco, Elobey Grande, Elobey Chico, and adjacent islets.

Bioko Island, called Fernando Po until the 1970s, is the largest island in the Gulf of Guinea—2,017 square kilometers (780 sq. mi.). It is shaped like a boot, with two large volcanic formations separated by a valley that bisects the island at its narrowest point. The 195-kilometer (120-mi.) coastline is steep and rugged in the south but lower and more accessible in the north, with excellent harbors at Malabo and Luba, and several scenic beaches between those towns.

On the continent, Rio Muni covers 26,003 square kilometers (10,040 sq. mi.). The coastal plain gives way to a succession of valleys separated by low hills and spurs of the Crystal Mountains. The Rio Benito (Mbini), which divides Rio Muni in half, is unnavigable except for a 20-kilometer stretch at its estuary. Temperatures and humidity in Rio Muni are generally lower than on Bioko Island.

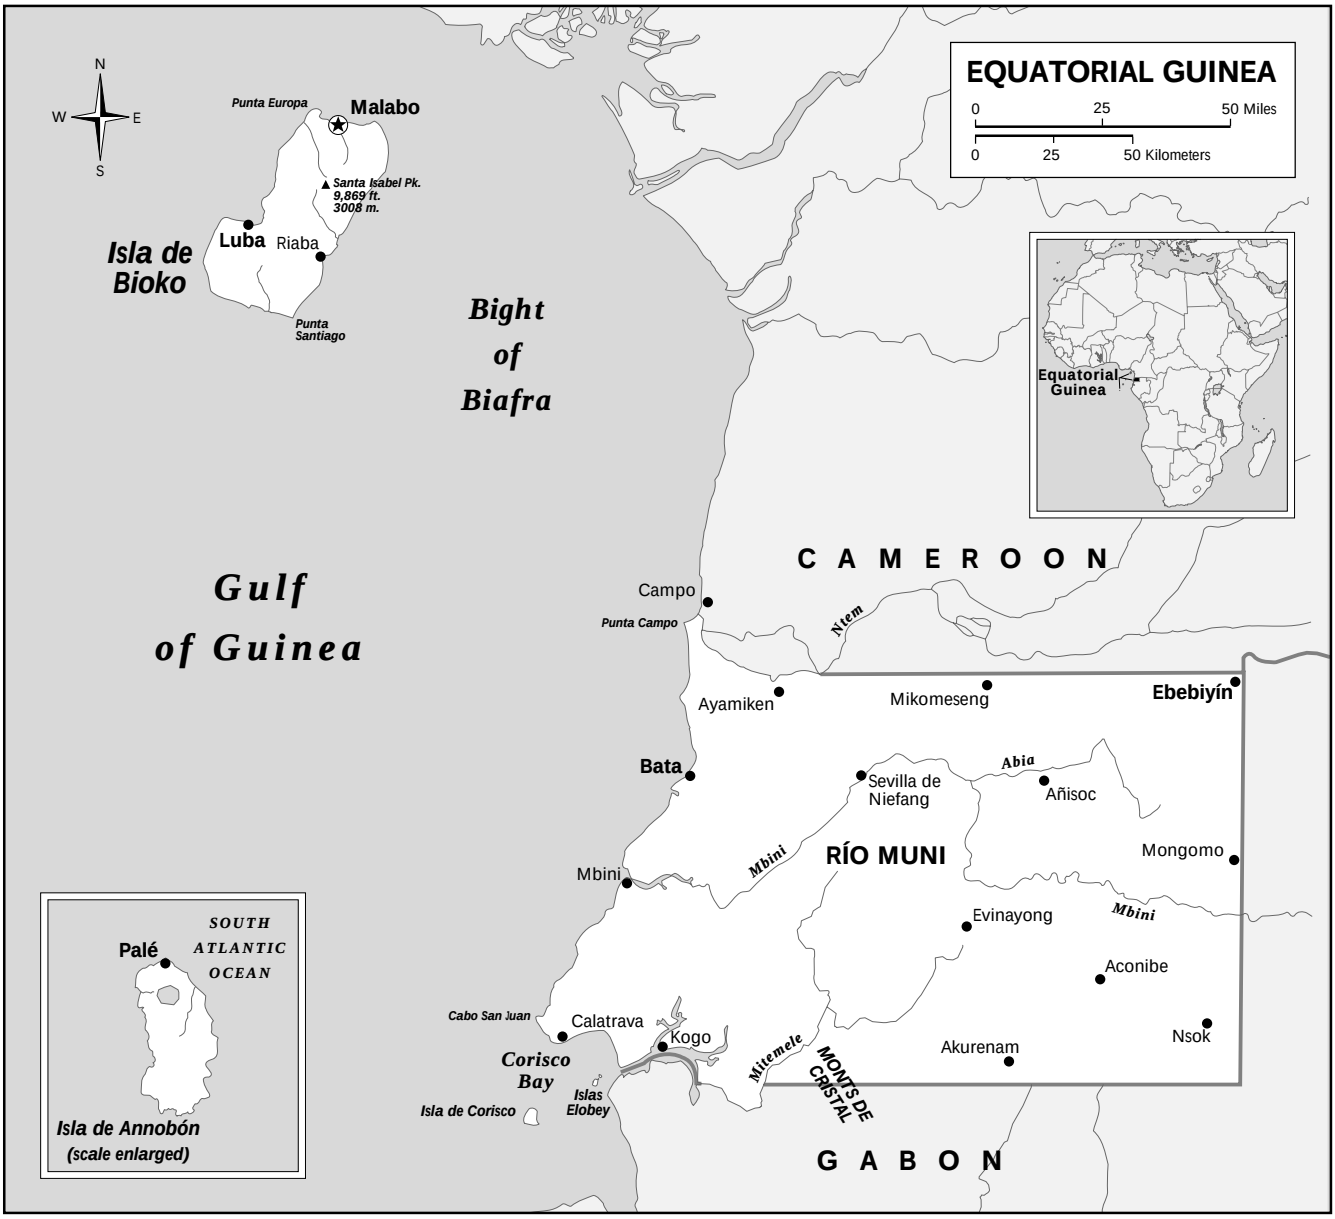
Annobon Island, named for its discovery on New Year's Day 1472, is a small volcanic island covering 18 square kilometers (7 sq. mi.). The coastline is abrupt except in the north; the principal volcanic cone contains a small lake. Most of the estimated 1,900 inhabitants are fisherman specializing in traditional, small-scale tuna fishing and whaling. The climate is tropical—heavy rainfall, high humidity, and frequent seasonal changes with violent windstorms.

PEOPLE

The majority of the Equatoguinean people are of Bantu origin. The largest tribe, the Fang, is indigenous to the mainland, but substantial migration to Bioko Island has resulted in Fang dominance over the earlier Bantu inhabitants. The Fang constitute 80% of the population and are themselves divided into 67 clans. Those in the northern part of Rio Muni speak Fang-Ntumu, while those in the south speak Fang-Okah; the two dialects are mutually unintelligible. The Bubi, who constitute 15% of the population, are indigenous to Bioko Island. In addition, there are coastal tribes, sometimes referred to as "Playeros," consisting of Ndowes, Bujebas, Balengues, and Bengas on the mainland and small islands, and "Fernandinos," a Creole community, on Bioko. Together, these groups comprise 5% of the population. There are also foreigners from neighboring Cameroon, Nigeria, and Gabon.

Spanish and French are both official languages, though use of Spanish predominates. The Roman Catholic Church has greatly influenced both religion and education.

Equatoguineans tend to have both a Spanish first name and an African first and last name. When written, the Spanish and African first names are followed by the father's first name (which becomes the principal surname) and the mother's first name. Thus people may have up to four names, with a different surname for each generation.



HISTORY

The first inhabitants of the region that is now Equatorial Guinea are believed to have been Pygmies, of whom only isolated pockets remain in northern Rio Muni. Bantu migrations between the 17th and 19th centuries brought the coastal tribes and later the Fang. Elements of the latter may have generated the Bubi, who immigrated to Bioko from Cameroon and Rio Muni in several waves and succeeded former Neolithic populations. The Annobon population, native to Angola, was introduced by the Portuguese via São Tomé.

The Portuguese explorer, Fernando Po (Fernao do Poo), seeking a route to India, is credited with having discovered the island of Bioko in 1471. He called it Formosa ("pretty flower"), but it quickly took on the name of its European discoverer. The Portuguese retained control until 1778, when the island, adjacent islets, and commercial rights to the mainland between the Niger and Ogoue Rivers were ceded to Spain in exchange for territory in South America (Treaty of Pardo). From 1827 to 1843, Britain established a base on the island to combat the slave trade. The Treaty of Paris settled conflicting claims to the mainland in 1900, and periodically, the mainland territories were united administratively under Spanish rule.

Spain lacked the wealth and the interest to develop an extensive economic infrastructure in what was commonly known as Spanish Guinea during the first half of this century. However, through a paternalistic system, particularly on Bioko Island, Spain developed large cacao plantations for which thousands of Nigerian workers were imported as laborers. At independence in 1968, largely as a result of this system, Equatorial Guinea had one of the highest per capita incomes in Africa. The Spanish also helped Equatorial Guinea achieve one of the continent's highest literacy rates and developed a good network of health care facilities.

In 1959, the Spanish territory of the Gulf of Guinea was established with

status similar to the provinces of metropolitan Spain. As the Spanish Equatorial Region, a governor general ruled it exercising military and civilian powers. The first local elections were held in 1959, and the first Equatoguinean representatives were seated in the Spanish parliament. Under the Basic Law of December 1963, limited autonomy was authorized under a joint legislative body for the territory's two provinces. The name of the country was changed to Equatorial Guinea. Although Spain's commissioner general had extensive powers, the Equatorial Guinean General Assembly had considerable initiative in formulating laws and regulations.

In March 1968, under pressure from Equatoguinean nationalists and the United Nations, Spain announced that it would grant independence to Equatorial Guinea. A constitutional convention produced an electoral law and draft constitution. In the presence of a UN observer team, a referendum was held on August 11, 1968, and 63% of the electorate voted in favor of the constitution, which provided for a government with a General Assembly and a Supreme Court with judges appointed by the president.

In September 1968, Francisco Macias Nguema was elected first president of Equatorial Guinea, and independence was granted in October. In July 1970, Macias created a single-party state and by May 1971, key portions of the constitution were abrogated. In 1972 Macias took complete control of the government and assumed the title of President-for-Life. The Macias regime was characterized by abandonment of all government functions

except internal security, which was accomplished by terror; this led to the death or exile of up to one-third of the country's population. Due to pilferage, ignorance, and neglect, the country's infrastructure—electrical, water, road, transportation, and health—fell into ruin. Religion was repressed, and education ceased. The private and public sectors of the economy were devastated. Nigerian contract laborers on Bioko, estimated to have been 60,000, left en masse in early 1976. The economy collapsed, and skilled citizens and foreigners left.

On August 3, 1979 the former director of the infamous Black Beach prison, Teodoro Obiang Nguema Mbasogo, led a successful coup d'etat; Macias was arrested, tried, and executed. Obiang assumed the Presidency in October 1979. Obiang initially ruled Equatorial Guinea with the assistance of a Supreme Military Council. A new constitution, drafted in 1982 with the help of the United Nations Commission on Human Rights, came into effect after a popular vote on August 15, 1982; the Council was abolished, and Obiang remained in the presidency for a 7-year term. He was reelected in 1989. In February 1996, he again won reelection with 98% of the vote; several opponents withdrew from the race, however, and international observers criticized the election. Subsequently, Obiang named a new cabinet, which included some opposition figures in minor portfolios.

Despite the formal ending of one-party rule in 1991, President Obiang and a circle of advisors (drawn largely from his own family and ethnic group) maintain real authority. The President names and dismisses cabinet members and judges, ratifies treaties, leads the armed forces, and has considerable authority in other areas. He appoints the governors of Equatorial Guinea's seven provinces. The opposition had few electoral successes in the 1990s. By early 2000, President Obiang's PDGE party fully dominated government at all levels. In December 2002, President Obiang won a new seven-year mandate with 97% of the vote. Reportedly, 95% of eligible voters voted in this election, although many observers noted numerous irregularities.

GOVERNMENT

The 1982 constitution gives the President extensive powers, including naming and dismissing members of the cabinet, making laws by decree, dissolving the Chamber of Representatives, negotiating and ratifying treaties and calling legislative elections. The President retains his role as commander in chief of the armed forces and maintains close supervision of military activity. In June 2004, the President reorganized the cabinet and created two new positions: Minister of National Security and Director of National Forces. The Prime Minister is appointed by the President and operates under powers designated by the President. The Prime Minister coordinates government activities.

The Chamber of Representatives is comprised of 100 members elected by direct suffrage for 5-year terms. In practice, the Chamber has not demonstrated independence, and it rarely acts without presidential approval or direction. National assembly elections were held in May 2008; 99 of the 100 seats went to the PDGE.

The President appoints the governors of the seven provinces. Each province is divided administratively into districts and municipalities. The internal administrative system falls under the Ministry of Interior and Territorial Administration; several other ministries are represented at the provincial and district levels.

The judicial system follows similar administrative levels. At the top are the President and his judicial advisors (the Supreme Court). In descending rank are the appeals courts, chief judges for the divisions, and local magistrates. Tribal laws and customs are honored in the formal court system when not in conflict with national law. The current court system, which often uses customary law, is a combination of traditional, civil, and military justice, and it operates in an ad hoc manner for lack of established procedures and experienced judicial personnel.

The other official branch of the government is the State Council. The State Council's main function is to serve as caretaker in case of death or physical incapacity of the President. It comprises the following ex officio members: the President of the Republic, the Prime Minister, the Minister of Defense, the President of the national assembly and the Chairman of the Social and Economic Council.

Although the abuses and atrocities that characterized the Macias years have been eliminated, the government continues to be dominated by the presidency. Religious freedom is tolerated.

Principal Government Officials

Last Updated: 11/12/08

Pres.: **Teodoro OBIANG Nguema Mbasogo, Brig. Gen. (ret.)**
Prime Min.: **Ricardo MANGUE Obama Nfube**
First Vice Prime Min. in Charge of Human Rights: **Aniceto EBIAKA Mohote**
Second Vice Prime Min. in Charge of the Interior: **Demetrio ELO Ndong Nsefumu**
Sec. Gen. of the Govt. in Charge of Admin. Coordination: **Fortunado OFA Mbo**
Min. of Agriculture & Forests: **Teodoro Nguema OBIANG Mangu**
Min. of Civil Service & Admin. Planning: **Vincente Eate TOMI**
Min. of Economy, Commerce, & Promotion: **Jaime Ela NDONG**
Min. of Education, Science, & Sports: **Cristobal Menana ELA**
Min. of Finance & Budget: **Mercelino Owono EDU**
Min. of Fishing & the Environment: **Vincente Rodriguez SIOSA**
Min. of Foreign Affairs, Intl. Cooperation, & Francophone Affairs: **Pastor Micha ONDO BILE**
Min. of Health: **Antonio Martin NDONG Ntutumu**
Min. of Information, Culture, Tourism, & Govt. Spokesman: **Santiago NSOBEYA Efuman Nchama**
Min. of Infrastructure & Urban Planning: **Fidel NSUE Micha**
Min. of Integration: **Baltasar Engonga EDJO**

Min. of Interior & Local Corporations: **Clemente ENGONGA Nguema Onguene**
Min. of Justice, Culture, & Penitentiary Institutions: **Mauricio BOKUNG Asumu**
Min. of Labor & Social Security: **Evangelina OYO Ebule**
Min. of Mines, Industry, & Energy: **Antanasio ELA Ntugu Nsa**
Min. of National Defense: **Antonio MBA Nguema, Gen.**
Min. of National Security: **Manuel Nguema MBA Ma Mba, Col.**
Min. of Mines, Industry, & Energy: **Antanasio Ela NTUGU Nsa**
Min. of Planning, Economic Development, & Public Investment: **Jose ELA Oyana**
Min. of Social Affairs & the Promotion of Women: **Eulalia ENVO Bela**
Min. of Transportation, Technology, & Posts & Telecommunications: **Demetrio Elo Ndong NSEFUMU**
Min. at the Presidency in Charge of Missions: **Alejandro EVUNA Owono Asangono**
Min. at the Presidency in Charge of Political Affairs & Admin.: **Carmelo MODU Acuse Bindang**
Min. at the Presidency in Charge of Information, Culture, & Tourism: **Alfonso NSUE Mokuy**
Min. in Charge of Relations With Parliament: **Angel MASIE Mibuy**
Ambassador to the US: **Purificacion Angue ONDO**
Permanent Representative to the UN, New York: **Lino Sima Ekua AVOMO**

Equatorial Guinea maintains an embassy at 2020 16th Street NW, Washington, DC 20009 (Tel. (202) 518-5700, Fax. (202) 518-5252). Its mission to the United Nations is at 801 Second Avenue, Suite 1403, New York, N.W. 10017 (Tel. 212-599-1523).

POLITICAL CONDITIONS

In the period following Spain's grant of local autonomy to Equatorial Guinea in 1963, there was a great deal of political party activity. Bubi and Fernandino parties on the island preferred separation from Rio Muni or a loose federation. Ethnically based parties in Rio Muni favored independence for a united country comprising Bioko and Rio Muni, an approach that ultimately won out. (The Movimiento para la Auto-determinacion de la Isla de Bioko (MAIB) which advocates independence for the island under Bubi control, is one of the offshoots of the era immediately preceding independence). After the accession of Macias to power, political activity largely ceased in Equatorial Guinea. Opposition figures who lived among the exile communities in Spain and elsewhere agitated for reforms; some of them had been employed in the Macias and Obiang governments. After political activities in Equatorial Guinea were legalized in the early 1990s, some opposition leaders returned, but repressive actions have continued sporadically.

The country's first freely contested municipal elections were held in September 1995. Most observers agree that the elections themselves were relatively free and transparent and that the opposition parties garnered between two-thirds and three-quarters of the total vote. The government, however, delayed announcement of the results and then claimed a highly dubious 52% victory overall and the capture of 19 of 27 municipal councils. In early January 1996 Obiang called for presidential elections. International observers agreed that the campaign was marred by fraud, and most of the opposition candidates withdrew in the final week. Obiang claimed re-election with 98% of the vote. In an attempt to mollify his critics, Obiang gave minor portfolios in his cabinet to people identified as opposition figures. In the legislative election in March 1999, the party increased its majority in the 80-seat parliament from 68 to 75. The main opposition parties refused the seats they had allegedly won. In May 2000, the ruling PDGE overwhelmed its rivals in local elections. Opposition parties rejected the next election, the December 2002 Presidential election, as invalid. During this election, President Obiang was re-elected with 97% of the vote. Following his re-election Obiang formed a government based on national unity encompassing all opposition parties, except for the CPDS, which declined to join after Obiang refused to release one of their jailed leaders.

In April 2004, parliamentary and municipal elections took place. President Obiang's Democratic Party of Equatorial Guinea (PDGE) and allied parties won 98 of 100 seats in parliament and all but seven of 244 municipal posts. International observers criticized both the election and its results.

While President Obiang's rule, in which schools reopened, primary education expanded, and public utilities and roads restored, compares favorably with Macias' tyranny and terror, it has been criticized for not implementing genuine democratic reforms. Corruption and a dysfunctional judicial system disrupt the development of Equatorial Guinea's economy and society. In 2004, the President appointed a new Prime Minister, Miguel Abia Biteo, and replaced several ministers; however, the government budget still did not include all revenues and expenditures. The United Nations Development Program proposed a broad governance reform program, but the Equatoguinean Government was not moving rapidly to implement it. In August 2006 a new Prime Minister, Ricardo Mangue, was named and the pace of reform accelerated.

On May 4, 2008, legislative elections resulted in an overwhelming victory for the PDGE. Ninety-nine of the 100 seats in the assembly went to the PDGE while the opposition party, the Convergence for Social Democracy (CPDS), only received one. (This is one less seat than the 2004 elections that granted the CPDS two seats.) Results were similar in the municipal elections held the same day, granting PDGE 319 councillor seats while CPDS only gained 13. International elections observers reported that the elections were generally conducted in a free and fair manner. Nevertheless, irregularities were reported, which included the barring of certain members of the international press.

In March 2004, Zimbabwean police in Harare impounded a plane from South Africa with 64 alleged mercenaries on board. The group said they were providing security for a mine in Democratic Republic of the Congo,

but a couple of days later an Equatorial Guinean minister said they had detained 15 more men who he claimed were the advance party for the group captured in Zimbabwe. Nick du Toit, the leader of the group of South Africans, Armenians and one German, in Equatorial Guinea, said at his trial in Equatorial Guinea that he was playing a limited role in a coup bid organized by Simon Mann, the alleged leader of the group held in Zimbabwe, to remove Obiang from power and install an exiled opposition politician, Severo Moto.

In September 2004, Mann was sentenced to seven years in jail in Zimbabwe after being convicted of illegally trying to buy weapons. In subsequent legal proceedings, three Equatoguineans and three South Africans were acquitted. In June 2005, President Obiang granted amnesty to the six Armenian pilots. In Harare, Mann obtained a reduced sentence based on good behavior in late 2007. Zimbabwe consented to Equatorial Guinea's extradition request and flew Mann to Malabo in early 2008. His trial began in June 2008. During the trail he reportedly confessed to the attempted coup, implicating Severo Moto, Sir Mark Thatcher, and Ely Calil, a nationalized British citizen of Lebanese ancestry with connections to Nigeria. Mann has been allowed visits by western media and family members.

Although Equatorial Guinea lacks a well-established democratic tradition, it has broken with the anarchic, chaotic, brutal, and repressive pattern of the Macias years and is improving its human rights and political performance. On June 5, 2008 President Obiang granted amnesty to 37 political prisoners, and the government has indicated a willingness to grant amnesty to other political prisoners. In addition, the country is undertaking an ambitious, multi-billion dollar development program that is improving the quality of life and providing opportunities for employment for its citizens. Equatorial Guinea also is a candidate for membership in the Extractive Industries Transparency Initiative (EITI), which aims to strengthen governance by improving transparency and accountability in the oil, gas, and minerals sector. The country is engaging with the EITI Secretariat to meet the requirements of EITI membership.

ECONOMY

Oil and gas exports have increased substantially and will drive the economy for years to come. Real GDP growth was 9.1% in 2007 (est.). Per capita income rose from about $590 in 1998 to $2,000 in 2000, $5,300 in 2004, and approximately $10,000 in 2007. The energy export sector is responsible for this rapid growth, and recorded even bigger gains in 2007 with a new, state-of-the-art liquefied natural gas (LNG) production and shipping facility coming on line in 2007. Oil production increased from 81,000 barrels per day (bbl/d) in 1998 to approximately 500,000 bbl/d equivalent by the end of 2007. Exploration efforts continue in search of further potential offshore concessions, and promising discoveries were announced in late 2007.

Equatorial Guinea has other resources, including its tropical climate, fertile soils, rich expanses of water, deepwater ports, and reserves of unskilled labor. However, its hydrocarbon riches dwarf all other economic activity. The government is actively seeking to diversify the economy by encouraging agriculture, tourism, and fishing. The ongoing construction boom is also enhancing related skills. The once-significant economic mainstays of the colonial era—cocoa, coffee, and timber—are also receiving attention, though they remain miniscule in comparison to the energy sector.

Equatorial Guinea's economic policies comprise an open investment regime. Qualitative restrictions on imports, non-tariff protection, and many import licensing requirements were lifted in 1992 when the government adopted a public investment program endorsed by the World Bank. The Government of Equatorial Guinea has sold some state enterprises. It is attempting to create a more favorable investment climate, and its investment code contains numerous incentives for job creation, training, promotion of nontraditional exports, support of development projects and indigenous capital participation, freedom for repatriation of profits, exemption from certain taxes and capital, and other benefits. Trade regulations have been further liberalized since Central African Economic and Monetary Union (CEMAC) reform codes in 1994. This included elimination of quota restrictions and reductions in the range and amounts of tariffs. The CEMAC countries agreed to the introduction of a value added tax (VAT) in 1999.

While business laws promote a liberalized economy, the business climate remains difficult. Application of the laws remains selective. Corruption among officials is widespread, and many business deals are concluded under nontransparent circumstances. A wage law now regulates separate wage levels for the petroleum, private, and government sector.

There is little industry in the country, and the local market for industrial products is small. The government seeks to expand the role of free enterprise and to promote foreign investment but has had little success in creating an atmosphere conducive to investor interest.

The Equatoguinean budget has grown enormously in the past 5 years as royalties and taxes on foreign company oil and gas production have provided new resources to a once poor government. The 2007 government revenue was about $7 billion. Oil revenues account for more than 81% of government revenue. Value Added Tax and trade taxes are other large revenue sources for the government.

The Equatoguinean Government has undertaken a number of reforms since 1991 to reduce its predominant role in the economy and promote private sector development. Its role is a diminishing one, although many government interactions with the private sector are at times capricious. Beginning in early 1997, the govern-

ment initiated efforts to attract significant private sector involvement through cooperative efforts with the Corporate Council on Africa visit and numerous ministerial efforts. In 1998, the government privatized distribution of petroleum products. There are now Total and Mobil stations in the country. The maritime border with Nigeria was settled in 2000, allowing Equatorial Guinea to continue exploitation of its oil fields. In October 2002, the government launched a national oil company, GEPetrol, under the Ministry of Mines and Hydrocarbons. The government is anxious for greater U.S. investment, and the aforementioned new Marathon LNG production refinery was the biggest new step in that direction for 2007. Much more is on the way, as U.S. hydrocarbon producers have announced $7 billion in new investments, starting in 2008. In addition, China has recently won exploration and drilling rights in a new offshore block, and will begin operations soon.

The government has expressed interest in privatizing the outmoded electricity utility. Several ports and a new terminal were built to accommodate the needs of the oil industry. A French company operates cellular telephone service in cooperation with a state enterprise, though the sector was opened to competition in 2007.

Equatorial Guinea's balance-of-payments situation has improved substantially since the mid-1990s because of new oil and gas production and favorable world energy prices. Exports totaled $8.1 billion in 2006. Crude oil exports now annually accounts for more than 94% of export earnings. Timber exports, by contrast, now represent only about 2% of export revenues. Imports into Equatorial Guinea also are growing very quickly. Imports totaled $4.3 billion in 2006.

Equatorial Guinea in the 1980s and 1990s received foreign assistance from numerous bilateral and multilateral donors, including European countries, the United States, and the World Bank. Many of these aid programs have ceased altogether or have diminished. Spain, France, and the European Union continue to provide some project assistance, as do China and Cuba. The government also has discussed working with World Bank assistance to develop government administrative capacity.

Equatorial Guinea operated under an International Monetary Fund-negotiated Enhanced Structural Adjustment Facility (ESAF) until 1996. Since then, there have been no formal agreements or arrangements. However, since 1996, the IMF has held regular held Article IV consultations (periodic country evaluations). After the 2003 consultations, IMF directors stressed the need for further improvements in governance and transparency, the attainment of a sustainable fiscal position, implementation of structural reforms to bolster the non-oil sector, the development of a transparent framework for saving and managing part of the country's oil wealth, and a comprehensive effort to reduce poverty. In 2007, the government undertook a multi-million dollar Social Development Fund project, which engaged U.S. Agency for International Development (USAID) expertise and regulation, to improve the quality of life and raise standards in education and health care.

Trade and Investment

With investments estimated at over $12 billion, the United States is the largest cumulative bilateral foreign investor in Equatorial Guinea. In 2003, 74% of U.S. exports to Equatorial Guinea consisted of energy sector-related transportation and machinery equipment. The United States' main import from Equatorial Guinea is petroleum (99% of imports in 2003). In 1999, the European Union (EU) imported $281.7 million in goods from Equatorial Guinea, 89% of which was petroleum and 7% timber. The European Union exported $104 million to Equatorial Guinea. Approximately 20% of these exports were oil and gas-related, and the remaining 80% ranged from agricultural products to clothing to used cars.

Infrastructure

Infrastructure has improved dramatically in the last few years. Numerous, large-scale infrastructure investments have recently been completed or are underway. Surface transport options are increasing as the government has invested heavily in road pavement projects. In 2002, the African Development Bank and the European Union co-financed two projects to improve the paved roads from Malabo to Luba and Riaba; and to build an interstate road network to link Equatorial Guinea to Cameroon and Gabon. A Chinese construction company is completing a project to link Mongomo to Bata, both cities on the mainland. In November 2003, the government announced an ambitious ten-project program to upgrade the country's road network and improve the airport facilities at Bata, the country's second city (on the mainland). These projects have since been completed and additional airport expansion and new-city corridors are now under construction.

Equatorial Guinea's electricity sector is owned and operated by the state-run monopoly, SEGESA. Equatorial Guinea's electricity generating capacity is now more than adequate to meet demand on both the continent and the island of Bioko, although the power supply is unreliable. The country's distribution network remains incapable of delivering reliable electricity to end users, due to aging equipment and poor management, as demonstrated by regular blackouts in Malabo. As a result, small diesel generators are widely used as a back-up power source. A project to modernize the grid is underway, with scheduled completion by 2010. Equatorial Guinea is estimated to have 2,600 megawatts (MW) of hydropower potential.

Potable water is available in the major towns but is not always reliable because of poor maintenance and aging infrastructure; consequently, supply interruptions are frequent and prolonged in some neighborhoods. A major project upgrading the public water system is also underway, with the cities of Malabo and Bata expecting completion in 2009. Some

villages and rural areas are equipped with generators and water pumps, usually owned by private individuals.

Telecommunications have improved dramatically in recent years. Parastatal Getesa, a joint venture with a 40% ownership stake held by France Telecom, provides telephone service in the major cities through an efficient, digital fixed network and good mobile coverage. Getesa's fixed-line service has 20,000 subscribers and the mobile service is used by over 200,000. Internet is widely available and access is increasing, providing improved access to information.

Equatorial Guinea has two of the deepest Atlantic seaports of the region, including the main business and commercial port city of Bata. The ports of both Malabo and Bata have been severely overextended. A half-billion dollar renovation project for the Port of Malabo is nearing completion, and a renovation of the Bata port scheduled to begin in 2008. In partnership with the U.S. petroleum company Amerada Hess, the British company Incat made significant progress in a project to renovate and expand Luba, the country's third-largest port, located on Bioko Island. Luba has become a major transportation hub for offshore oil and gas companies operating in the Gulf of Guinea. Luba is located some 50 kilometers from Malabo and was previously virtually inactive except for minor fishing activities and occasional use to ease congestion in Malabo.

The influx of oil workers has increased international air activity. Major international carriers now connect Malabo to the European cities of Amsterdam, Paris, Madrid, and Zurich. A weekly business-class charter flight was providing service to Houston, Texas. The runway at Malabo's international airport (3,200 meters) is equipped with lights and can service Boeing 747s. The runway at Bata (2,400 meters) does not currently operate at night but can accommodate aircraft as large as B737s. Bata is undergoing an upgrade with runway extension and expansion. Two minor airstrips (800 meters) are located at Mongomo and on the island of Annobon. Air service between the island and continental territories is restricted to 5 small airlines. In March 2006 the European Union blacklisted airlines based in Equatorial Guinea from flying into the EU. A project to gain International Civil Aviation Organization (ICAO) accreditation for various parts of the airline industry is underway.

Energy Developments

Equatorial Guinea is now the third-largest producer of crude oil in sub-Saharan Africa, after Nigeria and Angola. Equatorial Guinea's oil reserves are located mainly in the hydrocarbon-rich Gulf of Guinea, containing estimated probable reserves as high as 10% of the world total. As a result, large amounts of foreign investment primarily by U.S. companies have poured into the country's oil sector in recent years. Equatorial Guinea's total proven oil reserves are estimated at 1.1 billion barrels.

Oil production from Equatorial Guinea is expanding rapidly, averaging approximately 400,000 bbl/d by the end of 2007. In October 2004, the government capped production levels at 350,000 bbl/d to extend the life of the country's petroleum reserves, but lifted the cap the next year to allow expansion. With the addition of LNG production that came on line in 2007, total hydrocarbon production is now near 500,000 bbl/d equivalent. Three fields—Zafiro, Ceiba, and Alba—currently account for the majority of the country's oil output.

In 2001, GEPetrol became Equatorial Guinea's national oil company. It was established as the primary state-run institution responsible for the country's downstream oil sector activities. However, since 2001 its primary focus has become managing the government's interest stakes in various Production Sharing Contracts (PSCs) with foreign oil companies. GEPetrol also partners with foreign firms to undertake exploration projects and has a say in the country's environmental policy implementation. In its recent block-licensing negotiations, Equatorial Guinea has pursued increases in the government's stake in new PSCs. In early 2008 it announced a $2.2 billion purchase of U.S.-based Devon Energy's stake in the country's oil fields, increasing its participation to 20% in the Zafiro field operation.

The Zafiro field is Equatorial Guinea's largest oil producer, with output rising from an initial level of 7,000 bbl/d in August 1996 to approximately 280,000 bbl/d by 2004. Ceiba, Equatorial Guinea's second major producing oil field, is located just offshore of Rio Muni and is estimated to contain 300 million barrels of oil. Production at Ceiba has risen dramatically during the past 2-3 years, following improvements and upgrades to the facility. Alba, Equatorial Guinea's third significant field was discovered in 1991. Original estimates of reserves at Alba were around 68 million barrels of oil equivalent (BOE), but recent exploration has increased estimates significantly to almost 1 billion BOE. Unlike the Zafiro or Ceiba fields, exploration and production at Alba has focused on natural gas, including condensates.

Ceiba's discovery has significantly increased interest in petroleum exploration of surrounding areas, with many new companies acquiring licenses in exploration blocks further offshore in the Rio Muni basin. International companies with interests in one or more exploration blocks include Chevron (U.S.), Vanco Energy (U.S.), Atlas Petroleum International (U.S.), Devon Energy (U.S.), Roc Oil (Australia), Petronas (Malaysia), Sasol Petroleum (South Africa), and Glencore (Switzerland). In October 2004, Noble Energy Equatorial Guinea, an Equatoguinean subsidiary of American Noble Energy, Inc. signed a contract to exploit a new oil field off the island of Bioko. Recently, Equatorial Guineau gave the Chinese National Offshore Oil Company (CNOOC) the rights to its newest oil field. While China's capacity for deep-water drilling remains thus far unproven, CNOOC expects to complete two new oil rigs by 2009.

Equatorial Guinea's natural gas reserves are located offshore Bioko

Island, primarily in the Alba and Zafiro oil and gas fields. Natural gas and condensate production in Equatorial Guinea has expanded rapidly in the last five years in response to new investments by major stakeholders in the Alba natural gas field. Alba, the country's largest natural gas field, contains 1.3 trillion cubic feet (Tcf) of proven reserves, with probable reserves estimated at 4.4 Tcf or more.

Marathon Oil, other investors, and the state-owned gas company, SONOGAS, joined together in a $1.5 billion deal to construct a liquefied natural gas (LNG) facility on Bioko Island. The world-class facility shipped its first product in May 2007. In early 2008 Marathon and the government announced plans to construct and operate LNG trains 2 and 3, pending confirmation of feedstock gas from national and neighboring gas fields.

DEFENSE

The Equatoguinean military consists of approximately 2,500 service members. The largest contingent is the Army with 1,400 soldiers; the police have 400 para-military policemen, the Navy has 200 members and the Air Force has approximately 120. The Gendarmerie numbers approximately 300. In 2003, the government disbursed $75 million in military expenditures, about 9% of the 2002 budget. It continues to acquire equipment and has one of the strongest navies in the region. In 2005, the American consulting firm MPRI, Inc. was licensed to contract with the government to begin extensive training of the military and police forces. The primary purpose has been to professionalize security personnel, and a strong human rights and anti-trafficking provision was included in the curriculum. The program has been effective and continues to expand.

Between 1984 and 1992, service members went regularly to the United States on the International Military Education Training program, after which funding for this program for Equatorial Guinea ceased. U.S. military-to-military engagement has been dormant since 1997 (the year of the last Joint Combined Exchange Training Exercise), although their representatives did attend a military-hosted conference on Gulf of Guinea Security Cooperation in November 2006, and are slated to be involved in the follow-up conference later in 2008. The USS Fort McHenry made a highly successful ship visit to Malabo in January 2008, with additional similar visits being planned.

FOREIGN RELATIONS

The Equatoguinean Government favorably views the U.S. Government and American companies. The United States is the largest single foreign investor in Equatorial Guinea. U.S. companies have the largest and most visible foreign presence in the country, though the Chinese presence is growing rapidly. In an effort to attract increased U.S. investment, American passport-holders are entitled to visa-free entry for short visits. The United States is the only country with this privilege. With the increased U.S. investment presence, relations between the U.S. and the Government of Equatorial Guinea have been characterized by a positive, constructive relationship.

Equatorial Guinea maintains an embassy in Washington, DC, and has recently opened a new consulate in Houston, Texas. President Obiang has worked to cultivate the Equatorial Guinea-U.S. relationship with regular visits to the U.S. for meetings with senior government and business leaders, as well as to the opening sessions of the United Nations.

Despite improvements in its record, the 2007 U.S. State Department Human Rights report on Equatorial Guinea cited shortcomings in basic human rights, political freedom, and labor rights. U.S. Government policy involves constructive engagement with Equatorial Guinea to encourage an improvement in the human rights situation and positive use of petroleum funds directed toward the development of a working civil society. Equatoguineans visit the U.S. under programs sponsored by the U.S. Government, American oil companies, and educational institutions. The Ambassador's Self-Help Fund annually finances a number of small grassroots projects.

In view of growing ties between U.S. companies and Equatorial Guinea, the U.S. Government's overseas investment promotion agency, the Overseas Private Investment Corporation (OPIC), has concluded the largest agreement in Sub-Saharan Africa for a major U.S. project in Equatorial Guinea. The U.S. Agency for International Development has no U.S.-funded projects ongoing, but USAID does administer the Social Needs Fund of the Equatorial Guinean Government. This program is unique, and is projected to expand to a total value of $60 million over the next several years. The Peace Corps has had no presence in the country since the mid-1990s. American-based non-governmental organizations and other donor groups have very little involvement in the country.

U.S.-EQUATORIAL GUINEA RELATIONS

The Equatoguinean Government favorably views the U.S. Government and American companies. The United States is the largest single foreign investor in Equatorial Guinea. U.S. companies have the largest and most visible foreign presence in the country, though the Chinese presence is growing rapidly. In an effort to attract increased U.S. investment, American passport-holders are entitled to visa-free entry for short visits. The United States is the only country with this privilege. With the increased U.S. investment presence, relations between the U.S. and the Government of Equatorial Guinea have been characterized by a positive, constructive relationship.

Equatorial Guinea maintains an embassy in Washington, DC, and has recently opened a new consulate in

Houston, Texas. President Obiang has worked to cultivate the Equatorial Guinea-U.S. relationship with regular visits to the U.S. for meetings with senior government and business leaders, as well as to the opening sessions of the United Nations.

TRAVEL

Consular Information Sheet

November 15, 2007

Country Description: Equatorial Guinea is a developing country in central Africa. Its capital, Malabo, is located on the island of Bioko, off the coast of Cameroon. A secondary port, Luba, is also on Bioko. The mainland territory of Equatorial Guinea is located between Cameroon and Gabon.

The principal city on the mainland is Bata. Facilities for tourism are limited. Official languages are Spanish, which is widely spoken, and French, which is not widely understood, but sometimes used in business dealings.

Entry Requirements: A passport and evidence of a yellow fever vaccination is required to enter Equatorial Guinea. U.S. citizens are not required to have visas to enter Equatorial Guinea for short visits. For long visits and other types of visas, travelers should obtain the latest information and details from the Embassy of the Republic of Equatorial Guinea, 2020 16th Street NW, Washington, DC 20009, telephone (202) 518-5700, fax (202) 518-5252. Overseas, inquiries may also be made at the nearest Equato-Guinean embassy or consulate.

Safety and Security: It is not uncommon for a uniformed member of the security forces to stop motorists on the pretext of minor or nonexistent violations of the local motor vehicle regulations in order to extort small bribes. Visitors are advised not to pay bribes, and to request that the officer provide a citation to be paid at the local court.

Although large public demonstrations are uncommon, U.S. citizens should avoid large crowds, political rallies, and street demonstrations.

For the latest security information, Americans traveling abroad should regularly monitor the Department of State, Bureau of Consular Affairs web site, where the current Travel Warnings and Travel Alerts, including the Worldwide Caution Travel Alert, can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S. and Canada, or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: Violent crime is rare and the overall level of criminal activity is low in comparison to other countries in the region. However, there has been a rise in non-violent street crime and residential burglaries.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

Medical Facilities and Health Information: Medical facilities are extremely limited. Pharmacies in Malabo and Bata stock basic medicines including antibiotics, but cannot be counted on to supply advanced medications. Outside of these cities,

many medicines are unavailable. Travelers are advised to carry any special medication that they require. The sanitation levels in even the best hospitals are very low. Doctors and hospitals often require immediate payment for health services, and patients are often expected to supply their own bandages, linen and toiletries. Nevertheless, improvements in the health sector are underway. An Israeli-built and staffed private hospital in Bata is reported by Red Cross officials to be the best in the region. The Malabo hospital is likewise undergoing a complete update, with expected completion in 2008.

Malaria is a serious and sometimes fatal disease. Plasmodium falciparum malaria, the type that predominates in Equatorial Guinea, is resistant to the antimalarial drug chloroquine. Because travelers to the country are at high risk for contracting malaria, the Centers for Disease Control and Prevention (CDC) advises that travelers should take one of the following antimalarial drugs: mefloquine (Lariam TM), doxycycline, or atovaquone/proguanil (Malarone TM).

Travelers who become ill with a fever or flu-like illness while traveling in a malaria-risk area and up to one year after returning home should seek prompt medical attention and tell the physician their travel history and what antimalarials they have been taking. For additional information on malaria, including protective measures, see the CDC Travelers' Health web site at http://wwwn.cdc.gov/travel.

There are periodic outbreaks of cholera in Equatorial Guinea. Yellow fever can cause serious medical problems, but the vaccine, required for entry, is very effective in preventing the disease.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's web site at http://wwwn.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith/en.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Equatorial Guinea is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

Equatorial Guinea's road networks are underdeveloped. There are few road and traffic signs. Livestock and pedestrians create constant road hazards. During the rainy season, many roads are passable only with four-wheel-drive vehicles. However, new road construction and repair is taking place all over the country and road conditions have improved markedly over the course of the past year.

Travelers outside the limits of Malabo and Bata may expect to encounter occasional military roadblocks. Travelers should be prepared to show proper identification (for example, a U.S. passport) and to explain their reason for being at that particular location. The personnel staffing these checkpoints normally do not speak or understand English or French; travelers who do not speak Spanish would do well to have their reason for being in the country and their itinerary written down in Spanish before venturing into the countryside.

Aviation Safety Oversight: As there is no direct commercial air service between the United States and Equatorial Guinea, the U.S. Federal Aviation Administration (FAA) has not assessed Equatorial Guinea's Civil Aviation Authority for compliance with International Civil Aviation Organization (ICAO) aviation safety standards. For more information, travelers may visit the FAA's internet website at http://www.faa.gov.

Commercial air travel to and from Equatorial Guinea can be difficult. Malabo is served by European airlines a few times per week. The island of Bioko and the African mainland are connected by several small local airlines offering daily service. Schedules are subject to change or cancellation without notice; flights are often overbooked and reservations may not guarantee seats.

Malabo Airport has navigational aids and can accommodate night landings. There are no navigational aids at Bata Airport. Special clearances are required to land in or overfly Equato-Guinean territory.

Special Circumstances: Equatorial Guinea has a strictly cash economy. Credit cards and checks are not accepted; credit card cash advances are not available and there are no ATMs. In addition, most local businesses do not accept travelers' checks, dollars or euros. However, dollars can be changed at local banks for CFA. Cash in CFA is usually the only form of payment accepted throughout the country.

Special permits from the Ministry of Information and Tourism (or from the local delegation if outside Malabo) are required for virtually all types of photography. Police or security officials may charge a fine, attempt to take a violator into custody, or seize the camera and film of persons photographing the Presidential Palace and its environs, military installations, airports, harbors, government buildings, and other areas.

Travelers are advised that the possession of camouflage-patterned clothing, large knives, binoculars, firearms, or a variety of other items may be deemed suspicious by the

security forces and grounds for confiscation of the item and detention of the carrier.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating Equato-Guinean laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Equatorial Guinea are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in Equatorial Guinea are encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration web site so that they can obtain updated information on travel and security within Equatorial Guinea. Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency.

The United States reopened its Embassy in Malabo in October 2003. However, due to limited staffing, it can offer only emergency services to U.S. citizens in distress. The U.S. Embassy in Malabo can be contacted at (240) 098-895. Embassy web site: http://malabo.usembassy.gov. Routine services are provided through the U.S. Embassy in Yaoundé, Cameroon, located on Avenue Rosa Parks in the Mbankolo Quartier, adjacent to the Mount Febe Golf Club; mailing address P.O. Box 817; embassy tel. (237) 2220-1500, fax: (237) 2220-1572; web site: http://yaounde.usembassy.gov. The Embassy Branch Office in Douala, Cameroon is located on Rue Flatters, in the Citibank building, tel.: (237) 3342-53-31, fax: (237) 3342-77-90.

Intercountry Adoption

January 2008

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is based on public sources and current understanding.

Questions involving foreign and U.S. immigration laws and legal interpretation should be addressed respectively to qualified foreign or U.S. legal counsel.

Please Note: Intercountry adoption from Equatorial Guinea is rare. The U.S. Embassy in Yaoundé, Cameroon, which issues immigrant visas for citizens of Equatorial Guinea, has not issued any immigrant visas to orphans from Equatorial Guinea in the past five fiscal years. The U.S. Embassy in Malabo continues to seek clarification from the government of Equatorial Guinea on the legal procedures for intercountry adoption. This flyer will be updated as new information becomes available.

U.S. Immigration Requirements: Prospective adoptive parents are strongly encouraged to consult USCIS publication M-249, *The Immigration of Adopted and Prospective Adoptive Children,* as well as the Department of State publication, *Intercountry Adoptions.*

Please see the *Intercountry Adoption* section of this book for more details and review current reports online at http://adoption.state.gov.

Additional Information: Specific questions about adoption in Equatorial Guinea may be addressed to the U.S. Embassy in Equatorial Guinea. General questions regarding intercountry adoption may be addressed to the Office of Children's Issues, U.S. Department of State, CA/OCS/CI, SA-29, 4th Floor, 2201 C Street, NW, Washington, D.C. 20520-4818, toll-free Tel: 1-888-407-4747.

ERITREA

Compiled from the November 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
State of Eritrea

PROFILE

Geography

Area: 125,000 sq. km. (48,000 sq. mi.); about the size of Pennsylvania.
Cities: Capital—Asmara (est. pop. 435,000). Other cities—Keren (57,000); Assab (28,000); Massawa (25,000); Afabet (25,000); Tessenie (25,000); Mendefera (25,000); Dekemhare (20,000); Adekeieh (15,000); Barentu (15,000); Ghinda (15,000).
Terrain: Central highlands straddle escarpment associated with Rift Valley, dry coastal plains, and western lowlands.
Climate: Temperate in the highlands; hot in the lowlands.

People

Nationality: Noun and adjective—Eritrean(s).
Population: (2004 est.) 3.6 million.
Annual growth rate: 2.5%.
Ethnic groups: Tigrinya 50%, Tigre 31.4%, Saho 5%, Afar 5%, Beja 2.5%, Bilen 2.1%, Kunama 2%, Nara 1.5%, and Rashaida 0.5%.
Religions: Christian 50%, mostly Orthodox, Muslim 48%, indigenous beliefs 2%.
Education: Years compulsory—none. Attendance—elementary (net 2002) 45.2%; secondary (net 2002) 21.2%.
Health: Infant mortality rate (2003)—45/1,000. Life expectancy—52 yrs.
Work force: Agriculture—80%. Industry and commerce—20%.

Government

Type: Transitional government.
Independence: Eritrea officially celebrated its independence on May 24, 1993.
Constitution: Ratified May 24, 1997, but not yet implemented.
Government branches: Executive—president, cabinet. Legislative—Transitional National Assembly (does not meet). Judicial—Supreme Court.
Political subdivisions: Six administrative regions.
Political parties: People's Front for Democracy and Justice (name adopted by the Eritrean People's Liberation Front when it established itself as a political party).
Suffrage: Universal, age 18 and above (although no national elections have been held).
Budget: (2005 est.) $485 million.
Defense: (2004 est.) $185 million.

Economy

Real GDP: (2004 est.) $700 million.
Annual growth rate: (2005 est.) 4.8%.
Per capita income: $900 (on a purchasing power parity basis); per capita GNI (World Bank Atlas method), 2004 est. $180.
Avg. inflation rate: (2004 est.) 25%.
Mineral resources: Gold, copper, iron ore, potash, oil.
Agriculture: (12% of GDP in 2004) Products—millet, sorghum, teff, wheat, barley, flax, cotton, papayas, citrus fruits, bananas, beans and lentils, potatoes, vegetables, fish, dairy products, meat, and skins. Cultivated land—10% of arable land.
Industry: (25% of GDP in 2004) Types—processed food and dairy products, alcoholic beverages, leather goods, textiles, chemicals, cement and other construction materials, salt, paper, and matches.
Trade: Exports (2005 est.)—$12 million: skins, meat, live sheep and cattle, gum arabic. Major markets—Middle East (Saudi Arabia, Yemen), Europe (Italy), Djibouti, and Sudan. Imports (2005 est.)—$474 million: food, military materiel, and fuel, manufactured goods, machinery and transportation equipment. Major suppliers—U.A.E., Saudi Arabia, Italy, Germany, Belgium.

GEOGRAPHY

Eritrea is located in the Horn of Africa and is bordered on the northeast and east by the Red Sea, on the west and northwest by Sudan, on the south by Ethiopia, and on the south-

east by Djibouti. The country has a high central plateau that varies from 1,800 to 3,000 meters (6,000-10,000 ft.) above sea level. A coastal plain, western lowlands, and some 300 islands comprise the remainder of Eritrea's landmass. Eritrea has no year-round rivers.

The climate is temperate in the mountains and hot in the lowlands. Asmara, the capital, is about 2,300 meters (7,500 ft.) above sea level. Maximum temperature is 26o C (80o F). The weather is usually sunny and dry, with the short or belg rains occurring February-April and the big or meher rains beginning in late June and ending in mid-September.

PEOPLE

Eritrea's population comprises nine ethnic groups, most of which speak Semitic or Cushitic languages. The Tigrinya and Tigre make up four-fifths of the population and speak different, but related and somewhat mutually intelligible, Semitic languages. In general, most of the Christians live in the highlands, while Muslims and adherents of traditional beliefs live in lowland regions. Tigrinya and Arabic are the most frequently used languages for commercial and official transactions. In urban areas, English is widely spoken and is the language used for secondary and university education.

HISTORY

Prior to Italian colonization in 1885, what is now Eritrea had been ruled by the various local or international powers that successively dominated the Red Sea region. In 1896, the Italians used Eritrea as a springboard for their disastrous attempt to conquer Ethiopia. Eritrea was placed under British military administration after the Italian surrender in World War II. In 1952, a UN resolution federating Eritrea with Ethiopia went into effect. The resolution ignored Eritrean pleas for independence but guaranteed Eritreans some democratic rights and a measure of autonomy. Almost immediately after the federation went into effect, however, these rights began to be abridged or violated.

In 1962, Emperor Haile Sellassie unilaterally dissolved the Eritrean parliament and annexed the country, sparking the Eritrean fight for independence from Ethiopia that continued after Haile Sellassie was ousted in a coup in 1974. The new Ethiopian Government, called the Derg, was a Marxist military junta led by Ethiopian strongman Mengistu Haile Miriam.

During the 1960s, the Eritrean Liberation Front (ELF) led the Eritrean independence struggle. In 1970, some members of the group broke away to form the Eritrean People's Liberation Front (EPLF). By the late 1970s, the EPLF had become the dominant armed Eritrean group fighting against the Ethiopian Government, with Isaias Afwerki as its leader. The EPLF used material captured from the Ethiopian Army to fight against the government.

By 1977, the EPLF was poised to drive the Ethiopians out of Eritrea. That same year, however, a massive airlift of Soviet arms to Ethiopia enabled the Ethiopian Army to regain the initiative and forced the EPLF to retreat to the bush. Between 1978 and 1986, the Derg launched eight major offensives against the independence movement—all of which failed. In 1988, the EPLF captured Afabet, headquarters of the Ethiopian Army in northeastern Eritrea, prompting the Ethiopian Army to withdraw from its garrisons in Eritrea's western lowlands. EPLF fighters then moved into position around Keren, Eritrea's second-largest city. Meanwhile, other dissident movements were making headway throughout Ethiopia.

At the end of the 1980s, the Soviet Union informed Mengistu that it would not be renewing its defense and cooperation agreement. With the withdrawal of Soviet support and supplies, the Ethiopian Army's morale plummeted, and the EPLF—along with other Ethiopian rebel forces—advanced on Ethiopian positions. The United States played a facilitative role in the peace talks in Washington during the months leading up to the May 1991 fall of the Mengistu regime. In mid-May, Mengistu resigned as head of the Ethiopian Government and went into exile in Zimbabwe, leaving a caretaker government in Addis Ababa. Later that month, the United States chaired talks in London to formalize the end of the war. The four major combatant groups, including the EPLF, attended these talks.

Having defeated the Ethiopian forces in Eritrea, EPLF troops took control of their homeland. In May 1991, the EPLF established the Provisional Government of Eritrea (PGE) to administer Eritrean affairs until a referendum could be held on independence and a permanent government established. EPLF leader Isaias became the head of the PGE, and the EPLF Central Committee served as its legislative body.

A high-level U.S. delegation was present in Addis Ababa for the July 1-5, 1991 conference that established a transitional government in Ethiopia. The EPLF attended the July conference as an observer and held talks with the new transitional government regarding Eritrea's relationship to Ethiopia. The outcome of those talks was an agreement in which the Ethiopians recognized the right of the Eritreans to hold a referendum on independence. Although some EPLF cadres at one time espoused a Marxist ideology, Soviet assistance for Mengistu limited the level of Eritrean interest in seeking Soviet support. The fall of communist regimes in the former Soviet Union and the Eastern Bloc convinced them it was a failed system. The EPLF (and later its successor, the PFDJ) expressed its commitment to establishing a democratic form of government and a free-market economy in Eritrea. The United States agreed to provide assistance to both Ethiopia and Eritrea, conditional on continued progress toward democracy and human rights. On April 23-25, 1993, Eritreans voted overwhelmingly for independence from Ethiopia in a UN-

monitored free and fair referendum. The Eritrean authorities declared Eritrea an independent state on April 27, and Eritrea officially celebrated its independence on May 24, 1993.

GOVERNMENT AND POLITICAL CONDITIONS

Eritrea's Government faced formidable challenges following independence. With no constitution, no judicial system, and an education system in shambles, the Eritrean Government was required to build institutions of government from scratch. Currently, the Government of Eritrea exercises strict control of political, social, and economic systems, with nearly no civil liberties allowed.

On May 19, 1993, the PGE issued a proclamation regarding the reorganization of the government. The government was reorganized, and after a national, freely contested election, the Transitional National Assembly, which chose Isaias as President of the PGE, was expanded to include both EPLF and non-EPLF members. The EPLF established itself as a political party, the People's Front for Democracy and Justice (PFDJ). The PGE declared that during a 4-year transition period it would draft and ratify a constitution, draft a law on political parties, draft a press law, and carry out elections for a constitutional government.

In March 1994, the PGE created a constitutional commission charged with drafting a constitution flexible enough to meet the current needs of a population suffering from 30 years of civil war as well as those of the future, when prospective stability and prosperity would change the political landscape. Commission members traveled throughout the country and to Eritrean communities abroad holding meetings to explain

constitutional options to the people and to solicit their input. A new constitution was ratified in 1997 but has not been implemented, and general elections have not been held. The government had announced that Transitional National Assembly elections would take place in December 2001, but those were postponed and new elections have not been rescheduled.

The present government structure includes legislative, executive, and judicial bodies. The legislature, the Transitional National Assembly, comprises 75 members of the PFDJ and 75 additional popularly elected members. The Transitional National Assembly is the highest legal power in the government until the establishment of a democratic, constitutional government. The legislature sets the internal and external policies of the government, regulates implementation of those policies, approves the budget, and elects the president of the country.

The president nominates individuals to head the various ministries, authorities, commissions, and offices, and the Transitional National Assembly ratifies those nominations. The cabinet is the country's executive branch. It is composed of 17 ministers and chaired by the president. It implements policies, regulations, and laws and is accountable to the Transitional National Assembly. The ministries are agriculture; defense; education; energy and mines; finance; fisheries; foreign affairs; health; information; labor and human welfare; land, water, and environment; local governments; justice; public works; trade and industry; transportation and communication; and tourism.

Nominally, the judiciary operates independently of both the legislative and executive bodies, with a court system that extends from the village through to the district, provincial, and national levels. However, in practice, the independence of the judiciary is limited. In 2001, the president of the High Court was detained after criticizing the government for judicial interference.

In September 2001, after several months in which a number of prominent PFDJ party members had gone public with a series of grievances against the government and in which they called for implementation of the constitution and the holding of elections, the government instituted a crackdown. Eleven prominent dissidents, members of what had come to be known as the Group of 15, were arrested and held without charge in an unknown location. At the same time, the government shut down the independent press and arrested its reporters and editors, holding them incommunicado and without charge. In subsequent weeks, the government arrested other individuals, including two Eritrean employees of the U.S. Embassy. All of these individuals remain held without charge and none are allowed visitors.

Eritrea maintains an embassy in the United States at 1708 New Hampshire Ave., NW, Washington, DC 20009 (tel. 202-319-1991).

ECONOMY

The Eritrean economy is largely based on agriculture, which employs 80% of the population but currently may contribute as little as 12% to GDP. Agricultural exports include cotton, fruits and vegetables, hides, and meat, but farmers are largely dependent on rain-fed agriculture, and growth in this and other sectors is hampered by lack of a dependable water supply. Worker remittances and other private transfers from abroad currently contribute about 32% of GDP.

While in the past the Government of Eritrea stated that it was committed to a market economy and privatization, the government and the ruling PFDJ party maintain complete control of the economy. The government has imposed an arbitrary and complex set of regulatory requirements that discourage investment from both foreign and domestic sources, and it often reclaims successful private enterprises and property.

After independence, Eritrea had established a growing and healthy economy. But the 1998-2000 war with Ethiopia had a major negative impact on the economy and discouraged investment. Eritrea lost many valuable economic assets in particular during the last round of fighting in May-June 2000, when a significant portion of its territory in the agriculturally important west and south was occupied by Ethiopia. As a result of this last round of fighting, more than one million Eritreans were displaced, though by 2007 nearly all have been resettled. According to World Bank estimates, Eritreans also lost livestock worth some $225 million, and 55,000 homes worth $41 million were destroyed during the war. Damage to public buildings, including hospitals, is estimated at $24 million. Much of the transportation and communication infrastructure is outmoded and

deteriorating, although a large volume of intercity road-building activity is currently underway. The government sought international assistance for various development projects and mobilized young Eritreans serving in the national service to repair crumbling roads and dams. However, in 2005, the government asked the U.S. Agency for International Development (USAID) to cease operations in Eritrea.

According to the International Monetary Fund (IMF), post-border war recovery was impaired by four consecutive years of recurrent drought that have reduced the already low domestic food production capacity. The government reports that harvests have improved, but it provides no data to support these claims. Eritrea currently suffers from large structural fiscal deficits caused by high levels of spending on defense, which have resulted in the stock of debt rising to unsustainable levels. Exports have collapsed due to strict controls on foreign currencies and trade, as well as a closed border with Ethiopia, which was the major trading partner for Eritrea prior to the war. In 2006, Eritrea normalized relations with Sudan and is beginning to open the border to trade between the two countries. Large and persistent transfers from Eritreans living abroad offer significant support to the economy.

The port in Massawa has been rehabilitated and is being developed. In addition, the government has begun on a limited basis to export fish and sea cucumbers from the Red Sea to markets in Europe and Asia. A newly constructed airport in Massawa capable of handling jets could facilitate the export of high-value perishable seafood.

DEFENSE

During the war for independence, the EPLF fighting force grew to almost 110,000 fighters, about 3% of the total population of Eritrea. In 1993, Eritrea embarked on a phased program to demobilize 50%-60% of the army, which had by then shrunk to about 95,000. During the first phase of demobilization in 1993, some 26,000 soldiers—most of who enlisted after 1990—were demobilized. The second phase of demobilization, which occurred the following year, demobilized more than 17,000 soldiers who had joined the EPLF before 1990 and in many cases had seen considerable combat experience. Many of these fighters had spent their entire adult lives in the EPLF and lacked the social, personal, and vocational skills to become competitive in the work place. As a result, they received higher compensation, more intensive training, and more psychological counseling than the first group. Special attention was given to women fighters, who made up some 30% of the EPLF's combat troops. By 1998, the army had shrunk to 47,000.

The moves to demobilize were abruptly reversed after the outbreak of war with Ethiopia over the contested border. During the 1998-2000 war, which is estimated to have resulted in well over 100,000 casualties on the two sides, Eritrea's armed forces expanded to close to 300,000 members, almost 10% of the population. This imposed a huge economic burden on the country. The International Monetary Fund (IMF) estimates that the economy shrank by more than 8% in 2000, although it rebounded somewhat in 2001. The war ended with a cessation of hostilities agreement in June 2000, followed by a peace agreement signed in December of the same year. A UN peacekeeping mission, the UN Mission in Ethiopia and Eritrea (UNMEE), was established and monitors a 25-kilometer-wide Temporary Security Zone separating the two sides. Per the terms of the cessation of hostilities agreement, two commissions were established: one to delimit and demarcate the border and the other to weigh compensation claims by both sides. The Eritrea-Ethiopia Boundary Commission announced its decision in April 2002. Demarcation was expected to begin in 2003, but despite attempts to progress, it has been delayed by a stalemate between Ethiopia and Eritrea. The government has been slow to demobilize its military after the most recent conflict, although it formulated an ambitious demobilization plan with the participation of the World Bank. A pilot demobilization program involving 5,000 soldiers began in November 2001 and was to be followed immediately thereafter by a first phase in which some 65,000 soldiers would be demobilized. This was delayed repeatedly. In 2003, the government began to demobilize some of those slated for the first phase; however, the government maintains a "national service" program, which includes most of the male population between 18-40 and the female population between 18-27. The program essentially serves as a reserve force and can be mobilized quickly. There are estimates that one in twenty Eritreans actively serve in the military.

