The Asad regime (little has changed since Bashar Al-Asad succeeded his father) has held power longer than any other Syrian government since independence; its survival is due partly to a strong desire for stability and the regime's success in giving groups such as religious minorities and peasant farmers a stake in society. The expansion of the government bureaucracy has also created a large class loyal to the regime. The President's continuing strength is due also to the army's continued loyalty and the effectiveness of Syria's large internal security apparatus. The leadership of both is comprised largely of members of Asad's own Alawi sect. The several main branches of the security services operate independently of each other and outside of the legal system. Each continues to be responsible for human rights violations.

All three branches of government are guided by the views of the Ba'ath Party, whose primacy in state institutions is assured by the constitution. The Ba'ath platform is proclaimed succinctly in the party's slogan: "Unity, freedom, and socialism." The party has traditionally been considered both socialist, advocating state ownership of the means of industrial production and the redistribution of agricultural land, and revolutionary, dedicated to carrying a socialist revolution to every part of the Arab world. Founded by Michel 'Aflaq, a Syrian Christian and Salah al-Din Al-Bitar, a Syrian Sunni, the Ba'ath Party embraces secularism and has attracted supporters of all faiths in many Arab countries, especially Iraq, Jordan, and Lebanon. Since August 1990, however, the party has tended to de-emphasize socialism and to stress both pan-Arab unity and the need for gradual reform of the Syrian economy.

Nine smaller political parties are permitted to exist and, along with the Ba'ath Party, make up the National Progressive Front (NPF), a grouping of parties that represents the sole framework of legal political party participation for citizens. While created ostensibly to give the appearance of a multi-party system, the NPF is dominated by the Ba'ath Party and does not change the essentially one-party character of the political system. Non-Ba'ath parties included in the NPF represent small political groupings of a few hundred members each and conform strictly to Ba'ath Party and government policies. There were reports in 2005, in the wake of the June Ba'ath Party Congress, that the government was considering legislation to permit the formation of new political parties and the legalization of parties previously banned. These changes have not taken place. In addition, some 15 small independent parties outside the NPF operate without government sanction.

The Ba'ath Party dominates the parliament, which is known as the People's Council. With members elected every 4 years, the Council has no independent authority. The executive branch retains ultimate control over the legislative process, although parliamentarians may criticize policies and modify draft laws; according to the constitution and its bylaws, a group of 10 parliamentarians can propose legislation. During 2001, two independent members of parliament, Ma'mun al-Humsy and Riad Seif, who had advocated political reforms, were stripped of their parliamentary immunity and tried and convicted of charges of "attempting to illegally change the constitution." Seif was released from prison in early 2006, but remains under strict surveillance by the security services. The government has allowed independent non-NPF candidates to run for a limited allotment of seats in the 250-member People's Council. Following the April 22-23, 2007 parliamentary elections, the NPF strengthened its hold on parliament, with the number of non-NPF deputies shrinking from 83 to 80, ensuring a permanent absolute majority for the Ba'ath Party-dominated NPF.

There was a surge of interest in political reform after Bashar al-Asad assumed power in 2000. Human rights activists and other civil society advocates, as well as some parliamentarians, became more outspoken during a period referred to as "Damascus Spring" (July 2000-February 2001). Asad also made a series of appointments of reform-minded advisors to formal and less formal positions, and included a number of similarly oriented individuals in his cabinet. The 2001 arrest and long-term detention of the two reformist parliamentarians and the apparent marginalizing of some of the reformist advisors in the past five years, indicate that the pace of any political reform in Syria is likely to be much slower than the short-lived Damascus Spring promised. A crackdown on civil society in 2005, in the wake of Syria's withdrawal from Lebanon, and again in the late winter and spring of 2006, reinforced the perception that any steps toward political form were likely to be halting and piecemeal at best.

ECONOMY

Syria is a middle-income, developing country with an economy based on

agriculture, oil, industry, and tourism. However, Syria's economy faces serious challenges and impediments to growth, including: a large and poorly performing public sector; declining rates of oil production; widening non-oil deficit; wide scale corruption; weak financial and capital markets; and high rates of unemployment tied to a high population growth rate. In addition, Syria currently is the subject of U.S. economic sanctions under the Syria Accountability Act, which prohibits the export and re-export of most U.S. products to Syria.

As a result of an inefficient and corrupt centrally planned economy, Syria has low rates of investment, and low levels of industrial and agricultural productivity. Its GDP growth rate was approximately 2.9% in 2005, according to IMF statistics. The two main pillars of the Syrian economy have been agriculture and oil. Agriculture, for instance, accounts for 25% of GDP and employs 42% of the total labor force. The government hopes to attract new investment in the tourism, natural gas, and service sectors to diversify its economy and reduce its dependence on oil and agriculture. The government has begun to institute economic reforms aimed at liberalizing most markets, but reform thus far has been slow and ad hoc. For ideological reasons, privatization of government enterprises is explicitly rejected. Therefore major sectors of the economy including refining, ports operation, air transportation, power generation, and water distribution, remain firmly controlled by the government.

The Bashar al-Asad government started its reform efforts by changing the regulatory environment in the financial sector. In 2001, Syria legalized private banking and the sector, while still nascent, has been growing quickly in the last four years. Controls on foreign exchange continue to be one of the biggest impediments to the growth of the banking sector, although Syria has taken gradual steps to loosen those controls. In 2003, the government canceled a law that criminalized private sector use of foreign currencies, and in 2005 it issued legislation that allows licensed private banks to sell specific amounts of foreign currency to Syrian citizens under certain circumstances and to the private sector to finance imports. Syria's exchange rate is fixed, and the government maintains two official rates—one rate on which the budget and the value of imports, customs, and other official transactions are based, and a second set by the Central Bank on a daily basis that covers all other financial transactions. There is, however, still an active black market for foreign currency.

Given the policies adopted from the 1960s through the late 1980s, which included nationalization of companies and private assets, Syria failed to join an increasingly interconnected global economy. Syria withdrew from the General Agreement on Tariffs and Trade (GATT) in 1951 because of Israel's accession. It is not a member of the World Trade Organization (WTO), although it submitted a request to begin the accession process in 2001. Syria is developing regional free trade agreements. As of January 1, 2005, the Greater Arab Free Trade Agreement (GAFTA) came into effect and customs duties were eliminated between Syria and all other members of GAFTA. In addition, Syria has signed a free trade agreement with Turkey, which came into force in January 2007, and initialed an Association Agreement with the EU, which has yet to be signed. Although Syria claims a recent boom in non-oil exports, its trade numbers are notoriously inaccurate and out-of-date. Syria's main exports include crude oil, refined products, raw cotton, clothing, fruits, and grains. The bulk of Syrian imports are raw materials essential for industry, vehicles, agricultural equipment, and heavy machinery. Earnings from oil exports as well as remittances from Syrian workers are the government's most important sources of foreign exchange.

Syria has produced heavy-grade oil from fields located in the northeast since the late 1960s. In the early 1980s, light-grade, low-sulphur oil was discovered near Dayr al-Zur in eastern Syria. Syria's rate of oil production has been decreasing steadily, from a peak close to 600,000 barrels per day (bpd) in 1995 down to approximately 425,000 bpd in 2005. Experts generally agree that Syria will become a net importer of petroleum not later than 2012. Syria exported roughly 200,000 bpd in 2005, and oil still accounts for a majority of the country's export income. Syria also produces 22 million cubic meters of gas per day, with estimated reserves around 8.5 trillion cubic feet. While the government has begun to work with international energy companies in the hopes of eventually becoming a gas exporter, all gas currently produced is consumed domestically. Some basic commodities, such as diesel, continue to be heavily subsidized, and social services are provided for nominal charges. The subsidies are becoming harder to sustain as the gap between consumption and production continues to increase. Syria has a population of approximately 19 million people, and Syrian Government figures place the population growth rate at 2.45%, with 75% of the population under the age of 35 and more than 40% under the age of 15. Approximately 200,000 people enter the labor market every year. According to Syrian Government statistics, the unemployment rate is 7.5%, however, more accurate independent sources place it closer to 20%. Government and public sector employees constitute over one quarter of the total labor force and are paid very low salaries and wages. Government officials acknowledge that the economy is not growing at a pace sufficient to create enough new jobs annually to match population growth. The UNDP announced in 2005 that 30% of the Syrian population lives in poverty and 11.4% live below the subsistence level.

Syria has made progress in easing its heavy foreign debt burden through bilateral rescheduling deals with its key creditors in Europe, most importantly Russia, Germany, and France. Syria has also settled its debt with Iran and the World Bank. In December 2004, Syria and Poland reached an agreement by which Syria would pay $27 million out of the total $261.7 million debt. In January 2005, Russia forgave 80% of Syria's $13 billion

long-outstanding debt, and later that year Syria reached an agreement with Slovakia, and the Czech Republic to settle debt estimated at $1.6 billion. Again Syria was forgiven the bulk of its debt, in exchange for a one time payment of $150 million.

NATIONAL SECURITY

President Bashar Al-Asad is commander in chief of the Syrian armed forces, comprised of some 400,000 troops upon mobilization. The military is a conscripted force; males serve 24 months in the military upon reaching the age of 18. Some 17,000 Syrian soldiers formerly deployed in Lebanon have been withdrawn to Syria in response to UNSCR 1559, which was passed in the fall of 2004. Demands that Syria comply with 1559 intensified after the February 2005 assassination of former Lebanese Prime Minister Rafiq Hariri.

Syria's military remains one of the largest in the region, although the breakup of the Soviet Union—long the principal source of training, material, and credit for the Syrian forces—slowed Syria's ability to acquire modern military equipment. Syria received significant financial aid from Gulf Arab states in the 1990s as a result of its participation in the first Gulf War, with a sizable portion of these funds earmarked for military spending. Besides sustaining its conventional forces, Syria seeks to develop its weapons of mass destruction (WMD) capability.

FOREIGN RELATIONS

Ensuring national security, increasing influence among its Arab neighbors, and achieving a comprehensive Arab-Israeli peace settlement, which includes the return of the Golan Heights, are the primary goals of President Asad's foreign policy.

Relations with Other Arab Countries

Syria reestablished full diplomatic relations with Egypt in 1989. In the 1990-91 Gulf War, Syria joined other Arab states in the U.S.-led multinational coalition against Iraq. In 1998, Syria began a slow rapprochement with Iraq, driven primarily by economic needs. Syria continues to play an active pan-Arab role, although in the wake of the Hariri assassination, Syria became more isolated diplomatically, both in the region and beyond.

Though it voted in favor of UNSCR 1441 in 2002, Syria was against coalition military action in Iraq in 2003. However, the Syrian Government accepted UNSCR 1483 (after being absent for the actual vote), which lifted sanctions on Iraq and established a framework to assist the Iraqi people in determining their political future and rebuilding their economy. Syria also voted for UNSCR 1511, which called for greater international involvement in Iraq and addressed the transfer of sovereignty from the U.S.-led coalition. Since the transfer of sovereignty in Iraq on June 28, 2004, Syria extended qualified support to the Iraqi Government and pledged to cooperate in the areas of border security, repatriation of Iraqi assets, and eventual restoration of formal diplomatic relations. While Syria has taken some steps to tighten controls along the Syria-Iraq border, Syria remains one of the primary transit points for foreign fighters entering Iraq. Consequently, relations between Syria and the Iraqi Government remained strained. However, following a series of visits between high-level officials from both governments—including Foreign Minister Mu'allim's November 2006 visit to Baghdad and Iraqi President Talabani's subsequent visit to Damascus—formal diplomatic relations were finally established in December 2006. That same month, the Ministers of Interior from both countries signed a Memorandum of Security Understanding aimed at improving border security and combating terrorism and crime. Iraq continues to call for more action on the part of Syria to control its border and to prevent Iraqi and Arab elements residing in—or transiting—Syria from contributing financially, politically, or militarily to the insurgency in Iraq.

Involvement in Lebanon

Syria has played an important role in Lebanon by virtue of its history, size, power, and economy. Lebanon was part of post-Ottoman Syria until 1926. The presence of Syrian troops in Lebanon dated to 1976, when President Hafiz al-Asad intervened in the Lebanese civil war on behalf of Maronite Christians. Following the 1982 Israeli invasion of Lebanon, Syrian and Israeli forces clashed in eastern Lebanon. However, Syrian opposition blocked implementation of the May 17, 1983, Lebanese-Israeli accord on the withdrawal of Israeli forces from Lebanon.

In 1989, Syria endorsed the Charter of National Reconciliation, or "Taif Accord," a comprehensive plan for ending the Lebanese conflict negotiated under the auspices of Saudi Arabia, Algeria, and Morocco. In May 1991, Lebanon and Syria signed the treaty of brotherhood, cooperation, and coordination called for in the Taif Accord.

According to the U.S. interpretation of the Taif Accord, Syria and Lebanon were to have decided on the redeployment of Syrian forces from Beirut and other coastal areas of Lebanon by September 1992. Israeli occupation of Lebanon until May 2000, the breakdown of peace negotiations between Syria and Israel that same year, and intensifying Arab/Israeli tensions since the start of the second Palestinian uprising in September 2000 helped delay full implementation of the Taif Accords. The United Nations declared that Israel's withdrawal from southern Lebanon fulfilled the requirements of UN Security Council Resolution 425. However, Syria and Lebanon claimed that UNSCR 425 had not been fully implemented because Israel did not withdraw from an area of the Golan Heights called Sheba Farms, which had been occupied by Israel in 1967, and which Syria now claimed was part of Lebanon. The United Nations does not rec-

ognize this claim. However, Lebanese resistance groups such as Hezbollah use it to justify attacks against Israeli forces in that region. The danger of Hezbollah's tactics was highlighted when Hezbollah's attacks on and hostage-taking of Israeli soldiers on July 12, 2006 sparked a 34-day conflict in Lebanon. After the conflict, the passing of UNSCR 1701 authorized the enhancement of the UN Interim Force in Lebanon (UNIFIL). Before the conflict, UNIFIL authorized a presence of 2,000 troops in southern Lebanon; post-conflict, this ceiling is to be raised to 15,000. As of September 2006, 5,000 troops had deployed to southern Lebanon. UNIFIL is tasked with ensuring peace and security along the frontier and overseeing the eventual return of effective Lebanese government and military authority throughout the border region.

Until its withdrawal in April 2005, Syria maintained approximately 17,000 troops in Lebanon. A September 2004 vote by Lebanon's Chamber of Deputies to amend the constitution to extend Lebanese President Lahoud's term in office by three years amplified the question of Lebanese sovereignty and the continuing Syrian presence. The vote was clearly taken under Syrian pressure, exercised in part through Syria's military intelligence service, whose chief in Lebanon had acted as a virtual proconsul for many years. The UN Security Council expressed its concern over the situation by passing Resolution 1559, which called for the withdrawal of all remaining foreign forces from Lebanon, disbanding and disarmament of all Lebanese and non-Lebanese militias, the deployment of the Lebanese Armed Forces throughout the country, and a free and fair electoral process in the presidential election.

Former Prime Minister Rafiq Hariri and 19 others were assassinated in Beirut by a car bomb on February 14, 2005. The assassination spurred massive protests in Beirut and international pressure that led to the withdrawal of the remaining Syrian military troops from Lebanon on April 26, 2005. Rafiq Hariri's assassination was just one of a number of attacks that continue to target high-profile Lebanese critics of Syria. The UN International Independent Investigative Commission (UNIIIC) headed by Serge Brammertz is investigating Hariri's assassination and is expected to report its findings to the Security Council by June 2007.

The United States supports a sovereign, independent Lebanon, free of all foreign forces, and believes that the best interests of both Lebanon and Syria are served by a positive and constructive relationship based upon principles of mutual respect and nonintervention between two neighboring sovereign and independent states. The United States calls for Syrian non-interference in Lebanon, consistent with UNSCR 1559 and 1701.

Arab-Israeli Relations

Syria was an active belligerent in the 1967 Arab-Israeli War, which resulted in Israel's occupation of the Golan Heights and the city of Quneitra. Following the October 1973 Arab-Israeli War, which left Israel in occupation of additional Syrian territory, Syria accepted UN Security Council Resolution 338, which signaled an implicit acceptance of Resolution 242. Resolution 242, which became the basis for the peace process negotiations begun in Madrid in 1981, calls for a just and lasting Middle East peace to include withdrawal of Israeli armed forces from territories occupied in 1967; termination of the state of belligerency; and acknowledgment of the sovereignty, territorial integrity, and political independence of all regional states and of their right to live in peace within secure and recognized boundaries.

As a result of the mediation efforts of then U.S. Secretary of State Henry Kissinger, Syria and Israel concluded a disengagement agreement in May 1974, enabling Syria to recover territory lost in the October war and part of the Golan Heights occupied by Israel since 1967, including Quneitra. The two sides have effectively implemented the agreement, which is monitored by UN forces.

In December 1981, the Israeli Knesset voted to extend Israeli law to the part of the Golan Heights over which Israel retained control. The UN Security Council subsequently passed a resolution calling on Israel to rescind this measure. Syria participated in the Middle East Peace Conference in Madrid in October 1991. Negotiations were conducted intermittently through the 1990s, and came very close to succeeding. However, the parties were unable to come to an agreement over Syria's nonnegotiable demand that Israel withdraw to the positions it held on June 4, 1967. The peace process collapsed following the outbreak of the second Palestinian (Intifada) uprising in September 2000, though Syria continues to call for a comprehensive settlement based on UN Security Council Resolutions 242 and 338, and the land-for-peace formula adopted at the 1991 Madrid conference.

Tensions between Israel and Syria increased as the second Intifada dragged on, primarily as a result of Syria's unwillingness to stop giving sanctuary to Palestinian terrorist groups conducting operations against Israel. In October 2003, following a suicide bombing carried out by a member of Palestinian Islamic Jihad in Haifa that killed 20 Israeli citizens, Israeli Defense Forces attacked a suspected Palestinian terrorist training camp 15 kilometers north of Damascus. This was the first such Israeli attack deep inside Syrian territory since the 1973 war. During the summer of 2006 tensions again heightened due to Israeli fighter jets buzzing President Asad's summer castle in response to Syria's support for the Palestinian group Hamas, Syria's support of Hezbollah during the July-August 2006 conflict in Lebanon, and the possible rearming of Hezbollah in potential violation of UN Resolution 1701. Rumors of back-channel negotiations in 2006-2007 between the Israeli and Syrian Governments were discounted by both Israel and Syria, with spokespersons for both countries indicating that any such talks were not officially sanctioned.

Membership in International Organizations

Syria is a member of the Arab Bank for Economic Development in Africa, Arab Fund for Economic and Social Development, Arab League, Arab Monetary Fund, Council of Arab Economic Unity, Customs Cooperation Council, Economic and Social Commission for Western Asia, Food and Agricultural Organization, Group of 24, Group of 77, International Atomic Energy Agency, International Bank for Reconstruction and Development, International Civil Aviation Organization, International Chamber of Commerce, International Development Association, Islamic Development Bank, International Fund for Agricultural Development, International Finance Corporation, International Labor Organization, International Monetary Fund, International Maritime Organization, INTERPOL, International Olympic Committee, International Organization for Standardization, International Telecommunication Union, International Federation of Red Cross and Red Crescent Societies, Non-Aligned Movement, Organization of Arab Petroleum Exporting Countries, Organization of the Islamic Conference, United Nations, UN Conference on Trade and Development, UN Industrial Development Organization, UN Relief and Works Agency for Palestine Refugees in the Near East, Universal Postal Union, World Federation of Trade Unions, World Health Organization, World Meteorological Organization, and World Tourism Organization.

Syria's 2-year term as a nonpermanent member of the UN Security Council ended in December 2003.

U.S.-SYRIAN RELATIONS

U.S.-Syrian relations, severed in 1967, were resumed in June 1974, following the achievement of the Syrian-Israeli disengagement agreement. In 1990-91, Syria cooperated with the United States as a member of the multinational coalition of forces in the Gulf War. The U.S. and Syria also consulted closely on the Taif Accord, ending the civil war in Lebanon. In 1991, President Asad made a historic decision to accept then President Bush's invitation to attend a Middle East peace conference and to engage in subsequent bilateral negotiations with Israel. Syria's efforts to secure the release of Western hostages held in Lebanon and its lifting of restrictions on travel by Syrian Jews helped to further improve relations between Syria and the United States. There were several presidential summits; the last one occurred when then-President Clinton met the late President Hafiz al-Asad in Geneva in March 2000. In the aftermath of September 11th the Syrian Government began limited cooperation with U.S. in the war against terror.

Syria has been on the U.S. list of state sponsors of terrorism since the list's inception in 1979. Because of its continuing support and safe haven for terrorist organizations, Syria is subject to legislatively mandated penalties, including export sanctions and ineligibility to receive most forms of U.S. aid or to purchase U.S. military equipment. In 1986, the U.S. withdrew its ambassador and imposed additional administrative sanctions on Syria in response to evidence of direct Syrian involvement in an attempt to blow up an Israeli airplane. A U.S. ambassador returned to Damascus in 1987, partially in response to positive Syrian actions against terrorism such as expelling the Abu Nidal Organization from Syria and helping free an American hostage earlier that year.

However, relations since the February 2005 assassination of former Lebanese Prime Minister Hariri have considerably deteriorated. Issues of U.S. concern include the Syrian Government's failure to prevent Syria from becoming a major transit point for foreign fighters entering Iraq, its refusal to deport from Syria former Saddam regime elements who are supporting the insurgency in Iraq, its ongoing interference in Lebanese affairs, its protection of the leadership of Palestinian rejectionist groups in Damascus, its deplorable human rights record, and its pursuit of weapons of mass destruction. In May 2004, the Bush administration, pursuant to the provisions of the Syrian Accountability and Lebanese Sovereignty Restoration Act, imposed sanctions on Syria which banned nearly all exports to Syria except food and medicine. In February 2005, in the wake of the Hariri assassination, the U.S. recalled its Ambassador to Washington.

On September 12, 2006 the U.S. Embassy was attacked by four armed assailants with guns, grenades and a car bomb (which failed to detonate). Syrian Security Forces successfully countered the attack, killing all four attackers. Two other Syrians killed during the attack were a government security guard and a passerby. The Syrian Government publicly stated that terrorists had carried out the attack. The U.S. Government has not received an official Syrian Government assessment of the motives or organization behind the attack, but security was upgraded at U.S. facilities. Both the Syrian ambassador to the U.S., Imad Mushtapha, and President Bashar Asad, however, blamed U.S. foreign policy in the region as contributing to the incident.

TRAVEL

Consular Information Sheet

August 13, 2008

Country Description: Since March 1963, the Syrian Arab Republic has been ruled by an authoritarian regime dominated by the Socialist Ba'ath Party. While the ruling Ba'ath party espouses a largely secular ideology, Islamic traditions and beliefs provide a conservative foundation for the country's customs and practices. Syria has a developing, centrally-planned economy with large public (30%), agricultural (25%), and industrial (20%) sectors. Tourist facilities are available, but vary in quality depending on price and location.

Entry Requirements: A passport and a visa are required. Visas must be obtained prior to arrival in Syria from a Syrian diplomatic mission located in the traveler's country of residence, although the Syrian visa policy with respect to American diplomats and citizens is currently under review. Foreigners who wish to stay 15 days or more in Syria must register with Syrian immigration authorities by their 15th day. Syrian-American men or American men of Syrian origin, even those born in the United States, may be subject to compulsory military service unless they receive a temporary or permanent exemption from a Syrian diplomatic mission abroad prior to their entry into Syria. (Please see the section on Special Circumstances below.) Syria charges a departure tax for all visitors except those on diplomatic passports. As of July 1, 2008, the tax is 1,500 Syrian Pounds if departing from the airport; 500 Syrian Pounds if departing via one of the land borders.

The Syrian government rigidly enforces restrictions on prior travel to Israel, and does not allow persons with passports bearing Israeli visa or entry/exit stamps to enter the country. Syrian immigration authorities will not admit travelers with Israeli stamps in their passports, Jordanian entry cachets or cachets from other countries that suggest prior travel to Israel. Likewise, the absence of entry stamps from a country adjacent to Israel, which the traveler has just visited, will cause Syrian immigration officials to refuse admittance. Entry into Syria via the land border with Israel is not possible. American-citizen travelers suspected of having traveled to Israel have been detained for questioning.

Syrian security officials are also sensitive about travel to Iraq. There have been instances in which Americans, especially those of Arab descent, believed to have traveled to Iraq were detained for questioning at ports of entry/exit. Americans seeking to travel to Iraq through Syria have also on occasion been turned around and/or detained. On a number of occasions the border between Iraq and Syria has been closed without notice, stranding Americans on either side of the border.

Children under the age of eighteen whose fathers are Syrian or of Syrian descent must have their fathers' permission to leave Syria, even if the parents are separated or divorced and the mother has been granted full custody by a Syrian court. Women in Syria are often subject to strict family controls. On occasion, families of Syrian-American women visiting Syria have attempted to prevent them from leaving the country. This can be a particular problem for young single women of marriageable age. Although a woman does not need her husband's explicit consent every time she wishes to leave Syria, a Syrian husband may take legal action to prevent his wife from leaving the country, regardless of her nationality. Once such legal orders are in place, the U.S. Embassy cannot help American citizens leave Syria. Visit the Embassy of the Syrian Arab Republic, 2215 Wyoming Ave. NW, Washington, DC 20008, telephone (202) 232-6313 or check the Syrian Embassy's home page at http://www.syrianembassy.us for the most current visa information.

Safety and Security: Syria is included on the Department of State's List of State Sponsors of Terrorism. A number of the terrorist groups that have offices in Syria oppose U.S. policies in the Middle East. On September 12, 2006, the U.S. Embassy in Damascus was attacked by assailants using improvised explosives, gunfire, and two vehicles laden with explosives. On February 4, 2006, mobs protesting caricatures of the Prophet Mohammed destroyed the Norwegian and Chilean embassies and severely damaged the Danish and Swedish diplomatic missions. On April 27, 2004 there was a violent clash in which three people died in an area of Damascus where many foreign citizens reside. It has never been clear whether the shootout with Syrian security forces involved common criminals or terrorists. In 1998 and 2000, mobs attacked the U.S. Ambassador's Residence and the U.S. Embassy, respectively. In 1997, twenty-two people were killed when a public bus was bombed in downtown Damascus. All of these attacks serve as reminders that Syria is not immune from political or purely criminal violence. Americans traveling through the area should remain aware that U.S. interests and citizens might be targeted.

Security personnel may at times place foreign visitors under surveillance. Hotel rooms, telephones, and fax machines may be monitored, and personal possessions in hotel rooms may be searched. Taking photographs of anything that could be perceived as being of military or security interest may result in problems with authorities. Additionally, Americans should be aware that conversations on the topics of political, religious and other freedoms are not seen as merely healthy debate in Syria and could lead to arrest. Note that possession of specific-use electronic devices including GPS, short-wave or handheld radio equipment, or similar devices in Syria is illegal. For the lat-

est security information, Americans traveling abroad should regularly monitor the Department's Internet web site, where the current Worldwide Caution Travel Alert, Middle East and North Africa Travel Alert, Travel Warnings and other Travel Alerts and additional resources can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S. and Canada, or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: While a few cases of theft, burglary and assault have been reported to the Embassy, crime is generally not a serious problem for travelers in Syria. It is important to note, however, that Syria is not crime free. Specifically, incidents of credit card and ATM fraud, and physical harassment of women, are on the rise.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to the local police, please contact the U.S. Embassy for assistance. The Embassy staff can, for example, assist you to find appropriate medical care, to contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

The local equivalents for the "911" emergency line in Syria are: 110 for ambulance, 113 for fire and 112 for the police.

Medical Facilities and Health Information: Basic medical care and medicines are available in Syria's principal cities, but not necessarily in outlying areas. Serious illnesses and emergencies may require evacuation to a Western medical facility.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's web site at http://wwwn.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith/en.

Some HIV/AIDS entry restrictions exist for visitors to or foreign residents of Syria. There are no special immunizations required for entry to Syria. AIDS tests are mandatory for foreigners' ages 15 to 60 who wish to reside in Syria. The AIDS test must be conducted in Syria at a facility approved by the Syrian Ministry of Health. A residence permit will not be issued until the absence of the HIV virus has been determined. Foreigners wishing to marry Syrian nationals in Syria must also be tested for HIV. Syria usually will not give visas or residency permits to students wishing to study religion or Arabic in private religious institutions. Please verify this information with the Embassy of Syria at http://www.syrianembassy.us/ before you travel.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Syria is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

Driving in Syria is hazardous and requires great caution. Although drivers generally follow traffic signs and signals, they often maneuver aggressively and show little regard for vehicles traveling behind or to the sides of them. Lane markings are usually ignored. Vehicles within Syrian traffic circles must give way to entering traffic, unlike in the United States. At night, it is very hard to see pedestrians, who often walk into traffic with little warning. Outside major cities it is common to find pedestrians, animals and vehicles without lights on the roads at night. Pedestrians must also exercise caution. Parked cars, deteriorating pavement, and guard posts obstruct sidewalks, often forcing pedestrians to walk in the street. Vehicles often do not stop for pedestrians, and regularly run red lights or "jump" the green light well before it changes.

For specific information concerning Syrian driving permits, vehicle inspection, road tax and mandatory insurance, contact the Syrian Embassy in Washington, D.C. at 2215 Wyoming Avenue NW, Washington, DC 20008, tel. 202-232-6313.

Aviation Safety Oversight: Sanctions resulting from the passage of the Syria Accountability Act prohibit aircraft of any air carrier owned or controlled by the Syrian government to take off from or land in the United States. As there is no direct commercial air service to the United States by air carriers registered in Syria, the U.S. Federal Aviation Administration (FAA) has not assessed Syria's Civil Aviation Authority for compliance with International Civil Aviation Organization (ICAO) aviation safety standards. For more information, travelers may visit the FAA's web site at http://www.faa.gov. The U.S. Embassy in Damascus has advised its employees to avoid travel on Syrian Arab Airlines (Syrian Air or SAA) whenever possible due to concerns regarding the airline's ability to maintain its airplanes. SAA has, on its own initiative, grounded individual aircraft with significant maintenance or service issues; however, concerns persist that some planes still being flown may lack certain safety equipment or may have undergone repairs that have not been reviewed by the manufacturer.

Special Circumstances: Syrian customs authorities may enforce strict regulations concerning temporary importation into or export from Syria of items such as weapons, narcotics, alcohol, tobacco, cheese, fruits, pharmaceuticals, modems, cosmetics, and some electrical appliances. It is advisable to contact the Embassy of Syria in Washington, D.C. for specific information regarding customs requirements. Please see our Customs Information.

U.S. citizens are encouraged to carry a copy of their U.S. passports with them at all times so that, if questioned by local officials, they will have proof of identity and U.S. citizenship readily available. Although Syria is a signatory to the Vienna Convention on Consular Relations, Syrian officials generally do not notify the American Embassy when American citizens are arrested. When the American Embassy learns of arrests of Americans and requests consular access, individual police officials have, on their own initiative, responded promptly and allowed consular officers to visit the prisoners. However, security officials have also in the past denied Embassy requests for consular access, especially in the case of dual citizens.

Foreign currencies can be exchanged for Syrian pounds only at government-approved exchange centers and licensed private banks. Syrian pounds cannot be changed back into foreign currency. Very few places in Syria accept credit cards. Foreigners visiting Syria are required to pay hotel bills in US dollars or Euros. Travelers' checks are not accepted for payment in Syria, and banks will not cash them unless the traveler has an account at the bank in question. There are no US-based banks operating in Syria. There are six private banks operating in Syria, with branches and ATMs in most major cities. These ATMs usually honor major debit/credit systems. Funds may be transferred into Syria through Western Union. Wiring of funds through private banks is possible only if the traveler already holds an account with the bank in Syria;, transferring funds through the Commercial Bank of Syria is not possible due to U.S. sanctions. Syrian-American and Palestinian-American men who have never served in the Syrian military and who are planning to visit Syria are strongly urged to check with the Syrian Embassy in Washington, D.C. prior to traveling concerning compulsory military service. American men over the age of 18, even those who have never resided in or visited Syria, whose fathers are of Syrian descent, are required to complete military service or pay to be exempted. Possession of a U.S. passport does not absolve the bearer of this obligation.

The fee for exemption from military service ranges from $5,000 to $15,000 USD, depending upon circumstances, for Syrian-American and Palestinian-American men who live abroad. In January 2005 the Syrian government reduced mandatory military service from 30 months to 24 months. It also announced that Syrians born outside of Syria and residing abroad until the age of 18 have the option of being exempted from their service by paying $2,000 USD. Those born in Syria who left the country before reaching the age of 11, and have resided abroad for more than 15 years can be exempted by paying $5,000 USD. Contact the Syrian Embassy in Washington, DC, for more information (See Entry/Exit Requirements section above).

President Bush signed an executive order on May 11, 2004, implementing sanctions in accordance with the Syria Accountability Act. These sanctions prohibit the export to Syria of products of the United States other than food or medicine, and prohibit any commercial aircraft owned or controlled by the Syrian government from taking off from or landing in the United States. Under the authority provided in Section 5(b) of the Act, the President has determined that it is in the national security interest of the United States to waive the application of these sanctions in certain cases and for certain products, as specified in the Department of Commerce's General Order No. 2. For additional information about implementation of the Syria Accountability Act, consult the Department of Commerce web site at (http://www.bis.doc.gov).

Since 1979, the United States has designated Syria a State Sponsor of Terrorism due to its support for groups such as Hizbollah and Palestinian terrorist groups. The Terrorism List Government Sanctions Regulations prohibit U.S. persons from receiving unlicensed donations from the Syrian government. Additionally, U.S. persons are prohibited from engaging in financial transactions which a U.S. person knows or has reasonable cause to believe pose a risk of furthering terrorists' acts in the United States. For additional information about the Terrorism List Government Sanctions Regulations, consult the terrorism brochure on the U.S. Department of the Treasury, Office of Foreign Assets Control (OFAC) home page on the Internet at http://www.treas.gov/offices/enforcement/ofac/ or via OFAC's info-by-fax service at (202) 622-0077.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating Syrian laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Syria are strict and convicted offenders can expect prison sentences and heavy fines. Penalties for possession of even small amounts of illegal drugs for personal use are severe in Syria. Persons convicted in Syria for growing, processing, or smuggling drugs face the death penalty, which may be reduced to a minimum of 20 years' imprisonment. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children

and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in Syria are encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration web site, and to obtain updated information on travel and security within Syria. Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency. The U.S. Embassy is located at 2 Al-Mansour St., Abu Roumaneh, Damascus.

The international mailing address is PO Box 29, Damascus. Mail may also be sent via the U.S. Postal Service to: American Embassy Damascus, Department of State, Washington, DC 20521-6110. Telephone numbers are (963) (11) 3391-4444, fax number is (963)(11) 3391-3999, e-mail: acsdamascus@state.gov. The government workweek in Syria is Sunday through Thursday; the private sector generally works Saturday through Thursday. The U.S. Embassy is open Sunday through Thursday. Additional information may be found on the Embassy web site at http://damascus.usembassy.gov.

Intercountry Adoption

December 2007

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is based on public sources and current understanding. Questions involving foreign and U.S. immigration laws and legal interpretation should be addressed respectively to qualified foreign or U.S. legal counsel.

Please Note: Islamic Shari'a law does not allow for full adoptions as generally understood in the United States. However, immigrant visas may be issued in cases IF the Islamic court grants custody of an orphan to a guardian and where that court understands that custody of the orphan to be transferred through guardianship, and that the parents intend to obtain a full and final adoption of the child once that child is in the United States and expressly signals that agreement.

In Syria, only Catholic civil law recognizes full and final adoptions as a legal convention and defines the conditions, rights and duties thereof. Catholic orphanages in Syria may have children available for adoption by Catholic or Eastern Orthodox families and so prospective adopting parents WOULD NOT have to obtain special permission from Syrian courts allowing Catholic orphans to be adopted in the United States as has to be done with Islamic orphans.

Patterns of Immigration: Please review current reports online at http://adoption.state.gov.

Adoption Authority: Governmental orphanages are under the jurisdiction of the Ministry of Work and Social Affairs. The main office is "Zaid Bin Haretha" located at Masaken Barzeh, Damascus.

Eligibility Requirements for Adoptive Parents: Only one person of a married couple may adopt, or both spouses must adopt the child jointly. The prospective adoptive parent(s) must be at least 40 years old and the age difference between the prospective adoptive parent(s) and the child must be at least 18 years. In the case of a Catholic child, at least one of the prospective adoptive parents must be Catholic, unless the church authority makes an exception for a prospective adoptive parent that is from another Eastern Christian denomination, i.e. Greek Orthodox.

Residency Requirements: Adoptions of Catholic orphans do not require residency in Syria for prospective parents.

Time Frame: Due to the fact that the adoption of Catholic orphans has only been made possible since the establishment of the Catholic Civil code in July, 2006, average time frames have not yet been established.

Adoption Agencies and Attorneys: There are no adoption agencies in Syria. Churches and governmental orphanages care for abandoned children but may not always have the legal expertise to process an adoption. Attorneys who specialize in family law may assist in handling adoption cases. The U.S. Embassy in Damascus maintains a list of lawyers. This list is available by calling the Consular Section at 963-11-3391-4444.

Adoption Fees: There are no published, official governmental fees, but some offices may charge fees to process a case.

Adoption Procedures: Because the adoption of Catholic orphans is a religious procedure in Syria, it must be supervised by authorized church authorities and must also be approved by the relevant civil authorities.

A foundling child takes the religious affiliation of the orphanage that receives the baby. An adoption request for that child must be submitted to the presiding judge of the religious court of the community to which the child belongs. The religious court will investigate the case, which entails proof of the good moral reputation of the prospective adoptive parent(s) and financial support for the child. If the court does not find any grounds for objection to adoption, the court will issue a decree confirming the adoption. The court's final decision on the adoption must be affirmed by the bishop of the same relevant jurisdiction.

To be valid, the adoption decree must be granted exequatur, or endorsed, by the Civil Courts Enforcement

Bureau. The adoption decree must then be submitted to the Syrian Bureau of Vital Statistics so that the civil status of the adopted child can be amended in the registry book. The child will take the family name of the adoptive parents. Approval of the institution or organization where the child was found may be sometimes required.

The adoption decree must accompany the application for a Syrian identity card and the abstract for individual civil status record. After the identity card is issued, an application for a Syrian passport must be submitted at the Syrian Immigration & Passport Office in Damascus.

The consent of the prospective adoptive parent(s) as well as the sole surviving parent, or the guardian, if applicable, is required. In all cases, if the child is old enough, his/her consent is also required. There is no specific age of consent but practice indicates that age 10-12 or older is customary. If the child is too young to give consent, then the minor's guardian or the church authorities must consent. In the case where both parents of the minor have passed away, the consent of the head of the religious authority will be required. Moreover, the religious authority must consent to the adoption. Consent cannot be obtained by coercion or fraud.

Please see the *Intercountry Adoption* section of this book for more details and review current reports online at http://adoption.state.gov.

Requirements for Porpspective Parents: Prospective adoptive parents must meet the following conditions in order to adopt Catholic orphans:

- The adoption shall be for valid reasons and in the interest of the children.
- Good behavior of prospective adoptive parents.
- The adoptive parents must be at least 18 years older than the child.
- The adoptive parents must be Catholic or, with church approval, of an Eastern Orthodox church.
- Approval of the adoption by the two adoptive parents.
- The adoptive parents must be 40 years old at a minimum.
- Consent of the adoptive child, if the child is of an age capable of making a decision (usually from 10-12 years old and up).

Syrian Embassy in the United States
Embassy of Syria, Washington, D.C.
2215 Wyoming Ave., N.W.
Washington, D.C. 20008

Fax: (202) 265-4585
Email: info@syrembassy.net
Website:
http://www.syrianembassy.us

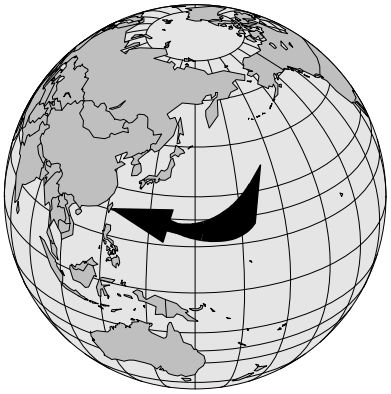
U.S. Immigration Requirements: Prospective adoptive parents are strongly encouraged to consult the USCIS publication M-249, *The Immigration of Adopted and Prospective Adoptive Children*, as well as the Department of State publication, *Intercountry Adoptions*. Please see the *Intercountry Adoption* section of this book for more details and review current reports online at http://adoption.state.gov.

Embassy of the United States of America, Damascus
2, Al-Mansour St., Abu Roumaneh
P.O. Box 29
Damascus, Syria
Tel: (963) 11-3391-4444
Fax (Consular Section):
(963) 11-331-9678
http://damascus.usembassy.gov/consular.html

Additional Information: Specific questions about adoption in Syria may be addressed to the U.S. Embassy in Damascus. General questions regarding intercountry adoption may be addressed to the Office of Children's Issues, U.S. Department of State, CA/OCS/CI, SA-29, 4th Floor, 2201 C Street, NW, Washington, D.C. 20520-4818, toll-free Tel: 1-888-407-4747.

Travel Warning
April 15, 2008

This Travel Warning alerts U.S. citizens to ongoing safety and security concerns in Syria. American citizens are urged to thoroughly consider the risks of travel to Syria and to take adequate precautions to ensure their safety. This supersedes the Travel Warning for Syria issued on September 18, 2007.



A number of terrorist groups that oppose U.S. policies have offices in Syria. Since 1979, the United States has designated Syria a State Sponsor of Terrorism due to its support for organizations such as Hizbollah, Hamas, and Palestinian Islamic Jihad. In addition, other extremist groups are present in Syria. These groups have the potential to be either the targets of or perpetrators of acts of violence. On February 12, 2008, an explosion occurred in the residential Kafer Soseh neighborhood of Damascus, killing Imad Moughniyeh, a senior Hizbollah operative. In 2006, the U.S. Embassy in Damascus was attacked by terrorists armed with guns, grenades, and a car bomb. The Syrian Government has allowed anti-U.S. demonstrations to occur; the latest was on March 3, 2008. Anti-U.S. demonstrations date back to September 2005, some of which have turned violent and led to damage to Western embassies, including the U.S. Embassy.

U.S. citizens who remain in or travel to Syria are encouraged to register at the consular section of the U.S. Embassy in Damascus, and to obtain updated information on travel and security in Syria. Americans in Syria should exercise caution and take prudent measures to maintain their security. These measures include being aware of their surroundings, avoiding crowds and demonstrations, keeping a low profile, varying times and routes for all travel, and ensuring travel documents are current.

U.S. consular personnel remain available to provide emergency information and services to American citizens. The U.S. Embassy in Damascus, Syria, is located at 2, Al-Mansour St.,

Abu Roumaneh. The Embassy telephone number is (963) (11) 3391-4444, fax (963) (11) 331-9678, e-mail: acsdamascus@state.gov. American citizens may register with the Embassy online by visiting https://travelregistration.state.gov/ibrs.

Additional information may be found on the Embassy website at http://usembassy.state.gov/damascus. Updated information on travel and security in Syria may be obtained from the Department of State by calling 1-888-407-4747 within the United States and Canada or, from overseas, 1-202-501-4444. Additional details can be found in the Department of State's Country Specific Information for Syria, and the Worldwide Caution, which are available on the Department's Internet website at http://travel.state.gov.

TAIWAN

Compiled from the September 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Taiwan

PROFILE

Geography

Area: 36,189 sq. km. (13,973 sq. mi.).

Cities: (2008) Capital—Taipei (pop. 2.6 million). Other cities—(Kaohsiung 1.5 million), Taichung (1.06 million).
Terrain: Two thirds of the island is largely mountainous with 100 peaks over 3,000 meters (9,843 ft.).
Climate: Maritime subtropical.

People

Population: (2008) 23 million.
Annual growth rate: (2008) 0.39%.
Languages: Mandarin Chinese (official), Taiwanese, Hakka.
Education: Years compulsory—9. Attendance (2007)—99.30%. Literacy (2007)—97.63%.
Health: Infant mortality rate: (2007)—0.47%. Life expectancy (2006)—77.90 yrs; male 74.86 yrs.; female 81.41 yrs.
Work force: (2008)10.8 million.

Government

Type: Multi-party democracy. There are two major parties, the Kuomintang (KMT) and the Democratic Progressive Party (DPP). The KMT holds a majority of 81 followed by the DPP with 27 seats in the 113-seat Legislative Yuan (LY), with the remaining seats held by independents and small parties.
Constitution: December 25, 1946; last amended 2005.
Government branches: (Yuan) Executive, Legislative, Judicial, Control, Examination.
Political parties: Kuomintang (KMT or Nationalist Party); Democratic Progressive Party (DPP); several small parties.
Suffrage: Universal over 20 years of age.
Budget: (FY 2008) $51.5 billion.
Defense: proposed (2008) 20.1% of entire budget.

Economy

GDP: (2007) $383 billion.
Real annual growth rate: (2007 estimated) 5.7%.
Per capita GDP: (2007) $16,790.
Unemployment: (June 2008) 3.95%.
Natural resources: Small deposits of coal, natural gas, limestone, marble, and asbestos.
Agriculture: (1.4% of GDP) Major products—pork, rice, fruit and vegetables, sugarcane, poultry, shrimp, eel.
Services: (71.1% of GDP).
Industry: (27.5% of GDP) Types—electronics and computer products, chemicals and petrochemicals, basic metals, machinery, textiles, transport equipment, plastics, machinery.
Trade: (2007) Exports—Exports—$247 billion: electronics, optical and precision instruments, information and communications products, textile products, basic metals, plastic and rubber products. Major markets—U.S. $32 billion, P.R.C. and Hong Kong $100 billion, Japan $16 billion. Imports—$219 billion: electronics, optical and precision instruments, information and communications products, machinery and electrical products, chemicals, basic metals, transport equipment, crude oil. Major suppliers—Japan $46 billion, P.R.C. $30 billion, U.S. $27 billion.

PEOPLE

Taiwan has a population of 23 million. More than 18 million, the "native" Taiwanese, are descendants of Chinese who migrated from Fujian and Guangdong Provinces on the mainland, primarily in the 18th and 19th centuries. The "mainlanders," who arrived in Taiwan after 1945, came from all parts of mainland China. About 484,000 indigenous peoples inhabit the mountainous central and eastern parts of the island and are believed to be of Malayo-Polynesian origin. Of Taiwan's total population, approximately one million, or 4.4%, currently reside in mainland China.

Education

Since 1979, six years of elementary school and three years of junior high have been compulsory for all children. About 96% of junior high graduates continue their studies in either a senior high or vocational school. Taiwan has an extensive higher education system with 163 institutions of higher learning. In 2007, about 159,000 students attempted to enter higher education institutes; about 74% of the candidates were accepted by a college or university. Opportunities for graduate education are expanding in Taiwan, but many students travel abroad for advanced education. In FY 2007, over 15,000 U.S. student visas were issued to Taiwan passport holders.

Languages

A large majority of people in Taiwan speak Mandarin Chinese, which has been the medium of instruction in the schools for more than five decades. Native Taiwanese and many others also speak one of the Southern Fujianese dialects, Min-nan, also known as Taiwanese. Recently there has been a growing use of Taiwanese in the broadcast media. The Hakka, who are concentrated in several counties throughout Taiwan, have their own distinct dialect. As a result of the half-century of Japanese rule, many older people also can speak Japanese. The method of Chinese romanization most commonly used in Taiwan is the Wade-Giles system. In 2002, Taiwan authorities announced adoption of the pinyin system also used on the mainland to replace the Wade-Giles system, but its use is not consistent throughout society, often resulting in two or more romanizations for the same place or person.

Religions

According to Taiwan's Interior Ministry figures, there are about 11.2 million religious believers in Taiwan, with more than 75% identifying themselves as Buddhists or Taoists. At the same time, there is also a strong belief in traditional folk religion throughout the island. These are not mutually exclusive, and many people practice a combination of the three. Confucianism also is an honored school of thought and ethical code. Christian churches have been active on Taiwan for many years, and today, the population includes a small but significant percentage of Christians.

Culture

Taiwan's culture is a blend of its distinctive Chinese, Japanese, and Western influences. Fine arts, folk traditions, and popular culture embody traditional and modern, Asian, and Western motifs. One of Taiwan's greatest attractions is the Palace Museum, which houses over 650,000 pieces of Chinese bronze, jade, calligraphy, painting, and porcelain. This collection was moved from the mainland in 1949 when Chiang Kai-shek's Nationalist Party (KMT) fled to Taiwan. The collection is so extensive that only 1% is on display at any one time.

HISTORY

Taiwan's indigenous peoples, who originated in Austronesia and southern Asia, have lived on Taiwan for 12,000 to 15,000 years. Significant migration to Taiwan from the Chinese mainland began as early as A.D. 500. Dutch traders first claimed the island in 1624 as a base for Dutch commerce with Japan and the China coast. Two years later, the Spanish established a settlement on the northwest coast of Taiwan, which they occupied until 1642 when they were driven out by the Dutch. Dutch colonists administered the island and its predominantly aboriginal population until 1661. The first major influx of migrants from the Chinese mainland came during the Dutch period, sparked by the political and economic chaos on the China coast during the Manchu invasion and the end of the Ming Dynasty.

In 1664, a fleet led by the Ming loyalist Cheng Ch'eng-kung (Zheng Chenggong, known in the West as Koxinga) retreated from the mainland and occupied Taiwan. Cheng expelled the Dutch and established Taiwan as a base in his attempt to restore the Ming Dynasty. He died shortly thereafter, and in 1683, his successors submitted to Manchu (Qing Dynasty) control. From 1680, the Qing Dynasty ruled Taiwan as a prefecture and, in 1875, divided the island into two prefectures, north and south. In 1887 the island was made into a separate Chinese province.

During the 18th and 19th centuries, migration from Fujian and Guangdong provinces steadily increased, and Chinese supplanted aborigines as the dominant population group. In 1895, a weakened Imperial China ceded Taiwan to Japan in the Treaty of Shimonoseki following the first Sino-Japanese war.

During its 50 years (1895-1945) of rule, Japan expended considerable effort in developing Taiwan's economy. At the same time, Japanese rule led to the "Japanization" of the island, including compulsory Japanese education and forcing residents of Taiwan to adopt Japanese names.

At the end of World War II in 1945, Taiwan reverted to Chinese rule. During the immediate postwar period, the Nationalist Chinese (KMT) administration on Taiwan was repressive and corrupt, leading to local discontent. Anti-mainlander violence flared on February 28, 1947, prompted by an incident in which a cigarette seller was injured and a passerby was shot to death by Nationalist authorities. The island-wide rioting was brutally put down by Nationalist Chinese troops, who killed thousands of people. As a result of the February 28 Incident, the native Taiwanese felt a deep-seated bitterness toward the mainlanders. For 50 years the KMT authorities suppressed accounts of this episode in Taiwan history. In 1995 a monument was dedicated to the victims of the "2-28 Incident," and for the first time, Taiwan's leader, President Lee Teng-hui, publicly apologized for the Nationalists' brutality.

Starting before World War II and continuing afterwards, a civil war was fought on the mainland between Chiang Kai-shek's KMT government

and the Chinese Communist Party led by Mao Zedong. When the civil war ended in 1949, 2 million refugees, predominately from the Nationalist government, military, and business community, fled to Taiwan. In October 1949 the People's Republic of China (P.R.C.) was founded on the mainland by the victorious communists. Chiang Kai-shek established a "provisional" KMT capital in Taipei in December 1949. During the 1950s, the KMT authorities implemented a far-reaching and highly successful land reform program on Taiwan. They redistributed land among small farmers and compensated large landowners with commodities certificates and stock in state-owned industries. Although this left some large landowners impoverished, others turned their compensation into capital and started commercial and industrial enterprises. These entrepreneurs were to become Taiwan's first industrial capitalists. Together with refugee businessmen from the mainland, they managed Taiwan's transition from an agricultural to a commercial, industrial economy.

Taiwan has developed steadily into a major international trading power with $466 billion in two-way trade (2007). Taiwan's accession to the World Trade Organization in 2002 has expanded its trade opportunities and further strengthened its standing in the global economy. Tremendous prosperity on the island has been accompanied by economic and social stability. Chiang Kai-shek's successor, his son Chiang Ching-kuo, began to liberalize Taiwan's political system, a process that accelerated when President Lee Teng-hui took office in 1988. The direct election of Lee Teng-hui as president in 1996 was followed by opposition Democratic Progressive Party (DPP) candidate Chen Shui-bian's election victory in March 2000. Chen was re-elected in March 2004 in a tightly contested election. The KMT's Ma Ying-jeou won the March 2008 presidential election by a substantial majority and took office on May 20, 2008.

ADMINISTRATION

The authorities in Taipei exercise control over Taiwan, Kinmen, Matsu, the Penghus (Pescadores) and several other smaller islands. Taiwan is divided into counties, provincial municipalities, and two special municipalities, Taipei and Kaohsiung. At the end of 1998, the Constitution was amended to make all counties and cities directly administered by the Executive Yuan. From 1949 until 1991, the authorities on Taiwan claimed to be the sole legitimate government of all of China, including the mainland. In keeping with that claim, when the Nationalists retreated to Taiwan in 1949, they re-established the full array of central political bodies, which had existed on the mainland. While much of this structure remains in place, the authorities on Taiwan in 1991 aban-

doned their claim of governing mainland China, stating that they do not "dispute the fact that the P.R.C. controls mainland China." The first National Assembly, elected on the mainland in 1947 to carry out the duties of choosing the President and amending the constitution, was re-established on Taiwan when the KMT moved. Because it was impossible to hold subsequent elections to represent constituencies on the mainland, representatives elected in 1947-48 held these seats "indefinitely." In June l990, however, the Council of Grand Justices mandated the retirement, effective December 1991, of all remaining "indefinitely" elected members of the National Assembly and other bodies.

The second National Assembly, elected in 1991, was composed of 325 members. The majority were elected directly, while 100 were chosen from party slates in proportion to the popular vote. This National Assembly amended the Constitution in 1994, paving the way for the direct election of the President and Vice President the first of which was held in March 1996. In April 2000, the members of the National Assembly voted to permit their terms of office to expire without holding new elections. The National Assembly elected in May 2005 voted to abolish itself the following month, leaving Taiwan with a unicameral legislature. The President is both leader of Taiwan and Commander-in-Chief of its armed forces. The President has authority over four of the five administrative branches (Yuan) Executive, Control, Judicial, and Examination. The President appoints the President of the Executive Yuan, who also serves as the Premier. The Premier and the cabinet members are responsible for government policy and administration.

The main lawmaking body, the Legislative Yuan (LY), was originally elected in the late 1940s in parallel with the National Assembly. The first LY had 773 seats and was viewed as a "rubber stamp" institution. The second LY was not elected until 1992. The third LY, elected in 1995, had 157 members serving 3-year terms, while the fourth LY, elected in 1998, was enlarged to 225 members. The LY has greatly enhanced its standing in relation to the Executive Yuan and has established itself as a major player on the central level. With increasing strength, size, and complexity, the LY now mirrors Taiwan's recently liberalized political system. In the 1992 and 1995 elections, the main opposition party—the Democratic Progressive Party (DPP)—challenged the half-century of Kuomintang (KMT) dominance of the Legislature. In both elections, the DPP won a significant share of the LY seats, leaving only half of the LY seats in the hands of the KMT. In 2001, the DPP won a plurality of LY seats—88 to the KMT's 66, the People First Party's 45, the Taiwan Solidarity Union's 13, and 13 won by other parties and independents. In the December 2004 LY election, the Pan-Blue coalition won a slender majority of 114 of the 225 seats compared to the Pan-Green coalition's 101. The LY was halved in size from 225 to 113 seats by constitutional amendments in 2005. In the January 2008 LY election, the first to be held under this new structure, the KMT won an absolute majority of 81 seats to the DPP's 27 seats, with the remaining five seats going to independent and small party candidates.

In 1994, when the National Assembly voted to allow direct popular election of the President, the LY passed legislation allowing for the direct election of the Governor of Taiwan Province and the mayors of Taipei and Kaohsiung Special Municipalities. These elections were first held in December 1994. In a move to streamline administration, the position of elected Governor was abolished at the end of 1998, and most other elements of the Taiwan Provincial Government have been eliminated.

The Control Yuan (CY) monitors the efficiency of public service and investigates instances of corruption. The 29 Control Yuan members are appointed by the President and approved by the Legislative Yuan; they serve 6-year terms. In recent years, the Control Yuan has become more activist, and it has conducted several major investigations and impeachments. From January 2005 to August 2008 the Control Yuan was inactive because the Pan-Blue dominated LY has refused to approve the new slate of CY members proposed by President Chen. The new Control Yuan members appointed by President Ma took office on August 1, 2008.

The Judicial Yuan (JY) administers Taiwan's court system. It includes a 16-member Council of Grand Justices (COGJ) that interprets the constitution. Grand Justices are appointed by the President, with the consent of the National Assembly, to 9-year terms.

The Examination Yuan (EY) functions as a civil service commission and includes two ministries: the Ministry of Examination, which recruits officials through competitive examination, and the Ministry of Personnel, which manages the civil service. The President appoints the President of the Examination Yuan.

Governor, Central Bank of the Republic of China (Taiwan):
Representative to the US:

POLITICAL CONDITIONS

Until 1986, Taiwan's political system was controlled by one party, the Kuomintang (KMT), the chairman of which was also Taiwan's top leader. As the ruling party, the KMT was able to fill appointed positions with its members and maintain political control of the island.

Before the 1986 island-wide elections, many "nonpartisans" grouped together to create Taiwan's first new opposition political party, the Democratic Progressive Party (DPP). Despite an official ban on forming new political parties, Taiwan authorities did not prohibit the DPP from operating, and DPP and independent candidates captured more than 20% of the vote in the 1986 elections. In 1987, President Chiang Ching-kuo ended the nearly four decades of martial law under which dissent had been suppressed. Since then, Taiwan has taken dramatic steps to improve respect for human rights and create a democratic political system, including ending almost all restrictions on the press. Vice President Lee Teng-hui succeeded Chiang Ching-kuo as president upon Chiang's death in 1988, and in 1990 the National Assembly (NA) elected Lee to a six-year term as President, the final indirect presidential election conducted by the NA. Under President Lee, the Legislative Yuan (LY) passed the Civic Organizations Law in 1989, which allowed for the formation of new political parties, thereby legalizing the DPP. In 1992, the DPP won 51 seats in the 161-seat LY, increasing the DPP's influence on legislative decisions. Chen Shui-bian's victory in the Taipei mayoral election in December 1994 further enhanced the profile of the DPP, which won 45 of the 157 seats in the 1995 LY elections.

In 1996, the KMT's Lee Teng-hui was elected President and Lien Chan Vice President in the first direct presidential election by Taiwan's voters. In the November 1997 local elections, the DPP won 12 of the 23 county magistrate and city mayor contests to the KMT's 8, outpolling the KMT for the first time in a major election. In a three-way contest in March 2000, DPP candidate Chen Shui-bian became the first opposition party candidate to win the presidency. His victory resulted in the first-ever transition of the presidency from one political party to another, validating Taiwan's democratic political system. President Chen was re-elected by 50.1% of the popular vote to a second term in a very tight contest on March 20, 2004. The election was marred by a shooting incident the day before the election during which President Chen and his running mate Vice President Annette Lu were slightly wounded. While the opposition contested the results, it was the first time that the DPP had won an outright majority in an island-wide election. Taiwan's second democratic transition of ruling party followed the March 22, 2008, presidential election, which went decisively (58%) to KMT candidate Ma Ying-jeou. Together with the KMT legislative victory two months earlier, Taiwan now had a unified government under KMT control.

The March 2004 election also included two "defensive referenda." Historically, referenda have been closely tied to the question of Taiwan independence, and thus a highly sensitive issue in cross-Strait relations. Both referenda in 2004 failed to meet the required participation threshold of 50% of eligible voters, as did four more referenda held in conjunction with the 2008 legislative and presidential elections. The 2008 DPP referendum on joining the UN under the name Taiwan was especially controversial.

The final National Assembly passed a set of constitutional amendments in June 2005 that halved the number of LY seats from 225 to 113 and created single-member legislative election districts beginning with the January 2008 legislative election. The constitutional revisions also abolished the National Assembly and provided for the public to confirm or reject future constitutional amendments passed by the Legislative Yuan. President Chen's controversial efforts to promote a second round of constitutional revisions focused on changing the government structure were unsuccessful. The P.R.C. accused him of using the constitution issue to move Taiwan toward independence. While not entirely ruling out future constitutional changes, President Ma has stressed the need to implement rather than revise the constitution.

In the December 2004 legislative elections, the ruling DPP won a plurality with 89 of the 225 seats, gaining 2 seats more than it did in 2001, but the opposition KMT and its Pan-Blue allies continued to hold a narrow majority in the Legislative Yuan. The ruling DPP's inability to form a majority coalition led to gridlock in the LY until 2008. Following a landslide victory in December 2005 local elections, the KMT won the 2006 mayoral election in Taipei City, while

the DPP won in Kaohsiung City. In the January 2008 elections for the downsized 113-seat LY, the KMT won 81 seats and KMT allies won a further five seats, giving them a three-quarters majority over the DPP, which won just 27 seats.

Political Parties

In addition to the Kuomintang (KMT) (described above in 'History' and 'Political Conditions'), the other major political party is the DPP, whose membership is made up largely of native Taiwanese, and whose platform includes outspoken positions on some of the most sensitive issues in Taiwan politics. For example, the DPP maintains that Taiwan is an entity separate from mainland China, in contrast to the KMT position that Taiwan and the mainland, though currently divided, are both part of "one China." In sharp contrast to the tenets of both KMT and P.R.C. policy, a number of prominent DPP politicians openly advocate independence for Taiwan.

There are a number of small political parties, including the Taiwan Solidarity Union (TSU), the People First Party (PFP), and the New Party (NP). After the 2000 presidential election, former KMT President Lee Teng-hui broke with the KMT and in 2001 formed the pro-independence Taiwan Solidarity Union (TSU), which allied itself with the DPP, an alliance that largely fell apart over time. The TSU failed to elect any members to the LY in January 2008. The People First Party (PFP) was formed in the wake of the March 2000 presidential election by disgruntled KMT members who supported the presidential bid of former KMT Taiwan Provincial Governor James Soong, who did not receive the KMT nomination. The PFP and KMT subsequently formed the "Pan-Blue" Alliance to oppose the DPP government. The PFP, however, gradually shrank and it largely merged with the KMT in the runup to the January 2008 LY elections, although one PFP candidate did win election to the LY under the name PFP. The New Party, which also split from the KMT, holds several seats on the Taipei City Council, but has no legislators at this point. In addition, there are more than 100 other registered small political parties, such as the Hakka Party, the Green Party, and the Constitution Party. None of these small parties received more than 1% or 2% of votes in the January 2008 LY election.

Taiwan and the Mainland

Over the past several years, Taiwan has relaxed restrictions on unofficial contacts with the P.R.C., and cross-Strait interaction has mushroomed. In January 2001, Taiwan formally allowed the "three mini-links" (direct trade, travel, and postal links) from Kinmen (Quemoy) and Matsu Islands to Fujian Province and permitted direct cross-Strait trade in February 2002. Cross-Strait trade has grown rapidly over the past 10 years. China is Taiwan's largest trading partner, and Taiwan is China's fifth-largest. Estimates of Taiwan investment on the mainland, both officially approved by Taiwan authorities and investment made by Taiwan firms through third parties, start from $100 billion, making Taiwan and Hong Kong the two largest investors. This trade runs heavily in Taiwan's favor and continues to grow, providing another engine for the island's economy.

In February 2003, Taiwan and the P.R.C. agreed to allow Taiwan carriers to fly non-stop (although routed via Hong Kong or Macau airspace) to bring Taiwan residents on the mainland home for the Lunar New Year holiday. The two sides agreed to conduct Lunar New Year charter flights again in 2005, with flights operated by both Taiwan and P.R.C. carriers flying over, but not having to land in, Hong Kong or Macau. Over time these flights were expanded to cover three other major holidays. In June 2008, Taiwan and P.R.C. carriers began operating cross-Strait charter flights every weekend. These flights are open to mainland tourists, as well as Taiwan and foreign travelers. The Ma administration has stated its goal to eventually turn these charters into regular flights that operate daily and to add cargo flights as well.

The development of semiofficial cross-Strait relations has had ups and downs. In April 1993, the first round of high-level cross-Strait talks was held in Singapore between the heads of two private intermediary organizations—Taiwan's Straits Exchange Foundation (SEF) and the P.R.C.'s Association for Relations Across the Taiwan Strait (ARATS). These talks primarily addressed technical issues relating to cross-Strait interactions. Beijing suspended lower-level talks from 1995-97 following President Lee's U.S. visit. SEF Chairman Koo Chen-fu visited the mainland in October 1998 for the second round of high-level talks. In 1999 Beijing once again suspended the cross-Strait dialogue, suspending plans for a visit by ARATS Chairman Wang Daohan to Taiwan, because of statements by President Lee that relations between the P.R.C. and Taiwan should be conducted as "state-to-state" or at least as "special state-to-state relations." Since his May 20, 2000 inauguration, President Chen called for resuming the cross-Strait dialogue without any preconditions, but the P.R.C. insisted President Chen must first acknowledge what it claimed was the "1992 consensus" on one China reached by the two sides. The cross-Strait dialogue remained suspended for the entire eight years of President Chen's two terms. Nonetheless, economic and social ties continued to develop rapidly despite the "one China" obstacle and Taiwan's resentment over the P.R.C.'s March 2005 "Anti-Secession Law," and the two sides were able through intermediary organizations to reach agreements on holiday cross-Strait charter flights. The KMT began its own dialogue with Beijing in 2005. President Ma has moved quickly to resume the cross-Strait dialogue, expand charter flights, and take other steps to enhance cross-Strait relations. The United States has welcomed and encouraged the cross-Strait dialogue as a process which contributes to a reduction of tension and to an environment conducive to the eventual peaceful resolution of the outstanding differences between the two sides. The United States believes that differences between Taipei and Beijing should be

resolved peacefully in a manner acceptable to people on both sides of the Taiwan Strait.

ECONOMY

Through decades of hard work and sound economic management, Taiwan has transformed itself from an underdeveloped, agricultural island to an economic power that is a leading producer of high-technology goods. In the 1960s, foreign investment in Taiwan helped introduce modern, labor-intensive technology to the island, and Taiwan became a major exporter of labor-intensive products. In the 1980s, focus shifted toward increasingly sophisticated, capital-intensive and technology-intensive products for export and toward developing the service sector. At the same time, the appreciation of the New Taiwan dollar (NTD), rising labor costs, and increasing environmental consciousness in Taiwan caused many labor-intensive industries, such as shoe manufacturing, to move to China and Southeast Asia. Taiwan has transformed itself from a recipient of U.S. aid in the 1950s and early 1960s to an aid donor and major foreign investor, especially in Asia. Taiwan is now a creditor economy, holding the world's fifth-largest stock of foreign exchange reserves ($291 billion as of July 2008). Although Taiwan enjoyed sustained economic growth, full employment, and low inflation for many years, in 2001, Taiwan joined other regional economies in its first recession since 1949. Since 2002, Taiwan's economic growth has ranged from 3.5% to 6.2% per year. With the current global economic downturn, however, slower growth is expected for 2008. Inflation is also rising in line with global commodities, and in July 2008 inflation reached a 14-year high of 5.9%.

Foreign Trade

Foreign trade has been the engine of Taiwan's rapid growth during the past 50 years. Taiwan's economy remains export-oriented, so it depends on an open world trade regime and remains vulnerable to fluctuations in the world economy. The total value of trade increased more than five-fold in the 1960s, nearly ten-fold in the 1970s, doubled in the 1980s, and nearly doubled again in the 1990s. In the first half of this decade, exports grew 60%. Export composition changed from predominantly agricultural commodities to industrial goods (now 98%). The electronics sector is Taiwan's most important industrial export sector and is the largest recipient of U.S. investment. Taiwan became a member of the World Trade Organization (WTO) as a special customs territory in January 2002.

Taiwan firms are the world's largest suppliers of computer monitors and leaders in PC manufacturing, although now much of the final assembly of these products occurs overseas, typically in China. Textile and apparel production continues to move to lower-cost locations overseas, but is still a major industrial export sector and employs about 200,000 people. Imports are dominated by raw materials and capital goods, which account for more than 90% of the total. Taiwan imports coal, oil and gas to meet most of its energy needs. Reflecting the large Taiwan investment in China, it supplanted the United States as Taiwan's largest trade partner in 2003. In 2007, China (including Hong Kong) accounted for over 28% of Taiwan's total trade and almost 41% of Taiwan's exports. Japan was Taiwan's second-largest trading partner with 13% of total trade, including 21% of Taiwan's imports. The U.S. is now Taiwan's third-largest trade partner, taking 12.6% of Taiwan's exports and supplying 12% of its imports. Taiwan is the United States' ninth-largest trading partner; Taiwan's two-way trade with the United States amounted to $65 billion in 2007. Imports from the United States consist mostly of agricultural and industrial raw materials as well as machinery and equipment. Exports to the United States are mainly electronics and consumer goods. The United States, Hong Kong, China, and Japan account for 60.2% of Taiwan's exports, and the United States, Japan, and China provide almost 46.6% of Taiwan's imports. As Taiwan's per capita income level has risen, demand for imported, high-quality consumer goods has increased. The U.S. trade deficit with Taiwan in 2007 was $11.9 billion, down 21% from $15.2 billion in 2006. Even though Taiwan maintains formal diplomatic relations with about a score of its trading partners, Taiwan maintains trade offices in nearly 100 countries. Taiwan is a member of the Asian Development Bank, the WTO, and the Asia-Pacific Economic Cooperation (APEC) forum. Taiwan is also an observer at the Organization for Economic Cooperation and Development (OECD). These developments reflect Taiwan's economic importance and its desire to become further integrated into the global economy.

Agriculture

Although only about one-quarter of Taiwan's land area is arable, virtually all farmland is intensely cultivated, with some areas suitable for two and even three crops a year. Agriculture comprises only about 1.4% of Taiwan's GDP. Taiwan's main crops are rice, sugarcane, fruit, and vegetables. While largely self-sufficient in rice production, Taiwan imports large amounts of wheat, corn, and soybeans, mostly from the United States. Poultry and pork production are mainstays of the livestock sector and the major demand drivers for imported corn and soybeans. Rising standards of living have led to increased demand for a wide variety of high-quality food products, much of it imported. Overall, U.S. agricultural and food products account for more than 30% of Taiwan's agricultural import demand. U.S. food and agricultural exports total about $2.5 billion annually, making Taiwan the United States' sixth-largest agricultural export destination. Taiwan's agricultural exports include frozen fish, aquaculture and sea products, canned and frozen vegetables, and grain products. Taiwan's imports of agricultural products have increased since its WTO accession in 2002, and it is slowly liberalizing previously protected agricultural markets.

Economic Outlook

Taiwan faces many of the same economic issues as other developed economies. As labor-intensive industries have relocated to countries with low-cost labor, Taiwan's future development will rely on further transformation to a high technology and service-oriented economy and carving out its niche in the global supply chain. Taiwan's economy has become increasingly linked with China, and the current Ma administration is expected to further develop these links and liberalize cross-Strait economic relations. Taiwan official statistics indicate that Taiwan firms had invested about U.S. $65 billion in China through 2007, which is more than half of Taiwan's stock of direct foreign investment. Many unofficial estimates put the actual number well over U.S. $100 billion. More than one million Taiwan people are estimated to be residing in China, and more than 70,000 Taiwan companies have operations there. Taiwan firms are increasingly acting as management centers that take in orders, produce them in Taiwan, the mainland, or Southeast Asia and then ship the final products to the U.S. and other markets.

DEFENSE

In proportion to its population, Taiwan still maintains a large military establishment. Defense expenditures accounted for NTD 304.9 billion (approximately U.S. $9.5 billion), 2.43% of GDP in 2007; and the 2008 central budget proposal increased defense expenditures to NTD 334 billion (approximately U.S. $10.5 billion), 2.94% of GDP. The military's primary mission is the defense of Taiwan against the P.R.C., which is seen as the predominant threat and which has not renounced the use of force against Taiwan. Taiwan's armed forces were reduced as part of a reform initiative from 1997 to 2001, going from about 450,000 to 385,000, with further reductions since then bringing the total force level down to just under 275,000. Registered reservists reportedly totaled 3,870,000 in 1997. Conscription remains universal for qualified males between the ages of 18 and 30. In 2007 the length of conscription service was dropped from 16 to 12 months, with a view to moving toward an all-volunteer force over the next several years. For qualified applicants, alternative service is available in police and fire departments and public clinics, as well as through teaching in some rural schools. Applicants with advanced degrees may qualify for National Defense Service, consisting of reserve officer training followed by four years of work in a government or academic research institution.

Taiwan's armed forces are equipped with weapons obtained primarily from the United States. In recent years, however, Taiwan also has procured some weapons from other Western nations and has stressed military "self-reliance," which has resulted in the growth of indigenous military production in certain fields. In 2007 Taiwan's legislature approved funding for certain defensive weapons systems the U.S. agreed to sell Taiwan in 2001 and earlier. These included the Patriot Advanced Capability (PAC-2 upgrade) missile defense system, P-3C maritime patrol aircraft, and a preliminary study of diesel-electric submarines. These systems would give Taiwan key capabilities in missile defense and anti-submarine warfare to remedy vulnerabilities in countering the P.R.C.'s accelerated military modernization. Taiwan adheres to the principles of the nuclear Non-Proliferation Treaty and has stated that it does not intend to produce nuclear weapons.

FOREIGN RELATIONS

The People's Republic of China replaced Taiwan at the United Nations in 1971, and Taiwan's diplomatic position has continued to erode, as many countries changed their official recognition from Taipei to Beijing. As of September 2008, Taiwan had formal diplomatic ties with 23 countries. At the same time, Taiwan has cultivated informal ties with most countries to offset its diplomatic isolation and to expand its economic relations. Many nations have set up unofficial organizations to carry out commercial and other relations with Taiwan. Including its official overseas missions and its unofficial representative and/or trade offices, Taiwan is represented in 122 countries. During the administration of President Chen, Taiwan lobbied strongly for admission into the United Nations and other international organizations, such as the World Health Organization (WHO). The P.R.C. opposes Taiwan's membership in such organizations, most of which require statehood for membership, because it considers Taiwan to be a part of its territory, not a separate sovereign state. The administration of President Ma has called for a "diplomatic truce" with Beijing, under which Taiwan would retain its existing diplomatic allies but not seek to win over countries that recognize the P.R.C. The Ma administration also hopes to expand Taiwan's "international space," increasing its participation in international organizations, such as the WHO.

U.S.-TAIWAN RELATIONS

On January 1, 1979, the United States changed its diplomatic recognition from Taipei to Beijing. In the U.S.-P.R.C. Joint Communiqué that announced the change, the United States recognized the Government of the People's Republic of China as the sole legal government of China and acknowledged the Chinese position that there is but one China and Taiwan is part of China. The Joint Communiqué also stated that within this context the people of the United States will maintain cultural, commercial, and other unofficial relations with the people on Taiwan.

On April 10, 1979, President Carter signed into law the Taiwan Relations Act (TRA), which created domestic legal authority for the conduct of unofficial relations with Taiwan. U.S. commercial, cultural, and other interaction with the people on Taiwan is

facilitated through the American Institute in Taiwan (AIT), a private nonprofit corporation. The Institute has its headquarters in the Washington, DC area and has offices in Taipei and Kaohsiung. It is authorized to issue visas, accept passport applications, and provide assistance to U.S. citizens in Taiwan. A counterpart organization, the Taipei Economic and Cultural Representative Office in the United States (TECRO), has been established by the Taiwan authorities. It has its headquarters in Taipei, the representative branch office in Washington, DC, and 12 other Taipei Economic and Cultural Offices (TECO) in the continental U.S. and Guam. The Taiwan Relations Act (TRA) continues to provide the legal basis for the unofficial relationship between the U.S. and Taiwan, and enshrines the U.S. commitment to assisting Taiwan maintain its defensive capability.

Following de-recognition, the United States terminated its Mutual Defense Treaty with Taiwan. However, the United States has continued the sale of appropriate defensive military equipment to Taiwan in accordance with the Taiwan Relations Act, which provides for such sales and which declares that peace and stability in the area are in U.S. interests. Sales of defensive military equipment are also consistent with the 1982 U.S.-P.R.C. Joint Communiqué.

The United States position on Taiwan is reflected in the Three Communiqués and the Taiwan Relations Act (TRA). The U.S. insists on the peaceful resolution of cross-Strait differences and encourages dialogue to help advance such an outcome. The U.S. does not support Taiwan independence. President Bush stated on December 9, 2003 that the United States is opposed to any attempt by either side to unilaterally alter the status quo in the Taiwan Strait. While the United States welcomes recent exchanges that enhance channels of communication between leaders in Beijing and Taipei, the United States urges Beijing and Taipei to further advance cross-Strait cooperation and dialogue, including direct discussions between the authorities in Beijing and elected leaders in Taipei. U.S. commercial ties with Taiwan have been maintained and have expanded since 1979. Taiwan continues to enjoy Export-Import Bank financing, Overseas Private Investment Corporation guarantees, normal trade relations (NTR) status, and ready access to U.S. markets. In recent years, AIT commercial dealings with Taiwan have focused on expanding market access for American goods and services. AIT has been engaged in a series of trade discussions, which have focused on protection of intellectual property rights and market access for U.S. goods and services.

Maintaining diplomatic relations with the P.R.C. has been recognized to be in the long-term interest of the United States by seven consecutive administrations; however, maintaining strong, unofficial relations with Taiwan also a major U.S. goal, in line with our desire to further peace and stability in Asia. In keeping with our one China policy, the U.S. does not support Taiwan independence, but it does support Taiwan's membership in appropriate international organizations, such as the World Trade Organization, Asia-Pacific Economic Cooperation (APEC) forum, and the Asian Development Bank, where statehood is not a requirement for membership. In addition, the U.S. supports Taiwan's meaningful participation in appropriate international organizations where its membership is not possible.

TRAVEL

Consular Information Sheet

August 18, 2008

The Department of State provides information to assist travelers in better understanding foreign locations they may visit and the known risks that they should consider. Travelers traveling to Taiwan are encouraged to inform themselves about Taiwan prior to commencement of travel. It is the traveler's responsibility to obtain a U.S. passport from the Department of State and the appropriate visas from the Taiwan Economic and Cultural Representative's Office (TECRO) in Washington, D.C., or the nearest office of the Taipei Economic and Cultural Office (TECO). When making reservations, travelers should discuss cancellation policies with their travel agent, travel insurer or airline, as scheduled trips abroad may be nonrefundable. The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation; Medicare does not cover medical expenses abroad.

Country Description: Taiwan is a stable democracy with a strong and well-developed economy. Tourist facilities are widely available.

Entry Requirements: U.S. passport holders will be allowed to enter Taiwan without a visa for up to thirty days (no extensions or change of status allowed) if they have a passport valid for at least six months from the date of entry into Taiwan and a confirmed return or onward air ticket. Travelers must have already met any additional visa requirements for the next destination, if applicable.

Visitors with passports valid for less than six months from the date of entry into Taiwan must apply for a landing visa, which has a duration of stay of no more than 30 days, or until the passport's expiration date, whichever comes first. Extensions are not permitted. Travelers who apply outside of Taiwan at Taiwan Overseas Missions for a landing visa will be charged a processing fee of US $131. Travelers who apply for a landing visa upon arrival in Taiwan will be charged NT $4,900. This fee includes a NT $800 service charge and can be paid only in Taiwan currency.

U.S. travelers planning to visit longer than 30 days may apply for and receive a visitor visa at one of the Taiwan Overseas Missions. The processing fee is U.S. $131; an additional $65.50 will be charged for expedited processing. Travelers arriving in Taiwan with a valid passport and valid Taiwan visa may be admitted for up to 60 days for multiple entries even if their passports are valid for less than 6 months.

For specific information about application, entry requirements and fees, travelers should contact the Taipei Economic and Cultural Representative Office (TECRO), 4201 Wisconsin Avenue NW, Washington, DC 20016-2137, via either its main telephone number, (202) 895-1800, or its visa section telephone number, (202) 895-1814. TECRO's visa website is http://www.taiwanembassy.org. The main fax number at TECRO is (202) 363-0999, and the visa section fax number is (202) 895-0017. TECO (Taipei Economic and Cultural Office) also has offices in Atlanta, Boston, Chicago, Guam, Honolulu, Houston, Kansas City, Los Angeles, Miami, New York, San Francisco and Seattle.

Safety and Security: For the latest security information, Americans traveling abroad should regularly monitor the Department's Internet web site at http://travel.state.gov where the current Worldwide Caution Travel Alert, Travel Warnings and Travel Alerts can be found. Up to date information on security can also be obtained by calling 1-888-407-4747 toll free in the United States and Canada, or for callers outside the United States and Canada, a regular toll line at 1-202-501-4444. These numbers are available from 8:00 a.m. to 8:00 p.m. Eastern Standard Time, Monday through Friday (except U.S. federal holidays).

Public Demonstrations: Taiwan is a modern democracy with vibrant public participation. Political demonstrations are common, especially around election time. Since Taiwan democratized in the early 1990s, there have been very few cases of violence associated with political demonstrations. But even demonstrations intended to be peaceful can turn confrontational. American citizens are therefore urged to avoid the areas of demonstrations if possible, and to exercise caution if within the vicinity of any political demonstrations.

Crime: Although the overall violent crime rate in Taiwan is relatively low, travelers should avoid high crime areas, such as areas where massage parlors, illegal "barbershops," and illegal "nightclubs" run by criminals prevail. In contrast to their counterparts, legal barbershops prominently display the usual grooming services. Illegal nightclubs have no advertisement and are publicized by word of mouth only. Public transportation, including the buses and the subway, is generally safe in Taiwan, but women should exercise caution when traveling alone in taxis late at night. In several parts of Taiwan, incidents of purse snatching by thieves on motorcycles have been reported.

In many countries around the world, counterfeit and pirated goods are widely available. Transactions involving such products may be illegal under local law. In addition, bringing them back to the United States may result in forfeitures and/or fines. More information on this serious problem is available at www.cybercrime.gov.

The emergency telephone number for Taiwan services (ambulance, fire, police) is 119. Taiwan Police offers a 24-hour telephone line for foreigners in English: 0800-024-111.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the National Immigration

Agency and to American Institute in Taiwan (AIT)-Taipei or AIT-Kaohsiung. The National Immigration Agency has foreign affairs sections that are usually staffed by English-speaking officers. National Immigration Agency contact numbers for the major cities in Taiwan are as follows: Taipei (02) 2389-9983, Kaohsiung (07) 282-1400, Tainan (06) 293-7641, Taichung (04) 2254-9981, Taitung (089) 342-251, Pingtung (08) 721-6665.

If you are the victim of a crime while in Taiwan, in addition to reporting to the local police, contact AIT-Taipei (02) 2162-2000 or AIT-Kaohsiung (07) 238-7744 for assistance. AIT's consular staff can, for example, help you find appropriate medical care, contact family members or friends, and explain how funds can be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help explain the local criminal justice process and assist with finding an attorney if needed.

Medical Facilities and Health Information: Health facilities in Taiwan are adequate for routine and emergency medical treatment. Physicians are well trained and many have studied in the U.S. and speak English. State-of-the-art medical equipment is available at many clinics and hospitals. Hospitals' nursing services provide medication dispensing and wound care, but generally not the daily patient maintenance functions found in U.S. hospitals. Ambulances are available in Taiwan but are not like those in the U.S. There are no trained Emergency Medical System Technicians accompanying an ambulance, unless within 2 kilometers of National Taiwan University Hospital or Veterans General Hospital. For information on specific clinics and hospitals, please refer to the AIT web page at http://www.ait.org.tw/en/uscitizens/HealthCareInTW.asp

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747); fax 1-888-CDC-FAXX (1-888-232-3299), or via the CDC's Internet site at http://wwwn.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith/en.

English speakers experiencing a personal crisis in Taiwan can contact the Community Services Center in Taipei (www.community.com.tw) at (02) 2836-8134 or (02) 2838-4947 to arrange counseling or to contact a support group.

The U.S. Department of State is unaware of any HIV/AIDS entry restrictions for visitors to or foreign residents of Taiwan. However, persons staying over 90 days or applying for residency or work permits must be tested for HIV/AIDS.

Medical Insurance: Doctors and hospitals in Taiwan expect immediate cash payment for health services, although some private clinics may accept credit cards. The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While outside the United States, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Taiwan is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

Roads in Taiwan's major cities are generally congested, and the many scooters and motorcycles that weave in and out of traffic make driving conditions worse. Pedestrians should exercise caution when crossing streets because many drivers do not respect the pedestrian's right of way. Special caution should be taken when driving on mountain roads, which are typically narrow, winding, and poorly banked, and which may be impassable after heavy rains. The national authority responsible for road safety in Taiwan is the Traffic Safety Committee, MOTC. For general information on tourism in Taiwan information may be found at www.tbroc.gov.tw (Taiwan Tourism Bureau—Ministry of Transportation and Communication).

Aviation Safety Oversight: The U.S. Federal Aviation Administration (FAA) has assessed Taiwan's Civil Aeronautics Administration (CAA) as being in compliance with International Civil Aviation Organization (ICAO) aviation safety standards for oversight of Taiwan's air carrier operations. For more information, travelers may visit the FAA's Internet web site at http://www.faa.gov.

Screening Process: Because of the need for early detection and prevention of communicable diseases, all arriving passengers are scanned with an infrared thermal apparatus to test for elevated temperatures. Passengers with elevated temperatures are required to fill out the Communicable Disease Survey Form and will then be evaluated for additional testing and/or follow up with local health authorities.

Customs Regulations: Taiwan customs authorities may enforce strict regulations concerning temporary import or export of items such as: firearms, antiquities, medications, currency, ivory, etc. It is advisable to contact the Taipei Economic and Cultural Office (TECRO) in Washington or one of the TECO offices in the United States for specific information regarding customs requirements.

Disaster Preparedness: Taiwan is subject to strong earthquakes that can occur anywhere on the island. Taiwan is also hit by typhoons, usually from July to October. Travelers planning a trip to Taiwan can obtain general information about natural disaster preparedness on the Inter-

net from the U.S. Federal Emergency Management Agency (FEMA) at http://www.fema.gov. Additional information about currently active typhoons can be obtained on the University of Hawaii tropical storm page at http://www.solar.ifa.hawaii.edu/Tropical/tropical.html. The Central Weather Bureau of Taiwan also maintains a web site that provides information about typhoons and earthquakes. Its Internet address is http://www.cwb.gov.tw.

Dual Nationality and Compulsory Military Service: Taiwan law provides for compulsory military service. Men between the ages of 18 and 36 who were born in Taiwan or who have ever held a Taiwan passport should be aware that they may be subject to compulsory military service in Taiwan, even if they are also U.S. citizens, and even if they have entered Taiwan on U.S. passports. Potentially affected individuals are urged to consult with the nearest office of the Taipei Economic and Cultural Office (TECO) in the United States before visiting Taiwan to determine whether they are subject to the military service requirement.

English Language Programming: The International Community Radio Taipei (ICRT) www.icrt.com.tw provides all of Taiwan with English-language programming 24 hours a day. In the event of an emergency or an approaching typhoon, travelers in the Taipei and Kaohsiung areas should tune their radios to FM 100.7 for English-language updates. Travelers can find ICRT in Taichung at FM 100.1. Travelers can listen to ICRT's live broadcasting on the Internet at http://www.icrt.com.tw/en/D01.php. TV news in English is available on channel 53 at 6:00 a.m. and at 11:45 pm on Formosa Television, or at its web site http://englishnews.ftv.com.tw. The three main English-language daily newspapers published in Taiwan are Taipei Times, Taiwan News and China Post. In addition to the print versions, readers can read their content online at http://www.taipeitimes.com, http://www.etaiwannews.com and http://www.chinapost.com.tw.

Judicial Assistance: Judicial assistance is provided by authorities on Taiwan in response to letters rogatory from foreign courts in accordance with Taiwan's "Law Governing Extension of Assistance to Foreign Courts." For further information regarding judicial assistance in Taiwan please go to the following website: http://www.ait.org.tw/en/uscitizens/judicial.asp.

AUTHORITY—22 U.S.C. 3306(b) provides acts performed by officers of the American Institute in Taiwan under 22 U.S.C. 3306 are valid, as if performed by any other person authorized under the laws of the United States to perform such acts (consular officers). The American Institute in Taiwan (AIT) is a nonprofit corporation under the laws of the District of Colombia. 22 U.S.C. 3305, 3306(a)(3). The judicial assistance acts of AIT personnel parallel the acts performed by U.S. consular officers under 28 U.S.C. 1781 (a)(2). See Sec. 1-201(h) of Executive Order No. 12143, 44 Fed. Reg. 37191 (June 23, 1979). Pursuant to Section 10(a) of the Taiwan Relations Act (TRA), 22 U.S.C. 3309(a), the Taiwan Economic Cultural Representative's Office ("TECRO") is the instrumentality established by the people of Taiwan having the necessary authority under the laws of Taiwan to take actions on behalf of Taiwan in accordance with the Act.

Criminal Penalties: While outside the United States, a U.S. citizen is subject to local laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating Taiwan's laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Taiwan are severe and convicted offenders can expect long jail sentences and heavy fines. Engaging in illicit sexual conduct with children or using or disseminating child pornography in a foreign state is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: The American Institute in Taiwan (AIT) is authorized by law to perform American citizen services. Americans living or traveling in Taiwan are encouraged to register with AIT through the State Department's travel registration web site, and to obtain updated information on travel and security within Taiwan. Americans resident in Taiwan are encouraged also to become a member of AIT's group email notifications by sending an email to aittaipeiacs-subscribe@yahoogroups.com. Americans without Internet access may register directly with AIT Taipei or AIT Kaohsiung. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency.

The American Institute in Taiwan is a full passport services agency. Processing time for routine passports is about two weeks. The American Institute in Taiwan is located at No.7 Lane 134, Hsin Yi Road Section 3, Taipei, Taiwan, telephone: (886) 2-2162-2000; fax: (886) 2-2162-2239, web site: http://www.ait.org.tw. The American Institute in Taiwan branch office is located at No. 2 Chung Cheng 3rd Road, 5th Floor, Kaohsiung, Taiwan, telephone: (886) 7-238-7744; fax: (886) 7-238-5237. AIT's citizen services section can also be contacted by e-mail at aitamcit@mail.ait.org.tw. In case of emergencies after working hours, the duty officer at the American Institute in Taiwan at Taipei may be contacted at (886) 2-2162-2000.

Intercountry Adoption

November 2008

The information in this section has been edited from a report available through the U.S. Department of State Office of Children's Issues. For more information detailed, please read the *Intercountry Adoption* section of this book and review current reports

online at http://adoption.state.gov. Taiwan is not party to The Hague Convention on Protection of Children and Co-operation in Respect of Intercountry Adoption (Hague Adoption Convention).

The United States does not have formal diplomatic relations with Taiwan. All Consular and other representative functions are handled by the American Institute in Taiwan (AIT), a non-profit, private corporation authorized by the Taiwan Relations Act to conduct and carry out programs, transactions, and other relations between the United States and Taiwan.

Who Can Adopt? To bring an adopted child to United States from Taiwan, you must be found eligible to adopt by the United States Government. For detailed information on these requirements for adoption, please review the *Intercountry Adoption* section of this publication and visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

In addition to the United States requirements for adoptive parents, Taiwan also has the following requirements for adoptive parents.

Residency Requirements: There are currently no residency requirements that prospective adoptive parents must meet in order to adopt an orphan from Taiwan.

Age Requirements: Prospective adoptive parents must be at least twenty years older than the child to be adopted. Taiwanese regulations further stipulate that adopting parents must be adults not older than 55 years of age.

Marriage Requirements: A married person who adopts a child shall do so jointly with his/her spouse.

Income Requirements: Prospective adoptive parents must have a stable residence, legitimate work and sufficient financial means.

Who Can Be Adopted? A child must meet the definition of an orphan under United States law for you to bring him or her home back to the United States.

In addition to these requirements, Taiwan has specific requirements that a child must meet in order to be eligible for adoption. You cannot adopt a child in Taiwan unless he or she meets the requirements outlined below.

No child adopted may be:

- Directly related by blood to the prospective adoptive parents;
- Directly related by marriage, except in the adoption of the other spouse's child as a stepchild; or
- Indirectly related by blood, such as cousins (unless removed by a certain degree), the spouse of a sibling, or a sibling of your spouse. (Taiwan law is very detailed about what degree of indirect blood relation is excluded from adoption. If prospective adoptive parents are concerned about possible blood ties with the child they wish to adopt, they should contact AIT for clarification before proceeding with the adoption.)

Waiting Period: The average time to complete an intercountry adoption in Taiwan is approximately 10 months from initial contact with the adoption agency in the United States until the immigrant visa is issued.

Taiwan's Adoption Authority: Children's Bureau (Er Tong Ju), Ministry of Interior

The Process: The first step in adopting a child from Taiwan is usually to select a licensed agency in the United States that can help with your adoption. Adoption service providers must be licensed by the United States state in which they operate.

To bring an adopted child from Taiwan to the United States, you must apply to be found eligible to adopt (Form I-600A) by the USCIS. If you are eligible to adopt, and a child is available for intercountry adoption, the central adoption authority in Taiwan will provide you with a referral to a child.

Role of the Adoption Authority: Although the Children's Bureau is Taiwan's Adoption Authority, as soon as prospective adoptive parents arrive in Taiwan, they should contact AIT's Consular Section to register their presence in Taiwan.

Consular Section
Immigrant Visa Unit, 3rd Floor
American Institute in Taiwan
Number 7, Lane 134
Hsin Yi Rd, Section 3
Taipei 106, Taiwan
Tel: (886) 02-2162-2005
Fax: (886) 02-2162-2253
Email: visaiv@mail.ait.org.tw

Role of the Court: All applications for adoption are first submitted to the Taiwan District Court.

Role of Adoption Agencies: Most adoptions are processed through local orphanages identified by United States or other foreign-based adoption agencies.

Adoption Application: An application for adoption is first submitted to the Taiwan District Court. After one to two months, the adoptive parent(s) or a designated representative will receive a notice to appear. During this waiting period, a Taiwan social worker from the local bureau of social affairs or a designated agency will review the foreign (United States) home study. After the hearing, the court will rule on the adoption (usually within two months) and publish a final ruling three weeks later. The third step is to register the adoption at the Taiwan Registrar's office by submitting the original court ruling, final ruling, and the power of attorney certified at the Taiwan Foreign Affairs Police Station at the Taiwan Registrar's office. This usually takes only one hour.

Time Frame: The average time to complete an intercountry adoption in Taiwan is approximately 10 months from initial contact with the adoption agency in the United States until the immigrant visa is issued.

Adoption Fees: The following fees apply to adoptions in Taiwan:

- Court processing fee–US $5
- Taiwan passport application fee (regular fee)–US $30
- Expedited application–US $70
- Taiwan Household Registry (HHR) application fee–US $ 0.30 per copy
- Translation fees–VARIABLE
- Notary fees–US $25 per document

Documents Required: After a child has been identified, the prospective parents must submit the following documents:

- Power of attorney, in English and Chinese, appointing the Taiwan orphanage or social worker to represent them;
- United States home study and Chinese translation;
- Evidence of prospective adoptive parents' right to adopt in the United States (included in United States-certified home study);
- I-797 approval notice of I-600A from DHS;
- Copy of United States prospective adoptive parents' home state adoption laws and Chinese translation;
- Signed adoption agreement notarized by the TECO (Taipei Economic and Cultural office) having jurisdiction over the place of the parent(s)' residence (in English and Chinese); and
- Other documents (birth certificates, marriage certificates, etc.) may be requested by the orphanage, agency, or Taiwan authorities.

Chinese translations prepared in the United States must be certified by the TECRO/TECO office for that district and English versions must be notarized by a United States notary public.

For updates on document requirements and information on how to authenticate documents, visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

Bringing Your Child Home: Once your adoption is complete (or you have obtained legal custody of the child), there are a few more steps to take before you can head home. Specifically, you need to apply for several documents for your child before he or she can travel to the United States, such as a birth certificate, a passport or travel document for your child from the country in which he or she was born, and a U.S. Immigration Visa.

For detailed and updated information on how to obtain these documents, review the *Intercountry Adoption* section on this publication and visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

Child Citizenship Act: For adoptions finalized abroad: The Child Citizenship Act of 2000 allows your new child to acquire American citizenship automatically when he or she enters the United States as lawful permanent residents. For adoptions finalized in the United States: The Child Citizenship Act of 2000 allows your new child to acquire American citizenship automatically when the court in the United States issues the final adoption decree. To learn more, review the *Intercountry Adoption* section on this publication and visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

After Adoption: Taiwan requires five years of post-placement reports. In the first year, post placement reports are required at three, six and twelve months; after that one report per year is required. (This means seven reports over a five-year period.) The reports, which include photos of the child, must be completed by licensed social workers or agencies through home visits.

TAJIKISTAN

Compiled from the October 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Republic of Tajikistan

PROFILE

Geography

Area: 143,100 sq. km.

Cities: Capital—Dushanbe.

Terrain: Pamir and Alay mountains dominate landscape; western Ferghana valley in north, Kofarnihon and Vakhsh Valleys in southwest.

Climate: Mid-latitude continental, hot summers, mild winters; semiarid to polar in Pamir mountains.

People

Nationality: Tajikistani.

Population: (Oct. 2007 est.) 7,181,400.

Population growth rate: (2006 est.) 2.19%.

Ethnic groups: Tajik 74%, Uzbek 23%, Russian and others 3%.

Religions: (2003 est.) Sunni Muslim 95%, Shi'a Muslim 3%, other 2 %.

Languages: Tajik (sole official language as of 1994); Russian widely used in government and business; 77% of the country, however, is rural and they speak mostly Tajik.

Education: Literacy (according to Tajikistan official statistics, 2003)—88%. The Tajik education system is still struggling through a period of decline since independence.

Health: Life expectancy—61.68 years men; 67.59 years women. Infant mortality rate—110.76 deaths/1,000 live births (2005 est.).

Work force: (2003 est.) 3.301 million.

Government

Type: Republic.

Independence: September 9, 1991 (from Soviet Union).

Constitution: November 6, 1994.

Government branches: Executive—chief of state: President Emomali RAHMON since November 6, 1994; head of state and Supreme Assembly chairman since November 19, 1992; head of government (appointed by the president): Prime Minister Oqil OQILOV since January 20, 1999; Oqilov has reached mandatory retirement age, and will soon be replaced. Cabinet: Council of Ministers appointed by the president, approved by the Supreme Assembly. Elections: president elected by popular vote for a 7-year term; election last held November 6, 2006. Election results: Emomali RAHMON 79.3%, Olimjon BOBOYEV 6.2%, Amir QARAQULOV 5.3%, Ismoil TALBAKOV 5.1%, Abduhalim GHAFFOROV 2.8%. Legislative—bicameral Supreme Assembly or Majlisi Oli consists of the Assembly of Representatives or Majlisi Namoyanandagon (lower chamber; 63 seats; members are elected by popular vote to serve 5-year terms) and the National Assembly or Majlisi Milliy (upper chamber; 33 seats; members are indirectly elected by popular vote to serve 5-year terms, 25 selected by local deputies, 8 appointed by the president, plus former presidents of Tajikistan—currently there is one; all serve 5-year terms). Elections: last held February 27, 2005 for the Assembly of Representatives. Election results: percent of vote by party—People's Democratic Party of Tajikistan 74.9%, Communist Party 13.64%, Islamic Revival 8.94%, other 2.5%. Judicial—Supreme Court; judges are appointed by the president.

Political parties: People's Democratic Party of Tajikistan or PDPT [Emomali RAHMON]; Islamic Revival Party or IRPT [Muhiddin KABIRI]; Tajik Communist Party or CPT [Shodi SHABDOLOV]; Democratic Party or DPT [Masud Sobirov heads government-recognized faction; (Mahmadruzi IZKANDAROV, currently serving 23-year prison term, is chairman of original DPT; Rahmatullo VALIYEV is deputy)]; Social Democratic Party or SDPT [Rahmatullo ZOYIROV]; Socialist Party of Tajikistan or SPT [Abdukhalim GAFFOROV; (Murhuseyn NARZIEV heads the original SPT party that is currently unrecognized by the government)]; Agrarian Party or APT [Amir Birievich QARAQULOV]; Party of Economic Reform or PERT [Olimjon BOBOYEV].

Suffrage: 18 years of age, universal.

Defense: (2003 est.) Military manpower (availability)—1,273,700.

Economy

GDP nominal: (2008 projected) $4.3 billion.

GDP nominal per capita: (2007 est.) U.S. $561. Purchasing power parity is about $1,500.

GDP real growth rate: (2008 projected) 5%.

Inflation rate: (consumer prices, 2007 est.) 20%.

Natural resources: Hydropower, some petroleum, uranium, gold, mercury, brown coal, lead, zinc, antimony, tungsten.

Unemployment: (2008 projected) 2.3%. The official rate is estimated based on the number of registered unemployment benefit recipients; underemployment also is very high, approximately 40% of the workforce; 53% live below the poverty line (2008).

Agriculture: Products—cotton, grain, fruits, grapes, vegetables; cattle, sheep, goats.

Industry: Types—aluminum, zinc, lead, chemicals and fertilizers, cement, vegetable oil, textiles, metal-cutting machine tools, refrigerators and freezers.

Trade: Exports (Jan.-April 2008)—$470.1 million f.o.b.: aluminum, electricity, cotton, gold, fruits, vegetable oil, textiles. Partners include—Netherlands, Turkey, China. Imports (Jan.-April 2008)—$1.27 billion f.o.b.: electricity, petroleum products, aluminum oxide, machinery and equipment, foodstuffs. Partners include—Russia, Kazakhstan, Uzbekistan, Azerbaijan, China, Ukraine, Italy, Turkmenistan.

Total external debt: (April 2008) $1.222 billion; total bilateral external debt (2006)—$185.3 million, of which Uzbekistan $73.1 million, U.S. $16.3 million, Turkey $10.3 million, Kazakhstan $10.9 million, Russia $30 million; total multilateral debt (April 2008)—$650.5 million, of which World Bank $349.8 million, IMF $44.4 million, ADB $139.9 million.

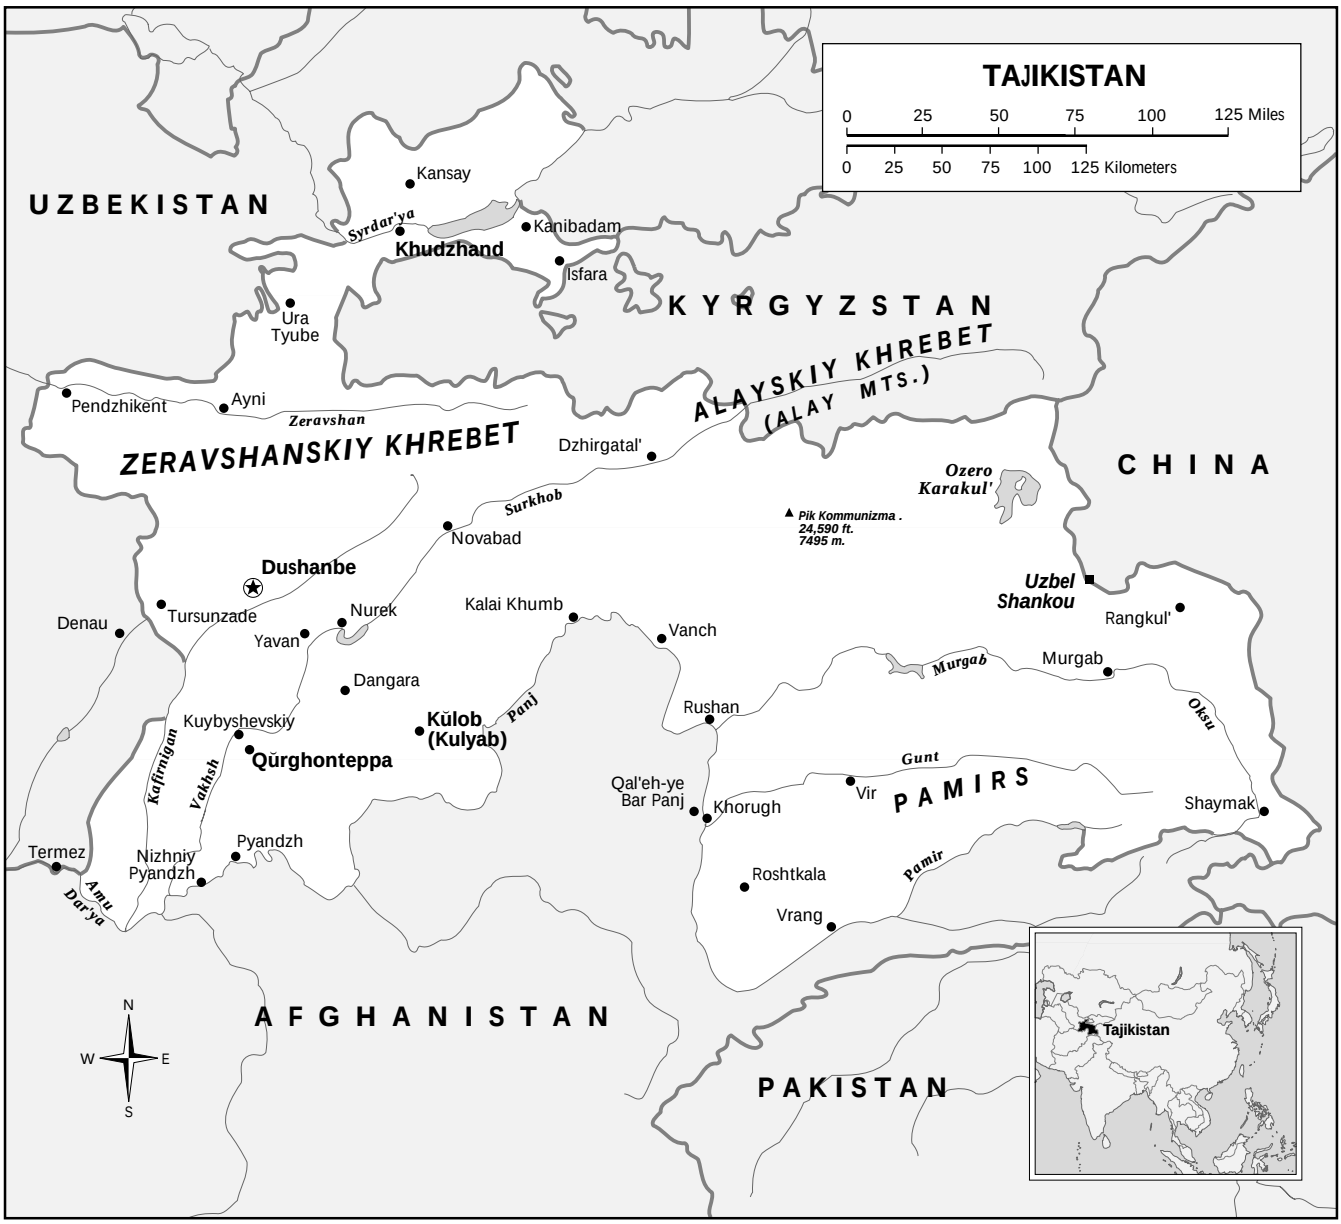
Debt/GDP ratio: (2007 est.) 30.5%.

GEOGRAPHY

At 36'40' northern latitude and 41'14' eastern longitude, Tajikistan is nestled between Kyrgyzstan and Uzbekistan to the north and west, China to the east, and Afghanistan to the south. Tajikistan is home to some of the highest mountains in the world, including the Pamir and Alay ranges. Ninety-three percent of Tajikistan is mountainous with altitudes ranging from 1,000 feet to 27,000 feet, with nearly 50% of Tajikistan's territory above 10,000 feet. Earthquakes are of varying degrees and are frequent. The massive mountain ranges are cut by hundreds of canyons and gorges; at the bottom of these run streams which flow into larger river valleys where the majority of the country's population lives and works. The principal rivers of Central Asia, the Amu Darya and the Syr Darya, both flow through Tajikistan, fed by melting snow from mountains of Tajikistan and Kyrgyzstan. Flooding and landslides sometimes occur during the annual spring thaw.

PEOPLE

Contemporary Tajiks are the descendants of ancient Eastern Iranian inhabitants of Central Asia, in particular the Soghdians and the Bactrians, and possibly other groups, with an admixture of western Iranian Persians and non-Iranian peoples, Mongols, and Turkic peoples. Until the 20th century, people in the region used two types of distinction to identify themselves: way of life—either nomadic or sedentary—and place of residence. By the late 19th century, the Tajik and Uzbek peoples had lived in proximity for centuries and often used—and continue to use—each other's languages. The division of Central Asia into five Soviet Republics in the 1920s imposed artificial divisions on a region in which many different peoples lived intermixed.



HISTORY

The current Tajik Republic hearkens back to the Samanid Empire (A.D. 875-999), which ruled what is now Tajikistan as well as territory to the south and west, as their role model and name for their currency. During their reign, the Samanids supported the revival of the written Persian language in the wake of the Arab Islamic conquest in the early 8th century and played an important role in preserving the culture of the pre-Islamic Persian-speaking world. They were the last Persian-speaking empire to rule Central Asia.

The expanding Russian Empire encompassed the territory that is now Tajikistan, along with most of the rest of Central Asia during the late 19th and early 20th centuries. Russian rule collapsed briefly after the Russian Revolution of 1917, as the Bolsheviks consolidated their power and were embroiled in a civil war in other regions of the former Russian Empire. As the Bolsheviks attempted to regain Central Asia in the 1920s, an indigenous Central Asian resistance movement based in the Ferghana Valley, the "Basmachi movement," resisted but was eliminated by 1925. Tajikistan became fully established under Soviet control with the creation of Tajikistan as an autonomous Soviet socialist republic within Uzbekistan in 1924, and as an independent Soviet socialist republic in 1929.

GOVERNMENT AND POLITICAL CONDITIONS

The Republic of Tajikistan gained its independence during the breakup of the Union of Soviet Socialist Republics (U.S.S.R.) on September 9, 1991 and soon fell into a civil war. From 1992 to 1997 internal fighting ensued between old-guard regionally based ruling elites and disenfranchised regions, democratic liberal reformists, and Islamists loosely organized in a United Tajik Opposition (UTO).

Other combatants and armed bands that flourished in this civil chaos simply reflected the breakdown of central authority rather than loyalty to a political faction. The height of hostilities occurred between 1992 and 1993. By 1997, the predominantly Kulyabi-led Tajik Government and the UTO had negotiated a power-sharing peace accord and implemented it by 2000.

The last Russian border guards protecting Tajikistan's 1,400 km border with Afghanistan completed their withdrawal in July 2005. Russia maintains its military presence in Tajikistan with the basing of the Russian 201st Motorized Rifle Division that never left Tajikistan when it became independent. Most of these Russian-led forces, however, are local Tajik noncommissioned officers and soldiers.

Tajikistan's most recent presidential election in 2006 and its 2005 parliamentary elections were considered to be flawed and unfair but peaceful. While the government and the now-incorporated former opposition continue to distrust each other, they have often found a way to work with each other and are committed to peacefully resolving their differences. In June 2003, Tajikistan held a flawed referendum to enact a package of constitutional changes, including a provision to allow President Rahmon the possibility of re-election to up to two additional 7-year terms after his term expired in 2006. The February 2005 parliamentary elections, in which the ruling party secured 49 of the 63 seats, failed to meet many key Organization for Security and Cooperation in Europe (OSCE) standards on democratic elections, but there were some improvements over previous elections.

After the November 6, 2006 presidential election in which President Rahmon secured a new 7-year term in office, the OSCE determined that democratic practices were not fully tested "due to the absence of genuine competition, which provided voters with only nominal choice." There were four other candidates on the ballot but no strong opposition candidate. The strongest opposition party, the IRPT, decided not to field a candidate and two other parties (the DPT and SDPT) boycotted the election.

Lack of transparency in the legislative process and significant concerns regarding due process demonstrate the weakness of civil society in the country. Corruption is pervasive, and numerous observers have noted that power has been consolidated into the hands of a relatively small number of individuals.

Afghanistan continues to represent the primary security concern in Tajikistan's immediate neighborhood, although much less so than in earlier years. With the ouster of the former Taliban government from Afghanistan, Tajikistan now has much friendlier relations with its neighbor to the south. The Taliban-allied Islamic Movement of Uzbekistan (IMU), a U.S. Government-declared terrorist organization formerly active in Afghanistan and Tajikistan, has also been greatly diminished as a threat to Tajikistan's domestic stability. Rampant illicit trafficking of Afghan opium and heroin through Tajikistan remains a serious long-term threat to Tajikistan's stability and development, fostering corruption, violent crime, HIV/AIDS, and economic distortions.

Tajikistan established an embassy in Washington, DC in temporary offices in February 2003, and formally opened its first permanent chancery building in March 2004. Tajikistan's embassy in the United States is at 1005 New Hampshire Ave NW, Washington, DC 20037 (tel.: 202-233-6090; fax: 202-223-6091).

ECONOMY

Tajikistan is the poorest Commonwealth of Independent States (CIS) country and one of the poorest countries in the world. Foreign revenue is precariously dependent upon exports of cotton and aluminum, and on foreign remittance flows from Tajik migrant workers abroad, mainly in Russia. The economy is highly vulnerable to external shocks. Tajikistan has great hydropower potential, and has focused on attracting investment for projects for internal use and electricity exports. Meanwhile, the country faces severe electricity shortages, particularly during the winter, when many citizens receive two to four hours of electricity each day.

Tajikistan has followed a relatively strict fiscal and monetary policy, which has resulted in macroeconomic stability. However, government interference in the economy and massive corruption stifle economic growth and private investment. The government has attracted state-led investment for major infrastructure projects rather than implementing the necessary economic reforms to attract private investors. Two-thirds of the workforce of Tajikistan is in agriculture, most of them pressured to grow cotton. Tajikistan struggles to implement agricultural reforms that would allow this two-thirds of the population to farm the crop of their choice. Income from narcotics trafficking, while difficult to quantify, has an increasingly visible impact on the Tajik economy.

FOREIGN RELATIONS

With the ouster of the former Taliban government from Afghanistan, Tajikistan now has much friendlier relations with its neighbor to the south. Though a pull-out of Russian border guards was completed in July 2005, Tajikistan continues to permit basing of the Russian 201st Motorized Rifle Division that never left Tajikistan when it became independent.

Tajikistan has a difficult relationship with Uzbekistan. Uzbekistan is concerned about Tajikistan's plan to develop hydropower, which Uzbekistan views as a threat to downstream irrigation.

Border disagreements arise sporadically between Tajikistan and Uzbekistan and the Kyrgyz Republic. For the most part these are harmless disagreements concerning people mov-

ing across mostly unmarked borders, but occasionally disputes develop into situations where gunfire is exchanged.

U.S.-TAJIK RELATIONS

The United States remains committed to assisting Tajikistan in its economic and political development, as Tajikistan continues to recover from its civil war legacy. U.S. assistance efforts are evolving away from humanitarian aid and political reconciliation, as those needs increasingly have been met. Instead, our efforts are targeted toward broader goals of democratic and economic reforms.

U.S.-Tajik relations have developed considerably since September 11, 2001. The two countries now have a broad-based relationship, cooperating in such areas as counter-narcotics, counter-terrorism, non-proliferation, and regional growth and stability. In light of the Russian border forces' withdrawal from the Tajik-Afghan border, the U.S. Government leads an international donor effort to enhance Tajikistan's territorial integrity, prevent the transit of narcotics and material or technology related to weapons of mass destruction (WMD), and support a stable, peaceful Tajikistan in order to prevent the spread of influence and activities of radical groups and terrorists.

We continue to assist Tajikistan on economic reforms and integration into the broader global marketplace, for example in pursuing World Trade Organization (WTO) accession. U.S. assistance also supports health and education, as well as democracy, media, and local governance. Tajikistan has been a strong supporter of U.S. efforts in the war on terrorism and in promoting peace and stability in Afghanistan.

A U.S. Government-funded $36 million bridge over the Pyanzh River connecting Sher Khan, Afghanistan with Nizhniy Pyanzh, Tajikistan opened for commercial traffic in October 2007 and about 200 trucks cross daily. Since the opening, trade volume has tripled. The bridge will continue to enhance economic and commercial opportunities on both sides of the river, allowing goods and people to move across more easily. On the Afghan side, the bridge road will connect to the Afghan Ring Road.

The United States recognized Tajikistan on December 25, 1991, the day the U.S.S.R. dissolved, and opened a temporary Embassy in a hotel in the capital, Dushanbe, in March 1992. After the bombings of U.S. Embassies in Africa in 1998, Embassy Dushanbe American personnel were temporarily relocated to Almaty, Kazakhstan, due to heightened Embassy security standards. American Embassy Dushanbe has since returned to full operations and in July 2006 moved into a purpose-built Embassy compound.

TRAVEL

Consular Information Sheet

December 9, 2008

Country Description: Tajikistan remains the poorest of the former Soviet republics in Central Asia. It is a nominally constitutional, democratic, and secular republic, dominated by President Emomali Rahmon who has been in power since 1992. Tourist facilities are undeveloped and many goods and services usually available in other countries are unavailable.

Entry Requirements: A valid passport and visa are required to enter and exit Tajikistan, as well as for registration at hotels. The visa should be valid for the entire period of stay in country, through departure, and travelers should ideally request visas which allow for changing travel dates. Failure to produce a valid visa will require the traveler to leave the country immediately. Travelers planning to arrive in Tajikistan from countries that have Tajik embassies or consulates must obtain Tajik visas abroad prior to their travel. Tajikistan is represented by embassies and consulates in the following countries: United States of America, United Kingdom, Austria, Germany, Belgium, Turkey, China, Afghanistan (Kabul, Mazori Sharif), Iran, Pakistan, India, Russian Federation, Belarus, Kazakhstan, Kyrgyzstan, Uzbekistan, Turkmenistan, Egypt, and United Arab Emirates (Dubai). Travelers arriving in Tajikistan from countries in which there are no Tajik embassies or consulates must have Tajik visa support, in the form of a letter from the Tajik Ministry of Foreign Affairs (MFA) confirming that a visa may be issued, in order to receive a Tajik visa at the Dushanbe International Airport upon arrival. Travelers need to have two passport-size photos and a passport valid for at least six months longer than the duration of the planned stay in Tajikistan. Visas issued at the Dushanbe airport are normally valid for only 45 days. This

"upon arrival" visa service does not apply to any other Tajik airports or land borders.

Travelers staying in Tajikistan three days or longer must, within three days of arrival in Tajikistan, obtain registration stamps at the MFA or the Department of Visas and Registration of the Ministry of Internal Affairs (OVIR), depending on whether the purpose of the visit to Tajikistan is for official or personal travel. Immigration authorities may deny the departure of travelers who failed to register their visas until after they have paid a fine and obtained the registration stamps at the MFA or OVIR.

In order to receive visa support, an organization inviting a traveler to Tajikistan must submit a request to the MFA at least two weeks in advance of the planned travel date to Tajikistan. Persons planning to arrive in Tajikistan at the invitation of a private Tajik resident (e.g., a friend or relative in Tajikistan) need to obtain a notification letter from OVIR. According to OVIR, it may take up to 45 days to obtain the notification letter. The MFA will issue Tajik visa support on the basis of the OVIR notification letter. The inviting party will send a copy of visa support to the traveler. The original MFA visa support will be sent to the Consular bureau at Dushanbe airport. According to the Ministry of Foreign Affairs, persons traveling at the invitation of Tajik organizations or travel agencies, who are applying for visas at Tajik embassies or consulates abroad, will be able to obtain single-entry Tajik visas valid for 45 days upon direct submission of their visa request to the Tajik embassy or consulate (without a visa support letter). With the issuance of visa support, travelers applying for visas at Tajik embassies or consulates abroad will be able to obtain multiple-entry visas valid for a maximum of three months. Travelers who would like their visas extended need to apply for extension in advance through the MFA (official travelers) or OVIR (tourist or commercial travelers). Entry into the Gorno-Badakhshan region, both from inside and outside of Tajikistan, requires special authorization in advance in addition to a valid Tajik visa. Travelers can obtain this authorization at Tajik embassies and consulates abroad, or by applying to the MFA or OVIR once in Tajikistan. Tajik authorities advise that sponsoring organizations in Tajikistan submit requests for travel authorization for the Gorno-Badakhshan Autonomous Region at least two weeks in advance of the planned travel. The Tajik MFA or OVIR will list the names of the settlements and cities in Gorno-Badakhshan which the traveler plans on visiting in the travel authorization stamp. The Gorno-Badakhshan travel authorization is not written on a Tajik visa sticker; it is a separate note put in a passport.

The government of Tajikistan requires visitors who remain in country for more than 90 days to present a medical certificate showing that they are HIV-free, or to submit to an HIV test in Tajikistan. HIV is a growing health threat in Tajikistan.

Visit the Embassy of Tajikistan web site at http://www.tjus.org for the most current visa information.

Note: Departure options from Tajikistan may be limited in an emergency. U.S. citizens, their family members, and their dependents can maximize departure options by obtaining extended visas for travel to countries with reliable connections to Tajikistan, including Kazakhstan, Kyrgyzstan, Uzbekistan and Russia. Other destinations, notably Turkey, offer several flights a week and do not require American citizens to obtain visas in advance. Please note, however, that in emergency situations, flights may be suspended.

Safety and Security: Supporters of terrorist groups such as the Islamic Movement of Uzbekistan (IMU), the Islamic Jihad Union (IJU), al-Qaida, and the Eastern Turkistan Islamic Movement remain active in Central Asia, as do anti-Western, anti-Semitic extremist organizations such as Hizb'ut-Tahrir. These groups have expressed anti-U.S. sentiments and may attempt to target U.S. Government or private interests in the region, including in Tajikistan. Terrorist attacks involving the use of suicide bombers have previously taken place in neighboring Uzbekistan. Taliban resurgence and successful operations in Afghanistan, including attacks in the north, could also affect the security situation in southern Tajikistan.

Minor explosions have occasionally occurred in Dushanbe in the last two years. These explosions usually happen at night. In June 2007, an individual threw a grenade at the Supreme Court building. Witnesses and unofficial reports indicate that three guards were killed, although no official reports confirmed this. In November 2007, a small explosive killed an individual outside the Kokhi Vahhdat conference center in the center of Dushanbe. In both cases, no individual or organization claimed responsibility and authorities continue to investigate. Also in November 2007, a small improvised explosive device destroyed the official car belonging to the Commander of the President's National Guard. Incursions along the Afghan border have resulted in shootings and kidnappings; however, most are believed to be related to narcotics trafficking. None of these incidents have indicated the targeting of Americans or Westerners.

Criminal groups and terrorists do not distinguish between official and civilian targets. Because of increased security at official U.S. facilities, terrorists are seeking softer civilian targets such as residential areas, clubs and restaurants, places of worship, hotels, outdoor recreation events, and other venues. The limited number of facilities catering to Westerners presents a heightened risk. American travelers should also avoid demonstrations and large crowds. Demonstrations and mobs are rare in Tajikistan following the 1992-1997 civil war, and police reaction to such behavior is unpredictable.

For the latest security information, Americans traveling abroad should regularly monitor the Bureau of Consular Affairs' web site where the current Travel Warnings and Travel

Alerts, including the Worldwide Caution Travel Alert and the Travel Alert for Central Asia, can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S. and Canada, or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: The current crime rating for Dushanbe is high. The primary concern is the inability of Tajikistan's law enforcement entities to provide adequate and immediate assistance. Lack of manpower, low salaries, and inadequate training all contribute to a lack of professionalism. Tajikistan's struggling economy and high unemployment have resulted in incidents of street crime, including pick pocketings, muggings and armed robberies. Alcohol-related incidents such as bar fights and drunk driving are common. Criminals are not deterred by the risk of confrontation and tend to operate in groups of two or more to decrease their chances of arrest. When crimes do occur, they can be violent in nature. Additionally, the lack of a free media, and the infrequent public outreach between the government and the public through the media, does not provide the average citizen current and accurate information to make informed decisions about safety.

Government statistics are typically inaccurate because many crimes are not reported to law enforcement organizations. Often police refuse to open minor or routine cases that seem too difficult to resolve. In 2007, the Ministry of Interior reported a number of arrests related to organized crime, although overall reported crimes saw a slight decrease. The Ministry also reported a slight increase in firearm and drug-related offenses compared to previous years.

Crimes of opportunity can occur against anyone, and the Embassy reminds visitors to be careful and cautious in their own personal security, whether within the city limits of Dushanbe or in the more remote areas of the country. Americans should be aware that danger increases after dark, and they are advised to use caution when traveling alone or on foot after dark. The U.S. Embassy encourages visitors to travel in pairs and to notify colleagues of their whereabouts when not working, especially during evening hours. Travelers are also encouraged to carry a copy of their passport (separate from their wallets) to speed up issuance of a new passport in case of theft.

In many countries around the world, counterfeit and pirated goods are widely available. Transactions involving such products are illegal under local law. In addition, bringing them back to the United States may result in forfeitures and/or fines. More information on this serious problem is available at http://www.cybercrime.gov/18usc2320.htm.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

The local equivalent to the "911" emergency line in Tajikistan is: 01—Fire, 02—Police, 03—Ambulance.

Medical Facilities and Health Information: The quality of Tajikistan's medical infrastructure is significantly below Western standards, with severe shortages of basic medical supplies, including disposable needles, anesthetics, and antibiotics. Many trained medical personnel left the country during and following the civil war. Elderly travelers and those with pre-existing health problems may be at particular risk due to inadequate medical facilities.

Significant disease outbreaks are possible due to population shifts and a decline in some immunization coverage among the general population. There have been outbreaks of typhoid in the Dushanbe area and in the south, and the risk of contracting malaria, cholera, and water-borne illnesses is high. Throughout Central Asia, rates of infection of various forms of hepatitis and tuberculosis (including drug-resistant strains) are on the rise. Tuberculosis is an increasingly serious health concern in Tajikistan. For further information, please consult the CDC's Travel Notice on tuberculosis at http://wwwn.cdc.gov/travel. It is advised to drink only bottled or thoroughly boiled water while in Tajikistan.

The U.S. Department of State is unaware of any HIV/AIDS entry restrictions for visitors to or foreign residents of Tajikistan. However, the government of Tajikistan does require visitors who remain in country for more than 90 days to present a medical certificate showing that they are HIV-free, or to submit to an HIV test in Tajikistan. HIV is a growing health threat in Tajikistan.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's internet site at http://www.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith. Pandemic and avian flu information is available at www.pandemicflu.gov.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Tajikistan is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

Travel to, from, and within Tajikistan is difficult and unreliable. Neighboring countries may unilaterally close borders and some borders are poorly delineated. Armed police or military checkpoints can make road travel outside of Dushanbe more difficult. Crossing the Tajik-Uzbek border, in particular, has been known to present difficulties for drivers operating vehicles with non-Tajik government-issued plates. Road travel should be undertaken only in daylight hours and on routes known to the traveler or a reliable escort. Those traveling to Gorno-Badakhshan by car should do so only during daylight hours. The roads traverse mountainous terrain along the Afghan border that is difficult to navigate, even in daylight hours. Public transportation vehicles in the city are often overcrowded and not always safe. If you are driving, be vigilant because pedestrians often tend to cross the street at inappropriate places or walk along the highway without paying attention to vehicular traffic. Bus services between major cities have been severely disrupted by border closures and should not be relied upon. The State Traffic Inspectorate (GAI, or in Tajiki, BDA), which has checkpoints in many cities and at regular intervals along all highways outside the city, frequently stops vehicles for inspection of the vehicle and the driver's documents.

During the winter months, the potential dangers when traveling outside of Dushanbe in the mountainous areas of the country are heightened. Every year, accidents and casualties occur on Tajikistan's mountain roads and passes, often when drivers ignore warnings not to travel over a closed mountain pass. Avalanches are a common occurrence in Tajikistan's mountains during the winter months. The tunnel bypassing the Anzob Pass is still not complete and travel via this construction project is not advised in any season. Please exercise caution and limit winter travel to Tajikistan's mountain regions.

In certain parts of the country, including in the Vakhsh and Rasht valleys and along the Afghan-Tajik border, land mines and cluster munitions form an additional hazard. If an area has land mine warning signs, or is marked off with red and white plastic tape, heed the warning and do not venture off the road. In all cases, do not pick up or handle anything that looks like unexploded munitions.

Emergency phone numbers: police—02, ambulance—03, state traffic control (GAI) duty officer—35-45-45.

Aviation Safety Oversight: As there is no direct commercial air service between the United States and Tajikistan, the U.S. Federal Aviation Administration (FAA) has not assessed Tajikistan's Civil Aviation Authority for compliance with International Civil Aviation Organization (ICAO) aviation safety standards. For more information, travelers may visit the FAA's Internet web site at http://www.faa.gov.

Special Circumstances: Tajikistan has a cash-only economy. International banking services are limited, but ATM machines have been installed in several locations. Cash is dispensed in both U.S. and local currency. Few establishments in the country accept credit cards and none accepts traveler's checks. Tajikistan's national currency is the Somoni, which is convertible.

Tajik customs authorities may subject all items that are imported into or exported from Tajikistan to a high level of scrutiny. The Government of Tajikistan may enforce strict customs regulations against those who import and export goods. The export of antiques and cultural valuables requires special permission. There are also currency restrictions. Travelers must fill out a Customs Declaration Form upon arrival in Tajikistan, have it stamped by Tajik customs officials at the port of entry and retain the form until departure to demonstrate that the travelers are not leaving Tajikistan with more money than they brought into the country. Please contact the Embassy of the Republic of Tajikistan in the United States, 1005 New Hampshire Avenue NW, Washington, DC, 20037; telephone (202) 223-6090, fax: (202) 223-6091, e-mail: tajikistan@verizon.net, web site: http://www.tjus.org for specific information about customs requirements.

The Republic of Tajikistan does not recognize dual citizenship with most countries, including the United States (one exception is with Russia, where dual citizenship is regulated by a special interstate agreement). Dual nationals who attempt to leave Tajikistan on U.S. passports without valid Tajik visas in them are likely to have problems with immigration authorities upon departing Tajikistan.

Travelers to Tajikistan are subject to frequent document inspections by local police. U.S. citizens are strongly encouraged to carry copies of their U.S. passports, Tajik visas, and visa registration at all times (including while traveling within Tajikistan) so that, if questioned by local officials, proof of identity, U.S. citizenship, and valid visa status in Tajikistan are readily available. Always check your visa and registration validity dates so that these documents can be renewed if necessary before they expire. Taking photographs of anything that could be perceived as being of military or security interest, including many government buildings, may result in problems with the authorities. In accordance with the Vienna Convention on Consular Relations and certain bilateral agreements, local authorities must grant a U.S. consular officer access to any U.S. citizen who is arrested. U.S. citizens who are arrested or detained should ask to contact the U.S. Embassy immediately. Tajikistan is an earthquake-prone country. General information about natural disaster preparedness is available via the Internet from the U.S. Federal Emergency Management Agency (FEMA) at http://www.fema.gov.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses.

Persons violating Tajik laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Tajikistan are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in Tajikistan are encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration web site and to obtain updated information on travel and security within Tajikistan. Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate.

By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency.

The U.S. Embassy is located at 109A Ismoili Somoni Avenue, Dushanbe, Tajikistan, Main Phone: 992-37-229-2000, Consular Direct Line: 992-37-229-23-00, consular fax: 992-37-229-23-09, embassy fax: 992-37-2050, Duty Officer: 992-90-770-10-32, web site: http://dushanbe.usembassy.gov.

Intercountry Adoption

May 2006

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is based on public sources and current understanding. Questions involving foreign and U.S. immigration laws and legal interpretation should be addressed respectively to qualified foreign or U.S. legal counsel.

Important Notes: On May 3, 2006, Tajikistan changed its Family Code to prohibit intercountry adoption of Tajik orphans. While couples which consist of at least one Tajik citizen will still be allowed to adopt according to the below procedures, all other adoptions by non-Tajik citizens are expressly forbidden by Tajik law.

Adoption Authority: The Department of Care and Guardianship (under the Tajik Ministry of Education) and the district education committee covering the child's place of residence (under the local mayor's office) both play important roles in identifying children as adoptable orphans and evaluating the appropriateness of prospective adoptive parents. Final adoption decisions are made in courts.

Age, Civil Status And Residency Requirements: At least one prospective adoptive parent must be Tajik citizen. Single parents may adopt but there must be at least 16 years' difference between the adoptive parent and adoptive child. However, Tajik authorities will allow adoption by a single parent only if they are fully convinced that the adoptive parent's age, health condition and financial status will enable him/her to provide adequate support and education for the child until adulthood.

Adoption Agencies and Attorneys: There are no recognized adoption agencies in Tajikistan and there are few attorneys who will agree to even take on adoption cases, although there are several who have experience.

Fees: Tajikistan ranks among the most corrupt countries in the world. There are no set official fees for adoption and unofficial fees are rumored to vary widely, from $500 to $20,000.

Adoption Procedures: The following adoption procedures are related to the domestic Tajik adoption process, and are not always applied to (or successful in) intercountry adoption cases.

Applications for adoption should be filed with district or city courts having jurisdiction over the child's or the adoptive parents' place of residence in Tajikistan. Before the application is filed, the child must be registered as an orphan with both the Department of Care and Guardianship (under the Tajik Ministry of Education) and the district education committee covering the child's place of residence (under the local mayor's office). These departments review the child's and prospective parents' living conditions, ensure that the prospective adoptive parents met the Tajik requirement of meeting with the adoptive child in person, determine whether there are claims against the adoption (e.g., from other family members), and find out the child's attitude towards the adoption. (Children over age 10 cannot be adopted without their permission.) All adoptive parents are required to meet with the child in person before the court hearing and to be personally present at the court hearing. Representatives of the Care and Guardianship district committee, the prosecutor, and the orphanage must also be present at the hearing, and a failure by any of these to be present may later be used to invalidate the court decision. Tajik authorities believe that birth parents' rights always have priority and birth parents may withdraw their permission for the child's adoption at any time before the court decision is made. If

the child's birth parents are known and alive, the judge may invite them to the court hearing. Any person or entity who believes that his/her rights were violated by the adoption may file an appeal to have the adoption declared void. Not only the birth parents, but also other heirs of the adoptive parents, the prosecutor, or other Tajik government offices (Care and Guardianship Departments) may file such an appeal. Even the child him/herself, once having reached the age of majority, may request that the adoption be voided. If the court declares the adoption void, it can return the child to the birth parents or to the Tajik Care and Guardianship Departments. If there are no challenges to the adoption and the court approves the adoption, the adoptive parents can obtain the adoption certificate and the new birth certificate (showing the child's new name and the adoptive parents' names) from the Tajik civil registration office (ZAGS). Please note that in cases of issuance of a child's birth certificate to a single mother, ZAGS frequently writes a fictitious father's name in the birth certificate. A single adoptive mother should either ask ZAGS officials not to do this or should keep the court decision or statement from ZAGS to confirm that a single mother adopted the child. In the case of an adoption by a single, U.S. citizen mother, she will need these documents at the immigrant visa interview and also later when applying for a U.S. passport for the child. After the adoption certificate and the new birth certificate have been obtained, the adoptive parent(s) can apply for the child's Tajik international passport. This is done at the Visa and Registration Department of the Ministry of Internal Affairs (OVIR). Once the adoption is finalized, the birth certificate has been reissued, and the child's passport is in hand, the parents can contact the U.S. Embassy in Tajikistan to make an appointment for an interview with a U.S. consular officer. The purpose of this interview is so that the consular officer can completed the Report on Overseas Orphan Investigation (Form I-604). When this report is completed, the parents can then contact the U.S. Embassy in Almaty, Kazakhstan, to arrange to apply for the immigrant visa for the adopted child. Please see the *Intercountry Adoption* section of this book for more details and review current reports online at http://adoption.state.gov.

Documentary Requirements: The adoption application to the Tajik court should include (but is not limited to):

- Home Study Report prepared by a competent authority of the prospective adoptive parents' country of residence
- Written recommendation of the Tajik Care and Guardianship Department
- Approval from the prospective adoptive parents' country of residence that they may apply to adopt a child internationally
- Copies of prospective adoptive parents' passports
- Prospective adoptive parents' marriage certificate/divorce certificate (if applicable)
- Police certificate for the adoptive parents
- Medical examination report describing the prospective adoptive parents' health condition
- Financial documents showing prospective adoptive parents' salary and income: employment verification letter, bank statements, tax forms
- Evidence of prospective adoptive parents' place of residence
- Certificate showing how many people there are in the prospective adoptive parents' family, including all dependents, to assess financial means
- Notarized agreement of biological parents (if they are known and alive) or guardians for adoption of the child
- Written permission from the head of the orphanage or hospital where the child resides (if applicable)
- Original birth certificate of the adoptive child
- Child's statement agreeing to be adopted (if s/he is over ten years old)
- Medical report on the child's health condition and physical and mental development

All of these documents must be translated into Tajik or Russian, notarized and authenticated.

Additional Information: Specific questions about adoption in Tajikistan may be addressed to the U.S. Embassy in Dushanbe. General questions regarding intercountry adoption may be addressed to the Office of Children's Issues, U.S. Department of State, CA/OCS/CI, SA-29, 4th Floor, 2201 C Street, NW, Washington, D.C. 20520-4818, toll-free Tel: 1-888-407-4747.

TANZANIA

Compiled from the December 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
United Republic of Tanzania

PROFILE

Geography

Area: Mainland—945,000 sq. km. (378,000 sq. mi.); slightly smaller than New Mexico and Texas combined. Zanzibar—1,658 sq. km. (640 sq. mi.).

Cities: Capital—Dar es Salaam (executive), Dodoma (legislative), Major metropolises—Arusha, Mwanza, Mbeya, Mtwara, Stonetown in Zanzibar.

Terrain: Varied.

Climate: Varies from tropical to arid to temperate.

People

Nationality: Noun and adjective—Tanzanian(s); Zanzibari(s).

Population: Mainland—39.3 million. Zanzibar—1 million (est.).

Religions: Muslim 40%, Christian 40%, indigenous beliefs 20%.

Languages: Kiswahili (official), English.

Education: Attendance—73.2% Mainland (primary); 71.4% Zanzibar. Literacy: Females 67% Mainland; 76.8% Zanzibar. Literacy: Males 79.9% Mainland; 86% Zanzibar.

Health: Infant mortality rate—68/1,000. Life expectancy—50 years.

Work force: Agriculture—80%; industry, commerce, government—20%.

Government

Type: Republic.

Independence: Tanganyika 1961, Zanzibar 1963. Union formed in April 1964.

Constitution: 1982.

Government branches: Executive—president (chief of state and commander in chief), vice president, and prime minister. Legislative—unicameral National Assembly (for the Union), House of Representatives (for Zanzibar only). Judicial—Mainland: Court of Appeals, High Courts, Resident Magistrate Courts, district courts, and primary courts; Zanzibar: High Court, people's district courts, kadhis court (Islamic courts).

Political parties: 1. Chama cha Mapinduzi (CCM), 2. The Civic United Front (CUF), 3. Chama cha Demokrasia na Maendeleo (CHADEMA), 4. Union for Multiparty Democracy (UMD), 5. National Convention for Construction and Reform (NCCR-Mageuzi), 6. National League for Democracy (NLD), 7. National Reconstruction for Alliance (NRA), 8. Tanzania Democratic Alliance Party (TADEA), 9. Tanzania Labour Party (TLP), 10. United Democratic Party (UDP), 11. Demokrasia Makini (MAKINI), 12. United Peoples' Democratic Party (UPDP), 13. Chama cha Haki na Ustawi (CHAUSTA), 14. The Forum for Restoration of Democracy (FORD), 15. Democratic Party (DP), 16. Progressive Party of Tanzania (PPT-Maendeleo), 17. Jahazi Asilia.

Suffrage: Universal at 18.

Political subdivisions: 26 regions (21 on mainland, 3 on Zanzibar, 2 on Pemba).

Economy

GDP: (2007) $16.18 billion.

Average growth rate: (2007) 7.3%.

Per capita income: (2007) $400.

Natural resources: Hydroelectric potential, coal, iron, gemstones, gold, natural gas, nickel, diamonds, crude oil potential, forest products, wildlife, fisheries.

Agriculture: (2007) 42.5% of GDP. Products—coffee, cotton, tea, tobacco, cloves, sisal, cashew nuts, maize, livestock, sugar cane, paddy, wheat, pyrethrum.

Industry/manufacturing (2007) 18.9% of GDP. Types—textiles, agroprocessing, light manufacturing, construction, steel, aluminum, paints, cement, cooking oil, beer, mineral water and soft drinks.

Trade: (2007) Exports—$2.22 billion (merchandise exports, 2007): coffee, cotton, tea, sisal, cashew nuts, tobacco, cut flowers, seaweed, cloves, fish and fish products, minerals (diamonds, gold, and gemstones), manufactured goods, horticultural

products; services (tourism services, communication, construction, insurance, financial, computer, information, government, royalties, personal and other businesses). Major markets—U.K., Germany, India, Japan, Italy, China, Bahrain, Malaysia, South Korea, Thailand, Pakistan, Indonesia. Primary imports—petroleum, consumer goods, machinery and transport equipment, used clothing, chemicals, pharmaceuticals. Major suppliers—U.K., Germany, Japan, India, Italy, U.S., United Arab Emirates, Hong Kong, Singapore, South Africa, Kenya.

PEOPLE

Population distribution in Tanzania is extremely uneven. Density varies from 1 person per square kilometer (3 per sq. mi.) in arid regions to 51 per square kilometer (133 per sq. mi.) in the mainland's well-watered highlands to 134 per square kilometer (347 per sq. mi.) on Zanzibar. More than 80% of the population is rural. Dar es Salaam is the capital and largest city; Dodoma, located in the center of Tanzania, has been designated the legislative capital and the Parliament meets there four times a year.

The African population consists of more than 120 ethnic groups, of which the Sukuma, Haya, Nyakyusa, Nyamwezi, and Chaga have more than 1 million members each. The majority of Tanzanians, including such large tribes as the Sukuma and the Nyamwezi, are of Bantu stock. Groups of Nilotic or related origin include the nomadic Masai and the Luo, both of which are found in greater numbers in neighboring Kenya. Two small groups speak languages of the Khoisan family peculiar to the Bushman and Hottentot peoples. Cushitic-speaking peoples, originally from the Ethiopian highlands, reside in a few areas of Tanzania.

Although much of Zanzibar's African population came from the mainland, one group known as Shirazis traces its origins to the island's early Persian settlers. Non-Africans residing on the mainland and Zanzibar account for 1% of the total population. The Asian community, including Hindus, Sikhs, Shi'a and Sunni Muslims, and Goans, has declined by 50% in the past decade to 50,000 on the mainland and 4,000 on Zanzibar. An estimated 70,000 Arabs and 10,000 Europeans reside in Tanzania.

Each ethnic group has its own language, but the national language is Kiswahili, a Bantu-based tongue with strong Arabic borrowings.

HISTORY

Tanganyika/Tanzania

Northern Tanganyika's famed Olduvai Gorge has provided rich evidence of the area's prehistory, including fossil remains of some of humanity's earliest ancestors. Discoveries suggest that East Africa may have been the site of human origin.

Little is known of the history of Tanganyika's interior during the early centuries of the Christian era. The area is believed to have been inhabited originally by ethnic groups using a click-tongue language similar to that of Southern Africa's Bushmen and Hottentots. Although remnants of these early tribes still exist, most were gradually displaced by Bantu farmers migrating from the west and south and by Nilotes and related northern peoples. Some of these groups had well-organized societies and controlled extensive areas by the time the Arab slavers, European explorers, and missionaries penetrated the interior in the first half of the 19th century.

The coastal area first felt the impact of foreign influence as early as the 8th century, when Arab traders arrived. By the 12th century, traders and immigrants came from as far away as Persia (now Iran) and India. They built a series of highly developed city and trading states along the coast, the principal one being Kibaha, a settlement of Persian origin that held ascendancy until the Portuguese destroyed it in the early 1500s.

The Portuguese navigator Vasco da Gama explored the East African coast in 1498 on his voyage to India. By 1506, the Portuguese claimed control over the entire coast. This control was nominal, however, because the Portuguese did not colonize the area or explore the interior. Assisted by Omani Arabs, the indigenous coastal dwellers succeeded in driving the Portuguese from the area north of the Ruvuma River by the early 18th century. Claiming the coastal strip, Omani Sultan Seyyid Said (l804-56) moved his capital to Zanzibar in 1841.

European exploration of the interior began in the mid-19th century. Two German missionaries reached Mt. Kilimanjaro in the 1840s. British explorers Richard Burton and John Speke crossed the interior to Lake Tanganyika in 1857. David Livingstone, the Scottish missionary-explorer who crusaded against the slave trade, established his last mission at Ujiji, where he was "found" by Henry Morton Stanley, an American journalist-explorer, who had been commissioned by the New York Herald to locate him.

German colonial interests were first advanced in 1884. Karl Peters, who formed the Society for German Colonization, concluded a series of treaties by which tribal chiefs in the interior accepted German "protection." Prince Otto von Bismarck's government backed Peters in the subsequent establishment of the German East Africa Company.

In 1886 and 1890, Anglo-German agreements were negotiated that delineated the British and German spheres of influence in the interior of East Africa and along the coastal strip previously claimed by the Omani sultan of Zanzibar. In 1891, the German Government took over direct administration of the territory from the German East Africa Company and appointed a governor with headquarters at Dar es Salaam.

Although the German colonial administration brought cash crops, railroads, and roads to Tanganyika, European rule provoked African's

resistance, culminating in the Maji Maji rebellion of 1905-07. The rebellion, which temporarily united a number of southern tribes and ended only after an estimated 120,000 Africans had died from fighting or starvation, is considered by most Tanzanians to have been one of the first stirrings of nationalism.

German colonial domination of Tanganyika ended after World War I when control of most of the territory passed to the United Kingdom under a League of Nations mandate. After World War II, Tanganyika became a UN trust territory under British control. Subsequent years witnessed Tanganyika moving gradually toward self-government and independence.

In 1954, Julius K. Nyerere, a school teacher who was then one of only two Tanganyikans educated abroad at the university level, organized a political party—the Tanganyika African National Union (TANU). TANU-supported candidates were victorious in the Legislative Council elections of September 1958 and February 1959. In December 1959, the United Kingdom agreed to the establishment of internal self-government following general elections to be held in August 1960. Nyerere was named chief minister of the subsequent government.

In May l961, Tanganyika became autonomous, and Nyerere became

Prime Minister under a new constitution. Full independence was achieved on December 9, 1961. Julius. Nyerere was elected President when Tanganyika became a republic within the Commonwealth a year after independence.

Zanzibar

An early Arab/Persian trading center, Zanzibar fell under Portuguese domination in the 16th and early 17th centuries but was retaken by Omani Arabs in the early 18th century. The height of Arab rule came during the reign of Sultan Seyyid Said, who encouraged the development of clove plantations, using the island's slave labor.

The Arabs established their own garrisons at Zanzibar, Pemba, and Kilwa and carried on a lucrative trade in slaves and ivory. By 1840, Said had transferred his capital from Muscat to Zanzibar and established a ruling Arab elite. The island's commerce fell increasingly into the hands of traders from the Indian subcontinent, who Said encouraged to settle on the island.

Zanzibar's spices attracted ships from as far away as the United States. A U.S. consulate was established on the island in 1837. The United Kingdom's early interest in Zanzibar was motivated by both commerce and the determination to end the slave trade. In 1822, the British signed the first of a series of treaties with Sultan Said to curb this trade, but not until 1876 was the sale of slaves finally prohibited.

The Anglo-German agreement of 1890 made Zanzibar and Pemba a British protectorate. British rule through a Sultan remained largely unchanged from the late 19th century until after World War II.

Zanzibar's political development began in earnest after 1956, when provision was first made for the election of six nongovernmental members to the Legislative Council. Two parties were formed: the Zanzibar Nationalist Party (ZNP), representing the dominant Arab and "Arabized" minority, and the Afro-Shirazi Party (ASP), led by Abeid Karume and representing the Shirazis and the African majority.

The first elections were held in July 1957. The ASP won three of the six elected seats, with the remainder going to independents. Following the election, the ASP split; some of its Shirazi supporters left to form the Zanzibar and Pemba People's Party (ZPPP). The January 1961 election resulted in a deadlock between the ASP and a ZNP-ZPPP coalition.

United Republic of Tanzania

Zanzibar received its independence from the United Kingdom on December 19, 1963, as a constitutional monarchy under the sultan. On January 12, 1964, the African majority revolted against the sultan and a new government was formed with the ASP leader, Abeid Karume, as President of Zanzibar and Chairman of the Revolutionary Council. Under the terms of its political union with Tanganyika in April 1964, the Zanzibar Government retained considerable local autonomy.

On April 26, 1964, Tanganyika united with Zanzibar to form the United Republic of Tanganyika and Zanzibar. The country was renamed the United Republic of Tanzania on October 29, 1964.

To form a sole ruling party in both parts of the union Nyerere merged TANU with the Zanzibar ruling party, the Afro-Shirazi Party (ASP) of Zanzibar to form the CCM (Chama cha Mapinduzi-CCM Revolutionary Party), on February 5, 1977. The CCM was to be the sole instrument for mobilizing and controlling the population in all significant political or economic activities. He envisioned the party as a "two-way street" for the flow of ideas and policy directives between the village level and the government. On April 26, 1977, the union of the two parties was ratified in a new constitution. The merger was reinforced by principles enunciated in the 1982 union constitution and reaffirmed in the constitution of 1984. President Nyerere stepped down from office and was succeeded as President by Ali Hassan Mwinyi in 1985. Nyerere retained his position as Chairman of the ruling CCM party for 5 more years and was influential in Tanzanian politics until his death in October 1999. The current President, Jakaya Kikwete, was elected in December 2005. Zanzibar President Amani Abeid Karume, the son of Zanzibar's first president, was elected in 2000, in general elections that were marked by widespread irregularities throughout the Isles. His predecessor, Salmin Amour, was first elected in single-party elections in 1990, then re-elected in 1995 in Zanzibar's first multi-party elections. These elections also were tainted by violence and serious irregularities in the voting process.

GOVERNMENT

Tanzania's president and National Assembly members are elected concurrently by direct popular vote for 5-year terms. The president appoints a prime minister who serves as the government's leader in the National Assembly. The president selects his cabinet from among National Assembly members. The Constitution also empowers him to nominate 10 non-elected members of Parliament, who also are eligible to become cabinet members. Elections for president and all National Assembly seats were held in December 2005.

The unicameral National Assembly has up to 325 members: the Attorney General, the Speaker, five members elected from the Zanzibar House of Representatives to participate in the Parliament, 75 special women's seats apportioned among the political parties based on their election results, 233 constituent seats from the mainland, and up to 10 members nominated by the president. In 2006, the president nominated seven members and the Speaker was elected to a constituent seat, bringing the total number of Members of Parliament to 320. The ruling party, CCM, holds about 82% of the seats in the Assembly. Laws passed by the National Assem-

bly are valid for Zanzibar only in specifically designated union matters. Zanzibar's House of Representatives has jurisdiction over all non-union matters. There are currently 81 members in the House of Representatives in Zanzibar: 50 elected by the people, 10 appointed by the president of Zanzibar, 5 ex officio members, an attorney general appointed by the president, and 15 special seats allocated to women. Ostensibly, Zanzibar's House of Representatives can make laws for Zanzibar without the approval of the union government as long as it does not involve union-designated matters. The terms of office for Zanzibar's president and House of Representatives also are 5 years. The semiautonomous relationship between Zanzibar and the union is a relatively unique system of government.

Tanzania has a five-level judiciary combining the jurisdictions of tribal, Islamic, and British common law. Appeal is from the primary courts through the district courts, resident magistrate courts, to the high courts, and the high courts to the Court of Appeals. District and resident court magistrates are appointed by the Chief Justice, except for judges of the High Court and Court of Appeals, who are appointed by the president. The Zanzibari court system parallels the legal system of the union, and all cases tried in Zanzibari courts, except for those involving constitutional issues and Islamic law, can be appealed to the Court of Appeals of the union. A commercial court was established on the mainland in September 1999 as a division of the High Court.

For administrative purposes, Tanzania is divided into 26 regions—21 on the mainland, 3 on Zanzibar, and 2 on Pemba. Ninety-nine district councils have been created to further increase local authority. These districts are also now referred to as local government authorities. Currently there are 114 councils operating in 99 districts, 22 are urban and 92 are rural. The 22 urban units are classified further as city (Dar es Salaam and Mwanza), municipal (Arusha, Dodoma, Iringa, Kilimanjaro, Mbeya, Morogoro, Shinyanga, Tabora, and Tanga), and town councils (the remaining 11 communities).

Principal Government Officials

Last Updated: 11/12/08

Pres.: **Jakaya Mrisho KIKWETE**
Vice Pres.: **Ali Mohamed SHEIN, Dr.**
Prime Min.: **Peter Mizengo PINDA**
Pres. of Zanzibar: **Amani Abeid KARUME**
Min. of Agriculture, Food Security, & Cooperatives: **Peter MSOLA**
Min. of Communication, Science, & Technology: **Shukuru Jumanne KAWAMBWA**
Min. of Community Development, Gender, & Children: **Margaret SITTA**
Min. of Defense & National Service: **Hussein MWINYI**
Min. of East Africa Cooperation Affairs: **Diodorus KAMALA**
Min. of Education & Vocational Training: **Jumanne MAGHEMBE**
Min. of Energy & Mineral Resources: **William NGELEJA**
Min. of Finance, Planning, Economy, & Empowerment: **Mustapha MKULO**
Min. of Foreign Affairs & Intl. Cooperation: **Bernard Kamillius MEMBE**
Min. of Health & Social Welfare: **David Homeli MWAKYUSA**
Min. of Home Affairs, Public Safety, & Security: **Lawrence MASHA**
Min. of Industry, Trade, & Marketing: **Mary NAGU**
Min. of Information, Culture, & Sports: **George Huruma MKUCHIKA, Capt.**
Min. of Infrastructure Development: **Andrew John CHENGE**
Min. of Justice & Constitutional Affairs: **Mathias CHIKAWE**
Min. of Labor, Employment, & Youth Development: **Athumani Juma KAPUYA**
Min. of Lands & Human Settlement Development: **John CHILIGATI**
Min. of Livestock Development & Fisheries: **John MAGUFULI**
Min. of Natural Resources & Tourism: **Shamsa MWANGUNGA**
Min. of Water & Irrigation: **Mark MWANDOSYA**
Min. of State for Good Governance, Pres.'s Office: **Sophia SIMBA**
Min. of State for Regional Admin. & Local Govt., Pres.'s Office: **Stephen WASSIRA**
Min. of State for Environment, Vice Pres.'s Office: **Batilda BURIANI**
Min. of State for Union Affairs, Vice Pres.'s Office: **Mohamed Khatib SEIF**
Min. of State for Policy, Coordination, & Parliamentary Affairs, Prime Min.'s Office: **Philip MARMO**
Attorney Gen.: **Johnson MWANYIKA**
Governor, Central Bank: **Benno NDULU**
Ambassador to the US: **Ombeni Y. SEFUE**
Permanent Representative to the UN, New York: **Augustine Philip MAHIGA**

Tanzania maintains an embassy in the United States at 2139 R Street NW, Washington, DC 20008 (tel. 202-939-6125).

POLITICAL CONDITIONS

From independence in 1961 until the mid-1980s, Tanzania was a one-party state, with a socialist model of economic development. Beginning in the mid-1980s, under the administration of President Ali Hassan Mwinyi, Tanzania undertook a number of political and economic reforms. In January and February 1992, the government decided to adopt multiparty democracy. Legal and constitutional changes led to the registration of 11 political parties. Two parliamentary by-elections (won by CCM) in early 1994 were the first-ever multiparty elections in Tanzanian history.

In October 2000, Tanzania held its second multi-party general elections. The ruling CCM party's candidate, Benjamin W. Mkapa, defeated his three main rivals, winning the presidential election with 71% of the vote. In the parliamentary elections, CCM won 202 of the 232 elected seats. In the Zanzibar presidential election, Abeid Amani Karume, the son of former President Abeid Karume, defeated CUF candidate Seif Sharif Hamad. The election was marred by irregularities, especially on Zanzibar, and subsequent political violence claimed at least 23 lives in January 2001, mostly on Pemba island. Also, 16 CUF members were expelled from the Union Parliament after boycotting the legislature to protest the Zanzibar election results.

In October 2001, the CCM and the CUF parties signed a reconciliation agreement which called for electoral

reforms on Zanzibar and set up a Commission of Inquiry to investigate the deaths that occurred in January 2001 on Pemba. The agreement also led to the presidential appointment of an additional CUF official to become a member of the Union Parliament. Changes to the Zanzibar Constitution in April 2002 allowed both the CCM and CUF parties to nominate members to the Zanzibar Electoral Commission. In May 2003, the Zanzibar Electoral Commission conducted by-elections to fill vacant seats in the parliament, including those seats vacated by the CUF boycott. Observers considered these by-elections, the first major test of the reconciliation agreement, to be free, fair, and peaceful.

In October 2005, presidential and parliamentary elections were scheduled to take place. However, the death of an opposition vice presidential candidate forced a postponement until December. Zanzibari presidential elections went forward as scheduled. Although there were many administrative improvements over the 2000 elections in Zanzibar, the poll was marred by violence and intimidation. Abeid Amani Karume edged out Seif Sharif Hamad 53% to 46% in an election widely deemed to have had serious irregularities by international observers. In contrast, the December 2005 elections in mainland Tanzania proceeded with few if any problems, and the popular Kikwete won by over 80% of the vote. The ruling CCM party also picked up additional parliamentary seats, leaving the opposition parties fractured and marginalized.

In February 2008, President Kikwete dissolved his cabinet after then-Prime Minister Edward Lowassa and two ministers resigned. Prime Minister Lowassa offered his resignation after a parliamentary select committee report alleged Lowassa used undue influence to help secure a major energy contract for a company that had no prior experience in the energy sector and ended up providing none of the promised energy. President Kikwete quickly nominated and the National Assembly approved a new cabinet. Mizengo Kayanza Peter Pinda was selected as the new Prime Minister. President Kikwete, Vice President Ali Mohamed Shein, Prime Minister Mizengo Kayanza Peter Pinda, and National Assembly members will serve until the next general elections in 2010. Similarly, Zanzibar President Karume and members of the Zanzibar House of Representatives also will complete their terms of office in 2010.

ECONOMY

Significant measures have been taken to liberalize the Tanzanian economy along market lines and encourage both foreign and domestic private investment. Beginning in 1986, the Government of Tanzania embarked on an adjustment program to dismantle state economic controls and encourage more active participation of the private sector in the economy. The program included a comprehensive package of policies which reduced the budget deficit and improved monetary control, substantially depreciated the overvalued exchange rate, liberalized the trade regime, removed most price controls, eased restrictions on the marketing of food crops, freed interest rates, and initiated a restructuring of the financial sector.

In February 2007 the International Monetary Fund (IMF) completed the final review of Tanzania's second Poverty Reduction and Growth Facility (PRGF) arrangement and approved a three-year Policy Support Instrument (PSI) as a successor to the PRGF. Tanzania had implemented a second three-year PRGF in August 2003. From April 2000 to June 2003, the Tanzanian Government successfully completed a previous three-year PRGF. The PRGF was the successor program to the Enhanced Structural Adjustment Facility (ESAF) Tanzania had from 1996-1999. Tanzania also embarked on a major restructuring of state-owned enterprises. Overall, real GDP growth has averaged about 6% a year over the past seven years, higher than the annual average growth of less than 5% in the late 1990s, but not enough to improve the lives of average Tanzanians. The economy remains overwhelmingly donor-dependent. Tanzania had an external debt of U.S. $5.36 billion, down from U.S. $5.74 billion recorded as of the end of December 2006, while domestic debt increased to U.S. $1.67 billion from U.S. $1.43 billion during the same period. During 2007, external debt service payments amounted to U.S. $42.0 million compared with U.S. $90.3 million paid in 2006. The drastic fall in the actual debt service is associated with the debt relief arising from the Heavily Indebted Poor Countries initiative (HIPC) and Multilateral Debt Relief Initiative (MDRI), and accumulation of arrears on non-serviced debts.

Agriculture dominates the economy, providing about 42% of GDP and 80% of employment. Cash crops, including coffee, tea, cotton, cashews, sisal, cloves, and pyrethrum, account for the vast majority of export earnings. While the volume of major crops—both cash and goods marketed through official channels—have increased in recent years, large amounts of produce never reach the market. Poor pricing and unreliable cash flow to farmers continue to frustrate the agricultural sector.

Accounting for about 18% of GDP, Tanzania's industrial sector is one of the smallest in Africa. It was hard hit during the 2002-2003 drought years and again in 2005-2006 by persistent power shortages caused by low rainfall in the hydroelectric dam catchment area, a condition compounded by years of neglect and bad management at the state-controlled electric company. Management of the electric company was contracted to the private sector in 2003.

The main industrial activities (90%) are dominated by small and medium sized enterprises (SMEs) specializing in food processing including dairy products, meat packing, preserving fruits and vegetables, production of textile and apparel, leather tanning and plastics. A few larger factories (10%) manufacture cement, rolled steel, corrugated iron, aluminum sheets, cigarettes, beer and bottling beverages, fruit juices and mineral

water. Other factories produce raw materials, import substitutes, and processed agricultural products. Poor infrastructure in water and electricity supply systems continues to hinder factory production. In general, Tanzania's manufacturing sector targets primarily the domestic market with limited exports of manufactured goods. Most of the industry is concentrated in Dar es Salaam.

Despite Tanzania's past record of political stability, an unattractive investment climate has discouraged foreign investment. Government steps to improve the business climate include redrawing tax codes, floating the exchange rate, licensing foreign banks, and creating an investment promotion center to cut red tape. In terms of mineral resources and the largely untapped tourism sector, Tanzania could become a viable and attractive market for U.S. goods and services.

Zanzibar's economy is based primarily on the production of cloves (90% grown on the island of Pemba), the principal foreign exchange earner. Exports have suffered with the downturn in the clove market. Tourism is a promising sector with a number of new hotels and resorts have been built in recent years.

The Government of Zanzibar legalized foreign exchange bureaus on the islands before the mainland Tanzania moved to do so. The effect was to increase the availability of consumer commodities. Furthermore, with external funding, the Government of Zanzibar plans to make the port of Zanzibar a free port. In 2007, the rehabilitation of Zanzibar's port facilities commenced with assistance from European donors. The island's manufacturing sector is limited mainly to import substitution industries, such as cigarettes, shoes, and process agricultural products. In 1992, the government designated two export-producing zones and encouraged the development of offshore financial services. Zanzibar still imports much of its staple requirements, petroleum products, and manufactured articles.

FOREIGN RELATIONS

During the Cold War era, Tanzania played an important role in regional and international organizations. Tanzania's first president, Julius Nyerere, was one of the founding members of the Non-Aligned Movement. Additionally, Tanzania played an active role in the front-line states, the G-77, and the Organization of African Unity (OAU). One of Africa's best-known elder statesmen, Nyerere was personally active in many of these organizations, and served chairman of the OAU (1984-85) and chairman of six front-line states concerned with eliminating apartheid in Southern Africa. Nyerere's death, in October 1999, is still commemorated annually.

Tanzania enjoys good relations with its neighbors in the region and in recent years has been an active participant in efforts to promote the peaceful resolution of disputes. Tanzania helped to broker peace talks to end the conflict in Burundi; a comprehensive cease-fire was signed in Dar es Salaam on September 7, 2006. Tanzania also supports the Lusaka agreement concerning the conflict in the Democratic Republic of the Congo. In March 1996, Tanzania, Uganda, and Kenya revived discussion of economic and regional cooperation. These talks culminated with the signing of an East African Cooperation Treaty in September 1999; a treaty establishing a Customs Union was signed in March 2004. The Customs Union went into effect January 1, 2005 and, in time, should lead to complete economic integration. On July 1, 2007 Rwanda and Burundi joined the EAC and the Customs Union as full members. Tanzania is the only country in East Africa which also is a member of the Southern Africa Development Community (SADC). In January 2005, Tanzania became a non-permanent member of the UN Security Council, serving a two-year term that ended on December 31, 2006. In February 2008, President Kikwete was selected to chair the African Union for a one-year term.

U.S.-TANZANIAN RELATIONS

The U.S. has historically enjoyed very good relations with Tanzania. The relationship became closer after terrorists bombed the U.S. Embassy in Dar es Salaam on August 7, 1998. With the election of President Kikwete, the relationship has blossomed into warmer relations than at any time since Tanzania achieved independence. In February 2008, President Bush made an official four-day visit to Tanzania. President Kikwete, who has visited the U.S. repeatedly, made a reciprocal official visit to Washington in August 2008.

The U.S. Government provides assistance to Tanzania to support programs in the areas of peace and security, democracy, health, education, economic growth, and natural resource management. Tanzania is a major recipient of funding for the President's Emergency Plan for AIDS Relief (PEPFAR) and the President's Malaria Initiative (PMI). In September 2008, Tanzania's $698 million Millennium Challenge Compact entered into force. The Peace Corps program, revitalized in 1979, provides assistance in education through the provision of teachers. Peace Corps also is assisting in health and environment sectors. Currently, about 147 volunteers are serving in Tanzania.

TRAVEL

Consular Information Sheet

November 4, 2008

Country Description: Tanzania is a developing East African nation noted for both its history of stability and its astounding natural beauty. A robust tourist industry provides all levels of tourist amenities, although higher-end facilities are concentrated mainly in the cities and selected game parks. The United Republic of Tanzania was formed in 1964 with the union of the mainland country of Tanganyika and the Zanzibar archipelago, which comprises the islands of Unguja and Pemba. Unguja is the much larger and more populous of the two islands and it is commonly referred to as Zanzibar, as is its main city, Stonetown.

Zanzibar enjoys an autonomous status in many areas of governance and has a separate legal system from the mainland. The legislative capital of Tanzania is Dodoma. The U.S. Embassy is in Tanzania's largest city, Dar es Salaam, the location of most government offices, and the commercial center of the country.

Entry Requirements: A passport and visa are required for travel to Tanzania. U.S. citizens with valid passports may obtain a visa either before arriving in Tanzania or at any port of entry staffed by immigration officials. The current fee for a visa has recently risen to $100 for a 12-month multiple-entry tourist visa to reciprocate the fee the United States charges visa applicants. This could rise again as the U.S. application fee rises. Some border posts and embassies may have technical difficulty in producing the 12-month visa. They may make hand-written annotations on the computer printed visa. U.S. passports should be valid for a minimum of six months beyond the date the visa is obtained, whether it is acquired beforehand or at the port of entry. Also, foreigners are required to show their passports when entering or exiting Zanzibar.

The web site of the Embassy of Tanzania in Washington, DC states that yellow fever vaccination is required only for persons from, or those who have visited yellow fever endemic countries.

Tanzanian law is very strict on visa categories. A recurring problem encountered by Americans is that volunteer activity—even if the traveler is paying for the volunteer opportunity—is prohibited on a tourist visa. Americans who are traveling to Tanzania for short or long term volunteer projects should review their status with the sponsoring organization before entering the country.

Travelers are reminded to safeguard their U.S. passports while in Tanzania. Passport loss can lead to delays in departing the country and can cause disruption of travel. Tanzanian authorities require that travelers who are not in possession of the visa and entry stamps obtained upon admission to Tanzania visit the immigration office prior to departure to regularize their status. Persons attempting to depart the country without proper documentation may be subject to fines or delays in departure. Visit the Embassy of Tanzania's web site at http://www.tanzaniaembassy-us.org for the most current visa information.

Safety and Security: Terrorist incidents in the recent past highlight the continuing threat posed by terrorism in East Africa and the capacity of terrorist groups to carry out such attacks. On August 7, 1998, terrorists bombed the U.S. Embassies in Dar es Salaam and Nairobi, Kenya. On November 28, 2002, terrorists bombed a hotel in Mombasa, Kenya, approximately 50 miles north of the Kenya-Tanzania border, and unsuccessfully attempted to shoot down an Israeli charter plane departing Mombassa Airport. U.S. citizens should be aware of the risk of indiscriminate attacks on civilian targets including usual gathering places of tourists and Westerners. At all times, travelers should maintain a high level of security vigilance. They should avoid political rallies and related public gatherings. In the past, peaceful demonstrations have turned violent with little or no warning as riot police clashed with demonstrators.

The population in Zanzibar is majority Muslim and holds traditional values. Some Zanzibar newspapers have warned that women who dress immodestly may be subject to harassment. American citizens are advised to dress modestly and to refrain from intemperate public behavior. As in Dar es Salaam, Americans in Zanzibar should also avoid political rallies and related public gatherings. The potential for political related violence should not be overlooked.

The area near Tanzania's borders with Rwanda and Burundi has been the site of minor military clashes, and refugee flows across the borders into Tanzania continue. There have been a number of incidents of criminal and violent activity in the region. Travelers to this area should exercise caution. U.S. officials, in keeping with UN security procedures, request police escorts on parts of the Rusomo to Kahama road near the Rwandan border because of an increase in armed bandit attacks.

Inter-city transportation routes between major destinations such as Arusha and Dar es Salaam are serviced by a variety of carriers that offer differing levels of safety and comfort. U.S. citizens who travel by bus are urged to select carriers who use modern equipment and to avoid utilizing vehicles that are in obvious disrepair. Americans on long-haul bus routes in Tanzania have been victims of "druggings" in which drug-laced food and drink are used to

sedate unsuspecting passengers so their belongings can be stolen easily. Travelers are cautioned not to accept food or beverages from fellow passengers.

In-town transportation is best accomplished using taxis or hired drivers from a reputable source. Travelers should be wary of using the ubiquitous microbuses (dala-dalas), which are frequently overcrowded, poorly maintained, a common site of petty theft, and whose operation is generally unsafe.

A continuing concern is Tourè Drive on Msasani Peninsula in Dar es Salaam. It is the beach front road leading from the Sea Cliff Hotel into town and provides an inviting view of the ocean. However, there are regular reports of daytime muggings, pickpocketing, and theft from cars. This road continues to be an area of concern any time of day, on foot, or in vehicles. US government personnel are expressly advised to avoid walking or running along Tourè Drive.

Crime: Crime is a serious problem in Tanzania, and visitors should be alert and cautious. Street crime in Dar es Salaam is common and includes mugging, vehicle theft, "smash and grab" attacks on vehicles, armed robbery, and burglary. Thieves and pickpockets on buses and trains steal from inattentive passengers.

Crime involving firearms is becoming more common. A series of robberies involving increasing levels of violence has occurred along the coast and on Zanzibar. Robbers have held up tour buses and dive boats at gunpoint. In July 2004, a group of volunteer conservation workers was attacked on Pemba Island. Two of the group suffered gunshot wounds. In the spring of 2008, there were a string of armed robberies in hotels along the east coast of Ungunja (the main island) in Zanzibar.

Pedestrians on beaches and footpaths, both in isolated areas and in popular tourist venues, are often targeted for robbery or assault. This is especially true on Zanzibar and in Dar es Salaam and its environs. Visitors should limit the amount of cash they carry and leave valuables, such as passports, jewelry and airline tickets, in a hotel safe or other secure place. Cameras are highly coveted by thieves, and should be guarded carefully. Because of the potential for fraud, credit cards should only be used in reputable tourist hotels. Sexual assaults involving tourists are also an increasing concern. Travelers are warned to avoid walking alone after dark. Relations between consenting adults of the same sex are still illegal in Tanzania although no one has been prosecuted in reportedly decades. Any public displays of affection are disapproved of by Tanzanian society. Public displays of affection between persons of the same sex could result in violence.

Travelers should contract only with legitimate tour guides, preferably arranged by a known travel agency or hotel. The Embassy has received reports of female tourists being maneuvered into unsafe situations by gregarious men offering to show them certain sights or locales. When alone with the women, the men made sexual advances that escalated to assaults. Travelers are advised to be wary of "spontaneous" offers of sightseeing and to avoid being alone with "friendly" strangers who propose special, customized sightseeing trips.

In Arusha, the high number of foreign tourists attracts pickpockets and bag snatchers. Occasionally, these crimes escalate into violence. Travelers are strongly encouraged not to walk around at dusk or later, and to avoid the section of Arusha on the far side of the Themi River at all times on foot. Long time residents say that crime in Arusha peaks around the December-January holiday season. Travelers should be even more vigilant during these months.

Americans residing in Arusha report a steady increase in crimes targeting the homes of expatriates living in the region. These armed home invasions usually involve some violence and some victims have received serious injuries. Americans choosing to reside in the area should ensure that their homes have a safe haven—a secure area with reinforced barriers into which inhabitants can retreat and remain safe if the intruders come into the home. Residents in Arusha strongly recommend retaining a professional security company with 24-hour guards and roving patrols.

In northern Tanzania, there have been incidents of armed, violent robberies of Americans. While very frightening, the number of these attacks is small and the majority of American tourists enjoy Tanzania in peace. Travelers are always urged to practice common sense security and remain vigilant of their surroundings. If a situation does not seem right, travelers should follow their instincts and leave the scene.

Carjacking has occurred in both rural and urban areas. Visitors are advised to drive with doors locked and windows rolled up. Travelers are urged not to stop between populated areas and to travel in convoys if possible.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, contact family members or friends and explain how funds may be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

Medical Facilities and Health Information: Medical facilities are limited and medicines are sometimes unavailable, even in Dar es Salaam. There are hospitals on Zanzibar that can treat minor ailments. For any major medical problems, including dental work, travelers should consider obtaining medical treatment in Nairobi or South Africa where more advanced medical care is available.

Cholera is prevalent in many areas of Tanzania, and several strains of malaria are endemic. Malaria suppressants are advised, and travelers are strongly advised to carry malaria suppressants with them. Visitors should consult their physicians before traveling to learn about prophylaxis and the possible side effects of various available medications.

In addition, other personal protective measures, such as the use of insect repellents, help to reduce malaria risk. Travelers who become ill with a fever or flu-like illness while traveling in a malaria-risk area and up to one year after returning home should seek prompt medical attention and tell the physician their travel history and what anti-malarial medications they have been taking. For additional information on malaria, protection from insect bites, and anti-malarial drugs, please visit the CDC travel health web site at http://www.cdc.gov/malaria.

Tuberculosis is an increasingly serious health concern in Tanzania. For further information, please consult the CDC's Travel Notice on TB at http://wwwn.cdc.gov/travel.

Tap water in Tanzania is unsafe to drink. Travelers are strongly urged to use bottled water for drinking and food preparation.

The HIV infection rate in the population is around seven percent. The infection is even more prevalent among prostitutes and their clients. Travelers should be aware of the related health and legal risks.

East African Trypanosomiasis (Sleeping sickness) is carried by the tse-tse fly, which is endemic to the northern safari circuit of Tanzania. The disease itself is very rare but present. Travelers are advised to use normal precautions to avoid insect bites. Prompt diagnosis and treatment are essential if there is an infection. If symptoms appear, even months later, health care practitioners should be told of the visit to East Africa and the possibility of exposure.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's web site at http://wwwn.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith/en.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Tanzania is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

Road and traffic conditions in Tanzania differ markedly from those found in the United States and present hazards that require drivers to exercise continual alertness and caution.

Traffic in Tanzania moves on the left. Drivers and pedestrians alike must maintain vigilance, looking both ways before turning or crossing a road.

Drivers are advised against nighttime travel. Roadways are often not marked and many lack both streetlights and shoulders. Pedestrians, cyclists, and animals are often encountered on unlit roads after dark, as are slow-moving trucks and cars traveling without lights. Carjacking and other related crimes are more common during the nighttime hours. Traveling in rural areas after dark is strongly discouraged.

Although a number of inter-city highways are periodically repaved and maintained, maintenance schedules are erratic and even good roads may deteriorate precipitously in periods of inclement weather. During the rainy season (late March to mid-June), many roads in Tanzania, both urban and rural, are passable only with four-wheel-drive vehicles.

In urban areas, it is common to find main arterial roads paved and maintained, while secondary streets are severely rutted and passable only with high-clearance vehicles. Traffic lights are often out of order, and care should be exercised at any traffic intersection, whether controlled or not, as many drivers disregard signals.

Excessive speed, unpredictable driving habits, and the lack of basic safety equipment on many vehicles pose serious traffic hazards.

Tanzanian law requires all motor vehicle operators to be in possession of a valid driver's license. Persons staying in Tanzania for six months or less may use a valid U.S. driver's license after validation by local traffic authorities, or an international driver's license. Persons intending to remain in Tanzania for more than six months are required to obtain a Tanzanian driver's license. All vehicles are required to carry third-party liability insurance.

Aviation Safety Oversight: As there is no direct commercial air service between the United States and Tanzania, the U.S. Federal Aviation Administration (FAA) has not assessed Tanzania's Civil Aviation Authority for compliance with International Civil Aviation Organization (ICAO) aviation safety standards. For more information, travelers may visit the FAA's web site at http://www.faa.gov.

Special Circumstances: Every year, thousands of Americans have a truly awe-inspiring experience in Tanzania enjoying its natural wonders. However, these activities do have inherent risks. A handful of tourists are mauled or killed by wild

animals. Climbers are injured or killed in rockslides or succumb to altitude sickness or hypothermia. Safaris and mountain expeditions in general require sustained physical exertion and can aggravate existing chronic health problems. In past years, Americans have died while on safari in accidents or from natural causes related to the exertion of the trip or environmental factors. Most tour operators offer structured, safe excursions into parks, the mountains, and other wildlife areas. Travelers must also play a responsible role in maintaining their safety. Travelers are reminded to maintain a safe distance from animals and to remain in vehicles or other protected enclosures when venturing into game parks. Persons with chronic health problems should weigh the risks before joining an extended trip in the African wilderness. Climbers should familiarize themselves with the signs of altitude sickness and heed the advice of the professionals organizing the ascents.

U.S. citizens should carry a copy of their U.S. passport with them at all times, so that, if questioned by local officials, they have readily available proof of identity and U.S. citizenship. Travelers and U.S. citizens resident in Tanzania are strongly urged to maintain legal immigration status while in Tanzania to avoid difficulties with local immigration authorities. U.S. citizens who are arrested or detained have the right to have the U.S. Embassy notified of their situation and should request that notification be made.

Credit cards may be used at some major hotels, but are not widely accepted in Tanzania. In the larger urban areas, ATM machines are usually available at major banks. Travelers are advised to check with their home banking institution regarding international ATM use. Travelers should bring sufficient cash or traveler's checks for their trip if they will be spending time outside of the large cities.

Photography of military installations is forbidden. Individuals have been detained and/or had their cameras and film confiscated for taking pictures of hospitals, schools, bridges, industrial sites, and airports. Installations that are prohibited from being photographed are not always marked.

There have been several recent cases of American businesspersons who have fallen victim to scams involving the sale of copper and other resources at cut-rate prices. Potential buyers are urged to be very cautious of good deals offered by agents based in Tanzania. Such precautions as using an escrow account arranged by an attorney outside of Tanzania should be considered.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating Tanzanian laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Tanzania are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in Tanzania are encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration web site so that they can obtain updated information on travel and security within Tanzania. Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency. The U.S. Embassy is located at 686 Old Bagamoyo Road, Msasani, Dar es Salaam. The telephone number is [255] (22)266 8001. The direct extension for the Consular Section is x4122. After hours, the Embassy Duty Officer can be reached through the main embassy number. The Consular Section fax number is [255] (22) 266 8274. The email address for American Citizen Services is drsacs@state.gov. The Embassy web site is http://tanzania.usembassy.gov.

Intercountry Adoption

October 2006

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is based on public sources and current understanding. Questions involving foreign and U.S. immigration laws and legal interpretation should be addressed respectively to qualified foreign or U.S. legal counsel.

Patterns of Immigration: Please review current reports online at http://adoption.state.gov.

Adoption Authority:
Department of Social Welfare
Regional C.C.M Building, Lumumba Street
P.O. Box 1949
Dar Es Salaam, Tanzania
Telephone: (+255) 22-218-4281

Eligibility Requirements For Adoptive Parent(s): Under Tanzanian law, an unmarried person must be at least 25 years of age and be at least 21 years older than the child. A single male cannot adopt a female child except by court order which is granted only under exceptional circumstances.

Residency Requirements: In order to adopt a child in Tanzania, the American citizen or citizens must be residents of Tanzania. The Tanzanian Department of Social Welfare considers a person to be resident if that person holds a Resident Permit (Class A, B or C) a Dependent's Pass or an Exemption Permit and lives in Tanzania. This requirement is never waived.

Time Frame: Adoptions may take up to 18 months in Tanzania.

Adoption Agencies and Attorneys: Upon inquiry, the Department of Social Welfare will provide a list of participating adoption agencies and attorneys to adopting parents.

Department of Social Welfare
Regional C.C.M Building, Lumumba Street
P.O. Box 1949
Dar Es Salaam, Tanzania
Telephone: (+255) 22-218-4281

Adoption Fees: The Government of Tanzania does not charge a fee for adoption but legal fees can be between $800 and $1,500.

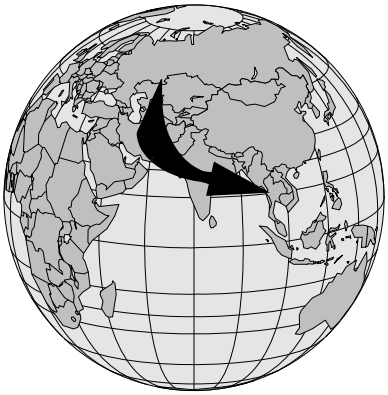
Adoption Procedures: Prospective adoptive parents contact the District Social Welfare Office for an application form for a child for foster care. Prospective adoptive parents must arrange with the District Social Welfare Officer to begin the homestudy process. The homestudy will consist of at least four interviews with the family, including at least one visit to the family's home. The homestudy will evaluate the prospective adoptive parents' physical, mental and emotional health as well as financial and marital (in the case of married couples) stability.

The District Social Welfare Officer will send the foster care application, homestudy and other relevant supporting documents to the Commissioner for Social Welfare for approval. When the foster care application has been approved by the Commissioner for Social Welfare, the District Social Welfare Officer will identify children who are eligible for adoption and who meet the criteria of the prospective adoptive parents. Once a child has been identified and accepted by the prospective adoptive parents, the District Social Welfare Officer will place the identified child with the prospective adoptive parents for a foster care period of not less than three months. After the foster care period, the prospective adoptive parents will meet with the District Social Welfare Officer to discuss whether they wish to adopt the child and whether the District Social Welfare Officer intends to approve an application by the prospective parents to adopt. Provided that the District Social Welfare Officer approves the adoption, the District Social Welfare Officer will submit a report and recommendation to the Commissioner of Social Welfare.

If they have not already done so, prospective adoptive parents retain Tanzanian attorney experienced in adoption procedures. The Law Society of Tanganyika should be able to recommend an attorney or a firm of attorneys to the prospective adoptive parents. Also, the U.S. Embassy in Dar es Salaam maintains a list of attorneys that adoptive parents may consult.

The prospective adoptive parent's attorney will assist them in filing a petition to legally adopt their foster child and obtain a court order from the High Court. Close contact should be maintained with the Social Welfare Department during this period, as that agency will submit a report to the Court in its capacity as the court-appointed Guardian ad Litem of the child.

In addition to the High Court Adoption Order, the prospective adoptive parent's attorney should also assist you in obtaining an Adoption Certificate for the adopted child. All children will need a valid passport issued by their country of origin.



Required Documents: No specific documents are required, although it may be prudent to carry documents relating to identity, marital status, family status and financial means. Passports must include valid residency permits.

Embassy of the United Republic of Tanzania
2139 R Street, N.W.
Washington, D.C. 20008
Tel: (202) 939-6125
Fax: (292) 797-7408

U.S. Immigration Requirements: Prospective adoptive parents are strongly encouraged to consult the Department of Homeland Security's, United States Citizenship and Immigration Service (USCIS) publication M-249, *The Immigration of Adopted and Prospective Adoptive Children*, as well as the Department of State publication, *Intercountry Adoptions.* Please see the *Intercountry Adoption* section of this book for more details and review current reports online at http://adoption.state.gov.

Embassy of the United States of America
686 Old Bagamoyo Road
Msasani, P.O. Box 9123
Dar Es Salaam, Tanzania
Email: drsacs@state.gov
Website:
http://tanzania.usembassy.gov

Additional Information: Specific questions about adoption in Tanzania may be addressed to the U.S. Embassy in Dar es Salaam, Tanzania. General questions regarding intercountry adoption may be addressed to the Office of Children's Issues, U.S. Department of State, CA/OCS/CI, SA-29, 4th Floor, 2201 C Street, NW, Washington, D.C. 20520-4818, toll-free Tel: 1-888-407-4747.

THAILAND

Compiled from the July 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Kingdom of Thailand

PROFILE

Geography

Area: 513,115 sq. km. (198,114 sq. mi.); equivalent to the size of France, or slightly smaller than Texas.
Cities: Capital—Bangkok (population 9,668,854); Nakhon Ratchasima (pop. 437,386 for Muang district and 2,565,685 for the whole province), Chiang Mai (pop. 247,672 for Muang district and 1,595,855 for the whole province).
Terrain: Densely populated central plain; northeastern plateau; mountain range in the west; southern isthmus joins the land mass with Malaysia.
Climate: Tropical monsoon.

People

Nationality: Noun and adjective—Thai.
Population: (2006) 65.28 million. (Data based on Bank of Thailand.)
Work force: (2006) 36.43 million.
Annual population growth rate: (2006 est.) 0.3%.
Ethnic groups: Thai 89%, other 11%.
Religions: Buddhist 94-95%, Muslim 4-5%, Christian, Hindu, Brahmin, other.
Languages: Thai (official language); English is the second language of the elite; regional dialects.
Education: Years compulsory—12. Literacy—94.9% male, 90.5% female.
Health: (2006 est.) Infant mortality rate—19.5/1,000. Life expectancy—68 years male, 75 years female.

Government

Type: Thailand remains a constitutional monarchy. Prime Minister, Cabinet, and National Legislative Assembly were appointed by the leaders of a September 19, 2006 coup d'etat. Military leaders constitute a Council for National Security. The current structure will remain in place until a democratically elected government takes office.
Constitution: Thailand adopted its current constitution following an August 19, 2007 referendum.
Independence: Never colonized; traditional founding date 1238.
Government branches: Executive—King (chief of state), Prime Minister (head of government). Legislative—National Assembly (unicameral, appointed by the military leadership). Judicial—composed of the Constitutional Tribunal, the Courts of Justice, and the Administrative Courts.
Political subdivisions: 76 provinces, including Bangkok municipality, subdivided into 877 districts, 7,255 tambon administration, and 74,944 villages.
Political parties: Multi-party system; Communist Party is prohibited.
Suffrage: Universal and compulsory at 18 years of age.

Economy

GDP: (2007) $246 billion.
Annual GDP growth rate: (2007) 4.8%.
Per capita income: (2007) $3,737.
Unemployment rate: (2007) 1.5% of total labor force.
Natural resources: Tin, rubber, natural gas, tungsten, tantalum, timber, lead, fish, gypsum, lignite, fluorite.
Agriculture: (8.9% of GDP) Products—rice, tapioca, rubber, corn, sugarcane, coconuts, soybeans.
Industry: Types—tourism, textiles, garments, agricultural processing, cement, integrated circuits, jewelry, electronics, and auto assembly.
Trade: (2007) Merchandise exports—$152.5 billion. Products—automatic data processing machines and parts, automobiles and parts, precious stones and jewelry, refined fuels, rubber, electronic integrated circuits, polymers of ethylene and propylene, rice, iron and steel and their products, rubber products, chemical products. Major markets—ASEAN, EU, U.S., Japan, China, and Singapore. Merchandise imports—$140.0 billion. Products—crude oil, machinery and parts, electrical machinery and parts, chemicals, iron and steel and their products, electrical circuits panels, computers and

parts, other metal ores and metal waste scrap, ships and boats and floating structure, jewelry including silver and gold. Major suppliers—Japan, ASEAN, China, EU, U.S. and Malaysia.

PEOPLE

Thailand's population is relatively homogeneous. More than 85% speak a dialect of Thai and share a common culture. This core population includes the central Thai (33.7% of the population, including Bangkok), Northeastern Thai (34.2%), northern Thai (18.8%), and southern Thai (13.3%).

The language of the central Thai population is the language taught in schools and used in government. Several other small Thai-speaking groups include the Shan, Lue, and Phutai.

Up to 12% of Thai are of significant Chinese heritage, but the Sino-Thai community is the best integrated in Southeast Asia. Malay-speaking Muslims of the south comprise another significant minority group (2.3%). Other groups include the Khmer; the Mon, who are substantially assimilated with the Thai; and the Vietnamese. Smaller mountain-dwelling tribes, such as the Hmong and Mein, as well as the Karen, number about 788,024.

The population is mostly rural, concentrated in the rice-growing areas of the central, northeastern, and northern regions. However, as Thailand continues to industrialize, its urban population—31.6% of total population, principally in the Bangkok area—is growing.

Thailand's highly successful government-sponsored family planning program has resulted in a dramatic decline in population growth from 3.1% in 1960 to less than 1% today. Life expectancy also has risen, a positive reflection of Thailand's efforts at public health education. However, the AIDS epidemic has had a major impact on the Thai population. Today, over 500,000 Thais live with HIV or AIDS—approximately 1.4% of the adult population. Each year, 25-30,000 Thais die from AIDS-related causes. Ninety percent of them are aged 20-49, the most productive sector of the workforce. The situation could have been worse; an aggressive public education campaign in the early 1990s reduced the number of new HIV infections from over 100,000 annually to around 15,000 annually now.

The constitution mandates 12 years of free education, however, this is not provided universally. Education accounts for 18.0% of total government expenditures.

Theravada Buddhism is the major religion of Thailand and is the religion of about 95% of its people. The government permits religious diversity, and other major religions are represented. Spirit worship and animism are widely practiced.

HISTORY

Southeast Asia has been inhabited for more than half a million years. Archaeological studies suggest that by 4000 BC, communities in what is now Thailand had emerged as centers of early bronze metallurgy. This development, along with the cultivation of wet rice, provided the impetus for social and political organization. Research suggests that these innovations may actually have been transmitted from there to the rest of Asia, including to China.

The Thai are related linguistically to Tai groups originating in southern China. Migrations from southern China to Southeast Asia may have occurred in the 6th and 7th centuries. Malay, Mon, and Khmer civilizations flourished in the region prior to the arrival of the ethnic Tai.

Thais date the founding of their nation to the 13th century. According to tradition, in 1238, Thai chieftains overthrew their Khmer overlords at Sukhothai and established a Thai kingdom. After its decline, a new Thai kingdom emerged in 1350 on the Chao Praya River. At the same time, there was an equally important Tai kingdom of Lanna, centered in Chiang Mai, which rivaled Sukhothai and Ayutthaya for centuries, and which defines northern Thai identity to this day.

The first ruler of the Kingdom of Ayutthaya, King Rama Thibodi, made two important contributions to Thai history: the establishment and promotion of Theravada Buddhism as the official religion—to differentiate his kingdom from the neighboring Hindu kingdom of Angkor—and the compilation of the Dharmashastra, a legal code based on Hindu sources and traditional Thai custom. The Dharmashastra remained a tool of Thai law until late in the 19th century. Beginning with the Portuguese in the 16th century, Ayutthaya had some contact with the West, but until the 1800s, its relations with neighboring kingdoms and principalities, as well as with China, were of primary importance.

After more than 400 years of power, in 1767, the Kingdom of Ayutthaya was brought down by invading Burmese armies and its capital burned. After a single-reign capital established at Thonburi by Taksin, a new capital city was founded in 1782, across the Chao Phraya at the site of present-day Bangkok, by the founder of the Chakri dynasty. The first Chakri king was crowned Rama I. Rama I's heirs became increasingly concerned with the threat of European colonialism after British victories in neighboring Burma in 1826.

The first Thai recognition of Western power in the region was the Treaty of Amity and Commerce with the United Kingdom in 1826. In 1833, the United States began diplomatic exchanges with Siam, as Thailand was called until 1938. However, it was during the later reigns of Rama IV (or King Mongkut, 1851-68), and his son Rama V (King Chulalongkorn (1868-1910), that Thailand established firm rapprochement with Western powers. The Thais believe that the diplomatic skills of these monarchs, combined with the modernizing reforms of the Thai

Government, made Siam the only country in South and Southeast Asia to avoid European colonization.

In 1932, a bloodless coup transformed the Government of Thailand from an absolute to a constitutional monarchy. King Prajadhipok (Rama VII) initially accepted this change but later surrendered the kingship to his 10-year-old nephew. Upon his abdication, King Prajadhipok said that the obligation of a ruler was to reign for the good of the whole people, not for a select few.

Although nominally a constitutional monarchy after 1932, Thailand was ruled by a series of military governments interspersed with brief periods of democracy. Following the 1932 revolution that imposed constitutional limits on the monarchy, Thai politics was dominated for a half-century by a military and bureaucratic elite.

Changes of government were effected primarily by means of a long series of mostly bloodless coups. Thailand was occupied by the Japanese during the Second World War until Japan's defeat in 1945.

Beginning with a brief experiment in democracy during the mid-1970s, civilian democratic political institutions slowly gained greater authority, culminating in 1988 when Chatichai Choonavan—leader of the Thai Nation Party—assumed office as the country's first democratically elected Prime Minister in more than a decade. Three years later, yet another bloodless coup ended his term.

Shortly afterward, the military appointed Anand Panyarachun, a businessman and former diplomat, to head a largely civilian interim government and promised to hold elections in the near future.

However, following inconclusive elections, former army commander Suchinda Kraprayoon was appointed Prime Minister. Thais reacted to the appointment by demanding an end to military influence in government. Demonstrations were violently suppressed by the military; in May 1992, soldiers killed at least 50 protesters.

Domestic and international reaction to the violence forced Suchinda to resign, and the nation once again turned to Anand Panyarachun, who was named interim Prime Minister until new elections in September 1992. In those elections, the political parties that had opposed the military in May 1992 won by a narrow majority, and Chuan Leekpai, a leader of the Democratic Party, became Prime Minister. Chuan dissolved Parliament in May 1995, and the Thai Nation Party won the largest number of parliamentary seats in subsequent elections. Party leader Banharn Silpa-Archa became Prime Minister but held the office only little more than a year. Following elections held in November 1996, Chavalit Youngchaiyudh formed a coalition government and became Prime Minister. The onset of the Asian financial crisis caused a loss of confidence in the Chavalit government and forced him to hand over power to Chuan Leekpai in November 1997. Chuan formed a coalition government based on the themes of prudent economic management and institution of political reforms mandated by Thailand's 1997 constitution.

In January 2001, telecommunications multimillionaire Thaksin Shinawatra and his Thai Rak Thai (TRT) party won a decisive victory on a populist platform of economic growth and development. In the February 2005 elections, Thaksin was re-elected by an even greater majority, sweeping 377 out of 500 parliamentary seats. Soon after Prime Minister Thaksin's second term began, allegations of corruption emerged against his government. Peaceful anti-government mass demonstrations grew, and thousands marched in the streets to demand Thaksin's resignation. Prime Minister Thaksin dissolved the Parliament in February 2006 and declared snap elections in April. The main opposition parties boycotted the polls, and the judiciary subsequently annulled the elections.

Before new elections could be held, on September 19, 2006 in a non-violent coup d'etat, a group of top military officers overthrew the caretaker administration of Thaksin Shinawatra, repealed the constitution, and abolished both houses of Parliament. Soon thereafter, the coup leaders promulgated an interim constitution and appointed Surayud Chulanont as interim Prime Minister. In a national referendum on August 19, 2007, a majority of Thai voters approved a new constitution drafted by an assembly appointed by the coup leaders. The interim government held multi-party elections under provisions of the new constitution on December 23, 2007, which resulted in the People's Power Party (PPP) winning a plurality of 233 of the 480 seats in the lower house of Parliament. PPP leader Samak Sundaravej formed a coalition government and formally took office as Prime Minister on February 6, 2008.

Thailand's southern border provinces have long been host to a secessionist movement. Since 2004, violent ethnic Malay separatists have conducted an insurgency in the provinces of Narathiwat, Yala, Pattani, and Songkhla against symbols and representatives of government authority, as well as against civilians, which has resulted in hundreds of deaths.

Since the end of the Second World War in 1945, Thailand has had very close relations with the United States. Threatened by communist revolutions in neighboring countries such as Vietnam, Cambodia, and Laos, Thailand actively sought U.S. assistance to contain communist expansion in the region. Thailand also has been an active member in multilateral organizations like the Association of Southeast Asian Nations (ASEAN) and the Asia-Pacific Economic Cooperation (APEC) forum.

GOVERNMENT AND POLITICAL CONDITIONS

Thailand is a constitutional monarchy. From 1992 and until the 2006 coup, the country was considered a functioning democracy with constitutional changes of government. Generally free and fair multi-party elections held in December 2007 subsequently restored democratic governance. The King has been given little direct power under Thailand's constitutions but is a symbol of national identity and unity. King Bhumibol (Rama IX)—who has been on the throne since 1946—commands enormous popular respect and moral authority, which he has used on occasion to resolve political crises that have threatened national stability.

Under the 2007 constitution, the National Assembly consists of two chambers—the Senate and the House of Representatives. The Senate is a non-partisan body with 150 members, 76 of whom are directly elected (one per province). The remaining 74 are appointed by a panel comprised of judges and senior independent officials from a list of candidates compiled by the Election Commission. The House has 480 members, 400 of whom are directly elected from constituent districts and the remainder drawn proportionally from party lists.

Thailand's legal system blends principles of traditional Thai and Western laws. Under the constitution, the Constitutional Court is the highest court of appeals, though its jurisdiction is limited to clearly defined constitutional issues. Its members are nominated by a committee of judges, leaders in Parliament, and senior independent officials, whose nominees are confirmed by the Senate and appointed by the King. The Courts of Justice have jurisdiction over criminal and civil cases and are organized in three tiers: Courts of First Instance, the Court of Appeals, and the Supreme Court of Justice. Administrative courts have jurisdiction over suits between private parties and the government, and cases in which one government entity is suing another. In Thailand's southern border provinces, where Muslims constitute the majority of the population, Provincial Islamic Committees have limited jurisdiction over probate, family, marriage, and divorce cases.

Thailand's 76 provinces include the metropolis of greater Bangkok.

Bangkok's governor is popularly elected, but those of the remaining provinces are career civil servants appointed by the Ministry of Interior.

Principal Government Officials

Last Updated: 11/12/08

Thai officials are addressed by the first element in their names.

King: **PHUMIPHON Adunyadet**
Prime Min.: **SOMCHAI Wongsawat**
Dep. Prime Min.: **CHAWALIT Yongchaiyut**
Dep. Prime Min.: **CHAWARAT Chanweerakun**
Dep. Prime Min.: **OLARN Chaipravat**
Dep. Prime Min.: **SANAN Kachornprasat**
Dep. Prime Min.: **SOMPONG Amornwiwat**
Min. to the Prime Min.'s Office: **SUKHUMPONG Ngonkham**
Min. to the Prime Min.'s Office: **SUPON Fong-ngam**
Min. of Agriculture & Cooperatives: **SOMSAK Prisnananthakun**
Min. of Commerce: **CHAIYA Sasomsab**
Min. of Culture: **WORAWAT Ua-apinyakun**
Min. of Defense: **SOMCHAI Wongsawat**
Min. of Education: **SRIMUANG Charoensiri**
Min. of Energy: **WANNARAT Charnnukun**
Min. of Finance: **SUCHAT Thadathamrongwet**
Min. of Foreign Affairs: **SOMPONG Amornwiwat**
Min. of Industry: **PRACHA Promnok**
Min. of Information & Communications Technology: **MAN Patanothai**
Min. of Interior: **KOWIT Wattana**
Min. of Justice: **SOMSAK Kiatsuranon**
Min. of Labor: **URAIWAN Thienthong**
Min. of Natural Resources & Environment: **ANONGWAN Thepsuthin**
Min. of Public Health: **CHALERM Yubamrung**
Min. of Science & Technology: **WUTTHIPONG Chaisaeng**
Min. of Social Development & Human Security: **UDOMDET Rattanasathien**
Min. of Tourism & Sports: **WEERASAK Kowsurat**
Min. of Transport: **SANTI Promphan**
Governor, Bank of Thailand: **THARISA Watthanaket**
Ambassador to the US:
Permanent Representative to the UN, New York: **DON Pramudwinai**

Thailand maintains an embassy in the United States at 1024 Wisconsin Ave. NW, Washington DC 20007 (tel. 202-944-3600). Consulates are located in New York City, Chicago, and Los Angeles.

ECONOMY

The Thai economy is export-dependent, with exports of goods and services accounting for over 70% of GDP in 2007. Thailand's recovery from the 1997-98 Asian financial crisis relied largely on external demand from the United States and other foreign markets. From 2001-2006, the administration of former Prime Minister Thaksin embraced a "dual track" economic policy that combined domestic stimulus programs with Thailand's traditional promotion of open markets and foreign investment. Real GDP growth strengthened sharply from 2.2% in 2001 to 7.1% in 2003 and 6.3% in 2004. In 2005-2007, economic expansion moderated, averaging 4.5% to 5.0% real GDP growth, due to domestic political uncertainty, rising violence in Thailand's four southernmost provinces, and repercussions from the devastating Indian Ocean tsunami of 2004. Thailand's economy in 2007 relied heavily on resilient export growth (at an 18.6% annual rate), particularly in the automobile, petrochemicals, and electronics sectors.

Before the 1997 financial crisis, the Thai economy had years of manufacturing-led economic growth—averaging 9.4% for the decade up to 1996. Relatively abundant and inexpensive labor and natural resources, fiscal conservatism, open foreign investment policies, and encouragement of the private sector underlay the economic success in the years up to 1997. The economy is essentially a free-enterprise system. Certain services—such as power generation, transportation, and communications—are state-owned and operated, but the government is considering privatizing them in the wake of the financial crisis. The timetable for privatization of some state-owned enterprises, however, has slipped due to resistance from labor unions and parts of civil society. Despite the resistance, some firms were successfully privatized, such as Airports of Thailand (renamed from Airport Authority of Thailand), PTT Public Company Limited (renamed from the Petroleum Authority of Thailand), and MCOT (renamed from Mass Communication Authority of Thailand).

The Royal Thai Government welcomes foreign investment, and investors who are willing to meet certain requirements can apply for special investment privileges through the Board of Investment. To attract additional foreign investment, the government has modified its investment regulations. In a reaction to former Prime Minister Thaksin's 2006 sale of his telecommunications company to foreign investors, the interim Thai government introduced amendments to the Foreign Business Act in 2007 which would have further restricted non-Thais from owning or controlling businesses operating in the Thai services sector. The National Assembly did not complete consideration of the amendments before its session concluded at the end of 2007. However, the new government has stated its intention to liberalize the act rather than strengthen the restrictions.

The organized labor movement remains weak and divided in Thailand; less than 2% of the work force is unionized. In 2000, the State Enterprise Labor Relations Act (SELRA) was passed, giving public sector employees similar rights to those of private sector workers, including the right to unionize.

Roughly 40% of Thailand's labor force is employed in agriculture (data based on Bank of Thailand.) Rice is the country's most important crop; Thailand is the largest exporter in the world rice market. Other agricultural commodities produced in significant amounts include fish and fishery products, tapioca, rubber, corn, and sugar. Exports of processed foods such as canned tuna, canned pineapples, and frozen shrimp are on the rise.

Thailand's increasingly diversified manufacturing sector is the largest contributor to growth. Industries reg-

istering rapid increases in production included computers and electronics, furniture, wood products, canned food, toys, plastic products, gems, and jewelry. High-technology products such as integrated circuits and parts, hard disc drives, electrical appliances, vehicles, and vehicle parts are now leading Thailand's strong growth in exports. The appreciation of the Thai baht to the U.S. dollar relative to other regional currencies during the 2006-2007 period has dampened some of Thailand's exports, and export sector margins have been affected. To help arrest baht appreciation, the Bank of Thailand applied controls on the import of capital into the country in December 2006. Nevertheless, the baht continued to appreciate.

The United States is Thailand's largest export market and third-largest supplier after Japan and China. While Thailand's traditional major markets have been North America, Japan, and Europe, economic recovery among Thailand's regional trading partners has helped Thai export growth (21.6% in 2004, 15.0% in 2005, 17.4% in 2006, and 18.6% in 2007). Export growth has been highest in some of Thailand's non-traditional export markets including India, China, and the Middle East. Due to domestic political uncertainty and concern about government's economic policies, Thai domestic demand and private investment were flat from early 2006 through late 2007.

Machinery and parts, vehicles, electronic integrated circuits, chemicals, crude oil and fuels, and iron and steel are among Thailand's principal imports. The moderation in import levels (7.0% increase in 2006 versus 26.0% in 2005) reflects the low confidence of both consumers and investors.

Thailand is a member of the World Trade Organization (WTO) and the Cairns Group of agricultural exporters. Tourism contributes significantly to the Thai economy (about 6%). Tourist arrivals, which declined in 2005 due to the tsunami catastrophe, recovered strongly in 2006.

Bangkok and its environs are the most prosperous part of Thailand, and the barren northeast is the poorest. An overriding concern of successive Thai Governments, and a particularly strong focus of the Thaksin government, has been to reduce these regional income differentials, which have been exacerbated by rapid economic growth in and around Bangkok and the financial crisis. The government has tried to stimulate provincial economic growth with programs such as the Eastern Seaboard project and the development of an alternate deep-sea port on Thailand's southern peninsula. It also is conducting discussions with Malaysia to focus on economic development along the Thai-Malaysian border.

Although the economy has demonstrated moderate positive growth since 1999, future performance depends on continued reform of the financial sector, corporate debt restructuring, attracting foreign investment, and improving domestic investment and consumption to balance past reliance on exports. Telecommunications, transportation networks, and electricity generation showed increasing strain during the period of sustained economic growth and may pose a future challenge. Thailand's growing shortage of engineers and skilled technical personnel may limit its future technological creativity and productivity.

FOREIGN RELATIONS

Thailand's foreign policy emphasizes a close and longstanding security relationship with the United States. It also strongly supports ASEAN's efforts to promote economic development, social integration, and stability throughout the region. Thailand will assume the chairmanship of ASEAN in July 2008 and will host the ASEAN Summit (heads of government meeting) in late 2008.

Thailand participates fully in international and regional organizations. It has developed increasingly close ties with other ASEAN members—Indonesia, Malaysia, the Philippines, Singapore, Brunei, Laos, Cambodia, Burma, and Vietnam—whose foreign and economic ministers hold annual meetings. Regional cooperation is progressing in economic, trade, banking, political, and cultural matters.

Thailand continues to take an active role on the international stage. When East Timor gained independence from Indonesia, Thailand, for the first time in its history, contributed troops to the international peacekeeping effort. As part of its effort to increase international ties, Thailand has reached out to such regional organizations as the Organization of American States (OAS) and the Organization for Security and Cooperation in Europe (OSCE). Thailand has contributed troops to reconstruction efforts in Afghanistan and Iraq.

U.S.-THAI RELATIONS

Since World War II, the United States and Thailand have developed close relations, as reflected in several bilateral treaties and by both countries' participation in UN multilateral activities and agreements. The principal bilateral arrangement is the 1966 Treaty of Amity and Economic Relations, which facilitates U.S. and Thai companies' economic access to one another's markets. Other important agreements address civil uses of atomic energy, sales of agricultural commodities, investment guarantees, and military and economic assistance. In June 2004 the United States and Thailand initiated negotiations on a free trade agreement which, when concluded, will reduce and eliminate barriers to trade and investment between the two countries. These negotiations were placed on hold following the dissolution of the Thai Parliament in February 2006 and the subsequent coup in September.

The United States and Thailand are among the signatories of the 1954 Manila pact of the former Southeast Asia Treaty Organization (SEATO).

Article IV(1) of this treaty provides that, in the event of armed attack in the treaty area (which includes Thailand), each member would "act to meet the common danger in accordance with its constitutional processes." Despite the dissolution of the SEATO in 1977, the Manila pact remains in force and, together with the Thanat-Rusk communiqué of 1962, constitutes the basis of U.S. security commitments to Thailand. Thailand continues to be a key security ally in Asia, along with Australia, Japan, the Philippines, and South Korea. In December 2003, Thailand was designated a Major Non-NATO Ally.

Thailand's stability and independence are important to the maintenance of peace in the region. Economic assistance has been extended in various fields, including rural development, health, family planning, education, and science and technology. The formal U.S. Agency for International Development (USAID) program ended in 1995. However, there are a number of targeted assistance programs which continue in areas of mutually defined importance, including: health and HIV/AIDS programming; refugee assistance; and trafficking in persons. The U.S. Peace Corps in Thailand has approximately 100 volunteers, focused on primary education, with an integrated program involving teacher training, health education, and environmental education.

Thailand has received U.S. military equipment, essential supplies, training, and assistance in the construction and improvement of facilities and installations for much of the period since 1950. Over recent decades, U.S. security assistance included military training programs carried out in the United States and elsewhere.

A small U.S. military advisory group in Thailand oversaw the delivery of equipment to the Thai Armed Forces and the training of Thai military personnel in its use and maintenance. Funding for the International Military Education and Training and the Foreign Military Financing programs, along with selected other programs totaling $29 million, was suspended following the September 19, 2006 coup d'etat in Thailand. Funding for these programs resumed after a democratically elected government took office in February 2008. As part of their mutual defense cooperation over the last decade, Thailand and the United States have developed a vigorous joint military exercise program, which engages all the services of each nation and averages 40 joint exercises per year.

Thailand remains a trafficking route for narcotics from the Golden Triangle—the intersection of Burma, Laos, and Thailand—to both the domestic Thai and international markets. The large-scale production and shipment of opium and heroin shipments from Burma of previous years have largely been replaced by widespread smuggling of methamphetamine tablets, although heroin seizures along the border continue to take place with some frequency. The United States and Thailand work closely together and with the United Nations on a broad range of programs to halt illicit drug trafficking and other criminal activity, such as trafficking in persons. The U.S. supports the International Law Enforcement Academy (ILEA) in Bangkok, which provides counter-narcotics and anti-crime capacity-building programs to law enforcement and judicial officials from a number of regional countries.

Trade and Investment

The United States is Thailand's second-largest trading partner after Japan; in 2007 merchandise imports from Thailand totaled $22.6 billion, and merchandise exports totaled $8.4 billion. The U.S., Japan, Taiwan, Singapore, and the European Union are among Thailand's largest foreign investors. U.S. investment, concentrated in the petroleum and chemicals, finance, consumer products, and automobile production sectors, is estimated at $23 billion.

TRAVEL

Consular Information Sheet

May 1, 2008

Country Description: Thailand is a constitutional monarchy. Thailand adopted its current constitution following an August 19, 2007, referendum. Multi-party elections held on December 23, 2007, under the provisions of the new constitution resulted in the People's Power Party (PPP) winning a plurality of the seats in the lower house of Parliament and the formation of a coalition government. Most of the population is Buddhist and ethnically Thai. Standard Thai is the official language of Thailand and is spoken in every province, though many areas also have a local dialect. Most Thais working in the tourist industry and in businesses dealing with foreigners can speak at least rudimentary English. Thailand is a popular travel destination, and tourist facilities and services are available throughout the country. At many tourist attractions, including national parks, foreigners are charged admission fees up to ten times higher than those charged to Thais.

Entry Requirements: U.S. citizen tourists staying for fewer than 30 days do not require a visa, but must possess a passport and may be asked to show an onward/return ticket. Effective October 1, 2006, persons entering Thailand without a visa will be allowed to stay in Thailand for 30 days per visit. The total duration of stay in Thailand for persons who enter Thailand without a visa cannot exceed 90 days during any six-month period, counting from the date of first entry. Travelers must pay a Passenger Service Charge in Thai baht when departing from any of Thailand's international airports.

When a traveler enters the country, Thai Immigration stamps in his or her passport the date on which the traveler's authorized stay in Thailand will expire. Any traveler remaining in Thailand beyond this date without having received an official extension will be assessed an immediate cash fine when departing Thailand. Any foreigner found by police to be out of legal status prior to departure (during a Thai Immigration "sweep" through a guesthouse, for example) will be jailed, fined, and then deported at his or her own expense, and may be barred from reentering Thailand.

In this regard, American citizens should be aware that private "visa extension services," even those advertising in major periodicals or located close to Immigration offices or police stations, are illegal. A number of Americans are arrested at border crossings each year when the visas and entry stamps they have obtained through these illegal services are discovered to be counterfeit.

Thailand's Entry/Exit information is subject to change without notice. For further information on Thailand's entry/exit requirements, contact the Royal Thai Embassy, 1024 Wisconsin Avenue NW, Washington, DC 20007, telephone (202) 944-3600, or contact the Thai consulates in Chicago, Los Angeles, or New York City. Visit the Embassy of Thailand web site at http://www.thaiembdc.org for the most current visa information.

Safety and Security: The State Department is concerned that there is an increased risk of terrorism in Southeast Asia, including in Thailand. American citizens traveling to Thailand should therefore exercise caution, especially in locations where Westerners congregate, such as clubs, discos, bars, restaurants, hotels, places of worship, schools, outdoor recreation venues, tourist areas, beach resorts, and other places frequented by foreigners. They should remain vigilant with regard to their personal security and avoid crowds and demonstrations. For more information on terrorist threats against Americans worldwide, and steps that U.S. citizens should take as a result of these threats, please see the Worldwide Caution.

On September 30, 2007, a small bomb exploded near the Army headquarters in Bangkok, causing minor injuries to passersby, and on May 6, 2007, a small bomb exploded near the Chitralada Palace. On January 30, 2007, two grenades were fired at the offices of a local newspaper in northern Bangkok and a nearby hotel car park. There were no reports of casualties. On December 31, 2006, a series of bombs exploded at six different locations in Bangkok. The bombs killed three Thai citizens and injured dozens, including six foreign tourists. It remains unclear who is behind the bombings. The Department of State advises all American citizens residing in or traveling to Bangkok to monitor events closely, to avoid any large public gatherings, and to exercise discretion when moving about Bangkok.

The far south of Thailand has been experiencing almost daily incidents of criminally and politically motivated violence, including incidents attributed to armed local separatist/extremist groups. On March 15, 2008, two bombs exploded at the CS Pattani Hotel in Pattani Province in southern Thailand. Two people died and thirteen were injured. A car bomb exploded in Yala Province on the same day, killing the driver. Although the extremist groups have continued to focus primarily on Thai government interests in the southern provinces, some of the recent violence in the area has targeted public places, including areas where tourists may congregate. In February 2007, Thai press reported that senior Thai officials expressed concern the violence in the south could move to Bangkok, particularly during Thai holidays and special occasions. On September 17, 2006, a series of bombs detonated in a commercial district of Hat Yai, killing one American citizen and injuring another. On August 31, 2006, a series of 22 bombs exploded inside commercial banks in Yala province, injuring 28 people. In 2005 two American citizens were injured when a bomb detonated in the Hat Yai airport. Attacks in the area have increasingly been targeted against commercial areas where foreigners congregate. The Department of State urges U.S. citizens to defer

non-emergency travel to the far south of Thailand: Narathiwat, Pattani, Yala, Satun and Songkhla provinces, including the town of Hat Yai. If U.S. citizens must travel to these areas, they should exercise special caution and remain vigilant with regard to their personal security. Travelers should be aware that Thai authorities have on occasion instituted special security measures in affected areas, such as curfews, military patrols, or random searches of train passengers.

Travelers should also be aware that between 2004 and 2006, seven Lao- and Hmong-American citizens were murdered in northern and northeastern Thailand near the border with Laos. During the same period, a number of non-Americans with ties to Laos were murdered in this region of Thailand. In addition, in March 2006, a Hmong-American disappeared from his residence in Chiang Mai along with seven other individuals. In most of these cases, no arrests have been made. If U.S. citizens, particularly Lao-Americans or Hmong-Americans, must travel to these areas, they should exercise caution and remain vigilant with regard to their personal security. It is recommended that persons wishing to travel to border areas check first with the Thai Police and the U.S. Consulate General in Chiang Mai or the U.S. Embassy in Bangkok or the U.S. Embassy in Vientiane. In addition to these cases, three Hmong-American men went missing in August 2007 after reportedly going on a business trip to Xieng Khouang Province in Laos. The Government of Laos stated that the three departed Laos for Thailand, but none of the three has contacted family members in the U.S. since they were last seen in 2007.

The Thai/Burma border is the site of on-going conflicts between the Burmese Army and armed opposition groups as well as clashes between Thai security forces and armed drug traffickers. Pirates, bandits and drug traffickers operate in these border areas. There remains a possibility of significant flare-ups of military activity on the Burmese side of the border that could spill over into immediately adjacent areas of northern Thailand. Visitors should travel off-road in undeveloped areas only with local guides who are familiar with the area. Border closings and re-openings occur frequently, and U.S. citizens considering traveling into Burma from Thailand should be aware that in the event of a border closure they may not be able to re-enter Thailand. In light of the continuing unsettled situation along Thailand border with Burma and the possibility of frequent closings to all traffic, the Department of State recommends that all Americans exercise caution when traveling in remote or rural areas immediately adjacent to the Burma border. Tourists should obtain information from Thai authorities about whether official border crossing points are open, and should cross into neighboring countries only at designated crossing points. Licensed guides can help ensure that trekkers do not cross inadvertently into a neighboring country.

Thailand experienced a number of large, public demonstrations, primarily in Bangkok and Chiang Mai during the political unrest that led to a military coup in September 2006. The protests subsided following the return to a democratically elected government; however a potential for renewed protests remains.All demonstrations are unpredictable, and any demonstration can turn violent without warning. For this reason, the Embassy encourages all Americans to monitor local media for announcements of possible demonstrations and to avoid the areas where demonstrations might occur. If a demonstration is expected to pass near U.S. Embassy facilities, Embassy entrances and functions may be restricted, depending on circumstances. For the latest security information, Americans traveling abroad should regularly monitor the Department of State, Bureau of Consular Affairs' web site, where the current Travel Warnings and Travel Alerts including the Worldwide Caution Travel Alert, can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S. and Canada, or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: Although the crime threat in Bangkok remains lower than that in many American cities, crimes of opportunity such as pick-pocketing, purse-snatching, and burglary have become more common in recent years. Travelers should be especially wary when walking in crowded markets, tourist sites and bus or train stations. Many American citizens have reported having passports, wallets, and other valuables stolen in Bangkok's Chatuchak Weekend Market, usually by thieves who cut into purses or bags with a razor and remove items surreptitiously. Police at the Market usually refuse to issue police reports for foreign victims of theft, requiring them instead to travel several miles to the central Tourist Police office. Violent crimes against foreigners are relatively rare.However, there has been a recent upsurge in violent crime against tourists, including the murder of several independent travelers, on the southern islands of Phuket and Koh Samui. Independent travelers should exercise caution and stay in vicinity of other travelers, especially in the beach areas of these islands.

Reports of serious crimes involving taxis or "tuk-tuks" (three-wheeled taxis) are also relatively rare, although attempts to charge excessive fares occur regularly. Several taxi-related incidents involving foreign passengers occur in Bangkok each year. Americans should not hesitate to ask to be let out of a taxi immediately if the driver is acting suspiciously or driving erratically. (See also the Safety and Road Conditions section.)

When arriving at Bangkok's airport, travelers should use only taxis from the airport's official taxi stand, cars from the airport limousine counters, or airport buses. All major hotels in Bangkok can also arrange to have a car and driver meet incoming flights. It is uncommon for Thai taxis to pick up additional passengers. Travelers should be wary of drivers seeking to do so, and should never enter a cab that has someone besides the driver in it.

Americans frequently encounter taxi drivers and others who tout gem stores or entertainment venues. These touts receive kickbacks or commissions that drive up the prices of the goods or services, and travelers should not accept tours or other offers from them. Scams involving gems, city tours, entertainment venues and credit cards are common, especially in areas heavily visited by tourists. Credit cards should be used only in reputable, established businesses, and the amount charged should be checked for accuracy.

The Tourism Authority of Thailand (TAT) receives over 1,000 complaints each year from visitors who have been cheated on gem purchases. Gem scams usually follow a predictable pattern. Someone approaches a tourist outside of a well-known tourist attraction such as the Grand Palace or the Jim Thompson House and says that the attraction is closed. The friendly stranger quickly gains the tourist's confidence, and suggests a visit to a temple that is supposedly open only one day per year; the stranger then mentions in passing that a special once-a-year government-sponsored gem sale is going on, and directs the tourist to a waiting tuk-tuk. At the temple, another stranger—sometimes a foreigner – engages the tourist in conversation and, by seeming coincidence, also mentions the "special" gem sale. The tourist agrees to go look at the gem shop, and is soon convinced to buy thousands of dollars worth of jewels that can supposedly be sold in the U.S. for a 100% profit. When the tourist actually has the goods appraised, they turn out to be of minimal value, and the shop's money-back guarantee is not honored. No matter what a tout may say, no jewelry stores are owned, operated, or sponsored by the Thai Government or by the Thai royal family. Lists of gem dealers who have promised to abide by TAT guidelines are available online at http://www.tatnews.org/special_interest/shopping/979.asp, and detailed information on gem scams can be found on numerous Internet websites. A traveler who has fallen victim to a gem scam should contact the local branch of the Tourist Police, or call their country-wide toll-free number: 1155. Although most bars and entertainment venues operate honestly, some, especially in tourist areas such as Patpong, at times try to charge exorbitant amounts for drinks or unadvertised cover charges, and threaten violence if the charges are not paid. If victimized in this fashion, travelers should not attempt to resolve the problem themselves, but should instead pay the price demanded and then seek out a nearby Tourist Police officer for help in getting restitution. (If no officer is nearby, the Tourist Police may be contacted toll-free by dialing 1155.)

There have been occasional reports of scopolamine drugging perpetrated by prostitutes or unscrupulous bar workers for the purpose of robbery. (Scopolamine is a powerful sedative.) Tourists have also been victimized by drugged food and drink, usually offered by a friendly stranger, sometimes posing as a fellow traveler on an overnight bus or train. In addition, casual acquaintances met in a bar or on the street may pose a threat. Travelers are advised to avoid leaving drinks or food unattended, and should avoid going alone to unfamiliar venues. Some trekking tour companies, particularly in Northern Thailand, have been known to make drugs available to trekkers. Travelers should not accept drugs of any kind, as the drugs may be altered or harmful, and the use or sale of narcotic drugs is illegal in Thailand.

Pirated Merchandise: Counterfeit and pirated goods are widely available in Thailand. The manufacture and sale of pirated goods, including music, movies, software, and counterfeit luxury goods and apparel, is a crime in Thailand and is frequently controlled by organized crime networks. Bringing these goods back to the United States may result in forfeitures and/or fines. For more information on the serious nature of this intellectual property crime, visit the Special 301 Report at http://www.ustr.gov.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

Medical Facilities and Health Information: Medical treatment is generally adequate throughout Thailand. In Bangkok, excellent facilities exist for routine, long-term and emergency health care.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's web site at http://wwwn.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith/en.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Other Health Information: Thailand has been experiencing an epidemic of HIV infection and AIDS. Heterosexual transmission accounts for most HIV infections, and HIV is common among prostitutes of both sexes, as well as among injection drug users. HIV infections among men who have sex with other men appear to be on the rise. Additionally, alco-

holic beverages, medications and drugs may be more potent or of a different composition than similar ones in the United States. Several U.S. citizen tourists die in Thailand each year of apparent premature heart attacks after drinking alcohol or using drugs.

The CDC, WHO, and Thai authorities have confirmed human cases of the H5N1 strain of avian influenza, commonly known as the "bird flu." Travelers to Thailand and other countries affected by the virus are cautioned to avoid poultry farms, contact with animals in live food markets, and any surfaces that appear to be contaminated with feces from poultry or other animals. In addition, the CDC and WHO recommend eating only fully cooked poultry and eggs.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Thailand is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

Traffic moves on the left in Thailand, although motorcycles and motorized carts often drive (illegally) against the traffic flow. The city of Bangkok has heavy traffic composed of motorcycles, cars, trucks, buses, and three-wheeled tuk-tuks. For safety, pedestrians should use overhead walkways whenever possible and should look carefully in both directions before crossing streets, even when using a marked crosswalk with a green "walk" light illuminated. This is particularly true in front of the U.S. Embassy on Bangkok's Wireless Road, where many pedestrians have died crossing the street, and where several American citizens have been seriously injured. The Embassy has instructed its employees to use the pedestrian bridge to cross the road at all times, and other Americans are advised to do the same.

Traffic accidents are common in Thailand, and those involving motorcycles can be particularly deadly. The Embassy has sent a notice to Embassy staff and family members strongly recommending that they refrain from using motorcycles (especially motorcycle taxis), mopeds, and tuk-tuks in Bangkok, and the Embassy advises American visitors and residents to follow this recommendation as well. Use of motorcycle helmets is mandatory, but this law is seldom enforced. The accident rate in Thailand is particularly high during long holidays, when alcohol use and traffic are both heavier than normal. During the Songkran (Thai New Year) holiday in April, the problem is further exacerbated by people throwing water at passing vehicles as part of the traditional celebration.

Paved roads, many of them four lanes wide, connect Thailand's major cities. On the country's numerous two-lane roads, however, slow-moving trucks limit speed and visibility. Speeding, reckless passing, and failure to obey traffic laws is common in all regions of Thailand, as is the consumption by commercial drivers of alcohol, amphetamines and other stimulants. Serious bus crashes occur frequently, especially on overnight trips, and sometimes result in fatalities. Congested roads and a scarcity of ambulances can make it difficult for accident victims to receive timely medical attention. Thailand requires that all vehicles be covered by third-party liability insurance for death or injury, but there is no mandatory coverage for property damage. The Embassy strongly encourages its employees to obtain liability insurance coverage over and above the minimum third party liability insurance required by the Thai Government. American citizen motorists should consider this as well, as the more affluent driver, even if not at fault, is frequently compelled to cover the expenses of the other party in an accident in Thailand.

Travelers in Bangkok may wish to travel about the city using the BTS "Skytrain" elevated mass transit system or the underground Metro system, which operate daily from 6 a.m. to midnight. Bangkok also has an extensive bus system, but buses can be overcrowded, and are often driven with little or no regard for passenger safety. Cities elsewhere in Thailand typically have only rudimentary public transportation, and usually do not have metered taxis. In many cases, motorcycle taxis, tuk-tuks, bicycle-powered rickshaws, and pick-up trucks will be the only options available for travelers without their own transport. Americans should be cautious when using these services, as all can be dangerous in fast or heavy traffic.

Aviation Safety Oversight: The U.S. Federal Aviation Administration (FAA) has assessed the Government of Thailand's Civil Aviation Authority as being in compliance with International Civil Aviation Organization (ICAO) aviation safety standards for oversight of Thailand's air carrier operations. For more information, travelers may visit the FAA's web site at http://www.faa.gov.

On September 16, 2007, One-Two-Go flight OG269 crashed at Phuket International Airport, killing 90 people, including five American citizens. The cause of the accident is still under investigation.

Special Circumstances: Thai customs authorities may enforce strict regulations concerning temporary importation into or export from Thailand of items such as firearms, explosives, narcotics and drugs, radio equipment, books or other printed material and video or audio recordings which might be considered subversive to national security, obscene, or in any way harmful to the public interest and cultural property. It is advisable to contact the Embassy of Thailand in Washington, D.C., or one of the Thai consulates in the United States for specific information regarding customs requirements. Please see our information on Customs Information.

Strong seasonal undercurrents at popular beach resorts pose a sometimes-fatal threat to surfers and swimmers. During the monsoon season from May through October, drowning is the leading cause of death for tourists visiting the resort island of Phuket. Some, but not all, beaches have warning flags to indi-

cate the degree of risk (red flag: sea condition dangerous for swimming; yellow flag: sea condition rough, swim with caution; green flag: sea condition stable).

Boat safety has become an increasing concern in Thailand. Ferries and speedboats used to transport tourists and local nationals to and from the many islands off the Thai mainland are often overcrowded and carry insufficient safety equipment. In January 2005, three U.S. citizen tourists died when the over-crowded speedboat they were in capsized and sank off the coast of Koh Samui. Three months later, two U.S. citizens narrowly escaped death when their dive boat sank off the coast near Phuket. The Department of State encourages U.S. citizens to avoid travel on overcrowded boats, and to ensure that proper safety equipment (including life preservers) is available before boarding any boat or ferry.

The rental of cars, motorbikes and jet skis is common in the tourist areas. Many rental companies ask to hold the renters passport as a deposit. If there is damage to the vehicle, the company often holds the passport until the renter pays for the damage. For this reason, a passport should not be used as a deposit or collateral. There are have been reports that some companies charge the renter for damage that they did not cause. Renters should be certain to examine the vehicle and note any pre-existing damage before operating the vehicle.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating Thai laws, even unknowingly, may be expelled, arrested or imprisoned.

In this connection, it is a criminal offense to make negative comments about the King or other members of the royal family. Thais hold the King in the highest regard, and it is a serious crime to make critical or defamatory comments about him. This particular crime, called "lese majeste," is punishable by a prison sentence of three to fifteen years. Purposely tearing or destroying Thai bank notes, which carry an image of the King, may be considered such an offense, as can spitting on or otherwise defiling an official uniform bearing royal insignia.

The Thai Government has publicly stated that it will not tolerate the use of Thai territory as a base by groups trying to overthrow or destabilize the governments of nearby countries. Numerous American citizens have been arrested or detained under suspicion of carrying out such activities; sometimes these detentions are carried out by military authorities, and the Embassy does not learn of them until many days after the fact. Many other Americans suspected of advocating the armed overthrow of other governments have been "blacklisted" from entering the country. Americans should be aware that attempts to overthrow foreign governments by force may violate U.S. law as well as Thai law.

Penalties for the possession of, use of, or trafficking in illegal drugs in Thailand are severe. Convicted offenders can expect long prison sentences under harsh conditions, and often heavy fines as well. Thailand also has a death penalty for serious drug offenses, and has executed convicted traffickers. The U.S. Embassy frequently does not learn of the arrest of U.S. citizens for minor drug offenses, particularly in southern Thailand, until several days after the incident.

Engaging in illicit sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States. Please see our information on Criminal Penalties.

Thai police occasionally raid discos, bars, or nightclubs looking for underage patrons and drug users. During the raids, they typically check the IDs of all customers in the establishment, and then make each person provide a urine sample to be checked for narcotics. Foreigners are not excused from these checks, and anyone whose urine tests positive for drugs is arrested and charged. Although some Thai civil libertarians have questioned the constitutionality of these forced urine tests, the Embassy is unaware of any successful challenge to the practice, and customers can be jailed if they do not cooperate.

Shoplifting, even for low-value goods is strictly prosecuted. Arrests for shoplifting even low-value items can result in large fines and lengthy detention.

Registration and Embassy Locations: Americans living in or visiting Thailand are encouraged to register with the U.S. Embassy in Bangkok or the U.S. Consulate in Chiang Mai through the State Department's travel registration web site, and to obtain updated information on travel and security within Thailand. Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency. The Consular Section of the U.S. Embassy is located at 95 Wireless Road in Bangkok; the U.S. mailing address is APO AP 96546-0001. The central switchboard number is (66-2) 205-4000; the American Citizen Services Unit number is (66-2) 205-4049; and the fax number is (66-2) 205-4103. The web site for the U.S. Embassy is http://bangkok.usembassy.gov. American citizens can register online via the web site. Questions regarding American Citizens Services can be submitted by E-mail to acsbkk@state.gov. The U.S. Consulate General in Chiang Mai is located at 387 Wichayanond Road; the U.S. mailing address is Box C, APO AP 96546. The telephone number is (66-53) 252-629 and the fax number is (66-53) 252-633.

Intercountry Adoption

November 2008

The information in this section has been edited from a report available

through the U.S. Department of State Office of Children's Issues. For more information detailed, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Thailand is party to The Hague Convention on Protection of Children and Co-operation in Respect of Intercountry Adoption (Hague Adoption Convention). Therefore all adoptions between Thailand and the United States must meet the requirements of the Convention and United States law implementing the Convention. For detailed information on these requirements for adoption, please review the *Intercountry Adoption* section of this publication and visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

Who Can Adopt? Adoption between the United States and Thailand is governed by The Hague Adoption Convention. Therefore to adopt from Thailand, you must first be found eligible to adopt by the United States Government. In addition to the United States requirements for prospective adoptive parents, Thailand also has the following eligibility requirements for prospective adoptive parents.

Residency Requirements: There are no residency requirements for intercountry adoptions from Thailand.

Age Requirements: Prospective adoptive parents must be at least 25 years old and 15 years older than the child to be adopted.

Marriage Requirements: A prospective adoptive parent can be single or married. If married, the prospective adoptive parent must have a legitimate spouse and must have been married for at least 3 years.

Income Requirements: While there are no formal income requirements, prospective adoptive parents must provide proof of income with their application.

Other Requirements: Prospective adoptive parents must be legally qualified under United States law to adopt a child.

Who Can Be Adopted? Because Thailand is party to The Hague Adoption Convention, children from Thailand must meet the requirements of the Convention in order to be eligible for adoption. In addition to Thailand's requirements, a child must meet the definition of a Convention adoptee for you to bring him or her back to the United States.

Thailand also has specific requirements that a child must meet in order to be eligible for adoption. You cannot adopt a child in Thailand unless he or she meets the requirements outlined below.

Sibling Requirements: It is not possible to apply for more than one child at a time, except for twins, siblings, or in cases of adoption of the children of the applicant's Thai spouse. Department of Social Development and Welfare (DSDW) advises that it is extremely unlikely that an abandoned child under the age of one year would be available for foreign adoption.

Waiting Period: It is hard to predict with certainty how much time is required to complete an adoption in Thailand. The time frames provided in this flyer are intended as guidelines only, and the specific circumstances of each case could affect significantly how long it takes. The most recent reports indicate that waiting periods range from approximately 24-30 months from the time the United States adoption agency submitted the paperwork of the prospective adopter to the time the child is placed with the prospective adoptive parents.

Thailand's Adoption Authority: Department of Social Development and Welfare (DSDW)

The Process: The first step in adopting a child from Thailand is to select an adoption service provider in the United States that has been accredited. Only these agencies and attorneys can provide adoption services between the United States and Thailand.

After you choose an accredited adoption service provider, you apply to be found eligible to adopt (Form I-800A) by the USCIS. Once the United States Government determines that you are "eligible" and "suitable" to adopt, you or your agency will forward your information to the adoption authority in Thailand. Thailand's adoption authority will review your application to determine whether you are also eligible to adopt under Thai law.

If both the United States and Thailand determine that you are eligible to adopt, and a child is available for intercountry adoption, the central adoption authority in Thailand may provide you with a referral for a child.

Once the DSDW approves the application, it matches the application with a specific child. The DSDW then sends the prospective adoptive parent(s) a letter of introduction about the child, including photographs and the child's health record. This document is commonly called a 'referral.' Prospective adoptive parents who still have questions about the child after reviewing this information may follow up with the DSDW either directly or via their adoption agency.

Note that Thailand law does not allow applications for more than one child at a time, except twins, siblings, or adoption of Thai spouse's children. In general, abandoned children under one year will not be available for foreign adoption.

After you accept a referral with a child, you will apply to the US Government, Department of Homeland Security, United States Citizenship and Immigration Services (USCIS) for provisional approval to adopt that particular child (Form I-800).

The Consular officer will review the child's information and evaluate the child for possible visa ineligibilities. If the Consular office determines that the child appears eligible to immigrate to the United States, he/she will

notify Thailand's adoption authority (Article 5 letter). For Convention country adoptions, prospective adoptive parent(s) may not proceed with the adoption or obtain custody for the purpose of adoption until this takes place.

Role of the Adoption Authority: The DSDW matches the child with the prospective adoptive parents. Once DSDW is notified of the prospective adoptive parents' acceptance of the child, it forwards the application to the Child Adoption Board (CAB). After receiving official authorization from the Minister of Social Development and Human Security, DSDW schedules the interview between the prospective adoptive parents and CAB. DSDW issues the documents necessary for the child's travel.

Role of the Court: The court finalizes the adoption after the prospective adoptive parents have successfully completed their pre-adoption placement requirements.

These requirements include the three bi-monthly reports on the pre-adoption placement, CAB approval for final adoption, and adoption registration within six months of notification by the CAB.

Role of Adoption Agencies: The adoption service provider assembles the application forms and supporting documents for submission to DSDW.

Adoption Application: The adoption application is submitted to the DSDW.

Time Frame: While there is no specific timeframe noted for the completion of an intercountry adoption from Thailand, it should be noted that the adoption process can be lengthy.

Documents Required: The following is a list of documents that must be submitted with the application:

- Home study–The home study must be conducted or endorsed by one of the DSDW approved agencies. Any home study done by a non-DSDW approved agency must obtain an endorsement from a DSDW approved agency agreeing to supervise the pre-adoption placement.
- Confirmation Statement–The adoption service provider must confirm that once the adoption is finalized under Thai law that it will also be legalized in the prospective adoptive parents' state of residence.
- Formal Commitment Statement–If the prospective adoptive parents reside in Thailand, DSDW's social worker will conduct three bi-monthly home visits and supervise the pre-adoption placement of the child. Once DSDW is satisfied with the pre-adoption placement, DSDW reports their findings to the Child Adoption Board (CAB) who will approve the child for adoption.
- If the prospective adoptive parents do not reside in Thailand, the adoption service provider must formally commit to supervise a pre-adoption placement for at least six months and conduct at least three bi-monthly progress reports that will be provided to the DSDW.
- Medical Certificate–The certificate verifies the prospective adoptive parents' good physical health, mental stability, and infertility (if applicable).
- Birth Certificates
- Marriage Certificate (if applicable)
- Proof of Termination of Previous Marriages–Death certificate of spouse or divorce decree
- Proof of Occupation and Income–Letter from employer
- Complete Financial Statement–The statement should indicate all assets and liabilities.
- Recommendations from Two Responsible Persons
- Current License of Adoption Service Provider
- Photographs of Prospective Adoptive Parents –Four (4.5 cm x 6 cm) photographs from each prospective adoptive parent and their children

For updates on document requirements and information on how to authenticate documents, visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

Bringing Your Child Home: Once your adoption is complete (or you have obtained legal custody of the child), there are a few more steps to take before you can head home. Specifically, you need to apply for several documents for your child before he or she can travel to the United States, such as a birth certificate, a passport or travel document for your child from the country in which he or she was born, and a U.S. Immigration Visa.

For detailed and updated information on how to obtain these documents, review the *Intercountry Adoption* section on this publication and visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

Child Citizenship Act: For adoptions finalized abroad: The Child Citizenship Act of 2000 allows your new child to acquire American citizenship automatically when he or she enters the United States as lawful permanent residents.

For adoptions finalized in the United States: The Child Citizenship Act of 2000 allows your new child to acquire American citizenship automatically when the court in the United States issues the final adoption decree. To learn more, review the *Intercountry Adoption* section on this publication and visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

After Adoption: Adoptive parents are required to register the adoption with the Thai Embassy or Consulate and the United States authority.

International Parental Child Abduction

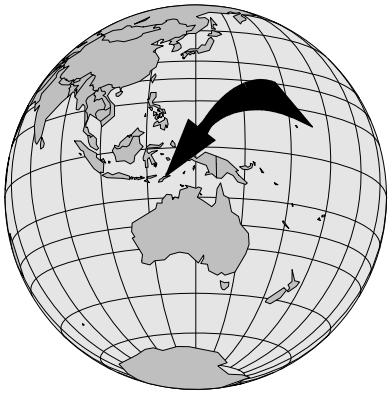
February 2008

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *International Parental Child Abduction* section of this book and review current reports online at http://travel.state.gov.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is provided for general information only. Questions involving interpretation of specific foreign laws should be addressed to foreign legal counsel.

General Information: Parental Kidnapping is not a crime in Thailand and Thai authorities will not issue a warrant or become involved should one parent take a child without the other parent's authorization. The Hague Convention on the Civil Aspects of International Child Abduction cannot be invoked if a child is taken from the United States to Thailand, or vice versa, by one parent against the wishes of the other parent or in violation of a U.S. custody order.

Child Custody: Under Thai law, the question of child custody is addressed in Book Five of the Thai Civil and Commercial Code under the general headings Termination of Marriage and Rights and Duties of Parent and Child. For more information, please review current reports online at http://travel.state.gov.



Enforcement Of Foreign Orders: Foreign orders (including U.S. custody orders) are not enforced/enforceable in Thailand. American citizens who travel to Thailand place themselves under the jurisdiction of Thai courts. If a taking parent chooses to remain in Thailand with a child or leave a child behind in Thailand, the U.S. Embassy cannot force either the taking parent or the Thai Government to return the child to the United States. American citizens planning a trip to Thailand with dual national children should bear this in mind.

Acquiring Thai Nationality: The Thai Nationality Act, Doc No. 2, B.E. 2535 (1992), states that any child born in Thailand of at least one Thai-citizen parent is a Thai citizen. If the child is born outside of Thailand, and has at least one Thai-citizen parent, the Thai parent can report the birth of the child to the nearest Thai Embassy or Consulate and the child will acquire Thai citizenship.

Special Courts: Juvenile and Family Courts to hear custody cases can be found only in Bangkok and a few of the larger cities in Thailand

Thai Passports For Children: Parents wishing to obtain a Thai passport for their child must present a Birth Certificate (for children under14 years-old) or Thai identity card (for children between 15-20 years-old) of the child, the House Registration Certificate and the identity cards of mother and father. Both parents must accompany their minor child during the application process. In case one of the parents is unable to be present, he/she must sign a letter of consent, which must be brought to the office by the other parent and the minor.

For further information on international parental child abduction, contact the Office of Children's Issues, U.S. Department of State at 1-888-407-4747 or visit its web site on the Internet at http://travel.state.gov. You may also direct inquiries to: Office of Children's Issues, U.S. Department of State, Washington, DC 20520-4811; Phone: (202) 736-9090; Fax: (202) 312-9743.

TIMOR-LESTE

Compiled from the April 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Democratic Republic of Timor-Leste

PROFILE

Geography

Area: 15,007 sq. km.
Cities: Capital—Dili; Baucau.
Terrain: Mountainous.
Climate: Tropical; hot, semi-arid; rainy and dry seasons.

People

Nationality: Noun—Timorese; adjective—Timorese.
Population: (2007) 1,100,000.
Religions: Catholic 96.5%.
Languages: Portuguese, Tetum (official languages); English, Bahasa Indonesia (working languages).
Education: Literacy—43%.
Health: Life expectancy—47.9/51.8 years (male/female). Child mortality rate (under 5)—91/69 (male/female) per 1,000 population.

Government

Type: Parliamentary republic.
Independence: (from Portugal) November 28, 1975. Restoration of independence: May 20, 2002.
Constitution: March 2002.
Government branches: Executive—president (head of state), prime minister (head of government), cabinet. Legislative—unicameral parliament. Judicial—Supreme Court and supporting hierarchy. As the Supreme Court has not yet been formed, the Court of Appeal functions, on an interim basis, as the Supreme Court.
Political parties: Revolutionary Front of Independent East Timor (FRETILIN), National Congress for Timorese Reconstruction (CNRT), Democratic Party (PD), Social Democratic Party (PSD), Timorese Social Democratic Association (ASDT), National Unity Party (PUN), People's Party of Timor (PPT), Klibur Oan Timor Asuwain (KOTA), and National Union of Timorese Resistance (UNDERTIM).

Economy

GDP: (2006 est.) $320 million.
GDP per capita: (nominal 2007 est.) $373.
GDP composition by sector: (2006) Services 55%, agriculture 32%, industry 13%.
Industry: Types—coffee, oil and natural gas.
Trade: Exports—coffee, oil and natural gas. Major markets—Australia, Europe, Japan, United States. Imports—basic manufactures, commodities. Major sources—Australia, Europe, Indonesia, Japan, United States.

GEOGRAPHY AND PEOPLE

Timor-Leste is located in Southeast Asia, on the southernmost edge of the Indonesian archipelago, northwest of Australia. The country includes the eastern half of Timor island as well as the Oecussi enclave in the northwest portion of Indonesian West Timor, and the islands of Atauro and Jaco. The mixed Malay and Pacific Islander culture of the Timorese people reflects the geography of the country on the border of those two cultural areas. Portuguese influence during the centuries of colonial rule resulted in a substantial majority of the population identifying itself as Roman Catholic. Some of those who consider themselves Catholic practice a mixed form of religion that includes local animist customs. As a result of the colonial education system and the 23-year Indonesian occupation, approximately 13.5% of Timorese speak Portuguese, 43.3% speak Bahasa Indonesia, and 5.8% speak English, according to the 2004 census. Tetum, the most common of the local languages, is spoken by approximately 91% of the population, although only 46.2% speak Tetum Prasa, the form of Tetum dominant in the Dili district. Mambae, Kemak, and Fataluku are also widely spoken. This linguistic diversity is enshrined in the country's constitution, which designates

Portuguese and Tetum as official languages and English and Bahasa Indonesia as working languages.

HISTORY

Portuguese and Dutch traders made the first western contact with Timor in the early 16th century. Sandalwood and spice traders, as well as missionaries, maintained sporadic contact with the island until 1642, when the Portuguese moved into Timor in strength. The Portuguese and the Dutch, based at the western end of the island in Kupang, battled for influence until the present-day borders were agreed to by the colonial powers in 1906. Imperial Japan occupied East Timor from 1942-45. Portugal resumed colonial authority over East Timor in 1945 after the Japanese defeat in World War II.

Following a military coup in Lisbon in April 1974, Portugal began a rapid and disorganized decolonization process in most of its overseas territories, including East Timor. Political tensions—exacerbated by Indonesian involvement—heated up, and on August 11, 1975, the Timorese Democratic Union Party (UDT) launched a coup d'état in Dili. The putsch was followed by a brief but bloody civil war in which the Revolutionary Front for an Independent East Timor (FRETILIN) pushed UDT forces into Indonesian West Timor. Shortly after the FRETILIN victory in late September, Indonesian forces began incursions into East Timor. On October 16, five journalists from Australia, Britain, and New Zealand were murdered in the East Timorese town of Balibo shortly after they had filmed regular Indonesian army troops invading East Timorese territory. On November 28, FRETILIN declared East Timor an independent state, and Indonesia responded by launching a full-scale military invasion on December 7. On December 22, 1975 the UN Security Council called on Indonesia to withdraw its troops from East Timor.

Declaring a provisional government made up of Timorese allies on January 13, 1976, the Indonesian Government said it was acting to forestall civil strife in East Timor and to prevent the consolidation of power by the FRETILIN party. The Indonesians claimed that FRETILIN was communist in nature, while the party's leadership described itself as social democratic. Coming on the heels of the communist victories in Vietnam, Cambodia, and Laos, the Indonesian claims were accepted by many in the West. Major powers also had little incentive to confront Indonesia over a territory seen as peripheral to their security interests. Nonetheless, the widespread popular support shown for the guerilla resistance launched by the Timorese made clear that the Indonesian occupation was not welcome. The Timorese were not permitted to determine their own political fate via a free vote, and the Indonesian occupation was never recognized by the United Nations.

The Indonesian occupation of Timor was initially characterized by a program of brutal military repression. Beginning in the late 1980s, however, the occupation was increasingly characterized by programs to win the "hearts-and-minds" of the Timorese through the use of economic development assistance and job creation while maintaining a strict policy of political repression, although serious human rights violations—such as the 1991 Santa Cruz massacre—continued. Estimates of the number of Timorese who lost their lives to violence and hunger during the Indonesian occupation range from 100,000 to 250,000. On January 27, 1999, Indonesian President B.J. Habibie announced his government's desire to hold a referendum in which the people of East Timor would chose between autonomy within Indonesia and independence. Under an agreement among the United Nations, Portugal, and Indonesia, the referendum was held on August 30, 1999. When the results were announced on September 4—78% voted for independence with a 98.6% turnout—Timorese militias organized and supported by the Indonesian military (TNI) commenced a large-scale, scorched-earth campaign of retribution. While pro-independence FALINTIL guerillas remained cantoned in UN-supervised camps, the militia and the TNI killed approximately 1,300 Timorese and forcibly relocated as many as 300,000 people into West Timor as refugees. The majority of the country's infrastructure, including homes, irrigation systems, water supply systems, and schools, and nearly 100% of the country's electrical grid were destroyed. On September 20, 1999 the Australian-led peacekeeping troops of the International Force for East Timor (INTERFET) deployed to the country, bringing the violence to an end.

Timor-Leste became a fully independent republic with a parliamentary form of government on May 20, 2002, following approximately two and a half years under the authority of the UN Transitional Administration in East Timor (UNTAET). The country's first parliament was formed from the 88-member Constituent Assembly chosen in free and fair, UN-supervised elections in August 2001. The FRETILIN Party won the majority of Assembly seats. Mari Alkatiri, FRETILIN's Secretary General, became the first Prime Minister, and the country's 29-member cabinet was dominated by FRETILIN. Xanana Gusmao was elected in free and fair elections on April 14, 2002 as President. UNTAET's mandate ended with East Timor's independence, but a successor organization, the UN Mission for the Support of East Timor (UNMISET), was established to provide additional support to the government. UNMISET's mandate expired on May 20, 2005 after the UN Security Council unanimously approved the creation of a small special political mission in Timor-Leste, the UN Office in Timor-Leste (UNOTIL), to take its place. Under the constitution ratified in March 2002, "laws and regulations in force continue to be applicable to all matters except to the extent that they are inconsistent with the Constitution." Many Indonesian and UNTAET laws and regulations remain in effect, but are being gradually replaced by Timorese laws.

GOVERNMENT AND POLITICAL CONDITIONS

Despite the winding down of the UN presence in Timor-Leste, the institutions comprising the country's armed forces (F-FDTL) and police (PNTL) remained fragile and the authority of the state much more tenuous than most observers assumed at the time. In February 2006, approximately 400 military personnel (from a total military strength of 1,400) petitioned President Gusmao to address their complaints of discrimination against "westerners" or Loro Monu people by "easterners" or Loro Sae people in the military. Shortly after being dismissed by the F-FDTL commander, the petitioners staged protests in Dili. On April 28, the protests turned violent.

Citing ineffective police response, the government called in the F-FDTL to respond. The rioting and the police and military response resulted in six confirmed deaths. In response to the events of April 28, large numbers of people began to flee their homes for internally displaced persons (IDP) camps or the outlying districts and several members of the F-FDTL, including the commander of the Military Police, left their posts in protest of the military intervention. The violence escalated, with a series of deadly clashes among the F-FDTL, dissident military forces, civilians, and some police occurring on May 23-24, followed by deadly conflict between the F-FDTL and the PNTL on May 25. After these clashes civil order collapsed. Mob and gang violence took over the capital, resulting in additional deaths, widespread destruction of property, and the continued displacement of thousands of Dili residents.

At the peak of the crisis, approximately 80,000 IDPs fled to the districts and approximately 70,000 resided in camps in Dili. The U.S. Agency for International Development (USAID) and international relief organizations provided vital services to the camps that included water and sanitation facilities, camp management support, hygiene kits, and mosquito nets. USAID also supported Timor-Leste's independent public radio and television broadcast services to ensure that reliable and timely information about current political events reached Timorese citizens. On May 28, the Government of Timor-Leste requested the Governments of Australia, Malaysia, New Zealand, and Portugal to send security forces to stabilize the country. During June 2006, there was increasing pressure on Prime Minister Alkatiri to resign as criticisms of his handling of the crisis mounted. Moreover, serious allegations emerged that he and other senior officials had been involved in illegal arms distribution. President Gusmao publicly requested that the prime minister step down, and threatened to resign himself if Alkatiri remained in office. Alkatiri resigned on June 27. Jose Ramos-Horta—the Foreign and Defense Minister in the Alkatiri government—became Prime Minister on July 10, and a new cabinet was sworn in on July 14, 2006.

As requested by the Government of Timor-Leste, the UN Security Council extended the small UN political mission, UNOTIL, through the summer while members considered the mandate of a more robust UN mission to assist Timor-Leste overcome its crisis. The United States coordinated closely with members of the Core Group on Timor-Leste (Australia, Brazil, Japan, New Zealand, Portugal, and the United Kingdom) and the European Union to obtain approval of the UN Integrated Mission in Timor-Leste (UNMIT), which provided for a UN-led policing component of up to 1,608 personnel. UNMIT's mandate, set forth in UN Security Council Resolution 1704 approved on August 25, 2006, calls for the UN mission to assist in restoring stability, rebuilding the institutions comprising the security sector, supporting the Government of Timor-Leste in conducting the 2007 presidential and parliamentary elections, and achieving accountability for the crimes against humanity and other atrocities committed in 1999, among other aims. The UN Security Council extended UNMIT's mandate for one

year in February 2007 and again on February 25, 2008. (UNMIT's own website provides additional information: http://www.un.org/Depts/dpko/missions/unmit)

Although security in Dili has been significantly improved in comparison to the violence and anarchy that reigned in May and June, neither the establishment of a new government nor the expansion of the UN mission has reduced the levels of violence and criminality to their pre-April 2006 levels. While the overwhelming majority of the current violence is Timorese-on-Timorese perpetrated by gangs or martial arts groups, foreign nationals have also been targeted. Although much of the current fighting reflects a continuing lack of law and order underscored by the absence of judicial accountability, many observers note that communal and gang violence has been employed in many cases toward political ends.

As of January 2008, approximately 30,000 displaced persons live in over 30 camps in and around Dili. Another 70,000 or so IDPs remain in the outlying districts. Numbers of displaced persons remain essentially unchanged from late 2006. Police functions in Dili are currently under UN control, while members of the PNTL are being gradually reintegrated into city policing following vetting for criminal or ethical violations. UN officials and other observers expect the reform of the country's security sector to be a long-term challenge.

Timor-Leste held presidential elections in the spring of 2007. On April 9, voters chose from a slate of eight candidates. With a voter turnout of almost 82%, the top two finishers were the FRETILIN Party candidate Francisco "Lu-olo" Guterres, who received 28% of the vote, and Jose Ramos-Horta, who received 22% of the vote after stepping down as Prime Minister to run as an independent candidate with the endorsement of former President Xanana Gusmao. In the runoff election on May 9, required because the electoral law specifies that a candidate must win a majority, Ramos-Horta won by a landslide, receiving 69% of the vote. The presidential elections experienced some procedural glitches, but were largely free of violence and significant irregularity.

The presidency is a mostly ceremonial position, with executive power concentrated in the office of the prime minister. The majority party in parliament normally determines the next prime minister. With the support of UNMIT and international donors, the Government of Timor-Leste held parliamentary elections on June 30, 2007. Observers agree that the elections were generally free and fair. FRETILIN won the most seats in parliament, but no single party won a majority and the various parties did not agree to form a national unity government. On August 6, 2007, President Ramos-Horta asked Xanana Gusmao, the leader of a coalition with a majority of the seats in the parliament (the Alliance with a Parliamentary Majority or AMP), to form a government. Gusmao was sworn in as Prime Minister along with most of the other ministers in the new government on August 8, 2007. Although the June elections proceeded in a largely peaceful atmosphere, violent disturbances broke out in several areas of Dili and the eastern districts of Baucau and Viqueque when the president announced the formation of a new government as FRETILIN partisans took to the streets to protest that they had not been given an opportunity to form a government. The unrest subsided within days, but the affected areas remained tense for several weeks thereafter and FRETILIN continues to assert that the AMP government is unconstitutional although it participates actively in the work of the national parliament.

FRETILIN's peaceful handover of power to the AMP government represents a significant milestone in Timor-Leste's political development. Upon taking office, the AMP government put the problems of the internally displaced persons, the petitioners, and other issues flowing from the crisis of 2006 at the top of its policy agenda. After obtaining parliamentary approval for a transitional 2007 budget and the fiscal year 2008 budget, the AMP launched its National Recovery Strategy in December 2007. The National Recovery Strategy consists of five pillars that aim to give substance to its name, "Building the Future Together" (Hamutuk Hari'i Futuru):

- Building Homes Together, or return and resettlement of IDPs;
- Building Protection Together, or provision of social welfare support to vulnerable groups;
- Building Stability Together, or creating an atmosphere of stability for the return of the IDPs and resolution of the claims of the petitioners, among other issues;
- Building Social Economy Together, or promotion of economic development;
- Building Trust Together, or promotion of trust-building between the people and the government through community dialogue, and engagement with youth groups.

In November and December 2007 the Government of Timor-Leste hosted several visits by high-level UN officials, including Under Secretary for Peacekeeping Jean-Marie Guehenno, Secretary-General Ban Ki-moon, and a delegation from the UN Security Council, all of whom urged Timorese leaders to work together to tackle pressing issues in a coordinated way in the national interest.

On February 11, 2008 followers of former military police commander and fugitive Alfredo Reinado attacked President Ramos-Horta. Ramos-Horta sustained gunshot injuries and was airlifted to Darwin, Australia. Prime Minister Gusmao escaped unharmed after his bodyguards thwarted a separate attack against him the same day. The president's bodyguards killed Reinado.

The national parliament imposed a state of emergency, which it has since extended, while the government seeks to apprehend the attackers. World leaders and the UN Security

Council immediately condemned these attacks against Timor-Leste's democratically elected leaders.

Principal Government Officials

Last Updated: 11/12/08

President: **Jose RAMOS-HORTA**
Prime Minister: **Kay Rala Xanana GUSMAO**
First Dep. Prime Min.: **Jose Luis GUTERRES**
Min. for Agriculture, Fisheries, & Forestry:
Min. for Development: **Joao GONCALVES**
Min. for Education: **Joao CANCIO**
Min. for Finance: **Emilia PIRES**
Min. for Foreign Affairs: **Zacarias DA COSTA**
Min. for Health: **Nelson MARTINS**
Min. for Infrastructure: **Pedro LAY**
Min. for Justice: **Lucia LOBATO**
Min. for Social Solidarity:
Min. for State Admin.: **Arcangelo LEITE**
Min. for Tourism, Commerce, & Industry: **Gil da Costa ALVES**
Ambassador to the US:
Permanent Representative to the UN, New York: **Nelson SANTOS**

Timor-Leste maintains an embassy at 4201 Connecticut Avenue, NW, Washington, DC 20008 (telephone: 202-966-3202). Timor-Leste Government website: http://www.timor-leste.gov.tl.

ECONOMY

As the poorest nation in Asia, Timor-Leste faces daunting challenges. Basic income, health, and literacy indicators are among the lowest in Asia. Severe shortages of trained and competent personnel to staff newly established executive, legislative, and judicial institutions hinder progress. Rural areas, lacking in infrastructure and resources, remain brutally poor, and the relatively few urban areas cannot provide adequate jobs for the country's growing labor force. Many cities, including the country's second largest, Baucau, lack routine electrical service. Rural families' access to electricity and clean water is very limited. Unemployment and underemployment combined are estimated to be as high as 70%. While revenues from offshore oil and gas reserves offer great hope for the country, effective use of those resources will require a major transformation of the country's current human and institutional infrastructure.

Timor-Leste has made significant progress in a number of areas since independence. It has become a full-fledged member of the international community, joining the United Nations, the International Monetary Fund, the World Bank, and the Asian Development Bank (ADB). In July 2005, parliament unanimously passed a law creating a petroleum fund to effectively manage and invest oil revenues to ensure these funds are invested in the country's development after exploitation of these resources ends. While a nascent legal system has been put into place, the justice system remains among the weakest performing sector of government, still unable to perform its most basic functions without substantial assistance by outside professionals. Efforts are underway to put in place the institutions required to protect human rights, rebuild the economy, create employment opportunities, and reestablish essential public services.

FOREIGN RELATIONS

Timor-Leste joined the United Nations on September 27, 2002. It is pursuing membership in the Association of Southeast Asian Nations (ASEAN) and became a member of the ASEAN Regional Forum (ARF) in July 2005. Timor-Leste's foreign policy has placed a high priority on its relationships with Indonesia; regional friends such as Malaysia and Singapore; and donors such as Australia, the United States, the European Union, Japan, and Portugal.

Relations Between Indonesia and Timor-Leste

Timor-Leste and Indonesia have full diplomatic relations. In 2005 Indonesian President Susilo Bambang Yudhoyono visited Timor-Leste, including the Santa Cruz cemetery in Dili where Indonesian troops had massacred hundreds of Timorese in 1991. Yudhoyono prayed and laid a heart-shaped wreath at the cemetery, symbolizing the improving ties between the two nations. After the 2004 Indian Ocean tsunami devastated parts of Indonesia, the Government of Timor-Leste contributed humanitarian assistance to the victims. Likewise, the Indonesian Government sent humanitarian assistance to help those displaced by the unrest in Dili in 2006. After assuming office in May 2007, President Ramos-Horta traveled to Jakarta for his first state visit abroad. When former President Suharto died in January 2008, Prime Minister Gusmao and other senior officials traveled to Indonesia to pay their respects.

In 2005, both nations created a bilateral Truth and Friendship Commission (TFC) in order "to establish the conclusive truth in regard to the events prior to and immediately after the popular consultation in 1999, with a view to promoting reconciliation and friendship, and ensuring the non-recurrence of similar events." The United States has encouraged both Indonesia and Timor-Leste to ensure that the TFC achieves a credible outcome and that the TFC process is transparent, holds public hearings, has international participation, and names the names of those individuals who perpetrated the serious crimes. Respected international human rights groups, however, have criticized the TFC because its limited terms of reference for achieving these ends do not provide for prosecutions or similar measures to achieve accountability, and because the TFC has made no clear progress to date.

RELATIONS BETWEEN THE UNITED STATES AND TIMOR-LESTE

Timor-Leste maintains an embassy in Washington, DC, as well as a Permanent Mission in New York at the United Nations. The United States has a large bilateral development

assistance program—$20.6 million in fiscal year 2007—and also contributes funds as a major member of a number of multilateral agencies such as the Asian Development Bank and the World Bank. The U.S. Peace Corps has operated in Timor-Leste since 2002, but it suspended operations in May 2006 due to the unrest and instability.

TRAVEL

Consular Information Sheet

September 23, 2008

Country Description: Occupying 5,743 square miles on the eastern half of an island in the Timor Sea between Indonesia and Australia, Timor-Leste has a population of approximately 1.1 million people. Timor-Leste became independent on May 20, 2002, and is now a democratically governed, independent nation with an elected President and Parliament.

In the violence that followed Timor-Leste's 1999 independence referendum, the country's infrastructure, never robust, was totally destroyed and has been only partially rebuilt. In April 2006, violence erupted again in and around the capital, Dili, resulting in further damage to infrastructure and setting back economic growth. Electricity, telephone and telecommunications, roads and lodging remain unreliable, particularly outside of the capital. Timor-Leste's economy relies largely on international assistance and revenues from oil and gas production.

Entry Requirements: A passport valid for six months beyond the intended date of departure from Timor-Leste is required. Tourist visas are not required prior to arrival, but travelers arriving in Timor-Leste without a visa will need to pay a $30 fee for the 30-day visa. There is an additional fee for each 30-day renewal of this tourist visa. Visitors traveling via air must transit Singapore; Darwin, Australia; or Bali, Indonesia en route to Timor-Leste.

Safety and Security: American citizens in Timor-Leste should exercise caution, use common sense, avoid large gatherings, remain alert with regard to their personal security, and avoid travel after dark to the extent possible. Americans should exercise caution in public places, including, but not limited to, clubs, restaurants, bars, schools, places of worship, outdoor recreational events, hotels, resorts and beaches and other locations frequented by foreigners.

American citizens should maintain a high level of security awareness while moving around in Dili; be alert to the potential for violence; and avoid demonstrations, large political gatherings, and areas where disturbances have occurred. Demonstrations can occur at or near symbols and institutions of the Government of Timor-Leste, including government buildings and houses belonging to prominent politicians. Even demonstrations intended to be peaceful can turn confrontational and escalate into violence. Although social and political tensions have diminished in 2008, American citizens should exercise particular caution in sites of past unrest. These areas in Dili include the international airport and its surroundings, and the areas around internally displaced persons camps in the city.

Gang-related violence occurs sporadically in Dili, and Americans risk intentional or inadvertent injury when traveling in affected areas. While the overwhelming majority of gang-related criminal violence has been Timorese-on-Timorese, foreigners have been caught up in such violence and there have been credible reports of anti-Western attacks, most recently during a surge of violence in Dili in and Baucau in August 2007. About 30,000 internally displaced persons remain in camps in and around Dili, several of which have been sites of recurring incidents of violence.

Timor-Leste's state institutions comprising the security sector remain fragile, and the country depends upon international police and security forces to assist in the maintenance of public security. Although authorities have made progress toward restoring public security in recent months, the risk of further violent civil unrest persists.

Timor-Leste has experienced several major episodes of violent civil disorder in recent years. When demonstrations in April 2006 protesting the Government's dismissal of 595 members of the armed forces escalated into rioting, civil order in and around the capital Dili broke down. Tens of thousands of Timorese fled the violence and settled in camps for internally displaced persons (IDPs). The Government asked for the deployment of international security forces to assist in restoring order. An Australian-led International Stabilization Force of about 1,000 troops remains in Timor-Leste.

Also at the Government's request, the UN Security Council extended its mission in Timor-Leste. On August 25, 2006, the UN Security Council approved a new expanded mission (the UN Integrated Mission for Timor-Leste, or UNMIT) providing for a policing component of up to

1,608 personnel. The Security Council extended the mandate of UNMIT for one year in February 2007 and again for one year on February 25, 2008. The Timorese national police (PNTL) in Dili were disbanded and are being reconstituted under UNMIT guidance. For more information on UNMIT, consult http://www.un.org/Depts/dpko/missions/unmit.

In April through June 2007, the Government of Timor-Leste held three rounds of national elections in a largely peaceful atmosphere. Localized, sporadic violence erupted in August after the President announced the formation of a new government. International forces, alongside members of the National Police of Timor-Leste, contained the violence and the affected communities returned to normal. The security situation can, however, deteriorate without warning, and the risk that foreigners may be specifically targeted persists. On February 11, 2008, armed rebels attacked President Jose Ramos-Horta, who sustained gunshot injuries and was evacuated to Australia for medical treatment. Prime Minister Xanana Gusmao escaped unharmed when his bodyguards thwarted a separate attack against him the same day. All of the rebels involved in this incident are now in custody.

Americans are advised that international security forces and UN police and the Timorese security forces occasionally establish security checkpoints along roads. These legitimate checkpoints are intended to enhance security and should be respected. There are also occasional illegal checkpoints which Americans should avoid, but which to date have been primarily targeted at Timorese. Americans traveling in Timor-Leste should remember that despite its small size, much of the territory is isolated and can be difficult to reach by available transportation or communication links.