Presently, the U.S. has no military-to-military cooperation with Eritrea.

FOREIGN RELATIONS

Eritrea is a member of the Common Market of Eastern and Southern Africa (COMESA) and the African Union (AU) but does participate actively in the AU. Eritrea maintains diplomatic relations with the United States, Italy, and several other European nations, including the United Kingdom, Germany, Norway, and the Netherlands. Relations with these countries became strained as a result of the 2001 government crackdown against political dissidents and others, the closure of the independent press, and limits on civil liberties.

Eritrea's relations with its neighbors other than Djibouti also are somewhat strained. Although a territorial dispute with Yemen over the Haynish Islands was settled by international arbitration, tensions over traditional fishing rights with Yemen resurfaced in 2002. The relationship to date remains cordial. Relations with Sudan also were colored by occasional incidents involving the extremist group, Eritrean Islamic Jihad (EIJ)—which the Eritrean Government believes is supported by the National Islamic Front government in Khartoum—and by continued Eritrean

support for the Sudanese opposition coalition, the National Democratic Alliance; however, Eritrea normalized relations with Sudan in 2006.

U.S.-ERITREAN RELATIONS

The U.S. consulate in Asmara was first established in 1942. In 1953, the United States signed a mutual defense treaty with Ethiopia. The treaty granted the United States control and expansion of the important British military communications base at Kagnew near Asmara. In the 1960s, as many as 4,000 U.S. military personnel were stationed at Kagnew. In the 1970s, technological advances in the satellite and communications fields were making the communications station at Kagnew increasingly obsolete. In 1974, Kagnew Station drastically reduced its personnel complement. In early 1977, the United States informed the Ethiopian Government that it intended to close Kagnew Station permanently by September 30, 1977. In the meantime, U.S. relations with the Mengistu regime were worsening. In April 1977, Mengistu abrogated the 1953 mutual defense treaty and ordered a reduction of U.S. personnel in Ethiopia, including the closure of Kagnew Communications Center and the consulate in Asmara. In August 1992, the United States reopened its consulate in Asmara, staffed with one officer. On April 27, 1993, the United States recognized Eritrea as an independent state, and on June 11, diplomatic relations were established, with a chargé d'affaires. The first U.S. Ambassador arrived later that year. In the past, the United States has provided substantial assistance to Eritrea, including food and development. In FY 2004, the United States provided over $65 million in humanitarian aid to Eritrea, including $58.1 million in food assistance and $3.47 million in refugee support. In 2005, the Government of Eritrea told USAID to cease operations. At the Eritrean Government's request, the United States no longer provides bilateral development assistance to Eritrea. U.S. interests in Eritrea include consolidating the peace with Ethiopia, encouraging progress toward establishing a democratic political culture, supporting Eritrean efforts to become constructively involved in solving regional problems, assisting Eritrea in dealing with its humanitarian and development needs, and promoting economic reform.

TRAVEL

Consular Information Sheet

November 26, 2008

Country Description: Eritrea is a poor but developing East African country, the capital of which is Asmara. Formerly a province of Ethiopia, Eritrea became an independent country on May 24, 1993, following a 30-year struggle that culminated in an overwhelming referendum vote for independence. Tourism facilities are very limited.

Entry Requirements: All travelers should have a passport and valid visa prior to arrival; visas are not available at the airport unless specifically pre-authorized by the Eritrean government. Travelers visiting Eritrea using a foreign passport do not need an exit visa, provided they leave before their entrance visa expiration date. Persons staying beyond their entrance visa expiration date may be subject to fines or imprisonment, or be required to remain in Eritrea for an extended period while their case is reviewed in court. All long-term residents, regardless of citizenship, must obtain an exit visa 30 days prior to departure, unless they hold a difficult-to-obtain multiple entry visa. Upon entry and exit, visitors must declare all foreign currency, and may be asked to declare electronic equipment such as cameras, computers and video equipment. Visitors must save all receipts for foreign exchange and present these upon departure to account for all foreign currency spent in Eritrea. Failure to report foreign currency or meet customs requirements usually results in both a fine and imprisonment. There is also a $20 airport departure tax. Information about the airport tax and entry/exit requirements is available from the Embassy of Eritrea, 1708 New Hampshire Avenue NW, Washington, DC 20009; telephone (202) 319-1991; fax (202) 319-1304. Overseas, inquiries may be made at the nearest Eritrean embassy or consulate.

U.S. citizens born in Eritrea, to Eritrean parents, or who in any other way appear to have Eritrean origins, are required to register with the Immigration and Nationality office in Asmara within seven business days of their entry into the country. The Eritrean government sometimes subjects U.S. citizens of Eritrean heritage to the same entry/exit requirements as Eritrean citizens. See the "Special Circumstances" section below for more information about dual nationality.

Safety and Security: Eritrea and Ethiopia fought a border war from 1998-2000. United Nations peacekeepers patrolled the border until March 2008, when Government of

Eritrea diesel fuel restrictions resulted in the peacekeepers' withdrawal. Both Eritrea and Ethiopia maintain large military presences along the border and currently all border crossings into Ethiopia from Eritrea remain closed. U.S. citizens are strongly advised to avoid travel near the Eritrean-Ethiopian border and to register their presence in Eritrea with the U.S. Embassy in Asmara.

Since April 2008, large numbers of Eritrean troops have been deployed along the northeastern border of Djibouti. U.S. citizens are strongly advised to avoid non-essential travel to the Southern Red Sea region of Eritrea, including the port of Assab.

Landmines and unexploded ordnance remain a serious problem throughout the country. There are reports of accidents and numerous incidents where vehicles and people occasionally detonate mines. Many detonations occurred on relatively well-traveled roads in and near the Gash Barka region of western Eritrea; subsequent investigations indicated that several mines had been recently laid. Vast areas of the country still have not been certified free of mines and unexploded ordnance left over from both the 30-year war for independence and the subsequent 1998-2000 conflict with Ethiopia. Americans should avoid walking alone and hiking in riverbeds or areas that local government officials have not certified as safe.

Although Eritrea and Sudan have diplomatic relations, the procedures for crossing their common border are not clear and subject to change. Overland travel between the two countries is dangerous and ill advised. Travelers crossing from Eritrea to Sudan north and west of the Keren-Barentu road risk becoming victims of banditry or Islamic extremist insurgent activity. Several incidents were reported in 2007, apparently involving insurgents or criminals in this area. The U.S. Embassy also received reports of sporadic bombings of vehicles and government facilities in the Gash Barka region near Sudan in 2007 and 2008. If travel near the Eritrean-Sudanese border is essential, travelers should consult both the Eritrean authorities and the U.S. Embassy in advance. Foreign travelers who wish to visit any area outside of Asmara must apply at least ten days in advance for a travel permit from the Eritrean government.

For the latest security information, Americans traveling abroad should regularly monitor the Department's Internet web site at where the current Travel Warnings and Travel Alerts, including the Worldwide Caution Travel Alert, can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S. and Canada, or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: Although still a safe city by many measures, Asmara reported significant increases of street crime, such as theft, robbery, and assault in 2008. Travelers should exercise vigilance in their personal security and safety precautions regarding what valuables they carry and which areas they visit.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, contact family members or friends, and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

Medical Facilities And Other Health Information: Medical facilities in Eritrea are extremely limited. Travelers must carry their own supplies of prescription drugs and preventative medicines because pharmaceuticals are in short supply. Food and water-borne illnesses are very common among travelers, so drink only bottled or purified water and eat foods that are cooked or peeled. Malaria is a serious risk to travelers in the lowlands of Eritrea, but Asmara is generally considered free of the disease.

There is no HIV testing requirement for temporary or permanent entry into Eritrea. Please verify this information with the Embassy of Eritrea before you travel.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's Internet site at http://wwwn.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Eritrea is provided for general reference only and may not be totally accurate in a particular location or circumstance.

The roads between major cities (Asmara, Massawa, Mendefera, Dekemhare, Barentu, and Keren) are paved and in relatively good condition. However, secondary roads and those in remote areas are usually unpaved and in poor condition. U.S. citizens should avoid traveling on these roads, especially at night. Bad weather can also make the condition

of poor roads worse. If you must take unpaved roads, check first with local government and village officials as new minefields continue to be discovered.

Landmines and unexploded ordnance litter the countryside in many areas, occasionally causing injuries and deaths. Although the UN conducted de-mining efforts until late 2007, evidence of new mines has been reported, particularly in areas near the Ethiopian border. All areas that are not well traveled are potentially dangerous due to live mines, especially north and west of Keren.

There are also minefields near Massawa, Ghinda, Agordat, Barentu, south of Tessenae, Nakfa, Adi Keih, Arezza, Dekemhare, and in a roughly 40-kilometer wide region just west of the Eritrean-Ethiopian border between the Setit and Mereb Rivers.

Many Eritreans use inexpensive public transportation, especially bus service. Travelers should avoid taking buses due to extreme over-crowding. Taxis are plentiful and inexpensive in Asmara, but usually carry multiple passengers along pre-defined routes. If an empty taxi is available, a customer may request a "contract" taxi, which accepts no additional passengers, for a significantly higher fixed price. Drivers should be aware of heavy and erratic pedestrian and bicycle traffic obstructing vehicle flow. Occasionally horse-drawn carts, cattle, or goats add to the obstacles. Other hazards are children and the elderly, who sometimes wander into the path of moving traffic, as well as small, slow, motorized carts. Elderly or disabled people usually drive these carts and do not always yield to faster moving traffic. When parallel parking on city streets, watch for pedestrians as you back into the space.

Aviation Safety Oversight: As there is no direct commercial air service between the United States and Eritrea, the U.S. Federal Aviation Administration (FAA) has not assessed Eritrea's Civil Aviation Authority for compliance with International Civil Aviation Organization (ICAO) aviation safety standards. For more information, travelers may visit the FAA's Internet web site at http://www.faa.gov.

Special Circumstances: Due to Eritrean government restrictions impacting Embassy operations, the consular section of the U.S. Embassy in Asmara does not provide routine services to American citizens in Eritrea, including reports of birth, passports, and notaries. Americans traveling or residing in Eritrea who require such services must travel to a U.S. Embassy or Consulate outside Eritrea, and should plan accordingly.

American citizens should also be aware that U.S. diplomatic personnel are subject to travel restrictions. The Government of Eritrea requires resident diplomats to apply 10 days in advance for travel outside of Asmara city limits; often travel permission is not given. This restriction can delay or prevent U.S. Embassy emergency assistance to American citizens outside of Asmara.

The consular section of the U.S. Embassy in Asmara has been closed for visa services since January 2007.

Eritrea has complicated citizenship laws and does not recognize renunciation of Eritrean citizenship. Dual nationals who enter the country on Eritrean documents are treated as Eritrean citizens, regardless of their other citizenship. U.S. citizens born in Eritrea, or who otherwise are considered to have acquired Eritrean citizenship, may be subject to certain obligations, including being drafted into national service, regardless of the documents they present at entry. (National service is approximately six months of military training, followed by an often unspecified number of years in military or other government service.)

U.S.-Eritrean dual nationals who enter the country on an Eritrean passport or national ID card must obtain an exit visa prior to departure. Exit visa applications can significantly delay travel plans or be denied, even for persons who entered Eritrea legally. Eritrean dual nationals are also required to pay a 2% income tax on overseas earnings to the Eritrean Government prior to being granted an exit visa. Additionally, Eritrean authorities sometimes to not allow Eritreans who left the country after 1993 to depart Eritrea after visiting the country, even if they have a U.S. passport and a valid Eritrean visa.

The government of Eritrea does not inform the U.S. Embassy of the detention of American citizens, and does not allow Embassy officials to visit incarcerated Americans.

Visitors are advised to exercise caution when taking photographs in Eritrea. Foreigners in Asmara have been harassed and detained by local police and plain clothes security officials for taking photographs of street scenes in the city. No law has been cited, but the arresting officials' justifications have been that (unmarked) government buildings are in the background and/or that the pictures are being taken (illegally) for commercial reasons.

All foreign nationals in Eritrea are required to apply for permits to travel outside of Asmara. Travel permits must be presented at all checkpoints. Checkpoints are found on major roads through Eritrea, but locations may change without notice. Applications for travel permits are available at the Ministry of Tourism located on Harnet Avenue.

There is a high risk of earthquakes in Eritrea. General information about natural disaster preparedness is available on the Internet from the U.S. Federal Emergency Management Agency (FEMA) at http://www.fema.gov. Please see our information on Customs Regulations.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating Eritrean

laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Eritrea are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sex with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues web pages.

Registration and Embassy Locations: Americans living or traveling in Eritrea are encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration web site, https://travelregistration.state.gov, and to obtain updated information on travel and security within Eritrea. Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate.

By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency. The U.S. Embassy is located at 179 Alaa Street, PO Box 211, Asmara; telephone (291-1) 12-00-04; fax (291-1) 124-255 and (291-1) 127-584; the Embassy's web site is located at http://eritrea.usembassy.gov.

Intercountry Adoption

July 2006

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is based on public sources and current understanding. Questions involving foreign and U.S. immigration laws and legal interpretation should be addressed respectively to qualified foreign or U.S. legal counsel.

Please Note: In order to adopt Eritrean children, prospective adoptive parents who are not Eritrean citizens must reside in Eritrea for at least six continuous months immediately prior to the adoption. In the U.S. Embassy's experience, most adoptions by U.S. citizens have been of younger relatives.

However, there have been difficulties in verifying the children's ages and that they meet the U.S. immigration requirements for "orphan." Eritrea requires post-adoption reports for adopted children at three months, six months and one year after the adoption and annually thereafter until the child reaches 18.

Patterns of Immigration: Please review current reports online at http://adoption.state.gov.

Adoption Authority: The adoption authority responsible for adoptions in Eritrea is the Ministry of Labor & Human Welfare. They can be reached by phone at: (291) 1-151846. Contact Mr. Tekle Tesfay at that office for more information.

Ministry of Labor and
Human Welfare
P. O. Box 5252
Asmara, Eritrea
Telephone: (291) 1-151846

Eligibility Requirements for Adoptive Parents: Prospective adoptive parents must be between the ages of 25 and 50 and be at least 21 years older than the child at the time of adoption. Prospective adoptive parents do not need to be married.

Residency Requirements: Prospective adoptive parents must have resided in Eritrea for at least six consecutive months prior to the date of the application unless they are Eritrean citizens.

Time Frame: The adoption process takes approximately six months, but can take longer. This time period is separate from the 6-month residency requirement.

Adoption Agencies and Attorneys: There are no official adoption agencies in Eritrea; however, the Ministry of Labor & Human Welfare facilitates and oversees both local and intercountry adoptions. There are no specialized adoption attorneys. If there is a request regarding an intercountry adoption, the Ministry of Labor & Human Welfare will be asked to assist. with the processing and obtaining documentation regarding the adoption.

In the event prospective adoptive parents wish to consult an attorney, a list of attorneys can be obtained from the U.S. Embassy website at: http://usembassy.state.gov. Neither the U.S. Embassy nor the Department of State can vouch for the efficacy or professionalism of attorneys on this list.

All adoptions must be finalized through the office of the Ministry of Labor & Human Welfare and/or by the High Court.

Adoption Fees: Please note that prospective adoptive parents are required under Eritrean law to retain an attorney for adoption proceedings. Adoption fees paid to the attorney vary depending.

Adoption Procedures: Most children in orphanages are abandoned children, i.e. they have no living parents or relatives to care for them. The Ministry of Labor and Human Welfare has custody of abandoned children and the authority to place these children with prospective adoptive parents.

However, some children residing in orphanages also have surviving parent(s) and/or distant relatives. Prospective adoptive parents need to work with birth parent(s) or the distant relative of the child regarding the release of the child for adoption.

Please be advised that directed adoptions involving two birth parents to U.S. citizen prospective adoptive par-

ents may disqualify a child from receiving a U.S. immigrant visa. All adoptions are reviewed by the High Court. Prospective adoptive parents must first work with local clerks of the municipal government of the area where the child resides to obtain a statement that transfers authority from the biological parents or relative (if available) or the Ministry of Labor and Human Welfare to the prospective adoptive parents. Prospective adoptive parents submit the request for transfer of authority and the application to adopt to the High Court.

The High Court issues a decision based on their statement and the court's satisfaction of the decision done in the best interests of the child. The adoption goes into effect as of the date the High Court's judge signs the petition.

Required Documents: Prospective adoptive parents must provide the following documents to Ministry of Labor & Human Welfare:

- A written statement from the prospective adoptive parents explaining why an Eritrean child is preferred;
- Original birth certificate(s) of the prospective adoptive parent(s);
- Original marriage license/certificate, if applicable. Note: If originals are not available, certified copies must be authenticated by the Department of State or U.S. Embassy Asmara;
- An original Eritrean police clearance for each of the prospective adoptive parent(s) including those residing in Eritrea;
- A medical certificate/clearance for each of the prospective adoptive parent(s);
- The original home study prepared by a qualified social worker, which specifies the following: personal and family status; character and personal qualities; educational background; duration and stability of marriage; financial and medical situations; present address and U.S. address; condition of home in country of residence; address and names of family of origin (i.e., parents) and the agency's recommendation regarding your suitability as an adoptive parent with an original translation into Tigrigna;
- Evidence of economic status, which must include proof of life insurance and health insurance, other proof of income or assets may also be submitted;
- Three letters of reference from friends, relatives, church or other sources qualified to assess prospective adoptive parents' character, the stability of marriage, and ability to parent;
- Two passport-size photographs of the prospective adopting parent(s);
- If the prospective adoptive parent(s) do not come to Eritrea together to oversee this entire process, then they must execute a power of attorney for their adoption agency, or if only one parent will travel to Eritrea, the other parent must execute a power of attorney for him/her. That power of attorney must be authenticated by the Eritrean Embassy in Washington, D.C. This applies to all prospective adopting parents coming from the U.S.Eritrean nationals living in the United States as well as non-Eritreans who plan to adopt. Documents that are notarized by a U.S. notary public in the United States must be authenticated by the Eritrean Embassy in Washington, D.C. in order to be recognized by the Eritrean government;
- Obligation of Adoption or Social Welfare Agency signed by the adoption agency handling the adoption, or for private adopters, from the organization that provided the home study, or by the parents' employer, in which the parent(s) agree to allow follow-up visits by a U.S. social worker, and to submit regular progress report to the Ministry of Labor and Human on the child's (or children's) adjustment to/development in the adoptive home;
- Verification by the adoption agency or home study organization on the child's qualification for naturalization under the laws of the parents' country of residence with an original translation into Tigrigna.

Embassy of the State of Eritrea

Fax: (510) 986-1904
E-mail: badmena@sbcglobal.net

U.S. Immigration Requirements: Prospective adoptive parents are strongly encouraged to consult USCIS publication M-249, *The Immigration of Adopted and Prospective Adoptive Children*, as well as the Department of State publication, *Intercountry Adoptions*.

Please see the *Intercountry Adoption* section of this book for more details and review current reports online at http://adoption.state.gov.

American Embassy Asmara
Ala Street, P. O. Box 211
Asmara, Eritrea

The Consular Section's telephone number is (291)-1-120-004. The fax number is (291)-1-124255. The e-mail address is consularasmara@state.gov. American citizens can walk in from 2:00 p.m.—4:00 p.m., Monday through Thursday.

Additional Information: Specific questions about adoption in Eritrea may be addressed to the U.S. Embassy in Asmara. General questions regarding intercountry adoption may be addressed to the Office of

Children's Issues, U.S. Department of State, CA/OCS/CI, SA-29, 4th Floor, 2201 C Street, NW, Washington, D.C. 20520-4818, toll-free Tel: 1-888-407-4747.

Travel Warning

November 15, 2008

The U.S. Department of State warns U.S. citizens of the risks of travel to Eritrea and recommends that U.S. citizens defer travel at this time. This replaces the Travel Warning dated June 11, 2008, and informs U.S. citizens that the consular section of the U.S. Embassy in Asmara is currently closed for all public non-emergency services. The Consular Section will continue to provide emergency services to U.S. citizens.

Since September 13, the Government of Eritrea has repeatedly, and in violation of the Vienna Convention on Diplomatic Relations, interfered with the unfettered delivery of the U.S. Embassy's diplomatic pouches. As a result, the Embassy is unable to receive critical supplies and materials necessary, including U.S. passports and other citizenship-related documents, for the conduct of normal operations. Until this matter is resolved, the consular section of the U.S. Embassy has no choice but to suspend all non-emergency services. This closure affects all routine services to American citizens, such as Consular Reports of Birth Abroad, passport services, and notary services. American citizens who need routine consular services should consider traveling to the U.S. Embassy in Djibouti or the U.S. Embassy in Addis Ababa, Ethiopia. The Department of State recommends U.S. citizens defer travel to Eritrea due to restrictions on travel outside the capital city of Asmara and heightened tensions along Eritrea's borders with Ethiopia and Djibouti.

American citizens considering travel within Eritrea should be aware of the presence of large numbers of Eritrean and Ethiopian troops along the Eritrean-Ethiopian border, and acute political tensions between the two countries. In March 2008, the Eritrean restrictions on diesel fuel supplies caused United Nations' Mission in Ethiopia and Eritrea's detachments to withdraw from the Temporary Security Zone, leaving no international observers monitoring the border.

Since April 2008, Djiboutian and Eritrean troops have been deployed along the northeastern border of Djibouti. The Djiboutian government claims Eritrean troops have crossed into its territory and on June 10, 2008, Djiboutian and Eritrean troops exchanged fire along their shared border.

U.S. citizens are strongly advised to avoid travel near the Eritrean-Ethiopian border and to the Southern Red Sea region, including the port of Assab.

The Eritrean government continues to restrict the travel of all foreign nationals, including resident diplomats. These restrictions require all visitors and residents to apply ten days in advance for permission to travel outside Asmara city limits. As a result, the U.S. Embassy cannot provide emergency consular assistance outside of Asmara. The government of Eritrea does not inform the U.S. Embassy when American citizens have been arrested or detained.

Americans currently living or traveling in Eritrea are strongly encouraged to register with the U.S. Embassy in Asmara in person or through the State Department's travel registration web site, https://travelregistration.state.gov, and to obtain updated information on travel and security within Eritrea. By registering, American citizens make it easier for the Embassy to contact them in case of an emergency and provide updates on the security situations. The U.S. Embassy is located at 179 Alaa Street, P.O. Box 211, Asmara; telephone (291-1) 12-00-04; fax (291-1) 124-255 and (291-1) 127-584; web site http://asmara.usembassy.gov.

For additional information, consult the Department of State's Country Specific Information sheet for Eritrea and the Worldwide Caution at http://travel.state.gov. American citizens may also obtain up-to-date information on security conditions by calling 1-888-407-4747 toll free in the United States and Canada, or 1-202-501-4444 from overseas.

ESTONIA

Compiled from the May 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Republic of Estonia

PROFILE

Geography

Area: 45,226 sq. km. (17,462 sq. mi.); slightly smaller than New Hampshire and Vermont combined.

Cities: Capital—Tallinn (pop. 396,000), situated in the north of the country, on the Gulf of Finland. Other cities—university town of Tartu (101,500); the primarily Russian-speaking industrial towns of Narva (67,100) and Kohtla-Järve (46,000) in the north-east of Estonia; Pärnu on the western coast (44,400) and Viljandi in the rural south (20,509). The last population census was held in 2000.

Terrain: Mostly flat, with some undulating terrain in the east and southeast, average elevation 50 m. Steep limestone banks and 1,520 islands mark the coastline. Land use—12.05% arable land, 47.4% forest and woodland, 22% swamps and bogs, 18.55% other. Coastal waters are somewhat polluted.

Climate: Temperate, with four seasons. Annual precipitation averages 50-75 cm.

People

Nationality: Noun and adjective—Estonian(s).

Population: (2007) 1.342 million.

Annual growth rate: (2006) -1.82%. Birth rate (2006)—11.07/1,000. Death rate (2006)—12.89/1,000. Net migration (2006)—3.2 migrant(s)/1,000 population. Density—31/sq. km. Urban dwellers—70%.

Ethnic groups: Estonians 68.6%, Russians 25.6%, Ukrainians 2.1%, Belarusians 1.2%, Finns 0.8%, other 1.7%.

Religions: Evangelical Lutheran; the Estonian Apostolic Orthodox, subordinated to Constantinople; the Estonian Orthodox, subordinated to the Moscow Patriarchate; Baptist.

Languages: (2000 census) Estonian (official) 67.3%, Russian 29.7%, other 2.3%, unknown 0.7%.

Education: Years compulsory—9. Attendance—218,600 students at 550 schools, plus 50,800 university students. Literacy—99.8%.

Health: Infant mortality rate—4.4 deaths/1,000 live births. Life expectancy—67.3 yrs. men, 78 yrs. women.

Work force: 659,600.

Government

Type: Parliamentary democracy.

Constitution: On June 28, 1992 Estonia ratified its constitution based on its 1938 model, offering legal continuity to the Republic of Estonia prior to Soviet occupation.

Government branches: Executive—president (chief of state), elected indirectly every 5 years; prime minister (head of government). Legislative—Riigikogu (Parliament—101 members, 4-year term). Judicial—Supreme Court.

Political subdivisions: 15 counties, 33 towns, and 194 municipalities (local elections data, 2005).

Political parties: Six parties are presently represented in the parliament: the Estonian Center Party; Estonian Reform Party; Pro Patria-Res Publica Union; Estonian People's Union; Estonian Social Democratic Party; and the Estonian Greens. Other parties include: the Russian Party of Estonia; Estonian Independence Party; Estonian Christian Democratic Party; Constitution Party; Estonian Left Party.

Suffrage: Universal at 18 years of age; noncitizen residents may vote in municipal elections.

Government Budget: $2.3 billion.

Defense: 1.8% of GDP.

National holidays: Jan. 1 (New Year's Day), Feb. 24 (Independence Day), Good Friday, Easter Sunday, May 1 (May Day), Whitsunday, June 23 (Victory Day—anniversary of Battle of Vonnu in 1919), June 24 (Midsummer Day), Aug. 20 (Day of Restoration of Independence), Dec. 25 (Christmas Day), Dec. 26 (Boxing Day).

Government of Estonia web site: http://www.riik.ee/en/

Economy

GDP: (2007) $21.3 billion.
Real GDP growth rate: (2007) 7.1%.
Per capita GDP: (2007) $15,868.
Inflation: (2007) 6.6%.
Unemployment: (2007) 4.7%.
Natural resources: Oil shale, phosphorus, limestone, blue clay.
Agriculture: (3% of 2007 GDP): Products—livestock production (milk, meat, eggs) and crop production (cereals and legumes, potatoes, forage crops). Arable land—433,100 hectares.
Industry: (21% of 2007 GDP): Types—engineering, electronics, wood and wood products, and textiles.
Services: (60% of 2007 GDP): Transit, information technology (IT), telecommunications, business services, retail, construction, real estate.
Trade: Exports (2007)—$11 billion. Partners—Finland 18%, Sweden 13%, Latvia 11%, Russia 8.8%, Germany 5.2%, Lithuania 5.7%, U.S. 4%. Imports (2007)—$15.5 billion. Partners—Finland 16%, Germany 12.8%, Russia 10%, Sweden 10%, Latvia 7.6%, Lithuania 6.8%.
Exchange rate: (2007) 11.4 kroon (EEK)=U.S.$1.
Foreign direct investment: (2007) Sweden 39.7%, Finland 24.6%, Netherlands 5.7%, Denmark 4.4%, Russia 2.6%, Norway 2.5%, Germany 2.4%, Cyprus 2.3%, Luxembourg 2%, U.K. 2%, U.S. 1.6%.

GEOGRAPHY

Between 57.3 and 59.5 degrees latitude and 21.5 and 28.1 degrees longitude, Estonia lies on the eastern shores of the Baltic Sea on the level, northwestern part of the rising East European platform. Average elevation reaches only 50 meters (160 ft.).

The climate resembles New England's. Oil shale and limestone deposits, along with forests that cover 47% of the land, play key economic roles in this generally resource-poor country. Estonia boasts more than 1,500 lakes, numerous bogs, and 3,794 kilometers of coastline marked by numerous bays, straits, and inlets. Tallinn's Muuga port offers one of Europe's finest warm water harbor facilities. Estonia's strategic location has precipitated many wars fought on its territory between other rival powers at its expense. In 1944, the Union of Soviet Socialist Republics (U.S.S.R.) granted Russia the trans-Narva and Petseri regions on Estonia's eastern frontier. Russia and Estonia signed a border treaty in 2005 recognizing the current border. Estonia ratified the treaty in June 2005, but Russia subsequently revoked its signature to the treaty, due to a reference the Estonian Parliament inserted regarding the Peace Treaty of Tartu.

PEOPLE

Estonians belong to the Balto-Finnic group of the Finno-Ugric peoples, as do the Finns and the Hungarians. Archaeological research confirms the existence of human activity in the region as early as 8,000 BC, but by 3,500 BC the principal ancestors of the Estonians had arrived from the east.

Estonians have strong ties to the Nordic countries today stemming from deep cultural and religious influences gained over centuries during Scandinavian colonization and settlement. This highly literate society places great emphasis upon education, which is free and compulsory until age 16. About 20% of the population belongs to the following churches registered in Estonia: Estonian Evangelical Lutheran Church, Estonian Apostolic Orthodox Church, Estonian Orthodox Church subordinated to the Moscow Patriarchate, Baptist Church, Roman Catholic Church, and others.

As of March 2, 2008, 83.8% of Estonia's population held Estonian citizenship, 8% were citizens of other countries (primarily Russia), and 8.2% were of undetermined citizenship.

Written with the Latin alphabet, Estonian is the language of the Estonian people and the official language of the country. Estonian is one of the world's most difficult languages to learn for English-speakers: it has fourteen cases, which can be a challenge even for skilled linguists. During the Soviet era, the Russian language was imposed for official use.

HISTORY

Ancient

Estonians are one of the longest-settled European peoples and have lived along the Baltic Sea for over 5,000 years. The Estonians were an independent nation until the 13th century A.D. The country was then subsequently conquered by Denmark, Germany, Poland, Sweden, and finally Russia, whose defeat of Sweden in 1721 resulted in the Uusikaupunki Peace Treaty, granting Russia rule over what became modern Estonia.

First Period of Independence

Independence remained out of reach for Estonia until the collapse of the Russian empire during World War I.

Estonia declared itself an independent democratic republic in November 1918. In 1920, by the Peace Treaty of Tartu, Soviet Russia recognized Estonia's independence and renounced in perpetuity all rights to its territory.

The first constitution of the Republic of Estonia was adopted in 1920 and established a parliamentary form of government. Estonia's independence would last for 22 years, during which time Estonia guaranteed cultural autonomy to all minorities, including its small Jewish population, an act that was unique in Western Europe at the time.

Soviet Period

Leading up to World War II (WWII), Estonia pursued a policy of neutrality. However, the Soviet Union forcibly incorporated Estonia as a result of the Molotov-Ribbentrop Pact of

1939, in which Nazi Germany gave control of Estonia, Latvia, and Lithuania to the Soviet Union in return for control of much of Poland. In August 1940, the U.S.S.R proclaimed Estonia a part of the Soviet Union as the Estonian Soviet Socialist Republic (E.S.S.R.). The United States never recognized Soviet sovereignty over Estonia, Latvia, or Lithuania.

During World War II, between 1939 and 1945, through both the Nazi and Soviet occupations, Estonia's direct human losses reached 180,000 residents, which amounted to 17% of its total population. During the Nazi occupation from 1941 to 1944, 7,800 citizens of the Republic of Estonia (70% ethnic Estonians, 15% ethnic Russians, 12.8% Estonian Jews, and 2.2% representing other nationalities) were executed in Nazi prison camps. Of the total number executed during the period of Nazi occupation, an estimated 1,000 were Estonian Jews—or roughly 25% of the pre-war Jewish population of Estonia. Additionally, an estimated 10,000 Jews were transported to Estonia from elsewhere in eastern Europe and killed there.

Re-establishing Independence

In the late 1980s, looser controls on freedom of expression under Soviet leader Mikhail Gorbachev reignited the Estonians' call for self-determination. By 1988, hundreds of thousands of people were gathering across Estonia to sing previously banned national songs in what became known as the "Singing Revolution."

In November 1988, Estonia's Supreme Soviet passed a declaration of sovereignty; in 1990, the name of the Republic of Estonia was restored, and during the August 1991 coup in the U.S.S.R, Estonia declared full independence. The U.S.S.R Supreme Soviet recognized independent Estonia on September 6, 1991. Unlike the experiences of Latvia and Lithuania, Estonia's revolution ended without blood spilled.

Estonia became a member of the United Nations on September 17, 1991 and is a signatory to a number of UN organizations and other international agreements, including IAEA, ICAO, UNCTAD, WHO, WIPO, UNESCO, ILO, IMF, and WB/EBRD. It is also a member of the Organization for Security and Cooperation in Europe (OSCE).

After more than 3 years of negotiations, on August 31, 1994, the armed forces of the Russian Federation withdrew from Estonia.

Modern Period: 1990s—Today

In 1992, a constitutional assembly introduced amendments to the 1938 constitution. After the draft constitution was approved by popular referendum, it came into effect July 3, 1992. Presidential elections were held on September 20, 1992, with Lennart Meri as victor. Lennart Meri served two terms as president, implementing many reforms during his tenure. Meri was constitutionally barred from a third term. Arnold Rüütel became president in 2001, Toomas Hendrick Ilves in 2006. Since fully regaining independence, Estonia has had 13 governments with 7 different prime ministers elected: Mart Laar, Andres Tarand, Tiit Vähi, Mart Siimann, Siim Kallas, Juhan Parts, and Andrus Ansip.

Estonia began to adopt free-market policies even before it declared independence in mid-1991 and has continued to pursue reform aggressively ever since. For example, the government set privatization as an early priority and has now completed the process of putting most major industries in private hands. After independence the Government of Estonia took steps to simplify the tax system. Tax evasion is now relatively low by regional standards. Income tax is levied at a flat rate, a principle supported by all the major parties except the Center Party, for which a progressive tax system remains a keystone policy. Budget performance is excep-

tionally strong; the IMF projected a surplus of 3.4% of GDP in 2006. An integral part of Estonia's transition to a market economy during the early 1990s involved reorienting foreign trade to the West and attracting foreign investment to upgrade the country's industry and commerce. In 1990, only 5% of Estonia's foreign trade was with the developed West; only 21% of this trade represented exports. About 87% of Estonia's trade was with the Soviet Union, and of that, 61% was with Russia. Estonia's main foreign trading partners today are Sweden, Finland, Germany and others in the West. Russia's share of Estonia's trade is less than 10%.

The introduction of the Estonian kroon in June 1992, with only U.S.$120 million in gold reserves and no internationally backed stabilization fund, proved decisive in stabilizing foreign trade. For stability, the kroon was pegged by special agreement to the deutsche mark (DM) at EKR8 = DM1 and later to the Euro. The new Estonian currency became the foundation for rational development of the economy. Money began to have clear value; the currency supply could be controlled from Tallinn, not Moscow; and long-term investment decisions could be made with greater confidence by both the state and private enterprise. The central bank is independent of the government but subordinate to the parliament. In addition to its president, the bank is managed by a board of directors, whose chair is also appointed by parliament.

The fall of the Soviet Union and the rapid contraction of Estonia's market to the East during the early 1990s caused Estonia's economy to shrink 36% from 1990 to 1994. But economic reforms in Estonia and the ability of its economy to reorient toward the West allowed Estonia's economy to pick up in 1995 with 4.6% growth and 4.0% growth in 1996. Russia's financial crisis in 1999 led to the only year of decline in Estonia's GDP since 1994—but the 0.7% decline was relatively small.

The 1994-2004 period was mainly dominated by the Estonian EU and NATO accession processes. Estonia was the first Baltic country to start direct accession talks with the EU. Estonia applied to join the EU in November 1995 and, while participating in accession negotiations, continued its program of major economic and social reforms. This gave Estonia a good opportunity to take into account EU objectives and to exploit the experience of existing EU member states when carrying out reforms. Examples of reform in the social area included the launch of unemployment insurance in 2002 and the 1999 implementation of the Occupational Safety and Health Act, which regulates safety and health requirements in the work place as well as the organizational aspects of the occupational health system.

In 1999, Estonia joined the World Trade Organization, adding to its previous membership of the IMF, World Bank and the European Bank for Reconstruction and Development.

In November 2002, Estonia was one of seven Central and East European countries to be invited to join NATO; it officially became a member of NATO on March 29, 2004. In just fifteen years since re-establishing independence, Estonia has proven itself to be an excellent Ally, having built a military capable of participating in ever more complex and distant military operations.

EU accession negotiations proceeded rapidly, and Estonia joined the EU in May 2004, along with nine other countries, including its Baltic neighbors. The final decision was conditional on the outcome of a national referendum which was held in September 2003 and returned a large majority in favor of membership.

Estonia has developed into a strong international actor, through its membership in the EU and NATO; it is a capable advocate and promoter of stability and democracy in the former Soviet Union and beyond. Estonian troops have been in Afghanistan since 2002 and Iraq since 2003. It participates in the NATO training mission in Iraq. Estonia also provides peacekeepers for international missions in both Bosnia and Kosovo and contributes to EU battlegroups and NATO Response Force rotations. It supports democratic developments in key countries of the former Soviet Union and beyond by providing training to government and law enforcement officials as well as non-governmental organizations. It has valuable experience to offer new democracies from its own recent history, and it works hard to promote democracy, freedom, and stability worldwide.

GOVERNMENT

Estonia is a parliamentary democracy, with a 101-member parliament (the Riigikogu) and a president who is elected indirectly by parliament or, if no candidate wins a two-thirds majority in parliament, by an electoral college composed of members of parliament and of local government representatives. Estonia holds presidential elections every five years. The last presidential election was in 2006. The President serves a maximum of two terms. The President is also the Supreme Commander of the National Defense of Estonia.

Parliamentary elections take place every four years; members are elected by proportional representation. The most recent elections took place on March 4, 2007. A party must gather at least 5% of the votes to take a seat in Parliament. EU citizens who are 18 years of age or older and registered in the Population Register may vote in European Parliament elections. In addition, non-citizen long-term residents may vote in local elections, although they may not run for office.

After parliamentary elections, the President traditionally asks the party with the most votes to form a new government. The President chooses the Prime Minister—usually the leader of the largest party or coalition in the Parliament—with the consent of the parliament to supervise the work of the government. The Estonian government has a total of 14 ministers.

At the local level, Estonians elect government councils by proportional representation. The individual councils vary in size, but election laws stipulate minimum size requirements depending on the population of the municipality.

Estonia's Supreme Court, the Riigikohus, has 19 justices, all of whom receive lifetime tenure appointments. The parliament appoints the Chief Justice on nomination by the President.

Estonians may vote via the Internet in local and parliamentary elections.

POLITICAL CONDITIONS

Currently, half a dozen parties represent Estonia's 1.3 million citizens. The Reform Party, Pro Patria and Res Publica Union, and the Social Democratic parties form the current government with 31, 19, and 10 seats in parliament, respectively. Other major parties include the Center Party, the Greens, and the People's Union.

Reform Party Chairman Andrus Ansip is the current Prime Minister of the coalition government.

Toomas Hendrik llves is the President of Estonia. He was a member of the Social Democrat Party, a former Ambassador to the United States, two-time Minister of Foreign Affairs, Estonian member of parliament, and a former member of the European Parliament. President Ilves narrowly defeated incumbent Arnold Rüütel in an electoral-college vote in September 2006, and he took office on October 9, 2006.

Estonia maintains an embassy in the United States at 2131 Massachusetts Avenue, NW, Washington DC 20008 (tel: [1] (202) 588-0101; fax: [1] (202) 588-0108). It operates a consulate at 600 Third Avenue, 26th Floor, New York, NY 10016-2001 (tel: [1] (212) 883-0636; fax: [1] (212) 883-0648).

ECONOMY

Estonia is considered one of the most liberal economies in the world, ranking 12th in the Heritage Foundation's 2007 Economic Freedom Index. Hallmarks of Estonia's free, market-based economy include a balanced budget, a flat-rate income tax system (the first in the world), a fully convertible currency pegged to the Euro, a competitive commercial banking sector, and a hospitable environment for foreign investment, including no tax on reinvested corporate profits (tax is not levied unless a distribution is made).

Estonia's liberal economic policies and macroeconomic stability have fostered exceptionally strong growth and better living standards than those of most new EU member states. The economy benefits from strong electronics and telecommunications sectors; the country is so wired that it is nicknamed E-stonia. Many bars and cafes across the country are equipped with wireless connections. Skype, designed by Estonian developers, offers free calls over the Internet to millions of people worldwide. Tourism has also driven Estonia's economic growth, with beautifully restored Tallinn already a Baltic tourist landmark. By the late 1990s, Estonia's trade regime was so liberal that adoption of EU and World Trade Organization (WTO) norms actually forced Estonia to impose tariffs in certain sectors, such as agriculture, which had previously been tariff-free. Openness to trade, rapid growth in investment, and an appreciating real exchange rate have resulted in large trade deficits in recent years. In 2006, exports and imports both grew rapidly, with growth reaching 24% and 29% year-on-year, respectively.

Estonia supplies more than 90% of its electricity needs with locally mined oil shale; however, it imports all of its natural gas and petroleum (roughly 30% of total energy consumption) from Russia. Alternative energy sources such as wood, peat, and biomass make up about 9% of primary energy production. An undersea electricity cable inaugurated in December 2006 allows Estonia to export electricity to Finland.

Notwithstanding these many achievements, the economy of Estonia still faces challenges. The income differential between Tallinn and the rest of the country has widened in recent years as the cost of living differential has narrowed. The formerly industrial northeast section of Estonia suffered from economic depression as a result of plant closings in the early 1990s, although even this region has experienced strong growth in the last two years.

The labor force is shrinking due to low birth rates and emigration. This tight labor market and the government's restrictive labor and immigration policies have led to wage pressure and challenges to future competitiveness. Inflation above 3% has forced the government to push back adoption of the Euro from its original target of 2007.

After enjoying double digit growth in recent years, 2007 GDP growth slowed to 7.1% and is expected to be around 2% for 2008 (Bank of Estonia estimate from April 2008). Prices are decreasing in the real estate sector, and there are signs of a slowdown in

private consumption growth. Rising prices of non-domestic goods, especially food, both from the EU and imported from third countries, have pushed inflation to 6.6%.

Foreign Trade

Estonia is part of the European Union, and its trade policy is conducted in Brussels.

Estonia's business attitude toward the United States is positive, and business relations between the two countries are increasing. The primary competition for American companies in the Estonian marketplace is European suppliers, especially Finnish and Swedish companies.

Total U.S. exports to Estonia in 2007 were $242 million, forming 1.2% of total Estonian imports. In 2007 the principal imports from the United States were boilers, machinery, vehicles, chemicals, mineral fuels, oils and electronics. Estonian exports to the United States were around $296 million in 2007, making the U.S. Estonia's fourth-largest export market outside of the EU. U.S. imports from Estonia are primarily mineral fuels and oils, electronic machinery, games and sports equipment, and fertilizers.

Estonia's economy benefits from its location at the crossroads of East and West. Estonia lies just south of Finland and across the Baltic Sea from Sweden, both EU members. To the east are the huge potential markets of northwest Russia. Estonia's modern transportation and communication links provide a safe and reliable bridge for trade with former Soviet Union and Nordic countries. Many observers also see a potential role for Estonia as a future link in the supply chain from the Far East into the EU.

Country Commercial Guides are available for U.S. exporters from the National Trade Data Bank's CD-ROM or via the Internet. Please contact STAT-USA at 1-800-STAT-USA for more information. Country Commercial Guides can be accessed via the World Wide Web at the U.S. Department of Commerce's site and at the U.S. Embassy in Tallinn's website at http://estonia.usembassy.gov/commguide.php. They also can be ordered in hard copy or on diskette from the National Technical Information Service (NTIS) at 1-800-553-NTIS. U.S. exporters seeking general export information/assistance and country-specific commercial information should contact the U.S. Department of Commerce, Trade Information Center by phone at 1-800-USA-TRAD(E) or by fax at 1-202-482-4473.

DEFENSE

Estonia's regular armed forces—the Estonian Defense Forces—in peacetime number about 3,800 (Army 3,300, Navy 300, Air Force 200) persons, of whom about 1,500 are conscripts. The President of Estonia is the Commander in Chief of the Estonian Defense Forces. The National Defense Council—composed of the Chairman of the Parliament, the Prime Minister, the Chief of the Defense Forces, the Defense Minister, the Minister of Internal Affairs, the Minister of Foreign Affairs, and the Chairman of the Parliamentary National Defense Committee—advises the President on national defense matters.

Estonia officially became a member of the North Atlantic Treaty Organization on March 29, 2004 after depositing its instruments of treaty ratification in Washington, DC. The United States and Estonia cooperate intensively in the defense and security field.

Estonian defense spending has increased 13% annually since 2001. The Government of Estonia has expressed a firm commitment to meet the NATO goal of spending 2% of GDP by 2010; its current defense budget is 1.8% of GDP. In 2007, Estonia had approximately 300 military personnel deployed to support UN, NATO, and coalition military operations around the world. That number represents almost 10% of Estonia's military, a good indication of Estonia's willingness and ability to contribute to global security. Estonia currently has troops in Afghanistan, Iraq, Kosovo, and Bosnia.

FOREIGN RELATIONS

Estonia is party to most major international organizations. It is a UN, EU, and NATO member and a strong ally and partner of the United States on all fronts. It is deeply committed to good transatlantic relations and to promoting democracy and free-market economic policy globally.

In the EU, Estonia's priorities include supporting continued EU enlargement; raising EU competitiveness through innovation; joining the Eurozone; developing a unified European energy policy; enhancing and fostering the European Neighborhood Policy; and improving the EU relationship with Russia.

Estonia has active development assistance programs in many of the former Soviet countries (with a focus on Georgia, Ukraine, and Moldova), as well as in Afghanistan.

U.S.-ESTONIA RELATIONS

The relationship between Estonia and the United States of America has been constant and strong since Estonia first became independent. The United States and Estonia are important allies and partners.

The United States recognized the Republic of Estonia on July 28, 1922. The first Estonian diplomatic mission in the United States was opened in the same year. It continued its activities throughout the period of occupation by the Soviet Union from 1940 to 1991. The U.S. Government recognized Estonia's diplomatic mission as a legal representative of the Republic of Estonia. Indeed, the recognition of the legal continuity of the Republic of Estonia has been the cornerstone of Estonian-U.S. relations.

The U.S. reopened its Embassy in Tallinn on September 4, 1991, soon after the restoration of Estonia's independence on August 20, 1991. Relations between the two countries have since developed at a rapid pace. In November 2006, President George W. Bush became the first sitting U.S. president to visit Estonia. During the visit, he announced the administration's intention to work with the U.S. Congress to make changes to the U.S. Visa Waiver Program, increasing security while facilitating entry for legitimate visitors and businesspeople from countries like Estonia.

President Bush nominated Stanley Davis Phillips at the end of 2006 to be Ambassador to Estonia. Vaino Reinart has been Estonia's Ambassador to the United States since September 2007. Estonia also is represented in the United States by a Consulate General in New York and four Honorary Consuls: Jaak Treiman in Los Angeles, Eric Harkna in Chicago, Irja Cilluffo in New Hampshire, and Paul Raidna in Seattle.

TRAVEL

Consular Information Sheet

October 28, 2008

Country Description: Estonia a stable democracy with an economy that has developed rapidly in recent years. Tourist facilities in Tallinn are comparable to other western European cities, but some amenities may be lacking in rural areas. Some goods and services may not be available outside of major cities.

Entry Requirements: A valid passport is required. Estonia is a party to the "Schengen" Agreement. As such, U.S. citizens may enter Estonia for up to 90 days for tourist or business purposes without a visa.

The passport should be valid for at least three months beyond the period of stay. For further details about travel into and within Schengen countries, please see our Schengen Fact Sheet. For further information concerning entry requirements and residency permits, contact the Estonian Embassy, located at 2131 Massachusetts Ave., NW, Washington, DC 20008, telephone (202)588-0101, or the Consulate General of Estonia in New York City, telephone (212) 883-0636. Visit the Embassy of Estonia web site at http://www.estemb.org for the most current visa information. American citizens who wish to reside in Estonia (e.g. for work, studies, retirement, etc.) can also consult with the Estonian Citizenship and Migration Board at http://www.mig.ee.

Safety and Security: Civil unrest generally is not a problem in Estonia, and there have been no incidents of terrorism directed toward American interests. Large public gatherings and demonstrations may occur on occasion in response to political issues, but these have been, with few exceptions, without incident in the past.

During periods of darkness, (roughly October through April), reflectors must be worn by pedestrians. Violators of this law may be subject to a fine of up to 600 EEK (Estonian Kroon), or up to 6,000 EEK if the pedestrian is under the influence of alcohol. Reflectors are inexpensive and are available at most supermarkets and many smaller shops. To meet legal requirements, the reflector's packaging must include a reference to European safety standard EN13356.

For the latest security information, Americans traveling abroad should regularly monitor the Department's Internet web site where the current Worldwide Caution Travel Alert, Travel Warnings and Travel Alerts can be found. Americans are reminded to remain vigilant with regard to their personal security and to exercise caution. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S., or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: Estonia is a relatively safe country, although crime in Tallinn's "Old Town" is an ongoing concern, particularly during the summer tourist season. Travelers should exercise the same precautions with regard to their personal safety and belongings they would take in major U.S. cities. The most common crimes encountered by foreign tourists are purse snatching, pick-pocketing, and mugging. Tourists are often targeted by individuals and small groups of thieves working together.

In public places such as the "Old Town," in particular the Town Hall Square ("Raekoja Plats"), as well as the airport, train stations, bus stations and the Central Market, one must exercise special care in safeguarding valuables against purse-snatchers and pickpockets. Valuables should never be left unattended in vehicles and car doors should be kept locked at all times. Some violent crime does occur, mainly at night and often in proximity to nightlife areas. Public drunkenness, car theft and break-ins also continue to be a problem in Tallinn.

The Estonian Police agencies are modern, well-equipped law enforcement entities on a standard comparable to most Western European police, with only isolated instances of corruption. However, large-scale reductions in the police force are scheduled for this year, which may decrease some of their capabilities. Many police officers speak only very limited English.

Credit card fraud is an ongoing concern, as is internet-based financial fraud and "internet dating" fraud. Travelers should take precautions to safeguard their credit cards and report any suspected unauthorized transaction to the credit card company immediately. Racially motivated verbal harassment and, on occasion, physical assault of Americans and other nationals of non-Caucasian ethnicity has occurred. If an incident occurs, it should be reported to the police and to the Embassy.

Information for Victims of Crime: The loss or theft of a U.S. passport abroad should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance.

The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

The local equivalent to the "911" emergency line in Estonia is: 112. The level of English spoken by the operator answering may be minimal.

Medical Facilities and Health Information: The quality of medical care in Estonia continues to improve but still falls short of Western standards. Estonia has many highly trained medical professionals, but hospitals and clinics still suffer from a lack of equipment and resources. Elderly travelers and those with health problems may be at increased risk. Visitors to forest areas in warm weather should also guard against tick-borne encephalitis. The U.S. Department of State is unaware of any HIV/AIDS entry restrictions for visitors to or foreign residents of Estonia.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's Internet site at http://wwwn.cdc.gov/travel.

For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation. In recent years, a number of American citizens have been disembarked from cruise ships and hospitalized due to serious medical problems. Holding a policy providing for medical evacuation coverage can be critical to ensure access to timely emergency medical care.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Estonia is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

Driving in Estonia can be more dangerous than in much of the United States. Many roads, especially in rural areas, are poorly lit and are not up to Western standards. Some drivers can be aggressive, recklessly overtaking vehicles and traveling at high speed, even in crowded urban areas. Despite strict Estonian laws against driving under the influence of alcohol, accidents involving intoxicated drivers are very frequent.

It is not uncommon for the police to set up checkpoints on major streets and highways; drivers should pull over when asked. Drivers should always remain alert to the possibility of drunk drivers and drunken pedestrians.

Estonian traffic laws require drivers to stop for all pedestrians in marked crosswalks. Nevertheless, Estonian motorists do not always comply with this regulation, and pedestrians should always be careful when crossing the streets. In rural areas, wild animals, such as deer and moose, and icy road conditions can create unexpected hazards. Dark-clothed or drunken pedestrians walking along unlit roads or darting across dimly-lit streets or highways pose a risk to unsuspecting drivers.

Winter roads are usually treated and cleared of snow, but drivers should remain vigilant for icy patches and large potholes.

Estonian laws against driving under the influence are strict and follow a policy of zero tolerance. Penalties are severe for motorists caught driving after consumption of even a small amount of alcohol. Local law requires that headlights be illuminated at all times while driving. Use of a seatbelts by all passengers is required, and children too small to be secure in seatbelts must use child car seats. The speed limit is 50 km/h in town and 90 km/h out of town unless otherwise indicated. A right turn on a red light is prohibited unless otherwise indicated by a green arrow.

According to Estonian law vehicles involved in accidents should not be moved to the side of the road until the police reach the scene. Americans planning to drive in Estonia must obtain an international driving permit prior to arrival.

For information about international driving permits, contact AAA or the American Automobile Touring Alliance. The Eesti Autoklubi (Estonian Auto Club—www.autoclub.ee), which is affiliated with AAA, provides emergency roadside assistance. Drivers do not need to be a member to receive assistance; however, the fees charged are higher for non-members.

The number to call for roadside vehicle assistance and towing service is 1888. For ambulance, fire or police assistance the number is 112. Please note that for both numbers, the level of English spoken by the operator answering may be minimal.

You may also visit the website of Estonia's national tourist office at http://www.visitestonia.com. For specific information concerning Estonian driving permits, vehicles inspections and road tax mandatory insurance, contact the Estonian Motor Vehicle Registration Center at http://www.ark.ee/atp. Additional information may be obtained from the website of the Estonian Road Administration at http://www.mnt.ee/atp, or from Baltic Roads at http://www.balticroads.net.

Aviation Safety Oversight: As there is no direct commercial air service between the United States and Estonia, the U.S. Federal Aviation Administration (FAA) has not assessed the EstonianCivil Aviation Authority for compliance with International Civil Aviation Organization (ICAO) aviation safety standards. For more information, travelers may visit the FAA's Internet web site at http://www.faa.gov.

Special Circumstances: Commercial and financial transactions in Estonia are increasingly automated and on-line. Cash is almost always acceptable. The national currency is the Estonian Kroon (EEK), the value of which is pegged to the Euro (15.65 EEK= 1 Euro). Most credit cards are widely recognized throughout the country. ATM machines are common and many U.S.-issued bankcards are compatible with them. Bank checks are virtually unknown, and checks drawn on a U.S. bank are of little use in the country. Estonia's customs authorities encourage the use of an ATA (Admission Temporaire/Temporary Admission) Carnet for the temporary admission of professional equipment, commercial samples, and/or goods for exhibitions and fair purposes.

ATA Carnet Headquarters, located at the U.S. Council for International Business, 1212 Avenue of the Americas, New York, NY 10036, issues and guarantees the ATA Carnet in the United States. For additional information call (212) 354-4480, send and email to acarnet@uscib.org, or visit http://www.uscib.org for details.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses.

Persons violating Estonian laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Estonia are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable both in Estonia as well as in the United States.

Dual Nationality: Estonian law requires that individual with dual nationality must choose between Estonian citizenship and his of her other citizenship at age 18. After that time, Estonian law does not permit the individual to carry passports of two (or more) different countries. However, the Estonian government reportedly has not regularly enforced this law in the past with respect to persons of Estonian background, and thus a number of individuals have continued to carry both Estonian and American passports. Any American citizen who also carries an Estonian passport should be aware that the Estonian government may not recognize the person as an American citizen in certain circumstances, thus limiting the consular services that can be provided by the U.S. Embassy (e.g. in case of arrest, etc.).

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in Estonia are encouraged to register with the U.S Embassy in Tallinn through the State Department's travel registration web site, and to obtain updated information on travel and security within Estonia.

Americans without Internet access may register directly with the U.S. Embassy in Tallinn by visiting in person. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency. The latest security information is available from the Embassy, including on its web site, http://estonia.usembassy.gov.

The U.S. Embassy is available 24 hours a day for emergency assistance for American citizens visiting or residing in Estonia. The Embassy is located approximately 1 km outside of Tallinn's "Old Town." The address is: Kentmanni 20, 15099 Tallinn, Estonia. The Embassy's main switchboard number is telephone (372) 668-8100.

The Consular Section can be reached directly at (372 668-8128, 8111, 8197 or 8129. The Consular Section's fax number is (372) 668-8267. The Consular Sections' email address for American Citizen Services is ACSTallin@state.gov. For after-hours emergencies, an Embassy Duty Officer may be contacted by mobile phone at (372) 509-2129, if dialing from the U.S., and 509-2129 if dialed from within Estonia. The Embassy's web site is http://estonia.usembassy.gov. The American Citizen Services Unit email address is ACSTallinn@state.gov.

Intercountry Adoption

November 2008

The information in this section has been edited from a report available through the U.S. Department of State Office of Children's Issues. For more information detailed, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov. Estonia is party to The Hague Convention on Protection of Children and Co-operation in Respect of Intercountry Adoption (Hague Adoption Convention).

Therefore all adoptions between Estonia and the United States must meet the requirements of the Convention and United States law implementing the Convention. For detailed information on these requirements for adoption, please review the *Intercountry Adoption* section of this publication and visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

Who Can Adopt? Adoption between the United States and Estonia is governed by The Hague Adoption Convention. Therefore to adopt from Estonia, you must first be found eligible to adopt by the United States Government. According to the Estonian Family Law only those children whose parents are deceased or whose parents have had their parental rights taken away may be adopted. There are few such children and long waiting lists of Estonian families who by law take precedence. Consequently, identifying a child for adoption can be lengthy (several years or more) as the number of children that can be adopted by foreigners is quite limited (only about 20 children a year). Since foreign parents with Estonian background are given preference over foreigners with no Estonian heritage, prospective adoptive parents should explain their ties to Estonia.

Residency Requirements: There are no residency requirements for prospective adoptive parents in Estonia.

Age Requirements: A prospective adoptive parent must be at least 25 years old. In exceptional cases, the Court may give permission to a younger person.

Marriage Requirements: Both single individuals and legally married couples can adopt. Married couples must have the written consent of the spouse. Per the Estonian Family Law Act, an adoption can occur without the consent of the spouse if the conjugal relations of the spouses have terminated and they live apart.

Income Requirements: Estonia does not have any income requirements for intercountry adoptions.

Other Requirements: Same-sex couples cannot adopt in Estonia.

Who Can Be Adopted? Because Estonia is party to The Hague Adoption Convention, children from Estonia must meet the requirements of the Convention in order to be eligible for adoption. In addition to Estonia's requirements, a child must meet the definition of a Convention adoptee for you to bring him or her back to the United States.

Abandonment Requirements: According to the Estonian Family Law only those children whose parents are deceased or whose parents have had their parental rights taken away may be adopted.

Estonia's Adoption Authority: Ministry of Social Affairs (Sotsiaal Ministeerium)

The Process: The first step in adopting a child from Estonia is to select an adoption service provider in the United States that has been accredited. Only these agencies and attorneys can provide adoption services between the United States and Estonia. Adoption Hope International is currently the only registered United States adoption agency working in Estonia.

The address and website for Adoption Hope International is:

Adoption Hope International, Inc.
284 Shoreward Drive
Myrtle Beach, SC 29579
http://www.adopts.com/estonia.html

After you choose an accredited adoption service provider, you apply to be found eligible to adopt (Form I-800A) by the USCIS. Once the United States Government determines that you are "eligible" and "suitable" to adopt, you or your agency will forward your information to the adoption authority in Estonia. Estonia's adoption authority will review your application to determine whether you are also eligible to adopt under Estonia's law.

Once prospective adoptive parents have been approved to adopt, the Ministry places them on a list and begins the process of locating a suitable match Once a match is found, the Ministry notifies the prospective adoptive parents (through the adoption agency).

According to the Estonian Family Law only those children whose parents are deceased or whose parents have had their parental rights taken away may be adopted. There are few such children and long waiting lists of Estonian families who by law take precedence. Consequently, identifying a child for adoption can be lengthy (several years or more) as the number of children that can be adopted by foreigners is quite limited (only about 20 children a year). Since foreign parents with Estonian background are given preference over foreigners with no Estonian heritage, prospective adoptive parents should explain their ties to Estonia.

The Ministry of Social Affairs cautions that prospective adoptive parents should not visit orphanages to locate a child since it is unlikely that the child they choose will be permitted to be adopted by foreigners. According to the new adoption law, intercountry adoptions may be processed through an adoption agency in the parents' home country which has signed an agreement with the Ministry. After you accept a match with a child, you will apply to the USCIS for provisional approval to adopt that

particular child (Form I-800). After this, your adoption service provider or you will submit a visa application to a Consular Officer at the United States Embassy. If the Consular office determines that the child appears eligible to immigrate to the United States, he/she will notify Estonia's adoption authority (Article 5 letter).