Travelers and residents should always ensure that passports and important personal papers are in order in the event it becomes necessary to leave the country quickly for any reason. Likewise, travelers should be aware that the U.S. Embassy in Dili is not able to issue emergency passports and has only limited capacity to process passport renewals.

For the latest security information, Americans traveling abroad should regularly monitor the Department's Internet web site at http://travel.state.gov, where the current Worldwide Caution Travel Alert, Travel Warnings and Travel Alerts can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S. and Canada, or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: Crimes such as pick pocketing, purse snatchings, residential and automobile break-ins and theft occurs throughout the country, but are more frequent in Dili, the capital. Victims who resist may be subject to physical violence. Gang related violence occurs, and has targeted foreign nationals. Stone-throwing attacks on vehicles occur during periods of gang conflicts and civil unrest, and have resulted in serious injury and death. Visitors should avoid travel at night or in unfamiliar areas alone. Women should avoid traveling alone, especially at night because sexual assault or banditry is possible. Timor-Leste is a socially conservative country, and travelers should avoid wearing revealing clothing, particularly in crowded public areas such as markets.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. embassy or consulate. Those in need of police assistance should call the National Police of Timor-Leste at 112 or 723-0365. The UN Security Operations Center can be reached at 723-0635. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. embassy or consulate for assistance. The embassy/consulate staff can, for example, assist you to find appropriate medical care, contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

Medical Facilities and Health Information: Although limited emergency medical care is available in Dili, options for routine medical care throughout the country are extremely limited. Serious medical problems requiring hospitalization and/or medical evacuation to Australia, the nearest point with acceptable medical care, to Singapore, or to the United States, can cost thousands of dollars.

The Government of Timor-Leste does not have any policy restricting the entry of persons with HIV/AIDS or imposing restrictions on residents of Timor-Leste with HIV/AIDS.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's I internet site at http://wwwn.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith/en.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The infor-

mation below concerning Timor-Leste is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

All traffic operates on the left side of the road, and most vehicles use right-hand drive. Roads are often poorly maintained and four-wheel drive may be required in some areas. Non-existent lighting and poor road conditions make driving at night hazardous. Taxis, small buses and mini-vans provide public transportation in Dili and elsewhere. However, public transportation is generally overcrowded, uncomfortable, and below international safety standards. Public transportation operators have been known to unexpectedly drop passengers at locations other than their destination due to the operators' fears about certain areas or hours. Disagreement about fares has occasionally led to hostilities. Public transport is generally inadvisable and is unavailable after dark.

Driving in Dili is especially hazardous, with large trucks and military vehicles sharing the streets with vendors, pedestrians and livestock. Many cars and especially motorcycles operate at night without lights.

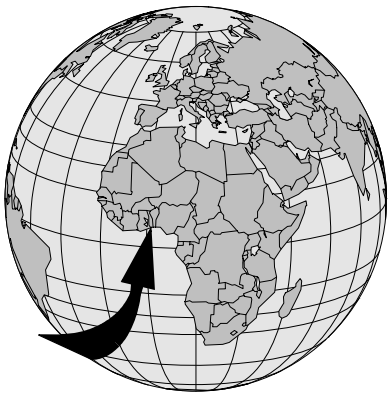
During the rainy season, travel on all cross-island roadways should be considered to be risky. U.S. citizens should use caution when traveling on the cross-island roadways in the mountain areas of Aileu, Ermera, Manatuto, Ainaro and Manufahi provinces. In December 2003, rain showers severely damaged several cross-island roadways, and several UN vehicles had to be airlifted out of the area south of Aileu due to landslides and roadway damage.

Accidents occur frequently. When there is an accident, the police should be contacted. It is not uncommon for bystanders to attack the driver perceived to be responsible for a traffic accident. This is more common in rural areas and in accidents involving Timorese drivers but crowds have occasionally attacked expatriate drivers at the scene of an accident. If a U.S. citizen involved in an accident reasonably believes that there is a threat of bodily harm from people at the scene of the accident, it is advisable to drive to the police station or U.S. Embassy before stopping.

While it is possible to obtain insurance for vehicles in Timor-Leste, only a handful of foreigners have done so, and virtually no one else has automobile insurance. Most traffic accidents are settled informally between those involved.

Visit the web site of the country's national tourist office and national authority responsible for road safety at http://www.timor-leste.gov.tl.

Aviation Safety Oversight: As there is no direct commercial air service between the United States and Timor-Leste, the U.S. Federal Aviation Administration (FAA) has not assessed Timor-Leste's Civil Aviation Authority for compliance with International Civil Aviation Organization (ICAO) aviation safety standards. For more information, travelers may visit the FAA's Internet web site at http://www.faa.gov.



Special Circumstances: Timor-Leste remains in a state of transition. The country faces continuing challenges that limit its law enforcement capability. Many civil and governmental institutions are still being developed with international assistance. U.S. citizens traveling or doing business in Timor-Leste may find it difficult to identify legal or administrative mechanisms if problems arise.

The U.S. dollar is the official currency of Timor-Leste. Money can be exchanged at the three banks in Dili, but only to or from a limited number of currencies. Only a few establishments accept credit cards, usually requiring a substantial additional fee, and visitors should be prepared to settle all bills in cash. Dili has several ATM machines that accept U.S.-issued bankcards. Travelers should not plan to rely exclusively on these machines, as they are frequently inoperative.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating Timor-Leste's laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Timor-Leste are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in Timor-Leste are encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration web site so that they can obtain updated information on travel and security within Timor-Leste. Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency. The U.S. Embassy is located at Avenida de Portugal, Praia dos Coqueiros, Dili, Timor-Leste, tel: (670) 332-4684, fax: (670) 331-3206. The web site is http://timor-leste.usembassy.gov.

TOGO

Compiled from the September 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Togolese Republic

PROFILE

Geography

Area: 56,785 sq. km.; slightly smaller than West Virginia.

Cities: Capital—Lome 1,008,000 (pop. 2007 est.); other major cities—Sokode 111,200, Kara 104,900, Atakpame 77,300, Dapaong 53,600.

Terrain: Savannah and hills and coastal plain.

Climate: Tropical.

People

Nationality: Noun and adjective (sing. and pl.)—Togolese.

Population: (2006) 6,300,000.

Annual growth rate: (2006) 2.4%.

Ethnic groups: Ewe, Mina, Kabye, Cotocoli, Moba.

Religions: (est.) Animist 33%, Christian 47.1%, Muslim 13.7%, other 6.1%.

Languages: French (official), local (Ewe, Mina, Kabye).

Education: Attendance (2006)—74.6% of age group 6-11 enrolled. Literacy (2006)—male 70%, female 44%.

Health: Life expectancy (2003)—male 51 yrs, female 55 yrs.

Work force: (1999 est.) Total—2 million (43% of the total population); rural work force (est.)—1,350,000; urban work force (est.)—650,000.

Government

Type: Republic.

Independence: April 27, 1960 (from French-administered UN trusteeship).

Constitution: Adopted 1992.

Government branches: Executive—president (chief of state); prime minister (head of government). Legislative—National Assembly. Judicial—Supreme Court.

Political subdivisions: 30 prefectures.

Political parties: Rassemblement du Peuple Togolais (RPT); Union des Forces de Changement (UFC); Comite d'action pour le Renouveau (CAR), Pan-African Patriotic Convergence Party (CPP), Democratic Convention of the Togolese People (CDPA).

Suffrage: Universal adult.

National holidays: Independence Day, April 27.

Economy

GDP: (2006) $2.2 billion.

Per capita income: (2006) $350.

Natural resources: Phosphates, limestone, marble.

Agriculture: (43.6% of 2005 GDP) Products—yams, cassava, corn, millet, sorghum, cocoa, coffee, rice, cotton.

Industry: (24% of 2005 GDP) Types—mining, manufacturing, construction, energy.

Services: 32.4% of 2005 GDP.

Trade: (2005) Exports—$739 million: phosphates, cocoa, coffee, cotton. Imports—$1 billion: consumer goods, including foodstuffs, fabrics, clothes, vehicles, equipment. Major partners—Ghana, France, Cote d'Ivoire, Germany, Nigeria, Canada, People's Republic of China, Benin.

GEOGRAPHY

Togo is bounded by Ghana, Burkina Faso, Benin, and the Gulf of Guinea. It stretches 579 kilometers (360 mi.) north from the gulf and is only 160 kilometers (100 mi.) wide at the broadest point. The country consists primarily of two savanna plains regions separated by a southwest-northeast range of hills (the Chaine du Togo).

Togo's climate varies from tropical to savanna. The south is humid, with temperatures ranging from 23ºC to 32ºC (75ºF to 90ºF). In the north, temperature fluctuations are greater—from 18ºC to more than 38ºC (65ºF to 100ºF).

PEOPLE

Togo's population of 6.3 million people (2006 est.) is composed of about 21 ethnic groups. The two major groups are the Ewe in the South and the

Kabye in the North. Population distribution is very uneven due to soil and terrain variations. The population is generally concentrated in the south and along the major north-south highway connecting the coast to the Sahel. The ethnic groups of the coastal region, particularly the Ewes (about 21% of the population), constitute the bulk of the civil servants, professionals, and merchants, due in part to the former colonial administrations which provided greater infrastructure development in the south. The Kabye (12% of the population) live on marginal land and traditionally have emigrated south from their home area in the Kara region to seek employment. Their historical means of social advancement has been through the military and law enforcement forces, and they continue to dominate these services.

Most of the southern peoples use the Ewe or Mina languages, which are closely related and spoken in commercial sectors throughout Togo. French, the official language, is used in administration and documentation. The public primary schools combine French with Ewe or Kabye as languages of instruction, depending on the region. English is spoken in neighboring Ghana and is taught in Togolese secondary schools. As a result, many Togolese, especially in the south and along the Ghana border, speak some English.

HISTORY

The Ewes moved into the area which is now Togo from the Niger River valley between the 12th and 14th centuries. During the 15th and 16th centuries, Portuguese explorers and traders visited the coast. For the next 200 years, the coastal region was a major raiding center for Europeans in search of slaves, earning Togo and the surrounding region the name "The Slave Coast." In an 1884 treaty signed at Togoville, Germany declared a protectorate over a stretch of territory along the coast and gradually extended its control inland. Because it became Germany's only self-supporting colony, Togoland was known as its model possession. In 1914, Togoland was invaded by French and British forces and fell after brief resistance. Following the war, Togoland became a League of Nations mandate divided for administrative purposes between France and the United Kingdom.

After World War II, the mandate became a UN trust territory administered by the United Kingdom and France. During the mandate and trusteeship periods, western Togo was administered as part of the British Gold Coast. In 1957, the residents of British Togoland voted to join the Gold Coast as part of the new independent nation of Ghana.

By statute in 1955, French Togo became an autonomous republic within the French union, although it retained its UN trusteeship status. A legislative assembly elected by universal adult suffrage had considerable power over internal affairs, with an elected executive body headed by a prime minister responsible to the legislature. These changes were embodied in a constitution approved in a 1956 referendum. On September 10, 1956, Nicholas Grunitzky became prime minister of the Republic of Togo. However, due to irregularities in the plebiscite, an unsupervised general election was held in 1958 and won by Sylvanus Olympio. On April 27, 1960, in a smooth transition, Togo severed its constitutional ties with France, shed its UN trusteeship status, and became fully independent under a provisional constitution with Olympio as president.

A new constitution in 1961 established an executive president, elected for 7 years by universal suffrage, and a weak National Assembly. The president was empowered to appoint ministers and dissolve the assembly, holding a monopoly of executive power. In elections that year, from which Grunitzky's party was disqualified, Olympio's party won 90% of the vote and all 51 National Assembly seats, and he became Togo's first elected president.

During this period, four principal political parties existed in Togo: the leftist Juvento (Togolese Youth Movement); the Union Democratique des Populations Togolaises (IDPT); the Parti Togolais Du Progres (PTP), founded by Grunitzky but having limited support; and the Unite Togolaise (UT), the party of President Olympio. Rivalries between elements of these parties had begun as early as the 1940s, and they came to a head with Olympio dissolving the opposition parties in January 1962, ostensibly because of plots against the majority party government. Many opposition members, including Grunitzky, fled to avoid arrest.

On January 13, 1963, President Olympio was assassinated in an uprising of army non-commissioned officers dissatisfied with conditions following their discharge from the French army. Grunitzky returned from exile 2 days later to head a provisional government with the title of prime minister. On May 5, 1963, the Togolese adopted a new constitution which reinstated a multi-party system, chose deputies from all political parties for the National Assembly, and elected Grunitzky as president and Antoine Meatchi as vice president. Nine days later, President Grunitzky formed a government in which all parties were represented.

During the next several years, the Grunitzky government's power became insecure. On November 21, 1966, an attempt to overthrow Grunitzky, inspired principally by civilian political opponents in the UT party, was unsuccessful. Grunitzky then tried to lessen his reliance on the army, but on January 13, 1967, Lt. Col. Etienne Eyadema (later Gen. Gnassingbe Eyadema) ousted President Grunitzky in a bloodless military coup. Political parties were banned, and all constitutional processes were suspended. The committee of national reconciliation ruled the country until April 14, when Eyadema assumed the presidency. In late 1969, a single national political party, the Rally of the Togolese People (RPT), was created, and President Eyadema was elected party president on November 29, 1969. In 1972, a national referendum, in which Eyadema ran unopposed, confirmed his

role as the country's president. In late 1979, Eyadema declared a third republic and a transition to greater civilian rule with a mixed civilian and military cabinet. He garnered 99.97% of the vote in uncontested presidential elections held in late 1979 and early 1980. A new constitution also provided for a national assembly to serve primarily as a consultative body. Eyadema was reelected to a third consecutive 7-year term in December 1986 with 99.5% of the vote in an uncontested election. On September 23, 1986, a group of some 70 armed Togolese dissidents crossed into Lome from Ghana in an unsuccessful attempt to overthrow the Eyadema government.

In 1989 and 1990, Togo, like many other countries, was affected by the winds of democratic change sweeping eastern Europe and the Soviet Union. On October 5, 1990, the trial of students who handed out antigovernment tracts sparked riots in Lome. Antigovernment demonstrations and violent clashes with the security forces marked the months that followed. In April 1991, the government began negotiations with newly formed opposition groups and agreed to a general amnesty that permitted exiled political opponents to return to Togo. After a general strike and further demonstrations, the government and opposition signed an agreement to hold a "national forum" on June 12, 1991.

The national forum, dominated by opponents of President Eyadema, opened in July 1991 and immediately declared itself to be a sovereign "National Conference." Although subjected to severe harassment from the government, the conference drafted an interim constitution calling for a 1-year transitional regime tasked with organizing free elections for a new government. The conference selected Joseph Kokou Koffigoh, a lawyer and human rights group head, as transitional prime minister but kept President Eyadema as chief of state for the transition, although with limited powers. A test of wills between the president and his opponents followed over the next 3 years during which President Eyadema

gradually gained the upper hand. Frequent political paralysis and intermittent violence marked this period. Following a vote by the transitional legislature (High Council of the Republic) to dissolve the President's political party—the RPT—in November 1991, the army attacked the prime minister's office on December 3 and captured the prime minister. Koffigoh then formed a second transition government in January 1992 with substantial participation by ministers from the President's party. Opposition leader Gilchrist Olympio, son of the slain president Sylvanus Olympio, was ambushed and seriously wounded, apparently by soldiers, on May 5, 1992.

In July and August 1992, a commission composed of presidential and opposition representatives negotiated a new political agreement. On September 27, the public overwhelmingly approved the text of a new, democratic constitution, formally initiating Togo's fourth republic.

The democratic process was set back in October 1992, when elements of the army held the interim legislature hostage for 24 hours. This effectively put an end to the interim legislature. In retaliation, on November 16, opposition political parties and labor unions declared a general strike intended to force President Eyadema to agree to satisfactory conditions for elections. The general strike largely shut down Lome for months and resulted in severe damage to the economy.

In January 1993, President Eyadema declared the transition at an end and reappointed Koffigoh as prime minister under Eyadema's authority. This set off public demonstrations, and, on January 25, members of the security forces fired on peaceful demonstrators, killing at least 19. In the ensuing days, several security force members were waylaid and injured or killed by civilian oppositionists. On January 30, 1994, elements of the military went on an 8-hour rampage throughout Lome, firing indiscriminately and killing at least 12 people. This incident provoked more than 300,000 Togolese to flee Lome for Benin, Ghana, or the interior of Togo. Most had returned by early 1996. On March 25, 1993, armed Togolese dissident commandos based in Ghana attacked Lome's main military camp and tried unsuccessfully to kill President Eyadema. They inflicted significant casualties, however, which set off lethal reprisals by the military against soldiers thought to be associated with the attackers.

Under substantial domestic and foreign pressure and the burden of the general strike, the presidential faction entered negotiations with the opposition in early 1993. Four rounds of talks led to the July 11 Ouagadougou agreement, which set forth conditions for upcoming presidential and legislative elections and ended the general strike as of August 3, 1993. The presidential elections were set for August 25, but hasty and inadequate technical preparations, concerns about fraud, and the lack of effective campaign organization by the opposition led the chief opposition candidates—former minister and Organization of African Unity Secretary General Edem Kodjo and lawyer Yawovi Agboyibo—to drop out of the race before election day and to call for a boycott. President Eyadema won the elections by a 96.42% vote against token opposition. About 36% of the voters went to the polls; the others boycotted.

Ghana-based armed dissidents launched a new commando attack on military sites in Lome in January 1994. President Eyadema was unhurt, and the attack and subsequent reaction by the Togolese armed forces resulted in hundreds of deaths, mostly civilian. The government went ahead with legislative elections on February 6 and February 20, 1994. In generally free and fair polls as witnessed by international observers, the allied opposition parties UTD and CAR together won a narrow majority in the National Assembly.

On April 22, President Eyadema named Edem Kodjo, the head of the smaller opposition party, the UTD, as prime minister instead of Yawovi Agboyibo, whose CAR party had far more seats. Kodjo's acceptance of the post of prime minister provoked the CAR to break the opposition alliance and refuse to join the Kodjo government.

Kodjo was then forced to form a governing coalition with the RPT. Kodjo's government emphasized economic recovery, building democratic institutions and the rule of law and the return of Togolese refugees abroad. In early 1995, the government made slow progress toward its goals, aided by the CAR's August 1995 decision to end a 9-month boycott of the National Assembly. However, Kodjo was forced to reshuffle his government in late 1995, strengthening the representation by Eyadema's RPT party, and he resigned in August 1996. Eyadema reemerged with a sure grip on power, controlling most aspects of government.

In the June 1998 presidential election, the government prevented citizens from effectively exercising the right to vote. The Interior Ministry declared Eyadema the winner with 52% of the vote in the 1998 election; however, serious irregularities in the government's conduct of the election strongly favored the incumbent and appear to have affected the outcome materially. Although the government did not obstruct the functioning of political opponents openly, the President used the strength of the military and his government allies to intimidate and harass citizens and opposition groups. The government and the state remained highly centralized: President Eyadema's national government appointed the officials and controlled the budgets of all subnational government entities, including prefectures and municipalities, and influenced the selection of traditional chiefs.

The second multi-party legislative elections of Eyadema's 33-year rule were held on March 21, 1999. However, the opposition boycotted the election, in which the ruling party won 79 of the 81 seats in the National Assembly. Those two seats went to candidates from little-known independent parties. Procedural problems and significant fraud, particularly misrepresentation of voter turnout,

marred the legislative elections. After the legislative election, the government announced that it would continue to pursue dialog with the opposition. In June 1999, the RPT and opposition parties met in Paris, in the presence of facilitators representing France, Germany, the European Union (EU), and La Francophonie (an international organization of French-speaking countries), to agree on security measures for formal negotiations in Lome.

In July 1999, the government and the opposition began discussions, and on July 29, 1999, all sides signed an accord called the "Lome Framework Agreement," which included a pledge by President Eyadema that he would respect the constitution and not seek another term as president after his current one expired in 2003. The accord also called for the negotiation of a legal status for opposition leaders, as well as for former heads of state (such as their immunity from prosecution for acts in office). In addition, the accord addressed the rights and duties of political parties and the media, the safe return of refugees, and the security of all citizens. The accord also contained a provision for compensating victims of political violence. The President agreed to dissolve the National Assembly in March and hold new legislative elections, which would be supervised by an independent national election commission (CENI) and which would use the single-ballot method to protect against some of the abuses of past elections. However, the March 2000 date passed without presidential action, and new legislative elections were ultimately rescheduled for October 2001. Because of funding problems and disagreements between the government and opposition, the elections were again delayed, this time until March 2002.

In May 2002 the government scrapped CENI, blaming the opposition for its inability to function. In its stead, the government appointed seven magistrates to oversee preparations for legislative elections. Not surprisingly, the opposition announced it would boycott them. Held in October, as a result of the opposition's boycott the government party won more than two-thirds of the seats in the National Assembly. In December 2002, Eyadema's government used this rubber-stamp parliament to amend Togo's constitution, allowing President Eyadema to run for an "unlimited" number of terms. A further amendment stated that candidates must reside in the country for at least 12 months before an election, a provision that barred the participation in the upcoming presidential election of popular Union des Forces du Progres (UFC) candidate, Gilchrist Olympio, who had been in exile since 1992. The presidential election was held June 1, 2003. President Eyadema was re-elected with 57% of the votes, amid allegations of widespread vote rigging.

On April 14, 2004, the Government of Togo signed an agreement with the European Union that included 22 commitments the Government of Togo must honor as a precondition for resumption of EU aid. Two of the most important of these commitments were a constructive national dialogue between the Government of Togo and the traditional opposition parties and free and democratic legislative elections.

By November 2004, Togo had made modest progress on some commitments, releasing 500 prisoners, removing prison sentences from most provisions of the Press Code, and initiating a dialogue with the core opposition parties. Consultations were ongoing with the European Union with regard to when and how to resume development cooperation.

On February 4, 2005 President Gnassingbe Eyadema died. In an unconstitutional move, the military leadership swore in as President Faure Gnassingbe, the late President Eyadema's son. Immediate condemnation by African leaders followed by sanctions of the Economic Community of West African States and the African Union combined with pressure from the international community led finally to a decision on February 25 for Faure Gnassingbe to step down. Protest efforts by the public included a large demonstration in Lome that was permitted to proceed peacefully. Prior to stepping down, Gnassingbe was selected as leader of the ruling party and named as a candidate in the announced presidential elections to choose a successor to Eyadema. Abass Bonfoh, National Assembly Vice President, was selected to serve as Speaker of the National Assembly and therefore simultaneously became interim President. Real power apparently was retained by Gnassingbe as he continued to use the offices of the President while the interim President operated from the National Assembly.

Deeply flawed elections held in April 2005 were marred by violence and widespread accusations of vote tampering, causing tens of thousands of Togolese to flee to neighboring Benin and Ghana. Faure Gnassingbe was pronounced the winner and was pressed by the international community—including regional heads of state—to form a government of national unity, including key opposition figures. After Gnassingbe failed to reach agreement with the opposition, he named as Prime Minister Edem Kodjo of the CPP, an original founder of the ruling RPT and former OAU Secretary-General and Togolese Prime Minister. Kodjo subsequently named a cabinet that kept security-related ministries in the hands of the RPT and did not include any representatives from the genuine opposition.

In August 2006 President Gnassingbe and members of the opposition signed the Global Political Agreement (GPA), bringing an end to the political crisis triggered by Gnassingbe Eyadema's death in February 2005 and the flawed and violent electoral process that followed. The GPA provided for a transitional unity government whose primary purpose would be to prepare for benchmark legislative elections. CAR opposition party leader and human rights lawyer Yawovi Agboyibo was appointed Prime Minister of the transitional government in September 2006. Leopold Gnininvi, president of the CDPA party, was appointed minister of state for mines and energy. The third opposition party, UFC, headed

by Gilchrist Olympio, declined to join the government, but agreed to participate in the national electoral commission and the National Dialogue follow-up committee, chaired by Burkina Faso President Blaise Compaore.

The legislative elections held on October 14, 2007, in which all opposition parties participated, were declared free and fair by international and national election observers. The RPT, with 50 seats, won a majority. The UFC took 27 seats, with the CAR receiving the remaining 4. RPT members were elected to all the internal leadership positions within the National Assembly.

On December 3, 2007, President Gnassingbe appointed as the new Prime Minister Komlan Mally, an RPT member and former Minister of Urban Development. The President named the rest of his cabinet on December 13, 2007 from the RPT and a number of lesser parties. The number of ministries was reduced substantially, down to 22 from 35. The other two parties elected to the National Assembly, the UFC and CAR, are not represented in the cabinet.

On September 5, 2008, Prime Minister Mally submitted his resignation to President Faure, who named Gilbert Fossoun Houngbo, formerly of the UNDP, to the position two days later. The rest of the cabinet was named on September 16, 2008 and is composed of members of the RPT, the CDPA, the CPP, and civil society. The number of ministers rose from 22 to 26, plus two secretaries of state.

GOVERNMENT AND POLITICAL CONDITIONS

President Gnassingbe faces a significant challenge, balancing entrenched interests with the need to implement democratic reforms and revive Togo's deteriorating economy. Togo's long-suffering population has seen its living standards decline precipitously since the beginning of the 1990s. The Togolese judiciary is modeled on the French system. For administrative purposes, Togo is divided into 30 prefectures, each having an appointed prefect.

Principal Government Officials

Last Updated: 11/12/08

Pres.: **Faure GNASSINGBE**
Prime Min.: **Gilbert HOUNGBO**
Min. of Agriculture, Animal Breeding, & Fisheries: **Charles AGBA**

ECONOMY

Subsistence agriculture and commerce are the main economic activities in Togo; the majority of the population depends on subsistence agriculture. Food and cash crop production employs the majority of the labor force and contributes about 42% to the gross domestic product (GDP). Coffee and cocoa are traditionally the major cash crops for export. Cotton cultivation increased rapidly in the 1990s, with 173,000 metric tons produced in 1999. After a disastrous harvest in 2001 (113,000 metric tons), production rebounded to 168,000 metric tons in 2002. However, cotton exports have plummeted in recent years due to arrears in payments to farmers, low cotton prices, and poor weather conditions; many cotton farmers have switched to other crops. As of December 2007, the Togolese Government had paid back all arrears to cotton farmers, and the industry is recovering slowly. Despite insufficient rainfall in some areas, the Togolese Government has achieved its goal of self-sufficiency in food crops—corn, cassava, yams, sorghum, millet, and groundnut. Small and medium-sized farms produce most of the food crop; farms range in size from one to three hectares.

Commerce is the most important economic activity in Togo after agriculture. Lome is an important regional trading center. Its port operates 24 hours a day, mainly transporting goods to the inland countries of Mali,

Burkina Faso, and Niger. Lome's "Grand Marche" is known for its entrepreneurial market women, who have a stronghold on many areas of trade, notably in African cloth. In addition to textiles, Togo is an important center for re-export of alcohol, cigarettes, perfume, and used automobiles to neighboring countries. Political instability during the last decade has, however, eroded Togo's position as a trading center.

In the industrial sector, phosphates are Togo's most important commodity. The country has an estimated 60 million metric tons of phosphate reserves. From a highpoint of 2.7 million tons in 1997, production dropped to approximately 1.3 million tons in 2002. The fall in production is partly the result of the depletion of easily accessible deposits and the lack of funds for new investment. The formerly state-run company benefited from private management, which took over in 2001, but the phosphate industry has all but collapsed in recent years. The International Monetary Fund (IMF) recommended a financial and strategic audit of the sector and that the government seek a new investor to take over. Togo also has substantial limestone and marble deposits.

When bilateral donors cut off assistance to Togo in the early 1990s as a result of the regimes' poor democracy and human rights performance, the country was unable to service its debts to multilateral lenders, who ceased their programs as a result. As part of the Government of Togo's strategy to address donor concerns, in 2006 it undertook discussions with the IMF toward the resumption of a country program. Togo successfully completed an IMF Staff-Monitored Program in mid-2007. Talks are underway to relaunch a regular program, which would hasten Togo's eligibility for World Bank assistance and multilateral debt relief. After the successful legislative elections in October 2007, missions from the EU, IMF, and World Bank visited Togo to assess the financial state of the country. The EU, immediately after the elections, reinitiated assistance with a grant of 26 million Euros to be used for urban development and democracy projects. As of fall 2006, Togo was $104.5 million in arrears to the World Bank and owed $15.4 million to the African Development Bank (ADB).

Togo is one of 16 members of the Economic Community of West African States (ECOWAS). The ECOWAS development fund is based in Lome. Togo also is a member of the West African Economic and Monetary Union (UEMOA), which groups eight West African countries using the CFA franc; the eight countries are Benin, Burkina Faso, Cote d'Ivoire, Guinea-Bissau, Mali, Niger, Senegal, and Togo. The West African Development Bank (BOAD), which is associated with UEMOA, is based in Lome. Togo long served as a regional banking center, but that position has been eroded by the political instability and economic downturn of the early 1990s. Historically, France has been Togo's principal trading partner, although other European Union countries are important to Togo's economy.

FOREIGN RELATIONS

Although Togo's foreign policy is nonaligned, it has strong historical and cultural ties with western Europe, especially France and Germany, the former colonial powers. Togo recognizes the People's Republic of China, North Korea, and Cuba. It re-established relations with Israel in 1987.

Togo pursues an active foreign policy and participates in many international organizations. It is particularly active in West African regional affairs and in the African Union. Relations between Togo and neighboring states are generally good.

U.S.-TOGOLESE RELATIONS

one of Togo's major trade partners. The largest share of U.S. exports to Togo generally has been used clothing and scrap textiles. Other important U.S. exports include rice, wheat, shoes, and tobacco products, and U.S. personal computers and other office electronics are becoming more widely used.

The Government of Togo, with the support of the Overseas Private Investment Corporation (OPIC) and the U.S. Agency for International Development (USAID), established an export processing zone (EPZ) in Togo in 1989. The zone has attracted private investors interested in manufacturing, assembly, and food processing, primarily for the export market. USAID closed its local office in 1994 and runs local development programs from its office in Accra through nongovernmental organizations in Togo.

Peace Corps began its work in Togo in 1962, which since that time has hosted more than 2,200 Peace Corps Volunteers. Currently there are 114 Volunteers serving in Togo. Volunteers have a successful history of collaboration and involvement with the Togolese people at all levels. Their efforts build upon counterpart relationships and emphasize low-cost solutions that make maximum use of local resources. Partnering with local and international organizations is an important component of Volunteer project activities. Volunteers work to promote self-sufficiency in the areas of small business development, education, environment, and health. All Volunteers, regardless of sector, are trained in how to promote HIV/AIDS awareness and prevention.

TRAVEL

Consular Information Sheet

September 10, 2008

Country Description: Togo is a small, economically stagnant country in West Africa in a state of political uncertainty. French is the official language, but Ewe and Mina are commonly spoken as well. Tourism facilities are limited, especially outside the capital city, Lomé.

Entry Requirements: A passport and visa are required. Travelers are encouraged to obtain visas prior to arrival due to recent difficulties with requesting them at the airport in Lomé or at some of the land borders. Visas issued in Togo are limited to 7 days and can take an hour or more to be issued. Travelers applying for visa extensions can also experience significant delays. Vaccination against yellow fever is required before entry. U.S. citizens should carry copies of their U.S. passports and vaccination records with them at all times while traveling in Togo so that, if questioned by local officials, they have proof of identity, U.S. citizenship, and required vaccinations readily available.

Travelers may obtain the latest information and details from the Embassy of the Republic of Togo, 2208 Massachusetts Avenue NW, Washington, DC 20008; telephone (202) 234-4212. Overseas, inquiries should be made at the nearest Togolese embassy or consulate.

Safety and Security: U.S. citizens are urged to avoid political rallies, street demonstrations, and maintain security awareness at all times. Togo has experienced periodic violence, strikes, and political tensions since 1990. Following the death of President Eyadema in February 2005, political activists took to the streets and held demonstrations throughout the country that resulted in more than 500 deaths. Land borders with Ghana and Benin are routinely shut down during elections. The October 2007 legislative elections were nonviolent with only minor incidents reported during the single post-election demonstration. The next major elections are the presidential elections scheduled for 2010.

For the latest security information, Americans traveling abroad should regularly monitor the Department of State, Bureau of Consular Affair's Internet site at http://travel.state.gov, where the current Travel Warnings and Travel Alerts, including the Worldwide Caution Travel Alert, can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S. and Canada, or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: Over the past year, Togo has seen a marked increase in incidents of violent crime throughout the country, including several recent machete attacks in poorly lit areas of Lomé. Rapid inflation and food shortages have contributed to increases in already critical crime levels in urban areas. Particular areas for Americans to avoid within Lomé, especially during the hours of darkness, include the Grand Marché area, the beach road, and the Ghana-Togo border areas. Travelers should avoid the beach even during daylight hours as purse-snatchings and muggings occur there regularly.

Pick pocketing and theft are common in Togo, especially along the beach and in the market areas of Lomé. While incidents of residential burglary are less common against foreigners, carjacking is on the rise, and even western diplomats have been victims of carjacking. Theft while riding in taxis is also increasing, as thieves steal bags, wallets, and passports. Taxicabs should not be shared with strangers.

Perpetrators of business fraud often target foreigners, including Americans. Formerly associated with Nigeria, these fraud schemes are now prevalent throughout western Africa, including Togo, and pose a danger of both financial loss and physical harm. An increasing number of Americans have been the targets of such scams, losing anywhere from several thousand to several hundred thousand dollars. Typically, these scam operations begin with an unsolicited communication, usually by e-mail, from an unknown individual who describes a situation that promises quick financial gain, often by assisting in the transfer of a large sum of money or valuables out of the country. The scenarios vary: an American must pretend to be the next-of-kin to a recently deceased Togolese who left a fortune unclaimed in a Togolese bank, or a person claiming to be related to present or former political leaders needs assistance in transferring large sums of cash, or even a business deal that appears to be legitimate. The requests are usually for the payment of advance fees, attorneys' fees, or down payments on contracts. The final payoff does not exist; the purpose of the scam is to get any money possible and to gain information about the American's bank account. The best way to avoid becoming a victim of advance-fee fraud is common sense—if it looks too good to be true, it probably is. You should carefully check out any unsolicited business proposals originating in Togo before you commit any funds, provide any goods or services, or undertake any travel. Please check the Embassy web site at http://togo.usembassy.gov for the most current information on fraud in Togo. For additional information, please see the Department of State brochure on International Financial Scams.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the near-

est U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance.

The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

The local equivalent to the "911" emergency line in Togo is: 117 or 171 for police, 172 for Gendarmerie, 242 for the Pharmacy on Duty, and 118 for Fire Services.

Medical Facilities and Health Information: Medical facilities in Togo are limited and of very poor quality, with no adequate emergency medical care. Availability of medications through local pharmacies is unreliable, and travelers should carry all necessary medications, properly labeled, with them. Malaria, a serious and sometimes fatal disease, is prevalent in Togo. For additional information on malaria, including protective measures, see the CDC travelers' health web site at http://www.cdc.gov/malaria.

According to the Togolese Ministry of Foreign Affairs and Ministry of Health, there are no HIV/AIDS entry restrictions for visitors to or foreign residents of Togo.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's internet site at http://www.cdc.gov/travel.

For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) website at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith/en.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Togo is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

While some major thoroughfares in urban parts of Togo are paved, many secondary streets are not, and become severely flooded every time it rains. Driving conditions are hazardous throughout Togo due to the presence of pedestrians, large numbers of small motorcycles, disorderly drivers (moped, car and truck drivers), livestock on the roadways, and the poor condition of the roads, including deep potholes.

Overland travel off the main network of roads generally requires a four-wheel-drive vehicle. Many drivers in Togo do not obey traffic laws and most traffic signals do not function properly. Drivers should be prepared for other vehicles to run red lights or stops signs and drive in the wrong direction on one-way streets.

Nighttime travel on unfamiliar roads is dangerous. Poorly marked checkpoints, often manned by armed, undisciplined soldiers, exist throughout the country, including in the capital. Banditry, including demands for bribes at checkpoints, has been reported on major inter-city highways, including the Lomé-Cotonou coastal highway.

Travelers are advised to be aware of their surroundings and to drive defensively. At official checkpoints, Togolese security officials prefer that you approach with your dome light on, and have your driver's license, registration, and proof of insurance ready.

Americans should be aware of the staged-accident ploy when driving in Lomé. In this scam, a motorbike will cut in front of you, cause a collision, and draw a crowd, which can turn hostile if you attempt to leave the scene of the so-called accident. Such encounters appear designed to extort money from the vehicle driver. Pedestrians also cause staged accidents. Genuine accidents can also draw hostile crowds. Travelers should drive with their car doors locked and windows closed, and have a cell phone in the vehicle. If you are involved in this kind of accident and can drive away, you should leave the scene, drive to a safe location, and alert both the police and the U.S. Embassy. Violent carjackings are periodically reported in Togo and tend to increase during the summer months and holiday season.

Travelers are advised to exercise caution when using any form of local public transportation. Never get into a taxi with unknown passengers and always agree on the fare before getting in.

Aviation Safety Oversight: As there is no direct commercial air service between the United States and Togo, the U.S. Federal Aviation Administration (FAA) has not assessed Togo's Civil Aviation Authority for compliance with International Civil Aviation Organization (ICAO) aviation safety standards. For more information, travelers may visit the FAA's Internet web site at http://www.faa.gov.

Special Circumstances: Power outages, voltage fluctuations, and water shortages are common throughout the country. Only certain U.S. credit cards are accepted in Togo. Most major hotels and their restaurants accept American Express, MasterCard, and Visa, while smaller hotels and restaurants do not. Travelers planning to use credit cards should know which cards are accepted before they commit to any transaction. Travelers should keep all credit card

receipts, as unauthorized card use and overcharging are common. There are some Automatic Teller Machines that dispense local currency in major banks and they are generally considered safe. Well-known money transfer firms, including Western Union, operate in Togo.

Photographing places affiliated with the government of Togo, including official government buildings, border crossings, checkpoints, police stations, military bases, utility buildings, airports, government vehicles, and government or military personnel, is strictly prohibited, and local authorities will confiscate film and cameras. Government buildings are not always clearly identifiable, as they vary from being very well marked to being not marked at all.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating Togolese laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Togoleseare severe, and convicted offenders can expect long jail sentences and heavy fines.

Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in Togoare encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration web site so that they can obtain updated information on travel and security within Togo. Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency. The U.S. Embassy is located on Boulevard Eyadema, Neighborhood Lomé II, Lomé; telephone (228) 261-5470, fax (228) 261-5499. The local mailing address is B.P. 852, Lomé. Its web site is http://lome.usembassy.gov.

Intercountry Adoption

January 2008

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is based on public sources and current understanding.

Questions involving foreign and U.S. immigration laws and legal interpretation should be addressed respectively to qualified foreign or U.S. legal counsel.

Patterns of Immigration: Recent U.S. immigrant visa statistics indicate that only two orphan visas have been issued to Togolese children within the past five fiscal years.

Adoption Authority: According to the Togolese Civil Code (article 224), the request for adoption must be presented to the Court of the residence of the adoptee. However, the High Court of Lomé has jurisdiction over intercountry adoptions by default.

While a High Court Judge may pronounce a full and final adoption, he/she may do so only after consulting with the Ministry of Social Affairs, and specifically the Adoption office within. The High Court, with the assistance of the Ministry of Social Affairs, will identify and match a child with potential adoptive parents if needed.

High Court of Lomé
Tel: (228) 221 56 39 (this is in fact the social affairs office's number)
B.P. 342
Lomé, Togo

Eligibility Requirements for Adoptive Parents: According to articles 209 and 210 of the Togolese Civil Code, both married couples (married for at least five years, not separated, and one spouse above 30 years old) and single individuals of 35 years old or older may adopt, provided that at the time of their application to adopt a Togolese child, the applicants do not already have biological children together (a couple with biological children from another union may adopt as long as they have no biological children together at the time of the adoption). The Ministry of Social Affairs does not allow same sex couples to adopt in Togo.

Residency Requirements: There are no residency requirements for intercountry adoptions.

Time Frame: When the adoption concerns a child chosen by the adoptive parents, the process can take up to three (3) months, and in some much cases, longer. When the government places a child with prospective adoptive parents, the length of time will vary depending of the complexity of the case and availability of a child.

Adoption Agencies and Attorneys: There are no private adoption agencies in Togo and attorneys are not authorized to sign adoption decrees. (The only document that notaries are authorized to issue is the Notarized Adoption Consent to be included in file for the Court review and decision. The Notarized Adoption Consent document occurs only after a home study.

Notaries can assist prospective parents in locating the correct office responsible for each paper. They can give some local guidance in what can

be a very confusing bureaucratic process. Prospective adoptive parents can expect to pay attorneys fees for services rendered.

Prospective adoptive parents should contact the U.S. Embassy in Lomé for an updated list of local notaries. Please be advised that some lawyers and notaries may promise to facilitate adoptions or help families overcome legal ineligibilities preventing them from adopting in Togo. The Ministry of Social Affairs has emphasized that these lawyers have no influence in the adoption process, only the High Court and Social Affairs do. The Ministry of Social Affairs has reiterated that the Adoption laws are not flexible and must be abided by fully.

Adoption Fees: Fees involved in the adoption procedure vary from case to case. Prospective adoptive parents should expect to pay a minimum of $150 to as high as $1,000. Also, applicants should include a self-addressed envelope for return postage in their application package to the High Court. The standard postage to the US is CFA 650, which is a little over a dollar. Prospective adoptive parents may wish to consult with overseas delivery services to find out the exact price for pre-paid envelopes for document deliveries from Togo.

Adoption Procedures: An adoption file should first start with an appointment with the officer in charge of adoption at the High Court of Lomé. Tel: (228) 221 56 39. The U.S. Embassy can set up the appointment for you.

The documents and fees incorporated in this flyer should be taken as a guideline; procedures tend to change frequently and without notice, so the court officer will be able to give you specific information on what will be required for each case.

An Application for adoption in form of a letter should be addressed to the President of the High Court of Lomé or the Court of residence of the adoptee together with a required documentation listed below. If a couple initiated the application, both should sign the letter. If the prospective adoptive parent(s) wish to express preferences regarding the age and gender of the child whom they would like to adopt, this information should be included in the letter.

The file should be addressed to:

Service Social près le Tribunal de Première Instance de Lomé
B.P. 342
Contact: Mr. Djikounou Kodjo,
911 5026
Lomé, Togo
Tel. 221 5639

If the adoptive parents have not yet identified a child, the High Court can identify a child who is eligible for adoption. The High Court works with a local NGO (Terre des Hommes) and orphanages. There are no pre-adoption fostering requirements.

Required Documents:

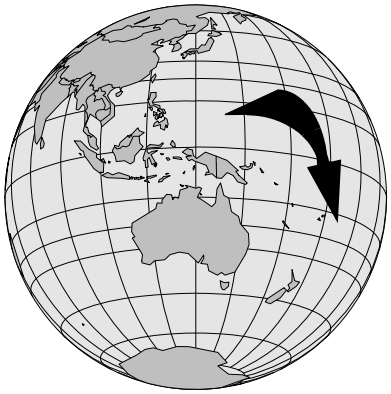
- The adoption request to the President of the High Court of Lomé or other competent court with exact age and gender of prospective adoptee;
- A police clearance certificate for each applicant (in the case of a couple);
- A legalized copy of birth certificate for each applicant (in the case of a couple);
- A legalized copy of marriage certificate for couple;
- A Medical certificate for each applicant;
- A Proof of financial resources (e.g. pay slips/latest bank statement);
- An approved I-600A from USCIS;
- A copy of the Home Study report;
- A copy of the psychological investigation report;
- Photographs (of applicants and their apartment/home);
- Letters of recommendation from family, friends or acquaintances;
- A prepaid or pre-stamped envelope;
- A Notarized Adoption Consent document expressing the consent of both parties (in the case of an adoption by consent).

Simple versus Plenary/Full adoption: For the moment Togolese law does not recognize simple adoption and only offers plenary/full adoptions. Plenary adoption severs the biological ties of a child with his biological antecedents and replaces them with a new identity, that of his adoptive parents.

Adoption versus Legal Guardianship: Togolese child and family law stipulates that the legal guardianship of a child or the delegation of parental authority can be granted in cases where the child is an orphan, or in instances where he/she is considered abandoned or needy with no family to provide elementary care.

The legal guardianship and the delegation of parental authority can be an alternative to adoption and not a conduit to adoption. While by effect of law, the adoption creates a relation of affiliation independently of the origin of the adoptee; the legal guardianship and the delegation of parental authority rather authorize the placement of a child with a family until his/her age of majority. The legal guardianship and the delegation of parental authority can be ended at any time by decision of the Court if new conditions arise.

The High Court, in conjunction with the Ministry of Social Affairs, grants legal guardianship and delegation of parental authority in consideration of the highest interest of the child. However, the Court does not authorize the child to be placed or taken out of the country in view of a full and final adoption. Hence, obtaining custody of a child in order to bring that child to the US to complete an adoption is not legal and should not be envisaged.



Embassy of the Republic of Togo
2208 Massachusetts Ave., N.W.
Washington, DC 20008
Tel: 202-234-4212/3

U.S. Immigration Requirements: Prospective adopting parents are strongly encouraged to consult USCIS publication M-249, *The Immigration of Adopted and Prospective Adoptive Children*, as well as the Department of State publication, *Intercountry Adoptions*. Please see the *Intercountry Adoption* section of this book for more details and review current reports online at http://adoption.state.gov.

Additional Information: Specific questions about adoption in Togo may be addressed to the U.S. Embassy in Lomé.

General questions regarding intercountry adoption may be addressed to the Office of Children's Issues, U.S. Department of State, CA/OCS/CI, SA-29, 4th Floor, 2201 C Street, NW, Washington, D.C. 20520-4818, toll-free Tel: 1-888-407-4747.

TONGA

Compiled from the October 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Kingdom of Tonga

PROFILE

Geography

Area: 747 sq. km. (288 sq. mi.).
Cities: Capital—Nuku'alofa (pop. 34,000).
Terrain: 171 islands, mainly raised coral but some volcanic; 48 inhabited.
Climate: Tropical, modified by trade winds. Warm season (December to May), cool season (May to December).

People

Nationality: Noun and adjective—Tongan(s).
Population: (2006 census) 101,990.
Age structure: 38% below 15; 8% over 60.
Annual growth rate: (2006) 0.4%.
Ethnic groups: Tongan 98%, other Polynesian, European.
Religions: Christian.
Languages: Tongan, English.
Education: Literacy (2004)—98.9%.
Health: Infant mortality rate (2006 est.)—19/1,000. Life expectancy at birth—68.56 yrs.: female—73 years; male—67.3 years.
Work force: (2003) 36,500: Agriculture—65%.
Unemployment: (2003) 5.2%.

Government

Type: Constitutional hereditary monarchy.
Constitution: 1875 (revised 1970).
Independence: June 4, 1970.
Government branches: Executive—monarch, prime minister, and cabinet. Legislative—unicameral Legislative Assembly. Judicial—Court of Appeals (Privy Council), Supreme Court, Land Court, Magistrates' Court.
Political subdivisions: Three main island groups—Ha'apai, Tongatapu, Vava'u.
Political parties: People's Democratic Party, Friendly Islands Human Rights and Democratic Movement, Paati Langafonua Tu'uloa.
Suffrage: Universal at age 21.
Budget: (2008/2009 est.) $132 million.

Economy (all figures in U.S. dollars)

GDP: (2006) $232 million.
Per capita GDP: (2006) $2,274.
GDP real growth rate: (2007) 3.5%.
Natural resources: Fish.
Agriculture: (25% of GDP) Products—squash, vanilla beans, root crops, fish, other marine products.
Industry: 17% of GNP.
Services: (2006/2007 est.) 57% of GDP.
Trade: (2007) Exports—$5.7 million; squash, fish, vanilla beans, root crops. Major export markets—New Zealand, U.S, Australia, Japan, Fiji. Imports—$117.9 million; food, machinery and transport equipment, fuels, chemicals. Major import sources—New Zealand, Fiji, Australia, U.S.,Japan
Fiscal year: July 1 to June 30.

GEOGRAPHY

Tonga is an archipelago directly south of Western Samoa. Its 171 islands, 48 of them inhabited, are divided into three main groups—Vava'u, Ha'apai, and Tongatapu—and cover an 800-kilometer (500 mi.)-long north-south line. The largest island, Tongatapu, on which the capital city of Nuku'alofa is located, covers 257 square kilometers (99 sq. mi.). Geologically the Tongan islands are of two types: most have a limestone base formed from uplifted coral formations; others consist of limestone overlaying a volcanic base.

The climate is basically subtropical with a distinct warm period (December-April), during which the temperatures rise above 32ºC (90ºF), and a cooler period (May-November), with temperatures rarely rising above 27ºC (80ºF). The temperature increases from 23ºC to 27ºC (74ºF to 80ºF), and the annual rainfall is from 170 to 297 centimeters (67-117 in.) as one moves from Tongatapu in the south to the more northerly islands closer to the Equator. The mean daily humidity is 80%.

PEOPLE

Tongans, a Polynesian group with a very small mixture of Melanesian, represent more than 98% of the inhabitants. The rest are European, mixed European, and other Pacific Islanders. There also are about 500 Chinese.

More than two-thirds of the population of the Kingdom of Tonga live on its main island, Tongatapu. An increasing number of Tongans have moved into Nuku'alofa, Tonga's capital and only urban and commercial center, where increasingly Western and indigenous Polynesian cultural and living patterns have blended. For instance, the extended family lifestyle is declining, with young couples choosing to live on their own. Nonetheless, village life and kinship ties continue to be important throughout the country. The Christian faith that has dominated Tongan life for almost two centuries is still influential. All commerce and entertainment activities cease on Sunday from midnight, and the constitution declares the Sabbath to be sacred, forever. However, within the past five years, an unsuccessful attempt was made in parliament to amend the Sunday law.

Primary education between ages 6 and 14 is compulsory and free in state schools. The state owns and operates 99% of the primary schools and 44% of secondary schools. Higher education includes teacher training, nursing and medical training, a small private university, a women's business college, and a number of private agricultural schools. Most higher education is pursued overseas.

HISTORY

The word Tonga means "south" in numerous Polynesian languages. Some scholars believe the inhabitants originally came from the islands now known as Samoa. Archaeological evidence indicates that the Tonga islands have been settled since at least 500 B.C., and local traditions have carefully preserved the names of the Tongan sovereigns for about 1,000 years. The power of the Tongan monarchy reached its height in the 13th century. At the time, chieftains exercised political influence as far away as Samoa.

During the 14th century, the King of Tonga delegated much of his temporal power to a brother while retaining the spiritual authority. Sometime later, this process was repeated by the second royal line, thus resulting in three distinct lines: the Tu'i Tonga with spiritual authority, which is believed to have extended over much of Polynesia; the Tu'i Ha'atakalaua; and the Tu'i Kanokupolu. The latter two had temporal authority for carrying out much of the day-to-day administration of the kingdom.

Dutch navigators in 1616 were the first Europeans to sight the Tongan archipelago. The main island of Tongatapu was first visited by the Dutch explorer Abel Tasman in 1643. Continual contact with Europeans, however, did not begin until more than 125 years later. Captain James Cook visited the islands in 1773 and 1777 and gave the archipelago the name "the Friendly Islands" because of the gentle nature of the people he encountered. He, of course, was never aware of the acrimonious debate that raged among contending nobles over who should have the honor of attacking Cook's tiny fleet and killing its sailors. In 1789, the famous mutiny on the British ship, Bounty, took place in the waters between the Ha'apai and Nomuka island groups.

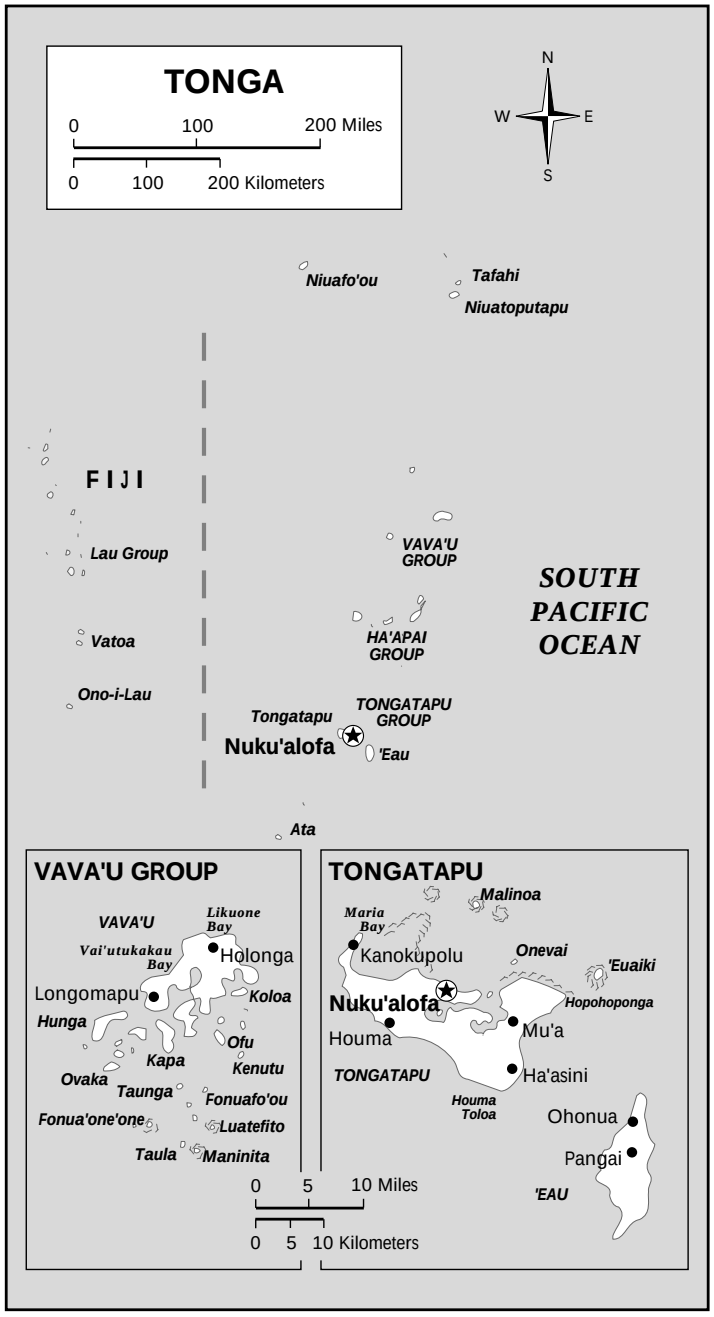
Shortly after Captain Cook's last visit, warfare broke out in the islands as the three lines of kings contended for dominance. At about the same time, young Tongan nobles serving as mercenaries took Tongan culture to Fiji's most eastern island group, the Laus. The first missionaries, attached to the London Missionary Society, arrived in Tonga in 1747. A second missionary group followed in 1822, led by Walter Lawry of the Wesleyan Missionary Society. They converted Taufa'ahau, one of the claimants to the Tu'i Kanokupolu line, and Christianity began to spread throughout the islands.

At the time of his conversion, Taufa'ahau took the name of Siaosi (George) and his consort assumed the name Salote (Charlotte) in honor of King George III and Queen Charlotte of England. In the following years, he united all of the Tongan islands for the first time in recorded history. In 1845, he was formally proclaimed King George Tupou I, and the present dynasty was founded.

He established a constitution and a parliamentary government based, in some respects, on the British model. In 1862, he abolished the existing system of semi-serfdom and established an entirely alien system of land tenure. Under this system every male Tongan, upon reaching the age of 16, was entitled to rent—for life and at a nominal fee—a plot of bushland (called "api tukuhau") of 8.25 acres, plus a village allotment of about three-eights of an acre for his home (api kolo).

Tonga concluded a treaty of friendship and protection with the United Kingdom in 1900 and came under British protection. It retained its independence and autonomy, while the United Kingdom agreed to handle its foreign affairs and protect it from external attack.

During World War II, in close collaboration with New Zealand, Tonga formed a local defense force of about 2,000 troops that saw action in the Solomon Islands. In addition, New Zealand and U.S. troops were stationed on Tongatapu, which became a staging point for shipping.



A new treaty of friendship and protection with the United Kingdom, signed in 1958 and ratified in May 1959, provided for a British Commissioner and consul in Tonga who were responsible to the Governor of Fiji in his capacity as British Chief Commissioner for Tonga. In mid-1965 the British Commissioner and consul became directly responsible to the U.K. Secretary of State for Colonial Affairs. Tonga became fully independent on June 4, 1970, an event officially designated by the King as Tonga's "reentry into the community of nations." On August 1, 2008, King

Siaosi Tupou V, who ascended the throne in September 2006, was formally crowned as Tonga's king.

GOVERNMENT

Tonga is the South Pacific's last Polynesian kingdom. Its executive branch includes the prime minister and the cabinet, which becomes the Privy Council when presided over by the monarch. In intervals between legislative sessions, the Privy Council makes ordinances, which become law if confirmed by the legislature. The unicameral Legislative Assembly is controlled by the royal family and nobles. It consists of nine nobles who are elected by the 33 hereditary nobles of Tonga and nine people's representatives elected by universal adult suffrage for 3-year terms. The cabinet includes 12 ministers, appointed by the monarch, currently including two from the nine selected nobles' representatives and two from the nine elected people's representatives. The governors of Ha'apai and Vava'u are appointed to their offices and serve as ex officio members of the cabinet. The Legislative Assembly sits for 4 or 5 months a year.

Tonga's court system consists of the Court of Appeal (Privy Council), the Supreme Court, the Magistrates' Court, and the Land Court. Judges are appointed by the monarch. The only form of local government is through town and district officials who have been popularly elected since 1965. The town official represents the central government in the villages; the district official has authority over a group of villages.

Principal Government Officials

Last Updated: 11/12/08

King: **Siaosi TUPOU V**
Prime Minister: **Feleti SEVELE**
Dep. Prime Min.: **Viliami TANGI, Dr.**
Min. of Agriculture, Food, Fisheries, & Forestry: **Peauafi HAUKINIMA**
Min. of Civil Aviation, Marine, & Ports: **Paul KARALUS**
Min. of Communication: **Feleti SEVELE**
Min. of Defense: **Sonatane Tu'akinamolahi Taumoepeau TUPOU**
Min. of Disaster Relief & Activities: **Feleti SEVELE**
Min. of Education, Women's Affairs, & Culture: **Tevita Hala PALEFAU**
Min. of Finance: **Siosiua UTOIKAMANU**
Min. of Foreign Affairs: **Sonatane Tu'akinamolahi Taumoepeau TUPOU**
Min. of Health: **Vailami TANGI, Dr.**
Min. of Justice: **Malia Viviena 'Alisi Numia Afeaki TAUMOEPEAU**
Min. of Labor, Commerce, & Industries: **Feleti SEVELE**
Min. of Lands, Survey, Natural Resources, & Environment: **Siosaia Ma'Ulupekotofa TUITA**
Min. of Police, Fire Services, & Prisons: **Taimani SIAOSI 'Aho**
Min. of Tourism: **Fineasi FUNAKI**
Min. of Training, Employment, Youth, & Sports: **TU'IVAKANO**
Min. of Works: **NUKU**

Attorney General: **Malia Viviena 'Alisi Numia Afeaki TAUMOEPEAU**
Governor, National Reserve Bank: **Siosiua UTOIKAMANU**
Ambassador to the US: **Fekitamoeloa 'UTOIKAMANU**
Permanent Representative to the UN, New York: **Fekitamoeloa 'UTOIKAMANU**

Tonga maintains an embassy at 250 East 51st Street, New York, New York 10022 (tel: 917-369-1136; fax: 917-369-1024). In addition, Tonga has a Consulate General in San Francisco.

POLITICAL CONDITIONS

For most of the 20th century Tonga was quiet, inward-looking, and somewhat isolated from developments elsewhere in the world. The Tongans, as a whole, continue to cling to many of their old traditions, including a respect for the nobility. However, an increasingly popular pro-democracy movement is articulating a rising demand for more rights for the common people and curbs to the influence of the nobility. Tonga's complex social structure is essentially broken into three tiers: the king, the nobles, and the commoners. Between the king, nobles, and commoners are matapule, sometimes called "talking chiefs," who are allied with the king or a noble, and who may also hold estates. Obligations and responsibilities among the groups are reciprocal, and although the nobility are able to extract favors from people living on their estates, they likewise must extend favors to their people. Status and rank play a powerful role in personal relationships, even within families.

Tongans are beginning to confront the problem of how to preserve their cultural identity and traditions in the wake of the increasing impact of Western technology and culture. Migration and the gradual monetization of the economy have led to the breakdown of the traditional extended family. Some of the poor, traditionally cared for by the extended family, are now being left without visible means of support. The rapidly increasing population is already too great to provide the constitutionally mandated 8.25-acre plot of land or api tukuhau due each male at age 16. Population density reached 132 persons per square kilometer in 2002, fueling the growing population shift from farm and village to urban centers, where traditional societal and political structures are undergoing steady change. Increasing educational opportunities, expanded media penetration and foreign influences via the country's extensive diaspora have raised the political awareness of Tonga's commoners and stimulated dissent against the current system of government. In the past two decades, calls for political reform have gained wide-ranging support and momentum.

Historically, political reform has been slow in the kingdom. In a departure from this, the late King of Tonga announced in late 2004 that he would henceforth include people's representatives in the 12-member appointed cabinet. Following elections in March 2005, the king appointed two of nine recently elected people's representatives and two nobles' representatives as cabinet ministers. In April 2005, Tonga's first official political party, the People's Democratic Party, was formed, and its candidate was elected to parliament in special May by-elections held to fill the two people's representational seats vacated by the king's cabinet appointments. The by-election also resulted in the election of the first woman to sit in the Tongan parliament in 24 years. Out of the nine current people's representatives, seven are members of Tongan democratic movements and two are independent. When the princely prime minister resigned from office in early 2006, People's Representative Feleti Sevele was appointed as the first commoner prime minister in modern times.

In November 2006, days of political demonstrations deteriorated into a riot, leaving the central business district of Nuku'alofa in ruins. The government declared a state of emergency to restore law and order to the capital. The state of emergency was repeatedly extended, and was still in place in October 2008. In recent years, the king has repeatedly expressed support for political reforms. In August 2007, a tripartite committee of cabinet, nobles', and people's representatives issued a report to the Legislative Assembly recommending major changes to the political system that would result in a sizable majority of people's representatives in the Assembly, with the Assembly then choosing a prime minister from among its members. The prime minister would in turn select a cabinet from among the Assembly members. The Assembly endorsed the committee's report "in general," prior to adjourning in October 2007,. In July 2008, the Assembly passed legislation to establish a constitutional and electoral reform commission charged with undertaking preparatory work for the 2010 political reforms.

ECONOMY

Tonga's economy is characterized by a large non-monetary sector and a heavy dependence on remittances from the more than half of the country's population that lives abroad, chiefly in Australia, New Zealand, and the United States. Much of the monetary sector of the economy is dominated, if not owned, by the royal family and nobles. This is particularly true of telecommunications and electricity generation and supply. Many small businesses, particularly in the retail sector on Tongatapu, are owned by recent Chinese immigrants who arrived under a cash-for-passports scheme ended in 1998. Royal-owned and Chinese businesses were among those targeted in the November 2006 rioting.

The manufacturing sector consists of handicrafts and a few other very small-scale industries, which together contribute only about 3% of GDP. Commercial business activities are to a large extent dominated by large trading companies found throughout the South Pacific. In September 1974, the country's first com-

mercial trading bank, the Bank of Tonga, opened. Following the destruction of the capital's commercial center in the November 2006 riots, government, business, and international donors have combined forces to support the reconstruction of Nuku'alofa.

Rural Tongans rely on plantation and subsistence agriculture. Squash pumpkins, vanilla beans, and root crops such as cassava and yams, coffee, and noni are the major cash crops. Pigs and poultry are the major types of livestock. Horses are kept for draft purposes, primarily by farmers working their api. More cattle are being raised, and beef imports are declining. Fisheries are also a growing export sector, with tuna, beche de mer, and seaweed being the major marine export products.

Tonga's development plans emphasize a growing private sector, upgrading agricultural productivity, revitalizing the squash and vanilla bean industries, developing tourism, and improving the island's communications and transportation systems. Substantial progress has been made, but much work remains to be done. A small but growing construction sector is developing in response to the inflow of aid monies and remittances from Tongans abroad. Government, international development agencies, and major donor nations have together identified a number of promising means to diversity the Tongan economy. One hope is seen in fisheries; tests have shown that sufficient skipjack tuna pass through Tongan waters to support a fishing industry. Another potential development activity is exploitation of forests, which cover 35% of the kingdom's land area. Plantation coconut trees past their prime bearing years also provide a potential source of lumber.

FOREIGN RELATIONS

Tonga maintains cordial relations with most countries and has close relations with its Pacific neighbors. It is a member of the Pacific Islands Forum. In 1998, it recognized China and broke relations with Taiwan. In 1972, Tonga laid claim to the tide-washed, isolated Minerva Reefs, some 480 kilometers southwest of Nuku'alofa, to forestall efforts by a private Anglo-American group to establish an independent Republic of Minerva on the reefs. The reefs are regularly patrolled by the Tonga Defense Services.

DEFENSE

The Tonga Defense Service (TDS) is a 500-person force. The force is comprised of a headquarters platoon and a light infantry company. A coastal naval unit of four small patrol boats and amphibious landing craft operates as a component of the TDS. The force's mission is to assist in maintenance of public order, to patrol coastal waters and fishing zones, and to engage in civic action and national development projects. The main base of operations is the capital, Nuku'alofa. The TDS is partially supported by defense cooperation agreements with both Australia and New Zealand, which support the TDS with small in-country detachments of military technicians. The United States military provides training to the TDS and conducts humanitarian civic action projects in Tonga. Since 2002, TDS soldiers have been deployed as part of a multi-national regional peacekeeping force in the Solomon Islands. Tonga's third contingent of TDS soldiers deployed to Iraq departed for Baghdad in February 2008. Since the November 2006 riots, TDS have had authority to maintain law and order and assist the police within a declared restricted area of Nuku'alofa.

U.S.-TONGA RELATIONS

The United States and Tonga enjoy close cooperation on a range of international issues. Officers of the American Embassy in Suva, Fiji, are concurrently accredited to Tonga and make periodic visits since the United States has no permanent consular or diplomatic offices in Tonga. Peace Corps Volunteers teach and provide technical assistance to Tongans. Tonga has no embassy in Washington, DC, but has a permanent representative to the United Nations in New York who also is accredited as ambassador to the United States. A large number of Tongans reside in the United States, particularly in Utah, California, and Hawaii. Trade between the U.S. and Tonga is relatively low, but it has seen a steady increase in recent years. In 2001 U.S. exports to Tonga totaled $4.8 million, and by 2005 they had increased to $10.78 million. In 2005, the U.S. imports from Tonga totaled $6.45 million.

TRAVEL

Consular Information Sheet

June 16, 2008

Country Description: Tonga is a South Pacific island nation consisting

of 171 islands, of which 45 are inhabited. Tonga is a constitutional monarchy and a member of the British Commonwealth. Its agrarian economy is developing and its tourist industry, although limited, is growing. Tourist facilities are concentrated in and around the main island of Tongatapu where the capital, Nuku'alofa, is located.

The Tongan Tourist Bureau has a wide range of information of interest to travelers. The web site is www.tongaholiday.com.

Entry Requirements: A passport and an onward/return ticket are required. Visas are not required for stays of up to 30 days. Tonga collects a departure tax. For further information about entry requirements, travelers, particularly those planning to enter by sea, may wish to contact the Consulate General of Tonga at 360 Post Street, Suite 604, San Francisco, California 94108; telephone 415-781-0365.

Safety and Security: An organized movement for political reform exists in Tonga. Protests in November 2006 became violent, resulting in fires that destroyed much of the downtown area of Nuku'alofa. American citizens are advised to avoid large public gatherings and to exercise caution if within the vicinity of any demonstrations, as they could turn violent at any time. For the latest security information, Americans traveling abroad should regularly monitor the Department's web site where the current Worldwide Caution Public Announcement, Travel Warnings and Public Announcements can be found. Up-to-date information on security can also be obtained by calling 1-888-407-4747 toll free in the U.S., or, for callers outside the United States and Canada, a regular toll line at 1-202-501-4444. These numbers are available from 8:00 a.m. to 8:00 p.m. Eastern Standard Time, Monday through Friday (except U.S. federal holidays).

Tonga has three emergency contact numbers: 911 connects to the Tonga Telecommunications emergency operators; 922 connects directly to the police; and 933 connects directly to the hospital. Americans requiring immediate emergency services in Tonga should call one of these emergency contact numbers.

Crime: Although the crime rate in Tonga is low compared to that in the U.S. and most European countries, petty crime and theft does take place. Though rare, crimes against persons occur as well. Visitors should not be complacent regarding personal safety or the protection of valuables.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the U.S. Embassy in Suva, Fiji at (679) 331 4466 (ask for American Citizen Services). If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, to contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney, if needed.

Medical Facilities and Health Information: Medical facilities in Tonga are extremely limited. The cities of Nuku'alofa and Neiafu have hospitals with limited emergency and outpatient facilities. Local residents and visitors with serious medical problems are often referred to New Zealand for treatment. For additional information on medical visas for New Zealand, contact the Embassy of New Zealand, 37 Observatory Circle NW, Washington, DC 20008, (202) 328-4800 or the Consulate General in Los Angeles (310) 207-1605. Serious medical conditions requiring hospitalization and/or medical evacuation to the United States can cost thousands of dollars. Doctors and hospitals often expect immediate cash payment for health services.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's web site at http://wwwn.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and if it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Tonga is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

No roadside assistance is available. Traffic moves on the left in Tonga. While roads in Nuku'alofa are paved, most other roads are not. Animals and unwary pedestrians walking in the road make night driving on unlit secondary roads hazardous.

For specific information concerning Tonga driving permits, vehicle inspection, road tax and mandatory insurance, contact the Consulate General of Tonga in San Francisco. Visit the website of the country's national tourist office and national authority responsible for road safety at http://www.tongaholiday.com.

Aviation Safety Oversight: The U.S. Federal Aviation Administration (FAA) has assessed the Government of Tonga's Civil Aviation Authority as being in compliance with International Civil Aviation Organization (ICAO) aviation safety standards for oversight of Tonga's air carrier operations.

For further information, travelers may visit the FAA's web site at http://www.faa.gov.

Special Circumstances: Tonga's customs authorities may enforce strict regulations concerning temporary importation into or export from Tonga of items such as firearms, explosives, motor vehicles, eggs, and certain types of alcohol. It is advisable to contact the Consulate General of Tonga in San Francisco for specific information regarding customs requirements.

U.S. citizens are encouraged to carry a copy of their U.S. passports with them at all times, so that if questioned by local officials, proof of identity and U.S. citizenship are readily available. U.S. citizens who are detained are encouraged to request that a consular officer from the U.S. Embassy in Suva, Fiji, be notified.

The cyclone season is November through April. The Fiji Meteorological Service maintains a Tropical Cyclone Warning Center (TCWC) in Nadi serving the Southwest Pacific Region. General information about natural disaster preparedness is available online at http://travel.state.gov/travel/tips/emergencies/emergencies_1207.html and from the U.S. Federal Emergency Management Agency (FEMA) at http://www.fema.gov.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than those in the United States for similar offenses. Persons violating Tongan law, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs are strict, and convicted offenders can expect jail sentences and fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: There is no U.S. Embassy or other U.S. diplomatic or consular post in Tonga. The U.S. Embassy in Fiji provides assistance for U.S. citizens in Tonga. Americans living or traveling in Tonga are encouraged to register with the U.S. Embassy in Suva through the State Department's travel registration web site, and to obtain updated information on travel and security within Tonga.

Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate. The U.S. Embassy in Fiji is located at 31 Loftus Street in Fiji's capital city of Suva. The telephone number is (679) 331-4466; the fax number is (679) 330-2267. Information may also be obtained by visiting the Embassy's home page at http://suva.usembassy.gov. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency.

Intercountry Adoption

November 2006

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services.

For more information, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is based on public sources and current understanding. Questions involving foreign and U.S. immigration laws and legal interpretation should be addressed respectively to qualified foreign or U.S. legal counsel.

Please Note: Tongan law states that prospective adopting parents must reside with the child for period of at least six months prior to the application for adoption of that child. In addition, under Tongan law, only illegitimate children may be adopted.

Patterns of Immigration: Please review current reports online at http://adoption.state.gov.

Adoption Authority: The Supreme Court of the Kingdom of Tonga is the adoption authority. The address for the Supreme Court in Tonga is:

P. O. Box 11
Nuku'alofa, Tonga
Phone: (676) 23599.

Eligibility Requirements for Adoptive Parents: Tongan law permits both single and married foreigners to adopt Tongan children. There is no specific minimum or maximum age requirement for adoptive parents. However, the prospective parents must show themselves able to provide adequate emotional and financial support for the child. Under no circumstances are proxy adoptions allowed.

Residency Requirements: Prospective adoptive parents must reside with the child for six months prior to the application for adoption of that child. The Supreme Court occasionally waives the residency requirements in exceptional cases.

Time Frame: Currently, the typical time frame from physically meeting the child to having an adoption order is six to eight months.

Adoption Agencies and Attorneys: Adoption agencies and intermediaries specializing in adoption do not exist in Tonga.

Many prospective adoptive parents work through church organizations in Tonga to request assistance in identifying children who might be available for adoption. In practice, most Tongan adoptions occur within the child's birth family.

Although Tonga does not have adoption agencies, American prospective adoptive parents may still choose to work with a U.S. adoption agency to assist with the U.S. portions of the adoption process. If they do so, they should fully research any such adoption agency or facilitator.

Adoption Fees: The Tongan government fee is around US$17 per child, up to a maximum of less than US$25 if adopting more than one child. Tongan attorney fees generally range between US$300 and US$400 per child.

Adoption Procedures: Prospective adoptive parents must first identify a child whom they wish to adopt. They then file an application for letters of adoption with the office of the Registrar of the Supreme Court. After reviewing the application to ensure that it is in order, the Supreme Court appoints a Guardian Ad Litem (usually a representative from Crown Law) to compile a report with recommendations on whether or not the applicants should be granted letters of adoption.

When the Court receives the Guardian Ad Litem report, it will set a date to hear the application, which is usually done in chambers in the presence of the applicants. At that hearing, the judge will make a decision and notify the applicants (if they aren't present).

It is customary for Tongans who wish to adopt a child to contribute to the child's maintenance between the time of the request to the biological mother and the issuance of letters of adoption. All other payments are prohibited. An affidavit of declarations about the applicants must specifically declare any payments.

The sworn affidavit of declaration from prospective adoptive parents must declare any payments made towards the welfare of the child. Tongan authorities take child buying very seriously and they would like to rule out is any circumstance/instance in which the child's biological mother is paid to give her consent to the adoption of the child.

Almost all Tongan adoptions involve direct relinquishments of children by their birth mothers to the adoptive parents, and almost all are arranged either between relatives, by close friends, or through religious institutions.

Please note that in some instances, such direct relinquishments, while appropriate under Tongan law, may complicate the U.S. immigration process.

American prospective adoptive parents considering a Tongan adoption in which the child will be directly relinquished should contact the U.S. Embassy in Suva (Fiji) early in the process to confirm whether the circumstances of their specific case will or will not preclude the child's immigration to the United States.

Required Documents: Prospective adopting parents must provide the following documents when submitting an application for adoption to the Tonga Supreme Court:

- An independent home study report must be submitted by all overseas applicants for adoptions.
- Application for adoption.
- Evidence that the adoption is in the best interest of the child. (For example, a statement of the prospective adoptive parents' motives for adoption, proof of financial capabilities, etc.)
- Child's original birth certificate.
- Prospective adoptive parents' marriage license (if married).
- Prospective adoptive parents' birth certificates.
- Prospective adoptive parents' financial information, such as bank statements, job letters, etc.
- Death certificate(s) of birth parents of child (if deceased).
- Consent to adoption from biological mother.
- Sworn affidavits of applicants for letters of adoption and sworn affidavits of the child's biological parents.
- Two letters of support/recommendations from the prospective adoptive parents neighbors or friends stating the suitability of applicants for adopting.
- Fee of US $5.00 for the application for adoption.

Once the application is approved, the applicants have to pay a second fee of US$12.00 for the Letter of Adoption.

Guardianship: The Tongan Legal Guardianship Act of 2004 makes it possible for Tongan authorities to grant legal guardianship of legitimate children under age 18.

However, Tongan law is silent about (neither prohibits nor approves) whether such children may be removed from Tonga to be adopted in another country. American citizens interested in pursuing legal guardianship of a Tongan child should consult a Tongan attorney for the latest information.

Passports: Current Tongan law places restrictions on the issuance of Tongan passports to Tongan children adopted by foreigners. The children may obtain Tongan passports, but only in their birth (rather than adoptive) names.

It is advisable that applicants for letters of adoption that their prospective adoptive child already has a Tongan passport before the adoption order has been granted. American prospective adoptive parents do not have legal standing to apply for a Tongan passport for a minor child.

The biological parent or a Tongan legal guardian must consent to the passport application. Tongan law clearly states, "The adopted person shall bear the name of and be deemed to be of the same nationality as the person to whom Letters of Adoption have been granted by the Court."

Note: The Tongan Government is proposing to pass a Dual Nationality Law in the near future. It is unclear, however, what this law may contain or how it may affect adoptions of Tongan children.

Embassy of the Kingdom of Tonga
250 East 51st Street,
New York, NY 10022
Tel: (917) 369-1136
Fax: (917) 369-1024

U.S. Immigration Requirements: Prospective adoptive parents are strongly encouraged to consult USCIS publication M-249, *The Immigrationo of Adopted and Prospective Adoptive Children*, as well as the Department of State publication, *Intercountry Adoptions*. Please see the *Intercountry Adoption* section of this book for more details and review current reports online at http://adoption.state.gov.

Embassy of the United States
31 Loftus Street

Additional Information: Specific questions about adoption in Tonga may be addressed to the U.S. Embassy in Suva.

General questions regarding intercountry adoption may be addressed to the Office of Children's Issues, U.S. Department of State, CA/OCS/CI, SA-29, 4th Floor, 2201 C Street, NW, Washington, D.C. 20520-4818, Toll-free Tel: 1-888-407-4747.

TRINIDAD AND TOBAGO

Compiled from the August 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Republic of Trinidad and Tobago

PROFILE

Geography

Area: 5,128 sq. km. (1,980 sq. mi.), about the size of Delaware. Trinidad—4,828 sq. km. (1,864 sq. mi). Tobago—300 sq. km. (116 sq. mi).
Cities: Capital—Port of Spain (metropolitan pop. 310,000). Other cities—San Fernando, Chaguanas, Arima, Scarborough (Tobago).
Terrain: Plains and low mountains.
Climate: Tropical; principal rainy season is June through December.

People

Nationality: Noun and adjective—Trinidadian(s) and Tobagonian(s). (Note: A popular combination name for Trinidadians and Tobagonians is Trinbagonians.)
Population: (2007 est.) 1,303,188.
Annual growth rate: 0.4%.
Ethnic groups: (2000) East Indian 40.0%, African 37.5%, mixed 20.5%, European 0.6%, Chinese 0.3%, other/not stated 1.1%.
Religions: (2000) Roman Catholic 26.0%, Hindu 22.5%, Anglican 7.8%, Pentecostal 6.8%, Baptist 7.2%, other Christian 5.8%, Muslim 5.8%, Seventh Day Adventist 4%, other 10.8%, unspecified 1.4%, none 1.9%.
Languages: English.
Education: Years compulsory—8. Literacy—98.6%.
Health: Infant mortality rate: (2005 est.)—25.81/1,000. Life expectancy (2006 est.)—66 yrs. male; 68 yrs. female.
Work force: (615,400 in 2007 est.) Trade and services 44.1%, construction 16.8%, government 20.1%, manufacturing 10.2%, agriculture/sugar 3.9%, oil/gas 3.8%, utilities 1.1%.

Government

Type: Parliamentary democracy.
Independence: August 31, 1962.
Constitution: September 24, 1976.
Government branches: Executive—president (chief of state), prime minister (head of government), cabinet. Legislative—bicameral parliament. Judicial—independent court system; highest court of appeal is Privy Council (London).
Political subdivisions: Nine regional corporations, two city corporations, three borough corporations, one ward (Trinidad); Tobago House of Assembly.
Political parties: People's National Movement (PNM); United National Congress (UNC); Congress of the People (COP); other minor parties, including the National Alliance for Reconstruction (NAR).
Suffrage: Universal at 18.

Economy (2007 est.)

GDP: U.S. $20.9 billion (current prices).
Annual growth rate: 5.5% (2007 est.), 12.2% (2006 preliminary).
Per capita income: U.S. $16,041.
Natural resources: Oil and natural gas, timber, fish. Petroleum (crude oil, natural gas, petrochemicals) 44.3% of GDP.
Financial services: 13.5% of GDP.
Distribution including restaurants: 14% of GDP.
Manufacturing: (food and beverages, assembly, chemicals, printing) 7.2% of GDP: (excludes oil refining and petrochemical industries).
Construction and Quarrying: 7.4% of GDP.
Transport/storage/communication: 6.6% of GDP.
Government: 4.6% of GDP.
Education, cultural community services: 2% of GDP.
Electricity and water: 1.3% of GDP.
Agriculture: (sugar, poultry, other meat, vegetables, citrus) 0.4% of GDP.
Hotels and guesthouses: 0.2% of GDP.

PEOPLE AND HISTORY

Columbus landed on and named Trinidad in 1498, and Spaniards settled the island a century later. Spanish colonizers largely wiped out the original inhabitants—Arawak and

Carib Indians—and the survivors were gradually assimilated. Although it attracted French, free black, and other non-Spanish settlers, Trinidad remained under Spanish rule until the British captured it in 1797. During the colonial period, Trinidad's economy relied on large sugar and cocoa plantations. Tobago's development was similar to other plantation islands in the Lesser Antilles and quite different from Trinidad.

During the colonial period, French, Dutch, and British forces fought over possession of Tobago, and the island changed hands 22 times—more often than any other West Indies island. Britain took final possession of Tobago in 1803. The two islands of Trinidad and Tobago were incorporated into a single colony in 1888. Trinidad and Tobago achieved full independence in 1962 and joined the British Commonwealth. Trinidad and Tobago became a republic in 1976.

The people of Trinidad and Tobago are mainly of African or East Indian descent. Virtually all speak English. Small percentages also speak Hindi, French patois, and several other dialects. Trinidad has two major folk traditions: Creole and East Indian. Creole is a mixture of African elements with Spanish, French, and English colonial culture. Trinidad's East Indian culture came to the island beginning May 30, 1845 with the arrival of indentured servants brought to fill a labor shortage created by the emancipation of the African slaves in 1838. Most remained on the land, and they still dominate the agricultural sector, but many have become prominent in business and the professions. East Indians have retained much of their own way of life, including Hindu and Muslim religious festivals and practices.

GOVERNMENT

Trinidad and Tobago is a unitary state, with a parliamentary democracy modeled after that of Great Britain. Although completely independent, Trinidad and Tobago acknowledged the British monarch as the figurehead chief of state from 1962 until 1976. In 1976 the country adopted a republican Constitution, replacing Queen Elizabeth with a president elected by Parliament. The general direction and control of the government rests with the cabinet, led by a prime minister and answerable to the bicameral Parliament.

The members of the House of Representatives are elected to terms of at least 5 years. Elections may be called earlier by the president at the request of the prime minister or after a vote of no confidence in the House of Representatives. Parliamentary elections took place on November 5, 2007; the number of seats contested in the House of Representatives in that vote increased from 36 to 41.

The Senate's 31 members are appointed by the president: 16 on the advice of the prime minister, 6 on the advice of the leader of the opposition, and 9 independents selected by the president from among outstanding members of the community. Elected councils administer the nine regional, two city, and three borough corporations on Trinidad. Since 1980 the Tobago House of Assembly has governed Tobago with limited responsibility for local matters.

The country's highest court is the Court of Appeal, whose chief justice is appointed by the president after consultation with the prime minister and leader of the opposition. The Judicial Committee of the Privy Council in London decides final appeal on some matters. Member states of the Caribbean Community (CARICOM) selected Trinidad as the headquarters site for the new Caribbean Court of Justice (CCJ), which is intended eventually to replace the Privy Council for all CARICOM states. The CCJ heard its first case in August 2005. Despite having its seat in Port of Spain, the CCJ has not yet supplanted the Privy Council for Trinidad and Tobago due to a legislative dispute over constitutional reform.

Principal Government Officials

Last Updated: 11/12/08

Pres.: **George Maxwell RICHARDS**
Prime Min.: **Patrick MANNING**
Min. of Agriculture, Land, & Marine Resources: **Arnold PIGGOTT**
Min. of Community Development, Culture, & Gender Affairs: **Marlene MCDONALD**
Min. of Education: **Esther LE GENDRE**
Min. of Energy & Energy Industries: **Conrad ENILL**
Min. of Finance: **Karen NUNEZ-TESHEIRA**
Min. of Foreign Affairs: **Paula GOPEE-SCOON**
Min. of Health: **Jerry NARACE**
Min. of Labor & Small & Micro-Enterprise Development: **Rennie DUMAS**
Min. of Legal Affairs: **Peter TAYLOR**
Min. of Local Govt.: **Hazel MANNING**
Min. of National Security: **Martin JOSEPH**
Min. of Planning, Housing, & the Environment: **Emily GAYNOR DICK-FORDE**
Min. of Public Admin.: **Kennedy SWARTSINGH**
Min. of Public Information: **Neil PARSANLAL**
Min. of Public Utilities: **Mustapha ABDUL-HAMID**
Min. of Science, Technology, & Tertiary Education: **Christine KANGALOO**
Min. of Social Development: **Amery BROWNE**
Min. of Sports & Youth Affairs: **Gary HUNT**
Min. of Trade & Industry: **Lenny SAITH**
Min. of Tourism: **Joseph ROSS**
Min. of Works & Transport: **Colm IMBERT**
Min. in the Ministry of Finance: **Mariano BROWNE**
Min. in the Office of the Prime Min.: **Lenny SAITH**
Attorney Gen.: **Bridgette ANNISETTE-GEORGE**
Governor, Central Bank: **Ewart WILIAMS**
Ambassador to the US: **Glenda MOREAN-PHILLIP**
Permanent Representative to the UN, New York: **Marina Annette VALERE**

The embassy of the Republic of Trinidad and Tobago is located at 1708 Massachusetts Avenue NW, Washington, DC 20036 (tel. 202-467-6490; fax. 202-785-3130).

POLITICAL CONDITIONS

The first political party in Trinidad and Tobago with a continuing organization and program—the People's National Movement (PNM)—emerged in 1956 under Dr. Eric Williams, who became Prime Minister upon independence and remained in that position until his death in 1981. Politics have generally run along ethnic lines, with Afro-Trinidadians supporting the PNM and Indo-Trinidadians supporting various Indian-majority parties, such as the United National Congress (UNC). Most political parties, however, have sought to broaden their appeal and their candidate lists for the November elections reflect this.The PNM remained in power following the death of Dr. Williams, but its 30-year rule ended in 1986 when the National Alliance for Reconstruction (NAR), a "rainbow party" aimed at Trinidadians of both African and Indian descent, won a landslide victory by capturing 33 of 36 seats. Tobago's A.N.R. Robinson, the NAR political leader, became Prime Minister. The NAR began to break down when the Indian component withdrew in 1988. Basdeo Panday, leader of the old United Labor Front (ULF), formed the new opposition with the UNC.

In July 1990, the Jamaat al Muslimeen, an extremist Black Muslim group with an unresolved grievance against the government over land claims, tried to overthrow the NAR government. The group held the prime minister and members of parliament hostage for 5 days while rioting and looting shook Port of Spain. After a long standoff with the police and military, Jamaat leader Yasin Abu Bakr and his followers surrendered to Trinidad and Tobago authorities. In 1992 the Court of Appeal upheld the validity of a government amnesty given to the Jamaat members during the hostage crisis. Abu Bakr and 113 other Jamaat members were jailed for two years while other courts debated the amnesty's validity. All 114 members were eventually released after a ruling by the U.K. Privy Council.

In 1991 elections, the NAR lost control of the government to the PNM, led by Patrick Manning who became prime minister. The Panday-led UNC finished second and replaced the NAR as chief opposition party. In 1995 Manning called for elections, in which the PNM and UNC both won 17 seats and the NAR won two seats. The UNC allied with the NAR and formed the new government, with Panday becoming prime minister—the first prime minister of East Indian descent. Although elections held in 2000 returned the UNC to power, the UNC government fell in 2001 with the defection of three of its parliamentarians, and the subsequent elections resulted in an even 18-18 split between the UNC and the PNM. President A.N.R. Robinson bypassed his former party colleague Panday by inviting PNM leader Manning to form a government, but the inability to break the tie delayed Parliament from meeting. Manning called elections in 2002, after which the PNM formed the next government with a 20-16 majority.

Elections were held again on November 5, 2007, with the PNM winning 26 seats and the UNC securing the remaining 15; the recently-formed Congress of the People party (COP) won no seats. Prime Minister Manning took his oath of office on November 7 to begin another 5-year term. All three major parties are committed to free market economic policies and

increased foreign investment. Trinidad and Tobago has remained cooperative with the United States in the regional fight against narcotics trafficking and on other issues.

ECONOMY

The twin-island nation of Trinidad and Tobago continues to experience real GDP growth as a result of economic reforms, tight monetary policy, fiscal responsibility, and high oil prices. In 2006 the country experienced a real GDP growth rate of 12.2%. This was expected to level off to 5.5% in 2007. The PNM-led government continues its sound macroeconomic policies. Long-term growth looks promising, as Trinidad and Tobago further develops its oil and gas resources and the industries dependent on natural gas, including petrochemicals, fertilizers, iron/steel and aluminum. Additional growth potential also exists in financial services, telecommunications and transport. Strong growth in Trinidad and Tobago over the past few years has led to trade surpluses, even with high import levels due to industrial expansion and increased consumer demand. The debt service ratio was 2.8% in 2006, up from 1.8% in 2005. In 2006, unemployment fell to 5% down from 6.7% in 2005. In the first quarter of 2007, unemployment was at 6.5%. Headline inflation peaked at 10% (year-on-year) in October 2006, then moderated to 7.9% as of August 2007. Food price inflation slowed to 16.7% (year-on-year) in August 2007, down from 22% in October 2006. After raising its interest rates eight times in 2006, the Central Bank has maintained the rate at 8.0% since September 2006. There are no currency or capital controls and the Central Bank maintains the TT dollar in a lightly managed, stable float against the U.S. dollar. From October 2006 to March 2007, the exchange rate experienced some fluctuation between TT$6.3122 and TT$6.3288 to US $1. The rate as of October 9, 2007, was TT$6.3335 to US$1.

Trinidad and Tobago has made a transition from an oil-based economy to one based on natural gas. In 2006, natural gas production averaged 4000 million standard cubic feet per day (mmscf/d), compared with 3200 mmscf/d in 2005. The petrochemical sector, including plants producing methanol, ammonia, urea, and natural gas liquids, has continued to grow in line with natural gas production, which continues to expand and should meet the needs of new industrial plants coming on stream over the next few years, including iron, aluminum, ethylene and propylene. In December 2005, the Atlantic LNG fourth production module or "train" for liquefied natural gas (LNG) began production. Train 4 has increased Atlantic LNG's overall output capacity by almost 50% and is among the largest LNG trains in the world at 5.2 million tons/year of LNG. Trinidad and Tobago is the fifth-largest exporter of LNG in the world and the single largest supplier of LNG to the U.S., supplying two-thirds of all LNG imported into the U.S. As a result of Atlantic LNG Train 4, the energy sector experienced 21.4% growth in 2006 and accounted for nearly 47% of GDP at that year's end.

Growth in the non-energy sector was projected to increase slightly, from 6.6% in 2006 to 6.7% in 2007. The manufacturing sector was estimated to be growing by 8.0% in 2007, down from 9.4% in 2006. The food, beverage and tobacco industry is expected to expand at a rate of 13.4%, up from 8.4% in 2006. This is due to improved performance in meat, poultry, and fish (19%); tobacco (32%); alcoholic beverages (25%); and non-alcoholic beverages (15%). In 2007, slower growth was also expected in other industries, with chemicals and non-metallic minerals expected to slow to 6.4% in 2007 from 12.3% in 2006, and assembly type and related industries slowing to 5.1% growth in 2007 from 10.1% in 2006. Improved growth was expected from the remaining industries, i.e., wood and related products (4.5%); printing and publishing (7.7%); textile, garments, and footwear (0.6%); and miscellaneous manufacturing (11.9%). Services sector growth was expected to reach 5.2% in 2007, up from 4.3% in 2006, led by construction sector growth resulting from Trinidad and Tobago Government investment in housing and infrastructure and the commencement of new infrastructure projects such as the highway interchange. A marginal increase of 0.3% was projected for the domestic agriculture sector. The government is seeking to diversify the economy to reduce dependence on the energy sector and to achieve self-sustaining growth. The diversification strategy focuses on seven key industries: yachting; fish and fish processing; merchant marine; music and entertainment; film; food and beverage; and printing and packaging. A national research and development fund will be established to stimulate innovation and investment in a new technology park, currently under construction.

Trinidad and Tobago has an open investment climate. Since 1992, almost all investment barriers have been eliminated. The government continues to welcome foreign investors. The government has a double taxation agreement, a bilateral investment treaty and an intellectual property rights agreement with the United States. The stock of U.S. direct investment in Trinidad and Tobago was $3.85 billion as of 2006. Total foreign direct investment inflows over the last five years amounted to approximately US$6 billion. Among recent and ongoing investment projects are several involving U.S. firms: ISG Trinidad started operations in November 2004 in a plant that has the capacity to produce 500,000 metric tons annually of hot briquetted iron. In December 2006 Nucor began producing direct reduced iron for shipment to the U.S. at its plant in Trinidad, which has a production capacity of 2.0 million tons per year. Two aluminum smelter plants are also planned, one of them to be owned by Alcoa. The first major business-class hotel to be opened in several years bears the Marriott Courtyard brand. A Hyatt-managed hotel was scheduled to open in late 2007, part of a multimillion-dollar waterfront development project in Port of Spain.

Trinidad and Tobago's infrastructure is adequate by regional standards.

Expansion of the Crown Point airport on Tobago is being planned, which follows opening of the Piarco terminal on Trinidad in 2000. There is an extensive network of paved roads. Traffic is a worsening problem throughout Trinidad, as the road network is not well suited to the rising volume of vehicles and only a rudimentary mass transport system exists as an alternative. Utilities are fairly reliable in cities, but some rural areas suffer from power failures, water shortages in the dry season, and flooding in the rainy season due to inadequate drainage. Infrastructure improvement is one of the government's budget priorities, especially rehabilitating rural roads and bridges, rural electrification, flood control, and improved drainage and sewerage. The government has awarded a contract for the preliminary design of a light rail system which is projected to be completed in five to six years.

Telephone service is modern and fairly reliable, although significantly more costly to consumers than comparable U.S. service, including for wireline, wireless, and broadband services. Change began in the wireless market when the new Telecommunications Authority invited two firms to offer competition to state-owned monopoly incumbent TSTT (co-owned by Cable & Wireless). Two wireless providers, bmobile and Digicel, are already operational, while a third licensee, Laqtel, had not launched service as of October 2007. Two companies, Telestar Cable System Limited and Green Dot Limited, won an October 2007 Telecommunication Authority of Trinidad and Tobago (TATT) auction for radio spectrum to provide public Broadband Wireless Access (BWA) services. Improvements in service and price are likely as competition in the Internet services market increases in coming years.

FOREIGN RELATIONS

As the most industrialized and second-largest country in the English-speaking Caribbean, Trinidad and Tobago has taken a leading role in the Caribbean Community and Common Market (CARICOM), and strongly supports CARICOM economic integration efforts and has advocated for a greater measure of political security and integration. CARICOM members are working to establish a Single Market and Economy (CSME). In early 2006, Trinidad and Tobago, in conjunction with the larger CARICOM nations, inaugurated the CARICOM Single Market, a precursor to the full CSME. As a first step toward greater security integration, Trinidad and Tobago and the other members of CARICOM collaborated with the U.S. on an Advance Passenger Information System in preparation for the 2007 Cricket World Cup tournament, which took place in nine Caribbean venues in March and April 2007.

Trinidad and Tobago is active in the Summit of the Americas (SOA) process of the Organization of American States (OAS). It recently hosted hemisphere-wide ministerial meetings on energy (2004) and education (2005), as well as an OAS meeting on terrorism and security (also 2005). It also hosted a negotiating session in 2003 for the OAS Free Trade Area of the Americas (FTAA), and aspires to hosting an eventual FTAA secretariat. It will host the SOA summit in 2009.

Trinidad and Tobago is a democracy that maintains close relations with its Caribbean neighbors and major North American and European trading partners. After its 1962 independence, Trinidad and Tobago joined the UN and the Commonwealth. In 1967, it became the first Commonwealth country to join the OAS. In 1995, Trinidad played host to the inaugural meeting of the Association of Caribbean States and has become the headquarters location for this 25-member grouping, which seeks to further economic progress and cooperation among its members.

U.S.-TRINIDAD AND TOBAGO RELATIONS

The United States and Trinidad and Tobago enjoy cordial relations. U.S. interests here and throughout the hemisphere focus on increasing investment and trade, and ensuring more stable supplies of energy. They also include enhancing Trinidad and Tobago's political and social stability and positive regional role through assistance in drug interdiction, health issues, and legal affairs. The U.S. embassy was established in Port of Spain in 1962, replacing the former consulate general.

International Military Education and Training (IMET) and Foreign Military Financing (FMF) programs were suspended in 2003 under the terms of the American Service Members Protection Act (ASPA), because Trinidad and Tobago, a member of the International Criminal Court, had not concluded a bilateral non-surrender or "Article 98" agreement with the United States. However, when the Congress de-linked IMET funding from the Article 98 sanctions, a nominal allocation of $45,000 in IMET was reinstated for late 2007. Currently, the main source of financial assistance provided to the defense force is through State Department's Bureau of International Narcotics and Law Enforcement funds, Traditional Commander's Activities funds, the State Partnership Program (with Delaware), and IMET. Assistance to Trinidad and Tobago from U.S. military, law enforcement authorities, and in the area of health issues remains important to the bilateral relationship and to accomplishing U.S. policy objectives.

The U.S. Government also provides technical assistance to the Government of Trinidad and Tobago through a number of existing agreements. The Department of Homeland Security has a Customs Advisory Team working with the Ministry of Finance to update its procedures. Similarly, the Treasury Department had an Internal Revenue Service (IRS) advising team that worked with the Board of

Inland Revenue modernizing its tax administration; this long-running project ended in October 2007. The U.S. Centers for Disease Control and Prevention (CDC), a part of the Department of Health and Human Services, collaborates with the Trinidad-based Caribbean Epidemiology Center (CAREC) and other regional partners to provide technical assistance and financial support for HIV/AIDS-related epidemiology surveillance and public health training in the region.

U.S. commercial ties with Trinidad and Tobago have always been strong and have grown substantially in the last several years due to economic liberalization. U.S. firms have invested more than a billion dollars in recent years—mostly in the petrochemical, oil/gas, and iron/steel sectors. Many of America's largest corporations have commercial links with Trinidad and Tobago, and more than 30 U.S. firms have offices and operations in the country. Trinidad and Tobago is a beneficiary of the U.S. Caribbean Basin Initiative (CBI). The U.S. embassy actively fosters bilateral business ties and provides a number of commercial services to potential investors and traders. A double-taxation agreement has existed since the early 1970s. A tax information exchange agreement was signed in 1989, and a Bilateral Investment Treaty (BIT) and an Intellectual Property Rights agreement were signed in 1994. The BIT entered into force in 1996. Other agreements include Extradition and Mutual Legal Assistance treaties, which have been in force since 1999. An agreement on Maritime Cooperation was signed in 1996.

There are large numbers of U.S. citizens and permanent residents of Trinidadian origin living in the United States (mostly in New York and Florida), which keeps cultural ties strong. About 20,000 U.S. citizens visit Trinidad and Tobago on vacation or for business every year, and more than 4,600 American citizens are residents.

TRAVEL

Consular Information Sheet

April 13, 2007

Country Description: Trinidad and Tobago is a developing nation in the Caribbean composed of two islands. The islands gained independence from the British in 1962. The country is one of the most prosperous in the Caribbean, largely as a result of petroleum and natural gas industries. Tourist travel is mostly to the smaller of the two sister islands, Tobago. Tourist facilities are widely available.

Entry Requirements: A valid passport is required of U.S. citizens for entry to Trinidad and Tobago. U.S. citizens do not need a visa for tourism or business-related visits of 90 days or less. Work permits are required for compensated and some non-compensated employment, including missionary work. Visas may be required for travel for purposes other than business or tourism. For further information concerning entry, employment and customs requirements, travelers may contact the Embassy of Trinidad and Tobago, 1708 Massachusetts Avenue N.W., Washington, DC 20036, telephone (202) 467-6490, email embttgo@erols.com, or the Trinidad and Tobago Consulates in Miami or New York City. Visit the Embassy of Trinidad and Tobago's website at http://ttembassy.cjb.net.

Safety and Security: American citizens traveling to or residing in Trinidad and Tobago should avoid large crowds and demonstrations. While non-violent demonstrations occur on occasion, widespread civil disorder is not typical.The downtown area of Port of Spain experienced four bombings in 2005.While no similar incidents have occurred since that time, the perpetrator(s) have not been arrested and their identities and motive remain unknown.Americans living or visiting Port of Spain are advised to exercise caution, especially

in crowded urban areas. For the latest security information, Americans traveling abroad should regularly monitor the Department's Internet web site where the current Travel Warnings and Travel Alerts, including the Worldwide Caution Travel Alert, can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S., or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: Incidents of violent crime have been steadily on the rise on both islands. Visitors to Trinidad and Tobago should exercise caution and good judgment, as in any large urban area, particularly when traveling after dark from Trinidad's Piarco Airport. There have been incidents involving armed robbers trailing arriving passengers from the airport and then accosting them outside the gates of their residences. Areas to avoid in Trinidad include Laventille, Morvant, Sea Lots, South Belmont, scenic rest stops, walking across the Queen's Park Savannah, and downtown Port of Spain (after dark), as tourists are particularly vulnerable to pick pocketing and armed assaults in these locations. Holiday periods, especially Christmas and Carnival, often see an increase in criminal activity.

Violent crimes, including assault, kidnapping for ransom, sexual assault and murder, have involved foreign residents and tourists, including U.S. citizens. The perpetrators of many these crimes have not been arrested.

Burglaries of private residences are common. Robbery is a risk, particularly in urban areas and especially near ATMs and shopping malls. Visitors should avoid wearing expensive jewelry or displaying large amounts of money in public. One victim was targeted for driving an expensive new car. In some cases, robberies of Americans have turned violent and resulted in injuries after the victim resisted handing over valuables.

In Tobago, the media have reported an increase in the incidence of violent crimes. While local authorities have announced increased measures to fight crime, the U.S. Embassy advises that when making reservations at private accommodations, visitors should ensure that 24-hour security is provided. There have been reports of home invasions in the Mt. Irvine area, and robberies occurring on isolated beaches in Tobago. Visitors to Tobago should ensure that all villas or private homes have adequate security measures.

Visitors to Trinidad and Tobago are also advised to be cautious when visiting isolated beaches or scenic overlooks where robberies can occur. In particular, we advise against visiting the Ft. George scenic overlook in Port of Spain because of lack of security and a number of recent armed robberies at that site. Tourists at La Brea Pitch Lake in South Trinidad were targets of criminals in 2004 and 2005. Visitors should not walk alone or in unfamiliar areas. Valuables left unattended on beaches and in other public places are vulnerable to theft. Visitors should avoid neighborhoods known for high crime rates. When in doubt, consult the establishment where you are staying to identify areas to be avoided.

Taxis available at the major hotels or through pre-arranged pick-ups with reputable companies are generally safe and reliable. The U.S. Embassy urges caution in the use of the small buses or vans in Trinidad, known as "Maxi Taxis" (full-size inter-city buses are usually safe). Unmarked shared taxis authorized to pick up passengers will have the letter 'H' as the first letter on their license plates. Some shared taxis and maxi taxis have been linked to petty crime and serious traffic accidents. Valuables including travel documents should not be left unattended in parked cars, especially in parking lots, as several thefts have been reported.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

Medical Facilities and Health Information: We strongly recommend that you obtain comprehensive travel and medical insurance before traveling. Medical care is limited compared to that in the United States. Care at public health facilities is significantly below U.S. standards for treatment of serious injuries and illness, with limited access to supplies and medications. While care at some private facilities is better than at most public health facilities, patients may be expected to prove their ability to pay before assistance is given, even in emergency situations. Patients requiring blood transfusions are expected to arrange for at least the same amount to be donated on their behalf. Physicians and nurses may go on strike, causing serious strain on both public and private medical resources. Ambulance service is extremely limited both in the quality of emergency care and in the availability of vehicles in many parts of the country.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's internet site at http://www.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) website at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith.

Medical Insurance: The Department of State strongly urges Ameri-

cans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Trinidad and Tobago is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

Traffic moves on the left in Trinidad and Tobago. Most vehicles are right-hand drive, but left-hand drive vehicles are permitted. Rental cars are available, and are generally right-hand drive. A U.S. driver's license and/or an International Driving Permit are valid for up to 90 days after arrival. Seatbelts are required for drivers and front seat passengers, and cars may be pulled over and drivers fined for not wearing seatbelts. Older cars are not required to be equipped with rear seatbelts; many taxis, being older cars, thus lack rear seatbelts. There are no particular requirements for child safety seats.

Trinidad has several good four-lane highways and one controlled-access highway. However, road quality decreases quickly on secondary roads. Rural roads are narrow and often have deep drainage ditches on either side. Some are in poor repair, and are frequently congested. Night travel should be avoided other than on major highways. Roadside assistance exists, but is extremely limited and subject to lengthy delays. The Ministry of Works and Transport is responsible for road conditions and safety in the country. Emergency ambulance services exist but may take prolonged amounts of time to reach the site of an accident and may not provide service in rural areas.

Trinidadian drivers often use hand signals to indicate turning, stopping, or slowing, which do not necessarily correspond to hand signals used in the United States. Trinidadian drivers are generally courteous, but can be flexible with the rules of the road. For example, cars traveling north on a two way street may cross into the southbound lane to stop and let passengers out. Visitors need to be attentive and alert. Intoxicated drivers on the road are a particular concern on the weekends, especially after dark when many locals are going to or returning from social events. Drivers should take extra precaution on narrow and windy roads leading in and out of beaches and small towns in Trinidad and Tobago. As always, defensive driving is strongly encouraged.

The country has an extensive system of taxis, maxi-taxis (vans) and some larger buses. Although the larger inter-city buses are generally safe, the maxi-taxis have been linked to many road accidents and some instances of crime. Fares should be agreed upon in advance. Taxis will often stop at any point along the road to pick up or discharge passengers, often with little or no warning.

Visit the website of the country's national tourist office www.visittnt.com. The Ministry of Works and Transport is the national authority responsible for road safety.

Aviation Safety Oversight: The U.S. Federal Aviation Administration (FAA) has assessed the Government of Trinidad and Tobago as being in compliance with International Civil Aviation Organization (ICAO) aviation safety standards for oversight of Trinidad and Tobago's air carrier operations. For more information, travelers may visit the FAA's website at http://www.faa.gov.

Marine Safety and Oversight: Visitors arriving in Trinidad and Tobago aboard a private vessel must register any firearms with local customs authorities. Failure to declare firearms or making false customs declarations is a serious offense. U.S. citizens have been jailed and fined for possession of unlicensed firearms and ammunition, attempting to export ammunition, making false customs declarations and not declaring their firearms.

There is a small community of private boat owners who stay in Trinidad temporarily during the hurricane season. There have been several incidents within the past few months in which vessels were boarded and the occupants were assaulted and robbed. Sailors should report any incidents to the Coast Guard and local police, and are encouraged to check with the Trinidad and Tobago Coast Guard and yacht facility managers for current information.

Special Circumstances: Trinidad and Tobago is prone to occasional, moderate earthquakes. Tobago has suffered extensive damage by only two hurricanes since 1963. In 2004, parts of Tobago were severely affected by flooding and mudslides from Hurricane Ivan and several other major storms that followed soon thereafter. General information about natural disaster preparedness is available via the Internet from the U.S. Federal Emergency Management Agency (FEMA) website.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offences. Persons violating Trinidad and Tobago's laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Trinidad and Tobago are severe, and convicted offenders can expect long jail sentences and heavy fines. Suspected offenders may be jailed until the trial date, which can be months or even years after the arrest.

Many of the US citizens incarcerated in Trinidad and Tobago were caught attempting to take suitcases or packages containing drugs out of the country. Even if the package or suitcase is being carried for someone else, the traveler is liable for its contents. Engaging in sexual conduct with children or using or disseminating child

pornography in a foreign country is a crime, prosecutable in the United States. Americans should also be aware that cursing and use of foul language in public is a criminal offense in Trinidad and Tobago, subject to arrest and fines. Several Americans have been arrested recently for this offense. While the penalty for public cursing is usually a fine, it can cause considerable disruption in travel plans due to the realities of an arrest and requirement to appear at hearings, and even incarceration if bail cannot be posted. Travelers are also cautioned against wearing military or camouflage clothing in public, as it is against local laws to do so, unless they are in Trinidad and Tobago on official military business. We have had reports of local immigration and customs officials detaining children wearing camouflage outfits and confiscating the clothing.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in Trinidad and Tobago are encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration website and to obtain updated information on travel and security within Trinidad and Tobago. Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency. The U.S. Embassy is located 15 Queen's Park West, telephone 868-622-6371, Consular Section fax 868-822-5555, web site http://trinidad.usembassy.gov/american_citizen_registration2.html. Hours of operation are 7:30 AM—12:00 PM, and 1:00 PM through 4:00 PM Monday—Friday, except U.S. and Trinidad and Tobago national holidays. For additional information please visit our website at http://trinidad.usembassy.gov or email your inquiries at acspos@state.gov.

Intercountry Adoption

August 2006

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is based on public sources and current understanding. Questions involving foreign and U.S. immigration laws and legal interpretation should be addressed respectively to qualified foreign or U.S. legal counsel.

There are two ways of gaining custody of a child from Trinidad and Tobago obtaining an adoption order or legal guardianship.

Adoption Order: The first option is to go through the adoption process and obtain an adoption order. If the prospective adoptive parent(s) is a resident of Trinidad and Tobago, then the Adoption Board acts as the lead agency in the adoption process. If the prospective adoptive parent(s) are not residents of Trinidad and Tobago, they must contact an adoption agency that handles intercountry adoption. Since intercountry adoptions are adjudicated through the High Court and not the Adoption Board, prospective adoptive parents are advised to contact an attorney since these are done through the High Court and not handled by the Adoption Board.

An adoption order issued by the Court carries different rights to the adopting parents than Guardianship/custody Order, in the latter cases, the birth parents still retain parental rights. With an Adoption Order the birth parents are required to relinquish their rights.

Legal Guardianship: The second option is to seek legal guardianship of a child from the courts in Trinidad and Tobago for the purpose of adopting the child in the United States. While considerably less burdensome than seeking a formal adoption in Trinidad and Tobago, prospective parents need to keep in mind that legal guardianship is not as secure as an adoption order. Legal guardianship does not provide full parental rights to the adopting party. Legal guardianship is also vulnerable to revocation by the courts if the biological parents or other relatives subsequently petition the courts for a change of guardianship.

Patterns of Immigration: Please review current reports online at http://adoption.state.gov.

Adoption Authority: To obtain an Adoption Order in Trinidad and Tobago, prospective adoptive parents must contact the Adoption Board, which is the only organization authorized to process the application and make recommendations to the courts for legal adoptions.

Adoption Board
55-57 St. Vincent Street
Port of Spain, Trinidad
Telephone: (868) 627-4447

The Adoption Board is not responsible for legal guardianship cases. To seek legal guardianship, the prospective guardians need to contact the Clerk of the Peace through the courts in Trinidad and Tobago.

Probation Office
3rdFloor ANSA House
Corner of Queen and Henry Streets
Port of Spain, Trinidad
Telephone: (868) 623-8180

Eligibility Requirements for Adoptive Parents: The government of Trinidad and Tobago allows married couples and single women to adopt. Single men may not adopt. The adoptive parent(s) must be at least 25 years old and 21 years older than the child they are adopting. A married couple or unmarried individuals, either male or female, are allowed to gain legal guardianship.

Please note that the guardian must be at least 25 years old and there is no specification as to an age difference between the guardian and the

child. First preference is given to citizens/nationals of Trinidad and Tobago to adopt a child.

Residency Requirements: Applicant(s) for adoption orders should be residents of Trinidad and Tobago and must have residential status proof from Trinidadian immigration authority in order to establish residency. Foreigners may apply to the High Court for an Adoption Order for a child born in Trinidad, Orders are granted in certain limited circumstances as outlined in Adoption of Children Act 2000.

Time Frame: Adoption Orders take more than six months due to the Adoption Board's six-month probation period. Securing legal guardianship can take anywhere from one week to several months depending on the cooperation of the parties and the time availability of the courts.

Adoption Agencies and Attorneys: Laws in Trinidad and Tobago make it illegal for any local persons or local agencies other than the Adoption Board and or the Courts to facilitate adoptions. Where persons have a guardianship Order, they may still apply for adoption of the child through an intercountry adoption agency, but the Guardianship Order should also include that the child be sent abroad for adoption. For adoption where the prospective adoptive parents are not residing in Trinidad, an application must be made to the High Court for an adoption order. Local attorneys may be contacted to interpret local adoption laws.

Adoption Fees: Adoption in Trinidad and Tobago is free. Payment to anyone, other than an attorney for their legal services, is illegal.

Adoption Procedures: The local adoption process begins with the prospective adoptive parent(s) filing a formal application that can be obtained only from the Adoption Board. Prospective adoptive parents will have to appear in person in order to obtain these forms. However, if an order is applied for through the Courts, the attorney drafts the legal documents after taking instruction from their clients and submitting medical reports to the Adoption Board. The Board may request additional documents depending on the circumstances of each case. Prospective adoptive parents will be made aware of additional requirements when they attend the initial interview with the Board. Once the process is initiated, the Board identifies children eligible for adoption. Children are typically are referred to the Boar by children's homes and institutions. The Adoption Board confirms consent of the birth parent(s) or current guardian(s) to relinquish custody of the child. The Adoption Board will then grant temporary custody to the prospective adoptive parents. If the child is orphaned due to the death of the birth parent(s), the official death certificate of the parent(s) must be provided. Meanwhile, the Welfare Officers in Trinidad and Tobago complete a home study report to ensure that the adoption will be beneficial to the child. The Adoption Board then reviews all the information and decides whether a probationary period can be granted to the prospective parents. The probationary period is a minimum of six months and is a requirement that must be completed in Trinidad and Tobago in order to bring the case before the courts. The Adoption Board may extend the probationary period if it feels more time is needed in the trial period. During this period the Adoption Board keeps a close supervision of the child and monitors the child's reactions to the new family. At any point during the probationary period, the Adoption Board may terminate the temporary custody if it feels that the child is in a harmful situation. Upon the completion of the probationary period, whether by notice of the Adoption Board or by its expiration, the prospective adoptive parents may apply to the court for an adoption order to finalize the adoption. Once the Court grants an adoption order, the process is finalized.

To gain legal guardianship, the prospective guardians should contact the Clerk of the Peace in their district. The Clerk of the Peace will arrange for the prospective guardian to fill out the necessary forms and will set a court date. The Probation Office, which works with and takes instructions from the court, will also require proof that the prospective guardians are deemed fit (International Social Services certification is acceptable) and investigate the appropriateness of the change in guardianship. All the information will be presented before the Magistrate and the court will make a final decision based on the recommendations from the Probation Office.

Required Documents for an Adoption Order:

- Original certified birth certificates of the prospective adoptive parents and child; Certificate of successful immunization record of child issued by the Ministry of Health;
- Result of blood test of the prospective adoptive parents and child;
- Result of chest x-ray of the prospective adoptive parents and child;
- Medical fitness examination conducted in Trinidad and Tobago for the prospective adoptive parents;
- Original certified copy of the prospective adoptive parents' marriage certificate (if applicable);
- Original certified death registration of the child's birth parents (if applicable) or consent from the child's birth parents. If the birth parents are alive, they must relinquish rights;
- Photographs in color—one full length and one head and shoulders of applicant(s);
- Other general forms given by the Adoption Board. Prospective adoptive parents should contact the Adoption Board for more information.

Required Documents for Legal Guardianship: Current valid photo ID of prospective guardian(s) and original or certified copy of birth certificate of applicants and the child.

Embassy of Trinidad and Tobago
1708 Massachusetts Ave, NW
Washington, DC 20036
Tel: 202-467-6490

Trinidad and Tobago also maintains Consulates General in Miami and New York City.

U.S. Immigration Requirements: Prospective adoptive parents are strongly encouraged to consult USCIS publication M-249, *The Immigration of Adopted and Prospective Adoptive Children, as* well as the Department of State publication, *Intercountry Adoptions.*

Please see the *Intercountry Adoption* section of this book for more details and review current reports online at http://adoption.state.gov.

U.S. Embassy
15 Queen's Park West (PO Box 752)
Port of Spain, Trinidad
Tel: 868-622-6371 through 6

Additional Information: Specific questions about adoption in Trinidad and Tobago may be addressed to the U.S. Embassy in Port-of-Spain.

General questions regarding intercountry adoption may be addressed to the Office of Children's Issues, U.S.Department of State, CA/OCS/CI, SA-29, 4th Floor, 2201 C Street, NW, Washington, D.C. 20520-4818, toll-free Tel: 1-888-407-4747.

International Parental Child Abduction

February 2008

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services.

For more information, please read the *International Child Abduction* section of this book and review current reports online at http://travel.state.gov.

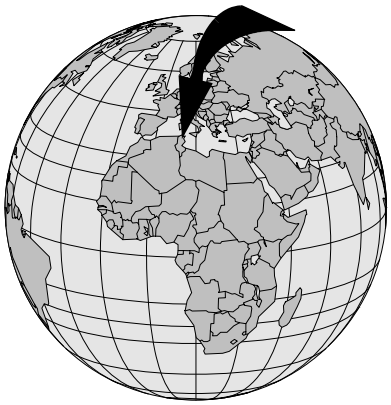
Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is provided for general information only. Questions involving interpretation of specific foreign laws should be addressed to foreign legal counsel.

General Information: Trinidad and Tobago is a party to the Hague Convention on the Civil Aspects of International Child Abduction, but the treaty has not yet entered into force between the United States and Trinidad and Tobago. Therefore, the Convention cannot be used as a remedy to recover a child abducted from the United States to Trinidad and Tobago or to gain access (visitation) to such a child; however, local authorities may be willing to implement Hague precepts in individual cases pending final entry into force. American citizens who travel to Trinidad and Tobago place themselves under the jurisdiction of local courts. American citizens planning a trip to Trinidad and Tobago with dual national children should bear this in mind.

Custody Disputes: Relevant laws in Trinidadian courts base custodianship decisions on the best interests of the child.

Enforcement of Foreign Judgments: Custody orders and judgments of foreign courts are not enforceable in Trinidad and Tobago if they potentially contradict or violate local laws and practices. Courts do not yet enforce U.S. court decrees ordering a parent in Trinidad and Tobago to pay child support.

Visitation Rights: In cases where one parent has been granted custody of a child, the other parent is usually granted visitation rights. If a custodial parent fails to allow visitation, the non-custodial parent may appeal to the court.



Dual Nationality: Dual nationality is recognized under Trinidadian law. Children born anywhere in the world to parents from Trinidad and Tobago automatically acquire Trinidadian citizenship.

Travel Restrictions: No exit visas are required to leave Trinidad and Tobago. However, a parent without any custody order may face legal difficulties if he or she attempts to take a child out of Trinidad and Tobago against the will of the other parent. Immigration officials at the airport or seaport, if informed of the dispute, may not allow the child to exit.

Criminal Remedies: For information on possible criminal remedies, please contact your local law enforcement authorities or the nearest office of the Federal Bureau of Investigation (FBI). Information is also available on the Internet at the web site of the U.S. Department of Justice, Office of Juvenile Justice and Delinquency Prevention (OJJDP) at http://www.ojjdp.ncjrs.org.

Persons who wish to pursue a child custody claim in a Trinidadian court should retain an attorney in Trinidad and Tobago. The U.S. Embassy in Trinidad and Tobago maintains a list of attorneys willing to represent American clients.

For further information on international parental child abduction, contact the Office of Children's Issues, U.S. Department of State at 1-888-407-4747 or visit its web site on the Internet at http://travel.state.gov. You may also direct inquiries to: Office of Children's Issues, U.S. Department of State, Washington, DC 20520-4811; Phone: (202) 736-9090; Fax: (202) 312-9743.

TUNISIA

Compiled from the February 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Tunisian Republic

PROFILE

Geography

Location: North Africa, bordering the Mediterranean Sea, between Algeria and Libya.
Area: 163,610 sq. km. (63,378 sq. mi.), slightly smaller than Missouri.
Cities: Capital—Tunis; Greater Tunis Area, Sfax, Nabeul, Sousse.
Terrain: Arable land in north and along central coast; south is mostly semiarid or desert.
Climate: Hot, dry summers and mild, rainy winters.
Land use: Arable land, 17.05%; permanent crops, 13.08%; other, 69.87%.

People

Nationality: Noun and adjective—Tunisian(s).
Population: (2007) 10,276,185.
Annual growth rate: (2007) 0.99%. Birth rate—15.54 births/1,000 population. Death rate—5.17 deaths/1,000 population.
Ethnic groups: Arab-Berber 98%, European 1%, other 1%.
Religions: Muslim 98%, Christian 1%, Jewish less than 1%.
Languages: Arabic (official), French.
Education: Years compulsory—9. Literacy (definition—age 15 and over can read and write, 2006 est.)—74.3%.
Health: (2007) Infant mortality rate—22.94 deaths/1,000 live births. Life expectancy—75.34 total, 73.6 years male, 77.21 years female.
Work force: (2007) 3.591 million.
Unemployment rate: (2007) 13.9%.

Government

Type: Republic.
Constitution: June 1, 1959; amended July 12, 1988, June 29, 1999, and June 1, 2002.
Independence: March 20, 1956.
Government branches: Executive—chief of state President Zine El Abidine BEN ALI (since November 7, 1987) head of government, Prime Minister Mohamed GHANNOUCHI (since November 17, 1999) cabinet, Council of Ministers appointed by the president; president elected by popular vote for a 5-year term; election last held October 24, 2004 (next to be held in October 2009); prime minister appointed by the president. Election results: President Zine El Abidine Ben Ali reelected for a fourth term; candidates from opposition: Mohamed Bouchiha (PUP), Mohamed Ali Halouani (Et-Tajdid) and Mounir Beji (PSL); percentage of vote—Zine El Abidine Ben Ali 94.49% (officially).
Legislative—bicameral. Chamber of Deputies or Majlis al-Nuwaab (189 seats; 5-year terms; 152 seats are elected by popular vote for party lists on a winner-take-all basis). An additional 37 seats (20% of the total) are distributed to opposition parties on a proportional basis as provided for in 1999 constitutional amendments. Elections last held October 24, 2004 (next to be held in October 2009). Election results: percentage of vote by party—RCD 92%; seats by party—RCD 152, MDS 14, PUP 11, UDU 7, Et-Tajdid 3, PSL 2. Note: The opposition increased number of seats from 34 to 37. A referendum in 2002 created a second chamber, the Chamber of Advisors. Elections for the Chamber of Advisors were held in July 2005. Judicial—Nominally independent District Courts, Courts of Appeal, Highest Court (Cour de Cassation). Judges of the Highest Court are appointed by the President.
Political parties: Democratic Constitutional Rally (Rassemblement Constitutionnel Democratique—ruling party) or RCD, President Zine El Abidine Ben Ali; Et-Tajdid Movement (Mohamed Harmel); Democratic Forum for Labor and Liberties or FDTL (Mustapha Ben Jaafar); Liberal Social Party or PSL (Mondher Thabet); Movement of Democratic Socialists or MDS (Ismail Boulahia); Popular Unity Party or PUP (Mohamed Bouchiha); Unionist Democratic Union or UDU (Ahmed Inoubli); Progressive Democratic Party or PDP (Maya Jribi); Green Party for Progress or PVP (Mongi Khamassi).

Political pressure groups and leaders: Authorized—Tunisian Human Rights League or LTDH (Mokhtar Trifi); Tunisian Association of Democratic Women or ATFD (Khadija Cherif); Tunisian Bar Association (Adbessatar Ben Moussa); National Syndicate of Tunisian Journalists or SNJT (Neji Bhouri). Unauthorized —An-Nahdha (Renaissance) the Islamic fundamentalist party (Rached El Ghanouchi, in exile); National Council for Liberties in Tunisia or CNLT (Sihem Ben Sedrine); Movement of 18 October (Nejib Chebbi, Hamma Hammami, et. al) Congress for the Republic or CPR (Moncef Marzouki); Tunisian Communist Labor Party or POCT (Hamma Hammami); Tunisian Green Party or PVT (Abdelkader Zitouni); International Association for the Support of Political Prisoners or AISPP (Co-ordinator: Mokhtar Yahyaoui); Tunisian Journalists' Syndicate or SJT (Lotfi Hajji).
Political subdivisions: 24 governorates—Ariana, Beja, Ben Arous, Bizerte, El Kef, Gabes, Gafsa, Jendouba, Kairouan, Kasserine, Kebili, Mahdia, Manouba, Medenine, Monastir, Nabeul, Sfax, Sidi Bou Zid, Siliana, Sousse, Tataouine, Tozeur, Tunis, Zaghouan.
Suffrage: Universal at 20. (Active duty members of the military cannot vote.)

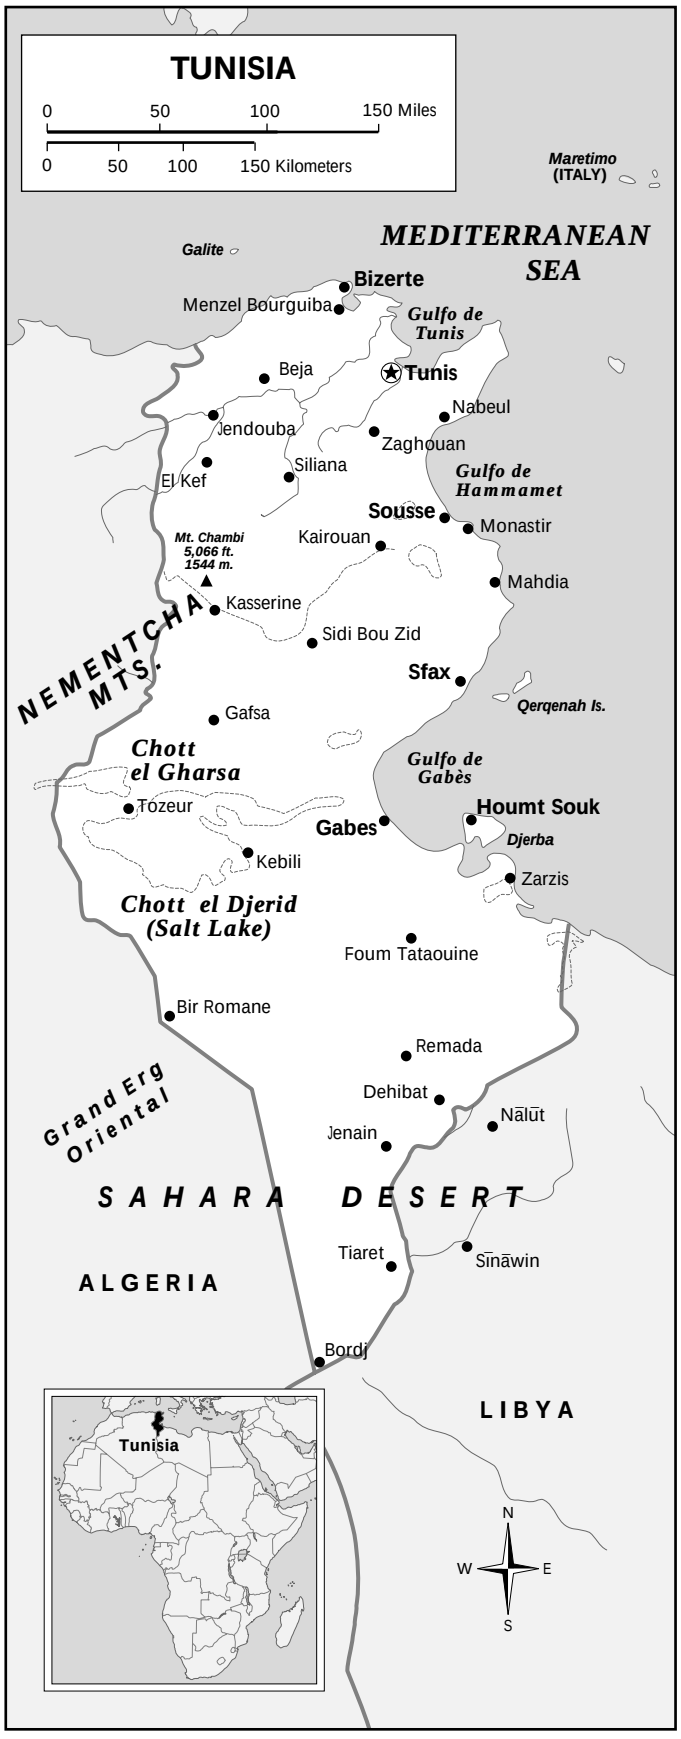
Economy

Real GDP: (2006, 2000$ mil) $25,498.
Real GDP growth rate: (2006) 5.2%.
Per capita GDP, PPP: (2007, IMF): $9,630.
Natural resources: natural gas, crude oil, phosphates, salt, iron ore.
Agriculture: Products—olives, dates, citrus, almonds, grains.
Industry: Types—petroleum, mining (particularly phosphate), textiles, footwear, food processing.
Services: Tourism, commerce, transport, communications.
Sector information as % GDP: (2006 est.) Agriculture, 12%; industry, 33%; services, 55%.
Trade: (2005) Exports—$11.7 billion: hydrocarbons, agricultural products, phosphates, chemicals, textiles, mechanical, electric components. By region—Africa 9.9%, Americas 3.1%, Asia 3.7%, Europe 83.3%. By country (U.S.$million)—France, $3807.07, Italy, $2598.46, Germany, $926.0, Spain, $739.0; Libya, $635.15; Belgium, $282.61; UK, $322.0; U.S. $145.6. Imports ($15.2 billion)—industrial goods and equipment, hydrocarbons, food, consumer goods. By region—Africa 7.8%, Americas 5.9% Asia 10.5%, Europe 75.8%. By country (U.S.$million)—France $3461.61, Italy $2836.15, Germany $1200.61, Spain $714.69, Libya $743.0, China $501.84, U.S. $435.15.

PEOPLE AND HISTORY

Modern Tunisians are the descendents of indigenous Berbers and of people from numerous civilizations that have invaded, migrated to, and been assimilated into the population over the millennia. Recorded history in Tunisia begins with the arrival of Phoenicians, who founded Carthage and other North African settlements in the 8th century B.C. Carthage became a major sea power, clashing with Rome for control of the Mediterranean until it was defeated and captured by the Romans in 146 B.C. The Romans ruled and settled in North Africa until the 5th century, when the Roman Empire fell and Tunisia was invaded by European tribes, including the Vandals. The Muslim conquest in the 7th century transformed Tunisia and the make-up of its population, with subsequent waves of migration from around the Arab and Ottoman world, including significant numbers of Spanish Muslims and Jews at the end of the 15th century. Tunisia became a center of Arab culture and learning and was assimilated into the Turkish Ottoman Empire in the 16th century. It was a French protectorate from 1881 until independence in 1956, and retains close political, economic, and cultural ties with France.

Nearly all Tunisians (98% of the population) are Muslim. There has been a Jewish population on the southern island of Djerba for 2000 years, and there remains a small Jewish population in Tunis and other cities, which is mainly descended from those who fled Spain in the late 15th century. A small Christian community is dispersed throughout the country, and includes foreign residents, as well as a few hundred native-born citizens who have converted to Christianity. Small nomadic indigenous minorities have been mostly assimilated into the larger population.



GOVERNMENT AND POLITICAL CONDITIONS

Tunisia is a republic with a strong presidential system dominated by a single political party. President Zine El Abidine Ben Ali has been in office since 1987, when he deposed Habib Bourguiba, president since Tunisia's independence from France in 1956. The ruling party, the Democratic Constitutional Rally (RCD), was the sole legal party for 25 years—including when it was known as the Socialist Destourian Party (PSD)—and still dominates political life. The president is elected to 5-year terms—with virtually no opposition—and appoints a prime minister and cabinet, who play a strong role in the execution of policy. Regional governors and local administrators are also appointed by the central government; largely consultative mayors and municipal councils are elected. There is a bicameral legislative body. The Chamber of Deputies has 189 seats, 20% of which are reserved for the opposition. It plays a limited role as an arena for debate on national policy but never originates legislation and virtually always passes bills presented by the executive with only minor changes. A referendum in 2002 created a second chamber, the Chamber of Advisors. First-time elections for the Chamber of Advisors were held in July 2005. The judiciary is nominally independent, but responds to executive direction, especially in politically sensitive cases. The military is professional and does not play a role in politics.

Tunisia's independence from France in 1956 ended a protectorate established in 1881. President Bourguiba, who had been the leader of the independence movement, declared Tunisia a republic in 1957, ending the nominal rule of the Ottoman Beys. In June 1959, Tunisia adopted a constitution modeled on the French system, which established the basic outline of the highly centralized presidential system that continues today. The military was given a defined defensive role, which excluded participation in politics. Starting from independence, President Bourguiba placed strong emphasis on economic and social development, especially education, the status of women, and the creation of jobs, policies that continued under the Ben Ali administration. The result was strong social progress—high literacy and school attendance rates, low population growth rates, and relatively low poverty rates—and generally steady economic growth. These pragmatic policies have contributed to social and political stability.

Progress toward full democracy has been slow. Over the years, President Bourguiba stood unopposed for reelection several times and was named "President for Life" in 1974 by a constitutional amendment. At the time of independence, the Neo-Destourian Party (later the PSD)—enjoying broad support because of its role at the forefront of the independence movement—became the sole legal party. Opposition parties were banned until 1981.

When President Ben Ali came to power in 1987, he promised greater democratic openness and respect for human rights, signing a "national pact" with opposition parties. He oversaw constitutional and legal changes, including abolishing the concept of President for life, the establishment of presidential term limits, and provision for greater opposition party participation in political life. But the ruling party, renamed the Democratic Constitutional Rally (RCD), continued to dominate the political scene because of its historic popularity and the advantage it enjoyed as the ruling party. Ben Ali

ran for re-election unopposed in 1989 and 1994. In the multiparty era, he won 99.44% of the vote in 1999 and 94.49% of the vote in 2004. In both elections he faced weak opponents. The RCD won all seats in the Chamber of Deputies in 1989, and won all of the directly elected seats in the 1994, 1999, and 2004 elections. However, constitutional amendments provided for the distribution of additional seats to the opposition parties by 1999 and 2004. Currently, five opposition parties share 37 of the 189 seats in the Chamber of Deputies. A May 2002 referendum approved constitutional changes proposed by Ben Ali that allowed him to run for a fourth term in 2004 (and a fifth, his final, because of age limits on presidential candidates, in 2009), and provided judicial immunity during and after his presidency. The referendum also created a second parliamentary chamber, the Chamber of Advisors, and provided for other changes.

There are currently eight legal opposition parties, the Social Democratic Movement (MDS), the Popular Unity Party (PUP), the Union of Democratic Unionists (UDU), Et-Tajdid (also called the Renewal Movement), the Liberal Social Party (PSL), and the Green Party for Progress (PVP), plus the Democratic Progressive Party (PDP) and the Democratic Forum for Labor and Liberties (FDTL), the only two not represented in the Chamber of Deputies. The parties are generally weak and divided and face considerable restrictions on their ability to organize. The Islamist opposition party, An-Nahdha, was allowed to operate openly in the late 1980s and early 1990s despite a ban on religiously based parties. The government outlawed An-Nahdha as a terrorist organization in 1991 and arrested its leaders and thousands of party members and sympathizers, accusing them of plotting to overthrow the president. The party is no longer openly active in Tunisia, and its leaders operate from exile in London. Several pro-democracy activists have been denied permission to establish other opposition political parties.

While there are thousands of official, established non-governmental organizations, civil society remains weak. The Tunisian Human Rights League (LTDH), the first human rights organization in Africa and the Arab world, operates under restrictions and suffers from internal divisions. The Tunisian Association of Democratic Women (ATFD), the Young Lawyers Association, and the Bar Association also are active. The government has denied legal status to a handful of other human rights advocacy groups who, nonetheless, attempt to organize and publicize information on the human rights situation in the country.

Despite the Government of Tunisia's stated committed to making progress toward a democratic system, citizens do not enjoy political freedom. The government imposes restrictions on freedom of association and speech and does not allow a free press. Many critics have called for clearer, effective distinctions between executive, legislative, and judicial powers. Foreign media, including foreign-based satellite television channels, have criticized the Tunisian Government for the lack of press freedom. Tunisia ranked number 148 out of 167 countries in the 2006 Reporters Without Borders list of World Press Freedom rankings. As reflected in the State Department's annual human rights report, there are frequent reports of widespread torture and abuse of prisoners, especially political prisoners.

Trade unions have played a key role in Tunisia's history since the struggle for independence, when the 1952 assassination of labor leader Farhat Hached was a catalyst for the final push against French domination. The General Union of Tunisian Workers (UGTT), the country's sole labor confederation, has generally focused on bread-and-butter issues, but at some critical moments in Tunisia's history has played a decisive role in the nation's political life. Despite a drop in union membership from 400,000 to about 250,000 as the structure of the Tunisian economy changed, the UGTT continues to hold a prominent place in Tunisia's political and social life, and negotiates with government and the umbrella employer group for higher wages and better benefits. The current leadership under Abdessalem Jerad was elected at the 21st UGTT Congress held in December 2006. In January 2008, members of the Tunisian Journalists' Association (AJT) dissolved the association and created a union, the National Syndicate of Tunisian Journalists (SNJT). Neji Bhouri, who billed himself as an independent, was elected its first president. The International Federation of Journalists had suspended the AJT's membership from 2004-2007 for failing to defend freedom of the press. The new union promised to defend the rights of journalists and promote freedom of expression.

Tunisia is a leader in the Arab world in promoting the legal and social status of women. A Personal Status Code was adopted shortly after independence in 1956, which, among other things, gave women full legal status (allowing them to run and own businesses, have bank accounts, and seek passports under their own authority). It also, for the first time in the Arab world, outlawed polygamy. The government required parents to send girls to school, and today more than 50% of university students are women. Rights of women and children were further enhanced by 1993 reforms, which included a provision to allow Tunisian women to transmit citizenship even if they are married to a foreigner and living abroad. The government has supported a remarkably successful family planning program that has reduced the population growth rate to just over 1% per annum, contributing to Tunisia's economic and social stability.

Tunisia's judiciary is headed by the Court of Cassation, whose judges are appointed by the president. The country is divided administratively into 24 governorates. The president appoints all governors.

Principal Government Officials

Last Updated: 11/12/08

Pres.: **Zine el Abidine BEN ALI**
Prime Min.: **Mohamed GHANNOUCHI**

Special Adviser to the Pres. & Spokesman of the Republic: **Abdelaziz BEN DHIA**
Min. of Agriculture & Water Resources: **Abdessalem MANSOUR**
Min. of Communication Technologies: **Haj KLAI**
Min. of Communications & Relations With the Chamber of Deputies & the Chamber of Counselors: **Rafaa DEKHIL**
Min. of Culture & Protection of National Heritage: **Abderraouf EL BASTI**
Min. of Development & Intl. Cooperation: **Mohamed Nouri JOUINI**
Min. of Education & Vocational Training: **Hatem BEN SALEM**
Min. of Employment & Vocational Integration of Youth: **Slim TLETLI**
Min. of Environment & Sustainable Development: **Nadhir HAMADA**
Min. of Equipment, Housing, & Land Development: **Slaheddine MALOUCHE**
Min. of Finance: **Mohamed Rachid KECHICHE**
Min. of Foreign Affairs: **Abdelwaheb ABDALLAH**
Min. of Higher Education & Scientific Research: **Lazhar BOUOUNI**
Min. of Industry, Energy, & Small- & Medium-Size Enterprises: **Afif CHELBI**
Min. of the Interior & Local Development: **Rafiq BELHAJ KACEM**
Min. of Justice & Human Rights: **Bechir TEKKARI**
Min. of National Defense: **Kamel MORJANE**
Min. of Public Health: **Mondher ZENAIDI**
Min. of Public Property & Real Estate Affairs: **Ridha GRIRA**
Min. of Religious Affairs: **Boubaker EL-AKHZOURI**
Min. of Scientific Research, Technology, & Expertise Development: **Taieb HADHRI**
Min. of Social Affairs, Solidarity, & Tunisians Living Abroad: **Ali CHAOUCH**
Min. of Tourism: **Khelil LAJIMI**
Min. of Trade & Handicrafts: **Ridha TOUITI**
Min. of Transport: **Abderrahim ZOUARI**
Min. of Women, Children, & Family Affairs: **Sarra Kanoun JARRAYA**
Min. of Youth, Sport, & Physical Education: **Samir LABIDI**
Min.-Dir. of the Presidential Cabinet: **Ahmed Eyadh OUEDERNI**
Sec. Gen. of the Govt.: **Mounir JAIDANE**
Governor, Central Bank: **Taoufik BACCAR**
Ambassador to the US:
Permanent Representative to the UN, New York: **Habib MANSOUR**

Tunisia's embassy in the United States is located at 1515 Massachusetts Avenue NW, Washington, DC 20005 (tel. 1-202-862-1850, fax 1-202-862-1858).

ECONOMY

Tunisia's economy has emerged from rigid state control and is now mostly liberalized. World Bank and IMF support, coupled with prudent economic policies implemented by the Tunisian Government in the mid-eighties after a balance of payments crisis, has resulted in regular stable growth. Although this faltered after 9/11, the economy has since bounced back, thanks to healthy exports, renewed growth in tourism, and favorable climatic conditions which boosted agricultural production.

Manufacturing industries, producing largely for export, are a major source of foreign currency revenue. Industrial production represents about 28% of GDP and primarily consists of petroleum, mining (particularly phosphates), textiles, footwear, food processing, and electrical and mechanical manufactures. Textiles are a major source of foreign currency revenue, with more than 90% of production being exported. While the end of the Multifiber Arrangement in 2005 eroded Tunisia's competitiveness in its traditional European textile markets, to counteract this, manufacturers are successfully upgrading product lines and exporting smaller quantities of higher value items.

Tourism is a major source of foreign exchange, representing about 20% of hard currency receipts, as well as an important sector for employment. In 2006, 6.5 million tourists visited Tunisia, hailing largely from Europe and North Africa. While the influx of tourists represents a boon to the economy. Tunisia's large expatriate population (about 1 million) also makes a positive and significant contribution. Over the past five years, remittances from abroad averaged 1.61 million dinars (approximately 1.21 million USD) a year, or roughly 5% of Tunisia's GDP and one fourth of the country's foreign currency earnings.

Soaring oil prices have hit the Tunisian economy hard. The country is a net importer of hydrocarbon products. Domestic crude production is approximately 112,000 barrels per day, but refining capacity is only about 30,000 barrels a day. Proven reserves are in the region of 300 million barrels. Tunisia has one oil refinery in Bizerte on the north coast and in May 2006 awarded a tender for a second at La Skhira near Gabes to Qatar Petroleum. Natural gas production is currently about 3 million tons oil equivalent Proven reserves are about 2.8 trillion cubic feet, two-thirds of which are located offshore. British Gas is the major developer of the natural gas industry, and the largest foreign investor in Tunisia.

Economically and commercially, Tunisia is very closely linked to Europe. Tunisia signed an Association Agreement with the European Union (EU), which went into effect on January 1, 2008. The agreement eliminates customs tariffs and other trade barriers on a wide range of goods and services. To help prepare the Tunisian economy for this opening, the Tunisian Government in 1996 embarked on an industrial upgrading program, called "Mise a Niveau." The goal of the program was to improve the competitiveness of Tunisian industry. Launched on a pilot scale in 1996, the program, supported in part by EU grants, has consisted of technical assistance, training, subsidies, and infrastructure upgrades aimed at encouraging and assisting Tunisian private sector restructuring and modernization.

EU member states also provide the bulk of foreign direct investment (FDI), much of which has come in under the Government of Tunisia's privatization program launched in 1987. In May 2006 the Government of Tunisia announced that overall its privatization program had raised $1.9 billion, of which $1.4 billion was foreign capital. This does not include the $2.25 billion the Government of Tunisia recently received for the sale

to Dubai Holding of a 35% share in the national telecommunications authority, Tunisie Telecom. Persian Gulf investments in telecommunications, real estate, and energy are also a major source of FDI.

A Trade and Investment Framework Agreement (TIFA) with the U.S. was signed in October 2002 and follow-up TIFA Council meetings were held in October 2003 and June 2005, but little progress has been made toward generating the necessary reforms required to engender a free trade agreement between the U.S. and Tunisia. A TIFA Council meeting is planned for March 2008. The framework for a multilateral trade agreement with Egypt, Jordan, and Morocco, known as the Agadir Agreement, has also been signed. The Agadir Agreement creates a potential market of over 100 million people across North Africa and into the Middle East.

The government still retains control over certain "strategic" sectors of the economy (finance, hydrocarbons, aviation, electricity and gas distribution, and water resources) but the private sector is playing an increasingly important role. Tunisia is a founding member of the World Trade Organization (WTO) and is publicly committed to a free trade regime and export-led growth. Most goods can be imported without prior licensing, although non-tariff administrative barriers sometimes delay imports of goods. Significant import duties, coupled with high consumption taxes on certain items and a value-added tax (VAT), add considerably to the local price of imported goods.

The Government of Tunisia is beginning to take a more proactive stance on intellectual property rights (IPR) enforcement and education. Tunisia's recent intellectual property rights law is designed to meet WTO TRIPS (Trade-Related Aspects of Intellectual Property) minimum standards and there is on-going collaboration between the United States and Tunisian governments to promote public awareness of these rights.

Tunisia's timely completion of its IMF program (1987-1994) and subsequent fiscal conservatism have earned it investment grade ratings from a number of international institutions, although Standard and Poor has noted that ratings on Tunisia are constrained by its highly centralized political system and the need for further structural reforms. In mid-2005 the Tunisian Central Bank issued a new Euro-denominated bond on the London financial market. The issue totaled over $450 million (400 million Euros) with a maturity of 15 years. In 2004 the Government of Tunisia sold a similar bond with a total value of nearly $550 million and seven-year maturity.

The Central Bank is moving from direct management of the financial sector towards a more traditional supervisory and regulatory role. Commercial banks are permitted to participate in the forward foreign exchange market. The dinar is convertible for current account transactions but some convertible dinar/foreign exchange account transactions still require Central Bank authorization. Total convertibility of the Tunisian dinar is probably still some years away. The dinar is traded on an intra-bank market. Trading operates around a managed float established by the Central Bank (based upon a basket of the Euro, the U.S. Dollar and the Japanese Yen). The stock exchange remains under the supervision of the state-run financial market council, and lists about 50 companies. A new phase of the Mise a Niveau program aims to double this figure.

Tunisia has a relatively well-developed infrastructure that includes six commercial seaports and six international airports. The contract to build a seventh international airport at Enfidha was awarded to the Turkish holding company Tepe Akfen Ventisres (TAV) in March 2007. A tender for a deep water port in the same region is expected also.

Average annual income per capita in Tunisia is approaching $3000. The minimum monthly legal wage for a 48-hour week was recently raised to approximately $180. Tunisia's goal of pushing per capita incomes into the middle emerging market level calls for an average 6-7% growth rate instead of 4-5%. In 2006, GDP growth was 5.2 %, but inflation spiked to 4.5 %, from 2 % the year before. Official figures claim unemployment is around 14%, but it is generally believed to be much higher in some regions. Despite the present low rate of population growth, a demographic peak is now hitting higher education and the job market. Tunisia has invested heavily in education and the number of students enrolled at university has soared from 41,000 in 1986 to over 360,000. Providing jobs for these highly educated people represents a major challenge for the Government of Tunisia.

FOREIGN RELATIONS

President Ben Ali has maintained Tunisia's long-time policy of seeking good relations with the West, including the United States, while playing an active role in Arab and African regional bodies. President Bourguiba took a nonaligned stance but emphasized close relations with Europe and the United States.

Tunisia has long been a voice for moderation and realism in the Middle East. President Bourguiba was the first Arab leader to call for the recognition of Israel, in a speech in Jericho in 1965. Tunisia served as the headquarters of the Arab League from 1979 to 1990 and hosted the Palestine Liberation Organization's (PLO) headquarters from 1982 to 1993. (The PLO Political Department remains in Tunis.) Tunisia consistently has played a moderating role in the negotiations for a comprehensive Middle East peace. In 1993, Tunisia was the first Arab country to host an official Israeli delegation as part of the Middle East peace process. The Government of Tunisia operated an Interests Section in Israel from April 1996 until the outbreak of the second Intifada in 2000. Israeli citizens may travel to Tunisia on their Israeli passports. Wedged between Algeria and Libya, Tunisia has

sought to maintain good relations with its neighbors despite occasionally strained relations. Tunisia and Algeria resolved a longstanding border dispute in 1993 and have cooperated in the construction of a natural gas pipeline through Tunisia that connects Algeria to Italy. In 2002, Tunisia signed an agreement with Algeria to demarcate the maritime frontier between the two countries.

Tunisia's relations with Libya have been erratic since Tunisia annulled a brief agreement to form a union in 1974. Diplomatic relations were broken in 1976, restored in 1977, and deteriorated again in 1980, when Libyan-trained rebels attempted to seize the town of Gafsa. In 1982, the International Court of Justice ruled in Libya's favor in the partition of the oil-rich continental shelf it shares with Tunisia. Libya's 1985 expulsion of Tunisian workers and military threats led Tunisia to sever relations. Relations were normalized again in 1987. While supporting the UN sanctions imposed following airline bombings, Tunisia has been careful to maintain positive relations with her neighbor. Tunisia supported the lifting of UN sanctions against Libya in 2003, and Libya is again becoming a major trading partner, with 2005 exports to Libya valued at $472.2 million and imports at $509.9 million.

Tunisia has supported the development of the Arab Maghreb Union (UMA), which includes Algeria, Morocco, Mauritania, and Libya. Progress on Maghreb integration remains stymied, however, as a result of bilateral tensions between some member countries. Tunisia has played a positive role in trying to resolve these tensions.

U.S.-TUNISIAN RELATIONS

The United States has very good relations with Tunisia, which date back more than 200 years. The United States has maintained official representation in Tunis almost continuously since 1795, and the American Friendship Treaty with Tunisia was signed in 1799. The two governments are not linked by security treaties, but relations have been close since Tunisia's independence. U.S.-Tunisian relations suffered briefly after the 1985 Israeli raid on PLO headquarters in Tunis, after the 1988 Tunis assassination of PLO terrorist Abu Jihad, and in 1990 during the Gulf War. In each case, however, relations warmed again quickly, reflecting strong bilateral ties. The United States and Tunisia have an active schedule of joint military exercises. U.S. security assistance historically has played an important role in cementing relations. The U.S.-Tunisian Joint Military Commission meets annually to discuss military cooperation, Tunisia's defense modernization program, and other security matters.

The United States first provided economic and technical assistance to Tunisia under a bilateral agreement signed March 26, 1957. The U.S. Agency for International Development (USAID) managed a successful program until its departure in 1994, when Tunisia's economic advances led to the country's "graduation" from USAID funding. Tunisia enthusiastically supported the U.S.-North African Economic Partnership (USNAEP), designed to promote U.S. investment in, and economic integration of, the Maghreb region. The program provided over $4 million in assistance to Tunisia between 2001 and 2003. The Middle East Partnership Initiative (MEPI) was launched in 2002 and incorporated the former USNAEP economic reform projects while adding bilateral and regional projects for education reform, civil society development and women's empowerment. In 2004, the MEPI Regional Office opened in Embassy Tunis. The Regional Office is staffed by American diplomats and regional specialists. It is responsible for coordinating MEPI activities in Algeria, Egypt, Lebanon, Morocco and Tunisia in close coordination with the American Embassies in those countries.

American private assistance has been provided liberally since independence by foundations, religious groups, universities, and philanthropic organizations. The U.S. Government has supported Tunisia's efforts to attract foreign investment. The United States and Tunisia concluded a bilateral investment treaty in 1990 and an agreement to avoid double taxation in 1989. In October 2002, the U.S. and Tunisia signed a Trade and Investment Framework Agreement (TIFA), and in October 2003 held the first TIFA Council meeting in Washington, DC.

American firms seeking to invest in Tunisia and export to Tunisia can receive insurance and financing for their business through U.S. Government agencies, including the Overseas Private Investment Corporation and the Export-Import Bank. The best prospects for foreigners interested in the Tunisian market are in high technology, energy, agribusiness, food processing, medical care and equipment, and the environmental and tourism sectors.

TRAVEL

Consular Information Sheet

October 15, 2008

Country Description: Tunisia is a presidential republic with a developing economy. Tourist facilities are widely available in large urban and major resort areas.

Entry Requirements: A passport is required. For U.S. passport holders, a visa is not necessary for stays of up to four months; however, a residence permit is needed for longer stays. The residence permit can be obtained from the central police station of the district of residence. Americans born in the Middle East or with Arabic names have experienced delays in clearing immigration upon arrival. American citizens of Tunisian origin are expected to enter and exit Tunisia on their Tunisian passports. If a Tunisian-American succeeds in entering using a U.S. passport, he or she will still have to present a Tunisian passport to exit the country.

For further information concerning entry/exit requirements for Tunisia, travelers may contact the Embassy of Tunisia at 1515 Massachusetts Avenue NW, Washington, DC 20005, tel. 202-862-1850.

Tunisian/American children must always have both parents' permission to exit the country, even if one parent has sole custody.

Safety and Security: There have been no instances in which U.S. citizens or facilities in Tunisia have been subject to terrorist attacks. However, in January 2007, Tunisian security forces announced the disruption of a terrorist group which they believe intended to attack targets including the U.S. Embassy in Tunis. On April 11, 2002, Al-Qaida terrorists used a truck bomb to attack a synagogue on the Tunisian island of Djerba and a number of Western tourists were killed. Tunisian nationals have been involved in international terrorism, and international terrorist organizations have on multiple occasions called for attacks in North Africa, including Tunisia. There have also been reported threats to tourist facilities.

Recent terrorist attacks in Algeria, the November 2, 2007 announcement of the merger of the Libyan Islamic Fighting Group with Al-Qaida and the cancellation of the 2008 Dakar Rally are all indicative of an increased threat in the region. The December 2007 sentencing of 30 Tunisian individuals for terrorist related activities in December 2006/ January 2007 may also encourage anti-Western sentiment or reactions toward the Government of Tunisia.

Tunisia has open borders with Libya and Algeria. Please refer to the Country Specific Information and other international travel safety and security information for those countries. Al-Qaida in the Land of the Islamic Maghreb (AQIM) has claimed responsibility for the kidnapping of two Austrian tourists in Tunisia in late February 2008. The two Austrians had been driving a four-wheel-drive vehicle in the southern desert. AQIM is designated as a terrorist organization by the United States, and the presence of AQIM in North Africa presents potential dangers to travelers. During late 2002 and early 2003, a number of tourists, several of whom crossed into Algeria from Tunisia, were kidnapped in the Sahara desert areas of southeastern Algeria. Travelers should remain particularly alert in areas near the Algerian border. Please see the section below on Traffic Safety and Road Conditions for more information about traveling in the desert.

In May and June 2008, there were also reports of disturbances in communities in the south of Tunisia near the Algerian border. While these disturbances appear to be triggered by economic concerns, and not directed toward Western tourists, travelers in these areas are urged to remain alert to local security developments and to be vigilant regarding their personal security.

Government security forces, including the police and National Guard, are visibly present throughout Tunisia. Travelers should heed directions given by uniformed security officials, and are encouraged to always carry a copy of their passport as proof of nationality and identity. Security personnel, including plainclothes officials, may at times place foreign visitors under surveillance. It is against Tunisian law to photograph government offices and other security facilities. Suspicious incidents or problems should be reported immediately to Tunisian authorities and the U.S. Embassy.

For the latest security information, Americans traveling abroad should regularly monitor the Department of State, Bureau of Consular Affair's Internet site at http://travel.state.gov, where the current Travel Warnings and Travel Alerts, including the Worldwide Caution, can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S. and Canada, or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: Criminals have targeted tourists and business travelers for theft, pick pocketing, and scams. Care should be taken with wallets and other valuables kept in handbags or backpacks that can be easily opened from behind in crowded streets or marketplaces. Criminals may violently grab at items worn around the neck (purses, necklaces, backpacks) and then run away, sometimes causing injury to their victims. Criminals have been known to rob pedestrians by snatching purses and handbags from their victims while on a motorcycle.

Harassment of unaccompanied females occurs rarely in hotels, but it occurs more frequently elsewhere. Dressing in a conservative manner can diminish potential harassment, especially for young women. It is always wise to travel in groups of two or more people. Women are advised against walking alone in isolated areas. Travelers are advised to avoid buses and commuter rail when possible, and to never enter a taxi if another passenger is present.

Theft from vehicles is also common. Items high in value like luggage, cameras, laptop computers, or briefcases are often stolen from cars. Travelers are advised not to leave valuables in parked cars, and to keep doors locked, windows rolled up and valuables out of sight. Americans resident in Tunisia are also advised to not leave items of value unattended in the yards of their homes, as there have been reports of theft of items such as tools and bicycles.

Information for Victims of Crime: The loss loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while in Tunisia, in addition to reporting to local police, please contact the U.S. Embassy for assistance, telephone: 71-107-000. The Embassy staff can, for example, assist you to find appropriate medical care, to contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

The local equivalent to the "911" emergency line in Tunisia is 197. Emergency services are widely available in the larger towns; however, they can be less reliable in rural areas.

Medical Facilities and Health Information: Medical care in Tunisia is adequate, with a number of new, private "polyclinics" available that function as simple hospitals and can provide a variety of procedures. Specialized care or treatment may not be available. Facilities that can handle complex trauma cases are virtually non-existent. While most private clinics have a few physicians who are fluent in English, the medical establishment uses French and all of the ancillary staff in every clinic communicates in Arabic and/or French. Public hospitals are overcrowded, under-equipped and understaffed. In general, nursing care does not conform to U.S. standards.

Immediate ambulance service may not be available outside of urban areas. Even in urban areas, emergency response times can be much longer than in the United States. Doctors and hospitals expect immediate cash payment for healthcare services, although some hospitals may accept credit cards. Over-the-counter medications are available; however, travelers should bring with them a full supply of medications that are needed on a regular basis. The U.S. Embassy in Tunis maintains a list of doctors and medical practitioners (dentists, etc.) who can be contacted for assistance.

The U.S. Department of State is unaware of any HIV/AIDS entry restrictions for visitors to or foreign residents of Tunisia.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Tunisia is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

Driving in Tunisia can be dangerous. It is recommended that visitors avoid driving after dark outside of Tunis or the major resort areas. Driving practices are poor. Drivers fail to obey the rules of the road even in the presence of the police. Traffic signs and signals are often ignored, and drivers sometimes drive vehicles on the wrong side of the road. Faster drivers tend to drive on the left while slower drivers stay to the right. Traffic lane markings are widely ignored. Bicycles, mopeds and motorcycles are operated without sufficient lights or reflectors, making them difficult to see darting in and out of traffic. Motorists should also be aware of animals on the roads, particularly in rural areas.

Pedestrians present an additional challenge as they continuously dodge traffic (even on controlled-access highways) and do not pay attention to vehicles. Pedestrians and cyclists should be aware that drivers rarely yield and will not always stop at either crosswalks or stoplights. Defensive driving is a must when driving in Tunisia. Drivers may be stopped for inspection by police officers within cities and on highways at any time, and drivers should comply.

Drivers should also be aware that if they are involved in a motor accident which results in death or serious injury of another person, the police may take them into protective custody until they are absolved of responsibility. This can mean spending a period varying from one day to two months in detention. As with any arrest or detention, Americans taken into custody should immediately request that the police inform the Embassy of their whereabouts.

Travel in the desert areas of southern Tunisia presents additional challenges. Many roads are unimproved, and even well-traveled routes are subject to blowing sands that can create hazards for vehicles. Persons driving off the major paved roads are encouraged to ensure that their vehicles are appropriate for off-road driving conditions, and are equipped with appropriate spares and supplies—including water and food. Groups should generally travel in multiple vehicles, so if a vehicle becomes disabled or immobilized, the group can return in the operable vehicle(s).

Desert regions are subject to extreme temperatures, from sub-freezing evenings in the winter to dangerously hot daytime temperatures in the summer. In addition, there are many areas in the southern desert regions with little or no cellular telephone service. The Tunisian National Guard encourages persons traveling into the desert to register their travel beforehand. For details on how and where to register, please visit the U.S. Embassy's desert travel page at http://tunis.usembassy.gov.

Emergency services are widely available in the larger towns. They can be less reliable in rural areas. Emergency service numbers are:

Police (Police secours): 197
Fire Department: 198
Ambulance (SAMU): 190
Towing (SOS Remorquage 24/24): 71 801 211, 71 840 840

Visit the website of the country's national tourist office and national authority responsible for road safety at http://www.tourismtunisia.com.

Aviation Safety Oversight: As there is no direct commercial air service between the United States and Tunisia, the U.S. Federal Aviation Administration (FAA) has not assessed Tunisia's Civil Aviation Authority for compliance with International Civil Aviation Organization (ICAO) aviation safety standards. For more information, travelers may visit the FAA's web site at http://www.faa.gov.

Currency: Travelers' checks and credit cards are accepted at some establishments in Tunisia, mainly in urban or tourist areas. Cash machines (ATMs) are available in urban and tourist areas. The Tunisian dinar is not a fully convertible currency. While the export or import of Tunisian banknotes and coins is prohibited, the export of foreign currency declared when entering Tunisia is allowed. Tourists are expected to make foreign exchange transactions at authorized banks and to retain receipts. A tourist may reconvert to foreign currency 30 percent of the amount previously exchanged into dinars, up to a maximum of $100. Declaring foreign currency when entering Tunisia and obtaining receipts for dinars purchased thereafter will facilitate the conversion of dinars to U.S. dollars when leaving the country. Please keep all receipts of monetary transactions for presentation when departing.

Workweek: Normal working days are Monday to Friday, with government offices open on Saturday mornings. Many stores are closed on Sunday, except in resort areas where most remain open.

Proselytizing: Islam is the state religion of Tunisia and the government does not interfere with the country's religious minorities' public worship. Many religious denominations hold regularly scheduled services. However, it is illegal to proselytize or engage in other activities that the Tunisian authorities could view as encouraging conversion to another faith. In the past, Americans who engaged in such activities were asked to leave the country.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating Tunisian laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Tunisia are severe, and convicted offenders can expect long jail sentences and heavy fines. Tunisian law includes penalties for failure to respect government officials. Individuals, including U.S. citizens, have been sentenced to jail for cursing at police officers. Homosexuality is illegal in Tunisia, and can be punished by imprisonment. Possession of pornography can also lead to criminal charges. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in Tunisia are encouraged to register with the U.S. Embassy through the State Department's travel registration web site, so that they can obtain updated information on travel and security within Tunisia. Americans may also register directly with the U.S. Embassy. By registering, American citizens make it easier for the Embassy to contact them in case of emergency. The U.S. Embassy is located at Zone Nord Est des Berges du Lac, Nord de Tunis 2045 La Goulette, Tunisie Tel: (216) 71-107-000, Fax: (216) 71964-360, Internet: http://tunisia.usembassy.gov.

Intercountry Adoption

June 2007

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is based on public sources and current understanding. Questions involving foreign and U.S. immigration laws and legal interpretation should be addressed respectively to qualified foreign or U.S. legal counsel.

Please Note: The U.S. Embassy in Tunis has been informed that Law No. 58-27, Articles 8 to 16, covers Tunisian adoptions. The law contains no nationality or religious requirements but in practice Tunisian judges have generally held that prospective adoptive parents must be Muslim and of Tunisian descent.

Usually, they will only grant adoptions to Muslims who are living in Tunisia or an Islamic Arab country and who have some family ties to Tunisia.

Patterns of Immigration: Please review current reports online at http://adoption.state.gov.

Adoption Authority:
Institut National de la Protection de l'Enfance
2010 Manoubia
Tunis, Tunisie
Tel: (216) 71-606-938 or 71-606-890

Eligibility Requirements for Adoptive Parents: The prospective adoptive parents must be at least 20 years of age, married and not legally barred from adoption.

Divorced or widowed individuals may not adopt without the express consent of a judge. Single individuals or common-law partners may not adopt.Prospective adoptive parents must be at least 15 years older than the child.

Prospective adoptive parents must be able to prove they have sufficient revenue to support the child. It is extremely rare for foreigners to be allowed to adopt in Tunisia. Tunisian judges have generally held that prospective adoptive parents must be Muslim and of Tunisian descent. Usually, they will only grant adoptions to Muslims who are living in Tunisia or an Islamic Arab country and who also have some family ties to Tunisia.

Time Frame:

- One month for review of submitted documentation by the Institut National de la Protection de l'Enfance
- "Undetermined" amount of time for review of file by psychologists and other authorities (estimated time: 1-2 months)
- 3 months of visits by the Institut National to the home of the potential parents to make sure the home is ready for the child
- 3 months of visits by the Institut National to the home of the potential parents after the child has been placed there

Adoption Agencies and Attorneys: There are no adoption agencies operating in Tunisia. However, U.S. citizen prospective adoptive parents of a Tunisian orphan may choose to employ the services of an adoption agency or attorney to assist them with the U.S. immigration portion of the process.

Adoption Fees: There are no Tunisian government fees for processing an adoption case.

Adoption Procedures: A completed adoption file containing the documents listed below may be mailed or hand-delivered to the Institut National de la Protection de l'Enfance at: Institut National de la Protection de l'Enfance; 2010 Manoubia; Tunis, Tunisie.

Required Documents:

- Petition to adopt a child signed by the prospective adoptive parents
- Marriage certificate (or death or divorce certificate where applicable)
- 4 prepaid envelopes
- Birth certificates of both prospective adoptive parents
- A copy of Tunisian social security card
- 2 photographs of each prospective adoptive parent
- Police certificates of both prospective adoptive parents
- Medical certificates of both prospective adoptive parents
- Proof of revenue

Embassy of Tunisia
1515 Massachusetts Avenue, NW
Washington, D.C. 20005
Phone: (202) 862-1850
Fax: (202) 862 1858

U.S. Immigration Requirements: Prospective adoptive parents are strongly encouraged to consult USCIS publication M-249, *The Immigration of Adopted and Prospective Adoptive Children*, as well as the Department of State publication, *Intercountry Adoptions*. Please see the *Intercountry Adoption* section of this book for more details and review current reports online at http://adoption.state.gov.

U.S. Embassy Tunis
1053 Les Berges du Lac
Tunis, Tunisia
Phone: +216 71-107-000
Fax: +216 71-964-360
Email: ConsularTunis@state.gov

Additional Information: Specific questions about adoption in Tunisia may be addressed to the U.S. Embassy in Tunis. General questions regarding intercountry adoption may be addressed to the Office of Children's Issues, U.S. Department of State, CA/OCS/CI, SA-29, 4th Floor, 2201 C Street, NW, Washington, D.C. 20520-4818, toll-free Tel: 1-888-407-4747.

International Parental Child Abduction

November 2008

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *International Child Abduction* section of this book and review current reports online at www.travel.state.gov/childabduction.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is provided for general information only. Questions involving interpretation of specific foreign laws should be addressed to foreign legal counsel.

Dual Nationality: When one of the parents is Tunisian, a child is considered Tunisian regardless of the child's place of birth or whether the child had acquired the nationality of another country.

Residency: Tunisian courts expect that parents seeking child custody have established residency in Tunisia.

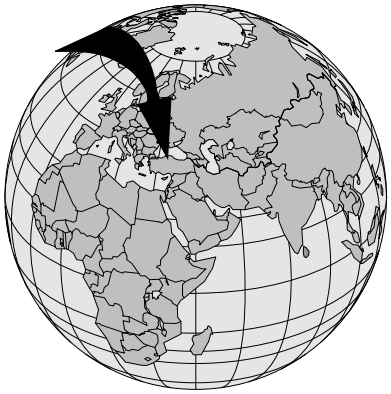
Enforcement of Foreign Custody Orders: The parent can request that a foreign child custody order be recognized in Tunisia, but enforcement will result only if the custody order conforms with Tunisian child custody law. Therefore, as a practical matter, foreign child custody orders are not generally recognized in Tunisia, and the parent must seek legal representation in Tunisia and file for custody in Tunisia.

Custody Disputes: When a child custody dispute arises between parents, one of whom is a Tunisian, the courts determine which parent is awarded legal custody of a child. Child custody laws in Tunisia are codified in the Child Code Law 67 of the Code du Statut Personnel Tunisian. Tunisian judges take into consideration the welfare and protection of the child and the eligibility of the parent seeking custody. (The parent must be over 21 years old, sound of mind, able to support and care for the child, and free from contagious diseases.)

Right of Custody and Visitation: The court will conduct an investigation to determine which parent will benefit the child the most. The court will base its custody decision on its assessment of what is in the best interests of the child. The law does not specify religious or nationality conditions for the mother. Even when Tunisian courts award legal custody to the mother, the father retains certain rights. The father may control the child's welfare, enroll the child in school and provide for the child's education. Tunisian courts do grant visitation rights to the non-custodial parent.

Travel Restrictions on Minor Children: Special authorization from the court must be obtained before the child can stay overnight outside the custodial parent's home. If the custodial parent moves and the move interferes with the other parent's rights and duties, the custodial parent can lose legal custody of the child. Imprisonment can result if the non-custodial parent takes the child without the consent of the custodial parent. Unless the child is at risk, the mother, as custodial parent, must give her permission before the father can take the child from her residence. A minor child, under the age of 20 years cannot be taken outside Tunisia without the father's permission or the court's authorization, when the mother has been awarded custody.

Specific questions regarding child custody in Tunisia may be addressed to:



Embassy of Tunisia
1515 Massachusetts Avenue, NW
Washington, D.C. 20005
Phone: (202) 862-1850

U.S. Embassy Tunis
144 Avenue de la Liberte
1002 Tunis-Belvedere
Phone: (216) (1) 7782-566, ext. 4280
Fax (216) (1) 789-719 or 788-928

Hours: 8:00 AM to 4:30 PM, except during July & August when hours are 7:30 AM to 4:00 PM.

Passports for Minors and the Children's Passport Issuance Alert Program: For more information on these topics, see the *International Parental Child Abduction* section of this publication and review current reports from the U.S. Department of State at www.travel.state.gov/childabduction.

More Information: For further information and/or assistance in either preventing or responding to an international parental child abduction, contact the Office of Children's Issues, U.S. Department of State at (202) 736-9090 or visit its web site at www.travel.state.gov/childabduction.

TURKEY

Compiled from the December 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Republic of Turkey

PROFILE

Geography

Area: 780,580 sq. km.

Cities: Capital—Ankara (pop. 3.9 million). Other cities—Istanbul (11.3 million), Izmir (2.6 million), Bursa (1.5 million), Adana (1.5 million), Gaziantep (1.2 million).

Terrain: Narrow coastal plain surrounds Anatolia, an inland plateau becomes increasingly rugged as it progresses eastward. Turkey includes one of the more earthquake-prone areas of the world.

Climate: Moderate in coastal areas, harsher temperatures inland.

People

Nationality: Noun—Turk(s). Adjective—Turkish.

Population: (2007) 70.5 million.

Annual population growth rate: (2004 est.) 1.33%.

Ethnic groups: Turkish, Kurdish, other.

Religions: Muslim 99%, Christian, Bahai, and Jewish.

Languages: Turkish (official), Kurdish, Zaza, Arabic, Armenian, Greek.

Education: Years compulsory—8. Attendance—97.6%. Literacy—86.5%.

Health: Infant mortality rate—39.4/1,000. Life expectancy—68.5 yrs.

Work force: (23 million) Agriculture—35.6%; industry—17.5%; services—47.2%.

Government

Type: Republic.

Independence: October 29, 1923.

Constitution: November 7, 1982.

Government branches: Executive—president (chief of state), prime minister (head of government), Council of Ministers (cabinet—appointed by the president on the nomination of the prime minister). Legislative—Grand National Assembly (550 members) chosen by national elections at least every 5 years. Judicial—Constitutional Court, Court of Cassation, Council of State, and other courts.

Political parties: Justice and Development Party (AKP) (340 seats), Republican People's Party (CHP) (97 seats), Nationalist Action Party (MHP) (70 seats), Democratic Society Party (DTP) (21 seats), Democratic Left Party (DSP) (13 seats), Freedom and Democracy Party (ODP) (1 seat), Grand Unity Party (BBP) (1 seat), and five independents.

Suffrage: Universal, 18 and older.

National holidays: Republic Day, October 29.

Economy

GDP: (2005) $361.5 billion; (2006) $390.4 billion; (2007) $490 billion.

Annual real GDP growth rate: (2005) 7.4%; (2006) 6.0%; (2007) 4.6%.

GDP per capita: (2005) $5,016; (2006) $5,349; (2007) $6,830.

Annual inflation rate /CPI: (2005) 7.7%; (2006) 9.7%; (2007) 8.4%.

Natural resources: Coal, chromium, mercury, copper, boron, oil, gold.

Agriculture: (10.5% of GNP) Major cash crops—cotton, sugar beets, hazelnuts, wheat, barley, and tobacco. Provides 26% of jobs and 4% of exports.

Industry: (25.4% of GNP) Major growth sector, types—automotive, electronics, food processing, textiles, basic metals, chemicals, and petrochemicals. Provides 20% of jobs.

Trade: Exports (merchandise)—2005) $73.1 billion; (2006) $83.5 billion; (2007) $106 billion: textiles and apparel, industrial machinery, iron and steel, electronics, petroleum products, and motor vehicles. Imports (merchandise)—(2005) $116 billion; (2006) $135.5 billion; (2007) $167 billion: petroleum, machinery, motor vehicles, electronics, iron, steel, plastics precious metals. Major partners—Germany, U.S., Italy, France, Russia, Italy, Japan, Netherlands, U.K.

PEOPLE

Modern Turkey encompasses bustling cosmopolitan centers, pastoral farming villages, barren wastelands, peaceful Aegean coastlines, and steep mountain regions. More than half of Turkey's population lives in urban areas that juxtapose Western lifestyles with more traditional ways of life. The Turkish state has been officially secular since 1924. Approximately 99% of the population is Muslim. Most Turkish Muslims follow the Sunni traditions of Islam, although a significant number follow Alevi and Shiite traditions. Questions regarding role of religion in society and government, the role of linguistic and ethnic identity, and the public's expectation to live in security dominate public discourse. Turkish citizens who assert a Kurdish identity constitute an ethnic and linguistic group that is estimated at up to 12 million in number.

HISTORY

Mustafa Kemal, celebrated by the Turkish State as a Turkish World War I hero and later known as "Ataturk" or "father of the Turks," led the founding of the Republic of Turkey in 1923 after the collapse of the 600-year-old Ottoman Empire and a three-year war of independence. The empire, which at its peak controlled vast stretches of northern Africa, southeastern Europe, and western Asia, had failed to keep pace with European social and technological developments. The rise of national consciousness impelled several national groups within the Empire to seek independence as nation-states, leading to the empire's fragmentation. This process culminated in the disastrous Ottoman participation in World War I as a German ally. Defeated, shorn of much of its former territory, and partly occupied by forces of the victorious European states, the Ottoman structure was repudiated by Turkish nationalists brought together under the leadership of Mustafa Kemal. The nationalists expelled invading Greek, Russian, French and Italian forces from Anatolia in a bitter war. After the proclamation of the Republic of Turkey the temporal and religious ruling institutions of the old empire (the sultanate and caliphate) were abolished.

The leaders of the new republic concentrated on consolidating their power and modernizing and Westernizing what had been the empire's core—Asian Anatolia and a part of European Thrace. Social, political, linguistic, and economic reforms and attitudes decreed by Ataturk from 1924-1934 continue to be referred to as the ideological base of modern Turkey. In the post-Ataturk era, and especially after the military coup of 1960, this ideology came to be known as "Kemalism" and his reforms began to be referred to as "revolutions." Kemalism comprises a Turkish form of secularism, strong nationalism, statism, and to a degree a western orientation. The continued validity and applicability of Kemalism are the subject of lively debate in Turkey's political life. The current ruling AK Party comes from a tradition that challenges many of the Kemalist precepts and is driven in its reform efforts by a desire to achieve EU accession.

Turkey entered World War II on the Allied side until shortly before the war ended, becoming a charter member of the United Nations. Difficulties faced by Greece after World War II in quelling a communist rebellion and demands by the Soviet Union for military bases in the Turkish Straits prompted the United States to declare the Truman Doctrine in 1947. The doctrine enunciated American intentions to guarantee the security of Turkey and Greece and resulted in large scale U.S. military and economic aid under the Marshall Plan. After participating with United Nations forces in the Korean conflict, Turkey in 1952 joined the North Atlantic Treaty Organization (NATO). Turkey is currently a European Union candidate.

GOVERNMENT AND POLITICAL CONDITIONS

The 1982 Constitution, drafted by the military in the wake of a 1980 military coup, proclaims Turkey's system of government as democratic, secular, and parliamentary. The presidency's powers are not precisely defined in practice, and the president's influence depends on his personality and political weight. The president and the Council of Ministers led by the prime minister share executive powers. The current president, who has broad powers of appointment and supervision, was elected by Parliament in August 2007 for a seven-year term. Pursuant to a constitutional amendment package approved by voters in an October 2007 referendum, the president is directly elected by the voters for a term of 5 years and can serve for a maximum of two terms. The prime minister administers the government. The prime minister and the Council of Ministers are responsible to Parliament.

The 550-member Parliament carries out legislative functions. Election is by the D'Hondt system of party-list proportional representation. To participate in the distribution of seats, a party must obtain at least 10% of the votes cast at the national level as well as a percentage of votes in the contested district according to a complex formula. The president enacts laws passed by Parliament within 15 days. With the exception of budgetary laws, the president may return a law to the Parliament for reconsideration. If Parliament reenacts the law, it is binding, although the president may then apply to the Constitutional Court for a reversal of the law. Constitutional amendments pass with a 60% vote, but require a popular referendum unless passed with a two-thirds majority; the president may also submit amendments passed with a two-thirds majority to a popular referendum.

The judiciary is declared to be independent, but the need for judicial reform and confirmation of its inde-

pendence are subjects of open debate. Internationally recognized human rights, including freedom of thought, expression, assembly, and travel, are officially enshrined in the Constitution but have at times been narrowly interpreted, can be limited in times of emergency and cannot be used to violate what the Constitution and the courts consider the integrity of the state or to impose a system of government based on religion, ethnicity, or the domination of one social class. The Constitution prohibits torture or ill treatment; the current government has focused on ensuring that practice matches principle. Labor rights, including the right to strike, are recognized in the Constitution but can be restricted.

The high court system includes a Constitutional Court responsible for judicial review of legislation, a Court of Cassation (or Supreme Court of Appeals), a Council of State serving as the high administrative and appeals court, a Court of Accounts, and a Military Court of Appeals. The High Council of Judges and Prosecutors, appointed by the president, supervises the judiciary.

In the November 2002 election of Turkey's 58th government, the Justice and Development Party (AKP) captured 34.3% of the total votes, making Abdullah Gul Prime Minister, followed by the Republican People's Party (CHP) with 19.39% of the vote, led by Deniz Baykal. A special General Election was held again in the province of Siirt in March 2003, resulting in the election of AKP's chairman Recep Tayyip Erdogan to a seat in Parliament, allowing him to become prime minister. AKP and CHP were the only parties to surpass the 10% threshold required to hold seats in Parliament. The elections resulted in 363 of the 550 seats going to AKP, 178 seats to CHP, and 9 as independent. Due to a reshuffle in party affiliation and resignations, by 2007, AKP held 353 seats, CHP held 151 seats, Anavatan Party held 20 seats, independents held 10 seats, and five joined the True Path Party (DYP). In March 2004 nationwide local elections, AKP won 57 of 81 provincial capital municipalities and, with 41.8% of the votes for provincial council seats, consolidated its hold on power.

The Turkish Grand National Assembly was to have elected in May 2007 a new president to succeed President Sezer, whose term ended on May 16. Opposition parties led a Constitutional Court challenge to the electoral procedures, which resulted in a series of proposed constitutional amendments and early general elections on July 22. AKP won 46.6% of the vote, followed by CHP (20.9%), MHP (14.3%) and independents (5.2%). The new Parliament, which was sworn in on August 4, 2007 included 341 AKP members, 97 CHP members, 71 Nationalist Movement Party (MHP)

members, 20 Democratic Society Party (DTP) members, 13 Democratic Left Party (DSP) members, one Freedom and Democracy Party (ODP) member, one Grand Unity Party (BBP) member, and five independents. Following the election, Sezer reappointed Erdogan as Prime Minister and then-Foreign Minister Gul again declared his presidential candidacy. The Parliament elected Gul in the third round of voting on August 28, 2007. Following Gul's move to the presidency, AKP seats in Parliament total 340; an MHP deputy died in August 2007, bringing the number of MHP members to 70; and the ban on a DTP deputy expired in July 2008, raising the number of DTP members to 21. President Gul approved Erdogan's proposed cabinet on August 29, 2007, and the new government received a vote of confidence on September 5. Nationwide local elections for municipal assembly and mayoral positions are scheduled for March 2009.

In March 2008 the Constitutional Court agreed to hear a case to close down the AKP because of alleged "anti-secular" activities that contravene the Turkish Constitution. Seventy-one AKP members, including President Gul and Prime Minister Erdogan, were named in the case and could have been barred from politics for five years. On July 30, 2008 the court voted six in favor and five against closing down AKP; seven votes were required to close down the party. The court decided to cut the party's state funding, worth about $58 million, in half. None of the AKP members were banned.

Principal Government Officials

Last Updated: 11/12/08

Pres.: **Abdullah GUL**
Prime Min.: **Recep Tayyip ERDOGAN**

Turkey maintains an embassy in the United States at 2525 Massachusetts Avenue NW, Washington, DC 20008, tel. (202) 612-6700. Consulates general in Chicago (360 N. Michigan Ave., Suite 1405, Chicago, IL 60601, tel: 312-263-0644, ext. 28); Los Angeles (4801 Wilshire Blvd., Suite 310, Los Angeles, CA 90010, tel: 323-937-0118); New York (821 United Nations Plaza, New York, NY 10017, tel: 212-949-0160); and Houston (1990 Post Oak Blvd., Suite 1300, Houston, TX 77056, tel: 713-622-5849). The Permanent Representative of Turkey to the United Nations is located on 821 United Nations Plaza, 10th floor, New York, NY 10017, tel: 212-949-0150.

ECONOMY

Turkey is a large, middle-income country with relatively few natural resources. Its economy is currently in transition from a high degree of reliance on agriculture and heavy industrial economy to a more diversified economy with an increasingly large and globalized services sector. Coming out of a tradition of a state-directed economy that was relatively closed to the outside world, Prime Minister and then President Turgut Ozal began to open up the economy in the 1980s, leading to the signing of a Customs Union with the European Union in 1995. In the 1990s, Turkey's economy suffered from a series of coalition governments with weak economic policies, leading to high-inflation boom-and-bust cycles that culminated in a severe banking and economic crisis in 2001 and a deep economic downturn (GNP fell 9.5% in 2001) and increase in unemployment.

Turkey's economy has recovered strongly from the 2001 recession thanks to good monetary and fiscal policies and structural economic reforms made with the support of the International Monetary Fund and the World Bank. The independence of the Central Bank has been firmly established, a floating exchange rate system has been put in place, and the government's overall budget deficit has been substantially reduced. In addition, there have been substantial reforms in the financial, energy, and telecommunications sectors that have included the privatization of several large state-owned institutions.

Turkey's economy grew an average of 6.0% per year from 2002 through 2007—one of the highest sustained rates of growth in the world. It is expected to grow about 5.5% in 2008. Inflation and interest rates have fallen significantly, the currency has stabilized, government debt has declined to more supportable levels, and business and consumer confidence have returned. At the same time, booming economic growth has contributed to a growing current account deficit. Though Turkey's vulnerabilities have been greatly reduced, the economy could still face problems in the event there is a sudden change in investor sentiment. Continued implementation of reforms, including tight fiscal policy; securing independent Central Bank monetary policies, is essential to sustain growth and stability.

After years of low levels of foreign direct investment (FDI), in January-November 2007, Turkey succeeded in attracting $16.6 billion in foreign direct investment (FDI) and is expected to attract a similar level in 2008. A series of large privatizations, the stability fostered by the start of Turkey's EU accession negotiations, strong and stable growth, and structural changes in the banking, retail, and telecommunications sectors have all contributed to the rise in foreign investment.

Turkey has taken steps to improve its investment climate through administrative streamlining, an end to foreign investment screening, and strengthened intellectual property legislation. However, a number of disputes involving foreign investors in Turkey and certain policies, such as high taxation and continuing gaps in the intellectual property regime, inhibit investment. Turkey has a number of bilateral investment and tax treaties, including with the United States, which guarantee free repatriation of capital in convertible currencies and eliminate double taxation.

EU Accession

Turkey's principal ongoing economic challenge is providing for the needs of a fast-growing, young population. Raising living standards to those prevalent in Europe will require high rates of GDP growth sustained over many years. This will entail continued structural reforms that encourage both domestic and foreign investment. Principal areas for reform identified by international financial intuitions include increasing flexibility in the labor market, making the educational sector more responsive to the needs of the economy and ensuring faster and more predictable operation of the judicial system. As an aspirant to membership in the European Union, Turkey aims to adopt the EU's basic system of national law and regulation (the acquis communautaire) by 2014. While implementing some elements of the acquis will be costly and difficult (for example in the areas of environmental protection and agriculture), its adoption will make a significant contribution to modernizing the economy.

Energy

Installed electricity generation capacity in Turkey reached 40,000 megawatts (MW) as of 2007. Fossil fuels account for 68% of the total installed capacity and hydro, geothermal, and wind account for the remaining 32%. Electricity demand in Turkey has been above the average rate of GNP growth over the last few years. This, combined with the lack of investment in the sector, mainly due to the Government of Turkey's (GOT) control over prices and slow progress in market liberalization, increased concerns regarding electricity shortages. According to official data, Turkey will face electricity shortages as of 2009, while market experts expected the shortages as early as summer 2008. The GOT is working on new legislation to encourage investments in the sector, which is expected to introduce incentives for companies bringing their facilities online by 2012. Turkey also plans to privatize its electricity generation and distribution facilities in 2008.

Oil provides about 43% of Turkey's total energy requirements; around 90% is imported. Domestic production is mostly from small fields in the southeast. New exploration is taking place in the eastern Black Sea. In 2004, the Parliament approved a petroleum market reform bill that liberalized consumer prices and would lead to the privatization of the state refining company TUPRAS, which was privatized in 2005. Turkey has a refining capacity of 714,275 barrels per day (b/d).

Turkey acts as an important link in the East-West Southern Energy Corridor bringing Caspian, Central Asian, and Middle Eastern energy to Europe and world markets. The Baku-Tbilisi-Ceyhan pipeline, which came online in July 2006, delivers 1 million barrels/day of petroleum, and in 2007, the South Caucasus Pipeline (from Shah Deniz) started bringing natural gas from Azerbaijan to Turkey. Turkey's interconnector pipeline to Greece, an important step in bringing Caspian natural gas to Europe via Turkey, came online in November 2007.

Telecommunications

Parliament enacted legislation separating telecommunications policy and regulatory functions in January 2000, by establishing an independent regulatory body, the Telecommunication Authority. The Authority is responsible for issuing licenses, supervising operators, and taking necessary technical measures against violations of the rules. Most regulatory functions of the Transport Ministry were transferred to the Authority, and the regulator is slowly gaining competence and independence. The long-expected privatization of the state-owned telecommunications company was accomplished by the sale of 55% of Turk Telekom to the Saudi-owned Oger Group in November 2005.

With liberalization and growth in the economy, there is growing competition for Internet provision, but Turk Telekom remains the sole provider of ADSL wide band Internet.

Environment

With the establishment of the Environment Ministry in 1991, Turkey began to make significant progress addressing its most pressing environmental problems. The most dramatic improvements were significant reductions of air pollution in Istanbul and Ankara. However, progress has been slow on the remaining—and serious—environmental challenges facing Turkey.

In 2003, the Ministry of Environment was merged with the Forestry Ministry. With its goal to join the EU, Turkey has made commendable progress in updating and modernizing its environmental legislation. However, environmental concerns are not fully integrated into public decision-making and enforcement can be weak. Turkey faces a backlog of environmental problems, requiring enormous outlays for infrastructure.

The most pressing needs are for water treatment plants, wastewater treatment facilities, solid waste management, and conservation of biodiversity. The discovery of a number of chemical waste sites in 2006 has highlighted weakness in environmental law and oversight.

After long years of silence, Turkey's becoming a signatory of the Kyoto Protocol was back on the agenda in 2007, and a focus of Prime Minister Erdogan's speech at the UN General Assembly. Despite the positive approach, Turkey would still like to keep its reservation to get developing country treatment with regard to the emission levels set by the protocol.

Transport

The Turkish Government gives a special priority to major infrastructure projects, especially in the transport sector. The government is in the process of building new airports and highways, thanks to an increased public investment budget. The government will realize many of these projects by utilizing the build-operate-transfer (BOT) model.

FOREIGN RELATIONS

Turkey's primary political, economic, and security ties are with the West, although some voices call for a more "Eurasian" orientation.

Turkey entered NATO in 1952 and serves as the organization's vital eastern anchor, controlling the straits leading from the Black Sea to the Mediterranean and sharing a border with Syria, Iraq, and Iran. A NATO headquarters is located in Izmir. Besides its relationships with NATO and the EU, Turkey is a member of the OECD, the Council of Europe, and OSCE. Turkey also is a member of the UN and the Islamic Conference Organization (OIC).

In December 1999, Turkey became a candidate for EU membership. On December 17, 2004, the EU decided to begin formal accession negotiations with Turkey in October 2005.

Turkey and the EU formed a customs union beginning January 1, 1996. The agreement covers industrial and processed agricultural goods.

Turkey is harmonizing its laws and regulations with EU standards. Turkey adopted the EU's Common External Tariff regime, effectively lowering Turkey's tariffs for third countries, including the United States.

On October 3, 2005, Turkey and the EU reached agreement for Turkey to begin negotiations on accession to the European Union. Turkey and EU officials have begun the process of screening Turkey's laws and policies in order to begin negotiating the individual chapters required for ultimate EU accession.

Turkey opened and provisionally closed in 2006 one EU negotiating chapter on science and technology. Another chapter on statistics was opened in February 2007, and two more were opened in June 2007. Eight chapters, mostly related to trade, were suspended by the European Council in December 2006 after Turkey declined to open its ports and airports to Cypriot vessels—a commitment Turkey made as part of the Ankara Protocol and its EU Customs Union membership.

Two new chapters were opened in December 2007 under the Portuguese Presidency, and the Slovenian Presidency opened two additional chapters in June 2008.

Turkey is a member of the World Trade Organization (WTO). It has signed free trade agreements with the European Free Trade Association (EFTA), Israel, and many other countries. In 1992 Turkey and 10 other regional nations formed the Black Sea Economic Cooperation (BSEC) Council to expand regional trade and economic cooperation. Turkey chaired BSEC in 2007 and hosted in Istanbul the 15th BSEC Summit in June 2007.

U.S.-TURKEY RELATIONS

U.S.-Turkish friendship dates to the late 18th century and was officially sealed by a treaty in 1830. The present close relationship began with the agreement of July 12, 1947, which implemented the Truman Doctrine. As part of the cooperative effort to further Turkish economic and military self-reliance, the United States has loaned and granted Turkey more than $12.5 billion in economic aid and more than $14 billion in military assistance.

U.S.-Turkish relations focus on areas such as strategic energy cooperation, trade and investment, security ties, regional stability, the global war on terrorism, and human rights progress. Relations were strained when Turkey refused in March 2003 to allow U.S. troops to deploy through its territory to Iraq in Operation Iraqi Freedom, but regained momentum steadily thereafter and mutual interests remain strong across a wide spectrum of issues. On July 5, 2006, Secretary Rice and then-Foreign Minister Gul signed a Shared Vision Statement to highlight the common values and goals between our two countries and to lay out a framework for increased strategic dialogue. U.S. President Bush welcomed Prime Minister Erdogan to Washington for a White House visit on November 5, 2007, during which he committed to provide greater assistance to Turkey in its fight against terrorism from the Kurdistan Workers' Party (PKK or Kongra Gel), which he characterized as a "common enemy" of Turkey, Iraq, and the United States. He reiterated this commitment during President Gul's January 8, 2008, White House visit.

The U.S. and Turkey for several years have had a Trade and Investment Framework Agreement, which last met in Washington in April 2007. In 2002, the two countries indicated their joint intent to upgrade bilateral economic relations by launching an Economic Partnership Commission, which last convened in Washington in

April 2008. In 2006, Turkish exports to the U.S. totaled about $5.4 billion, and U.S. exports to Turkey totaled $5.7 billion.

TRAVEL

Consular Information Sheet

July 18, 2008

Country Description: Turkey is a moderately developed nation with a wide range of tourist facilities of all classes in the main tourist destinations.

Entry Requirements: A passport and visa are required. Currently, holders of all types of passports can purchase a 90-day sticker visa at the port of entry for USD $20 cash if they are traveling to Turkey as tourists. For further information, travelers in the U.S. may contact the Embassy of the Republic of Turkey at 2525 Massachusetts Avenue NW, Washington, DC 20008, telephone: (202) 612-6700, or the Turkish Consulates General in Chicago, Houston, Los Angeles, or New York. Visit the Embassy of Turkey web site at http://www.turkishembassy.org for the most current visa information. Overseas, travelers may contact a Turkish embassy or consulate. Holders of official and diplomatic passports on official business must obtain a visa from a Turkish embassy or consulate before arriving in Turkey.

All travelers planning to stay more than three months for any purpose are required to obtain a visa from a Turkish embassy or consulate. Such travelers must also apply for a residence/work permit or Turkish ID card within the first month of their arrival in Turkey. This includes anyone who plans to spend more than three months doing research, studying, or working in Turkey.

All travelers are advised to obtain entry stamps on the passport page containing their visa at the first port of entry before transferring to domestic flights. Failure to obtain entry stamps at the port of entry may cause serious difficulties for travelers when they attempt to depart the country. On multiple occasions, Turkish authorities have detained overnight travelers in such situations.

Crossing the border with Iraq can be time-consuming, as the Turkish Government tightly controls entry and exit. All travelers wishing to cross into Iraq from Turkey must still have a valid travel document, such as a passport; travelers wishing to enter Turkey from Iraq must have both a valid travel document and current Turkish visa.

Safety and Security: Terrorist bombings over the past five years—some causing significant numbers of casualties—have struck religious, government, government-owned, political, tourist and business targets in a number of locations in Turkey. A variety of leftist or Islamic terrorist groups have targeted U.S. and Western interests as well. Terrorists claiming association with al-Qa'ida were responsible for suicide bombings in Istanbul in 2003 that targeted Western interests. In August 2005, Turkish police uncovered a planned terrorist attack by a transnational group targeting maritime interests in Turkey. The possibility of terrorist attacks, both transnational and indigenous, remains high.

The Kurdistan Worker's Party (PKK, also known as Kongra Gel) is one of the most active terrorist organizations in Turkey. Over the last few decades, the PKK has been responsible for the deaths of more than 30,000 Turkish citizens. This indigenous terrorist group continues to target Turkish officials and various civilian facilities.

The following paragraphs describe the extent of terrorist activity in major cities and regions in Turkey.

Ankara: In May 2007, an explosive device was detonated by a suicide bomber in the Ulus district of Ankara during rush hour, resulting in six deaths and injuring more than 100. While there was no claim made by the PKK, the material used in the device was similar to that frequently used by the group. In September 2007, 600 kilograms of explosives were found in a minivan parked in a multi-story car park in the central Sihhiye area of Ankara. Investigations revealed a suspect with ties to the PKK.

Istanbul: In November 2003, al-Qa'ida-associated suicide bombers attacked the British Consulate, an HSBC Bank, and two synagogues, killing dozens and wounding hundreds of people. These incidents represent a significant change from prior attacks in Turkey and showed an increased willingness on the part of terrorists to attack Western targets.

On July 9, 2008, a terrorist attack on the Turkish police guarding the U.S. Consulate General in Istanbul resulted in three police officer deaths and wounding two other police personnel. At this time, responsibility for the attack has not been claimed by or assigned to a specific terrorist group.

In April 2007, Turkish police captured a PKK terrorist in one of Istanbul's major tourist centers, Taksim Square. The female terrorist was intercepted carrying a bomb made of five kilograms of A-4 explosive; the target was a large gathering celebrating the founding of the Turkish police. In December 2007, a suspected male PKK member carrying three kilograms of A-4 explosive material in a backpack was arrested by Turkish National Police in Istanbul's Mecidiyekoy Square; the intended target was the Mecidiyekoy subway station.

In Istanbul, small-scale bombings and violent demonstrations, and more recently vehicle arsons, have occurred regularly since 2006. Most, but not all, of these incidents have happened in neighborhoods not generally frequented by tourists. PKK supporters on a number of occasions have set public buses on fire after ordering passengers to disembark. In April 2006, an attack of this type resulted in three deaths and at least one severe wounding. Thus far, no attacks on buses have taken place in tourist areas of the city.

Mediterranean/Aegean Regions: The Kurdistan Liberation Falcons (TAK, also known as the Kurdistan Freedom Hawks), which was designated a "Specially Designated Global Terrorist" organization by the Department of State in January 2008 and is ostensibly aligned with the PKK, has warned tourists not to visit Turkey. Consistent with its threats, this group claimed responsibility for a number of bombings in tourist areas in the Mediterranean and Aegean coastal resort areas (as well as in Istanbul). In July 2005, TAK claimed responsibility for a bomb that ripped through a minibus in the holiday resort town of Kusadasi, killing five persons, including a British tourist and an Irish tourist. In June 2006, the group also was responsible for an explosion that killed three European tourists in Manavgat, a town in Antalya Province, as well as other attacks in the Antalya and Mugla Provinces. In August 2006, ten Britons and six Turks were injured when their minibus was blown up in Marmaris, and a bomb killed three and injured 87 in a blast at a shopping area in the city of Antalya.

Eastern and Southeastern Provinces (including Adana): The PKK retains a presence in certain parts of southeastern Turkey, and regularly carries out attacks focused primarily on security personnel; occasionally, however, attacks injure or kill civilians. Travel is difficult and should be considered dangerous in some portions of this region. Americans traveling in southeastern Turkey, as well as to Mt. Ararat in the Agri, northeast, should exercise extreme caution.

On July 3, 2008, three German tourists were kidnapped by armed PKK militants while camped on Mt. Ararat with their 13-member climbing team. This kidnapping highlights the risks to traveling in this area and in Turkey's southeast.

Roadside explosions caused by remote-controlled land mines or other improvised explosive devices in the Batman, Sirnak, Hakkâri, Siirt, Mardin, Diyarbakir and Tunceli provinces occur regularly. Sound bombs are a frequent event throughout the region. There have also been a number of PKK raids on Jandarma posts and ambushes of Turkish security force vehicle patrols in many of Turkey's rural southeastern areas. In 2005, the PKK attacked two trains and kidnapped two Turkish government employees in the region. In August 2006, two bombs exploded in Adana, injuring four people. In September 2006, a bomb detonated in the city of Diyarbakir, killing ten and injuring 15 Turkish nationals. In January 2008, a PKK remote controlled car bomb killed seven people and injured 66 when it exploded on a street in downtown Diyarbakir.

Terrorist activity aside, the southeast area has also had a history of civil unrest of which travelers should be aware. Regional civil unrest that began in late March 2006 prompted clashes involving Turkish security forces and protestors, and left approximately a dozen people killed and several hundred wounded.

Visitors to southeastern Turkey should use commercial air travel whenever possible. If road travel is necessary, travelers are advised to drive only during daylight hours and on major highways. The Turkish Jandarma and police forces monitor checkpoints on roads throughout the southeastern region. Travelers should be cooperative if stopped at any checkpoint. Drivers and all pas-

sengers in the vehicle should be prepared to provide identification cards or passports, a driver's license, and vehicle registration if stopped. At these checkpoints, roll down the driver's side window (the passenger side also, in vehicles with tinted windows) when stopped by security force officials. Security forces can then safely inspect the vehicle and its occupants. Remain calm, do not make any sudden movements, and obey all instructions immediately. Security officials may restrict access to some roads at times, and security force escort vehicles may be required to "convoy" visitors through troublesome areas. In some cases, this must be arranged in advance. Use of public transportation, at any time, is strongly discouraged in the southeastern region.

In June 2007, the Turkish General Staff declared parts of the southeastern provinces of Sirnak, Hakkâri, and Siirt as "sensitive areas" due to ongoing counter-insurgency operations carried out by Turkish military forces. Access to these areas, mostly along the Iraqi border, is controlled by the security forces. The Turkish government has extended this designation until September 2008.

Department of State personnel are subject to travel restrictions in the provinces of Sirnak, Diyarbakir, Van, Siirt, Mus, Mardin, Batman, Bingol, Tunceli, Hakkâri, Bitlis, and Elazig. U.S. military and Department of Defense civilians should consult their local area commander regarding any restrictions in effect for southeastern Turkey. Mount Ararat, in the Agri province, is a special military zone and access permission must be obtained from the Turkish government through a Turkish embassy or consulate before coming to Turkey.

For all of Turkey, travelers are cautioned not to accept letters, parcels, or other items from strangers for delivery either in or outside of Turkey. The PKK has attempted to use foreigners to deliver messages and packages in or outside of Turkey. If discovered, individuals could be arrested for aiding and abetting the terrorist organization.

In addition to terrorist activities, there have been several recent instances of violence targeting Christians in Turkey: the fatal shooting of a Catholic priest in Trabzon in February 2006; the murder of Armenian Turkish writer/journalist Hrant Dink in Istanbul in January 2007; the brutal murder of three Christians, one of them a German citizen, in a Bible bookstore in Malatya in April 2007; and the stabbing of a Catholic priest in Izmir in December 2007.

Americans should exercise caution and good judgment, keep a low profile, and remain vigilant with regard to their personal security. Terrorists do not distinguish between official and civilian targets. As security is increased at official U.S. facilities, terrorists will seek softer targets. These may include facilities where Americans and Westerners are known to live, congregate, shop, or visit. U.S. citizens should remain in a heightened state of personal security awareness when attendance at such locations is unavoidable.

International and domestic political issues sometimes trigger demonstrations in most major cities in Turkey. We wish to remind American citizens that even demonstrations intended to be peaceful can turn confrontational and possibly escalate into violence. American citizens are therefore urged to avoid the areas of demonstrations, if possible, and to exercise caution if within the vicinity of any demonstrations.

For the latest security information, Americans traveling abroad should regularly monitor the Department's Internet web site, where the current Worldwide Caution Travel Alert, Travel Warnings and Travel Alerts can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S. and Canada, or for callers outside the U.S. and Canada, a regular toll-free line at 1-202-501-4444.

Crime: The rate of street crime is relatively low in Turkey, although it has increased in large urban centers such as Istanbul and Izmir. In Istanbul, petty street crime is most common in tourist areas such as Taksim Square, Sultanahmet and in the areas around the Grand Bazaar and Spice (Egyptian) Bazaar. It is strongly recommended that you carry only what is needed, and leave your U.S. passport in your hotel safe.

As in other large metropolitan areas throughout the world, common street crimes include pocket picking, purse snatching, and mugging. Often the crime is preceded by some sort of diversion such as an argument, a fight, or someone bumping you. In other cases, English- or French-speaking foreigners have befriended tourists and then drugged them, using tea, juice, alcohol, or food. Two common drugs used are Nembutal and benzodiazepine which, when used incorrectly, can cause death. In other cases, tourists are invited to visit clubs or bars, and then presented with inflated bills (often exceeding $1,000), and coerced to pay them by credit card or to withdraw cash from a nearby ATM to cover the charge. Residential crime appears to be on the increase in major cities, with criminals targeting ground floor apartments for theft. Visitors should not be complacent regarding personal safety or the protection of valuables. The same precautions employed in the United States should be followed in Turkey.

In many countries around the world, counterfeit and pirated goods are widely available. Transactions involving such products may be illegal under local law. In addition, bringing them back to the United States may result in forfeitures and/or fines. More information on this serious problem is available at http://www.cybercrime.gov/18usc2320.htm.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropri-

ate medical care, contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

The local equivalent of the "911" emergency line (for police, fire or ambulance) in Turkey is 155. The emergency number for ambulance assistance only is 112.

Medical Facilities and Health Information: Turkish hospitals vary greatly. The new, private hospitals in Ankara, Antalya, and Istanbul have modern facilities and equipment, numerous U.S.-trained specialists, and international accreditation. However, they still may be unable to treat certain serious conditions. The State Department prefers medical evacuation for its personnel who will be giving birth; however there are private hospitals in Ankara and Istanbul whose level of obstetric care is considered to meet Western standards. Those planning to remain in Turkey for a prolonged period of time should consider bringing or securing a supply of necessary chronic medications (e.g., heart medications, birth control pills) to cover them while they are in the country, as certain medications are difficult to obtain in Turkey. Nursing care and diagnostic testing (including mammograms) meet American standards at specific institutions in the larger cities. Health care standards are lower in small cities in Turkey in comparison to bigger cities such as Ankara, Istanbul, Izmir, and Adana.

Travelers are advised to drink only bottled water or water that has been filtered and boiled. Bottled beverages are considered safe to drink. Most local dairy products, including milk, yogurt, and cheese, are safe to consume. However, care must be taken when purchasing all perishable products, as many vendors do not have adequate refrigeration. Travelers are advised to wash vegetables and fruits thoroughly and to cook meat thoroughly before eating.

The U.S. Department of State is unaware of any HIV/AIDS entry restrictions for visitors to or foreign residents of Turkey. However, visitors or foreign residents with HIV/AIDS should register with the Ministry of Health upon their arrival into Turkey.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's Internet site at http://wwwn.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith.

Avian Influenza: In January 2006, the WHO and Turkish authorities confirmed human cases of the H5N1 strain of avian influenza, commonly known as the "bird flu." The Government of Turkey immediately quarantined the affected region (mostly eastern and southeastern region) and no human cases have been reported since then. Travelers to Turkey and other countries affected by the virus are cautioned to avoid poultry farms, contact with animals in live food markets, and any surfaces that appear to be contaminated with feces from poultry or other animals. In addition, the CDC and WHO recommend eating only fully cooked poultry and eggs. For the most current information and links on avian influenza in Turkey, see the State Department's Avian Influenza Fact Sheet or visit the web site of the U.S. Embassy in Ankara at http://turkey.usembassy.gov.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Turkey is provided for general reference only, and may not be totally accurate in a particular location or circumstance.Motorists should drive defensively at all times and take every precaution for safety while driving in Turkey. Drivers routinely ignore traffic regulations, including driving through red lights and stop signs and turning left from the far right hand lane. These driving practices cause frequent traffic accidents. Statistics released by the Turkish State Statistics Institute indicate that daytime hours are the most dangerous times on local highways. Drivers should be aware of several driving practices that are prevalent in Turkey. Normally drivers who experience car troubles or accidents pull over by the side of the road and turn on their emergency lights to warn other drivers, but many drivers place a large rock or a pile of rocks on the road about 10-15 meters behind their vehicles instead of turning on their emergency lights.

Drivers should exercise extreme caution while driving at night. The Embassy recommends that you not drive after dark outside of major cities. Some local drivers tend to drive without their lights on or with very low lights, making it impossible to see their vehicles. While driving, it is also not unusual to come across dead animals, large rocks, missing sewer covers, deep holes or objects that have fallen from trucks.

Roads in Turkey run the full spectrum from single lane country roads to modern, divided, Trans-European motorways built to European standards. Highways in the southwestern, coastal portion of the country, which is frequented by tourists, are generally in good condition and well maintained.

Further information is available on the Embassy's web site at http://turkey.usembassy.gov. For more information on driving in Turkey, visit the

web site of the Embassy of Turkey at http://www.turkishembassy.org or the Turkey Road Report on http://www.asirt.org.

Those who wish to enter the country with their own vehicle will have to provide the following documentation: passport, international driving license, car license (note: if the vehicle belongs to another individual, a power of attorney is needed), international green card (insurance card) with the "valid in Turkey" sign visible, and a transit book "carnet de passage" (for those who want to proceed to the Middle East). The vehicle can be brought into Turkey for up to 6 months. If an extension is needed, apply to the Turkish Touring and Automobile Club (Turkiye Turing ve Otomobil Kurumu 1.Oto Sanayi Sitesi Yani, 4.Levent, Istanbul, Tel: (212) 282 81 40 or Fax: (212) 282 80 42), or to the General Directorate of Customs (Gumrukler Genel Md.lugu Ulus Ankara Tel: (312) 306-8000, Fax: (312) 306-8995, 306-8965 or 306-8195) before the end of the period declared.

In Case of an Accident: Drivers are to remain at the traffic accident site, and they are not to move their vehicle—even to move it out of the way—until the Traffic Police arrive. Drivers can be held liable for the accident otherwise. The accident should be reported to the Traffic Police (Tel: 154) or Gendarme (Tel. 156). That report will then need to be certified by the nearest local authority. The owner should apply to the customs authority with his passport and report. If the vehicle can be repaired, it is necessary to inform the customs authority first and then take the vehicle to a garage. If the vehicle is not repairable and if the owner wishes to leave the country without his vehicle, he has to deliver it to the nearest customs office, and the registration of his vehicle on his passport will be cancelled. (Only after the cancellation can the owner of the vehicle leave the country.)

Train Travel: There have been several train accidents on the popular Ankara-Istanbul train route. These accidents have led to loss of life and injury. In 2003 there were 556 accidents (collisions, derailments, falling from train) resulting in 162 fatalities and 299 injuries on trains throughout Turkey. Previous year's statistics reflect the same pattern. Two large accidents in 2004 on the Ankara-Istanbul line resulted in 45 fatalities and scores of injured alone.

Aviation Safety Oversight: The U.S. Federal Aviation Administration (FAA) has assessed the Government of Turkey's Civil Aviation Authority as being in compliance with International Civil Aviation Organization (ICAO) aviation safety standards for oversight of Turkey's air carrier operations. For more information, travelers may visit the FAA's Internet web site at http://www.faa.gov.

Special Circumstances: Turkish customs authorities enforce strict regulations concerning temporary importation into or export from Turkey of items such as antiquities (very broadly defined) or other important artwork and cultural artifacts. At the time of departure, travelers who purchase such items may be asked to present a receipt from the seller, as well as the official museum export certificate required by law. Contact the Embassy of Turkey in Washington or one of Turkey's consulates in the United States for specific information regarding customs requirements.

In addition to being subject to all Turkish laws affecting U.S. citizens, dual nationals may also be subject to additional laws that impose special obligations on Turkish citizens. Male U.S. citizens over the age of 18 who are also considered to be Turkish citizens may be subject to conscription and compulsory military service upon arrival and to other aspects of Turkish law while in Turkey. Those who may be affected are strongly advised to consult with Turkish officials and inquire at a Turkish embassy or consulate to determine their status before traveling. The Government of Turkey will not permit American officials to visit or provide consular assistance to Turkish/American dual nationals arrested in Turkey.

On January 1, 2005 six zeroes were dropped from the Turkish Lira. One million Turkish Lira is now equal to 1 New Turkish Lira. Although old banknotes and coins were taken out of circulation at the end of 2005, some vendors and businesses continue to list their prices in the old currency. For more information please see the web site of the Central Bank of the Republic of Turkey at http://www.tcmb.gov.tr/yeni/eng/index.html.

Disaster Preparedness: Turkey is a seismically active country and earthquakes occur throughout Turkey. A major earthquake along the North Anatolian fault line in 1999 killed approximately 18,000 in the Izmit area (more than one hour's travel east of Istanbul in light traffic). American citizens should make contingency plans and leave emergency contact information with family members outside of Turkey.

General information about natural disaster preparedness is available via the Internet from the U.S. Federal Emergency Management Agency (FEMA) at http://www.fema.gov. The U.S. Consulate General in Istanbul can provide a Disaster Preparedness checklist upon request to CA_Istanbul@state.gov.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses.

Persons violating Turkish laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Turkey are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Insulting the State: It is illegal to show disrespect to the name or image of Mustafa Kemal Ataturk, the founder of the modern Turkish Republic, or to insult the Turkish government, flag, or security forces.

Proselytizing: Although there is no specific law against proselytizing, some activities can lead to arrest under laws that regulate expression, educational institutions, and religious meetings. The Department of State's Annual Report on International Religious Freedom contains additional information on religious freedom in Turkey. The report is available on the Department's web site, http://www.state.gov.

Cultural Artifacts: Turkish law has a broad definition of "antiquities" and makes it a crime to remove any from the country. Offenders are prosecuted. Under Turkish law, all historic sites such as fortresses, castles and ruins, and everything in them or on the grounds or in the water, are the property of the Turkish government. While many sites do not have signs cautioning the unwary, official silence does not mean official consent. Certain antiquities may be purchased, but only from authorized dealers who have been issued a certificate by a museum for each item they are authorized to sell. If an antiquity has been purchased without having obtained the necessary certificate, competent museum personnel should evaluate it before its removal from Turkey. You may be arrested and placed in jail for one month or longer even for accidental cases.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in Turkey are encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration web site, and to obtain updated information on travel and security within Turkey. Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency and to make preparations of emergency situations.

The U.S. Embassy in Ankara is at 110 Ataturk Boulevard, tel.: (90) (312) 455-5555, fax (90)(312) 468-6131. Visa information is also available at (90) (212) 344-4444. The web site is http://ankara.usembassy.gov. Non-emergency e-mail messages about consular matters may be sent through the web site.

The U.S. Consulate General in Istanbul is located at Kaplicalar Mevkii Sokak No. 2, 34460, Istinye, Sariyer, tel.: (90) (212) 335-9000, fax (90) (212) 335-9102. Istanbul-specific information can also be accessed via the Consulate General's web site http://istanbul.usconsulate.gov. Non-emergency e-mail messages about consular matters may be sent to email: ca_istanbul@state.gov.

The U.S. Consulate in Adana is located at Girne Bulvari No. 212, Guzelevler Mahallesi, Yuregir, Adana, Turkey. Tel: (90) (322) 346-6262, fax (90) (322) 346-7916. General information can be accessed at the Consulate's web site at http://adana.usconsulate.gov.

The U.S. Consular Agent in Izmir can be contacted at (90) (232) 464-8755.

Intercountry Adoption

November 2006

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is based on public sources and current understanding. Questions involving foreign and U.S. immigration laws and legal interpretation should be addressed respectively to qualified foreign or U.S. legal counsel.

Patterns of Immigration: Please review current reports online at http://adoption.state.gov.

Adoption Authority:
General Directorate of Social Services and Child Protection Agency
(T.C. Basbakanlik Sosyal Hizmetler ve Cocuk Esirgeme Kurumu Genel Mudurlugu)
Address: Anafartalar Cad. N: 70 Ulus Ankara, Turkey
Phone: 90-312-310 2460
Web Address: www.shcek.gov.tr

Eligibility Requirements for Adoptive Parents: Adoptive parents may be single or married. A couple may adopt together or separately, and should have been married for at least five years. If only one parent adopts the child, the other must give his or her consent. Priority is given to childless, married couples, but couples with children are not prohibited from adopting.

The adoptive parent must be at least 30 years of age and there must be at least an 18-year age difference between the prospective parent and child. Adoptive parents must not be over the age of 40 if they wish to adopt children who are under one year old. Prospective adoptive parents who are over 40 can only adopt older children.

Those who reach 41 during the waiting period after submitting their application will be asked to adopt older children. Foreign nationals who do not speak Turkish and who are between the ages of 30 and 40 may only adopt children under the age of three.

Adoptive parents must be psychologically and biologically healthy, have a certain level of education and culture to raise a child in a safe and good environment and be financially capable of providing for the child. Adoptive parents must not have been convicted of a crime of moral turpitude and cannot be users of illicit

drugs. All conditions and requirements that are mentioned above are evaluated by the General Directorate of Social Services and Child Protection Agency officials.

Residency Requirements: Turkish law requires prospective adoptive parents to spend a year caring for the child in Turkey prior to finalizing the adoption. Although Turkish law allows for a child to leave Turkey during the one-year probationary period, a U.S. visa cannot be issued until the probationary period is over and the adoption is final. U.S. prospective adoptive parents should be prepared to remain in Turkey for one year.

Time Frame: Families are normally able to finalize the adoption in Turkish court in two to three weeks once they complete the one-year probationary period. Obtaining a Turkish passport, a new birth certificate and the U.S. immigrant visa can take an average of 7-10 days after the adoption is finalized.

According to the law, the adoption procedure must be completed within certain periods of time. It can be completed on time when ISS, the General Directorate of Social Service & Child Protection Agency and the prospective family work in coordination.

Adoption Agencies and Attorneys: For adoptions through the governmental orphanages, International Social Services (ISS) submits the adoption paperwork to the Turkish Government on behalf of the adopting parents. For private adoptions, the paperwork is submitted by an attorney directly to the court. There are no private adoption agencies or non-governmental organizations handling adoption cases.

Adopting parents are not required to have a legal representative to process an adoption in Turkey. However, families that do not do so may face some problems with language or have difficulty navigating the Turkish adoption process. The U.S. Embassy in Ankara recommends families consider engaging a translator or an English-speaking attorney. A list of such attorneys is available on the Embassy website at http://ankara.usembassy.gov. This list does not imply an endorsement of specific attorneys.

Adoption Fees: There are no Turkish government fees for adoption. Prospective adoptive families can expect to pay notary public ($20-$50 per document depending on the subject), translations ($10 per page), birth registration ($10 -$20), and the child's Turkish passport of the child ($80-$100).

Adoption Procedures: There are three categories of children who are eligible for adoption: children who are abandoned by their families immediately after their birth, children who are abandoned to the orphanage by their families, children whose parents are considered homeless. When prospective adoptive parents choose to register with one of these categories, they must wait until a suitable child in that category becomes available. They cannot be considered for more than one category. This may cause further procedural delays.

Orphanages are state controlled and follow comprehensive guidelines concerning placement of children. Private adoptions occur when an individual or couple finds a child and adopts him/her directly with the consent of the child's birth parent(s) or legal guardian(s).

State Agency Adoption: Foreign nationals who have permits to reside in Turkey for more than one year and Turkish-American families residing outside of Turkey can submit their applications directly to the General Directorate of Social Service & Child Protection Agency. Foreign nationals not resident in Turkey should submit their applications to the authorized institutions in their respective countries. Turkish families are given preference in adoption of children between the ages of 0 and 6. The Child Protection Agency requires that at least one of the adoptive parents be a Turkish citizen to adopt an orphan over the age of three. Foreign nationals can generally only adopt children who cannot be placed with Turkish families or who have special needs. International Social Services (ISS) prepares adoption files where the foreign prospective adoptive parents reside. Social workers at prospective adoptive parents' country observe and interview families, who then prepare a report approving the family for intercountry adoption. ISS forwards the original report with a translation, along with the financial documentation, medical records and police clearance records to the General Directorate of the Social Services & Child Protection Agency.

Once the administrative process (which can take several months) is completed, the family is contacted and invited to Turkey to meet children eligible for intercountry adoption. During the meeting the family may meet one or multiple available children. Should the family decide on a child, the legal adoption procedure begins with a one-year care contract signed between the prospective adoptive parents and the Director of Social Services & Child Protection in the city where the child resides. The one-year contract makes the prospective adoptive parents responsible for the child's welfare, education and medical care for the pre-adoption year. The Care Contract does permit the prospective adoptive parents to remove the child from Turkey of the child's legal guardian consents, the Turkish adoption authority are aware, and the prospective adoptive parents commit to not finalizing and adoption of the child while outside Turkey. At the end of the one-year period, adopting parents and the child are required to return to court so a Turkish judge can finalize the adoption. Once the judge approves the adoption, the child is then registered as the son/daughter of the adoptive family and has the same legal status as a biological child. Turkish-American dual nationals are able to adopt children with or without medical problems Turkish-American dual nationals submit an application directly to the General Directorate of the Social Services & Child Protection Agency. Please see the *Intercountry Adoption* section of this book for more details and review current reports online at http://adoption.state.gov.

Private Adoption: If an individual or family locates an orphan through private sources (not through an orphanage) and meets the requirements of the Turkish Civil Code for adoption, the adoption may proceed. Because this is an adoption agreement directly between the biological and adopting parents, no government care contract is signed. Turkish law still requires the adopting parents to care for the child for one year prior to finalizing the adoption. The one-year period is enforced when the court gives temporary physical custody to the adopting parents but orders them to return after a year to finalize the adoption. Please keep in mind, directed adoptions in which a child with two living birth parents is relinquished directly to U.S. prospective adoptive parents may disqualify a child from receiving a U.S. immigrant visa.

Required Documents: Non-Turks who have permits to reside in Turkey for more than one year and the Turkish families who are residing outside Turkey can submit their applications directly to the General Directorate of Social Service & Child Protection Agency. Foreign nationals should submit their applications to the authorized institutions (ISS or U.S. equivalent) in their home country. Turkish nationals should contact the General Directorate of Social Service & Child Protection Agency in writing or in person. The agency sends a statement and a form for the prospective adoptive parents to complete. Prospective adoptive parents may also be required to provide more documentation during the procedure (e.g. marriage certificate, birth record, financial documents, police clearance documents, health records).

All documents not in English must be accompanied by certified Turkish translations. The translation must include a statement signed by the translator that states that the translation is accurate.

Embassy of the Republic of Turkey
2525 Massachusetts Ave. NW
Washington, DC 20008
Telephone: (202) 612-6700
Fax: (202) 612-6744
E-mail: contact@turkishembassy.org
http://www.turkishembassy.org/index.php

Turkey also has Consulates General in Chicago, Houston, Los Angeles, and New York.

U.S. Immigration Requirements: Prospective adoptive parents are strongly encouraged to consult USCIS publication M-249, *The Immigration of Adopted and Prospective Adoptive Children*, as well as the Department of State publication, *Intercountry Adoptions*. Please see the *Intercountry Adoption* section of this book for more details and review current reports online at http://adoption.state.gov.

Additional Information: Specific questions about intercountry adoption in Turkey may be addressed to the U.S. Embassy in Ankara. General questions regarding intercountry adoption may be addressed to the Office of Children's Issues, U.S. Department of State, CA/OCS/CI, SA-29, 4th Floor, 2201 C Street, NW, Washington, D.C. 20520-4818, toll-free Tel: 1-888-407-4747.

TURKMENISTAN

Compiled from the November 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Turkmenistan

PROFILE

Geography

Area: 488,100 sq. km. (303,292 sq. mi.).
Cities: Capital—Ashgabat. Other cities—Turkmenabat (formerly Chardjou/Charjew), Dashoguz (formerly Dashowuz), Mary, Turkmenbashi (formerly Krasnovodsk).
Terrain: 80% covered in subtropical, sandy Karakum Desert, with dunes rising to the Kopet Dag Mountains in the south along the border with Iran; borders the Caspian Sea to the west and the Amu Darya River and Uzbekistan to the east; borders Afghanistan to the southeast, Kazakhstan to the north.
Climate: Subtropical desert.

People

Nationality: Turkmenistani.
Population: (July 2007 est.) 5 million.
Population growth rate: (2007 est.) 1.62%.
Ethnic groups: (2003 est.) Turkmen 85%, Uzbek 5%, Russian 4%, other 6%.
Religions: Muslim 89%, Eastern Orthodox 9%, unknown 2%.
Languages: Turkmen 72%, Russian 12%, Uzbek 9%, other 7%.
Education: (2002 est.) Literacy—98.8%.
Health: (2007 est.) Infant mortality rate—53.49/1,000. Life expectancy—68.3 years.

Government

Type: Republic.
Independence: October 27, 1991 (from the Soviet Union).
Constitution: May 18, 1992.
Government branches: Executive—President. Legislative—Mejlis (Parliament); Halk Maslahaty (People's Council). Judicial—Supreme Court.
Political subdivisions: 5 Welayats (provinces)—Ahal Welayat (Ashgabat), Balkan Welayat (Balkanabat), Dashoguz Welayat (formerly Dashowuz), Lebap Welayat (Turkmenabat, formerly Chardjou/Charjew), Mary Welayat.
Political parties: Democratic Party of Turkmenistan (opposition parties are outlawed).

Economy (2006 est.)

GDP: (PPP—purchasing power parity) $42.84 billion.
GDP per capita: (PPP) $8,500.
GDP real growth rate: (IMF estimate) 6%. Note: official government statistics show 21.4% growth, but these estimates are unreliable.
Inflation rate: 11%.
Agriculture: Products—cotton, grain, livestock.
Industry: Types—natural gas, oil, petroleum products, textiles, food processing.
Trade: Exports ($5.4 billion)—gas 50%, oil and oil products 32%, cotton 2%. Partners—Russia, Iran, Italy, Turkey. Imports ($3.9 billion)—manufactured goods 65%, consumer goods 34%. Partners—Turkey, Russia, Ukraine, U.A.E., China, United States.
Debt, external: unknown.

PEOPLE AND HISTORY

The majority of Turkmenistan's citizens are ethnic Turkmen; other ethnic groups include Russian, Uzbek, and Kazakh. Turkmen is the official language of Turkmenistan, though Russian still is widely spoken as a "language of inter-ethnic communication" (per the 1992 constitution). Education is universal and mandatory through the secondary level, the total duration of which is 10 years.

The territory of Turkmenistan has been populated since ancient times, as armies from one empire to another decamped on their way to more prosperous territories. Tribes of horse-breeding Turkmen drifted into the territory of Turkmenistan, possibly from the Altay Mountains, and grazed along the outskirts of the Kar-

akum Desert into Persia, Syria, and Anatolia. Alexander the Great conquered the territory in the 4th century B.C. on his way to India. One hundred fifty years later the Parthian Kingdom took control of Turkmenistan, establishing its capital in Nisa, an area now located in the suburbs of the modern-day capital of Ashgabat. In the 7th century A.D. Arabs conquered this region, bringing with them the Islamic religion and incorporating the Turkmen into Middle Eastern culture. It was around this time that the famous "Silk Road" was established as a major trading route between Asia and Europe.

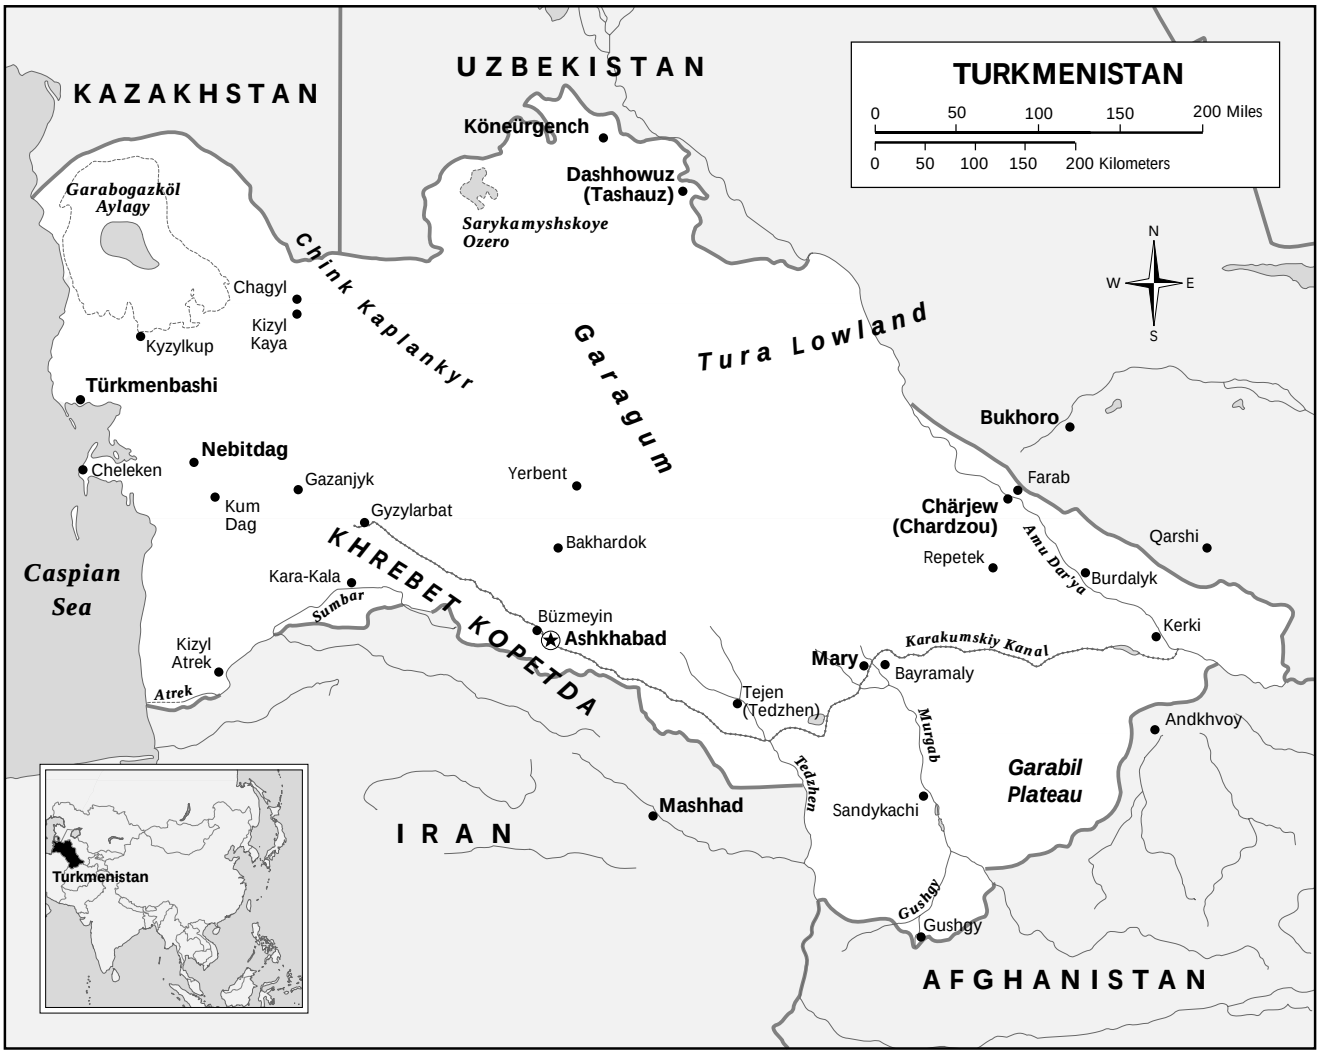
In the middle of the 11th century, the powerful Turks of the Seljuk Empire concentrated their strength in the territory of Turkmenistan in an attempt to expand into Afghanistan. The empire broke down in the second half of the 12th century, and the Turkmen lost their independence when Genghis Khan took control of the eastern Caspian Sea region on his march west. For the next seven centuries, the Turkmen people lived under various empires and fought constant intertribal wars.

From the 16th century on, Turkmen raiders on horseback preyed on passing caravans, pillaging and taking prisoners for the slave trade. In order to consolidate the Tsarist Empire in Central Asia, and upon the pretext of freeing Russian citizens from slavery, Russia sent forces to Turkmenistan, and in 1881 fighting climaxed with the massacre of 7,000 Turkmen at the desert fortress of Gokdepe, near modern Ashgabat; another 8,000 were killed trying to flee across the desert. By 1894 imperial Russia had taken control of Turkmenistan. The October Revolution of 1917 in Russia and subsequent political unrest led to the declaration of the Turkmen Republic as one of the 15 republics of the Soviet Union in 1924. At this time the modern borders of Turkmenistan were formed.

The Turkmen Republic was under full control of Moscow, which exploited its raw material resources for the purposes of the Soviet Union. Sovereignty was only a formality since Russia ultimately ruled all Soviet states. Following the end of the Cold War and the breakup of the Soviet Union, Turkmenistan declared its independence on October 27, 1991. Saparmyrat Niyazov became the first president of the new republic and remained the supreme decision-maker, "president for life," until his death in 2006.

GOVERNMENT AND POLITICAL CONDITIONS

Although the constitution declares the country to be a secular democracy and presidential republic, Turkmenistan is an authoritarian state that was dominated by its first president, Saparmyrat Niyazov, who retained his monopoly on political power until his death on December 21, 2006. The Halk Maslahaty (People's Council) decided on December 26 to select Niyazov's successor through public elections on February 11, 2007. Gurbanguly Berdimuhamedov became president through a public election in which the population eagerly participated, even though the election did not meet international standards.



Government efforts continue to focus on fostering centralized state control. The president controls the parliament and the judiciary. The civilian authorities maintain effective control of the security forces. Neither independent political activity nor opposition candidates are allowed in Turkmenistan. The Democratic Party of Turkmenistan (DPT) is the only legal political party. Political gatherings are illegal unless government-sanctioned, and the citizens of Turkmenistan do not have the means to change their government democratically.

On November 25, 2002, an armed attack against then-President Niyazov's motorcade occurred, and the Government of Turkmenistan moved quickly against perceived sources of opposition. There were widespread reports of human rights abuses committed by officials investigating the attack, including torture and punishment of families of the accused. The Government of Turkmenistan denied the charges, but refused to allow independent observers at trials, to accept a mandatory Organization for Security and Cooperation in Europe (OSCE) fact-finding mission, or to permit the International Committee of the Red Cross (ICRC) access to prisons. It also instituted new measures to stifle dissent and limit contact with the outside world.

While the constitution provides for freedom of the press, there is virtually no freedom of the press or of association. The government has full control of all media and restricts foreign publications. International satellite TV is available.

The population is 89% Sunni Muslim. The constitution provides for freedom of religion and does not establish a state religion; however, in practice, the government continues to monitor all forms of religious expression. Amendments to the law on religious organizations adopted in March 2004 reduced membership requirements from 500 to 5 for registration purposes. All groups must register in order to gain legal status with the government. Until 2004 the only religions that were registered successfully were Sunni Islam and Russian Orthodox Christianity. By January 2006, nine minority religious groups had registered. The government limits the activities of unregistered religious congregations by prohibiting them from gathering publicly, proselytizing, and disseminating religious materials.

The government has started to review and rewrite its legislation with the stated goal of meeting international standards, including the criminal and criminal procedures codes and laws on religion and assembly. In late September 2008, a revised national constitution was adopted. It included provisions for a strengthened and enlarged Mejlis (parliament), eliminated many of former President Niyazov's arbitrary addenda, and contained some rights-related textual changes the interna-

tional community had suggested. Most notably, it eliminated the Halk Maslahaty (Peoples Council), an oversized, bureaucratic, and largely rubber-stamp body whose powers have largely been transferred to the Mejlis.

A legacy of a Soviet-style command economy greatly limits equality of opportunity. Industry is almost entirely dominated by government or government-owned entities. Services are now largely in the private sector. Agriculture is dominated by a state order system, mainly for wheat and cotton, although about 50% of food production is in private hands.

Women face discrimination, and their freedom is further restricted due to traditional socio-religious norms. All citizens are required to carry internal passports, noting place of residence. President Niyazov introduced a new migration law in late 2005 that suggested a reimposition of exit restrictions on Turkmen citizens. As of August 2006, the law was not fully implemented and its effect remained unclear. In July 2007, the government rescinded the requirement for citizens to acquire visas for travel to border areas.

Corruption is pervasive. Power is concentrated in the president. The judiciary is subservient to the president, with all judges appointed for 5-year terms by the president without legislative review.

Principal Government Officials

Last Updated: 11/12/08

According to the Turkmen Constitution, the president serves as de facto chairman of the Cabinet of Ministers.

Pres.: **Gurbanguly BERDIMUHAMEDOW**
Dep. Chmn. of the Cabinet of Ministers for Agriculture & Water Resources: **Myratgeldi AKMAMMEDOW**
Dep. Chmn. of the Cabinet of Ministers for Construction: **Deryageldi ORAZOW**
Dep. Chmn. of the Cabinet of Ministers for Economy & Finance: **Hojamyrat GELDIMYRADOW**
Dep. Chmn. of the Cabinet of Ministers for Education, Health, Science, Religious Affairs, & Tourism: **Hydyr SAPARLYYEW**

Dep. Chmn. of the Cabinet of Ministers for Energy & Industry: **Nazarguly SAGULYYEW**
Dep. Chmn. of the Cabinet of Ministers for Intl. Relations: **Rasit MEREDOW**
Dep. Chmn. of the Cabinet of Ministers for Media & Culture: **Maysa YAZMUHAMMEDOWA**
Dep. Chmn. of the Cabinet of Ministers for Oil & Gas: **Tacberdi TAGYYEW**
Dep. Chmn. of the Cabinet of Ministers for Trade, Commerce, Textiles, & Customs: **Hojamuhammet MUHAMMEDOW**
Dep. Chmn. of the Cabinet of Ministers for Transport & Communication (Acting): **Nazarguly SAGULYYEW**
Min. of Agriculture: **Esenmyrat ORAZGELDIYEW**
Min. of Communication: **Resulberdi HOJAGURBANOW**
Min. of Construction: **Samuhammet DURDYLYYEW**
Min. of Construction Materials: **Yazmirat HOMMADOW**
Min. of Culture & TV & Radio of Turkmenistan: **Gulmyrat MYRADOW**
Min. of Defense: **Agageldi MAMMETGELDIYEW**
Min. of Economics & Development: **Basimmyrat HOJAMAMMEDOW**
Min. of Education: **Muhammetgeldi ANNAAMANOW**
Min. of Energy & Industry: **Gurbannur ANNAWELIYEW**
Min. of Environmental Protection: **Magtymguly AKMYRADOW**
Min. of Finance: **Annamuhammet GOCYYEW**
Min. of Foreign Affairs: **Rasit MEREDOW**
Min. of Health & Medical Industry: **Ata SERDAROW**
Min. of Industry & Construction Materials: **Jumadurdy KAKALYYEW**
Min. of Internal Affairs: **Orazgeldi AMANMYRADOW**
Min. of Justice: **Myrat GARRYYEW**
Min. of National Security: **Carymyrat AMANOW**
Min. of Oil & Gas Industry & Mineral Resources (Acting): **Bayramgeldi NEDIROW**
Min. of Railways: **Orazberdi HUDAYBERDIYEW**
Min. of Textile Industry: **Hojamyrat METEKOW**
Min. of Trade & Foreign Economic Relations: **Nokerguly ATAGULYEW**
Min. of Transport: **Gurbanmyrat HANGULYYEW**
Min. of Water Resources: **Annageldi YAZMYRADOW**
Min. of Welfare & Social Protection: **Gurbandurdy KAKALYYEW**
Head, State Concern for Turkmen Roads: **Asyr SARYBAYEW**
Prosecutor Gen.: **Cary HOJAMYRADOW**
Chmn., Central Bank: **Guwancmyrat GEKLENOW**
Ambassador to the US: **Meret ORAZOW**
Permanent Representative to the UN, New York: **Aksoltan ATAYEWA**

Turkmenistan maintains an embassy at 2207 Massachusetts Avenue NW, Washington, DC 20008; tel: (202) 588-1500, fax: (202) 588-0697, web site: http://www.turkmenistanembassy.org.

ECONOMY

Turkmenistan is an important supplier of raw materials, especially natural gas, petrochemicals and raw cotton. With the 2007 harvest of 920,000 tons, Turkmenistan is the second-largest cotton producer in the former Soviet Union after Uzbekistan. However, the crop yield has been steadily declining since independence because of poor irrigation and management practices.

While outside estimates place Turkmenistan's proven natural gas reserves among those of the top 15 of gas-producing countries, Turkmenistan's claims place its reserves at far higher than outside sources consider credible. In January 2005 Turkmenistan claimed its current recoverable gas resources to be as much as 20.42 trillion cubic meters (tcm), but controversy surrounding the as yet unreleased certified audit results of Turkmenistan's single largest field, Dovletabad, casts doubts on the verifiability of Turkmenistan's claims for its total reserves. To increase transparency, the president ordered that a new audit be carried out by a respected international firm, and that audit reportedly is starting with Turkmenistan's newest field in South Yoloten.

Despite its non-transparency about gas reserves, Turkmenistan remains the second-largest gas producer in the former Soviet Union after Russia. Production figures have been consistently climbing since 1998 when Turkmenistan was virtually cut off from all outside markets by Russia. Turkmenistan's 2007 output was an estimated 72 billion cubic meters (bcm); the bulk of which (50 bcm) went to Russia.

Turkmenistan relies almost exclusively on Russia for its energy export routes because most of the pipeline network is laid on Russian territory. Turkmenistan currently holds a contract with Gazprom to supply annually 50 bcm. In the first half of 2008, Turkmenistan received $130 per 1,000 cubic meters from Gazprom; that figure increased to $150 per 1,000 cubic meters on July 1. China has exploration and production rights on the right bank of the Amu Darya river in the east. Turkmenistan has contracted to provide China 30 bcm per year, beginning in 2010 when a new pipeline is due to be completed. Turkmenistan also exports to Iran about 8 bcm a year.

Turkmenistan's 2007 oil production increased by almost a million tons to 9.8 million tons. Among other major exports are liquefied natural gas (LNG) and polypropylene.

Turkmenistan has taken a cautious approach to economic reform, hoping to use gas sales to sustain inefficiencies in its economy. The private sector remains insignificant, with a substantial private share only in food processing, consumer trade and services. Despite the increased inflow of gas revenue, prospects in the near future are uncertain. Turkmenistan's statistics are closely held state secrets, and published GDP and other figures are subject to wide margins of error. Turkmenistan's unrealistic goal of "self-sufficiency" also artificially sustains the cultivation of inefficient crops, such as wheat and cotton. The 2006 UN Development Program (UNDP) Human Development Report places Turkmenistan in the category of "medium human development" although the unemployment and underemployment rates may be as high as 70%. Turkmenistan has cooperated with the international community to transport humanitarian aid to Afghanistan.

FOREIGN RELATIONS

Turkmenistan's declaration of "permanent neutrality" was formally recognized by the United Nations in 1995. Although the Government of Turkmenistan has favored high-profile purchases from the United States like Boeing aircraft, it has significant commercial relationships with Turkey, Russia, and Iran, and increasingly with China. The government worked closely with the Taliban regime in Afghanistan until September 11, 2001, and until that time had a growing cross-border trade with the regime in Afghanistan.

The five states of Central Asia wrestle with sharing limited water resources and environmental degradation caused by the shrinking of the Aral Sea. Multilaterally accepted Caspian Sea seabed and maritime boundaries have not yet been established. Up to now, Iran has insisted on dividing the Caspian Sea into five equal sectors while Azerbaijan, Kazakhstan, and Russia have generally agreed upon equidistant seabed boundaries. Turkmenistan is negotiating bilateral delimitation with Azerbaijan.

U.S.-TURKMENISTAN RELATIONS

For several years, Turkmenistan was a key player in the U.S. Caspian Basin Energy Initiative, which sought to facilitate negotiations between commercial partners and the Governments of Turkmenistan, Georgia, Azerbaijan, and Turkey to build a pipeline under the Caspian Sea and export Turkmen gas to the Turkish domestic energy market and beyond—the so-called Trans-Caspian Gas Pipeline (TCGP). However, the Government of Turkmenistan essentially removed itself from the negotiations in 2000 by refusing all offers by its commercial partners and making unrealistic demands for billion-dollar "pre-financing." Following a tripartite summit with the presidents of Russia and Kazakhstan in May 2007 in which gas was a major topic, however, President Berdimuhamedov again resurrected the idea of a Trans-Caspian gas pipeline, explicitly refusing to rule out the possibility of constructing such a pipeline in the future.

The United States and Turkmenistan agreed in February 2007 to "turn a new page" in the bilateral relationship and find ways to cooperate on political and human rights reform, economic and agricultural reform, education and health care, energy, and security.

U.S. criticism of the Government of Turkmenistan's crackdown against perceived sources of political opposition after the November 2002 motorcade attack led to a marked downturn in bilateral relations between the Governments of the United States and Turkmenistan. However, currently the Government of Turkmenistan is interested in engaging with the United States in several areas, including security and energy issues. In order to secure and maintain this engagement, the government has been willing to take some small steps forward in democratic reform, such as lifting exit visas and allowing the registration of some religious minorities. Its human rights record, however, remains poor. Diplomatic missions from various countries and international organizations have joined together to persuade the Government of Turkmenistan to improve its human rights practices, but their efforts have not yet led to significant improvements overall.

TRAVEL

Consular Information Sheet

September 2, 2008

Country Description: Turkmenistan is a Central Asian nation roughly the size of California. It shares borders with Kazakhstan, Uzbekistan, Afghanistan, and Iran. Turkmenistan gained its independence in 1991 during the dissolution of the Soviet Union. Primarily a desert country, it has a population of around six million people. Tourist facilities, especially outside of the capital city of Ashgabat, are not highly developed. Many of the goods and services taken for granted in North American and Western European countries are not yet available. Travel within the country can be difficult due to limited infrastructure and government-imposed internal travel restrictions.

Entry Requirements: American citizens must have a valid passport and visa and/or letter of invitation from the Government of Turkmenistan to enter and exit Turkmenistan. To apply for a visa, all U.S. citizens must complete an application and have a letter of invitation approved by the State Migration Service (SMS), formerly known as the State Service for the Registration of Foreigners (SSRF), in Ashgabat. An individual or organization in Turkmenistan must submit the letter of invitation on behalf of an American citizen to the SMS accompanied by a copy of the traveler's passport ID page. Each traveler's passport must be valid for at least 6 months following the date of the application. The SMS requires at least 15 working

days for approval. The U.S. Embassy in Ashgabat does not issue letters of invitation to citizens interested in private travel to Turkmenistan. Applications for a visa can be submitted to the Embassy of Turkmenistan in Washington, D.C., or directly to the SMS in Ashgabat. Under local law, a traveler with a stamped and approved invitation letter may also obtain a visa at the Ashgabat International Airport upon arrival in Turkmenistan; however, some travelers have reported difficulties with airlines not boarding passengers who only have approved invitation letters in lieu of a visa for onward travel to Turkmenistan. Travelers are strongly recommended to obtain a visa before traveling.

The price for the visa will vary according to the intended length of stay. For an additional charge, the SMS can extend a visa in Ashgabat beyond its initial validity. Any traveler arriving without a visa or without the documents necessary to obtain a visa will be denied entry and may be held at the airport or border until the traveler has secured transportation out of Turkmenistan. Based on past incidents, the Embassy discourages travelers from planning to use transit visas in lieu of obtaining tourist visas through a travel agency. The U.S. Embassy in Ashgabat is unable to intervene with Turkmenistani authorities regarding the admission of private travelers to Turkmenistan. Travelers departing Turkmenistan must have a current valid visa or they will be denied exit until they have extended the validity of the visa through their departure date. In addition, U.S. citizens traveling in Turkmenistan should be aware that they need special permission from the SMS to travel to areas of the country that have been restricted by the Government of Turkmenistan, including almost all border areas.

Upon arrival at an airport or border entry point, foreigners will be charged approximately $12 for an immigration card issued by Turkmen authorities. All foreigners are required to carry this immigration card for the duration of their stay in Turkmenistan. Authorities will collect the immigration card upon departure. Those departing Turkmenistan from the Ashgabat airport and flying with a non-Turkmenistani flagged carrier are required to pay a $25 departure fee.

In addition to the immigration requirements mentioned above, foreigners are subject to local registration requirements. Americans who plan to stay more than three working days in Turkmenistan must register with the SMS. SMS offices are located in all of Turkmenistan's five major cities: Ashgabat, Dashoguz, Mary, Turkmenabat and Turkmenbashy. Foreigners who plan to travel outside of the city in which they will register must inform the SMS in advance; otherwise travelers will face fines or deportation. One day prior to their departure from Turkmenistan, foreigners must return to an SMS office to register the departure. Foreigners should be registered and deregistered at the SMS in the city in which their sponsoring organization is located. Foreigners who fail to register their departure may be prevented by immigration authorities from leaving the country until they have done so. The penalties for remaining in Turkmenistan with an expired visa or for failing to register with SMS include fines, arrest, and/or deportation. Foreigners who are deported for these violations may be prohibited from returning to Turkmenistan for up to five years. American citizens in Turkmenistan are strongly urged to ensure that their visas do not expire and that they register with SMS upon arrival and upon departure.

Visitors holding tourist visas organized by a travel agency must stay in hotels; other visitors may stay in private accommodations whose owner must register the visitor's presence. Visit the Embassy of Turkmenistan web site at http://turkmenistanembassy.org for the most current visa information.

Several popular travel guides discuss traveling by "ferry" across the Caspian Sea from Baku, Azerbaijan, to the port of Turkmenbashy in western Turkmenistan. Some travelers have faced problems attempting to travel to Turkmenistan by boat. Travelers should be aware that these "ferries" are in fact cargo ships that take on some passengers incidental to their primary function. Passengers are generally not provided food or water on these ships, and sleeping and sanitary facilities are likely to be rudimentary. Travelers should be aware that ships arriving at the port of Turkmenbashy often wait days offshore for outgoing ships to vacate the dock to allow incoming ships to disembark. Some travelers have spent more than a week offshore while their ship awaited permission to enter the port, and they have run out of stores of food and water, or had their Turkmen visas expire before they could be used. For this and other reasons travelers, especially those who plan to enter Turkmenistan by boat, are discouraged from using transit visas to enter Turkmenistan.

At Ashgabat International Airport, most airlines do not accept payment for tickets by credit card, or in any currency other than US dollars or Turkmen manat. Travelers planning direct transit through Turkmenistan en route to another country should be aware that if they are stranded due to a missed connection, they will not be allowed to leave the arrival detention area until they are able to buy a ticket for an onward flight out of Turkmenistan. For this reason, the Embassy discourages travelers from planning to directly transit through Ashgabat International Airport.

Safety and Security: Those considering travel to Turkmenistan should take the country's proximity to regions of past and current instability into account before making any plans. The Government of Turkmenistan has designated many areas throughout the country as "restricted zones," particularly the border areas next to Iran, Uzbekistan, and Afghanistan, the entire region of Dashoguz (including Dashoguz city), and areas of the Caspian coast. Travel to these areas by foreigners is forbidden without special permission from the Government of Turkmenistan. Turkmenistan Airlines, the national airline, will not sell a ticket to any traveler who intends to travel

to a "restricted zone" without proof of permission from the government. Travelers who wish to visit a "restricted zone" must have a valid passport and visa and must apply to the Ministry of Foreign Affairs for a special permit. There is a minimum processing time of 10 working days for these permits.

Visible police and military presence in Turkmenistan is common. Both uniformed and plainclothes officials frequently ask to see passports, visas, migration cards, and SMS registrations. Travelers should ask to see identification if they are not certain that the person requesting the information is an official. These documentation checks, and residence and vehicle searches, are common. Security personnel maintain checkpoints on major roads.

Security personnel may at times place foreign visitors under surveillance. Hotel rooms, telephones, and fax machines may be monitored, and personal possessions in hotel rooms may be searched. Taking photographs of anything that could be perceived as being of military or security interest, such as government buildings, may result in problems with authorities. Visitors should ask whether buildings may be photographed.

Supporters of extremist groups such as the Islamic Movement of Uzbekistan, Al-Qaeda, and the Eastern Turkistan Islamic Movement remain active in Central Asia. These groups have expressed anti-U.S. sentiments and may attempt to target U.S. Government or private interests in the region, including in Turkmenistan. Terrorists do not distinguish between official and civilian targets. Because of increased security at official U.S. facilities, terrorists are seeking softer civilian targets such as residential areas, clubs, restaurants, places of worship, hotels, schools, outdoor recreation events, resorts, beaches, maritime facilities, and commercial aircraft.

For the latest security information, Americans traveling abroad should regularly monitor the Department of State, Bureau of Consular Affair's Internet site at http://travel.state.gov, where the current Travel Warnings and Travel Alerts, including the Worldwide Caution Travel Alert, can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S. and Canada, or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: Although the government's official policy is to report that there is no violent crime, there are incidents of assault, rape, and murder sometimes directed at foreigners. Prostitution, heroin use, and economic conditions are all factors contributing to the incidence of violent crimes. Petty theft is common in crowded public places such as the local bazaars. Visitors should take appropriate measures to safeguard their passports and valuables in such areas. Also, visitors should not leave their valuables in plain view within a parked vehicle. Several recent cases suggest that there has been an increase in theft from parked vehicles.

Foreign visitors, including American citizens, present an attractive target for criminals. Travelers should exercise the same common sense, good judgment, and caution as they would in any major U.S. city. For instance, one should avoid carrying large sums of money in public. Travelers should avoid walking alone after dark, and women specifically should avoid being alone in isolated areas. Most taxis are not regulated by any government licensing agency and drivers are usually private citizens looking to make money. The majority of cars will not have seat belts or other safety devices, and drivers may not have had any formal driver training. For safety reasons, visitors should strongly consider hiring a private car and driver through their travel agency or hotel. There is one government-owned and regulated taxi company, operating in Ashgabat, which charges a flat fee of 30,000 Turkmen Manat (about $2 at the July 2008 exchange rate) for a one-way trip within Ashgabat city limits. Its telephone number is: (993 12) 32-97-75. If using local unregulated taxis, passengers should always negotiate fares with taxi drivers in advance, and extreme caution should be used when using taxis after dark, especially when there are other passengers in the vehicle.

Prostitution is illegal, and prostitutes have been known to accompany men to their residences or hotel rooms in order to steal from them, sometimes with the help of an accomplice. The authorities will generally consider any woman leaving a discotheque with a foreign man late at night to be a prostitute, and on that basis, the foreigner may be detained. In recent years, at least one foreigner was kept in jail for fifteen days on charges of soliciting prostitution. Travelers should be aware that U.S. law provides for criminal prosecution in U.S. federal courts of American citizens who have solicited a prostitute under the age of 18 while traveling abroad.

Police can ask anyone to present identity papers at any time, but authorities are especially aggressive late at night. Even if valid papers are presented, the police may ask for a bribe. For this reason, those going from place to place late at night should consider using a trusted driver.

In many countries around the world, counterfeit and pirated goods are widely available. Transactions involving such products may be illegal under local law. In addition, bringing these products back to the United States may result in forfeitures and/or fines. More information on this serious problem is available at http://www.cybercrime.gov.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, contact family members or friends and explain how funds

could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

The local equivalent to the "911" emergency line in Turkmenistan is: 03.

Medical Facilities and Health Information: Medical care in Turkmenistan is limited and well below North American and Western European standards. All visitors are strongly advised to purchase medical evacuation insurance to cover costs associated with transporting them to adequate medical facilities in the event of serious illness or injury. Such travel can be expensive if undertaken under emergency conditions, and absent this insurance, medical evacuation travel may be logistically impossible on an emergency basis. Travelers with medical conditions should consult their regular physician to determine whether travel to Turkmenistan is advisable in light of the level of available health care. Resident American citizens travel to Western Europe or North America for treatment of any serious medical condition. The U.S. Embassy maintains a list of public hospitals and English-speaking physicians in the country, however the standard of care at these hospitals cannot be considered comparable to Western standards. Basic medical supplies, including disposable needles, anesthetics, and antibiotics are often in short supply. Two private clinics have foreign medical practitioners (generally Turkish) who may be available for consultations and treatment; these clinics, however, have refused in some cases to admit patients with serious conditions, regardless of the patient's ability to pay for treatment. Even at these hospitals, the standard of care is low compared to Western standards. Travelers requiring prescription medications should bring sufficient supplies of all necessary medications and appropriate documentation to ensure no problems with customs officials upon arrival.

Some HIV/AIDS entry restrictions exist for visitors to and foreign residents of Turkmenistan. Currently, HIV tests are not required for applicants requesting tourist visas, however, should an individual be discovered to be HIV positive, that status would be grounds for denial of a visa or deportation. All individuals requesting residence visas are required to submit to an HIV test. Please verify this information with the Embassy of Turkmenistan at http://www.turkmenistanembassy.org before you travel.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's Internet site at http://wwwn.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation. Please see our information on medical insurance overseas. All travelers are strongly encouraged to obtain medical evacuation insurance, in light of the substandard health care available in Turkmenistan. Information on companies that provide medical evacuation insurance for Turkmenistan is available on the U.S. Embassy website at http://turkmenistan.usembassy.gov.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Turkmenistan is provided for general reference only, and may not be totally accurate in a particular location or circumstance. Road conditions in Turkmenistan make driving difficult and sometimes dangerous. Most roads outside of major cities are narrow, riddled with potholes, unlit at night, and without proper road signs. Driving at night on these roads should be avoided. City roads are better in comparison to rural routes but may be hazardous due to potholes, uncovered manholes, poor lighting, and heavy pedestrian traffic. Pedestrians frequently cross against traffic and create dangerous conditions. Traffic accidents involving serious injury to drivers, passengers, and pedestrians are common.

In general, visitors should use caution when driving in Turkmenistan. Drivers pay little attention to lanes and other road markings, with weaving and sudden lane changes a common occurrence (usually without use of a turn signal). Drivers will often encounter cars going the wrong way on one-way streets or divided highways. Cars also frequently make left-turns from the right lane and vice-versa. Pedestrians regularly walk or stand in the middle of busy streets during the day and night, often without paying attention to oncoming traffic.

Roadside assistance does not exist in Turkmenistan, where vast stretches of highway are often unmarked. Police checkpoints (where cars are required to stop and register) are a common feature on major routes between cities. The U.S. Embassy in Ashgabat has received reports that police stationed at checkpoints may arbitrarily fine motorists. Local law requires that traffic fines be paid within 12 hours. If a fine is not paid within that period, the amount may double every 12 hours up to 72 hours, after which time the vehicle in question may be seized.

Travelers who wish to drive in Turkmenistan must have a valid international driving permit. Foreigners who plan to reside in Turkmenistan must apply for a local driver's license with the Road Police Department of the Ministry of Internal Affairs of Turkmenistan. American citizens who

want more specific information about driving in Turkmenistan should contact the Embassy of Turkmenistan at 2207 Massachusetts Ave. NW, Washington DC 20008, telephone (202) 588-1500.

For specific information concerning Turkmenistan driving permits, vehicle inspection, road tax and mandatory insurance, contact the Turkmenistan National Tourist Organization offices at its Permanent Mission in New York. The address is: 136 East 67th Street, NY, NY 10021. The phone number is 1-212-472-5921.

Aviation Safety Oversight: As there is no direct commercial air service between the United States and Turkmenistan, the U.S. Federal Aviation Administration (FAA) has not assessed Turkmenistan's Civil Aviation Authority for compliance with International Civil Aviation Organization (ICAO) aviation safety standards. For more information, travelers may visit the FAA's Internet web site at http://www.faa.gov.

Travelers may experience significant delays, unexpected re-routing, and sudden cancellations of flights, including those of Turkmenistan Airlines (Turkmenhowayollary), the national airline. Travelers have reported difficulties securing reservations and purchasing tickets from Turkmenistan Airlines on both domestic and international flights, which are routinely overbooked.

Special Circumstances: Turkmenistan has a cash-only economy. However, several new hotels accept credit cards. Vnesheconombank and the National Bank of Pakistan cash traveler's checks and personal checks for a fee, although cashing a personal check is a lengthy process that could require up to two months. Vnesheconombank also accepts Visa for cash advances, for a fee.

Although the manat is the official currency, U.S. dollars are widely accepted and are required as payment for certain goods and services. Travelers may wish to bring sufficient U.S. currency to exchange into manat to cover expenses not payable in U.S. Dollars. Old U.S. dollar bills (issued before 1990) and/or those in poor condition (with tears, writing or stamps) are not acceptable forms of currency in Turkmenistan. Banks frequently do not have small bills for change.

In 2008, the government of Turkmenistan, unified its dual currency exchange rate by bringing the commercial and governmental exchange rates together. This change occurred incrementally, contributing to wild currency speculation by average citizens, many of whom keep their savings in U.S. dollars in their homes, rather than in bank accounts. As a result, the banks, at times, have imposed limits on the amount of currency that could be exchanged by an individual on a particular day. Travelers should check with their travel agencies to discuss options for currency exchange if a limitation should happen during their visit to Turkmenistan.

Turkmenistan customs authorities may enforce strict regulations concerning temporary importation into or export from Turkmenistan of items such as carpets, jewelry, musical instruments, pieces of art, archaeological artifacts, antiques, protected animals, etc. It is advisable to contact the Embassy of Turkmenistan in Washington for specific information regarding customs requirements. Travelers who wish to take carpets out of Turkmenistan must obtain a certificate from the Carpet Museum in central Ashgabat indicating that the carpet is not of historical value. Some private shops may have carpets for sale for which they have already obtained certificates; buyers should be sure to ask about customs certificates before purchasing any carpet. In addition, buyers may have to pay a tax calculated according to the size of the carpet. Travelers who have purchased other items that could be perceived to be of historical value, such as jewelry, have also reported difficulties in taking these items out of Turkmenistan. Turkmenistan's indigenous dog, the Alabay, is considered a national treasure and is banned for export without prior permission. American citizens should also check to ensure that any item they intend to bring into the United States is permitted by U.S. customs regulations.

U.S. citizens are encouraged to carry a copy of their U.S. passports and visas with them at all times, so that, if questioned by local officials, proof of identity and U.S. citizenship, are readily available.

Travelers to Turkmenistan should be aware that there are several types of poisonous snakes and insects indigenous to the country. Even in cities, it is common to encounter cobras and scorpions, especially in areas covered with tall grass. Travelers are advised to be alert to these dangers to avoid being bitten or stung.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating Turkmenistani laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Turkmenistan are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Disaster Preparedness: Turkmenistan is an earthquake-prone country. Building practices within Turkmenistan do not generally meet U.S. seismic standards. In addition, local authorities do not have sufficient resources to respond to a large-scale disaster. General information about natural disaster preparedness is available via the Internet from the U.S. Federal Emergency Management Agency (FEMA) at http://www.fema.gov.

Children's Issues: For information on intercountry adoption of children

and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in Turkmenistan are encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration web site so that they can obtain updated information on travel and security within Turkmenistan. Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate.

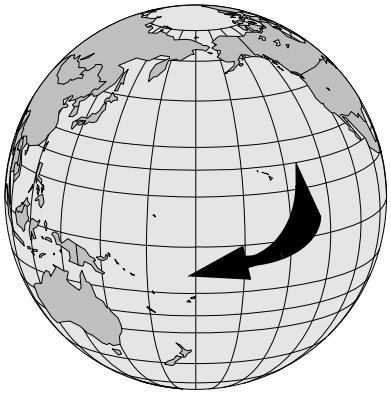
By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency. The U.S. Embassy is located at 9 1984 (Pushkin Street), off Magtymguly Street, tel. (993-12) 35-00-45; fax (993-12) 39-26-14. The Consular Section can also be contacted by e-mail at: consularashgab@state.gov.

The embassy's Internet address is http://turkmenistan.usembassy.gov. The Consular Section is open for American Citizens services every Monday through Friday afternoon, excepting holidays. American Citizens are requested to call for an appointment for services except in cases of emergency.

Intercountry Adoption

January 2008

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.



Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is based on public sources and current understanding. Questions involving foreign and U.S. immigration laws and legal interpretation should be addressed respectively to qualified foreign or U.S. legal counsel.

Please Note: Recent U.S. immigrant visa statistics indicate that only one immigrant visa has been issued to a Turkmenistan orphan in the last five fiscal years. The U.S. Embassy in Ashgabat continues to seek clarification from the government of Turkmenistan regarding the legal procedures for intercountry adoption. This flyer will be updates as new information becomes available.

U.S. Immigration Requirements: Prospective adoptive parents are strongly encouraged to consult USCIS publication M-249, *The Immigration of Adopted and Prospective Adoptive Children*, as well as the Department of State publication, *Intercountry Adoptions*. Please see the *Intercountry Adoption* section of this book for more details and review current reports online at http://adoption.state.gov.

U.S. Embassy
Ashgabat, Turkmenistan
9 Pushkin Street
Telephone: 993-12 35-00-45,
Fax: 993-12-35-00-49

Additional Information: Specific questions about adoption in Turkmenistan may be addressed to the U.S. Embassy in Turkmenistan. General questions regarding intercountry adoption may be addressed to the Office of Children's Issues, U.S. Department of State, CA/OCS/CI, SA-29, 4th Floor, 2201 C Street, NW, Washington, D.C. 20520-4818, toll-free Tel: 1-888-407-4747.

TUVALU

Compiled from the October 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Tuvalu

PROFILE

Geography

Area: 26 sq. km.
Cities: Capital—Funafuti.
Terrain: Very low lying and narrow coral atolls.
Climate: Tropical; moderated by easterly trade winds (March-November); westerly gales and heavy rain (November-March).

People

Nationality: Noun—Tuvaluan (s); adjective—Tuvaluan.
Population: (2006 est.) 9,652. Age structure (2006 est.)—34.2% under 15; 3.6% over 65.
Growth rate: (2007 est.) 2.5%.
Ethnic groups: Polynesians 96%, Micronesians 4%.
Religions: Church of Tuvalu (Congregationalist) 97%; Seventh-day Adventist 1.4%, Baha'i 1%, other 0.6%.
Languages: Tuvaluan, English, Samoan, Kiribati (on the island of Nui) also spoken.
Education: (2004) Literacy—95%.
Health: (2004) Life expectancy—total 61.5 yrs.; male 61 yrs; female 62. Infant mortality rate (2004)—36/1,000.
Work force: (2004 est.) total 6,000; formal sector 2,400.