For Convention country adoptions, prospective adoptive parent(s) may not proceed with the adoption or obtain custody for the purpose of adoption until this takes place.

Role of the Adoption Authority: The Ministry of Social Affairs prepares the entire package of adoption documents for approval first by the Minister of Social Affairs and then for the county or city court to make the adoption decision.

Once prospective adoptive parents have been approved to adopt, the Ministry places them on a list and begins the process of locating a suitable match Once a match is found, the Ministry notifies the prospective adoptive parents (through the adoption agency).

Role of the Court: Estonian adoption law requires court approval of intercountry adoptions and the adoptive parents' presence at the court hearing when the adoption is finalized. The Domiciliary County Government's Children Protection officer represents the child's rights and will release the child into the adoptive parents' custody.

Role of Adoption Agencies: The adoption agency sends a letter of interest, on behalf of the prospective adoptive parents, to the Ministry of Social Affairs indicating the sex and age of the child(ren) they would be interested in adopting as well as information regarding the prospective adoptive parents' age and profession. Once a child is identified, the adoption agency notifies the prospective adoptive parents.

The adoption agency then notifies the Ministry of Social Affairs of the prospective adoptive parents' decision to accept or decline a proposed child. (It should be noted that no more than three successive children will be offered to the prospective adoptive parents.

Time Frame: Once a child has been identified, the adoption process takes approximately one year. This estimate includes matching the child and prospective parents, documentation, and the court hearing.

Adoption Application: The adoption agency forwards the letter of interest and the adoption application to the Ministry of Social Affairs.

Adoption Fees: While there is no official adoption fee in Estonia, some fees prospective adoptive parents should anticipate include court fees ($10 USD) and new Estonian passports ($25 USD).

In the adoption services contract that you sign at the beginning of the adoption process, your agency will itemize the fees and estimated expenses related to your adoption process.

Documents Required: The following is a list of documents needed for adoptions in Estonia:

- Home study;
- Medical examination indicating the prospective adoptive parents' state of health;
- Documents pertaining to the financial condition of the prospective adoptive parents;
- Copy of marriage certificate;
- Copies of the prospective adoptive parents' passports;
- Any other information the parents feel would be useful for the MSW to know, including family heritage, ties to Estonia, letters of reference, etc.; and
- Documents determining that there is no open criminal record of the prospective adoption parents.

For updates on document requirements and information on how to authenticate documents, visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

Bringing Your Child Home: Once your adoption is complete (or you have obtained legal custody of the child), there are a few more steps to take before you can head home. Specifically, you need to apply for several documents for your child before he or she can travel to the United States, such as a birth certificate, a passport or travel document for your child from the country in which he or she was born, and a U.S. Immigration Visa. For detailed and updated information on how to obtain these documents, review the *Intercountry Adoption* section on this publication and visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

Child Citizenship Act: For adoptions finalized abroad: The Child Citizenship Act of 2000 allows your new child to acquire American citizenship automatically when he or she enters the United States as lawful permanent residents. For adoptions finalized in the United States:

The Child Citizenship Act of 2000 allows your new child to acquire American citizenship automatically when the court in the United States issues the final adoption decree. To learn more, review the *Intercountry Adoption* section on this publication and visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

After Adoption: Estonia does not have any post-adoption requirements.

ETHIOPIA

Compiled from the October 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Federal Democratic Republic of Ethiopia

PROFILE

Geography

Area: 1.1 million sq. km (472,000 sq. mi.); about the size of Texas, Oklahoma, and New Mexico combined.
Cities: Capital—Addis Ababa (pop. 5 million). Other cities—Dire Dawa (237,000), Nazret (189,000), Gondar (163,000), Dessie (142,000), Mekelle (141,000), Bahir Dar (140,000), Jimma (132,000), Awassa (104,000).
Terrain: High plateau, mountains, dry lowland plains.
Climate: Temperate in the highlands; hot in the lowlands.

People

Nationality: Noun and adjective—Ethiopian(s).
Population: (2005) 77 million.
Annual growth rate: 2.7%.
Ethnic groups: (est.) Oromo 40%, Amhara 25%, Tigre 7%, Somali 6%, Sidama 9%, Gurage 2%, Wolaita 4%, Afar 4%, other nationalities 3%.
Religions: (est.) Ethiopian Orthodox Christian 40%, Sunni Muslim 45-50%, Protestant 5%, remainder indigenous beliefs.
Languages: Amharic (official), Tigrinya, Arabic, Guaragigna, Oromigna, English, Somali.
Education: Years compulsory—none. Attendance (elementary) 57%. Literacy—43%.
Health: Infant mortality rate—93/1,000 live births.
Work force: Agriculture—80%. Industry and commerce—20%.

Government

Type: Federal Republic.
Constitution: Ratified 1994.
Government branches: Executive—president, Council of State, Council of Ministers. Executive power resides with the prime minister. Legislative—bicameral parliament. Judicial—divided into Federal and Regional Courts.
Political subdivisions: 9 regions and 2 special city administrations: Addis Ababa and Dire Dawa.
Political parties: Ethiopian People's Revolutionary Democratic Front (EPRDF), the Coalition for Unity and Democracy Party (CUDP), the United Ethiopian Democratic Forces (UEDF), Oromo Federalist Democratic Movement (OFDM), and other small parties.
Suffrage: Universal starting at age 18.
Budget: (2006 est.) $3.4 billion.
Defense: $348 million (5.6% of GDP FY 2003).
National holidays: May 28.

Economy

Real GDP: (2006 est.) $13.3 billion.
Annual growth rate: (2006 est.) 9.6%.
Per capita income: (2006 est.) $130.
Average inflation rate: (2006 est.) 13%.
Natural resources: Potash, salt, gold, copper, platinum, natural gas (unexploited).
Agriculture: (47% of GDP) Products—coffee, cereals, pulses, oilseeds, khat, meat, hides and skins. Cultivated land—17%.
Industry: (12% of GDP) Types—textiles, processed foods, construction, cement, and hydroelectric power.
Trade: (2006 est.) Exports—$1.1 billion. Imports—$4.1 billion; plus remittances—official est. $400 million; unofficial est. $400 million.
Fiscal year: July 8-July 7.

GEOGRAPHY

Ethiopia is located in the Horn of Africa and is bordered on the north and northeast by Eritrea, on the east by Djibouti and Somalia, on the south by Kenya, and on the west and southwest by Sudan. The country has a high central plateau that varies from 1,800 to 3,000 meters (6,000 ft.-10,000 ft.) above sea level, with some mountains reaching 4,620 meters (15,158 ft.). Elevation is generally highest just before the point of descent to the Great Rift Valley, which splits the plateau diagonally. A number of rivers cross the plateau—

notably the Blue Nile flowing from Lake Tana. The plateau gradually slopes to the lowlands of the Sudan on the west and the Somali-inhabited plains to the southeast.

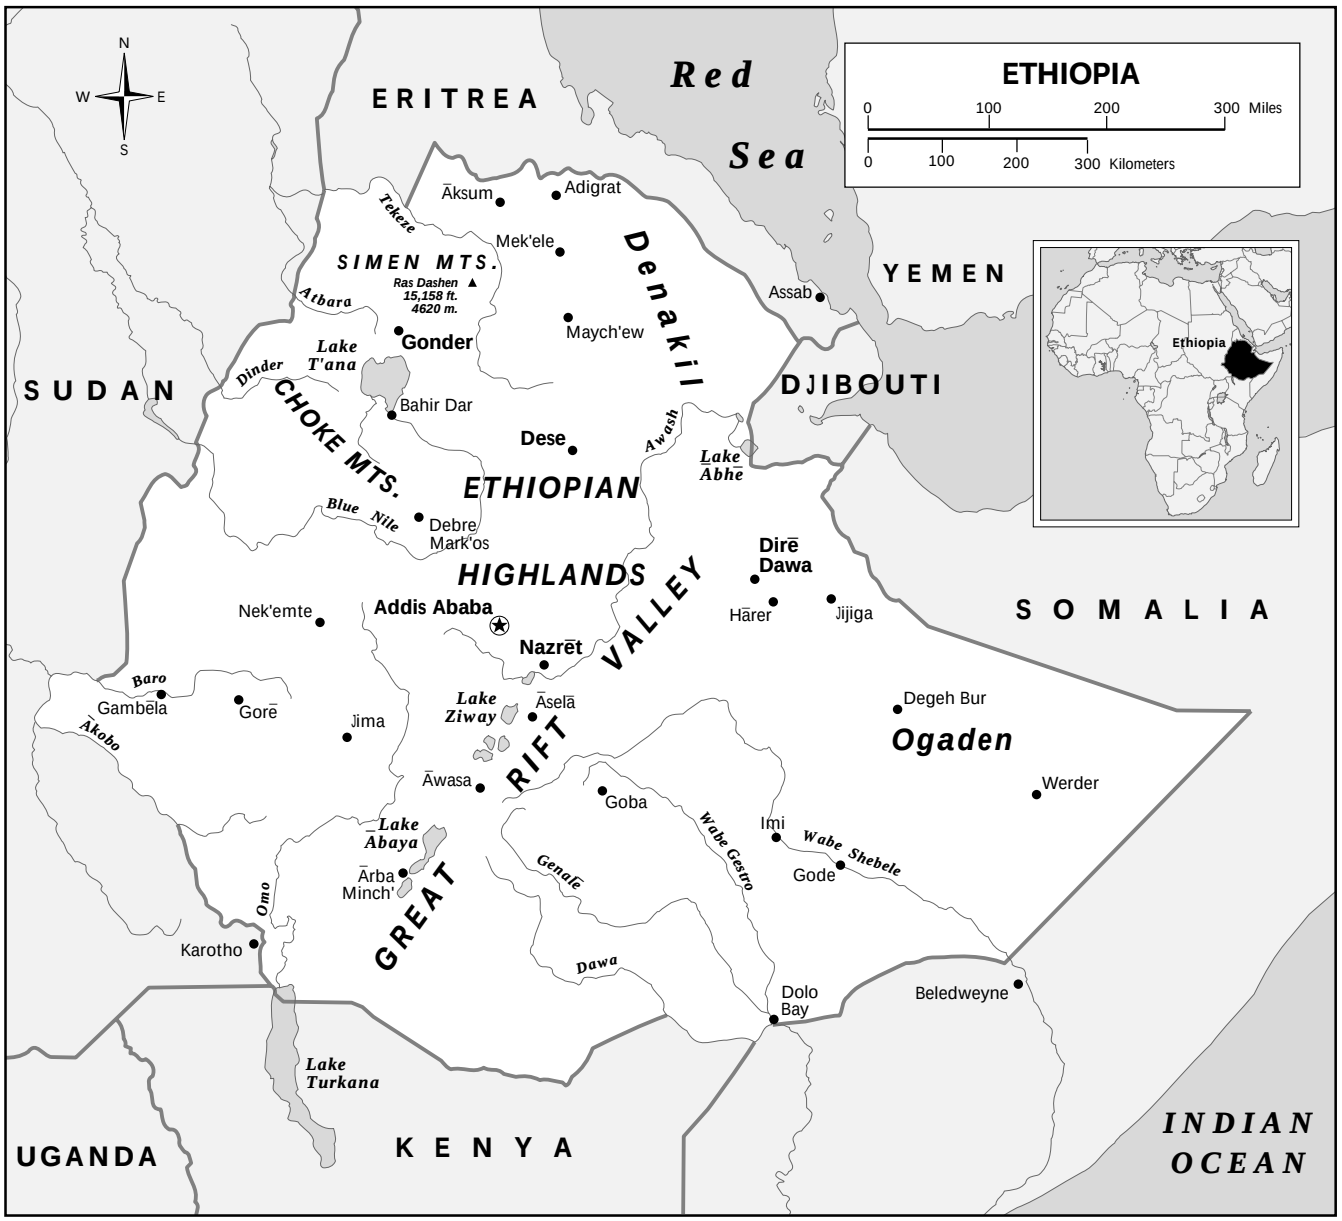
The climate is temperate on the plateau and hot in the lowlands. At Addis Ababa, which ranges from 2,200 to 2,600 meters (7,000 ft.-8,500 ft.), maximum temperature is 26o C (80o F) and minimum 4o C (40o F). The weather is usually sunny and dry with the short (belg) rains occurring February-April and the big (meher) rains beginning in mid-June and ending in mid-September.

PEOPLE

Ethiopia's population is highly diverse. Most of its people speak a Semitic or Cushitic language. The Oromo, Amhara, and Tigreans make up more than three-fourths of the population, but there are more than 77 different ethnic groups with their own distinct languages within Ethiopia. Some of these have as few as 10,000 members. In general, most of the Christians live in the highlands, while Muslims and adherents of traditional African religions tend to inhabit lowland regions. English is the most widely spoken foreign language and is taught in all secondary schools. Amharic is the official language and was the language of primary school instruction but has been replaced in many areas by local languages such as Oromifa and Tigrinya.

HISTORY

Ethiopia is credited with being the origin of mankind. Bones discovered in eastern Ethiopia date back 3.2 million years. Ethiopia is the oldest independent country in Africa and one of the oldest in the world. Herodotus, the Greek historian of the fifth century B.C. describes ancient Ethiopia in his writings. The Old Testament of the Bible records the Queen of Sheba's visit to Jerusalem. According to legend, Menelik I, the son of King Solomon and the Queen of Sheba, founded the Ethiopian Empire. Missionaries from Egypt and Syria introduced Christianity in the fourth century A.D. Following the rise of Islam in the seventh century, Ethiopia was gradually cut off from European Christendom. The Portuguese established contact with Ethiopia in 1493, primarily to strengthen their influence over the Indian Ocean and to convert Ethiopia to Roman Catholicism. There followed a century of conflict between pro- and anti-Catholic factions, resulting in the expulsion of all foreign missionaries in the 1630s. This period of bitter religious conflict contributed to hostility toward foreign Christians and Europeans, which persisted into the 20th century and was a factor in Ethiopia's isolation until the mid-19th century.



Under the Emperors Theodore II (1855-68), Johannes IV (1872-89), and Menelik II (1889-1913), the kingdom was consolidated and began to emerge from its medieval isolation. When Menelik II died, his grandson, Lij Iyassu, succeeded to the throne but soon lost support because of his Muslim ties. The Christian nobility deposed him in 1916, and Menelik's daughter, Zewditu, was made empress. Her cousin, Ras Tafari Makonnen (1892-1975), was made regent and successor to the throne. In 1930, after the empress died, the regent, adopting the throne name Haile Selassie, was crowned emperor. His reign was interrupted in 1936 when Italian Fascist forces invaded and occupied Ethiopia. The emperor was forced into exile in England despite his plea to the League of Nations for intervention. Five years later, British and Ethiopian forces defeated the Italians, and the emperor returned to the throne.

After a period of civil unrest, which began in February 1974, the aging Haile Selassie I was deposed on September 12, 1974, and a provisional administrative council of soldiers, known as the Derg ("committee") seized power from the emperor and installed a government, which was socialist in name and military in style. The Derg summarily executed 59 members of the royal family and ministers and generals of the emperor's government; Emperor Haile Selassie was strangled in the basement of his palace on August 22, 1975.

Lt. Col. Mengistu Haile Mariam assumed power as head of state and Derg chairman, after having his two predecessors killed. Mengistu's years in office were marked by a totalitarian-style government and the country's massive militarization, financed by the Soviet Union and the Eastern Bloc, and assisted by Cuba. From 1977 through early 1978 thousands of suspected enemies of the Derg were tortured and/or killed in a purge called the "red terror." Communism was officially adopted during the late 1970s and early 1980s with the promulgation of a Soviet-style constitution, Politburo, and the creation of the Workers' Party of Ethiopia (WPE).

In December 1976, an Ethiopian delegation in Moscow signed a military assistance agreement with the Soviet Union. The following April, Ethiopia abrogated its military assistance agreement with the United States and expelled the American military missions. In July 1977, sensing the disarray in Ethiopia, Somalia attacked across the Ogaden Desert in pursuit of its irredentist claims to the ethnic Somali areas of Ethiopia. Ethiopian forces were driven back deep inside their own frontier but, with the assistance of a massive Soviet airlift of arms and Cuban combat forces, they stemmed the attack. The major Somali regular units were forced out of the Ogaden in March 1978. Twenty years later, development in the Somali region of Ethiopia lagged.

The Derg's collapse was hastened by droughts and famine, as well as by insurrections, particularly in the northern regions of Tigray and Eritrea. In 1989, the Tigrayan People's Liberation Front (TPLF) merged with other ethnically based opposition movements to form the Ethiopian Peoples' Revolutionary Democratic Front (EPRDF). In May 1991, EPRDF forces advanced on Addis Ababa. Mengistu fled the country for asylum in Zimbabwe, where he still resides. In July 1991, the EPRDF, the

Oromo Liberation Front (OLF), and others established the Transitional Government of Ethiopia (TGE) which was comprised of an 87-member Council of Representatives and guided by a national charter that functioned as a transitional constitution. In June 1992 the OLF withdrew from the government; in March 1993, members of the Southern Ethiopia Peoples' Democratic Coalition left the government. In May 1991, the Eritrean People's Liberation Front (EPLF), led by Isaias Afwerki, assumed control of Eritrea and established a provisional government. This provisional government independently administered Eritrea until April 23-25, 1993, when Eritreans voted overwhelmingly for independence in a UN-monitored free and fair referendum. Eritrea was with Ethiopia's consent declared independent on April 27, and the United States recognized its independence on April 28, 1993.

In Ethiopia, President Meles Zenawi and members of the TGE pledged to oversee the formation of a multiparty democracy. The election for a 547-member constituent assembly was held in June 1994, and this assembly adopted the constitution of the Federal Democratic Republic of Ethiopia in December 1994. The elections for Ethiopia's first popularly chosen national parliament and regional legislatures were held in May and June 1995. Most opposition parties chose to boycott these elections, ensuring a landslide victory for the EPRDF. International and nongovernmental observers concluded that opposition parties would have been able to participate had they chosen to do so. The Government of the Federal Democratic Republic of Ethiopia was installed in August 1995.

In May 1998, Eritrean forces attacked part of the Ethiopia-Eritrea border region, seizing some Ethiopian-controlled territory. The strike spurred a two-year war between the neighboring states that cost over 100,000 lives. Ethiopian and Eritrean leaders signed an Agreement on Cessation of Hostilities on June 18, 2000 and a peace agreement, known as the Algiers Agreement, on December 12, 2000.

The agreements called for an end to the hostilities, a 25-kilometer-wide Temporary Security Zone along the Ethiopia-Eritrea border, the establishment of a United Nations peacekeeping force to monitor compliance, and the establishment of the Ethiopia Eritrea Boundary Commission (EEBC) to act as a neutral body to assess colonial treaties and applicable international law in order to render final and binding border delimitation and demarcation determinations. The United Nations Mission to Eritrea and Ethiopia (UNMEE) was established in September 2000. The EEBC presented its border delimitation decision on April 13, 2002. To date, neither Ethiopia nor Eritrea has taken the steps necessary to enable the EEBC to demarcate the border.

Opposition candidates won 12 seats in national parliamentary elections in 2001. Ethiopia held the most free and fair national campaign period in the country's history prior to May 15, 2005 elections. Unfortunately, electoral irregularities and tense campaign rhetoric resulted in a protracted election complaints review process. Public protests turned violent in June 2005. The National Electoral Board released final results in September 2005, with the opposition taking over 170 of the 547 parliamentary seats and 137 of the 138 seats for the Addis Ababa municipal council. Opposition parties called for a boycott of parliament and civil disobedience to protest the election results. In early November 2005, Ethiopian security forces responded to public protests by arresting scores of opposition leaders, as well as journalists and human rights advocates, and detaining tens of thousands of civilians in rural detention camps for up to three months. In December 2005, the government charged 131 opposition, media, and civil society leaders with capital offenses including "outrages against the constitution." Key opposition leaders and almost all of the 131 were pardoned and released from prison in the summer of 2007. Approximately 150 of the elected opposition members of parliament have taken their seats. Ruling and opposition parties have engaged in little dialogue since the opposition leaders were freed. Government harassment and intimidation prompted the major opposition parties to withdraw from the April 2008 elections for local officials and 39 seats in parliament. As a result, the ruling party won over 95% of all the positions, including all but one of the 138 seats of the Addis Ababa city council (a complete reversal of the 2005 results).

GOVERNMENT AND POLITICAL CONDITIONS

Ethiopia is a federal republic under the 1994 constitution. The executive branch includes a president, Council of State, and Council of Ministers. Executive power resides with the prime minister. There is a bicameral parliament; national legislative elections were held in 2005. The judicial branch comprises federal and regional courts.

Political parties include the Ethiopian People's Revolutionary Democratic Front (EPRDF), the Coalition for Unity and Democracy (CUD), the United Ethiopian Democratic Forces (UEDF), and other small parties. Suffrage is universal at age 18.

The EPRDF-led government of Prime Minister Meles Zenawi has promoted a policy of ethnic federalism, devolving significant powers to regional, ethnically based authorities. Ethiopia today has 9 semi-autonomous administrative regions and two special city administrations (Addis Ababa and Dire Dawa), which have the power to raise their own revenues. Under the present government, Ethiopians enjoy wider, albeit circumscribed, political freedom than ever before in Ethiopia's history.

Principal Government Officials

Last Updated: 11/12/08

President: **GIRMA Woldegiorgis**
Prime Minister: **MELES Zenawi**
Dep. Prime Min.: **ADDISU Legesse**
Dep. Prime Min.: **KASSU Ilala**
Min. of Agriculture & Rural Development: **ADDISU Legesse**
Vice Min. of Agriculture & Rural Development: **BELAY Ejigu**
Vice Min. of Agriculture & Rural Development: **GETACHEW Teklemedhin**
Vice Min. of Agriculture & Rural Development: **TEKALIGN Mamo**
Min. of Cabinet Affairs: **BERHANU Adelo**
Min. of Capacity Building: **TEFERA Walwa**
Min. of Culture & Tourism: **MOHAMOUD Dirir**
Min. of Defense: **KUMA Demeksa**
Min. of Education: **SNTAYEHU Weldemikael**
Min. of Energy & Mines: **ALEMAYEHU Tegenu**
Min. of Federal Affairs: **SIRAJ Fegisa**
Min. of Finance & Economic Development: **SUFIAN Ahmed**
Min. of Foreign Affairs: **SEYOUM Mesfin**
Min. of Health: **TEWODROS Adhanom**

Min. of Water Resources: **ASFAW Dingamo**
Min. of Women's Affairs: **HIRUT Dilebo**
Min. of Works & Urban Development: **KASSU Ilala**
Min. of Youth & Sports: **ASTER Mamo**
Governor, National Bank: **TEKLEWOLD Atnafu**
Ambassador to the US: **Samuel ASSEFA**
Permanent Representative to the UN, New York: **DAWIT Yohannes**

Ethiopia maintains an embassy in the U.S. at 3506 International Drive, NW, Washington, DC 20008 (tel. 202-364-1200) headed by Ambassador

Samuel Assefa. It also maintains a UN mission in New York and consulates in Los Angeles, Seattle (honorary), and Houston (honorary).

ECONOMY

The current government has embarked on a cautious program of economic reform, including privatization of state enterprises and rationalization of government regulation. While the process is still ongoing, so far the reforms have attracted only meager foreign investment, and the government remains heavily involved in the economy.

The Ethiopian economy is based on agriculture, which contributes 47% to GNP and more than 80% of exports, and employs 85% of the population. The major agricultural export crop is coffee, providing 35% of Ethiopia's foreign exchange earnings, down from 65% a decade ago because of the slump in coffee prices since the mid-1990s. Other traditional major agricultural exports are hides and skins, pulses, oilseeds, and the traditional "khat," a leafy shrub that has psychotropic qualities when chewed. Sugar and gold production has also become important in recent years. Ethiopia's agriculture is plagued by periodic drought, soil degradation caused by inappropriate agricultural practices and overgrazing, deforestation, high population density, undeveloped water resources, and poor transport infrastructure, making it difficult and expensive to get goods to market. Yet agriculture is the country's most promising resource. Potential exists for self-sufficiency in grains and for export development in livestock, flowers, grains, oilseeds, sugar, vegetables, and fruits.

Gold, marble, limestone, and small amounts of tantalum are mined in Ethiopia. Other resources with potential for commercial development include large potash deposits, natural gas, iron ore, and possibly oil and geothermal energy. Although Ethiopia has good hydroelectric resources, which power most of its manufacturing sector, it is totally dependent on imports for its oil. A landlocked country, Ethiopia has relied on the port of Djibouti since the 1998-2000 border war with Eritrea. Ethiopia is connected with the port of Djibouti by road and rail for international trade. Of the 23,812 kilometers of all-weather roads in Ethiopia, 15% are asphalt. Mountainous terrain and the lack of good roads and sufficient vehicles make land transportation difficult and expensive. However, the government-owned airline's reputation is excellent. Ethiopian Airlines serves 38 domestic airfields and has 42 international destinations.

Dependent on a few vulnerable crops for its foreign exchange earnings and reliant on imported oil, Ethiopia lacks sufficient foreign exchange earnings. The financially conservative government has taken measures to solve this problem, including stringent import controls and sharply reduced subsidies on retail gasoline prices. Nevertheless, the largely subsistence economy is incapable of meeting the budget requirements for drought relief, an ambitious development plan, and indispensable imports such as oil. The gap has largely been covered through foreign assistance inflows.

DEFENSE

The Ethiopian National Defense Forces (ENDF) numbers about 200,000 personnel, which makes it one of the largest militaries in Africa. During the 1998-2000 border war with Eritrea, the ENDF mobilized strength reached approximately 350,000. Since the end of the war, some 150,000 soldiers have been demobilized. The ENDF continues a transition from its roots as a guerrilla army to an all-volunteer professional military organization with the aid of the U.S. and other countries. Training in peacekeeping operations, professional military education, military training management, counter-terrorism operations, and military medicine are among the major programs sponsored by the United States. Ethiopia now has one peacekeeping contingent in Liberia.

FOREIGN RELATIONS

Ethiopia was relatively isolated from major movements of world politics until Italian invasions in 1895 and 1935. Since World War II, it has played an active role in world and African affairs. Ethiopia was a charter member of the United Nations and took part in UN operations in Korea in 1951 and the Congo in 1960. Former Emperor Haile Selassie was a founder of the Organization of African Unity (OAU), now known as the African Union (AU). Addis Ababa also hosts the UN Economic Commission for Africa. Ethiopia is also a member of the Intergovernmental Authority on Development, a Horn of Africa regional grouping.

Although nominally a member of the Non-Aligned Movement, after the 1974 revolution, Ethiopia moved into a close relationship with the Soviet Union and its allies and supported their international policies and positions until the change of government in 1991. Today, Ethiopia has very good relations with the United States and the West, especially in responding to regional instability and supporting war on terrorism and, increasingly, through economic involvement.

Ethiopia's relations with Eritrea remained tense and unresolved. Following a brutal 1998-2000 border war in which tens of thousands died on both sides, the two countries signed a peace agreement in December 2000. A five-member independent international commission—the Eritrea Ethiopia Boundary Commission (EEBC)—issued a decision in April 2002 delimiting the border. In November 2007 the EEBC issued a decision that the border was demarcated based on map coordinates (usual demarcation based on pillars on the ground had not yet occurred due to disagreement between Ethiopia and Eritrea) and disbanded. Ethiopia does not consider the border to be demarcated, though Eritrea does. In March 2008 the United Nations Mission in Ethiopia and Eritrea (UNMEE) peacekeeping mission began withdrawing from Eritrea

because Eritrea refused to allow UNMEE to secure fuel supplies for its operations. Both countries have stationed approximately 100,000 troops along the border, which has become more dangerous due to the pending departure of UNMEE. Both countries insist they will not instigate fighting, but both also remain prepared for any eventuality. Regarding its neighbor Somalia, the weakness of the Transitional Federal Government (TFG) and factional fighting in Somalia contributes to tensions along the boundaries of the two countries. Ethiopia has recently entered into a loose tripartite (nonmilitary) cooperation with Sudan and Yemen.

The irredentist claims of the extremist-controlled Council of Islamic Courts (CIC) in Somalia in 2006 posed a legitimate security threat to Ethiopia and to the TFG of Somalia. In December 2006, the TFG requested the assistance of the Ethiopian military to respond to the CIC's aggression. Within a few weeks, the joint Ethiopian-TFG forces routed the CIC from Somalia. Since then Ethiopia has stationed troops in Somalia (largely around Mogadishu), awaiting full deployment of the African Union's Mission in Somalia (AMISOM). Uganda and Burundi together have sent some 2,400 peacekeepers to Somalia—roughly one-third of AMISOM's planned deployment of 8,000 soldiers.

U.S.-ETHIOPIA RELATIONS

U.S.-Ethiopian relations were established in 1903 and were good throughout the period prior to the Italian occupation in 1935. After World War II, these ties strengthened on the basis of a September 1951 treaty of amity and economic relations. In 1953, two agreements were signed: a mutual defense assistance agreement, under which the United States agreed to furnish military equipment and training, and an accord regularizing the operations of a U.S. communication facility at Asmara.

Through fiscal year 1978, the United States provided Ethiopia with $282 million in military assistance and $366 million in economic assistance in agriculture, education, public health, and transportation. A Peace Corps program emphasized education, and U.S. Information Service educational and cultural exchanges were numerous.

After Ethiopia's revolution, the bilateral relationship began to cool due to the Derg's linking with international communism and U.S. revulsion at the Derg's human rights abuses. The United States rebuffed Ethiopia's request for increased military assistance to intensify its fight against the Eritrean secessionist movement and to repel the Somali invasion. The International Security and Development Act of 1985 prohibited all U.S. economic assistance to Ethiopia with the exception of humanitarian disaster and emergency relief. In July 1980, the U.S. Ambassador to Ethiopia was recalled at the request of the Ethiopian Government, and the U.S. Embassy in Ethiopia and the Ethiopian Embassy in the United States were headed by Charges d'Affaires.

With the downfall of the Mengistu regime, U.S.-Ethiopian relations improved dramatically. Legislative restrictions on assistance to Ethiopia other than humanitarian assistance were lifted. Diplomatic relations were upgraded to the ambassadorial level in 1992. Total U.S. Government assistance, including food aid, between 1991 and 2003 was $2.3 billion. The U.S. Government provided $474 million in assistance in FY 2007, $264 million of it for combating HIV/AIDS.

Today, Ethiopia is a strategic partner of the United States in the Global War on Terrorism. U.S. development assistance to Ethiopia is focused on reducing famine vulnerability, hunger, and poverty and emphasizes economic, governance, and social sector policy reforms. Some military training funds, including training in such issues as the laws of war and observance of human rights, also are provided.

TRAVEL

Consular Information Sheet

November 26, 2008

Country Description: The Federal Democratic Republic of Ethiopia is a developing country in East Africa. It is comprised of nine states and two city administrations (Addis Ababa and Dire Dawa). The capital is Addis Ababa. Tourism facilities can be found in the most populous regions of Ethiopia, but infrastructure is basic. The ruling EPRDF party and Prime

Minister Meles Zenawi maintain strong control of the government and economy. Despite several years of high economic growth, the country remains vulnerable to external economic shocks and recurring drought.

Entry Requirements: To avoid possible confusion or delays, travelers are advised to obtain a valid Ethiopian visa at the nearest Ethiopian Embassy prior to arrival, and must do so if entering across any land port-of-entry. For example: travelers wishing to enter Ethiopia from Kenya at the land border at Moyale, must obtain an Ethiopian visa first. Ethiopian visas ARE NOT available at the border crossing point at Moyale. Travelers should apply for Ethiopian visas at the Ethiopian Embassy in Nairobi or at other Ethiopian embassies in other countries. Ethiopian visas are available to U.S. citizens upon arrival at Bole International Airport in Addis Ababa. U.S. citizens may obtain one-month or three month, single-entry tourist visas or 10-day single-entry business visas upon arrival at Bole International Airport. This service is available only at Bole International Airport and is not available at any other ports of entry in Ethiopia. The visa fee at Bole International Airport is payable in U.S. dollars. Such visas can be extended by applying at the Main Immigration Office in Addis Ababa. Business visas of up to three-months validity can also be obtained at Bole International Airport upon arrival if the traveler has a sponsoring organization in Ethiopia that has made prior arrangements for issuance through the Main Immigration Office in Addis Ababa. Travelers whose entry visa expires before they depart Ethiopia, must obtain a visa extension and pay a monthly penalty fee of $20 USD per month. Such travelers may also be required to pay a court fine of up to 4000 ETB (USD $435) before being permitted to depart from Ethiopia. Travelers are required to pay the penalty fee before they will be able to obtain an exit visa (USD $20) permitting them to leave Ethiopia.

Individuals intending to stay in Ethiopia for a prolonged period of time are advised to contact the Ethiopian Embassy in Washington prior to traveling. The Ethiopian Embassy is located at 3506 International Drive NW, Washington, DC 20008; telephone (202) 364-1200; fax (202) 587-0195. For the most current visa information, visit the Embassy's web site at www.ethiopianembassy.org. Inquiries by Americans located overseas may be made at the nearest Ethiopian embassy or consulate.

Safety and Security: While Ethiopia is generally stable, domestic insurgent groups, extremists from Somalia, and the heavy military buildup along the northern border pose risks to safety and security, particularly along Ethiopia's border areas and in the Somali region. In the past year, there has been an increase in targeted bombings in Addis Ababa and in other parts of Ethiopia. In November 2008, the Government of Ethiopia issued a warning to its citizens alerting them of the potential for terrorist attacks and subsequently increased security measures to unprecedented levels.

Throughout Ethiopia: Americans are strongly advised to review their personal safety and security posture, to remain vigilant and to be cautious when frequenting prominent public places and landmarks. Targeted bombings in Addis Ababa and south eastern Ethiopia in 2008 resulted in numerous injuries and deaths. Americans are advised to avoid public gatherings and public places, including hotels, if possible, and using public transportation and transportation hubs. They are advised to beware of unattended baggage or packages left in any location, including in minibuses and taxis.

Ethiopia/Eritrea Border Area: Ethiopia and Eritrea signed a peace agreement in December 2000 that ended their border war. However, the border remains an issue of contention between the governments of Ethiopia and Eritrea. The border area is a militarized zone where there exists the possibility of armed conflict between Ethiopian and Eritrean forces. American citizens are advised to avoid travel in the areas along the Eritrean/Ethiopian border (within 50 km/30 miles of the Ethiopian/Eritrean border) because of the dangers posed by land mines and because of the possibility of conflict between Ethiopian and Eritrean defense forces. Due to abductions and banditry, Americans are advised to avoid travel within 30 miles of the Ethiopian-Eritrean border west of Adigrat to the Sudanese border, with the exception of the town of Axum, and within 60 miles east of Adigrat to the Djiboutian border. Embassy personnel are permitted to travel in these areas only on a case-by-case basis. Travel to the northern Afar Region towards the Eritrean border is also discouraged. Embassy personnel are permitted to travel there only on a case-by-case basis.

Somali Region: Since the mid-1990's the members of the Ogaden National Liberation Front (ONLF) have clashed with Ethiopian government forces near the city of Harar and in the Somali regional state, particularly in the Ogaden zones. In April 2007, the ONLF claimed responsibility for attacking a Chinese oil exploration installation south of Jijiga, in Ethiopia's Somali region. The attack resulted in deaths, kidnappings and the wounding of dozens of Chinese and Ethiopian citizens. In 2008, a hotel in the town of Jijiga was bombed and two hotels in the town of Negele Borena were bombed.

American citizens are reminded that the U.S. Embassy strongly discourages travel to Ethiopia's Somali region and that a Travel Warning for Somalia has been issued that advises against all travel to that country. Armed insurgent groups operate within the Somali, Oromiya and Afar regions of Ethiopia. In December 2006, the Ethiopian Government, at the invitation of the Transitional Federal Government of Somalia, began military operations against extremists in Somalia. As of November 2007, military operations continue in Mogadishu, where an African Union peacekeeping force, AMISOM, is deployed. In 2008, two staff members of a non-governmental organization (NGO) were abducted in the Somali region.

Gambella Region: Sporadic inter-ethnic clashes remain a concern throughout the Gambella region of western Ethiopia following outbursts of violence there in 2003 - 2004. There is a heavy military and police presence in the town of Gambella. While the security situation in the town of Gambella is calm, it remains unpredictable throughout the rest of the region, and violence could recur without warning. Travel to this region is discouraged.

Travel in Ethiopia via rail is discouraged due to past episodes of derailment, sabotage, and bombings. In southern Ethiopia along the Kenyan border, banditry and incidents involving ethnic conflicts are also common. Travelers should exercise caution when traveling to any remote area of the country, including the borders with Eritrea, Somalia, Kenya and Sudan. Ethiopian security forces do not have a widespread presence in those regions.

For the latest security information, Americans traveling abroad should regularly monitor the Department's Internet web site where the current Travel Warnings and Travel Alerts, including the Worldwide Caution Travel Alert, can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S. and Canada, or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: Pick-pocketing, "snatch and run" thefts, and other petty crimes are common in Addis Ababa. These are generally crimes of opportunity rather than planned attacks. Travelers should exercise caution in crowded areas and should avoid visiting the Mercato in Addis Ababa, a large open-air market. Violence in the Mercato has been on the rise. In 2008 an explosion in the Mercato killed several and wounded more than a dozen individuals. Also in 2008, there was a shooting in the Mercato. Travelers should limit the amount of cash they carry and leave valuables, such as passports, jewelry, and airline tickets in a hotel safe or other secure place. Travelers should keep wallets and other valuables where they will be less susceptible to pick-pockets.

Travelers should be cautious at all times when traveling on roads in Ethiopia. There have been reports of highway robbery, including carjacking, by armed bandits outside urban areas. Some incidents have been accompanied by violence. Travelers are cautioned to limit road travel outside major towns or cities to daylight hours and travel in convoys, if possible.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

There is no local equivalent to the "911" emergency line in Ethiopia. Distress calls should be made to the local police station, the telephone number of which can be obtained by calling directory assistance at 997. This is the number for directory assistance throughout Ethiopia. In Addis Ababa, the number for police is 991, for the fire brigade 939, and for an ambulance 907.

Medical Facilities and Other Health Information: Health facilities in Addis Ababa are very limited and are generally inadequate outside the capital. Even the best hospitals in Addis Ababa suffer from inadequate facilities, antiquated equipment, and shortages of supplies (particularly medicines). There is a shortage of physicians. Emergency assistance is limited. Psychiatric services and medications are practically nonexistent. Serious illnesses and injuries often require travelers to be medically evacuated from Ethiopia to a location where adequate medical attention is available. Such "medevac" services are very expensive and are generally available only to travelers who either have travel insurance that covers medevac services or who are able to pay in advance the considerable cost of such services (often in excess of USD 40,000). See Medical Insurance below. Travelers must carry their own supplies of prescription drugs and preventive medicines, as well as a doctor's note describing the medication. If the quantity of drugs exceeds that which would be expected for personal use, a permit from the Ministry of Health is required.

Malaria is prevalent in Ethiopia outside of the highland areas. Travelers who become ill with a fever or flu-like illness while traveling in a malaria-risk area and up to one year after returning home should seek prompt medical attention and explain to the health care provider their travel history and which anti-malarials they have been taking. For additional information on malaria, protection from insect bites, and anti-malarial drugs, please visit the CDC Travelers' Health web site at http://www.cdc.gov/malaria/index.htm.

Tuberculosis is an increasingly serious health concern in Ethiopia. For further information, please consult the CDC's Travel Notice on TB at http://wwwn.cdc.gov.

Ethiopia is a mountainous country and the high altitude may cause health problems, even for healthy travelers. Addis Ababa is located at an altitude of 8,300 feet. Travelers may experience shortness of breath, fatigue, nausea, headaches, and inability to sleep. Individuals with respiratory (including asthma) or heart conditions should consult with a health care professional before traveling to Ethiopia. Travelers to Ethiopia should also avoid swimming in any lakes, rivers, or still bodies of water. Most bodies of water have been found to contain parasites. Travelers should be aware that Ethiopia has a

high prevalence of HIV/AIDS. Ethiopia has had outbreaks of acute watery diarrhea, possible cholera, typhoid, or other bacterial diarrhea in the recent past, and the conditions for reoccurrences continue to exist. Further information on prevention and treatment of cholera and other diarrheal diseases can be found at the CDC web site at http://wwwn.cdc.gov/travel/contentDiseases.aspx.

Ethiopian authorities are monitoring the possibility of avian influenza following the deaths of poultry and birds; preliminary results are negative. For additional information on avian flu please visit the CDC website at http://www.cdc.gov/flu/avian.

The U.S. Department of State is unaware of any HIV/AIDS entry restrictions for visitors to or foreign residents of Ethiopia. Please verify with the embassy of Ethiopia before you travel.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's web site at http://wwwn.cdc.gov/travel/default.aspx. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith/en.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation. Specific medevac insurance, which generally covers evacuation of a patient from Ethiopia to a location where adequate medical attention is available, is often inexpensive and available through a variety of companies that can be accessed online. Medicare and Medicaid recipients are not covered overseas and are advised to purchase supplemental health and medical evacuation insurances.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Ethiopia is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

According to the World Health Organization (WHO), Ethiopia has the highest rate of traffic fatalities per vehicle in the world. Roads in Ethiopia are poorly maintained, inadequately marked, and poorly lighted. Road travel after dark outside Addis Ababa and other cities is dangerous and discouraged due to hazards posed by broken-down vehicles left in the road, pedestrians walking in the road, stray animals, and the possibility of armed robbery. Road lighting in cities is inadequate at best and nonexistent outside of cities. Excessive speed, unpredictable local driving habits, pedestrians and livestock in the roadway, and the lack of basic safety equipment on many vehicles are daily hazards on Ethiopian roads.

While travel during daylight hours on both paved and unpaved roads is generally considered safe, land mines and other anti-personnel devices can be encountered on isolated dirt roads that were targeted during various conflicts. Before undertaking any off-road travel, it is advisable to inquire of local authorities to ensure that the area has been cleared of mines.

Aviation Safety Oversight: The U.S. Federal Aviation Administration (FAA) has assessed the Government of Ethiopia's Civil Aviation Authority as being in compliance with International Civil Aviation Organization (ICAO) aviation safety standards for oversight of Ethiopia's air carrier operations. For more information, travelers may visit the FAA's Internet web site at http://www.faa.gov.

The Ethiopian government has closed air routes near the border with Eritrea and has referred to the airspace as a "no-fly zone." The FAA currently prohibits U.S. aircraft and U.S. pilots from flying in Ethiopian airspace north of 12 degrees north latitude, the area along the country's northern border with Eritrea. For complete information on this flight prohibition, travelers may visit the FAA's web site at http://www.faa.gov.

Special Circumstances: Ethiopia Ethiopia does not recognize dual nationality. The government of Ethiopia considers Ethiopians who have become naturalized U.S. citizens to be Americans. Such individuals are not subject to Ethiopian military service. The Ethiopian government has stated that Ethiopian-Americans in almost all cases are given the same opportunity to invest in Ethiopia as Ethiopians. Several years ago the government of Ethiopia arrested people of Eritrean origin who initially failed to disclose their U.S. citizenship. However, this has not occurred in recent years. Ethiopian officials have recently stated that Eritrean-Americans are treated as U.S. citizens and are not subject to arrest simply because of their ties to Eritrea.

Permits are required before exporting either antiques or animal skins from Ethiopia. Antique religious artifacts, including "Ethiopian" crosses, require documentation from the National Museum in Addis Ababa for export.

Foreign currency should be exchanged in authorized banks, hotels and other legally authorized outlets and proper receipts should be obtained for the transactions. Exchange receipts are required to convert unused Ethiopian currency back to the original foreign currency. Penalties for exchanging money on the black market range from fines to imprisonment. Credit cards are not accepted at most hotels, restaurants, shops, or other local facilities, although they are accepted at the Hilton and Sheraton Hotels in Addis Ababa. Some hotels and car rental companies, particularly in Addis Ababa, may require foreigners to pay in foreign currency or show a receipt for the source of foreign exchange if

paying in local currency. However, many hotels or establishments are not permitted to accept foreign currency or may be reluctant to do so. Ethiopian institutions have on occasion refused to accept 1996 series U.S. currency, although official policy is that such currency should be treated as legal tender.

Ethiopian law strictly prohibits the photographing of military installations, police/military personnel, industrial facilities, government buildings, and infrastructure (roads, bridges, dams, airfields, etc.). Such sites are rarely marked clearly. Travel guides, police, and Ethiopian officials can advise if a particular site may be photographed. Photographing prohibited sites may result in the confiscation of film and camera.

There is a risk of earthquakes in Ethiopia. Buildings may collapse due to strong tremors. General information about natural disaster preparedness is available via the Internet from the U.S. Federal Emergency Management Agency (FEMA) at http://www.fema.gov.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating Ethiopian laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Ethiopia are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in Ethiopia are encouraged to register with the U.S. Embassy through the State Department's travel registration website and to obtain updated information on travel and security within Ethiopia. Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency.

The U.S. Embassy is located at Entoto Avenue, P.O. Box 1014, in Addis Ababa, telephone: 251-11-124-2424; emergency after-hours telephone: 251-11-124-2400; consular fax: 251-11-124-2435; website: http://addisababa.usembassy.gov.

Intercountry Adoption

November 2008

The information in this section has been edited from a report available through the U.S. Department of State Office of Children's Issues. For more information detailed, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Ethiopia is not party to The Hague Convention on Protection of Children and Co-operation in Respect of Intercountry Adoption (Hague Adoption Convention).

Who Can Adopt? To bring an adopted child to United States from Ethiopia, you must be found eligible to adopt by the United States Government. For detailed information on these requirements for adoption, please review the *Intercountry Adoption* section of this publication and visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

In addition to the United States requirements for prospective adoptive parents, Ethiopia also has the following eligibility requirements for prospective adoptive parents.

Residency Requirements: There are no residency requirements for prospective adoptive parents:

Age Requirements: If single, the prospective adoptive parent must be at least 25 years old. If married, there is no minimum age. There is no maximum age limit; however, the practice is to limit the age difference between the prospective adoptive parent and the adopted child to no more than 40 years.

Marriage Requirements: The Ethiopian Government prefers to place children with married couples who have been married for at least five years.

Income Requirements: Prospective parent(s) must prove financial ability as determined by the Ethiopian courts, though there is no minimum income required.

Other Requirements: Gay and lesbian adoption, and/or adoption by same-sex couples is not allowed in Ethiopia, although the Ethiopian Government has occasionally approved such cases.

Who Can Be Adopted? Ethiopia has specific requirements that a child must meet in order to be eligible for adoption. You cannot adopt a child in Ethiopia unless he or she meets the requirements outlined below. In addition to these requirements, a child must meet the definition of an orphan under United States law for you to bring him or her home back to the United States.

The Ministry of Women's Affairs (MOWA) identifies orphans in need of permanent family placement through intercountry adoption. In general, orphans identified for intercountry adoption have been abandoned by their parents or have lost their parents to disease or other misfortune.

Relinquishment Requirements: The Contract of Adoption is signed between the child's legal guardian and the prospective adoptive parents or the agency representative. This contract is the basis for the issuance of the adoption decree which shows

that the guardian or the orphanage has relinquished their parental or guardian right to the child.

Abandonment Requirements: When a child is abandoned, by law it comes into the custody of the Government. When a child is found to have two HIV/AIDS-infected parents, or one living HIV/AIDS-infected parent, the Government routinely declares that the child is an orphan and assumes legal guardianship of the child.

Waiting Period: It is common for the Government of Ethiopia to require that a child be resident in an orphanage for three months before they can be adopted.

Ethiopian Adoption Authority: The Adoption Team in the Children and Youth Affairs office (CYAO) operating under the Ministry of Women's Affairs (MOWA)

The Process: Adoptive parents residing in Ethiopia face a few issues NOT faced by those living in the United States. Please see the bottom of this section for more details and considerations for adoptive parents living in Ethiopia. Private adoptions are permitted in Ethiopia, but discouraged by MOWA because they take place under local adoption rules and may bypass the process and protections put in place by the Government of Ethiopia relating to intercountry adoption. Information regarding private adoptions is also found at the end of this section.

The first step in adopting a child from Ethiopia is usually to select a licensed agency in the United States that can help with your adoption. Adoption service providers must be licensed by the United States state in which they operate.

Intercountry adoptions from Ethiopia are handled by the Adoption Team in the Children and Youth Affairs office (CYAO), a part of the Ministry of Women's Affairs (MOWA). There are several United States-based adoption agencies authorized by the Ethiopian Government to provide adoption services. All Ethiopian adoptions are full, final, and irrevocable under Ethiopian law. Private adoptions are allowed in Ethiopia; however, they are discouraged by MOWA because they take place under local rules and may bypass the Government of Ethiopia's guidelines for intercountry adoption.

MOWA has a list of adoption agencies authorized to provide adoption services. To bring an adopted child from Ethiopia to the United States, you must apply to be found eligible to adopt (Form I-600A) by the USCIS.

Prospective adoptive parents must take or send all of the required documents (see below), certified and authenticated, to the Ethiopian Embassy in Washington, D.C. for additional authentication. Once the Embassy has completed its authenticated, the completed packet is returned to the prospective adoptive parents. The prospective adoptive parents then forward the documents to MOWA, Children and Youth Affairs office, Adoption Team (CYAO). You can find their address in the Contacts section of this information.

The parents' dossier is then taken to the Claims and Authentication Section of the Protocol office at the Ministry of Foreign Affairs in Ethiopia to be authenticated. The parents' dossier is returned to CYAO where they then affix a summary sheet of vital information, then forwarded to the Adoption Committee for review and approval to adopt. Given the volume of work before the committee, it can take weeks before the Committee reviews a dossier. The Committee either approves or rejects the prospective adoptive parents, based on Ethiopian guidelines. Further investigation into the parents' qualifications is done if deemed necessary, and a recommendation is made. Only if all members of the committee agree, and sign the recommendation, is the request approved.

Upon approval, a child is selected and referred to the prospective parents to adopt, according to the parents' preferences for age and sex. The child must have its own dossier at MOWA. That dossier describes the child, the child's history, how the child came to be an orphan, and who has legal guardianship of the child.

At this time a notice seeking any other claimants to the child is published in the local press stating the child's name and the name of the adopting parents. Anyone opposed to the adoption must appear at MOWA by a certain date and time.

Upon acceptance of the referral, a Contract of Adoption is signed between the child's legal guardian and the adoptive parents, or the agency representative. The contract must be taken to the Inland Revenue Administration office to be stamped, which charges a nominal fee.

CYAO opens a file at the Federal First Instance Court to apply for an appointment date for the adoption hearing. The court date could be one or two months from the date of filing.

The process for finalizing the adoption (or gaining legal custody) in Ethiopia generally includes the following:

Role of the Adoption Authority: MOWA has all responsibility for all activities regarding children in the country, including intercountry adoption. MOWA approves the eligibility of prospective adoptive parents and oversees the selection of a child eligible for intercountry adoption. It also facilitates services after the adoption process is complete.

After the adoption is complete, MOWA prepares a request to the city of Addis Ababa for a new birth certificate and the office of Security, Immigration and Refugee Affairs for an Ethiopian passport in the child's new name.

Role of the Court: The Federal First Instance Court is where the adoption hearing will be scheduled and held. The court date could be one or two months from the date of the filing of that adoption petition. the Court generally is closed between 3 and 12 weeks between July and October. The dates change every year.

When the appointed court date arrives, the prospective parents or their agency's local representative will be asked to appear in court. Final decision can be handed down quickly, but delays of weeks are not uncommon. Adoptive parents must obtain at least two originals of the court decree. One will be retained by MOWA and one must be submitted to the United States Embassy for the visa application. The original submitted to the Embassy will be returned to the parents.

Role of Adoption Agencies: An adoption agency's United States and Ethiopian-based staff manage the adoption process in Ethiopia. American citizens who are adopting privately must complete all of the adoption steps unaided by adoption professionals.

Time Frame: Recent adoptions have generally taken between 6 to 24 months.

Adoption Fees:

- Authentication and translation of United States documents—$1 USD per page, but check with your adoption agency for up to date information on translation costs
- Document authentication stamps at the Claims and Authentication Section of the Protocol office, Ministry of Foreign Affairs, is 300 Ethiopian Birr per document
- Document certification by the United States Embassy—$30 per package
- Local birth certificate—$2 USD. Add $5 USD for expedited or same day service
- Birth certificate or document authentication by the Ministry of Foreign Affairs—$35 USD
- Ethiopian passport—$35 USD
- Adoption Agencies–The amount charged by the licensed adoption agencies to process Ethiopian adoptions is unknown. Some unscrupulous adoption facilitators have been known to charge additional costs beyond what the prospective adoptive parents expected. These fees are often charged after the parents have arrived in Ethiopia and have the children in their physical custody.

Documents Required: To adopt from Ethiopia, prospective adoptive parents must initially apply directly to the Ethiopian Embassy in the United States. All documents must be accompanied by an original translation into Amharic. Along with your application, you will be required to provide the following documents:

- A written statement of why an Ethiopian child is preferred;
- An original birth certificate(s) of the prospective adoptive parent(s);
- An original marriage license/certificate, if applicable. If originals are not available, certified copies must be authenticated by the Department of State. That authentication must also be accompanied by an original translation into Amharic;
- An original Ethiopian police clearance for each of the prospective adoptive parents;
- A medical certificate/clearance for each of the prospective adoptive parents;
- The original home study prepared by a qualified social worker;
- Evidence of economic status;
- Three letters of reference from friends, relatives, church or other sources describing your character, the stability of your marriage, and your ability to parent;
- Two passport-size photographs of the prospective adoptive parents;
- A Power of Attorney for the adoption agency if the adoptive parents do not come to Ethiopia together to oversee the process, or, if one parent comes to Ethiopia, the other parent must execute a power of attorney for him/her;
- Obligation of Adoption or Social Welfare Agency signed by the adoption agency, or private adopters, in which the parents agree to allow follow-up visits by a social worker and to submit the scheduled progress reports to the CYAO; and
- Verification by the adoption agency or home study organization on the child's qualification for naturalization under the prospective adoptive parents' state laws.

For updates on document requirements and information on how to authenticate documents, visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

Bringing Your Child Home: Once your adoption is complete (or you have obtained legal custody of the child), there are a few more steps to take before you can head home. Specifically, you need to apply for several documents for your child before he or she can travel to the United States, such as a birth certificate, a passport or travel document for your child from the country in which he or she was born, and a U.S. Immigration Visa.

For detailed and updated information on how to obtain these documents, review the *Intercountry Adoption* section on this publication and visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

Adoptive Parents Residing in Ethiopia: Adoptive parents residing in Ethiopia face a few issues not faced by those living in the United States. For detailed and updated information, visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

Child Citizenship Act: For adoptions finalized abroad: The Child Citizenship Act of 2000 allows your new child to acquire American citizenship automatically when he or she enters

the United States as lawful permanent residents. For adoptions finalized in the United States: The Child Citizenship Act of 2000 allows your new child to acquire American citizenship automatically when the court in the United States issues the final adoption decree.

To learn more, review the *Intercountry Adoption* section on this publication and visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

After Adoption: By Ethiopian law, the adoptive parents must submit post adoption reports at three months, six months, and one year. After the first year, the reports must be filed yearly until the child turns 18.

This is a commitment that the adopting parents, home study agency, and adopting agency must sign when submitting documents for the adoption.

FIJI

Compiled from the October 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Republic of the Fiji Islands

PROFILE

Geography

Area: 18,376 sq. km (7,056 sq. mi.).
Cities: Capital—Suva (pop. 172, 948), Lautoka (pop. 52,742), Nadi (pop. 42,712).
Terrain: Mountainous or varied.
Climate: Tropical maritime.

People

Nationality: Noun—Fiji Islander; adjective—Fiji or Fijian.*
Population: (2007 census): 827,900. Age structure: 35.4% under 14; 3.1% over 65.
Annual growth rate: (2006 est.) 0.83%.
Ethnic groups: Indigenous Fijian 57%, Indo-Fijian 37%.
Religions: Christian 52% (Methodist and Roman Catholic), Hindu 33%, Muslim 7%.
Languages: English (official), Fijian, Hindi.
Education: Literacy (2004)—93%.
Health: (2004) Life expectancy—overall, 67.8 years, male 66 years; female 70. Infant mortality rate—16/1,000.
Work force: Agriculture—67%.
*The term "Fijian" has exclusively ethnic connotations and should not be used to describe any thing or person not of indigenous Fijian descent.

Government

Type: Parliamentary democracy (overthrown by military coup in December 2006).
Independence (from U.K.) October 10, 1970.
Constitution: July 1997 (suspended May 2000, reaffirmed March 2001).
Government branches: Executive—president (head of state), prime minister (head of government), Cabinet. Legislative—bicameral parliament; upper house is appointed, lower house is elected. Judicial—Supreme Court and supporting hierarchy.
Political parties: Soqosoqo Duavata ni Lewenivanua (SDL), Fiji Labor Party (FLP), United People's Party (UPP), National Federation Party (NFP), National Alliance Party (NAP), Nationalist Vanua Tako Lavo Party (NVTLP), Soqosoqo ni Vakavulewa ni Taukei (SVT), General Voters Party (GVP), Conservative Alliance Matanitu Vanua (CAMV).

Economy

GDP: (2008 forecast) $3.3 billion.
GDP per capita: (2008 forecast nominal) $3,981.93.

GDP composition by sector: Services 59.7%, industry 30.4%, agriculture 9.9%.
Industry: Types—tourism, sugar, garments.

Trade: (2007) Exports—$779.96 million; sugar, garments, gold, fish, mineral water. Major markets—Australia, U.S., U.K., Japan, New Zealand. Imports—$1.86 billion; mineral products, machinery and transport equipment. Major sources—Singapore, Australia, New Zealand, Japan, U.S. ($29.9 million).
Government external debt: (2007 provisional) $209 million.

GEOGRAPHY

Fiji is comprised of a group of volcanic islands in the South Pacific lying about 4,450 km. (2,775 mi.) southwest of Honolulu and 1,770 km. (1,100 mi.) north of New Zealand. Its 322 islands vary dramatically in size. The largest islands are Viti Levu, about the size of the "Big Island" of Hawaii, and where the capital and 70% of the population are located, and Vanua Levu. Just over 100 of the smaller islands are inhabited. The larger islands contain mountains as high as 1,200 meters (4,000 ft.) rising abruptly from the shore.

Heavy rains—up to 304 cm. (120 in.) annually—fall on the windward (southeastern) sides of the islands, covering these sections with dense tropical forest. Lowlands on the western portions of each of the main islands are sheltered by the moun-

tains and have a well-marked dry season favorable to crops such as sugarcane.

PEOPLE

Most of Fiji's population lives on Viti Levu's coasts, either in Suva or in smaller urban centers. The interior of Viti Levu is sparsely populated due to its rough terrain.

Indigenous Fijians are a mixture of Polynesian and Melanesian, resulting from the original migrations to the South Pacific many centuries ago. The Indo-Fijian population grew rapidly from the 60,000 indentured laborers brought from India between 1879 and 1916 to work in the sugarcane fields. Thousands more Indians migrated voluntarily in the 1920s and 1930s and formed the core of Fiji's business class. Native Fijians live throughout the country, while Indo-Fijians reside primarily near the urban centers and in the cane-producing areas of the two main islands. Nearly all of indigenous Fijians are Christian; more than three-quarters are Methodist. Approximately 80% of Indo-Fijians are Hindu, 15% are Muslim, and around 6% are Christian.

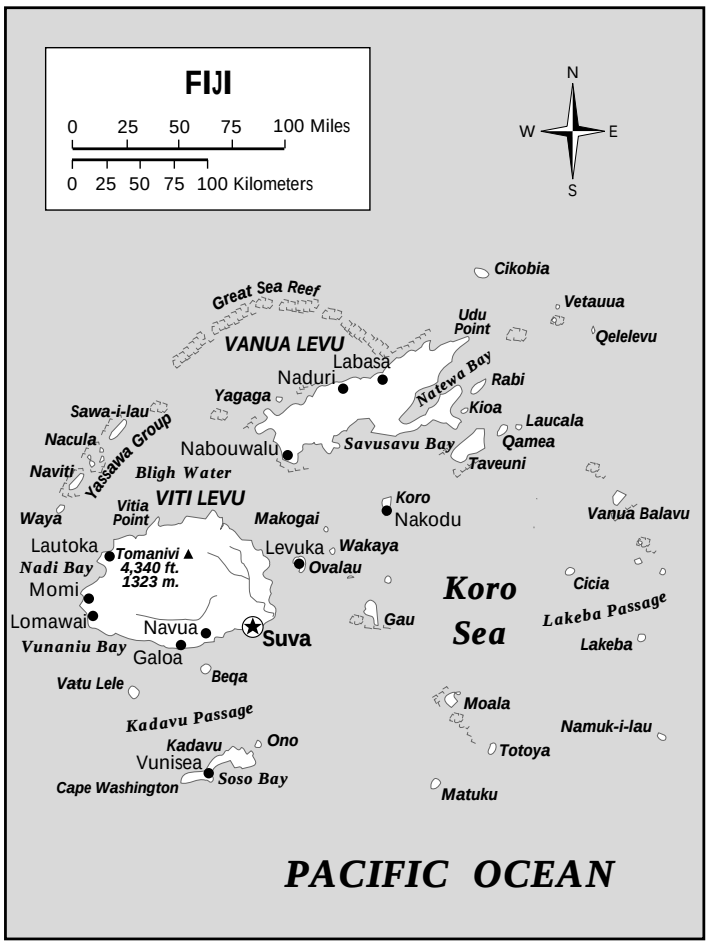
Some Indo-Fijians have been displaced by the expiration of land leases in cane-producing areas and have moved into urban centers in pursuit of jobs. Similarly, a number of indigenous Fijians have moved into urban areas, especially Suva, in search of a better life. Meanwhile, the Indo-Fijian population has declined due to emigration and a declining birth rate. Indo-Fijians currently constitute 37% of the total population, although they were the largest ethnic group from the 1940s until the late 1980s. Indo-Fijians continue to dominate the professions and commerce, while ethnic Fijians dominate government and the military.