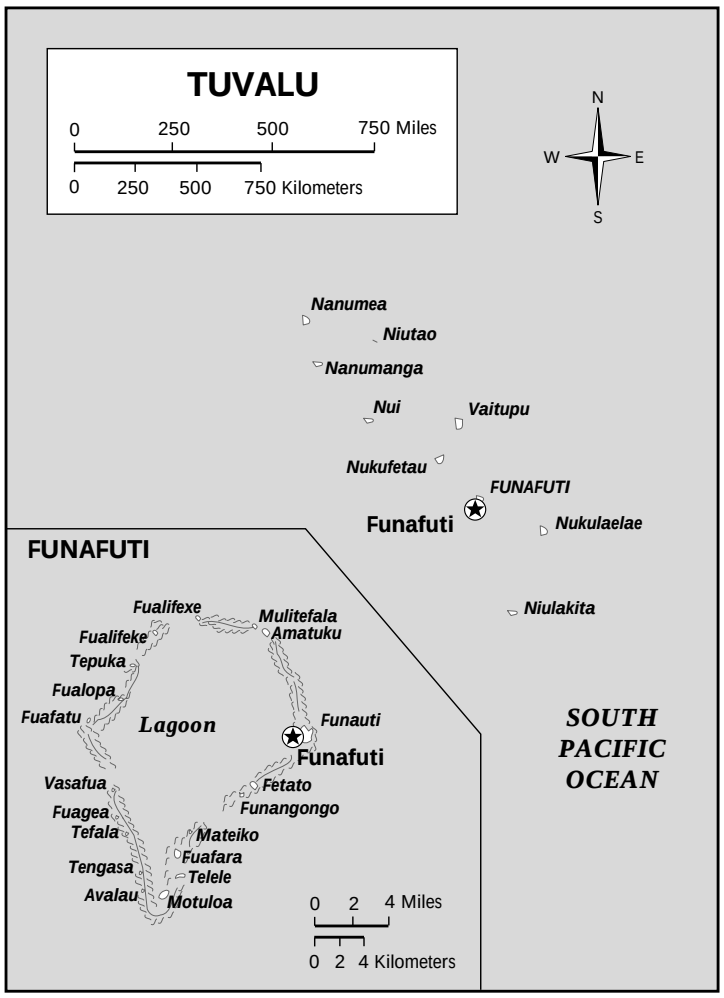
Government

Type: Constitutional monarchy with a parliamentary democracy.
Independence: (from U.K.) October 1, 1978.
Constitution: October 1, 1978.
Government branches: Executive—Governor General is appointed by the British monarch on recommendation of the Prime Minister, who is head of the government. Legislative—unicameral Parliament, also called House of Assembly (15 seats; members elected by popular vote to serve 4-year term). Judicial—High Court with eight Island Courts (with limited jurisdiction). Rulings from High Court can be appealed to the Court of Appeal in Fiji.
Political parties: None.

Economy (all figures in U.S. $)

GDP: (2007 est.) $26.7 million.
GDP per capita: (2007 est.) $2,718.
Industry: Types—fishing, tourism (government and NGO officials on business), copra.
Trade: Exports (2007 est.)—$100,410; stamps, copra, handicrafts. Major markets—Fiji, Australia, New Zealand. Imports (2007 est.)—$15.5 million; prepared foodstuffs, mineral products, machinery, animals and animal products. Major sources—Australia, Fiji, Singapore, New Zealand.
Currency: Australian dollar (A$).

GEOGRAPHY



The Western Pacific nation of Tuvalu, formerly known as the Ellice Islands, is situated 4,000 kilometer (2,486 mi.) northeast of Australia. It is halfway from Hawaii to Australia. Tuvalu consists of four reef islands and five true atolls, with poor soil and a total land area of only about 26 sq. km. (10 sq. mi.). Tuvalu has westerly gales and heavy rain from November to March and tropical temperatures moderated by easterly winds from March-November. The land is very low lying with narrow coral atolls. The highest elevation is five meters above sea level.

PEOPLE

96% of Tuvaluans are ethnic Polynesians, closely related to the people of Samoa and Tonga. The vast majority belong to the Church of Tuvalu, a Protestant denomination. Conversion began in the 1860s with the arrival of a Congregationalist missionary from the Cook Islands.

HISTORY

The Spanish were the first Europeans to see the islands in the 1500s. However, in 1819, Captain De Pey-

ster, an American in command of the British merchant ship Rebecca named the main island in the group Ellice's Island after a British politician who owned the cargo aboard his ship. In 1841, the U.S. Exploring Expedition commanded by Charles Wilkes visited three of Tuvalu's islands and welcomed visitors to his ships. Other early interactions with the outside world were far less benign. In 1863, hundreds of people from the southern islands were kidnapped when they were lured aboard slave ships with promises that they would be taught about Christianity.

Those islanders were forced to work under horrific conditions in the guano mines of Peru. Eventually, the islands came under British influence in the late 19th century. The Ellice Islands were administered by Britain as part of a protectorate (1892-1916) and later as part of the Gilbert and Ellice Islands colony (1916-74). During World War II, several thousand American troops were in the islands. Beginning in October 1942, U.S. forces built airbases on the islands of Funafuti, Nanumea, and Nukufetau. Friendly cooperation was the hallmark of relations between the local people and the troops, mainly U.S. Marines and U.S. Navy SeaBees.

The airstrip in the capital of Funafuti, originally built by the U.S. during the war, is still in use, as is the "American Passage" that was blasted through Nanumea's reef by SeaBees assisted by local divers. In 1974 the Ellice Islanders voted for separate British dependency status as Tuvalu, separating from the Gilbert Islands, which became Kiribati upon independence. Tuvalu became fully independent in 1978 and in 1979 signed a treaty of friendship with the United States, which recognized Tuvalu's possession of four islets formerly claimed by the United States.

GOVERNMENT

Queen Elizabeth II is the head of state, represented by the Governor General, who is appointed by the Queen on advice of the Prime Minister. Members of the Parliament elect the Prime Minister. The Cabinet is appointed by the Governor General on the advice of the Prime Minister. The legislative branch is a unicameral Parliament, also called House of Assembly (15 seats; members elected by popular vote to serve 4-year terms). Tuvalu maintains an independent judiciary consisting of a High Court and eight island courts. The rulings of the High Court can be appealed to the Tuvalu Court of Appeal.

Min. for Labor: **Maatia TOAFA**
Min. for Natural Resources: **Samuelu P. TEO**
Min. for Works & Energy: **Saufatu SOPOANGA**
Permanent Representative to the UN, New York: **Enele Sosene SOPOAGA**

Tuvalu maintains a diplomatic mission in New York at 800 2nd Ave, Suite 400B New York, New York 10017 (tel: 212-490-0534; fax: 212-937-0692).

POLITICAL CONDITIONS

Democratic values in Tuvalu are strong, with free elections every 4 years by universal adult suffrage. There are no formal political parties; election campaigns are largely on the basis of home island/personal/family ties and reputation. Members of Parliament have very close ties to the islands they represent. Often the northern islands in the country compete against the southern islands, with the capital isle of Funafuti holding the balance of power. Traditional chiefs and island councils also still play significant roles in influencing island affairs, particularly on the outer islands. A long-held distinction between chiefs and commoners is slowly disappearing, and chiefs are now more often selected on merit rather than by birth.

Tuvalu has had a number of prime ministers. This in part reflects the pressures affecting the small nation, including the transition from an exchange economy to a money economy, an adopted system of government with only limited regard for Tuvaluan traditions of decision making, and the lack of a clear national path to implement Tuvalu's vision for the future.

After elections in August 2006, Apisai Ielemia, a former opposition member of Parliament, became Prime Minister. He replaced Maatia Toafa, who took power in October 2004 after a vote of no confidence against his predecessor. Apisai Ielemia is the tenth Prime Minister of Tuvalu. He also holds the portfolio of Minister for Foreign Affairs and Labor.

ECONOMY

The economy suffers from Tuvalu's remoteness and lack of natural resources. Virtually the only jobs in the islands that pay a steady wage or salary are with the government, and nearly 70 percent of the formal workforce is employed in the public sector. Subsistence farming and fishing remain the primary economic activities, particularly away from the capital island of Funafuti. There is relatively little disparity between rich and poor in the country.

The Australian dollar (A$) is the currency of Tuvalu. Tuvalu's GDP per capita was about U.S.$2,718 in 2007. Only about one third of the labor force participates in the formal wage economy. The remaining 70% work primarily in rural subsistence and livelihood activities. There is growing youth unemployment and few new jobs are being created. Some 900-1,000 Tuvaluan men are trained, certified and active as seafarers. The Asian Development Bank estimates that, at any one time, about 15 percent of the adult male population works abroad as seafarers. Remittances from seafarers (estimated at U.S. $1.5-3 million per annum) are a major source of income for families in the country, and there is a steady annual uptake of young Tuvaluan men to the Tuvalu Maritime Training Institute.

The Tuvalu Trust Fund (TTF), a prudently managed overseas investment fund, has contributed roughly 11% of the annual government budget each year since 1990. The TTF was created from donations by Australia, New Zealand and the United Kingdom (along with Tuvalu's own contribution) at independence. The TTF has grown from about A$27 million to some A$100 million (est. 2006). Earnings from the TTF provide an important cushion against Tuvalu's volatile income from fishing license fees and royalties from the sale of the dot-TV Internet domain. Initial windfall income from the domain name paid most of the costs of paving the streets of Funafuti and installing street lighting in mid-2002. Sales of national stamps and coins provide another minor source of income for the government. Tuvalu is a safe country of unspoiled natural beauty and friendly people, but remoteness and lack of infrastructure have constricted Tuvalu's ability to develop its tourism potential.

FOREIGN RELATIONS

Tuvalu maintains an independent but generally pro-Western foreign policy. It maintains close relations with Fiji, New Zealand and Australia. It has diplomatic relations with Taiwan, which maintains the only resident embassy in Tuvalu and has a large assistance program in the islands. There is no U.S. embassy in Tuvalu, but U.S. diplomats from the U.S. embassy in Fiji are accredited to Tuvalu and visit there regularly. Tuvalu became a member of United Nations in 2000 and maintains a mission at the UN in New York.

Tuvalu's only other diplomatic office is its High Commission in Suva, Fiji. Tuvalu is an active member of the Pacific Islands Forum and a member of the Asian Development Bank. A major international priority for Tuvalu in the UN and other international fora has been promoting concern about global warming and possible sea level rise. Tuvalu advocates ratification and implementation of the Kyoto Protocol.

TRAVEL

Consular Information Sheet

December 17, 2008

Country Description: Tuvalu is a South Pacific island nation consisting of four reef islands and five atolls. A self-governing member of the British Commonwealth, Tuvalu has a parliamentary system of government.

Entry Requirements: A passport, onward/return ticket, and proof of sufficient funds for the stay in Tuvalu are required. Visitor permits valid for up to three months are issued upon arrival. For further information about entry requirements, travelers may wish to contact the Tuvalu Permanent Mission to the United Nations in New York, Suite 400 B, 800 2nd Avenue, NY 10017, tel.: (212) 490-0534, fax: (212) 808-4975. This is particularly true for those persons planning to enter by sea.

Safety and Security: Americans in Tuvalu requiring immediate emergency assistance should call the 24-hour police command center in Tuvalu at (688) 20726.

For the latest security information, Americans traveling abroad should regularly monitor the Department's web site, where the current Worldwide Caution Travel Alert, Travel Warnings and other Travel Alerts can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S. and Canada, or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: Tuvalu has a low crime rate. However, visitors should not be complacent regarding personal safety or the protection of valuables.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, contact family members or friends and explain how funds may be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

Medical Facilities and Health Information: Medical and dental care is very limited in Tuvalu, including in the capital, Funafuti. Serious medical problems are referred to Guam or Hawaii. Serious medical conditions requiring hospitalization and/or medical evacuation to the United States can cost thousands of dollars. Doctors and hospitals often expect immediate cash payment for health services.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's web site at http://wwwn.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith/en.

The U.S. Department of State is unaware of any HIV/AIDS entry restrictions for visitors to or foreign residents of Tuvalu.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Tuvalu is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

Traffic moves on the left in Tuvalu. The main roads on Funafuti have been paved, but most roads on these tiny islands are generally unpaved. Animals and unwary pedestrians walking in the road make night driving on unlit secondary roads hazardous. For specific information concerning Tuvalu driving permits, vehicle inspection, road tax and mandatory insurance, contact the Tuvalu Permanent Mission to the United Nations in New York.

Aviation Safety Oversight: As there is no direct commercial air service between the United States and Tuvalu, the U.S. Federal Aviation Administration (FAA) has not assessed Tuvalu's Civil Aviation Authority for compliance with International Civil Aviation Organization (ICAO) aviation safety standards. For more information, travelers may visit the FAA's web site at http://www.faa.gov.

Special Circumstances: In Tuvalu, the Australian dollar is the legal currency. Traveler's checks and all major currencies are accepted by banks and may also be exchanged for local currency at some local hotels. Visa and MasterCard are accepted at most hotels. Expect to pay cash for hotel bills.

Tuvalu's customs authorities may enforce strict regulations concerning temporary importation into or export from Tuvalu of items such as agricultural products. It is advisable to contact the Office of the Tuvalu Permanent Representative in New York, for specific information regarding customs requirements.

U.S. citizens are encouraged to carry a copy of their U.S. passports with them at all times, so that, if questioned by local officials, proofs of

identity and U.S. citizenship are readily available. If detained, U.S. citizens are encouraged to request that a consular officer at the U.S. Embassy in Suva, Fiji, be notified.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating Tuvalu's laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession of, use of, or trafficking in illegal drugs in Tuvalu are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website online at http://travel.state.gov.

Registration and Embassy Locations: There is no U.S. Embassy or diplomatic post in Tuvalu. The U.S. Embassy in Fiji provides assistance for U.S. citizens in Tuvalu. Americans living or traveling in Tuvalu are encouraged to register with the U.S. Embassy in Suva through the State Department's travel registration web site so that they can obtain updated information on travel and security within Tuvalu. Americans without Internet access may register directly with the U.S. Embassy in Suva, Fiji. The U.S. Embassy in Fiji is located at 31 Loftus Street in the capital city of Suva. The telephone number is (679) 331-4466; the fax number is (679) 330-2267. Information may also be obtained by visiting the Embassy's home page at http://suva.usembassy.gov. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency.

UGANDA

Compiled from the November 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Republic of Uganda

PROFILE

Geography

Area: 241,040 sq. km. (93,070 sq. mi.); about the size of Oregon.

Cities: Capital—Kampala (2002 pop. 1.2 million). Other cities—Jinja, Gulu, Mbale, Mbarara.

Terrain: 18% inland water and swamp; 12% national parks, forest, and game reserves; 70% forest, woodland, grassland.

Climate: In the northeast, semi-arid—rainfall less than 50 cm. (20 in.); in southwest, rainfall 130 cm. (50 in.) or more. Two dry seasons: Dec.-Feb. and June-July.

People

Nationality: Noun and adjective—Ugandan(s).

Population: (2007) 30.9 million.

Annual growth rate: (2004 est.) 4.0%.

Ethnic groups: African 99%, European, Asian, Arab 1%.

Religions: (2007) Christian 85%, Muslim 12%, other 2%.

Languages: English (official); Luganda and Swahili widely used; other Bantu and Nilotic languages.

Education: Attendance (2000; primary school enrollment, public and private)—89%. Literacy (2003)—70%.

Health: Infant mortality rate—86/1,000. Life expectancy—45.3 yrs.

Government

Type: Republic.

Constitution: Ratified July 12, 1995; promulgated October 8, 1995.

Independence: October 9, 1962.

Government branches: Executive—president, vice president, prime minister, cabinet. Legislative—parliament. Judicial—Magistrate's Court, High Court, Court of Appeals, Supreme Court.

Political subdivisions: 80 districts.

Political parties: In 2006, approximately 33 parties were allowed to function, including political parties that existed in 1986, when the National Resistance Movement assumed power.

Suffrage: Universal adult.

National holidays: Independence Day, October 9.

Economy

GDP: (nominal, 2006/2007) $10.8 billion.

Inflation rate: (annual headline or CPI, 2006/2007) 7.6%.

Natural resources: Copper, cobalt, limestone, phosphate, oil.

Agriculture: Cash crops—coffee, tea, cotton, tobacco, sugar cane, cut flowers, vanilla. Food crops—bananas, corn, cassava, potatoes, millet, pulses. Livestock and fisheries—beef, goat meat, milk, Nile perch, tilapia.

Industry: Processing of agricultural products (cotton ginning, coffee curing), cement production, light consumer goods, textiles.

Trade: Exports (2006/2007)—$1.5 billion: coffee, fish and fish products, tea, electricity, horticultural products, vanilla, cut flowers, remittances from abroad. Major markets—EU, Kenya, South Africa, U.K., U.S. Imports (2006/2007)—$2.5 billion: capital equipment, vehicles, petroleum, medical supplies, chemical, cereals. Major suppliers—OPEC countries, Kenya, EU, India, South Africa, China, U.S.

Fiscal year: July 1-June 30.

PEOPLE AND HISTORY

Africans of three main ethnic groups—Bantu, Nilotic, and Nilo-Hamitic—constitute most of the population. The Bantu are the most numerous and include the Baganda, which, with 18% of the population, constitute the largest single ethnic group. Individual ethnic groups in the southwest include the Banyankole and Bahima, 10%; the Bakiga, 8%; the Banyarwanda, 6%; the Bunyoro, 3%; and the Batoro, 3%. Residents of the north, largely Nilotic, include the Langi, 6%, and

the Acholi, 4%. In the northwest are the Lugbara, 4%, and the Karamojong, 2%, occupy the considerably drier, largely pastoral territory in the northeast. The Basoga, 8% and the Bagisu, 5% are among ethnic groups in the East. Europeans, Asians, and Arabs make up about 1% of the population with other groups accounting for the remainder.

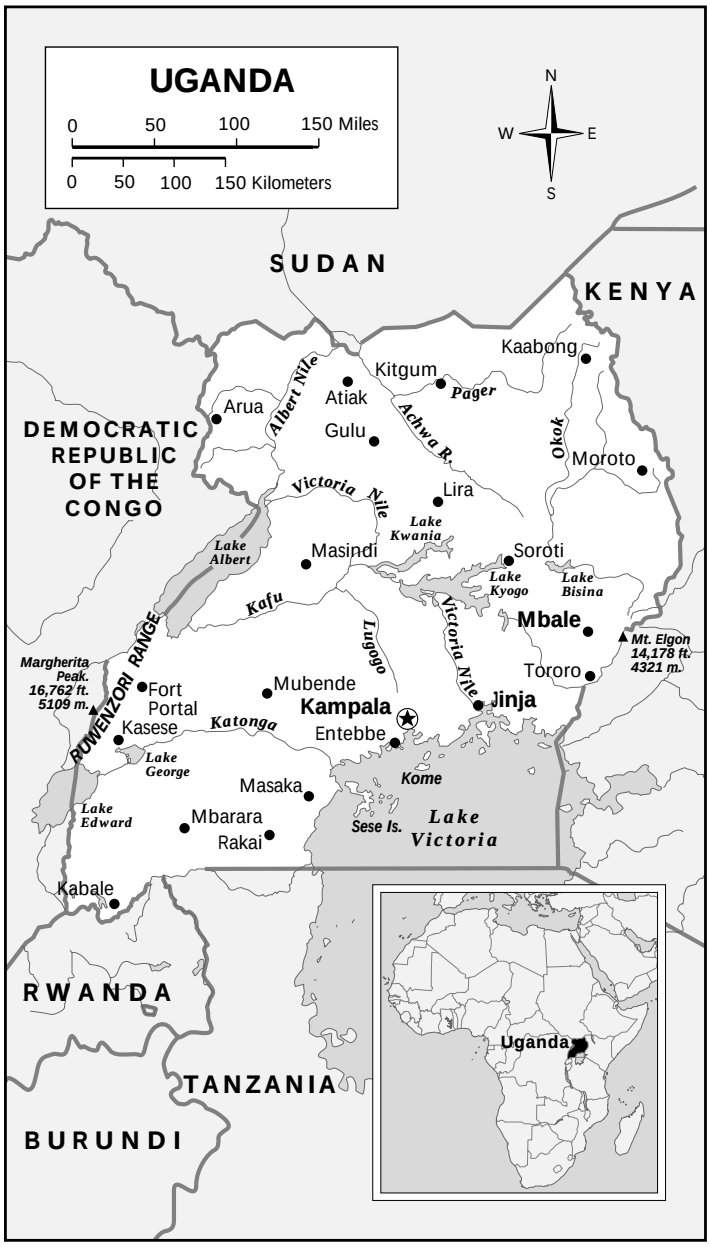
Uganda's population is predominately rural, and its population density highest in the southern regions. Until 1972, Asians constituted the largest nonindigenous ethnic group in Uganda. In that year, the Idi Amin regime expelled 50,000 Asians, who had been engaged in trade, industry, and various professions. In the years since Amin's overthrow in 1979, Asians have slowly returned and now number around 30,000. Other nonindigenous people in Uganda include Arabs, Western missionaries, nongovernmental organization (NGO) workers, diplomats, and business people.

When Arab traders moved inland from their enclaves along the Indian Ocean coast of East Africa and reached the interior of Uganda in the 1830s, they found several African kingdoms with well-developed political institutions dating back several centuries. These traders were followed in the 1860s by British explorers searching for the source of the Nile River. Protestant missionaries entered the country in 1877, followed by Catholic missionaries in 1879.

In 1888, control of the emerging British "sphere of interest" in East Africa was assigned by royal charter to the Imperial British East Africa Company, an arrangement strengthened in 1890 by an Anglo-German agreement confirming British dominance over Kenya and Uganda. In 1894, the Kingdom of Buganda was placed under a formal British protectorate.

Britain granted internal self-government to Uganda in 1961, with the first elections held on March 1, 1961. Benedicto Kiwanuka of the Democratic Party became the first Chief Minister. Uganda maintained its Commonwealth membership. A second round of elections in April 1962 elected members to a new National Assembly. Milton Obote, leader of the majority coalition in the National Assembly, became prime minister and led Uganda to formal independence on October 9, 1962.

In succeeding years, supporters of a centralized state vied with those in favor of a loose federation and a strong role for tribally-based local kingdoms. Political maneuvering climaxed in February 1966, when Prime Minister Milton Obote suspended the constitution, assumed all government powers, and removed the ceremonial president and vice president. In September 1967, a new constitution proclaimed Uganda a republic, gave the president even greater powers, and abolished the traditional kingdoms. On January 25, 1971, Obote's government was ousted in a military coup led by armed forces commander Idi Amin Dada. Amin declared himself president, dissolved the parliament, and amended the constitution to give himself absolute power.



Idi Amin's 8-year rule produced economic decline, social disintegration, and massive human rights violations. The Acholi and Langi ethnic groups were particular objects of Amin's political persecution because they had supported Obote and made up a large part of the army. In 1978, the International Commission of Jurists estimated that more than 100,000 Ugandans had been murdered during Amin's reign of terror; some authorities place the figure much higher.

In October 1978, Tanzanian armed forces repulsed an incursion of Amin's troops into Tanzanian territory. The Tanzanian force, backed by Ugandan exiles, waged a war of liberation against Amin's troops and Libyan soldiers sent to help him. On April 11, 1979, Kampala was captured, and Amin fled with his remaining forces.

After Amin's removal, the Uganda National Liberation Front formed an interim government with Yusuf Lule as president. This government adopted a ministerial system of administration and created a quasi-parliamentary organ known as the National Consultative Commission (NCC). The NCC and the Lule cabinet reflected widely differing political views. In June 1979, following a dispute over the extent of presidential powers, the NCC replaced Lule with Godfrey Binaisa. In a continuing dispute over the powers of the interim presidency, Binaisa was removed in May 1980. Thereafter, Uganda was ruled by a military commission chaired by Paulo Muwanga. December 1980 elections returned the UPC to power under the leadership of President Obote, with Muwanga serving as vice president. Under Obote, the security forces had one of the world's worst human rights records. In their efforts to stamp out an insurgency led by Yoweri Museveni's National Resistance Army (NRA), they laid waste to a substantial section of the country, especially in the Luwero area north of Kampala.

Obote ruled until July 27, 1985, when an army brigade, composed mostly of ethnic Acholi troops and commanded by Lt. Gen. Basilio Olara-Okello, took Kampala and proclaimed a military government. Obote fled to exile in Zambia. The new regime, headed by former defense force commander Gen. Tito Okello (no relation to Lt. Gen. Olara-Okello), opened negotiations with Museveni's insurgent forces and pledged to improve respect for human rights, end tribal rivalry, and conduct free and fair elections. In the meantime, massive human rights violations continued as the Okello government murdered civilians and ravaged the countryside in order to destroy the NRA's support.

Negotiations between the Okello government and the NRA were conducted in Nairobi in the fall of 1985, with Kenyan President Daniel Moi seeking a cease-fire and a coalition government in Uganda. Although agreeing in late 1985 to a cease-fire, the NRA continued fighting, seized Kampala in late January 1986, and assumed control of the country, forcing Okello to flee north into Sudan. Museveni's forces organized a government with Museveni as president and dominated by the political grouping called the National Resistance Move-

ment (NRM or the "Movement"). A referendum was held in March 2000 on whether Uganda should retain the Movement system, with limited operation of political parties, or adopt multi-party politics. Although 70% of voters endorsed retention of the Movement system, the referendum was widely criticized for low voter turnout and unfair restrictions on Movement opponents. Museveni was reelected to a second five-year term in March 2001. Parliamentary elections were held in June 2001, and more than 50% of contested seats were won by newcomers. Movement supporters nevertheless remained in firm control of the legislative branch. Observers believed that the 2001 presidential and parliamentary elections generally reflected the will of the electorate; however, both were marred by serious irregularities, particularly in the period leading up to the elections, such as restrictions on political party activities, incidents of violence, voter intimidation, and fraud. A Constitutional Review Commission (CRC) issued a report proposing comprehensive constitutional change in December 2003. The government, however, took issue with many CRC recommendations and made counter-proposals in September 2004. A July 2005 national referendum resulted in the adoption of a multiparty system of government and the subsequent inclusion of opposition parties in elections and government.

In February 2006, the country held its first multiparty general elections since President Museveni came to power in 1986. The election generally reflected the will of the people, although serious irregularities occurred. Ruling NRM candidate President Museveni was declared the winner with 59.26% of the vote, giving him a third term in office following the passage of a controversial amendment in June 2005 to eliminate presidential term limits. Opposition FDC leader Kizza Besigye captured 37.39% of the vote, while the remaining contestants received less than 2% of the vote each, according to official figures from the Electoral Commission.

GOVERNMENT

The 1995 constitution established Uganda as a republic with an executive, legislative, and judicial branch. The constitution provides for an executive president, to be elected every 5 years. President Yoweri Museveni, in power since 1986, was elected in 1996 and reelected in 2001 and 2006. Legislative responsibility is vested in the parliament; legislative elections were last held February 2006. There are currently 102 women representatives in the 332-member parliament. The Ugandan judiciary operates as an independent branch of government and consists of magistrate's courts, high courts, courts of appeals, and the Supreme Court. Parliament and the judiciary have significant amounts of independence and wield significant power.

Principal Government Officials

Last Updated: 11/12/08

Pres.: **Yoweri Kaguta MUSEVENI**
Vice Pres.: **Gilbert Balibaseka BUKENYA, Dr.**
Prime Min.: **Apolo NSIBAMBI**

First Dep. Prime Min.: **Eriya KATEGAYA**
Second Dep. Prime Min.: **Henry KAJURA**
Third Dep. Prime Min.: **Kirunda KIVEJINJA**

Attorney Gen.: **Khiddu MAKUBUYA**
Dep. Attorney Gen.: **Adolf MWESIGYE**
Governor, Bank of Uganda: **Emmanuel TUMUSIIME-MUTEBILE**
Ambassador to the US: **Perezi Karukubiro KAMUNANWIRE**
Permanent Representative to the UN, New York: **Francis K. BUTAGIRA**

Uganda maintains an embassy in the United States at 5909 16th Street NW, Washington, DC 20011 (tel. 202-726-7100).

POLITICAL CONDITIONS

Since assuming power, Museveni and his government have largely put an end to the human rights abuses of earlier governments, initiated substantial economic liberalization and general press freedom, and instituted economic reforms in accord with the International Monetary Fund (IMF), World Bank, and donor governments.

The vicious and cult-like Lord's Resistance Army (LRA), which seeks to overthrow the Ugandan Government, has murdered and kidnapped civilians in the north and east since 1986. Although the LRA does not threaten the stability of the government, LRA violence at one time displaced up to 1.7 million people, creating a humanitarian catastrophe, particularly when they were forced into internally displaced persons (IDP) camps for their own protection. The Uganda Peoples Defense Force (UPDF) launched "Operation Iron Fist" against LRA rebels in northern Uganda in 2002 and conducted operations against LRA sanctuaries in southern Sudan with the permission of the Sudanese Government. The Sudanese Government had previously supported the LRA.

There have been significant new developments in this conflict since January 2006. With the signing of the Sudanese "Comprehensive Peace Agreement," the Government of Southern Sudan (GOSS) was created. To protect this fragile peace from

LRA incursions in southern Sudan, Riek Machar, a GOSS Vice President, launched efforts to broker a peace agreement between the Government of Uganda and the LRA in July 2006. Those talks are ongoing and represent the first time there has been meaningful progress in ending this conflict. As a result, many northern Ugandans are leaving the IDP camps and returning to their villages.

In 1998, Uganda deployed a sizable military force to eastern Democratic Republic of the Congo (D.R.C.), ostensibly to prevent attacks from Ugandan rebel groups operating there. There were widespread allegations that Ugandan military and civilian officials were involved in the illegal exploitation of D.R.C. natural resources. After much international pressure, Uganda withdrew its troops from D.R.C. in June 2003. Relations with the D.R.C., however, continue to be frosty. When the LRA left southern Sudan and relocated to eastern Congo in September 2005, Museveni threatened to enter D.R.C. and go after the LRA if neither Congo nor the UN peacekeepers in the region would take action. The recent peace talks have taken a lot of steam out of those threats, however, and Uganda seems focused on seeing the talks to conclusion.

ECONOMY

Uganda's economy has great potential. Endowed with significant natural resources, including ample fertile land, regular rainfall, and mineral deposits, it appeared poised for rapid economic growth and development at independence. However, chronic political instability and erratic economic management produced a record of persistent economic decline that left Uganda among the world's poorest and least-developed countries.

Since assuming power in early 1986, Museveni's government has taken important steps toward economic rehabilitation. The country's infrastructure—notably its transportation and communications systems that were destroyed by war and neglect—is being rebuilt. Recognizing the need for increased external support, Uganda negotiated a policy framework paper with the IMF and the World Bank in 1987. It subsequently began implementing economic policies designed to restore price stability and sustainable balance of payments, improve capacity utilization, rehabilitate infrastructure, restore producer incentives through proper price policies, and improve resource mobilization and allocation in the public sector.

Uganda's macroeconomic policies are sound and contributed to a 7% growth rate in fiscal year 2006-2007, compared to 5.1% in FY 2005-2006. Inflation, which ran at 240% in 1987 and 42% in June 1992, was 5.1% in 2003, but bounced up to 7.7% in 2007, well above the government's annual target average of 5%, as food prices rose.

Investment as a percentage of GDP was estimated at 24% in 2006/2007 compared to 15.7% in 2002/2003. Private sector investment, largely financed by private transfers from abroad, was 20% of GDP in 2006/2007. In the same year, gross national savings as a percentage of GDP fell to an estimated 12%, from 13% the previous fiscal year. The Ugandan Government has worked with donor countries to reschedule or cancel substantial portions of the country's external debts.

Agricultural products supply nearly all of Uganda's foreign exchange earnings, with coffee (of which Uganda is Africa's second leading producer) accounting for about 19% and fish 15.5% of the country's exports in 2002. Exports of non-traditional products, including apparel, hides, skins, vanilla, vegetables, fruits, cut flowers, and fish are growing, while traditional exports such as cotton, tea, and tobacco continue to be mainstays.

Most industry is related to agriculture. The industrial sector is being rehabilitated to resume production of building and construction materials, such as cement, reinforcing rods, corrugated roofing sheets, and paint. Domestically produced consumer goods include plastics, soap, cork, beer, and soft drinks. Uganda has about 45,000 kilometers (28,000 mi.), of roads, of which 10,000 (6,213 miles) kilometers are main roads and 35,000 kilometers (21,747 miles) are feeder roads. Only 3,000 kilometers (1,864 mi.) are paved, and most roads radiate from Kampala. The country has about 1,350 kilometers (800 mi.) of rail lines, but most of it is not currently in use. A railroad originating at Mombasa on the Indian Ocean connects with Tororo, where it branches westward to Jinja, Kampala, and Kasese and northward to Mbale, Soroti, Lira, Gulu, and Pakwach. Uganda's important road and rail links to Mombasa serve its transport needs and also those of its neighbors-Rwanda, Burundi, and parts of Congo and Sudan. An international airport is at Entebbe on the shore of Lake Victoria, some 32 kilometers (20 mi.) south of Kampala.

FOREIGN RELATIONS

The Ugandan Government generally seeks good relations with other nations without reference to ideological orientation. Relations with Rwanda, Congo and Sudan have sometimes been strained because of security concerns. President Museveni has been active in attempts implement a peace agreement Burundi and has supported peace initiatives in Sudan and Somalia.

In the past, neighbors were concerned about Uganda's relationship with Libya, which had supplied military equipment and bartered fuel to Uganda. In addition to its friendly ties to Western nations, Uganda has maintained ties with North Korea. Uganda's has strained relations with Sudan because of past Sudanese support for the LRA. The LRA seeks to overthrow the Uganda Government and has inflicted brutal violence on the population in northern Uganda, including rape, kidnapping, torture, and murder. In 2002 Uganda and Sudan reestablished diplomatic ties and signed a protocol permitting the

UPDF to enter southern Sudan and engage the LRA. The protocol must be renewed periodically. Another rebel group operating in western Uganda and eastern Democratic Republic of the Congo, near the Rwenzori Mountains, the Allied Democratic Forces (ADF), emerged as a localized threat in 1996 and inflicted substantial suffering on the population in the area. It has largely been defeated by the UPDF and the affected areas of western Uganda have been secured. Remnants of the ADF remain in eastern Congo.

DEFENSE

The Uganda Peoples Defense Force (UPDF)—previously the National Resistance Army—constitutes the armed forces of Uganda. Prior to 2000, U.S. military forces participated with the UPDF in training activities under the African Crisis Response Initiative. U.S. military assistance was terminated in 2000 as a result of the Ugandan incursion into the D.R.C. Following the June 2003 UPDF withdrawal of troops from the D.R.C., the U.S. restarted limited nonlethal military assistance.

U.S.-UGANDAN RELATIONS

Although U.S.-Ugandan relations were strained during the rule of Idi Amin in the 1970s, relations improved after Amin's fall. In mid-1979, the United States reopened its embassy in Kampala. Relations with successor governments were cordial, although Obote and his administration rejected strong U.S. criticism of Uganda's human rights situation.

Bilateral relations between the United States and Uganda have been good since Museveni assumed power, and the United States has welcomed his efforts to end human rights abuses and to pursue economic reform. Uganda is a strong supporter of the global war against terrorism. The United States is helping Uganda achieve export-led economic growth through the African Growth and Opportunity Act and provides a significant amount of development assistance. At the same time, the United States is concerned about continuing human rights problems and the pace of progress toward the establishment of genuine political pluralism.

U.S. development assistance in Uganda has the overall goal of reducing mass poverty. Most U.S. program assistance is focused in the areas of health, education and agriculture. Both the U.S. Agency for International Development (USAID) and the Centers for Disease Control (CDC) have major programs to fight the HIV/AIDS pandemic.

Other programs promote trade and investment, curb environmental degradation, encourage the peaceful resolution of local and international conflicts, and promote honest and open government.

The United States also provides large amounts of humanitarian assistance to populations without access to adequate food supplies because of conflict, drought and other factors. U.S. Peace Corps Volunteers are active in primary teacher training and HIV/AIDS programs. The Department of State carries out cultural exchange programs, brings Fulbright lecturers and researchers to Uganda, and sponsors U.S. study and tour programs for a wide variety of officials from government, non-governmental organizations and the private sector.

Through Ambassador's Self-Help Fund, local groups in poor areas receive assistance for small projects with a high level of community involvement. U.S.-Ugandan relations also benefit from significant contributions to health care, nutrition, education, and park systems from U.S. missionaries, non-governmental organizations, private universities, HIV/AIDS researchers, and wildlife organizations. Expatriate Ugandans living in the U.S. also promote stronger links between the two countries.

TRAVEL

Consular Information Sheet

May 6, 2008

Country Description: Uganda is a landlocked, developing country in central eastern Africa. Infrastructure is adequate in Kampala, the capital, but is limited in other areas.

Entry Requirements: A passport valid for three months beyond the date of entry, visa and evidence of yellow fever vaccination are required. Visas are available at Entebbe Airport upon arrival or may be obtained from the Embassy of the Republic of Uganda. The current fee for a three month tourist visa obtained upon arrival at Entebbe Airport is $50.00. Airline companies may also require

travelers to have a visa before boarding. Travelers should obtain the latest information and details from the Embassy of the Republic of Uganda at 5911 16th Street NW, Washington, DC 20011; telephone (202) 726-7100; web site: http://www.ugandaembassy.com; e-mail: info@ugandaembassyus.org. Travelers may also contact the Ugandan Permanent Mission to the United Nations, telephone (212) 949-0110. Overseas, inquiries may be made at the nearest Ugandan embassy or consulate.

Safety and Security: U.S. citizens living in or planning to visit Uganda should be aware of threats to their safety from insurgent groups and banditry, particularly in the northern region near the border with Sudan and along the western and southwestern borders with the Democratic Republic of the Congo. Insurgent groups have in the past specifically targeted U.S. citizens. They have engaged in murder, armed attacks, kidnapping, and the placement of land mines. Although isolated, incidents occur with little or no warning.

Due to security concerns from potential insurgent activity or armed banditry, U.S. Government employees must have prior authorization from the U.S. Chief of Mission in Uganda to visit the following districts: Abim, Adjumani, Amolatar, Amuria, Amuru (Amuru District includes the segment of Murchison Falls National Park that is north of the Victoria Nile River), Apac, Arua, Bundibugyo, Dokolo, Gulu, Kaabong, Kaberamaido, Katakwi, Kitgum, Koboko, Kotido, Lira, Maracha-Terego, Moroto, Moyo, Nakapiripirit, Nebbi, Oyam, Pader, and Yumbe. Note: Prior authorization is not required by employees to travel to the towns of Lira, Gulu, Kitgum, and Pader provided the travel is only during daylight hours on designated primary roads and the employee does not conduct any activity outside of the town limits.

American citizens traveling to northern Uganda, especially in those districts bordering southern Sudan and the Democratic Republic of the Congo, are advised to exercise caution due to insurgent activity and lawlessness. Negotiations between the Lord's Resistance Army (LRA) insurgent group and the Government of Uganda continue, but reports indicate that the LRA has resumed attacks on civilian populations in the neighboring Democratic Republic of the Congo, southern Sudan, and the Central African Republic. Absent a comprehensive peace agreement, there remains a potential for conflict and continued attacks by LRA-affiliated groups and individuals within the region. In addition, other armed groups operate in remote areas of the lawless border region and pose a threat to safety and security. The Government of Uganda is deploying additional civilian police officers throughout the northern districts, yet these civilian police officers lack critical resources: transportation, facilities, and equipment. Banditry-related activities often go unchallenged due to lack of a robust civilian police presence in northern Uganda.

LRA road ambushes and attacks in northern Uganda and southern Sudan killed both foreign nationals and Ugandan citizens in 2005 and early 2006. One attack that killed a foreign national in November 2005 took place within the boundaries of Murchison Falls National Park, a popular tourist destination. Following the 2005 attack within Murchison Falls National Park, the Ugandan Government strengthened its security presence within the park environs. When visiting the park, American citizens are advised to restrict all activity on the northern bank of the Victoria Nile River to the game viewing area west of Paraa Safari Lodge known as the "Buligi Circuit" or the "Delta Circuit Area."

In March 2004, two Americans were killed in Yumbe District by a group of armed men who attacked the school compound where the Americans were working as missionaries. The Americans were taken out of their home and murdered. The murders were never solved and the motives behind the school attack remain unclear.

American citizens traveling to northern Uganda are advised to ensure that they have made appropriate travel, lodging, and communication arrangements with their sponsoring organization before visiting the region. Local officials in northern Uganda have expressed concern for the safety and security of foreigners visiting Internally Displaced People (IDP) camps, and have also expressed concern about foreign nationals traveling to the region apparently to assist with relief efforts, but without any specific arrangements with a sponsoring organization. Foreign citizens who travel to the region without a sponsoring organization may not find secure lodging or safe transport, and may become more susceptible to crime. They may also find that local officials are unable to provide assistance in the event of an emergency.

Armed banditry and attacks on vehicles are also very common in the Karamoja region of northeastern Uganda, and the Uganda People's Defense Forces (UPDF) continues to implement a program to disarm Karamojong warriors. Past incidents have included ambushes of UPDF troops, and attacks on vehicles, residences, and towns that resulted in multiple deaths. Most of the violence occurred in the districts of Kaabong, Kotido, and Abim, although some violent incidents also occurred in Moroto and Nakapiripirit Districts. American citizens are advised to avoid travel to the Karamoja region given the frequent insecurity.

On August 8, 2007, a group of armed assailants entered Uganda from the Democratic Republic of the Congo and raided Butogota, a town in Kanungu District. Three Ugandans were killed and many others assaulted during the raid. Ugandan officials believe that the perpetrators of the attack were members of one of the various militia groups operating in the southwestern region of the Democratic Republic of the Congo, or possibly remnants of the "Interahamwe," a group that participated in the 1994 genocide in Rwanda and was also responsible for the 1999 attack on Bwindi Impenetrable National Park. The 1999 Bwindi attack killed four Ugandans and eight foreign tourists. The 2007 raid

on Butogota is in a district transited by tourists traveling to Bwindi, a popular gorilla-trekking destination. Within Bwindi Impenetrable National Park, armed security personnel accompany tourists on the daily gorilla hikes and the UPDF maintains a military presence within the park. At Ishasha Camp, another popular tourist destination located in the southern sector of Queen Elizabeth National Park, the UPDF also maintains a small military base for security purposes.

In 2006 and 2007 further north along the western border, the UPDF intercepted and engaged elements of another insurgent group that had entered Uganda from the Democratic Republic of the Congo. In September 2006, the UPDF killed six members of the Allied Democratic Front (ADF) rebel group in two separate incidents. On March 27, 2007, the UPDF engaged a group of suspected ADF rebels in Bundibugyo District, killing 34 and capturing five others. On April 13, 2007, the UPDF intercepted another group of suspected ADF rebels, engaging in an intense firefight approximately two kilometers from the Semliki Safari Lodge. No additional incidents have been reported in the Semliki area since the spring 2007 ADF incursion into Uganda.

There have also been several violent incidents on Lake Albert, a lake in western Uganda intersected by the international border between Uganda and the Democratic Republic of the Congo. On August 2, 2007, a British citizen employed by an oil exploration company was killed during a firefight that occurred between a UPDF boat and an armed Congolese group that had approached an oil exploration vessel. On September 24, 2007, another firefight occurred on the lake between UPDF and Congolese military forces that resulted in multiple fatalities.

Although relatively secure in past years, during early 2008 there were two security incidents in the area of Mount Elgon National Park in eastern Uganda. In February 2008, a Belgian tourist climbing Mt. Elgon in the company of park rangers was shot and killed. The attack occurred while the group was camped for the night and assailants fired into the campsite. The tourist was reportedly struck by gunfire when exiting her tent in the darkness. Ugandan security and park officials suspected that the attack was perpetrated by smugglers engaged in cattle rustling or other illicit activities that are common in the border area.

In March 2008, the Kenyan Government initiated military operations against the Sabaot Land Defence Force (SLDF) militia group on the Kenyan side of the Mt. Elgon area. The Ugandan Government also increased military troop deployments and security patrols in the Mt. Elgon area, and intercepted a number of armed militia members apparently seeking refuge in the caves and rough terrain found at the higher elevations of Mt. Elgon.

Before planning to climb Mt. Elgon, American citizens should obtain up-to-date information regarding security on the mountain and the status of military operations against the SLDF from either the U.S. Embassy in Kampala or the Ugandan Wildlife Authority (UWA).

Demonstrations take place in Kampala and other Ugandan cities from time to time in response to world events or local developments. In most cases, these demonstrations occur with no warning and demonstrations intended to be peaceful can turn confrontational and possibly violent. American citizens are therefore urged to avoid the areas of demonstrations if possible, and to exercise caution if they find themselves in the vicinity of any demonstration. American citizens should stay current with media coverage of local events and be aware of their surroundings at all times. Because many demonstrations are spontaneous events, the U.S. Embassy may not always be able to alert American citizens that a demonstration is taking place and to avoid a specific area. If employed with an institution or other large organization, American citizens may find it helpful and request that local employees notify expatriates when they learn of a demonstration from local radio reports or other sources. Recent protests have occurred over land disputes involving Kampala market areas, university closures and strikes, opposition party demonstrations, and protests by taxi drivers over the enforcement of traffic regulations.

Crime: Crimes such as pick pocketing, purse snatching, and thefts from hotels and parked vehicles or vehicles stalled in traffic jams are common. The Embassy receives frequent reports of theft of items from locked vehicles, even when the stolen items were secured out of sight and the vehicle was parked in an area patrolled by uniformed security personnel. Pick pocketing and the theft of purses and bags is also very common on public transportation. Armed robberies of pedestrians also occur, sometimes during daylight hours and in public places. Although infrequent, the Embassy also receives reports of armed carjackings and highway robbery. In May 2007, two American citizens reported an attempted robbery when they were traveling near the town of Bugiri in eastern Uganda. The Americans reported that a second vehicle with at least one armed assailant tried to stop their vehicle by forcing it off the road. This incident occurred during daylight hours. On June 27, 2007, two American citizens were robbed and held at gunpoint when the vehicle transporting them to Entebbe Airport was stopped by a group of armed men. This incident occurred during the early morning hours on Entebbe Road. Although some of these attacks are violent, victims are generally injured only if they resist. U.S. Embassy employees are advised against using roads at night, especially in areas outside the limits of cities and large towns.

Home burglaries also do occur and sometimes turn violent. In April 2008, the Ugandan police reported an increase in armed robberies in the Kampala neighborhoods of Bukoto, Kisaasi, Kiwatule, Naalya, Najera, and Ntinda. Several of these robberies occurred as the victims were arriving at their residences after

nightfall and the assailants struck as they were entering their residential compounds.

Women traveling alone are particularly susceptible to becoming crime victims. In early 2008, there was an increase in reports of sexual assaults against expatriate females. In some instances, the victims were walking alone, or were single passengers on one of the common modes of public transport which include "boda boda" motorcycle taxis. If the victim of a sexual assault, medical assistance should be sought immediately and counseling provided regarding prophylactic treatment to help prevent the transmission of HIV and other sexually transmitted diseases. A list of local medical providers can be found on the U.S. Embassy website at http://kampala.usembassy.gov.

American citizens visiting Uganda are advised not to accept food or drink offered from a stranger, even a child, because such food may contain narcotics used to incapacitate a victim and facilitate a robbery or sexual assault. In addition, patrons of bars, casinos, nightclubs, and other entertainment centers should never leave their drink or food unattended. When visiting such establishments, it is advisable to remain with a group of friends as single individuals are more likely to be targeted. Victims have included female patrons who reported they were drugged, and taken to another location and sexually assaulted. Robberies have been facilitated on public transportation under similar circumstances. In 2006, an American citizen traveling by bus from Kenya to Uganda was incapacitated and robbed on the bus when the passenger accepted a sealed beverage from a fellow traveler. Expatriates traveling by bus to the popular tourist destination of Bwindi Impenetrable National Forest in southwest Uganda were also incapacitated and robbed when they accepted snacks from fellow bus passengers.

There has been a recent, marked increase in financial crime, including fraud involving wire transfers, credit cards, checks, and advance fee fraud perpetrated via email. The U.S. Embassy recommends using money orders for all fund transfers and protecting all bank account information.

An increasing number of U.S. exporters (primarily vendors of expensive consumer goods such as computers, stereo equipment, and electronics) have been targeted by a sophisticated check fraud scheme. A fictitious company in Uganda locates a vendor on the Internet, makes e-mail contact to order goods, and pays with a third-party check. The checks, written on U.S. accounts and made out to entities in Uganda for small amounts, are intercepted, washed and presented for payment of the goods with the U.S. vendor as payee and an altered amount. If the goods are shipped before the check clears, the U.S. shipper will have little recourse, as the goods are picked up at the airport and the company cannot be traced. American companies receiving orders from Uganda are encouraged to check with the Economic and Commercial Section in the Embassy to verify the legitimacy of the company. The Embassy strongly cautions U.S. vendors against accepting third-party checks as payment for any goods to be shipped to Uganda.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. embassy or consulate for assistance.

The embassy/consulate staff can, for example, assist you to find appropriate medical care, contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

Medical Facilities and Health Information: Medical facilities in Uganda, including Kampala, are limited and not equipped to handle most emergencies, especially those requiring surgery. Outside Kampala, hospitals are scarce and offer only basic services. Equipment and medicines are often in short supply or unavailable. Travelers should carry their own supplies of prescription drugs and preventive medicines. A list of medical providers is available at the U.S. Embassy. Malaria is prevalent in Uganda. Travelers who become ill with a fever or flu-like illness while traveling in a malaria-risk area and up to one year after returning home should seek prompt medical attention and tell the physician their travel history and what antimalarials they have been taking. For additional information on malaria, including protective measures, see the CDC Travelers' Health web site at http://www.cdc.gov/malaria.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's Internet site at http://wwwn.cdc.gov/travel.

For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith.

Uganda has experienced recent outbreaks of Marburg Hemorrhagic Fever, Ebola Hemorrhagic Fever, Pneumonic Plague, Meningitis, and other types of infectious diseases.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The infor-

mation below concerning Uganda is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

Most inter-city transportation in Uganda is by small van or large bus. Many drivers of these vehicles have little training and some are reckless. Small vans and large buses are often poorly maintained, travel at high speeds, and are the principal vehicles involved in the many deadly single and multi-vehicle accidents along Ugandan roads. Large trucks on the highways are often over-loaded, with inadequately secured cargo and poor braking systems. Alcohol frequently is a contributing factor in road accidents, particularly at night. Drivers are advised to take extra care when driving. Nighttime driving and road transportation should be avoided whenever possible. Pedestrians often walk in the roads and may not be visible to motorists. Large branches or rocks in the road sometimes indicate an upcoming obstruction or other hazard. Highway travel at night is particularly dangerous, including the road between Entebbe Airport and Kampala. The Embassy recommends caution on this road and use of a reliable taxi service to and from the airport.

Traffic accidents draw crowds. Ugandan law requires that the drivers stop and exchange information and assist any injured persons. In some cases where serious injury has occurred, there is the possibility of mob anger. In these instances, Ugandans often do not get out of their cars, but drive to the nearest police station to report the accident.

For specific information concerning Ugandan driving permits, vehicle inspection, road tax and mandatory insurance, please contact the Uganda Tourist Board, IPS building, 14, Parliament Avenue, Kampala, Uganda; telephone 256-414-342196. You may also wish to consult their web site at http://www.visituganda.com, or, for information on government agencies, see http://myuganda.co.ug.

Aviation Safety Oversight: As there is no direct commercial air service between the United States and Uganda, the U.S. Federal Aviation Administration (FAA) has not assessed Uganda's Civil Aviation Authority for compliance with International Civil Aviation Organization (ICAO) aviation safety standards. For more information, travelers may visit the FAA's Internet web site at http://www.faa.gov.

Special Circumstances: Please note that U.S. currency notes in $20 and $50 denominations are exchanged at a lower rate than $100 currency notes. In addition, travelers often find that they cannot exchange or use U.S. currency printed earlier than the year 2000. Travelers who find they cannot pay for accommodation or expenses often must request that friends or family wire money to them in Uganda. There are offices that facilitate Western Union, MoneyGram, and other types of money transfers in Kampala and other cities throughout the country. ATMs are available in Uganda, particularly in downtown Kampala, but usually only customers who have an account with a specific Ugandan bank may use them. A few machines function with overseas accounts.

Ugandan Customs authorities may enforce strict regulations concerning the importation of pets. A Ugandan import permit is required, along with an up-to-date rabies vaccination certificate and a veterinary certificate of health issued by a USDA-approved veterinarian no more than thirty days before arrival. Travelers are advised to contact the Ugandan Embassy in the United States for specific information regarding customs requirements. Please see our Customs Information.

Photography in tourist locations is permitted. However, taking pictures of military/police installations or personnel is prohibited. Military and police officers have detained tourists for taking photographs of Entebbe Airport and of the area around Owen Falls Dam, near Jinja, although the prohibition on taking photographs is not publicly displayed on signs.

The U.S. Embassy receives frequent inquiries from American citizens wishing to register a nongovernmental organization (NGO) in Uganda. Information about registering an NGO can be obtained from the Ugandan NGO Board which has offices within the Ministry of Internal Affairs. The NGO Board can be reached on phone number: 256 414 341 556. One of the requirements for registering an NGO is that a foreign national employee must provide a Certificate of Good Conduct/Criminal Background Check. The U.S. Embassy Kampala cannot provide this service, so American citizens intending to travel to Uganda as an employee of an NGO or who plan to register an NGO should obtain a Certificate of Good Conduct from their local police or the Federal Bureau of Investigation (FBI) before departing the United States. More information on how to obtain a Criminal Background Check can be found on the FBI web site at http://www.fbi.gov/hq/cjisd/fprequest.htm.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating Ugandan laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Uganda are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling

in Uganda are encouraged to register with the U.S. Embassy through the State Department's travel registration web site so that they can obtain updated information on travel and security within Uganda. Americans without Internet access may register directly with the nearest U.S. embassy or consulate. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency.

The U.S. Embassy is located at 1577 Ggaba Road, Kampala; telephone 256-414-259-791 or 256 414 306 001; fax 256-414-258-451; e-mail: Kampalauscitizen@state.gov. The U.S. Embassy web site is http://kampala.usembassy.gov.

Intercountry Adoption

November 2008

The information in this section has been edited from a report available through the U.S. Department of State Office of Children's Issues. For more information detailed, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Uganda is not party to The Hague Convention on Protection of Children and Co-operation in Respect of Intercountry Adoption (Hague Adoption Convention).

Who Can Adopt? To bring an adopted child to United States from Uganda, you must be found eligible to adopt by the U.S. Government. For detailed information on these requirements for adoption, please review the *Intercountry Adoption* section of this publication and visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

Ugandan law places restrictions on the ability of foreign citizens to adopt Ugandan children. The Children's Act states that a foreign citizen may, in exceptional circumstances, adopt a Ugandan child, if the foreigner has resided in Uganda for at least three years and if the foreigner has also fostered the child for 36 months. However, High Court judges have made some exceptions to these three-year residency and fostering requirements on a case-by-case basis if it was deemed in the best interests of the child.

Ugandan High Court judges have also exercised discretion in approving legal guardianship decrees (which may permit the child to emigrate for full and final adoption abroad) in certain cases where the prospective adoptive parents were unable to meet the requirements for adoption in Uganda. In addition to these U.S. requirements for prospective adoptive parents, Uganda also has the following eligibility requirements for prospective adoptive parents.

Residency Requirements: Unless a judge waives the fostering requirements, prospective adoptive parents must reside in Uganda with their prospective adoptive child for three years. This means that a foreign citizen may adopt a Ugandan child if the foreigner has resided in Uganda for at least three years, and has also fostered the child for 36 months.

Age Requirements: Applicants must be at least 25 years old and 21 years older than the child they plan to adopt. In the case of a married couple, it is sufficient for one spouse to meet these requirements.

Marriage Requirements: Married couples must adopt jointly. Single parents may adopt, but they may not adopt a child of the opposite sex (unless an exception is made).

Income Requirements: There are no specific income requirements for Ugandan adoption, although prospective adoptive parents must be able to prove financial stability.

Other: Foreign adoptive parents must demonstrate they have no criminal record, and that they have been approved by their country of nationality to adopt. Applicants must demonstrate financial stability.

Who Can Be Adopted? Uganda has specific requirements that a child must meet in order to be eligible for adoption. In addition to these requirements, a child must meet the definition of an orphan under U.S. law for you to bring him or her home back to the United States. Learn more about these U.S. requirements.

Relinquishment Requirements: Children who are 14 years old or older must consent to the adoption. The consent of both biological parents, if known, must be obtained and may be withdrawn prior to the execution of the adoption order. Under U.S. immigration law, if both biological parents for a child are living, they must independently release their child for adoption and emigration abroad, prior to U.S. prospective adoptive parents being identified.

Uganda's Adoption Authority: The Department of Youth and Child Affairs

The Process: The first step in adopting a child from Uganda is usually to select a licensed agency in the United States that can help with your adoption. Adoption service providers must be licensed by the U.S. state in which they operate.

To bring an adopted child from Uganda to the United States, you must apply to be found eligible to adopt (Form I-600A) by the U.S. Government, Department of Homeland Security, U.S. Citizenship and Immigration Services (USCIS). If you are eligible to adopt, and a child is available for intercountry adoption, the central adoption authority in Uganda will provide you with a referral to a child.

Role of the Adoption Authority: The Department of Youth and Child Affairs oversees Probation and Social Welfare officers assigned to magistrate courts. Prospective adoptive parents work with the Probation and Social Welfare officers in the region where the child resides. These officers monitor and record the progress of the adoptive family during the 36-month fostering period.

Role of the Court: Foreign citizens wishing to adopt a child in Uganda are required to file a petition with the High Court of Uganda after they have

identified a child they wish to adopt. Prospective adoptive parents are required to appear in person, and the court requires that the local Probation and Social Welfare officer overseeing the case submit a report with his/her recommendation. In certain cases, the court may also request that other individuals or authorities submit a report in respect to the adoption petition.

For instance, in many cases orphanage directors are requested to submit information about children that were placed in their care. Children who are 14 years old or older must consent to the adoption. The consent of both biological parents, if known, must be obtained and may be withdrawn prior to the execution of the adoption order. Under U.S. immigration law, if both biological parents for a child are living, they must independently release their child for adoption and emigration abroad, prior to U.S. prospective adoptive parents being identified.

The Ugandan Government also permits foreign citizens to obtain legal guardianship of orphans and, in some cases allows, it permits the child to emigrate from Uganda for full and final adoption abroad. For U.S. citizens, this means the prospective adoptive child may qualify for an Immediate Relative 4 visa (IR-4) for the purpose of emigration and adoption in the United States.

In order to file for an IR-4 visa for the child, the legal guardianship order and the accompanying court ruling must state clearly that the High Court is aware of, and concurs with, the intention of the legal guardian to take the child out of Uganda for full and final adoption abroad. Once the child immigrates to the United States, the legal guardians must file for adoption with a U.S. state court.

Role of Adoption Agencies: There are no adoption agencies that provide adoption services in Uganda, although there are a number of non-governmental organizations and interest groups that advocate for children's rights. For U.S.-based agencies, it is suggested that prospective adoptive parents contact the Better Business Bureau and/or the licensing authority in the U.S. state where the agency is located or licensed.

Time Frame: Prospective adoptive parents should allow sufficient time to complete the necessary processing of the case both with the Ugandan High Court, and the U.S. Embassy. The court process often takes at least three weeks from the initial court appearance, the execution of the adoption or legal guardianship decree, and the issuance of a court ruling. The U.S. Embassy in Kampala is responsible for processing all immigrant adoption cases from Uganda. Prospective adoptive parents are encouraged to contact the U.S. Embassy in Kampala well in advance of their anticipated arrival in Uganda. This will assist the Embassy in processing your paperwork.

Adoption Fees: Court fees are less than $100.00 and may vary according to the number of documents that require notarization. Attorney's fees can range from $500 to $2,000. The U.S. Embassy in Uganda discourages the payment of any fees that are not properly receipted, for example, "donations," or "expediting" fees, which may be requested from prospective adoptive parents. Such fees have the appearance of "buying" a baby and put all future adoptions in Uganda at risk.

Documents Required: To adopt from Uganda, the following documents must be submitted to the Ugandan High Court:

- Marriage certificate of adoptive parents;
- Police clearances;
- Proof of financial stability, including tax returns and bank statements;
- A report from the Probation and Social Welfare officer, or a U.S. home study if the prospective parents do not reside in Uganda;
- Adoption order from the High Court of Uganda;
- Death certificates for the biological parent(s), and/or other documentary evidence that demonstrates the child's orphan status such as orphanage records, statements from local Government or hospital officials, Probation and Social Welfare officer's report, etc.; and
- Assurance that the adoptive parent(s)'s country will respect and recognize the adoption order issued by the Ugandan Court. The Ugandan attorney working with the adoptive parents usually provides a letter or brief statement to the High Court that the United States will recognize the adoption decree. The U.S. Child and Citizenship Act of 2000 meets this requirement.

For updates on document requirements and information on how to authenticate documents, visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

Bringing Your Child Home: Once your adoption is complete (or you have obtained legal custody of the child), there are a few more steps to take before you can head home. Specifically, you need to apply for several documents for your child before he or she can travel to the United States, such as a birth certificate, a passport or travel document for your child from the country in which he or she was born, and a U.S. Immigration Visa.

For detailed and updated information on how to obtain these documents, review the *Intercountry Adoption* section on this publication and visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

Child Citizenship Act: For adoptions finalized abroad: The Child Citizenship Act of 2000 allows your new child to acquire American citizenship automatically when he or she enters the United States as lawful permanent residents. For adoptions finalized in the United States: The Child Citizenship Act of 2000 allows your new child to acquire American citizenship automatically when the court

in the United States issues the final adoption decree. To learn more, review the *Intercountry Adoption* section on this publication and visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

After Adoption: Once the adoption is finalized, adoptive parents must register the adoption with the Registrar General's office in Kampala. The Registrar General informs the Ugandan Ministry of Foreign Affairs of the adoption.

The Ministry of Foreign Affairs will maintain the adopted child's records, which will remain available to the child.

UKRAINE

Compiled from the March 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Ukraine

PROFILE

Geography

Area: 233,000 sq. mi., the largest country wholly in Europe.
Cities: Capital—Kyiv (also transliterated as Kiev, pop. 2.8 million). Other cities—Kharkiv, Dnipropetrovsk, Donetsk, Odesa, Lviv.
Terrain: A vast plain mostly bounded by the Carpathian mountains in the southwest and by the Black Sea and the Sea of Azov in the South.
Climate: Continental temperate, except in southern Crimea, which has a sub-tropical climate.

People

Population: (est.) 46.3 million.
Nationality: Noun—Ukrainian(s); adjective—Ukrainian.
Ethnic groups: Ukrainians, Russians, Belarusians, Moldovans, Hungarians, Bulgarians, Jews, Poles, Crimean Tatars, and other groups.
Religions: Ukrainian Orthodoxy, Ukrainian Greek Catholicism, Judaism, Roman Catholicism, Islam, others.
Languages: Ukrainian (official), Russian, others.
Education: Literacy—99.7%.
Health: Infant mortality rate—9.9/1,000; life expectancy—64.71 yrs. males, 75.59 yrs. females.
Work force: 22.3 million. Industry and construction—32%; agriculture and forestry—24%; health, education, and culture—17%; transport and communication—7%.

Government

Type: Parliamentary-presidential.
Independence: August 24, 1991.
Constitution: First post-Soviet constitution adopted June 28, 1996, amended January 1, 2006.
Government branches: Executive—president, prime minister, cabinet. Legislative—450-member unicameral parliament, the Supreme Rada (members elected to 4-year terms from party lists by proportional vote). Judicial—Supreme Court, Courts of Appeal, local courts, and Constitutional Court.
Political parties: Wide range of active political parties and blocs, from leftist to center and center-right to ultra-nationalist.
Suffrage: Universal at 18.
Political subdivisions: 24 provinces (oblasts), Crimean autonomous republic, and two cities with special status—Kyiv and Sevastopol.

Economy

PPP GDP: (2007 est.) $321.3 billion.
Nominal GDP: (2007 est.) $90.1 billion.
Annual growth rate: (2007 gov. est.) 6.9%.
PPP per capita GDP: (2007 est.) $6,900.
Nominal per capita GDP: (2006 est.) $1,746.
Natural resources: Vast fertile lands, coal, ironstone, complex ore, various large mineral deposits, timber.
Agriculture: Products—Grain, sugar, sunflower seeds.
Industry: Types—Ferrous metals and products, oil and gas transport, coke, fertilizer, airplanes, turbines, metallurgical equipment, diesel locomotives, tractors.
Trade: (2006) Exports of goods and services—$46.68 billion: Ferrous and nonferrous metals, mineral products, chemicals, energy transport services, machinery, transport equipment, grain, and textiles. Imports—$54.3 billion: Energy, mineral fuel and oil, machinery and parts, transportation equipment, chemicals, textiles, and paper.

PEOPLE

The population of Ukraine is about 46.3 million. Ethnic Ukrainians make up about 73% of the total; ethnic Russians number about 22%, ethnic Belarusians number about 5%. The industrial regions in the east and southeast are the most heavily populated, and the population is about 67% urban. Ukrainian and Russian

are the principal languages. Although Russian is very widely spoken, in the 1989 census (the latest official figures) 88% of the population identified Ukrainian as their native language. There are also small Tatar and Hellenic minorities centered mainly in Crimea. The dominant religions are the Ukrainian Orthodox Church and the Ukrainian Greek Catholic Church (which practices Orthodox rites but recognizes the Roman Catholic Pope as head of the Church). The Ukrainian Orthodox Church is divided between a Moscow Patriarchate and a separate Kyiv Patriarchate, which was established after Ukrainian independence and which declared independence from Moscow. In addition to these, there are also the Ukrainian Autocephalous Orthodox Church and representatives of the Russian Orthodox Church Abroad.

The birth rate in Ukraine is declining. About 70% of adult Ukrainians have a secondary or higher education. Ukraine has about 150 colleges and universities, of which the most important are in Kyiv, Lviv, and Kharkiv. There are about 70,000 scholars in 80 research institutes.

HISTORY

The first identifiable groups to populate what is now Ukraine were Cimmerians, Scythians, Sarmatians, and Goths, among other nomadic peoples who arrived throughout the first millennium B.C. These peoples were well known to colonists and traders in the ancient world, including Greeks and Romans, who established trading outposts that eventually became city-states. Slavic tribes occupied central and eastern Ukraine in the sixth century A.D. and played an important role in the establishment of Kyiv. Kievan Rus Prince Volodymyr converted the Kievan nobility and most of the population to Christianity in 988. Situated on lucrative trade routes, Kyiv quickly prospered as the center of the powerful state of Kievan Rus. In the 11th century, Kievan Rus was, geographically, the largest state in Europe. Conflict among the feudal lords led to decline in the 12th century. Mongol raiders razed Kyiv in the 13th century.

Most of the territory of what is modern Ukraine was annexed by Poland and Lithuania in the 14th century, but during that time, Ukrainians began to conceive of themselves as a distinct people, a feeling that survived subsequent partitioning by greater powers over the next centuries. Ukrainian peasants who fled the Polish effort to force them into servitude came to be known as Cossacks and earned a reputation for their fierce martial spirit and love of freedom. In 1667, Ukraine was partitioned between Poland and Russia. In 1793, when Poland was partitioned, much of modern-day Ukraine was integrated into the Russian Empire.

The 19th century found the region largely agricultural, with a few cities and centers of trade and learning. The region was under the control of the Austro-Hungarian Empire in the extreme west and the Russian Empire elsewhere. Ukrainian writers and intellectuals were inspired by the nationalistic spirit stirring other European peoples existing under other imperial governments and were determined to revive Ukrainian linguistic and cultural traditions and reestablish a Ukrainian state. Taras Shevchenko (1814-1861), national hero of Ukraine, presented the intellectual maturity of the Ukrainian language and culture through his work as a poet and artist. Imperial Russia, however, imposed strict limits on attempts to elevate Ukrainian culture, even banning the use and study of the Ukrainian language.

When World War I and the Russian revolution shattered the Habsburg and Russian empires, Ukrainians declared independent statehood. In 1917 the Central Rada proclaimed Ukrainian autonomy and in 1918, following the Bolshevik seizure of power in Petrograd, the Ukrainian National Republic declared independence under President Mykhaylo Hrushevsky. After three years of conflict and civil war, however, the western part of Ukrainian territory was incorporated into Poland, while the larger, central and eastern regions were incorporated into the Soviet Union in 1922 as the Ukrainian Soviet Socialist Republic.

The Ukrainian national idea persevered during the twenties, but with Stalin's rise to power and the campaign of forced collectivization, the Soviet leadership imposed a campaign of terror that ravaged the intellectual class. The Soviet government under Stalin also created an artificial famine (called the Holodomor in Ukrainian) as part of his forced collectivization policies, which killed millions of previously independent peasants and others throughout the country. Estimates of deaths from the 1932-33 famine alone range from 3 million to 7 million.

When the Nazis invaded the Soviet Union in 1941, some Ukrainians, particularly in the west, welcomed what they saw as liberation from Communist rule, but this did not last as they quickly came to understand the nature of Nazi rule. Nazi brutality was directed principally against Ukraine's Jews (of whom an estimated 1 million were killed), but also against many other Ukrainians. Babyn Yar in Kyiv was the site of one of the most horrific Nazi massacres of Ukrainian Jews, ethnic Ukrainians, and many others. Kyiv and other parts of the country were heavily damaged.

After the Nazi and Soviet invasions of Poland in 1939, the western Ukrainian regions were incorporated into the Soviet Union. Armed resistance against Soviet authority continued as late as the 1950s. During periods of relative liberalization—as under Nikita Khrushchev from 1955 to 1964 and during the period of "perestroika" under Mikhail Gorbachev—Ukrainian communists pursued nationalist objectives. The 1986 explosion at the Chornobyl (Chernobyl in Russian) nuclear power plant, located in the Ukrainian SSR, and the Soviet Government's initial efforts to conceal the extent of the catastrophe from its own people and the world, was a watershed for many Ukrainians in exposing the severe problems of the Soviet system. Ukraine became an indepen-

dent state on August 24, 1991, and was a co-founder of the Commonwealth of Independent States (CIS) following the dissolution of the Soviet Union, although it has not officially joined the organization.

GOVERNMENT AND POLITICAL CONDITIONS

Ukraine has a parliamentary-presidential system of government with separate executive, judicial, and legislative branches. The president nominates the defense and foreign ministers, and the Prosecutor General and Chief of the State Security Service (SBU), each of whom must be confirmed by the parliament. Beginning in 2006, the 450-member unicameral parliament (Supreme Rada) names the prime minister, who in turn nominates other ministers. The Supreme Rada initiates legislation, ratifies international agreements, and approves the budget. Its members are elected to five-year terms. Following free elections held on December 1, 1991, Leonid M. Kravchuk, former chairman of the Ukrainian Rada, was elected to a five-year term, and became Ukraine's first president. At the same time, a referendum on independence was approved by more than 90% of the voters.

Shortly after becoming independent, Ukraine named a parliamentary commission to prepare a new constitution, adopted a multi-party system, and adopted legislative guarantees of civil and political rights for national minorities. A new, democratic constitution was adopted on June 28, 1996, which mandates a pluralistic political system with protection of basic human rights and liberties. Amendments that took effect January 1, 2006, shifted significant powers from the president to the prime minister and Supreme Rada.

Freedom of religion is guaranteed by law, although religious organizations are required to register with local authorities and with the central government. Minority rights are respected in accordance with a 1991 law guaranteeing ethnic minorities the right to schools and cultural facilities and the use of national languages in conducting personal business. According to the constitution, Ukrainian is the only official state language. In Crimea and some parts of eastern Ukraine—areas with substantial ethnic Russian minori-

ties—local and regional governments permit Russian as a language for local official correspondence.

Freedom of speech and press are guaranteed by law and by the constitution, and authorities generally respect these rights. Prior to the "Orange Revolution," however, authorities sometimes interfered with the news media through intimidation and other forms of pressure. In particular, the failure of the government to conduct a thorough, credible, and transparent investigation into the 2000 disappearance and murder of independent journalist Heorhiy Gongadze, in which then-government officials have been credibly implicated, negatively affected Ukraine's international image. Freedom of the media and respect for citizens' rights have increased markedly since the government of President Yushchenko took office in January 2005.

Ethnic tensions in Crimea during 1992 prompted a number of pro-Russian political organizations to advocate secession of Crimea and annexation to Russia. (Crimea was ceded by the RFSSR to the Ukrainian SSR in 1954, in recognition of historic links and for economic convenience, to mark the 300th anniversary of Ukraine's union with Russia.) In July 1992, the Crimean and Ukrainian parliaments determined that Crimea would remain under Ukrainian jurisdiction while retaining significant cultural and economic autonomy.

Official trade unions have been grouped under the Federation of Trade Unions. A number of independent unions, which emerged during 1992, among them the Independent Union of Miners of Ukraine, have formed the Consultative Council of Free Trade Unions. While the right to strike is legally guaranteed, strikes based solely on political demands are prohibited.

In July 1994, Leonid Kuchma was elected as Ukraine's second president in free and fair elections. Kuchma was reelected in November 1999 to another five-year term, with 56% of the vote. International observers criticized aspects of the election, especially slanted media coverage; however, the outcome of the vote was not called into question. Ukraine's March 2002 parliamentary elections were characterized by the Organization for Security and Cooperation in Europe (OSCE) as flawed, but an improvement over the 1998 elections. The pro-presidential For a United Ukraine bloc won the largest number of seats, followed by the reformist Our Ukraine bloc of Viktor Yushchenko (who was then a former Prime Minister), and the Communist Party.

The campaign leading to the October 31, 2004 presidential election was characterized by widespread violations of democratic norms, including government intimidation of the opposition and of independent media, abuse of state administrative resources, highly skewed media coverage, and numerous provocations. The two major candidates—Prime Minister Viktor Yanukovych and opposition leader (and former Prime Minister) Viktor Yushchenko—each garnered between 39% and 40% of the vote and proceeded to a winner-take-all second round. The November 21 runoff election was marred by credible reports of widespread and significant violations, including illegal expulsion of opposition representatives from election commissions, multiple voting by busloads of people, abuse of absentee ballots, reports of coercion of votes in schools and prisons, and an abnormally high number of (easily manipulated) mobile ballot box votes. Hundreds of thousands of people took to the streets of Kyiv and other cities to protest electoral fraud and express support for Yushchenko, and conducted ongoing peaceful demonstrations during what came to be known as the "Orange Revolution."

The OSCE International Election Observation Mission found that the November 21 run-off election "did not meet a considerable number of OSCE commitments and Council of Europe and other European standards for democratic elections." Other independent observers were similarly critical. On November 24, the CEC declared Yanukovych the winner with 49.46% compared to 46.61% for Yushchenko. The U.S. and Europe refused to accept the result as legitimate due to the numerous, uninvestigated reports of fraud. On November 27, Ukraine's Supreme Rada passed a resolution declaring that the election results as announced did not represent the will of the people. On December 1, the Rada passed a vote of "no confidence" in the government. On December 3, Ukraine's Supreme Court invalidated the CEC's announced results and mandated a repeat of the second round vote to take place on December 26. An agreement mediated by European leaders resulted in new legislation being passed by the Rada and signed by the President December 8. The electoral law was reformed to close loopholes that had permitted pervasive electoral fraud. The constitution was amended to transfer power, especially with respect to appointment of ministers, from the president to the prime minister.

The December 26 re-vote took place in an atmosphere of calm. While irregularities were noted, observers found no systemic or massive fraud. The OSCE Mission noted that " Ukraine's elections have moved substantially closer to meeting OSCE and other European standards." On January 10, 2005, after the CEC and the Supreme Court had considered and rejected numerous complaints and appeals filed by the Yanukovych campaign, the CEC certified the results: Yushchenko had won 51.99% of the votes, with 44.20% for Yanukovych. President Yushchenko was inaugurated January 23, 2005.

Ukraine held parliamentary and local elections on March 26, 2006. International observers noted that conduct of the Rada election was in line with international standards for democratic elections, making this the most free and fair in Ukraine's history. Unlike the first rounds of the 2004 presidential election, candidates and parties were able to express themselves freely in a lively press and assembled without hindrance. There was no systemic abuse of administrative resources as there had been under the previous regime. The Party of Regions and the bloc of former Prime Minster Tymoshenko

(BYuT), whose government the President dismissed in September 2005, finished ahead of the pro-presidential Our Ukraine bloc. Other parties passing the 3% threshold to enter parliament were the Socialist Party of Ukraine and the Communist Party of Ukraine. No party held the majority of Rada seats needed to form a government. Following four months of difficult negotiations, the Anti-Crisis Coalition was formed by Party of Regions, the Socialists, and the Communists. The new coalition formed a government, confirmed August 4, 2006, led by Prime Minister Yanukovych. This, the first government formed after the extensive constitutional amendments brokered as part of the Orange Revolution, saw the Prime Minister's influence and power growing, often at the expense of the President.

On April 3, 2007, President Yushchenko dissolved the Supreme Rada and called for preterm elections. Months of political stalemate followed, with the Anti-Crisis Coalition continuing to hold Rada sessions, even after opposition parties Our Ukraine and BYuT resigned their seats and deprived the parliament of a constitutional quorum. On May 27, Yushchenko, Yanukovych, and Rada Speaker Moroz reached a political agreement on new elections, which were held September 30, 2007. International observers judged this vote to be in line with international democratic standards. Once again, Party of Regions finished in first place, but BYuT gained eight percentage points over its 2006 results, for a strong second-place finish. As a result, BYuT and Our Ukraine, which came in a distant third, garnered enough votes to form a thin three-seat majority. The Communist Party and Bloc Lytvyn, headed by former Rada Speaker Volodymyr Lytvyn, also crossed the 3% threshold.

The new coalition nominated Yuliya Tymoshenko as Prime Minister; she was confirmed December 18, 2007. The rest of the cabinet is split 50-50 between representatives from BYuT and Our Ukraine (which is now called Our Ukraine-People's Self Defense.) So far, Prime Minister Tymoshenko and President Yushchenko are cooperating more constructively than they did in 2005 as they tackle an ambitious agenda of reforms and Euro-Atlantic integration.

Security forces are controlled by the president, although they are subject to investigation by a permanent parliamentary commission. Surveillance is permitted for reasons of national security.

After independence, Ukraine established its own military forces of about 780,000 from the troops and equipment inherited from the Soviet Union. Under defense reform legislation passed in 2004, Ukraine is strengthening civilian control of the military, professionalizing its noncommissioned officer (NCO) corps, modernizing force structure to improve interoperability with NATO, and reducing troop numbers, all with an eye toward achieving NATO standards. Current force levels are approximately 225,000 (plus 90,000 civilian workers in the Ministry of Defense). The Ministry of Defense plans to continue force reductions by approximately 20,000 personnel per year to reach a final end state of 143,000 by 2011. Ukraine's stated national policy is Euro-Atlantic integration, including with both NATO and the European Union (EU). NATO offered Ukraine an "Intensified Dialogue on Membership Issues" in April 2005. Ukraine had previously signed an agreement with NATO on using Ukraine's strategic airlift capabilities and has been an active participant in Partnership for Peace exercises, in Balkans peacekeeping, and Coalition operations in Iraq. Ukrainian units have been serving in the U.S. sector in Kosovo, and served in the Polish-led division in Iraq. Currently, Ukraine participates in six United Nations peacekeeping missions and has up to 50 troops serving in supporting roles in Iraq. In January 2008 Ukraine formally requested a NATO Membership Action Plan, noting that a final decision on membership would be determined by a national referendum.

Principal Government Officials

Last Updated: 11/12/08

Pres.: **Viktor YUSHCHENKO**

ECONOMY

With rich farmlands, a well-developed industrial base, highly trained labor, and a good education system, Ukraine has the potential to become a major European economy. After eight straight years of sharp economic decline from the early to late 1990s, the standard of living for most citizens declined more than 50%, leading to widespread poverty. Beginning in 2000 economic growth has averaged over 7% per year, reaching 12.1% in 2004 and 7.2% in 2007. Personal incomes are rising. The macro economy is stable, with the hyperinflation of the early post-Soviet period gone, although inflation did accelerate from 11.6% to 16.6% in 2007. Ukraine's currency, the hryvnia, was introduced in September 1996 and has remained stable despite a small nominal appreciation in April 2005. While economic growth continues, Ukraine's long-term economic prospects depend on acceleration of market reforms. The economy remains burdened by excessive government regulation, corruption, and lack of law enforcement, and while the government has taken steps against corruption and small and medium enterprises have been largely privatized, much remains to be done to restructure and privatize key sectors such as energy and telecommunications and to allow the free sale of farmland.

Ukraine is rich in natural resources. It has a major ferrous metal industry, producing cast iron, steel, and steel pipe, and its chemical industry produces coke, mineral fertilizers, and sulfuric acid. Manufactured goods include airplanes, turbines, metallurgical equipment, diesel locomotives, and tractors. It also is a major producer of grain, sunflower seeds, and beet sugar and has a broad industrial base, including much of the former U.S.S.R.'s space and rocket industry. Although proven onshore and offshore oil and natural gas reserves are small, there is now petroleum exploration interest in the Ukrainian portion of the Black Sea. It has important energy sources, such as coal, and large mineral deposits, and is one of the world's leading energy transit countries, providing transportation of Russian and Caspian oil and gas across its territory.

Ukraine encourages foreign trade and investment. Foreigners have the right to purchase businesses and property, to repatriate revenue and profits, and to receive compensation in the event that property were to be nationalized by a future government. However, complex laws and regulations, poor corporate governance, weak enforcement of contract law by courts and particularly corruption have discouraged broad foreign direct investment in Ukraine. While there is a functioning stock market, the lack of protection for minority shareholder rights severely restricts portfolio investment activities. Total foreign direct investment in Ukraine was approximately $26.9 billion as of October 1, 2007. At $581 per capita, this was one of the lowest figures in the region.

While countries of the former Soviet Union remain important trading partners, especially Russia and Turkmenistan for energy imports, Ukraine's trade is becoming more diversified. Europe is now the destination of about one-third of Ukraine's exports, while around one-quarter of Ukraine's exports go to Russia and the CIS. Steel constitutes nearly 40% of exports. Ukraine imports almost 80% of its oil and 77% of its natural gas. Russia ranks as Ukraine's principal supplier of oil and Russian firms now own and/or operate the majority of Ukraine's refining capacity. Natural gas imports, which are brokered through the intermediary company RosUkrEnergo, currently come from Russia, Turkmenistan, Kazakhstan, and Uzbekistan, which deliver the gas through a pipeline system owned and controlled by Gazprom, Russia's state-owned gas monopoly. In 2005 and 2006, Ukraine switched from barter to cash payments for gas imports. Ukraine controls the gas pipelines on its territory that are also used to transit Russian gas to Western Europe. The complex relationship between supplier, transporter, and consumer has led to some tensions, including Russia's decision to cut off gas supplies for three days in January 2006 and for three days in March 2008.

In 1992, Ukraine became a member of the International Monetary Fund (IMF) and the World Bank. The Government of Ukraine's 12-month $605 million precautionary standby agreement with the IMF expired in March 2005, and Ukraine currently does not receive IMF financing. In Article IV Consultations, the IMF recommends fiscal discipline and structural reforms, particularly of Ukraine's pension system. In July 2005, the World Bank approved a $250 million Development Policy Loan (formerly a Programmatic Adjustment Loan) to support reforms to improve the investment climate, public administration and financial management, and social inclusion. European Bank for Reconstruction and Development (EBRD) project outlays increased by 51% in 2006 to 797 million Euros, bringing its portfolio to 2.86 billion Euros.

Ukraine is a member of the EBRD but not a member of the World Trade Organization (WTO). Ukraine applied for membership in the WTO in 1995 and has made significant progress in recent years. Accession to the WTO is expected to occur in 2008.

Environmental Issues

Ukraine is interested in cooperating on regional environmental issues. Conservation of natural resources is a stated high priority, although implementation suffers from a lack of financial resources. Ukraine established its first nature preserve, Askania-Nova, in 1921 and has a program to breed endangered species.

Ukraine has significant environmental problems, especially those resulting from the Chornobyl nuclear power plant disaster in 1986 and from industrial pollution. In accordance with its agreement with the G7 and European Commission in 1995,

Ukraine permanently closed the Chornobyl Nuclear Power Plant in December of 2000. Urgent measures for radiation and worker safety as well as structural stabilization measures to the "sarcophagus" erected by the Soviet Union are largely complete, and the contract for construction of the new shelter to be built around the sarcophagus was awarded in September 2007.

Ukraine also has established a Ministry of Environment and has introduced a pollution fee system, which levies taxes on air and water emissions and solid waste disposal. The resulting revenues are channeled to environmental protection activities, but enforcement of this pollution fee system is lax. Ukraine ratified the Kyoto Protocol in April 2004.

Construction of a shipping canal through a UN-protected core biosphere reserve in the Danube Delta, which began in May 2004, is an environmental issue of international interest.

FOREIGN RELATIONS

The government has declared Euro-Atlantic integration to be its primary foreign policy objective and has sought to maintain good relations with Russia. The European Union's Partnership and Cooperation Agreement (PCA) with Ukraine went into force on March 1, 1998. After the 2004 round of EU expansion, the EU did not signal a willingness to consider Ukraine for an association agreement, as Ukraine had hoped for, but instead included it in the European Neighborhood Policy, disappointing many Ukrainians. The EU and Ukraine are negotiating a "new enhanced agreement," which could also incorporate a free trade agreement that would be established after Ukrainian WTO accession. On January 31, 1992, Ukraine joined the then-Conference on Security and Cooperation in Europe (now the Organization for Security and Cooperation in Europe—OSCE), and on March 10, 1992, it became a member of the North Atlantic Cooperation Council. Ukraine signed a Charter Agreement with NATO in 1997, sent troops to Kosovo in close cooperation with NATO countries, signed an agreement for NATO use of Ukrainian strategic airlift assets, and has declared interest in eventual membership. It is the most active member of the Partnership for Peace (PfP). In April 2005, NATO offered an "Intensified Dialogue on Membership Issues" to Ukraine, and in January 2008 Ukraine requested a NATO Membership Action Plan.

Ukraine maintains peaceful and constructive relations with all its neighbors, though there are some unresolved maritime issues along the Danube and in the Black Sea with Romania; it has especially close ties with Poland and Russia. Relations with Russia are complicated by differing foreign policy priorities in the region, energy dependence, payment arrears, disagreement over compliance with the 1997 agreement on the stationing of the Russian Black Sea Fleet in Sevastopol, and a dispute over bilateral boundaries in the Sea of Azov and the Kerch Strait. Ukraine co-founded the Commonwealth of Independent States (CIS) on December 8, 1991, but in January 1993 it refused to endorse a draft charter strengthening political, economic, and defense ties among CIS members. Ukraine was a founding member of GUAM (Georgia-Ukraine-Azerbaijan-Moldova) and has taken the lead with Georgia to promote cooperation among emerging democracies in the Community for Democratic Choice, which held its first summit meeting December 1-2, 2005 in Kyiv.

In 1999-2001, Ukraine served as a non-permanent member of the UN Security Council. Soviet Ukraine joined the United Nations in 1945 as one of the original members following a Western compromise with the Soviet Union, which had asked for seats for all 15 of its union republics. Ukraine has consistently supported peaceful, negotiated settlements to disputes. It has participated in the five-sided (now "5+2") talks on the conflict in Moldova and under President Yushchenko has actively boosted efforts to seek a resolution. Ukraine has also promoted a peaceful resolution to conflict in the post-Soviet state of Georgia and has advocated a return to democracy in neighboring Belarus. Ukraine has also made a substantial contribution to UN peacekeeping operations since 1992.

U.S.-UKRAINIAN RELATIONS

The dissolution of the Soviet Union in December 1991 brought an end to the Cold War and created an opportunity to build bilateral relations with the New Independent States (NIS) as they began a political and economic transformation. On December 25, 1991, the United States officially recognized the independence of Ukraine. It upgraded its consulate in the capital, Kyiv, to embassy status on January 21, 1992. The U.S. ambassador to Ukraine is William B. Taylor, the sixth U.S. ambassador since Ukrainian independence.

The United States attaches great importance to the success of Ukraine's transition to a democratic state with a flourishing market economy. Following a period of economic decline characterized by high inflation and a continued reliance on state controls, the Ukrainian Government began taking steps in the fall of 1999 to reinvigorate economic reform. Ukraine's democratic "Orange Revolution" has led to closer cooperation and more open dialogue between Ukraine and the United States. The United States granted Ukraine market economy status in February 2006. In March 2006, the United States terminated the application of the Jackson-Vanik amendment to the Trade Act of 1974 to Ukraine, providing Ukraine permanent normal trade relations status. U.S. policy remains centered on realizing and strengthening a democratic, prosperous, and secure Ukraine more closely integrated into Europe and Euro-Atlantic structures.

U.S. Assistance to Ukraine

A cornerstone for the continuing U.S. partnership with Ukraine and the other NIS has been the Freedom for Russia and Emerging Eurasian Democracies and Open Markets (FREEDOM) Support Act (FSA), enacted in October 1992. Ukraine has been a primary recipient of FSA assistance. Total U.S. assistance since independence has been more than $3 billion. U.S. assistance to Ukraine is targeted to promote political, security, and economic reform and to address urgent health and humanitarian needs. The U.S. has consistently encouraged Ukraine's transition to a democratic society with a prosperous market-based economy. For more detailed information on these programs, please see the "Annual Report to Congress on U.S. Government Assistance to and Cooperative Activities with Eurasia," which is available on the State Department's website at the following address: http://www.state.gov/p/eur/ace. Information is also available on USAID's website at the address: http://www.usaid.gov.

In November 2006, the Millennium Challenge Corporation (MCC) selected Ukraine to be eligible to apply for compact assistance. Ukraine already participates in the MCC Threshold Program, and in December 2006 signed a $45 million Threshold Program agreement. This program, which began implementation in early 2007, aims to reduce corruption in the public sector through civil society monitoring and advocacy, judicial reform, increased government monitoring and enforcement of ethical and administrative standards, streamlining and enforcing regulations, and combating corruption in higher education. Ukraine is beginning the process of developing a Compact proposal, and successful implementation of the Threshold Program will be necessary before the MCC will enter into a Compact with Ukraine. Information is also available on the MCC website at the following address: http://www.mcc.gov.

TRAVEL

Consular Information Sheet

October 29, 2008

Country Description: Ukraine is undergoing profound political and economic change as it moves from its Soviet past toward a market economy, multi-party democracy, and integration into Euro-Atlantic and other international institutions. In recent years, the availability of goods and services has increased along with increased rates of growth in Ukraine's economy, and facilities for travelers have improved somewhat. Nonetheless, the availability of travel and tourist services remains uneven throughout the country, and Ukraine still lacks the abundance of many of the goods and services taken for granted in other countries.

Entry Requirements: A passport valid for six months beyond the planned date of travel is required for entry. U.S. citizens are exempt from the requirement to have a Ukrainian visa as long as the duration of their stay in Ukraine does not exceed 180 days and the purpose of their travel is tourism, private travel, or business. U.S. citizens whose planned stay in Ukraine exceeds 180 days must have visas authorizing their entry into Ukraine. If the purpose of their visit is other than tourism, private travel, or business, an appropriate visa must be obtained regardless of the length of stay. The Government of Ukraine does not issue visas at its borders or ports of entry. Visas must be obtained in advance by those who need them.

U.S. citizens may apply for all types of visas through Ukrainian Embassies and Consulates overseas. Contact details for Ukrainian Embassies and Consulates are available on the Ministry of Foreign Affairs web site at http://www.mfa.gov.ua/mfa/en/305.htm or http://www.mfa.gov.ua/mfa/en/403.htm.

Visas may also be obtained from the Consular Office of the Embassy of Ukraine in Washington, D.C., or from Ukrainian Consulates General in New York, Chicago, or San Francisco.

Visas may be obtained from the Consular Office of the Embassy of Ukraine in Washington, D.C., or from Ukrainian Consulates General in New York, Chicago, or San Francisco. For additional information about Ukrainian visas and related policy, please contact the Ukrainian Embassy or Consulate nearest you.

Embassy of Ukraine
3350 M Street, NW
Washington, D.C. 20007
Tel: (202) 333-0606
Fax: (202) 333-0817
Website: http://www.mfa.gov.ua/usa/en

Consulate General of Ukraine in New York
240 East 49th Street
New York, NY 10017
Tel: (212) 371-5690

Consulate General of Ukraine in Chicago
10 East Huron St.
Chicago, IL 60611
Tel: (312) 642 4388
Fax: (312) 642 4385
Web site: http://www.ukrchicago.com

Please check your visa carefully upon receipt and pay careful attention to validity dates. Each traveler is responsible for understanding the type of visa issued and the provisions of the visa. Frequently, American citizens are refused reentry into Ukraine because they thought they possessed multiple entry visas, but in fact their visas were valid for only a single entry. In some cases, Americans attempt to enter Ukraine before their visas become valid. This is a common mistake, since in Ukraine the date is written day-month-year, not month-day-year. Thus, a visa issued on 01/05/08 is valid from May 1, 2008 and NOT from January 5, 2008. Such travelers can be detained at the port of entry, refused admission, and sent back to the country from which they traveled. The U.S. Embassy in Kyiv is unable to assist travelers in these situations.

American citizens traveling to or staying in Ukraine are reminded of the recent changes to Ukrainian Immigration Law. Mandatory registration for short-term visits of up to 180 days is completed at the border by border control offices and is valid for a period of 180 days in one year. In other words, a traveler may come to Ukraine as a tourist for a cumulative period of 180 days within a consecutive period of 360 days without a visa. The calculation of the 180-day period begins from the date of the first entry into Ukraine. This regulation applies to all American citizens irrespective of the date of their entry into Ukraine.

Future extensions for stays exceeding 180 days are completed through the Ukrainian Ministry of Internal Affairs' Office of Citizenship, Immigration and Registration (OVIR). Most cities have several OVIR offices. Extensions are not automatic, however, and are valid only for continued presence in the country. It is not possible to depart Ukraine and return on the extension, nor can an adjustment to visa status be made from within Ukraine. Applications for extension of registration should be submitted at least three days before the current registration expires.

Travelers who intend to visit Russia from Ukraine must also have a Russian visa. The Consular Section of the Russian Embassy in Ukraine is located at Prospekt Kutuzova 8, tel.: (380-44) 284-6816, fax 284-7936, e-mail: general@rucons.kiev.ua, http://www.embrus.org.ua.

Visitors to Ukraine should note that Ukrainian law requires them to obtain mandatory health insurance. For more information see the section on Medical Insurance below.

Visit the Embassy of Ukraine's web site at http://www.mfa.gov.ua/usa/en/1609.htm for the most current visa information. Also, see the Ukrainian Ministry of Foreign Affairs' web site at http://www.mfa.gov.ua/usa/en or http://www.ukraineinfo.org.

Safety and Security: Ukraine is largely free of significant civil unrest or any organized anti-American domestic political movements. Occasionally, mass demonstrations occur in larger cities, such as Kyiv, and are usually sponsored by individual political organizations. There has been an upsurge in the number of anti-NATO protests; these protests are likely to increase in size and frequency as Ukraine pursues closer ties to the alliance. While the majority of these protests are small and peaceful, they can still result in violence and it is best to avoid such gatherings.

There also have been increasing incidents of racially-motivated violence; groups of "skinheads" and neo-Nazis target people of Asian, African, or other non-European descent, as well as religious minorities, in Kyiv and throughout Ukraine (see the section on Crime below).

For the latest security information, Americans traveling abroad should regularly monitor the Department's web site where the current Travel Warnings and Travel Alerts, including the Worldwide Caution Travel Alert, can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S., or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: Ukraine is undergoing a significant economic, political, and social transformation, and income disparities have grown sharply. As a result, foreign visitors may be perceived as wealthy and easy targets for criminals. Americans often stand out in Ukraine, and are therefore more likely to be targeted than in Western European countries, where incomes are higher and Americans may blend in better.

Most street crime ranges from various scams, simple pocket picking, purse snatching, and theft of personal items from parked cars, to mugging, armed robbery, or the drugging of unsuspecting victims at nightspots and bars (where they are then robbed). Cases of assaults in apartment building corridors, elevators, and stairwells, as well as armed break-ins and crimes involving small caliber firearms have been reported.

A commonly reported scam in Kyiv is"The Wallet Scam," which involves a person dropping a wallet or a packet of money near a potential victim. After the victim picks up the wallet and attempts to return it to the individual who "dropped" it, the perpetrator then claims that the wallet is missing money and accuses the victim of stealing it. The perpetrator either threatens to call the police if the victim does not pay, or asks the victim to show his or her wallet to the perpetrator to ensure that the victim did not take any money. When the victim produces his or her wallet, the perpetrator grabs the money and

flees. Another variant involves a second person who claims to be a police officer and who approaches the victim after the wallet has been picked up. This second person also asks to see the wallet, grabbing the money and fleeing or, through sleight-of-hand, stealing the victim's money.

While most travelers do not encounter problems with crime in Ukraine, there has been an increase in the number of hate crimes directed at ethnic and religious minorities over the past few years. Many of these incidents are conducted by "skinheads" or neo-Nazis in Kyiv, but similar crimes have also been reported throughout the country. In Kyiv, these incidents have occurred without provocation in prominent downtown areas commonly frequented by tourists. While the majority of people targeted have been of Asian, African, or other non-European descent, all travelers should exercise caution. In addition to incidents of assault, racial minorities may be subject to various types of harassment, such as being stopped on the street by both civilians and law enforcement officials. Individuals belonging to religious minorities have also been harassed and assaulted in Kyiv and throughout Ukraine.

The police and government's slow response to hate crimes is a continuing concern. Although senior Government of Ukraine officials (including the President and Prime Minister) have publicly deplored these hate crimes and groups, Ukrainian street-level law enforcement activities are unable to effectively deter hate crimes or adequately protect racial minorities. The Embassy has received numerous reports from victims of violent hate crimes, as well as from bystanders, stating that uniformed police officers observed the assaults and did nothing to prevent the attacks, to assist the victims afterward, or to investigate and apprehend the attackers. The Government of Ukraine took initial steps to address the problem in the final months of 2007 with the establishment of special law enforcement units to prevent and investigate hate crimes in Ukraine. It remains to be seen if these units will be effective. Credit card and ATM fraud is an issue. Ukraine generally operates as a cash economy, and money scams are widespread. Although credit card and ATM use among Ukrainians is increasingly common, it is nevertheless strongly recommended that visitors and permanent residents of Ukraine exercise caution when using credit cards or ATM cards at any establishment in Ukraine.

Burglaries of apartments and vehicles represent a significant threat to long-term residents. Although few cars are actually stolen, primarily because of increased use of alarm systems and security wheel locks, vehicular break-ins and vehicular vandalism are common.

Ukraine lacks reliable tourist and travel services for foreign victims of crime. Transferring funds from the United States, replacing stolen traveler's checks or airline tickets, or canceling credit cards can be difficult and time consuming. There are few safe low-cost lodgings, such as youth hostels. Public facilities in Ukraine are generally not equipped to accommodate persons with physical disabilities.

Over the past several years, the Embassy has received a number of reports of harassment and intimidation directed against foreign businesspersons and interests. While these reports have become much less frequent in recent years, they have not ended entirely. Reported incidents range from physical threats (possibly motivated by rival commercial interests tied to organized crime), to local government entities engaging in such practices as arbitrary termination or amendment of business licenses, dilution of corporate stock to diminish U.S. investor interest, delays of payment or delivery of goods, and arbitrary "inspections" by tax, safety or other officials that appear designed to harm the business rather than a genuine attempt at good governance. American businesses and other private sector organizations are also encouraged to read the most recent Overseas Security Advisory Council (OSAC) Annual Crime and Safety Report for Ukraine at https://www.osac.gov. The Embassy suggests refraining from wiring money unless the recipient is well-known and the purpose of business is clear. American citizens have reported transferring money to Ukraine to pay for goods purchased from residents of Ukraine via online auction sites, but never receiving the goods in return. The Embassy regularly receives complaints from Americans regarding scams involving marriage and dating services. Numerous Americans have lost money to agencies and individuals that claimed they could arrange for student or fiancée visas to the U.S. Additional information is available on our web site in a document titled "Marriage Brokers" at http://kyiv.usembassy.gov and on the Department of State's web site under Ukraine: Internet and Other Fraud Schemes.

In many countries around the world, counterfeit and pirated goods are widely available. Transactions involving such products may be illegal under local law. In addition, bringing them back to the United States may result in forfeitures and/or fines. More information on this serious problem is available at http://www.cybercrime.gov/18usc2320.htm.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to both the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you in finding appropriate medical care, contacting family members or friends and explaining how funds could be transferred. Although the investigation and prosecution of a crime abroad is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to provide a list of local attorneys who have informed the Embassy that they are willing to take foreign clients.

There is no local equivalent to the "911" emergency line in Ukraine. There are emergency numbers to call in case of:

Fire–01
Police–02
Ambulance–03

If dialing from a cellular phone, dial 101, 102, or 103 respectively or call the cellular phone operator for assistance.

Visitors should be aware that Ukrainian police and emergency services still generally remain below Western European and U.S. standards in terms of training, responsiveness, and effectiveness. American citizens have reported waiting sometimes hours for Ukrainian police and ambulance services to respond to calls for emergency assistance. Although this may be atypical, it does nevertheless occur.

Medical Facilities and Health Information: The Embassy recommends that ill or infirm persons not travel to Ukraine. Elderly travelers and those with existing health problems may be at risk due to inadequate medical facilities. The U.S. Embassy maintains a list of hospitals and clinics with some English-speaking staff at http://kyiv.usembassy.gov/amcit_medical_serv_eng.html. Many facilities have only limited English speakers. There are no hospitals in Ukraine which accept American health insurance plans for payment, and the level of medical care is not equal to that found in American hospitals. (Some facilities are adequate for basic services. Basic medical supplies are available; however, travelers requiring prescription medicine should bring their own. When a patient is hospitalized, the patient, relative, or acquaintance must supply bandages, medication, and food. The Embassy also recommends that travelers obtain private medical evacuation insurance prior to traveling to Ukraine.

Medical evacuation remains the best way to secure western medical care. This option, however, is very expensive and could take at least several hours to arrange. Travelers may wish to purchase medical evacuation insurance prior to travel, or have access to substantial lines of credit to cover the cost of medical evacuation. The Consular Section of the U.S. Embassy has information on various air ambulance companies that perform medical evacuations to Europe or to the U.S. at http://kyiv.usembassy.gov/amcit_medical_evac_eng.html. Serious medical problems requiring hospitalization and/or medical evacuation to other European countries can cost from $25,000 to $50,000, and to the U.S. as much as $70,000 or more. More information can be found on the U.S. Embassy's web site in the document "Medical Services in Kyiv," at http://kyiv.usembassy.gov/amcit_medical_eng.html.

In December 2005, Ukraine reported the first cases of H5N1 ("avian influenza," "avian flu," "bird flu," "chicken flu") among birds in Crimea. Further outbreaks followed in 2006. On January 18, 2008, another outbreak of the H5N1 avian influenza virus was detected at a poultry farm in the Krasnogvardiyskyi Rayon in Crimea. There are no registered human cases of H5N1 in Ukraine.

The U.S. Department of State is unaware of any HIV/AIDS entry restrictions for visitors to Ukraine. HIV/AIDS and/or tuberculosis positive applicants cannot obtain permanent residency status in Ukraine, and waivers are not granted.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's web site. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site. Further health information for travelers is available at http://www.who.int/ith.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

The Ukrainian parliament passed a law in 1997 whereby all visitors to Ukraine are required to obtain mandatory health insurance. According to information from the Ukrainian authorities, the cost of this medical insurance depends on the anticipated length of a foreigner's stay in Ukraine. The cost for the insurance is approximately 25 cents per day (more for short stays). This required insurance can be purchased after arrival and covers only the costs of basic medical care inside Ukraine; it does not cover medical evacuation. Failure to purchase mandatory health insurance often results in refusal of treatment at Ukrainian public hospitals and clinics. Private clinics do not require Ukrainian public health insurance, but can be as expensive as similar clinics in the United States and may require payment in advance. More information can be found online in Ukrainian at http://www.pro100.com.ua, or by calling +38 (044) 206 2885 from abroad or 8-800-500-1080 from within Ukraine.

Radiation and Nuclear Safety: In 1986, the Chornobyl incident resulted in the largest short-term, unintentional, accidental release of radioactive materials to the atmosphere ever recorded. The highest areas of radioactive ground contamination occurred within thirty kilometers of the Chornobyl nuclear power station. The city of Kyiv was not badly affected because of the wind direction, but it was not completely spared. The last operating reactor at the Chornobyl Nuclear Power Plant site closed officially on December 15, 2000. All identified stabilization measures on the existing sarcophagus are complete, and preparatory work to start construction of the new shelter is almost nearing completion. The contract for the new Chornobyl shelter was awarded in September 2007 and its construction is projected to be completed in 2012. The Ukrainian government has an effective program

of monitoring fresh foods and meats sold in local markets. Street purchase of produce should be avoided. Wild berries, mushrooms, and wild fowl and game should be avoided, as these have been found to retain higher than average levels of radiation. Background levels of radiation are monitored regularly by the Embassy and, to date, have not exceeded the level found on the Eastern seaboard of the United States. If external radiation levels are high enough to require evacuation, the U.S. Embassy will notify the American community through the Embassy warden e-mail and text messaging system.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Ukraine is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

Generally, roads in Ukraine outside major urban areas are in poor condition and are poorly lit. Visitors should drive defensively at all times, since local drivers often disregard traffic rules. Drivers are often poorly trained or drive without a valid driver's license. Drivers can also be very aggressive, and they normally do not respect the rights of pedestrians, even at clearly marked pedestrian crossings. Pedestrians should also be aware of cars driving or attempting to park on sidewalks. Many cars do not meet the safety standards common in America.

Due to heavy traffic and congested roads, vehicle accidents are a common occurrence in larger Ukrainian cities, especially in Kyiv. In Ukraine, it is mandatory for motorists involved in vehicle accidents not to remove the vehicle from the site of the accident, unless it presents a clear safety concern. Local police must be notified and will report to the scene to conduct an investigation. Persons should be prepared to wait until the police arrive and complete their report. Due to traffic and slow response, it may take up to several hours for police to arrive. When police arrive, they will ascertain responsibility, take the drivers' personal information, and file a report of the accident.

Cross-country travel at night and in winter can be particularly dangerous. The Embassy strongly recommends that visitors and permanent residents of Ukraine refrain from driving their private vehicles after dark outside of major cities. However, major roads are drivable during daylight hours. Roadside services such as gas stations and repair facilities are becoming more common, particularly on the main national and regional overland highways and in large and mid-size cities.

Nonetheless, such services are far from American standards, and travelers should plan accordingly. There have been isolated reports of carjackings of western-made or foreign-registered cars. There has also been an increase in the number of documented reports of criminal acts (primarily theft) occurring on trains and other modes of public transport.

Aviation Safety Oversight: The U.S. Federal Aviation Administration (FAA) has assessed the Government of Ukraine's Civil Aviation Authority as not being in compliance with International Civil Aviation Organization (ICAO) aviation safety standards for the oversight of Ukraine's air carrier operations. For more information, travelers may visit the FAA's web site.

Special Circumstances: Ukraine does not recognize dual nationality. American citizens entering Ukraine with a Ukrainian passport will be treated as Ukrainian citizens by the local authorities. This may include being required to perform mandatory military service. Also, Ukrainians who have immigrated to the U.S. without obtaining the proper exit visa from Ukrainian authorities may be subject to civil or criminal penalties, and will be required to obtain an exit visa before returning to the U.S.

Ukraine is a cash economy. Traveler's checks and credit cards are gaining wider acceptance in larger cities. Even in Kyiv, however, acceptance of credit cards is not nearly as widespread as in the U.S. or in Western European countries. Expect credit card use to be limited to some hotels, upscale restaurants, international airlines, and the rapidly growing, but still select number of up-market stores.

Exchanging U.S. dollars into the national Ukrainian currency, hryvnya, is simple and unproblematic, as licensed exchange booths are widespread, and exchange rates are normally clearly advertised. Currency exchange is only legal at such licensed exchange booths, banks, and currency exchange desks at hotels; anyone caught dealing on the black market can expect to be detained by the local militia.

There are many banks and licensed currency exchange booths located in major cities. ATMs (a.k.a. bankomats) are becoming more common throughout Ukraine, particularly in Kyiv and in other larger cities. In smaller cities and towns, ATMs are still virtually non-existent. Most ATMs disperse cash only in the local currency, hryvnya. The difficulties of a currency shortage can be avoided by coming to Ukraine with a sufficient supply of hard currency to cover necessary obligations during travel. Funds may be transferred by wire, advances may be drawn on credit cards, and traveler's checks may be cashed at many locations. Again, the Embassy emphasizes that the incidence of credit card and ATM bankcard fraud is high, and strongly recommends that visitors and permanent residents of Ukraine refrain from using credit cards or ATMs.

Customs regulations prohibit sending cash, traveler's checks, personal checks, credit cards, or passports or other forms of identification through the international mail system, as well as via courier mail (FedEx, DHL, etc.). Customs authorities regularly confiscate these items as contraband. Ukrainian customs authorities may also enforce strict regulations concerning temporary importation into or export from Ukraine of items such as firearms, antiquities, currency, etc. It is advisable to contact the Embassy

of Ukraine in Washington, or one of Ukraine's consulates in the United States for specific information regarding customs requirements. As in many countries around the world, counterfeit and pirated goods are widely available. Transactions involving such products are illegal and bringing them back to the United States may result in forfeitures and/or fines.

Ukrainian law requires that travelers declare all cash and jewelry, regardless of value, upon entering Ukraine. Travelers should fill out a customs declaration and ask customs officials to stamp it. According to Ukrainian law, foreign citizens may bring up to $15,000 in cash, or up to $30,000 in traveler's checks, into Ukraine without a special license. A traveler must declare the imported currency. If customs officials determine that a traveler entering or exiting the country is carrying undeclared currency, they can and often do confiscate the undeclared funds. When leaving the country, foreign travelers are only allowed to take out a maximum of $3,000 in cash, or as much cash as they declared upon their entry into Ukraine. If a traveler wants to take out more than $3,000, the traveler must have a customs declaration proving that he or she in fact brought the corresponding sum of money into the country.

Travelers desiring to bring more than $15,000 into Ukraine must obtain a special license AFTER entering the country.

Special Circumstances: Ukraine does not recognize dual nationality. American citizens entering Ukraine with a Ukrainian passport will be treated as Ukrainian citizens by the local authorities. This may include being required to perform mandatory military service. Also, Ukrainians who have immigrated to the U.S. without obtaining the proper exit visa from Ukrainian authorities may be subject to civil or criminal penalties, and will be required to obtain an exit visa before returning to the U.S. For additional information, see our dual nationality information. Under Ukrainian law, Ukrainian police are permitted to stop anyone for any reason and check his/her identification documents. Ukrainian police may check foreigners' passports to verify their legal presence in Ukraine. Ukrainian law requires foreign visitors to carry their passports and immigration cards with them at all times and these are the only two documents that will be recognized by Ukrainian police. Police are further permitted to detain anyone for up to 72 hours without formal charges.

Ukraine is a cash economy. Traveler's checks and credit cards are gaining wider acceptance in larger cities. Even in Kyiv, however, acceptance of credit cards is not nearly as widespread as in the U.S. or in Western European countries. Expect credit card use to be limited to major hotels, upscale restaurants, international airlines, and the rapidly growing, but still select number of up-market stores.

Exchanging U.S. dollars into the national Ukrainian currency, hryvnya, is simple and unproblematic, as licensed exchange booths are widespread, and exchange rates are normally clearly advertised. Currency exchange is only legal at such licensed exchange booths, banks, and currency exchange desks at hotels; anyone caught dealing on the black market can expect to be detained by the local militia.

There are many banks and licensed currency exchange booths located in major cities. ATMs (also called bankomats) are becoming more common throughout Ukraine, particularly in Kyiv and in other larger cities. In smaller cities and towns, ATMs are still virtually non-existent. Most ATMs disperse cash only in the local currency, hryvnya. The difficulties of a currency shortage can be avoided by coming to Ukraine with a sufficient supply of hard currency to cover necessary obligations during travel. Funds may be transferred by wire, advances may be drawn on credit cards, and traveler's checks may be cashed at many locations. Again, the Embassy emphasizes that the incidence of credit card and ATM card fraud is high, and urges visitors and permanent residents of Ukraine to exercise caution when using local ATMs at any establishment in Ukraine.

Customs regulations prohibit sending cash, traveler's checks, personal checks, credit cards, passports, or other forms of identification through the international mail system, as well as via courier mail (FedEx, DHL, etc.). Customs authorities regularly confiscate these items as contraband. Ukrainian customs authorities may also enforce strict regulations concerning temporary importation into or export from Ukraine of items such as firearms, antiquities, currency, etc. It is advisable to contact the Embassy of Ukraine in Washington, or one of Ukraine's consulates in the United States for specific information regarding customs requirements. State Customs Service of Ukraine can also be contacted for advice at (38 044) 249 9284 or (38 044) 522 8169. The web site is http://www.customs.gov.ua/dmsu/control/uk/index. Operators speak only Ukrainian or Russian. As in many countries around the world, counterfeit and pirated goods are widely available. Transactions involving such products are illegal and bringing them back to the United States may result in forfeitures and/or fines.

A traveler may take up to EUR 10,000 or its equivalent into or out of Ukraine. To transport a greater amount, proof of the source of the money (a bank reference) must be presented, or travelers face forfeiture to Ukrainian customs and a court appearance. Currency must be declared before checking in at airports.

Ukraine has strict limitations for the export of antiques and other goods and artifacts deemed to be of particularly important historical or cultural value. This includes, but is not limited to, any items produced before 1950. American citizens must adhere to these restrictions as a matter of law. Please contact the Kyiv Department of Culture, Expertise Section at (38-044) 279-6109 or (38-044) 279-5647, if you have any questions

regarding items you own, wish to purchase, and/or plan to export. It is advisable to contact the Embassy of Ukraine in Washington, or one of Ukraine's consulates in the United States, for specific information regarding customs requirements.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses.

Persons violating Ukraine's laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Ukraine are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in Ukraine are encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration web site and to obtain updated information on travel and security within Ukraine. Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency.

The Consular Section of the U.S. Embassy is located at #6 Mykoly Pymonenka St., 01901 Kyiv, Ukraine. Telephone: (38-044) 490-4422, fax 486-3393. The Embassy is located at #10 Yuriy Kotsyubynsky St. 01901 Kyiv, Ukraine. Tel.: (38-044) 490-4000.

Intercountry Adoption

November 2008

The information in this section has been edited from a report available through the U.S. Department of State Office of Children's Issues.

For more information detailed, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Ukraine is not party to The Hague Convention on Protection of Children and Co-operation in Respect of Intercountry Adoption (Hague Adoption Convention).

Who Can Adopt? To bring an adopted child to United States from Ukraine, you must be found eligible to adopt by the U.S. Government. The U.S. Government agency responsible for making this determination is the Department of Homeland Security, U.S. Citizenship and Immigration Services (USCIS). For detailed information on these requirements for adoption, please review the *Intercountry Adoption* section of this publication and visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

In addition to these U.S. requirements for prospective adoptive parents, Ukraine also has the following requirements for prospective adoptive parents:

Residency Requirements: There are no residency requirements for intercountry adoption from Ukraine.

Age Requirements: Under a Ukrainian law which came into effect on April 24, 2008, prospective adoptive parents must be at least 21 years old, and at least 15 years older, but not more than 45 years older than the adopted child. If only one of the adoptive parents complies with these age requirements, the adoption can be completed in the younger parent's name only. If the child is being adopted by a relative, the age difference is not considered.

Marriage Requirements: Foreign citizens must be married in order to be eligible to adopt from Ukraine.

Income Requirements: While there are no specified income requirements, prospective adoptive parents are required to submit documentation identifying their income/financial standing.

Who Can Be Adopted? Ukraine has specific requirements that a child must meet in order to be eligible for adoption. In addition to these requirements, a child must meet the definition of an orphan under U.S. law for you to bring him or her home back to the United States. Learn more about these U.S. requirements.

Ukraine's Adoption Authority: State Department for Adoptions and Protection of Rights of the Child (SDAPRC)

The Process: The first step in adopting a child from Ukraine is usually to select a licensed agency in the United States that can help with your adoption. Adoption service providers must be licensed by the U.S. state in which they operate.

To bring an adopted child from Ukraine to the United States, you must apply to be found eligible to adopt (Form I-600A) by the U.S. Government, Department of Homeland Security, U.S. Citizenship and Immigration Services (USCIS).

If you are eligible to adopt, and a child is available for intercountry adoption, the central adoption authority in Ukraine will provide you with a referral to a child. The child must be eligible to be adopted according to Ukraine's requirements. The child must also meet the definition of an orphan under U.S. law.

Role of the Adoption Authority: The SDAPRC processes the documents submitted by the prospective adoptive parents and enters them into its database (within 20 working

days). Upon approval of the application, the prospective adoptive parents receive an appointment to visit the SDAPRC to view information on eligible orphans for intercountry adoption and who are within the parents' specified age range. SDAPRC issues a letter of referral allowing the parents to visit an orphanage to meet and make contact with a child. In addition to the referral letter, the prospective adoptive parents receive their documents (bound, numbered, sealed, and signed by an official in charge of SDAPRC) along with a separate sheet specifying the number of pages and the prospective adoptive parents' registration file code.

SDAPRC officials will not meet with prospective adoptive parents who arrive without an appointment or on a day other than when their appointment is scheduled. Ukrainian law does not allow adoption intermediaries. No private interpreters or facilitators are allowed to interpret during the meetings between the prospective adoptive parents and the SDAPRC. The private interpreters can be used at later stages of the adoption process.

Role of the Court: After the parents have identified and accepted a child for adoption, the file for the case is presented to a judge in the region the child lives. The power to approve or deny an adoption lies solely with the judge who bases his or her decision on a review of various case-specific documents during the court hearing. Adoptive parents must attend the hearing. If one parent cannot be present (e.g., major surgery, disability), a judge may permit the parent to provide the power of attorney to the attending parent.

The judge's decision is announced and issued the day of the hearing. However, it will not take effect for 10 days. During the 10 days the adoption can be appealed. If an appeal application is submitted, an additional 20-day period is granted for the appellant to file his/her complete appeal. This additional time can be shortened or waived if the court finds that delaying the final court decision would be contrary to the child's best interests. Once the final decision takes effect, the adoptive parents have full parental rights and legal responsibility for the child.

Role of Adoption Agencies: As stated above, Ukrainian law does not allow adoption intermediaries.

Adoption Application: Prospective adoptive parents register with the SDAPRC.

Time Frame: Three to 12 months can pass between the prospective adoptive parents' submission of their application dossier and the SDAPRC appointment date. In addition, there is usually a three-to-four week wait between the initial filing of the adoption petition in the local court and issuance of the final adoption.

Adoption Fees: There are no Ukrainian fees except those for court filing, notarial, translator, and similar services. Adoptive parents of Ukrainian children have reported paying between $2000 and $20,000 USD to the adoption agencies for services. This payment has included lodging, transportation, authentication of Ukrainian documents, fees for expedited services, and interpretation/translation services. Some adoptive parents have reported additional and unexpected fees after arriving in Ukraine. You are advised to inform the U.S. Embassy or the Department of State of any unexpected or seemingly inappropriate fees.

Documents Required: The following is a list of the eight documents required for an intercountry adoption in Ukraine:

- Certificate of completed home study, issued by a competent authority in the prospective adoptive parents' country. If completed by a non-Governmental entity, a copy of the license authorizing this entity to conduct home studies must be included.
- Form I-171H, Notice of Approval of Advance Processing, entrance and permanent residence permit for the adopted child.
- Proof of Income, including bank statements, W-2 forms or tax returns, and a statement from the parents' employers indicating salary.
- Medical Information–A specific medical form must be completed.
- Copy of marriage certificate, if applicable.
- Copies of the passports or other identification papers of prospective adoptive parents. If one prospective adoptive parent is not an American citizen, a copy of the Permanent Resident Card must be included.
- "No criminal record" statement from a competent authority, attesting to his/her/their having no criminal record at the State level.
- Registration Commitment–The prospective adoptive parents must commit, in writing, to register their child with the Ukrainian Embassy or Consulate in the United States within one month of the completion of the adoption. The parents also agree to complete the post-adoption progress reports.

For updates on document requirements and information on how to authenticate documents, visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

Bringing Your Child Home: Once your adoption is complete (or you have obtained legal custody of the child), there are a few more steps to take before you can head home.

Specifically, you need to apply for several documents for your child before he or she can travel to the United States, such as a birth certificate, a passport or travel document for your child from the country in which he or she was born, and a U.S. Immigration Visa.

For detailed and updated information on how to obtain these documents, review the *Intercountry Adoption* sec-

tion on this publication and visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

Child Citizenship Act: For adoptions finalized abroad: The Child Citizenship Act of 2000 allows your new child to acquire American citizenship automatically when he or she enters the United States as lawful permanent residents. For adoptions finalized in the United States: The Child Citizenship Act of 2000 allows your new child to acquire American citizenship automatically when the court in the United States issues the final adoption decree. To learn more, review the *Intercountry Adoption* section on this publication and visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

After Adoption: Ukraine requires adoptive parents to supply information about the adopted child's living conditions and educational progress to the Ukrainian consular office annually during the first three years following the adoption. Under Ukrainian law, an adopted child remains a citizen until he/she turns 18 years old. At that time, he/she can decide whether or not to remain a Ukrainian citizen.

UNITED ARAB EMIRATES

Compiled from the June 2007 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
United Arab Emirates

PROFILE

Geography

Area: 82,880 sq. km. (30,000 sq. mi.); about the size of Maine.
Cities: (2002 est.) Capital—Abu Dhabi (pop. 1,000,000); Dubai (pop. 860,000).
Terrain: Largely desert with some agricultural areas.
Climate: Hot, humid, low annual rainfall.

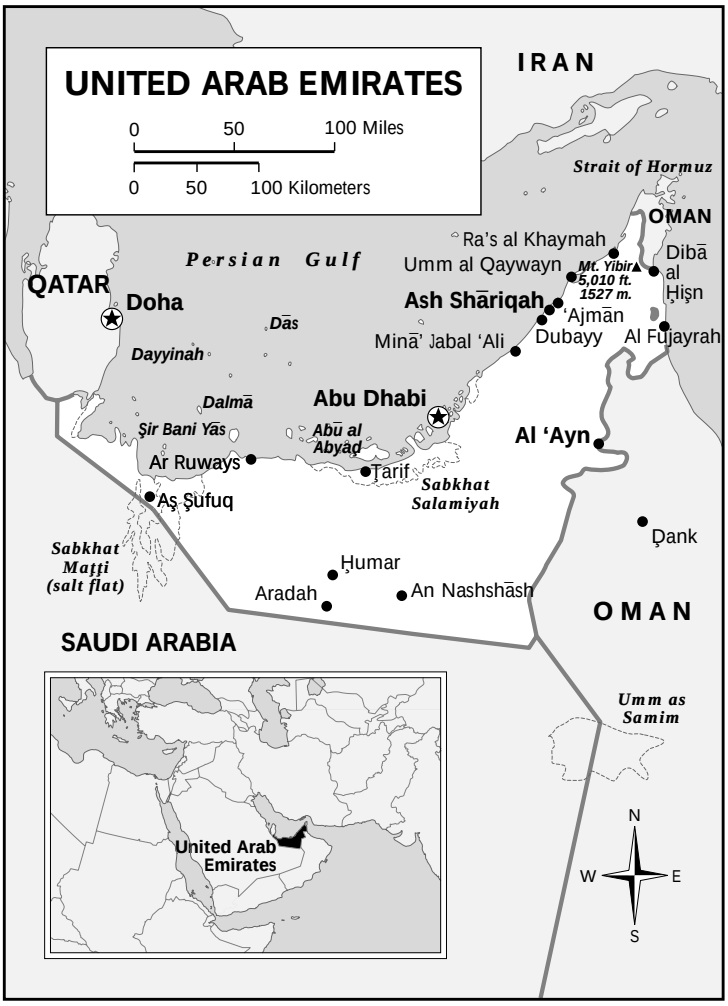
People

Nationality: Noun and adjective—U.A.E., Emirati.
Population: (2007 est.) 4.4 million.
Population growth rate: (2007 est.) 4.0%.
Ethnic groups: Indian, Pakistani, Bangladeshi, Egyptian, Jordanian, Iranian, Filipino, other Arab; (15-20% of residents are U.A.E. citizens).
Religions: Muslim (96%), Hindu, Christian.
Languages: Arabic (official), English, Hindi, Urdu, Persian.
Education: Years compulsory—ages 6-12. Literacy (U.A.E. citizens)—about 80%.
Health: Life expectancy—about 76 yrs.
Work force: (2006) 2.968 million (93% foreign in 15-64 age group) Agriculture—2.3%; industry—61.9%; services—35.8%.

Government

Type: Federation of emirates.
Independence: December 2, 1971.
Constitution: December 2, 1971.
Government branches: Executive—7-member Supreme Council of Rulers, which elects president and vice president. Legislative—40-member Federal National Council (consultative only). Judicial—Islamic and secular courts.
Political subdivisions: Seven largely self-governing city-states.
Political parties: None.
Suffrage: State-nominated electors chose half of the Federal National Council seats in 2006.
Budget: (2006) $7 billion.

Economy



GDP: (2006 est.) $163 billion.
Annual growth rate: (2006 est.) 9.7%.
Per capita GDP: (2006 est.) $37,000.
Inflation rate: (2006 est.) 10-13%.
Natural resources: Oil and natural gas.
Agriculture: (2005 est., 2.0% of GDP) Products—vegetables, dates, dairy products, poultry, fish.
Petroleum (2005 est.) 36%.
Manufacturing: (2005 est.) 13%.
Services: (44% of 2003 GDP) Trade, government, real estate.
Trade: (2006 est.) Exports—$157 billion: petroleum, gas, and petroleum products. Major markets—Japan, South Korea, Thailand, India. Imports—$126.6 billion: machinery, chemicals, food. Major suppliers—Western Europe, Japan, U.S., China, India.
Foreign economic aid: (2004) In excess of $5.25 billion.

PEOPLE

Only 15-20% of the total population of 4.4 million is U.A.E. citizens. The rest include significant numbers of other Arabs—Palestinians, Egyptians, Jordanians, Yemenis, Omanis—as well as many Indians, Pakistanis, Bangladeshis, Iranians, Afghans, Filipinos, and west Europeans.

The majority of U.A.E. citizens are Sunni Muslims with a very small Shia minority. Many foreigners also are Muslim, although Hindus and Christians make up a portion of the U.A.E.'s foreign population.

Educational standards among U.A.E. citizens population are rising rapidly. Citizens and temporary residents have taken advantage of facilities throughout the country. The UAE University in Al Ain had roughly 17,000 students in 2004. The Higher Colleges of Technology, a network of technical-vocational colleges, opened in 1989 with men's and women's campuses in each emirate. Zayed

University for women opened in 1998 with campuses in Abu Dhabi and Dubai. Zayed University will establish separate male campuses for the 2007-2008 academic year. American University Sharjah had over 4,500 students enrolled in 2007. Many foreign universities, including ones from the U.S., U.K., and Australia, also have campuses in the U.A.E.

HISTORY

The U.A.E. was formed from the group of tribally organized Arabian Peninsula Sheikhdoms along the southern coast of the Persian Gulf and the northwestern coast of the Gulf of Oman. This area was converted to Islam in the Seventh century; for centuries it was embroiled in dynastic disputes. It became known as the Pirate Coast as raiders based there harassed foreign shipping, although both European and Arab navies patrolled the area from the 17th century into the 19th century. Early British expeditions to protect the India trade from raiders at Ras al-Khaimah led to campaigns against that headquarters and other harbors along the coast in 1819. The next year, a general peace treaty was signed to which all the principal sheikhs of the coast adhered. Raids continued intermittently until 1835, when the sheikhs agreed not to engage in hostilities at sea. In 1853, they signed a treaty with the United Kingdom, under which the sheikhs (the "Trucial Sheikhdoms") agreed to a "perpetual maritime truce." It was enforced by the United Kingdom, and disputes among sheikhs were referred to the British for settlement. Primarily in reaction to the ambitions of other European countries, the United Kingdom and the Trucial Sheikhdoms established closer bonds in an 1892 treaty, similar to treaties entered into by the U.K. with other Gulf principalities. The sheikhs agreed not to dispose of any territory except to the United Kingdom and not to enter into relationships with any foreign government other than the United Kingdom without its consent. In return, the British promised to protect the Trucial Coast from all aggression by sea and to help out in case of land attack.

In 1955, the United Kingdom sided with Abu Dhabi in the latter's dispute with Saudi Arabia over the Buraimi Oasis and other territory to the south. A 1974 agreement between Abu Dhabi and Saudi Arabia would have settled the Abu Dhabi-Saudi border dispute; however, the agreement has yet to be ratified by the U.A.E. Government. The border with Oman also remains officially unsettled, but the two governments agreed to delineate the border in May 1999. Since that time, the U.A.E. has constructed a border fence along the entire length with both Oman and Saudi Arabia. The new fence and checkpoints will likely be finished by 2008-2009.

In 1968, the U.K. announced its decision, reaffirmed in March 1971, to end the treaty relationships with the seven Trucial Sheikhdoms which had been, together with Bahrain and Qatar, under British protection. The nine attempted to form a union of Arab emirates, but by mid-1971 they were unable to agree on terms of union, even though the termination date of the British treaty relationship was the end of 1971. Bahrain became independent in August and Qatar in September 1971. When the British-Trucial Sheikhdoms treaty expired on December 1, 1971, they became fully independent. On December 2, 1971, six of them entered into a union called the United Arab Emirates. The seventh, Ras al-Khaimah, joined in early 1972.

The U.A.E. sent forces to help liberate Kuwait during the 1990-91 Gulf War. U.A.E. troops have also participated in peacekeeping missions to Somalia, Lebanon, Bosnia, Albania, Kosovo, and Kuwait.

In 2004, the U.A.E.'s first and only president until that time, Sheikh Zayed bin Sultan Al Nahyan, died. His eldest son Khalifa bin Zayed Al Nahyan succeeded him as Ruler of Abu Dhabi. In accordance with the Constitution, the U.A.E.'s Supreme Council of Rulers elected Khalifa bin Zayed Al Nahyan as U.A.E. Federal President. Mohammed bin Zayed al Nahyan succeeded Khalifa as Crown Prince of Abu Dhabi. In January 2006, Sheikh Makotum bin Rashid Al Maktoum, U.A.E. Vice President and Prime Minister and Ruler of Dubai, passed away and was replaced by his brother, Sheikh Mohammed bin Rashid Al Maktoum (MbR), Ruler of Dubai and U.A.E. Minister of Defense. On February 9, 2006, the U.A.E. announced a cabinet reshuffle. Several ministries were eliminated or renamed, while others were created.

GOVERNMENT

Administratively, the U.A.E. is a loose federation of seven emirates, each with its own ruler. The pace at which local government in each emirate evolves from traditional to modern is set primarily by the ruler. Under the provisional constitution of 1971, each emirate reserves considerable powers, including control over mineral rights (notably oil and gas) and revenues. In this milieu, federal powers have developed slowly. The constitution established the positions of President (Chief of State) and Vice President, each serving 5-year terms; a Council of Ministers, led by a Prime Minister (head of government); a supreme council of rulers; and a 40-member Federal National Council (FNC). The FNC is a consultative body with half its members appointed by the emirate rulers and half elected.

Principal Government Officials

Last Updated: 11/12/08

Pres.: **KHALIFA bin Zayid Al Nuhayyan**
Vice Pres.: **MUHAMMAD BIN RASHID Al Maktum**
Prime Min.: **MUHAMMAD BIN RASHID Al Maktum**
Dep. Prime Min.: **SULTAN bin Zayid Al Nuhayyan**
Dep. Prime Min.: **HAMDAN bin Zayid Al Nuhayyan**
Min. of Cabinet Affairs: **Muhammad Abdallah al-GERGAWI**
Min. of Culture, Youth, & Social Development: **Abd al-Rahman Muhammad al-UWAIS**
Min. of Defense: **MUHAMMAD BIN RASHID Al Maktum**
Min. of Economy: **Sultan bin Saeed al-MANSURI**
Min. of Education: **Hanif Hassan ALI**
Min. of Energy: **Muhammad bin Dhaen al-HAMILI**
Min. of Environment & Water: **Rashid Ahmed bin FAHD**
Min. of Finance: **HAMDAN bin Rashid Al Maktum**
Min. of Foreign Affairs: **ABDALLAH bin Zayid Al Nuhayyan**
Min. of Foreign Trade: **LUBNA Al Qasimi**
Min. of Health: **Humaid Muhammad Ubayd al-QATAMI**
Min. of Higher Education & Scientific Research: **NUHAYYAN bin Mubarak Al Nuhayyan**
Min. of Interior: **SAIF bin Zayid Al Nuhayyan**
Min. of Justice: **Hadef bin Juaan al-DHAHERI**
Min. of Labor: **Saqr Ghobash Saeed GHOBASH**
Min. of Presidential Affairs: **MANSUR bin Zayid Al Nuhayyan**
Min. of Public Works: **HAMDAN bin Mubarak Al Nuhayyan**
Min. of Social Affairs: **Mariam Muhammad Khalfan al-RUMI**
Min. of State Without Portfolio: **Reem Ibrahim al-HASHEMI**
Min. of State Without Portfolio: **Maitha Salem al-SHAMSI**
Min. of State for Financial Affairs: **Obaid Humaid al-TAYER**
Min. of State for Foreign Affairs: **Anwar Muhammad GARGASH**
Governor, Central Bank: **Sultan bin Nasir al-SUWAYDI**
Ambassador to the US: **Yousef bin Mani Saeed al-OTAIBA**
Permanent Representative to the UN, New York: **Ahmad Abd al-Rahman al-JARMAN**

The U.A.E. maintains an embassy in the United States at 3522 International Court, NW, Washington, DC, 20008 (tel. 202-243-2400). The U.A.E. Mission to the UN is located at 747 3rd Avenue, 36th Floor, New York, NY 10017 (tel. 212-371-0480).

POLITICAL CONDITIONS

The relative political and financial influence of each emirate is reflected in the allocation of positions in the federal government. The ruler of Abu Dhabi, whose emirate is the U.A.E.'s major oil producer, is president of the U.A.E. The ruler of Dubai, which is the U.A.E.'s commercial center, is vice president and prime minister.

Since achieving independence in 1971, the U.A.E. has worked to strengthen its federal institutions. Nonetheless, each emirate still retains substantial autonomy, and progress toward greater federal integration has slowed in recent years. A basic concept in the U.A.E. Government's development as a federal system is that a significant percentage of each emirate's revenues should be devoted to the U.A.E. central budget.

The U.A.E. has no political parties. The rulers hold power on the basis of their dynastic position and their legitimacy in a system of tribal consensus. Rapid modernization, enormous strides in education, and the influx of a large foreign population have changed the face of the society. In December 2006, the U.A.E. held its first-ever limited elections to select half the members of the FNC. Ballots were cast by electors selected by the emir of each emirate. One woman was elected to the FNC and seven additional women were appointed to be council members.

DEFENSE

The Trucial Oman Scouts, long the symbol of public order on the coast and commanded by British officers, were turned over to the U.A.E. as its

defense forces in 1971. The U.A.E. armed forces, consisting of 48,800 troops, are headquartered in Abu Dhabi and are primarily responsible for the defense of the seven emirates.

Although small in number, the U.A.E. armed forces are equipped with some of the most modern weapon systems, purchased from a variety of outside countries. The military has been reducing the number of foreign nationals in its ranks, and its officer corps is composed almost entirely of U.A.E. nationals. The U.A.E. air force has about 4,000 personnel. The Air Force has advanced U.S. F-16 BLOCK 60 multi-role fighter aircraft. Other equipment includes French Mirage 2000-9 fighters, British Hawk trainer aircraft, 36 transport aircraft and U.S. Apache and French Puma helicopters. The Air Defense Force is linked into a joint air defense system with the other six Gulf Cooperation Council (GCC) nations aimed at protecting the airspace of the allied states. The U.A.E. Navy is small—about 2,500 personnel—and maintains 12 well-equipped coastal patrol boats and 8 missile boats. Although primarily concerned with coastal defense, the Navy is constructing a six-unit class of blue water corvettes in conjunction with French shipbuilder CMN. The U.A.E.'s Land Forces are equipped with several hundred French LeClerc tanks and a similar number of Russian BMP-3 armored fighting vehicles. The U.A.E. Special Operations Command (SOC) is a small but effective force centered on the counter-terrorism mission within the country. SOC is well-financed, trained, and equipped and is capable of executing its mission with a level of expertise equal to, or above, the rest of the GCC.

The U.A.E. contributes to the continued security and stability of the Gulf and the Straits of Hormuz. It is a leading partner in the campaign against global terrorism, providing assistance in the military, diplomatic, and financial arenas since September 11, 2001.

ECONOMY

Prior to the first exports of oil in 1962, the U.A.E. economy was dominated by pearl production, fishing, agriculture, and herding. Since the rise of oil prices in 1973, however, petroleum has dominated the economy, accounting for most of its export earnings and providing significant opportunities for investment. The U.A.E. has huge proven oil reserves, estimated at 98.8 billion barrels in 2003, with gas reserves estimated at (212 trillion cubic feet); at present production rates, these supplies would last well over 150 years. In 2006, the U.A.E. produced about 2.8 million barrels of oil per day.

Major increases in imports occurred in manufactured goods, machinery, and transportation equipment, which together accounted for 70% of total imports. Another important foreign exchange earner, the Abu Dhabi Investment Authority—which controls the investments of Abu Dhabi, the wealthiest emirate—manages an estimated $600 billion in overseas investments.

More than 6,000 companies from more than 120 countries operate at the Jebel Ali complex in Dubai, which includes a deep-water port and a free trade zone for manufacturing and distribution in which all goods for re-export or transshipment enjoy a 100% duty exemption. A major power plant with associated water desalination units, an aluminum smelter, and a steel fabrication unit are prominent facilities near the complex.

Except in the free trade zone, the U.A.E. requires at least 51% local citizen ownership in all businesses operating in the country as part of its attempt to place Emiratis into leadership positions.

As a member of the Gulf Cooperation Council (GCC), the U.A.E. participates in a wide range of GCC activities that focus on economic issues. These include regular consultations and development of common policies covering trade, investment, banking and finance, transportation, telecommunications, and other technical areas, including protection of intellectual property rights.

FOREIGN RELATIONS

The U.A.E. is a member of the United Nations and the Arab League and has established diplomatic relations with more than 60 countries, including the U.S., Japan, Russia, the People's Republic of China, and most western European countries. It has played a moderate role in the Organization of Petroleum Exporting Countries, the Organization of Arab Petroleum Exporting Countries, the United Nations, and the GCC.

Substantial development assistance has increased the U.A.E.'s stature among recipient states. Most of this foreign aid (in excess of $15 billion) has been to Arab and Muslim countries.

Following Iraq's 1990 invasion and attempted annexation of Kuwait, the U.A.E. has sought to rely on the GCC, the United States, and other Western allies for its security. The U.A.E. believes that the Arab League needs to be restructured to become a viable institution and would like to increase strength and interoperability of the GCC defense forces.

In 2007, the U.A.E. pledged and delivered $300 million to Lebanon, and was the first country to fulfill its pledge. The U.A.E. has provided significant monetary and material support to the Iraqi Government, including a pledge of $215 million in economic and reconstruction assistance, and has also provided substantial aid to Afghanistan and the Palestinian Authority. The U.A.E. is a member of the following international organizations: UN and several of its specialized agencies (ICAO, ILO, UPU, WHO, WIPO); World Bank, International Monetary Fund (IMF), Arab League, Organization of the Islamic Conference, Organization of Petroleum Exporting Countries, Organization of Arab Petroleum Exporting Countries, and the Non-Aligned Movement.

U.S.-U.A.E. RELATIONS

The United States has enjoyed friendly relations with the U.A.E. since 1971. Private commercial ties, especially in petroleum, have developed into friendly government-to-government ties which include security assistance. The breadth, depth, and quality of U.S.-U.A.E. relations increased dramatically as a result of the U.S.-led coalition's campaign to end the Iraqi occupation of Kuwait. In 2002, the U.S. and the U.A.E. launched a strategic partnership dialogue covering virtually every aspect of the relationship. The U.A.E. has been a key partner in the War on Terror. U.A.E. ports host more U.S. Navy ships than any port outside the U.S. The United States was the third country to establish formal diplomatic relations with the U.A.E. and has had an ambassador resident in the U.A.E. since 1974.

TRAVEL

Consular Information Sheet

November 26, 2008

Country Description: The United Arab Emirates (UAE) is a federation of seven independent emirates, each with its own ruler. The federal government is a constitutional republic, headed by a president and council of ministers. Islamic ideals and beliefs provide the conservative foundation of the country's customs, laws and practices. The UAE is a modern, developed country, and tourist facilities are widely available.

Entry Requirements: A passport is required. For stays of 30 days or fewer, U.S. citizens holding valid passports may obtain visitor visas at the port of entry for no fee. For a longer stay, a traveler must obtain a visa before arrival in the UAE. In addition, an HIV/AIDS test is required for work or residence permits; testing must be performed after arrival. A U.S. HIV/AIDS test is not accepted. For further information, travelers can contact the Embassy of the United Arab Emirates, 3522 International Court, NW, Washington, DC 20037, telephone (202) 243-2400. Visit the Embassy of the United Arab Emirates web site at http://uae-embassy.org for the most current visa information.

The Government of the United Arab Emirates requires that all persons residing in the UAE, including U.S. citizens, have a national identification card. Americans who are working or living in the UAE, should visit the Emirates Identity Authority web site for more information on card registration procedures and requirements: http://www.emiratesid.ae/mainenglish.html.

Unlike other countries in the region that accept U.S. military ID cards as valid travel documents, the UAE requires U.S. military personnel to present a valid passport for entry/exit.

UAE authorities will confiscate any weapons, weapon parts, ammunition, body armor, handcuffs, and/or other military/police equipment transported to or through a civilian airport. Americans have been arrested and jailed for transporting such weapons and equipment without the express written authorization of the UAE government, even though airline and U.S. authorities allowed shipment on a U.S.-originating flight.

U.S. citizens and citizens of other countries that are not members of the Gulf Cooperation Council (GCC) who depart the UAE via land are required to pay a departure fee. This fee is 20 UAE dirhams and is payable only in the local currency.

Safety and Security: Americans in the United Arab Emirates should exercise a high level of security awareness. The Department of State remains concerned about the possibility of terrorist attacks against U.S. citizens and interests throughout the world. Americans should maintain a low profile, vary routes and times for all required travel, and treat mail and packages from unfamiliar sources with caution. In addition, U.S. citizens are urged to avoid contact with any suspicious, unfamiliar objects, and to report the presence of

the objects to local authorities. U.S. Government personnel overseas have been advised to take the same precautions. In addition, U.S. Government facilities may temporarily close or suspend public services from time to time as necessary to review their security posture and ensure its adequacy.

Taking photographs of potentially-sensitive UAE military and civilian sites, or foreign diplomatic missions, including the U.S. Embassy, may result in arrest, detention and/or prosecution by local authorities. In addition, engaging in mapping activities, especially mapping which includes the use of GPS equipment, without coordination with UAE authorities, may have the same consequences.

On several occasions in the past three years, small groups of expatriate recreational boaters were detained by the Iranian Coast Guard for alleged violation of Iranian territorial waters while fishing near the island of Abu Musa, approximately 20 miles from Dubai. The UAE and Iran have had a long-standing dispute concerning jurisdiction of Abu Musa. Fishing or sailing in these waters may result in seizure of vessels and detention of passengers and crew in Iran. Obtaining consular assistance in Iran is difficult and can only be done through the Swiss Embassy in Tehran, which acts as a Protecting Power, providing limited U.S. consular services.

For the latest security information, Americans traveling abroad should regularly monitor the Department of State Internet site at http://travel.state.gov, where the current Travel Warnings and Travel Alerts, including the Worldwide Caution Travel Alert and the Middle East and North Africa Travel Alert, can be found.

Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S. and Canada, or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: Crime generally is not a problem for travelers in the UAE. However, the U.S. Embassy advises U.S. citizens to take normal precautions against theft, such as not leaving a wallet, purse, or credit card unattended. Although vehicle break-ins in the UAE are rare, U.S. citizens are encouraged to ensure that unattended vehicles are locked and that valuables are not left out in plain sight.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, to contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

The local equivalent to the “911” emergency line in the United Arab Emirates is 999.

Medical Facilities and Health Information: Basic modern medical care and medicines are available in the principal cities of the UAE, but not necessarily in outlying areas. The United Arab Emirates has imposed HIV/AIDS travel restrictions on persons applying for a work or residence visa. An HIV/AIDS test is required for work or residence permits; testing must be performed after arrival. A U.S. HIV/AIDS test is not accepted. Please inquire directly with the Embassy of the United Arab Emirates at http://uae-embassy.org before you travel.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747); fax 1-888-CDC-FAXX (1-888-232-3299), or via the CDC's Internet site at http://www.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning the United Arab Emirates is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

The police emergency number and ambulance number is 999. Mobile phones are widely used throughout the UAE, so passers-by usually request emergency police and medical services quickly. Response time by emergency services is adequate. However, medical personnel emphasize transport of the injured to the hospital rather than treatment on site. Traffic accidents are a leading cause of death in the UAE because drivers often drive at high speeds. Unsafe driving practices are common, especially on inter-city highways. On highways, unmarked speed bumps and drifting sand create additional hazards.

Country-wide traffic laws impose stringent penalties for certain violations, particularly driving under the influence of alcohol. In the UAE, there is zero tolerance for driving after consumption of alcohol. Penalties may include hefty jail sentences and fines and, for Muslims (even those holding U.S. citizenship), lashings. Persons involved in an accident

in which another party is injured automatically go to jail, until the injured person is released from the hospital. Should a person die in a traffic accident, the driver of the other vehicle is liable for payment of compensation for the death (known as "dhiyya"), usually the equivalent of 55,000 U.S. dollars. Even relatively minor accidents may result in lengthy proceedings, during which both drivers may be prohibited from leaving the country.

In order to drive, UAE residents must obtain a UAE driver's license. Foreign driver's licenses are not recognized. However, a non-resident visitor to the UAE can drive if he/she obtains a valid international driver's license issued by the motor vehicle authority of the country whose passport the traveler holds. The UAE recognizes driver's licenses issued by other Gulf Cooperation Council (GCC) states only if the bearer is driving a vehicle registered to the same GCC state. Under no circumstances should anyone drive without a valid license.

You may also visit the web site of the UAE's national tourist office and national authority responsible for road safety at http://www.uaeinteract.org.

Aviation Safety Oversight: The U.S. Federal Aviation Administration (FAA) has assessed the Government of the United Arab Emirates' Civil Aviation Authority as being in compliance with International Civil Aviation Organization (ICAO) aviation safety standards for oversight of the United Arab Emirates' air carrier operations. For more information, travelers may visit the FAA's Internet web site at http://www.faa.gov.

Special Circumstances: The Government of the United Arab Emirates does not recognize dual nationality. Children of UAE fathers automatically acquire UAE citizenship at birth and must enter the UAE on UAE passports. UAE authorities have confiscated U.S. passports of UAE/U.S. dual nationals in the past. This act does not constitute loss of U.S. citizenship, but should be reported to the U.S. Embassy in Abu Dhabi or the U.S. Consulate General in Dubai. In addition to being subject to all UAE laws, U.S. citizens who also hold UAE citizenship may also be subject to other laws that impose special obligations on citizens of the UAE. For additional information, please refer to our Dual Nationality flyer.

U.S. citizens have at times become involved in disputes of a commercial nature that have prompted local firms or courts to take possession of the U.S. citizen's passport. Travel bans may also be enforced against U.S. citizens involved in financial disputes with a local sponsor or firm. Such travel bans, which are rigidly enforced, effectively prevent the individual from leaving the UAE for any reason until the dispute is resolved. Although it is customary for a local sponsor to hold an employee's passport, it is illegal to do so under UAE law. Most contractual/labor disputes can be avoided by clearly establishing all terms and conditions of employment or sponsorship in the labor contract at the beginning of any employment. Should a dispute arise, the UAE Ministry of Labor has established a special department to review and arbitrate labor claims. A list of local attorneys capable of representing Americans in such matters is available from the Consular and Commercial sections of the U.S. Embassy in Abu Dhabi and the U.S. Consulate General in Dubai.

Codes of behavior and dress in the UAE reflect the country's Islamic traditions and are more conservative than those of the United States. Visitors to the UAE should be respectful of this conservative heritage, especially in the Emirate of Sharjah where rules of decency and public conduct are strictly enforced. Female travelers should keep in mind the cultural differences among the many people who coexist in the UAE and should be cognizant that unwitting actions may invite unwanted attention to them. Isolated incidents of verbal and physical harassment of Western women have occurred. Victims of harassment are encouraged to report such incidents to the U.S. Embassy in Abu Dhabi or the U.S. Consulate General in Dubai.

American citizens intending to reside and work in the UAE may have to present personal documents authenticated by the Department of State's Office of Authentications in Washington, D.C. before traveling to the UAE. This can be a complex process involving local, state and federal offices and requiring several weeks to complete. For procedural information, the Office of Authentications may be contacted by telephone from within the United States at 800-688-9889 or 202-647-5002, by fax at 202-663-3636, or by e-mail at aoprgsm-auth@state.gov. In order to meet UAE government requirements for school registrations and residency sponsorship for family members, Americans intending to bring their families to reside with them in the UAE will need to have their marriage certificate and children's birth certificates, or custody/adoption decrees, if appropriate, authenticated by the Department of State in Washington, DC. The U.S. Embassy and Consulate General cannot authenticate U.S. local- and state-issued personal, academic or professional documents; they will only be able to authenticate the final authentication document from the Department of State. The Embassy and Consulate General will also not authenticate the academic documents of institutions of higher education in the United States that are not accredited by the U.S. Department of Education, even if the documents have been authenticated by the Department of State. Additional information on authentication of documents can be found at http://www.state.gov/m/a/auth. In terms of employment, a recent change to UAE labor law requires local sponsors to have employees' diplomas, academic and/or occupational/professional certificates validated through a "Degree Verification" process established in the UAE. Prospective employees will be required to submit photocopies of such documents for verification to a firm under contract to the Ministry of Labor.

In addition, persons in the education and health professions reportedly have to meet two requirements for validation of their educational credentials at this time—the formal

"chain" authentication of academic/professional credentials in the U.S. and the "Degree Verification" process in the UAE. Different UAE Ministries have different requirements in this regard. Determining these requirements with one's prospective employer is strongly recommended before arrival in the UAE.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. As each Emirate has its own independent judicial system, legal procedures and penalties vary throughout the country. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating Emirati laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in the United Arab Emirates are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Legislation enacted in January 1996 imposes the death sentence for convicted drug traffickers. Since January 2006, possession of even trace amounts of illegal drugs has resulted in sentences of four years imprisonment for foreign citizens transiting the UAE. Some drugs normally taken under a doctor's supervision in the United States, and even some over-the-counter U.S. drugs and medications, are classified as narcotics in the UAE and are illegal to possess. A doctor's prescription should be carried along with any medication that is brought into the country. A person may be subject to arrest and prosecution if possession of prescribed medicines (especially those containing codeine and similar narcotic-like ingredients) comes to the attention of local authorities. The U.S. Embassy's web site includes an unofficial list of such medicines, obtained from the UAE Ministry of Health. This list can be found at http://abudhabi.usembassy.gov. Most medications available in the U.S. are also available by doctors' prescription through hospitals and pharmacies in the UAE.

In addition, the UAE's tough anti-narcotics program also includes poppy seeds, widely used in other cultures, including the U.S., for culinary purposes, on its list of controlled substances. The importation and possession of poppy seeds in any and all forms is strictly prohibited. Persons found to possess even very small quantities of controlled substances listed by the UAE are subject to prosecution by the authorities and may be given lengthy prison terms of up to 15 years. Travelers with questions regarding the items on the list of controlled substances should contact the U.S. Embassy in Abu Dhabi or the U.S. Consulate General in Dubai. If suspected of being under the influence of drugs or alcohol, individuals may be required to submit to blood and/or urine tests and may be subject to prosecution.

Crimes of fraud, including passing bad checks and non-payment of bills (including hotel bills), are regarded seriously in the UAE and can result in imprisonment and/or fines. Bail generally is not available to non-residents of the UAE who are arrested for crimes involving fraud.

Drinking or possession of alcohol without a Ministry of Interior liquor permit is illegal and could result in arrest and/or fines and imprisonment. Alcohol is served at bars in most major hotels but is intended for guests of the hotel. Persons who are not guests of the hotel, and who consume alcohol in the restaurants and bars, technically are required to have their own personal liquor licenses. Liquor licenses are issued only to non-Muslim persons who possess UAE residency permits. Drinking and driving is considered a serious offense. Persons arrested on alcohol-related offenses are often jailed for many days as they await a court hearing. Penalties may include hefty jail sentences and fines and, for Muslims (even those holding U.S. citizenship), lashings. While individuals are free to worship as they choose, and facilities are available for that purpose, religious proselytizing is not permitted in the UAE. Persons violating this law, even unknowingly, may be imprisoned or deported.

If arrested, U.S. citizens should contact the U.S. Embassy or Consulate General for assistance. The U.S. Consul will provide information on the local judicial system and a list of local attorneys. In Dubai, the U.S. Consul can also arrange for U.S. citizen detainees to meet with an ombudsman from the Human Rights Department of the Dubai police headquarters, if the detainee believes he or she is not being treated fairly.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy and Consulate Locations: Americans living or traveling in the United Arab Emirates are encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration web site and to obtain updated information on travel and security within the United Arab Emirates. Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency.

The U.S. Embassy in Abu Dhabi is located at Embassies District, Plot 38, Sector W59-02, Street No. 4, P.O. Box 4009. The telephone number is (971) (2) 414-2200, and the Consular Section fax number is (971) (2) 414-2241. The email address for American Citizens Services inquiries, including passport questions, is abudhabiacs@state.gov. The after-hours telephone number is (971) (2) 414-2500. The Embassy Internet web site is http://uae.usembassy.gov.

The U.S. Consulate General in Dubai is located on the 21st floor of the

Dubai World Trade Center, P.O. Box 9343. The telephone number is (971) (4) 311-6000 (for after-hours emergencies, contact the Embassy at (971)(2) 414-2200 for the Dubai Duty Officer, and the Consular Section fax number is (971) (4) 311-6213. The email address for American Citizens Services inquiries, including passport questions, is dubaiwarden@state.gov. The web site for the U.S. Consulate General in Dubai is http://dubai.usconsulate.gov.

The workweek for both the Embassy in Abu Dhabi and the Consulate General in Dubai is Sunday through Thursday.

Intercountry Adoption

February 2008

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is based on public sources and current understanding. Questions involving foreign and U.S. immigration laws and legal interpretation should be addressed respectively to qualified foreign or U.S. legal counsel.

The American Embassy in Abu Dhabi has been informed by the Sharia Court that Sharia law does not permit adoption in the United Arab Emirates. The Sharia Court may grant a guardianship, but such a guardianship is insufficient for the filing of an I-130 petition for U.S. immigration purposes, according to the U.S. Board of Immigration Appeals.

Specific questions regarding adoption issues may be addressed to:

U.S. Embassy in Abu Dhabi
11th St. (also known as Al-Sudan St.)
P.O. Box 4009
Abu Dhabi, United Arab Emirates
Telephone: (971) (2) 436-691
Fax: (971) (2) 435-786
After-hours telephone:
(971) (2) 434-457
Internet:
http://www.usembabu.gov.ae

U.S. Consulate General in Dubai
21st floor of the
Dubai World Trade Center
P.O. Box 9343
Dubai, United Arab Emirates
Telephone: (971) (4) 313-115
Fax: (971) (4) 316-935

Embassy of the
United Arab Emirates
1255 22nd Street, NW
Suite 700
Washington, D.C. 20037
Phone: (202) 955-7999

For further information on intercountry adoption, contact the Office of Children's Issues, U.S. Department of State at 1-888-407-4747 or visit its web site on the Internet at http://adoption.state.gov. You may also direct inquiries to: Office of Children's Issues, U.S. Department of State, Washington, DC 20520-4811; Phone: (202) 736-9090; Fax: (202) 312-9743.

International Parental Child Abduction

February 2008

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *International Parental Child Abduction* section of this book and review current reports online at http://travel.state.gov/Childabduction.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is provided for general information only. Questions involving interpretation of specific foreign laws should be addressed to foreign legal counsel.

General Information: The United Arab Emirates (UAE) is not a party to the Hague Convention on the Civil Aspects of International Child Abduction, nor are there any international or bilateral treaties in force between the UAE and the United States dealing with international parental child abduction. American citizens who travel to the UAE are subject to the jurisdiction of UAE courts, as well as to the country's laws and regulations. American citizens planning a trip to the UAE with dual national children should bear this in mind.

Custody Disputes: When child custody disputes arise between parents, custody decisions are based on Islamic (Sharia) law. Non-UAE nationals resident in the UAE, whether married to a UAE or non-UAE citizen, may file custody cases in the UAE. Non-residents of the UAE may also file custody cases in the UAE, but may need to authorize a UAE resident and/or a lawyer practicing in the UAE to act on their behalf for the duration of the case. Non-Muslims are also permitted to file cases in the UAE family courts, under Sharia law. In determining issues of custody, UAE courts may take into consideration the parents" religion, place of permanent residence, income, and the mother's subsequent marital status. Priority is generally given to the Muslim father, irrespective of his nationality, when the mother is a non-Muslim. As a basic starting point under Sharia law, a Muslim mother may be granted custody of girls under the age of nine and boys under the age of seven, at which time custody may be transferred to the father. If a child has attained an "age of discretion," that child may be allowed to choose the parent with whom he or she wishes to live. A UAE lawyer should be contacted to discuss the definition of "age of discretion."

If the court finds the mother "incompetent," custody of a child, regardless of age, can be given to the father, or to the child's grandmother on the father's side. A finding of incompetence is left fully to the discretion of the Sharia judge. Sharia courts consistently find parents incompetent if they engage in behavior that is con-

sidered to be inconsistent with the Islamic faith. Further, a mother may lose her rights of custody should she remarry. If both the mother and father are ruled incompetent, custody of the children may be given to the child's paternal grandparents. Persons who wish to pursue a child custody claim in a UAE court may wish to retain an attorney in the UAE. The U.S. State Department, the U.S. Embassy in Abu Dhabi and the U.S. Consulate General in Dubai maintain a list of attorneys practicing in the area.

For more information, please read the *International Parental Child Abduction* section of this book and review current reports online at http://travel.state.gov/childabduction.

Enforcement of Foreign Judgments: Custody orders and judgments of foreign courts are not enforceable in the UAE. UAE courts will not enforce U.S. court decrees ordering a parent in the UAE to pay child support.

An American parent with a U.S. court order granting him or her custody can present that order to the court, and the court may take it into consideration, but it will not be binding in a custody proceeding in the UAE.

Visitation Rights: Non-custodial parents are guaranteed visitation rights, but may have to seek approval from the appropriate authorities. In some cases the custodial parent and family have been very open and accommodating in facilitating the right of the non-custodial parent to visit and maintain contact with the child, but in other cases the custodial parent and family have not been so accommodating.

Dual Nationality: Dual nationality is not recognized under UAE law. Children of UAE fathers automatically acquire UAE citizenship at birth, regardless of where the child was born. In certain circumstances, UAE mothers can also transmit citizenship. UAE citizens must enter and exit the country on UAE passports.

Travel Restrictions: Exit visas are not required to leave the UAE. However, all persons exiting the country must exit on the passport that shows proof of the person's legal status in the UAE, meaning either their residence or entry visa. A parent can obtain a court order that places a travel ban on a child, and this ban will be enforced at all the airports in the country. If a parent attempts to leave with a child who has been placed under a travel ban, this could potentially lead to new legal issues concerning the custody of the child.

Criminal Remedies: For information on possible criminal remedies, please contact your local law enforcement authorities or the nearest office of the Federal Bureau of Investigation (FBI). Information is also available on the Internet at the web site of the U.S. Department of Justice, Office of Juvenile Justice and Delinquency Prevention (OJJDP) at http://www.ojjdp.ncjrs.org.

For further information on international parental child abduction, contact the Office of Children's Issues, U.S. Department of State at 1-888-407-4747 or visit its web site on the Internet at http://travel.state.gov. You may also direct inquiries to: Office of Children's Issues, U.S. Department of State, Washington, DC 20520-4811; Phone: (202) 736-9090; Fax: (202) 312-9743.

UNITED KINGDOM

Compiled from the July 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
United Kingdom of Great Britain and Northern Ireland

PROFILE

Geography

Area: 243,000 sq. km. (93,000 sq. mi.); slightly smaller than Oregon.

Cities: Capital—London (metropolitan pop. about 7.2 million). Other cities—Birmingham, Glasgow, Leeds, Sheffield, Liverpool, Bradford, Manchester, Edinburgh, Bristol, Belfast.

Terrain: 30% arable, 50% meadow and pasture, 12% waste or urban, 7% forested, 1% inland water.

Land use: 25% arable, 46% meadows and pastures, 10% forests and woodland, 19% other.

Climate: Generally mild and temperate; weather is subject to frequent changes but to few extremes of temperature.

People

Nationality: Noun—Briton(s). Adjective—British.

Population: (2008 est.) 60.9 million.

Annual population growth rate: (2007 est.) 0.276%.

Ethnic groups: British, Irish, West Indian, South Asian.

Religions: Church of England (Anglican), Roman Catholic, Church of Scotland (Presbyterian), Muslim.

Languages: English, Welsh, Irish Gaelic, Scottish Gaelic.

Education: Years compulsory—12. Attendance—nearly 100%. Literacy—99%.

Health: Infant mortality rate: (2008 est.)—4.93/1,000. Life expectancy (2008 est.)—males 76.37 years; females 81.46 years; total 78.85 years.

Work force: (2008, 29.59 million) Services—80.4%; industry—18.2%; agriculture—1.4%.

Government

Type: Constitutional monarchy.

Constitution: Unwritten; partly statutes, partly common law and practice.

Government branches: Executive—monarch (head of state), prime minister (head of government), cabinet. Legislative—bicameral Parliament: House of Commons, House of Lords; Scottish Parliament, Welsh Assembly, and Northern Ireland Assembly. Judicial—magistrates' courts, county courts, high courts, appellate courts, House of Lords.

Political subdivisions: Scotland, Wales, Northern Ireland (municipalities, counties, and parliamentary constituencies).

Political parties: Great Britain—Conservative, Labour, Liberal Democrats; also, in Scotland—Scottish National Party. Wales—Plaid Cymru (Party of Wales). Northern Ireland—Ulster Unionist Party, Social Democratic and Labour Party, Democratic Unionist Party, Sinn Fein, Alliance Party, and other smaller parties.

Suffrage: British subjects and citizens of other Commonwealth countries and the Irish Republic resident in the U.K., at 18.

Economy

GDP: (at current market prices, 2007 est.) $2.15 trillion.

Annual growth rate: (2007 est.) 2.9%.

Per capita GDP: (2007 est.) $35,300.

Natural resources: Coal, oil, natural gas, tin, limestone, iron ore, salt, clay, chalk, gypsum, lead, silica.

Agriculture: (1.1% of GDP) Products—cereals, oilseed, potatoes, vegetables, cattle, sheep, poultry, fish.

Industry: Types—steel, heavy engineering and metal manufacturing, textiles, motor vehicles and aircraft, construction (5.2% of GDP), electronics, chemicals.

Trade: (2007 est.) Exports of goods and services—$415.6 billion: manufactured goods, fuels, chemicals; food, beverages, tobacco. Major markets—U.S., European Union. Imports of goods and services—$595.6 billion: manufactured goods, machinery, fuels, foodstuffs. Major suppliers—U.S., European Union, China.

PEOPLE

The United Kingdom's population in 2004 surpassed 60 million—the third-largest in the European Union. Its overall population density is one of the highest in the world. Almost one-third of the population lives in England's prosperous and fertile southeast and is predominantly urban and suburban—with about 7.2 million in the capital of London, which remains the largest city in Europe. The United Kingdom's high literacy rate (99%) is attributable to universal public education introduced for the primary level in 1870 and secondary level in 1900. Education is mandatory from ages 5 through 16. About one-fifth of British students go on to post-secondary education. The Church of England and the Church of Scotland are the official churches in their respective parts of the country, but most religions found in the world are represented in the United Kingdom.

A group of islands close to continental Europe, the British Isles have been subject to many invasions and migrations, especially from Scandinavia and the continent, including Roman occupation for several centuries. Contemporary Britons are descended mainly from the varied ethnic stocks that settled there before the 11th century. The pre-Celtic, Celtic, Roman, Anglo-Saxon, and Norse influences were blended in Britain under the Normans, Scandinavian Vikings who had lived in Northern France. Although Celtic languages persist in Wales, Scotland, and Northern Ireland, the predominant language is English, which is primarily a blend of Anglo-Saxon and Norman French.

HISTORY

The Roman invasion of Britain in 55 BC and most of Britain's subsequent incorporation into the Roman Empire stimulated development and brought more active contacts with the rest of Europe. As Rome's strength declined, the country again was exposed to invasion—including the pivotal incursions of the Angles, Saxons, and Jutes in the fifth and sixth centuries AD—up to the Norman conquest in 1066. Norman rule effectively ensured Britain's safety from further intrusions; certain institutions, which remain characteristic of Britain, could develop. Among these are a political, administrative, cultural, and economic center in London; a separate but established church; a system of common law; distinctive and distinguished university education; and representative government.

Union

Both Wales and Scotland were independent kingdoms that resisted English rule. The English conquest of Wales succeeded in 1282 under Edward I, and the Statute of Rhuddlan established English rule 2 years later. To appease the Welsh, Edward's son (later Edward II), who had been born in Wales, was made Prince of Wales in 1301. The tradition of bestowing this title on the eldest son of the British Monarch continues today. An act of 1536 completed the political and administrative union of England and Wales.

While maintaining separate parliaments, England and Scotland were ruled under one crown beginning in 1603, when James VI of Scotland succeeded his cousin Elizabeth I as James I of England. In the ensuing 100 years, strong religious and political differences divided the kingdoms. Finally, in 1707, England and Scotland were unified as Great Britain, sharing a single Parliament at Westminster.

Ireland's invasion by the Anglo-Normans in 1170 led to centuries of strife. Successive English kings sought to conquer Ireland. In the early 17th century, large-scale settlement of the north from Scotland and England began. After its defeat, Ireland was subjected, with varying degrees of success, to control and regulation by Britain.

The legislative union of Great Britain and Ireland was completed on January 1, 1801, under the name of the United Kingdom. However, armed struggle for independence continued sporadically into the 20th century. The Anglo-Irish Treaty of 1921 established the Irish Free State, which subsequently left the Commonwealth and became a republic after World War II. Six northern, predominantly Protestant, Irish counties have remained part of the United Kingdom.

British Expansion and Empire

Begun initially to support William the Conqueror's (c. 1029-1087) holdings in France, Britain's policy of active involvement in continental European affairs endured for several hundred years. By the end of the 14th century, foreign trade, originally based on wool exports to Europe, had emerged as a cornerstone of national policy.

The foundations of sea power were gradually laid to protect English trade and open up new routes. Defeat of the Spanish Armada in 1588 firmly established England as a major sea power. Thereafter, its interests outside Europe grew steadily. Attracted by the spice trade, English mercantile interests spread first to the Far East. In search of an alternate route to the Spice Islands, John Cabot reached the North American continent in 1498. Sir Walter Raleigh organized the first, short-lived colony in Virginia in 1584, and permanent English settlement began in 1607 at Jamestown, Virginia. During the next two centuries, Britain extended its influence abroad and consolidated its political development at home.

Great Britain's industrial revolution greatly strengthened its ability to oppose Napoleonic France. By the end of the Napoleonic Wars in 1815, the United Kingdom was the foremost European power, and its navy ruled the seas. Peace in Europe allowed the British to focus their interests on more remote parts of the world, and, during this period, the British Empire reached its zenith. British colonial expansion reached its height largely during the reign of Queen Victoria (1837-1901). Queen Victoria's reign witnessed the spread of British technology, commerce,

language, and government throughout the British Empire, which, at its greatest extent, encompassed roughly one-fifth to one-quarter of the world's area and population. British colonies contributed to the United Kingdom's extraordinary economic growth and strengthened its voice in world affairs. Even as the United Kingdom extended its imperial reach overseas, it continued to develop and broaden its democratic institutions at home.

20th Century

By the time of Queen Victoria's death in 1901, other nations, including the United States and Germany, had developed their own industries; the United Kingdom's comparative economic advantage had lessened, and the ambitions of its rivals had grown. The losses and destruction of World War I, the depression of the 1930s, and decades of relatively slow growth eroded the United Kingdom's preemi-

nent international position of the previous century. Britain's control over its empire loosened during the interwar period. Ireland, with the exception of six northern counties, gained independence from the United Kingdom in 1921. Nationalism became stronger in other parts of the empire, particularly in India and Egypt.

In 1926, the United Kingdom, completing a process begun a century earlier, granted Australia, Canada, and New Zealand complete autonomy within the empire. They became charter members of the British Commonwealth of Nations (now known as the Commonwealth), an informal but closely-knit association that succeeded the empire. Beginning with the independence of India and Pakistan in 1947, the remainder of the British Empire was almost completely dismantled. Today, most of Britain's former colonies belong to the Commonwealth, almost all of them as independent members. There are, however, 13 former British colonies—including Bermuda, Gibraltar, the Falkland Islands, and others—which have elected to continue their political links with London and are known as United Kingdom Overseas Territories.

Although often marked by economic and political nationalism, the Commonwealth offers the United Kingdom a voice in matters concerning many developing countries. In addition, the Commonwealth helps preserve many institutions deriving from British experience and models, such as parliamentary democracy, in those countries.

GOVERNMENT

The United Kingdom does not have a written constitution. The equivalent body of law is based on statute, common law, and "traditional rights." Changes may come about formally through new acts of Parliament, informally through the acceptance of new practices and usage, or by judicial precedents. Although Parliament has the theoretical power to make or repeal any law, in actual practice the weight of 700 years of tradition restrains arbitrary actions. Executive power rests nominally with the monarch but actually is exercised by a committee of ministers (cabinet) traditionally selected from among the members of the House of Commons and, to a lesser extent, the House of Lords. The prime minister is normally the leader of the largest party in the Commons, and the government is dependent on its support.

Parliament represents the entire country and can legislate for the whole or for any constituent part or combination of parts. The maximum parliamentary term is 5 years, but the prime minister may ask the monarch to dissolve Parliament and call a general election at any time. The focus of legislative power is the 646-member House of Commons, which has sole jurisdiction over finance. The House of Lords, although shorn of most of its powers, can still review, amend, or delay temporarily any bills except those relating to the budget. The House of Lords has more time than the House of Commons to pursue one of its more important functions—debating public issues. In 1999, the government removed the automatic right of hereditary peers to hold seats in the House of Lords. The current house consists of appointed life peers who hold their seats for life and 92 hereditary peers who will hold their seats only until final reforms have been agreed upon and implemented. The judiciary is independent of the legislative and executive branches but cannot review the constitutionality of legislation.

The separate identities of each of the United Kingdom's constituent parts are also reflected in their respective governmental structures. Up until the recent devolution of power to Scotland and Wales, a cabinet minister (the Secretary of State for Wales) handled Welsh affairs at the national level with the advice of a broadly representative council for Wales. Scotland maintains, as it did before union with England, different systems of law (Roman-French), education, local government, judiciary, and national church (the Church of Scotland instead of the Church of England). In addition, separate departments grouped under a Secretary of State for Scotland, who also is a cabinet member, handled most domestic matters. In late 1997, however, following approval of referenda by Scottish and Welsh voters (though only narrowly in Wales), the British Government introduced legislation to establish a Scottish Parliament and a Welsh Assembly. The first elections for the two bodies were held May 6, 1999. The Welsh Assembly opened on May 26, and the Scottish Parliament opened on July 1, 1999. The devolved legislatures have largely taken over most of the functions previously performed by the Scottish and Welsh offices.

Northern Ireland had its own Parliament and prime minister from 1921 to 1973, when the British Government imposed direct rule in order to deal with the deteriorating political and security situation. From 1973, the Secretary of State for Northern Ireland, based in London, was responsible for the region, including efforts to resolve the issues that lay behind the "the troubles."

By the mid-1990s, gestures toward peace encouraged by successive British governments and by President Clinton began to open the door for restored local government in Northern Ireland. An Irish Republican Army (IRA) cease-fire and nearly 2 years of multiparty negotiations, led by former U.S. Senator George Mitchell, resulted in the Good Friday Agreement of April 10, 1998, which was subsequently approved by majorities in both Northern Ireland and the Republic of Ireland. Key elements of the agreement include devolved government, a commitment of the parties to work toward "total disarmament of all paramilitary organizations," police reform, and enhanced mechanisms to guarantee human rights and equal opportunity. The Good Friday Agreement also called for formal cooperation between the Northern Ireland institutions and the Government of the Republic of Ireland, and it established the British-Irish Council, which includes representatives of the British and Irish Governments as well as the devolved

Governments of Northern Ireland, Scotland, and Wales. Devolved government was reestablished in Northern Ireland in December 1999.

The Good Friday Agreement provides for a 108-member elected Assembly, overseen by a 12-minister Executive Committee (cabinet) in which unionists and nationalists share leadership responsibility. Northern Ireland elects 18 representatives to the Westminster Parliament in London. However, the five Sinn Fein Members of Parliament (MPs), who won seats in the 2004 election, have refused to claim their seats.

Progress has been made on each of the key elements of the Good Friday Agreement. Most notably, a new police force has been instituted; the IRA has decommissioned its weapons, and the security situation in Northern Ireland has normalized. Since 2002, when the last devolved government was suspended, the British Government, with Irish and U.S. support, continued to push Northern Ireland's main parties towards a power-sharing agreement. In October 2006, intense negotiations led to the St. Andrews Agreement, which set up a Transitional Assembly, as the precursor for the return of devolved government. Parties were given until March 26, 2007 to work out arrangements for a power-sharing agreement. As part of these negotiations, the Democratic Unionist Party (DUP) insisted that Sinn Fein endorse policing structures, a key U.S. objective as well.

In a historic move, Sinn Fein's general membership finally agreed to support policing in late January 2007. New assembly elections were held on March 7, returning the unionist (Protestant) DUP and nationalist (Catholic) Sinn Fein again as the two largest parties. While party leaders Ian Paisley (DUP) and Gerry Adams (Sinn Fein) did not reach agreement on power-sharing in time for the March 26 deadline, they did hold a historic joint meeting that day. At the meeting, they agreed to begin a power-sharing government on May 8 with Paisley as First Minister and Martin McGuinness of Sinn Fein as Deputy First Minister. On May 8, 2007 Paisley and McGuinness took their oath of office in the presence of British Prime Minister Tony Blair, Irish Prime Minister Bertie Ahern, and a bipartisan U.S. presidential delegation headed by Special Envoy Paula Dobriansky, who was accompanied by Senator Ted Kennedy.

While most attributes of government have been devolved to the Northern Ireland Assembly, responsibility for security and justice remains in the hands of the Parliament in Westminster. The St. Andrews Agreement envisioned devolution of policing and justice by May 2008. Other outstanding issues relate to continued paramilitary activities. While the IRA has completely decommissioned its weapons and is no longer considered a terrorist threat, a few loyalist (Protestant) paramilitary groups have thus far refused to stand down or decommission. While one large loyalist paramilitary group recently announced it has placed its weapons "out of use", it has not formally decommissioned them. There is also some concern about dissident republican groups who are believed responsible for a number of fire bombs in November 2006 around Northern Ireland.

The United States also is committed to Northern Ireland's economic development, and through the U.S. Agency for International Development (USAID) almost $462 million was obligated to the International Fund for Ireland from 1986 to 2006. The fund provides grants and loans to businesses to improve the economy, redress inequalities of employment opportunity, and improve cross-border business and community ties.

Principal Government Officials

Last Updated: 11/12/08

Queen: **ELIZABETH II**
Prime Min., First Lord of the Treasury, & Minister for the Civil Service: **Gordon BROWN**
Chancellor of the Exchequer: **Alistair DARLING**
Sec. of State for Business, Enterprise, & Regulatory Reform: **John HUTTON**
Sec. of State for Children, Schools, & Families: **Ed BALLS**
Sec. of State for Communities & Local Govt.: **Hazel BLEARS**
Sec. of State for Culture, Media, & Sport: **Andy BURNHAM**
Sec. of State for Defense: **Desmond BROWNE**
Sec. of State for the Environment, Food, & Rural Affairs: **Hilary BENN**
Sec. of State for Equalities: **Harriet HARMAN**
Sec. of State for Foreign & Commonwealth Affairs: **David MILIBAND**
Sec. of State for Health: **Alan JOHNSON**
Sec. of State for the Home Dept.: **Jacqui SMITH**
Sec. of State for Innovation, Universities, & Skills: **John DENHAM**
Sec. of State for Intl. Development: **Douglas ALEXANDER**
Sec. of State for Justice: **Jack STRAW**
Sec. of State for Northern Ireland: **Shaun WOODWARD**
Sec. of State for Scotland: **Desmond BROWNE**
Sec. of State for Transport: **Ruth KELLY**
Sec. of State for Wales: **Paul MURPHY**
Sec. of State for Work & Pensions: **James PURNELL**
Lord Chancellor: **Jack STRAW**
Leader of the House of Lords: **ASHTON, Baroness**
Pres. of Council, Leader of the House of Commons, & Chmn. of the:
Labor Party: **Harriet HARMAN**
Chancellor of the Duchy of Lancaster & Cabinet Office Minister: **Ed MILIBAND**
Chief Sec. to the Treasury: **Yvette COOPER**
Chief Whip & Parliamentary Sec. to the Treasury: **Geoff HOON**
Governor, Bank of England: **Mervyn KING**
Ambassador to the US: **Nigel Elton SHEINWALD, Sir**
Permanent Representative to the UN, New York: **John SAWERS, Sir**

The United Kingdom maintains an embassy in the United States at 3100 Massachusetts Ave. NW, Washington, DC 20008 (tel. 202-588-6500; fax 202-588-7870).

POLITICAL CONDITIONS

Tony Blair became the first Labour Prime Minister ever to win a third

consecutive term when he was re-elected on May 5, 2005. Labour has a 67-seat majority in the House of Commons. The Conservative (Tory) Party and Liberal-Democrats (LibDems) form the major opposition parties. Blair stepped down as Prime Minister in June 2007. Labour Party leader Gordon Brown succeeded him. The main British parties support a strong transatlantic link, but have become increasingly absorbed by European issues as Britain's economic and political ties to the continent grow in the post-Cold War world. Prime Minister Brown is expected to continue Blair's policy of having the United Kingdom play a leading role in Europe even as the United Kingdom maintains its strong bilateral relationship with the United States. Britain's relationship with Europe is a subject of considerable political discussion in the United Kingdom.

ECONOMY

The United Kingdom has the fifth-largest economy in the world, is the second-largest economy in the European Union, and is a major international trading power. A highly developed, diversified, market-based economy with extensive social welfare services provides most residents with a high standard of living. Unemployment and inflation levels are amongst the lowest within the European Union.

Since 1979, the British Government has privatized most state-owned companies, including British Steel, British Airways, British Telecom, British Coal, British Aerospace, and British Gas, although in some cases the government retains a "golden share" in these companies. The Labour government has continued the privatization policy of its Conservative predecessor, particularly by encouraging "public-private partnerships" (partial privatization) in such areas as the London Underground. The economy of the United Kingdom is now primarily based on private enterprise, accounting for approximately four-fifths of employment and output.

London ranks alongside New York as a leading international financial center. London's financial exports contribute greatly to the United Kingdom's balance of payments. Ratings agencies rank the United Kingdom's banking sector as one of the strongest in the world and its banks are amongst the most profitable in the G-8. It is a global leader in emissions trading and is home to the Alternative Investment Market (AIM). It is also a government priority to make London the leading center of Islamic finance.

The United Kingdom is the European Union's only significant energy exporter. It is also one of the world's largest energy consumers, and most analysts predict a shift in U.K. status from net exporter to net importer of energy by 2020, possibly sooner. Oil production in the U.K. is leveling off. While North Sea natural gas production continues to rise, gains may be offset by ever-increasing consumption. North Sea oil and gas exploration activities are shifting to smaller fields and to increments of larger, developed fields, presenting opportunities for smaller, independent energy operators to become active in North Sea production.

DEFENSE AND FOREIGN RELATIONS

The United Kingdom is a founding member of the North Atlantic Treaty Organization (NATO) and is one of NATO's major European maritime, air, and land powers; it ranks third among NATO countries in total defense expenditure. The United Kingdom has been a member of the European Community (now European Union) since 1973. In the United Nations, the United Kingdom is a permanent member of the Security Council. The U.K. held the Presidency of the G-8 during 2005; it held the EU Presidency from July to December 2005.

The British Armed Forces are charged with protecting the United Kingdom and its overseas territories, promoting Britain's wider security interests, and supporting international peacekeeping efforts. The 37,000-member Royal Navy, which includes 4,000 Royal Marine commandos, is in charge of the United Kingdom's independent strategic nuclear arm, which consists of four Trident missile submarines. The British Army, consisting of approximately 97,900 personnel, the Royal Air Force, with 42,000 personnel, along with the Royal Navy and Royal Marines, are active and regular participants in NATO and other coalition operations. Approximately 9% of the British Armed Forces is female, and 4% of British forces represent ethnic minorities.

The United Kingdom stood shoulder to shoulder with the United States following the September 11, 2001 terrorist attacks in the U.S., and its military forces are part of the coalition force in Afghanistan. The U.K. force in Afghanistan numbered 7,700 at the end of 2007. U.K. forces are primarily based in the Helmand region, where they are on the front line in the war against continued Taliban operations. In addition, the U.K. has contributed more than £500 million to Afghan reconstruction—the second-largest donor after the U.S. The U.K. was the United States' main coalition partner in Operation Iraqi Freedom and continues to have more than 5,000 troops deployed in Iraq to help stabilize and rebuild the country. Under UN Security Council Resolution 1483, the U.K. also shared with the United States responsibility for civil administration in Iraq and was an active participant in the Coalition Provisional Authority before the handover of Iraqi sovereignty on June 28, 2004. Britain's participation in the Iraq war and its aftermath remains a domestically controversial issue.

U.S.-UNITED KINGDOM RELATIONS

The United Kingdom is one of the United States' closest allies, and British foreign policy emphasizes close coordination with the United States.

Bilateral cooperation reflects the common language, ideals, and democratic practices of the two nations. Relations were strengthened by the United Kingdom's alliance with the United States during both World Wars, and its role as a founding member of NATO, in the Korean conflict, in the Persian Gulf War, and in Operation Iraqi Freedom. The United Kingdom and the United States continually consult on foreign policy issues and global problems and share major foreign and security policy objectives.

The United Kingdom is the fifth-largest market for U.S. goods exports after Canada, Mexico, Japan, and China, and the sixth-largest supplier of U.S. imports after Canada, China, Mexico, Japan, and Germany. U.S. exports of goods and services to the United Kingdom in 2006 totaled $92 billion, while U.S. imports from the U.K. totaled $93 billion. The United States has had a trade deficit with the United Kingdom since 1998. The United Kingdom is a large source of foreign tourists in the United States. In 2007, an estimated 3.1 million U.S. residents visited the United Kingdom, while 4.5 million U.K. residents visited the United States.

The United States and the United Kingdom share the world's largest foreign direct investment partnership. U.S. investment in the United Kingdom reached $324 billion in 2005, while U.K. direct investment in the U.S. totaled $282 billion. This investment sustains more than 1 million American jobs.

TRAVEL

Consular Information Sheet

October 9, 2008

Country Description: The United Kingdom of Great Britain and Northern Ireland is a highly developed constitutional monarchy comprised of Great Britain (England, Scotland and Wales) and Northern Ireland. Gibraltar is a United Kingdom Overseas Territory bordering Spain and located at the southernmost tip of Europe at the entrance to the Mediterranean Sea. It is one of thirteen former British colonies that have elected to continue their political links with London. Tourist facilities are widely available.

Entry Requirements: A UK visa/entry clearance is not required for tourist or business visits to the United Kingdom of less than six months in duration. Visitors wishing to remain longer than one month in Gibraltar should regularize their stay with Gibraltar immigration authorities. Those planning to visit the United Kingdom for any purpose other than tourism or business, or who intend to stay longer than six months, should consult the website of the British Embassy in the United States at http://ukinusa.fco.gov.uk/en for information about current visa/entry clearance requirements. The United Kingdom has very specific definitions of tourism and business. Interns, students, prospective students, fiancés/partners, those coming to the United Kingdom to work unpaid or paid, those coming to the United Kingdom to marry, and all dependents in the preceding categories may require a visa/entry clearance prior to travel, irrespective of duration of stay. Prospective visitors should note that "unpaid work" is defined very broadly by the UK authorities to include such activities as volunteer work and performance of any kind. Those who are required to obtain a visa/entry clearance and fail to do so may be denied entry and returned to their port of origin. The U.S. Embassy cannot intervene in UK immigration matters.

In the past year, the British government has completely restructured its immigration system, tightening visa/entry clearance regulations and enforcement at its borders. All American travelers to the United Kingdom are urged to check the web site of the British Embassy in the United States

at http://ukinusa.fco.gov.uk/en or the web site of the UK Border Agency at http://www.bia.homeoffice.gov.uk/ to determine whether they must have a visa/entry clearance before traveling to the United Kingdom. Students should be especially alert to UK visa/entry clearance requirements. Under no circumstances should Americans seeking to study or work in the United Kingdom attempt to enter the country without the appropriate visa/entry clearance from a British Consulate in the United States. If you do so, you are likely to be detained by UK immigration officials at the port of entry and held in an immigration detention facility until you can be returned to the United States. Again, the U.S. Embassy cannot intervene in UK immigration matters.

In addition to the British Embassy web site at http://ukinusa.fco.gov.uk/en, those seeking current UK visa/entry clearance information may also contact UK consular offices in the United States via their premium rate telephone service at 1-900-656-5000 (cost $3/minute) or 1-212-796-5773 ($12 flat fee). There is also a no-fee website for visa information at www.visainfoservices.com.

Safety and Security: The United Kingdom is politically stable, with a modern infrastructure, but shares with the rest of the world an increased threat of terrorist incidents of international origin, as well as the potential, though significantly diminished in recent years, for isolated violence related to the political situation in Northern Ireland (a part of the United Kingdom).

Like the United States, the United Kingdom shares its national threat levels with the general public to keep everyone informed and explain the context for the various increased security measures that may be encountered. UK threat levels are determined by the UK Home Office and are posted on its web site at http://www.homeoffice.gov.uk/security/current-threat-level.

Information from the UK Security Service, commonly known as MI5, about the reasons for the increased threat level and actions the public can take is available on the MI5 web site at http://www.mi5.gov.uk. American citizens are advised to check with the UK Department for Transport at http://www.dft.gov.uk/transportforyou/airtravel/airportsecurity regarding the latest security updates and carry-on luggage restrictions.

The British Home Secretary has urged UK citizens to be alert and vigilant by, for example, keeping an eye out for suspect packages or people acting suspiciously at subway (called the Tube or Underground) and train stations, as well as at airports, and reporting anything suspicious to the appropriate authorities. Americans are reminded to remain vigilant with regard to their personal security and to exercise caution. For more information about UK public safety initiatives, consult the UK Civil Contingencies Secretariat web site at http://www.ukresilience.gov.uk.

The political situation in Northern Ireland has improved dramatically. The potential remains, however, for sporadic incidents of street violence and/or sectarian confrontation. American citizens traveling to Northern Ireland should therefore remain alert to their surroundings and should be aware that if they choose to visit potential flashpoints or attend parades, sporadic violence remains a possibility. Tensions may be heightened during the summer marching season (April to August), particularly during the month of July (around the July 12th public holiday).

The phone number for police/fire/ambulance emergency services—the equivalent of 911 in the United States—is 999 in the United Kingdom and 112 in Gibraltar. This number should also be used for warnings about possible bombs or other immediate threats. The UK Anti-Terrorist Hotline, at 0800-789-321, is for tips and confidential information about possible terrorist activity.

For the latest security information, Americans traveling abroad should regularly monitor the Department's Internet web site where the current Travel Warnings and Travel Alerts, including the Worldwide Caution Travel Alert, can be found. Recent communications from U.S. Embassy London to the local American citizen community, called Warden Messages, can be found on the U.S. Embassy's American Citizens' Services web site at http://london.usembassy.gov/cons_new/acs/index.html.

Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S., or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: The Kingdom and Gibraltar benefit from generally low crime rates, which decreased slightly in 2007 in significant categories, including violent crime. The crime situation in the United Kingdom is similar to that in the United States: typical incidents include pick pocketing; muggings; "snatch and grab" thefts of mobile phones, watches and jewelry; and thefts of unattended bags, especially at airports and from cars parked at restaurants, hotels, and resorts. Pickpockets target tourists, especially at historic sites and restaurants, and on buses, trains, and the London subway (known as the Tube or Underground). Thieves often target unattended cars parked at tourist sites and roadside restaurants, looking for laptop computers and handheld electronic equipment, especially global positioning satellite equipment. Walking in isolated areas, including public parks, especially after dark, should be avoided, as these are advantageous venues for muggers and thieves. At night or when there is little foot traffic, travelers should be especially careful using the underground pedestrian tunnels. As a general rule, either walk the extra distance to use a surface crossing or wait until there are other adult pedestrians entering the tunnel.

In London, travelers should use only licensed Black Cabs or car services recommended by their hotel or tour operator. Unlicensed taxis or private cars posing as taxis may offer low fares, but are often uninsured and may have unlicensed drivers. In some instances, travelers have been robbed

and raped while using these cars. You can access 7,000 licensed Black Cabs using just one telephone number: 087-1871-8710. This taxi booking service combines all six of London's radio taxi circuits, allowing you to telephone 24 hours a day if you need a cab. Alternatively, to find a licensed minicab, text HOME to 60835 on your mobile phone to get the telephone number to two licensed minicab companies in the area. If you know in advance when you will be leaving for home, you can prebook your return journey. The Safe Travel at Night partnership among the Metropolitan Police, Transport for London, and the Mayor of London maintains a web site with additional information at http://www.cabwise.com.

Travelers should not leave drinks unattended in bars and nightclubs. There have been some instances of drinks being spiked with illegal substances, leading to incidents of robbery and rape.

Americans should take steps to ensure the safety of their U.S. passports. Visitors in England, Scotland, Wales, Northern Ireland, and Gibraltar are not expected to produce identity documents for police authorities and thus may secure their passports in hotel safes or residences. Abundant ATMs that link to U.S. banking networks offer an optimal rate of exchange, and they preclude the need to carry a passport to cash travelers' checks. Travelers should be aware that U.S. banks might charge a higher processing fee for withdrawals made overseas. Common-sense personal security measures taken in the United States when using ATMs should also be followed in the United Kingdom. ATM fraud in the United Kingdom is becoming more sophisticated, incorporating technologies to surreptitiously record customer ATM card and PIN information. Travelers should avoid using ATMs that look in any way temporary in structure or location, or are located in isolated areas. Travelers should be aware that in busy public areas, thieves use distraction techniques, such as waiting until the PIN number has been entered and then pointing to money on the ground, or attempting to hand out a free newspaper. When the ATM user is distracted, a colleague will quickly withdraw cash and leave. If distracted in any way, travelers should press the cancel transaction button immediately and collect their card before speaking to the person who has distracted them. If the person's motives appear suspicious, travelers should not challenge them but remember the details and report the matter to police as soon as possible. In addition, travelers should not use the ATM if there is anything stuck to the machine or if it looks unusual in any way. If the machine does not return the card, report the incident to the issuing bank immediately.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate at the opening of the next business day. The U.S. Embassy or Consulate only issues replacement passports during regular business hours. If you are the victim of a crime while overseas, report it to local police. The nearest U.S. Embassy or Consulate will also be able to assist by helping you to find appropriate medical care, contacting family members or friends, and explaining how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

Visit the Victim Support web site, maintained by an independent UK charity to help people cope with the effects of crime: http://www.victimsupport.org.uk.

Medical Facilities and Health Information: While medical services are widely available, free care under the National Health System is allowed only for UK residents and certain EU nationals. Tourists and short-term visitors will be charged for medical treatment in the United Kingdom. Charges may be significantly higher than those assessed in the United States. Hiking in higher elevations can be treacherous. Several people die each year while hiking, particularly in Scotland, often due to sudden changes in weather. Visitors, including experienced hikers, are encouraged to discuss intended routes with local residents familiar with the area, and to adhere closely to recommendations.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's web site at http://wwwn.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance companies prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation. If your medical insurance policy does not provide overseas coverage, you may want to purchase a short-term policy for your trip. The Department of State provides an online list of travel insurance companies that can provide the additional insurance needed for the duration of one's trip abroad.

Remember also that most medical care facilities and medical care providers in the United Kingdom do not accept insurance subscription as a primary source of payment. Rather, the beneficiary is expected to pay for the service and then seek reimbursement from the insurance company. This may require an upfront payment in the $10,000 to $20,000 range.

Traffic Safety and Road Conditions: UK penalties for driving under the influence of even minimal amounts of alcohol or drugs are stiff and often result in prison sentences. In contrast to U.S. and continental European traffic, which moves on the right side of the road, UK traffic moves on the left. The maximum

speed limit on highways/motorways in the United Kingdom is 70 mph. Motorways generally have a hard shoulder (breakdown lane) on the far left, defined by a solid white line. It is illegal to stop or park on a hard shoulder unless it is an emergency. In such cases, you should activate your hazard lights, get out of your vehicle, and go onto an embankment for safety.

Emergency call boxes (orange telephone booths with SOS printed on them) may be found at half-mile intervals along the motorway. White and blue poles placed every 100 yards along the motorway point in the direction of the nearest call box. Emergency call boxes dial directly to a motorway center. It is best to use these phones rather than a personal cell phone, because motorway center personnel will immediately know the location of a call received from an emergency call box.

Roadside towing services may cost approximately £125 (as of 10/08, approximately $225). However, membership fees of automotive associations such as the RAC (Royal Automobile Club) or AA (Automobile Association) often include free roadside towing service.

Visitors uncomfortable with or intimidated by the prospect of driving on the left-hand side of the road may wish to avail themselves of the United Kingdom's extensive bus, rail, and air transport networks. Roads in the United Kingdom are generally excellent but are narrow and often congested in urban areas. If you plan to drive while in the United Kingdom, you may wish to obtain a copy of the Highway Code, available at http://www.direct.gov.uk/en/TravelAndTransport/Highwaycode/index.htm.

Travelers intending to rent cars in the United Kingdom should make sure that they are adequately insured. U.S. auto insurance is not always valid outside the United States, and travelers may wish to purchase supplemental insurance, which is generally available from most major rental agents. A congestion charge of £8 (as of 10/08, approximately $15) is imposed on all cars entering much of central London Monday through Friday from 7:00 a.m. to 6:30 p.m. Information on the congestion charge can be found at http://www.tfl.gov.uk/roadusers/congestioncharging.

Public transport in the United Kingdom is excellent and extensive. However, poor track conditions may have contributed to train derailments, resulting in some fatalities. Repairs are under way and the overall safety record is excellent. Information on disruptions to London transportation services can be found at http://www.tfl.gov.uk/tfl/livetravelnews/realtime/tube/default.html and information about the status of National Rail Services can be found at http://nrekb.nationalrail.co.uk/service_disruptions/today.html. Many U.S. pedestrians are injured, some fatally, every year in the United Kingdom because they forget that oncoming traffic approaches from the opposite direction than in the United States. Extra care should be taken when crossing streets; remember to remain alert and look both ways before stepping into the street. Driving in Gibraltar is on the right-hand side of the road, as in the United States and continental Europe. Persons traveling overland between Gibraltar and Spain may experience long delays in clearing Spanish border controls.

For specific information concerning United Kingdom driving permits, vehicle inspection, road tax and mandatory insurance, refer to the United Kingdom's Department of Environment and Transport web site at www.dft.gov.uk, the Driving Standards Agency web site at http://www.dsa.gov.uk or consult the U.S. Embassy in London's web site at http://london.usembassy.gov.

Aviation Safety Oversight: The U.S. Federal Aviation Administration (FAA) has assessed the Government of the United Kingdom's Civil Aviation Authority as being in compliance with International Civil Aviation Organization (ICAO) aviation safety standards for oversight of the UK's air carrier operations. For further information, travelers may visit the FAA's web site at http://www.faa.gov.

Special Circumstances: The legal drinking age in the United Kingdom is generally lower than that in the United States, and social drinking in pubs is often seen as a routine aspect of British life. Parents, organizers of school trips, and young travelers should be aware of the impact that this environment may have when combined with the sense of adventure that comes with being abroad.

The United Kingdom has strict gun-control laws, and importing firearms is extremely complicated. Travelers should consider leaving all firearms in the United States. Restrictions exist on the type and number of weapons that may be possessed by an individual. All handguns, such as pistols and revolvers, are prohibited, with very few exceptions. Licensing of firearms in the United Kingdom is controlled by the police.

Applicants for a license must be prepared to show "good reason" why they require each weapon. Applicants must also provide a copy of their U.S. gun license, a letter of good conduct from their local U.S. police station, and a letter detailing any previous training, hunting, or shooting experience. Background checks will also be carried out. Additional information on applying for a firearm certificate and/or shotgun certificate can be found on the Metropolitan Police Firearms Enquiry Teams web site at http://www.met.police.uk.

A number of Americans are lured to the United Kingdom each year in the belief that they have won a lottery or have inherited from the estate from a long-lost relative. Americans may also be contacted by persons they have "met" over the Internet who now need funds urgently to pay for hospital treatment, hotel bills, taxes, or airline security fees. Invariably, the person contacted is the victim of fraud.

Any unsolicited invitations to travel to the United Kingdom to collect winnings or an inheritance should be viewed with skepticism. Also, there are no licenses or fees required when transiting a UK airport, nor is emergency medical treatment withheld

pending payment of fees. Please see our information on International Financial Scams.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses.

Persons violating British law, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in the UK are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States. Many pocket knives and other blades, and mace or pepper spray canisters, although legal in the United States, are illegal in the United Kingdom and will result in arrest and confiscation if detected. A UK Metropolitan Police guide to items that are prohibited as offensive weapons is available at http://www.met.police.uk/youngpeople/guns.htm.

A UK Customs Guide, detailing which items visitors are prohibited from bringing into the United Kingdom, is available at http://customs.hmrc.gov.uk. Air travelers to and from the United Kingdom should be aware that penalties against alcohol-related and other in-flight crimes ("air rage") are stiff and are being enforced with prison sentences. Please also see our information on customs regulations that pertain when returning to the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration And Embassy And Consulate Locations: Americans living or traveling in the United Kingdom are encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration web site, and to obtain updated information on travel and security within the United Kingdom.

By registering, Americans make it easier for the Embassy or Consulate to contact them in case of emergency, and to relay updated information on travel and security within the United Kingdom. The Embassy and Consulates regularly send security and other information via email to Americans who have registered. As noted above, recent communications from U.S. Embassy London to the local American citizen community, called Warden Messages, can be found on the embassy's web site.

Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate. The Consular Section also disseminates a newsletter every month. Those wishing to subscribe to the monthly consular newsletter in London should send a request by email to SCSLondon@state.gov.

The U.S. Embassy is located at 24 Grosvenor Square, London W1A 1AE; telephone: in country 020-7499-9000; from the U.S. 011-44-20-7499-9000 (24 hours); Consular Section fax: in country 020-7495-5012; from the U.S. 011-44-20-7495-5012, and on the Internet at http://london.usembassy.gov. The U.S. Consulate General in Edinburgh, Scotland, is located at 3 Regent Terrace, Edinburgh EH7 5BW; Telephone: in country 0131-556-8315, from the U.S. 011-44-131-556-8315. After hours: in country 01224-857097, from the U.S. 011-44-1224-857097. Fax: in country 0131-557-6023; from the U.S. 011-44-131-557-6023.

Information on the Consulate General is included on the Embassy's web site at http://london.usembassy.gov/scotland. The U.S. Consulate General in Belfast, Northern Ireland, is located at Danesfort House, 228 Stranmillis Road, Belfast BT9 5GR; Telephone: in country 028-9038-6100; from the U.S. 011-44-28-9038-6100. Fax: in country 028-9068-1301; from the U.S. 011-44-28-9068-1301. Information on the Consulate General is included on the Embassy's web site at: http://london.usembassy.gov/nireland.

There is no U.S. consular representation in Gibraltar. Passport questions should be directed to the U.S. Embassy in Madrid, located at Serrano 75, Madrid, Spain; telephone (34)(91) 587-2200, and fax (34)(91) 587-2303. The web site is http://madrid.usembassy.gov. All other inquiries should be directed to the U.S. Embassy in London.

Intercountry Adoption

June 2006

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is based on public sources and current understanding.

Questions involving foreign and U.S. immigration laws and legal interpretation should be addressed respectively to qualified foreign or U.S. legal counsel.

Patterns of Immigration: Please review current reports online at http://adoption.state.gov.

Adoption Authority: The Department for Education and Skills is responsible for children's social services, including adoption policy. While the following address is the Central Authority for the Hague Convention on Intercountry Adoption, each adoption case will be handled by the relevant social services department in the area where the adoptive

child is located. Anyone who wishes to contact the Department of Education & Skills's Adoption Team should write to the following:

Area 47
Looked After Children Division
CAXTON HOUSE
Tothill Street
London
SW1H 9NA
Or e-mail: info@dfes.gsi.gov.uk

Eligibility Requirements for Adoptive Parents: Anyone over 21, whether married or single, can legally adopt a child. The United Kingdom does not have a statutory upper age limit. However, each local authority has the power to determine if a prospective adoptive parent is above its acceptable age limit on a case-by-case basis. Married couples must adopt jointly unless one partner cannot be found, is incapable of making an application, or if a separation is likely to be permanent. Unmarried couples may not adopt jointly although one partner in that couple may adopt as a single parent.

Residency Requirements: Residency requirements are set by the local Social Services Department on a case-by-case basis.

Time Frame: In view of the above, there is no standard time frame.

Adoption Agencies and Attorneys: Within the UK all local councils have a statutory responsibility to provide an adoption service. In addition to the local council, there are a number of voluntary adoption agencies who also provide an adoption service.

Adoption Fees: There are no specific costs set by the British government.

Adoption Procedures: Please see the Department for Education and Skills website (http://www.dfes.gov.uk/adoption) for detailed information on preparing of an intercountry adoption from third countries. The adoption of such children will be governed by the child's country of origin.

Required Documents: In general, adoptive parents must provide the following:

- A detailed home study completed by an approved adoption agency;
- Medical clearance;
- Full police background check.

For more information, please see http://www.dfes.gov.uk/adoption.

The British Embassy
3100 Massachusetts Avenue, NW
Washington, DC 20008
Ph: (202) 588-7800
http://www.britainusa.com

The United Kingdom has Consulates-General in Atlanta, Boston, Chicago, Houston, Los Angeles, New York, Orlando, San Francisco and Seattle.

U.S. Immigration Requirements: Prospective adopting parents are strongly encouraged to consult USCIS publication M-249, *The Immigration of Adopted and Prospective Adoptive Children,* as well as the Department of State publication, *Intercountry Adoptions.*

Please see the *Intercountry Adoption* section of this book for more details and review current reports online at http://adoption.state.gov.

U.S. Embassy
55/56 Upper Brook Street
London W1A 2LQ
Phone: 020-7499-9000
Fax: 020-7495-5012

The United States also has Consulates General in Belfast (Northern Ireland) and Edinburgh (Scotland). These are located at:

U.S. Consulate General, Belfast, Northern Ireland
Danesfort House
223 Stranmillis Road
Belfast BT9 5GR
Tel: [44] (0)28 9038 6100
Fax: [44] (0)28 9068 1301

Consulate General, Edinburgh, Scotland
3 Regent Terrace
Edinburgh
Scotland, EH7 5BW
Tel: [44] (0)131 556-8315
Fax: [44] (0)131 557-6023

Additional Information: Specific questions about adoption in the United Kingdom may be addressed to the U.S. Embassy in the London. General questions regarding intercountry adoption may be addressed to the Office of Children's Issues, U.S. Department of State, CA/OCS/CI, SA-29, 4th Floor, 2201 C Street, NW, Washington, D.C. 20520-4818, toll-free Tel: 1-888-407-4747.

International Parental Child Abduction

February 2008

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services.

For more information, please read the *International Parental Child Abduction* section of this book and review current reports online at http://travel.state.gov/childabduction.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is provided for general information only. Questions involving interpretation of specific foreign laws should be addressed to foreign legal counsel.

The Hague Convention on the Civil Aspects of International Child Abduction came into force between the United States and the United Kingdom on July 1, 1988. Therefore, Hague Convention provisions for return would apply to children abducted or retained after July 1, 1988.

Parents and legal guardians of children taken to the United Kingdom prior to July 1, 1988, may still submit applications for access to the child under the Hague Convention in some cases. The United Kingdom has three Central Authorities: England and Wales, Northern Ireland, and Scotland.

The Central Authority
for England and Wales
The Child Abduction Unit
Official Solicitors Department
81 Chancery Lane—Fourth floor
London WC2A 1DD England
Telephone: 011 [44] (171) 911-7047
Fax: 011 [44] (171) 911-7248

The Central Authority
for Northern Ireland
Northern Ireland Court Service
Windsor House
9-15 Belford Street
Belfast BT2 7LT Northern Ireland
Telephone: 011 [44] (232) 328-594

The Central Authority for Scotland
Office of the Secretary of State
for Scotland
Scottish Courts Administration
Hayweight House
23 Lauriston Street
Edinburgh EH3 9DQ Scotland
Telephone: 011 [44] (131) 229-9200
Fax: 011 [44] (131) 221-6894

For further information on international parental child abduction, contact the Office of Children's Issues, U.S. Department of State at 1-888-407-4747 or visit its web site on the Internet at http://travel.state.gov.

You may also direct inquiries to: Office of Children's Issues, U.S. Department of State, Washington, DC 20520-4811; Phone: (202) 736-9090; Fax: (202) 312-9743.

UNITED STATES

January 2009

Official Name:

United States of America

Editor's Note: This entry is an abstract of key facts regarding the United States. This information was provided by the U.S. Central Intelligence Agency which indicates data was developed from public sources. The U.S. Department of State is the source for Background Notes on most other nations in this Yearbook.

PROFILE

Britain's American colonies broke with the mother country in 1776 and were recognized as the new nation of the United States of America following the Treaty of Paris in 1783. During the 19th and 20th centuries, 37 new states were added to the original 13 as the nation expanded across the North American continent and acquired a number of overseas possessions. The two most traumatic experiences in the nation's history were the Civil War (1861-65) and the Great Depression of the 1930s. Buoyed by victories in World Wars I and II and the end of the Cold War in 1991, the US remains the world's most powerful nation state. The economy is marked by steady growth, low unemployment and inflation, and rapid advances in technology.

GEOGRAPHY

Location: North America, bordering both the North Atlantic Ocean and the North Pacific Ocean, between Canada and Mexico

Geographic coordinates: 38 00 N, 97 00 W

Area: *total:* 9,826,630 sq km; *land:* 9,161,923 sq km; *water:* 664,707 sq km; *Note:* includes only the 50 states and District of Columbia

Area—comparative: about half the size of Russia; about three-tenths the size of Africa; about half the size of South America (or slightly larger than Brazil); slightly larger than China; more than twice the size of the European Union

Land boundaries: *total:* 12,034 km; *border countries:* Canada 8,893 km (including 2,477 km with Alaska), Mexico 3,141 km; *Note:* US Naval Base at Guantanamo Bay, Cuba is leased by the US and is part of Cuba; the base boundary is 28 km

Coastline: 19,924 km

Maritime claims: *territorial sea:* 12 nm; *contiguous zone:* 24 nm; *exclusive economic zone:* 200 nm; *continental shelf:* not specified

Climate: mostly temperate, but tropical in Hawaii and Florida, arctic in Alaska, semiarid in the great plains west of the Mississippi River, and arid in the Great Basin of the southwest; low winter temperatures in the northwest are ameliorated occasionally in January and February by warm chinook winds from the eastern slopes of the Rocky Mountains

Terrain: vast central plain, mountains in west, hills and low mountains in east; rugged mountains and broad river valleys in Alaska; rugged, volcanic topography in Hawaii

Elevation extremes: *lowest point:* Death Valley -86 m; *highest point:* Mount McKinley 6,198 m

Natural resources: coal, copper, lead, molybdenum, phosphates, uranium, bauxite, gold, iron, mercury, nickel, potash, silver, tungsten, zinc, petroleum, natural gas, timber. The US has the world's largest coal reserves with 491 billion short tons accounting for 27% of the world's total

Land use: *arable land:* 18.01%; *permanent crops:* 0.21%; *other:* 81.78% (2005); *Irrigated land:* 223,850 sq km (2003)

Total renewable water resources: 3,069 cu km (1985)

Freshwater withdrawal (domestic/industrial/agricultural): *Total:* 477 cu km/yr (13%/46%/41%); *Per capita:* 1,600 cu m/yr (2000)

Natural hazards: tsunamis, volcanoes, and earthquake activity around Pacific Basin; hurricanes along the Atlantic and Gulf of Mexico coasts; tornadoes in the midwest and southeast; mud slides in California; forest fires in the west; flooding; permafrost in northern Alaska, a major impediment to development

Environment—current issues: air pollution resulting in acid rain in both the US and Canada; the US is the largest single emitter of carbon dioxide from the burning of fossil fuels; water pollution from runoff of pesticides and fertilizers; limited natural fresh water resources in much of the western part of the country require careful management; desertification

Environment—international agreements: *party to:* Air Pollution, Air Pollution-Nitrogen Oxides, Antarctic-Environmental Protocol, Antarctic-Marine Living Resources, Antarctic Seals, Antarctic Treaty, Climate Change, Desertification, Endangered Species, Environmental Modification, Marine Dumping, Marine Life Conservation, Ozone Layer Protection, Ship Pollution, Tropical Timber 83, Tropical Timber 94, Wetlands, Whaling. *signed, but not ratified:* Air Pollution-Persistent Organic Pollutants, Air Pollution-Volatile Organic Compounds, Biodiversity, Climate Change-Kyoto Protocol, Hazardous Wastes

Geography—Note: world's third-largest country by size (after Russia and Canada) and by population (after China and India); Mt. McKinley is highest point in North America and Death Valley the lowest point on the continent

PEOPLE

Population: 303,824,640 (July 2008 est.)

Age structure: *0-14 years:* 20.1% (male 31,257,108/female 29,889,645); *15-64 years:* 67.1% (male 101,825,901/female 102,161,823); *65 years and over:* 12.7% (male 16,263,255/female 22,426,914) (2008 est.)

Median age: *total:* 36.7 years; *male:* 35.4 years; *female:* 38.1 years (2008 est.)

Population growth rate: 0.883% (2008 est.)

Birth rate: 14.18 births/1,000 population (2008 est.)

Death rate: 8.27 deaths/1,000 population (2008 est.)

Net migration rate: 2.92 migrant(s)/1,000 population (2008 est.)

Sex ratio: *at birth:* 1.05 male(s)/female; *under 15 years:* 1.05 male(s)/female; *15-64 years:* 1 male(s)/female; *65 years and over:* 0.72 male(s)/female; *total population:* 0.97 male(s)/female (2008 est.)

Infant mortality rate: *total:* 6.3 deaths/1,000 live births; *male:* 6.95 deaths/1,000 live births; *female:* 5.62 deaths/1,000 live births (2008 est.)

Life expectancy at birth: total population: 78.14 years; *male:* 75.29 years; *female:* 81.13 years (2008 est.)

Total fertility rate: 2.1 children born/woman (2008 est.)

HIV/AIDS—adult prevalence rate: 0.6% (2003 est.)

HIV/AIDS—people living with HIV/AIDS: 950,000 (2003 est.)

HIV/AIDS—deaths: 17,011 (2005 est.)

Nationality: noun: American(s); adjective: American

Ethnic groups: white 79.96%, black 12.85%, Asian 4.43%, Amerindian and Alaska native 0.97%, native Hawaiian and other Pacific islander 0.18%, two or more races 1.61% (July 2007 estimate). *note:* a separate listing for Hispanic is not included because the US Census Bureau considers Hispanic to mean a person of Latin American descent (including persons of Cuban, Mexican, or Puerto Rican origin) living in the US who may be of any race or ethnic group (white, black, Asian, etc.); about 15.1% of the total US population is Hispanic

Religions: Protestant 51.3%, Roman Catholic 23.9%, Mormon 1.7%, other Christian 1.6%, Jewish 1.7%, Buddhist 0.7%, Muslim 0.6%, other or unspecified 2.5%, unaffiliated 12.1%, none 4% (2007 est.)

Languages: English 82.1%, Spanish 10.7%, other Indo-European 3.8%, Asian and Pacific island 2.7%, other 0.7% (2000 census); *Note:* Hawaiian is an official language in the state of Hawaii

Literacy: definition: age 15 and over can read and write; total population: 99%; *male:* 99%; *female:* 99% (2003 est.)

School life expectancy (primary to tertiary education): *total:* 16 years; *male:* 15 years; *female:* 16 years (2006)

Education expenditures: 5.3% of GDP (2005)

GOVERNMENT

Country name: *conventional long form:* United States of America; *conventional short form:* United States; *abbreviation:* US or USA

Government type: Constitution-based federal republic; strong democratic tradition

Cities: *Capital name:* Washington, DC; *geographic coordinates:* 38 53 N, 77 02 W; *time difference:* UTC-5 (during Standard Time); *daylight saving time:* +1hr, begins second Sunday in March; ends first Sunday in November; *Note:* the US is divided into six time zones

Political subdivisions: 50 states and 1 district*; Alabama, Alaska, Arizona, Arkansas, California, Colorado, Connecticut, Delaware, District of Columbia*, Florida, Georgia, Hawaii, Idaho, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Maine, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Montana, Nebraska, Nevada, New Hampshire, New Jersey, New Mexico, New York, North Carolina, North Dakota, Ohio, Oklahoma, Oregon, Pennsylvania, Rhode Island, South Carolina, South Dakota, Tennessee, Texas, Utah, Vermont, Virginia, Washington, West Virginia, Wisconsin, Wyoming

Dependent areas: American Samoa, Baker Island, Guam, Howland Island, Jarvis Island, Johnston Atoll, Kingman Reef, Midway Islands, Navassa Island, Northern Mariana Islands, Palmyra Atoll, Puerto Rico, Virgin Islands, Wake Island. *Note:* from 18 July 1947 until 1 October 1994, the US administered the Trust Territory of the Pacific Islands; it entered into a political relationship with all four political units: the Northern Mariana Islands is a commonwealth in political union with the US (effective 3 November 1986); the Republic of the Marshall Islands signed a Compact of Free Association with the US (effective 21 October 1986); the Federated States of Micronesia signed a Compact of Free Association with the US (effective 3 November 1986); Palau concluded a Compact of Free Association with the US (effective 1 October 1994)

Independence: 4 July 1776 (from Great Britain)

National holiday: Independence Day, 4 July (1776)

Constitution: 17 September 1787, effective 4 March 1789

Legal system: federal court system based on English common law; each state has its own unique legal system, of which all but one (Louisiana, which is still influenced by the Napoleonic Code) is based on English common law; judicial review of legislative acts; has not accepted compulsory ICJ jurisdiction

Suffrage: 18 years of age; universal

Executive branch: *chief of state:* President Barack H. OBAMA (since 20 January 2009); Vice President Joseph R. BIDEN (since 20 January 2009); note—the president is both the chief of state and head of government; head of government: President Barack H. OBAMA (since 20 January 2009); Vice President Joseph R. BIDEN (since 20 January 2009); *cabinet:* Cabinet appointed by the president with Senate approval; *elections:* president and vice president elected on the same ticket by a college of representatives who are elected directly from each state; president and vice president serve four-year terms (eligible for a second term); election last held 4 November 2008 (next to be held in November

2012); *election results:* Barack H. OBAMA elected president; percent of popular vote - Barack H. OBAMA 52.4%, John MCCAIN 46.3%, other 1.3%

Legislative branch: bicameral Congress consists of the Senate (100 seats, 2 members are elected from each state by popular vote to serve six-year terms; one-third are elected every two years) and the House of Representatives (435 seats; members are directly elected by popular vote to serve two-year terms); *election results:* Senate 110th Congress (2007–2009); seats by party—Democratic Party 49, Republican Party 49, independent 2; House of Representatives—percent of vote by party—NA; seats by party—Democratic Party 233, Republican Party 202

Judicial branch: Supreme Court (nine justices; nominated by the president and confirmed with the advice and consent of the Senate; appointed to serve for life); United States Courts of Appeal; United States District Courts; State and County Courts

Political parties and leaders: Democratic Party [Howard DEAN]; Green Party; Libertarian Party [William (Bill) REDPATH]; Republican Party [Robert M. (Mike) DUNCAN]

Political pressure groups and leaders: environmentalists; business groups; labor unions; churches; ethnic groups; political action committees or PAC; health groups; education groups; cuvuc griyos; youth groups; transportation groups; agricultural groups; veterans groups; women's groups; reform lobbies

International organization participation: ADB (nonregional members), AfDB, ANZUS, APEC, Arctic Council, ARF, ASEAN (dialogue partner), Australia Group, BIS, BSEC (observer), CBSS (observer), CE (observer), CERN (observer), CP, EAPC, EBRD, FAO, G-5, G-7, G-8, G-10, IADB, IAEA, IBRD, ICAO, ICC, ICCt (signatory), ICRM, IDA, IEA, IFAD, IFC, IFRCS, IHO, ILO, IMF, IMO, IMSO, Interpol, IOC, IOM, ISO, ITSO, ITU, ITUC, MIGA, MINUSTAH, NAFTA, NATO, NEA, NSG, OAS, OECD, OPCW, OSCE, Paris Club, PCA, PIF (partner), SAARC (observer), SECI (observer), SPC, UN, UN Security Council, UNCTAD, UNESCO, UNHCR, UNITAR, UNMEE, UNMIL, UNOMIG, UNRWA, UNTSO, UPU, WCL, WCO, WHO, WIPO, WMO, WTO, ZC

Flag description: 13 equal horizontal stripes of red (top and bottom) alternating with white; there is a blue rectangle in the upper hoist-side corner bearing 50 small, white, five-pointed stars arranged in nine offset horizontal rows of six stars (top and bottom) alternating with rows of five stars; the 50 stars represent the 50 states, the 13 stripes represent the 13 original colonies; known as Old Glory; the design and colors have been the basis for a number of other flags, including Chile, Liberia, Malaysia, and Puerto Rico

Principal Government Officials

Last Updated: January 2009

President: **Obama,** Barack

Federal Reserve Board Chairman: **Bernanke,** Ben S.
Central Intelligence Agency Director: **Panetta,** Leon
Federal Bureau of Investigation Director: **Mueller,** Robert S., III
Chief Justice of the Supreme Court: **Roberts,** John G., Jr.

ECONOMY

Overview

The US has the largest and most technologically powerful economy in the world, with a per capita GDP of $46,000. In this market-oriented economy, private individuals and business firms make most of the decisions, and the federal and state governments buy needed goods and services predominantly in the private marketplace.

US business firms enjoy greater flexibility than their counterparts in Western Europe and Japan in decisions to expand capital plant, to lay

off surplus workers, and to develop new products. At the same time, they face higher barriers to enter their rivals' home markets than foreign firms face entering US markets.

US firms are at or near the forefront in technological advances, especially in computers and in medical, aerospace, and military equipment; their advantage has narrowed since the end of World War II. The onrush of technology largely explains the gradual development of a "two-tier labor market" in which those at the bottom lack the education and the professional/technical skills of those at the top and, more and more, fail to get comparable pay raises, health insurance coverage, and other benefits. Since 1975, practically all the gains in household income have gone to the top 20% of households.

The response to the terrorist attacks of 11 September 2001 showed the remarkable resilience of the economy. The war in March-April 2003 between a US-led coalition and Iraq, and the subsequent occupation of Iraq, required major shifts in national resources to the military. The rise in GDP in 2004-07 was undergirded by substantial gains in labor productivity.

Hurricane Katrina caused extensive damage in the Gulf Coast region in August 2005, but had a small impact on overall GDP growth for the year. Soaring oil prices in 2005-2007 threatened inflation and unemployment, yet the economy continued to grow through year-end 2007. Imported oil accounts for about two-thirds of US consumption. Long-term problems include inadequate investment in economic infrastructure, rapidly rising medical and pension costs of an aging population, sizable trade and budget deficits, and stagnation of family income in the lower economic groups. The merchandise trade deficit reached a record $847 billion in 2007. Together, these problems caused a marked reduction in the value and status of the dollar worldwide in 2007.

GDP (purchasing power parity): $13.78 trillion (2007 est.)

GDP (official exchange rate): $13.84 trillion (2007 est.)

GDP—real growth rate: 2% (2007 est.)

GDP—per capita (PPP): $45,000 (2007 est.)

GDP—composition by sector: agriculture: 1.2%; industry: 19.8%; services: 79% (2007 est.)

Labor force: 153.1 million (includes unemployed) (2007 est.)

Labor force—by occupation: farming, forestry, and fishing 0.6%, manufacturing, extraction, transportation, and crafts 22.6%, managerial, professional, and technical 35.5%, sales and office 24.8%, other services 16.5%/ *Note:* figures exclude the unemployed (2007)

Unemployment rate: 4.6% (2007 est.)

Population below poverty line: 12% (2004 est.)

Household income or consumption by percentage share: lowest 10%: 2%; highest 10%: 30% (2007 est.)

Distribution of family income—Gini index: 45 (2007)

Investment (gross fixed): 15.5% of GDP (2007 est.)

Budget: revenues: $2.568 trillion; expenditures: $2.73 trillion (2007 est.)

Fiscal year: 1 October—30 September

Public debt: 60.8% of GDP (2007 est.)

Inflation rate (consumer prices): 2.9% (2007 est.)

Central bank discount rate: 4.83% (31 December 2007)

Commercial bank prime lending rate: 8.05% (31 December 2007)

Stock of money: $1.374 trillion (31 December 2007)

Stock of quasi money: $10.1 trillion (31 December 2007)

Stock of domestic credit: $14.15 trillion (31 December 2007)

Agriculture—products: wheat, corn, other grains, fruits, vegetables, cotton; beef, pork, poultry, dairy products; fish; forest products

Industries: leading industrial power in the world, highly diversified and technologically advanced; petroleum, steel, motor vehicles, aerospace, telecommunications, chemicals, electronics, food processing, consumer goods, lumber, mining

Industrial production growth rate: -1.7% (2007 est.)

Electricity—production: 4.167 trillion kWh (2007 est.)

Electricity—consumption: 3.892 trillion kWh (2007 est.)

Electricity—exports: 20.14 billion kWh (2007 est.)

Electricity—imports: 51.4 billion kWh (2007 est.)

Oil—production: 8.457 million bbl/day (2007 est.)

Oil—consumption: 20.68 million bbl/day (2007 est.)

Oil—exports: 1.165 million bbl/day (2005)

Oil—imports: 13.71 million bbl/day (2005)

Oil—proved reserves: 20.97 billion bbl (1 January 2008 est.)

Natural gas—production: 545.9 billion cu m (2007 est.)

Natural gas—consumption: 652.9 billion cu m (2007 est.)

Natural gas—exports: 23.28 billion cu m (2007 est.)

Natural gas—imports: 130.3 billion cu m (2007 est.)

Natural gas—proved reserves: 5.977 trillion cu m (1 January 2008 est.)

Current account balance: -$731.2 billion (2007 est.)

Exports: $1.148 trillion f.o.b. (2007 est.)

Exports—commodities: agricultural products (soybeans, fruit, corn) 9.2%, industrial supplies (organic chemicals) 26.8%, capital goods (transistors, aircraft, motor vehicle parts, computers, telecommunications equipment) 49.0%, consumer goods (automobiles, medicines) 15.0% (2003)

Exports—partners: Canada 21.4%, Mexico 11.7%, China 5.6%, Japan 5.4%, UK 4.3%, Germany 4.3% (2007)

Imports: $1.968 trillion f.o.b. (2007 est.)

Imports—commodities: agricultural products 4.9%, industrial supplies 32.9% (crude oil 8.2%), capital goods 30.4% (computers, telecommunications equipment, motor vehicle parts, office machines, electric power machinery), consumer goods 31.8% (automobiles, clothing, medicines, furniture, toys) (2003)

Imports—partners: China 16.9%, Canada 15.7%, Mexico 10.6%, Japan 7.4%, Germany 4.8% (2007)
Economic aid—donor: ODA, $23.53 billion (2006)
Reserves of foreign exchange and gold: $70.57 billion (31 December 2007 est.)
Debt—external: $12.25 trillion (30 June 2007)
Stock of direct foreign investment—at home: $2.093 trillion (2007 est.)
Stock of direct foreign investment—abroad: $2.791 trillion (2007 est.)
Market value of publicly traded shares: $17 trillion (2005)
Currency (code): US dollar (USD)
Currency code: USD
Exchange rates: British pounds per US dollar: 0.4993 (2007), 0.5418 (2006), 0.5493 (2005), 0.5462 (2004), 0.6125 (2003); Canadian dollars per US dollar: 1.0724 (2007), 1.1334 (2006), 1.2118 (2005), 1.3010 (2004), 1.4011 (2003); Japanese yen per US dollar: 117.99 (2007), 116.18 (2006) 110.22 (2005), 108.19 (2004), 115.93 (2003); euros per US dollar: 0.7345 (2007), 0.7964 (2006), 0.8041 (2005), 0.8054 (2004), 0.8860 (2003), Chinese yuan per US dollar: 7.61 (2007), 7.97 (2006), 8.1943 (2005), 8.2768 (2004), 8.2770 (2003)

COMMUNICATIONS

Telephones—main lines in use: 163.2 million (2007)
Telephones—mobile cellular: 255 million (2007)
Telephone system: general assessment: a large, technologically advanced, multipurpose communications system; domestic: a large system of fiber-optic cable, microwave radio relay, coaxial cable, and domestic satellites carries every form of telephone traffic; a rapidly growing cellular system carries mobile telephone traffic throughout the country; international: country code—1; multiple ocean cable systems provide international connectivity; satellite earth stations—61 Intelsat (45 Atlantic Ocean and 16 Pacific Ocean), 5 Intersputnik (Atlantic Ocean region), and 4 Inmarsat (Pacific and Atlantic Ocean regions) (2000)
Radio broadcast stations: AM 4,789, FM 8,961, shortwave 19 (2006)
Radios: 575 million (1997)
Television broadcast stations: 2,218 (2006)
Televisions: 219 million (1997)
Internet country code:.us
Internet hosts: 316 million (2008); note—the US Internet total host count includes the following top level domain host addresses: .us, .com, .edu, .gov, .mil, .net, and .org
Internet users: 228 million (2006)

TRANSPORTATION

Airports: 14,947 (2007)
Airports—with paved runways: *total:* 5,143; *over 3,047 m*: 191; *2,438 to 3,047 m*: 224; *1,524 to 2,437 m*: 1,452; *914 to 1,523 m*: 2,323; *under 914 m*: 953 (2007)
Airports—with unpaved runways: *total:* 9,804; *2,438 to 3,047 m*: 7; *1,524 to 2,437 m*: 153; *914 to 1,523 m*: 1,732; *under 914 m*: 7,912 (2007)
Heliports: 146 (2007)
Pipelines: petroleum products 244,620 km; natural gas 548,665 km (2006)
Railways: *total:* 226,612 km; *standard gauge*: 226,612 km 1.435-m gauge (2005)
Roadways: *total:* 6,465,799 km; *paved:* 4,209,835 km (includes 75,040 km of expressways); *unpaved*: 2,255,964 km (2007)
Waterways: 41,009 km (19,312 km used for commerce). *Note:* Saint Lawrence Seaway of 3,769 km, including the Saint Lawrence River of 3,058 km, shared with Canada (2007)
Merchant marine: *total:* 422 ships *by type:* barge carrier 6, bulk carrier 61, cargo 69, carrier 2, chemical tanker 22, container 81, passenger 19, passenger/cargo 59, petroleum tanker 53, refrigerated cargo 3, roll on/roll off 25, vehicle carrier 22; *foreign-owned:* 74 (Australia 1, Denmark 31, Germany 5, Japan 7, Malaysia 2, Netherlands 1, Norway 9, Singapore 12, Sweden 5, UK 1); *registered in other countries*: 732 (Antigua and Barbuda 8, Australia 2, Bahamas 106, Bermuda 23, Cambodia 6, Canada 10, Cayman Islands 42, Comoros 2, Cyprus 5, Ecuador 1, Greece 8, Hong Kong 29, Ireland 2, Isle of Man 4, Italy 17, South Korea 7, Liberia 98, Luxembourg 4, Malta 23, Marshall Islands 123, Netherlands 14, Netherlands Antilles 1, Norway 1, Norway 7, Panama 126, Portugal 1, Puerto Rico 3, Russia 1, Saint Vincent and the Grenadines 18, Sierra Leone 1, Singapore 22, Trinidad and Tobago 1, Tuvalu 1, UK 12, Vanuatu 1, unknown 2) (2008)
Ports and terminals: Corpus Christi, Duluth, Hampton Roads, Houston, Long Beach, Los Angeles, New York, Philadelphia, Tampa, Texas City

MILITARY

Military branches: US Army, US Navy (includes Marine Corps), US Air Force, US Coast Guard; note—Coast Guard administered in peacetime by the Department of Homeland Security, but in wartime reports to the Department of the Navy (2008)
Military service age and obligation: 18 years of age (17 years of age with parental consent) for male and female voluntary service; maximum enlistment age 42 (Army), 27 (Air Force), 34 (Navy), 28 (Marines); service obligation 8 years, including 2-5 years active duty (Army), 2 years active (Navy), 4 years active (Air Force, Marines) (2008)
Manpower available for military service: *males age 16-49:* 72,715,332; *females age 16-49:* 71,638,785 (2008 est.)
Manpower fit for military service: *males age 16-49:* 59,413,258; *females age 16-49:* 59,187,183 (2008 est.)
Manpower reaching military service age annually: *males:* 2,186,440; *females:* 2,079,688 (2008 est.)
Military expenditures—percent of GDP: 4.06% (2005 est.)

TRANSNATIONAL ISSUES

Disputes—international: the U.S. has intensified domestic security

measures and is collaborating closely with its neighbors, Canada and Mexico, to monitor and control legal and illegal personnel, transport, and commodities across the international borders; abundant rainfall in recent years along much of the Mexico-US border region has ameliorated periodically strained water-sharing arrangements; 1990 Maritime Boundary Agreement in the Bering Sea still awaits Russian Duma ratification; managed maritime boundary disputes with Canada at Dixon Entrance, Beaufort Sea, Strait of Juan de Fuca, and around the disputed Machias Seal Island and North Rock.

The Bahamas and US have not been able to agree on a maritime boundary; US Naval Base at Guantanamo Bay is leased from Cuba and only mutual agreement or US abandonment of the area can terminate the lease.

Haiti claims US-administered Navassa Island; US has made no territorial claim in Antarctica (but has reserved the right to do so) and does not recognize the claims of any other states. Marshall Islands claims Wake Island.

Tokelau included American Samoa's Swains Island among the islands listed in its 2006 draft constitution

Refugees and internally displaced persons: refugees (country of origin): the US admitted 62,643 refugees during FY04/05 including, 10,586 (Somalia), 8,549 (Laos), 6,666 (Russia), 6,479 (Cuba), 3,100 (Haiti), 2,136 (Iran) (2006)

Illicit drugs: world's largest consumer of cocaine (shipped from Colombia through Mexico and the Caribbean), Colombian heroin, and Mexican heroin and marijuana; major consumer of ecstasy and Mexican methamphetamine; minor consumer of high-quality Southeast Asian heroin; illicit producer of cannabis, marijuana, depressants, stimulants, hallucinogens, and methamphetamine; money-laundering center

URUGUAY

Compiled from the July 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Oriental Republic of Uruguay

PROFILE

Geography

Area: 176,220 sq. km. (68,000 sq. mi.); slightly smaller than Oklahoma.

Cities: Capital—Montevideo (est. pop. 1.4 million).

Terrain: Plains and low hills; 84% agricultural.

Climate: Temperate.

People

Nationality: Noun and adjective—Uruguayan(s).

Population: (July 2008) 3.5 million.

Annual growth rate: 0.5%.

Ethnic groups: (est.) European descent 88%, African descent 4%, mestizo 8%.

Religions: Roman Catholic 66%, Protestant and other Christian 2%, Jewish 1%, non-professing or other 31%.

Languages: Spanish.

Education: Literacy (2004)—98%.

Health: (2005) Life expectancy—76.1 yrs. (79.5 yrs females; 72.9 yrs. males). Infant mortality rate—11.6/1,000.

Work force: (1.3 million, 2006) Manufacturing—16%; agriculture—7%; commerce, restaurants & hotels—23%; other services—43%.

Government

Type: Republic.

Independence: 1825.

Constitution: First 1830, current 1967, most recently amended December 1996.

Government branches: Executive—president (chief of state and head of government). Legislative—General Assembly consisting of a 99-seat Chamber of Deputies and a 30-seat Senate. Judicial—Supreme Court of Justice.

Political subdivisions: 19 departments with limited autonomy.

Political parties: Colorado Party, Blanco (National) Party, Encuentro Progresista-Frente Amplio, Nuevo Espacio.

Suffrage: Universal at 18.

Economy

GDP: $23.1 billion (2007); $19.3 billion (2006); $16.8 billion (2005); $13.2 billion (2004).

Annual growth rate: +7.4% (2007); +7.0% (2006); +6.6% (2005); +12.3% (2004); +2.5% (2003); -11.0% (2002).

Per capita GDP: $6,950(2007); $5,828 (2006); $5,200 (2005); $4,100 (2004).

Natural resources: Arable land, pastures, hydroelectric power, granite, marble.

Agriculture: (9% of GDP) Products—beef, wool, rice, wheat, barley, corn.

Industry: (23% of GDP) Types—meat processing, wool, textiles, leather, leather apparel, beverages and tobacco, chemicals, cement, petroleum refining.

Services: About 60% of GDP.

Trade: Exports (f.o.b.)—$4.5 billion: meat, wool, hides, leather, wool products, fish, rice, furs. Major markets—United States, Brazil, Argentina, Mexico, Germany. Imports (c.i.f.)—$5.5 billion: machinery, chemicals, fuel, vehicles. Major suppliers—Brazil, Argentina, United States, China, Venezuela.

PEOPLE

Uruguayans share a Spanish linguistic and cultural background, even though about one-quarter of the population is of Italian origin. Most are nominally Roman Catholic although the majority of Uruguayans do not actively practice a religion. Church and state are officially separated.

Uruguay is distinguished by its high literacy rate, large urban middle class, and relatively even income distribution. The average Uruguayan standard of living compares favorably with that of most other Latin Americans. Metropolitan Montevideo, with about 1.4 million inhabitants, is the only large city. The rest of the urban population lives in about 20 towns.

During the past two decades, an estimated 500,000 Uruguayans have emigrated, principally to Argentina and Spain. Emigration to the United States also rose significantly. As a result of the low birth rate, high life expectancy, and relatively high rate of emigration of younger people, Uruguay's population is quite mature.

HISTORY

The only inhabitants of Uruguay before European colonization of the area were the Charrua Indians, a small tribe driven south by the Guarani Indians of Paraguay. The Spanish discovered the territory of present-day Uruguay in 1516, but the Indians' fierce resistance to conquest, combined with the absence of gold and silver, limited settlement in the region during the 16th and 17th centuries. The Spanish introduced cattle, which became a source of wealth in the region. Spanish colonization increased as Spain sought to limit Portugal's expansion of Brazil's frontiers.

Montevideo was founded by the Spanish in the early 18th century as a military stronghold; its natural harbor soon developed into a commercial center competing with Argentina's capital, Buenos Aires. Uruguay's early 19th century history was shaped by ongoing conflicts between the British, Spanish, Portuguese, and colonial forces for dominance in the Argentina-Brazil-Uruguay region. In 1811, Jose Gervasio Artigas, who became Uruguay's national hero, launched a successful revolt against Spain. In 1821, the Provincia Oriental del Rio de la Plata, present-day Uruguay, was annexed to Brazil by Portugal. The Provincia declared independence from Brazil in August 25, 1825 (after numerous revolts in 1821, 1823, and 1825) but decided to adhere to a regional federation with Argentina.

The regional federation defeated Brazil after a 3-year war. The 1828 Treaty of Montevideo, fostered by the United Kingdom, gave birth to Uruguay as an independent state. The nation's first constitution was adopted in 1830. The remainder of the 19th century, under a series of elected and appointed presidents, saw interventions by neighboring states, political and economic fluctuations, and large inflows of immigrants, mostly from Europe. Jose Batlle y Ordonez, president from 1903 to 1907 and again from 1911 to 1915, set the pattern for Uruguay's modern political development. He established widespread political, social, and economic reforms such as a welfare program, government participation in many facets of the economy, and a plural executive. Some of these reforms were continued by his successors.

By 1966, economic, political, and social difficulties led to constitutional amendments, and a new constitution was adopted in 1967. In 1973, amid increasing economic and political turmoil, the armed forces closed the Congress and established a civilian-military regime, characterized by repression and widespread human rights abuses. A new constitution drafted by the military was rejected in a November 1980 plebiscite. Following the plebiscite, the armed forces announced a plan for return to civilian rule. National elections were held in 1984. Colorado Party leader Julio Maria Sanguinetti won the presidency and served from 1985 to 1990. The first Sanguinetti administration implemented economic reforms and consolidated democracy following the country's years under military rule.

Sanguinetti's economic reforms, focusing on the attraction of foreign trade and capital, achieved some success and stabilized the economy. In order to promote national reconciliation and facilitate the return of democratic civilian rule, Sanguinetti secured public approval by plebiscite of a controversial general amnesty for military leaders accused of committing human rights violations under the military regime, and sped the release of former guerrillas.

The National Party's Luis Alberto Lacalle won the 1989 presidential election and served from 1990 to 1995. Lacalle executed major structural economic reforms and pursued further liberalization of the trade regime. Uruguay became a founding member of MERCOSUR in 1991 (the Southern Cone Common Market, which includes Argentina, Brazil, and Paraguay). Despite economic growth during Lacalle's term, adjustment and privatization efforts provoked political opposition, and some reforms were overturned by referendum.

In the 1994 elections, former President Sanguinetti won a new term, which ran from 1995 until March 2000. As no single party had a majority in the General Assembly, the National Party joined with Sanguinetti's Colorado Party in a coalition government. The Sanguinetti government continued Uruguay's economic reforms and integration into MERCOSUR. Other important reforms were aimed at improving the electoral system, social security, education, and public safety. The economy grew steadily for most of Sanguinetti's term, until low commodity prices and economic difficulties in its main export markets caused a recession in 1999, which continued into 2003.

The 1999 national elections were held under a new electoral system established by constitutional amendment. Primaries in April decided single presidential candidates for each party, and national elections on October 31 determined representation in the legislature. As no presidential candidate received a majority in the October election, a runoff was held in November. In the runoff, Colorado Party candidate Jorge Batlle, aided by the support of the National Party, defeated Frente Amplio candidate Tabare Vazquez.

The legislative coalition of the Colorado and National parties that held during most of Batlle's administration ended in November 2002, when the Blancos withdrew their ministers from the cabinet. Throughout most of his administration, President Batlle had to handle Uruguay's largest economic crisis in recent history, which impacted on poverty and led to

increased emigration. Aside from successfully addressing the crisis, Batlle increased international trade, attracted foreign investment and tried to resolve issues related to Uruguayans who disappeared during the military government. The two traditional political parties, the National ("Blanco") and Colorado parties, which were founded in the early 19th century, in the past garnered about 90% of the vote but have seen their share decline over the past decades. At the same time the share of the Frente Amplio, a coalition of various left-of-center factions that became the largest political force in 1999, was on the rise. In October 2004 presidential elections, Tabare Vazquez ran against the Blanco candidate Jorge Larranaga, a former state governor and senator who got 34.3% of votes, and against the Colorado candidate, former Interior Minister Stirling who got 10.4%. President Vazquez won the elections in the first round, with 50.5% of ballots, and his party achieved parliamentary majority. The Frente Amplio has ruled Montevideo since 1990. During its first 3 years in power, the Vazquez administration made good on its campaign promise to re-examine the human rights abuses committed during the period of military dictatorship and uncovered important forensic evidence. Bilateral relations with Argentina were strained by an ongoing dispute over the construction in Uruguay of a large wood pulp mill on a shared river. Legislation, including a controversial tax reform bill, tended to pass easily as the Frente Amplio enjoyed majorities in both houses of congress.

GOVERNMENT AND POLITICAL CONDITIONS

Uruguay's 1967 constitution institutionalizes a strong presidency, subject to legislative and judicial checks. The president's term is 5 years. Thirteen cabinet ministers, appointed by the president, head executive departments. The constitution provides for a bicameral General Assembly responsible for enacting laws and regulating the administration of justice. The General Assembly consists of a 30-member Senate, presided over by the vice president of the republic, and a 99-member Chamber of Deputies. In the October 2004 general elections, the Frente Amplio won the presidency in the first round with 50.7% and a majority of the seats in each chamber.

The National (Blanco) Party won 34.1%, the Colorado Party 10.3%, and the Independent Party 1.8%. The highest court is the Supreme Court; below it are appellate and lower courts and justices of the peace. In addition, there are electoral and administrative ("contentious") courts, an accounts court, and a military judicial system.

Ambassador to the US: **Carlos GIANELLI Derois**
Permanent Representative to the UN, New York:

ECONOMY

Uruguay's economy remains dependent on agriculture. Agriculture and agri-industry account for 23% of GDP, and for over two-thirds of total exports. Leading economic sectors include meat processing, agribusiness, wood, wool, leather production and apparel, textiles, and chemicals. Though still small, the information software industry is growing rapidly.

In 2002, Uruguay went through the steepest economic and financial crisis in recent history, which developed mostly from external factors. Devaluation in Brazil in 1999 made Uruguayan goods less competitive, and an outbreak of foot and mouth disease in 2001 curtailed beef exports to North America. Starting in late 2001, an economic crisis in Argentina undermined Uruguay's economy, with exports to Argentina and tourist revenues falling dramatically. In mid-2002 Argentine withdrawals from Uruguayan banks started a bank run that was overcome only by massive borrowing from international financial institutions. This, in turn, led to serious debt sustainability problems. A successful debt swap helped restore confidence and significantly reduced country risk.

Uruguay's economy resumed growth in 2003—with a 2.5% rise in GDP—and surged in 2004 and 2005 with growth rates of 12.3% and 6.6%, respectively. Growth equaled 7.0% in 2006 and reached 7.4% in 2007.

Uruguay's spectacular recovery over the past couple of years has been based on increased exports, especially to North America. The U.S. became Uruguay's largest export market in 2004, thanks in large part to meat exports. Uruguay enjoys a positive investment climate, with a strong legal system and open financial markets. It grants equal treatment to national and foreign investors and, aside from very few sectors, there is neither de jure nor de facto discrimination toward investment by source or origin.

Uruguay has traditionally favored substantial state involvement in the economy, and privatization is still widely opposed. Recent governments have carried out cautious programs of economic liberalization similar to those in many other Latin American countries. They included lowering tariffs, controlling deficit spending, reducing inflation, and cutting the size of government.

Uruguay has largely diversified its trade in recent years and reduced its longstanding dependency on Argentina and Brazil. It is a founding member of MERCOSUR, the Southern Cone trading bloc also composed of Argentina, Brazil, and Paraguay, which is in the process of integrating Venezuela. The MERCOSUR Secretariat is located in Montevideo.

The investment climate is generally positive. Investments are allowed without prior authorization, foreign and national investors are treated alike, and there is fully free remittance of capital and profits. About 90 American firms operate in Uruguay and, according to the U.S. Department of Commerce, the stock of U.S. direct investment amounts to $656 million.

Uruguay's economy is based on free enterprise and private ownership. In spite of some de-monopolization and privatization over the past 10 years, the state continues to play a major role in the economy, owning either fully or partially companies in insurance, water supply, electricity, telephone service, petroleum refining, airlines, postal service, railways, and banking.

NATIONAL SECURITY

The armed forces are constitutionally subordinate to the president through the minister of defense. By offering early retirement incentives, the government has trimmed the armed forces to about 14,500 for the army, 6,000 for the navy, and 3,000 for the air force. Uruguay ranks first in the world on a per capita basis for its contributions to the UN peacekeeping forces, with 2,613 soldiers and officers in 13 UN peacekeeping missions. As of June 2008, Uruguay had 1,177 military personnel deployed to Haiti in support of MINUSTAH; its other major peacekeeping troop deployment was in the Congo.

FOREIGN RELATIONS

Uruguay traditionally has had strong political and cultural links with its neighbors and Europe. With globalization and regional economic problems, its links to North America have strengthened. Uruguay is a strong advocate of constitutional democracy, political pluralism, and individual liberties. Its international relations historically have been guided by the principles of non-intervention, multilateralism, respect for national sovereignty, and reliance on the rule of law to settle disputes. Uruguay's international relations also reflect its drive to seek export markets and foreign investment. It is a founding member of MERCOSUR, the Southern Cone Common Market also composed of Argentina, Brazil, and Paraguay. As of December 2006, Chile, Bolivia, Colombia, Ecuador, and Peru were associate members of MERCOSUR. As of July 2008, Venezuela was in the process of becoming MERCOSUR's fifth full member.

Uruguay is a member of the Rio Group, an association of Latin Amer-

ican states that deals with multilateral security issues (under the Inter-American Treaty of Reciprocal Assistance). Uruguay's location between Argentina and Brazil makes close relations with these two larger neighbors and MERCOSUR associate members Chile and Bolivia particularly important. Usually considered a neutral country and blessed with a professional diplomatic corps, Uruguay is often called on to preside over international bodies. Uruguay is a member of the Latin American Integration Association (ALADI), a trade association based in Montevideo that includes 10 South American countries plus Mexico and Cuba.

U.S.-URUGUAYAN RELATIONS

U.S.-Uruguayan relations traditionally have been based on a common outlook and emphasis on democratic ideals. In 2002, Uruguay and the U.S. created a Joint Commission on Trade and Investment (JCTI) to exchange ideas on a variety of economic topics. In March 2003, the JCTI identified six areas of concentration until the eventual signing of the Free Trade Area of the Americas (FTAA): customs issues, intellectual property protection, investment, labor, environment, and trade in goods. In late 2004, Uruguay and the U.S. signed an Open Skies Agreement, which was ratified in May 2006. In November 2005, they signed a Bilateral Investment Treaty (BIT), which entered into force on November 1, 2006. A Trade and Investment Framework Agreement (TIFA) was signed in January 2007. More than 80 U.S.-owned companies operate in Uruguay, and many more market U.S. goods and services. In April 2008, Secretary Rice met with Foreign Minister Fernandez to sign a science and technology agreement. Uruguay cooperates with the U.S. on law enforcement matters such as regional efforts to fight drug trafficking and terrorism. It has also been very active in human rights issues. From 1999 through early 2003 Uruguayan citizens were exempted from visas when entering the United States under the Visa Waiver Program. This exemption was withdrawn on April 16, 2003, based on the high overstay rates for Uruguayans and worldwide national security concerns.

TRAVEL

Consular Information Sheet

May 1, 2008

Country Description: Uruguay is a constitutional democracy with a large, educated middle class and a robust developing economy. The capital city is Montevideo. Tourist facilities are generally good with many 5-star accommodations at resort destinations such as Punta del Este and Colonia de Sacramento. The quality of tourist facilities varies according to price and area. Travelers are encouraged to seek travel agency assistance in making plans to visit Uruguay.

Entry Requirements: All United States citizens entering Uruguay for business or pleasure must have a valid passport. U.S. citizens traveling on a regular passport do not need a visa for a visit of less than three months. U.S. citizens traveling on diplomatic or official passports require a visa. Air travelers are required to pay an airport tax upon departure. This fee may be paid in U.S. dollars or in Uruguayan pesos. For further information on entry requirements, contact the Embassy of Uruguay at 1913 "Eye" Street NW, Washington, DC 20006, tel. (202) 331-4219; e-mail: conuruwashi@uruwashi.org. Travelers may also contact the Consulate of Uruguay in New York, Miami, Chicago, Los Angeles, and Puerto Rico. Visit the Embassy of Uruguay web site at http://www.uruwashi.org for the most current visa information.

Safety and Security: Regular protests, some with an anti-American flavor, take place outside Congress, City Hall and the "University of the Republic." U.S. citizens visiting or residing in Uruguay are advised to take common-sense precautions and avoid any large gatherings or any other event where crowds have congregated to demonstrate or protest. If travelers encounter a protest they should walk the other way or enter a commercial establishment until the

protest passes. Taking pictures of protesters is not a good idea. Although there have been no past instances of violence directed at U.S. citizens from cross-border extremist groups, U.S. citizens traveling or residing in the more remote areas of Uruguay near the border with Argentina and Brazil are urged to exercise caution.

For the latest security information, Americans traveling abroad should regularly monitor the Department of State, Bureau of Consular Affairs' web site at http://travel.state.gov, where the current Travel Warnings and Travel Alerts, including the Worldwide Caution Travel Alert, can be found. Up to date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the United States, or for callers outside the United States and Canada, a regular toll line at 1-202-501-4444. These numbers are available from 8:00 a.m. to 8:00 p.m. eastern time, Monday through Friday (except U.S. federal holidays).

Crime: Petty street crime is prevalent in Montevideo. The criminals tend to be non-violent. However, criminals often resort to violence if the victims resist. Travelers should exercise reasonable caution to minimize their exposure to crime. Criminals prey on the unaware, particularly those carrying cameras, pocketbooks, laptops, or backpacks. Travelers are advised to lock most valuables in secure hotel safes and to download their wallets of excess credit cards and cash. If dining at an outdoor restaurant take extra care with pocketbooks or bags. There are no "off limits" areas of the city and parts of "Ciudad Vieja" are popular tourist attractions. However the only sections of Ciudad Vieja with continual police patrols are Plaza Independencia, the pedestrian street Sarandi, and the Mercado del Puerto. Mugging is common in other parts of Ciudad Vieja - particularly for travelers walking alone, or couples walking at night. A smart alternative is to call for a taxi for evening travel between restaurants, bars, and hotels.

Victims are usually foreign tourists, individuals openly carrying valuable items, and motorists in unlocked vehicles stopped at busy intersections, particularly on Montevideo 's riverfront road known as the Rambla. Drivers should keep all car doors locked, the driver's window open only one inch, and purses, bags, briefcases and other valuables out of sight on the floor or in the trunk. Parked cars, particularly in the Carrasco neighborhood, are also increasingly targeted for break-ins. During the summer months (December-March), beach resort areas such as Punta del Este attract tourists, and petty street crimes and residential burglaries—similar to those that occur in Montevideo —rise significantly. Visitors are advised to exercise common sense in the conduct of their activities around Montevideo and in Uruguayan resort areas. They should be very attentive to personal security and their surroundings in the aforementioned areas.

Those planning to live in Montevideo should note that burglaries and attempted burglaries seem to be on the rise in upscale neighborhoods. The perpetrators are mostly non-confrontational but determined teenagers. A combination of preventive measures including rigorous use of locks and alarms, strong grillwork on all windows, guard dogs, keeping a residence occupied as much as possible, and using a security service is highly recommended.

Montevideo continues to experience armed robberies of patrons at crowded restaurants in the Pocitos neighborhood. Most of these crimes have occurred very late at night. Restaurant patrons should exercise extreme caution for late night dining.

Uruguayan law enforcement authorities have increased the number of uniformed policemen on foot in areas where criminal activity is concentrated and the number of patrol cars in residential areas. The clearly marked patrol cars are equipped with cellular phones and the phone numbers are conspicuously painted on the vehicles.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

The local equivalent to the "911" emergency line in Uruguay is also 911.

Medical Facilities and Health Information: Facilities for medical care are considered adequate. Serious medical problems requiring hospitalization and/or medical evacuation to the United States can cost tens of thousands of dollars.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747); fax 1-888-CDC-FAXX (1-888-232-3299) or via the CDC's Internet site at http://wwwn.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith/en.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States.

The Uruguayan Ministry of Transportation is responsible for maintaining safe road conditions countrywide. The Uruguayan Ministry of Interior highway police (tel. 1954) are responsible for traffic safety on highways and other roads beyond city limits. In urban and suburban areas, transit police and municipal employees share road safety responsibilities.

Driving is on the right-hand side of the road. Wearing seat belts and using headlights on highways and other inter-city roads 24 hours a day are mandatory. Children under 12 must ride in the back seat. Motorcyclists must wear helmets. The use of cellular phones while driving is prohibited. Right turns on red lights and left turns at most intersections marked with a stoplight are not permitted. Drivers approaching an intersection from the right or already in traffic circles have the right of way. Flashing high beams indicate intent to pass or continue through unmarked intersections. Many drivers ignore speed limits and traffic signs. If you plan to drive, use extreme caution and drive defensively.

For driving under the influence, violators are fined and confiscated licenses may be retained for up to six months. In accidents causing injury or death, drivers are brought before a judge who decides if incarceration is warranted. Inter-city travel is via bus, taxi, car service (remise), car and motorcycle. Speed limits are posted on highways and some main roads. Most taxis have no seat belts in the back seat. Cycling outside the capital or small towns is hazardous due to a scarcity of bike paths, narrow road shoulders and unsafe driving practices.

Illumination, pavement markings and road surfaces are sometimes poor. Route 1, which runs between Montevideo and Colonia or Punta del Este, and Route 2, between Rosario and Fray Bentos, are particularly accident-ridden because of heavy tourist traffic. Road accidents rise during the austral summer beach season (December to March), Carnaval (mid-to-late February) and Easter Week.

Within Montevideo, the emergency number to contact the police, fire department, rescue squad, or ambulance service is 911. In the rest of the country, dial 02-911 to connect with the Montevideo central emergency authority, which will then contact the local emergency service. The Automobile Club of Uruguay responds to emergency calls for roadside assistance at 1707, "Car Up" at 0800-1501 and the Automobile Center of Uruguay at 2-408-6131/2091. SEMM (tel. 159) and UCM (tel. 147), Montevideo-based ambulance services manned by doctors, have agreements with emergency medical units in other cities. You may also telephone Uruguay 's national tourist office and national authority responsible for road safety in Miami at (305) 443-7431.

Aviation Safety Oversight: The U.S. Federal Aviation Administration (FAA) has assessed the Government of Uruguay's Civil Aviation Authority as not being in compliance with International Civil Aviation Organization (ICAO) aviation safety standards for oversight of Uruguay's air carrier operations. For more information, travelers may visit the FAA's Internet web site at http://www.faa.gov.

Special Circumstances: Uruguay's customs authorities may enforce strict regulations concerning temporary importation into or export from Uruguay of items such as precious jewels, gold, firearms, pornography, subversive literature, inflammable articles, acids, prohibited drugs (medications), plants, seeds, and foodstuffs as well as some antiquities and business equipment.

It is advisable to contact the Embassy of Uruguay in Washington, D.C., or one of Uruguay 's consulates in the U.S. for specific information regarding customs requirements.

Note: Travelers entering Uruguay with precious jewels or gold worth more than $500.00 (U.S.) must declare them to customs officers at the port of entry or face possible detention or seizure of the goods and charges of contraband or evasion of customs controls. Visitors are expected to comply with local law and regulations by approaching a customs officer before routine inspection of all incoming baggage, conducted on standard security equipment.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating Uruguay's laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Uruguay are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

The Uruguayan Ministry of Agriculture and Fishing strictly enforces all regulations regarding hunting permits, as well as seasonal and numerical limits on game.

Visitors who contravene local law have been detained by the authorities and had valuable personal property (weapons) seized. Under Uruguayan law, seized weapons can only be returned after payment of a sum equivalent to the value of the property seized. Hunters are also subject to stiff fines for practicing the sport without all appropriate permits.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in Uruguay are encouraged to register with the U.S. Embassy through the State Department's travel registration web site so that they can obtain updated information on travel and security within Uruguay. Americans without Internet access may register directly with the U.S. Embassy. By registering, American citizens make it easier for the Embassy to contact them in case of emergency. The U.S. Embassy is located at Lauro Muller 1776; telephone (598) (2) 418-7777; fax (598) (2) 418-4110 or -8611. Internet: http://uruguay.usembassy.gov, email: MontevideoACS@state.gov. Consular Section hours for American Citizen Services are Monday to Thursday, 9:00 a.m. to 11:00 p.m. and 2:00 p.m. to 4:00 p.m., except U.S. and Uruguayan holidays.

Intercountry Adoption

September 2006

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is based on public sources and current understanding. Questions involving foreign and U.S. immigration laws and legal interpretation should be addressed respectively to qualified foreign or U.S. legal counsel.

Please Note: While intercountry adoptions are legal in Uruguay, Uruguayan law explicitly favors local adoptions over intercountry adoptions. Prospective adoptive parents must live in Uruguay with the child they plan to adopt for a minimum of six months. A judge may reduce this time requirement on a case-by-case basis if he/she believes it is in the best interests of the child.

Patterns of Immigration: The U.S. Embassy in Montevideo has not issued any orphan visas for Uruguayan children for at least the last five years.

Adoption Authority: The government adoption authority in Uruguay is the Departamento de Adopción y Legitimación Adoptiva (DLAYA or Department of Adoption and Legitimating of Adoptions). DLAYA is an agency within the responsibility of the Instituto del Niño y el Adolescente (INAU or Uruguayan Institute for Children and Adolescents).

DLAYA
Rio Branco 1394
Montevideo, Uruguay
Tel: (598 2) 908-3219,
E-mail inaudlaya@adinet.com.uy

Eligibility Requirements for Adoptive Parents: With a simple adoption, birth parents do not relinquish all parental rights over the child. It is important to note that while this may fulfill the adoption requirement in Uruguay, it will not necessarily fulfill the U.S. immigration requirements. Any person more than 25 years old and at least fifteen years older than the child to be adopted, who has had the prospective child under his/her care for at least one year is eligible to adopt. Consent of the spouse is required if the adopting person is married.

Adoption Legitimating Process: The legitimating process is an irrevocable release of parental rights by the birth parents. The child will be registered as the adoptive parent's child and a new birth certificate is issued bearing the adoptive parents' names. Adoption eligibility requirements for this type of adoption are as follows. Spouses more than 25 years old and at least fifteen years older than the child to be adopted, who have been married for at least four years, and who have had the prospective child under their care for at least one year are eligible. In the case of intercountry adoptions, the guardianship period may be shortened to six months.

Residency Requirements: Prospective adoptive parents are required to reside in Uruguay for a minimum of six months.

Time Frame: The adoption process in Uruguay can take four to five years from start to finish.

Adoption Agencies and Attorneys: In Uruguay adoptions can be arranged through one of the following:

- Government of Uruguay: Departamento de Adopción y Legitimación Adoptiva (DLAYA);
- Movimiento Familiar Cristiano (Christian Family Movement). Contact Sra. Ana Maria Castillo, Presidente, Movimiento Familiar Cristiano, Colonia 1738, Montevideo, Uruguay Tel/fax: (598 2) 400-7703; or
- Independently through a private lawyer.

Although the U.S. Embassy does not have a list of adoption lawyers specifically, they do maintain a list of attorneys in the Consular District which may be found at: http://uruguay.usembassy.gov.

Adoption Fees: DLAYA provides legal counseling at no cost. Even though the whole adoption process is free, the Uruguayan authorities charge for required documents and services they provide, prior to the adoption, such as legalization of foreign documents, and/or marriage, birth, police certificates. There is no information regarding private attorney's fees.

Adoption Procedures: Adoptions through DLAYA and the Movimiento Familiar Cristiano follow a similar process with an initial interview with the prospective adoptive parents that is used to explain the adoption process, the documents required, the legal aspects and expectations.

After the prospective adoptive parents submit the required documentation, an evaluation process begins through group activities and personal

interviews with psychologists and social workers of DLAYA, including a home study. DLAYA staff members make the final decision concerning the applicants' eligibility to adopt a child. Once approved, the couple is added to the waiting list. The length of the evaluation process varies according to staff availability. The average waiting time to complete an adoption from start to finish is four years. Once a child is assigned to a couple, a one-year period of legal custody (guardianship) begins. During this period, INAU periodically monitors the family to ensure the welfare of the child. Biological parents can claim the child during this period. Any such claim must be made through DLAYA and a judge is assigned to protect the privacy of the foster family. The four years listed above refer to the entire waiting period starting from the time prospective adoptive parents are first registered and a child is selected. Then, another year during legal custody and/or co-residency, which can be reduced to 6 months.

Once the parental rights of the birth parents are terminated, the child has completed a one-year period of legal custody (guardianship) with the prospective adoptive parents, and INAU has submitted a recommendation for approval, a judge will finalize the adoption process by awarding all legal rights regarding the child to the adoptive parents.

Required Documents:

- Original birth certificate of each prospective adoptive parent
- Local Police Records (Certificado de Antecedentes) issued by the Ministry of the Interior, for each prospective adoptive parent
- An original marriage certificate for the prospective adoptive parents
- Income certificate of each prospective parent
- Health certificate of each prospective parent
- Identification card of each prospective parent
- Voting Registration Card (Credencial Civica) of each prospective parent (if applicable)
- Photocopy of marriage booklet (libreta de matrimonio), if applicable
- Current color photographs of each prospective parent

Embassy of Uruguay

Additional Information: Specific questions about adoption in Uruguay may be addressed to the U.S. Embassy in Montevideo through e-mail MontevideoIV@state.gov or MontevideoACS@state,gov. General questions regarding intercountry adoption may be addressed to the Office of Children's Issues, U.S. Department of State, CA/OCS/CI, SA-29, 4th Floor, 2201 C Street, NW, Washington, D.C. 20520-4818, toll-free Tel: 1-888-407-4747.

UZBEKISTAN

Compiled from the December 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Republic of Uzbekistan

PROFILE

Geography

Area: 447,400 sq. km., slightly larger than California.

Cities: Capital—Tashkent (pop. 2.5 million); Samarkand (600,000); Bukhara (350,000).

Terrain: Flat-to-rolling sandy desert with dunes; broad, flat, intensely irrigated river valleys along Amu Darya, Syr Darya; shrinking Aral Sea; semiarid grasslands surrounded by mountainous Tajikistan and Kyrgyzstan in east.

Climate: Mid-latitude desert; long, hot summers, mild winters.

People

Nationality: Uzbek.

Population: (July 2008 est.) 27,345,026.

Ethnic groups: (1996 est.) Uzbek 80%, Russian 5.5%, Tajik 5%, Kazakh 3%, Karakalpak 2.5%, Tatar 1.5%, other 2.5%.

Religions: Muslim 90% (mostly Sunni), Eastern Orthodox 5%, other 3%.

Languages: Uzbek 74.3%, Russian 14.2%, Tajik 4.4%, other 7.1%.

Education: Literacy—97% (total population).

Health: (2005 est.) Life expectancy—60.82 years men; 67.73 years women.

Work force: (11.9 million) Agricultural and forestry—44%, industry—20%; services—36%.

Government

Type: Republic.

Independence: September 1, 1991.

Constitution: December 8, 1992.

Government branches: Executive—president, prime minister, cabinet. Legislative—bicameral Supreme Assembly or Oliy Majlis consists of an Upper House or Senate (100 seats; 84 members are elected by regional governing councils to serve five-year terms and 16 are appointed by the president) and a Lower House or Legislative Chamber (120 seats; elected by popular vote to serve five-year terms). Judiciary—Supreme Court, constitutional court, economic court.

Administrative subdivisions: (viloyatlar) 12, plus autonomous Republic of Karakalpakstan and city of Tashkent.

Political parties: Adolat (Justice) Social Democratic Party—established February 18, 1995 in Tashkent, number of seats in the Legislative Chamber of the parliament 9, Ismail Saifnazarov, first secretary; Democratic National Rebirth Party (Milly Tiklanish Democratic Partiya) or MTP—established on June 3, 1995 in Tashkent, and merged with the National Democratic Party “Fidokorlar” ("Selfless men") on June 20, 2008, number of seats in the Legislative Chamber of the parliament 28, Ahtam Tursunov, chairman; ; People’s Democratic Party or PDPU (Uzbekiston Halq Democratic Partiya, formerly Communist Party)—established November 1, 1991 in Tashkent, number of seats in the Legislative Chamber of the parliament 32, Latif Gulomov, first secretary; Liberal Democratic Party of Uzbekistan—established December 3, 2003, number of seats in the Legislative Chamber of the parliament 41, Muhammadyusuf Mutalibjanovich Teshaboev, chairman. Other political or pressure groups and leaders: Birlik (Unity) Movement—Abdurakhim PULATOV, chairman; Erk (Freedom) Democratic Party—Mohammed SOLIH, chairman (banned Dec. 1992); party of Agrarians and Entrepreneurs of Uzbekistan—Marat ZAHIDOV, chairman; Ozod Dekkon (Free Farmers) Party—Nigara KHIDOYATOVA, general secretary; Human Rights Society of Uzbekistan—Abdumannob PULATOV, chairman; Independent Human Rights Society of Uzbekistan—Mikhail ARDZINOV, chairman; Ezgulik—Vasilya INOYATOVA, chairwoman.

Suffrage: Universal at age 18, unless imprisoned or certified as insane.

Defense: Manpower fit for military service—males age 16-49 fit for military service: 5,684,540 (2008 est.),

females age 16-49 fit for military service: 6,432,976 (2008 est.); 18 years of age for compulsory military service; 1-year conscript service obligation.

Economy

(Note: Government of Uzbekistan statistics are not consistently reliable. This report therefore relies heavily on unofficial estimates and states clearly when a figure is an estimate.)

GDP: 2007 real GDP growth, according to the IMF based on Government of Uzbekistan statistics, was 9.5%. Actual GDP growth was likely lower.

Inflation: International institutions estimate inflation reached 12.3% in 2007, though actual inflation was likely higher, between 24%-28%.

Per capita GDP: Estimated per capita GDP in 2007, on a purchasing power parity measure, was $2,400.

Natural resources: Natural gas, petroleum, gold, coal, uranium, silver, copper, lead, zinc, tungsten, molybdenum. Natural gas production in 2006 was 62.5 billion cubic meters (bcm). In 2006, the U.S. Government estimates 48.4 bcm of natural gas was consumed in Uzbekistan and 12.5 bcm was exported. Oil production in 2007 was 109,400 bbl/day.

Agriculture: Products—cotton, fourth-largest producer worldwide; vegetables, fruits, grain, livestock.

Industry: Types—textiles, food processing, machine building, metallurgy, natural gas, automobiles, chemical. The industrial production growth rate was estimated at 12.1% in 2007; electricity production was 49 billion kilowatt hours (2006 estimate).

Budget: (2007 estimates) Revenues—$6.9 (IMF 2008 staff report, Table 5, 1290 soums/dollar) billion; expenditures—$6.6 billion.