HISTORY

Melanesian and Polynesian peoples settled the Fijian islands some 3,500 years ago. European traders and missionaries arrived in the first half of the 19th century, and the resulting disruption led to increasingly serious wars among the native Fijian confederacies. One Ratu (chief), Cakobau, gained limited control over the western islands by the 1850s, but the continuing unrest led him and a convention of chiefs to cede Fiji unconditionally to the British in 1874.

The pattern of colonialism in Fiji during the following century was similar to that in many other British possessions: the pacification of the countryside, the spread of plantation agriculture, and the introduction of Indian indentured labor. Many traditional institutions, including the system of communal land ownership, were maintained.

Fiji soldiers fought alongside the Allies in the Second World War, gaining a fine reputation in the tough Solomon Islands campaign. The United States and other Allied countries maintained military installations in Fiji during the war, but Fiji itself never came under attack.



In April 1970, a constitutional conference in London agreed that Fiji should become a fully sovereign and independent nation within the Commonwealth. Fiji became independent on October 10, 1970. Post-independence politics came to be dominated by the Alliance Party of Ratu Sir Kamisese Mara. The Indian-led opposition won a majority of House seats in 1977, but failed to form a government out of concern that indigenous Fijians would not accept Indo-Fijian leadership. In April 1987, a coalition led by Dr. Timoci Bavadra, an ethnic Fijian supported by the Indo-Fijian community, won the general election and formed Fiji's first majority Indian government, with Dr. Bavadra serving as Prime Minister. Less than a month later, Dr. Bavadra was forcibly removed from power during a military coup led by Lt. Col. Sitiveni Rabuka on May 14, 1987.

After a period of deadlocked negotiations, Rabuka staged a second coup on September 25, 1987. The military government revoked the constitution and declared Fiji a republic on October 10. This action, coupled with protests by the Government of India, led to Fiji's expulsion from the Commonwealth of Nations and official nonrecognition of the Rabuka regime from foreign governments, including Australia and New Zealand. On December 6, 1987, Rabuka resigned as head of state and Governor General Ratu Sir Penaia Ganilau was appointed the first President of the Fijian Republic. Mara was reappointed Prime Minister, and Rabuka became Minister of Home Affairs.

The new government drafted a new constitution that went into force in July 1990. Under its terms, majorities were reserved for ethnic Fijians in both houses of the legislature. Previously, in 1989, the government had released statistical information showing that for the first time since 1946, ethnic Fijians were a majority of the population. More than 12,000 Indo-Fijians and other minorities had left the country in the 2 years following the 1987 coups. After resigning from the military, Rabuka became prime minister in 1993 after elections under the new constitution.

Tensions simmered in 1995-96 over the renewal of land leases and political maneuvering surrounding the mandated 7-year review of the 1990 constitution. The Constitutional Review Commission produced a draft constitution that expanded the size of the legislature, lowered the proportion of seats reserved by ethnic group, and reserved the presidency for ethnic Fijians, but opened the position of prime minister to all races. Prime Minister Rabuka and President Mara supported the proposal, while the nationalist indigenous Fijian parties opposed it. The reformed constitution was approved in July 1997. Fiji was readmitted to the Commonwealth in October.

The first legislative elections held under the new constitution took place in May 1999. Rabuka's coalition was defeated by the Fiji Labor Party (FLP), which formed a coalition, led by Mahendra Chaudhry, with two small Fijian parties. Chaudhry

became Fiji's first Indo-Fijian prime minister. One year later, in May 2000, Chaudhry and most other members of parliament were taken hostage in the House of Representatives by gunmen led by ethnic Fijian nationalist George Speight. The standoff dragged on for 8 weeks—during which time Chaudhry was removed from office by the then-president due to his incapacitation. The Republic of Fiji military forces convinced President Mara to resign and brokered a negotiated end to the situation. Speight was later arrested when he violated the settlements' terms. In February 2002, Speight was convicted of treason and is currently serving a life sentence.

In July 2000, former banker Laisenia Qarase was named interim prime minister and head of the interim civilian administration by the military and Great Council of Chiefs. Ratu Josefa Iloilo was named President. The Supreme Court reaffirmed the validity of the constitution and ordered the Chaudhry government returned to power in March 2001, after which the President dissolved the Parliament elected in 2000 and appointed Qarase head of a caretaker government until elections could be held in August. Qarase's newly formed Soqosoqo Duavata ni Lewenivanua (SDL) party won the elections. In May 2006, the SDL was re-elected to a majority in the Parliament, Qarase continued as Prime Minister and formed a multi-party cabinet, which included nine members of the FLP.

In the lead-up to the May 2006 election and beginning again in September, tensions grew between Commander of the Fiji Military Forces Commodore Frank Bainimarama and the Qarase government. Bainimarama demanded the Qarase government not pursue certain legislation and policies. On December 5, 2006 Bainimarama removed elected Prime Minister Qarase from his position and dissolved Parliament in a military coup d'état. Bainimarama temporarily assumed the powers of the President, stating that the President was unable to discharge his responsibilities. Qarase was exiled to an outer island. On January 4, 2007, Bainimarama reinstated President Iloilo, who stated the military was justified in its behavior and promised them amnesty. The following day Iloilo appointed Bainimarama Prime Minister. Over the following weeks Bainimarama formed an "interim government" that included, among others, former Prime Minister Chaudhry and former Republic of Fiji Military Forces heads Epeli Ganilau and Epeli Nailatikau. On January 15, 2007, President Iloilo decreed amnesty to Bainimarama, the Republic of Fiji Military Forces (RFMF), and all those involved in the coup from December 5, 2006 to January 5, 2007, and he claimed to ratify all the actions of Bainimarama and the RFMF.

The coup was widely condemned by regional partners, including Australia, New Zealand, the United States, and the European Union. In April 2007, the interim government suspended the Great Council of Chiefs after the council declined to appoint the interim government's choice as vice president. In October 2007, the interim government launched a People's Charter initiative, ostensibly to remove communal or ethnic voting and improve governance arrangements. There has been little visible progress towards election. In October 2008, the High Court ruled that President Iloilo's January 2007 appointment of Bainimrama as prime minister, the granting of amnesty to coup perpetrators, and rule by decree, was not unconstitutional.

GOVERNMENT

Under the Fiji constitution, the president (head of state) is appointed for a 5-year term by the Great Council of Chiefs, a traditional ethnic Fijian leadership body. The president in

turn appoints the prime minister (head of government) and Cabinet from among the members of Parliament. Both houses of the legislature have some seats reserved by ethnicity. Other seats can be filled by persons of any ethnic group. The House of Representatives is elected; the Senate is appointed. Since the December 2006 coup, the self-appointed interim government has ruled by decree. Fiji maintains a judiciary consisting of a Supreme Court, a Court of Appeals, a High Court, and magistrate courts. All but one of the five judges on the Supreme Court also is a serving judge in Australia or New Zealand. Since the 2006 coup, a number of High Court and Court of Appeals justices have resigned, claiming interference in judicial affairs.

There are four administrative divisions—central, eastern, northern, and western—each under the charge of a divisional commissioner. Ethnic Fijians have their own administration in which councils preside over a hierarchy of provinces, districts, and villages. The 14 provincial councils deal with all matters affecting ethnic Fijians. There is also a Rotuma Island Council for the island of Rotuma. The Great Council of Chiefs (Bose Levu Vakaturaga) is made up of 55 hereditary chiefs, most of whom are nominated to the Council by their respective provincial councils. It is established under the Fijian Affairs Act and recognized by the constitution. The interim government promulgated regulations in February 2008 concerning membership in the Great Council of Chiefs that are being challenged in Fiji's courts.

Principal Government Officials

Last Updated: 11/12/08

The US has not recognized the interim government formed after the illegal coup of 5 December 2006.

President:

Vice President:

Prime Minister: **Josaia Voreqe BAINIMARAMA, Commodore**

Min. for Agriculture, Fisheries, & Forests: **Jainend KUMAR**

Min. for Commerce, Industry, Investment, & Communications: **Taito WARADI**

Min. for Education: **Netani SUKANAIVALU**

Min. for Fijian Affairs, Heritage, Provincial Development, & Multiethnic Affairs: **Epeli GANILAU**

Min. for Finance, National Planning, Public Enterprise, & Sugar Industry: **Mahendra Pal CHAUDHRY**

Min. for Foreign Affairs & External Trade: **Epeli NAILATIKAU**

Min. for Health: **Jona SENILAGAKALI**

Min. for Home Affairs & Immigration: **Josaia Voreqe BAINIMARAMA, Commodore**

Min. for Information: **Josaia Voreqe BAINIMARAMA, Commodore**

Min. for Justice, Electoral Reform, & Anticorruption: **Aiyaz SAYED-KHAIYUM**

Min. for Labor, Industrial Relations, Productivity, Tourism, & Environment: **Bernadette ROUNDS-GANILAU**

Min. for Lands & Mineral Resources: **Tevita VUIBAU**

Min. for Local Govt., Urban Development, & Public Utilities: **Jone NAVAKAMOCEA**

Min. for Public Service & Public Sector Reform: **Poseci BUNE**

Min. for Transport, Works, & Energy: **Manu KOROVULAVULA**

Min. for Women, Social Welfare, & Housing: **Adi Laufitu MALANI**

Min. for Youth, Sports, & Employment Opportunities: **Lekh Ram VAYESHNOI**

Attorney General: **Aiyaz SAYED-KHAIYUM**

Governor, Reserve Bank: **Savenaca NARUBE**

Charge d'Affaires, Embassy, Washington: **Penijamini Ravulolo Tuikubulau LOMALOMA**

Permanent Representative to the UN, New York:

Fiji maintains an embassy at 2000 M Street NW, Suite 710, Washington, DC 20036 (tel: 202-337-8320).

POLITICAL CONDITIONS

For 17 years after independence, Fiji was a parliamentary democracy. During that time, political life was dominated by Ratu Sir Kamisese Mara and the Alliance Party, which combined the traditional Fijian chiefly system with leading elements of the European, part-European, and Indian communities. The main parliamentary opposition, the National Federation Party, represented mainly rural Indo-Fijians. Intercommunal relations were managed without serious confrontation. However, when a cabinet with substantial ethnic Indian representation was installed after the April 1987 election, extremist elements played on ethnic Fijian fears of domination by the Indo-Fijian community resulting in a military coup d'etat.

This began what many now refer to as the "coup cycle." The most recent coup took place in December 2006, but has its roots in the previous 2000 coup and mutiny. Military commander Commodore Bainimarama helped resolve the 2000 crisis by imposing martial law. Prime Minister Laisenia Qarase led the interim government that followed. Subsequently, Qarase was elected in 2001 and 2006, but pursued some policies favoring the indigenous Fijian community.

One of the main issues of contention is land tenure. Indigenous Fijian communities very closely identify themselves with their land. In 1909 the land ownership pattern was frozen by the British and further sales prohibited. Today, 87% of the land is held by indigenous Fijians, under the collective ownership of the traditional Fijian clans (mataqali). That land cannot be sold and is held in trust by the Native Land Trust Board on behalf of the landowning units. Indo-Fijians produce more than 75% of the sugar crop but, in most cases, must lease the land they work from its ethnic Fijian owners instead of being able to buy it outright.

In 2005 and 2006, tensions rose between Bainimarama and Qarase over legislation proposed by the Qarase government concerning land ownership, traditional non-public ownership of the foreshore, and a reconciliation bill that opened the possibility to grant immunity to some coup participants from 2000. Bainimarama began to make demands and threats, and engaged in shows of military force to intimidate the Qarase

government into backing away from the controversial policies. When the Qarase government did not accede to all military demands, on December 5, 2006, Bainimarama assumed the powers of the presidency, dismissed Parliament, and declared a temporary military government.

Commodore Bainimarama's interim government has pursued what he terms a "clean-up campaign" to root out what he considers to be large-scale corruption in Fiji. A number of civil servants, including the Chief Justice, were summarily suspended or dismissed due to unidentified corruption concerns. Many individuals who spoke out against the coup were taken to military camps where they were questioned and sometimes abused.

ECONOMY

Fiji is one of the more developed of the Pacific island economies, although it remains a developing country with a large subsistence agriculture sector. For many years sugar and textile exports drove Fiji's economy. However, neither industry is competing effectively in globalized markets. Fiji's sugar industry suffers from quality concerns, poor administration, and the phasing out of a preferential price agreement with the European Union beginning in 2006/2007. The European Union has promised a large amount of financial aid to assist the ailing sugar industry, but, post-coup, has clarified that the aid will only be forthcoming if Fiji cleans up its human rights situation and moves quickly to democracy.

In 2005, the textile industry in Fiji markedly declined following the end of the quota system under the Agreement on Textiles and Clothing (ATC) and the full integration of textiles into WTO General Agreement on Trade and Tariffs. The income from garments plummeted by 43% in 2005 with the end of the ATC quotas. Garments now account for approximately 12% of Fiji's exports and sugar approximately 24%. Other important export crops include coconuts and ginger, although production levels of both are declining. Fiji has extensive mahogany timber reserves, which are only now being exploited. Fishing is an important export and local food source. Gold is also an important, albeit troubled, export industry for Fiji.

The most important manufacturing activities are the processing of sugar and fish. Since 2000 the export of still mineral water, mainly to the United States, has expanded rapidly. By the end of 2006, water exports totaled around U.S. $52 million per year, an increase of 28% over 2005 and an increase of 775% since 2000.

During 2007, GDP growth declined by 6.6%, largely as a result of the December 2006 coup. GDP growth rate in 2006 was 3.6%.

In recent years, growth in Fiji has been largely driven by a strong tourism industry. Tourism expanded rapidly since the early 1980s and is the leading economic activity in the islands. However, the December 2006 coup led to an overall decline in tourist arrivals during 2007. About one-third of Fiji's visitors come from Australia, with large contingents also coming from New Zealand, the United States, the United Kingdom, and Japan. In 2007, more than 62,000, or around 12%, of the tourists were American, a number that had steadily increased since the start of regularly scheduled nonstop air service from Los Angeles. In 2006, Fiji's gross earnings from tourism were about $445.9 million, an amount double the revenue from its two largest goods exports (sugar and garments). Gross earnings from tourism continue to be Fiji's major source of foreign currency.

Fiji runs a persistently large trade deficit, F$1.6 billion (U.S. $1.03 billion) for 2007, although tourism revenues yield a services surplus. Australia accounts for between 25% and 35% of Fiji's foods trade, with New Zealand, Singapore, the United States, the United Kingdom, and Japan varying year-by-year between 5% and 20% each. Since the 1960s, Fiji has had a high rate of emigration, particularly of Indo-Fijians in search of better economic opportunities. This has been particularly true of persons with education and skills. The economic and political uncertainties following the coups have added to the outward flow by persons of all ethnic groups. In recent years, indigenous Fijians also have begun to emigrate in large numbers, often to seek employment as home health care workers. Remittances from overseas workers, often undocumented, are second only to tourism as a source of foreign exchange earnings.

Inflation increased dramatically in 2008, reaching an 18-year high of 9.5% in August 2008. This was due to higher oil prices and the rise in global food prices.

FOREIGN RELATIONS

Fiji has traditionally had close relations with its major trading partners Australia and New Zealand. Currently, a number of countries including Australia, New Zealand, and the United States have placed targeted sanctions on the illegal interim government. Fiji has pursued closer relations with a number of Asian countries, including the People's Republic of China and India.

Since independence, Fiji has been a leader in the South Pacific region. Fiji hosts the secretariat of the 16-nation Pacific Islands Forum, as well as a number of other prestigious regional organizations. In 2002, Fiji hosted the Africa, Caribbean and Pacific (ACP) Summit with more than 80 countries represented. During the ACP Summit, the Nadi Declaration was adopted regarding economic cooperation with the European Union. In July 2003, Fiji hosted the South Pacific Games, a prestigious event that went far beyond athletics and symbolized the country's return to normalcy. In September 2005, Fiji hosted the 51st Commonwealth Parliamentary Association Conference. Fiji became the 127th member of the United Nations on October 13, 1970, and participates actively in the organization. Fiji's contributions to UN

peacekeeping are unique for a nation of its size. It maintains about 600 soldiers and police overseas in UN peacekeeping missions, primarily in Iraq, and with MFO Sinai in the Middle East. Fiji also has a number of private citizens working in Iraq and Kuwait, mostly in security services and over 1500 citizens serving in the British Army.

U.S.-FIJI RELATIONS

Relations between the elected government of Fiji and the United States were excellent. The United States has not recognized the interim government established by the illegal December 5, 2006 coup. Fiji maintains an embassy in Washington DC, as well as a Permanent Mission in New York at the United Nations. Although the United States provides relatively little direct bilateral development assistance, it contributes as a major member of a number of multilateral agencies such as the Asian Development Bank and the Secretariat of the Pacific Community. The U.S. Peace Corps, temporarily withdrawn from Fiji in 1998, resumed its program in Fiji in late 2003.

TRAVEL

Consular Information Sheet

October 24, 2008

Country Description: Fiji is a South Pacific island nation consisting of over 350 islands and islets, of which approximately 100 are inhabited. On December 5, 2006, the Commander of Fiji's military force deposed the lawfully elected government of Fiji. There is currently an unelected interim government in place established by the military. The coup has had a negative effect on Fiji's economy. Tourist facilities are available. The capital is Suva. The Fiji Visitors Bureau, which has a wide range of information of interest to travelers, can be contacted via the Internet at http://www.bulafiji.com.

Entry Requirements: A passport valid for at least three months beyond the date of departure from Fiji, proof of sufficient funds and an onward/return ticket are required for entry to Fiji. A visa is not required for tourist stays up to four months. Yachts wishing to call at the Lau group of islands need special permission granted at the first port of entry into Fiji. For further information on entry/exit requirements, travelers may contact the Embassy of the Republic of Fiji, 2233 Wisconsin Avenue, NW, No. 240, Washington, DC 20007; telephone (202) 337-8320, or the Fiji Mission to the United Nations in New York. This is particularly important for travelers planning to enter Fiji by sailing vessel.

Safety and Security: While a state of emergency is no longer in effect, some basic rights remain uncertain. The independence of Fiji's law enforcement and judicial systems appears compromised, putting into question protections ordinarily afforded by the rule of law. The Department of State continues to warn U.S. citizens to carefully consider the risks of travel to the Republic of Fiji at this time. While Fiji's country situation appears calm on the surface, political, economic, and security uncertainties continue. It is possible that the security situation, especially in Suva, could deteriorate rapidly. American citizens in Fiji should remain vigilant, particularly in public places and near military activities in the greater Suva area, and should avoid demonstrations and large crowds. Even demonstrations intended to be peaceful could turn confrontational and escalate into violence unexpectedly.

For the latest security information, Americans traveling abroad should regularly monitor the Department's Internet web site where the current Worldwide Caution Travel Alert, Travel Warnings and Travel Alerts can be found. Up-to-date information on security can also be obtained by calling 1-888-407-4747 toll free in the U.S., or, for callers outside the U.S. and Canada, a regular toll line at 1-202-501-4444.

Crime: Urban areas experience a higher incidence of crime than do other areas. Travelers should protect their valuables and be aware that theft from hotel rooms and purse snatching or pick-pocketing are the most common crimes against tourists. Offenses against persons do occur, and visitors should remain attentive to their personal safety. Tourists should be cautious about sharing too much personal information about their country of origin or lodging. Americans not familiar with their environs should ask hotel staff about areas to avoid at night. Visitors are advised not to walk alone after dark and not to walk alone in isolated areas at any time. Due to crime directed against taxi drivers, travelers should not allow taxis to pick up other passengers while en route and should not enter a taxi that already carries other passengers.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the U.S. Embassy in Suva, Fiji at (679) 331-

4466 (ask for American Citizen Services). If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, to contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney, if needed.

The local equivalent to the "911" emergency line in Fiji is 911.

Medical Facilities and Health Information: Health-care facilities in Fiji are adequate for routine medical problems. Emergency response is extremely limited, and the few ambulances available are poorly equipped and staffed. Two major hospitals, the Lautoka Hospital in the western city of Lautoka, and the Colonial War Memorial Hospital in Suva, provide limited emergency and outpatient services. A private hospital in Suva provides Western-style medical care, and maintains the Fiji Recompression Chamber for the benefit of scuba divers. Other hospitals and clinics provide only a limited range of health services. Medical emergencies may be referred to Australia, New Zealand, or the United States. Serious medical problems requiring hospitalization and/or medical evacuation to the United States or elsewhere can cost thousands of dollars. Doctors and hospitals expect immediate cash payment for health services.

Fiji may impose HIV/AIDS travel restrictions on some visa applicants for work permits. Applicants must obtain a medical clearance, and the work permit committee will make the decision to grant the permit on a case-by-case basis. Before traveling, please inquire directly with the Embassy of the Republic of Fiji, 2233 Wisconsin Avenue NW, No. 240, Washington, DC 20007; telephone (202) 337-8320, or the Fiji Mission to the United Nations in New York. Fiji is currently experiencing an increased number of Dengue fever cases, with almost 1,000 cases confirmed (but no deaths) since September 1, 2008. Dengue fever is a common disease caused by a virus that humans get by being bitten by infected mosquitoes (usually Aedes aegypti). For more information about Dengue fever, see the CDC website below.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747); or via the CDC's Internet site at http://www.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) website at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and if it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Fiji is provided for general reference only, and it may not be totally accurate in a particular location or circumstance.

Traffic moves on the left in Fiji. While most roads in urban areas are paved, they are poorly maintained. Roads outside the city are usually not paved. In the city, driving after dark requires heightened attentiveness; outside the city, it is discouraged, except in emergency or exceptional circumstances. Stray animals, unwary pedestrians, and potholes make driving dangerous and particularly hazardous at night. Visit the web site of the country's national tourist office and national authority responsible for road safety at http://www.bulafiji.com.

Aviation Safety Oversight: The U.S. Federal Aviation Administration (FAA) has assessed the government of Fiji's Civil Aviation Authority as being in compliance with International Civil Aviation Organization (ICAO) aviation safety standards for oversight of Fiji's air carrier operations. For further information, travelers may visit the FAA's Internet web site at http://www.faa.gov.

Water Sports: Many visitors to Fiji participate in water sports, including scuba diving, snorkeling, surfing, and operating jet-skis. The Embassy strongly recommends that anyone interested in scuba diving and snorkeling while in Fiji check the references, licenses, and equipment of tour operators before agreeing to or paying for a tour. Visitors should rent equipment only from reputable operators and should insist on sufficient training before using the equipment. Rental diving equipment may not always be properly maintained or inspected, and some local dive masters may fail to consider the skill levels of individual tourists when organizing dives. Deaths and serious mishaps have occurred in the past as a result of lack of attention to basic safety measures during diving and snorkeling trips. Surfing on Fiji's numerous reef breaks can be highly dangerous. Safety precautions and emergency response capabilities may not be up to U.S. standards. Fiji has only one decompression chamber, which is located in Suva, far from most resorts.

Trekking: Terrain in the Fiji islands can be hazardous. Please consult with local guides and/or your place of lodging before undertaking a trek. Americans are also advised to hike with a companion and not to stray from marked or well-worn paths.

Customs: Fiji's customs authorities may enforce strict regulations concerning temporary importation into, or export from, Fiji of items such as alcohol or tobacco products. It is advisable to contact the Embassy of

Fiji in Washington, DC at (202) 337-8320 for specific information regarding customs requirements. Importation of animals is strictly controlled. Pets may be imported only from designated, rabies-free locales. Those wishing to bring pets to Fiji should contact the Ministry of Agriculture in Suva as much as six months in advance for particulars.

Purchase of Real Estate: U.S. citizens should be aware of the risks inherent in purchasing real estate in Fiji, and should exercise caution before entering into any form of commitment to invest in property there. Investors must recognize the need to obtain authoritative information and to hire competent Fijian legal counsel when contemplating any real estate investment. Fijian law and practices regarding real estate differ substantially from those in the United States.

Notification of Arrest: U.S. citizens are encouraged to carry a copy of their U.S. passports with them at all times so, that if questioned by local officials, proof of identity and U.S. citizenship are readily available. According to Fijian law, a criminal detainee may be held for a maximum of 48 hours before being charged. Police authorities normally advise the U.S. Embassy of the detention or arrest of a U.S. citizen within 24 hours of the incident. Nevertheless, U.S. citizens who are detained are encouraged to request that a consular officer at the U.S. Embassy in Suva be notified.

Natural Disasters: Fiji is located in an area of high seismic activity. Although the probability of a major earthquake occurring during a particular trip is remote, earthquakes can and do occur. The cyclone season is November through April. The Fiji Meteorological Service maintains a Tropical Cyclone Warning Center (TCWC) in Nadi serving the Southwest Pacific Region. General information regarding disaster preparedness is available via the Bureau of Consular Affairs' web site, and from the U.S. Federal Emergency Management Agency (FEMA) home page at http://www.fema.gov.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses.

Persons violating Fijian laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Fiji are strict, and convicted offenders can expect jail sentences and heavy fines.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in Fiji are encouraged to register with the U.S. Embassy in Suva through the State Department's travel registration web site, and to obtain updated information on travel and security within Fiji. Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate. By registering, American citizens make it easier for the U.S. Embassy or Consulate to contact them in case of emergency. The U.S. Embassy is located at 31 Loftus Street in Fiji's capital city of Suva. The telephone number is (679) 331-4466; the fax number is (679) 330-2267. Information may also be obtained by visiting the U.S. Embassy's home page at http://suva.usembassy.gov/information_for_travelers.html.

FINLAND

Compiled from the September 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Republic of Finland

PROFILE

Geography

Area: 338,144 sq. km. (130,558 sq. miles); about the size of New England, New Jersey, and New York combined.

Cities: Capital—Helsinki (pop. 564,521). Other cities—Espoo (235,000), Tampere (204,000), Vantaa (189,711), Turku (175,286).

Terrain: Low but hilly, more than 70% forested; 188,000 lakes and 179,584 islands, 98,050 of which are in the lakes.

Climate: Northern temperate.

People

Nationality: Noun—Finn(s). Adjective—Finnish.

Population: (April 2008) 5.3 million.

Population growth rate: (2006) 0.4%.

Ethnic groups: Finns, Swedes, Lapps, Sami, Roma, Tatars.

Religions: Lutheran 82.5%, Orthodox 1.1%.

Languages: Finnish 91.5%, Swedish 5.5% (both official); small Lapp- (0.03%) and Russian-speaking (0.8%) minorities.

Education: Years compulsory—9. Attendance—almost 100%. Literacy—almost 100%.

Health: Infant mortality rate—2.8/1,000 (2006). Life expectancy—males 75.6 yrs., females 82.8 yrs.

Work force: (2.65 million; of which 2.44 million are employed) Public services—32.8%; industry—19%; commerce—15.6%; finance, insurance, and business services—13.8%; agriculture and forestry—4.7%; transport and communications—7.4%; construction—6.7%.

Government

Type: Constitutional republic.

Constitution: July 17, 1919; March 2000.

Independence: December 6, 1917.

Government branches: Executive—president (chief of state), prime minister (head of government), Council of State (cabinet). Legislative—unicameral parliament. Judicial—Supreme Court, regional appellate courts, local courts.

Political subdivisions: Six provinces, provincial self-rule for the Aland Islands.

Political parties: Social Democratic Party, Center Party, National Coalition (Conservative) Party, Leftist Alliance, Swedish People's Party, Green League, Christian Democrats, True Finns.

Suffrage: Universal at 18.

Economy (2007)

GDP: $245.3 billion (EUR 179 billion).

GDP growth rate: 4.4%.

Per capita income: $46,327 (EUR 33,803).

Inflation rate: 2.5% (2007 average); 3.9% (March 2008).

Natural resources: Forests, minerals (copper, zinc, iron), farmland.

Agriculture, forestry, fishing and hunting: (2.9% of GDP) Products—meat (pork and beef), grain (wheat, rye, barley, oats), dairy products, potatoes, rapeseed.

Industry: (30.1% of GDP) Types—metal (including electronics and electrical equipment) and engineering, forest products, chemicals, shipbuilding, foodstuffs, textiles.

Trade: Exports—$89.7 billion. Major markets—EU 57%, Russia 10.2%, U.S. 6.4%, China 3.3%. Imports—$81.5 billion. Major suppliers—EU 56%, Russia 14.1%, China 7.5%, U.S. 3.4%

HISTORICAL HIGHLIGHTS

The origins of the Finnish people are still a matter of conjecture, although many scholars argue that their original home was in what is now west-central Siberia. The Finns arrived in their present territory thousands of

years ago, pushing the indigenous Lapps into the more remote northern regions. Finnish and Lappish—the language of Finland's small Lapp minority—both are Finno-Ugric languages and are in the Uralic rather than the Indo-European family.

Finland's nearly 700-year association with the Kingdom of Sweden began in 1154 with the introduction of Christianity by Sweden's King Eric. During the ensuing centuries, Finland played an important role in the political life of the Swedish-Finnish realm, and Finnish soldiers often predominated in Swedish armies. Finns also formed a significant proportion of the first "Swedish" settlers in 17th-century America.

Following Finland's incorporation into Sweden in the 12th century, Swedish became the dominant language, although Finnish recovered its predominance after a 19th-century resurgence of Finnish nationalism. Publication in 1835 of the Finnish national epic, The Kalevala—a collection of traditional myths and legends—first stirred the nationalism that later led to Finland's independence from Russia.

In 1809, Finland was conquered by the armies of Czar Alexander I and thereafter remained an autonomous grand duchy connected with the Russian Empire until the end of 1917. On December 6, 1917, shortly after the Bolshevik Revolution in Russia, Finland declared its independence. In 1918, the country experienced a brief but bitter civil war that colored domestic politics for many years. During World War II, Finland fought the Soviet Union twice—in the Winter War of 1939-40 and again in the Continuation War of 1941-44. This was followed by the Lapland War of 1944-45, when Finland fought against the Germans as they withdrew their forces from northern Finland.

During the Continuation War (1941-1944) Finland was a co-belligerent with Germany. However, Finnish Jews were not persecuted. Of the approximately 500 Jewish refugees who arrived in Finland, eight were handed over to the Germans, for which Finland submitted an official apology in 2000. Also during the war, approximately 2,600 Soviet prisoners of war were exchanged for 2,100 Finnish prisoners of war from Germany. In 2003, the Simon Wiesenthal Center submitted an official request for a full-scale investigation by the Finnish authorities of the prisoner exchange. It was established there were about 70 Jews among the extradited prisoners but none was extradited as a result of ethnic background or religious belief.

Treaties signed in 1947 and 1948 with the Soviet Union included obligations and restraints on Finland vis-a-vis the U.S.S.R. as well as territorial concessions by Finland; both have been abrogated by Finland since the 1991 dissolution of the Soviet Union.

GOVERNMENT AND POLITICAL CONDITIONS

Finland has a mixed presidential/parliamentary system with executive powers divided between the president, who has primary responsibility for national security and foreign affairs, and the prime minister, who has primary responsibility for all other areas, including EU issues. Under the constitution that took effect in March 2000, the established practice for managing foreign policy is that the president keeps in close touch with the prime minister, the minister for foreign affairs, and other ministers responsible for foreign relations. Constitutional changes strengthened the prime minister—who must enjoy the confidence of the parliament (Eduskunta)—at the expense of the president. Finns enjoy individual and political freedoms, and suffrage is universal at 18. The country's population is relatively ethnically homogeneous. Immigration to Finland has significantly increased over the past decade, although the foreign-born population, estimated at only 2.2% of the total population, is still much lower than in any other EU country. Few tensions exist between the Finnish-speaking majority and the Swedish-speaking minority.

President and cabinet. Elected for a 6-year term, the president:

- Handles foreign policy, except for certain international agreements and decisions of peace or war, which must be submitted to parliament, and EU relations, which are handled by the prime minister;
- Is commander in chief of the armed forces and has wide decree and appointive powers;
- May initiate legislation, block legislation by pocket veto, and call extraordinary parliamentary sessions; and
- Appoints the prime minister and the rest of the cabinet (Council of State). The Council of State is made up of the prime minister and ministers for the various departments of the central government as well as an ex officio member, the Chancellor of Justice. Ministers are not obliged to be members of the Eduskunta and need not be formally identified with any political party.

The president may, upon proposal of the prime minister and after having heard the parliamentary groups, order parliament to be dissolved, and a new election held.

Parliament. Constitutionally, the 200-member, unicameral Eduskunta is the supreme authority in Finland. It may alter the constitution, bring about the resignation of the Council of State, and override presidential vetoes; its acts are not subject to judicial review. Legislation may be initiated by the president, the Council of State, or one of the Eduskunta members.

The Eduskunta is elected on the basis of proportional representation. All persons 18 or older, except military personnel on active duty and a few high judicial officials, are eligible for election. The regular parliamentary

term is 4 years; however, the president may dissolve the Eduskunta and order new elections at the request of the prime minister and after consulting the speaker of parliament.

Judicial system. The judicial system is divided between courts with regular civil and criminal jurisdiction and special courts with responsibility for litigation between the public and the administrative organs of the state. Finnish law is codified. Although there is no writ of habeas corpus or bail, the maximum period of pretrial detention has been reduced to 4 days. The Finnish court system consists of local courts, regional appellate courts, a Supreme Court, and a Supreme Administrative Court.

Administrative divisions. Finland consists of five provinces and the self-ruled province of the Aland Islands. Below the provincial level, the country is divided into cities, townships, and communes administered by municipal and communal councils elected by proportional representation once every 4 years. At the provincial level, the five mainland provinces are administered by provincial boards composed of civil servants, each headed by a governor. The boards are responsible to the Ministry of the Interior and play a supervisory and coordinating role within the provinces.

The island province of Aland is located near the 60th parallel between Sweden and Finland. It enjoys local autonomy and demilitarized status by virtue of an international convention of 1921, implemented most recently by the Act on Aland Self-Government of 1951. The islands are further distinguished by the fact that they are entirely Swedish-speaking. Government is vested in the provincial council, which consists of 30 delegates elected directly by Aland's citizens.

Military. Finland's defense forces consist of 35,000 persons in uniform (26,000 army; 5,000 navy; and 4,000 air force). The country's defense budget equals about 1.3% of GDP. There is universal male conscription under which all men serve from six to 12 months. As of 1995, women were permitted to serve as volunteers. A reserve force ensures that Finland can field 490,000 trained military personnel in case of need.

Political parties. Finland's proportional representation system encourages a multitude of political parties and has resulted in many coalition governments. Political activity by communists was legalized in 1944, and although four major parties have dominated the postwar political arena, none now has a majority position. In elections held in 2007, the Center Party (Keskusta), tradition-

ally representing rural interests, kept its position as the biggest party. The then-opposition Conservative Party, however, came away as the biggest winner, gaining 10 seats and becoming the second-largest political party in the country. The Center then formed a four-party governing coalition with the Conservatives and the Swedish People's Party and the Greens. The Social Democratic Party (SDP) suffered a defeat in these elections and fell to the third position among the big parties. Of the other parties, the True Finns, the Green League, and the Swedish People's Party were able to gain seats in parliament. The Conservative Party received the portfolios of foreign minister, finance minister, and defense minister, among others, and became an important player after a long interval.

Principal Government Officials

Last Updated: 11/12/08

Finland's embassy in the United States is located at 3301 Massachusetts Avenue, NW, Washington, DC 20008; tel: 202-298-5800; fax: 202-298-6030.

ECONOMY

Finland has a highly industrialized, free-market economy with a per capita output equal to that of other western economies such as France, Germany, Sweden, or the U.K. The largest sector of the economy is services (64.6%), followed by manufacturing and refining (32.3%). Primary production is at 3.2%.

The Finnish economy has made enormous strides since the severe recession of the early 1990s. Finland successfully joined the euro zone and has outperformed euro-area partners in terms of economic growth and public finance. In the last few years, the Finnish economy has performed reasonably well, and Finland is now into its third year of upswing. The upswing is, however, set to level off in 2008 and GDP growth is estimated to slow from 4.4% in 2007 to 2.8% in 2008. Unemployment decreased significantly from 1994 to 6.9% in 2007 and is expected to drop to 6.2% in 2008. A relatively inflexible labor market and high employer-paid social security taxes hamper growth in employment. Labor bottlenecks are becoming more common in certain sectors, and this will increasingly restrict growth in output in the future. The main constraint to medium-term economic growth will be the drop in the population of working age once the post-war baby boomers reach retirement age.

Exports of goods and services contribute 32% of Finland's GDP. Metals and engineering (including electronics) and timber (including pulp and paper) are Finland's main industries. The United States is Finland's third most important trading partner outside of Europe. With a 3.4% share of imports in 2007, the United States was Finland's ninth-largest supplier. The total value of U.S. exports to Finland in 2007 was $2.7 billion. Major exports from the United States to Finland continue to be machinery, telecommunications equipment and parts, metalliferous ores, road vehicles and transport equipment, computers, peripherals and software, electronic components, chemicals, medical equipment, and some agricultural products. The primary competition for American companies comes from Russia, Germany, Sweden, and China. The main export items from Finland to the United States are electronics, machinery, ships and boats, paper and paperboard, refined petroleum products, telecommunications equipment and parts. In 2007, the United States was Finland's fourth-largest customer after Germany (10.9%), Sweden (10.7%), and Russia (10.2%), with an export share of 6.4%, or $5.7 billion. However, trade is only part of the totality: the 10 biggest Finnish companies in the United States have a combined turnover that is three times the value of Finland's total exports to the United States. About 2.3% of the Finnish GDP comes from exports to the United States.

Except for timber and several minerals, Finland depends on imported raw materials, energy, and some components for its manufactured products. Farms tend to be small, but farmers own sizable timber stands that are harvested for supplementary income in winter. The country's main agricultural products are dairy, meat, and grains. Finland's EU accession has accelerated the process of restructuring and downsizing of this sector.

FOREIGN RELATIONS

Finland's basic foreign policy goal from the end of the Continuation War with the U.S.S.R. in 1944 until 1991 was to avoid great-power conflicts and to build mutual confidence with the Soviet Union. Although the country was culturally, socially, and politically Western, Finns realized they must live in peace with the U.S.S.R.

and take no action that might be interpreted as a security threat. The dissolution of the Soviet Union in 1991 opened up dramatic new possibilities for Finland and has resulted in the Finns actively seeking greater participation in Western political and economic structures. Finland joined the European Union in 1995.

Relations With the Soviet Union and With Russia

The principal architect of the post-1944 foreign policy of neutrality was J.K. Paasikivi, who was President from 1946 to 1956. Urho Kekkonen, President from 1956 until 1981, further developed this policy, stressing that Finland should be an active rather than a passive neutral. This policy is now popularly known as the "Paasikivi-Kekkonen Line."

Finland and the U.S.S.R. signed a peace treaty at Paris in February 1947 limiting the size of Finland's defense forces and providing for the cession to the Soviet Union of the Petsamo area on the Arctic coast, the Karelian Isthmus in southeastern Finland, and other territory along the former eastern border. Another provision, terminated in 1956, leased the Porkkala area near Helsinki to the U.S.S.R. for use as a naval base and gave free access to this area across Finnish territory.

The 1947 treaty also called for Finland to pay to the Soviet Union reparations of 300 million gold dollars (amounting to an estimated $570 million in 1952, the year the payments ended). Although an ally of the Soviet Union in World War II, the United States was not a signatory to this treaty because it had not been at war with Finland.

In April 1948, Finland signed an Agreement of Friendship, Cooperation, and Mutual Assistance with the Soviet Union. Under this mutual assistance pact, Finland was obligated—with the aid of the Soviet Union, if necessary—to resist armed attacks by Germany or its allies against Finland or against the U.S.S.R. through Finland. At the same time, the agreement recognized Finland's desire to remain outside great-power conflicts. This agreement was renewed for 20 years in 1955, in 1970, and again in 1983 to the year 2003, although the subsequent dissolution of the Soviet Union led to the agreement's abrogation.

The Finns responded cautiously in 1990-91 to the decline of Soviet power and the U.S.S.R.'s subsequent dissolution. They unilaterally abrogated restrictions imposed by the 1947 and 1948 treaties, joined in voicing Nordic concern over the coup against Soviet leader Mikhail Gorbachev, and gave increasing unofficial encouragement to Baltic independence.

At the same time, by replacing the Soviet-Finnish mutual assistance pact with treaties on general cooperation and trade, Finns put themselves on an equal footing while retaining a friendly bilateral relationship. Finland now is boosting cross-border commercial ties and touting its potential as a commercial gateway to Russia. It has reassured Russia that it will not raise claims for Finnish territory seized by the U.S.S.R. and continues to reaffirm the importance of good bilateral relations.

Multilateral Relations

Finnish foreign policy emphasizes its participation in multilateral organizations. Finland joined the United Nations in 1955 and the EU in 1995. As noted, the country also is a member of the North —Atlantic Treaty Organization's (NATO) Partnership for Peace as well as a member in the Euro-Atlantic Partnership Council. As a NATO partner, Finland had 100 troops in Afghanistan as of May 2008.

Finland is well represented in the UN civil service in proportion to its population and belongs to several of its specialized and related agencies. Finnish troops have participated in UN peacekeeping activities since 1956, and the Finns continue to be one of the largest per capita contributors of peacekeepers in the world. Finland is an active participant in the Organization for Security and Cooperation in Europe (OSCE) and in early 1995 assumed the co-chairmanship of the OSCE's Minsk Group on the Nagorno-Karabakh conflict. Finland chairs the OSCE in 2008 and is part of the Chairmanship Troika in 2007 and 2009.

Cooperation with the other Scandinavian countries also is important to Finland, and it has been a member of the Nordic Council since 1955. Under the council's auspices, the Nordic countries have created a common labor market and have abolished immigration controls among themselves. The council also serves to coordinate social and cultural policies of the participating countries and has promoted increased cooperation in many fields.

In addition to the organizations already mentioned, Finland became a member of the following organizations: Bank for International Settlements, 1930; International Monetary Fund, 1948; International Bank for Reconstruction and Development, 1948; General Agreement on Tariffs and Trade: (GATT), 1950; International Finance Corporation, 1956; International Development Association, 1960; European Free Trade Association, 1961; Asian Development Bank, 1966; Organization for Economic Cooperation and Development, 1969; Inter-American Development Bank, 1977; African Development Bank, 1982; Multilateral Investment Guarantee Agency, 1988; the Council of Europe, 1989; European Bank for Reconstruction and Development in Central and Eastern Europe, 1991; World Trade Organization, 1995; and INTELSAT, 1999. Finland entered Stage Three of EMU (the European Monetary Union) in 1999. All the Nordic countries, including Finland, joined the Schengen area in March 2001.

U.S.-FINLAND RELATIONS

Relations between the United States and Finland are warm. Some 200,000 U.S. citizens visit Finland annually, and about 5,000 U.S. citizens are res-

ident there. The United States has an educational exchange program in Finland which is comparatively large for a west European country of Finland's size. It is financed in part from a trust fund established in 1976 from Finland's final repayment of a U.S. loan made in the aftermath of World War I. Finland is bordered on the east by Russia and, as one of the former Soviet Union's neighbors, has been of particular interest and importance to the United States both during the Cold War and in its aftermath. Before the U.S.S.R. dissolved in 1991, longstanding U.S. policy was to support Finnish neutrality while maintaining and reinforcing Finland's historic, cultural, and economic ties with the West. The United States has welcomed Finland's increased participation since 1991 in Western economic and political structures. Following the dissolution of the Soviet Union, Finland has moved steadily toward integration into Western institutions and abandoned its formal policy of neutrality, which has been recast as a policy of military nonalliance coupled with the maintenance of a credible, independent defense. Finland's 1994 decision to buy 64 F-18 fighter planes from the United States signaled the abandonment of the country's policy of balanced arms purchases from East and West. The final aircraft rolled off the assembly line in August 2000.

In 1994, Finland joined NATO's Partnership for Peace; the country also is an observer in the North Atlantic Cooperation Council. Finland became a full member of the EU in January 1995, at the same time acquiring observer status in the Western European Union. Finland welcomes foreign investment. Areas of particular interest for U.S. investors are specialized high-tech companies and investments that take advantage of Finland's position as a gateway to Russia and the Baltic countries.

TRAVEL

Consular Information Sheet

May 23, 2008

Country Description: Finland is a highly developed democracy with a modern economy. It is a member of the European Union. Tourist facilities are widely available.

Entry Requirements: Finland is a party to the Schengen agreement. As such, U.S. citizens may enter FInland for up to 90 days for tourist or business purposes without a visa. The passport should be valid for at least three months beyond the period of stay. For further details about travel into and within Schengen countries, please see our fact sheet. Travelers can contact the Embassy of Finland at 3301 Massachusetts Avenue NW, Washington, DC 20008, tel.: (202) 298-5800, or the Finnish Consulates General in Los Angeles or New York. Additional information is available via the Internet at http://www.finland.org. The U.S. Embassy in Helsinki is not able to assist private U.S. citizens in obtaining any necessary visas for neighboring countries, including Russia and other countries of the former Soviet Union.

Safety and Security: Finland remains largely free of terrorist incidents. However, like other countries in the Schengen area, Finland's open borders with its Western European neighbors allow the possibility of terrorist groups entering/exiting the country with anonymity. Elements of organized crime groups operating in the former Soviet Union and Eastern Europe are present in Finland, but these do not represent a specific danger to U.S. citizen residents or tourists. Americans are reminded to remain vigilant with regard to their personal security and to exercise caution.

For the latest security information, Americans traveling abroad should regularly monitor the Department of State, Bureau of Consular Affairs' web site, where the current Travel Warnings and Travel Alerts including the Worldwide Caution Travel Alert, can be found.

Up to date information on security can also be obtained by calling 1-888-407-4747 toll free in the United States and Canada, or for callers outside the United States and Canada, a regular toll line at 1-202-501-4444.

Crime: Although the crime rate in Finland is low compared to the U.S. and most European countries, it has increased in recent years. However, Finland remains a relatively safe environment. Americans visiting Finland are seldom victims of crime, but visitors should not be complacent regarding personal safety or the protection of valuables. The same precautions employed in the U.S. should be followed in Finland. Finnish police services are excellent, however, some police officers speak little English. Due to the low crime rate, Finland has one of the lowest numbers of police of any European nation. Outside of key sites in major urban cen-

ters, they rarely project a visible presence; consequently, response times to crisis situations may be unpredictable. The telephone number for police and other emergency services throughout Finland is 112. All forms of public transportation are considered safe. Street crimes, such as muggings and pick-pocketing, remain relatively uncommon, but do occur.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, to contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

Finland has a program to provide financial compensation to victims who suffer serious criminal injuries. According to existing regulations, the victim must report the incident to the police and file an application for compensation within 10 years of the date of the crime. Finnish police routinely inform victims of serious crime of their right to seek compensation.

Medical Facilities and Health Information: In Finland, medical facilities and their staff are as a rule excellent and are widely available for emergency services. English is commonly spoken by Finnish medical personnel. Helsinki is a frequent medical evacuation point for emergency cases from the countries of the former Soviet Union. The public hospital system and many private hospitals honor foreign credit cards. Most pharmacies ("apteekki" in Finnish) are open during normal shopping hours and major cities have at least one 24-hour service pharmacy.

If you are a tourist or temporary visitor to Finland and you require immediate emergency medical assistance, you may visit a local medical center or clinic, called "ensiapuasema" (first-aid station) in Finnish. Usually these stations are located at hospitals and provide a full range of services.

The emergency telephone number, 112, can be used throughout Finland to contact emergency medical services. For more detailed information on medicines and medical issues, please visit the website of the Finnish Embassy in Washington, DC at www.finland.org.

Travelers with special medical needs should consult with their personal physicians and take appropriate precautions, including bringing adequate supplies of necessary medication. Medicines may be brought into the country as long as they are intended for the traveler's personal use. Medications categorized as narcotics may only be brought into the country to cover the traveler's personal use for a maximum of 14 days and must be accompanied by a medical certificate stating why the traveler needs them. There are special requirements concerning the quantity of doses that can be brought into the country. For more detailed information, please contact the Finnish Embassy in Washington, DC at http://www.finland.org.

In addition, stringent Finnish customs regulations prohibit travelers from receiving drugs from abroad after having arrived in the country. Travelers may also find local physicians reluctant to prescribe equivalent quantities of dosages.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's web site at http://wwwn.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at www.who.int/ith.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Finland is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

Finnish roads are comparable to those in the U.S., though secondary roads may be less heavily traveled due to Finland's sparse population outside the major urban areas. These secondary routes often narrow to two lanes with a wider shoulder. Slower vehicles are expected to move onto the shoulder to allow faster moving vehicles to pass.

Finland has an extensive network of highways throughout the country, as well as excellent public transportation services. A valid U.S. driver's license may be used while visiting Finland, but drivers must be at least 18 years of age. Driving in Finland is on the right. Traffic approaching from the right usually has priority, even if entering a primary roadway from a secondary one.

Road signs use standard international symbols and Finnish text. Many urban streets have traffic lanes reserved for public transportation only. Unless otherwise noted on traffic signs, the speed limit is 50 km/h in urban areas, 80 km/h on open roads, and 120 km/h on expressways during summer (reduced to 100 km/h during winter). Vehicles must use headlights at all times. Use of seatbelts is mandatory for drivers and all passengers. Minor children must be seated in approved child or booster seats. The emergency telephone number for

police/fire/ambulance in Finland is 112. Public transport in Finland is of good quality and is the recommended method of travel. Passenger trains, intercity buses, and air flights provide regular service over longer distances. Public transportation in urban centers includes buses, subways, trams, suburban trains, and taxis. Taxis are more expensive than in major U.S. cities. Most local residents use public transport in Helsinki as parking can be hard to find and expensive. The bus, train, and subway systems are relatively safe.

Travelers should be aware that drunk-driving laws are strict, and acceptable blood alcohol levels are much lower in Finland than in the U.S. Police strictly enforce all traffic laws and institute random roadside Breathalyzer tests. Those drivers who register a.05 or above alcohol content are subject to immediate arrest. Drivers should be aware that regulations and traffic signs differ significantly from those in the U.S. Visitors should be familiar with both prior to operating a vehicle in Finland. Driving in Finland during the winter months can be hazardous. Daylight hours are very short and one should be comfortable with driving in darkness. Icy road conditions are common. If driving in Finland, the vehicle must be winterized with studded snow tires, and engine heaters are strongly recommended. When driving at night, drivers must be alert to moose wandering onto major roadways. There have been incidents of moose being struck by vehicles, causing severe damage to the vehicle and injury, sometimes fatal, to the occupants. For real-time updates on road conditions throughout Finland, see the Finnish Road Administration's travel and traffic information web site at http://www.finnra.fi. Visit the website of the country's national tourist office and national authority responsible for road safety at http://www.mek.fi.

Aviation Safety Oversight: The U.S. Federal Aviation Administration (FAA) has assessed the Government of Finland's Civil Aviation Authority as being in compliance with International Civil Aviation Organization (ICAO) aviation safety standards for oversight of Finland's air carrier operations. For more information, travelers may visit the FAA's web site at http://www.faa.gov.

Special Circumstances: Commercial and financial transactions in Finland are increasingly automated and on-line. Cash is almost always acceptable (the currency is the euro) but most major credit cards are widely recognized. ATM machines are very common and many U.S.-issued bankcards are compatible with them. Checks drawn on a U.S. bank are of little use in Finland.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating Finland's laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Finland are strict and convicted offenders can expect jail sentences and heavy fines. Engaging in illicit sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in Finland are encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration web site at https://travelregistration.state.gov, and to obtain updated information on travel and security within Finland. Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency. The U.S. Embassy is located at Itainen Puistotie 14B. The telephone number for the American Citizen Services unit is 358-9-616-25-701, 0830 to 1700 Monday to Friday (after hours, 358-9-616-25-0); the fax number is 358-9-616-25-800; e-mail: HelsinkiACS@state.gov. The address of the Embassy's Internet home page is http://helsinki.usembassy.gov.

Intercountry Adoption

April 2006

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is based on public sources and current understanding. Questions involving foreign and U.S. immigration laws and legal interpretation should be addressed respectively to qualified foreign or U.S. legal counsel.

Important Note: Finnish law prohibits foreigners from adopting Finnish children. Thus, the information in this flyer relates more generally to the Finnish adoption process and is unlikely to be applicable to U.S. citizen prospective adoptive parents.

Patterns of Immigration: Because of the restrictions mentioned above, the U.S. Embassy in Helsinki has issued no immigrant visas to Finnish orphans in recent years.

Adoption Authority: Ministry of Social Affairs (MSA). This agency may be reached via the Internet at www.stm.fi.

Eligibility Requirements for Adoptive Parents: A prospective adoptive parent must be at least 25 years old and a permanent resident of Finland in order to adopt a Finnish

child. The prospective adoptive parent is not permitted to take the child out of the country to live. The prospective parent(s) can be married, single, divorced or widowed, but couples in common-law marriages are not eligible to adopt.

Residency Requirements: Prospective adoptive parents must be permanent residents of Finland.

Time Frame: The general time frame for an adoption in Finland may vary depending on the circumstances of the case. Persons considering an adoption in Finland should check with the Ministry of Social Affairs at www.stm.fi for an assessment of how long the case is likely to take.

Adoption Agencies and Attorneys: Because of the strict prohibitions against intercountry adoptions, there are no adoption agencies or attorneys in Finland handling intercountry adoptions.

Adoption Fees, Procedures and Documentary Requirements: The best source of this information is the Finnish Ministry of Social Affairs, which may be reached most easily via the Internet at www.stm.fi.

Embassy of Finland
3301 Massachusetts Ave., N.W.
Washington, DC 20008
Phone: 202-298-5800.

U.S. Immigration Requirements: Prospective adopting parents are strongly encouraged to consult USCIS publication M-249, *The Immigration of Adopted and Prospective Adoptive Children,* as well as the Department of State publication, *Intercountry Adoptions.* Please see the *Intercountry Adoption* section of this book for more details and review current reports online at http://adoption.state.gov.

U.S. Embassy:

Itainen Puistotie 14 B

00140 Helsinki, Finland

Phone: 358-9-6162 5730.

Additional Information: Specific questions about intercountry adoption in Finland may be addressed to the U.S. Embassy in Helsinki at HelsinkiIV@state.gov. General questions regarding intercountry adoption may be addressed to the Office of Children's Issues, U.S. Department of State, CA/OCS/CI, SA-29, 4th Floor, 2201 C Street, NW, Washington, D.C. 20520-4818, toll-free Tel: 1-888-407-4747.

FRANCE

Compiled from the August 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
French Republic

PROFILE

Geography

Area: 551,670 sq. km. (220,668 sq. mi.); largest west European country, about four-fifths the size of Texas.
Cities: Capital—Paris. Major cities—Marseille, Lyon, Toulouse, Strasbourg, Nice, Rennes, Lille, Bordeaux.
Terrain: Varied.
Climate: Temperate.

People

Nationality: Adjective—French.
Population: (July 2008 est.) 64,057,790 (including overseas territories); 60,876,136 (metropolitan).
Annual growth rate: (2007 est.) 2.1%.
Ethnic groups: Celtic and Latin with Teutonic, Slavic, North African, Sub-Saharan African, Indochinese, and Basque minorities.
Religions: Roman Catholic 85% (est.), Muslim 10% (est.), Protestant 2%, Jewish 1%.
Languages: French.
Education: Years compulsory—10. Literacy—99%.
Health: Infant mortality rate (2008)—3.36/1,000.
Work force: (2007, third quarter) 27.929 million: Services—74.7%; industry and commerce—22.0%; agriculture—3.2%.

Government

Type: Republic.
Constitution: September 28, 1958.
Government branches: Executive—president (chief of state); prime minister (head of government). Legislative—bicameral Parliament (577-member National Assembly, 319-member Senate). Judicial—Court of Cassation (civil and criminal law), Council of State (administrative court), Constitutional Council (constitutional law).
Political subdivisions: 22 administrative regions containing 96 departments (metropolitan France). Thirteen territories outside metropolitan France: four overseas departments which are also regions (French abbreviation is DOM-ROM)—Guadeloupe, Martinique, French Guiana, and Reunion; six overseas collectivities ("Collectivités d'Outre-mer" or COM)—French Polynesia, Wallis and Futuna Islands, Mayotte, Saint-Pierre and Miquelon, Saint-Martin and Saint-Barthelemy Islands; one overseas country of France ("Pays d'Outre-mer" or POM)—New Caledonia; and the French Southern and Antarctic Territories and the atoll of Clipperton.
Political parties: Union for a Popular Movement (UMP—a synthesis of center-right Gaullist/nationalist and free-market parties); Socialist Party; New Center (former UDF centrists now affiliated with the UMP); Democratic Movement (former UDF centrists loyal to MoDem President Francois Bayrou); Communist Party; extreme right National Front; Greens; various minor parties.
Suffrage: Universal at 18.

Economy

GDP: (2007) $2.593 trillion.
Avg. annual growth rate: (2007) 2.1%, compared with 2.4% in 2006.
Per capita GDP at PPP: (2007) $33,200.
Agriculture: Products—grains (wheat, barley, corn); wines and spirits; dairy products; sugar beets; oilseeds; meat and poultry; fruits and vegetables.
Industry: Types—aircraft, electronics, transportation, textiles, clothing, food processing, chemicals, machinery, steel.
Trade: (est.) Exports (2007)—$550 billion (f.o.b.): automobiles, aircraft and aircraft components, pharmaceuticals, automobile equipment, pharmaceuticals, automobile equipment, iron and steel products, refined petroleum products, cosmetics, organic chemicals, electronic components, wine and champagne. Imports (2007)—$604 billion (f.o.b.): oil and natural gas, automobiles, aircraft and aircraft components, refined petroleum products, automobile equipment, pharmaceuticals, iron and steel products, and computers/

computer-related products. Major trading partners—EU and U.S.
Exchange rate: U.S. $1=euro 0.7297 in 2007.

PEOPLE

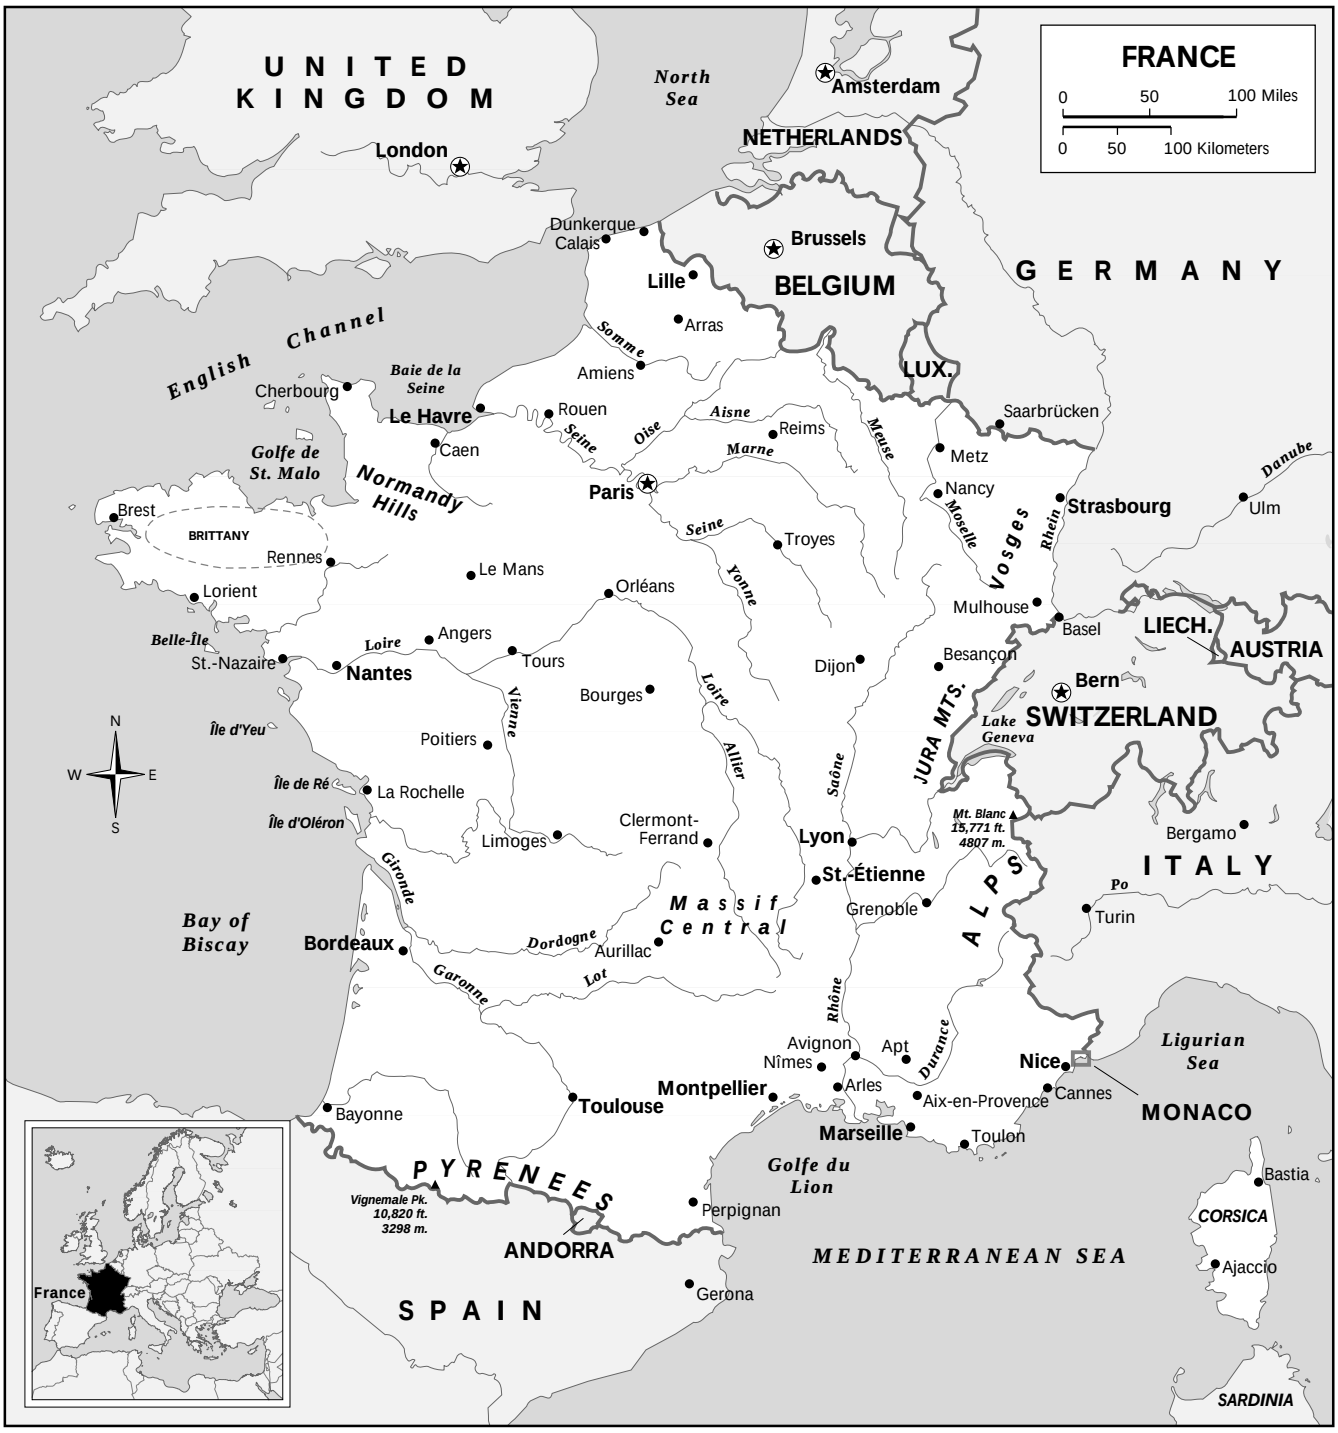
Since prehistoric times, France has been a crossroads of trade, travel, and invasion. Three basic European ethnic stocks—Celtic, Latin, and Teutonic (Frankish)—have blended over the centuries to make up its present population. France's birth rate was among the highest in Europe from 1945 until the late 1960s. Since then, its birth rate has fallen but remains higher than that of most other west European countries.