Trade: Total exports—(2007 est., $8.05 billion f.o.b.): largest contribution from cotton, gold, natural gas, mineral fertilizers, ferrous metals, textiles, food products, automobiles. Major export markets (2007 est.)—Russia 25.8%, Poland 10.4%, Turkey 9.2%, China 5.4%, Ukraine 4.7%, Bangladesh 4.4%. Total imports—(2007 est., $4.48 billion f.o.b.): machinery and equipment, chemicals, metals, foodstuffs. Primary import partners (2007 est.)—Russia 25.8%, China 14.3%, South Korea 13.7%, Germany 6.7%, Kazakhstan 6.6%, Ukraine 4.3%, Turkey 4.2%.

External debt: (December 31, 2007 est.) $3.927 billion.

PEOPLE

Uzbekistan is Central Asia's most populous country. Its 27.3 million people, concentrated in the south and east of the country, are nearly half the region's total population. Uzbekistan had been one of the poorest republics of the Soviet Union; much of its population was engaged in cotton farming in small rural communities. The population continues to be heavily rural and dependent on farming for its livelihood. Uzbek is the predominant ethnic group. Other ethnic groups include Russian 5.5%, Tajik 5%, Kazakh 3%, Karakalpak 2.5%, and Tatar 1.5%. The nation is approximately 90% Sunni Muslim, 1% Shiite Muslim, and 5% Eastern Orthodox. Uzbek is the official state language; however, Russian is the de facto language for interethnic communication, including much day-to-day government and business use.

The educational system has achieved 97% literacy, and the mean amount of schooling for both men and women is 9 years. However, due to budget constraints and other transitional problems following the collapse of the Soviet Union, texts and other school supplies, teaching methods, curricula, and educational institutions are outdated, inappropriate, and poorly kept. Additionally, the proportion of school-aged persons enrolled has been dropping. Although the government is concerned about this, budgets remain tight. Similarly, in health care, life expectancy is long, but after the breakup of the Soviet Union, health care resources have declined, reducing health care quality, accessibility, and efficiency. Uzbekistan continues to enjoy a highly educated and skilled labor force.

HISTORY

Located in the heart of Central Asia between the Amu Darya and Syr Darya Rivers, Uzbekistan has a long and interesting heritage. The leading cities of the famous Silk Road—Samarkand, Bukhara, and Khiva—are located in Uzbekistan, and many well-known conquerors passed through the land. Alexander the Great stopped near Samarkand on his way to India in 327 B.C. and married Roxanna, daughter of a local chieftain. Conquered by Muslim Arabs in the eighth century A.D., the indigenous Samanid dynasty established an empire in the 9th century. Genghis Khan and his Mongols overran its territory in 1220. In the 1300s, Timur, known in the west as Tamerlane, built an empire with its capital at Samarkand. Uzbekistan's most noted tourist sites date from the Timurid dynasty. Later, separate Muslim city-states emerged with strong ties to Persia. In 1865, Russia occupied Tashkent and by the end of the 19th century, Russia had conquered all of Central Asia. In 1876, the Russians dissolved the Khanate of Kokand, while allowing the Khanates of Khiva and Bukhara to remain as direct protectorates. Russia placed the rest of Central Asia under colonial administration, and invested in the development of Central Asia's infrastructure, promoting cotton growing and encouraging settlement by Russian colonists.

In 1924, following the establishment of Soviet power, the Soviet Socialist Republic of Uzbekistan was founded from the territories including the Khanates of Bukhara and Khiva and portions of the Ferghana Valley that had constituted the Khanate of Kokand. During the Soviet era, Moscow used Uzbekistan for its tremendous cotton growing and natural resource potential. The extensive and inefficient irrigation used to support the former has been the main cause of shrinkage of the Aral Sea to less than a third of its original volume, making this one of the world's worst environmental disasters. Uzbekistan declared independence on September 1, 1991.

GOVERNMENT AND POLITICAL CONDITIONS

The constitution of Uzbekistan provides for separation of powers, freedom of speech, and representative government. In reality, the executive holds almost all power. The judiciary lacks independence, and the legislature—which meets only a few days each year—has little power to shape laws. The president selects and replaces provincial governors. Islam Karimov, former First Secretary of the Central Committee of the Uzbek SSR Communist Party, was elected to a five-year presidential term in December 1991 with 88% of the vote. In a December 1995 referendum, his term was extended to 2000. President Karimov was re-elected in January 2000 with 91.9% of the vote. In a January 2002 referendum, the term of the presidency was extended from five years to seven. President Karimov was re-elected in December 2007. None of these elections or referenda were deemed free or fair.

The 2002 referendum also included a plan to create a bicameral parliament. Parliamentary elections in December 2004 likewise were neither free nor fair, and the Organization for Security and Cooperation in Europe's (OSCE) limited observation mission concluded that the elections fell significantly short of OSCE commitments and other international standards for democratic elections.

Uzbekistan has battled a low-intensity insurgency since the late 1990s. Early this decade, the Islamic Movement of Uzbekistan (IMU) launched a number of small, cross-border raids. The IMU in summer 2001 allied itself with the Taliban government in Afghanistan, where most of its troops were then based, and subsequently engaged U.S. forces in Afghanistan.

Terrorist bombings, blamed on the IMU and splinter groups, have occurred sporadically, including multiple, simultaneous attacks in Tashkent in 1998 that destroyed a portion of the Ministry of Interior headquarters and narrowly missed President Karimov. Death estimates in those attacks and in subsequent shootouts in Tashkent with alleged bombers range as high as 200. The official government death tally was sixteen. In March and April 2004, suicide bombers struck the U.S. and Israeli

Embassies in Tashkent and also detonated devices in the city of Bukhara. In May 2005, armed gunman in the city of Andijon attacked a police station, seized weapons and then stormed a prison, freeing members of a local Islamic organization accused by the government of extremism. In events whose details remain unclear, the attackers then gathered in Andijon's main square. Thousands of local residents also gathered in the square. Shooting erupted between government forces and the insurgents, and a large but undetermined number of individuals were killed. The Government of Uzbekistan, which put the death toll at 187, refused to heed European and U.S. calls for an independent international investigation. Unofficial death toll estimates range as high as 700 to 800. While an international investigation did not take place, the government claimed to have conducted internal investigations into the May 2005 events. It discussed investigation techniques and results with diplomats and other international representatives in 2006, 2007, and 2008.

Human Rights

Uzbekistan has no meaningful political opposition. Five compliant political parties hold all seats in the parliament, and independent political parties have been effectively suppressed since the early 1990s. Multiple independent and governmental media outlets (radio, TV, newspaper) exist. Self-censorship is the norm. Editors and journalists who have broached politically sensitive topics have routinely experienced repercussions, including loss of employment.

Since 1991, many prominent opponents of the government have fled, and others have been arrested. The government severely represses those it suspects of Islamic extremism, including those suspected of any affiliation to organizations such as the banned extremist Party of Islamic Liberation (Hizb ut-Tahrir). Thousands of suspected extremists have been incarcerated since 1992, and arrests continue. The exact number remaining in custody is unknown but may be several thousand. A large number of prisoners have died in custody, many from disease and other poor conditions and others from mistreatment and abuse. Political prisoners and suspected extremists are allegedly treated worse than ordinary prisoners.

The police force and the intelligence service have used torture as a routine investigation technique. In May 2003, following the visit of the UN Special Rapporteur on Torture, the Government of Uzbekistan drafted an action plan to implement the Rapporteur's recommendations. The government began enacting a number of the plan's provisions but has since ceased cooperating with international organizations involved in prison reform. Prison conditions and the prevalence of torture today therefore are not clear but are widely believed to remain problematic.

Principal Government Officials

Last Updated: 11/12/08

Pres.: **Islom KARIMOV**
Chmn., Supreme Assembly (Oliy Majlis): **Dilorom TOSHMUHAMEDOVA**
Prime Min.: **Shavkat MIRZIYOYEV**

Ambassador to the US: **Abdulaziz KAMILOV**
Permanent Representative to the UN, New York: **Alisher VOHIDOV**

The Republic of Uzbekistan maintains an embassy at 1746 Massachusetts Ave., NW, Washington, DC 20036. Tel.: (202) 887-5300; fax (202) 293-6804. Its consulate and mission to the UN in New York are located at 866 United Nations Plaza, Suite 326/327a, New York, NY 10017. Consulate tel.: (212) 754-7403; fax: (212) 486-7998.

ECONOMY

The economy is based primarily on agriculture and natural resource extraction. Uzbekistan is a major producer and exporter of cotton. It also is a major exporter of gold, uranium, strategic minerals, and gas. Since independence, the government has stated its commitment to a gradual transition to a free market economy but has been cautious in moving to a market-based economy.

It is difficult to accurately estimate economic growth in Uzbekistan due to unreliable government statistics, which often serve political rather than economic ends. Economic growth has been strong in the past few years, but wealth is strictly held by the elite. According to the World Bank, approximately 25% of Uzbeks live at or below the poverty line.

The government implements a strict import substitution policy to control foreign trade and prevent capital outflow. Substantial structural reform is needed, particularly in the area of improving the investment climate for foreign investors and liberalizing the agricultural sector. Although the government has committed itself in theory to the provisions of the International Monetary Fund's (IMF) Article VIII regarding currency con-

vertibility for current account operations, in practice firms can wait from three to eight months for currency conversion. Convertibility restrictions and other government measures to control economic activity, (e.g., import and export restrictions, and intermittent border closings) have constrained economic growth and led international lending organizations to suspend or scale back credits.

GDP and Employment

The International Monetary Fund estimates 2007 GDP growth figure as 9.5%. The IMF projects 2008 GDP growth of 8.0%. Unemployment and underemployment are very high, but reliable figures are difficult to obtain, as no recent credible surveying has been done. Unofficially, unemployment is estimated around 8% and underemployment around 25%. Underemployment in the agricultural sector is particularly high—which is important given the fact that 62% of the population is rural-based. Many observers believe that employment growth and real wage growth have been stagnant, given virtually no growth in output.

Labor

Literacy in Uzbekistan is almost universal, and workers are generally well-educated and well-trained. Worsening corruption in the country's education system in the past few years has begun to erode Uzbekistan's advantage in terms of its human capital, as grades and degrees are routinely purchased. Additionally, elementary and secondary students in the remote provinces have poor access to basic education. Most local technical and managerial training does not meet international business standards, but foreign companies engaged in production report that locally hired workers learn quickly and work effectively. Foreign firms generally find that younger workers, untainted by the Soviet system, work well at all levels. The government has significantly curbed a long-time program emphasizing foreign education, which in past years annually sent about 50 students to the United States, Europe, and Japan for university degrees, after which they have a commitment to work for the government for 5 years. Reportedly, about 60% of the students who studied abroad found employment with foreign companies upon their return, despite their 5-year commitment to work in the government. In addition, Uzbekistan subsidizes studies for students at Westminster University—the only Western-style institution in Uzbekistan. In 2003, Westminster admitted about 360 students, and the government funded about half of the students' education. Education at Westminster costs $4,900 per academic year.

With the closure or downsizing of many foreign firms, it is relatively easy to find qualified, well-trained employees, and salaries are very low by Western standards. The government has implemented salary caps in an attempt to prevent firms from circumventing restrictions on the withdrawal of cash from banks. Some firms had tried in the past to evade these limits on withdrawals by inflating salaries of employees, allowing firms to withdraw more money. These salary caps prevent many foreign firms from paying their workers as much as they would like. Labor market regulations in Uzbekistan are similar to those once used in the Soviet Union, with all rights guaranteed but some rights unobserved. Unemployment is a growing problem, and a significant number of people continue to look for jobs in Russia, Kazakhstan, the Middle East, and Southeast Asia, though the overall number might have declined in the past year due to slowing economies in neighboring countries. Business analysts estimate that a high number of Uzbek citizens are working abroad. Estimates range from lows of 3 million to highs of 5 million Uzbek citizens of working age living outside Uzbekistan, most in neighboring countries or Russia. Uzbekistan signed a labor agreement with Russia in 2007 to facilitate the temporary migration of Uzbek workers and the taxation of their income, though reportedly only 1,000 Uzbeks participated in this program in 2008.

Prices and Monetary and Fiscal Policy

Macroeconomic performance has been strong over the last two years and resulted in a positive trade balance. Real GDP growth was high, and official reserves continued to rise. Inflation is expected to be between 30%-40% in 2008. In order to combat inflation, the government has exercised strict currency controls, causing periodic shortages of cash. Reacting to the weakening of the dollar to the Euro, the government recently switched to the Euro for its accounting and financial management. The hospitality sector is following suit.

Outstanding external debt in 2007 was estimated at $3.927 billion. Tax collection rates remained high, due to the use of the banking system by the government as a collection agency. The World Bank and the UN Development Program (UNDP) have provided technical assistance to reform the Central Bank and Ministry of Finance into institutions that conduct market-oriented fiscal and monetary policy. Bank reform is very slow and inhibits the ability of citizens or private companies to obtain credit and other banking services.

Agriculture and Natural Resources

Agriculture and the agro-industrial sector contribute about 30% to Uzbekistan's GDP. Cotton is Uzbekistan's dominant crop, accounting for roughly 14% of the country's GDP in 2007. Uzbekistan also produces significant amounts of silk, wheat, fruit, and vegetables. Nearly all agriculture involves heavy irrigation. Farmers and agricultural workers earn low wages, which the state seldom pays on a regular basis. In general, the government controls the agriculture sector, dictates what farms grow, and buys directly from the farmers to sell abroad.

Minerals and mining are integral to Uzbekistan's economy. Gold is Uzbekistan's second most important foreign exchange earner, unofficially estimated at around 20%. Uzbekistan is the world's seventh-largest pro-

ducer, mining about 80 tons of gold per year, and holds the fourth-largest reserves in the world. Uzbekistan receives a considerable amount of income from natural gas exports. It produces oil for domestic consumption and has significant reserves of copper, lead, zinc, tungsten, and uranium.

Trade and Investment

Uzbekistan's export/import policy is based on import substitution. The highly regulated trade regime has led to both import and export declines since 1996, although imports have declined more than exports, as the government squeezed imports to maintain hard currency reserves. Draconian tariffs and sporadic border closures and crossing "fees" decrease legal imports of both consumer products and capital equipment. Uzbekistan's traditional trade partners are from the Commonwealth of Independent States (CIS), notably Russia, Ukraine, and Kazakhstan. Non-CIS partners have been increasing in importance in recent years, with the European Union, South Korea, Germany, Japan, and Turkey being the most active.

Uzbekistan is a member of the IMF, the World Bank, the Asian Development Bank, the Islamic Development Bank, and the European Bank for Reconstruction and Development. It has observer status at the World Trade Organization (WTO) and has publicly stated its intention to accede to the WTO. It is a member of the World Intellectual Property Organization and is a signatory to the Convention on Settlement of Investment Disputes between States and Nationals of Other States, the Paris Convention on Industrial Property, the Madrid Agreement on Trademarks Protection, and the Patent Cooperation Treaty. In 2008, Uzbekistan was again placed on the special "301" Watch List for lack of intellectual copyright protection.

Since Uzbekistan's independence, U.S. firms have invested roughly U.S. $500 million in Uzbekistan. 2006 and 2007 saw some foreign investors depart Uzbekistan because of declining investor confidence, harassment, and currency convertibility problems. However, in 2007 GM-DAT, a Korean subsidiary of GM entered Uzbekistan when it signed a joint-venture agreement with UzDaewoo to assemble Korean-manufactured cars for export and domestic sale, including Chevrolets. GM is looking to expand its operations in Uzbekistan. Boeing also has a longstanding relationship with the national airline of Uzbekistan, Uzbekistan Airways.

DEFENSE

Uzbekistan possesses the largest and most competent military forces in the Central Asian region, having around 65,000 people in uniform. Its structure is inherited from the Soviet armed forces, although it is moving rapidly toward a fully restructured organization, which will eventually be built around light and Special Forces. The Uzbek Armed Forces' equipment is not modern, and training, while improving, is neither uniform nor adequate yet for its new mission of territorial security. The government has accepted the arms control obligations of the former Soviet Union, acceded to the Nuclear Non-Proliferation Treaty (as a non-nuclear state), and has supported an active program by the U.S. Defense Threat Reduction Agency (DTRA) to demilitarize and clean up former weapons of mass destruction-related facilities in western Uzbekistan (Nukus and Vozrozhdeniye Island), as well as to guard against the proliferation of radiological materials across its borders. The Government of Uzbekistan spends about 2% of GDP on the military (2005 est.).

Beginning in the late 1990s until 2004, the government received U.S. Foreign Military Financing (FMF), International Military Education and Training (IMET), and other security assistance funds. Beginning in 2004, new FMF and IMET assistance to Uzbekistan was stopped, as the Secretary of State, implementing U.S. Government legislation, was unable to certify that the Government of Uzbekistan was making progress in meeting its commitments, including respect for human rights and economic reform, under the U.S.-Uzbekistan Strategic Framework Agreement. Uzbekistan approved U.S. Central Command's request for access to a vital military air base in southern Uzbekistan following the September 11, 2001 terrorist attacks in the U.S., but asked the U.S. to leave in July 2005. All U.S. forces had departed this facility by November 2005.

FOREIGN RELATIONS

Uzbekistan is a member of the Shanghai Cooperation Organization (SCO), the Collective Security Treaty Organization (CSTO), the Commonwealth of Independent States (CIS), the United Nations, the Euro-Atlantic Partnership Council, NATO Partnership for Peace, the Organization for Security and Cooperation in Europe (OSCE), the Organization of the Islamic Conference (OIC), and the Economic Cooperation Organization—comprised of the five Central Asian countries, Azerbaijan, Turkey, Iran, Afghanistan, and Pakistan. In 1999, Uzbekistan joined the GUAM alliance (Georgia, Ukraine, Azerbaijan, and Moldova), which was formed in 1997 (making it GUUAM), but formally withdrew in 2005. Uzbekistan hosts the Shanghai Cooperation Organization's (SCO) Regional Anti-Terrorist Structure (RATS) in Tashkent. Uzbekistan is a founding member of the Central Asian Union, formed with Kazakhstan and Kyrgyzstan (and which Tajikistan joined in March 1998). In 2002, Uzbekistan joined the Central Asian Cooperation Organization (CACO), which also includes Tajikistan, Kazakhstan, and Kyrgyzstan. In 2006, Uzbekistan joined the Eurasian Economic Community (EurASEC), comprising Belarus, Kazakhstan, Kyrgyzstan, Russia, Tajikistan, and Uzbekistan, but subsequently withdrew in 2008.

Uzbekistan participated in the CIS peacekeeping force in Tajikistan and in UN-organized groups to help resolve the Tajik and Afghan con-

flicts, both of which it viewed as posing threats to its own stability. Uzbekistan is a supporter of U.S. efforts against worldwide terrorism and joined the coalition combating terrorism in Afghanistan. It continues to support coalition anti-terrorist operations in Afghanistan by granting access to Germany to an air base in southern Uzbekistan.

Uzbekistan has actively participated in regional efforts to combat terrorism and the narcotics trade. It has maintained close ties to Russia, while also seeking to balance this with stronger ties to China and other powers. In November 2005, Uzbekistan signed a mutual defense treaty with Russia.

U.S.-UZBEK RELATIONS

The U.S. recognized the independence of Uzbekistan on December 25, 1991, and opened an Embassy in Tashkent in March 1992. U.S.-Uzbek relations developed slowly and reached a peak following the U.S. decision to invade Afghanistan following the September 11, 2001 terror attacks. Relations cooled significantly following the "color revolutions" in Georgia, Ukraine, and Kyrgyzstan in 2003-2005, and the Government of Uzbekistan sought to limit the influence of U.S. and other foreign non-governmental organizations (NGOs) working on civil society, political reform, and human rights inside the country. Relations deteriorated rapidly following U.S. and European demands for an independent, international investigation into the May 2005 Andijon violence.

Relations have improved since the second half of 2007 as both the United States and Uzbekistan sought re-engagement under the terms of the March 2002 Declaration of Strategic Partnership between the two countries. The declaration covers not only security and economic relations but political reform, economic reform, and human rights. Uzbekistan has Central Asia's largest population and is vital to U.S., regional, and international efforts to promote stability and security.

Bilateral Economic Relations

Trade and investment. Trade relations are regulated by a bilateral trade agreement, which entered into force January 14, 1994. It provides for extension of most-favored-nation trade status between the two countries. The U.S. additionally granted Uzbekistan exemption from many U.S. import tariffs under the Generalized System of Preferences (GSP status) on August 17, 1994. A Bilateral Investment Treaty was signed December 16, 1994; it has been ratified by Uzbekistan and received advice and consent of the U.S. Senate in October 2000. However, the Bilateral Investment Treaty will be unlikely to enter into force until Uzbekistan embarks on economic reform. The government is taking some modest steps to reduce the bureaucratic restraints on the nascent private sector.

Assistance. The United States' humanitarian and technical assistance to Uzbekistan has decreased markedly since 2004, both as a result of government actions against U.S. implementing partners and U.S. Government restrictions on aid. Since its independence, the U.S. has provided technical support to Uzbekistan's efforts to restructure its economy and to improve its environment, education, and health care system, provided support to nascent NGOs, and provided equipment to improve water availability and quality in the Aral Sea region. Through the U.S. Agency for International Development (USAID) and the Embassy's Public Affairs Section, the U.S. Government continues to support educational and professional exchanges and other programs that offer Uzbeks the opportunity to study in the United States and to establish professional contacts with their American counterparts. The Departments of State and Defense provide technical assistance in the form of equipment and training to enhance Uzbekistan's control over its borders and its capabilities to interdict the illicit movement of narcotics, people, and goods, including potential weapons of mass destruction-related items. In FY 2003, the United States provided roughly $87.4 million in humanitarian aid, technical assistance, military-to-military funding, and microcredit support in Uzbekistan. U.S. assistance grew to approximately $101.8 million in FY 2004, but fell to $92.6 million in FY 2005. These programs were designed to promote market reform and to establish a foundation for an open, prosperous, democratic society. Starting in 2004, the Secretary of State has been unable to certify that Uzbekistan has met its obligations under the bilateral 2002 Strategic Framework Agreement. As a result, U.S. assistance declined to approximately $10 million in FY 2008.

USAID provides both technical and humanitarian assistance. Technical assistance to Uzbekistan promotes sound fiscal and management policies, a strengthened business enabling environment, enhanced competitiveness of the agribusiness sector, increased citizens' participation in civil society and economic decision making, improved sustainability of social benefits and services, reduced environmental risks to public health, and other multi-sector reform programs. The USAID/Central Asian Republics Uzbekistan health program focuses on four chief needs: primary health care reform, HIV/AIDS and infectious disease control, drug demand reduction, and reproductive and maternal and child health. Programs are designed to develop local capacity and promote mechanisms for citizens to engage with their local government. U.S. Government funds also support the work of non-governmental organizations to prevent trafficking in persons and care for victims.

Peace Corps staff arrived in Uzbekistan in August 1992, and a bilateral agreement to establish the Peace Corps in Uzbekistan was signed November 4, 1992. The first volunteers arrived in December 1992. Peace Corps Volunteers were active in English teaching, small business

development, public health, and women's issues. However, Uzbekistan failed to renew visas for Peace Corps volunteers in 2005, ending the Peace Corps presence in the country. Department of State-managed exchange programs, farmer-to-farmer exchanges, and the Department of Commerce's Special American Business Internship Training Program (SABIT) contribute to expansion of technical know-how and support bilateral relations. The U.S. also provides export finance/guarantees and political risk insurance for U.S. exporters and investors through the U.S. Export-Import Bank and the Overseas Private Investment Corporation (OPIC). Proceeds from the U.S. Department of Agriculture's Commodity Monetization Program are scheduled to finance more than 30 farmer assistance and rural development projects which were approved jointly by U.S. and Uzbek officials in 2005. Some of the selected projects are already underway.

TRAVEL

Consular Information Sheet

June 30, 2008

Country Description: Uzbekistan gained independence from the Soviet Union in 1991. While the country has undergone significant change since then, its progress towards democratic and economic reform has been halting and uneven. Corruption is endemic at all levels of society. Much of the country, particularly areas outside of Tashkent and the major tourist destinations of Samarkand, Bukhara, and Khiva, is remote and difficult to access. Tourist facilities in these areas are typically below Western standards, and many goods and services remain difficult to find on a regular basis.

Entry Requirements: A passport and visa are required. Although official invitation letters are not required for American citizens applying for tourist visas, they are required for those planning to visit an individual who resides in Uzbekistan. Tourist visas cannot be extended in Uzbekistan. Visas are issued by Uzbek embassies and consulates abroad. Visitors coming from countries where Uzbekistan does not have diplomatic or consular representation should obtain visas in a third country. Visas are not available upon arrival at Uzbek airports. The Embassy has received a number of reports from American citizens who have had problems obtaining Uzbek visas or who received Uzbek visas valid for a very limited period, usually for fewer than three months. Americans seeking visas are encouraged to apply for their visas well in advance of their travel.

It is important to note that Uzbek visas indicate not only the validity of the visa, but also the period of time a person is allowed to stay in Uzbekistan on a given trip. A visitor will have to leave the country before the number of days indicated as the duration of stay on the visa expires. Therefore, it is important to indicate your intended period of stay when applying for your Uzbek visa. American citizens who are affiliated with a non-governmental organization (NGO) that has been closed in Uzbekistan may be prevented from entering the country, even with a valid visa. All travelers, even those simply transiting Uzbekistan for fewer than 72 hours, must obtain an Uzbek visa before traveling to Uzbekistan.

The Uzbek Government maintains travel restrictions on large parts of the Surkhandarya province bordering Afghanistan, including the border city of Termez. The border crossing point at Hayraton between Afghanistan and Uzbekistan, while open, is tightly controlled. Foreign citizens intending to travel to this province must obtain a special permission card from the Ministry of Foreign Affairs, the Ministry of Internal Affairs or Uzbek embassies and consulates abroad. Even with such permission, however, some American citizens transiting to Afghanistan via Termez have been briefly detained and/or fined for not registering in Uzbekistan.

Travel within Uzbekistan by rail or land sometimes requires brief exit into neighboring countries. Travelers should have multiple-entry Uzbek visas and a proper visa for the neighboring country in order to avoid delays in travel.

Registration after entry: All travelers present in Uzbekistan for more than three business days must register with the Office of Entry, Exit, and Citizenship, commonly known as "OVIR." Hotel guests are registered automatically, but all other travelers are responsible for registering themselves. Registration fees vary depending on length of stay. See http://uzbekistan.usembassy.gov/consular for more information. Visitors without proper registration are subject to fines, imprisonment, and deportation. The fines range from $500 to $4,000. Uzbek law mandates that visitors carry a medical certificate attesting that they are not infected with HIV, but this requirement is

sporadically enforced. Further visa information is available from the Consular Section of the Embassy of the Republic of Uzbekistan, 1746 Massachusetts Avenue NW, Washington, DC 20036; telephone: (202) 530-7291; fax: (202) 293-9633; web site: http://www.uzbekistan.org, or, from the Consulate General of Uzbekistan in New York City, 866 United Nations Plaza, Suite 327A, New York, NY 10017; telephone: (212) 754-7403; fax: (212) 838-9812; web site: http://www.uzbekconsulny.org.

Safety and Security: A Travel Warning remains in effect for Uzbekistan, and other parts of Central Asia. The Department of State reminds U.S. citizens of the potential for terrorist attacks or localized civil disturbances in Uzbekistan. Although there have been no violent incidents there since May 2005, Americans visiting or living in Uzbekistan are urged to exercise caution. The U.S. Government continues to receive information that indicates terrorist groups may be planning attacks, possibly against U.S. interests, in Uzbekistan. Supporters of terrorist groups such as the Islamic Movement of Uzbekistan, al-Qaida, the Islamic Jihad Union, and the Eastern Turkistan Islamic Movement are active in the region. Members of these groups have expressed anti-U.S. sentiments and have attacked U.S. Government interests in the past, including the U.S. Embassy in Tashkent, and may attempt to target U.S. Government or private American interests in Uzbekistan. In the past, these groups have conducted kidnappings, assassinations, and suicide bombings.

Increased security at official U.S. facilities over the past year may lead terrorists and their sympathizers to seek softer targets. These may include facilities where Americans and other foreigners congregate or visit, such as residential areas, clubs, restaurants, places of worship, schools, hotels, outdoor recreation events, and resorts. The U.S. Embassy in Tashkent continues to employ heightened security precautions. U.S. citizens should report any unusual activity to local authorities and then inform the Embassy.

Uzbekistan experienced a wave of terrorist violence in 2004. In July 2004 there were three suicide bombings in Tashkent, including one outside the U.S. Embassy. The Islamic Jihad Union (IJU) claimed responsibility for the attacks. The IJU also used suicide bombers in multiple attacks targeting police and Uzbek private and commercial facilities in Tashkent and Bukhara in late March and early April 2004. In May 2005, armed militants stormed a prison in Andijon, released its prisoners, and then took control of the regional administration and other government buildings in Andijon Province. Fighting broke out between government forces and the militants, and reports indicated that several hundred civilians died in the ensuing violence. While there were no reports of U.S. citizens being affected by the fighting, U.S. citizens and other foreigners in Uzbekistan frequently have experienced harassment from authorities and local residents in the wake of the events of 2005.

Depending upon security conditions, travelers can expect and anticipate restricted personal movement, including the closing of roads to traffic in addition to frequent document, vehicle, and personal identification checks. The Uzbek Government has intermittently restricted travel to certain parts of the country in response to security concerns.

Crime: Uzbekistan's rate of violent crime, including against foreigners, has increased slightly in recent years. In urban areas, travelers are urged to take the same precautions against crime that they would take in a large American city. If you are traveling at night, please travel in groups, maintain a low profile, and do not display large amounts of cash. Beware of pickpockets in public places, such as tourist destinations and local markets.

Although using private cars as taxicabs is a common practice in Uzbekistan, Americans, especially women, should not consider this a safe practice. Americans are encouraged to use clearly marked taxicabs, such as those at hotels. Also, Americans should avoid riding in taxis alone. In many countries around the world, counterfeit and pirated goods are widely available. Transactions involving such products may be illegal under local law. In addition, bringing them back to the United States may result in forfeitures and/or fines. More information on this serious problem is available at http://www.cybercrime.gov/18usc2320.htm.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting the crime to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

The local equivalents to the "911" emergency lines in Uzbekistan are: 01 for fire; 02 for police; 03 for an ambulance; and 050 for the Ministry of Emergency Situations.

Medical Facilities and Health Information: Medical care in Uzbekistan is below Western standards, with severe shortages of basic medical supplies, including disposable needles, anesthetics, and antibiotics. A large percentage of medication sold in local pharmacies is known to be counterfeit. Elderly travelers and those with pre-existing health problems may be at particular risk due to inadequate medical facilities. Most resident Americans travel to North America or Western Europe for their medical needs.

Travelers are advised to drink only boiled water, peel all fruits and vegetables, and avoid undercooked meat. Due to inadequate sanitation conditions, travelers should avoid eating

unpasteurized dairy products and most food sold in the streets. Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's web site at http://wwwn.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith/en.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Uzbekistan is provided for general reference only, and may not be totally accurate in a particular location or circumstance. Uzbekistan has a developed but inconsistently maintained traffic infrastructure. Although main roads in central Tashkent are relatively well maintained, many secondary roads inside and outside Tashkent, and particularly those in the Tien Shan and Fan Mountains, are in poor condition and may be passable only by four-wheel-drive vehicles. Driving at night can be quite dangerous because only the main roads in Tashkent and a few other major cities have streetlights; rural roads and highways generally are not lit. Visitors are strongly urged to avoid driving at night outside Tashkent. The gasoline supply can be sporadic; therefore, travelers should expect occasional difficulty finding gasoline, particularly outside of Tashkent.

Livestock, as well as farm equipment and carts drawn by animals that lack lights or reflectors, are found on both urban and rural roads at any hour. Local drivers are not familiar with safe driving techniques. Pedestrians in cities and rural areas cross streets unexpectedly and often without looking for oncoming traffic. Uzbekistan has a large road police force, which frequently stops drivers for minor infractions or simple document checks. There have been reports of harassment of foreign drivers by the road police, with reported minor police corruption in the form of solicitation of bribes. Visit the website of Uzbekistan's national tourist office and national authority responsible for road safety at http://www.uzbektourism.uz

Aviation Safety Oversight: The U.S. Federal Aviation Administration (FAA) has assessed the Government of Uzbekistan's Civil Aviation Authority as being in compliance with International Civil Aviation Organization (ICAO) aviation safety standards for oversight of Uzbekistan's air carrier operations. For more information, travelers may visit the FAA's Internet web site at http://www.faa.gov.

Special Circumstances: Travelers to Uzbekistan are subject to frequent document inspections. Therefore, U.S. citizens are strongly encouraged to carry a certified copy of their U.S. passport and their Uzbek visa with them at all times so that, if questioned by local officials, proof of identity and U.S. citizenship are readily available. In accordance with the Vienna Convention on Consular Relations and certain bilateral agreements, local authorities must grant a United States Consular Officer access to any U.S. citizen who is arrested. U.S. citizens who are arrested or detained should ask to contact the U.S. Embassy immediately.

Uzbek customs authorities may enforce strict regulations concerning temporary import to or export from Uzbekistan of items such as armaments and ammunition, space technology, encryption devices, X-ray and isotope equipment, nuclear materials, poisons, drugs, precious and semi-precious metals, nullified securities, pieces of art, and antiques of historical value. Contact the Embassy of Uzbekistan in Washington, D.C. or the Consulate of Uzbekistan in New York for specific information regarding customs requirements.

Most transactions are conducted on a cash-only, local currency (soum) basis. Many merchants will accept dollars for larger tourist handicraft purchases. Credit cards are accepted only at the main hotels and a few shops and restaurants; travelers' checks can be cashed into dollars at the National Bank of Uzbekistan. The commission fee is two percent. Importation of currency exceeding $10,000 (US) is subject to a one-percent duty. Foreigners must complete a customs declaration upon entering Uzbekistan. The amount of cash taken out of Uzbekistan should not exceed the amount indicated on the customs declaration. In order to export more cash than was imported, one must have special permission from the National Bank of Uzbekistan. Those who understate the amount of currency on their declaration form upon departure from Uzbekistan face fines and confiscation of their unreported money. Old U.S. dollar bills (prior to 1990) and/or those in poor condition (with tears, writing or stamps) are not acceptable forms of currency in Uzbekistan. Although payment in U.S. dollars is required for certain hotel charges, airline tickets, and visa fees, other dollar transactions, as well as black market currency exchanges, are prohibited.

Uzbekistan is an earthquake-prone country. General information about natural disaster preparedness is available via the Internet from the U.S. Federal Emergency Management Agency (FEMA) at http://www.fema.gov.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual

under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating Uzbek laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Uzbekistan are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in Uzbekistan are encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration web site so that they can obtain updated information on travel and security within Uzbekistan. Americans without Internet access may register directly with the U.S. Embassy in Tashkent. By registering, American citizens make it easier for the Embassy to contact them in case of emergency. The U.S. Embassy is located at # 3, Moyqorghon Street, 5th Block, Yunusobod District, Tashkent -700093, Uzbekistan. The main Embassy telephone number, which can also be reached after hours, is (998 71) 120-5450, fax: (998 71) 120-6335; Consular fax: (998 71) 120-54-48; e-mail: ConsularTashkent@state.gov; web site: http://uzbekistan.usembassy.gov.

Intercountry Adoption

November 2008

The information in this section has been edited from a report available through the U.S. Department of State Office of Children's Issues. For more information detailed, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Uzbekistan is not party to The Hague Convention on Protection of Children and Co-operation in Respect of Intercountry Adoption (Hague Adoption Convention).

Who Can Adopt? To bring an adopted child to United States from Uzbekistan, you must be found eligible to adopt by the U.S. Government. The U.S. Government agency responsible for making this determination is the Department of Homeland Security, U.S. Citizenship and Immigration Services (USCIS). For detailed information on these requirements for adoption, please review the *Intercountry Adoption* section of this publication and visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

Adopting in Uzbekistan is very difficult, and the Embassy is aware of only one adoption agency that has been able to process two adoptions since 2003. Adoption is a sensitive issue in Uzbekistan, and some Uzbek officials are not in favor of foreign adoptions. Individuals wishing to adopt in Uzbekistan, therefore, may face unexpected opposition, even when a case has been fully processed and the adoption is ready to be formalized. In addition to these U.S. requirements for adoptive parents, Uzbekistan also has the following requirements for adoptive parents.

Residency Requirements: There are no residency requirements for Uzbekistan.

Age Requirements: Prospective adoptive parents must be at least 15 years older than the child.

Marriage Requirements: Prospective adoptive parents may be married or single.

Who Can Be Adopted? Uzbekistan has specific requirements that a child must meet in order to be eligible for adoption. In addition to these requirements, a child must meet the definition of an orphan under U.S. law for you to bring him or her home back to the United States. Learn more about these U.S. requirements.

Relinquishment Requirements: Minimum legal requirements must be met prior to the issuance of an adoption decree by the respective Mayor. Such requirements include the need for the child to remain in an orphanage for at least one year. This applies only to children who have been place with social services by their own parents. If there is legal finding determining the parents as "missing," "deprived of parental rights," "legally incapable," or "deceased," then the one-year rule does not apply. To meet both U.S. and Uzbek legal requirements, there should have been a reasonable effort made to locate the birth parents by competent authorities.

Uzbek Adoption Authority: Ministry of Education and the local Mayor's office ("Hokimiat")

The Process: The first step in adopting a child from Uzbekistan is usually to select a licensed agency in the United States that can help with your adoption. Adoption service providers must be licensed by the U.S. state in which they operate.

To bring an adopted child from Uzbekistan to the United States, you must apply to be found eligible to adopt (Form I-600A) by the U.S. Government, Department of Homeland Security, U.S. Citizenship and Immigration Services (USCIS).

If you are eligible to adopt, and a child is available for intercountry adoption, the central adoption authority in Uzbekistan will provide you with a referral to a child. The child must be eligible to be adopted according to Uzbekistan's requirements. The child must also meet the definition of an orphan under U.S. law.

Role of the Adoption Authority: Under Uzbek law, the Guardianship and Trusteeship Organ (GTO) of each local Mayor's (Hokimiat) office is responsible for settlement of orphans. Adoptive parents or their legal representatives must submit documents to a local Mayor through its GTO.

Adoption Application: Once the prospective adoptive parents have selected a child, they or their legal representatives should submit an application and supporting documents directly to the Guardianship and Trusteeship Organ (GTO) of the Mayor's office ("Hokimiat") of the region. The application should include the prospective parents' names, place of residence, marital information, and complete information (name, age, sex) of any children they already have. It should also include the name, age and sex of the Uzbek child they wish to adopt.

After reviewing the family's documentation, the GTO will pass the documents to the Mayor for approval. Based on the Mayor's approval, the local Vital Records office issues a new birth certificate. The new birth certificate includes the names of the adoptive parents and changes the child's last name to the adoptive parents' last name. First name and the date of birth of the child can be changed upon request. The date of birth may be changed, but not by more than one year. If a child is under ten years old, his/her place of birth can also be changed to another location within the territory of the Republic of Uzbekistan.

With the Mayor's (Hokim's) permission and the vital record office, the Administration for Entry, Exit, and Citizenship issues a passport and exit permission to the child. As was stated earlier in this flyer, prospective parents are not required to have maintained residency in Uzbekistan for any particular length of time.

In order to process adoption cases in the most expeditious manner and to avoid unforeseen delays due to incomplete documentation, please submit adoption documents for review at least 5 business days prior to the date of the child's expected interview date.

Time Frame: Foreign adoption in Uzbekistan is a time consuming process. It can take from six months to two years. In some cases the U.S. Embassy may be required to conduct field investigations after adoption documents have been submitted. This could cause significant delays in processing. Adoptive parents should be prepared to make additional trips to Uzbekistan before the adoption is complete.

Adoption Fees: The Uzbek Government charges small official fees, usually about $10 USD per document, for the submission and processing of the adoption application and corresponding documents.

Documents Required: The following documents must be submitted by the prospective parents for adoption:

- Application to the GTO of the regional Hokimiat, with the information outlined in this flyer (names, place of residence, marital information, data on current children, and information about the prospective adoptive child);
- Copy of prospective adoptive parent(s) passport(s);
- Marriage certificates and/or divorce decrees, if applicable;
- Home study certificate, including the number of family members;
- Employment letter for the prospective adoptive parent(s), including salary information;
- Letter of recommendation (description of personality) from a parent's employer, local city hall or home study agency;
- Medical certificate from a doctor indicating that the prospective parents are healthy, do not have communicable diseases, and do not abuse drugs or alcohol;
- Letter from U.S. Embassy, based on the approved I-600A notification (Visas 37) which states that the U.S. Government is aware of the family, and that relevant authorities have approved the family for an adoption of an orphan.

All documents must be translated into Uzbek or Russian by an official translator and authenticated by the Uzbek Embassy in the United States. For updates on document requirements and information on how to authenticate documents, visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

Bringing Your Child Home: Once your adoption is complete (or you have obtained legal custody of the child), there are a few more steps to take before you can head home. Specifically, you need to apply for several documents for your child before he or she can travel to the United States, such as a birth certificate, a passport or travel document for your child from the country in which he or she was born, and a U.S. Immigration Visa.

For detailed and updated information on how to obtain these documents, review the *Intercountry Adoption* section on this publication and visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

Child Citizenship Act: For adoptions finalized abroad: The Child Citizenship Act of 2000 allows your new child to acquire American citizenship automatically when he or she enters the United States as lawful permanent residents. For adoptions finalized in the United States: The Child Citizenship Act of 2000 allows your new child to acquire American citizenship automatically when the court in the United States issues the final adoption decree. To learn more, review the *Intercountry Adoption* section on this publication and visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

After Adoption: Uzbek law has no post-adoption requirements for adoptive parents. Parents should confirm any post-adoption requirements with their legal representatives.

International Parental Child Abduction

November 2008

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *International Parental Child Abduction* section of this book and review current reports online at http://travel.state.gov/childabduction.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is provided for general information only. Questions involving interpretation of specific foreign laws should be addressed to foreign legal counsel.

General Information: Uzbekistan is a party to the Hague Convention on the Civil Aspects of International Child Abduction but the Convention is not yet in force between Uzbekistan and the United States.

Dual Nationality: Dual nationality is not recognized under Uzbek law.

Custody Disputes: Past Uzbek court practice has given priority for custodianship to the mother as long as certain restrictive conditions are met. The father can appeal for custody at any time.

Enforcement of Foreign Judgments: Custody orders and judgments of foreign courts are not enforceable in Uzbekistan if they potentially contradict or violate local laws and practices.

Visitation Rights: In cases where one parent has custody of a child, the second parent may be granted visitation rights by court decision.

Travel Restrictions: Uzbekistan issues two types of exit permissions:

- Temporary exit permission valid for two years: Consent of both parents (or guardian) is needed only for a minor under the age of 16. If only one parent is alive, a death certificate must be supplied.
- Permission to leave the country indefinitely: ALL citizens (adults and children) must submit a notarized letter of consent from both parents or supply a death certificate of the parents.

Persons who wish to pursue a child claim in Uzbekistan court should retain an attorney in Uzbekistan. The U.S. Embassy in Tashkent maintains a list of lawyers acting in Uzbekistan.

For further information on international parental child abduction, contact the Office of Children's Issues, U.S. Department of State at 1-888-407-4747 or visit its web site on the Internet at http://travel.state.gov. You may also direct inquiries to: Office of Children's Issues, U.S. Department of State, Washington, DC 20520-4811; Phone: (202) 736-9090; Fax: (202) 312-9743.

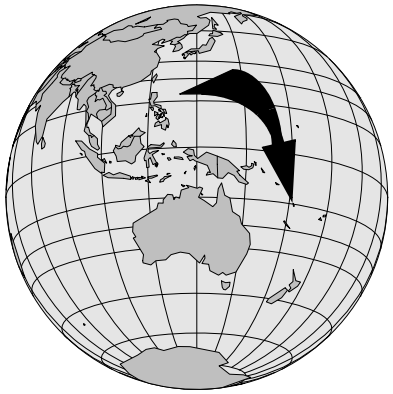
Travel Warning

July 3, 2008

This Travel Warning is being issued to remind U.S. citizens that the potential for a terrorist attack or localized civil disturbance still exists, despite the fact that there have been no violent incidents in Uzbekistan since May 2005. The Department of State continues to urge Americans in Uzbekistan to exercise caution when traveling in the region. This supersedes the Travel Warning dated October 25, 2007.

The U.S. Government continues to receive information that indicates terrorist groups may be planning attacks, possibly against U.S. interests, in Uzbekistan. Supporters of terrorist groups such as the Islamic Movement of Uzbekistan, Al-Qaida, the Islamic Jihad Union, and the Eastern Turkistan Islamic Movement are active in the region. Members of these groups have expressed anti-U.S. sentiments and have attacked U.S. Government interests in the past, including the U.S. Embassy in Tashkent, and may attempt to target U.S. Government or private American interests in Uzbekistan. In the past, these groups have conducted kidnappings, assassinations, and suicide bombings, though no instances have been documented in recent years.

High security at official U.S. facilities may lead terrorists and their sympathizers to seek softer targets. These may include facilities where Americans and other foreigners congregate or visit, such as residential areas, clubs, restaurants, places of worship, schools, hotels, outdoor recreation events, and resorts. The U.S. Embassy in Tashkent continues to employ heightened security precautions. U.S. citizens should report any unusual activity to local authorities and then inform the Embassy.



The Uzbek Government maintains travel restrictions on large parts of the Surkhandarya province bordering Afghanistan, including the border city of Termez. American citizens intending to travel to this region must obtain a special permission card from the Ministry of Foreign Affairs, the Ministry of Internal Affairs, or Uzbek embassies and consulates abroad. Even with permission, however, some American citizens transiting to Afghanistan via Termez have been briefly detained and/or fined for

not registering in Uzbekistan. Furthermore, American citizens affiliated with nongovernmental organizations that have been closed in Uzbekistan may be denied entry, even with a valid visa.

Uzbekistan experienced a wave of terrorist violence in 2004. In July 2004 there were three suicide bombings in Tashkent, including one outside the U.S. Embassy. The Islamic Jihad Union (IJU) claimed responsibility for the attacks. The IJU also used suicide bombers in multiple attacks focused on police and Uzbek private and commercial facilities in Tashkent and Bukhara in late March and early April 2004. In May 2005, armed militants stormed a prison in Andijon, released its prisoners, and then took control of the regional administration and other government buildings in Andijon Province. Fighting broke out between government forces and the militants, and reports indicated that several hundred civilians died in the ensuing violence. While there were no reports of U.S. citizens affected by these events, U.S. citizens and other foreigners in Uzbekistan have experienced harassment from authorities since the 2005 violence.

Americans traveling to or remaining in Uzbekistan are strongly urged to register with the U.S. Embassy through the State Department's travel registration website, https://travelregistration.state.gov, and to obtain updated information on travel and security within Uzbekistan. Americans without Internet access may register directly with the U.S. Embassy in Tashkent. The U.S. Embassy in Uzbekistan is located at # 3, Moyqorghon Street, 5th Block, Yunusobod District, Tashkent-700093, Uzbekistan. The telephone number is 998-71-120-5450 and can be reached after hours as well. The Consular fax number is 998-71-120-5448. The website is http://uzbekistan.usembassy.gov.

As the Department continues to develop information on any potential security threats to U.S. citizens overseas, it shares credible threat information through its consular information documents, including the Country Specific Information for Uzbekistan and the Worldwide Caution, available on the Internet at http://travel.state.gov. In addition to information on the Internet, travelers may obtain up-to-date information on security conditions by calling 1-888-407-4747 toll-free in the U.S. and Canada or, outside the U.S. and Canada, on a regular toll line at 1-202-501-4444. These numbers are available from 8:00 a.m. to 8:00 p.m. Eastern Time, Monday through Friday (except U.S. federal holidays).

VANUATU

Compiled from the October 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Republic of Vanuatu

PROFILE

Geography

Area: 11,830 sq. km. (4,568 sq. miles) archipelago of 83 islands. Comparative area—about the size of Connecticut.

Cities: Capital—Port Vila (on the island of Efate), pop. 33,700. Other towns—Luganville (on the island of Espiritu Santo, also known as Santo).

Terrain: Mostly mountains of volcanic origin, narrow coastal plains.

Climate: Tropical.

People

Nationality: Noun and adjective—ni-Vanuatu.

Population: (2007 est.) 218,000.

Annual growth rate: (2007 est.) 2.0%.

Ethnic groups: 94% ni-Vanuatu; 4% European; 2% other Pacific Islanders, Asian.

Religions: Predominantly Christian (84%).

Languages: Bislama (Pidgin), English, French, over 100 tribal languages.

Education: Enrollment in primary is 100% with rapid fall-off to 20% in secondary and upper secondary. Adult literacy rate (2007)—74% of those age 15 and older.

Health: Infant mortality rate (2007)—53/1,000. Life expectancy (2007)—63 yrs.

Work force: (1999) 134,000. Agriculture—65%. Industry—5%. Service—30%.

Government

Type: Parliamentary democracy.

Independence: July 30, 1980.

Constitution: July 30, 1980.

Government branches: Executive—president (head of state), prime minister (head of government). Legislative—unicameral (52-member parliament). Judicial—Supreme Court.

Political subdivisions: 6 administrative districts.

Political parties: Melanesian Progressive Party (MPP); Union of Moderate Parties (UMP); National United Party (NUP); Vanua'aku Party (VP); Vanuatu Republican Party (VRP); the Confederation of Greens (CG); John Frum group; People's Progressive Party (PPP); National Community Association (NCA).

Suffrage: Universal over 18.

Independence: July 30.

Economy

GDP: (2006) $343.6 million.

Per capita income: (2005) $1,576.

Real growth rate: (2006) 4%.

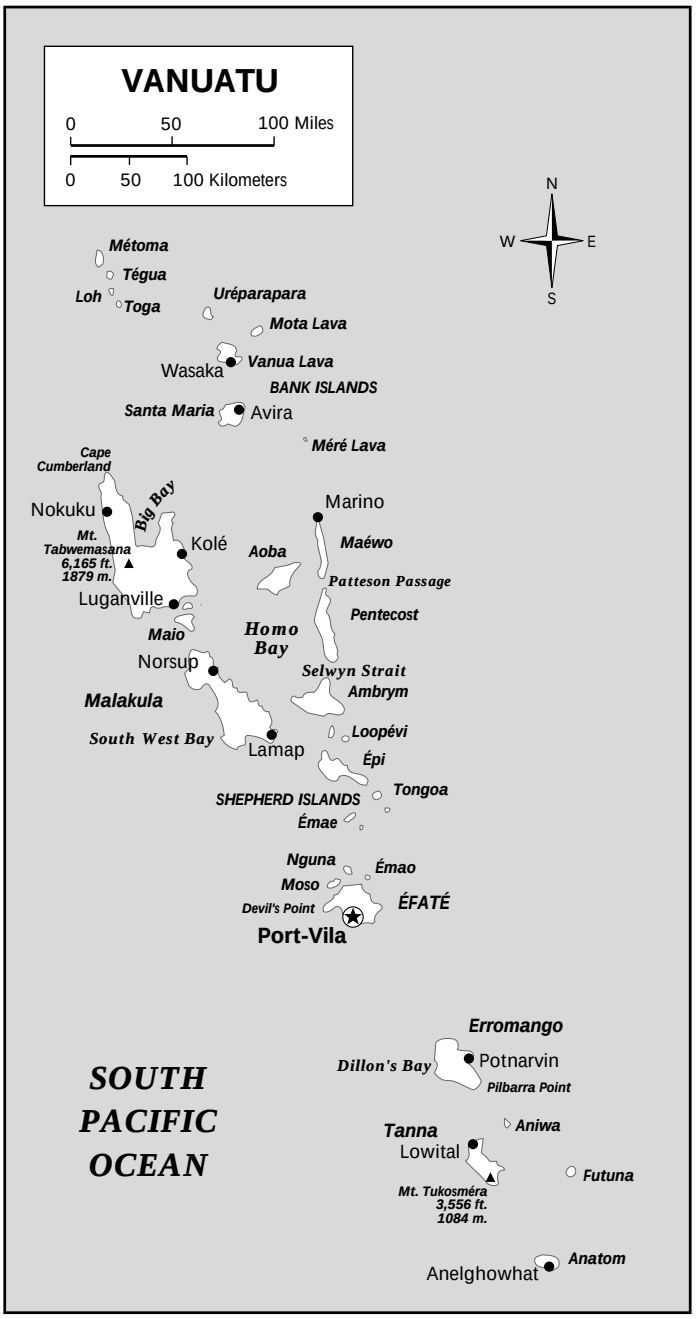
Avg. inflation rate: (2006) 1.8%.

Natural resources: Forests, agricultural land, marine resources.

Agriculture: Products—copra, cocoa, coffee, cattle, timber.

Industry: Types—copra production, beef processing, sawmilling, tourism, financial services.

Trade: (2003) Exports—$135.27 million: coconut oil, copra, kava, beef. Major markets—EU 44.9%, Australia 12.1%, Japan 6.8%, New Caledonia 4.6%. Imports—$181.4 million: machines and transport equipment, food and live animals, basic manufactures, mineral fuels. Major suppliers—Australia 42.5%, New Zealand 13.0%, Fiji 8.6%, Singapore 6.2%.



Exchange rate: (2005 avg.) 109.25 vatu=U.S.$1.

GEOGRAPHY

Vanuatu is a 'Y' shaped archipelago of 83 islands. It is located about 1,750 kilometers east of Australia. Fiji lies to the east, New Caledonia to the south, and the Solomon Islands to the northwest, all within the area of the South Pacific called Melanesia.

The two largest islands, Espiritu Santo (or Santo) and Malakula, account for nearly one-half of the total land area. They are volcanic, with sharp mountain peaks, plateaus, and lowlands. The larger islands of the remaining half also are

volcanic but are overlaid with limestone formations; the smaller ones are coral and limestone. Volcanic activity is common with an ever-present danger of a major eruption, the last of which occurred in 1945. Rainfall averages about 2,360 millimeters (94 in.) per year but can be as high as 4,000 millimeters (160 in.) in the northern islands.

PEOPLE

The population of Vanuatu is 94% indigenous Melanesian. About 33,700 live in the capital, Port Vila. Another 10,700 live in Luganville (or Santo Town) on Espiritu Santo. The remainder live in rural areas. Approximately 2,000 ni-Vanuatu live and work in New Caledonia. Although local pidgin, called Bislama, is the national language, English and French also are official languages. Indigenous Melanesians speak 105 local languages.

Christianity has had a profound influence on ni-Vanuatu society, and an estimated 90% of the population is affiliated with one of the Christian denominations. The largest denominations are Presbyterian, Roman Catholic, and Anglican. John Frum, a syncretic sect, also is important on Tanna Island.

HISTORY

The prehistory of Vanuatu is obscure; archaeological evidence supports the commonly held theory that peoples speaking Austronesian languages first came to the islands some 4,000 years ago. Pottery fragments have been found dating back to 1300-1100 B.C.

The first island in the Vanuatu group discovered by Europeans was Espiritu Santo, when in 1606 the Portuguese explorer, Pedro Fernandez De Quiros, spied what he thought was a southern continent. Europeans did not return until 1768, when Louis Antoine de Bougainville rediscovered the islands. In 1774, Captain Cook named the islands the New Hebrides, a name that lasted until independence.

In 1825, trader Peter Dillon's discovery of sandalwood on the island of Erromango began a rush that ended in 1830 after a clash between immigrant Polynesian workers and indigenous Melanesians. During the 1860s, planters in Australia, Fiji, New Caledonia, and the Samoa Islands, in need of laborers, encouraged a long-term indentured labor trade called "blackbirding." At the height of the labor trade, more than one-half the adult male population of several of the Islands worked abroad. Fragmentary evidence indicates that the current population of Vanuatu is greatly reduced compared to pre-contact times.

It was at this time that missionaries, both Catholic and Protestant, arrived on the islands. Settlers also came, looking for land on which to establish cotton plantations. When international cotton prices collapsed, they switched to coffee, cocoa, bananas, and, most successfully, coconuts. Initially, British subjects from Australia made up the majority, but the establishment of the Caledonian Company of the New Hebrides in 1882 soon tipped the balance in favor of French subjects. By the turn of the century, the French outnumbered the British two to one.

The jumbling of French and British interests in the islands brought petitions for one or another of the two powers to annex the territory. In 1906, however, France and the United Kingdom agreed to administer the islands jointly. Called the British-French Condominium, it was a unique form of government, with separate governmental systems that came together only in a joint court. Melanesians were barred from acquiring the citizenship of either power.

Challenges to this form of government began in the early 1940s. The arrival of Americans during World War II, with their informal demeanor and relative wealth, was instrumental in the rise of nationalism in the islands. The belief in a mythical messianic figure named John Frum was the basis for an indigenous cargo cult (a movement attempting to obtain industrial goods through magic) promising Melanesian deliverance. Today, John Frum is both a religion and a political party with a member in Parliament.

The first political party was established in the early 1970s and originally was called the New Hebrides National Party. One of the founders was Father Walter Lini, who later became Prime Minister. Renamed the Vanua'aku Pati in 1974, the party pushed for independence; in 1980, the Republic of Vanuatu was created.

GOVERNMENT

The constitution created a republican political system headed by a president who has primarily ceremonial powers and is elected by a two-thirds majority in an electoral college consisting of members of Parliament and the presidents of Regional Councils. The president serves a 5-year term. The president may be removed by the Electoral College for gross misconduct or incapacity. The prime minister, who is the head of government, is elected by a majority vote of a three-fourths quorum of the Parliament. The prime minister in turn appoints the Council of Ministers, whose number may not exceed one-fourth of the number of parliamentary representatives. The prime minister and the Council of Ministers constitute the executive government.

Parliament is a 52-member unicameral house elected by all persons over 18 years old. Parliament normally sits for a 4-year term unless dissolved by majority vote of a three-fourths quorum or a directive from the president on the advice of the prime minister. The national Council of Chiefs, called the Malvatu Mauri and elected by district councils of chiefs, advises the government on all matters concerning ni-Vanuatu culture and language.

The Supreme Court consists of a chief justice and up to three other judges. Two or more members of this court may constitute a Court of Appeal. Magistrate courts handle most routine legal matters. The legal system is based on British law. The constitution also provides for the establishment of village or island courts presided over by chiefs to deal with questions of customary law.

Principal Government Officials

Last Updated: 11/12/08

President: **Kalkot Matas KELEKELE**
Prime Minister: **Ham LINI**
Dep. Prime Min.: **Sato KILMAN**
Min. of Agriculture, Forestry, & Fisheries: **Barak SOPE Ma'au Tamate**
Min. of the Comprehensive Reform Program: **Isabelle DONALD**
Min. of Education: **Joseph NATUMAN**
Min. of Finance & Economic Development: **Moana CARCASSES**
Min. of Foreign Affairs: **Sato KILMAN**
Min. of Health: **Morkin Iatika STEVENS**
Min. of Internal Affairs: **Georges Andre WELLS**
Min. of Lands, Geology, & Mines: **Willie Jimmy TAPANGARARUA**
Min. of Ni-Vanuatu Business Development: **Joshua KALSAKAU**
Min. of Public Utilities: **Edward NATAPEI**
Min. of Trade, Commerce, & Industries: **James BULE**
Min. of Youth & Sports: **Arnold PRASAD**
Permanent Representative to the UN, New York:

Vanuatu does not have an embassy in Washington. Its mission to the United Nations is located at 866 UN Plaza, 4th Floor, Room 41, First Avenue and 48th Street, New York, NY 10017. Vanuatu Maritime Services, which provides information on ship registration in Vanuatu, is located at 120 Broadway, Suite 1743, New York, NY 10271.

POLITICAL CONDITIONS

Government and society in Vanuatu tend to divide along linguistic—French and English—lines. Historically, English-speaking politicians such as Walter Lini and other leaders of the Vanua'aku Pati favored early independence, whereas French-speaking political leaders favored continuing association with the colonial administrators, particularly France.

On the eve of independence in 1980, Jimmy Stevens' Nagriamel movement, in alliance with private French interests and backed by American libertarians hoping to establish a tax-free haven, declared the island of Espiritu Santo independent of the new government. Following independence, Vanuatu requested assistance from Papua New Guinea, whose forces restored order on Santo. From then until 1991, the Vanua'aku Pati and its predominantly English-

speaking leadership controlled the Vanuatu Government, and Walter Lini became widely considered as the nation's founding father.

In December 1991, and following a split in the Vanua'aku Pati, Maxime Carlot Korman, leader of the Francophone Union of Moderate Parties (UMP), was elected Vanuatu's first Francophone prime minister. He formed a coalition government with Walter Lini's breakaway VP faction, now named the National United Party (NUP). From 1995-2004 government leadership changed frequently due to unstable coalitions within the Parliament and within the major parties.

The president dissolved Parliament in May 2004 to forestall a vote of no confidence and called a special election that resulted in losses for most major parties. UMP's leader, Serge Vohor, returned as Prime Minister at the head of an unwieldy coalition government. Following controversy over Vohor's attempt to extend diplomatic relations to Taiwan, he was ousted by a vote of no confidence in December 2004 and replaced by Ham Lini, brother of Walter Lini. The new coalition includes ten parties and features the former opposition leader, Sato Kilman, as Deputy Prime Minister/ Foreign Minister.

Elections were held on September 2, 2008, and a seven-party coalition elected Edward Natapei as Prime Minister with the former Prime Minister, Ham Lini, as Deputy Prime Minister.

ECONOMY

Vanuatu's economy is primarily agricultural; 80% of the population is engaged in agricultural activities that range from subsistence farming to smallholder farming of coconuts and other cash crops. Copra is by far the most important cash crop (making up more than 35% of the country's exports), followed by timber, beef, and cocoa. Kava root extract exports also have become important. In addition, the government has maintained Vanuatu's preindependence status as a tax haven and international off-shore financial center. About 2,000 registered institutions offer a wide range of offshore banking, investment, legal, accounting, and insurance and trust-company services. Vanuatu also maintains an international shipping register in New York City. In 2002, following increasing international concern over money laundering, Vanuatu increased oversight and reporting requirements for its off-shore sector.

Coconut oil, copra, kava and beef account for more than 75% of Vanuatu's total agricultural exports and agriculture accounts for approximately 20% of GDP. Tourism is a key driver of the economy and contributed 20% of GDP in 2006.

Vanuatu claims an exclusive economic zone of 735,893 square kilometers and possesses substantial marine resources. Currently, only a limited number of ni-Vanuatu are involved in fishing, while foreign fleets exploit this potential.

Vanuatu's economic growth of 3.4% in 2006 was broad-based and highly driven by the services sector especially tourism. Other sectors which contributed significantly were construction (15.7%), wholesale and retail sector (12.4%), and the real estate and business service sector (11.2%). The agricultural sector showed improved performance due to better domestic prices for copra. Other sectors including cocoa, beef, and kava continued to support the growth.

The Recognized Seasonal Employer (RSE) program is an agreement that allows unskilled Vanuatu laborers, such as fruit pickers and farm workers, to work in New Zealand. Starting from June 2007, RSE is anticipated to bring over 20 million vatu into Vanuatu's economy.

FOREIGN RELATIONS

Vanuatu maintains relations with more than 65 countries, including Russia, the People's Republic of China, Cuba, and Vietnam. However, only Australia, France, New Zealand, and the People's Republic of China maintain embassies, high commissions, or missions in Port Vila.

The government's main concern has been to bolster the economy. In keeping with its need for financial assistance, Vanuatu has joined the Asian Development Bank, the World Bank, the International Monetary Fund, and the Agence de Cooperation Culturelle et Technique.

The government encourages private enterprise, foreign investment, and producer cooperatives. Like other developing countries, Vanuatu is particularly interested in enterprises that add value to local primary products and that provide employment. In less lucrative sectors, the government sets up its own production companies or enters joint ventures with foreign investors.

Since 1980, Australia, the United Kingdom, France, and New Zealand have provided the bulk of Vanuatu's development aid. A number of other countries, including Japan, Canada, Germany, and various multilateral organizations, such as the Economic and Social Council for Asia and the Pacific, the UN Development Program, the Asian Development Bank, the European Economic Community, and the Commonwealth Development Corporation also provide developmental aid. The United States, Canada, Australia, New Zealand, the United Kingdom, and Japan also send volunteers. In March 2006 the United States Millennium Challenge Corporation signed a five-year $65.69 million Compact agreement with Vanuatu. Vanuatu retains strong economic and cultural ties to Australia, New Zealand, and France.

Membership in International Organizations

Vanuatu is a member of the United Nations and its specialized and related agencies, including the World Bank and the International Monetary Fund; Secretariat of the Pacific

Community (SPC); Pacific Islands Forum (PIF); Non-Aligned Movement; Commonwealth, Group of 77; and Asian Development Bank (ADB).

U.S.-VANUATU RELATIONS

The United States and Vanuatu established diplomatic relations in 1986. Between 1977 and 1987, Vanuatu received just under $3 million from the U.S. Agency for International Development (USAID), including projects focusing on assisting the transition to indigenous plantation management. In June 1994, the regional USAID office located in Suva, Fiji, was closed due to U.S. Government budgetary cutbacks. The U.S. military retains training links and conducts ad hoc assistance projects in Vanuatu.

In March 2006 the United States Millennium Challenge Corporation signed a five-year $65.69 million Compact agreement with Vanuatu. The Millennium Challenge Program is expected to increase average income per capita by 15% within five years and directly impact the lives of more than 65,000 of the rural poor in Vanuatu.

Vanuatu identified costly and unreliable transportation infrastructure as a major impediment to economic growth. To overcome this constraint, the Compact consists of up to eleven infrastructure projects—including roads, wharfs, an airstrip and warehouses—that will help poor, rural agricultural producers and providers of tourist related goods and services reduce transportation costs and improve access to transportation services. The Compact also includes institutional strengthening efforts and policy reform initiatives in Vanuatu's Public Works Department, including: provision of plant and equipment for maintenance; introduction of service performance contracts; establishment of local community maintenance schemes; and introduction of user fees.

The United States also remains a major financial contributor to international and regional organizations that assist Vanuatu, including the World Bank, UNICEF, WHO, the UN Fund for Population Activities, and the Asian Development Bank.

In 1989, the United States concluded a Peace Corps agreement with Vanuatu. The Peace Corps has met with a warm welcome there and currently has over 80 volunteers in-country. The United States also provides security training assistance.

TRAVEL

Consular Information Sheet

July 18, 2008

Country Description: Vanuatu consists of more than 80 islands in a Y-shaped archipelago, 1300 miles northeast of Sydney, Australia. It is an independent parliamentary democracy and a member of the British Commonwealth, with a primarily agricultural economy. Tourist facilities are limited outside the capital, Port Vila, which is located on the Island of Efate. The National Tourism Office of Vanuatu can be contacted at PO Box 209, Port Vila, Vanuatu, telephone (678) 22515, 22685, 22813, fax (678) 23889, e-mail: tourism@vanuatu.com.vu.

Entry Requirements: A valid passport, and onward/return ticket and proof of sufficient funds are required. Visas are not required for stays up to 30 days. For further information on entry requirements, particularly those planning to enter by a sailing vessel, please contact the Vanuatu Mission to the United Nations at 42 Broadway, Suite 1200-18, New York, NY 10004, tel. (212) 425-9600, fax (212) 425-9652, e-mail: vmsnyc@attglobal.net.

Travelers who plan to transit or visit Australia must enter with an Australian visa or, if eligible, through Electronic Travel Authority (ETA). The ETA replaces a visa and allows a stay of up to three months. It may be obtained for a small service fee at http://www.eta.immi.gov.au. Airlines and many travel agents in the United States are also able to issue ETA's. Travelers may obtain more information about the ETA and Australian entry requirements from the Australian Embassy at 1601 Massachusetts Ave. NW, Washington, DC 20036, tel. (202) 797-3000, or via the Australian Embassy's web site at http://www.austemb.org.

Safety and Security: Civil disorder is rare; however, U.S. citizens are advised to avoid public demonstrations and/or political rallies if they occur. For the latest security information, Americans traveling abroad should regularly monitor the Department of State, Bureau of Consular Affairs' web site at http://travel.state.gov, where the current Travel Warnings and Travel Alerts, as well as the Worldwide Caution, can be found Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S. and Canada, or for callers outside the U.S. and Canada, a regular a regular toll line at 1-202-501-4444. These numbers are available from 8:00 a.m. to 8:00 p.m. Eastern Time, Monday through Friday (except for U.S. federal holidays).

Crime: Although violent crime is extremely rare in Vanuatu, burglary reports have been on the rise. Tourists, therefore, should take reasonable precautions to avoid exposing themselves to undue risk. There are higher risks for women of being a victim of sexual assault or harassment in Vanuatu, so it is therefore advisable that women travelers not travel alone.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the U.S. Embassy in Port Moresby. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the U.S. Embassy in Port Moresby for assistance. The Embassy staff can assist you to find appropriate medical care, to contact family members or friends, and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney, if needed.

The local equivalent to the "911" emergency line in Vanuatu is 112.

Natural Disasters: Vanuatu is prone to earthquakes, volcanic eruptions, sudden tidal movements, tropical storms, and cyclones. The Pacific cyclone season lasts from November through April. While local media and hotels will convey cyclone alerts issued by local authorities. Detailed weather information is published by Météo-France in New Caledonia at http://www.meteo.nc/, the Fiji Meteorological Service at http://www.meteo.nc/ and the Naval Pacific Meteorology and Oceanography Center at https://metocph.nmci.navy.mil/jtwc.php.

Volcanoes/Earthquakes: Vanuatu has many active volcanoes whose risk levels can change on a daily basis. Travelers to areas where there are volcanoes can contact the Department of Geology and Mines at 22423 to obtain information about the activity of a volcano. Detailed information about earthquakes is available from the National Earthquake Information Center of the United States Geological Survey at http://earthquake.usgs.gov/regional/neic. The country is situated in an active seismic zone and earthquakes are relatively common, sometimes followed by tsunamis. You should contact the Vanuatu Tourism Office prior to traveling to areas where volcanic activity may occur. If a natural disaster occurs, follow the advice of local authorities. General information about natural disaster preparedness is available via the Internet from the U.S. Federal Emergency Management Agency (FEMA) at http://www.fema.gov.

Medical Facilities and Health Information: Medical facilities are limited. The nearest reliable medical treatment is in Australia or New Zealand. There are two hyperbaric recompression chambers in Vanuatu; one in Luganville, on Espiritu Santo Island, and the other in Port Vila. Please note, however, that diving-related injuries may require medical evacuation to Australia or New Zealand. There is a paramedic service in Vanuatu called ProMedical, which is manned by Australian and New Zealand personnel. They also handle any medical evacuations. Malaria is prevalent in some areas. Serious injuries requiring hospitalization and/or medical evacuation to the United States or elsewhere can cost thousands of dollars). Doctors and hospitals often expect immediate cash payment for their services.

Pharmacies in Vanuatu are found only in urban centers and at missionary clinics. They are small and may be inadequately stocked. Travelers should bring adequate supplies of their medications for their stay in Vanuatu.

Travelers who anticipate the possible need for medical treatment in Australia should obtain entry permission for Australia in advance. Entry permission for Australian can be granted by the Australian High Commission in Port Vila, but it may be easier to obtain a visa or ETA prior to leaving the United States.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's web site at http://wwwn.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith/en.

The U.S. Department of State is unaware of any HIV/AIDS entry restrictions for visitors to or foreign residents of Vanuatu. The Government of Vanuatu does not impose any entry restrictions for persons with the HIV/AIDS virus, as long as they include the information on the arrival form.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Vanuatu is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

Vehicular traffic in Vanuatu moves on the right. Travel on highways outside of major towns can be hazardous. Drivers and passengers are advised to wear seatbelts. There is no country-wide road network; roads are generally in poor repair. Vanuatu is a chain of islands and atolls; most long-distance travel is by air or sea. Only the capital city of Port Vila (on Efate Island) and the town of Luganville (on Espiritu Santo Island) have consistently paved roads, which have a maximum speed limit of 50 kilome-

ters per hour. These paved roads can be quite narrow in spots; drivers should take care especially at night or along unfamiliar routes. The roads in all other areas are mostly unpaved or dirt tracks. Drivers on all roads should give way to traffic coming from the right, and to traffic coming from the left at a round-about. Travelers must take care when driving off main roads to avoid trespassing on communal land.

For specific information concerning Vanuatu driving permits, vehicle inspection, road tax and mandatory insurance, please contact the National Tourism Office of Vanuatu or the Vanuatu Mission to the United Nations at vmsnyc@attglobal.net.

Aviation Safety Oversight: As there is no direct commercial air service between the United States and Vanuatu, the U.S. Federal Aviation Administration (FAA) has not assessed Vanuatu's Civil Aviation Authority for compliance with ICAO international aviation safety standards. For more information, travelers may visit the FAA's web site at http://www.faa.gov.

Special Circumstances: Vanuatu and Australian customs authorities may enforce strict regulations concerning temporary importation into or export from Vanuatu of items such as firearms, certain prescription drugs, wooden artifacts, exotic animals, food, and sexually explicit material. Other products may be subject to quarantine. It is advisable to contact the Vanuatu Mission to the United Nations at 42 Broadway, Suite 1200 18, New York, NY 10004, tel. (212) 425-9600, fax (212) 425-9652, e-mail: vmsnyc@attglobal.net, and the Australian Embassy for specific information regarding customs requirements.

U.S. citizens are encouraged to carry a copy of their U.S. passports with them at all times, so that, if questioned by local officials, proof of identity and U.S. citizenship is readily available.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating Vanuatu's laws, even unknowingly, may be expelled, arrested, or imprisoned. Penalties for possession of, use of, or trafficking in illegal drugs in Vanuatu are strict and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: The U.S. Embassy in Papua New Guinea provides primary assistance for U.S. citizens in Vanuatu. The Embassy is located on Douglas Street, adjacent to the Bank of Papua New Guinea, in Port Moresby. Use that address for courier service deliveries. The mailing address is PO Box 1492, Port Moresby, N.C.D. 121, Papua New Guinea; the telephone number is (675) 321-1455; after hours duty officer telephone number is (675) 683-7943; Fax (675) 321-1593. American citizens may submit consular inquiries via e-mail to ConsularPortMoresby@state.gov. Other inquires may be e-mailed to our Virtual Embassy Officer (VEO) at USVPPVanuatu@state.gov. For additional information, and to download forms, please refer to our virtual embassy at www.usvpp-vanuatu.org.

Americans living or traveling in Vanuatu are encouraged to register with the U.S. Embassy in Port Moresby through the State Department's travel registration web site, https://travelregistration.state.gov, and to obtain updated information on travel and security within Vanuatu. Americans without Internet access may register directly with the Embassy. By registering, American citizens make it easier for the Embassy to contact them in case of emergency.

Intercountry Adoption

September 2006

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is based on public sources and current understanding. Questions involving foreign and U.S. immigration laws and legal interpretation should be addressed respectively to qualified foreign or U.S. legal counsel.

Patterns of Immigration: Recent U.S. immigrant visa statistics indicate that only one orphan from Vanuatu has received an adoption-based immigrant visa within the past five years.

Adoption Authority: Vanuatu courts oversee the adoption system. The court system may be reached by phone at (678) 22420.

Eligibility Requirements for Adoptive Parents: Prospective adoptive parents must be 18 years of age or older and can be either single or married. Although there are no income requirements, prospective adoptive parents must satisfy the Vanuatu courts that they are financially secure.

Residency Requirements: Although prospective adoptive parents do not need to be permanent residents of Vanuatu, they must remain in Vanuatu for the three-to-four-month period it takes for an adoption to be finalized.

Time Frame: Per above, the estimated time for an adoption to be processed is about 3 to 4 months.

Adoption Agencies and Attorneys: There are no adoption agencies in Vanuatu. However, American prospective adoptive parents may still wish to enlist the services of an American adoption agency to assist them with the overall intercountry adoption process.

Adoption Fees: American prospective adoptive parents should expect to pay less than $100 in Vanuatu government fees related to processing an adoption. It may or may not be necessary for prospective parents to pay additional fees to lawyers, depending on the services rendered.

Adoption Procedures: Applications for adoption are obtained from and must be submitted when completed to the Courthouse in Port Vila (Vanuatu's capital).

Courthouse in Port Vila,
Private Mail Bag 9041,
Port Vila, Vanuatu,
Telephone—(678) 22420.

Required Documents: When submitted to the Vanuatu court, the adoption dossier must contain:

- A completed adoption application;
- Child's birth certificate;
- Bank statements for the prospective adoptive parents; and
- Prospective adopting parents' marriage license (or proof of single status).

Vanuatu Mission to the United Nations
42 Broadway,
Suite 1200-18,
New York, NY 10004,
Tel. (212) 425-9600,
Fax (212) 425-9652,
E-mail: vmsnyc@attglobal.net.

U.S. Immigration Requirements: Prospective adopting parents are strongly encouraged to consult USCIS publication M-249, *The Immigration of Adopted and Prospective Adoptive Children*, as well as the Department of State publication, *Intercountry Adoptions*. Please see the *Intercountry Adoption* section of this book for more details and review current reports online at http://adoption.state.gov.

U.S. Embassy, Port Moresby, Papua New Guinea
Douglas Street,
P.O. Box 1492,
Port Moresby, N.C.D. 121,
Papua New Guinea
Telephone—(675) 321-1455;
Fax—(675) 321-1593.
E-mail—
ConsularPortMoresby@state.gov.

Additional Information: Specific questions about adoption in Vanuatu or immigrant visas for adopted children from Vanuatu may be addressed to the U.S. Embassy in Papua New Guinea at the address, phone number and e-mail address listed above. General questions regarding intercountry adoption may be addressed to the Office of Children's Issues, U.S. Department of State, CA/OCS/CI, SA-29, 4th Floor, 2201 C Street, NW, Washington, D.C. 20520-4818, toll-free Tel: 1-888-407-4747.

VENEZUELA

Compiled from the June 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Bolivarian Republic of Venezuela

PROFILE

Geography

Area: 912,050 sq. km. (352,143 sq. mi.); slightly more than twice the size of California.

Cities: Capital—Caracas (metro. area pop. 3.6 million, 2004 est.). Other major cities—Maracaibo, Valencia, Barquisimeto, Maracay, Merida, Ciudad Bolivar.

Terrain: Andes Mountains and Maracaibo Lowlands in northwest; central plains; Guiana Highlands in southeast.

Climate: Varies from tropical to temperate, depending on elevation.

People

Nationality: Noun and adjective—Venezuelan(s).

Population: (May 2008 est.) 27,874,747.

Annual population growth: 1.6%.

Religions: Roman Catholic 96%, Protestant 2%, other 2%

Languages: Spanish (official), numerous indigenous dialects.

Education: Years compulsory—9. Literacy—95%

Health: Infant mortality rate—22.02 deaths/1,000 live births. Life expectancy—73.38 yrs.

Ethnic groups: Spanish, Italian, Portuguese, Arab, German, African, Amerindian.

Government

Type: Federal Republic.

Independence: July 5, 1811.

Constitution: December 30, 1999.

Government branches: Executive—President (head of government and chief of state; 6-year term); Council of Ministers (cabinet, appointed by president). Legislative—unicameral Congress (5-year term). Judicial—32-member Supreme Court (elected by Congress; 12-year term). Electoral—National Electoral Council (elected by Congress; 7-year term). Citizen Power—Attorney General, Ombudsman, Comptroller General (elected by Congress; 7-year term).

Political subdivisions: 23 states, one federal district (Caracas), and one federal dependency (72 islands).

Political parties: United Socialist Party of Venezuela (PSUV), Fifth Republic Movement or Movimiento V Republica (MVR), Democratic Action or Accion Democratica (AD), Christian Democrats or Comite Organizador Politico por Elecciones Independientes (COPEI), Homeland for All or Patria Para Todos (PPT), Movement to Socialism or Movimiento al Socialismo (MAS), Radical Cause or La Causa R, First Justice or Primero Justicia, and the National Convergence or Convergencia.

Suffrage: Universal, age 18 and over.

Economy

GDP: (2007) $227 billion.

Annual growth rate: (2007) 8.3%.

GDP per capita: (2007) $8,140.

Government expenditures: 32% of GDP.

Natural resources: Petroleum, natural gas, coal, iron ore, gold, diamonds, bauxite, other minerals, hydroelectric power.

Petroleum industry: (28% of GDP) Oil refining, petrochemicals.

Manufacturing: (17% of GDP) Types—iron and steel products, paper products, aluminum, textiles, transport equipment, consumer products.

Agriculture: (4% of GDP) Products—corn, sorghum, rice, bananas, vegetables, coffee, beef, pork, milk, eggs, fish.

Trade: Exports (2007)—$69.2 billion: petroleum ($62.5 billion), aluminum, steel, chemical products, iron ore, cigarettes, plastics, fish, cement, and paper products. Major markets (2005)—U.S. 57.5%, the Netherlands 5.2%, Mexico, 4.5%, Colombia 4.5%. Imports (2007)—$45.5 billion: consumer goods, machinery and transport equipment, manufactured goods, construction materials. Major suppliers (2006)—U.S. 30.2%, Brazil 10.1%, Colombia 9.9%, Mexico 6.8%, China 6.7%.

Exchange rate: (May 2008) 2,145 bolivars=U.S. $1.

PEOPLE

An estimated 27.9 million people lived in Venezuela as of 2008. The population is young, growing, and urbanized. The population growth rate is 1.6% per year, and roughly 50% of Venezuelans are under the age of 25. According to the 2001 census, almost 90% of the population lives in urban areas. Metropolitan Caracas, the country's largest city, has an estimated 3.2 million inhabitants. Venezuela is proud of its tradition as a melting pot, and the majority of its citizens have a mixed racial heritage of Caucasian, African, and American Indian elements.

HISTORY AND POLITICAL CONDITIONS

At the time of Spanish discovery, the indigenous in Venezuela were mainly agriculturists and hunters living in groups along the coast, the Andean mountain range, and the Orinoco River. The first permanent Spanish settlement in South America—Nuevo Toledo—was established in Venezuela in 1522. Venezuela was a relatively neglected colony in the 1500s and 1600s as the Spaniards focused on extracting gold and silver from other areas of the Americas.

Toward the end of the 18th century, the Venezuelans began to grow restive under colonial control. In 1821, after several unsuccessful uprisings, the country succeeded in achieving independence from Spain, under the leadership of its most famous son, Simon Bolivar. Venezuela, along with what are now Colombia, Panama, and Ecuador, was part of the Republic of Gran Colombia until 1830, when Venezuela separated and became a separate sovereign country.

Much of Venezuela's 19th-century history was characterized by periods of political instability, dictatorial rule, and revolutionary turbulence. The first half of the 20th century was marked by periods of authoritarianism—including dictatorships from 1908-35 and from 1950-58. In addition, the Venezuelan economy shifted after the first World War from a primarily agricultural orientation to an economy centered on petroleum production and export.

Since the overthrow of Gen. Marcos Perez Jimenez in 1958 and the military's withdrawal from direct involvement in national politics, Venezuela has enjoyed an unbroken tradition of civilian democratic rule. This earned Venezuela a reputation as one of the more stable democracies in Latin America. Until the 1998 elections, the Democratic Action (AD) and the Christian Democratic (COPEI) parties dominated the political environment at both the state and federal level.

The Caracazo and Popular Dissatisfaction

Venezuela's prevailing political calm came to an end in 1989, when Venezuela experienced riots in which more than 200 people were killed in Caracas. The so-called Caracazo was a response to an economic austerity program launched by then-President Carlos Andres Perez. Three years later, in February 1992, a group of army lieutenant colonels led by future President Hugo Chavez mounted an unsuccessful coup attempt, claiming that the events of 1989 showed that the political system no longer served the interests of the people. A second, equally unsuccessful coup attempt by other officers followed in November 1992. A year later, Congress impeached Perez on corruption charges.

Deep popular dissatisfaction with the traditional political parties, income disparities, and economic difficulties were some of the major frustrations expressed by Venezuelans following Perez's impeachment. In December 1998, Hugo Chavez Frias won the presidency on a campaign for broad reform, constitutional change, and a crackdown on corruption.

Constitutional Reforms

Current President Hugo Chavez was elected in 1998 on a platform that called for the creation of a National Constituent Assembly in order to write a new constitution for Venezuela. Chavez's argument that the existing political system had become isolated from the people won broad acceptance, particularly among Venezuela's poorest classes, who had seen a significant decline in their living standards over the previous decade and a half. The National Constituent Assembly (ANC), consisting of 131 elected individuals, convened in August 1999 to begin rewriting the Constitution. In free elections, voters gave all but six seats to persons associated with the Chavez movement. Venezuelans approved the ANC's draft in a national referendum on December 15, 1999. The political system described below is that defined by the 1999 Constitution.

The president is elected by a plurality vote with direct and universal suffrage. The term of office is 6 years, and a president may be re-elected to a single consecutive term. The president appoints the vice president. He decides the size and composition of the cabinet and makes appointments to it with the involvement of the National Assembly. Legislation can be initiated by the executive branch, the legislative branch (either a committee of the National Assembly or three members of the latter), the judicial branch, the citizen branch (ombudsman, public prosecutor, and controller general) or a public petition signed by no fewer than 0.1% of registered voters. The president can ask the National Assembly to reconsider portions of laws he finds objectionable, but a simple majority of the Assembly can override these objections.

The National Assembly is unicameral, consisting solely of the Chamber of Deputies. Deputies serve 5-year terms, and may be re-elected for a maximum of two additional terms. These legislative agents are elected by a combination of party list and single member constituencies. When the Congress is not in session, a delegated committee acts on matters

relating to the executive and in oversight functions. In December 2005 pro-government parties took all 167 seats in the National Assembly after opposition parties boycotted the election over concerns with electoral conditions.

The Constitution designates three additional branches of the federal government—the judicial, citizen, and electoral branches.

The judicial branch is headed by the Supreme Tribunal of Justice (TSJ), which may meet either in specialized chambers (of which there are six) or in plenary session. The justices are appointed by the National Assembly and serve 12-year terms. Under the 1999 Constitution, the Supreme Tribunal of Justice is composed of 20 justices. The 1999 Constitution was amended in 2004, and the total number of justices was expanded by 12 to a total of 32. In December 2004, the National Assembly selected new judges to fill the expansion. The judicial branch also consists of lower courts, including district courts, municipal courts, and courts of first instance.

The citizens branch consists of three components—the attorney general ("fiscal general"), the "defender of the people" or ombudsman, and the comptroller general. The holders of these offices, in addition to fulfilling their specific functions, also act collectively as the "Republican Moral Council" to challenge before the Supreme Tribunal of Justice actions they believe are illegal, particularly those which violate the Constitution. The holders of the "citizen power" offices are selected for terms of 7 years by the National Assembly.

The "Electoral Power," otherwise known as the National Electoral Council (Consejo Nacional Electoral or CNE), is responsible for organizing elections at all levels. Its five mem-

bers are also elected to 7-year terms by the National Assembly. In the event of a hung vote in the National Assembly, the Supreme Tribunal of Justice can be called on to appoint the members.

Political Turmoil

In July 2000, following a long and controversial process, voters re-elected President Hugo Chavez of the Fifth Republic Movement (MVR) in generally free and fair national and local elections. The MVR and pro-Chavez Movimiento a Socialismo (MAS) party won 92 seats in the 165-member legislature. Subsequent party splits reduced the pro-Chavez members to 84 seats. In April 2002, the country experienced a temporary alteration of constitutional order. When an estimated 400,000 to 600,000 persons participated in a march in downtown Caracas to demand President Chavez' resignation, gunfire broke out, resulting in as many as 18 deaths and more than 100 injuries on both sides. Military officers took President Chavez into custody, and business leader Pedro Carmona swore himself in as interim President. On April 14, military troops loyal to Chavez returned him to power. A national reconciliation process, with participation by the Organization of American States, the UN Development Program, and the Carter Center, was unsuccessful in stopping further conflict. Opposition leaders called a national work stoppage on December 2, 2002. Strikers protested the government and called for the resignation of President Chavez. The oil sector joined other sectors of the economy and effectively shut down all economic activity for a month. The OAS Permanent Council passed Resolution 833 on December 16, 2002, calling for a "constitutional, democratic, peaceful, and electoral solution" to the crisis in Venezuela. The strike formally ended in February 2003 as political opponents of Chavez sought a recall referendum to revoke the mandate of the president.

The Referendum Process

In September 2003, after an impasse in the National Assembly, the Supreme Court named a new board of directors for the National Electoral Council (CNE). After months of intense deliberations that included two conflictive signature drives overseen by the CNE, political riots over the government's disqualification of questionable signatures, and the intervention of international electoral observers, the CNE certified the opposition's results and set the date of the recall referendum for August 15, 2004. According to the CNE, President Chavez won 59% of the vote.

His opponents immediately contested that the results of the referendum were marked by electoral fraud. However, international electoral observation missions carried out by the Organization of American States and the Carter Center found no indication of systemic fraud.

From Referendum to Elections

In the wake of the referendum victory, Pro-Chávez candidates continued to sweep other electoral contests. Chávez supporters won 20 out of the total 22 state governor positions up for election in October 2004 (there are currently two opposition governors). Chavez supporters also won a majority of the seats in the August 2005 municipal council (parroquias) elections. Pro-Chávez parties won all 167 seats in the December 2005 National Assembly elections, after most opposition candidates withdrew one week before the elections over voter secrecy concerns.

The final reports of the EU and OAS observer missions to the 2005 legislative elections, which were marked by record-high abstention, noted high levels of distrust in electoral institutions. The reports made specific recommendations to increase transparency and help voters regain the confidence necessary for participation. Most of the recommendations were not implemented. As a signatory of the Inter-American Democratic Charter, Venezuela has an obligation to hold "periodic, free, and fair elections based on secret balloting and universal suffrage."

A New Term and New Administration

President Chavez was re-elected by an overwhelming majority (63%) in the December 3, 2006, presidential elections. He defeated Zulia Governor Manuel Rosales, whose Un Nuevo Tiempo (UNT) party formed an alliance with several key opposition parties. Though international observers found no evidence of fraud on election day, they did note concerns over abuse of government resources used to support the Chavez campaign, voter intimidation tactics, and manipulation of the electoral registry.

In January 2007, President Chavez named a new Vice President (the former head of the CNE) and cabinet, drawing largely from deputies of the National Assembly. Chavez announced a renewed effort to implement his vision of "21st Century Socialism" in Venezuela. He asked the National Assembly to grant him special constitutional powers via an "enabling law" to rule by decree over a broad range of society and subsequently received those powers for a term of 18 months. He also took major steps to nationalize the telecommunications and electricity sectors, as well as to finalize a majority government share in many oil projects, all sectors with significant foreign investments.

On August 15, 2007, President Chávez proposed a package of reforms to his own 1999 Constitution, including measures that would have allowed indefinite presidential re-election, a reorganization of the geographic boundaries of government, and a redefinition of private property. On December 2, 2007, the proposed reforms were narrowly defeated in a public referendum after student groups, traditional opposition leaders, and former Chávez allies urged Venezuelans to reject the package. The vote was the first electoral loss for President Chávez since he assumed office and was viewed by

many as a rebuke of his efforts to consolidate greater power in the executive office. President Chavez has since signaled his intent to pass many of the changes defeated in the referendum by presidential decree.

Gubernatorial and mayoral elections are scheduled to be held in November 2008.

Principal Government Officials

Last Updated: 11/12/08

Pres.: **Hugo CHAVEZ Frias**
Executive Vice Pres.: **Ramon Alonzo CARRIZALEZ Rengifo**
Min. of Agriculture & Lands: **Elias JAUA Milano**
Min. of Basic Industry & Mining: **Rodolfo SANZ**
Min. of Culture: **Hector SOTO**
Min. of Defense: **Gustavo Reyes RANGEL Briceno, Gen.**
Min. of Education: **Hector NAVARRO**
Min. of Energy & Petroleum: **Rafael Dario RAMIREZ Carreno**
Min. of Environment & Natural Resources: **Yubiri del Carmen ORTEGA Lovera**
Min. of Finance: **Ali RODRIGUEZ Araque**
Min. of Foreign Affairs: **Nicolas MADURO Moros**
Min. of Health & Social Development: **Jesus MANTILLA Oliveros**
Min. of Higher Education: **Luis Augusto ACUNA Cedeno**
Min. of Housing & Habitat: **Francisco de Asis SESTO Novas**
Min. of Indigenous Peoples: **Nicia Marina MALDONADO**
Min. of Information & Communications: **Andres IZARRA**
Min. of Infrastructure: **Isidro RONDON Torres**
Min. of Interior & Justice: **Tarek El AISSAMI**
Min. of Labor & Social Security: **Roberto HERNANDEZ**
Min. of Light Industry & Commerce: **William CONTRERAS**
Min. of Nutrition: **Felix OSORIO Guzman**
Min. of Planning & Development: **Haiman EL-TROUDI**
Min. of Popular Economy: **Pedro MOREJON**
Min. of Science & Technology: **Nuris ORIHUELA**
Min. of the Secretariat of the Presidency: **Hector RODRIGUEZ**
Min. of Social Development & Popular Participation: **Erika FARIAS**
Min. of Sports: **Victoria MATA**
Min. of Telecommunications: **Socorro HERNANDEZ**
Min. of Tourism: **Olga Cecilia AZUAJE**
Min. of Women's Affairs: **Maria LEON**
Prosecutor Gen.: **Luisa ORTEGA Diaz**
Pres., Central Bank: **Gaston PARRA Luzardo**
Ambassador to the US:
Permanent Representative to the UN, New York:

The Venezuelan embassy in the United States is located at 1099 30th St. NW, Washington, DC 20007 (tel. (202) 342-2214). In addition to Washington, DC, Venezuela maintains consulates in Boston, Chicago, Houston, Miami, New Orleans, New York, San Francisco, and Puerto Rico.

ECONOMY

Real GDP increased by 8.3% in 2007. The economy recovered strongly in 2004 (18.3%), 2005 (10.3%), and 2006 (10.3%) after two consecutive years of deep economic recession (in 2003, Venezuelan GDP contracted 7.8%, after contracting 8.9% in 2002). The economic recovery has been driven by a large increase in government expenditures, based on an oil windfall, which in turn generated higher consumption levels.

The Consumer Price Index increased 18.7% in 2007, following increases of 13.7% in 2006, 16.0% in 2005, and 21.7% in 2004. Early monthly statistics suggest that annual inflation could be as high as 30% in 2008.

All foreign exchange requests must be approved by the National Exchange Control Administration (CADIVI), and the Central Bank (BCV) completes all legal purchase and sale of foreign currency. In January 2008, the Venezuelan Government adopted the "bolívar fuerte" as its new currency, effectively redenominating the previous currency, the "bolívar," by removing three zeroes (1 bolivar fuerte=1,000 bolívars). The current exchange control regime rate for U.S. dollar exchange is Bs.F. 2.145=U.S. $1.00. Unofficial exchange rates are far higher.

Central Bank-held international reserves increased to over U.S. $36 billion at the end of 2006. The reserves would have been higher, but the BCV transferred $6 billion to the National Development Fund (FONDEN) during the last quarter 2005, as directed by the Central Bank Law (July 2005) and an additional $4.3 billion in 2006.

The Venezuelan Government dominates the economy. The state oil company, PDVSA, controls the petroleum sector. Government companies control the electricity sector and important parts of the telecommunications and media sectors. In the spring of 2008, the government announced the nationalization of cement and steel producers, as well as select companies in the milk and meat distribution sectors. These and previous nationalizations, as well as other threats to property rights and an uncertain macroeconomic environment characterized by high inflation and foreign exchange controls, have led to reduced space for the private sector and low levels of private investment.

There is considerable income inequality. The Gini coefficient was 0.42 during 2007. According to government statistics, the percentages of poor and extremely poor among Venezuelan population were 27.5% and 7.6%, respectively, for the first half of 2007.

Although economic growth has been impressive, as a result of the oil windfall, many in the Venezuelan business community remain very concerned about President Chavez' vision for "21st Century Socialism" and what it portends for the private sector.

Petroleum and Other Resources

Economic prospects remain highly dependent on oil prices and the export of petroleum. In 2005, the oil sector accounted for more than 25% of GDP, 90% of export earnings, and more than half of the central government's ordinary revenues. Venezuela remains the fourth-leading supplier of imported crude and refined petroleum products to the United States.

The Venezuelan Government has sought more income from the petroleum sector. The first example was a unilateral decision in late 2004 to increase the royalty rate on production from the Orinoco heavy crude "strategic associations" with international oil companies from 1% to 16.67%.

In the 1990s, the Government of Venezuela opened up much of the hydrocarbon sector to foreign investment, promoting multi-billion dollar investment in heavy oil production, reactivation of old fields, and investment in several petrochemical joint ventures. By the late 1990s almost 60 foreign companies representing 14 different countries participated in one or more aspects of Venezuela's oil sector. On November 13, 2001, under an enabling law authorized by the National Assembly, President Chavez enacted a new Hydrocarbons Law, which came into effect in January 2002. This law replaced the Hydrocarbons Law of 1943 and the Nationalization Law of 1975. Among other things, the new law provided that all oil production and distribution activities would be the domain of the Venezuelan state, with the exception of the joint ventures targeting extra-heavy crude oil production. Under the new law, private investors cannot own 50% or more of the capital stock in joint ventures involved in upstream activities. The new law also provided that private investors could own up to 100% of the capital stock in downstream ventures. A Gaseous Hydrocarbons law promulgated earlier by the Chávez government also allowed substantial participation by private investors with respect to gas production ventures.

During the December 2002-February 2003 general strike, petroleum production and refining by PDVSA, the state-owned oil company, almost ceased. Despite the strike, these activities eventually were substantially restarted. Out of a total workforce of 45,000, over 20,000 PDVSA management and workers were subsequently dismissed because the government asserted they had abandoned their jobs during the strike. Current levels of production remain a subject of debate, with considerable difference between the levels cited by the Venezuelan Government and those cited by private sector and international observers.

In early 2005, the government informed companies with operating service contracts for mature fields that they must migrate the contracts to joint ventures that conform to the 2001 Hydrocarbons Law. The government threatened to seize fields operating under the services contracts on December 31, 2005 if oil companies did not sign transition agreements to migrate their contracts. All but three companies ultimately signed joint venture agreements with the government. One company was bought out by its partner while the fields operated by two other companies were ultimately taken over by the government. One of these disputes was handled by negotiation while another company decided to take its case to international arbitration. In early 2007, President Chávez announced that the Venezuelan Government would take a majority government share in the remaining foreign investments in the oil sector, including the four heavy-oil "strategic associations." Several international oil companies agreed to migrate their interests to joint ventures with majority government ownership. Two U.S. companies decided to pull out of Venezuela—one is still in negotiations over compensation while the other has announced that it will seek international arbitration.

Trade, Manufacturing and Agriculture

Despite political tensions between the U.S. and Venezuela, the U.S. remains Venezuela's most important trading partner. In 2007, bilateral trade topped U.S. $50 billion. Venezuelan exports to the U.S. were U.S. $40 billion (accounting for at least 60% of total Venezuelan exports), and U.S. exports to Venezuela were $10 billion (or 22% of total Venezuelan imports). The U.S. is the single most important customer for Venezuelan oil. Venezuela shipped an average of approximately 1.4 million barrels of crude oil and petroleum products per day to the U.S. in 2007, a figure which accounts for at least half of Venezuelan oil exports and 10% of U.S. oil imports.

The Government of Venezuela has taken a vocal role against the proposed Free Trade Agreement of the Americas (FTAA). Its stated goal is to expand its Bolivarian Alternative for the Americas (ALBA) project and develop a South American bloc (see Foreign Relations).

Manufacturing contributed an estimated 17% of GDP in 2006. The manufacturing sector continued its recovery started in 2004, but remained hindered by a marked lack of private investment. Venezuela manufactures and exports steel, aluminum, textiles, apparel, beverages, and foodstuffs. It produces cement, tires, paper, fertilizer, and assembles cars both for domestic and export markets.

Agriculture accounts for approximately 4% of GDP, 10% of the labor force, and at least one-fourth of Venezuela's land area. Venezuela exports rice, cigarettes, fish, tropical fruits, coffee, cocoa, and manufactured products. The country is not self-sufficient in most areas of agriculture. Venezuela imports about two-thirds of its food needs. Through November 2006, U.S. firms exported $412 million worth of agricultural products, including wheat, corn, soybeans, soybean meal, cotton, animal fats, vegetable oils, and other items to make Venezuela one of the top two U.S. markets in South America. The United States supplies roughly one-quarter of Venezuela's food imports.

Labor and Infrastructure

Official unemployment statistics registered 10.2% unemployment in January 2008. Unofficial estimates are significantly higher. The public sector employs about 13% of the work force, while less than 1% work in the capital-intensive oil industry. About 18% of the labor force is unionized, and unions are particularly strong in the petroleum and public sectors. The

"informal" sector accounts for some 45% of the work force, or 5.5 million people.

Labor unions allege the government repeatedly violates International Labor Organization (ILO) agreements on freedom of association and the right to organize and bargain collectively. Specifically, the Constitution and laws permit undue influence in the internal elections of unions. The government has told the ILO it will correct the problem; draft legislation remains pending in the National Assembly.

Venezuela has an extensive road system. With the exception of air service, transportation has failed to keep pace with the country's needs. Much of the infrastructure suffers from inadequate maintenance. Caracas has a modern subway but only one functioning rail line serves the rest of the country.

FOREIGN RELATIONS

President Chávez has promoted his "Bolivarian Revolution" as a model for other countries to follow. The policy calls for the establishment of a "multi-polar" world devoid of U.S. influence and for greater integration among developing countries. Venezuela is currently advocating regional integration through its PetroCaribe and PetroSur petroleum initiatives, the creation of a South American Community of Nations, and the establishment of the Bolivarian Alternative for the Americas (a social integration project proposed by President Chavez as an alternative to the Free Trade Area of the Americas). In April 2006, President Chávez announced he was withdrawing Venezuela from the Andean Community trade bloc. In July 2006, Venezuela officially joined the Southern Common Market, MERCOSUR. Before it can become a full member of MERCOSUR, Venezuela must conform to the trade bloc's economic regulations. Congressional approval by Brazil and Paraguay is also still outstanding. The Venezuelan Government maintains very close relations with Cuba and advocates an end to Cuba's isolation. Since 2005, President Chávez has deepened relations with Iran, a state sponsor of terrorism, by signing multiple economic and social accords and publicly supporting Iran's controversial nuclear program. President Chávez has also reached out to North Korea, Belarus, and Syria. The Venezuelans have also embarked on a worldwide effort to increase their presence in embassies overseas in Africa and Asia.

President Chávez has also launched a major renovation of the Venezuelan Armed Forces by purchasing new advanced weaponry. In 2005-2006, Venezuela purchased 100,000 AK-103 rifles from Russia and signed an agreement to construct a rifle and ammunition complex. Venezuela has also purchased Russian Mi-24 HIND attack and Mi-26 transport helicopters, and has begun receiving 24 Russian Sukhoi Su-30 fighters. In 2007-2008 Venezuela signed agreements for Mi-28 Havok attack helicopters, IL-76 heavy lift aircraft, an integrated air defense missile systems from Belarus, four KILO class diesel submarines, and Chinese K-8 jet trainers.

Venezuela has longstanding border disputes with Colombia and Guyana, but seeks in general to resolve them peacefully. Bilateral commissions have been established by Venezuela and Colombia to address a range of pending issues, including resolution of the maritime boundary in the Gulf of Venezuela. Relations with Guyana are complicated by Venezuela's claim to roughly three-quarters of Guyana's territory. Since 1987, the two countries have held exchanges on the boundary under the "good offices" of the United Nations.

U.S.-VENEZUELAN RELATIONS

U.S.-Venezuelan relations have been tense in recent years. President Hugo Chávez has continuously defined himself in opposition to the United States, using incendiary rhetoric to insult President Bush and senior administration officials. For example, in his September 2006 speech to the UN General Assembly, President Chávez called President Bush "the Devil" and other offensive names. The United States continues to seek constructive engagement with the Venezuelan Government, focusing on areas of technical cooperation. Major U.S. interests in Venezuela include promotion of U.S. exports and protection of U.S. investment, preservation of Venezuela's constitutional democracy, closer counter-narcotics cooperation, more vigorous efforts on counterterrorism, and continued access to petroleum.

U.S.-Venezuelan commercial ties are deep. The United States is Venezuela's most important trading partner, representing about 22% of imports and approximately 60% of Venezuelan exports. In turn, Venezuela is the United States' third-largest export market in Latin America, purchasing U.S. machinery, transportation equipment, agricultural commodities, and auto parts. Venezuela's opening of its petroleum sector to foreign investment in 1996 created extensive trade and investment opportunities for U.S. companies. As a result, Venezuela is one of the top four suppliers of foreign oil to the United States. The Department of State is committed to promoting the interests of U.S. companies in overseas markets. For contact information and a list of government publications, please go to the end of this document.

Venezuela is a minor source country for opium poppy and coca but a major transit country for cocaine and heroin. Money laundering and judicial corruption are major concerns. In 2004 and early 2005, counternarcotics cooperation between the U.S. and Venezuela deteriorated significantly. In March 2005, the Venezuelan National Guard removed its highly experienced members from the U.S.-supported Prosecutor's Drug Task Force. In August 2005, the Government of Venezuela accused the U.S. Drug Enforcement Administration (DEA) of espionage and terminated cooperation with the DEA pending negotiation of a new cooperation

agreement, which had gone unsigned as of October 2006. President Bush decertified Venezuela on counternarcotics cooperation in 2005, 2006, and 2007.

In June 2006, Venezuela was listed at Tier 3 status in the State Department's Report on Trafficking in Persons. Tier 3 status indicates a perceived lack of effort to combat human trafficking.

In May 2006, the Secretary of State certified that Venezuela was not fully cooperating with U.S. counter-terrorism efforts. As of October 1, 2006, the United States Government has prohibited arms sales and services to Venezuela.

Approximately 23,000 U.S. citizens living in Venezuela have registered with the U.S. embassy, an estimated three-quarters of them residing in the Caracas area. An estimated 12,000 U.S. tourists visit Venezuela annually. About 500 U.S. companies are represented in the country.

TRAVEL

Consular Information Sheet

May 5, 2008

Country Description: Venezuela is a medium income country whose economy is dominated by a substantial oil industry. The political climate in Venezuela is highly polarized and volatile. Violent crime is a continuing problem. Assaults, robberies, and kidnappings occur throughout the country. Scheduled air service and all-weather roads connect major cities and most regions of the country. Venezuela's tourism infrastructure varies in quality according to location and price.

Entry Requirements: A passport and a visa or tourist card are required. Tourist cards are issued on flights from the U.S. to Venezuela for persons staying less than ninety days. Persons traveling for reasons other than tourism, however, should consult the Venezuelan Embassy or nearest Venezuelan consulate regarding possible visa requirements for their specific purpose of travel. Venezuelan immigration authorities may require that U.S. passports have at least six months validity remaining from the date of arrival in Venezuela. Some U.S. citizens have been turned back to the United States if their passports will expire in less than six months. Passports should also be in good condition, as some U.S. citizens have been delayed or detained overnight for having otherwise valid passports in poor condition.

U.S. citizens residing in Venezuela should be careful to obtain legitimate Venezuelan documentation appropriate to their status. There have been numerous cases in the last several months of U.S. citizens who, having employed intermediaries, received what they believed to be valid Venezuelan resident visas and work permits. They were subsequently arrested and charged with possessing fraudulent Venezuelan documentation. ONIDEX, the Venezuelan government agency responsible for immigration documents, has informed the Embassy that the only valid resident visas are those for which the bearer has personally signed at ONIDEX headquarters in Caracas.

Venezuelan law requires Venezuelan citizens to enter and depart Venezuela using Venezuelan passports and Venezuelan immigration authorities are increasingly enforcing this requirement. In order to comply with U.S. and Venezuelan law, persons who hold dual American-Venezuelan nationality must plan to travel

between Venezuela and the United States with valid U.S. and Venezuelan passports.

Venezuela's child protection law mandates that minors (under 18) who are citizens or non-citizen residents of Venezuela and who are traveling alone, with only one parent, or with a third party, must present a copy of their birth certificate and written, notarized authorization from the absent parent(s) or legal guardian, specifically granting permission to travel alone, with one parent, or with a third party. This authorization must reflect the precise date and time of the travel, including flight and/or other pertinent information. Without this authorization, immigration authorities will prevent the child's departure from Venezuela. The Venezuelan Government no longer recognizes blanket or non-specific travel authorizations. When a parent is deceased, a notarized copy of the death certificate is required in lieu of the written authorization. If documents are prepared in the United States, the authorization and the birth certificate must be translated into Spanish, notarized, and authenticated by the Venezuela Embassy or a Venezuelan consulate in the United States. If documents are prepared in Venezuela, only notarization by a Venezuelan notary is required. A permission letter prepared outside Venezuela is valid for 90 days. A permission letter prepared in Venezuela is valid for 60 days.

Travelers entering Venezuela from certain countries are required to have a current yellow fever vaccination certificate. The Venezuelan government recommends that all travelers, regardless of their country of departure, be vaccinated for yellow fever before entering Venezuela. Mosquito-borne diseases such as malaria and dengue fever are also common in some areas and travelers should take precautions to prevent infection.

An exit tax and airport fee must be paid when departing Venezuela by airline. The exit tax is currently 46 Bolívares Fuertes, and the airport fee is currently 115 Bolívares Fuertes (a total of approximately 75 USD calculated at the official exchange rate). In many instances, especially with non-U.S. airlines, the exit tax and airport fee are not included in the airline ticket price and must be paid separately at the airport upon departure. Authorities usually require that payment be made in local currency. Both the departure tax and the airport fee are subject to change with little notice. Travelers should check with their airlines for the latest information.

For current information concerning entry, tax, and customs requirements for Venezuela, travelers may contact the Venezuelan Embassy at 1099 30th Street, NW, Washington DC 20007, tel: (202) 342-2214, or visit the Embassy of Venezuela web site at http://www.embavenez-us.org. Travelers may also contact the Venezuelan consulates in New York, Miami, Chicago, New Orleans, Boston, Houston, San Francisco, or San Juan. Additional information about vaccination requirements for travel to Venezuela, as well as to other international destinations, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747); fax 1-888-CDC-FAXX (1-888-232-3299), or via CDC's Internet site at http://wwwn.cdc.gov/travel/default.aspx.

Safety and Security: Violent crime in Venezuela is pervasive, both in the capital, Caracas, and in the interior. The country has one of the highest per-capita murder rates in the world. Armed robberies take place in broad daylight throughout the city, including areas generally presumed safe and frequented by tourists. A common technique is to choke the victim into unconsciousness and then rob them of all they are carrying. Well-armed criminal gangs operate with impunity, often setting up fake police checkpoints. Kidnapping is a particularly serious problem, with more than 1,000 reported during the past year alone. Investigation of all crime is haphazard and ineffective. In the case of high-profile killings, the authorities quickly round up suspects, but rarely produce evidence linking these individuals to the crime. Only a very small percentage of criminals are tried and convicted. Travel to and from Maiquetía Airport, the international airport serving Caracas, can be dangerous and corruption at the airport itself is rampant. Travelers at the airport have been victims of personal property theft, as well as mugging and "express kidnapping" in which individuals are taken to make purchases or to withdraw as much money as possible from ATMs, often at gunpoint. The Embassy has received multiple, credible reports that individuals with what appear to be official uniforms or other credentials are involved in facilitating or perpetrating these crimes. For this reason, American citizen travelers should be wary of all strangers, even those in official uniform or carrying official identification. There are also known drug trafficking groups working from the airport. Travelers should not accept packages from anyone and should keep their luggage with them at all times.

Because of the frequency of robberies at gunpoint, travelers are encouraged to arrive during daylight hours. If not, travelers should use extra care both within and outside the airport. The Embassy strongly advises that all arriving passengers make advance plans for transportation from the airport to their place of lodging. If possible, travelers should arrange to be picked up at the airport by someone who is known to them. The Embassy has received frequent reports of armed robberies in taxicabs going to and from the airport at Maiquetía. There is no foolproof method of knowing whether a taxi driver at the airport is reliable. The fact that a taxi driver presents a credential or drives an automobile with official taxi license plates marked "libre" is no longer an indication of reliability. Incidents of taxi drivers in Caracas overcharging, robbing, and injuring passengers are common. Travelers should take care to use radio-dispatched taxis or those from reputable hotels. Travelers should call a 24-hour radio-dispatched taxi service from a public phone lobby or ask hotel, restaurant, or airline representatives to contact a licensed cab com-

pany for them. A list of transportation services used by members of the U.S. Embassy community is available on the U.S. Embassy web site at http://venezuela.usembassy.gov. The Embassy does not vouch for the professional ability or integrity of any specific provider. The list is not meant to be an endorsement by the Department of State or the Embassy. Likewise, the absence of any individual or company does not imply lack of competence.

While visiting Venezuela, Americans are encouraged to carry as little U.S. currency on them as possible and to avoid wearing expensive or flashy watches and jewelry. Due to the poor security situation, the Embassy does not recommend changing money at the international airport. Visitors should bring a major credit card, but should be aware of widespread pilfering of credit card data to make unauthorized transactions. Travelers' checks are not recommended as they are honored in only a few locations. It is possible to exchange U.S. currency at approved exchange offices near major hotel chains in Caracas (personal checks are not accepted) and at commercial banks with some restrictions. Due to currency regulations, hotels cannot provide currency exchange. There are ATM machines throughout Venezuela. Malfunctions are common, however, and travelers should be careful to use only those in well-lit public places. ATM data has also been hacked and used to make unauthorized withdrawals from user's accounts.

Popular tourist attractions, such as the Avila National Park, are increasingly associated with violent crime. Americans planning to participate in outdoor activities in potentially isolated areas are strongly urged to travel in groups of five or more and to provide family or friends with their itineraries prior to departure.

Cross-border violence, kidnapping, drug trafficking, smuggling, and cattle-rustling occur frequently in areas along the 1,000-mile long border between Venezuela and Colombia. Some kidnap victims have been released after ransom payments, while others have been murdered. In many cases, Colombian terrorists are believed to be the perpetrators. Colombia's National Liberation Army (ELN) has had a long history of kidnapping for ransom, and the Revolutionary Armed Forces of Colombia (FARC) are active in the kidnapping trade. Common criminals are also increasingly involved in kidnappings, either dealing with victim's families directly or selling the victim to terrorist groups.

In-country travel by U.S. Embassy employees, both official and private, within a 50-mile area along the entire Venezuela/Colombia border, is prohibited. The State Department warns American citizens not to travel within a 50-mile area along the entire Venezuela/Colombia border. U.S. citizens who elect to visit areas along the border region with Colombia despite this warning, apart from the Colombian terrorist threat, could encounter Venezuelan military-controlled areas and may be subject to search and arrest.

The U.S. Embassy must approve in advance the official travel to Venezuela of all U.S. Government personnel. Private travel by U.S. military personnel to Venezuela requires advance approval by the U.S. Embassy. Please consult the Department of Defense Foreign Clearance Guide at https://www.fcg.pentagon.mil/ for further information. Non-military employees of the U.S. Government do not need Embassy approval for private travel.

Political marches and demonstrations are frequent in Caracas and often pass without incident. Nevertheless, travelers should be aware that violence, including exchanges of gunfire, has occurred at political demonstrations in the past. Demonstrations tend to occur at or near university campuses, business centers, and gathering places such as public squares and plazas. Marches generally occur on busy thoroughfares, significantly impacting traffic. Most major tourist destinations, including coastal beach resorts and Margarita Island, have not in the past been generally affected by protest actions. The city of Merida, however, a major tourist destination in the Andes, has been the scene of frequent student demonstrations, some of them violent, including the use of firearms.

Travelers should keep informed of local developments by following the local press, radio and television. Visitors should also consult their local hosts, including U.S. and Venezuelan business contacts, hotels, tour guides, and travel organizers. As circumstances warrant, the Embassy sends out messages to U.S. citizens who have registered on-line. These messages are also posted on the U.S. Citizens page of the Embassy's web site at http://venezuela.usembassy.gov. U.S. citizens traveling or residing in Venezuela are advised to take common-sense precautions and avoid large gatherings and demonstrations, no matter where they occur.

Harassment of U.S. citizens by pro-government groups, Venezuelan airport authorities, and some segments of the police occurs but is quite limited. Venezuela's most senior leaders, including President Chavez, regularly express anti-American sentiment. The Venezuelan government's rhetoric against the U.S. government, its American culture and institutions, has affected attitudes in what used to be one of the most pro-American countries in the hemisphere.

Venezuela is an earthquake-prone country and is occasionally subject to torrential rains, which can cause major disasters such as the one in Vargas State in 1999. Travelers who intend to rent or purchase long-term housing in Venezuela should choose structures designed for earthquake resistance.

Such individuals may wish to seek professional assistance from an architect or civil/structural engineer, as does the Embassy, when renting or purchasing a house or apartment in Venezuela. Americans already housed in such premises are also encouraged to seek a professional structural assessment of their housing.

For further information on seismic activity, you may wish to visit:

- The Multidisciplinary Center for Earthquake Engineering Research (MCEER) web site at http://mceer.buffalo.edu

- The Global Seismic Hazard Assessment Program web site at www.seismo.ethz.ch/GSHAP

- The Caribbean Disaster Mitigation Project web site at www.oas.org/CDMP

For the latest security information, Americans traveling abroad should regularly monitor the Department of State, Bureau of Consular Affairs' web site, where the current Travel Warnings and Travel Alerts including the Worldwide Caution Travel Alert, can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S. and Canada, or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: Venezuela and its capital, Caracas, have one of the highest per capita murder rates in the world. Virtually all murders go unsolved. The poor neighborhoods that cover the hills around Caracas are extremely dangerous. These areas are seldom patrolled by police and should be avoided. Armed robberies are common in urban and tourist areas throughout Venezuela, even areas presumed safe and visited by tourists. Crimes committed against travelers are usually money-oriented crimes, such as theft and armed robbery. Incidents occur during daylight hours as well as at night. Many criminals are armed with guns or knives and will use force. Jewelry attracts the attention of thieves. Travelers are advised to leave jewelry items, especially expensive-looking wristwatches, at home. Gangs of thieves will often surround their victims and use a chokehold to disable them, even in crowded market areas where there is little or no police presence. Theft from hotel rooms and safe deposit boxes is a problem, and theft of unattended valuables on the beach and from rental cars parked near isolated areas or on city streets is a common occurrence. A guarded garage or locked trunk is not a guarantee against theft. Pickpockets concentrate in and around crowded bus and subway stations in downtown Caracas. Subway escalators are favored sites for "bump and rob" petty thefts by roving bands of young criminals. Many of these criminals are well dressed to allay suspicion and to blend in with crowds using the subways during rush hour. Travelers should not display money or valuables.

"Express kidnappings," in which victims are seized in an attempt to get quick cash in exchange for their release, are a problem. Kidnapping of U.S. citizens and other foreign nationals, from homes, hotels, unauthorized taxis and the airport terminal has occurred. U.S. citizens should be alert to their surroundings and take necessary precautions.

The Department has received reports of robberies during nighttime and early morning hours on the highways around and leading to Caracas. Reports have specifically involved cars being forced off the La Guaira highway leading from Caracas to the Maquetía International Airport, and the "Regional del Centro" highway leading from Caracas to Maracay/Valencia, at which point the victims are robbed. The Department recommends avoiding driving at night and in the early morning where possible. Drivers traveling on highways during nighttime and early morning hours should exercise caution.

Police responsiveness and effectiveness in Venezuela vary drastically but generally do not meet U.S. expectations. U.S. travelers have reported robberies and other crimes committed against them by individuals wearing uniforms and purporting to be police officers or National Guard members.

Incidents of piracy off the coast of Venezuela remain a concern. Some of these incidents have been especially violent, including the severe beating of a U.S. citizen in 2002, the fatal shooting of an Italian citizen in January 2004, and a machete attack on a U.S. citizen in 2005. U.S. citizen yachters should exercise a heightened level of caution in Venezuelan waters. Please consult the U.S. Coast Guard web site at http://www.uscg.mil/hq/g-o/g-opr/g-opr.htm for additional information on sailing in Venezuela.

Rules governing the sale of fuel to foreign sailors in Venezuela vary by state. U.S. citizen yachters should inquire about specific state procedures prior to attempting to purchase fuel in any given location. Failure to comply with a state's particular requirements can result in arrest and criminal charges.

The Embassy is aware of several instances where women lured American men to Venezuela after establishing "relationships" with them over the Internet. Some of these men were robbed shortly after they arrived in Venezuela. Others were recruited to act as narcotics couriers or "drug mules." In three instances, the Americans were arrested at the airport with narcotics in their possession and served extended jail terms in Venezuela.

In many countries around the world, counterfeit and pirated goods are widely available. Transactions involving such products may be illegal under local law. In addition, bringing them back to the United States may result in forfeitures and/or fines. More information on this serious problem is available at http://www.cybercrime.gov/18usc2320.htm.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, contact family members or friends and explain how funds could be transferred.

Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to

understand the local criminal justice process and to find an attorney if needed.

Medical Facilities and Health Information: Medical care at private hospitals and clinics in Caracas and other major cities is generally good. Public hospitals and clinics generally provide a lower level of care and basic supplies at public facilities may be in short supply or unavailable. Cash payment is usually required in advance of the provision of medical services at private facilities, although some facilities will accept credit cards. Patients who cannot provide advance payment may be referred to a public hospital for treatment. Private companies that require the patient to be a subscriber to the service or provide cash payment in advance generally provide the most effective ambulance services. Public ambulance service is unreliable. U.S. citizens should be aware that due to the currency restrictions in effect in Venezuela they might find it difficult to receive wire transfers from abroad, whether through a bank or Western Union. Such wire transfers cannot be used reliably as a source of emergency funds. U.S. citizens traveling to Venezuela may also find it difficult to obtain certain prescription drugs, particularly name brands, and should ensure that they have sufficient quantities of all medications for the duration of their stay.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's web site at http://wwwn.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith/en.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Venezuela is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

Driving regulations in Venezuela are similar to those in the United States, although many drivers do not obey them. Defensive driving is a necessity. Child car seats and seatbelts are not required and are seldom available in rental cars and taxis. Outside the major cities, night driving can be dangerous because of unmarked road damage or repairs in progress, unlighted vehicles, and livestock. Even in urban areas, road damage is often marked by a pile of rocks or sticks left by passersby near or in the pothole or crevice, without flares or other devices to highlight the danger. Traffic jams are common within Caracas during most of the day and are frequently exploited by criminals. Stops at National Guard and local police checkpoints are mandatory. Drivers should follow all National Guard instructions and be prepared to show vehicle and insurance papers and passports. Vehicles may be searched. Inexpensive bus service is available to most destinations throughout the country, but the high incidence of criminal activity on public transportation makes bus travel inadvisable. Peak holiday travel occurs during summer and winter school breaks and major civil and religious holidays, including Carnival, Easter, Christmas and New Year's holidays. Lengthy delays due to road congestion are common during these peak periods.

Aviation Safety Oversight: The U.S. Federal Aviation Administration (FAA) has assessed the Government of Venezuela's Civil Aviation Authority as being in compliance with International Civil Aviation Organization (ICAO) aviation safety standards for the oversight of Venezuela's air carrier operations. For more information, travelers may visit the FAA's Internet web site at http://www.faa.gov.

Special Circumstances: In February 2007, the National Assembly granted President Chavez the authority to rule by decree in 11 general areas for 18 months. Laws issued by President Chavez under this authority become effective immediately after their publication in the government legislative gazette. As a result, laws directly impacting U.S. Citizens or their interests in Venezuela may come into force with little or no warning. U.S. Citizens are advised to carefully monitor changes in Venezuelan law. Venezuela is also slated to hold gubernatorial and mayoral elections nation-wide in late 2008. These electoral races are expected to generate extensive political campaigning from pro-government and opposition parties.

The government of Venezuela implemented rigid foreign exchange controls in 2003, including a fixed official rate of exchange. Foreign exchange transactions must take place through exchange houses or commercial banks at the official rate. As of October 2005 it is no longer possible to exchange money at hotels. Currency exchange for tourists can be arranged at "casas de cambio" (exchange houses). There are exchange houses located near most major hotels. It is also possible to exchange money at commercial banks; however, visitors should be aware that the exchange would not be immediate. Exchanges through commercial banks must first be approved by the Commission for Administration of Foreign Currencies (CADIVI). This requires a registration process, which delays the exchange. The exchange control mechanisms also require the exchange houses and commercial banks to obtain authorization from CADIVI to trade Bolívares Fuertes (the local currency) into U.S. dollars. Outside the major cities, a good supply of Venezuelan currency is necessary, as it may be difficult to find exchange houses. The Embassy cannot provide currency exchange ser-

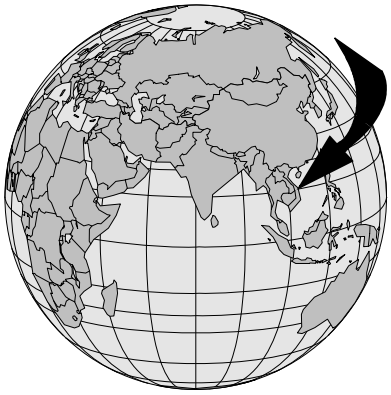
vices. Travelers will likely encounter individuals in Venezuela who are willing to exchange Bolívares Fuertes for U.S. dollars at a rate significantly higher than the official rate of exchange. These "parallel market" currency exchanges are prohibited under the Venezuelan foreign exchange controls. Travelers engaging in such activity may be detained by the Venezuelan authorities. Additionally, in accordance with an October 2005 law, any person who exchanges more than 10,000 U.S. dollars in the course of a year through unofficial means is subject to a fine of double the amount exchanged. If the amount exceeds 20,000 U.S. dollars the penalty is two to six years imprisonment. Any person who transports more than 10,000 U.S. dollars into or out of Venezuela by any means must declare this amount to customs officials.

Credit cards are generally accepted at most upscale tourist establishments, but foreign exchange controls have made credit card acceptance less common than in the past. Visa, MasterCard, and American Express have representatives in Venezuela. Due to the prevalence of credit card fraud in Venezuela, travelers should exercise caution in using their credit cards and should check statements regularly to ensure that no unauthorized charges have been made. Most major cities have ATMs with 24-hour service where users may withdraw local currency, but many of these ATMs will not accept U.S.-issued debit cards.

Venezuelan customs authorities may enforce strict regulations concerning temporary importation into or export from Venezuela of items such as plant and animal products, firearms, medications, archaeological or "cultural heritage" items, and pirated copies of copyrighted articles. It is advisable to contact the Embassy of Venezuela in Washington or one of Venezuela's consulates in the United States for specific information regarding customs requirements.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating Venezuela's laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Venezuela are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.



Registration and Embassy Locations: Americans living or traveling in Venezuela are encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration web site so that they can obtain updated information on travel and security within Venezuela. Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency. The Consular Section is open for American Citizen Services from 8:00 a.m. to 10:30 a.m. Monday through Friday, excluding U.S. and Venezuelan holidays. The U.S. Embassy is located at Calle Suapure and Calle F, Colinas de Valle Arriba, Caracas. The telephone number during regular business hours (8:00 a.m. to 5:00 p.m.) is (58) (212) 975-6411. In case of an after-hours emergency, callers should dial (58) (212) 907-8400. The Embassy's web site, http://venezuela.usembassy.gov, contains complete information about services provided and hours of operation.

A part-time consular agent in Maracaibo provides services for U.S. citizens in western Venezuela. The agent is available to the public every Monday from 8:15 am to 12:15 pm, at the Centro Venezolano Americano del Zulia (CEVAZ), Calle 63 No. 3E-60, Maracaibo; telephone (58)(0261) 797-8323 or 8324 or 8325.

Intercountry Adoption

May 2006

The adoption authority for Venezuela, the Ministry of Foreign Affairs, has advised the U.S. Embassy in Caracas that only citizens from countries that have ratified the Hague Convention on Intercountry Adoptions are eligible to adopt in Venezuela. The United States has not finished the process of ratifying the Convention, thus U.S. citizens are not allowed to adopt.

VIETNAM

Compiled from the August 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Socialist Republic of Vietnam

PROFILE

Geography

Area: 331,114 sq. km. (127,243 sq. mi.); equivalent in size to Ohio, Kentucky, and Tennessee combined.
Cities: (2008) Capital—Hanoi (6.232 million); on August 1, 2008 the capital city's administrative borders were officially expanded to include Ha Tay Province and parts of Hoa Binh and Ving Phuc. Other cities—Ho Chi Minh City (formerly Saigon; 6.602 million), Haiphong (1.711 million), Danang (806,900), Can Tho (1.154 million).
Terrain: Varies from mountainous to coastal delta.
Climate: Tropical monsoon.

People

Nationality: Noun and adjective—Vietnamese (sing. and pl.).
Population: (2007) 85.15 million.
Annual growth rate: (2007) 1.188%.
Ethnic groups: (2003) 54 groups including Vietnamese (Kinh) (85.73%), Tay (1.97%), Thai (1.79%), Muong (1.52%), Khmer (1.37%), Chinese (1.13%), Nung (1.13%), Hmong (1.11%).
Religions: (2007): Buddhism (14.38%), Catholic (6.9%), Cao Dai (2.8%), Protestantism (1.75%), Hoa Hao (1.5%), Islam (0.076%), Baha'i (0.007%), and other animist religions.
Languages: Vietnamese (official), English (increasingly favored as a second language), some French, Chinese, and other ethnic minority languages.
Education: (2006) Literacy—90%.
Health: (2007 estimate) Birth rate—16.63 births/1000 population. Infant mortality rate—17.4 /1000. Life expectancy—70.8 yrs. Death rate—6.56/1,000.

Government

Type: Communist Party-dominated constitutional republic.
Independence: September 2, 1945.
Constitution: April 15, 1992.
Government branches: Executive—president (head of state and chair of National Defense and Security Council) and prime minister (heads cabinet of ministries and commissions). Legislative—National Assembly. Judicial—Supreme People's Court; Prosecutorial Supreme People's Procuracy.
Political subdivisions: 59 provinces, 5 municipalities (Can Tho, Hai Phong, Da Nang, Hanoi, Ho Chi Minh).
Political parties: Communist Party of Vietnam (CPV) with over 3 million members, formerly (1951-76) Vietnam Worker's Party, itself the successor of the Indochinese Communist Party founded in 1930.
Suffrage: Universal over 18.

Economy

GDP: (2007) $71.4 billion.
Real growth rate: (2007) 8.5%.
Per capita income: (2007) $832.
Inflation rate: (May 2008) 25%.
External debt: (2007) 27% of GDP, $19.3 billion.
Natural resources: Coal, crude oil, zinc, copper, silver, gold, manganese, iron.
Agriculture and forestry: (20.25% of GDP, 2007) Principal products—rice, maize, sweet potato, peanut, soya bean, cotton, coffee, cashews. Cultivated land—12.2 million hectares. Land use—21% arable; 28% forest and woodland; 51% other.
Industry and construction: (41.6% of GDP, 2007) Principal types—mining and quarrying, manufacturing, electricity, gas, water supply, cement, phosphate, and steel.
Services: (38.13% of GDP, 2007) Principal types—wholesale and retail, repair of vehicles and personal goods, hotel and restaurant, transport storage, telecommunications, tourism.
Trade: (2007) Exports—$48.39 billion. Principal exports—crude oil, garments/textiles, footwear, fishery products, wood products, rice (second-largest exporter in world), sea

products, coffee, rubber, handicrafts. Major export partners—U.S., EU, Japan, China, Singapore, Australia, Taiwan, and Germany. Imports—$60.8 billion. Principal imports—machinery, oil and gas, garment materials, iron and steel, transport-related equipment. Major import partners—China, Japan, Singapore, Taiwan, South Korea, Hong Kong, and Thailand. Exports to U.S. (2007)—$10.6 billion. Imports from U.S. (2007) $1.9 billion.

PEOPLE

Originating in what is now southern China and northern Vietnam, the Vietnamese people pushed southward over 2 millennia to occupy the entire eastern seacoast of the Indochinese Peninsula. Vietnam has 54 ethnic groups; ethnic Vietnamese or Kinh constitute approximately 85% of Vietnam's population. The next largest groups are ethnic Tay and Thai, which account for 1.97% and 1.79% of Vietnam's population and are concentrated in the country's northern uplands.

With a population of more than 900,000, Vietnam's ethnic Chinese community is one of the most significant and wealthiest in Vietnam. Long important in the Vietnamese economy, Vietnamese of Chinese ancestry have been active in rice trading, milling, real estate, and banking in the south and shop keeping, stevedoring, and mining in the north. Restrictions on economic activity following reunification of the north and south in 1975 and the subsequent but unrelated general deterioration in Vietnamese-Chinese relations caused increasing anxiety within the Chinese-Vietnamese community. As tensions between Vietnam and China reached their peak in 1978-79, some 450,000 ethnic Chinese left Vietnam by boat as refugees (many officially encouraged and assisted) or were expelled across the land border with China.

Other significant ethnic minority groups include central highland peoples (formerly termed Montagnards) such as the Gia Rai, Bana, Ede, Xo Dang, Gie Trieng, and the Khmer Krom (Cambodians), who are concentrated near the Cambodian border and at the mouth of the Mekong River.

Vietnamese is the official language of the country. It is a tonal language with influences from Thai, Khmer, and Chinese. Since the early 20th century, the Vietnamese have used a Romanized script introduced by the French. Previously, Chinese characters and an indigenous phonetic script were both used.