Traditionally, France has had a high level of immigration. More than 1 million Muslims immigrated in the 1960s and early 1970s from North Africa, especially Algeria. About 85% of the population is Roman Catholic, 10% Muslim, less than 2% Protestant, and about 1% Jewish. In 2004, there were over 6 million Muslims, largely of North African descent, living in France. France is home to both the largest Muslim and Jewish populations in Europe.

Education is free, beginning at age 2, and mandatory between ages 6 and 16. The public education system is highly centralized. Private education is primarily Roman Catholic. Higher education in France began with the founding of the University of Paris in 1150. It now consists of 91 public universities and 175 professional schools, including the post-graduate Grandes Ecoles. Private, college-level institutions focusing on business and management with curriculums structured on the American system of credits and semesters have been growing in recent years.

The French language derives from the vernacular Latin spoken by the Romans in Gaul, although it includes many Celtic and Germanic words. Historically, French has been used as the international language of diplomacy and commerce. Today it remains one of six official languages at the United Nations and has been a unifying factor in Africa, Asia, the Pacific, and the Caribbean.

HISTORY



France was one of the earliest countries to progress from feudalism to the nation-state. Its monarchs surrounded themselves with capable ministers, and French armies were among the most innovative, disciplined, and professional of their day. During the reign of Louis XIV (1643-1715), France was the dominant power in Europe. But overly ambitious projects and military campaigns of Louis and his successors led to chronic financial problems in the 18th Century. Deteriorating economic conditions and popular resentment against the complicated system of privileges granted the nobility and clerics were among the principal causes of the French Revolution (1789-94). Although the revolutionaries advocated republican and egalitarian principles of government, France reverted to forms of absolute rule or constitutional monarchy four times—the Empire of Napoleon, the Restoration of Louis XVIII, the reign of Louis-Philippe, and the Second Empire of Napoleon III. After the Franco-Prussian War (1870), the Third Republic was established and lasted until the military defeat of 1940.

World War I (1914-18) brought great losses of troops and materiel. In the 1920s, France established an elaborate system of border defenses (the Maginot Line) and alliances to offset resurgent German strength. France was defeated early in World War II, however, and was occupied in June 1940. In July, the country was divided into two: one section being ruled directly by the Germans, and a second controlled by the French ("Vichy" France) and which the Germans did not occupy. German and Italian forces occupied all of France, including the "Vichy" zone, following the Allied invasion of North Africa in November 1942. The "Vichy" government largely acquiesced to German plans, namely in the plunder of French resources and the forceful deportations of tens of thousands of French Jews living in France to concentration camps across Europe, and was even more completely under German control following the German military occupation of November 1942. Economically, a full one-half of France's public sector revenue was appropriated by Germany. After 4 years of occupation and strife, Allied forces liberated France in 1944.

France emerged from World War II to face a series of new problems. After a short period of provisional government initially led by Gen. Charles de Gaulle, the Fourth Republic was set up by a new constitution and established as a parliamentary form of government controlled by a series of coalitions. French military involvement in both Vietnam and Algeria combined with the mixed nature of the coalitions and a consequent lack of agreement caused successive cabinet crises and changes of government.

Finally, on May 13, 1958, the government structure collapsed as a result of the tremendous opposing pressures generated by four years of war with Algeria. A threatened coup led the Parliament to call on General de Gaulle to head the government and prevent civil war. Marking the beginning of the Fifth Republic, he became prime minister in June 1958 and was elected president in December of that year. Also resulting from the Algerian conflict, were decades of increased immigration from the Maghreb states, which functioned to change the composition of French society.

Seven years later, for the first time in the 20th Century, the people of France went to the polls to elect a president by direct ballot. De Gaulle won re-election with a 55% share of the vote, defeating François Mitterrand. In April 1969, President de Gaulle's government conducted a national referendum on the creation of 21 regions with limited political powers. The government's proposals were defeated, and de Gaulle subsequently resigned. Succeeding him as president of France have been Gaullist Georges Pompidou (1969-

74), Independent Republican Valery Giscard d'Estaing (1974-81), Socialist François Mitterrand (1981-95), neo-Gaullist Jacques Chirac (1995-2007), and Nicolas Sarkozy (2007-present).

While France continues to revere its rich history and independence, French leaders are increasingly tying the future of France to the continued development of the European Union. France was integral in establishing the European Coal and Steel Community in 1951 and was among the EU's six founding states. During his tenure, President Mitterrand stressed the importance of European integration and advocated the ratification of the Maastricht Treaty on European economic and political union, which France's electorate narrowly approved in September 1992. The center of domestic attention soon shifted, however, to the economic reform and belt-tightening measures required for France to meet the criteria for Economic and Monetary Union (EMU) laid out by the Maastricht Treaty. France continues to play a leading role in the EU, particularly in

the development of European Security and Defense Policy (ESDP). Although a 2005 French referendum was actually responsible for the defeat of the treaty establishing a constitution for Europe, France has since then backed the Lisbon Treaty—a main priority of Nicolas Sarkozy during France's EU presidency in the latter half of 2008. In July 2008, France was instrumental in launching the Union for the Mediterranean (UM), a continuation of the EU Barcelona Process. France and Egypt hold the first rotating co-presidency, which serves as a forum for political and economic cooperation between the EU and its Mediterranean neighbors.

Since the September 11, 2001 attacks in the U.S., France has played a central role in the war on terrorism. French forces participate in Operation Enduring Freedom and in the International Security Assistance Force (ISAF) for Afghanistan. France did not, however, join the coalition that liberated Iraq in 2003. In October and November 2005, three weeks of violent unrest in the largely immigrant suburbs focused French attention further on their minority communities. Also in 2005 French voters disapproved the EU constitution in a national referendum. In the spring of 2006, students protested widely over restrictive employment legislation.

In May 2007, Nicolas Sarkozy was elected as France's sixth president under the Fifth Republic, signaling French approval of widespread economic and social reforms, as well as closer cooperation with the United States. President Sarkozy indicated France will fully reintegrate into the NATO command structure, a positive step in transatlantic relations and NATO-ESDP cooperation.

GOVERNMENT

The constitution of the Fifth Republic was approved by public referendum on September 28, 1958. It greatly strengthened the powers of the executive in relation to those of Parliament. Under this constitution, presidents were elected directly for a 7-year term since 1958. Beginning in 2002, the presidential term of office was reduced to 5 years and a constitutional reform passed on July 21, 2008 limits presidents to two consecutive terms in office. The president names the prime minister, presides over the cabinet, commands the armed forces, and concludes treaties. Traditionally, presidents under the Fifth Republic have tended to leave day-to-day policy-making to the prime minister and government; the five-year term of office is expected to make presidents more accountable for the results of domestic policies. Sarkozy, however, has been a hands-on manager and policymaker.

The president can submit questions to a national referendum and can dissolve the National Assembly. In certain emergency situations, with the approval of parliament, the president may assume dictatorial powers and rule by decree. The main components of France's executive branch are the president, the prime minister and government, and the permanent bureaucracies of the many ministries. Led by a prime minister, who is the head of government, the cabinet is composed of a varying number of ministers, ministers-delegate, and secretaries of state. Parliament meets for one 9-month session each year. Under special circumstances the president can call an additional session.

Under the constitution, the legislative branch has few checks on executive power; nevertheless, the National Assembly can still cause a government to fall if an absolute majority of the total Assembly membership votes to censure. The Parliament is bicameral with a National Assembly and a Senate. The National Assembly is the principal legislative body. Its deputies are directly elected to 5-year terms, and all seats are voted on in each election. Senators are chosen by an electoral college and, under new rules passed in 2003 to shorten the term, serve for six years, with one-half of the Senate being renewed every three years. (As a transitional measure in 2004, 62 Senators were elected to 9-year terms, while 61 were elected to 6-year terms; subsequently, all terms will be six years.) The Senate's legislative powers are limited; the National Assembly has the last word in the event of a disagreement between the two houses. The government has a strong influence in shaping the agenda of Parliament, although the constitutional reform passed on July 21, 2008 grants new authority to the Parliament to set its own agenda. The government also can declare a bill to be a question of confidence, thereby linking its continued existence to the passage of the legislative text; unless a motion of censure is introduced and voted, the text is considered adopted without a vote. The constitutional reform passed on July 21, 2008 has limited the process to the vote of the national budget, the financing of the social security, and to one bill per session of the Parliament.

A distinctive feature of the French judicial system is that the Constitutional Council protects basic rights when they might be potentially violated by new laws and the Council of State protects basic rights when they might be violated by actions of the state. The Constitutional Council examines legislation and decides whether it conforms to the constitution. Unlike the U.S. Supreme Court, it considers only legislation that is referred to it by Parliament, the prime minister, or the president. Moreover, it considers legislation before it is promulgated. The Council of State has a separate function from the Constitutional Council and provides recourse to individual citizens who have claims against the administration. The Ordinary Courts—including specialized bodies such as the police court, the criminal court, the correctional tribunal, the commercial court, and the industrial court—settle disputes that arise between citizens, as well as disputes that arise between citizens and corporations. The Court of Appeals reviews cases judged by the Ordinary Courts.

Traditionally, decision-making in France has been highly centralized, with each of France's departments headed by a prefect appointed by the

central government. In 1982, the national government passed legislation to decentralize authority by giving a wide range of administrative and fiscal powers to local elected officials. In March 1986, regional councils were directly elected for the first time, and the process of decentralization continues, albeit at a slow pace.

Principal Government Officials

Last Updated: 11/12/08

Pres.: **Nicolas SARKOZY**
Prime Min.: **Francois FILLON**
Min. of State: **Jean-Louis BORLOO**
Min. of Agriculture & Fisheries: **Michel BARNIER**
Min. of Budget, Public Accounts, & the Civil Service: **Eric WOERTH**
Min. of Culture & Communication: **Christine ALBANEL**
Min. of Defense: **Herve MORIN**
Min. of Economy, Industry, & Employment: **Christine LAGARDE**
Min. of Environment, Energy, Sustainable Development, & Regional Development: **Jean-Louis BORLOO**
Min. of Foreign & European Affairs: **Bernard KOUCHNER**
Min. of Health, Youth, Sports, & Associations: **Roselyne BACHELOT-NARQUIN**
Min. of Higher Education & Research: **Valerie PECRESSE**
Min. of Housing & Urban Affairs: **Christine BOUTIN**
Min. of Immigration, Integration, National Identity, & Co-Development: **Brice HORTEFEUX**
Min. of the Interior, Overseas France, & Local Authorities: **Michele ALLIOT-MARIE**
Min. of Justice & Keeper of the Seals: **Rachida DATI**
Min. of Labor, Labor Relations, Family, & Solidarity: **Xavier BERTRAND**
Min. of National Education: **Xavier DARCOS**
Sec. of State for the Civil Service: **Andre SANTINI**
Sec. of State for Defense & Veterans Affairs: **Jean-Marie BOCKEL**
Sec. of State for Development of the Capital Region: **Christian BLANC**
Sec. of State for Employment: **Laurent WAUQUIEZ**
Sec. of State for the Environment: **Nathalie KOSCIUSKO-MORIZET**
Sec. of State for European Affairs: **Jean-Pierre JOUYET**
Sec. of State for Family Affairs: **Nadine MORANO**
Sec. of State for Foreign Affairs & Human Rights: **Rama YADE**
Sec. of State for Foreign Cooperation & Francophone Affairs: **Alain JOYANDET**
Sec. of State for Industry & Consumer Affairs: **Luc CHATEL**
Sec. of State for the Interior & Local Authorities: **Alain MARLEIX**
Sec. of State for Overseas Territories: **Yves JEGO**
Sec. of State for Planning, Public Policy Evaluation, & Digital Economy Development: **Eric BESSON**
Sec. of State for Regional Development: **Hubert FALCO**
Sec. of State for Relations With Parliament: **Roger KAROUTCHI**
Sec. of State for Solidarity: **Valerie LETARD**
Sec. of State for Trade: **Anne-Marie IDRAC**
Sec. of State for Trade, Artisan Trades, Small & Medium-Sized Businesses, Tourism, & Services: **Herve NOVELLI**
Sec. of State for Transport: **Dominique BUSSEREAU**
Sec. of State for Urban Affairs: **Fadela AMARA**
Sec. of State for Youth, Sports, & Associations: **Bernard LAPORTE**
High Commissioner Responsible for Fighting Poverty: **Martin HIRSCH**
Governor, Bank of France: **Christian NOYER**
Ambassador to the US: **Pierre VIMONT**
Permanent Representative to the UN, New York: **Jean-Maurice RIPERT**

France maintains its embassy in the U.S. at 4101 Reservoir Rd. NW, Washington, DC 20007 (tel. 202-944-6000); it is its largest diplomatic mission in the world.

POLITICAL CONDITIONS

Since his inauguration in May 2007 as France's sixth president under the Fifth Republic, Nicolas Sarkozy focused his first months in office on improving the performance of France's economy through liberalization of labor markets, higher education, and taxes. In the April 22, 2007 first round of presidential elections, Sarkozy, the leader of the center-right Union for a Popular Movement (UMP) party, placed first; Socialist candidate Segolene Royal placed second; centrist Francois Bayrou placed third; and extremist Jean-Marie Le Pen placed fourth out of a field of 12 candidates. Sarkozy prevailed in the May 6, 2007 second round, defeating Royal by a 53.06% to 46.94% margin. Royal's loss marked the third straight defeat for the Socialist candidate in presidential elections.

President Sarkozy assumed office on May 16, 2007, the last day of Jacques Chirac's official term. Sarkozy named Francois Fillon Prime Minister. Jean-Louis Borloo became the second-highest ranking figure in the government, presiding over an expanded Ministry of Environment, renamed the Ministry of Ecology and Sustainable Planning. Legislative elections held on June 10 and 17, 2007 gave the UMP a large parliamentary majority. Other key ministers include: Michele Alliot-Marie, Interior; Bernard Kouchner, Foreign Affairs; Christine Lagarde, Economy; Brice Hortefeux, Immigration; Rachida Dati, Justice; and Herve Morin, Defense.

In electing Nicolas Sarkozy, French voters endorsed the wide-ranging program of reforms—including market-oriented social and economic reforms—that were the focal point of Sarkozy's campaign, implicitly giving him the green light to try and implement these reforms quickly, and allowing a way forward for overcoming France's 2005 rejection of the EU constitutional treaty. By embracing a figure long tagged as "pro-American," French voters also expressed their desire to renew trust in the U.S.-France relationship. During the campaign Sarkozy often ended his stump speeches—evoking Martin Luther King—by calling for a "French dream" of social equality, social mobility, and equal opportunity; and his first speech as President-elect assured his "American friends" that they could rely on France's friendship.

During his first year and a half in office, Sarkozy eliminated income taxes on overtime hours, lengthened the contribution period for retirees to receive full pensions, and established a "minimum service" requirement on strike days, among other reforms. He

also completed a major revision of the French constitution, which made the president more accountable to Parliament and strengthened the power of the legislature. French and EU analysts stress that longer-term reform measures must focus on reducing the future burden of ballooning public pension and health care budgets, as well as reducing labor-related taxes.

ECONOMY

With a GDP of $2.5 trillion, France is the sixth-largest economy. It has substantial agricultural resources, a large industrial base, and a highly skilled work force. A dynamic services sector accounts for an increasingly large share of economic activity and is responsible for nearly all job creation in recent years. Real GDP increased 2.1% in 2007. According to Organization for Economic Cooperation and Development (OECD) projections, 2008 GDP growth will hit 1.8%.

Government economic policy aims to promote investment and domestic growth in a stable fiscal and monetary environment. Creating jobs and reducing the high unemployment rate has been a top priority. The unemployment rate in metropolitan France slipped to 7.5% in the first quarter of 2008 from 8.1% in the second quarter of 2007 when the government took office. France joined 10 other European Union countries in adopting the euro as its currency in January 1999. Since then, monetary policy has been set by the European Central Bank in Frankfurt. On January 1, 2002, France, along with the other countries of the euro zone, dropped its national currency in favor of euro bills and coins.

Despite significant reform and privatization over the past 15 years, the government continues to control a large share of economic activity: Government spending, at 52.4% of GDP in 2007, is among the highest in the G-7. The government continues to own shares in corporations in a range of sectors, including banking, energy production and distribution, automobiles, transportation, and telecommunications. In 2008, in a move to advance France's competitiveness, the National Assembly passed four bills introduced by the French government to modernize the economy and improve the labor market. In October 2007, under President Nicolas Sarkozy's impetus, overtime work beyond the 35-hour work week was exempted from income taxes and payroll taxes, a move to encourage work and to increase work time. Membership in France's labor unions accounts for approximately 5% of the private sector work force and is concentrated in the manufacturing, transportation, and heavy industry sectors. Most unions are affiliated with one of the competing national federations, the largest and most powerful of which are the communist-dominated General Labor Confederation (CGT), the Workers' Force (FO), and the French Democratic Confederation of Labor (CFDT).

France has been very successful in developing dynamic telecommunications, aerospace, and weapons sectors. With virtually no domestic oil production, France has relied heavily on the development of nuclear power, which now accounts for about 80% of the country's electricity production.

Trade

France is the second-largest trading nation in Western Europe (after Germany). France ran a record-setting $90 billion deficit for the 12 months ending in May 2008. Total trade in goods for 2007 amounted to $1.162 trillion, over 45% of GDP, 63% of which was with EU-26 countries. In 2007, U.S.-France trade in goods and services totaled $99 billion. U.S. industrial chemicals, aircraft and engines, electronic components, telecommunications, computer software, computers and peripherals, analytical and scientific instrumentation, medical instruments and supplies, broadcasting equipment, and programming and franchising are particularly attractive to French importers. Total French trade of goods and services was $1.421 trillion in 2007.

Principal French exports to the United States are aircraft and engines, beverages, electrical equipment, chemicals, cosmetics, and luxury products. France is the eighth-largest trading partner of the United States.

Agriculture

France is the European Union's leading agricultural exporter, accounting for about 17% of all agricultural land within the EU-27. Agriculture and related food industries accounted for 2.0% of France's GDP in 2006. French agricultural production grossed $86 billion, or about 23% of the agricultural production of the European Union in 2006. Northern France is characterized by large grain farms. Dairy, pork, poultry, and apple production is concentrated in the western region. Beef production is located in central France, while the production of corn, fruits, vegetables, and wine ranges from central to southern France. France is expanding its forestry and fishery industries. France remains extremely cautious about the cultivation of genetically modified (GM) plants at the domestic and EU levels. France is a proponent of the European preference principle and is attentive to protecting its interests in further agricultural trade liberalization at the EU and World Trade Organization (WTO) levels.

France is the world's second-largest agricultural producer, after the United States. The destination of 70% of its exports is other EU member states. Wine and beverages, wheat, meat, and dairy products are the principal exports. The United States, the third-largest exporter to France, faces stiff competition from domestic production, other EU member states, and third countries. U.S. agricultural exports to France, totaling $1.1 billion in 2007, consisted primarily of tree nuts, seafood, live animals, soybeans, planting seeds, grapefruit, forest products, and many value-added products, especially snack foods. French agricultural exports to the United States amounted to $2.3 billion in 2007 and consisted mainly of wine and spirits, snack food, and dairy products.

FOREIGN RELATIONS

France plays an influential global role as a permanent member of the United Nations Security Council, NATO, the G-8, the EU, the Organization for Security and Cooperation in Europe (OSCE), the WTO, la Francophonie, and other multilateral institutions. Among NATO members, France is second only to the United States in terms of troops deployed abroad. The French took over the rotating EU presidency for July-December 2008, with a focus on immigration, energy, the environment, and European defense during their term. However, the 2008 French Presidency was complicated by the June 2008 Irish rejection of the Lisbon Treaty, which meant to serve as an institutional solution to the functioning of an enlarged EU at 27 members. The other EU member states are continuing to ratify the Lisbon Treaty while searching for an acceptable solution for Ireland. A charter member of the United Nations, France holds one of the permanent seats in the Security Council and is a member of most of its specialized and related agencies. France is also America's oldest ally; French military intervention was instrumental in helping Britain's American colonies establish independence. Because many battles in which the United States was involved during World War I and World War II took place in France, more American soldiers have been killed on French soil than on that of any other foreign country.

France is a leader in Western Europe because of its size, location, and large economy, membership in European organizations, strong military posture, and energetic diplomacy. France generally has worked to strengthen the global economic and political influence of the EU and its role in common European defense. It views Franco-German cooperation and the development of a European Security and Defense Policy (ESDP) with other EU members, as the foundation of efforts to enhance European security.

France supports Quartet (U.S.-EU-Russia-UN) efforts to implement the Middle East roadmap, which envisions establishment of a Palestinian state, living side-by-side in peace and security with Israel. Recognizing the need for a comprehensive peace agreement, France supports the involvement of all Arab parties and Israel in a multilateral peace process.

Since 2003, France has supported four UN Security Council (UNSC) resolutions on Iraq, including UNSCR 1546, which laid out a timetable for Iraq's political transition and reaffirmed UNSC authorization for a Multinational Force in Iraq, at the invitation of the Iraqi government, to stabilize the country. France contributed to the $315 million EU contribution to Iraq reconstruction in 2003. After the Iraqi Interim Government took power, France agreed to substantial debt relief and offered police training to Iraqi security forces. Since 2006, France has actively and repeatedly publicly stressed the danger of a nuclear-armed Iran and worked with the U.S. and other members of the P5+1 group (China, Russia, the U.K., the U.S., and Germany) to demand that Iran end its enrichment-related and pre-processing activities.

France continues to play an important role in Africa, especially in its former colonies, through aid programs, commercial activities, military agreements, and cultural impact. The Sarkozy government announced a change in its sub-Saharan African policy shortly after it came to power, intending to modernize and rationalize relations in a future-oriented manner. The French military presence is likely to diminish, with an emphasis on cooperating with Africa's sub-regional organizations such as Southern African Development Community (SADC), Economic Community of West African States (ECOWAS), and Intergovernmental Authority on Development (IGAD). France's military bases in Cote d'Ivoire, Djibouti, Gabon, and Senegal, and its long-term military presence in Chad may therefore be reduced in size, consolidated, or eliminated in the years ahead. Nonetheless, France is likely to continue to play an important role in promoting stability in the region. For example, French support to the Government of Chad was crucial in 2008 to fending off a rebel attack, and in 2007, France played a leading role in the EU's formation of a peacekeeping mission in Chad and the Central African Republic designed to complement international efforts in Sudan and Darfur.

France has extensive political and commercial relations with Asian countries, including China, Japan, and Southeast Asia as well as an increasing presence in regional fora. France is seeking to broaden its commercial presence in China and will pose a competitive challenge to U.S. business, particularly in aerospace, high-tech, and luxury markets. In Southeast Asia, France was an architect of the 1991 Paris Accords, which ended the conflict in Cambodia.

SECURITY ISSUES

French military doctrine is based on the concepts of national independence, nuclear deterrence, and military sufficiency. France is a founding member of the North Atlantic Treaty Organization (NATO), and has worked actively with Allies to adapt NATO, internally and externally, to the post-Cold War environment. In 1966, the French withdrew from NATO's military bodies while remaining full participants in the alliance's political councils. In December 1995, France increased its participation in NATO's military wing, including the Military Committee. France will co-host with Germany the 2009 NATO Summit and may announce further rapprochement with NATO's military structures, consistent with President Sarkozy's stated goals.

France released a white paper on defense in June 2008 that assessed foreign and domestic defense and security issues. The white paper was intended to provide a comprehensive security strategy for the next 25 years, reflecting a changed 21st century security environment, and to

outline restructuring proposals to make the French military more flexible, technologically advanced, and better able to coordinate with allies such as the U.S. and multilateral organizations such as the EU, NATO, and the UN. Consistent with the white paper, France has undertaken a major restructuring to develop a professional military that will be smaller, more rapidly deployable, and better tailored for operations outside of mainland France. Key elements of the restructuring include reducing personnel, bases, and headquarters and rationalizing equipment and the armament industry. French active-duty military number about 350,000 (including Gendarmes), of which over 35,000 were deployed outside of French territory as of July 2008. France completed the move to all-professional armed forces when conscription ended on December 31, 2002.

France has actively and heavily participated in a variety of peacekeeping/coalition efforts in Africa, the Middle East, and the Balkans, often taking the lead in these operations. France also remains a firm supporter of the OSCE and other efforts at cooperation.

France places a high priority on arms control and non-proliferation. After conducting a final series of six nuclear tests, the French signed the Comprehensive Test Ban Treaty in 1996. France has implemented a moratorium on the production, export, and use of anti-personnel landmines and supports negotiations leading toward a universal ban. France is an active participant in the major supplier regimes designed to restrict transfer of technologies that could lead to proliferation of weapons of mass destruction: the Nuclear Suppliers Group, the Australia Group (for chemical and biological weapons), the Non-Proliferation Treaty, and the Missile Technology Control Regime. France participates actively in the Proliferation Security Initiative, and is engaged with the U.S., both bilaterally and at the International Atomic Energy Agency (IAEA) and Organization for the Prohibition of Chemical Weapons (OPCW), to curb nuclear, biological, and chemical (NBC) proliferation. France has joined with the U.S., Germany, and the other three permanent members of the UN Security Council to offer a package of incentives and disincentives to Iran to halt its uranium enrichment activities. France, along with other EU member states, was instrumental in pressing for Europe's adoption of UNSCR 1803, calling for extra vigilance over Iranian banks. France has also signed and ratified the Chemical Weapons Convention. France maintains a color-coded security system, similar to that of the U.S., consisting of yellow, orange, red, and scarlet threat levels.

U.S.-FRENCH RELATIONS

Relations between the United States and France are active and friendly. Mutual visits by high-level officials are conducted frequently. Bilateral contact at the cabinet level has traditionally been active. France and the United States share common values and have parallel policies on most political, economic, and security issues. Differences are discussed frankly and have not generally been allowed to impair the pattern of close cooperation that characterizes relations between the two countries.

France is one of NATO's top five troop contributors. The French support NATO modernization efforts and are leading contributors to the NATO Response Force (NRF). France is keen to build European defense capabilities, including through the development of EU battle-group sized force packages and joint European military production initiatives. President Sarkozy supports development of a European defense that complements and reinforces NATO, which remains at the core of transatlantic security. During his December 2007 visit to Kabul, the President underscored French commitment to complete NATO's mission in Afghanistan, where some 2,200 French troops serve. In June 2008 Paris hosted the successful Afghanistan Support Conference, where international donors pledged a total of $21 billion to help develop Afghan infrastructure and to combat drugs, violence, and poverty.

France is a close partner with the U.S. in the war on terror. It cooperates with the U.S. to monitor and disrupt terrorist groups and has processed numerous U.S. requests for information under the Mutual Legal Assistance Treaty. French intelligence and security officials continue to actively investigate and prosecute cases of extremism. The French judiciary in December 2007 tried and convicted five French former Guantanamo detainees on terrorism charges. France is a strong partner in multiple non-proliferation fora and is a key participant in the Proliferation Security Initiative. As one of the P5+1 powers and as a leader of the EU, France is working to prevent Iran from developing nuclear weapons.

France opposed the use of force in Iraq in March 2003 and did not join the U.S.-led coalition that liberated the country from the dictatorial rule of Saddam Hussein. Despite differences over Iraq, the U.S. and France continue to cooperate closely on many issues, most notably the global war on terrorism, efforts to stem the proliferation of weapons of mass destruction (WMD), and on regional problems, including in Africa, Lebanon, and Kosovo. On Iraq, the French agreed to generous debt relief for Iraq in Paris Club negotiations and have accepted the establishment of a NATO training mission there.

In the Israeli-Palestinian conflict, France fully supports U.S. engagement in the peace process. France is working to contain the Hamas-led challenge to the Palestinian Authority. President Sarkozy has repeatedly emphasized his admiration of Israel and support for its security balanced with calls for Israel's full respect of commitments under the Middle East roadmap with respect to settlements and restrictions on Palestinian movement within the occupied territories. France hosted a donors conference for Palestinians in December 2007.

The U.S. and France have worked closely to support a sovereign and independent Lebanon, free of Syrian domination. The U.S. and France co-sponsored in September 2004 UNSCR 1559, which called for full withdrawal of Syrian forces, a free and fair electoral process, and disbanding and disarmament of all Lebanese and non-Lebanese militias. In the wake of the assassination of former Lebanese Prime Minister Rafiq Hariri in February 2005, the U.S. and France reiterated calls for a full, immediate withdrawal of all Syrian troops and security services from Lebanon.

France also co-sponsored UNSCR 1701 and was one of the leading countries in Europe working to end hostilities between Israel and Hizballah in 2006 by committing 2,000 troops to UNIFIL-plus. Strong French backing led to adoption of UNSCR 1757 establishing a Special Tribunal for Lebanon to prosecute the perpetrators of the Hariri assassination and other killings of critics of Syria's interference in Lebanon. French efforts in Lebanon are focused on maintaining stability and promoting national reconciliation consistent with relevant UNSCRs. President Sarkozy's decision to pursue a rapprochement with Syria following the Doha accord to end fighting in Lebanon in 2008 is also reportedly contingent upon good faith Syrian efforts to normalize relations with Lebanon. France also participates in the U.S. Broader Middle East and North Africa initiative.

Trade and investment between the U.S. and France are strong. On average, over $1 billion in commercial transactions take place between France and the U.S. every day, with the U.S. being France's sixth-ranked supplier and its sixth-largest customer. France ranks as the United States' eighth trading partner for total goods (imports and exports). There are approximately 2,300 French subsidiaries in the U.S. that provide more than 485,200 jobs and that generate an estimated $196 billion in turnover. The U.S. is the top destination for French investments worldwide. Concurrently, the U.S. is the largest foreign investor in France, employing over 619,000 French citizens with aggregate investment estimated at $65.9 billion in 2006.

TRAVEL

Consular Information Sheet

December 22, 2008

Country Description: France is a developed and stable democracy with a modern economy. Monaco is a developed constitutional monarchy. Tourist facilities are widely available.

Entry Requirements: France is party to the Schengen agreement. As such, U.S. citizens may enter France for up to 90 days for tourist or business purposes without a visa. A passport is required and should be valid for at least three months beyond the period of stay. Anyone intending to stay more than 90 days must obtain the appropriate visa issued by one of the French Consulates in the U.S., prior to departure for France. This also applies to anyone considering marriage in France. For further information about travel into and within Schengen countries, please see our fact sheet.

A passport is required to enter Monaco. A visa is not required for tourist/business stays up to 90 days in Monaco.

For further information concerning entry requirements for France, travelers may contact the Embassy of France at 4101 Reservoir Road NW, Washington, DC 20007, tel. (202) 944-6000, email: info@ambafrance-us.org, or the French Consulates General in Atlanta, Boston, Chicago, Houston, Los Angeles, Miami, New Orleans, New York, or San Francisco.

For further information on entry requirements to Monaco, travelers may contact the Embassy of the Principality of Monaco. 2314 Wyoming Avenue, NW Washington, DC 20008, Tel: 202-234-1530, email: embassy@monaco-usa.org, or the Consulate General of Monaco, 565 Fifth Avenue –23rd floor, New York, NY 10017, tel.: 212-286-0500, email: info@monaco-consulate.com. For more information, visit the Embassy of France web site at www.consulfrance-washington.org or the Embassy of the Principality of Monaco web site at http://www.monaco-usa.org for the most current visa information.

Safety and Security: The Government of France maintains a threat rating system, known locally as "Vigipirate," similar to the U.S. Department of Homeland Security Advisory System. Under this plan, in times of heightened security concerns, the government augments police with armed forces and increases visibility at airports, train and metro stations, and other high-profile locations such as schools, major tourist attractions, and government installations. Over the last few years, there have been numerous arrests of suspected Islamic militants involved in various terrorist plots. As with other countries in the Schengen area, France maintains open borders with its European neighbors, allowing the possibility of terrorist operatives entering/exiting the country with anonymity.

Political assassinations and bombings have occurred in France. The National Front for the Liberation of Corsica (FLNC), as part of its decades-long bombing campaign on the island of Corsica, continues to conduct limited operations in the south of France and on Corsica. In the 1990s there was a wave of bombings and attacks in Paris carried out by Algerian terrorists. Today, numerous radical Islamic groups claim sympathizers within France's large immigrant community, as evidenced by arrests over the last few years.

Although Americans have not been specifically targeted in terrorist attacks in France within the past few years, travelers should maintain vigilance. Immediately report unattended packages observed in public places or any other suspicious activities. French law enforcement authorities are proactive and will respond immediately. If there is a security incident or suspicious package, do not linger in the area to observe.

Although violent civil disorder is rare in France, in the past, student demonstrations, labor protests, and other types of demonstrations have developed into violent confrontations between demonstrators and police. This was the case in March/April 2006, when a series of large demonstrations took place in central Paris. Several weeks of unrest occurred in the suburbs of Paris, as well as in other French cities and towns, in November 2005. Neither of these

periods of disorder exhibited any anti-U.S. sentiment, but it is important to remember that even a passerby can be harmed should demonstrations devolve into violence. Americans are advised to avoid street demonstrations, particularly if riot police are on the scene.

For the latest security information, Americans traveling abroad should regularly monitor the Department of State, Bureau of Consular Affair's Internet site at http://travel.state.gov, where the current Travel Warnings and Travel Alerts, including the Worldwide Caution Travel Alert, can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S., or, for callers outside the U.S. and Canada, a regular toll line at 1-202-501-4444.

Crime: While both France and Monaco have relatively low rates of violent crime, a limited number of neighborhoods in the larger French cities merit extra caution. Additionally, although the overall crime rate has fallen slightly in recent years, the violent crime rate has increased. Thieves commonly target vehicles with non-local license plates, and work in or near tourist attractions such as museums, monuments, restaurants, hotels, beaches, trains, train stations, airports, and subways. Americans in France and Monaco should be particularly alert to pickpockets in train stations and subways. Travelers should keep photocopies of travel documents and credit cards separate from the originals, along with key telephone numbers to contact banks for credit card replacement.

Although thieves may operate anywhere, the U.S. Embassy in Paris receives frequent reports of theft from several areas in particular.

Paris: The Paris Police Prefecture published a pamphlet entitled "Paris in Complete Safety," which provides practical advice and useful telephone numbers for visitors and can be accessed at http://www.prefecture-police-paris.interieur.gouv.fr. Thieves operate on the rail link (RER) from Charles de Gaulle Airport to downtown Paris, where they prey on jet-lagged, luggage-burdened tourists. In one common ruse, a thief distracts a tourist with a question about directions while an accomplice steals a momentarily unguarded backpack, briefcase, or purse. Thieves also time their thefts to coincide with train stops so they may quickly exit the car just before the automatic doors close. Travelers should consider taking an airport shuttle bus or taxi from the airport into the city.

Reports of stolen purses, briefcases, and carry-on bags at Charles de Gaulle Airport are not uncommon. Travelers should monitor their bags at all times and never leave them unattended. As thieves commonly target laptop bags, travelers should avoid carrying passports and other valuables in computer bags. Another common method involves picking up a traveler's shoulder bag that has been placed on the floor while the traveler is busy at the ticket counter. Also be aware that unattended bags are subject to destruction by airport security.

There are reports of robberies in which thieves on motorcycles reach into a moving car by opening the car door or accessing an open window or even breaking the window to steal purses and other bags visible inside. The same technique is used against pedestrians walking with purses/bags/cameras slung over their street-side shoulder. Those traveling by car should remember to keep the windows up and the doors locked and items that may be attractive to thieves out of sight. Pedestrians are encouraged to remain aware of their surroundings at all times, and to keep bags slung across the body, with the bag hanging away from the street.

Many thefts occur on the Number One Subway Line, which runs through the center of Paris by many major tourist attractions (including the Grand Arch at La Défense, the Arc de Triomphe, the Champs Elysées, Place de la Concorde, the Louvre, and the Bastille). Pickpockets are especially active on this metro line during the summer months and use a number of techniques. The most common, and unfortunately the most successful, is the simple "bump and snatch," where an individual bumps into the tourist while at the same time reaching into the pockets/purse/bag. Visitors should be particularly careful when metro doors are closing, as this is a favored moment for the less-sophisticated pickpockets to simply grab valuables and jump through the closing doors, leaving the victim helplessly watching as the thief flees. Visitors are encouraged NOT to confront thieves aggressively; they often operate in groups and may become violent if cornered. Simply drawing attention to an attempted theft will most likely stop the operation, and result in a tactical withdrawal by the thief.

Gare du Nord train station, where the express trains from the airport arrive in Paris, is also a high-risk area for pocket-picking and theft. Travelers should also beware of thefts that occur on both overnight and day trains, especially on trains originating in Spain, Italy, and Belgium. These involve the theft of valuables while passengers are sleeping, or when the bags are left unattended.

In hotels, thieves target lobbies and breakfast rooms, and take advantage of a minute of inattention to snatch jackets, purses, and backpacks. While many hotels do have safety latches that allow guests to secure their rooms from inside, this feature is not as universal as it is in the United States. If no chain or latch is present, a chair placed up against the door and wedged under the handle is usually an effective obstacle to surreptitious entry during the night. There are, however, reports of thieves breaking into hotel rooms on lower floors through open windows while the occupants are sleeping. To guard against this, hotel room windows should be kept locked at all times. Whenever possible, valuables should be kept in the hotel safe.

Many Americans report thefts occurring in restaurants and nightclubs/bars, where purses are stolen from the back of a chair or from under the

table. Again, keep valuables on your person and do not leave them unattended or out of sight. Thefts also occur at the major department stores such as Galeries Lafayette and Printemps where tourists often place wallets, passports, and credit cards on cashier counters during transactions.

Automated Teller Machines (ATMs) are very common in France and provide ready access to cash, allowing travelers to carry as much money as they need for each day. The rates are competitive with local exchange bureaus, and an ATM transaction is easier than cashing a traveler's check. However, crime involving ATMs is increasing. Travelers should not use ATMs in isolated, unlit areas or where loiterers are present. Travelers should be especially aware of persons standing close enough to see the Personal Identification Number (PIN) being entered into the machine. Thieves often conduct successful scams by simply observing the PIN as it is entered and then stealing the card from the user in some other location. If the card becomes stuck, travelers should immediately report it to the bank where the machine is located.

Large criminal operations in Paris involving the use of ATMs that "eat" the user's ATM card have been reported. This most often happens during a weekend or at night when the bank is closed. The frustrated traveler often walks away after unsuccessfully trying to retrieve the card, with plans to return the first day the bank is open. In such cases, a criminal gang has modified the machine using an add-on device equipped with a microchip that records the user's PIN when it is typed in, and also prevents the card from being ejected. The criminal retrieves the card from the device once the visitor departs, downloads the recorded PIN and then goes to other ATMs and withdraws as much cash as possible. ATM users are strongly encouraged to carry a 24-hour emergency number for their ATM card and bank account that will enable the immediate prevention of withdrawals from the account if difficulties occur.

Pigalle is the "adult entertainment district" of Paris. Many entertainment establishments in this area engage in aggressive marketing and charge well beyond the normal rate for drinks. Reports of threats of violence to coerce patrons into paying exorbitant beverage tabs are not uncommon. There have also been several violent confrontations between rival gangs in the district, including one in August 2007 one block from the famous Moulin Rouge cabaret. Visitors are encouraged to avoid this area unless touring with a well-organized and reputable tour company.

Normandy: There has been an increase in break-ins and thefts from vehicles in the parking lots at the Normandy beaches and American cemeteries common. Valuables should not be left unattended in a car, and locking valuables in the trunk should not be considered a safeguard. Thieves often pry open car trunks to steal bags inside.

Southern France: Thefts from cars with unlocked doors or open windows stopped at red lights or caught in slow traffic are very common, particularly along the Riviera of the Nice-Antibes-Cannes area, and in Marseille. Car doors should be kept locked and windows raised at all times to prevent incidents of "snatch-and-grab" thefts. In this type of scenario, the thief is usually a passenger on a motorcycle. Break-ins of parked cars are also fairly common. Valuables should not be left in the car, not even in the trunk, when the vehicle is unattended.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, to contact family members or friends, and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed. Under French law, compensation is available to victims of crime committed on French soil under certain circumstances.

The local equivalents to the "911" emergency line in France are as follows: 17 (police emergency), 18 (fire department) and 15 (emergency medical/paramedic team/ambulance). In Monaco, the numbers are 17 (police emergency), 18 (fire department) and 9375-2525 (medical/paramedic team/ambulance).

Medical Facilities and Health Information: Medical care comparable to that found in the United States is widely available. In France, the phone number for emergency medical services is 15. In Monaco, the phone number for emergency medical services is 9375-2525.

The U.S. State Department is unaware of any HIV/AIDS related entry restrictions for visitors to or foreign residents of France.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's web site at http://wwwn.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who. int/ith/en.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S.

citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning France and Monaco is provided for general reference only, and it may not be totally accurate in a particular location or circumstance. Roads in France are generally comparable to those in the United States, but traffic engineering and driving habits pose special dangers. Usually, lane markings and sign placements are not as clear as in the United States. Drivers should be prepared to make last-minute maneuvers, as most French drivers do. The French typically drive more aggressively and faster than Americans, and tend to exceed posted speed limits. Right-of-way rules in France may differ from those in the United States. Drivers entering intersections from the right have priority over those on the left (unless specifically indicated otherwise), even when entering relatively large boulevards from small side streets. Many intersections in France are being replaced by traffic circles, where the right-of-way belongs to drivers in the circle.

On major highways, service stations are situated at least every 25 miles. Service stations are not as plentiful on secondary roads in France as they are in the United States. Paris, the capital and largest city in France, has an extensive and efficient public transportation system. The interconnecting system of buses, subways, and commuter rails serves more than 4 million people a day with a safety record comparable to or better than the systems of major American cities. Similar transportation systems are found in all major French cities. Between cities, France is served by an equally extensive rail service, which is reliable. High-speed rail links connect the major cities in France. Many cities are also served by frequent air service.

Visit the web site of the French and Monegasque National Tourist Office at http://franceguide.com. The website contains specific information concerning French and Monegasque driver's permits, vehicle inspection, road tax, and mandatory insurance.

Aviation Safety Oversight: The U.S. Federal Aviation Administration (FAA) has assessed the Government of France's Civil Aviation Authority as being in compliance with International Civil Aviation Organization (ICAO) aviation safety standards for oversight of France's air carrier operations. For more information, travelers may visit the FAA's web site at http://www.faa.gov.

Special Circumstances: French and Monegasque customs authorities enforce strict regulations concerning temporary importation into or export from France of items such as firearms, antiquities, medications, business equipment, sales samples, and other items. It is advisable to contact the Embassy of France in Washington, DC, one of France's consulates in the United States, or the Consulate General of Monaco in New York for specific information regarding customs requirements.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating French or Monegasque laws, even unknowingly, may be expelled, arrested, or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in France or Monaco are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy and Consulate Locations: Americans living or traveling in France or Monaco are encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration web site, and to obtain updated information on travel and security within France and Monaco. Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate. By registering, American citizens make it easier for the Embassy or Consulate to contact them in cases of emergency. The Consular Section of the U.S. Embassy in Paris is located at 4 avenue Gabriel, 75008 Paris (Place de La Concorde, Metro Stop Concorde), tel. 011-33-1-43-12-22-22 or (in France) 01-43-12-22-22; fax: 011-33-1-42-96-28-39 for Passport Services, or fax 011-33-1-42-61-61-40 for Special Consular Services (emergencies). Further information can be obtained at the U.S. Embassy's web site at http://france.usembassy.gov.

The Consulate General in Marseille is located at Place Varian Fry, 13006 Marseille, tel. 011-33-4-91-54-92-00, or (in France) 04-91-54-92-00; fax 011-33-4-91-55-55-56-95 or 011-33-4-91-55-09-47. Web site: http://france.usembassy.gov/marseille/default.htm

The Consulate General in Strasbourg is located at 15 Avenue d'Alsace, 67082 Strasbourg, tel. 011-33-3-88-35-31-04 or (in France) 03-88-35-31-04; fax 011-33-3-88-24-06-95.

The Consulate General in Strasbourg does not produce passports on the premises. American citizens in this area whose passports are lost or stolen and have urgent travel needs should contact the U.S. Embassy in Paris. Web site: www.amb-usa.fr/strasbourg.

The Consular Agency in Nice is located at 7, Avenue Gustave V, 3rd floor, 06000 Nice, tel. 011-33-4-93-88-89-55 or (in France) 04-93-88-89-55; fax 011-33-4-93-87-07-38. Web site: http://france.usembassy.gov.

The U.S. Government also has consular representation in Bordeaux, Lille, Lyon, Rennes, and Toulouse that provide some services to Americans, by appointment only. The post in Bor-

deaux is located at 10 place de la Bourse, 33076 Bordeaux (entry on rue Fernand Philippart); tel. 011-33-5-56-48-63-85 or 05-56-48-63-85 in France; fax: 011-33-5-56-51-61-97. Web site: http://france.usembassy.gov/bordeaux/default.htm.

The post in Lille is located at 107, rue Royale, 59000 Lille; tel. 011-33-3-28-04-25-00 or 03-28-04-25-00 in France; fax: 011-33-3-20-74-88-23. Website: http://france.usembassy.gov/lille/default.htm.

The post in Lyon is located at 1, quai Jules Courmont, 69002 Lyon; tel. 011-33-4-78-38- 33-03 or 04-78-38-33-03 in France; fax: 011-33-4-72-41-71-81. Website: http://france.usembassy.gov/lyon/default.htm.

The post in Rennes is located at 30, quai Duguay Trouin, 35000 Rennes; tel. 011-33-2-23-44-09-60 or 02-23-44-09-60 in France; fax: 011-33-2-99-35-00-92. Website: http://france.usembassy.gov/rennes/default.htm.

The post in Toulouse is located at 25, Allée Jean Jaures, 31000 Toulouse; tel. 011-33-5-34-41-36-50 or 05-34-41-36-50 in France; fax: 011-33-5-34-41-16-19. Website: http://france.usembassy.gov/toulouse/default.htm.

Intercountry Adoption

May 2006

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is based on public sources and current understanding. Questions involving foreign and U.S. immigration laws and legal interpretation should be addressed respectively to qualified foreign or U.S. legal counsel.

Please Note: The number of children available for adoption in France is small, and French couples who wish to adopt them are given priority over persons of other nationalities. Most go overseas to adopt.

Patterns of Immigration: Recent U.S. immigrant visa statistics indicate no immigrant visas have been issued to French orphans in the last five fiscal years.

Adoption Authority: The government office responsible for adoptions is the "Direction de l'Action Sociale, de l'Enfance et de la Santé," and each French department (local jurisdiction roughly equivalent to a U.S. state) has its own office and specific address. Residents of Paris must write, preferably in French, for information to the:

Direction de l'Action Sociale, de l'Enfance et de la Santé
Sous-Direction des Actions Familiales et Educatives,
Bureau des Adoptions,
94-96 Quai de la Rapée,
75570 Paris Cedex 12,
tel.: 01-43-47-75-42.

Americans residing elsewhere in France should consult the following French government internet site: http://www.france.diplomatie.fr/MAI, under the heading "Adresses utiles" for the address of the "Aide Sociale à l'enfance" office for the department in which they live. The web site is in French. French nationals and foreigners residing in France wishing to adopt a child from another country must apply to the Mission de l'Adoption Internationale at French Ministry of Foreign Affairs. Americans residing in France who travel to pick up a child adopted from third countries will need to obtain a French visa for the child in order to take the child back to France. Once in France, a U.S. visa may be required, if the parents choose to immigrate their child to the U.S. at a later time.

Adopted children of a number of Americans have been denied entry into France because they did not have the appropriate French visas.

Eligibility Requirements for Adoptive Parents: For domestic and intercountry adoptions, a couple must be married for a minimum of two years or if married less than two years, both spouses are at least 28 years old. A single person can adopt provided he/she is at least 28 years old; however, in practice, it is very difficult to get approval). There is no age limit if one of the spouses wishes to adopt the other spouse's child. There is no age maximum. Adopting parents must be at least 15 years older than the child they want to adopt (10 years in the case of the other spouse's child).

Residency Requirements: A foreigner who resides outside of France, and wishes to complete an intercountry adoption of a child residing in France, does not need to establish residency in France. A foreigner who wishes to adopt a child, whether in France or elsewhere, for the purpose of residing in France with the child, must be a permanent resident of France.

Time Frame: Intercountry adoption in France is a lengthy process. The process takes at least a year, sometimes several years.

Adoption Agencies and Attorneys: Addresses of adoption facilitators can also be obtained from the government agencies also listed on the site www.france.diplomatie.fr/MAI. The U.S. Embassy in France also maintains a list of numerous attorneys practicing in France. http://france.usembassy.gov/consul/acs/guide/Attorneys.pdf

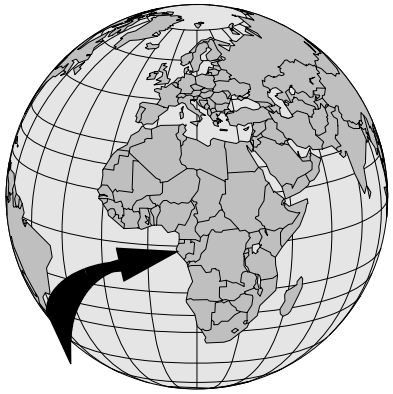
Adoption Fees: There are no "adoption fees" in France but adopting parents often hire an attorney to assist them with the administrative and legal proceedings.

Adoption Procedures: American citizens interested in or considering adopting a child in France should consult the French government internet site provided above. Americans who are legally resident in France but are considering adopting a child from a different country should first consult the adoption flyer for that

country. It is critical to remember, however, that in addition to meeting U.S. legal requirements, such children will also have to have a French visa to enter and reside in France.

Required Documents: American citizens interested in or considering adopting a child in France or bringing a child to be adopted elsewhere to reside with them in France should consult the French government internet site provide above under Adoption Authority in France for information concerning documentary requirements.

French Embassy
4101 Reservoir Road, NW
Washington, DC 20007
Telephone: (202) 944-6000
Fax: (202) 944-6166
http://www.info-france-usa.org



France also has Consulates General in Atlanta, Boston, Chicago, Houston, Los Angeles, Miami, New Orleans, New York and San Francisco.

U.S. Immigration Requirements: Prospective adopting parents are strongly encouraged to consult USCIS publication M-249, *The Immigration of Adopted and Prospective Adoptive Children*, as well as the Department of State publication, *Intercountry Adoptions*.

Please see the *Intercountry Adoption* section of this book for more details and review current reports online at http://adoption.state.gov.

U.S. Embassy
2 Rue St. Florentin, 75001
Paris
Tel: 011-33-1-43-12-22-22 or
(in France) 01-43-12-22-22
http://france.usembassy.gov

Additional Information: Specific questions about adoption in France may be addressed to the U.S. Embassy in Paris. Questions about adopting in other countries should be directed to the U.S. Embassies in those countries. General questions regarding intercountry adoption may be addressed to the Office of Children's Issues, U.S. Department of State, CA/OCS/CI, SA-29, 4th Floor, 2201 C Street, NW, Washington, D.C. 20520-4818, toll-free Tel: 1-888-407-4747.

GABON

Compiled from the November 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Gabonese Republic

PROFILE

Geography

Area: 267,667 sq. km. (103,347 sq. mi.); about the size of Colorado.

Cities: Capital—Libreville (pop. 673,995). Other cities—Port-Gentil (118,940), Franceville.

Terrain: Narrow coastal plain; hilly, heavily forested interior (about 80% forested); some savanna regions in east and south.

Climate: Hot and humid all year with two rainy and two dry seasons.

People

Nationality: Noun and adjective—Gabonese (sing. and pl.).

Population: (July 2007 est.) 1,454,867.

Annual growth rate: (2007 est.) 2.036%.

Ethnic groups: Fang (largest), Myene, Bapounou, Eshira, Bandjabi, Bakota, Nzebi, Bateke/Obamba.

Religions: Christian (55%-75%), Muslim, animist.

Languages: French (official), Fang, Myene, Bateke, Bapounou/Eschira, Bandjabi.

Education: Years compulsory—to age 16. Attendance—60%. Literacy—63%.

Health: Infant mortality rate—91/1,000. Life expectancy—56.2 yrs.

Work force: (500,000 est.) Agriculture—52%; industry and commerce—16%; services and government—33%.

Government

Type: Republic.

Independence: August 17, 1960.

Constitution: February 21, 1961 (revised April 15, 1975; rewritten March 26, 1991; revised July 29, 2003).

Government branches: Executive—president (head of state); prime minister (head of government) and appointed Council of Ministers. Legislative—bicameral legislature (National Assembly and Senate). Judicial—Supreme Court.

Political subdivisions: 9 provinces, 36 prefectures, and 8 subprefectures.

Political parties: Parti Democratique Gabonais (PDG) holds the largest number of seats in the National Assembly; there are several others.

Suffrage: Universal, direct.

Budget: (2001 est.) Receipts—$1.6 billion; expenses—$1.2 billion; defense (1999)—3.0% of government budget.

Economy

GDP: (2007 est.) $5.915 billion.

Annual real growth rate: (2007 est.) 5.6%.

Per capita income: (2006 est.) $7,200.

Avg. inflation rate: 1.2%.

Natural resources: Petroleum, timber, manganese, uranium.

Agriculture and forestry: (6% of GDP) Products—cocoa, coffee, rubber, sugar, and pineapples. Cultivated land—1%.

Industry: (59% of GDP): Types—petroleum related, wood processing, food and beverage processing.

Trade: (2007) $8.499 billion. Exports—61% of GDP (f.o.b.): petroleum, wood, manganese. Major markets—U.S. 53%, China 8.5%, France 7.4%, EU, Asia. Imports—30% of GDP (f.o.b.): construction equipment, machinery, food, automobiles, manufactured goods. Major suppliers—France 43%, U.S. 6.3%, U.K. 5.8%, Netherlands 4%. Current account balance with U.S. (2007 est.)—$1.689 billion.

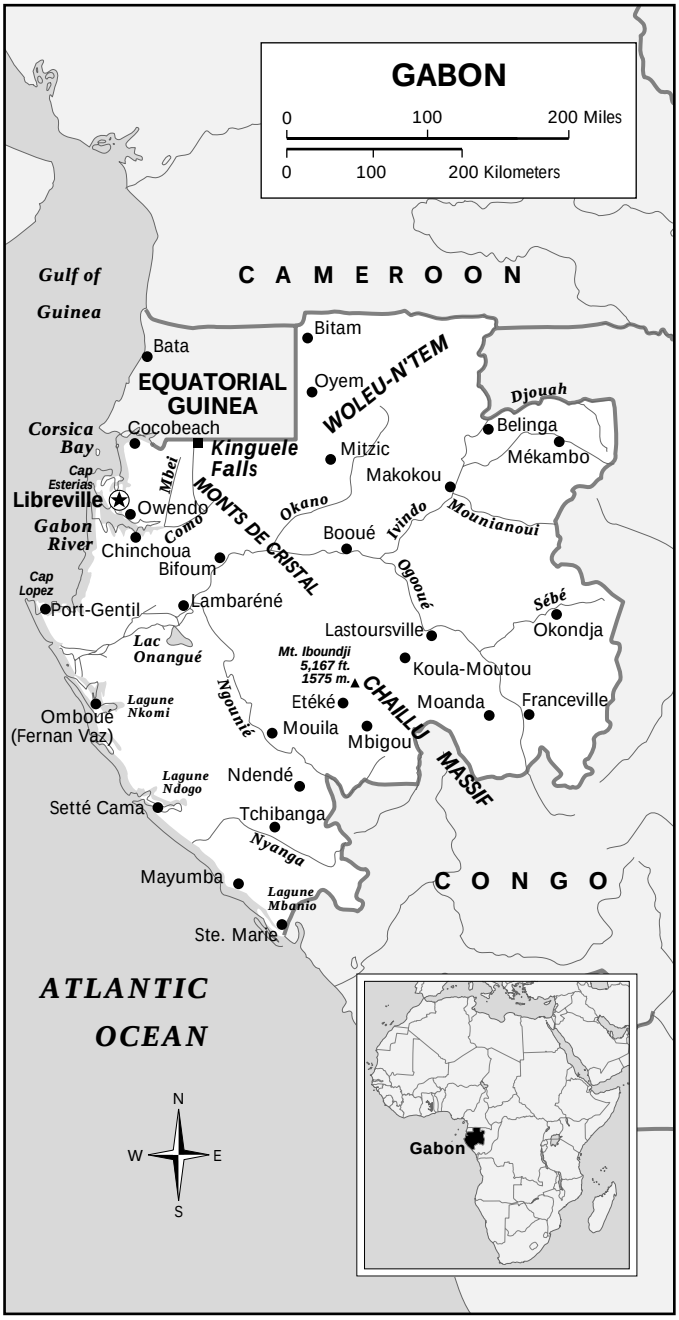
PEOPLE

Almost all Gabonese are of Bantu origin. Gabon has at least 40 ethnic groups, with separate languages and cultures. The largest is the Fang (about 30%). Other ethnic groups include the Myene, Bandjabi, Eshira, Bapounou, Bateke/Obamba, Nzebi, and Bakota. Ethnic group boundaries are less sharply drawn in Gabon than elsewhere in Africa. French, the official language, is a unifying force. More than 12,000 French people live in Gabon, including an estimated

2,000 dual nationals, and France dominates foreign cultural and commercial influences. Historical and environmental factors caused Gabon's population to decline between 1900 and 1940. It is one of the least densely inhabited countries in Africa, and a labor shortage is a major obstacle to development and a draw for foreign workers. The population is generally accepted to be just over 1 million but remains in dispute.

HISTORY

During the last seven centuries, Bantu ethnic groups arrived in the area from several directions to escape enemies or find new land. Little is known of tribal life before European contact, but tribal art suggests rich cultural heritages. Gabon's first European visitors were Portuguese traders who arrived in the 15th century and named the country after the Portuguese word "gabao," a coat with sleeve and hood resembling the shape of the Komo River estuary. The coast became a center of the slave trade. Dutch, British, and French traders came in the 16th century. France assumed the status of protector by signing treaties with Gabonese coastal chiefs in 1839 and 1841. American missionaries from New England established a mission at Baraka (now Libreville) in 1842. In 1849, the French captured a slave ship and released the passengers at the mouth of the Komo River. The slaves named their settlement Libreville—"free town." An American, Paul du Chaillu, was among the first foreigners to explore the interior of the country in the 1850s. French explorers penetrated Gabon's dense jungles between 1862 and 1887. The most famous, Savorgnan de Brazza, used Gabonese bearers and guides in his search for the headwaters of the Congo River. France occupied Gabon in 1885 but did not administer it until 1903. In 1910, Gabon became one of the four territories of French Equatorial Africa, a federation that survived until 1959. The territories became independent in 1960 as the Central African Republic, Chad, Congo (Brazzaville), and Gabon.



At the time of Gabon's independence in 1960, two principal political parties existed: the Bloc Democratique Gabonais (BDG), led by Leon M'Ba, and the Union Democratique et Sociale Gabonaise (UDSG), led by J.H. Aubame. In the first post-independence election, held under a parliamentary system, neither party was able to win a majority. The BDG obtained support from three of the four independent legislative deputies, and M'Ba was named Prime Minister. Soon after concluding that Gabon had an insufficient number of people for a two-party system, the two party leaders agreed on a single list of candidates. In the February 1961 election, held under the new presidential system, M'Ba became President and Aubame became Foreign Minister.

This one-party system appeared to work until February 1963, when the larger BDG element forced the UDSG members to choose between a merger of the parties or resignation. The UDSG cabinet ministers resigned, and M'Ba called an election for February 1964 and a reduced number of National Assembly deputies (from 67 to 47). The UDSG failed to muster a list of candidates able to meet the requirements of the electoral decrees. When the BDG appeared likely to win the election by default, the Gabonese military toppled M'Ba in a bloodless coup on February 18, 1964. French troops re-established his government the next day. Elections were held in April 1964 with many opposition participants. BDG-supported candidates won 31 seats and the opposition 16. Late in 1966, the constitution was revised to provide for automatic succession of the vice president should the president die in office. In March 1967, Leon M'Ba and Omar Bongo (then Albert Bongo) were elected President and Vice President. M'Ba died later that year, and Omar Bongo became President.

In March 1968, Bongo declared Gabon a one-party state by dissolving the BDG and establishing a new party—the Parti Democratique Gabonais (PDG). He invited all Gabonese, regardless of previous political affiliation, to participate. Bongo was elected President in February 1975; in April 1975, the office of vice president was abolished and replaced by the office of prime minister, who had no right to automatic succession. Bongo was re-elected President in December 1979 and November 1986 to 7-year terms. Using the PDG as a tool to submerge the regional and tribal rivalries that divided Gabonese politics in the past, Bongo sought to forge a single national movement in support of the government's development policies.

Economic discontent and a desire for political liberalization provoked violent demonstrations and strikes by students and workers in early 1990. In response to grievances by workers, Bongo negotiated with them on a sector-by-sector basis, making significant wage concessions. In addition, he promised to open up the PDG and to organize a national political conference in March-April 1990 to discuss Gabon's future political system. The PDG and 74 political organizations attended the conference. Participants essentially divided into two loose coalitions, the ruling PDG and its allies, and the United Front of Opposition Associations and Parties, consisting of the breakaway Morena Fundamental and the Gabonese Progress Party.

The April 1990 conference approved sweeping political reforms, including creation of a national Senate, decentralization of the budgetary process, freedom of assembly and press, and cancellation of the exit visa requirement. In an attempt to guide the political system's transformation to multiparty democracy, Bongo resigned as PDG chairman and created a transitional government headed by a new Prime Minister, Casimir Oye-Mba. The Gabonese Social Democratic Grouping (RSDG), as the resulting government was called, was smaller than the previous government and included representatives from several opposition parties in its cabinet. The RSDG drafted a provisional constitution in May 1990 that provided a basic bill of rights and an independent judiciary but retained strong executive powers for the president. After further review by a constitutional committee and the National Assembly, this document

came into force in March 1991. Under the 1991 constitution, in the event of the president's death, the prime minister, the National Assembly president, and the defense minister were to share power until a new election could be held.

Opposition to the PDG continued, however, and in September 1990, two coup d'etat attempts were uncovered and aborted. Despite anti-government demonstrations after the untimely death of an opposition leader, the first multiparty National Assembly elections in almost 30 years took place in September-October 1990, with the PDG garnering a large majority.

Following President Bongo's re-election in December 1993 with 51% of the vote, opposition candidates refused to validate the election results. Serious civil disturbances led to an agreement between the government and opposition factions to work toward a political settlement. These talks led to the Paris Accords in November 1994, under which several opposition figures were included in a government of national unity. This arrangement soon broke down, however, and the 1996 and 1997 legislative and municipal elections provided the background for renewed partisan politics. The PDG won a landslide victory in the legislative election, but several major cities, including Libreville, elected opposition mayors during the 1997 local election.

Facing a divided opposition, President Bongo coasted to easy re-election in December 1998, with large majorities of the vote. While Bongo's major opponents rejected the outcome as fraudulent, some international observers characterized the results as representative despite any perceived irregularities, and there were none of the civil disturbances that followed the 1993 election. Peaceful though flawed legislative elections held in 2001-02, which were boycotted by a number of smaller opposition parties and were widely criticized for their administrative weaknesses, produced a National Assembly almost completely dominated by the PDG and allied independents. In November 2005, President Bongo was elected for his sixth term. He won re-election easily, but opponents claim that the balloting process was marred by irregularities. There were some instances of violence following the announcement of Bongo's win, but Gabon generally remained peaceful.

National Assembly elections were held again in December 2006. Several seats contested because of voting irregularities were overturned by the Constitutional Court, but the subsequent run-off elections in early 2007 again yielded a PDG-controlled National Assembly.

GOVERNMENT AND POLITICAL CONDITIONS

Under the 1961 constitution (revised in 1975, rewritten in 1991, and

revised in 2003), Gabon is a republic with a presidential form of government. The National Assembly has 120 deputies elected for a 5-year term. The president is elected by universal suffrage for a 7-year term. The president can appoint and dismiss the prime minister, the cabinet, and judges of the independent Supreme Court. The president also has other strong powers, such as authority to dissolve the National Assembly, declare a state of siege, delay legislation, and conduct referenda. A 2003 constitutional amendment removed presidential term limits and facilitated a presidency for life. In 1990 the government made major changes to Gabon's political system. A transitional constitution was drafted in May 1990 as an outgrowth of the national political conference in March-April and later revised by a constitutional committee. Among its provisions were a Western-style bill of rights; creation of a National Council of Democracy to oversee the guarantee of those rights; a governmental advisory board on economic and social issues; and an independent judiciary. After approval by the National Assembly, the PDG Central Committee, and the President, the Assembly unanimously adopted the constitution in March 1991. Multiparty legislative elections were held in 1990-91, despite the fact that opposition parties had not been declared formally legal.

The elections produced the first representative, multiparty National Assembly. In January 1991, the Assembly passed by unanimous vote a law governing the legalization of opposition parties. After President Bongo was re-elected in a disputed election in 1993 with 51% of votes cast, social and political disturbances led to the 1994 Paris Conference and Accords, which provided a framework for the next elections. Local and legislative elections were delayed until 1996-97. In 1997, constitutional amendments were adopted to create an appointed Senate and the position of vice president, and to extend the president's term to 7 years.

For administrative purposes, Gabon is divided into 9 provinces, which are further divided into 36 prefectures and 8 separate subprefectures. The president appoints the provincial governors, the prefects, and the subprefects.

Principal Government Officials

Last Updated: 11/12/08

Pres.: **Omar BONGO**
Vice Pres.: **Didjob Divungi DI NDINGE**
Prime Min.: **Jean Eyeghe NDONG**
Dep. Prime Min.: **Honorine DOSSOU NAKI**
Dep. Prime Min.: **Laure Olga GONDJOUT**
Dep. Prime Min.: **Georgette KOKO**
Dep. Prime Min.: **Paul MBA ABESSOLE**
Min. of State for Agriculture & Rural Development: **Faustin BOUKOUBI**
Min. of State for Communication, Post, & Telecommunications & New Information Technologies: **Jean-Boniface ASSELE, Gen.**
Min. of State for Culture, the Arts, Educating the Population, Reform, & Human Rights: **Paul MBA ABESSOLE**
Min. of State for Economy, Finance, Budget, & Privatization: **Paul TOUNGUI**
Min. of State for Foreign Affairs, Cooperation, & Francophonie & Regional Integration: **Laure Olga GONDJOUT**
Min. of State for Housing & Town Planning: **Patrice TONDA**
Min. of State for Planning & Programming Development, in Charge of Evaluating Public Policies: **Richard Auguste ONOUVIET**
Min. of State for Trade & Industrial Development: **Paul BIYOGHE MBA**
Min. of Defense: **Ali BONGO ONDIMBA**
Min. for the Environment, Sustainable Development, & the Protection of Nature: **Georgette KOKO**
Min. of Forests, Water, & Fishing Economy: **Emile DOUMBA**
Min. for Higher Education: **Dieudonne PAMBO**
Min. of Interior, Regional Development, Decentralization, Security, & Immigration : **Andre MBA OBAME**
Min. of Justice: **Martin MABALA**
Min. of Labor, Employment, & Social Welfare: **Jean-Francois NDONGOU**
Min. of the Merchant Navy & Port Infrastructures: **Jacques ADIAHENOT**
Min. of Mines, Petroleum, Hydrocarbons, Energy, Hydraulic Resources, & the Promotion of New Energies: **Casimir OYE MBA**
Min. of National Education & Civic Instruction: **Michel MENGA M'ESSONO**
Min. for Public Health & Sanitation, in Charge of the Family & the Promotion of Women: **Angelique NGOMA**
Min. of Public Services & the Modernization of the State: **Alain Mensah ZOGUELET**
Min. of Public Works, Infrastructures, & Construction: **Flavien NZENGUI NZOUNDOU, Gen.**
Min. of Scientific Research & Technological Development: **Albert ONDO OSSA**
Min. of Small & Medium-Size Enterprises, Social Economy, & the Fight Against Poverty: **Vincent ESSONE MENGUE**
Min. of Social Affairs, National Solidarity, & the Protection of Widows & Orphans, in Charge of the Fights Against AIDS: **Maitre Denise MEKAM'NE**
Min. of State Control, Inspections, the Fight Against Corruption, & Illegal Accumulation of Wealth: **Honorine DOSSOU NAKI**
Min. of Technical Training, Vocational Training, & Professional Integration of Young People: **Pierre-Andre KOMBILA**
Min. of Territorial Development & Urban Policy: **Pierre Claver MAGANGA MOUSSAVOU**
Min. of Tourism & National Parks: **Idriss NGARI, Gen.**
Min. of Transport & Civil Aviation: **Dieudonne MOUIRI BOUSSOUGOU**
Min. of Youth, Sports, & Leisure, in Charge of Voluntary Organizations, & Govt. Spokesperson: **Rene NDEMEZO OBIANG**
Min. in Charge of Relations With Parliament & Constitutional Institutions: **Josue MBADINGA**
Ambassador to the US: **Carlos BOUNGOU**
Permanent Representative to the UN, New York: **Denis DANGUE-REWAKA**

Gabon maintains an embassy in the United States at 2034 20th Street NW, Washington, DC 20009 (tel. 202-797-1000).

ECONOMY

Gabon's economy is dominated by oil. Oil revenues comprise 65% of the Government of Gabon budget, 43% of gross domestic product (GDP), and 81% of exports. Oil production is now declining rapidly from its high point

of 370,000 barrels per day in 1997. In spite of the decreasing oil revenues, little planning has been done for an after-oil scenario. Gabon public expenditures from the years of significant oil revenues were not spent efficiently.

Overspending on the Transgabonais railroad, the oil price shock of 1986, the CFA franc devaluation of 1994, and low oil prices in the late 1990s caused serious debt problems. Gabon has earned a poor reputation with the Paris Club and the International Monetary Fund (IMF) for the management of its debt and revenues. Successive IMF missions have criticized the government for overspending on off-budget items (in good years and bad), over-borrowing from the Central Bank, and slipping on the schedule for privatization and administrative reform. In September 2005, Gabon successfully concluded a 15-month Stand-By Arrangement with the IMF. Following this, Gabon sought a multi-year successor arrangement that was formally proposed to the IMF in 2007.

Gabon's oil revenues have given it a strong per capita GDP of $7,800, extremely high for the region. On the other hand, a skewed income distribution and poor social indicators are evident. The richest 20% of the population receives over 90% of the income, and about a third of Gabonese live in poverty. The economy is highly dependent on extraction of abundant primary materials. After oil, logging and manganese mining are the other major sectors. Foreign and Gabonese observers have consistently lamented the lack of transformation of primary materials in the Gabonese economy. Various factors have so far stymied more diversification—small market of 1 million people, dependence on French imports, inability to capitalize on regional markets, lack of entrepreneurial zeal among the Gabonese, and the fairly regular stream of oil "rent". The small processing and service sectors are largely dominated by just a few prominent local investors. At World Bank and IMF insistence, the government embarked on a program of privatization of its state-owned companies and administrative reform, including reducing public sector employment and salary growth, but progress has been slow.

DEFENSE

Gabon has a small, professional military of about 10,000 personnel, divided into army, navy, air force, gendarmerie, and national police. Gabonese forces are oriented to the defense of the country and have not been trained for an offensive role. A well-trained, well-equipped 1,500-member guard provides security for the president.

FOREIGN RELATIONS

Gabon has followed a nonaligned policy, advocating dialogue in international affairs and recognizing both parts of divided countries. Since 1973, the number of countries establishing diplomatic relations with Gabon has doubled. In inter-African affairs, Gabon espouses development by evolution rather than revolution and favors regulated free enterprise as the system most likely to promote rapid economic growth. Concerned about stability in Central Africa and the potential for intervention, Gabon has been directly involved with mediation efforts in Chad, the Central African Republic, Angola, Congo/Brazzaville, the Democratic Republic of the Congo, and Burundi. In December 1999, through the mediation efforts of President Bongo, a peace accord was signed in Congo/Brazzaville between the government and most leaders of an armed rebellion. President Bongo has remained involved in the continuing Congolese peace process, and has also played a role in mediating the crisis in Cote d'Ivoire. Gabon has been a strong proponent of regional stability, and Gabonese armed forces played an important role in the Central African Economic and Monetary Community (CEMAC) mission to the Central African Republic.

Gabon is a member of the UN and some of its specialized and related agencies, as well as of the World Bank; the African Union (AU); the Central African Customs Union/Central African Economic and Monetary Community (UDEAC/CEMAC); EU/ACP association under the Lome Convention; the Communaute Financiere Africaine (CFA); the Organization of the Islamic Conference (OIC); the Nonaligned Movement; and the Economic Community of Central African States (ECCAS/CEEAC). Gabon withdrew from the Organization of Petroleum Exporting Countries (OPEC) in 1995.

U.S.-GABONESE RELATIONS

Relations between the United States and Gabon are excellent. In 1987, President Bongo made an official visit to Washington, DC. In September 2002, Secretary of State Colin Powell made a brief but historic visit to Gabon to highlight environmental protection and conservation in the Central Africa region. This was followed by a visit to the White House by President Bongo in May 2004. The United States imports a considerable percentage of Gabonese crude oil and manganese and exports heavy construction equipment, aircraft, and machinery to Gabon. Through a modest International Military Education and Training program, the United States provides military training to members of the Gabonese armed forces each year. Other bilateral assistance includes the funding of small grants for qualified democracy and human rights, self-help, and cultural preservation projects. U.S. private capital has been attracted to Gabon since before its independence.

TRAVEL

Consular Information Sheet

August 15, 2008

Country Description: Gabon is a developing nation in west central Africa. French is the official language; few Gabonese speak English. Facilities for tourism outside the capital city, Libreville, are available, but they are often limited and can be expensive.

Entry Requirements: A passport and visa are required. Proof of yellow fever vaccination is required for entry. Visas must be obtained in advance, as airport visas are no longer available. Travelers should obtain the latest information and details from the Embassy of Gabon, 2034 20th Street NW, Washington, DC 20009, telephone: (202) 797-1000, fax: (202) 332-0668. Travelers may also contact the Gabonese Consulate at 18 East 41st St., Ninth Floor, New York, NY 10017, telephone (212) 683-7371. Overseas, inquiries should be made to the nearest Gabonese embassy or consulate. All non-Gabonese citizens, with the exception of those bearing diplomatic or official passports, are required to obtain exit visas from the Direction Générale à la Documentation et l'Immigration (DGDI, formerly known as CEDOC) before departing Gabon.

Safety and Security: Americans should maintain security awareness at all times. There have been isolated incidents of civil unrest within the past year, both in the capital city and in the interior. Large gatherings such as sporting events or any other event where crowds have congregated to demonstrate or protest should be avoided.

Americans may contact the U.S. Embassy in Gabon for the most up-to-date information on safety and security. The Embassy informs the registered resident American community of security matters through a warden system (please see the Registration/ Embassy Location section below for more information).

In the event of a fire, dial 18.

For the latest security information, Americans traveling abroad should regularly monitor the Department of State, Bureau of Consular Affairs' web site, where the current Travel Warnings and Travel Alerts including the Worldwide Caution Travel Alert, can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S. and Canada, or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

For further information on safety and security in Gabon, please visit the Overseas Security Advisory Council (OSAC) web site at www.osac.gov, and use the "Jump to Country" pull-down menu to reach the Gabon Country Profile.

Crime: In Gabon, petty thievery is common. Violent crime is more common in urban areas, and there have been cases of armed robberies in homes and in restaurants frequented by foreigners. Occasionally Americans or Europeans have been victims of crime.

The U.S. Embassy encourages Americans to take extra precautions when traveling in Libreville. To prevent carjacking, citizens are encouraged to travel with their automobile windows up and doors locked. Marginal neighborhoods, poorly lit streets, and unfamiliar areas of the city should be avoided, especially at night. Walking or running on the beach alone at night should be avoided. When dining in restaurants or visiting markets, it is recommended that one carry only minimal amounts of cash and avoid wearing excessive amounts of jewelry. If involved in an attempted robbery or carjacking, Americans are encouraged to comply with the attacker to avoid injury and to report all incidents to the police and the U.S. Embassy. Police response time to reports of crime can be slow.

Scams or confidence schemes do occur in Gabon. For general information on scams, see our Financial Scams webpage.

Credit cards are not widely accepted except at hotels, and because of the high rates of credit card fraud, their use outside major chain hotels is not recommended.

There have been incidents of sexual assault against foreigners.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

The local equivalent to the "911" emergency line in Gabon to reach the police is 177.

Medical Facilities and Health Information: Medical facilities in Gabon's major cities are limited, but they are generally adequate for routine or basic needs. Medical services in rural areas are generally unavailable. Additionally, some medicines are not available; travelers should carry necessary, properly labeled medications with them.

The U.S. Department of State is unaware of any HIV/AIDS entry restrictions for visitors to or foreign residents of Gabon.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's web site at http://wwwn.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith/en.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Gabon is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

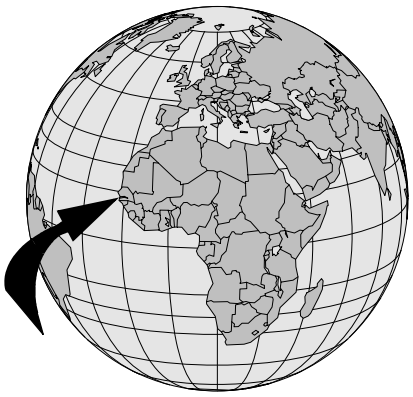
Travel by road in Gabon can be hazardous. It is recommended that you drive with your car windows up and the doors locked. Travelers are routinely stopped at police checkpoints within cities and on roads to the interior. Americans should comply politely if stopped, but avoid encouraging bribery if possible. Travelers should use extreme caution when driving after dark. Two-lane roads are the norm throughout Gabon. Roads to outlying cities have visible and hidden dangers that are profuse, including large potholes, absence of road signs, poor to non-existent streetlights, and the presence of pedestrians and animals. Construction work is often poorly indicated. Four-wheel drive vehicles are recommended for travel beyond the paved road to Lambarene, especially during the rainy season.

Roadside assistance and emergency medical services are available in Libreville, but they may not be dependable. Such services are nonexistent outside of the city. Service stations are available along main roads, but vehicle repair facilities are not always available. Drivers must have a valid international driver's license (available from AAA and the American Automobile Routing Alliance) when driving in Gabon.

Use of taxis is generally safe but does pose added risks. It is recommended that one use a hotel taxi when possible. Before riding in a taxi, check that the taxi has seatbelts and agree on a fare. Riding in a taxi alone or during late hours of the evening is not recommended and creates additional risk of becoming a victim of crime. Rail services are available, but infrequent, and travelers should be prepared for delays.

Aviation Safety Oversight: As there is no direct commercial air service between the United States and Gabon, the U.S. Federal Aviation Administration (FAA) has not assessed Gabon's Civil Aviation Authority for compliance with International Civil Aviation Organization (ICAO) aviation safety standards. For more information, travelers may visit the FAA's web site at http://www.faa.gov.

Special Circumstances: Gabon is a francophone country; travelers who do not speak French will face difficulties associated with the language barrier. Americans should always carry identification with them in the event they are stopped at a police checkpoint. Taking photographs of the Presidential Palace, military or other government buildings is strictly forbidden.



Official corruption is common, but offering bribes is not recommended. Gabon is largely a cash economy. Credit cards are accepted at only a few major hotels. Travelers' checks can be cashed or dollars exchanged for Central African Francs (CFA) at hotels and banks. ATMs are available in major urban centers, and dispense CFA.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses.

Persons violating Gabonese laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Gabon are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in Gabon are encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration web site so that they can obtain updated information on travel and security within Gabon.Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency. The U.S. Embassy is located downtown on the Boulevard du Bord de Mer. The mailing address is Centre Ville, B.P. 4000, Libreville, Gabon. The telephone numbers are (241) 76-20-03 or (241) 76-20-04. The fax numbers are (241) 74-55-07 or (241) 76-88-49 and the web ite is http://libreville.usembassy.gov.

THE GAMBIA

Compiled from the October 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Republic of The Gambia

PROFILE

Geography

Area: 11,300 sq. km. (4,361 sq. mi.); less than half the size of Maryland.
Cities: Capital—Banjul (pop. 34,828 excluding suburbs; 2003 census provisional).
Terrain: Flood plain of the Gambia River flanked by low hills.
Climate: Tropical; hot rainy season (June to November); cooler, dry season (November to May).

People

Nationality: Noun and adjective—Gambian(s).
Population: (2008) 1.7 million.
Annual growth rate: (2008 est.) 2.724%.
Ethnic groups: (2003 census) Mandinka 42%, Fula 18%, Wolof 16%, Jola 10%, Sarahule 9%, Serere 7.8%, Krio/Aku Marabout 1.8%, Manjago 0.8%, Bambara 0.7%, other Gambians 1.2%, no declaration 0.3%. Non-Gambians 12.9% of the population.
Religions: Muslim 90%, Christian 9%, other 1%.
Languages: English (official), Mandinka, Wolof, Fula, Jola, Sarahule, other indigenous languages.
Education: Years compulsory—up to age eight. Attendance—69% primary, 35% secondary. Adult literacy—37.8%.
Health: Life expectancy—57 yrs (2005 est.). Infant mortality rate (2005)—97/1,000. Access to safe drinking water (2004)—urban 95%, rural 77%.
Work force: (400,000) Agriculture—70%; industry, commerce, services—24%; government—6%.

Government

Type: Republic.
Independence: February 18, 1965.
Constitution: January 16, 1997.
Government branches: Executive, legislative, and judicial.
Political subdivisions: Capital and six divisions.
Political parties: Alliance for Patriotic Reorientation and Construction (APRC), United Democratic Party (UDP), National Reconciliation Party (NRP), National Convention Party (NCP), Peoples Democratic Organization for Independence and Socialism (PDOIS), National Democratic Action Movement (NDAM), and the Gambia Party for Democracy and Progress (GPDP).

Economy

GDP: (2007) $709 million.
Annual growth rate: (2007) 6.5%.
Per capita income: (2007) $454.
Natural resources: Seismic studies indicate the possible presence of oil and gas offshore.
Services: 58.5% of GDP, 2007.
Agriculture: (32.80% of GDP, 2007) Products—peanuts, rice, millet, sorghum, fish, palm kernels, vegetables, livestock, forestry.
Industry: (8.70% of GDP, 2007): Types—peanut products, construction, telecommunications, brewing, soft drinks, agricultural machinery assembly, woodworking, metal working, clothing and textile manufacturing, food processing.
Trade: (2007 est.) Principal exports—$14.5 million: 43.33% groundnut products, 25.18% fish and fish preparations, 2.43% cotton, 11.18% fruits and vegetables, 0.17% hides and skin, 6.191% re-exports, and others 11.52%. Major markets—France 48.85%, Senegal 22.62%, Netherlands 10.21%, United States 7.02%, Germany 3.46%, and Japan 3.05%. Principal imports—$345.7 million including food and beverages, manufactures, machinery and transport equipment, and minerals and fuel. Major suppliers—Denmark, United States, China, Germany, U.K., Cote d'Ivoire, and Netherlands.
Official Development Assistance: (ODA) received from all sources (2001) $50.9 million.
U.S. economic aid received: (FY 2007) $88,000 in grassroots projects and assistance to democracy and human rights programs.

PEOPLE AND HISTORY

A wide variety of ethnic groups live in The Gambia with a minimum of intertribal friction, each preserving its own language and traditions. The Mandinka tribe is the largest, followed by the Fula, Wolof, Jola, and Sarahule. Approximately 3,500 non-Africans live in The Gambia, including Europeans and families of Lebanese origin.

Muslims constitute more than 90% of the population. Christians of different denominations account for most of the remainder. Gambians officially observe the holidays of both religions and practice religious tolerance.

More than 63% of Gambians live in rural villages (1993 census), although more and more young people come to the capital in search of work and education. Provisional figures from the 2003 census show that the gap between the urban and rural populations is narrowing as more areas are declared urban. While urban migration, development projects, and modernization are bringing more Gambians into contact with Western habits and values, the traditional emphasis on the extended family, as well as indigenous forms of dress and celebration, remain integral parts of everyday life.

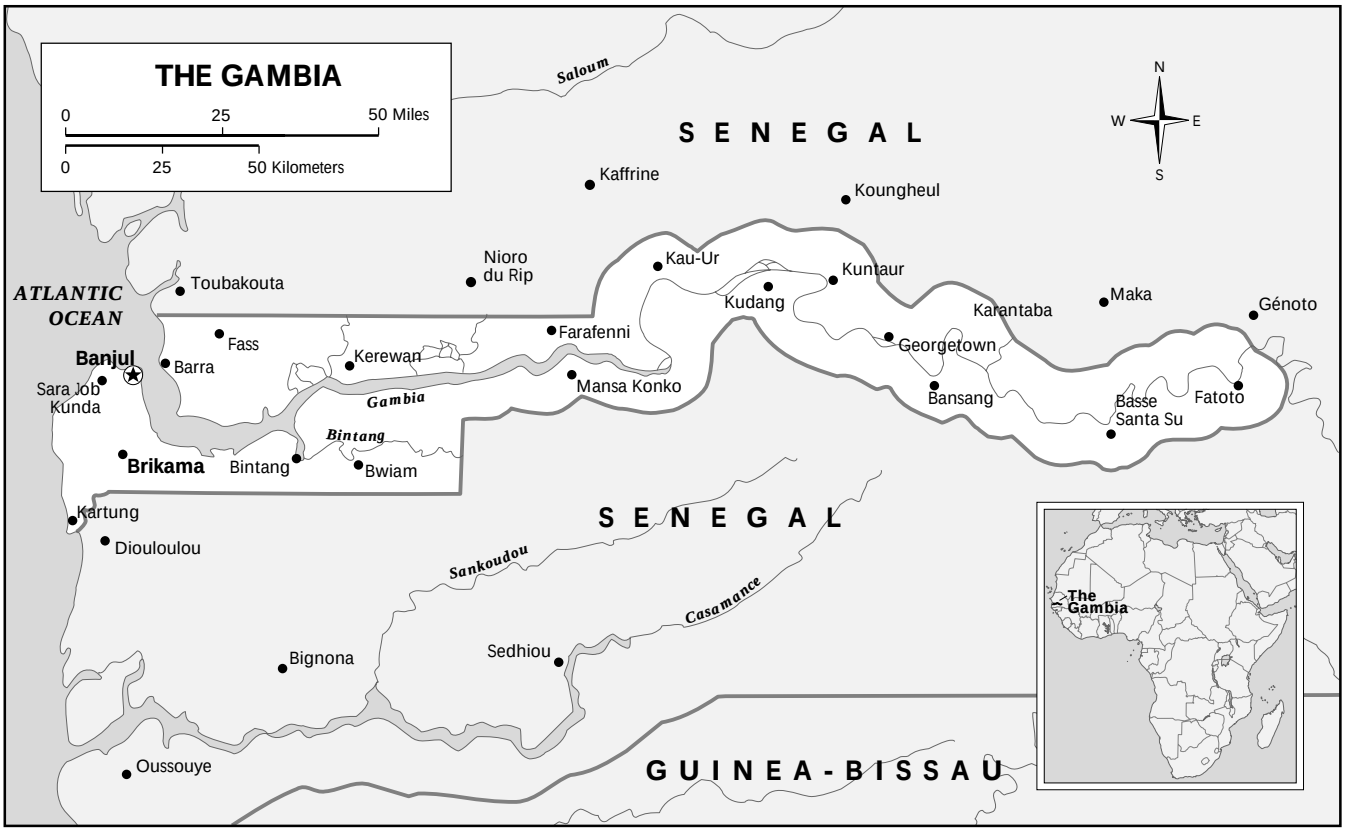
The Gambia was once part of the Ghana Empire and the Songhai Empire. The first written accounts of the region come from records of Arab traders in the 9th and 10th centuries A.D. Arab traders established the trans-Saharan trade route for slaves, gold, and ivory. In the 15th century, the Portuguese took over this trade using maritime routes. At that time, The Gambia was part of the Kingdom of Mali.

In 1588, the claimant to the Portuguese throne, Antonio, Prior of Crato, sold exclusive trade rights on The Gambia River to English merchants; this grant was confirmed by letters patent from Queen Elizabeth I. In 1618, King James I granted a charter to a British company for trade with The Gambia and the Gold Coast (now Ghana).

During the late 17th century and throughout the 18th, England and France struggled continuously for political and commercial supremacy in the regions of the Senegal and Gambia Rivers. The 1783 Treaty of Versailles gave Great Britain possession of The Gambia, but the French retained a tiny enclave at Albreda on the north bank of the river, which was ceded to the United Kingdom in 1857.

As many as 3 million slaves may have been taken from the region during the three centuries that the transatlantic slave trade operated. It is not known how many slaves were taken by Arab traders prior to and simultaneous with the transatlantic slave trade. Most of those taken were sold to Europeans by other Africans; some were prisoners of intertribal wars; some were sold because of unpaid debts, while others were kidnapped. Slaves were initially sent to Europe to work as servants until the market for labor expanded in the West Indies and North America in the 18th century. In 1807, slave trading was abolished throughout the British Empire, and the British tried unsuccessfully to end the slave traffic in The Gambia. They established the military post of Bathurst (now Banjul) in 1816. In the ensuing years, Banjul was at times under the jurisdiction of the British governor general in Sierra Leone. In 1888, The Gambia became a separate colonial entity.

An 1889 agreement with France established the present boundaries, and The Gambia became a British Crown Colony, divided for administrative purposes into the colony (city of Banjul and the surrounding area) and the protectorate (remainder of the territory). The Gambia received its own executive and legislative councils in 1901 and gradually progressed toward self-government. A 1906 ordinance abolished slavery.



During World War II, Gambian troops fought with the Allies in Burma. Banjul served as an air stop for the U.S. Army Air Corps and a port of call for Allied naval convoys. U.S. President Franklin D. Roosevelt stopped overnight in Banjul en route to and from the Casablanca Conference in 1943, marking the first visit to the African Continent by an American president while in office.

After World War II, the pace of constitutional reform quickened. Following general elections in 1962, full internal self-government was granted in 1963. The Gambia achieved independence on February 18, 1965, as a constitutional monarchy within the British Commonwealth. Shortly thereafter, the government proposed conversion from a monarchy to a republic with an elected president replacing the British monarch as chief of state. The proposal failed to receive the two-thirds majority required to amend the constitution, but the results won widespread attention abroad as testimony to The Gambia's observance of secret balloting, honest elections, and civil rights and liberties. On April 24, 1970, The Gambia became a republic following a referendum.

Until a military coup in July 1994, The Gambia was led by President Sir Dawda Kairaba Jawara, who was reelected five times. The relative stability of the Jawara era was first broken by a violent, unsuccessful coup attempt in 1981. The coup was led by Kukoi Samba Sanyang, who, on two occasions, had unsuccessfully sought election to parliament. After a week of violence which left several hundred dead, President Jawara, in London when the attack began, appealed to Senegal for help. Senegalese troops defeated the rebel force.

In the aftermath of the attempted coup, Senegal and The Gambia signed the 1982 Treaty of Confederation. The result, the Senegambia Confederation, aimed eventually to combine the armed forces of the two nations and to unify economies and currencies. The Gambia withdrew from the confederation in 1989.

In July 1994, the Armed Forces Provisional Ruling Council (AFPRC) seized power in a military coup d'etat, deposing the government of Sir

Dawda Jawara. Lieutenant Yahya A.J.J. Jammeh, chairman of the AFPRC, became head of state.

The AFPRC announced a transition plan for return to democratic civilian government. The Provisional Independent Electoral Commission (PIEC) was established in 1996 to conduct national elections. The transition process included the compilation of a new electoral register, adoption of a new constitution by referendum in August 1996, and presidential and legislative elections in September 1996 and January 1997, respectively.

Foreign observers did not deem these elections free and fair. Retired Col. Yahya A.J.J. Jammeh was sworn into office as President of the Republic of The Gambia in November 1996. The PIEC was transformed to the Independent Electoral Commission (IEC) in 1997 and became responsible for registration of voters and conduct of elections and referenda. In late 2001 and early 2002, The Gambia completed a full cycle of presidential, legislative, and local elections, which foreign observers deemed free, fair, and transparent, albeit with some shortcomings. President Yahya Jammeh, who was re-elected, took the oath of office again on December 21, 2001. The APRC maintained its strong majority in the National Assembly, particularly after the main opposition United Democratic Party (UDP) boycotted the legislative elections. President Jammeh was re-elected for a third five-year term on September 22, 2006 with 67% of the vote. The UDP received 27% of the vote, and instead of boycotting future elections, vowed to take part in the 2007 National Assembly elections. In the January 2007 parliamentary elections the ruling Alliance for Patriotic Reorientation and Construction (APRC) won 42 of the available 48 elected seats.

GOVERNMENT

The 1970 constitution, which divided the government into independent executive, legislative, and judicial branches, was suspended after the 1994 military coup. As part of the transition process, the AFPRC established the Constitution Review Commission (CRC) through decree in March 1995. In accordance with the timetable for the transition to a democratically elected government, the commission drafted a new constitution for The Gambia, which approved by referendum in August 1996. The constitution provides for a strong presidential government, a unicameral legislature, an independent judiciary, and the protection of human rights.

Local government in The Gambia varies. The capital city, Banjul and the much larger Kanifing Municipality have elected town and municipal councils. Five rural divisions exist, each with a council containing a majority of elected members. Each council has its own treasury and is responsible for local government services. Tribal chiefs retain traditional powers authorized by customary law in some instances.

Principal Government Officials

Last Updated: 11/12/08

Pres.: **Yahya JAMMEH**

Vice Pres.: **Isatou NJIE-SAIDY**

Sec. of State for Communications, Information, & Technology: **Fatim BADJI**

Sec. of State for Basic & Secondary Education: **Fatou Lamin FAYE**

Sec. of State for Defense: **Yahya JAMMEH**

Sec. of State for Finance & Economic Affairs: **Mousa BALA-GAYE**

Sec. of State for Fisheries, Water Resources, & National Assembly Matters: **Yankouba TOURAY**

Sec. of State for Foreign Affairs: **Omar TOURAY**

Sec. of State for Forestry & Environment: **Momodou Kotu CHAM**

Sec. of State for Health & Social Welfare: **Malick NJIE**

Sec. of State for Higher Education & Research, Science, & Technology: **Crispin GREY-JOHNSON**

Sec. of State for Interior: **Ousman SONKO**

Sec. of State for Local Govt. & Lands & Religious Affairs: **Ismaila SAMBOU**

Sec. of State for Petroleum, Energy, & Mineral Resources: **Ousman JAMMEH**

Sec. of State for Tourism & Culture: **Nancy NJIE**

Sec. of State for Trade, Industry, & Employment: **Abdou KOLLEY**

Sec. of State for Women's Affairs: **Isatou NJIE-SAIDY**

Sec. of State for Works, Construction, & Infrastructure: **Lamin BOJANG**

Sec. of State for Youth & Sports: **Mass Axy GYE**

Attorney Gen. & Sec. of State for Justice: **Marie SAINE-FIRDAUS**

Chief of Defense Staff: **Lang Tombong TAMBA, Maj. Gen.**

Ambassador to the US: **Dodou Bammy JAGNE**

Permanent Representative to the UN, New York: **Tamsir JALLOW**

The Gambia maintains an embassy at 1156 15th Street, NW, Suite 905, Washington, DC 20005. Tel. (202) 785-1399. Its UN mission is located at 820 2nd Avenue, Suite 900-C, New York, NY 10017. Tel. (212) 949-6640.

DEFENSE

The Gambian national army numbers about 1,900. The army consists of infantry battalions, the national guard, and the navy, all under the authority of the Department of State for Defense (a ministerial portfolio held by President Jammeh). Prior to the 1994 coup, the Gambian army received technical assistance and training from the United States, United Kingdom, People's Republic of China, Nigeria, and Turkey. With the withdrawal of most of this aid, the army has received renewed assistance from Turkey and new assistance from Libya and others. The Gambia allowed its military training arrangement with Libya to expire in 2002.

Members of the Gambian military participated in ECOMOG, the West African force deployed during the Liberian civil war beginning in 1990. Gambian forces have subsequently participated in several other peacekeeping operations, including, inter alia, Bosnia, Kosovo, Democratic Republic of the Congo, Sierra Leone, Eritrea, and East Timor. The Gambia contributed 150 troops to Liberia in 2003 as part of the ECOMIL contingent. In 2004, The Gambia contributed a 196-man contingent to the UN Peacekeeping Mission in Darfur, Sudan. Responsibilities for internal security and law enforcement rest with the Gambian police under the Inspector General of Police and the Secretary of State for the Interior.

POLITICAL CONDITIONS

Before the coup d'état in July 1994, The Gambia was one of the oldest existing multi-party democracies in Africa. It had conducted freely contested elections every 5 years since independence. After the military coup, politicians from deposed President Jawara's People's Progressive Party (PPP) and other senior government officials were banned from participating in politics until July 2001.

The People's Progressive Party (PPP), headed by former president Jawara, had dominated Gambian politics for nearly 30 years. After spearheading the movement toward complete independence from Britain, the PPP was voted into power and was never seriously challenged by any opposition party. The last elections under the PPP regime were held in April 1992.

Following the coup in July 1994, a presidential election took place in September 1996, in which retired Col. Yahya A.J.J. Jammeh won 56% of the vote. The legislative elections held in January 1997 were dominated by the APRC, which captured 33 out of 45 seats. In July 2001, the ban on Jawara-era political parties and politicians was lifted. Four registered opposition parties participated in the October 18, 2001, presidential election, which the incumbent, President Yahya Jammeh, won with almost 53% of the votes. The APRC maintained its strong majority in the National Assembly in legislative elections held in January 2002, particularly after the main opposition United Democratic Party (UDP) boycotted the legislative elections.

President Jammeh won the September 2006 elections with 67% of the vote while the opposition alliance won a total of 27%. In the January 2007 parliamentary elections, Jammeh's APRC won 42 of the available 48 seats. While both the September and January elections were declared credible, several sources have reported increased oversight of journalists in the preceding months. A failed coup in March 2006 had a major effect on The Gambia's political climate. Since then President Jammeh has taken far-reaching steps to maintain power.

ECONOMY

The Gambia has a liberal, market-based economy characterized by traditional subsistence agriculture, a historic reliance on groundnuts (peanuts) for export earnings, a re-export trade built up around its ocean port, low import duties, minimal adminis-

trative procedures, a fluctuating exchange rate with no exchange controls, and a significant tourism industry.

Agriculture accounts for roughly 30% of gross domestic product (GDP) and employs about 70% of the labor force. Within agriculture, peanut production accounts for 6.9% of GDP, other crops 8.3%, livestock 5.3%, fishing 1.8%, and forestry 0.5%. Industry accounts for approximately 8% of GDP and services approximately 58%. The limited amount of manufacturing is primarily agricultural-based (e.g., peanut processing, bakeries, a brewery, and a tannery). Other manufacturing activities include soap, soft drinks, and clothing.

Previously, the U.K. and other EU countries constituted The Gambia's major domestic export markets. However, in recent years Senegal, the United States, and Japan have gained fair proportions of Gambian exports. In Africa, Senegal represented the biggest trade partner of The Gambia in 2007, which is a defining contrast to previous years that saw Guinea-Bissau and Ghana as equally important trade partners. Globally, Denmark, the United States, and China have become important source countries for Gambian imports. The U.K., Germany, Cote d'Ivoire, and Netherlands also provide a fair share of Gambian imports. Gambia's trade deficit for 2007 was $331 million.

FOREIGN RELATIONS

The Gambia followed a formal policy of nonalignment throughout most of former President Jawara's tenure. It maintained close relations with the United Kingdom, Senegal, and other African countries. The July 1994 coup strained The Gambia's relationship with Western powers, particularly the United States, which until 2002 suspended most non-humanitarian assistance in accordance with Section 508 of the Foreign Assistance Act. Since 1995, President Jammeh has established diplomatic relations with several additional countries, including Libya, Taiwan and Cuba. The Gambia plays an active role in international affairs, especially West African and Islamic affairs, although its representation abroad is limited. As a member of the Economic Community of West African States (ECOWAS), The Gambia has played an active role in that organization's efforts to resolve the civil wars in Liberia and Sierra Leone and contributed troops to the community's ceasefire monitoring group (ECOMOG) in 1990 and (ECOMIL) in 2003. It also has sought to mediate disputes in nearby Guinea-Bissau and the neighboring Casamance region of Senegal. The Government of The Gambia believes Senegal was complicit in the March 2006 failed coup attempt. This has put increasing strains on relations between The Gambia and its neighbor. The subsequent worsening of the human rights situation has placed increasing strains of U.S.-Gambia relations.

U.S.-GAMBIAN RELATIONS

U.S. policy seeks to build improved relations with The Gambia on the basis of historical ties, mutual respect, democratic rule, human rights, and adherence to UN resolutions on counter-terrorism, conflict diamonds, and other forms of trafficking. Following The Gambia's successful presidential and legislative elections in October 2001 and January 2002, respectively, the U.S. Government determined that a democratically elected government had assumed office and thus lifted the sanctions it had imposed against The Gambia in accordance with Section 508 of the Foreign Assistance Act as a result of the 1994 coup. U.S. assistance supports democracy, human rights, girls' education, and the fight against HIV/AIDS. In addition, the Peace Corps maintains a large program with about 100 volunteers engaged in the environment, public health, and education sectors, mainly at the village level.

Relations with the U.S. have not been improved significantly due to the human rights and freedom of press shortcomings, which resulted in the suspension of The Gambia's compact with the Millennium Challenge Corporation (MCC) in June 2006. The Gambia became eligible for preferential trade benefits under the African Growth and Opportunity Act (AGOA) on January 1, 2003.

TRAVEL

Consular Information Sheet

October 23, 2008

Country Description: The Gambia is a developing country in western Africa, and the capital is Banjul. The official language is English. Facilities for tourism in the Banjul area are good; however, outside the capital region, tourist facilities are limited in availability and quality.

Entry Requirements: A passport, visa, and evidence of yellow fever vaccination are required. The current fee for a two-year visa for Americans is $100.00 (U.S. Dollars).

The U.S. Embassy strongly recommends obtaining a Gambian visa in advance of arrival.

Travelers who do not obtain the necessary visa before arrival in The Gambia will have their passports stamped at the port of entry with a 24, 48 or 72 hour pass and are required to report to Banjul Immigration Department to document their stay. Banjul Immigration grants permission to remain for one month for about $16. Extensions require additional visits to the Gambian Immigration Department and additional fees.

A $10.00 (U.S. dollars) tourist levy is charged upon arrival at the airport. Payment is only accepted in U.S. dollars, British pounds, or Euros. NOTE: Charter flights should have this fee included in the price of the ticket.

Travelers are urged to obtain the latest information on customs and entry requirements from the Embassy of The Gambia, 1156 15th Street, NW, Suite 905, Washington, DC 20005; telephone (202) 785-1399, fax (202) 785-1430; or from the Permanent Mission of The Gambia to the U.N. at 820 Second Avenue, Suite 900-C, New York, NY, 10071; Telephone (212) 949-6640. Overseas, inquiries should be made at the nearest Gambian embassy or consulate. Visit the Embassy of The Gambia web site at www.gambiaembassy.us for the most current visa information.

Safety and Security: The Gambia has not experienced any acts of terrorism or other major issues of safety and security, but The Gambia borders the Casamance region of Senegal, which is home to a long-running low-intensity conflict. Like most countries in the region, conditions are always subject to change and travelers should check with the US Embassy if they have specific concerns. Demonstrations are rare in The Gambia.

Travelers driving a vehicle in The Gambia are obligated to stop at all roadblocks or road checkpoints in the country. Drivers should not reverse direction to avoid a road checkpoint or make any movements that security personnel may view as suspicious or provocative. For travel to the nearby Casamance region of Senegal, please see the Country Specific Information for Senegal.

For the latest security information, Americans traveling abroad should regularly monitor the Department's Internet web site at http://travel.state.gov, where the current Worldwide Caution Travel Alert, Travel Warnings and Travel Alerts can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S. and Canada, or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: Petty street crime is a problem in The Gambia. Travelers should be careful of pickpockets in crowded markets areas and on ferries. Packages or luggage should never be left unattended, especially in taxis. U.S. citizens in The Gambia should be careful not to leave valuables or identity documents unsecured in hotel rooms or cars. Travelers should also be cautious of individuals who persistently offer unsolicited help.

Visitors and resident U.S. citizens should drive with their windows up and doors locked while driving due to several reported residential and automobile burglaries, including theft from occupied cars stopped in traffic with the windows open or doors unlocked. Long-term residents should consider hiring a security guard for their home to prevent burglary and theft.

Women should avoid walking alone especially after dark including beach and tourist areas. In addition, female visitors to The Gambia should be particularly cautious of men locally known as "bumsters" who approach them wishing "just to get to know you" or offering to be a tour guide. Bumsters often use romance in hopes of gaining money and/or assistance of various types, or in hopes of departing The Gambia through marriage to a Westerner. Travelers are advised to be polite but decisive in turning down unwanted help or attempts at conversation.

Business fraud, long associated with other parts of West Africa, has also been reported in The Gambia. The U.S. embassy has received reports of several scams recently in which U.S. businesses send, but do not receive payment for shipments. U.S. citizens should be very suspicious of any unsolicited offers to participate in lucrative business opportunities, especially if they require financial disclosures, money transfers, large up-front investments, or promises of confidentiality. The best way to avoid becoming a victim of fraud is common sense–if it looks too good to be true, it probably is. You should be suspicious of any unsolicited business proposal originating in The Gambia. Carefully scrutinize all proposals before you commit any funds, provide any goods or services, or undertake any travel. For additional information, please see the Department of State's Bureau of Consular Affairs brochure, International Financial Scams.

The U.S. embassy has also been contacted by several victims of internet scams perpetrated in The Gambia. Generally, an American citizen befriends someone or gets engaged to someone over the internet. This person, who can claim to be an American or a Gambian citizen, generally requests financial assistance from the American due to urgent medical treatment required, claims of improper imprisonment, harassment by local authorities, or a variety of other reasons. In most of these cases, the person with whom the American has been corresponding is using a fake identity and is in no need of assistance. In general, Americans are advised not to send money to anyone they have not met in person. For more information on this type of scam, please refer to the State's Bureau of Consular Affairs brochure, International Financial Scams, specifically the section entitled, "Gorgeous People in Trouble—The Damsel in Distress."

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while over-

seas, in addition to reporting the crime to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you in finding appropriate medical care, contact family members or friends, and explain how funds may be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed. Please contact the U.S. Embassy in Banjul for a list of lawyers practicing in The Gambia, or visit the Embassy's web site at http://banjul.usembassy.gov/public_services/legal-services.html.

The local equivalent to the "911" emergency line in The Gambia is: 116 for Ambulatory services, 117 for police assistance, and 118 for fire. The Gambian Police Force operates another 24 hour emergency line at (220)422-4914. Please be advised that the emergency numbers listed may or may not have an English-speaking operator available.

Medical Facilities and Health Information: Medical facilities in The Gambia are very limited, some treatments are unavailable, and emergency services can be unpredictable and unreliable. Travelers should carry their own supplies of prescription as well as over-the-counter medicines or treatments. See the "Special Circumstances" section below for further information on prescription drugs.

Malaria is a serious risk to travelers in The Gambia. Travelers who become ill with a fever or flu-like illness while traveling in amalaria-risk area and up to one year after returning home should seek prompt medical attention and tell the physician their travel history and what anti-malarial medications they have been taking. For additional information on malaria, protection from insect bites, and anti-malarial drugs, visit the CDC Travelers' Health web site at http://www.cdc.gov/malaria/faq.htm.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's web site at http://wwwn.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith/en.

There are no HIV/AIDS entry restrictions for visitors to or foreign residents of The Gambia at this time.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning The Gambia is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

Travel in The Gambia is difficult due to poor road conditions, particularly during the rainy season, which generally lasts from June through October. Although there are paved main roads in the greater Banjul area, many are poorly maintained and poorly lit. With the installation of street lights on some roads in the Banjul area, some drivers no longer use their vehicle lights at night. Most roads outside the Banjul Area are still unlit and unpaved. Livestock and pedestrians pose road hazards throughout the country, including in the greater Banjul area. Drivers and pedestrians should exercise extreme caution to prevent accidents.

Numerous accidents are caused by intoxicated drivers. Tests are rarely done to determine levels of intoxication. If you are suspected of causing an accident while intoxicated, and the case is taken to trial, you may be subject to a substantial fine or imprisonment.

The police do not consistently apply traffic laws and regulations, and sometimes compel drivers to pay fines on the spot for violations, real or contrived. Written citations/tickets are rarely given. Police periodically set up impromptu traffic stops on major streets to check for drivers' licenses and proper insurance. Drivers should not attempt to drive around these traffic stops.

Caution should be exercised when using taxis, particularly at night. Most taxis lack safety belts and some are not road-worthy.

Government convoys frequently travel at high speeds and often in either or both lanes of traffic, including in the oncoming traffic lane, requiring cars to move off the road. Whenever there are police lights or sirens, drivers should move off the road immediately and completely to avoid collisions.

There are no trauma centers in The Gambia and severe accidents often require evacuation to Senegal or Europe.

Water transportation in the region can be unpredictable and risky. Ferries rarely keep to their posted schedules. The ferries, which are often overcrowded, usually lack sufficient numbers of life preservers for all passengers. In particular, the wooden dugout "pirogues" that cross the Gambia River often leave shore overloaded and occasionally sink in the middle of the river. U.S. citizens are advised to exit their cars during the crossing. U.S. citizens who must cross the Gambia River are advised to use the Gambia Port Authority's Banjul-Barra or Yelitenda-Farafenni ferries, which are slower but safer than the privately operated pirogues.

Visit the website of the country's national tourist office and national authority responsible for road safety at www.visitthegambia.gm.

Aviation Safety Oversight: The U.S. Federal Aviation Administration (FAA) has assessed the Government of The Gambia's Civil Aviation Authority as not being in compliance with International Civil Aviation Organization (ICAO) aviation safety standards for oversight of The Gambia's air carrier operations. For more information, travelers may visit the FAA's Internet web site at http://www.faa.gov.

Gambian airlines do not offer service to the United States. Services provided by the West African regional air carriers that serve Banjul are sometimes unreliable. The airlines are known to alter scheduled stops, cancel or postpone flights on short notice, and regularly overbook flights. Travelers may experience unexpected delays even after checking in, and should be prepared to handle alternate ticketing and/or increased food and lodging expenses.

Special Circumstances: In addition to being subject to all of The Gambia's laws affecting foreign citizens, Americans who are also legal Gambian citizens may be subject, while in The Gambia to certain additional provisions of Gambian law. Dual nationals should inquire at a Gambian embassy or consulate regarding their status.

In May 2008 Gambian government leaders, including the country's president, strongly condemned homosexuality and advocated for greatly increased penalties for anyone harboring homosexuals. However, no legislative action has resulted. The Gambia's existing laws already criminalize homosexual sex acts, but current laws do not include the death penalty. Violations of the laws against homosexual sex acts are occasionally pursued and Gambian citizens have been prosecuted under these laws. In June 2008, two Western tourists were detained but not charged under this section of the criminal code. The Gambia has strict laws on the import and export of skin-bleaching creams and some medications. Visitors who arrive with substances containing hydroquinone, hydrocortisone, betamethasone, flucinonide, clobestatol, or clobestatone are subject to fines up to $2,000 and/or three years imprisonment. Airport police and customs officials routinely inspect incoming and outgoing luggage. Airline passengers are required to put their luggage through an x-ray machine before departing the airport. Travelers in possession of prescription drugs should carry proof of their prescriptions, such as labeled containers. Police have, on occasion, arrested foreigners carrying unlabeled pills. For a list of prohibited items, travelers should contact the nearest Gambian embassy or consulate.

It is against the law for tourists to photograph or film government buildings, including airports, military installations or embassies due to security concerns.

Gambian currency, the dalasi, is freely convertible but is not widely available outside the country. The Gambia has a cash economy and travelers should carry sufficient currency to cover all expenses for their visit. Visitors can exchange currency at banks or exchange bureaus. Changing money unofficially is prohibited and individuals who do so may face prosecution. Travelers should be aware that The Gambia has many last-minute holidays requiring banks and other businesses to close. Travelers should always have enough cash to carry them through unexpected bank closures.

Credit cards are accepted only at major hotels, some grocery stores, and a few restaurants. Local personal checks from U.S. citizens are accepted only at exchange bureaus and only from Americans who are resident in The Gambia. There are a few ATMs in the Banjul area, but they often malfunction or fail to issue receipts. ATMs only accept VISA cards for international transactions and only dispense a maximum of about $80.00 in local currency per transaction with three transactions allowed per day. Money transfers are widely available at Western Union branch offices in The Gambia.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law.

Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating The Gambia's laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in The Gambia are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in The Gambia are encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration web site so that they can obtain updated information on travel and security within The Gambia. Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate.

By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency. The U.S. Embassy is located at 92 Kairaba Avenue in Fajara, a suburb of the capital city of Banjul. The mailing address is P.M.B.19, Banjul, The Gambia. Twenty-four hour telephone numbers are (220) 439-2856, 439-2858 and 439-1971; the fax is (220) 439-2475; and the web site is http://

www.usembassybanjul.gm. Normal business hours are 8:00 a.m. to 5:30 p.m. Mondays-Thursdays and till noon on Fridays.

Intercountry Adoption

April 2006

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is based on public sources and current understanding. Questions involving foreign and U.S. immigration laws and legal interpretation should be addressed respectively to qualified foreign or U.S. legal counsel.

Please Note: The Government of Gambia passed into law a Children's Act in 2005 that includes laws governing adoptions in the country. Under this Act, the Children's Court has jurisdiction over matters of adoption; therefore, this court must approve all adoption applications. As of March 31, 2006, the Children's Court has only heard one case, and it was not related to adoptions.

Foreigners are allowed to adopt Gambian children only in exceptional circumstances. Prospective adoptive parents must be resident in The Gambia at least six month prior applying to adopt. The U.S. Embassy in Dakar, Senegal issues immigrant visas for Gambian citizens, including adopted orphans.

Please review carefully the information found later in this flyer regarding the immigrant visa procedures at the U.S. Embassy in Dakar. Failure to comply with the Embassy's requirements could result in a denial of the child's visa case. U.S. Embassy Dakar's website is at: http://usembassy.state.gov/dakar.

Patterns of Immigration: Recent U.S. immigrant visa statistics indicate only one immigrant visa has been issued to a Gambian orphan in the last five fiscal years.

Adoption Authority: The Children's Court, which has jurisdiction over adoption, coordinates with the Social Welfare Department in Gambia to process adoption applications.

Eligibility Requirements for Adoptive Parents: Adoptions by non-Gambian prospective adoptive parents are allowed only in exceptional circumstances. Adoptive parent(s) can be single or a married couple. The adoptive parent(s) must be at least 21 years old and at least 15 years older than the child, but not over age 60. The spouse of an applicant must also consent to the adoption. Single men may not adopt a female child, nor may single women adopt a male child.

The adoptive parent(s) must have fostered the child for a period of at least thirty-six months under the supervision of a Social Welfare Officer. Non-Gambian nationals must have residency in Gambia for at least six months, have no criminal record, and prove economic resources to support the child.

Residency Requirements: Non-Gambians are required to be resident for at least six months in Gambia. Prospective adoptive parents must foster the child for a minimum of thirty-six months under the supervision of a Social Welfare Officer. According to the Department of Social Welfare, the 36 months does not have to take place in Gambia, but must occur under the supervision of a qualified social welfare agency in the place of residence.

Time Frame: Currently no information is available on the timeframe for the adoption process in Gambia. Once the adoption process of the Children's Court is established, this information will be updated.

Adoption Agencies and Attorneys: The Children's Court handles all adoption cases. There are neither specific adoption lawyers nor adoption agencies in Gambia. At this time no private attorneys have brought adoption cases before the Children's Court.

Adoption Fees: The cost of an adoption decree has not yet been determined. According to the Department of Social Welfare in Gambia, no fees are charged for processing an adoption.

The S.O.S. Village, the only orphanage in Gambia, also reported that it does not charge adoption fees. They refer all inquiries to the Department of Social Welfare. The fee for a Gambian passport is 500 dalasi (USD 18).

Adoption Procedures: The process begins with an application submitted to the Children's Court. The Children's Act of 2005 does not give further details of this process and the Court has not yet heard an adoption case to set precedent or issue procedures.

The U.S. Embassy in Banjul and the Department of State's Office of Children's Issues are tracking closely the development of this area of law and any precedents the Children's Court may set, and this flyer will be updated as such information becomes available.

Required Documents: The Children's Act does not list specific documents that are required for adoption, and the Children's Court has not yet announced specific requirements.

Embassy of Gambia

1156 15th Street, N.W., Suite 905

Additional Information: Specific questions about intercountry adoption in The Gambia may be addressed to the U.S. Embassy in Banjul. Questions about the U.S. immigrant visa process for Gambian children should be directed to the U.S. Embassy in Dakar, Senegal. General questions regarding intercountry adoption may be addressed to the Office of Children's Issues, U.S. Department of State, CA/OCS/CI, SA-29, 4th Floor, 2201 C Street, NW, Washington, D.C. 20520-4818, toll-free Tel: 1-888-407-4747.

GEORGIA

Compiled from the February 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Republic of Georgia

PROFILE

Geography

Area: 69,700 square kilometers; slightly smaller than South Carolina; 20% of total territory is not under government control.
Cities: Capital Tbilisi (population 1.1 million, 2002).
Terrain: Mostly rugged and mountainous.
Climate: Generally moderate; mild on the Black Sea coast with cold winters in the mountains.

People

Nationality: Noun and adjective Georgian(s).
Population: (July 2007 est.) 4.65 million.
Population growth rate: (2007 est.) 0.33%.
Ethnic groups: (2002 census) Georgian 83.8%, Azeri 6.5%, Armenian 5.7%, Russian 1.5%, other 2.5%.
Religions: (2002 census) Orthodox Christian 83.9%, Muslim 9.9%, Armenian Apostolic 3.9%, Catholic 0.8%; other 0.8%; none 0.7%.
Languages: Georgian (official), Abkhaz also "official language" in Autonomous Republic of Abkhazia.
Education: Years compulsory 11. Literacy (2004 est.) 100%.
Health: Infant mortality rate (2007 est.) 17.36 deaths/1,000 live births. Life expectancy (2007 est.) 76.3 yrs.

Government

Type: Republic.
Constitution: August 24, 1995; amended February, April, and June 2004; December 2005; and January 2007.
Government branches: Executive: president with State Chancellery. Legislative: unicameral parliament, 235 members. Judicial: Supreme Court, Constitutional Court, and local courts.
Political subdivisions: 67 electoral districts, including those within the two autonomous republics (Abkhazia and Adjara) and five independent cities.
Political parties: United National Movement-Democrats [Mikheil Saakashvili]; Industry Will Save Georgia (Industrialists) [Georgi Topadze]; Labor Party [Shalva Natelashvili]; National Democratic Party [Bachuki Kardava]; New Rights [David Gamkrelidze]; Republican Party [David Usupashvili]; Traditionalists [Akaki Asatiani]; Union of National Forces-Conservatives [Koba Davitashvili and Zviad Dzidziguri], Georgia's Way [Salome Zourabichvili].
Suffrage: Universal over 18 years of age.

Economy

GDP: $6.46 billion (2006).
GDP per capita: $3,800, purchasing power parity (2006).
GDP growth: 9.4% in 2006 and 11.4% in the 1st quarter of 2007.
Inflation rate: 7.3% (end of June 2007).
Natural resources: Forests, hydropower, nonferrous metals, manganese, iron ore, copper, citrus fruits, tea, wine.
Industry: Types—steel, aircraft, machine tools, foundry equipment (automobiles, trucks, and tractors), tower cranes, electric welding equipment, fuel re-exports, machinery for food packing, electric motors, textiles, shoes, chemicals, wood products, bottled water, and wine.
Trade: (2006 est.) Exports—$1.76 billion. Partners: United Kingdom, Turkey, United States, Spain, Azerbaijan, Turkmenistan. Imports—$3.32 billion. Partner: Turkey, United States, Azerbaijan, Ukraine, Germany, Italy.
Work force: (2.02 million in 2005) Agriculture 40%, industry: 20%, services: 40%.
Unemployment: (2005 est.) 13.8%.

PEOPLE AND HISTORY

Georgia's recorded history dates back more than 2,500 years. Georgian, a South Caucasian (or "Kartvelian") language unrelated to any other outside the immediate region, is one of the oldest living languages in the

world, and has its own distinctive alphabet. Tbilisi, located in the picturesque Mtkvari River valley, is more than 1,500 years old. In the early 4th century Georgia adopted Christianity, the second nation in the world to do so officially. Georgia has historically found itself on the margins of great empires, and Georgians have lived together in a unified state for only a small fraction of their existence as a people. Much of Georgia's territory was fought over by Persian, Roman, Byzantine, Arab, Mongol, and Turkish armies from at least the 1st century B.C. through the 18th century. The zenith of Georgia's power as an independent kingdom came in the 11th and 12th centuries, during the reigns of King David the Builder and Queen Tamara, who still rank among the most celebrated of all Georgian rulers. In 1783 the king of Kartli (in eastern Georgia) signed the Treaty of Georgievsk with the Russians, by which Russia agreed to take the kingdom as its protectorate. In 1801, the Russian empire began the piecemeal process of unifying and annexing Georgian territory, and for most of the next two centuries (1801-1991) Georgia found itself ruled from St. Petersburg and Moscow. Exposed to modern European ideas of nationalism under Russian tutelage, Georgians like the writer Ilya Chavchavadze began calling for greater Georgian independence. In the wake of the collapse of tsarist rule and war with the Turks, the first Republic of Georgia was established on May 26, 1918, and the country enjoyed a brief period of independence under the Menshevik president, Noe Zhordania. However, in March 1921, the Russian Red Army re-occupied the country, and Georgia became a republic of the Soviet Union. Several of the Soviet Union's most notorious leaders in the 1920s and 1930s were Georgian, such as Joseph Stalin, Sergo Orjonikidze, and Lavrenti Beria. In the postwar period, Georgia was perceived as one of the wealthiest and most privileged of Soviet republics, and many Russians treated the country's Black Sea coast as a kind of Soviet Riviera. On April 9, 1991, the Supreme Council of the Republic of Georgia declared independence from the U.S.S.R.

Beset by ethnic and civil strife from independence in 1991, Georgia began to stabilize in 1995. The separatist conflicts in Georgia's regions of Abkhazia and South Ossetia remain unresolved, although cease-fires are in effect. In Abkhazia, the Commonwealth of Independent States (in fact, only Russian forces) maintains a peacekeeping force, and the United Nations maintains an Observer Mission in Georgia (UNOMIG), both of which monitor compliance with the 1994 cease-fire agreement. In South Ossetia, the Organization for Security and Cooperation in Europe (OSCE) has the prime role in monitoring the 1992 cease-fire and facilitating negotiations. A Joint Peacekeeping Force composed of Georgian, Russian, and Ossetian troops patrols the region.

The Georgian Government stakes much of its future on the revival of the ancient Silk Road as a Eurasian transportation corridor, using Georgia's geography as a bridge for the transit of goods, including oil and gas, between Europe and Asia. Georgians are renowned for their hospitality and artistry in dance, theater, music, and design.

GOVERNMENT

Georgia has been a democratic republic since the presidential elections and constitutional referendum of October 1995. The President is elected for a term of 5 years, limited to 2 terms; his constitutional successor is the Speaker of Parliament.

Parliamentary elections on November 2, 2003 were marred by irregularities and fraud according to local and international observers. Popular demonstrations ensued in the streets of Tbilisi; protestors carried roses in their hands and these peaceful protests became known as the Rose Revolution. Former President Eduard Shevardnadze resigned on November 23, 2003, and the Speaker of Parliament Nino Burjanadze assumed the role of Interim President. President Mikheil Saakashvili was elected to a 5-year term in January 2004. Parliamentary elections were re-held in March 2004 and President Saakashvili's party, National Movement, combined with Speaker Burjanadze's party, the Burjanadze-Democrats, won the majority of seats. On May 24, 2005, the Parliament passed legislation to decentralize power from the central government in Tbilisi to local government authorities in the regions. Elections were held on October 5, 2006 to elect 1,732 members of 69 local councils and seven city governments.

In September 2007, following the arrest of former Defense Minister Irakli Okruashvili, nine opposition parties formed the United National Council (UNC) and issued four demands to the government, including moving up parliamentary elections from the fall to the spring of 2008. The Council organized protests throughout Georgia in October and staged a large rally in front of the Parliament on November 2. Opposition leaders began to demand the president's resignation, and violence ensued when the police dispersed protesters in front of the Parliament on November 7. As a result, President Saakashvili officially resigned on November 25 and called snap presidential elections for January 5, 2008.

On January 5, President Saakashvili was reelected to a second 5-year term with 53.45% of the vote. Levan Gachechiladze, the UNC candidate, earned 25.68%. Voters also overwhelmingly voted in two plebiscites in favor of NATO integration and spring parliamentary elections.

Principal Government Officials

Last Updated: 11/12/08

President: **Mikheil SAAKASHVILI**
Speaker of Parliament: **Davit BAKRADZE**
Prime Minister: **Vladimir "Lado" GURGENIDZE**
Vice Premier: **Giorgi BARAMIDZE**
Min. of Agriculture: **Bakur KVEZERELI**
Min. of Culture: **Nika VACHEISHVILI**
Min. of Defense: **Davit KEZERASHVILI**
Min. of Economic Development: **Eka SHARASHIDZE**
Min. of Education & Science: **Gia NODIA**

Min. of Energy: **Alexander KHETAGURI**
Min. of Environment: **Irakli GVALADZE**
Min. of Finance: **Nikoloz GILAURI**
Min. of Foreign Affairs: **Eka TKESHELASHVILI**
Min. of Health & Social Welfare: **Sandro KVITASHVILI**
Min. of Internal Affairs: **Vano MERABISHVILI**
Min. of Justice: **Nika GVARAMIA**
State Min. for Diaspora Affairs: **Iulon GAGOSHADZE**
State Min. for Euro-Atlantic Integration: **Giorgi BARAMIDZE**
State Min. for Refugees & Accommodation:
State Min. for Regional Policies: **Davit TKESHELASHVILI**
State Min. for Reintegration: **Temur IAKOBASHVILI**
Prosecutor General:
Sec., National Security Council: **Kakha LOMAIA**
Chmn., National Bank (Acting): **David AMAGLOBELI**

Ambassador to the US: **Vasil "David" SIKHARULIDZE**
Permanent Representative to the UN, New York: **Irakli ALASANIA**

Georgia maintains an embassy in the United States at 2209 Massachusetts Avenue, NW, Washington, DC 20008, telephone (202) 387-2390, fax (202) 393-4537.

POLITICAL CONDITIONS

Since 2004, the Government of Georgia has turned a nearly failed state into a rapidly maturing market democracy. Parliamentary and municipal elections have been judged to be largely free and fair, although problems remain with voter lists. The new government took action against endemic corruption. It completely reorganized the traffic police, which was infamous for its corruption prior to the Rose Revolution. Corrupt judges were dismissed, and a fair examination system for entering the universities was implemented. Georgia has received high marks from the World Bank and others on the government's aggressive anti-corruption campaign. Democratic institutions were strengthened as public service reform gained momentum and judicial reform was acknowledged as a priority. Constitutional amendments signed into law in 2006 increased the independence of the judiciary; further reforms have aimed at increasing respect for and strengthening the rule of law. In July 2007, legislation banning ex parte communication was passed, prohibiting parties to a case from communicating with judges during the pre-trial investigation period

as well as during the trial. Legislation requiring the Ministry of Justice to establish a legal aid office was also passed, making available assistance and representation in court proceedings to those who request it. The Georgian legislature has instituted political reforms supportive of higher human rights standards, including religious freedoms that are enshrined in the constitution. The government has launched an aggressive campaign to combat trafficking in persons.

Georgia is seeking membership in Euro-Atlantic institutions, particularly the North Atlantic Treaty Organization (NATO) and eventually the European Union (EU), and much progress has been made reforming Georgia's military. In September 2006, NATO granted Georgia Intensified Dialogue on requirements for membership in the organization.

The separatist conflict in Abkhazia continues to simmer, with frequent accusations from the Georgian Government that ethnic Georgians in Abkhazia face discrimination from the Abkhaz de facto authorities. The Abkhaz de facto authorities seek full independence from Georgia, and are currently refusing talks following the reassertion of Georgian Government control over the upper Kodori Valley area of Abkhazia in the summer of 2006. Since December 1993, the United Nations has chaired negotiations toward a settlement in Abkhazia. The UN mediator is the Special Representative of the Secretary General (SRSG), currently Ambassador Jean Arnault. The Group of Friends of the UN Secretary General on Georgia (consisting of the United States, France, Germany, the Russian Federation, and the United Kingdom) supports the UN-led peace process. UNOMIG and the Friends continue to encourage the adoption of confidence-building measures in the region. The Georgian Government has repeatedly expressed its desire to internationalize the CIS peacekeeping contingent but has made no official demand for the peacekeepers in Abkhazia to leave. For more information on the separatist conflict in Georgia's Abkhazia region, see the Department of State's fact sheet on Abkhazia http://www.state.gov/p/eur/rls/fs/53745.htm. The United States supports the strengthening of Georgia's territorial integrity through peaceful means. Unilaterally and as a member of the Group of Friends, the U.S. seeks to advance negotiations toward a comprehensive settlement of the conflict, including on Abkhazia's future status within Georgia and the safe and dignified return of refugees and internally-displaced persons.

The 1992 Sochi Agreement established a cease-fire between the Georgian and South Ossetian forces, and defined both a zone of conflict around the South Ossetian capital of Tskhinvali and a security corridor along the border of South Ossetian territories. The South Ossetia region is comprised of a patchwork of Georgian villages interspersed with ethnic Ossetian villages. The Organization for Security and Cooperation in Europe (OSCE) monitors the cease-fire and facilitates negotiations between the Georgians and the South Ossetians toward a comprehensive settlement consistent with Georgian independence, sovereignty, and territorial integrity. The Agreement also created the Joint Control Commission (JCC) and a peacekeeping body, the Joint Peacekeeping Forces (JPKF). The JPKF is under Russian command and is comprised of peacekeepers from Georgia, Russia, and Russia's North Ossetian autonomous republic. South Ossetian peacekeepers serve in the North Ossetian contingent. Talks on South Ossetia are held under the auspices of the JCC, with Georgian, Russian, North Ossetian, and South Ossetian delegations participating. The Georgian Government has frequently complained that the current format for talks puts Georgia at a disadvantage, and would like greater participation by the international community.

In January of 2005, Georgian President Saakashvili put forth a proposal to give autonomous status to South Ossetia within Georgia. The United States welcomed President Saakashvili's initiative to resolve the conflict through peaceful means and continues to look for ways to encourage a lasting resolution of the conflict. An alternative leader in South Ossetia emerged in November 2006, when ethnic Ossetian Dmitry Sanakoyev was elected in a de facto presidential election, largely by the ethnic Georgian population. Sanakoyev heads a Temporary Administrative Unit in Kurta, South Ossetia.

The United States supports the territorial integrity of Georgia and supports a peaceful resolution of the conflict within Georgia's internationally recognized borders, while affording South Ossetia significant autonomy within a unified Georgia. The United States views Georgia's autonomy proposal as an important step in a peace process that should be marked by direct and frequent negotiations between the two sides. International donors, including the United States, launched an economic rehabilitation project in 2006 to help establish a peaceful and prosperous future for South Ossetia within Georgia. For more information on the separatist conflict in Georgia's South Ossetia region, see the Department of State's fact sheet on South Ossetia http://www.state.gov/p/eur/rls/fs/53721.htm.

ECONOMY

The Soviet Socialist Republic of Georgia was one of the most prosperous and envied locations in the former Soviet Union. The political turmoil after independence had a catastrophic effect on Georgia's economy. The cumulative decline in real GDP is estimated to have been more than 70% between 1990 and 1994, and by the end of 1996, Georgia's economy had shrunk to around one-third of its size in 1989. Today, the largest share of Georgia's GDP is produced by agriculture, followed by trade, manufacturing, and transport. Georgia's main exports are metals and ores, wine, nuts, and aircraft.Although Georgia experienced some years of growth in the mid-1990s, it was hit hard by the Russian economic crisis of 1998-99. The later years of former President Shevardnadze's administration were marked by rampant cronyism, cor-

ruption, and mismanagement. Public disaffection with the situation resulted in the Rose Revolution of 2003. The new government, led by Mikheil Saakashvili, promised to reorient the government and the economy toward privatization, free markets, and reduced regulation, to combat corruption, to stabilize the economy, and to bring order to the budget.

The government reduced the number of taxes from 21 to 7 and introduced a flat income tax of 12%. It significantly reduced the number of licenses a business requires, and introduced a "one-window" system that allows an entrepreneur to open a business relatively quickly. Strict deadlines for agency action on permits were introduced, and consent is assumed if the agency fails to act within the time limit. The government intends to completely eliminate import duties by 2008, which should reduce costs and stimulate business.

The World Bank recognized Georgia as the world's fastest-reforming economy in its 2008 "Doing Business" report, ranking it as the world's 18th easiest place to do business, in the same league as countries such as Germany, Sweden, and Estonia. The World Bank's "Anti-Corruption in Transition 3" report places Georgia among the countries showing the most dramatic improvement in the struggle against corruption, due to implementation of key economic and institutional reforms, and reported reduction in the bribes paid by firms in the course of doing business.

Economic growth has remained strong, reaching 8% in 2006; inflation reached 10% in the same year but decreased to 7.3% in the first six months of 2007. Efforts to improve the efficiency of government operations since the Rose Revolution have required the government to release workers, pushing official unemployment to 13.8% in 2005. A strongly negative balance of trade is offset by inflows of investment and assistance from international donors. The fiscal deficit was 2.9% of GDP in 2006 according to the International Monetary Fund (IMF).

Improved collection and administration of taxes have greatly increased revenues for the government. In two years, from 2003 to 2005, tax collections went up from 13.8% of GDP to 20.8%. The government has been able to pay off wage and pension arrears and increase spending on desperately needed infrastructure such as roads and electric energy supply systems. The government privatized nine times the value of state-owned assets in 2005 as it did in all of 2000-2003. It expects to have privatized all of the largest state-owned industries by the end of 2008, increasing revenues and removing a major temptation toward corruption from the control of state bureaucrats.

Before 2004, electricity blackouts were common throughout the country, but since late 2005, distribution has been much more reliable, approaching consistent 24-hour-a-day service. Improvements have resulted from increased metering, better billing and collection practices, reduced theft, and management reforms. Investments in infrastructure have been made as well. Hydroelectricity output increased by almost 27%, and thermal by 28%, from 2005 to 2006. Natural gas has traditionally been supplied to Georgia by Russia. Through conservation, new hydroelectricity sources, and the availability of new sources of natural gas in Azerbaijan, Georgia's dependence on Russia for energy supplies should decrease in the near future.

The banking sector is becoming more open to competition from foreign-owned banks. The sector is relatively stable, and is supplying more credit to domestic businesses. Credit from Georgian banks to the economy was 15% of GDP in 2005, compared to 10% in 2004—still low, compared to the average in the Czech Republic, Hungary, and Poland for 2005, which was 36%. Foreign direct investment (FDI) is the most important source of capital for Georgia and other post-Soviet states. Such investment not only supports new plants and equipment, but usually entails bringing in modern management methods as well. The Georgian Government is eager to welcome foreign investors. From 2002 to 2006, FDI averaged 9% of GDP, with much of it dedicated to the construction of the Baku-Tbilisi-Ceyhan oil pipeline and the South Caucasus gas pipeline. In 2006, which saw diminishing pipeline investment as a function of total FDI, more than half of FDI went to the banking, manufacturing, and tourism sectors.

Georgia faces many challenges in attracting foreign investment and growing its economy. In 2006, more than 50% of the population lived below the official poverty line. With only 4.7 million people, most of whom have little disposable income, it is a small market in itself. The major market to which Georgia has traditionally been linked is Russia. (For example, at one time nearly 100% of the Soviet Union's citrus fruits were grown in Georgia.) In 2006, trade relations were plagued by politically motivated interruptions when Russia imposed bans on all Georgian exports of wine, fruits and vegetables, and mineral water. In October 2006, Russia severed all direct transportation links, as well as postal service and visa issuance. In addition, Russia undertook a campaign of deportations of Georgian nationals residing in Russia and closed the only legal land border crossing between Georgia and Russia, diverting traffic into the separatist regions outside of Georgia's control. In light of these restrictions, Georgian businesses are actively seeking new markets for their products in the EU, Eastern Europe, North America, and elsewhere. Reports confirm that the sanctions have not had an adverse effect on the economy; in fact, exports have increased since the beginning of 2006 because Georgia was forced to find alternate markets for its goods.

The government faces a major challenge in controlling corruption, which is a persistent problem. Shortly after President Saakashvili took office, his administration dismissed nearly the entire police force and replaced it with better-paid and -trained officers. Several high officials have been prosecuted for corruption-related offenses. On the other hand, widespread lack of confidence in the Geor-

gian courts and system of justice is a major obstacle to both foreign and domestic investment. The new government has promised to tackle this difficult task, which requires balancing the objective of judicial independence with honest, fair, and competent decision making.

The United States and other international donors have targeted foreign assistance to promote democratic reform, resolve regional conflicts, foster energy independence, assist economic development, and reduce poverty. The U.S. seeks to help Georgia consolidate democratic gains since the Rose Revolution. The USG lends significant diplomatic and funding support to Georgia's efforts to resolve the separatist conflicts of South Ossetia and Abkhazia. With USG assistance, Georgia is working to free itself from near total energy dependence on Russian sources of energy. Georgia is one of the first countries to receive a compact, in the amount of $295 million over five years, from the United States Millennium Challenge Corporation (MCC). MCC offers grant assistance to countries that meet certain requirements for good governance and commitment to reform. In 2004, Georgia's debt to the Paris Club was restructured. Since 2004, the International Monetary Fund (IMF) has monitored a Poverty Reduction and Growth Facility that will terminate in 2007. The World Bank, European Bank for Reconstruction and Development, EU, OSCE, and the UN are all active in Georgia. Their goals are complementary, and include assisting in conflict resolution in Abkhazia and South Ossetia, energy and transportation development, legal and administrative reform, health, and many other areas.

FOREIGN RELATIONS

Georgia's location between the Black Sea, Russia, Armenia, Azerbaijan, and Turkey gives it importance as a transport corridor far beyond its size. It is developing as the gateway from the Black Sea to the Caucasus and the Caspian basin. Following Russian bans on imports of Georgian wine, water, and agricultural products, and the severing of transportation links in 2006, Georgia has reached out to other neighbors and to the West to diversify its export markets. It signed a partnership and cooperation agreement with the European Union, and in 2006 signed an action plan under the European Union's European Neighborhood Policy for reforms aimed at building a closer relationship with the EU. Georgia participates in NATO's Partnership for Peace program. In September 2006, Georgia was granted Intensified Dialogue with NATO to formalize discussions on Georgia's membership aspirations. In addition, Georgia has reached out to a number of countries that have expressed interest in investing in the country. China, Russia, Switzerland, Turkey, and Ukraine, as well as a number of European Union countries (including Austria, the Czech Republic, Denmark, France, Germany, Greece, Italy, Latvia, Lithuania, the Netherlands, Poland, Romania, Spain, Sweden, and the United Kingdom) maintain embassies in Tbilisi. Georgia is a member of the United Nations, the Organization for Security and Cooperation in Europe, the World Bank, the International Monetary Fund, the European Bank for Reconstruction and Development, the World Trade Organization, the Council of Europe, and the Organization for Democracy and Economic Development—GUAM.

U.S.-GEORGIA RELATIONS

U.S.-Georgia relations continue to be close. Extensive U.S. assistance is targeted to support Georgia's democratic, economic, and security reform programs, with an emphasis on institution-building and implementing lasting reforms. The United States has provided Georgia approximately $1.7 billion in assistance since 1991. On September 12, 2005, Georgia signed a compact with the Millennium Challenge Corporation for a five-year $295.3 million assistance package. Information about U.S. assistance to Georgia can be found at http://www.state.gov/p/eur/rls/fs/66198.htm.

The United States works closely with Georgia to promote mutual security and counterterrorism interests. The United States provides Georgia with bilateral security assistance, including English-language and military professionalism training, through the International Military Education and Training (IMET) program. The multi-year Georgia Train and Equip Program (GTEP) ended in 2004, achieving its intended goals of enhancing Georgia's military capability and stimulating military reform. Launched in January 2005, the Georgia Sustainment and Stability Operations Program has advanced GTEP's goals and trained the Georgian contingent participating in coalition operations in Iraq. Partnership with the Georgia (U.S.) National Guard, visits by the Sixth Fleet and the Coast Guard to Georgia, and the Bilateral Working Group on Defense and Military Cooperation are also important components of our security relationship with Georgia. Promoting democracy and reform is another strategic pillar of our bilateral relationship with Georgia. In April 2006 the government passed a strong anti-trafficking-in-persons law. Since then, the government has taken further constructive steps to combat trafficking in persons. In 2007, Georgia moved up to the Tier 1 list, meaning that it fully complies with the minimum standards for the elimination of trafficking.

TRAVEL

Consular Information Sheet

September 18, 2008

Country Description: Georgia is a constitutional republic with a developing economy. Tourist facilities outside of Tbilisi are not highly developed, and many of the goods and services taken for granted in other countries are not yet available.

Entry Requirements: A passport is required. U.S. citizens visiting for 90 days or less do not need a visa to enter Georgia. Armenian and Azerbaijani visas are no longer valid for transit through Georgia. For further information, please contact the Embassy of Georgia at 2209 Massachusetts Avenue, NW, Washington DC, 20008 tel. (202) 387-2390, fax: (202) 393-4537. Visit the Embassy of Georgia web site at http://embassy.mfa.gov.ge for the most current visa information.

Safety and Security: As a result of civil wars in the 1980s and early 1990s, there are two separatist regions in Georgia that are not under the control of the Government of Georgia: South Ossetia, in north-central Georgia; and Abkhazia, in northwest Georgia. Tensions are high between the separatist regions and the central government, and fighting broke out in August 2008 between separatist, Georgian, and Russian forces. The situation remains tense, with Russian troops stationed in both separatist regions and in adjacent territory within Georgia proper. Due to the volatility of the political situation, high levels of crime, and inability of Embassy personnel to travel to Abkhazia or South Ossetia, the U.S. Embassy advises American citizens not to travel to these separatist-controlled areas. The restricted access of U.S. officials to Abkhazia and South Ossetia significantly limits the ability of the U.S. Government to assist American citizens in these regions, even in emergencies. All travelers to these regions, should register with the U.S. Embassy. The U.S. Embassy recommends that Americans regularly monitor warden messages on the Embassy web site for the latest information on the security situation throughout Georgia.

Serious fighting occurred between Georgian and combined separatist and Russian forces in August 2008 in some areas adjacent to the conflict zones of South Ossetia and Abkhazia, resulting in civilian casualties and the displacement of over 100,000 people. Russian forces occupied the area near the city of Gori in central Georgia for several days; Russian troops remain in areas near the western cities of Poti and Zugdidi. The risk of unexploded ordnance in areas where fighting occurred remains high, and Americans should avoid travel to those areas until they are cleared.

In addition to the recent violence, a number of attacks, criminal incidents, and kidnappings have occurred in the separatist regions over the past several years. On August 6, 2007, a missile was fired from an aircraft near a village between the city of Gori and the separatist region of South Ossetia. This incident serves as another reminder that the situation near the separatist areas is unpredictable. While Abkhaz "border officials" may demand that travelers entering the region purchase "visas" from the so-called "Ministry of Foreign Affairs of Abkhazia," the U.S. Government recognizes the territorial integrity of Georgia.

Georgia's armed forces periodically conduct operations against suspected international terrorists, Chechen fighters, and criminals who have taken refuge in the Pankisi Gorge. American citizens should avoid all travel to the Pankisi Gorge. American citizens are also advised to exercise caution when traveling in the northern mountainous areas of Georgia bordering the Russian Federation, especially the Chechnya and Dagestan sectors. American citizens cannot legally cross by land, air, rail or sea between Russia and Georgia, even if in possession of valid Russian or Georgian visas.

Political demonstrations take place from time to time in Tbilisi, and normally take place in front of the Parliament building on Rustaveli Avenue. While these demonstrations are normally peaceful, confrontational demonstrations have occurred, and we wish to remind all Americans that even demonstrations intended to be peaceful can turn confrontational and possibly escalate into violence.

Regardless of the region in Georgia one is planning to visit, American citizens are urged to review their personal security precautions, increase their levels of awareness, register with the consular section and as appropriate, take increased security measures. American citizens in Georgia are also advised to be aware of their surroundings at all times and to avoid straying off main roads or traveling after dark.

Religious minorities in Georgia have been targets of violent attacks. The victims were primarily Jehovah's Witnesses, but also include Pentecostals, Baptists, and members of the Assembly of God. Incidents included the burning of literature, the destruc-

tion of private property and the beating (sometimes severe) of believers, including American citizens. Although Georgian authorities arrested, convicted, and imprisoned the ringleader of the group responsible for these attacks in 2005, American citizens should remain cautious when engaging in missionary activity in Georgia.

For the latest security information, Americans traveling abroad should regularly monitor the Department of State, Bureau of Consular Affair's Internet site at http://travel.state.gov, where the current Travel Warnings and Travel Alerts, including the Worldwide Caution Travel Alert, can be found. Up-to-date information on security can also be obtained by calling 1-888-407-4747 toll free in the U.S., or, for callers outside the United States and Canada, a regular toll line at 1-202-501-4444.

Crime: Crime is a very serious problem in Georgia. There is a great disparity in affluence between foreigners and most Georgians. Americans in particular are perceived as being wealthy, and are therefore targeted for economic- and property-based crimes. Most of the crimes involving Americans, as reported to the Embassy, are residential break-ins, carjackings, car theft, petty theft, and armed robbery. Petty street crime, such as pick pocketing, purse snatching, and cell phone theft, is also common throughout the country. Furthermore, violent attacks have become more commonplace. Illegal firearms are readily available in Georgia, so assailants are likely to be armed with firearms and other weapons.

Crime remains a particularly serious issue in Tbilisi, where criminal activity against foreigners remains at levels disproportionate to other metropolitan areas in Europe and the United States. Many robberies and assaults have occurred in areas frequented by American citizens and foreigners, such as on side streets near Tbilisi's city center; trouble spots include areas off the main avenues in the Vake and Vera districts, and Chavchavadze and Rustaveli avenues, as well as the Saburtalo region of Tbilisi. These crimes often occur when the victim is alone, after dark, and in unfamiliar surroundings.

Petty theft is also a problem on the Tbilisi metro system and in minivans, or "marshrutkas" used for public transport. American citizens are advised to use personal vehicles or use taxis from established companies that carry passengers door-to-door. While the security of overland travel in Georgia has improved, vehicular and rail traffic remains vulnerable to robbery.

The threat of kidnapping exists both within and outside of Tbilisi. In the past, foreign businessmen have been abducted for ransom, and Americans in the Tbilisi area have received kidnapping threats. The possibility of similar risk to Americans elsewhere in the country cannot be discounted.

Outside of Tbilisi, criminal activity is also a problem, especially in the separatist regions of Abkhazia and South Ossetia, due to the reduced capacity of law enforcement in those areas. Other regions of concern include: upper Svanetia, Samtskhe-Javakheti, the administrative border with Abkhazia (including Zugdidi city), and areas along the border with Russia. When visiting or traveling through these regions, American citizens are urged to increase their vigilance, review their personal security precautions, and take appropriate security measures, e.g. traveling with a native Georgian escort familiar with the local area.

Despite much progress in the Georgian Government's efforts to reform police and fight internal corruption, serious concerns remain as to the police's ability to deter criminal activity or conduct effective post-incident investigations. Although police emergency response is good (see below for contact information), criminals continue to have freedom of movement throughout Tbilisi day or night.

In light of the serious crime situation, all American citizens visiting Georgia are again strongly advised to exercise basic security precautions. American travelers should vary times and routes, especially from places of residence to work locations. Americans should maintain a low profile by not carrying large amounts of cash, not wearing excessive amounts of jewelry, and not behaving in a manner that draws unnecessary attention. Additionally, Americans should be aware of their surroundings, travel in pairs or groups, and stay on main streets and routes. The Embassy recommends that those traveling throughout the country do so during daylight hours only and provide a travel itinerary and contact telephone numbers to a friend or business colleague. Americans should not hesitate to report any unusual incidents or suspicious vehicles or individuals to the Georgian authorities as soon as possible. Finally, those that do become a victim of crime should not resist their assailant and should cooperate with the assailant as best they can. Assailants are most interested in money and/or property; cooperation reduces the chance of being more seriously injured.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, to contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed. The Georgian Ministry of Internal Affairs (MOIA) has established a police emergency hotline. This service is currently limited to larger cities, but the MOIA is planning to expand this service countrywide. The local "911" equivalent to contact police in an emergency is: "022." Please note that the police dispatcher speaks only Georgian or Russian.

Medical Facilities and Health Information: Medical care in Georgia is limited. There is a severe shortage of basic medical supplies, including disposable needles, anesthetics, and antibiotics. Elderly travelers and those with pre-existing health problems may be at risk due to inadequate medical facilities. It is recommended that travelers who intend to visit Georgia for at least two weeks get the hepatitis A vaccine and a pre-exposure rabies vaccine. Travelers are also encouraged to bring medicine to treat diarrhea, which regularly afflicts newcomers. Georgian doctors and hospitals often expect immediate cash payment before rendering medical services.

Tuberculosis (TB) is an increasingly serious health concern in Georgia. For further information, please consult the Centers for Disease Control and Prevention's (CDC) Travel Notice on TB http://wwwn.cdc.gov.

For information on avian influenza (bird flu), please refer to the Department of State's Avian Influenza Fact Sheet.

There are no restrictions on travel for HIV/AIDS positive tourist visitors to Georgia who plan to stay for 90 days or less. A recently enacted law, the Law of Georgia on the Legal Status of Foreigners, states that permanent residency can be denied for those carrying infectious diseases. It is unknown at this time if HIV/AIDS positive individuals would be denied permanent residency due to their HIV/AIDS infection alone, although Georgian Government officials have stated that it does not apply to HIV/AIDS carriers.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC site at http://wwwn.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith/en.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company before traveling abroad to confirm whether their policy applies overseas and if it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Georgia is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

As in the United States, vehicular traffic in Georgia moves along the right side of roadways. Speed limits range from 80 to 100 km/hr on highways, and from 30 to 60 km/hr on urban thoroughfares. Motorists are not permitted to make right turns on red traffic lights. While legislation mandating seat belt use has yet to be enacted, drivers and passengers are strongly advised to buckle up on Georgian roads. Georgian law requires that children under seven (7) years of age be restrained in child-safety seats. A driver with any blood alcohol concentration exceeding 0.00% is considered to be driving under the influence of alcohol.

Motorists should exercise extreme caution when driving in Georgia, as many local drivers do not operate their vehicles in accordance with established traffic laws. Traffic signals and rules of the road are often completely ignored. Motorists drive erratically, often recklessly, and at excessive speeds. Motorists frequently encounter oncoming high-speed traffic attempting to pass other vehicles at blind turns or over hilltops. Pedestrians enjoy no right-of-way and need to be extremely careful when crossing streets. The Georgian Patrol Police, who come under the authority of the Ministry of Internal Affairs, are responsible for maintaining traffic safety in Georgia, but enforcement of traffic regulations is haphazard. Undivided two-lane roads connect most major cities in Georgia. Roads are generally in poor condition and often lack shoulder markings and centerlines. In addition, traffic signals may not work because of power outages or poor maintenance. Driving at night can be especially dangerous. Travel on mountain roads is treacherous in both rain and snow, and during winter, heavy snowfalls may make some roads impassable.

Aviation Safety Oversight: As there is no direct commercial air service between the United States and Georgia, the U.S. Federal Aviation Administration (FAA) has not assessed Georgia's Civil Aviation Authority for compliance with International Civil Aviation Organization (ICAO) aviation safety standards. For more information, travelers may visit the FAA's web site at http://www.faa.gov.

Travelers on regional airlines among the countries of the South Caucasus may experience prolonged delays and sudden cancellations of flights. In addition to frequent delays, flights are often overcrowded or overbooked. Basic safety features such as seat belts are sometimes missing. Air travel to Georgia on international carriers via Europe is typically more reliable. Ticketed passengers on flights departing from Georgia should reconfirm reservations with the airline 24 hours prior to departure.

Special Circumstances: Georgia has been subject to regular energy crises. During the winter months, frequent and prolonged power outages are common, especially outside of Tbilisi. The lack of lighting in public places, even when electricity is available, heightens vulnerability to crime (please see the Crime section above for details).

Georgia's customs authorities may enforce strict regulations concerning the temporary import into or export from Georgia of items such as alcohol, tobacco, jewelry, religious materials, art or artifacts, antiquities, and business equipment. Only personal medicines with a doctor's statement can be

imported without the permission of the Georgian Drug Agency section of the Ministry of Health.

American citizens may not import firearms into Georgia; however, hunting weapons may be brought into the country for a two-week period, based on valid Georgian hunting licenses. While there is no limit to the amount of currency that can be imported, if more money is exported than was declared at the time of entry, the traveler is obligated to prove it was legally obtained. There are limits on the amount of Georgian currency that may be exported. For additional customs information, American citizens should contact the Embassy of Georgia in Washington, DC.

American citizens should exercise extreme caution in purchasing property in Abkhazia. Land for sale in that region may rightfully belong to internally displaced persons forced to leave Abkhazia in the early 1990s and may have improperly been placed on the market by the de facto authorities in Abkhazia. In such cases, the government of Georgia considers the sale of property in Abkhazia illegal under Georgian law and the property could be reclaimed by original owners at a future date.

The Ministry of Culture's Department of Expertise and Evaluation must license any valuables such as artwork, antiques, jewelry, paintings, etc. This license describes the object, assesses its value, and provides permission to export it from Georgia. The U.S. Embassy in Tbilisi can provide more specific information on quantities of items that can be imported duty-free, as well as duties excised for specific items.

It is also advisable to contact the Embassy of Georgia in Washington, DC. for specific information regarding customs requirements.

While the Georgian lari is the only legal tender, dollars can be freely exchanged for laris at market rates. ATMs are more widespread within the city of Tbilisi. Credit cards are rarely accepted outside of upscale hotels and restaurants, and travelers' checks are difficult to cash. American citizens in Georgia have reported incidents of credit card fraud and identity theft.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law.

Penalties for breaking the law can be more severe than in the United States for similar offences. Persons violating Georgian laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Georgia are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in Georgia are strongly encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration web site, https://travelregistration.state.gov, and to obtain updated information on travel and security within Georgia. Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate.

By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency. The U.S. Embassy in Tbilisi is located at 11 George Balanchine Street. Office hours from American Citizens Services are from 2 to 5 pm on weekdays; no appointment is necessary.

The telephone number is (995) (32) 27-70-00, which can also be reached after hours, and the fax number is: (995) (32) 53-23-10. The U.S. Embassy in Tbilisi's web site is http://georgia.usembassy.gov.

Intercountry Adoption

May 2008

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is based on public sources and our current understanding. Questions involving foreign and U.S. immigration laws and legal interpretation should be addressed respectively to qualified foreign or U.S. legal counsel.

The Hague Convention on Intercountry Adoption: The Hague Convention on Intercountry Adoption, to which the United States became a party on April 1, 2008, establishes legal and regulatory requirements for intercountry adoption. Georgia is a party to The Hague Convention on Protection of Children and Co-operation in Respect of Intercountry Adoption (the Convention) and with which the Convention is in force for the United States. A very limited number of Georgian children are eligible for intercountry adoption.

On May 1, 2008, a new adoption law took effect in Georgia that established a mandatory waiting period of 18 months before children available for adoption in Georgia can be considered for intercountry adoption.

Patterns of Immigration: Please review current reports online at http://adoption.state.gov.

Adoption Authority: The government office responsible for adoptions in Georgia is the Ministry of Educa-

tion and Science. The main contact is Ms. Tamta Golubiani, the head of the Child Care Department. Ms.Golubiani speaks English.

52 Uznadze Street
Tbilisi, Georgia 0102
Tel: 995-32-95-71-32 and
995-32-95-08-79

Eligibility to Adopt: Prospective adoptive parents must be at least 16 years older than the child they wish to adopt. Spouses must adopt the child jointly. Unmarried individuals may also adopt. Persons who have been denied parental rights in a court of law or who have had other adoptions annulled due to failure to perform parental duties may not adopt. Persons unable to perform parental duties due to physical or mental illness, moral, criminal or other reasons may not adopt.

Residential Requirements: There are no residency requirements in Georgia for prospective adoptive parents.

Time Frame: Georgian adoptions should take from three months to nine months. However, the U.S. Department of State is aware of individual cases that took much longer than nine months.

Adoption Agencies and Attorneys: Georgia does not require adoption agencies to be licensed or accredited. The Ministry of Education requires that the prospective adoptive parent(s) submit the required documentation, legalized by the Georgian Embassy in the U.S., directly to the Ministry of Education. While the Ministry will accept applications submitted through adoption agencies or facilitators, the use of such intermediaries has sometimes lengthened the process. Because Georgia is a Convention country, adoption services must be provided by an accredited agency, temporarily accredited agency, approved person, supervised provider, or exempted provider. It is essential that prospective adoptive parent(s) seeking to adopt from a Convention country use an accredited adoption service provider. The Department maintains a current list of accredited adoption service providers. The list of accredited adoption service providers is also provided on the website of The Hague Permanent Bureau at www.hcch.net.

Adoption Fees: The average total fees in Georgia are around $4,000 to $5,000. This fee includes the cost of an attorney, translation and notarization services as well as other costs charged by the Georgian government including the child's passport. Please note that the Ministry of Education does not charge any fees for the referral of a child for adoption. If a prospective adoptive parent uses an adoption agency the total fee to adopt a child could be from $20,000-$30,000.

Adoption Procedures: Children available for adoption are registered in the Central Registry Database maintained by the Ministry of Education. The children can be adopted locally only for eighteen months after being put in the database. According to the Georgian adoption law that took effect on May 1, 2008, a child is only eligible for intercountry adoption after eighteen months in the database. Only the Ministry of Education is authorized to make matches of adoptive parents with available children, and only after the adoptive parents' application for adoption is approved.

U.S. citizens wishing to adopt a child from Georgia must submit the documents listed below to the Ministry of Education for approval. It usually takes two to three months of review and investigation by the Ministry before the application is accepted.

The Ministry will then provide the adopting parent(s) with basic information about children in the Central Registry Database (date of birth, sex, and medical diagnosis if relevant). After the adopting parent(s) confirms in writing a willingness to adopt, the adopting parent(s) is provided with the location of the child, allowed to visit, and have any desired medical consultations done.

A final written confirmation from the adoptive parent(s) in regards to a specific child is then required before the Ministry of Education will submit a statement of adoption consent to the City Court Civil Cases Collegium. The length of this process fluctuates; there have been informal reports by adoptive parents(s) that the Ministry of Education review takes longer than the three to nine months stated above. The prospective adoptive parents must submit the documents to the Ministry of Education and see the child before the Ministry will issue the statement of adoption consent.

Prospective adoptive parents must be present at the court session. After the court has approved the adoption, copies of all documentation are taken by the prospective adoptive parents or facilitators to the regional registration department, where the new birth certificate and the adoption certificate are issued. The adopting parents must be present for this procedure. A new Georgian passport, based on the new birth certificate, will be issued.

Required Documents: Prospective adoptive parents need to submit the following documents directly to the Ministry of Education:

- Statement from the adoptive parent(s) indicating their full name, address, age, and sex and the category of child desired for adoption;
- Copy of passport(s);
- Copy of marriage certificate if applicable. If single or divorced, a sworn statement notarized by the consular section of the U.S. Embassy;
- Documents from a U.S. doctor certifying health of adoptive parents, including a psychiatric certificate;
- Certificate from adoptive parent's workplace indicating position and salary;
- Copy of adoptive parent's personal financial account;
- Clean record of no criminal activity of the adoptive parents;

- References from friends, family, clergy, this is often covered by the home study;
- Completed home study; and
- I-800 approval.

All the above documents MUST be translated into Georgian, notarized by a notary public, and then authenticated and legalized by the Consular Office of the Georgian Embassy in the U.S. For more detailed information, please review current reports online at http://adoption.state.gov.

Embassy of Georgia
1101 15th St., NW, Suite 602
Washington, D.C. 20009
Tel: 202-387-2390
Consular Section: 202-393-6060
Fax: 202-393-4537
Email: embassy@georgiaemb.org or consulate@georgiaemb.org
Internet: http://www.georgiaemb.org

U.S. Immigration Requirements: As of April 1, 2008, U.S. citizens wishing to adopt in a Convention country must begin the process by filing with the U.S. Citizenship and Immigration Services (USCIS) a form I-800A *Application for Determination of Suitability to Adopt a Child from a Convention Country*.

Prospective adoptive parents are strongly encouraged to consult the Department of Homeland Security, USCIS website (www.uscis.gov).

U.S. Embassy
11 George Balanchine St., Tbilisi, Georgia 0131
Tel: (995) (32) 277-000,
Email: consulate-tbilisi@state.gov
Website: http://www.usembassy.ge.

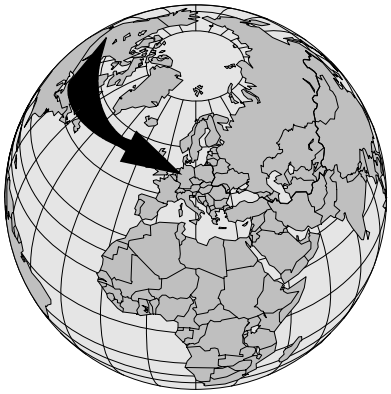
Additional Information: For information on intercountry adoption and international parental child abduction, and security information for U.S. citizens traveling abroad, call Toll Free 1-888-407-4747. This number is available from 8:00 a.m. to 8:00 p.m. EST/EDT, Monday through Friday (except U.S. federal holidays).

Callers who are unable to use toll-free numbers, such as those calling from overseas, may obtain information and assistance during these hours by calling 1-202-501-4444.

Travel Warning
December 12, 2008

The Department of State warns U.S. citizens of the risks of travel to Georgia. This travel warning replaces the one dated September 10, 2008 to note travel restrictions for official Americans in Georgia and the risk that unexploded ordnance poses in the areas where fighting took place in August 2008, including around the city of Gori in the direction of the administrative boundary with South Ossetia.

American citizens are urged not to travel to the separatist regions of South Ossetia and Abkhazia and to be aware that the potential exists for gunfire, increased risk of crime, and ongoing potential for violence in these and areas adjacent to these regions.



The U.S. Embassy in Tbilisi has limited travel for its employees in areas adjacent to the region of South Ossetia, to include all roads north of the M-1 (East/West Highway) that lead to the region of South Ossetia; areas adjacent to the region of Abkhazia, including the Tsalenjikha District of the Samegrelo Region; and the region of the Pankisi Gorge, north of the city Akhmeta, up to the border with Russia.

American citizens currently in Georgia are urged to continue to review their personal security situations to take appropriate action to ensure their safety. Given the recent upheaval in Georgia, American citizens should take precautions in case of an increase in violent crime. Private American citizens are encouraged to remain in close communication with the American Embassy in Tbilisi for more detailed information. American citizens in Georgia are advised to register with the Department of State on-line at https://travelregistration.state.gov/ibrs/ui/ or in person at U.S. Embassy Tbilisi so that they can obtain updated information on travel and security. Travel in some parts of western Georgia remains unpredictable. American citizens should monitor the U.S. Embassy web site, http://georgia.usembassy.gov/, and stay in contact with family and friends in the United States. American citizens in Tbilisi may also tune in to Radio Syndicati at FM 104.3 or throughout Georgia at Radio Green Wave at FM 107.4 for updated U.S. Embassy warden message information.

Family members and friends unable to verify the safety and welfare of U.S. citizens in the affected area should call 1-888-407-4747 toll-free in the United States and Canada, or from other areas via a regular toll line at 1-202-501-4444. U.S. citizens in the area are urged to monitor the local news. Those residing or traveling in Georgia are reminded to register with the U.S. Embassy either online at https://travelregistration.state.gov/ibrs/ui/ or in person at U.S. Embassy Tbilisi so that they can obtain updated information on travel and security. By registering, American citizens make it easier for the embassy to contact them in case of emergency.

For the latest security information, Americans living and traveling abroad should regularly monitor the Department's Bureau of Consular Affairs web site at http://travel.state.gov/, where the current Worldwide Caution, Travel Alerts, Travel Warnings, Country Specific Information, and health information resources can be found. Up-to-date information on security can also be obtained by calling 1-888-407-4747 toll free in the United States, or for callers outside the United States and Canada, a regular toll line at 1-202-501-4444. These numbers are available from 8:00 a.m. to 8:00 p.m. Eastern Daylight Time, Monday through Friday (except U.S. federal holidays).

The U.S. Embassy in Tbilisi is located at 11 George Balanchine Street (in Didi Dighomi), Tbilisi 0131, Georgia, tel: 995-32-27-70-00. The after-hours emergency number is 995-99-57-39-69, or, if dialing locally on a mobile telephone, 899-57-39-69.

GERMANY

Compiled from the November 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Federal Republic of Germany

PROFILE

Geography

Area: 357,000 sq. km. (137,821 sq. mi.); about the size of Montana.
Cities: Capital—Berlin (population about 3.4 million). Other cities—Hamburg (1.7 million), Munich (1.2 million), Cologne (964,000), Frankfurt (644,000), Essen (603,000), Dortmund (592,000), Stuttgart (582,000), Dusseldorf (568,000), Bremen (543,000), Hanover (516,000).
Terrain: Low plain in the north; high plains, hills, and basins in the center and east; mountainous alpine region in the south.
Climate: Temperate; cooler and rainier than much of the United States.

People

Nationality: Noun and adjective—German(s).
Population: (2007 est.) 82 million.
Ethnic groups: Primarily German; 2.6 million citizens and residents of Turkish descent; Danish minority in the north, Sorbian (Slavic) minority in the east; 7.3 million foreign residents.
Religions: Protestants (26 million); Roman Catholics (26 million); approximately 3.5 million Muslims. approximately 3.2 million Muslims.
Languages: German.
Education: Years compulsory—10; attendance—100%; literacy—99%.
Health: Infant mortality rate (2006 est.)—4.12/1,000; life expectancy (2006 est.)—women 81.96 years, men 77.81 years.
Employment: (2006 avg.) 39.08 million; unemployed (2006 avg.) 9.8% of labor force.

Government

Type: Federal republic.
Founded: 1949 (Basic Law, i.e., Constitution, promulgated on May 23, 1949). On October 3, 1990, the Federal Republic of Germany and the German Democratic Republic unified in accordance with Article 23 of the F.R.G. Basic Law.
Government branches: Executive—president (titular chief of state), chancellor (executive head of government); legislative—bicameral parliament; judicial—independent, Federal Constitutional Court.
Political subdivisions: 16 Laender (states).
Political parties: Social Democratic Party (SPD); Christian Democratic Union (CDU); Christian Social Union (CSU); Alliance 90/Greens; Free Democratic Party (FDP); Left Party (LP).
Suffrage: Universal at 18.

Economy

GDP: (2007 nominal) $3.22 trillion.
Annual growth rate: (2006) 2.7%; (2007) 2.5%; (2008 est.) 1.7%.
Per capita GDP: (2007 nom.): $40,415.
Inflation rate: (consumer prices, 2007) 2.2%; (2008 est.) 3%.
Natural resources: Iron, hard coal, lignite, potash, natural gas.
Agriculture: (0.9% of GDP) Products—corn, wheat, potatoes, sugar, beets, barley, hops, viticulture, forestry, fisheries.
Industry: (29.1% of GDP) Types—car-making; mechanical, electrical, and precision engineering; chemicals; environmental technology; optics; medical technology; biotech and genetic engineering; nanotechnology; aerospace; logistics.
Trade: (2007) Exports—$1.35 trillion: chemicals, motor vehicles, iron and steel products, manufactured goods, electrical products. Major markets—France, U.S., and U.K. Imports—$1.075 trillion: food, petroleum products, manufactured goods, electrical products, motor vehicles, apparel. Major suppliers—France, Netherlands, U.S.

PEOPLE

Most inhabitants of Germany are ethnic German. There are, however, more than 7 million foreign residents, most of whom are the families and descendents of so-called “guest work-

ers" (foreign workers, mostly from Turkey, invited to Germany in the 1950's and 1960's to fill labor shortages) who remained in Germany, and Germany has a sizable ethnic Turkish population. Germany is also a prime destination for political and economic refugees from many developing countries. An ethnic Danish minority lives in the north, and a small Slavic minority known as the Sorbs lives in eastern Germany. Due to restrictive German citizenship laws, most "foreigners" do not hold German citizenship even when born and raised in Germany. However, since the German government undertook citizenship and immigration law reforms in 2002, more foreign residents have had the ability to naturalize.

Germany has one of the world's highest levels of education, technological development, and economic productivity. Since the end of World War II, the number of youths entering universities has more than tripled, and the trade and technical schools of the Federal Republic of Germany (F.R.G.) are among the world's best. With a per capita income level of more than $28,700, Germany is a broadly middle class society. A generous social welfare system provides for universal medical care, unemployment compensation, and other social needs. Millions of Germans travel abroad each year.

With unification on October 3, 1990, Germany began the major task of bringing the standard of living of Germans in the former German Democratic Republic (G.D.R.) up to that of western Germany. This has been a lengthy and difficult process due to the relative inefficiency of industrial enterprises in the former G.D.R., difficulties in resolving property ownership in eastern Germany, and the inadequate infrastructure and environmental damage that resulted from years of mismanagement under communist rule.

Economic uncertainty in eastern Germany is often cited as one factor contributing to extremist violence, primarily from the political right. Confusion about the causes of the current hardships and a need to place blame has found expression in harassment and violence by some Germans directed toward foreigners, particularly non-Europeans. The vast majority of Germans condemn such violence.

HISTORY

Two of Germany's most famous writers, Goethe and Schiller, identified the central aspect of most of Germany's history with their poetic lament, "Germany? But where is it? I cannot find that country." Until 1871, there was no "Germany." Instead, Europe's German-speaking territories were divided into several hundred kingdoms, principalities, duchies, bishoprics, fiefdoms and independent cities and towns.

Finding the answer to "the German question"—what form of statehood for the German speaking lands would arise, and which form could provide central Europe with peace and stability—has defined most of German history. This history of many independent polities has found continuity in the F.R.G.'s federal structure. It is also the basis for the decentralized nature of German political, economic, and cultural life that lasts to this day.

The Holy Roman Empire

Between 962 and the beginning of the 19th Century, the German territories were loosely organized into the Holy Roman Empire of the German Nation. The initially non-hereditary Emperor, elected by the many princes, dukes, and bishops of the constituent lands and confirmed by the Pope, nominally governed over a vast territory, but had very limited ability to intervene in the affairs of the hundreds of entities that made up the Empire, many of which would often wage war against each other. The Empire was never able to develop into a centralized state.

Beginning in 1517 with Martin Luther's posting of his 95 Theses on the door of the Wittenberg Castle church, the German-speaking territories bore the brunt of the pan-European struggles unleashed by the Reformation. The leaders of the German kingdoms and principalities chose sides, leading to a split of the Empire into Protestant and Catholic regions, with the Protestant strongholds mostly in the North and East, the Catholic in the South and West. The split along confessional lines also laid the groundwork for the later development of the most powerful German states—Prussia and Austria—as the Prussian Hohenzollern line adopted Protestantism and the Hapsburgs remained Catholic.

The tension culminated in the 30 Years War (1618-1648), a combination of wars within the Empire and between outside European states that were fought on German land. These wars, which ended in a rough stalemate, devastated the German people and economy, definitively strengthened the rule of the various German rulers at the cost of the (Habsburg) Emperor (though Habsburg Austria remained the dominant single German entity within the Empire), and established the continued presence of both Catholics and Protestants in German territories.

The Rise of Prussia

The 18th and 19th Centuries were marked by the rise of Prussia as the second powerful, dominant state in the German-speaking territories alongside Austria, and Austrian-Prussian rivalry became the dominant political factor in German affairs. Successive Prussian kings succeeded in modernizing, centralizing, and expanding the Prussian state, creating a modern bureaucracy and the Continent's strongest military. Despite Prussia's emphasis on militarism and authority, Prussia also became a center of the German Enlightenment and was known for its religious tolerance, with its western regions being predominantly Catholic and Jews being granted complete legal equality by 1812. After humiliating losses to Napoleon's armies, Prussia embarked on a series of administrative, military, economic, and education reforms that eventu-

ally succeeded in turning Prussia into the Continent's strongest state. Following Napoleon's defeat, the 1814-1815 Congress of Vienna replaced the Holy Roman Empire with the German Confederation, made up of 38 independent states. A loose confederation, this construct had no common citizenship, legal system, or administrative or executive organs. It did, however, provide for a Federal Diet that met in Frankfurt—a Congress of deputies of the constituent states who would meet to discuss issues affecting the Confederation as a whole.

The Path to Unification: The Customs Union and the 1848 Revolutions

Prussia led a group of 18 German states that formed the German Customs Union in 1834, and the Prussian Thaler eventually became the common currency used in this region. The Customs Union greatly enhanced economic efficiency, and paved the way for Germany to become a single economic unit during the 19th Century's period of rapid industrialization. Austria chose to remain outside the German Customs Union, preferring instead to form its own customs

union with the Hapsburg territories—a further step down the path of a unified Germany that did not include Austria.

France's 1848 February Revolution that overthrew King Louis Phillipe sparked a series of popular uprisings throughout the German states. Panicking local leaders provided several political, social, and economic concessions to the demonstrators, including agreeing to a national assembly that would discuss the constitutional form of a united Germany, individual rights, and economic order. The assembly rapidly devolved into competing factions; meanwhile, the conservative leaders of the German states reconstituted their power. When the assembly finally determined that there should be a united, federal Germany (excluding Austria) with universal male suffrage, organized as a constitutional monarchy under an Emperor—and offered that emperor title to the King of Prussia—there was no longer any interest or political reason (least of all in absolutist, powerful Prussia) for the leaders to listen. The Prussian monarch rejected the assembly's offer, and the assembly was forcefully disbanded without achieving any of the stated goals of the 1848 revolutionaries.

Nevertheless, the 1848 Revolutions did leave a lasting legacy. The factions of the ill-fated national assembly went on to develop into political parties. Certain economic and social reforms, such as the final abolition of feudal property structures, remained. The idea of German unity was firmly established. And the revolutionaries' colors—black, red, and gold—became firmly ensconced as the colors of German democratic and liberal aspirations.

Unification and Imperial Germany

German nationalism developed into an important unifying and sometimes liberalizing force during this time, though it became increasingly marked by an exclusionary, racially-based definition of nationhood that included anti-Semitic tendencies. However, eventual unification of Germany was essentially the result of Prussian expansionism rather than the victory of nationalist sentiment. Prussia's economic growth outstripped Austria's during the latter half of the 19th Century and Prussia-controlled Germany became one of Europe's industrial powerhouses. Under Chancellor Otto von Bismarck, Prussia defeated Austria (1866) and France (1870) in wars that paved the way for the formation of the German Empire under Emperor Wilhelm I in 1871. Germany became a federal state, with foreign and military policy determined at the national level, but most other policies remained the purview of the states.

Internally, Bismarck waged a struggle against Catholicism, which he viewed as an agent of Austria (ironically, this anti-Catholic move—which eventually failed—actually ended up consolidating a lasting political role for Germany's Catholics), and tried to both co-opt and repress the emerging socialist movement by passing the age's most progressive social insurance and worker protection legislation while clamping down on Socialist activities. Externally, Bismarck then moved to consolidate the stability of the new Empire, launching a string of diplomatic initiatives to form a complex web of alliances with other European powers to ensure that Germany did not become surrounded by hostile powers and avoid Germany's involvement in further wars.

However, Emperor William II disagreed vehemently with Bismarck, sacking him in 1890. Wilhelm II had ambitious aspirations for Germany, including acquisition of overseas colonies. His dynamic expansion of military power and confrontational foreign policies contributed to tensions on the continent. The fragile European balance of power, which Bismarck had helped to create, broke down in 1914. World War I and its aftermath, including the Treaty of Versailles, ended the German Empire.

The Weimar Republic and Fascism's Rise and Defeat

The postwar Weimar Republic (1919-33) was established as a broadly democratic state, but the government was severely handicapped and eventually doomed by economic problems and the rise of the political extremes. The dozens of political parties represented in the federal parliament never allowed stable government formation, creating political chaos. (This lesson led to the decision by the creators of the F.R.G. to limit parliamentary representation to parties that garner at least 5% of the vote.) The hyperinflation of 1923, the world depression that began in 1929, and the social unrest stemming from resentment toward the conditions of the Versailles Treaty worked to destroy the Weimar government.

The National Socialist (Nazi) Party, led by Adolf Hitler, stressed nationalist and racist themes while promising to put the unemployed back to work. The party blamed many of Germany's ills on the alleged influence of Jewish and non-German ethnic groups. The party also gained support in response to fears of growing communist strength. In the 1932 elections, the Nazis won a third of the vote. In a fragmented party structure, this gave the Nazis a powerful parliamentary caucus, and Hitler was asked to form a government. He quickly declined. The Republic eroded and Hitler had himself nominated as Reich Chancellor in January 1933. After President Paul von Hindenburg died in 1934, Hitler assumed that office as well.

Once in power, Hitler and his party first undermined and then abolished democratic institutions and opposition parties. The Nazi leadership immediately jailed many Jewish citizens and opposition figures and withdrew their political rights. Hitler's Nuremburg Laws subsequently deprived all of Germany's Jews of their political rights and also of their economic assets and professional licenses, foreshadowing the systematic plundering of Jewish assets throughout Nazi-occupied territory. The Nazis implemented a program of

genocide, at first through incarceration and forced labor and then by establishing death camps. In a catastrophe generally known as the Holocaust or Shoah, roughly six million European Jews from Germany and Nazi-occupied countries were murdered in these death camps and in the killing fields set up behind military lines on the Eastern Front. Hitler's henchmen also carried out a campaign of ethnic extermination against Europe's Roma/Sinti and murdered thousands of homosexuals, mentally disabled people, and opposition figures.

Nazi revanchism and expansionism led to World War II, which resulted in the destruction of Germany's political and economic infrastructures and led to its division.

After Germany's unconditional surrender on May 8, 1945, the United States, the United Kingdom, the U.S.S.R. and, later, France occupied the country and assumed responsibility for its administration. The commanders in chief exercised supreme authority in their respective zones and acted in concert on questions affecting the whole country.

The United States, the United Kingdom, and the Soviet Union agreed at Potsdam in August 1945 to treat Germany as a single economic unit with some central administrative departments in a decentralized framework. However, Soviet policy turned increasingly toward dominating the part of Europe where Soviet armies were present, including eastern Germany. In 1948, the Soviets, in an attempt to abrogate agreements for Four-Power control of the city, blockaded Berlin. Until May 1949, the Allied-occupied part of Berlin was kept supplied only by an Allied airlift. The "Berlin airlift" succeeded in forcing the Soviets to accept, for the time being, the Allied role and the continuation of freedom in a portion of the city, West Berlin.

Political Developments in West Germany

The United States and the United Kingdom moved to establish a nucleus for a future German government by creating a central Economic Council for their two zones. The program later provided for a constituent assembly, an occupation statute governing relations between the Allies and the German authorities, and the political and economic merger of the French with the British and American zones. The western portion of the country became the Federal Republic of Germany.

On May 23, 1949, the Basic Law, which came to be known as the constitution of the Federal Republic of Germany, was promulgated. Konrad Adenauer became the first federal Chancellor on September 20, 1949. The next day, the occupation statute came into force, granting powers of self-government with certain exceptions.

As part of an ongoing commitment to deal with its historic responsibility, the Federal Republic of Germany took upon itself a leading role in the field of Holocaust education and support for research into this dark period of history. It has also paid out nearly 63 billion Euros as a measure of compensation to Jewish survivors and heirs of the Holocaust and other victims of Nazism, such as forced laborers from many European countries.

The F.R.G. quickly progressed toward fuller sovereignty and association with its European neighbors and the Atlantic community. The London and Paris agreements of 1954 restored full sovereignty (with some exceptions) to the F.R.G. in May 1955 and opened the way for German membership in the North Atlantic Treaty Organization (NATO) and the Western European Union (WEU).

The three Western Allies retained occupation powers in Berlin and certain responsibilities for Germany as a whole, including responsibility for the determination of Germany's eastern borders. Under the new arrangements, the Allies stationed troops within the F.R.G. for NATO defense, pursuant to stationing and status-of-forces agreements. With the exception of 45,000 French troops, Allied forces were under NATO's joint defense command. (France withdrew from NATO's military command structure in 1966.)

Political life in the F.R.G. was remarkably stable and orderly. After Adenauer's chancellorship (1949-63), Ludwig Erhard (1963-66) and Kurt Georg Kiesinger (1966-69) served as Chancellor. Between 1949 and 1966 the united caucus of the Christian Democratic Union (CDU) and Christian Social Union (CSU), either alone or with the smaller Free Democratic Party (FDP), formed the government. Kiesinger's 1966-69 "Grand Coalition" included the F.R.G.'s two largest parties, CDU/CSU and the Social Democratic Party (SPD). After the 1969 election, the SPD, headed by Willy Brandt, formed a coalition government with the FDP. Brandt resigned in May 1974, after a senior member of his staff was uncovered as an East German spy.

Helmut Schmidt (SPD) succeeded Brandt, serving as Chancellor from 1974 to 1982. Hans-Dietrich Genscher, a leading FDP official, became Vice Chancellor and Foreign Minister, a position he would hold until 1992.

In October 1982, the FDP joined forces with the CDU/CSU to make CDU Chairman Helmut Kohl the Chancellor. Following national elections in March 1983, Kohl emerged in firm control of both the government and the CDU. He served until the CDU's election defeat in 1997. In 1983, a new political party, the Greens, entered the Bundestag for the first time.

Political Developments in East Germany

In the Soviet zone, the Communist Party forced the Social Democratic Party to merge in 1946 to form the Socialist Unity Party (SED). Under Soviet direction, a constitution was drafted on May 30, 1949, and adopted on October 7 when the German Democratic Republic was proclaimed. On October 11, 1949, a SED government under Wilhelm Pieck was established. The Soviet Union and its East European allies immediately recog-

nized the G.D.R. The United States and most other countries did not recognize the G.D.R. until a series of agreements in 1972-73.

The G.D.R. established the structures of a single-party, centralized, communist state. On July 23, 1952, the G.D.R. abolished the traditional Laender and established 14 Bezirke (districts). Formally, there existed a "National Front"—an umbrella organization nominally consisting of the SED, four other political parties controlled and directed by the SED, and the four principal mass organizations (youth, trade unions, women, and culture). However, control was clearly and solely in the hands of the SED. Balloting in G.D.R. elections was not secret. On July 17, 1953, East Germans revolted against totalitarian rule. The F.R.G. marked the bloody revolt by making the date the West German National Day, which remained until reunification.

Inter-German Relations

During the 1950s, East Germans fled to the West by the millions. The Soviets made the inner German border increasingly tight, but Berlin's Four-Power status countered such restrictions. Berlin thus became an escape point for even greater numbers of East Germans. On August 13, 1961, the G.D.R. began building a wall through the center of Berlin, slowing down the flood of refugees and dividing the city. The Berlin Wall became the symbol of the East's political debility and the division of Europe.

In 1969, Chancellor Brandt announced that the F.R.G. would remain firmly rooted in the Atlantic Alliance but would intensify efforts to improve relations with Eastern Europe and the G.D.R. The F.R.G. commenced this "Ostpolitik" by negotiating nonaggression treaties with the Soviet Union, Poland, Czechoslovakia, Bulgaria, and Hungary. Based upon Brandt's policies, in 1971 the Four Powers concluded a Quadripartite Agreement on Berlin to address practical questions the division posed, without prejudice to each party's view of the city's Four Power status.

The F.R.G.'s relations with the G.D.R. posed particularly difficult questions. Though anxious to relieve serious hardships for divided families and to reduce friction, the F.R.G. under Brandt was intent on holding to its concept of "two German states in one German nation." Relations improved, however, and in September 1973, the F.R.G. and the G.D.R. were admitted to the United Nations. The two Germanys exchanged permanent representatives in 1974, and, in 1987, G.D.R. head of state Erich Honecker paid an official visit to the F.R.G.

Berlin

Shortly after World War II, Berlin became the seat of the Allied Control Council, which was to have governed Germany as a whole until the conclusion of a peace settlement. In 1948, however, the Soviets refused to participate any longer in the quadripartite administration of Germany. They also refused to continue the joint administration of Berlin and drove the government elected by the people of Berlin out of its seat in the Soviet sector and installed a communist regime in its place. From then until unification, the Western Allies continued to exercise supreme authority—effective only in their sectors—through the Allied Kommandatura. To the degree compatible with the city's special status, however, they turned over control and management of city affairs to the Berlin Senat (executive) and House of Representatives, governing bodies established by constitutional process and chosen by free elections. The Allies and German authorities in the F.R.G. and West Berlin never recognized the communist city regime in East Berlin or G.D.R. authority there.

During the years of Berlin's isolation—176 kilometers (110 mi.) inside the former G.D.R.—the Western Allies encouraged a close relationship between the Government of West Berlin and that of the F.R.G. Representatives of the city participated as non-voting members in the F.R.G. parliament; appropriate West German agencies, such as the supreme administrative court, had their permanent seats in the city; and the governing mayor of Berlin took his turn as President of the Bundesrat. In addition, the Allies carefully consulted with the F.R.G. and Berlin Governments on foreign policy questions involving unification and the status of Berlin.

Between 1948 and 1990, major events such as fairs and festivals took place in West Berlin, and the F.R.G. encouraged investment in commerce by special concessionary tax legislation. The results of such efforts, combined with effective city administration and the Berliners' energy and spirit, were encouraging. Berlin's morale remained high, and its industrial production considerably surpassed its prewar level.

German Unification

During the summer of 1989, rapid changes took place in the G.D.R. Pressures for political opening throughout Eastern Europe had not seemed to affect the G.D.R. regime. However, Hungary ended its border restrictions with Austria, and a growing flood of East Germans began to take advantage of this route to West Germany. Thousands of East Germans also tried to reach the West by staging sit-ins at F.R.G. diplomatic facilities in other East European capitals. The exodus generated demands within the G.D.R. for political change, and mass demonstrations in several cities—particularly in Leipzig—continued to grow. On October 7, Soviet leader Mikhail Gorbachev visited Berlin to celebrate the 40th anniversary of the establishment of the G.D.R. and urged the East German leadership to pursue reform.

On October 18, Erich Honecker resigned and was replaced by Egon Krenz. The exodus continued unabated, and pressure for political reform mounted. Finally, on November 9, the G.D.R. allowed East Germans to travel freely. Thousands poured through the Berlin Wall into the western sectors of Berlin. The Wall was opened.

On November 28, F.R.G.Chancellor Kohl outlined a 10-point plan for the peaceful unification of the two Ger-

manys. In December, the G.D.R. Volkskammer eliminated the SED's monopoly on power. The SED changed its name to the Party of Democratic Socialism (PDS), and numerous political groups and parties formed. The communist system had been eliminated. A new Prime Minister, Hans Modrow, headed a caretaker government that shared power with the new, democratically oriented parties.

In early February 1990, Chancellor Kohl rejected the Modrow government's proposal for a unified, neutral Germany. Kohl affirmed that a unified Germany must be a member of NATO. Finally, on March 18, the first free elections were held in the G.D.R., and Lothar de Maiziere (CDU) formed a government under a policy of expeditious unification with the F.R.G. The freely elected representatives of the Volkskammer held their first session on April 5, and the G.D.R. peacefully evolved from a communist to a democratically elected government.

Four Power Control Ends

In 1990, as a necessary step for German unification and in parallel with internal German developments, the two German states and the Four Powers—the United States, U.K., France, and the Soviet Union—negotiated to end Four Power reserved rights for Berlin and Germany as a whole. These "Two-plus-Four" negotiations were mandated at the Ottawa Open Skies conference on February 13, 1990. The six foreign ministers met four times in the ensuing months in Bonn (May 5), Berlin (June 22), Paris (July 17), and Moscow (September 12). The Polish Foreign Minister participated in the part of the Paris meeting that dealt with the Polish-German borders.

Of key importance was overcoming Soviet objections to a united Germany's membership in NATO. The Alliance was already responding to the changing circumstances, and, in NATO, issued the London Declaration on a transformed NATO. On July 16, after a bilateral meeting, Gorbachev and Kohl announced an agreement in principle to permit a united Germany in NATO. This cleared the way for the signing of the "Treaty on the Final Settlement With Respect to Germany" in Moscow on September 12. In addition to terminating Four Power rights, the treaty mandated the withdrawal of all Soviet forces from Germany by the end of 1994. This made it clear that the current borders were final and definitive, and specified the right of a united Germany to belong to NATO. It also provided for the continued presence of British, French, and American troops in Berlin during the interim period of the Soviet withdrawal. In the treaty, the Germans renounced nuclear, biological, and chemical weapons and stated their intention to reduce German armed forces to 370,000 within 3 to 4 years after the Conventional Armed Forces in Europe (CFE) Treaty, signed in Paris on November 19, 1990, entered into force.

German unification could then proceed. In accordance with Article 23 of the F.R.G.'s Basic Law, the five Laender (which had been reestablished in the G.D.R.) acceded to the F.R.G. on October 3, 1990. The F.R.G. proclaimed October 3 as its new national day. On December 2, 1990, all-German elections were held for the first time since 1933.

The Final Settlement Treaty ended Berlin's special status as a separate area under Four Power control. Under the terms of the treaty between the F.R.G. and the G.D.R., Berlin became the capital of a unified Germany. The Bundestag voted in June 1991 to make Berlin the seat of government.

The Government of Germany asked the Allies to maintain a military presence in Berlin until the complete withdrawal of the Western Group of Forces (ex-Soviet) from the territory of the former G.D.R. The Russian withdrawal was completed August 31, 1994. On September 8, 1994, ceremonies marked the final departure of Western Allied troops from Berlin.

In 1999, the formal seat of the federal government moved from Bonn to Berlin. Berlin also is one of the Federal Republic's 16 Laender.

GOVERNMENT AND POLITICAL CONDITIONS

The government is parliamentary, and a democratic constitution emphasizes the protection of individual liberty and division of powers in a federal structure. The chancellor (prime minister) heads the executive branch of the federal government. The duties of the president (chief of state) are largely ceremonial; the chancellor exercises executive power. The Bundestag (lower, principal chamber of the parliament) elects the chancellor. The president is elected every 5 years on May 23 by the Federal Assembly, a body convoked only for this purpose, comprising the entire Bundestag and an equal number of state delegates. President Horst Köhler (Christian Democratic Union - CDU) will stand for re-election on May 23, 2009. The CDU's coalition partner and rival, the Social Democratic Party (SPD), and the Left Party will also run candidates.

The Bundestag, which serves a 4-year term, consists of at least twice the number of electoral districts in the country (299). When parties' directly elected seats exceed their proportional representation, they may receive more seats. The number of seats in the Bundestag was reduced to 598 for the 2002 elections. The Bundesrat (upper chamber or Federal Council) consists of 69 members who are delegates of the 16 Laender (states). The legislature has powers of exclusive jurisdiction and concurrent jurisdiction with the Laender in areas specified in the Basic Law. The Bundestag has primary legislative authority. The Bundesrat must concur on legislation concerning revenue shared by federal and state governments and those imposing responsibilities on the states.

Germany has an independent federal judiciary consisting of a constitutional court, a high court of justice, and courts with jurisdiction in administrative, financial, labor, and social matters.

The highest court is the Bundesverfassungsgericht (Federal Constitutional Court), which ensures a uniform interpretation of constitutional provisions and protects the fundamental rights of the individual citizen as defined in the Basic Law.

Political Parties

Christian Democratic Union/ Christian Social Union (CDU/ CSU). An important aspect of postwar German politics was the emergence of a moderate, ecumenical Christian party—the Christian Democratic Union (CDU)—operating in alliance with a related Bavarian party, the Christian Social Union (CSU). Although each party maintains its own structure, the two form a common caucus in the Bundestag and do not run opposing campaigns. The CDU/CSU has adherents among Catholics, Protestants, rural interests, and members of all economic classes. It is generally conservative on economic and social policy and more identified with the Roman Catholic and Protestant churches.

Social Democratic Party (SPD). The SPD is one of the oldest organized political parties in the world. It originally advocated Marxist principles, but in the 1959 Godesberg Program abandoned the concept of a " "class party" while continuing to stress social welfare programs. Under the leadership of Gerhard Schroeder, the SPD-Greens government implemented in 2003 the centrist Agenda 2010 reforms, designed to modernize the country's social system and labor market.

The SPD elected Franz Muentefering as chairperson on October 18, 2008 replacing Kurt Beck, who had resigned in September 2008. The SPD also chose Foreign Minister Frank-Walter Steinmeier to lead the party against incumbent Chancellor Angela Merkel's CDU in the September 27, 2009 national parliamentary elections. The SPD has a powerful base in the bigger cities and industrialized states.

Free Democratic Party (FDP). The FDP has traditionally been composed mainly of middle and upper class Protestants who consider themselves heirs to the European liberal tradition. It supports reducing the role of the state in economic policy, free trade, and is libertarian on social issues. The party has participated in all but three postwar federal governments but has not been in federal government since 1998.

The Left. The PDS (comprised largely of former East German communists) and the WASG (comprised of western leftists) merged in June 2007 to form a party simply known as "The Left." The party's foreign policy is largely shaped by its rigid opposition to foreign military deployments. On domestic policy, the party opposes economic reforms, such as Hartz IV, which aim to increase free markets and reduce unemployment benefits. The Left proposes to replace the free market system with a return to socialist principles.

Alliance 90/Greens. In the late 1970s, environmentalists organized politically as the Greens. Opposition to nuclear power, military power, and certain aspects of highly industrialized society were principal campaign issues. In the December 1990 all-German elections, the Greens merged with the Eastern German Alliance 90, a loose grouping of civil rights activists with diverse political views. The Greens joined a federal government for the first time in 1998, forming a coalition with the SPD.

Other parties. Because of the instability caused by the need for multiparty coalitions in the Weimar Republic, Germany's Basic Law today requires parties reach 5% of the vote to win seats in the Bundestag. In addition to those parties that won representation in the Bundestag in 2005, a variety of minor parties won a cumulative 2.7% of the vote, down from 3.0% in 2002.

Several other parties were on the ballot in one or more states but did not qualify for representation in the federal Bundestag.

2005 Federal Elections

The 2005 federal elections were held after Chancellor Schroeder asked for a Bundestag "vote of confidence" in the SPD-Greens coalition. The July 1, 2005 confidence motion failed, and President Koehler called for elections to be held on September 18, 2005, a year earlier than planned. The results of the 2005 Bundestag elections are as follows:

CDU/CSU—35.2%, 226 seats; SPD—34.2%, 222 seats; FDP—9.8%, 61 seats; LP/PDS—8.7%, 54 seats; Greens—8.1%, 51 seats; Other parties—4.0%, no representation.

After several weeks of negotiations, the CDU/CSU and SPD agreed to form a "grand coalition" under the leadership of Chancellor Angela Merkel. Angela Merkel and the new cabinet were sworn in on November 22, 2005. The next Bundestag elections are scheduled to be held on September 27, 2009.

Germany maintains an Embassy in the United States at 4645 Reservoir Road NW, Washington, DC 20007 (tel. 202-298-4000). Consulates general are located in Atlanta, Boston, Chicago, Detroit, Houston, Los Angeles, Miami, New York, San Francisco, and Seattle. Germany has honorary consuls in more than 30 U.S. cities.

ECONOMY

Germany is the world's third-largest economy and the largest in Europe. In 2006, Germany had its best year since 2000 with 2.7% growth; in 2007, growth was at 2.5% despite a 3 percentage point value added tax (VAT) hike at the beginning of the year. In the context of the global financial crisis, economic growth has slowed during 2008. The German economy is expected to grow by 1.7% for the year as a whole, followed by 0.2% growth in 2009. Nevertheless, consumer expectations have risen as a result of wage increases earlier in the year and lower energy costs. Another bright spot is unemployment, which stood at 7.4% nationwide in September 2008, a decrease of 1.1% from a year earlier.

From the 1948 currency reform until the early 1970s, West Germany experienced almost continuous economic expansion. Real gross domestic product (GDP) growth slowed down, and even declined, from the mid-1970s through the recession of the early 1980s. The economy then experienced 8 consecutive years of growth that ended with a downturn beginning in late 1992. During most of the post-reunification period, Germany has seen relatively low average real growth and stubbornly high unemployment.

Germans often describe their economic system as a "social market economy." The German Government provides an extensive array of social services. The state intervenes in the economy by providing subsidies to selected sectors and by owning some segments of the economy, while promoting competition and free enterprise. The government has restructured the railroad system on a corporate basis, privatized the national airline, and is privatizing telecommunications and postal services.

The German economy is heavily export-oriented, with exports accounting for more than one-third of national output. As a result, exports traditionally have been a key element in German macroeconomic expansion, accounting for over half of the economic growth in recent years. Germany is a strong advocate of closer European economic integration, and its economic and commercial policies are increasingly determined within the European Union (EU). Germany uses the common European currency, the euro, and the European Central Bank sets monetary policy.

In the early-mid 2000s, Germany adopted a complex set of labor/social welfare reforms to overcome structural weaknesses of the German welfare state and to create policies more conductive to employment. Defying a skeptical German public, the coalition government of Chancellor Angela Merkel initiated additional reform measures, such as the gradual increase in the mandatory retirement age from 65 to 67—a move intended to add 2.5 million to the workforce by 2030. Subsequently, however, there has been active political debate and some rollback of these labor reforms; most notably the government decided to extend the payment period of unemployment benefits to older workers in early 2008.

Nearly 20 years after reunification (October 3, 1990), Germany has made great progress in raising the standard of living in eastern Germany, introducing a market economy and improving its infrastructure. At the same time, the process of convergence between east and west is taking longer than originally expected and, on some measures, has stagnated since the mid-1990s. Growth rates in the east have been lower than in the west in recent years. Unemployment is twice as high, prompting many skilled easterners to seek work in the west, and productivity continues to lag. Eastern consumption levels are dependent on large public net financial transfers from west to east. In addition to social assistance payments, the government will extend funds to promote eastern economic development through 2019.

The United States is Germany's second-largest trading partner, and U.S.-German trade has continued to be strong. Two-way trade in goods totaled $144 billion in 2007. U.S. exports to Germany were $49.6 billion, while U.S. imports from Germany were more than $94.4 billion. At nearly $45 billion, the U.S.'s fifth-largest trade deficit is with Germany. Major U.S. export categories include aircraft, electrical equipment, telecommunications equipment, data processing equipment, and motor vehicles and parts. German export sales are concentrated in motor vehicles, machinery, chemicals, and heavy electrical equipment. Much bilateral trade is intra-industry or intra-firm.

Germany has a liberal foreign investment policy. For 2007, German investment in the U.S. amounted to $202.6 billion, while U.S. investment in Germany was $107 billion.

U.S. firms employ about 800,000 people in Germany; German firms likewise employ about 670,000 people in the United States.

Despite persistence of some structural rigidities in the labor market and extensive government regulation, the economy remains strong and internationally competitive. Although production costs are very high, Germany is still an export powerhouse, and unit labor costs have decreased in the last decade. Additionally, Germany is strategically placed to take advantage of the rapidly growing central European countries. The current government has

addressed some of the country's structural problems, with important tax, social security, and financial sector reforms.

FOREIGN RELATIONS

Germany continues to emphasize close ties with the United States, membership in NATO, and the "deepening" of integration among current members of the EU. The Federal Republic of Germany took part in all of the joint postwar efforts aimed at closer political, economic, and defense cooperation among the countries of western Europe. Germany has been a large net contributor to the EU budget. Germany also is a strong supporter of the United Nations and of the Organization for Security and Cooperation in Europe (OSCE).

During the postwar era, the Federal Republic of Germany also sought to improve its relationship with the countries of eastern Europe, first establishing trade agreements and, subsequently, diplomatic relations. With unification, German relations with the new democracies in central and eastern Europe intensified. On November 14, 1990, Germany and Poland signed a treaty confirming the Oder-Neisse border. They also concluded a cooperation treaty on June 17, 1991. Germany concluded four treaties with the Soviet Union covering the overall bilateral relationship, economic relations, the withdrawal of Soviet troops from the territory of the former G.D.R., and German support for those troops. Russia accepted obligations under these treaties as successor to the Soviet Union. Germany continues to be active economically in the states of central and eastern Europe and to actively support the development of democratic institutions, bilaterally and through the EU.

U.S.-GERMAN RELATIONS

U.S.-German relations have been a focal point of American involvement in Europe since the end of World War II. Germany stands at the center of European affairs and is a key partner in U.S. relations with Europeans in NATO and the European Union.

German-American ties extend back to the colonial era. More than 7 million Germans have immigrated over the last three centuries, and today nearly a quarter of U.S. citizens claim German ancestry. In recognition of this heritage and the importance of modern-day U.S.-German ties, the U.S. President annually has proclaimed October 6, the date the first German immigrants arrived in 1623, to be "German-American Day."

U.S. policy toward Germany remains the preservation and consolidation of a close and vital relationship with Germany, not only as friends and trading partners, but also as allies sharing common institutions. During the 45 years in which Germany was divided, the U.S. role in Berlin and the large American military presence in West Germany served as symbols of the U.S. commitment to preserving peace and security in Europe. Since German unification, the U.S. commitment to these goals has not changed. The U.S. made significant reductions in its troop levels in Germany after the Cold War ended, and, on July 12, 1994, President Clinton "cased the colors" at the Berlin Brigade's deactivation ceremony. The U.S., however, continues to recognize that the security and prosperity of the United States and Germany significantly depend on each other.

As allies in NATO, the United States and Germany work side by side to maintain peace and freedom. This unity and resolve made possible the successful conclusion of the 1987 U.S.-U.S.S.R. Intermediate-Range Nuclear Forces Treaty (INF), the Two-plus-Four process—which led to the Final Settlement Treaty—and the November 1990 Conventional Armed Forces in Europe (CFE) Treaty.

More recently, the two allies have cooperated closely in peacekeeping efforts in the Balkans and have worked together to encourage the evolution of open and democratic states throughout central and eastern Europe. Germany is also a strong contributor to our common effort to secure peace and stability in Afghanistan, providing some 3,500 military personnel to the NATO ISAF mission, making it the third-largest troop contributor after the U.S. and the U.K. Germany currently commands ISAF's northern region (RC-North) where it leads two of the five provincial reconstruction teams (PRTs) as well as the forward support base. Under a new parliamentary mandate approved in October 2008, the troop ceiling for German forces in Afghanistan was increased from 3,500 to 4,500.

The Bundeswehr is in the process of transforming itself from a purely territorial defense force, as it was during the Cold War, into an expeditionary force capable of deploying up to 14,000 soldiers at a time. Currently, Germany has some 7,000 soldiers on deployments outside NATO territory. In addition to the troops in ISAF, Germany has more than 2,000 military personnel in the NATO-led Kosovo Force (KFOR) and contributes troops to the European Union Force in Bosnia, the UN Interim Force in Lebanon, and the UN missions in Sudan, Georgia, and Ethiopia.

Following the September 11, 2001, attacks on the World Trade Center in New York City and the Pentagon in Washington, DC, Germany has been a reliable U.S. ally in the campaign against terrorism. As two of the world's leading trading nations, the United States and Germany share a common, deep-seated commitment to an open and expanding world economy. Personal ties between the United States and Germany extend beyond immigration to include intensive foreign exchange programs, booming tourism in both directions, and the presence in Germany of large numbers of American military personnel and their dependents.

The United States and Germany have built a solid foundation of bilateral cooperation in a relationship that has changed significantly over six decades. The historic unification of Germany and the role the United

States played in that process have served to strengthen ties between the two countries.

German-American political, economic, and security relationships continue to be based on close consultation and coordination at the most senior levels. High-level visits take place frequently, and the United States and Germany cooperate actively in international forums.

TRAVEL

Consular Information Sheet

December 8, 2008

Country Description: Germany is a modern and stable democracy. Tourist facilities are highly developed. In larger towns, many people can communicate in English.

Entry Requirements: Germany is a party to the Schengen Agreement. As such, U.S. citizens may enter Germany for up to 90 days for tourist or business purposes without a visa. The passport should be valid for at least three months beyond the period of stay. For further details about travel into and within Schengen countries, please see our fact sheet. Further information on entry, visa and passport requirements may be obtained from the German Embassy at 4645 Reservoir Road N.W., Washington, D.C. 20007, telephone (202) 298-4000, web site: http://www.germany.info/Vertretung/usa/en/Startseite.html, or the German Consulates in Atlanta, Boston, Chicago, Houston, Los Angeles, Miami, New York, or San Francisco.

Passengers transiting Germany en route to other countries should ensure that they are aware of and in compliance with the entry requirements for their final destinations as

individuals not presenting appropriate documentation for their destination may be denied boarding on connecting flights.

Safety and Security: German authorities remain vigilant in combating the threat posed by foreign and resident extremists. Specific threats have been uncovered and persecutions undertaken, though Germany itself has been largely free of terror incidents. However, like other countries in the Schengen area, Germany's open borders with its European neighbors allow the possibility of dangerous individuals entering/exiting the country with anonymity. Germany regularly experiences demonstrations on a variety of political and economic themes. Prior police approval is required for public demonstrations, and police oversight is routinely provided for participants and passersby. Nonetheless, these demonstrations can attract counter-demonstrators and have the potential to turn violent. In addition, hooligans, most often young intoxicated "skinheads" have been known to harass or even attack people whom they believe to be foreigners or members of rival groups. On occasion, American have reported that they were assaulted for racial reasons or because they appeared "foreign." All Americans are cautioned to avoid the area around protests and demonstrations and to check local media for updates on the situation.

For the latest security information, Americans traveling abroad should regularly monitor the Department's Internet web site at http://travel.state.gov, where the current Worldwide Caution Travel Alert, Travel Warnings and Travel Alerts can be found. Up-to-date information on security can also be obtained by calling 1-888-407-4747 toll free in the U.S., or, for callers outside the U.S. and Canada, a regular toll line at 1-202-501-4444.

Crime: Violent crime is rare in Germany, but can occur, especially in larger cities or high-risk areas such as train stations. Most incidents of street crime consist of theft of unattended items and pickpocketing. There have been a few reports of aggravated assault against U.S. citizens in higher-risk areas. American travelers are advised to take the same precautions against becoming crime victims as they would in any American city.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy or Consulate staff can, for example, assist you to find appropriate medical care, to contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

The local equivalent to the 911 emergency line in Germany is 112.

Medical Facilities and Health Information: Good medical care is widely available. Doctors and hospitals may expect immediate payment in cash for health services from tourists and persons with no permanent address in Germany. Most doctors, hospitals and pharmacies do not accept credit cards.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's Internet site at http://wwwn.cdc.gov/travel. Further health information for travelers is available at http://www.who.int/ith/en.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation. U.S. military facilities in Germany will not provide treatment to private American citizens who are not affiliated with the Department of Defense.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Germany is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

Road conditions in general are excellent, although caution should be exercised while traveling on older roads in eastern Germany. The high speed permitted on the German autobahn, weather, and unfamiliar road markings can pose significant hazards, and driver error is a leading cause of accidents involving American motorists in Germany. Rules on right-of-way differ significantly from the U.S. Notice should be taken that it is generally illegal in Germany to pass vehicles from the right and that the threshold for determining whether a person has been driving under the influence of alcohol is lower than in some U.S. states.

Many German streets and sidewalks have dedicated bike lanes for use by bicyclists. Pedestrians should be aware that bicycles have priority use of these lanes and should be careful to observe whether any bicyclist is approaching before crossing or stepping into the bike lane. Bicyclists also have priority over cars turning onto side streets, and motorists should always confirm whether a bicyclist is approaching from either direction before attempting to enter side streets, even when the light is in their favor. Motorists turning into a side street who hit a bicyclist who is using a marked bike lane will be held responsible for any injury or damage caused.

The use of cell phones while driving is prohibited in Germany. For specific information on travel within Germany contact the German National Tourist Board Office in New York at

(212) 661-7200, fax (212) 661-7174 or via the Internet at http://www.germany-tourism.de. Travelers should also note that railroad crossings are marked differently in Germany than in the U.S. There have been several accidents involving Americans in recent years at railroad crossings. In addition to the standard crossbuck (X-shaped) sign, railroad crossings are often marked by signal lights. Signal lights at a railroad crossing means that a train is approaching and that all vehicles should stop.

Visit the website of the country's national tourist office and national authority responsible for road safety at http://www.germany-tourism.de.

Aviation Safety Oversight: The U.S. Federal Aviation Administration (FAA) has assessed the Government of Germany's Civil Aviation Authority as being in compliance with International Civil Aviation Organization (ICAO) aviation safety standards for oversight of Germany's air carrier operations. For more information, travelers may visit the FAA's Internet web site at http://www.faa.gov.

Special Circumstances: Germany's customs authorities may enforce strict regulations concerning temporary importation into or export from Germany of certain items such as firearms, military artifacts (particularly those pertaining to the Second World War), antiques, medications/pharmaceuticals and business equipment. Under German law it is also illegal to bring into or take out of Germany literature, music CDs, or other paraphernalia that glorifies fascism, the Nazi past of the former "Third Reich." It is advisable to contact the German Embassy in Washington or one of the German consulates in the United States for specific information regarding customs requirements.

Automatic Teller Machines (ATMs) are widely available throughout Germany. They utilize many of the same account networks that are found in the U.S., so it is possible in most cases to get euros directly from your U.S. bank while you are in Germany without paying any inordinate fees for currency exchange. Credit cards are not accepted as widely as in the United States.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating German laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Germany are strict and convicted offenders can expect jail sentences and heavy fines. Engaging in illicit sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: American citizen parents have at times encountered difficulties having visitation orders enforced in Germany. For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy and Consulate Locations: Americans living or traveling in Germany are encouraged to register with the nearest U.S. Embassy of Consulate through the State Department's travel registration web site, https://travelregistration.state.gov/ibrs/ui/, and to obtain updated information on travel and security within Germany.

Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency.

U.S. Consular Sections are located at:

Berlin: Clayallee 170; Tel: (49)(30)832-9233; Fax: (49)(30) 8305-1215.

Frankfurt: Giessner Str. 30, Tel. (49)(69) 75350; Fax: (49)(69) 7535-2304.

Leipzig: Wilhelm-Seyfferth-Strasse 4, Tel. (49)(341) 213-8418; Fax: (49)(341) 2138417 (emergency service only). Munich: Koenigstrasse 5, Tel. (49)(89) 2888-0; Fax: (49)(89) 280-9998.

There is also a U.S. consular agency in Bremen located at Bremen World Trade Center, Birkenstrasse 15, Tel: (49)(421) 301-5860; Fax: (49)(421) 301-5861.

When calling another city from within Germany, dial a zero before the city code (for example, when calling Berlin from Munich, the city code for Berlin is 030).

Intercountry Adoption

December 2006

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services.

For more information, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is based on public sources and current understanding. Questions involving foreign and U.S. immigration laws and legal interpretation should be addressed respectively to qualified foreign or U.S. legal counsel.

Please Note: The U.S. Consulate General in Frankfurt is the designated immigrant visa issuing post for Germany.

Patterns of Immigration: Please review current reports online at http://adoption.state.gov.

Adoption Authority: The address of the Central Authority for intercountry adoption in Germany is:

Generalbundesanwalt beim
Bundesgerichtshof
(Public Prosecutor General of the Federal Court of Justice)
Zentrale Behörde
Adenauerallee 99-103
53113 Bonn
Tel. + 49-228-40
Fax +49-228-410-5050
www.bundeszentralregister.de

Persons wishing to adopt a child in Germany should contact the Youth Welfare Office (Jugendamt) of each district/major city or the Youth Welfare Office (Landesjugendamt) of each German state (Bundesland). These organizations will be able to assist in arranging an adoption and in facilitating legal proceedings.

Eligibility Requirements for Adoptive Parents: The minimum age for an adopting parent is 25 years old. Married couples can only adopt together as husband and wife, with the minimum age for one parent being 25 years old and the minimum age of the second parent being at least 21 years old. Same-sex couples cannot adopt as a couple. However, one of the members of a couple may adopt alone. There is no restriction on the nationality of the adopting parent. Singles, not in a relationship, as well as one member of an unmarried heterosexual couple, can also adopt a child in Germany. Germany also allows non-Germans to adopt a German child.

There is no legal upper age limit of an adopting parent; although German youth welfare offices prefer that the adopting parent(s) be under 40, particularly if they are adopting a baby.

Residency Requirements: There are no residency requirements to adopt in Germany.

Time Frame: There is no specific time frame for the adoption process. It varies from case to case and primarily depends upon the duration of the qualifying process and/or the difficulty of identifying a child for adoption. However, the processing period may last from one to seven years and possibly longer.

Adoption Agencies and Attorneys: Prospective adoptive parents should visit the web site for the Hague Permanent Bureau for Private International Law for a list of accredited adoption agencies in Germany: http://www.hcch.net. The U.S. Embassy in Germany also maintains a list of attorneys who have expressed a willingness to work with U.S. citizens. Please see the Embassy's web site on living in Germany at http://berlin.usembassy.gov/germany/services/lists.html.

Adoption Fees: There will be a surcharge of approximately U.S.$300 for the handling and review of the foreign documents; the court fees for the final adoption decree will be approximately US$100-130. Prospective adoptive parents can expect to pay additional costs such as legal fees (attorneys), notarizations, flights, accommodations, etc, totaling several thousand dollars or more.

Adoption Procedures: For both domestic and intercountry adoption, the prospective adoptive parent(s) must first approach either one of the youth offices listed above, the German Central Authority for intercountry adoption, the Central Authority in the country of the child's habitual abode or an intercountry adoption agency for an initial consultation. After a favorable evaluation, the parents will be subject to a home study by their local youth welfare office. Their translated home study will be sent to the adoption authority office. When a child has been identified, the adopting parent(s) and the child's legal guardian sign an agreement before a German court or notary public. Before the family court decides if the adoption may take place and issues the final decree, the adopting parent(s) have to prove that the child will be lawfully admitted into their home country.

Required Documents: There is no standardized checklist of required documents, as each youth office/or court has discretion to allow an adoption to take place or to issue the adoption decree. However, the following is at least a partial list of the civil documents may be required:

- the adopting parents' certified birth certificate;
- identification (passport, photo i.d., etc.);
- marriage certificate (if applicable);
- termination of previous marriage(s) (death certificate, divorce decree, etc.);
- proof of parents' income.

All of the above documents may require a German translation.

German Embassy
4645 Reservoir Road NW
Washington, DC, 20007-1998
(202) 298-4000
http://www.germany.info/relaunch/index.html.

Germany also has consulates in Atlanta, Boston, Chicago, Houston, Los Angeles, Miami, New York, and San Francisco.

U.S. Immigration Requirements: Prospective adopting parents are strongly encouraged to consult USCIS publication M-249, *The Immigration of Adopted and Prospective Adoptive Children*, as well as the Department of State publication, *Intercountry Adoptions*. Please see the *Intercountry Adoption* section of this book for more details and review current reports online at http://adoption.state.gov.

U.S. Consulate General
Immigrant Visa Unit
Giessener Strasse 30
60435 Frankfurt Am Main

Additional Information: Specific questions about adoption in Germany may be addressed to the U.S. Consulate General in Frankfurt. General questions regarding intercountry adoption may be addressed to the Office of Children's Issues, U.S. Department of State, CA/OCS/CI, SA-29, 4th Floor, 2201 C Street, NW, Washington, D.C. 20520-4818, toll-free Tel: 1-888-407-4747.

International Parental Child Abduction

November 2008

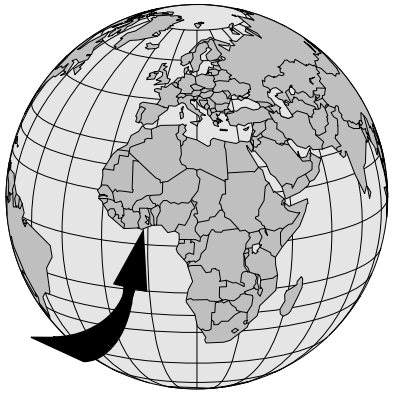
The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *International Child Abduction* section of this book and review current reports online at www.travel.state.gov/childabduction.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is provided for general information only. Questions involving interpretation of specific foreign laws should be addressed to foreign legal counsel.

General Information: Germany is a federal country that consists of 16 states. Nevertheless, substantive and procedural law on domestic relations is federal law. Germany became party to the Hague Convention on the Civil Aspects of International Child Abduction (the "Hague Convention") on December 1, 1990.

The Hague Convention: The Hague Convention is an international treaty. Its purpose is to discourage international parental child abduction and to ensure that children who are abducted or wrongfully retained in a party country are returned to their country of habitual residence. The Convention does not address child custody, but determines the jurisdiction in which custody should be adjudicated.

The Hague Convention came into force between the United States and Germany on December 1, 1990. Therefore, Hague Convention provisions for return of a child to the U.S. would apply only to children abducted to or retained in Germany after December 1, 1990. Parents and legal guardians of children taken to Germany prior to December 1, 1990, may still submit applications for access to the child under the Hague Convention in some cases. For more information on The Hague Convention, see the *International Parental Child Abduction* section of this publication and review current reports from the U.S. Department of State at www.travel.state.gov/childabduction. For a list of contact names and addresses for German Central Authorities, review current reports online at www.travel.state.gov/childabduction.



Other Information: Although German courts do issue return/access orders based upon Hague applications, the actual enforcement of those orders can be difficult if the parent with the child refuses to comply with the court's decision.

For further details about the Hague Convention proceedings in Germany, please contact the Office of Children Issues: Telephone (202) 736-9090 or Fax (202) 736-9133.

Criminal Remedies: For information on possible criminal remedies, please contact your local law enforcement authorities, or the nearest office of the Federal Bureau of Investigation. Information is also available on the Internet at the web site of the U.S. Department of Justice, Office of Juvenile Justice and Delinquency Prevention at http://www.ojjdp.ncjrs.org. You should be aware that filing criminal child abduction charges in the United States against a taking parent might jeopardize a German Hague Convention case.

Passports for Minors and the Children's Passport Issuance Alert Program: For more information on these topics, see the *International Parental Child Abduction* section of this publication and review current reports from the U.S. Department of State at www.travel.state.gov/childabduction.

More Information: For further information and/or assistance in either preventing or responding to an international parental child abduction, contact the Office of Children's Issues, U.S. Department of State at (202) 736-9090 or visit its web site at www.travel.state.gov/childabduction.

GHANA

Compiled from the June 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Republic of Ghana

PROFILE

Geography

Area: 238,538 sq. km. (92,100 sq. mi.); about the size of Illinois and Indiana combined.
Cities: Capital—Accra (metropolitan area pop. 3 million est.). Other cities—Kumasi (1 million est.), Tema (500,000 est.), Sekondi-Takoradi (370,000 est.).
Terrain: Plains and scrubland, rainforest, savanna.
Climate: Tropical.

People

Nationality: Noun and adjective—Ghanaian(s).
Population: (2007 est.) 23 million.
Population density: 88/sq. km. (247/sq. mi.).
Annual growth rate: (2007 est.) 2.7%.
Ethnic groups: Akan, Ewe, Ga, Moshi-Dagomba.
Religions: Christian 69%, Muslim 15.6%, traditional and indigenous beliefs 8.5%.
Languages: English (official), Akan (which includes Asante Twi, Akwapim Twi, Akyem, and Fanti) 49%, Mole-Dagbani 16%, Ewe 13%, Ga-Adangbe 8%, Guan 4%, others 10%.
Education: Years compulsory—9. Literacy—53.7%.
Health: Infant mortality rate (2003 est.)—64/1,000. Life expectancy—59.2 yrs. for women, 55.5 yrs. for men
Work force: (11.1 million) Agriculture and fishing—47.9%; industry and transport—16.2%; sales and clerical—19.3%; services—5.9%; professional—8.9%; other—1.8%.

Government

Type: Democracy.
Independence: March 6, 1957.
Constitution: Entered into force January 7, 1993.
Government branches: Executive—president popularly elected for a maximum of two 4-year terms; Council of State, a presidential appointed consultative body of 25 members required by the constitution. Legislative—unicameral Parliament popularly elected for 4-year terms. Judicial—independent Supreme Court justices nominated by president with approval of Parliament.
Political subdivisions: Ten regions.
Political parties: New Patriotic Party, National Democratic Congress, Convention People's Party, People's National Convention, others.
Suffrage: Universal at 18.

Economy

GDP: (2006) $12.5 billion.
Real GDP growth rate: (2006) 6.2%.
Per capita GDP: (2006) $540.
Inflation rate: (consumer prices) (2006) 11%.
Natural resources: Gold, timber, diamonds, bauxite, manganese, fish.
Agriculture: Products—cocoa, coconuts, coffee, pineapples, cashews, pepper, other food crops, rubber. Land—70% arable and forested.
Business and industry: Types—mining, lumber, light manufacturing, fishing, aluminum, tourism.
Trade: (2006) Exports—$3.9 billion: cocoa ($1.26 billion), gold, timber, diamonds, manganese. Imports—$6.8 billion: petroleum ($1.3 billion), food, industrial raw materials, machinery, equipment. Major trade partners—Nigeria, China, U.S., U.K., Germany, Togo, France, Netherlands, Spain.
Fiscal year: Calendar year.

GEOGRAPHY

Ghana is located on West Africa's Gulf of Guinea only a few degrees north of the Equator. Half of the country lies less than 152 meters (500 ft.) above sea level, and the highest point is 883 meters (2,900 ft.). The 537-kilometer (334-mi.) coastline is mostly a low, sandy shore backed by plains and scrub and intersected by several rivers and streams, most of

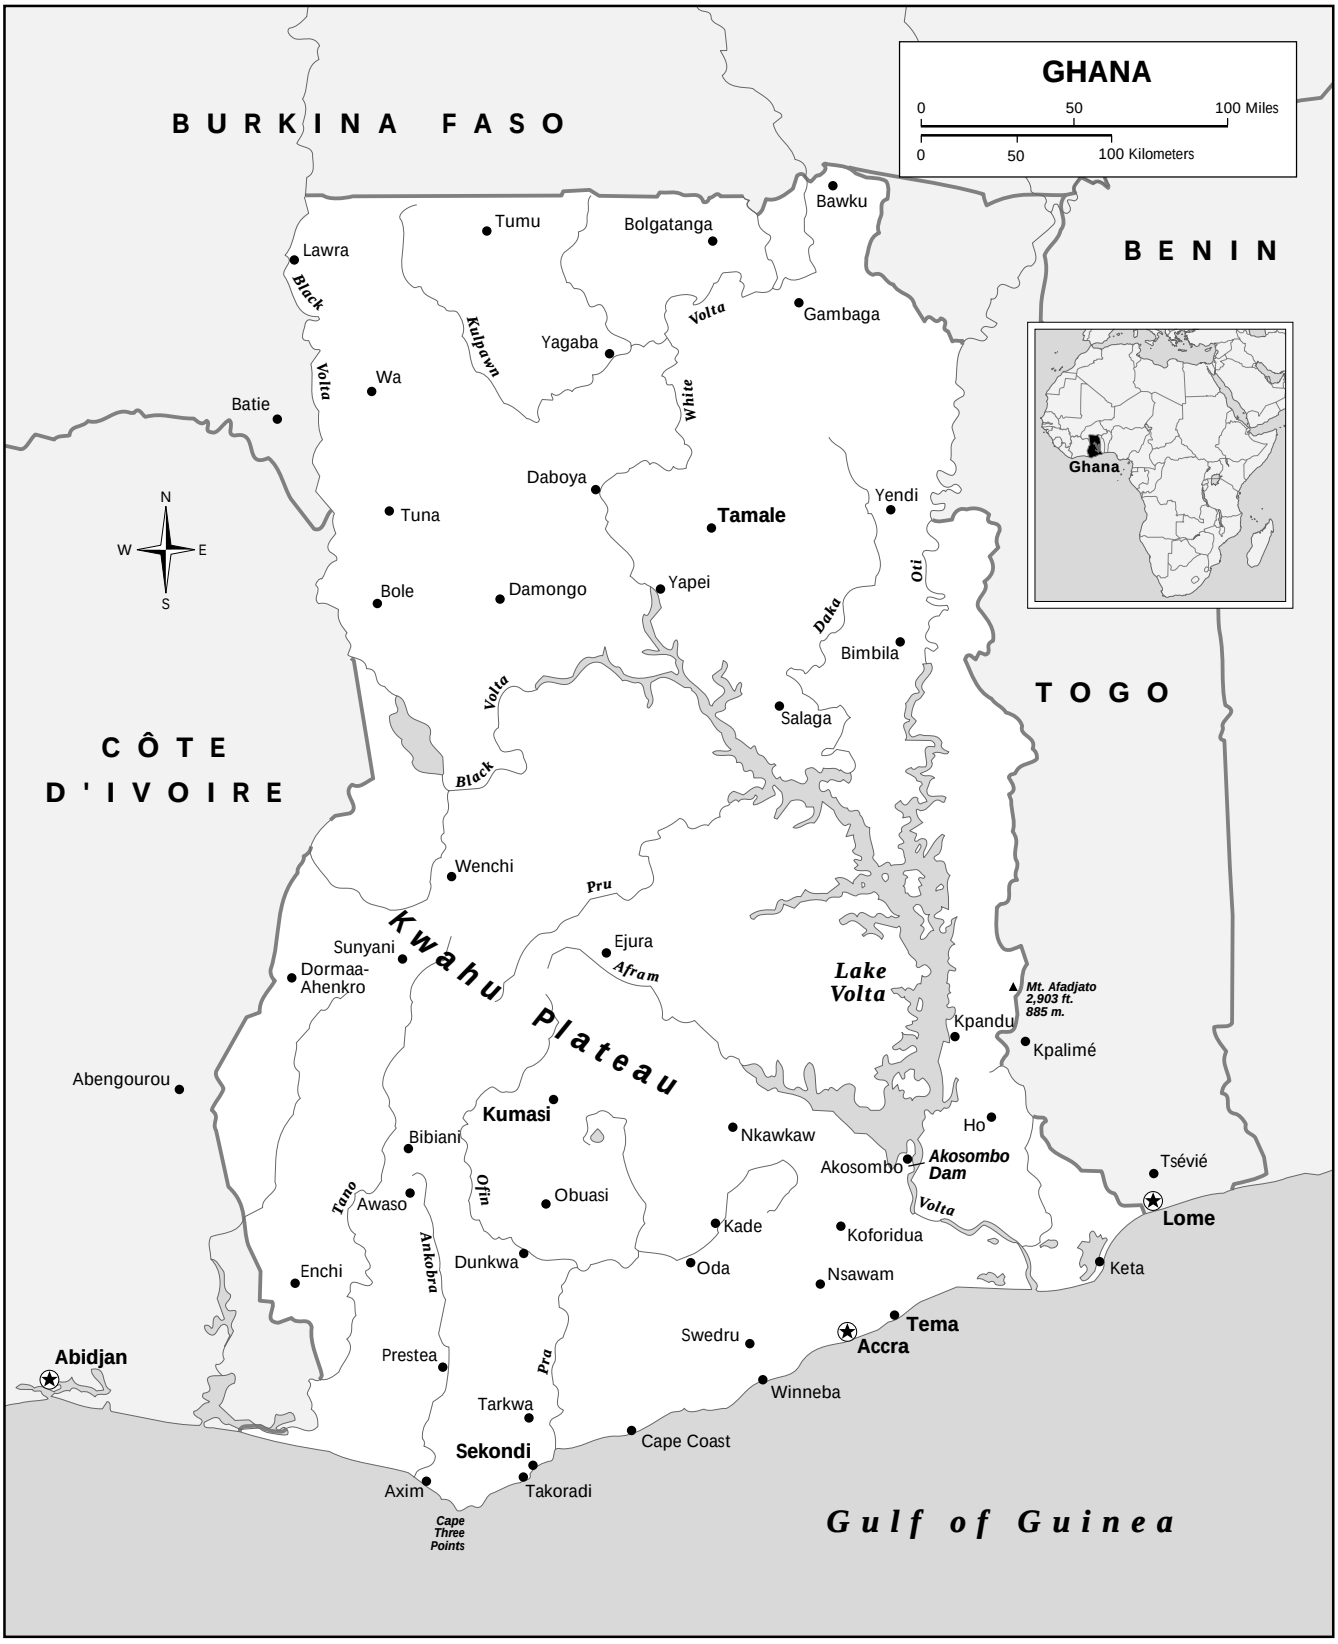
which are navigable only by canoe. A tropical rain forest belt, broken by heavily forested hills and many streams and rivers, extends northward from the shore, near the Cote d'Ivoire frontier. This area produces most of the country's cocoa, minerals, and timber. North of this belt, the country varies from 91 to 396 meters (300 ft.-1,300 ft.) above sea level and is covered by low bush, park-like savanna, and grassy plains. The climate is tropical. The eastern coastal belt is warm and comparatively dry; the southwest corner, hot and humid; and the north, hot and dry. There are two distinct rainy seasons in the south—May-June and August-September; in the north, the rainy seasons tend to merge. A dry, northeasterly wind, the Harmattan, blows in January and February. Annual rainfall in the coastal zone averages 83 centimeters (33 in.).

Volta Lake, the largest manmade lake in the world, extends from the Akosombo Dam in southeastern Ghana to the town of Yapei, 520 kilometers (325 mi.) to the north. The lake generates electricity, provides inland transportation, and is a potentially valuable resource for irrigation and fish farming.

PEOPLE

Ghana's population is concentrated along the coast and in the principal cities of Accra and Kumasi. Most Ghanaians descended from migrating tribes that probably came down the Volta River valley at the beginning of the 13th century. Ethnically, Ghana is divided into small groups speaking more than 50 languages and dialects. Among the more important linguistic groups are the Akans, which include the Fantis along the coast and the Ashantis in the forest region north of the coast; the Guans, on the plains of the Volta River; the Ga- and Ewe-speaking peoples of the south and southeast; and the Moshi-Dagomba-speaking tribes of the northern and upper regions. English, the official and commercial language, is taught in all the schools.

Education



Primary and junior secondary school education is tuition-free and mandatory. The Government of Ghana's support for basic education is unequivocal. Article 39 of the constitution mandates the major tenets of the free, compulsory, universal basic education (FCUBE) initiative. Launched in 1996, it is one of the most ambitious pre-tertiary education programs in West Africa. Since the early 1980s, Government of Ghana expenditures on education have risen from 1.5% to nearly 3.5% of GDP. Since 1987, the share of basic education in total education spending has averaged around 67%. The units of the Ministry of Education, Science and Sports (MOESS) responsible for education are: the Ghana Education Service (GES), which administers pre-university education; the National Council on Tertiary Education; the National Accreditation Board; and the National Board for Professional and Technician Examinations (NABPTEX). The West African Examinations Council (WAEC), a consortium of five Anglophone West African Countries (Ghana, Nigeria, Sierra Leone, Gambia, and Liberia) is responsible for developing, administering, and grading school-leaving examinations at the secondary level.

Since 1986, pre-tertiary education in Ghana includes six years of primary education, three years at the junior secondary school level and three years at the senior secondary school level. A new educational reform, beginning September 1, 2007, has introduced two years of kindergarten education beginning at age four and increased the three years senior secondary to four years. Successful completion of senior secondary school leads to admission eligibility at training colleges, polytechnics, and universities. In 2006 there were approximately 5.1 million students attending schools at these three levels: 68% at the primary level, 23% at the junior secondary level and 10% at the senior secondary level. There are over six hundred public senior secondary schools in Ghana that graduated a total of 90,000 students in 2004, representing a huge expansion over the old system (which was transformed in 1987), which consisted of three hundred institutions graduating 27,000 students a year. However, access to each successive level of education remains severely limited by lack of facilities. About 99.1% of junior secondary school graduates are able to gain admission to senior secondary schools, and only about 34.4% of senior secondary school graduates are able to gain admission to universities and polytechnics, plus another 10-20% to diploma-level postsecondary education. Private secondary schools play a very small role in Ghana, with only a handful of institutions offering international curricula such as the British-based A-levels, International Baccalaureate, and U.S. high school. Combined, they graduate fewer than 200 students a year.

Entrance to one of the five Ghanaian public universities is by examination following completion of senior secondary school. There are now five public and twelve private degree-granting universities in Ghana, along with ten public polytechnics offering the British Higher National Diploma (HND), a three-year tertiary system in applied fields of study. Ghana's first private Catholic university opened in 2003 in Sunyani. The polytechnics also offer vocational, non-tertiary diploma programs. In addition, there are approximately forty teacher-training colleges and fifteen nurses' training colleges. Private tertiary education is a recent but rapid development in Ghana, meticulously regulated by the National Accreditation Board. Over 84,078 undergraduates are now enrolled in secular degree-granting programs in seventeen public and private universities, 29,047 students enrolled in polytechnics, and 26,025 trainees enrolled in teacher training colleges.

HISTORY

The history of the Gold Coast before the last quarter of the 15th century is derived primarily from oral tradition that refers to migrations from the ancient kingdoms of the western Soudan (the area of Mauritania and

Mali). The Gold Coast was renamed Ghana upon independence in 1957 because of indications that present-day inhabitants descended from migrants who moved south from the ancient kingdom of Ghana. The first contact between Europe and the Gold Coast dates from 1470, when a party of Portuguese landed. In 1482, the Portuguese built Elmina Castle as a permanent trading base. Thomas Windham made the first recorded English trading voyage to the coast in 1553. During the next three centuries, the English, Danes, Dutch, Germans, and Portuguese controlled various parts of the coastal areas.

In 1821, the British Government took control of the British trading forts on the Gold Coast. In 1844, Fanti chiefs in the area signed an agreement with the British that became the legal steppingstone to colonial status for the coastal area. From 1826 to 1900, the British fought a series of campaigns against the Ashantis, whose kingdom was located inland. In 1902, they succeeded in establishing firm control over the Ashanti region and making the northern territories a protectorate. British Togoland, the fourth territorial element eventually to form the nation, was part of a former German colony administered by the United Kingdom from Accra as a League of Nations mandate after 1922. In December 1946, British Togoland became a UN Trust Territory, and in 1957, following a 1956 plebiscite, the United Nations agreed that the territory would become part of Ghana when the Gold Coast achieved independence.

The four territorial divisions were administered separately until 1946, when the British Government ruled them as a single unit. In 1951, a constitution was promulgated that called for a greatly enlarged legislature composed principally of members elected by popular vote directly or indirectly. An executive council was responsible for formulating policy, with most African members drawn from the legislature and including three ex officio members appointed by the governor. A new constitution, approved on April 29, 1954, established a cabinet comprising African ministers drawn from an all-African legislature chosen by direct election. In the elections that followed, the Convention People's Party (CPP), led by Kwame Nkrumah, won the majority of seats in the new Legislative Assembly. In May 1956, Prime Minister Nkrumah's Gold Coast government issued a white paper containing proposals for Gold Coast independence. The British Government stated it would agree to a firm date for independence if a reasonable majority for such a step were obtained in the Gold Coast Legislative Assembly after a general election. This election, held in 1956, returned the CPP to power with 71 of the 104 seats in the Legislative Assembly. Ghana became an independent state on March 6, 1957, when the United Kingdom relinquished its control over the Colony of the Gold Coast and Ashanti, the Northern Territories Protectorate, and British Togoland.

In subsequent reorganizations, the country was divided into 10 regions, which currently are subdivided into 138 districts. The original Gold Coast Colony now comprises the Western, Central, Eastern, and Greater Accra Regions, with a small portion at the mouth of the Volta River assigned to the Volta Region; the Ashanti area was divided into the Ashanti and Brong-Ahafo Regions; the Northern Territories into the Northern, Upper East, and Upper West Regions; and British Togoland essentially is the same area as the Volta Region.

Post-Independence Politics

After independence, the CPP government under Nkrumah sought to develop Ghana as a modern, semi-industrialized, unitary socialist state. The government emphasized political and economic organization, endeavoring to increase stability and productivity through labor, youth, farmers, cooperatives, and other organizations integrated with the CPP. The government, according to Nkrumah, acted only as "the agent of the CPP" in seeking to accomplish these goals.

The CPP's control was challenged and criticized, and Prime Minister Nkrumah used the Preventive Detention Act (1958), which provided for detention without trial for up to 5 years (later extended to 10 years). On July 1, 1960, a new constitution was adopted, changing Ghana from a parliamentary system with a prime minister to a republican form of government headed by a powerful president. In August 1960, Nkrumah was given authority to scrutinize newspapers and other publications before publication. This political evolution continued into early 1964, when a constitutional referendum changed the country to a one-party state. On February 24, 1966, the Ghanaian Army and police overthrew Nkrumah's regime. Nkrumah and all his ministers were dismissed, the CPP and National Assembly were dissolved, and the constitution was suspended. The new regime cited Nkrumah's flagrant abuse of individual rights and liberties, his regime's corrupt, oppressive, and dictatorial practices, and the rapidly deteriorating economy as the principal reasons for its action.

Post-Nkrumah Politics

The leaders of the February 24, 1966 coup established the new government around the National Liberation Council (NLC) and pledged an early return to a duly constituted civilian government. Members of the judiciary and civil service remained at their posts and committees of civil servants were established to handle the administration of the country. Ghana's government returned to civilian authority under the Second Republic in October 1969 after a parliamentary election in which the Progress Party, led by Kofi A. Busia, won 105 of the 140 seats. Until mid-1970, a presidential commission led by Brigadier A.A. Afrifa held the powers of the chief of state. In a special election on August 31, 1970, former Chief Justice Edward Akufo-Addo was chosen President, and Dr. Busia became Prime Minister.

Faced with mounting economic problems, Prime Minister Busia's government undertook a drastic devaluation

of the currency in December 1971. The government's inability to control the subsequent inflationary pressures stimulated further discontent, and military officers seized power in a bloodless coup on January 13, 1972.

The coup leaders, led by Col. I.K. Acheampong, formed the National Redemption Council (NRC) to which they admitted other officers, the head of the police, and one civilian. The NRC promised improvements in the quality of life for all Ghanaians and based its programs on nationalism, economic development, and self-reliance. In 1975, government reorganization resulted in the NRC's replacement by the Supreme Military Council (SMC), also headed by now-General Acheampong.

Unable to deliver on its promises, the NRC/SMC became increasingly marked by mismanagement and rampant corruption. In 1977, General Acheampong brought forward the concept of union government (UNIGOV), which would make Ghana a non-party state. Perceiving this as a ploy by Acheampong to retain power, professional groups and students launched strikes and demonstrations against the government in 1977 and 1978. The steady erosion in Acheampong's power led to his arrest in July 1978 by his chief of staff, Lt. Gen. Frederick Akuffo, who replaced him as head of state and leader of what became known as the SMC-2.

Akuffo abandoned UNIGOV and established a plan to return to constitutional and democratic government. A Constitutional Assembly was established, and political party activity was revived. Akuffo was unable to solve Ghana's economic problems, however, or to reduce the rampant corruption in which senior military officers played a major role. On June 4, 1979, his government was deposed in a violent coup by a group of junior and noncommissioned officers—Armed Forces Revolutionary Council (AFRC)—with Flt. Lt. Jerry John Rawlings as its chairman.

The AFRC executed eight senior military officers, including former chiefs of state Acheampong and Akuffo; established Special Tribunals that, secretly and without due process, tried dozens of military officers, other government officials, and private individuals for corruption, sentencing them to long prison terms and confiscating their property; and, through a combination of force and exhortation, attempted to rid Ghanaian society of corruption and profiteering. At the same time, the AFRC accepted, with a few amendments, the draft constitution that had been submitted; permitted the scheduled presidential and parliamentary elections to take place in June and July; promulgated the constitution; and handed over power to the newly elected President and Parliament of the Third Republic on September 24, 1979.

The 1979 constitution was modeled on those of Western democracies. It provided for the separation of powers between an elected president and a unicameral Parliament, an independent judiciary headed by a Supreme Court, which protected individual rights, and other autonomous institutions, such as the Electoral Commissioner and the Ombudsman. The new President, Dr. Hilla Limann, was a career diplomat from the north and the candidate of the People's National Party (PNP), the political heir of Nkrumah's CPP. Of the 140 members of Parliament, 71 were PNP. The PNP government established the constitutional institutions and generally respected democracy and individual human rights. It failed, however, to halt the continuing decline in the economy; corruption flourished, and the gap between rich and poor widened. On December 31, 1981, Flight Lt. Rawlings and a small group of enlisted and former soldiers launched a coup that succeeded against little opposition in toppling President Limann.

The PNDC Era

Rawlings and his colleagues suspended the 1979 constitution, dismissed the President and his cabinet, dissolved the Parliament, and proscribed existing political parties. They established the Provisional National Defense Council (PNDC), initially composed of seven members with Rawlings as chairman, to exercise executive and legislative powers. The existing judicial system was preserved, but alongside it the PNDC created the National Investigation Committee to root out corruption and other economic offenses; the anonymous Citizens' Vetting Committee to punish tax evasion; and the Public Tribunals to try various crimes. The PNDC proclaimed its intent to allow the people to exercise political power through defense committees to be established in communities, workplaces, and in units of the armed forces and police. Under the PNDC, Ghana remained a unitary government.

In December 1982, the PNDC announced a plan to decentralize government from Accra to the regions, the districts, and local communities, but it maintained overall control by appointing regional and district secretaries who exercised executive powers and also chaired regional and district councils. Local councils, however, were expected progressively to take over the payment of salaries, with regions and districts assuming more powers from the national government. In 1984, the PNDC created a National Appeals Tribunal to hear appeals from the public tribunals; changed the Citizens' Vetting Committee into the Office of Revenue Collection; and replaced the system of defense committees with Committees for the Defense of the Revolution.

In 1984, the PNDC also created a National Commission on Democracy to study ways to establish participatory democracy in Ghana. The commission issued a "Blue Book" in July 1987 outlining modalities for district-level elections, which were held in late 1988 and early 1989, for newly created district assemblies. The government appointed one-third of the assembly members.

The Fourth Republic

Under international and domestic pressure for a return to democracy, the PNDC allowed the establishment of a 258-member Consultative Assembly made up of members repre-

senting geographic districts as well as established civic or business organizations. The assembly was charged to draw up a draft constitution to establish a Fourth Republic, using PNDC proposals. The PNDC accepted the final product without revision, and it was put to a national referendum on April 28, 1992, in which it received 92% approval. On May 18, 1992, the ban on party politics was lifted in preparation for multi-party elections. The PNDC and its supporters formed a new party, the National Democratic Congress (NDC), to contest the elections. Presidential elections were held on November 3 and parliamentary elections on December 29, 1992. Members of the opposition boycotted the parliamentary elections, however, which resulted in a 200-seat Parliament with only 17 opposition party members and two independents.

The constitution entered into force on January 7, 1993, to found the Fourth Republic. On that day, Flt. Lt. Jerry John Rawlings was inaugurated as President and members of Parliament swore their oaths of office. In 1996, the opposition fully contested the presidential and parliamentary elections, which were described as peaceful, free, and transparent by domestic and international observers. In that election, President Rawlings was re-elected with 57% of the popular vote. In addition, Rawlings' NDC party won 133 of the Parliament's 200 seats, just one seat short of the two-thirds majority needed to amend the constitution, although the election returns of two parliamentary seats faced legal challenges.

The December 2000 elections ushered in the first democratic presidential change of power in Ghana's history when John A. Kufuor of the New Patriotic Party (NPP) defeated the NDC's John Atta Mills—who was Rawling's Vice President and handpicked successor. Kufuor defeated Mills by winning 56.73% of the vote, while the NPP picked up 100 of 200 seats in Parliament. The elections were declared free and fair by a large contingent of domestic and international monitors. After several by-elections were held to fill vacated seats, the NPP majority stood at 103 of the 200 seats in Parliament, while the NDC held 89 and independent and small party members held eight.