HISTORY

Vietnam's identity has been shaped by long-running conflicts, both internally and with foreign forces. In 111 BC, China's Han dynasty conquered northern Vietnam's Red River Delta and the ancestors of today's Vietnamese. Chinese dynasties ruled Vietnam for the next 1,000 years, inculcating it with Confucian ideas and political culture, but also leaving a tradition of resistance to foreign occupation. In 939 AD, Vietnam achieved independence under a native dynasty. After 1471, when Vietnam conquered the Champa Kingdom in what is now central Vietnam, the Vietnamese moved gradually southward, finally reaching the rich Mekong Delta, where they encountered previously settled communities of Cham and Cambodians. As Vietnam's Le dynasty declined, powerful northern and southern families, the Trinh and Nguyen, fought civil wars in the 17th and 18th centuries. A peasant revolt originating in the Tay Son region of central Vietnam defeated the Nguyen and Trinh and unified the country at the end of the 18th century, but was itself defeated by a surviving member of the Nguyen family, who founded the Nguyen dynasty as Emperor Gia Long in 1802.

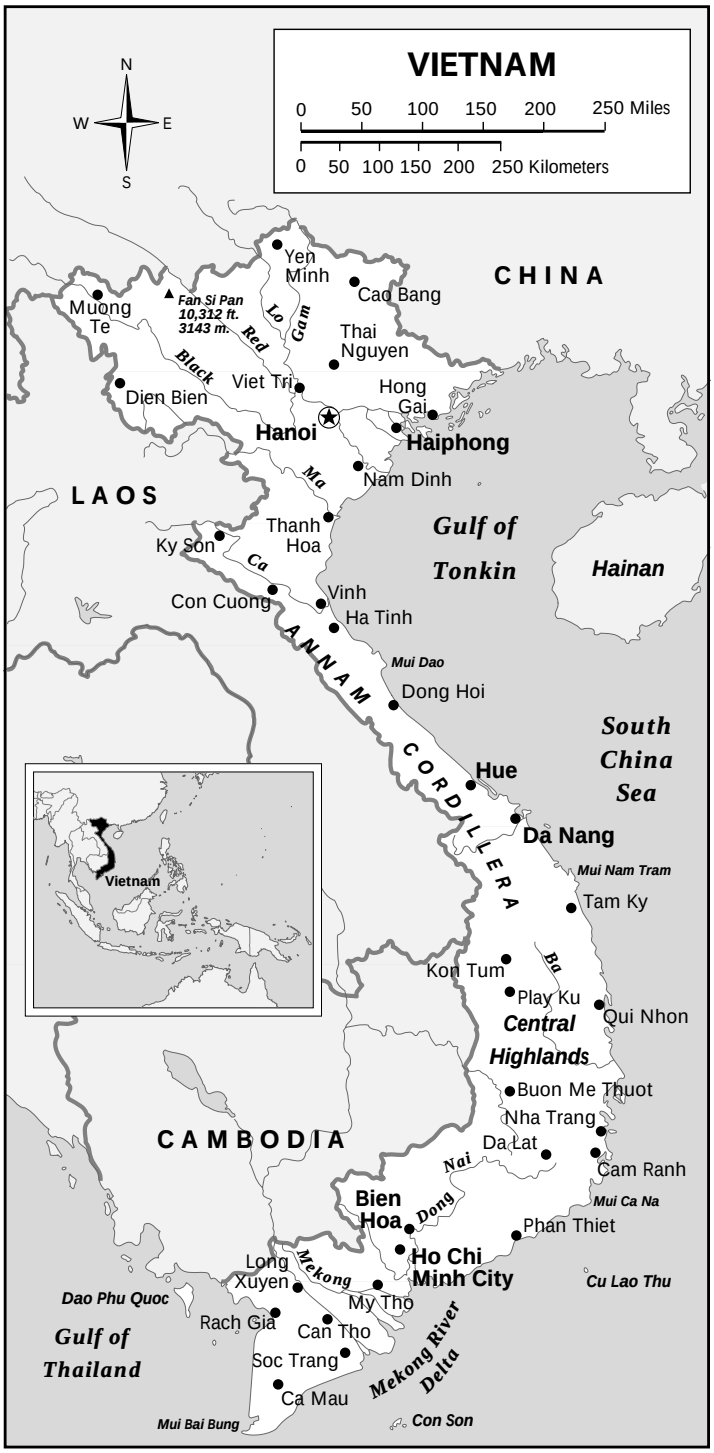
French Rule and the Anti-Colonial Struggle

In 1858, the French began their conquest of Vietnam starting in the south. They annexed all of Vietnam in 1885, but allowed Vietnam's emperors to continue to reign, although not actually to rule. In the early 20th century, French-educated Vietnamese intellectuals organized nationalist and communist-nationalist anti-colonial movements.

Japan's occupation of Vietnam during World War II further stirred nationalism. Vietnamese communists under Ho Chi Minh organized a coalition of anti-colonial groups, the Viet Minh, though many anti-communists refused to join. After Japan stripped the French of much power in Indochina in March 1945, Ho Chi Minh announced the independence of the Democratic Republic of Vietnam on September 2, 1945.

North and South Partition

France's post-World War II unwillingness to leave Vietnam led to failed talks and an 8-year guerrilla war between the communist-led Viet Minh on one side and the French and their anti-communist nationalist allies on the other. Following a humiliating defeat at Dien Bien Phu in May 1954, France and other parties, including Britain, China, the Soviet Union, and the United States, convened in Geneva, Switzerland for peace talks. On July 29, 1954, an Agreement on the Cessation of Hostilities in Vietnam was signed between France and the Democratic Republic of Vietnam. The United States observed, but did not sign, the agreement. French colonial rule in Vietnam ended.



The 1954 Geneva agreement provided for a cease-fire between communist and anti-communist nationalist forces, the temporary division of Vietnam at approximately the 17th parallel, provisional northern (communist) and southern (non-communist) zone governments, and the evacuation of anti-communist Vietnamese from northern to southern Vietnam. The agreement also called for an election to be held by July 1956 to bring the two provisional zones under a unified government. However, the South Vietnamese Government refused to accept this provi-

sion. On October 26, 1955, South Vietnam declared itself the Republic of Vietnam.

After 1954, North Vietnamese communist leaders consolidated their power and instituted a harsh agrarian reform and socialization program. In the late 1950s, they reactivated the network of communist guerrillas that had remained behind in the south. These forces—commonly known as the Viet Cong—aided covertly by the north, started an armed campaign against officials and villagers who refused to support the communist reunification cause.

American Assistance to the South

In December 1961, at the request of South Vietnamese President Ngo Dinh Diem, President Kennedy sent U.S. military advisers to South Vietnam to help the government there deal with the Viet Cong campaign. In the wake of escalating political turmoil in the south after a 1963 generals' coup against President Diem, the United States increased its military support for South Vietnam. In March 1965, President Johnson sent the first U.S. combat forces to Vietnam. The American military role peaked in 1969 with an in-country force of 534,000. However, the Viet Cong's surprise Tet Offensive in January 1968 deeply hurt both the Viet Cong infrastructure and American and South Vietnamese morale. In January 1969, the United States, governments of South and North Vietnam, and the Viet Cong met for the first plenary session of peace talks in Paris, France. These talks, which began with much hope, moved slowly. They finally concluded with the signing of a peace agreement, the Paris Accords, on January 27, 1973. As a result, the south was divided into a patchwork of zones controlled by the South Vietnamese Government and the Viet Cong. The United States withdrew its forces, although U.S. military advisers remained.

Reunification

In early 1975, North Vietnamese regular military forces began a major offensive in the south, inflicting great damage to the south's forces. The communists took Saigon on April 30, 1975, and announced their intention of reunifying the country. The Democratic Republic of Vietnam (north) absorbed the former Republic of Vietnam (south) to form the Socialist Republic of Vietnam on July 2, 1976.

After reunification, the government confiscated privately owned land and forced citizens into collectivized agricultural practices. Hundreds of thousands of former South Vietnamese Government and military officials, as well as intellectuals previously opposed to the communist cause, were sent to re-education camps to

study socialist doctrine. While Vietnamese leaders thought that reunification of the country and its socialist transformation would be condoned by the international community, this did not happen. Besides international concern over Vietnam's internal practices, the Vietnamese invasion of Cambodia in 1978 and its growing tight alliance with the Soviet Union appeared to confirm suspicions that Vietnam wanted to establish hegemony in Indochina.

Vietnam's invasion of Cambodia also heightened tensions that already existed between Vietnam and China. Beijing, which had long backed the Khmer Rouge regime in Cambodia, retaliated in early 1979 by initiating a border war with Vietnam.

Vietnam's tensions with its neighbors and its stagnant economy contributed to a massive exodus from Vietnam. Fearing persecution, many Chinese in particular fled Vietnam by boat to nearby countries. Later, hundreds of thousands of other Vietnamese nationals fled as well, seeking temporary refuge in camps throughout Southeast Asia.

The continuing grave condition of the economy and the alienation from the international community became focal points of party debate. In 1986, at the Sixth Party Congress, there was an important easing of communist agrarian and commercial policies.

GOVERNMENT AND POLITICAL CONDITIONS

A new state constitution was approved in April 1992, reaffirming the central role of the Communist Party of Vietnam (CPV) in politics and society, and outlining government reorganization and increased economic freedom. Though Vietnam remains a one-party state, adherence to ideological orthodoxy has become less important than economic development as a national priority.

The most important powers within the Vietnamese Government—in addition to the Communist Party—are the executive agencies created by the 1992 constitution: the offices of the president and the prime minister. The Vietnamese President, presently Nguyen Minh Triet, functions as head of state but also serves as the nominal commander of the armed forces and chairman of the Council on National Defense and Security. The Prime Minister of Vietnam, presently Nguyen Tan Dung, heads a cabinet currently composed of five deputy prime ministers and the heads of 22 ministries and agencies, all confirmed by the National Assembly.

Notwithstanding the 1992 constitution's reaffirmation of the central role of the Communist Party, the National Assembly, according to the constitution, is the highest representative body of the people and the only organization with legislative powers. It has a broad mandate to oversee all government functions. Once seen as little more than a rubber stamp, the National Assembly has become more vocal and assertive in exercising its authority over lawmaking, particularly in recent years. However, the National Assembly is still subject to party direction. More than 80% of the deputies in the National Assembly are party members. The assembly meets twice yearly for 7-10 weeks each time; elections for members are held every 5 years, although its Standing Committee meets monthly and there are now over 100 "full-time" deputies who function on various committees. In 2007, the assembly introduced parliamentary "question time," in which cabinet ministers must answer often pointed questions from National Assembly members. There is a separate judicial branch, but it is still relatively weak. Overall, there are few lawyers and trial procedures are rudimentary.

The present 14-member Politburo, elected in April 2006 and headed by Communist Party General Secretary Nong Duc Manh, determines government policy, and its Secretariat oversees day-to-day policy implementation. In addition, the party's Central Military Commission, which is composed of select Politburo members and additional military leaders, determines military policy.

A Party Congress, which most recently was comprised of 1,176 delegates at the Tenth Party Congress in April 2006, meets every 5 years to set the direction of the party and the government. The 160-member Central Committee (with an additional 21 alternate members), was elected by the Party Congress and it usually meets at least twice a year.

Principal Government Officials

Last Updated: 11/12/08

Vietnamese officials are addressed by the last element in their names.

Pres.: **Nguyen Minh TRIET**
Vice Pres.: **Nguyen Thi DOAN**
Prime Min.: **Nguyen Tan DUNG**
Permanent Dep. Prime Min.: **Nguyen Sinh HUNG**
Dep. Prime Min.: **Hoang Trung HAI**
Dep. Prime Min.: **Nguyen Thien NHAN**
Dep. Prime Min.: **Pham Gia KHIEM**
Dep. Prime Min.: **Truong Vinh TRONG**
Min. of Agriculture & Rural Development: **Cao Duc PHAT**
Min. of Construction: **Nguyen Hong QUAN**
Min. of Culture, Sports, & Tourism: **Hoang Tuan ANH**
Min. of Education & Training: **Nguyen Thien NHAN**
Min. of Finance: **Vu Van NINH**
Min. of Foreign Affairs: **Pham Gia KHIEM**
Min. of Industry & Trade: **Vu Huy HOANG**
Min. of Information & Communications: **Le Doan HOP**
Min. of Interior: **Tran Van TUAN**
Min. of Justice: **Ha Hung CUONG**
Min. of Labor, War Invalids, & Social Welfare: **Nguyen Thi Kim NGAN**
Min. of National Defense: **Phung Quang THANH, Sr. Lt. Gen.**
Min. of Natural Resources & Environment: **Pham Khoi NGUYEN**
Min. of Planning & Investment: **Vo Hong PHUC**
Min. of Public Health: **Nguyen Quoc TRIEU**
Min. of Public Security: **Le Hong ANH**
Min. of Science & Technology: **Hoang Van PHONG**
Min. of Transport: **Ho Nghia DUNG**

Chmn., Govt. Inspectorate: **Tran Van TRUYEN**
Chmn., Office of the Govt.: **Nguyen Xuan PHUC**
Chmn., State Ethnic Minorities Ctte.: **Giang Seo PHU**
Governor, State Bank: **Nguyen Van GIAU**
Ambassador to the US: **Le Cong PHUNG**
Permanent Representative to the UN, New York: **Le Luong MINH**

Vietnam maintains an embassy in the U.S. at 1233 20th Street, NW, #400, Washington DC 20036 (tel. 202-861-0737; fax 202-861-0917); Internet home page: www.vietnamembassy-usa.org. There is also a consulate general located in San Francisco at 1700 California Street, Suite 430, San Francisco, CA 94109 (tel. 415-922-1707; fax 415-922-1848; Website: www.vietnamconsulate-ca.org/home.asp.

ECONOMY

Economic stagnation marked the period after reunification from 1975 to 1985. In 1986, the Sixth Party Congress approved a broad economic reform package called "Doi Moi" (renovation) that introduced market reforms and dramatically improved Vietnam's business climate. Vietnam became one of the fastest-growing economies in the world, averaging around 8% annual gross domestic product (GDP) growth from 1990 to 1997 and 6.5% from 1998-2003. From 2004 to 2007, GDP grew over 8% annually. Foreign trade and foreign direct investment have improved significantly. Average annual foreign investment commitment has risen sharply since foreign investment was authorized in 1988, and in 2007 Vietnam licensed $17.86 billion in foreign direct investment. Actual investment in that year totaled $4.60 billion. From 1990 to 2005, agricultural production nearly doubled, transforming Vietnam from a net food importer to the world's second-largest exporter of rice. Exports in 2007 were a historic $48.39 billion, but Vietnam's need for capital goods, construction materials, refined fuel, and primary material for exports meant that it ran a trade deficit of $12.4 billion.

The shift away from a centrally planned economy to a more market-oriented economic model improved the quality of life for many Vietnamese. Per capita income rose from $220 in 1994 to $832 in 2007. Inflation in 2007 was 7.3% but was in the double digits and approaching 30% year-on-year by August 2008. The average Vietnamese savings rate is about 30%. Urban unemployment has been rising in recent years, and rural unemployment, estimated to be between 25% and 35% during non-harvest periods, is significant.

The Vietnamese Government still holds a tight rein over major sectors of the economy through large state-owned enterprises and the banking system. The government has plans to reform key sectors and partially privatize state-owned enterprises, but implementation has been gradual and the state sector still accounts for approximately 40% of GDP. Greater emphasis on private sector development is critical for job creation.

The 2001 entry-into-force of the Bilateral Trade Agreement (BTA) between the U.S. and Vietnam was a significant milestone for Vietnam's economy and for normalization of U.S.-Vietnam relations. Bilateral trade between the United States and Vietnam has expanded dramatically, rising from $2.91 billion in 2002 to $12.5 billion in 2007.

Implementation of the BTA, which includes provisions on trade in goods and services, enforcement of intellectual property rights, protection for investments, and transparency, fundamentally changed Vietnam's trade regime and helped it prepare to accede to the World Trade Organization (WTO). Following the conclusion of bilateral negotiations with interested WTO members and completion of multilateral negotiations in 2006, the WTO General Council approved the terms for Vietnam's membership on November 7, 2006. Vietnam formally acceded to the WTO as its 150th member on January 11, 2007.

Vietnam was granted unconditional normal trade relations (NTR) status by the United States through a Presidential Proclamation signed by President Bush on December 29, 2006. On January 11, 2007, the United States removed the application of quotas on textile and apparel imports from Vietnam consistent with the terms of our WTO bilateral market access agreement and treatment provided to other WTO members. To meet the obligations of WTO membership, Vietnam revised nearly all of its trade and investment laws and guiding regulations. As a result, foreign investors and those seeking to sell goods and services to the increasingly affluent Vietnamese population will benefit from the improved legislative framework and lower trade barriers. Local firms that have heretofore enjoyed a range of protections, meanwhile, will experience increased competition. In 2006, the Government of Vietnam reasserted its goal of becoming a middle-income country by 2010. That would entail raising the average per capita income to at least $1,000 from the 2007 average of $832. Economic analysts, including those at the World Bank, believe that this goal is attainable.

A U.S.-Vietnam Trade and Investment Framework Agreement (TIFA), a bridge to future economic cooperation, was signed in June 2007 during President Triet's visit to the United States. The first TIFA Council occurred on December 17, 2007 in Washington. During Prime Minister Dung's June 2008 visit, the United States and Vietnam committed to undertake Bilateral Investment Treaty (BIT) negotiations.

Agriculture and Industry

Land reform, de-collectivization, and the opening of the agricultural sector to market forces converted Vietnam from a country facing chronic food shortages in the early 1980s to the second-largest rice exporter in the world. Besides rice, key exports are coffee, tea, rubber, and fisheries products. Agriculture's share of economic output has declined, falling as a share of GDP from 42% in 1989 to 20.25% in 2007, as production in other sectors of the economy has risen.

Paralleling its efforts to increase agricultural output, Vietnam's industrial production has grown. Industry and construction contributed 41.6% of GDP in 2007, up from 27.3% in 1985. Vietnam has successfully increased exports of manufactured goods, especially labor-intensive manufactures, such as textiles and apparel and footwear. Subsidies have been cut to some inefficient state enterprises. The government is also in the process of "equitizing" (e.g., transforming state enterprises into shareholding companies and distributing a portion of the shares to management, workers, and private foreign and domestic investors) a significant number of state enterprises. However, to date the government continues to maintain control of the largest and most important companies. Despite reforms, the state share of GDP has remained relatively constant since 2000, at 38-39%.

Trade and Balance of Payments

From the late 1970s until the 1990s, Vietnam was heavily dependent on the Soviet Union and its allies for trade and economic assistance. To compensate for drastic cuts in Soviet-bloc support after 1989, Vietnam liberalized trade, devalued its exchange rate to increase exports, and embarked on a policy of regional and international economic re-integration. Vietnam has demonstrated its commitment to trade liberalization in recent years, and integration with the world economy has become one of the cornerstones of its reform program. Vietnam has locked in its intention to create a more competitive and open economy by committing to several comprehensive international trade agreements, including the Association of Southeast Asian Nations (ASEAN) Free Trade Area (AFTA) and the U.S.-Vietnam Bilateral Trade Agreement (BTA). Vietnam's accession to the World Trade Organization further integrated Vietnam into the global economy.

As a result of these reforms, exports expanded significantly, growing by as much as 20%-30% in some years. In 2007, exports accounted for 68% of GDP. Imports have also grown rapidly, and Vietnam has a significant trade deficit ($12.4 billion in 2007). Vietnam's total external debt, amounting to 27% of GDP in 2007, was estimated at around $19.3 billion.

FOREIGN RELATIONS

During the second Indochina war (1954-75), North Vietnam balanced relations with its two major allies, the Soviet Union and China. By 1975, tension began to grow as Beijing increasingly viewed Vietnam as a potential Soviet instrument to encircle China. Meanwhile, Beijing's increasing support for Cambodia's Khmer Rouge sparked Vietnamese suspicions of China's motives.

Vietnamese-Chinese relations deteriorated significantly after Hanoi instituted a ban in March 1978 on private trade, mostly affecting Sino-Vietnamese. Following Vietnam's December 1978 invasion of Cambodia, China launched a retaliatory incursion over Vietnam's northern border. Faced with severance of Chinese aid and strained international relations, Vietnam established even closer ties with the Soviet Union and its allies in the Council for Mutual Economic Assistance (Comecon). Through the 1980s, Vietnam received nearly $3 billion a year in economic and military aid from the Soviet Union and conducted most of its trade with that country and with other Council for Mutual Economic Assistance countries. However, Soviet and East bloc economic aid ceased after the breakup of the Soviet Union.

Vietnam did not begin to emerge from international isolation until it withdrew its troops from Cambodia in 1989. Within months of the 1991 Paris Agreements, Vietnam established diplomatic and economic relations with ASEAN as well as with most of the countries of Western Europe and Northeast Asia. China reestablished full diplomatic ties with Vietnam in 1991, and the two countries continue their joint efforts to demarcate their land and sea borders, expand trade and investment ties, and build political relations. In the past decade, Vietnam has recognized the increasing importance of growing global economic interdependence and has made concerted efforts to adjust its foreign relations to reflect the evolving international economic and political situation in Southeast Asia. The country has begun to integrate itself into the regional and global economy by joining international organizations. Vietnam has stepped up its efforts to attract foreign capital from the West and regularize relations with the world financial system.

In the 1990s, following the lifting of the American veto on multilateral loans to the country, Vietnam became a member of the World Bank, the International Monetary Fund, and the Asian Development Bank. The country has expanded trade with its East Asian neighbors as well as with countries in Western Europe and North America. Of particular significance was Vietnam's acceptance into the Association of Southeast Asian Nations (ASEAN) in July 1995. In recent years, Vietnam's influence in ASEAN has expanded significantly. In addition, Vietnam joined the Asia-Pacific Economic Cooperation forum (APEC) in November 1998 and hosted the ASEAN summit in 2001 and APEC in 2006. In October 2007, Vietnam was elected for the first time to the United Nations Security Council, to serve a two-year term starting on January 1, 2008.

While Vietnam has not experienced war since its withdrawal from Cambodia, tensions have periodically flared between Vietnam and China, primarily over their overlapping maritime claims in the South China Sea. Vietnam and China each assert claims to the Spratly and Paracel Islands, archipelagos in the potentially oil-rich area of the South China Sea. Several other countries (Malaysia, the Philippines, Taiwan) claim all or part of the South China Sea. Over the years, conflicting claims have produced small-scale armed altercations in the area; in 1988, 70 Vietnamese sailors died in a confrontation with China in the Spratlies. China's asser-

tion of "indisputable sovereignty" over the Spratly Islands and the entire South China Sea has elicited concern from Vietnam and its Southeast Asia neighbors. Tensions escalated in the latter half of 2007, as China pressured foreign oil companies, notably BP, to abandon their oil and gas exploration contracts with Vietnam in the South China Sea. Vietnamese students staged several anti-China demonstrations in response, prompting a warning from the Chinese Foreign Ministry spokesman that Hanoi's failure to quell the demonstrations was harming relations. By contrast, Vietnam has made progress with China in delineating its northern land border and the Gulf of Tonkin, pursuant to a Land Border Agreement signed in December 1999, and an Agreement on Borders in the Gulf of Tonkin signed in December 2000.

U.S.-VIETNAM RELATIONS

After a 20-year hiatus of severed ties, President Clinton announced the formal normalization of diplomatic relations with Vietnam on July 11, 1995. Subsequent to President Clinton's normalization announcement, in August 1995, both nations upgraded their Liaison Offices opened during January 1995 to embassy status. As diplomatic ties between the nations grew, the United States opened a consulate general in Ho Chi Minh City, and Vietnam opened a consulate in San Francisco.

U.S. relations with Vietnam have become increasingly cooperative and broad-based in the years since political normalization. A series of bilateral summits have helped drive the improvement of ties, including President Bush's visit to Hanoi in November 2006, President Triet's visit to Washington in June 2007, and Prime Minister Dung's visit to Washington in June 2008. The two countries hold an annual dialogue on human rights, resumed in 2006 after a two-year hiatus. They signed a Bilateral Trade Agreement in July 2000, which went into force in December 2001. In 2003, the two countries signed a Counternarcotics Letter of Agreement (amended in 2006), a Civil Aviation Agreement, and a textile agreement. In January 2007, Congress approved Permanent Normal Trade Relations (PNTR) for Vietnam. In June 2008, the U.S. and Vietnam agreed to hold political-military talks and policy planning talks to consult on regional security and strategic issues. Bilateral diplomatic engagement expanded at ASEAN and APEC, and with Vietnam's January 2008 start of a two-year term on the UN Security Council.

Vietnam's suppression of political dissent continued to be the main issue of contention in relations with the U.S., drawing criticism from the administration and Congress. In spring 2007, Vietnam's government launched a crackdown on political dissidents, and in November the same year arrested a group of pro-democracy activists, including two Americans. By May 2008, all Americans had been released. In contrast, Vietnam continued to make significant progress on expanding religious freedom. In 2005, Vietnam passed comprehensive religious freedom legislation, outlawing forced renunciations and permitting the official recognition of new denominations. As a result, in November 2006, the Department of State lifted the designation of Vietnam as a "Country of Particular Concern," based on a determination that the country was no longer a serious violator of religious freedoms, as defined by the International Religious Freedom Act. This decision was reaffirmed by the Department of State in November 2007. The government's harassment of certain religious leaders for their political activism, including leaders of the outlawed United Buddhist Church of Vietnam, was an ongoing source of U.S. concern.

As of December 14, 2007, the U.S. Government listed 1,763 Americans unaccounted for in Southeast Asia, including 1,353 in Vietnam. Since 1973, 883 Americans have been accounted for, including 627 in Vietnam. Additionally, the Department of Defense has confirmed that of the 196 individuals who were "last known alive" (LKA), the U.S. Government has determined the fate of all but 31. The United States considers achieving the fullest possible accounting of Americans missing and unaccounted for in Indochina to be one of its highest priorities with Vietnam.

Since entry into force of the U.S.-Vietnam Bilateral Trade Agreement on December 10, 2001, increased trade between the U.S. and Vietnam, combined with large-scale U.S. investment in Vietnam, evidence the maturing U.S.-Vietnam economic relationship. In 2007, the United States exported $1.9 billion of goods to Vietnam and imported $10.6 billion of goods from Vietnam. Similarly, U.S. companies continue to invest directly in the Vietnamese economy. During 2006, the U.S. private sector committed $444 million to Vietnam in foreign direct investment. This number is expected to rise dramatically following Vietnam's accession into the WTO.

Another sign of the expanding bilateral relationship is the signing of a Bilateral Air Transport Agreement in December 2003. Several U.S. carriers already have third-party code sharing agreements with Vietnam Airlines. Direct flights between Ho Chi Minh City and San Francisco began in December 2004. Vietnam and the United States also signed a Bilateral Maritime Agreement in March 2007 that opened the maritime transport and services industry of Vietnam to U.S. firms.

Cooperation in other areas, such as defense engagement, nonproliferation, and law enforcement, is also expanding steadily. Prime Minister Dung announced during his June 2008 visit to the U.S. that Vietnam plans to take part in peacekeeper training under the U.S.-funded, multinational Global Peace Operations Initiative (GPOI). In June 2008, Vietnam hosted a port call to Nha Trang by the hospital ship USNS Mercy, providing medical and dental treatment to over 11,000 Vietnamese patients. This followed Vietnam's hosting of visits by five U.S. Navy ves-

sels in 2007, including a port call to Danang by the humanitarian supply ship USS Peleliu, whose personnel carried out numerous medical and engineering projects.

Also in June 2008, Vietnamese observers took part for the second successive year in the multinational naval exercise Cooperation Afloat Readiness and Training (CARAT), organized by the U.S. Pacific Fleet.

TRAVEL

Consular Information Sheet

November 10, 2008

Country Description: Vietnam is a developing, mainly agrarian country in the process of moving from a centrally planned to a market economy. Political control rests in the Communist Party. Tourist facilities are not well established, but are improving in certain areas, especially in Hanoi, Ho Chi Minh City, and some beach and mountain resorts.

Entry Requirements: A valid passport and Vietnamese visa or visa exemption document are required. A visa or visa exemption document must be obtained from a Vietnamese Embassy or Consulate prior to traveling to Vietnam; entry visas are not available upon arrival. Americans arriving without an appropriate Vietnamese visa or exemption document will not be permitted to enter, and will be subject to immediate deportation. Vietnamese visas are usually valid for only one entry. Persons planning to leave Vietnam and re-enter from another country should be sure to obtain a visa allowing multiple entries.

Even while in possession of a valid visa, some travelers have been refused entry to Vietnam. U.S. citizens are cautioned that Vietnamese immigration regulations require foreigners entering Vietnam to undertake only the activity for which their visas were issued. A change in the purpose of your visit requires permission in advance from the appropriate Vietnamese authority. U.S. citizens whose stated purpose of travel was tourism, but who engaged in religious proselytizing have had religious materials confiscated and have been expelled from Vietnam. An American whose U.S. passport is lost or stolen in Vietnam must obtain both a replacement passport and a replacement Vietnamese visa. The U.S. Embassy and Consulate General can issue limited validity emergency replacement passports in as little as one day, but the Vietnamese government requires three working days, not to include the day of application, to issue a replacement visa. Neither the U.S. Embassy nor the Consulate General can expedite replacement Vietnamese visas.

Current information on visa and entry requirements may be obtained from the Vietnamese Embassy (http://www.vietnamembassy-usa.org/), 1233 20th Street NW, Suite 400, Washington, DC 20036, tel: 202-861-0737, fax: 202-861-0917, the Vietnamese Consulate General, 1700 California Street - Suite 430, San Francisco, CA 94109, tel: (415) 922-1707, fax: 415-922-1848, or from the nearest Vietnamese embassy or consulate overseas.

Safety and Security: Official U.S. personnel and tourists are sometimes not authorized to travel to the Central Highland areas without prior consent from the Government of Vietnam. These travel limitations may hinder the ability of the U.S. Government to provide assistance to private U.S. citizens in those areas.

U.S. citizens have been detained after traveling in areas close to the Vietnamese borders with China, Cambodia and Laos. These areas are not always marked, and there are no warnings about prohibited travel.

Travelers should avoid such areas unless written permission is obtained in advance from local authorities.

Large gatherings, such as those forming at the scene of traffic accidents, can become violent, and should be avoided.

For the latest security information, Americans traveling abroad should regularly monitor the Department's Internet web site where the current Travel Warnings and Travel Alerts, including the Worldwide Caution Travel Alert, can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S. and Canada, or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: Cities in Vietnam have the crime problems typical of many other large cities throughout the world. Pick-pocketing and other petty crimes occur regularly. Although violent crimes such as armed robbery are still relatively rare in Vietnam, perpetrators have grown increasingly bold, and the U.S. Consulate General has received recent reports of knives and razors being used in attempted robberies in Ho Chi Minh City. Thieves congregate around hotels frequented by foreign tourists and business people, and assaults have been reported in outlying areas. The evolving nature of incidents warrants caution on the part of the U.S. traveler. Travelers are advised not to resist theft attempts, and to report them both to police and to the U.S. Embassy in Hanoi or the U.S. Consulate General in Ho Chi Minh City.

Motorcyclists are known to snatch bags, cameras and other valuables from pedestrians or passengers riding in "cyclos" (pedicabs) or riding on the back of rented motorcycles. Serious injuries have resulted when thieves snatched purses or bags that were strapped across their victims' bodies, resulting in the victim being dragged along the ground by the thief's motorcycle.

Passengers riding in cyclos (pedicabs) may be especially prone to thefts of personal possessions by snatch-and-grab thieves, because they ride in a semi-reclining position that readily exposes their belongings and does not allow good visibility or movement. As some cyclo drivers have reportedly kidnapped passengers and extorted money, it may be risky to hire cyclos not associated with reputable hotels or restaurants.

Travelers are strongly advised to keep passports and other important valuables in hotel safes or other secure locations. Travelers are advised to carry a photocopy of their passport with them when going out. The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the U.S. Embassy or the U.S. Consulate General. U.S. citizens must obtain a police report from the local police office in order to apply for a replacement passport and a Vietnamese exit visa.

Travelers should take precaution in choosing ground transportation upon arrival at the airports in Hanoi and HCMC. Some travelers have reported being robbed by drivers who had greeted them upon arrival with a placard showing the traveler's name. If one is expecting to be picked up, ensure that the driver truly knows who they are picking up and where they are taking them. It is best to stick with only airport taxis or vehicles provided by hotels. Several times in the past year in Hanoi, people have been extorted by taxi drivers who took them from the airport to flophouses masquerading as hotels. Travelers should be familiar with the hotel they have chosen.

There have been occasional reports of incidents in which an unknown substance was used to taint drinks, leaving the victim susceptible to further criminal acts. Travelers are advised to avoid leaving drinks or food unattended and to avoid going to unfamiliar venues alone. Travelers should also avoid purchasing liquor from street vendors, as the quality of the contents cannot be assured.

Recreational drugs available in Vietnam can be extremely potent, and more than one American has died of an accidental overdose of drugs. Penalties for possession of drugs of any kind are severe.

Some U.S. citizens have reported threats of death or physical injury related to personal business disputes. The U.S. Embassy and the U.S. Consulate General do not provide personal protection services. U.S. citizens who do not have confidence in the ability of the local police to protect them may wish to depart the country expeditiously.

In many countries around the world, counterfeit and pirated goods are widely available. Transactions involving such products may be illegal under local law. In addition, bringing them back to the United States may result in forfeitures and/or fines. More information on this serious problem is available at http://www.cybercrime.gov/18usc2320.htm.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. embassy or consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. embassy or consulate for assistance. The embassy/consulate staff can, for example, assist you to find appropriate medical care, contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed. In Hanoi, the American Citizen Services (ACS) office is located at Rose Garden Tower, #170 Ngoc Khanh, Hanoi. Telephone number is (84-4) 3831-4590 Monday thru Friday and (84-4) 3850-5000 Main Embassy Fax; 3850-5010, after business hours and weekends. In Ho Chi Minh City, the ACS office is located in the U.S. Consulate General 4 Le Duan St., Dist. 1, Ho Chi Minh City, telephone (84-8) 3520-4200.

In Vietnam, the local equivalents to the "911" line are 113 for police, 114 for Fire, and 115 for Ambulance.

Medical Facilities and Health Information: Medical facilities in Vietnam do not meet international standards and frequently lack medicines and supplies. Medical personnel in Vietnam, particularly outside Hanoi and Ho Chi Minh City, may speak little or no English. Doctors and hospitals expect immediate cash payment for health services. International health clinics in Hanoi and Ho Chi Minh City can provide acceptable care for minor illnesses and injuries, but more serious problems will often require medical evacuation to Bangkok or Singapore. Although many medications can be purchased at pharmacies without having a prescription, some common U.S. medications are not available in Vietnam. Travelers should bring adequate supplies of their medications for their duration of their stay in Vietnam. Travelers may obtain lists of local English-speaking physicians from the U.S. Embassy in Hanoi or the United States Consulate General in Ho Chi Minh City. Travelers are reminded that neither office may recommend specific medical practitioners or hospitals. Emergency medical response services are generally unresponsive, unreliable, or completely unavailable.

Travelers should be cautious about drinking non-bottled water and about using ice cubes in drinks. Travelers may wish to drink only bottled or canned beverages, or beverages that have been boiled (such as hot tea and coffee).

Since December of 2007, Hanoi and provinces in northern Vietnam have seen an episodic resurgence of severe acute diarrhea known to be cholera. For more information on cholera, please visit CDC's web site at http://www.cdc.gov.

Travelers to Vietnam and other Southeast Asian countries affected by avian influenza are cautioned to avoid poultry farms, contact with animals in live food markets, and any surfaces that appear to be contaminated with feces from poultry or other animals. Tuberculosis is a serious health concern in Vietnam. For further information, please consult the CDC's Travel Notice on TB and other CDC resources at http://wwwn.cdc.gov/travel.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's (CDC) hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's Internet site. For information about outbreaks of infectious diseases abroad, consult the World Health Organization's (WHO) website. Further health information for travelers is available at http://www.who.int/ith.

The U.S. Department of State is unaware of any HIV/AIDS entry restrictions for visitors to or foreign residents of Vietnam.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Vietnam is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

Traffic in Vietnam is chaotic. Traffic accidents occur frequently and the most common victims are motorbike riders and pedestrians. At least 30 people die each day from transportation-related injuries and many more are injured, often with traumatic head injuries. Traffic accident injuries are the leading cause of death, severe injury, and emergency evacuation of foreigners in Vietnam. Traffic accidents, including those involving a pedestrian and a motorized vehicle, are the single greatest health and safety risk U.S. citizens will face in Vietnam.

Traffic moves on the right, although drivers frequently cross to the left to pass or turn, and motorcycles and bicycles often travel (illegally) against the flow of traffic. Horns are used constantly, often for no apparent reason. Streets in major cities are choked with motorcycles, cars, buses, trucks, bicycles, pedestrians and cyclos. Outside the cities, livestock compete with vehicles for road space. Sudden stops by motorcycles and bicycles make driving a particular hazard. Nationwide, drivers do not follow basic traffic principles, vehicles do not yield right of way, and there is little adherence to traffic laws or enforcement by traffic police. The number of traffic lights in Hanoi and Ho Chi Minh City is increasing, but red lights are often not obeyed. Most Vietnamese ride motorcycles; often an entire family rides on one motorcycle.

Road conditions are poor nationwide. Numerous tragic accidents have occurred due to poor road conditions that resulted in landslides, and American travelers have lost their lives in this way. Travelers should exercise extra caution in the countryside, as road conditions are particularly poor in rural areas.

Driving at night is especially dangerous and drivers should exercise extreme caution. Roads are poorly lit, and there are few road signs. Buses and trucks often travel at high speed with bright lights that are rarely dimmed. Some motor vehicles may not use lights at all, vehicles of all types often stop in the road without any illumination, and livestock are likely to be encountered.

Motorcyclists and bicyclists are strongly urged to wear helmets. Passengers in cars or taxis should use seatbelts when available, but should be aware that Vietnamese vehicles often are not equipped with working seatbelts. A law mandating the use of motorcycle helmets on all roads went into effect on December 15, 2007, and is strictly enforced Child car seats are

not available in Vietnam. Penalties for driving under the influence of alcohol or causing an accident resulting in injury or death can include fines, confiscation of driving permits or imprisonment. U.S. citizens involved in traffic accidents have been barred from leaving Vietnam before paying compensation (often determined arbitrarily) for property damage or injuries.

Emergency roadside help is theoretically available nationwide by dialing 113 for police, 114 for fire brigade and 115 for an ambulance. Efficiency of these services is well below U.S. standards, however, and locating a public telephone is often difficult or impossible. Trauma care is not widely available.

The urban speed limit ranges from 30 to 40 km/h. The rural speed limit ranges from 40 to 60 km/h. Both speed limits are routinely ignored. Pedestrians should be careful, as sidewalks are extremely congested and uneven, and drivers of bicycles, motorcycles and other vehicles routinely ignore traffic signals and traffic flows, and even drive on sidewalks. For safety, pedestrians should look carefully in both directions before crossing streets, even when using a marked crosswalk with a green "walk" light illuminated.

International driving permits and U.S. drivers' licenses are not valid in Vietnam. Foreigners renting vehicles risk prosecution and/or imprisonment for driving without a Vietnamese license endorsed for the appropriate vehicle. Americans who wish to drive in Vietnam should contact any office of the Provincial Public Transportation Service of the Vietnamese Department of Communications and Transport to obtain a Vietnamese driver's license. The U.S. Embassy in Hanoi and Consulate General in Ho Chi Minh City cannot assist U.S. citizens in obtaining Vietnamese driver's permits or notarize U.S. drivers' licenses for use in Vietnam.

Most Vietnamese travel within Vietnam by long-distance bus or train. Both are slow, and safety conditions do not approach U.S. standards. Local buses and taxis are available in some areas, particularly in the larger cities. Safety standards vary widely depending on the individual company operating the service, but are generally much lower than what would be found in the U.S.

Aviation Safety Oversight: As there is no direct commercial air service to the United States by carriers registered in Vietnam, the U.S. Federal Aviation Administration (FAA) has not assessed the Government of Vietnam's Civil Aviation Authority for compliance with International Civil Aviation Organization (ICAO) aviation safety standards. For more information, travelers may visit the FAA's web site athttp://www.faa.gov.

Special Circumstances: Hotels in Vietnam require that foreigners present their passports (and visas, if issued separately) upon check-in so that their stay can be registered with local police. Therefore, Americans should be sure to carry these documents with them when changing lodging. Every guest in a hotel room must be registered and foreigners are generally not allowed to share accommodations with Vietnamese nationals.

Currency: Foreign currency (including cash and travelers' checks) in excess of US$7,000, cash exceeding Vietnamese Dong (VND) 15,000,000, and gold exceeding 300 grams must be declared at customs upon arrival and departure.

There is no limitation on either the export or import of U.S. dollars or other foreign currency by U.S. citizens, provided that all currency in excess of US$7,000 (or its equivalent in other foreign currencies) or in excess of VND 15,000,000 in cash is declared upon arrival and departure, and supported by appropriate documentation. If excess cash is not declared, it can be confiscated at the port of entry/exit and the passenger may be arrested and/or fined.

Exports: Vietnamese law prohibits the export of antiques, but the laws on the subject are vague and unevenly enforced. Antique objects are subject to inspection and seizure by customs authorities with no compensation made to owners/travelers. The determination of what is an "antique" can be arbitrary. Purchasers of non-antique items of value should retain receipts and confirmation from shop owners and/or the Ministry of Culture and the Customs Department to prevent seizure upon departure.

Imports: Vietnamese government authorities have seized documents, audio and video tapes, compact discs, literature, and personal letters they deem to be pornographic or political in nature, or intended for religious or political proselytizing. Individuals arriving at airports with videotapes or materials considered to be pornographic have been detained and heavily fined (up to U.S. $2,000 for one videotape). It is illegal to import weapons, ammunition, explosives, military equipment and tools, narcotics, drugs, toxic chemicals, pornographic and subversive materials, firecrackers, children's toys that have "negative effects on personality development, social order and security," or cigarettes in excess of the stipulated allowance.

Speech: The Government of Vietnam maintains strict control over all forms of political speech, particularly dissent. Persons—both Vietnamese and visiting foreigners—engaging in public actions that the Government of Vietnam determines to be political in nature can be subject to arrest and detention. Even private conversations can lead to legal actions. American citizens have been detained and arrested for political activities (including criticizing the government or its domestic/foreign policies, or advocating alternatives to Communist Party rule), possession of political material, or non-sanctioned religious activities (including proselytizing). Sponsors of small, informal religious gatherings such as Bible-study groups in hotel rooms, have been detained, fined and expelled, although this has become much less common due to significant improvements in religious freedom.

Association with Groups: Persons whom the Government of Vietnam perceives to be associated with dissident political groups may be denied entry to Vietnam or prevented from departing Vietnam after a visit. In a number of cases, the plane tickets and personal property of such individuals have been confiscated and the individuals forced to spend extended periods in Vietnam at their own expense while undergoing extensive police interrogation. In addition, Vietnamese security personnel may place foreign visitors under surveillance. Hotel rooms, telephone conversations, fax transmissions, and e-mail communications may be monitored, and personal possessions in hotel rooms may be searched.

Local security officials have called in some U.S. citizens of Vietnamese origin for "discussions" not related to any suspected or alleged violation of law. These meetings normally do not result in any action against the traveler, but are nevertheless intimidating.

Photography: Taking photographs of anything that could be perceived as being of military or security interest may result in problems with authorities. Tourists should be cautious when traveling near military bases and avoid photographing in these areas.

Property: Foreigners are generally not allowed to purchase real property in Vietnam. Because Vietnamese laws governing real estate differ substantially from those in the United States, U.S. citizens may wish to consult with competent legal counsel before entering into any transaction. American citizens should exercise extreme caution if entering into any transaction through a third-party.

Disputes: The Vietnamese government has occasionally seized the passports and blocked the departure of foreigners involved in commercial disputes. The U.S. Embassy or Consulate General may issue a new passport to a U.S. citizen in such a situation, but the Vietnamese exit ban could remain in effect, preventing departure.

Notification and Access: A 1994 agreement between the United States and Vietnam provides for immediate notification of and reciprocal access within 96 hours to each other's detained citizens. Bearers of U.S. passports, who enter Vietnam with a Vietnamese visa, including those of Vietnamese origin, are regarded as U.S. citizens by the U.S. Government for purposes of notification and access. Therefore, U.S. citizens are encouraged to carry photocopies of passport data and photo pages with them at all times so that, if questioned by Vietnamese officials, proof of U.S. citizenship is readily available.

Despite the 1994 agreement, U.S. consular officers in Vietnam are rarely notified in a timely manner when a U.S. citizen is arrested or detained. There have also generally been very significant delays in U.S. consular officers obtaining access to incarcerated U.S. citizens. This has been particularly true when the U.S. citizen is being held during the investigatory stage that Vietnamese officials do not consider as covered by the bilateral agreement. The investigatory stage can last up to one year, and often proceeds without the formal filing of any charges. Americans should note that the problem of access has been particularly evident when the U.S. citizen is considered by the Vietnamese government to be a citizen of Vietnam, irrespective of proof of U.S. citizenship. According to the 1994 agreement, U.S. citizens, even dual citizens, have the right to consular access if they were admitted into Vietnam as a U.S. citizen with their U.S. passport, and should insist upon contact with the U.S. Embassy or the U.S. Consulate General.

Civil Procedures: Civil procedures in Vietnam, such as marriage, divorce, documenting the birth of a child, and issuance of death certificates, are highly bureaucratic, painstakingly slow, and often require chain authentication. Please contact the Vietnamese Embassy in Washington, DC or the Vietnamese Consulate General in San Francisco concerning documentary requirements for these services.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating Vietnamese laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Vietnam are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in Vietnam are encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration website, and to obtain updated information on travel and security within Vietnam. Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency. The Consular Section of the U.S. Embassy in Hanoi is located at 6 Ngoc Khanh, Ba Dinh District, Hanoi, Socialist Republic of Vietnam, telephone: (84-4) 850-5000; after hours emergency telephone number: (84-4) 850-5000; fax: (84-4) 850-5010.

The U.S. Consulate General in Ho Chi Minh City is located at 4 Le Duan, District 1, Ho Chi Minh City, Socialist Republic of Vietnam, telephone: (84-8) 822-9433; fax: (84-8) 822-9434.

Intercountry Adoption
November 2008

The information in this section has been edited from a report available through the U.S. Department of State Office of Children's Issues. For more information detailed, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Vietnam is not party to The Hague Convention on Protection of Children and Co-operation in Respect of Intercountry Adoption (Hague Adoption Convention). On June 21, 2005, the United States and Vietnam signed a bilateral agreement on intercountry adoption. The current Memorandum of Agreement (MOA) between the United States and Vietnam expired on September 1, 2008. As a result, intercountry adoption is suspended until a new MOA is signed and implemented. If a child had been referred to a family by September 1, 2008 and approved by the Vietnam Department of Intercountry Adoptions, the adoption can proceed to completion. A referral has occurred once DIA sends a letter to the prospective adoptive parents informing them that both DIA and provincial authorities have agreed to a particular child's match.

Prospective adoptive parents who have a pending dossier with the Government of Vietnam should be aware that documents relating to adoptions in Vietnam, such as birth certificates, abandonment reports, relinquishment agreements, and investigative reports are generally issued by orphanage directors, local People's Committees, Provincial Departments, and the Department for Intercountry Adoptions (DIA). The facts asserted in these documents are not verified by the issuing officials. Attempts by U.S. officials to verify the accuracy of these documents frequently uncover evidence of fraudulent or inaccurate information. Therefore, documents issued by the authorities listed above, and any other documents containing information not verified by the issuing authority, may not be considered adequate evidence of the facts claimed. They may be used in conjunction with primary and contemporaneous secondary evidence, or must be independently verified by U.S. officials in Vietnam, before they can be considered valid for immigration purposes.

The U.S. Citizenship and Immigration Service and the Department of State have instituted procedures to verify that children identified for placement meet the requirements of Vietnamese and U.S. law, before the child has been adopted under Vietnamese law. Information about these procedures is available from USCIS. The Embassy strongly advises prospective adoptive parents not to travel to Vietnam until they have received notification from the Embassy that their case is ready for final processing and travel is appropriate. Parents should contact the Embassy immediately if anyone, including their adoption service provider, encourages them to travel to Vietnam prior to receiving this notification. The Embassy can work together with adoption service providers, Vietnam's Department of Intercountry Adoptions, and local authorities to resolve issues such as the scheduling of a Giving and Receiving Ceremony.

YEMEN

Compiled from the December 2007 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Republic of Yemen

PROFILE

Geography

Area: 527,970 sq. km. (203,796 sq. mi.); about the size of California and Pennsylvania combined.

Cities: Capital—Sanaa. Other cities—Aden, Taiz, Hodeida, and al-Mukalla.

Terrain: Mountainous interior bordered by desert with a flat and sandy coastal plain.

Climate: Temperate in the mountainous regions in the western part of the country, extremely hot with minimal rainfall in the remainder of the country. Humid on the coast.

People

Nationality: Noun and adjective—Yemeni(s).

Population: (July 2007 est.) 22,230,531.

Annual growth rate: 3%.

Ethnic groups: Predominantly Arab.

Religions: Islam, small numbers of Jews, Christians, and Hindus.

Languages: Arabic.

Education: Attendance (2004 est.)—80% for boys at the primary level and 50% for girls. Attendance was 55% for boys at the secondary level and 22% for girls. Literacy (2004 est.)—50% overall, including 70% of males, 30% of females.

Health: Infant mortality rate—76/1,000 live births. Life expectancy—62 years.

Work force: (by sector) Agriculture—53%; public services—17%; manufacturing—4%; construction—7%; percentage of total population—25%.

Government

Type: Republic; unification (of former south and north Yemen) May 22, 1990.

Constitution: Adopted May 21, 1990 and ratified May 1991.

Government branches: Executive—president, and prime minister with cabinet. Legislative—bicameral legislature with 111-seat Shura Council and 301-seat House of Representatives. Judicial—the constitution calls for an independent judiciary. The former northern and southern legal codes have been unified. The legal system includes separate commercial courts and a Supreme Court based in Sanaa.

Political subdivisions: 19 governorates subdivided into districts.

Political parties: General People's Congress (GPC), Yemeni Grouping for Reform (Islah), Yemeni Socialist Party (YSP).

Suffrage: Universal over 18.

National holidays: May 22 (Unity Day).

Economy

GDP: (2006 est.) $20.4 billion.

Per capital GDP: (2006 est.) $723.

Natural resources: Oil, natural gas, fish and seafood, rock salt, minor deposits of coal and copper.

Agriculture: (est. 12.5% of GDP) Products—qat (a shrub containing a natural amphetamine), coffee, cotton, fruits, vegetables, cereals, livestock and poultry. Arable land (est.)—3%.

Industry: (est. 42.8% of GDP) Types—petroleum refining, mining, wholesale and retail trade, transportation, manufacturing, and construction.

Services: (est. 43.7% of GDP).

Trade: Exports (2006)—$7.2 billion: crude petroleum, refined oil products, seafood, fruits, vegetables, hides, tobacco products. Major markets—China, Thailand, India, South Korea, United States, Switzerland. Imports (2006)—$5 billion: petroleum products, cereals, feed grains, foodstuffs, machinery, transportation equipment, iron, sugar, honey. Major suppliers—United Arab Emirates, China, Saudi Arabia, Switzerland, Kuwait.

Exchange rate: (2006) Market rate 199 rials per U.S. $1. The Yemeni rial (YR) floats freely based on an average of foreign currencies. Since the floating of the YR, the market usually reflects the official rate of exchange.

PEOPLE

Unlike other people of the Arabian Peninsula who have historically been nomads or semi-nomads, Yemenis are almost entirely sedentary and live in small villages and towns scattered throughout the highlands and coastal regions.

Yemenis are divided into two principal Islamic religious groups: the Shia Zaidi sect, found in the north and northwest, and the Shafa'i school of Sunni Muslims, found in the south and southeast. Yemenis are mainly of Semitic origin, although African strains are present among inhabitants of the coastal region. Arabic is the official language, although English is increasingly understood in major cities. In the Mahra area (the extreme east), several non-Arabic languages are spoken. When the former states of north and south Yemen were established, most resident minority groups departed.

HISTORY

Yemen was one of the oldest centers of civilization in the Near East. Between the 12th century BC and the 6th century AD, it was part of the Minaean, Sabaean, and Himyarite kingdoms, which controlled the lucrative spice trade, and later came under Ethiopian and Persian rule. In the 7th century, Islamic caliphs began to exert control over the area. After this caliphate broke up, the former north Yemen came under control of Imams of various dynasties usually of the Zaidi sect, who established a theocratic political structure that survived until modern times. (Imam is a religious term. The Shi'ites apply it to the prophet Muhammad's son-in-law Ali, his sons Hassan and Hussein, and subsequent lineal descendants, whom they consider to have been divinely ordained unclassified successors of the prophet.)

Egyptian Sunni caliphs occupied much of north Yemen throughout the 11th century. By the 16th century and again in the 19th century, north Yemen was part of the Ottoman Empire, and in some periods its Imams exerted control over south Yemen.

Former North Yemen

Ottoman control was largely confined to cities with the Imam's suzerainty over tribal areas formally recognized. Turkish forces withdrew in 1918, and Imam Yahya strengthened his control over north Yemen. Yemen became a member of the Arab league in 1945 and the United Nations in 1947.

Imam Yahya died during an unsuccessful coup attempt in 1948 and was succeeded by his son Ahmad, who ruled until his death in September 1962. Imam Ahmad's reign was marked by growing repression, renewed friction with the United Kingdom over the British presence in the south, and growing pressures to support the Arab nationalist objectives of Egyptian President Gamal Abdul Nasser.

Shortly after assuming power in 1962, Ahmad's son, Badr, was deposed by revolutionary forces, which took control of Sanaa and created the Yemen Arab Republic (YAR). Egypt assisted the YAR with troops and supplies to combat forces loyal to the Imamate. Saudi Arabia and Jordan supported Badr's royalist forces to oppose the newly formed republic. Conflict continued periodically until 1967 when Egyptian troops were withdrawn. By 1968, following a final royalist siege of Sanaa, most of the opposing leaders reconciled; Saudi Arabia recognized the Republic in 1970.

Former South Yemen

British influence increased in the south and eastern portion of Yemen after the British captured the port of Aden in 1839. It was ruled as part of British India until 1937, when Aden was made a crown colony with the remaining land designated as east Aden and west Aden protectorates. By 1965, most of the tribal states within the protectorates and the Aden colony proper had joined to form the British-sponsored federation of south Arabia.

In 1965, two rival nationalist groups—the Front for the Liberation of Occupied South Yemen (FLOSY) and the National Liberation Front (NLF)—turned to terrorism in their struggle to control the country. In 1967, in the face of uncontrollable violence, British troops began withdrawing, federation rule collapsed, and NLF elements took control after eliminating their FLOSY rivals. South Arabia, including Aden, was declared independent on November 30, 1967, and was renamed the People's Republic of South Yemen. In June 1969, a radical wing of the Marxist NLF gained power and changed the country's name on December 1, 1970, to the People's Democratic Republic of Yemen (PDRY). In the PDRY, all political parties were amalgamated into the Yemeni Socialist Party (YSP), which became the only legal party. The PDRY established close ties with the Soviet Union, China, Cuba, and radical Palestinians.

Republic of Yemen

In 1972, the governments of the PDRY and the YAR declared that they approved a future union. However, little progress was made toward unification, and relations were often strained. In 1979, simmering tensions led to fighting, which was only resolved after Arab League mediation. The northern and southern heads of state reaffirmed the goal of unity during a summit meeting in Kuwait in March 1979. However, that same year the PDRY began sponsoring an insurgency against the YAR. In April 1980, PDRY President Abdul Fattah Ismail resigned and went into exile. His successor, Ali Nasir Muhammad, took a less interventionist stance toward both the YAR and neighboring Oman. On January 13, 1986, a violent struggle began in Aden between Ali Nasir Muhammad and the returned Abdul Fattah Ismail and their supporters. Fighting lasted for more than a month and resulted in thousands of casualties, Ali Nasir's ouster, and Ismail's death. Some 60,000 persons, including Ali Nasir and his supporters, fled to the YAR.

In May 1988, the YAR and PDRY governments came to an understanding that considerably reduced tensions including agreement to renew discussions concerning unification, to establish a joint oil exploration area along their undefined border, to demilitarize the border, and to allow Yemenis unrestricted border passage on the basis of only a national identification card.

In November 1989, the leaders of the YAR (Ali Abdullah Saleh) and the PDRY (Ali Salim Al-Bidh) agreed on a draft unity constitution originally drawn up in 1981. The Republic of Yemen (ROY) was declared on May 22, 1990. Ali Abdullah Saleh became President, and Ali Salim Al-Bidh became Vice President.

A 30-month transitional period for completing the unification of the two political and economic systems was set. A presidential council was jointly elected by the 26-member YAR advisory council and the 17-member PDRY presidium. The presidential council appointed a Prime Minister, who formed a Cabinet. There was also a 301-seat provisional unified Parliament, consisting of 159 members from the north, 111 members from the south, and 31 independent members appointed by the chairman of the council.

A unity constitution was agreed upon in May 1990 and ratified by the populace in May 1991. It affirmed Yemen's commitment to free elections, a multiparty political system, the right to own private property, equality under the law, and respect of basic human rights. Parliamentary elections were held on April 27, 1993. International groups assisted in the organization of

the elections and observed actual balloting. The resulting Parliament included 143 GPC, 69 YSP, 63 Islah (Yemeni Grouping for Reform, a party composed of various tribal and religious groups). The head of Islah, Paramount Hashid Sheik Abdullah Bin Hussein Al-Ahmar, was elected speaker of Parliament, and continues in that capacity.

Islah was invited into the ruling coalition, and the presidential council was altered to include one Islah member. Conflicts within the coalition resulted in the self-imposed exile of Vice President Ali Salim Al-Bidh to Aden beginning in August 1993 and a deterioration in the general security situation as political rivals settled scores and tribal elements took advantage of the unsettled situation.

Haydar Abu Bakr Al-Attas (former southern Prime Minister) continued to serve as the ROY Prime Minister, but his government was ineffective due to political infighting. Continuous negotiations between northern and southern leaders resulted in the signing of the document of pledge and accord in Amman, Jordan on February 20, 1994. Despite this, clashes intensified until civil war broke out in early May 1994.

Almost all of the actual fighting in the 1994 civil war occurred in the southern part of the country despite air and missile attacks against cities and major installations in the north. Southerners sought support from neighboring states and received billions of dollars of equipment and financial assistance. The United States strongly supported Yemeni unity, but repeatedly called for a cease-fire and a return to the negotiating table. Various attempts, including by a UN special envoy, were unsuccessful in bringing about a cease-fire.

Southern leaders declared secession and the establishment of the Democratic Republic of Yemen (DRY) on May 21, 1994, but the DRY was not recognized by the international community. Ali Nasir Muhammad supporters greatly assisted military operations against the secessionists and Aden was captured on July 7, 1994. Other resistance quickly collapsed and thousands of southern leaders and military went into exile.

Early during the fighting, President Ali Abdullah Saleh announced a general amnesty, which applied to everyone except a list of 16 persons. Most southerners returned to Yemen after a short exile.

An armed opposition was announced from Saudi Arabia, but no significant incidents within Yemen materialized. The government prepared legal cases against four southern leaders—Ali Salim Al- Bidh, Haydar Abu Bakr Al-Attas, Abd Al-Rahman Ali Al-Jifri, and Salih Munassar Al-Siyali—for misappropriation of official funds. Abd Al-Rahman Ali Al-Rahman was allowed to return to Yemen in 2006. Others on the list of 16 were told informally they could return to take advantage of the amnesty, but most remained outside Yemen.

Although many of Ali Nasir Muhammad's followers were appointed to senior governmental positions (including Vice President, Chief of Staff, and Governor of Aden), Ali Nasir Muhammad himself remained abroad in Syria.

In the aftermath of the civil war, YSP leaders within Yemen reorganized the party and elected a new politburo in July 1994. However, the party remained disheartened and without its former influence.

In 1994, amendments to the unity constitution eliminated the presidential council. President Ali Abdullah Saleh was elected by Parliament on October 1, 1994 to a 5-year term. In April 1997, Yemen held its second multiparty parliamentary elections. The country held its first direct presidential elections in September 1999, electing President Ali Abdullah Saleh to a 5-year term in what were generally considered free and fair elections.

Constitutional amendments adopted in the summer of 2000 extended the presidential term by 2 years, creating a seven-year presidential term. The constitution provides that henceforth the President will be elected by popular vote from at least two candidates selected by the legislature.

The amendments also extended the parliamentary term of office to a 6-year term, with the next elections occurring in 2009. On February 20, 2001, a new constitutional amendment created a bicameral legislature consisting of a Shura Council (111 seats; members appointed by the president) and a House of Representatives (301 seats; members elected by popular vote). In April 2003, the third multiparty parliamentary elections were held with improvements in voter registration for both men and women and in a generally free and fair atmosphere. Two women were elected. In September 2006, citizens re-elected President Saleh to a second term in a generally open and competitive election, although there were multiple problems with the voting process and use of state resources on behalf of the ruling party.

GOVERNMENT AND POLITICAL CONDITIONS

Yemen is a republic with a bicameral legislature. Under the constitution, an elected president, an elected 301-seat House of Representatives, and an appointed 111-member Shura Council share power. The president is head of state, and the prime minister is head of government. The constitution provides that the president be elected by popular vote from at least two candidates endorsed by Parliament; the prime minister is appointed by the president. The presidential term of office is 7 years, and the parliamentary term of elected office is 6 years. Suffrage is universal over 18.

President Ali Abdullah Saleh was re-elected to a second term in 2006; the next presidential elections are scheduled for 2013. In the April 2003 parliamentary elections, the General People's Congress (GPC) maintained an absolute majority. International observers judged elections to be gen-

erally free and fair, and there was a marked decrease from previous years in election-related violence; however, there were some problems with underage voting, confiscation of ballot boxes, voter intimidation, and election-related violence. The next parliamentary elections are scheduled for 2009. In the September 2006 local council elections, the GPC won a majority of seats on local and provincial councils. International observers judged the elections to be generally open and competitive, with another marked decrease in election-related violence.

The constitution calls for an independent judiciary. The former northern and southern legal codes have been unified. The legal system includes separate commercial courts and a Supreme Court based in Sanaa.

Principal Government Officials

Last Updated: 11/12/08

Pres.: **Ali Abdallah SALIH**
Vice Pres.: **Abd al-Rab Mansur al-HADI, Maj. Gen.**
Prime Min.: **Ali Muhammad MUJAWWAR**
Dep. Prime Min.:
Dep. Prime Min.for Economic Affairs: **Abd al-Karim Ismail al-ARHABI**
Dep. Prime Min.for Local Authority Affairs: **Sadiq Amin ABU RAS**
Dep. Prime Min.for Security & Defense Affairs: **Rashad Muhammad al-ALIMI**
Min. of Agriculture & Irrigation: **Mansur Ahmad al-HAWSHABI**
Min. of Cabinet Affairs: **Salim al-AYDARUS**
Min. of Civil Service & Social Security: **Yahya al-SHUIBI**
Min. of Communications & Information Technology: **Kamal Husayn al-JABRI**
Min. of Construction, Housing, & Urban Planning: **Abdallah Husayn al-DAFA**
Min. of Culture: **Muhammad Abu Bakr al-MAFLAHI**
Min. of Defense: **Muhammad Nasir Ahmad ALI, Brig. Gen.**
Min. of Education: **Abd al-Salman Muhammad Hizam al-JAWFI**
Min. of Electricity: **Awadh Said al-SOCOTRI**
Min. of Expatriate Affairs: **Ahmad Musaed HUSAYN**
Min. of Finance: **Numan Salih al-SUHAYBI**
Min. of Fisheries: **Abyan Muhammad Salih SHAMLAN**
Min. of Foreign Affairs: **Abu Bakr Abdallah al-QIRBI**
Min. of Higher Education & Scientific Research: **Salih Ali BA SURA**
Min. of Human Rights: **Huda Abd al-Latif al-BAN**
Min. of Industry & Trade: **Yahya Yahya al-MUTAWAKIL**
Min. of Information: **Hasan Ahmad al-LAWZI**
Min. of Interior: **Mutahir Rashad al-MASRI**
Min. of Justice: **Ghazi Shaif al-AGHBARI**
Min. of Legal Affairs: **Rashad Ahmad al-RASAS**
Min. of Local Admin.: **Abd al-Qadir Ali HILAL**
Min. of Oil & Minerals: **Amir Salim al-AYDARUS**
Min. of Planning & Intl. Cooperation: **Abd al-Karim Ismail al-ARHABI**
Min. of Public Health & Population: **Abd al-Karim RASI**
Min. of Public Works & Roads: **Umar Abdallah al-KURSHAMI**
Min. of Religious Endowment & Islamic Affairs: **Hamud Abd al-Hamid al-HITAR**
Min. of Social & Labor Affairs: **Amat al-Razaq Ali HAMAD**
Min. of Supply & Trade: **Abd al-Aziz al-KUMAYM**
Min. of Technical Education & Vocational Training: **Ibrahim Umar HAJRI**
Min. of Tourism: **Nabil Hasan al-FAQIH**
Min. of Transport: **Khalid Ibrahim al-WAZIR**
Min. of Water & Environment: **Abd al-Rahman Fadhl al-IRIYANI**
Min. of Youth & Sports: **Mahmud Muhammad UBAD**
Min. of State & Sec. Gen. of the Presidency: **Abdallah al-BASHIRI, Maj. Gen.**
Min. of State & Cabinet Member: **Qasim Ahmad al-AJAM**
Min. of State & Cabinet Member: **Muhammad Ali al-YASIR**
Min. of State & Dir. of Prime Min.'s Office: **Abdulrahman Muhammad TARMOUM**
Min. of State & Mayor of Sanaa: **Yahya Muhammad al-SHUAYBI**
Min. of State for Parliamentary & Shura Council Affairs: **Khalid Abd al-Wahhab al-SHARIF**
Governor, Central Bank: **Ahmad Abd al-Rahman al-SAMAWI**
Ambassador to the US: **Abd al-Wahab Abdallah al-HAJRI**
Permanent Representative to the UN, New York: **Abdallah Muhammad al-SAIDI**

The Republic of Yemen maintains an Embassy in the United States at 2319 Wyoming Ave. NW, Washington, DC 20008 (tel: 202-965-4760).

ECONOMY

At unification, both the YAR and the PDRY were struggling, underdeveloped economies. In the north, disruptions of civil war (1962-70) and frequent periods of drought had dealt severe blows to a previously prosperous agricultural sector. Coffee production, formerly the north's main export and principal form of foreign exchange, declined as the cultivation of qat increased. Low domestic industrial output and a lack of raw materials made the YAR dependent on a wide variety of imports.

Remittances from Yemenis working abroad and foreign aid paid for perennial trade deficits. Substantial Yemeni communities exist in many countries of the world, including Yemen's immediate neighbors on the Arabian Peninsula, Indonesia, India, East Africa, the United Kingdom, and the United States. Beginning in the mid-1950s, the Soviet Union and China provided large-scale assistance to the YAR. This aid included funding of substantial construction projects, scholarships, and considerable military assistance.

In the south, pre-independence economic activity was overwhelmingly concentrated in the port city of Aden. The seaborne transit trade, which the port relied upon, collapsed with the closure of the Suez Canal and Britain's withdrawal from Aden in 1967. Only extensive Soviet aid, remittances from south Yemenis working abroad, and revenues from the Aden refinery (built in the 1950s) kept the PDRY's centrally planned Marxist economy afloat. With the dissolution of the Soviet Union and a cessation of Soviet aid, the south's economy basically collapsed.

Since unification, the government has worked to integrate two relatively disparate economic systems. However, severe shocks, including

the return in 1990 of approximately 850,000 Yemenis from the Gulf states, a subsequent major reduction of aid flows, and internal political disputes culminating in the 1994 civil war hampered economic growth.

Since the conclusion of the war, the government has entered into agreement with the International Monetary Fund (IMF) to institute an extremely successful structural adjustment program. Phase one of the IMF program included major financial and monetary reforms, including floating the currency, reducing the budget deficit, and cutting subsidies. Phase two will address structural issues such as civil service reform. The World Bank also is present in Yemen, with 19 active projects in 2005, including projects in the areas of public sector governance, water, and education. Since 1998, the government of Yemen has sought to implement World Bank economic and fiscal recommendations. In subsequent years, Yemen has lowered its debt burden through Paris Club agreements and restructuring U.S. foreign debt. In 2004, government reserves reached $4.7 billion.

Current U.S. commercial assistance is focused on aiding the business sector in supporting U.S.-Yemen bilateral trade relations, encouraging American business interests in country, and diversifying Yemen's economy toward non-petroleum dependent sectors.

Following a minor discovery in the south in 1982, an American company found an oil basin near Marib in 1984. A total of 170,000 barrels per day were produced there in 1995. A small oil refinery began operations near Marib in 1986. A Soviet discovery in the southern governorate of Shabwa proved only marginally successful even when taken over by a different group. A Western consortium began exporting oil from Masila in the Hadramaut in 1993, and production there reached 420,000 barrels per day in 1999. More than a dozen other companies have been unsuccessful in finding commercial quantities of oil. There are new finds in the Jannah (formerly known as the Joint Oil Exploration Area) and east Shabwah blocks. In November 2005, Hunt Oil's 20-year contract for the management of Block 18 fields ended. Despite agreement with the Government of Yemen on a 5-year extension, the Republic of Yemen Government abrogated the agreement via a parliamentary vote (not called for in the contract). The company formally requested arbitration proceedings at the International Chamber of Commerce in Paris in November. No decision has been rendered.

Yemen's oil exports in 1995 earned about $1 billion. By 2005, exports had grown to approximately $3.1 billion and comprised roughly 70% of government revenue. Oil production is expected to decline in 2007 due to dwindling reserves, but revenue will be stable as long as oil prices remain high.

Oil located near Marib contains associated natural gas. Proven reserves of 10-13 trillion cubic feet could sustain a liquefied natural gas (LNG) export project. A long-term prospect for the petroleum industry in Yemen is a proposed liquefied natural gas project (Yemen LNG), which plans to process and export Yemen's 17 trillion cubic feet of proven associated and natural gas reserves. In September 1995, the Yemeni Government signed an agreement that designated Total of France to be the lead company for an LNG project, and, in January 1997, agreed to include Hunt Oil, Exxon, and Yukong of South Korea as partners in the Yemeni Exploration and Production Company. The project envisions a $3.5 billion investment over 25 years, producing approximately 3.1 million tons of LNG annually. A Bechtel-Technip joint venture also conducted a preliminary engineering study for LNG production/development. In 2005, Yemen LNG signed two agreements for the sale of 4.5 metric tons per year, the majority of which will be exported to the United States and South Korea. Construction on the LNG export facility began in September 2005, and it is expected to begin exporting in 2009.

FOREIGN RELATIONS

The geography and ruling Imams of north Yemen kept the country isolated from foreign influence before 1962. The country's relations with Saudi Arabia were defined by the Taif Agreement of 1934, which delineated the northernmost part of the border between the two kingdoms and set the framework for commercial and other intercourse. The Taif Agreement has been renewed periodically in 20-year increments, and its validity was reaffirmed in 1995. Relations with the British colonial authorities in Aden and the south were usually tense.

The Soviet and Chinese Aid Missions established in 1958 and 1959 were the first important non-Muslim presence in north Yemen. Following the September 1962 revolution, the Yemen Arab Republic became closely allied with and heavily dependent upon Egypt. Saudi Arabia aided the royalists in their attempt to defeat the Republicans and did not recognize the Yemen Arab Republic until 1970. Subsequently, Saudi Arabia provided Yemen substantial budgetary and project support. At the same time, Saudi Arabia maintained direct contact with Yemeni tribes, which sometimes strained its official relations with the Yemeni Government. Hundreds of thousands of Yemenis found employment in Saudi Arabia during the late 1970s and 1980s.

In February 1989, north Yemen joined Iraq, Jordan, and Egypt informing the Arab Cooperation Council (ACC), an organization created partly in response to the founding of the Gulf Cooperation Council, and intended to foster closer economic cooperation and integration among its members.

After unification, the Republic of Yemen was accepted as a member of the ACC in place of its YAR predecessor. In the wake of the Gulf crisis, the ACC has remained inactive. Yemen is not a member of the Gulf Cooperation Council.

British authorities left southern Yemen in November 1967 in the wake of an intense terrorist campaign. The people's democratic Republic of Yemen, the successor to British colonial rule, had diplomatic relations with many nations, but its major links were with the Soviet Union and other Marxist countries. Relations between it and the conservative Arab states of the Arabian Peninsula were strained. There were military clashes with Saudi Arabia in 1969 and 1973, and the PDRY provided active support for the Dhofar rebellion against the Sultanate of Oman. The PDRY was the only Arab state to vote against admitting new Arab states from the Gulf area to the United Nations and the Arab League. The PDRY provided sanctuary and material support to various international terrorist groups.

Yemen is a member of the United Nations, the Arab League, and the Organization of the Islamic Conference. Yemen participates in the nonaligned movement. The Republic of Yemen accepted responsibility for all treaties and debts of its predecessors, the YAR and the PDRY. Yemen has acceded to the nuclear nonproliferation treaty. The Gulf crisis dramatically affected Yemen's foreign relations. As a member of the UN Security Council (UNSC) in 1990-1991, Yemen abstained on a number of UNSC resolutions concerning Iraq and Kuwait, and voted against the "use of force resolution." Western and Gulf Arab states reacted by curtailing or canceling aid programs and diplomatic contacts. At least 850,000 Yemenis returned from Saudi Arabia and the Gulf.

Subsequent to the liberation of Kuwait, Yemen continued to maintain high-level contacts with Iraq. This hampered its efforts to rejoin the Arab mainstream and to mend fences with its immediate neighbors. In 1993, Yemen launched an unsuccessful diplomatic offensive to restore relations with its Gulf neighbors. Some of its aggrieved neighbors actively aided the south during the 1994 civil war. Since the end of that conflict, tangible progress has been made on the diplomatic front in restoring normal relations with Yemen's neighbors. The Omani-Yemeni border has been officially demarcated. In the summer of 2000, Yemen and Saudi Arabia signed an International Border Treaty settling a 50-year-old dispute over the location of the border between the two countries. Yemen also settled its dispute with Eritrea over the Hanish Islands in 1998.

U.S.–YEMEN RELATIONS

The United States established diplomatic relations with the Imamate in 1946. A resident legation, later elevated to embassy status, was opened in Taiz (the capital at the time) on March 16, 1959 and moved to Sanaa in 1966. The United States was one of the first countries to recognize the Yemen Arab Republic, doing so on December 19, 1962. A major U.S. Agency for International Development (USAID) program constructed the Mocha-Taiz-Sanaa highway and the Kennedy memorial water project in Taiz, as well as many smaller projects. On June 6, 1967, the YAR, under Egyptian influence, broke diplomatic relations with the United States in the wake of the Arab-Israeli conflict of that year. Secretary of State William P. Rogers restored relations following a visit to Sanaa in July 1972, and a new USAID agreement was concluded in 1973.

On December 7, 1967, the United States recognized the People's Democratic Republic of Yemen and elevated its Consulate General in Aden to embassy status. However, relations were strained. The PDRY was placed on the list of nations that support terrorism. On October 24, 1969, south Yemen formally broke diplomatic relations with the United States. The United States and the PDRY reestablished diplomatic relations on April 30, 1990, only 3 weeks before the announcement of unification. However, the embassy in Aden, which closed in 1969, was never reopened, and the PDRY as a political entity no longer exists.

During a 1979 border conflict between the Yemen Arab Republic and the People's Democratic Republic of Yemen, the United States cooperated with Saudi Arabia to greatly expand the security assistance program to the YAR by providing F-5 aircraft, tanks, vehicles and training. George H.W. Bush, while Vice President, visited in April 1986, and President Ali Abdullah Saleh visited the United States in January 1990. The United States had a $42 million USAID program in 1990. From 1973 to 1990, the United States provided the YAR with assistance in the agriculture, education, and health and water sectors. Many Yemenis were sent on U.S. Government scholarships to study in the region and in the United States. There was a Peace Corps program with about 50 volunteers. The U.S. Information Service operated an English-language institute in Sanaa.

In 1990, as a result of Yemen's actions in the Security Council following the Iraqi invasion of Kuwait, the United States drastically reduced its presence in Yemen including canceling all military cooperation, non-humanitarian assistance, and the Peace Corps program. USAID levels dropped in FY 1991 to $2.9 million, but food assistance through the PL 480 and PL 416 (B) programs continued through 2006. In 2006, the U.S. Department of Agriculture provided 30,000 metric tons of soybean meal that were sold for approximately $7.5 million to finance programs in support of Yemen's agricultural sector.

The United States was actively involved in and strongly supportive of parliamentary elections in 1993 as well as the 2006 presidential and local council elections, and continues working to strengthen Yemen's democratic institutions. The USAID program, focused in the health field, had slowly increased to $8.5 million in FY 1995, but ended in FY 2000. It was reinvigorated in 2003 and a USAID office has re-opened in Sanaa. Yemen has also received significant funding from the Middle East Partnership Initiative. Funds went, in large part, to support literacy projects, election monitoring, training for civil society,

and the improvement of electoral procedures. Defense relations between Yemen and the United States are improving rapidly, with the resumption of International Military Education and Training assistance and the transfer of military equipment and spare parts.

In FY 2006 U.S. Foreign Military Financing (FMF) for Yemen was $8.42 million, International Military Education and Training (IMET) was $924,000, and Non-Proliferation, Anti-Terrorism, Demining and Related Programs (NADR) was $1.4 million. In FY 2006 Yemen also received $7.9 million in Economic Support Funds (ESF), $10 million in Food for Progress (Title 1) assistance, and $5 million in Section 1206 funding.

In November 2006, a World Bank-sponsored international donors conference held in London raised $4.7 billion for Yemen's development; the funds are to be disbursed between 2007 and 2010.

Currently, Yemen is an important partner in the global war on terrorism, providing assistance in the military, diplomatic, and financial arenas. President Ali Abdullah Saleh visited Washington, DC, in November 2001. Since that time, Yemen has stepped up its counter-terrorism cooperation efforts with the United States, achieving significant results and improving overall security in Yemen.

President Saleh returned to Washington in June 2004 when he was invited to attend the G-8 Sea Island Summit. The Summit was an excellent forum for Yemen to share its democratic reform experiences, and it has agreed to participate in future activities detailed in the Sea Island charter. In November 2005 and May 2007, President Saleh again visited high-level officials in Washington, including President George W. Bush and Secretary of State Condoleezza Rice.

TRAVEL

Consular Information Sheet

July 21, 2008

Country Description: The Republic of Yemen was established in 1990 following unification of the former Yemen Arab Republic (North) and the People's Democratic Republic of Yemen (South). Islamic and traditional ideals, beliefs, and practices provide the foundation of the country's customs and laws. Yemen is a developing country and modern tourist facilities are widely available only in major cities.

Entry Requirements: Passports and visas are required for travel to Yemen. Visas may be obtained at Yemeni Embassies abroad; all travelers to Yemen can also potentially obtain entry visas at ports of entry. Travelers to Yemen are no longer required to have an affiliation with and arrange their travel through a Yemeni-based individual or organization to enter Yemen. However, individuals may be asked for supporting evidence of their character, purpose of visit and length of stay. Upon arrival at ports of entry, travelers may be issued a visa valid for a maximum of three months.

Yemeni law requires that all foreigners traveling in Yemen obtain exit visas before leaving the country. In cases of travelers with valid tourist visas and without any special circumstances (like those listed below), this exit visa is obtained automatically at the port of exit as long as the traveler has not overstayed the terms of the visa.

In certain situations, however, foreigners are required to obtain exit visas from the Immigration and Passport Authority headquarters in Sanaa. These cases may include, but are not limited to, foreigners who have overstayed the validity date of their visa; U.S.-citizen children with Yemeni or Yemeni-American parents who are not exiting Yemen with them; foreigners who have lost the passport containing their entry visa; foreign residents whose residence visas are based on their employment or study in Yemen, marriage to a Yemeni citizen, or relationship to a Yemeni parent; or foreign residents who have pending legal action (including court-based "holds" on family members' travel). The loss of a passport can result in considerable delay to a traveler because Yemeni law requires that the traveler attempt to recover the passport by placing an advertisement in a newspaper and waiting a week for a response. All minor/underage U.S. citizens should be accompanied by their legal guardian(s) and/or provide a notarized letter in Arabic of parental consent when obtaining exit visas to depart Yemen. In all of these more complex cases, obtaining an exit visa requires the permission of the employing company, the sponsoring Yemeni family member, the sponsoring school or the court in which the legal action is pending. Without this permission, foreigners—including

U.S. Citizens—may not be allowed to leave Yemen. American women who also hold Yemeni nationality and/or are married to Yemeni or Yemeni-American men often must obtain permission from their husbands for exit visas. They also may not take their children out of Yemen without the permission of the father, regardless of who has custody (see Special Circumstances section below).

For more details, travelers can contact the Embassy of the Republic of Yemen, Suite 705, 2600 Virginia Avenue NW, Washington, DC 20037, telephone 202-965-4760; or the Yemeni (Mission to the U.N., 866 United Nations Plaza, Room 435, New York, NY 10017, telephone (212) 355-1730. Visit the Yemeni Embassy home page for more visa information at http://www.yemenembassy.org.

Safety and Security: The Department of State is concerned that al-Qa'ida and its affiliates are actively engaged in extremist-related activities in Yemen and the Arabian Peninsula. The Department remains concerned about possible attacks by extremist individuals or groups against U.S. citizens, facilities, businesses and perceived interests.

On March 18, 2008, three mortar rounds landed in the vicinity of the U.S. Embassy in Sanaa. Yemeni students at a nearby school and Yemeni government security personnel posted outside the embassy were injured in the attack. On April 6, 2008, an expatriate residential compound in the Hadda neighborhood of southwestern Sanaa was attacked by mortar fire, and on April 30, 2008, suspected extremists fired two mortar rounds that exploded near the Yemen Customs Authority and the Italian Embassy. No injuries were reported in either incident. A group calling itself al-Qa'ida in Yemen may be responsible for all three attacks. Following the attacks against the Embassy and the residential compound, the Department of State ordered the departure of all American non-emergency embassy staff and family members on April 7, 2008.

On January 18, 2008, suspected al-Qa'ida operatives ambushed a tourist convoy in the eastern Hadramout Governorate, killing two Belgians. On July 2, 2007, suspected al-Qa'ida operatives carried out a vehicle-borne explosive device attack on tourists at the Belquis Temple in Marib, which resulted in the deaths of eight Spanish tourists and two Yemenis. The targeting of tourist sites by al-Qa'ida may represent an escalation in terror tactics in Yemen. On February 3, 2006, 23 convicts, including known affiliates of al-Qa'ida, escaped from a high-security prison in the capital city, Sanaa. Among the al-Qa'ida associates were individuals imprisoned for their roles in the 2000 bombing of the USS Cole and the 2002 attack on the French oil tanker Limburg. In the weeks following the escape, some prisoners voluntarily turned themselves in to authorities; to date, however, some escapees remain at large. Two of the escapees were killed in vehicle-based suicide attacks on oil facilities near Mukalla and Marib on September 15, 2006. Those attacks were followed by the arrest the next day in Sanaa of four suspected al-Qa'ida operatives, who had stockpiled explosives and weapons. On December 5, 2006, a lone gunman opened small arms fire outside of the Embassy compound during the early morning hours. The assailant, wounded by host-nation security personnel and subsequently arrested, was the sole casualty. It appears that, although the gunman was influenced by extremist ideology, he worked alone in planning and executing the attack.

Americans should avoid areas where demonstrations are taking place. A 2005 demonstration against an increase in the fuel price led to two days of widespread demonstrations and rioting throughout Sanaa and other cities. Those demonstrations resulted in a large amount of property damage, looting, and several roadblocks.

In late 2007 and throughout 2008, there has been an increase in anti-government demonstrations in southern Yemen, including the cities of Aden, Taizz, Ibb, and Mukalla, as well as surrounding regions. Some of these demonstrations have resulted in injuries and deaths. Americans should be aware of the potential for further demonstrations when traveling in these areas.

Throughout the country, U.S. citizens are urged to exercise particular caution at locations where large groups of expatriates have gathered. From time to time, the U.S. Embassy in Sanaa may temporarily close or suspend public services as necessary to review its security posture and ensure its adequacy.

In addition, U.S. citizens are urged to avoid contact with any suspicious, unfamiliar objects, and to report the presence of such objects to local authorities. Vehicles should not be left unattended and should be kept locked at all times. Americans in Yemen are urged to register and remain in contact with the American Embassy in Sanaa for updated security information (see section on Registration/Embassy location below).

Yemeni government security organizations have arrested and expelled foreign Muslims, including Americans, who have associated with local Muslim organizations considered to be extremist by security organs of the Yemeni government. Americans risk arrest if they engage in either political or other activities that violate the terms of their admission to Yemen.

Travel on roads between cities throughout Yemen can be dangerous. Armed carjacking, especially of four-wheel-drive vehicles, occurs in many parts of the country, including the capital. Yemeni security officials advise against casual travel to rural areas. The U.S. Embassy sometimes restricts the travel of its own personnel to rural areas, while the Government of Yemen also sometimes places restrictions on Americans traveling outside Sanaa. Please check with the Embassy for the latest restrictions.

Travel is particularly dangerous in the tribal areas north and east of Sanaa. Armed tribesmen in those areas have kidnapped a number of foreigners in attempts to resolve dis-

putes with the Yemeni government. Hostilities between tribesmen and government security forces in the Sadah governorate north of Sanaa have flared up on several occasions since 2005. Serious fighting occurred in the city of Benni Hashish from late May through early June 2008. Americans are urged to avoid this region during periods of conflict.

Travel by boat through the Red Sea or near the Socotra Islands in the Gulf of Aden presents the risk of pirate attacks. If travel to any of these areas is necessary, travelers may reduce the risk to personal security if such travel is undertaken by air or with an armed escort provided by a local tour company.

Other potential hazards to travelers include land mines and unexploded ordnance from the 1994 civil war. This is of particular concern in areas where fighting took place in the six southern provinces. However, most minefields have been identified and cordoned off.

Americans are most vulnerable to terrorist attacks when they are in transit to and from their residences or workplaces, or visiting locations where large groups of expatriates have gathered. All Americans are reminded to vary their routes and times, remain vigilant, report suspicious incidents to the Embassy, avoid areas where large groups of expatriates have gathered, lock car windows and doors, and carry a cell phone.

Based on previous abductions of foreigners in Iraq, Afghanistan and Kuwait, the Embassy recommends that Americans with doubts about the identity of security or police personnel on the roads remain in their vehicles, roll up their windows, and contact the Embassy.

For the latest security information, Americans traveling abroad should regularly monitor the Department's web site, where the current Worldwide Caution Travel Alert, Middle East and North Africa Travel Alert, Travel Warnings and other Travel Alerts can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S. and Canada, or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: The most serious problem affecting travelers to Yemen is carjacking. Travelers have rarely been victims of petty street crime.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, contact family members or friends, and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

The local equivalent to the "911" emergency line in Yemen is 199, but operators do not speak English.

Medical Facilities and Health Information: Lack of modern medical facilities outside of Sanaa and Aden and a shortage of emergency ambulance services throughout the country may cause concern to some visitors. Doctors and hospitals often expect immediate cash payment for health services. An adequate supply of prescription medications for the duration of the trip is important. While many prescription drugs are available in Yemen, a particular drug needed by a visitor may not be available.

The U.S. Embassy in Sanaa strongly advises all American citizens residing in or traveling to Yemen to ensure that they have received all recommended immunizations.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's internet site at http://wwwn.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith/en.

The U.S. Department of State is unaware of any HIV/AIDS entry restrictions for visitors to or foreign residents of Yemen.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Yemenis provided for general reference only, and may not be totally accurate in a particular location or circumstance.

Based on previous abductions of foreigners in Iraq, Afghanistan and Kuwait, the Embassy recommends that Americans with doubts about the identity of security or police personnel on the roads remain in their vehicles, roll up their windows, and contact the Embassy. For additional information addressing security concerns for Americans in Yemen, please see the Safety and Security section above.

Travel by road in Yemen should be considered risky. Within cities, minivans and small buses ply somewhat regular routes, picking up and dropping off passengers with little notice or regard for other vehicles. Taxis and public transportation are widely available but the vehicles may lack safety standards and equipment.

Embassy personnel are advised to avoid public buses for safety reasons. Despite the presence of traffic lights and traffic policemen, drivers are urged to exercise extreme caution, especially at intersections. While traffic laws exist, they are often not enforced, and/or not adhered to by motorists. Drivers sometimes drive on the left side of the road, although right-hand driving is specified by Yemeni law. No laws mandate the use of seat belts or car seats for children. The maximum speed for private cars is 100 kilometers per hour (62.5 miles per hour), but speed limits are rarely enforced. A large number of underage drivers are on the roads. Many vehicles are in poor repair and lack basic parts such as functional turn signals, headlights and taillights. Pedestrians, especially children, and animals on the roads constitute a hazard in both rural and urban areas. Beyond the main inter-city roads, which are usually paved and in fair condition, the rural roads in general require four-wheel-drive vehicles or vehicles with high clearance.

Yemeni security officials advise against casual travel to rural areas. The U.S. Embassy sometimes restricts the travel of its own personnel to rural areas, while the Government of Yemen also sometimes places restrictions on Americans traveling outside Sanaa. Please check with the Embassy for the latest restrictions.

Travelers should take precautions to avoid minefields left over from Yemen's civil wars. Traveling off well-used tracks without an experienced guide could be extremely hazardous, particularly in parts of the south and the central highlands.

Penalties for driving under the influence of alcohol or drugs, and reckless driving which causes an accident resulting in injury, are a fine and/or prison sentence. If the accident results in death, the driver is subject to a maximum of three years in prison and/or a fine. Under traditional practice, victims' families negotiate a monetary compensation from the driver proportionate to the extent of the injuries—higher if it is a fatality.

and visit the web site of Yemen's national tourism office and national authority responsible for road safety at http//yementourism.com.

Aviation Safety Oversight: As there is no direct commercial air service between the United States and Yemen, the U.S. Federal Aviation Administration (FAA) has not assessed Yemen's Civil Aviation Authority for compliance with International Civil Aviation Organization (ICAO) aviation safety standards. For more information, travelers may visit the FAA's web site at http://www.faa.gov.

Special Circumstances: Photography of military installations, including airports, equipment, or troops is forbidden. In the past, such photography has led to the arrest of U.S. citizens. Military sites are not always obvious. If in doubt, it is wise to ask specific permission from Yemeni authorities.

Travelers should be aware that automated teller machines (ATMs) are being introduced in major cities but are still not widely available in Yemen. Credit cards are not widely accepted. The Government of Yemen may not recognize the U.S. citizenship of persons who are citizens of both Yemen and the United States. This may hinder the ability of U.S. consular officials to assist persons who do not enter Yemen on a U.S. passport. Dual nationals may also be subject to national obligations, such as taxes or military service. For further information, travelers can contact the nearest embassy or consulate of Yemen.

American citizens who travel to Yemen are subject to the jurisdiction of Yemeni courts, as well as to the country's laws, customs, and regulations. This holds true for all legal matters including child custody. Women in custody disputes in Yemen may not enjoy the same rights that they do in the U.S., as Yemeni law often does not work in favor of the mother. Parents planning to travel to Yemen with their children should bear this in mind. Parents should also note that American custody orders might not be enforced in Yemen. American women who also hold Yemeni nationality, and/or are married to Yemeni or Yemeni-American men, are advised that if they bring their children to Yemen they may not enjoy freedom of travel should they decide they want to leave Yemen. Such women often must obtain permission from their husbands for exit visas. They also may not take their children out of Yemen without the permission of the father, regardless of who has custody.

American students and workers in Yemen sometimes report that the sponsors of their residence permits seize their U.S. passports as a means of controlling their domestic and international travel.

While the sponsors say they seize the passports on behalf of local security services, there is no law or instruction from Yemeni passport or security offices requiring that passports be seized.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating Yemeni laws, even unknowingly, may be expelled, arrested, or imprisoned. Penalties for possession or use, or trafficking in illegal drugs in Yemen are severe, and convicted offenders can expect long jail sentences and heavy fines.

The use of the mild stimulant "qat" or "khat" is legal and common in Yemen, but it is considered an illegal substance in many other countries, including the United States. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child

abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in Yemen are encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration web site, and to obtain updated information on travel and security within Yemen. Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency.

The U.S. Embassy is located at Dhahr Himyar Zone, Sheraton Hotel District, PO Box 22347. The telephone number of the Consular Section is (967)(1) 755-2000, extension 2153 or 2266. The fax number is (967) (1) 303-175. The after-hours emergency number is (967) (1) 755-2000 (press 0 for extension) or (967) 733213509. The Embassy is open from Saturday through Wednesday.

Intercountry Adoption

May 2007

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is based on public sources and current understanding. Questions involving foreign and U.S. immigration laws and legal interpretation should be addressed respectively to qualified foreign or U.S. legal counsel.

Please Note: The basis for Yemeni family law is a strict interpretation of Islamic Sharia law, and, therefore, does not allow for adoption as that concept is understood in the United States. Accordingly, it is generally not possible for U.S. citizens to adopt a Yemeni orphan to obtain an immigrant visa that will allow that child to immigrate to the United States.

Patterns of Immigration: No Yemeni orphans have received U.S. immigrant visas within the past five fiscal years.

Yemeni Guardianship Authority: Guardianship in Yemen is granted by local courts. Persons considering applying for guardianship of a Yemeni child should direct their inquiries to the court in the region of Yemen where the child is residing.

Adoption Agencies and Attorneys: There are no adoption agencies in Yemen. However, prospective guardians who may wish to use the services of an agency in the context of a guardianship case are advised to fully research any agency or facilitator they are considering using.

Embassy of the Republic of Yemen
2319 Wyoming Avenue, NW
Washington, DC 20008
Telephone: (202) 965-4760
Fax: (202) 337-2017

Yemen also has a consulate in Detroit and an honorary consulate in San Francisco.

U.S. Immigration Requirements: Prospective adoptive parents are strongly encouraged to consult USCIS publication M-249, *The Immigration of Adopted and Prospective Adoptive Children*, as well as the Department of State publication, *Intercountry Adoptions*. Please see the *Intercountry Adoption* section of this book for more details and review current reports online at http://adoption.state.gov.

Embassy of the United States of America
Saawan St
Sheraton District
Sanaa, Yemen
Telephone: +967 (1) 755-2000 (Immigrant Visa Unit)
Fax: +967 (1) 303-175

Additional Information: Specific questions about the guardianship process in Yemen may be addressed to the U.S. Embassy in Sana'a. General questions regarding intercountry adoption may be addressed to the Office of Children's Issues, U.S. Department of State, CA/OCS/CI, SA-29, 4th Floor, 2201 C Street, NW, Washington, D.C. 20520-4818, toll-free Tel: 1-888-407-4747.

International Parental Child Abduction

February 2008

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *International Parental Child Abduction* section of this book and review current reports online at http://travel.state.gov.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is provided for general information only. Questions involving interpretation of specific foreign laws should be addressed to foreign legal counsel.

General Information: Yemen is not a party to the Hague Convention on the Civil Aspects of International Child Abduction, nor are there any international or bilateral treaties in force between Yemen and the United States dealing with international parental child abduction. American citizens who travel to Yemen are subject to the jurisdiction of Yemeni courts, as well as to the country's laws and regulations. This holds true for all legal matters including child custody. Parents planning to travel with their children to Yemen should bear this in mind.

Custody Disputes: Cases involving divorce and the custody of minor children are adjudicated in local courts that apply principles of Islamic law. Islamic law will be applied regardless of the religious beliefs of the parents.

In Yemen, Islamic law gives priority for custodianship to the mother as

long as certain restrictive conditions are met. However, once the children reach adolescence (age 9 for boys and age 12 for girls), the father can take custody. If the mother refuses, the father can file in court for custody. A court can find a mother unfit to have custody before the children reach adolescence. In that case, a maternal grandmother living in Yemen or a paternal grandmother (if the maternal grandmother is not living in Yemen) will be given custody until the children reach the age at which the father may appeal for custody.

In actual practice, the conditions placed on the mother's primary right to custody often enable the father to maintain a great deal of influence over the rearing of the children, even though he may not have custody. For example, the mother must seek his approval to depart Yemen with the children. Frequently, the father is actually able to assume custody against the wishes of the mother when she is unable or unwilling to meet the conditions set by law for her to maintain her custodial rights.

A mother can lose her primary right to custody of a child in a number of ways. The court can determine that she is incapable of safeguarding the child or of bringing the child up in accordance with the appropriate religious standards. The mother can void her right to custody by re-marrying a party considered "unmarriageable," or by residing in a home with people who might be "strangers" to the child. The mother may not deny visitation rights to the father or the paternal grandfather and may not travel outside Yemen with the child without the father's approval and the approval of the court. In general, a Yemeni man divorcing his non-Yemeni wife may be awarded legal custody of their children if the court determines that any of the above conditions have not been met.

Under Sharia law, if a mother removes a child from the father, thus denying him access, the mother's custody rights can be severed. Removal of children from Yemen without the father's permission is a crime in Yemen. Immigration officials at the port of exit may request permission from the father before permitting the children to leave Yemen.

A Yemeni father can remove his children from Yemen without approval of the mother. While a mother can legally seek a travel ban to prevent the father from taking the children out of Yemen, this is not always possible in reality.

Persons who wish to pursue a child custody claim in a Yemeni court should retain an attorney in Yemen. The U.S. Embassy in Sanaa maintains a list of attorneys willing to represent American clients. For more information, please read the *International Parental Child Abduction* section of this book and review current reports online at http://travel.state.gov.

Enforcement of Foreign Judgments: Custody orders and judgments of foreign courts are not enforceable in Yemen if they potentially contradict or violate local laws and practices. For example, an order from a U.S. court granting custody to an American mother may not be honored in Yemen if the mother intends to take the child to live outside Yemen. Courts in Yemen will not enforce U.S. court decrees ordering a parent in Yemen to pay child support.

Visitation Rights: The government of Yemen will assist non-custodial parents who wish to visit their children in Yemen. When the custodial parent refuses to permit visitation, the non-custodial parent will need to file a complaint in local court.

Dual Nationality: Dual nationality is recognized under Yemeni law. Children of Yemeni fathers automatically acquire Yemeni citizenship at birth, regardless of where the child was born. Yemeni women can only transmit citizenship in rare instances when there is official intervention from the Yemen government. Yemenis are not required to enter and leave the country on Yemeni passports.

Travel Restrictions: Parents can obtain an order from a local court preventing the other parent from taking a child out of Yemen, regardless of the child's nationality, when there is a custody dispute before the local court.

Criminal Remedies: For information on possible criminal remedies, please contact your local law enforcement authorities or the nearest office of the Federal Bureau of Investigation (FBI). Information is also available on the Internet at the web site of the U.S. Department of Justice, Office of Juvenile Justice and Delinquency Prevention (OJJDP) at http://www.ojjdp.ncjrs.org. For further information on international parental child abduction, contact the Office of Children's Issues, U.S. Department of State at 1-888-407-4747 or visit its web site on the Internet at http://travel.state.gov. You may also direct inquiries to: Office of Children's Issues, U.S. Department of State, Washington, DC 20520-4811; Phone: (202) 736-9090; Fax: (202) 312-9743.

Travel Warning

November 10, 2008

This Travel Warning warns U.S. citizens of the high security threat level in Yemen due to terrorist activities and updates information on the security situation in Yemen. The Department of State has lifted the authorized departure status of non-emergency personnel and adult family members of the U.S. Embassy in Sana'a. The Department recommends that American citizens defer non-essential travel to Yemen. American citizens remaining in Yemen despite this warning should monitor the U.S. Embassy website at http://yemen.usembassy.gov and should make contingency emergency plans. This replaces the Travel Warning for Yemen issued September 17, 2008.

The security threat level remains high due to terrorist activities in Yemen. On September 17 at approximately 9:15 a.m. local time, armed terrorists attacked the U.S. Embassy in Sana'a Yemen. A number of explosions occurred in the vicinity of the Embassy's main gate. Several Yemeni security personnel and one Embassy security guard were killed, as were a

few individuals waiting to gain entry to the Embassy. U.S. embassy employees have been advised to exercise caution when choosing restaurants, hotels or visiting tourist areas in Sanaa in order to avoid large gatherings of foreigners and expatriates. In addition, unofficial travel outside of the capital is not authorized at this time.

U.S. citizens who travel to or remain in Yemen despite this warning should exercise caution and take prudent security measures, including maintaining a high level of vigilance, avoiding crowds and demonstrations, keeping a low profile, varying times and routes for all travel, and ensuring travel documents are current. American citizens in Yemen are advised to exercise particular caution at locations frequented by foreigners countrywide, including restaurants and hotels frequented by expatriates. From time to time, the Embassy may restrict official Americans from restaurants, hotels, or shopping areas. The Department of State strongly encourages American citizens to consult the most recent Warden Messages (http://usembassy.state.gov/yemen/citizen_services.html) to get up-to-date information on security conditions. Americans who believe they are being followed or threatened while driving in urban centers should proceed as quickly as possible to the nearest police station or major intersection and request assistance from the officers in the blue-and-white police cars stationed there.

The Department remains concerned about possible attacks by extremist individuals or groups against U.S. citizens, facilities, businesses, and perceived interests. On January 17, 2008, suspected al-Qa'ida operatives ambushed a tourist convoy in the eastern Hadramout Governorate, killing two Belgians. On July 2, 2007, suspected al-Qa'ida operatives carried out a vehicle-borne explosive device attack on tourists at the Belquis Temple in Marib, which resulted in the deaths of eight Spanish tourists and two Yemenis. The targeting of tourist sites by al-Qa'ida may represent an escalation in terror tactics in Yemen. On February 3, 2006, 23 convicts, including known affiliates of al-Qa'ida, escaped from a high-security prison in the capital city, Sanaa, some of whom remain at large. Two of the escapees were later killed in vehicle-based suicide attacks on oil facilities near Mukalla and Marib on September 15, 2006. Those attacks were followed by the arrest the next day in Sanaa of four suspected al Qa'ida operatives, who had stockpiled explosives and weapons.

Since January 2007, the Government of Yemen has been battling al Houthi rebels in and around the northern governorate of Saada. While foreigners have not been targeted, hundreds of soldiers and civilians have been killed in the violence. U.S. citizens traveling in Yemen should be aware that local authorities occasionally place restrictions on the travel of foreigners to parts of the country experiencing unrest. In addition, the U.S. Embassy itself often restricts travel of official personnel to the tribal areas north and east of Sanaa, such as the governorates of Amran, Al Jawf, Hajja, Marib, Saada, and Shabwa. Travelers should be in contact with the Embassy for up-to-date information on such restrictions. U.S. citizens should register at the Consular Section of the U.S. Embassy in Sanaa and enroll in the warden system (emergency alert network) to obtain updated information on travel and security in Yemen. This can be done online prior to arrival in Yemen at https://travelregistration.state.gov/ibrs.

The U.S. Embassy is located at Dhahr Himyar Zone, Sheraton Hotel District, P.O. Box 22347. The telephone number of the Consular Section is (967) (1) 755-2000, extension 2153 or 2266. The fax number is (967) (1) 303-175. The afterhours emergency number is (967) (1) 755-2000 (press zero for extension) or (967) 733213509. From time to time the Embassy may temporarily close or suspend public services for security reasons. Emergency assistance to U.S. citizens during non-business hours (or when public access is restricted) is available through Embassy duty personnel. Current information on travel and security in Yemen may be obtained from the Department of State by calling 1-888-407-4747 within the United States and Canada or, from outside the United States and Canada, 1-202-501-4444. U.S. citizens should consult the Country Specific Information for Yemen and the Worldwide Caution on the Department's Internet site at http://travel.state.gov. Up-to-date information on security conditions can also be addressed at http://usembassy.state.gov/yemen/citizen_services.html.

ZAMBIA

Compiled from the September 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Republic of Zambia

PROFILE

Geography

Area: 752,614 sq. km. (290,585 sq. mi.); slightly larger than Texas.
Cities: Capita—Lusaka (pop. approx. 1 million). Other cities: Kitwe, Ndola, Livingstone, Kabwe.
Terrain: Varies; mostly plateau savanna.
Climate: Generally dry and temperate.

People

Nationality: Noun and adjective—Zambian(s).
Population: (2006) Approx. 11.9 million.
Annual growth rate: (2006) 1.6%.
Ethnic groups: More than 70 ethnic groups.
Religions: Christian, indigenous beliefs, Muslim, Hindu.
Languages: English (official), about 70 local languages and dialects, including Bemba, Lozi, Kaonde, Lunda, Luvale, Tonga, and Nyanja.
Education: No compulsory education; seven years free education. Literacy—women: 60.6%; men: 81.6%.
Health: Infant mortality rate—102/1,000. Life expectancy—37 years. HIV prevalence (15-49)—17%.
Work force: Agriculture—75%; mining and manufacturing—6%; services—19%.

Government

Type: Republic.
Independence: October 24, 1964.
Constitution: 1991 (as amended in 1996).
Government branches: Executive—president (chief of state and head of government), cabinet. Legislative—unicameral National Assembly. Judicial—Supreme Court, high court, magistrate courts, and local courts.
Political parties: Movement for Multi-party Democracy (MMD).
Suffrage: Universal adult.
Political subdivisions: Nine provinces subdivided into 72 districts.

Economy

GDP: (2006, current prices) $10.9 billion.
Annual growth rate: (2007, preliminary): 6.2%.
Per capita GDP: (2006, current prices) $921.
Natural resources: Copper, cobalt, zinc, lead, coal, emeralds, gold, silver, uranium, hydroelectric power, fertile land.
Agriculture: Products—corn, sorghum, rice, groundnuts, sunflower seeds, vegetables, horticultural products, tobacco, cotton, sugarcane, livestock, coffee, and soybeans.
Industry: Types—mining, transport, construction, foodstuffs, beverages, chemicals, and textiles.
Trade: (2006) Exports—$3.54 billion: copper, cobalt, lead, and zinc, cut vegetables, cotton. Major markets—South Africa, United Kingdom, Tanzania, Malawi, Japan. Imports—$2.7 billion: crude oil, refined petroleum products, manufactured goods, machinery, transport equipment, foodstuffs. Major suppliers—South Africa, China, Tanzania, Zimbabwe.
Major donors: Donors provided $1.1 billion in development assistance to Zambia in 2005/6. The World Bank is Zambia's largest multilateral donor. Other key multilateral donors include the International Monetary Fund (IMF), the European Union, UN agencies, and the African Development Bank. Counting direct bilateral assistance and assistance through multilateral agencies, the U.S. is Zambia's largest country donor.

PEOPLE

Zambia's population comprises more than 70 Bantu-speaking ethnic groups. Some ethnic groups are small, and only two have enough people to constitute at least 10% of the population. Most Zambians are subsistence farmers. The predominant religion is a blend of traditional beliefs and Christianity; Christianity is the official national religion. Expatriates, a majority of whom are Brit-

ish (about 15,000) and South African, live mainly in Lusaka and in the Copperbelt in northern Zambia, where they are employed in mines and related activities. Zambia also has a small but economically important Asian population, most of whom are Indians. The HIV/AIDS epidemic is ravaging Zambia. Almost 17% of Zambians are infected by HIV. Over 800,000 Zambian children have lost one or both of their parents due to HIV/AIDS. Life expectancy at birth is 37 years.

HISTORY

The indigenous hunter-gatherer occupants of Zambia began to be displaced or absorbed by more advanced migrating tribes about 2,000 years ago. The major waves of Bantu-speaking immigrants began in the 15th century, with the greatest influx between the late 17th and early 19th centuries. They came primarily from the Luba and Lunda tribes of southern Democratic Republic of Congo and northern Angola but were joined in the 19th century by Ngoni peoples from the south. By the latter part of that century, the various peoples of Zambia were largely established in the areas they currently occupy.

Except for an occasional Portuguese explorer, the area lay untouched by Europeans for centuries. After the mid-19th century, it was penetrated by Western explorers, missionaries, and traders. David Livingstone, in 1855, was the first European to see the magnificent waterfalls on the Zambezi River. He named the falls after Queen Victoria, and the Zambian town near the falls is named after him.

In 1888, Cecil Rhodes, spearheading British commercial and political interests in Central Africa, obtained a mineral rights concession from local chiefs. In the same year, Northern and Southern Rhodesia (now Zambia and Zimbabwe, respectively) were proclaimed a British sphere of influence. Southern Rhodesia was annexed formally and granted self-government in 1923, and the administration of Northern Rhodesia was transferred to the British colonial office in 1924 as a protectorate. In 1953, both Rhodesias were joined with Nyasaland (now Malawi) to form the Federation of Rhodesia and Nyasaland. Northern Rhodesia was the center of much of the turmoil and crisis that characterized the federation in its last years. At the core of the controversy were insistent African demands for greater participation in government and European fears of losing political control.

A two-stage election held in October and December 1962 resulted in an African majority in the legislative council and an uneasy coalition between the two African nationalist parties. The council passed resolutions calling for Northern Rhodesia's secession from the federation and demanding full internal self-government under a new constitution and a new national assembly based on a broader, more democratic franchise. On December 31, 1963, the federation was dissolved, and Northern Rhodesia became the Republic of Zambia on October 24, 1964.

At independence, despite its considerable mineral wealth, Zambia faced major challenges. Domestically, there were few trained and educated Zambians capable of running the government, and the economy was largely dependent on foreign expertise. Abroad, three of its neighbors—Southern Rhodesia and the Portuguese colonies of Mozambique and Angola—remained under white-dominated rule. Rhodesia's white-ruled government unilaterally declared independence in 1965. In addition, Zambia shared a border with South African-controlled South-West Africa (now Namibia). Zambia's sympathies lay with forces opposing colonial or white-dominated rule, particularly in Southern Rhodesia. During the next decade, it actively supported movements such as the Union for the Total Liberation of Angola (UNITA), the Zimbabwe African People's Union (ZAPU), the African National Congress of South Africa (ANC), and the South-West Africa People's Organization (SWAPO).

Conflicts with Rhodesia resulted in the closing of Zambia's borders with that country and severe problems with international transport and power supply. However, the Kariba hydroelectric station on the Zambezi River provided sufficient capacity to satisfy the country's requirements for electricity. A railroad to the Tanzanian port of Dar es Salaam, built with Chinese assistance, reduced Zambian dependence on railroad lines south to South Africa and west through an increasingly troubled Angola. By the late 1970s, Mozambique and Angola had attained independence from Portugal. Zimbabwe achieved independence in accordance with the 1979 Lancaster House agreement, but Zambia's problems were not solved. Civil war in the former Portuguese colonies generated refugees and caused continuing transportation problems.

The Benguela Railroad, which extended west through Angola, was essentially closed to traffic from Zambia by the late 1970s. Zambia's strong support for the ANC, which had its external headquarters in Lusaka, created security problems as South Africa raided ANC targets in Zambia.

In the mid-1970s, the price of copper, Zambia's principal export, suffered a severe decline worldwide. Zambia turned to foreign and international lenders for relief, but as copper prices remained depressed, it became increasingly difficult to service its growing debt. In response to growing popular demand, and after lengthy, difficult negotiations between the Kaunda government and opposition groups, Zambia enacted a new constitution in 1991 and shortly thereafter became a multi-party democracy. Kaunda's successor, Frederick Chiluba, made efforts to liberalize the economy and privatize industry, but allegations of massive corruption characterized the latter part of his administration. By the mid-1990s, despite limited debt relief, Zambia's per capita foreign debt remained among the highest in the world.

Although poverty continues to be a significant problem in Zambia, its economy has stabilized, featuring

single-digit inflation, real GDP growth, decreasing interest rates, and increasing levels of trade. Much of its growth is due to foreign investment in Zambia's mining sector and higher copper prices on the world market. In 2005, Zambia qualified for debt relief under the Heavily Indebted Poor Countries (HIPC) initiative, consisting of approximately U.S. $6 billion in debt relief.

GOVERNMENT

Zambia became a republic immediately upon attaining independence in October 1964. The constitution promulgated on August 25, 1973, abrogated the original 1964 constitution. The new constitution and the national elections that followed in December 1973 were the final steps in achieving what was called a "one-party participatory democracy."

The 1973 constitution provided for a strong president and a unicameral National Assembly. National policy was formulated by the Central Committee of the United National Independence Party (UNIP), the sole legal party in Zambia. The cabinet executed the central committee's policy.

In accordance with the intention to formalize UNIP supremacy in the new system, the constitution stipulated that the sole candidate in elections for the office of president was the person selected to be the president of UNIP by the party's general conference. The second-ranking person in the Zambian hierarchy was UNIP's secretary general.

In December 1990, at the end of a tumultuous year that included riots in the capital and a coup attempt, President Kenneth Kaunda signed legislation ending UNIP's monopoly on power. In response to growing popular demand for multi-party democracy, and after lengthy, difficult negotiations between the Kaunda government and opposition groups, Zambia enacted a new constitution in

August 1991. The constitution enlarged the National Assembly from 136 members to a maximum of 158 members, established an electoral commission, and allowed for more than one presidential candidate who no longer had to be a member of UNIP. The constitution was amended again in 1996 to set new limits on the presidency (including a retroactive two-term limit, and a requirement that both parents of a candidate be Zambian-born). The National Assembly is comprised of 150 directly elected members, up to eight presidentially-appointed members, and a speaker. Zambia is divided into nine provinces, each administered by an appointed deputy minister who essentially performs the duties of a governor.

The Supreme Court is the highest court and the court of appeal; below it are the high court, magistrate's court, and local courts.

Principal Government Officials

Last Updated: 11/12/08

Pres. (Acting): **Rupiah BANDA**
Vice Pres.: **Rupiah BANDA**
Min. of Agriculture & Cooperatives: **Ben KAPITA**
Min. of Agriculture & Cooperatives: **Sarah SAYIFWANDA**
Min. of Commerce, Trade, & Industry: **Dora SILIYA**
Min. of Community Development & Social Services: **Catherine NAMUGALA**
Min. of Defense: **George MPOMBO**
Min. of Education: **Geoffrey LUNGWANGA**
Min. of Energy & Water Development: **Kenneth KONGA**
Min. of Environment, Natural Resources, & Tourism: **Michael KAINGU**
Min. of Finance & National Planning: **Ngandu Peter MAGANDE**
Min. of Foreign Affairs: **Kabinga PANDE**
Min. of Gender & Women's Development: **Patricia MULASIKWANDA**
Min. of Health: **Angela CIFIRE**
Min. of Home Affairs: **Ronnie SHIKAPWASHA, Lt. Gen.**
Min. of Information & Broadcasting: **Mike MULONGOTI**
Min. of Labor & Social Security:
Min. of Lands: **Gladys NYIRONGO**
Min. of Justice: **George KUNDA**
Min. of Local Govt. & Housing: **Sylvia MASEBO**
Min. of Mines & Mineral Resources: **Kalombo MWANSA**
Min. of Presidential Affairs: **Cecil HOLMES**
Min. of Science, Technology, & Vocational Training: **Brian CHITUWO**
Min. of Sports, Youth, & Child Development: **Gabriel NAMULAMBE**
Min. of Transport & Communications: **Peter DAKA**
Min. of Works & Supply: **Kapembwa SIMBAO**
Permanent Sec., Office of the Pres.: **Gibson ZIMBA**
Attorney Gen.: **George KUNDA**
Solicitor Gen.: **Sunday NKONDE**
Governor, Central Bank: **Caleb FUNDANGA**
Ambassador to the US: **Inonge MBIKUSITA-LEWANIKA**
Permanent Representative to the UN, New York: **Lazarous KAPAMBWE**

Zambia maintains an embassy in the United States at 2419 Massachusetts Avenue, NW, Washington, DC 20008 (tel: 202-265-9717/8/9).

POLITICAL CONDITIONS

The major figure in Zambian politics from 1964 to 1991 was Kenneth Kaunda, who led the campaign for independence and successfully bridged the rivalries among the country's various regions and ethnic groups. Kaunda tried to base government on his philosophy of "humanism," which condemned human exploitation and stressed cooperation among people, but not at the expense of the individual.

Kaunda's political party—the United National Independence Party (UNIP)—was founded in 1959 and was in power under Kaunda's leadership from 1964 to 1991. Before 1972, Zambia had three significant political parties, but only UNIP had a nationwide following.

In December 1972, Zambian law established a one-party state, and all other political parties were banned; this was later enshrined in the 1973 constitution. Kaunda, the sole candidate, was elected President in the 1973 elections. Elections also were held for the National Assembly. Only UNIP members were permitted to run, but these seats were sharply contested. President Kaunda's mandate was renewed in December 1978, October 1983, and October 1988 in a "yes" or "no" vote on his candidacy.

Growing opposition to UNIP's monopoly on power led to the rise in 1990 of the Movement for Multiparty Democracy (MMD). The MMD assembled an increasingly impressive group of important Zambians, including prominent UNIP defectors and labor leaders. Zambia's first multi-party elections for parliament and the presidency since the 1960s were held on October 31, 1991. MMD candidate Frederick Chiluba resoundingly carried the presidential election over Kenneth Kaunda with 81% of the vote. To add to the MMD landslide, in the parliamentary elections the MMD won 125 of the 150 elected seats and UNIP the remaining 25.

By the end of Chiluba's first term as President (1996), the MMD's commitment to political reform had faded in the face of re-election demands. A number of prominent supporters founded opposing parties. Relying on the MMD's overwhelming majority in parliament, President Chiluba in May 1996 pushed through constitutional amendments that eliminated former President Kaunda and other prominent opposition leaders from the 1996 presidential elections. In the presidential and parliamentary elections held in November 1996, Chiluba was re-elected, and the MMD won 131 of the 150 seats in the National Assembly. Kaunda's UNIP party boycotted the parliamentary polls to protest the exclusion of its leader from the presidential race, alleging in addition that the outcome of the election had been predetermined due to a faulty voter registration exercise. As President Chiluba began his second term in 1997, the opposition and civil society challenged the results of the election amid international efforts to encourage the MMD and the opposition to resolve their differences through dialogue.

Early in 2001, supporters of President Chiluba mounted a campaign to amend the constitution to enable Chiluba to seek a third term of office. Civil society, opposition parties, and many members of the ruling party exerted sufficient pressure on Chiluba to force him to back away from any attempt at a third term.

Presidential, parliamentary, and local government elections were held on December 27, 2001. Eleven parties contested the elections. The elections encountered numerous administrative problems. Opposition parties alleged that serious irregularities occurred. Nevertheless, MMD presidential candidate Levy Mwanawasa, having garnered a plurality of the vote (29%), was declared the victor by a narrow margin, and he was sworn into office on January 2, 2002. Opposition parties won a majority of parliamentary seats in the December 2001 election, but subsequent by-elections gave the ruling MMD a majority in parliament.

During his first months in office, President Mwanawasa encouraged the Zambian Anticorruption Commission to aggressively pursue its mandate. In July 2002, in a speech before the Zambian National Assembly, President Mwanawasa provided details on a number of corruption allegations targeting former President Chiluba, and called for parliament to consider lifting Chiluba's immunity from prosecution. Mwanawasa appointed a special Task Force to investigate and prosecute corrupt officials. Zambian courts are now hearing cases involving corruption charges against Chiluba and numerous officials from his regime.

On May 4, 2007, a British court found former President Frederick Chiluba and several others liable in a civil suit for misappropriating $41 million of public resources. The criminal case, which was frequently in recess due to Chiluba's poor health, is expected to continue through 2008. The government's Task Force on Corruption has also successfully prosecuted three other cases of abuse of office and high-level corruption.

During his first term in office, President Mwanawasa appointed an Electoral Reform Technical Committee (ERTC) and a Constitutional Reform Committee (CRC) to make recommendations for reforms. The ERTC submitted its final report to the President in August 2005. Voter registration began on October 31, 2005 and continued through December 31, 2005. The CRC presented its final report and a draft constitution in December 2005. In February 2006 the government agreed to allow the formation of a Constituent Assembly to consider and adopt the draft constitution, subject to certain conditions. In August 2007, the Zambian parliament passed a government-sponsored law creating a National Constitutional Conference (NCC) charged with drafting a new constitution. The NCC, which is comprised of over 500 members drawn from parliament, political parties, civil society, and government, began meeting in late December 2007. Some members of civil society have refused to participate in the NCC, saying that its membership is too heavily stacked in the government's favor and pushing instead for the promised Constituent Assembly.

The Government of Zambia introduced very limited legislative changes to electoral procedures in mid-2006, including an electoral code of conduct and limits on politically-motivated donations and handouts. On July 25, 2006, President Mwanawasa dissolved parliament and his cabinet and set September 28, 2006 as the date for presidential, parliamentary, and local government elections. Mwanawasa won the September 2006 election with 1,177,846 votes, while the Patriotic Front's Michael Sata came in second with 804,748 votes. The head of a three-party alliance, Hakainde Hichilema, placed third. In parliamentary elections, the ruling MMD party won a slim majority of seats. International observers commended the overall conduct of the elections, but noted some anomalies.

President Mwanawasa died August 19, 2008 in a Paris hospital from complications of a stroke suffered June 29 while he was attending the African Union (AU) Summit in Sharm-el-Sheikh, Egypt. In accordance with the constitution, Vice President Rupiah Banda assumed presidential powers but must hold elections within 90 days of Mwanawasa's death.

ECONOMY

About two-thirds of Zambians live in poverty. Per capita annual incomes are well below their levels at independence and, at $921, place the country among the world's poorest nations. Social indicators continue to decline, particularly in measurements of life expectancy at birth (about 37 years) and maternal mortality (729 per 100,000 pregnancies). The country's rate of economic growth cannot support rapid population growth or the strain which HIV/AIDS related issues (i.e., rising medical costs, decline in worker productivity) place on government resources. Zambia is also one of Sub-Saharan Africa's most highly urbanized countries. Over one-third of the country's 12 million people are concentrated in a few urban zones strung along the major transportation corridors, while rural areas are underpopulated. Unemployment and underemployment are serious problems.

HIV/AIDS is the nation's greatest challenge, with 17% prevalence among the adult population. HIV/AIDS will continue to ravage Zambian economic, political, cultural, and social development for the foreseeable future.

Once a middle-income country, Zambia began to slide into poverty in the 1970s when copper prices declined on world markets. The socialist government made up for falling revenue by increasing borrowing. After democratic multi-party elections, the Chiluba government (1991-2001) came to power in November 1991 committed to an economic reform program. The government was successful in some areas, such as privatization of most of the parastatals, maintenance of positive real interest rates, the elimina-

tion of exchange controls, and endorsement of free market principles. Corruption grew dramatically under the Chiluba government. Zambia has yet to address effectively issues such as reducing the size of the public sector and improving Zambia's social sector delivery systems.

For 30 years, copper production declined steadily from a 1973 high of 700,000 metric tons to a 2000 low of 226,192 metric tons. The decline was the result of poor management of state-owned mines and lack of investment. With the privatization of the mines in April 2000, the downward trend in production and exports was reversed as a result of investments in plant rehabilitation, expansion, increased exploration, and high copper prices on the international market. Copper production rose to 515,000 metric tons in 2006, and a similar level was estimated for 2007.

Zambia experienced positive economic growth for the ninth consecutive year in 2007 with a GDP of U.S. $10.9 billion and a real growth rate of 6% (according to preliminary IMF estimates). The rate of inflation dropped from 30% in 2000 to a single digit inflation of 8.9% by December 2007 due to fiscal and monetary discipline and the growth of the domestic food supply.

In April 2005, the International Monetary Fund (IMF) and the World Bank's International Development Association (IDA) provided Zambia significant debt service relief and debt forgiveness under the Heavily Indebted Poor Countries (HIPC) initiative. Zambia was the 17th country to reach the HIPC completion point and has benefited from approximately U.S. $6 billion in debt relief. In July 2005, the G-8 agreed on a proposal to cancel 100% of outstanding debt of eligible HIPC countries to the IMF, African Development Fund, and IDA. Zambia is among the beneficiaries of this additional multilateral debt relief. Zambia also completed a Poverty Reduction and Growth Facility (PRGF) arrangement with the IMF in 2007, and the government has not yet determined whether it will seek another PRGF program or pursue a different arrangement with the IMF, a Policy Support Instrument (PSI), which would not involve additional lending.

The Zambian Government is pursuing an economic diversification program to reduce the economy's reliance on the copper industry. This initiative seeks to exploit other components of Zambia's rich resource base by promoting agriculture, tourism, gemstone mining, and hydro power. The government is also seeking to create an environment that encourages entrepreneurship and private-sector led growth. The 2008 budget contained provisions for tax alleviation, as well as increased allotments for healthcare, education, and economic development.

DEFENSE

The Zambian Defense Force (ZDF) consists of the army, the air force, and Zambian National Service (ZNS). The ZNS, while operating under the Ministry of Defense, is responsible primarily for public works projects. The ZDF is designed primarily for internal defense. The HIV/AIDS epidemic has hit the ZDF especially hard.

The ZDF has contributed to African Union and United Nations peacekeeping operations in Africa, and in 2005 became a partner in the African Contingency Operations and Training Assistance (ACOTA) program. The first iteration of ACOTA peacekeeper training took place in 2007.

FOREIGN RELATIONS

Zambia is a member of the Non-Aligned Movement (NAM), the African Union, the Southern African Development Community (SADC), and the Common Market for Eastern and Southern Africa (COMESA), which is headquartered in Lusaka.

President Kaunda was a persistent and visible advocate of change in Southern Africa, supporting liberation movements in Angola, Mozambique, Namibia, Southern Rhodesia (Zimbabwe), and South Africa. Many of these liberation organizations were based in Zambia during the 1970s and 1980s.

President Chiluba assumed a visible international role in the mid- and late 1990s. His government sponsored Angola peace talks that led to the 1994 Lusaka Protocols. Zambia provided troops to UN peacekeeping initiatives in Mozambique, Rwanda, Angola, and Sierra Leone. Zambia was the first African state to cooperate with the International Tribunal investigation of the 1994 genocide in Rwanda.

In 1998, Zambia took the lead in efforts to establish a cease-fire in the Democratic Republic of Congo. After the signing of a cease-fire agreement in Lusaka in July and August 1999, Zambia was active in supporting the Congolese peace effort, although activity diminished considerably after the Joint Military Commission tasked with implementing the cease-fire relocated to Kinshasa in September 2001.

During President Mwanawasa's administration, Zambia contributed troops to support UN peacekeeping operations in Sudan. In 2007, the Zambian Government publicly appealed to other African nations to contribute to a joint African Union-United Nations (UNAMID) peacekeeping force in Darfur. In August 2007, President Mwanawasa assumed the SADC Chairmanship and affirmed his commitment to launching a free trade agreement in 2008.

Zambia's history of stability and its commitment to regional peace has made it a haven for large numbers of refugees. Currently, Zambia hosts 113,600 refugees (down from a high of 203,000 in 2002), including roughly 56,100 Congolese, 40,700 Angolans, and 16,800 other nationalities (mainly Rwandans, Burundians, and Somalis). In recent years, Zambia has made serious efforts to repatriate many of these refugees, including an estimated 108,000 Angolan and 7,500 Congolese refugees.

U.S.-ZAMBIAN RELATIONS

The United States and Zambia enjoy warm relations. The United States works closely with the Zambian Government to defeat the HIV/AIDS pandemic that is ravaging Zambia, to promote economic growth and development, and to effect political reform needed to promote responsive and responsible government. The United States is also supporting the government's efforts to root out corruption. Zambia is a beneficiary of the African Growth and Opportunity Act (AGOA). The U.S. Government provides a variety of technical assistance and other support that is managed by the Department of State, U.S. Agency for International Development, Millennium Challenge Account (MCA) Threshold Program, Centers for Disease Control, Department of Treasury, Department of Defense, and Peace Corps. The majority of U.S. assistance is provided through the President's Emergency Plan for AIDS Relief (PEPFAR), in support of the fight against HIV/AIDS.

In addition to supporting development projects, the United States has provided considerable emergency food aid during periods of drought and flooding through the World Food Program (WFP) and is a major contributor to refugee programs in Zambia through the UN High Commission for Refugees and other agencies.

U.S. Agency for International Development (USAID)

In 2007, U.S. assistance to Zambia exceeded $259 million. USAID's program in Zambia included over $116 million for HIV/AIDS programs utilizing PEPFAR funding and $11 million to fight corruption and increase trade under the MCA Threshold Program. In addition to programs funded through PEPFAR, the President's Malaria Initiative, and the Millennium Challenge Account Threshold Program, USAID's program in Zambia supported training and technical assistance to promote economic growth through trade and investment; create health and educational opportunities to improve lives; and reduce the impact of HIV/AIDS through multi-sectoral responses.

Peace Corps

A country agreement inviting the Peace Corps to work in Zambia was signed by the United States and Zambia on September 14, 1993. The first group of volunteers was sworn in on April 7, 1994. In 2007, the Peace Corps program in Zambia continued to increase understanding between Zambians and Americans.

More than 160 two-year Volunteers and as many as 10 extension and Crisis Corps Volunteers promote sustainable development through their activities in agricultural and natural resource management, health and sanitation, rural education, and humanitarian assistance. Volunteers are working in eight of Zambia's nine provinces building local capacity to manage family fish farms, to promote food security and positive resource management practices near forest reserves, to implement health reforms at the village level, to promote and support rural education, and to extend HIV/AIDS education and prevention efforts through full participation in PEPFAR. Volunteers live primarily in rural villages in remote parts of the country without running water, electricity, or other amenities.

New trainees undertake training in local language, culture, and the relevant technical specialty for 9-12 weeks at a center in the Chongwe district of Lusaka province.

TRAVEL

Consular Information Sheet

December 8, 2008

Country Description: Zambia is a developing country in southern Africa. Tourist facilities outside of the capital, Lusaka, Livingstone (Victoria Falls), and well-known game parks are not fully developed.

Entry Requirements: A passport and visa are required. A visa may be obtained in advance at a Zambian Embassy or Consulate or at the port of entry. The visa fee for American passport holders is $135. Visas are valid for 3 years, multiple entries. Upon entry, immigration will stamp your passport with the permitted length of stay. This is normally 30 days and usually can be extended twice (a total time of 90 days) by visiting an immigration office. All Americans, except resident diplomats, must pay an airport departure tax. Often airlines include this tax in the cost of the ticket. At the airport, passengers need to verify this tax has

been paid. The traveler will receive a "no-fee" receipt to reflect payment. Travelers transiting through South Africa should ensure they have at least two blank (unstamped) visa pages in their passports. South African immigration authorities routinely turn away visitors who do not have enough blank visa pages. Zambian Immigration officials insist visitors carry the original or a certified copy of their passports and immigration permits at all times. Certified copies must be obtained from the immigration office that issued the permit. American citizens should closely follow immigration guidelines, including visa requirements. Visit the Embassy of Zambia web site at http://www.zambiaembassy.org or the Zambian Immigration site at http://www.zambiaimmigration. gov.zm for the most current visa information.

Safety and Security: U.S. citizens are advised to exercise caution when traveling in northern Luapula Province and in areas of Northern Province adjacent to the Democratic Republic of Congo (DRC). A cease-fire is currently in effect, but the DRC is not yet stable and uncontrolled militias operate in the eastern DRC. In the past, armed gunmen have attacked vehicles near the DRC-Zambian border. Land mines and unexploded ordnance along the western, southern, and eastern borders make off-road travel to those areas potentially hazardous. For these reasons, the U.S. Embassy discourages travelers from driving off-road or on remote tracks near the borders with DRC and Angola. American citizens who must drive in these areas are encouraged to drive in convoy and to carry satellite telephones.

U.S. citizens should avoid political rallies and street demonstrations and maintain security awareness at all times.

For the latest security information, Americans traveling abroad should regularly monitor the Department's web site, where the current Worldwide Caution Travel Alert, Middle East and North Africa Travel Alert, Travel Warnings and other Travel Alerts can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S. and Canada, or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: Travel in many sections of Lusaka, Livingstone and most other major cities as well as in the major game parks, is generally safe during daylight hours. Those using public transport or visiting high-pedestrian traffic areas are advised to be vigilant against petty crime.

Vehicle thefts, burglaries, and armed robbery occur throughout the country. Carjacking remains an ongoing problem, especially in Lusaka and other major cities. Carjackers generally employ a strategy of blocking the back of one's car when the car is waiting to pass through a security gate into a residence or other facility. It is recommended to drive with doors locked and windows closed at all times and remain vigilant when entering or exiting residences and facilities.

Foreign tourists have frequently been the target of small-scale financial scams involving "fees" to be paid to Zambian officials. The embassy cautions travelers to make sure they receive an official receipt from the Government of Zambia for any fines and duties paid. Often, travelers will be told that the official does not have a receipt book or that this type of fine is not receipted. Polite, but firm insistence on a Zambian Government receipt is recommended.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

The local equivalent to the "911" emergency line in Zambia is: 999.

Medical Facilities and Health Information: Government hospitals and clinics are often understaffed and lack supplies. Private medical clinics in major cities can provide reasonable care in many cases, but major medical emergencies usually require medical evacuation to South Africa, Europe, or the United States. Basic medical care outside of major cities is extremely limited. Doctors and hospitals often expect immediate cash payment for health services. Travelers should carry their prescription drugs and medications in original labeled containers, as well as the written prescription from their physician (See Criminal Penalties section).

The U.S. Department of State is unaware of any HIV/AIDS entry restrictions for visitors to or foreign residents of Zambia.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's website at http://wwwn.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith/en.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road condi-

tions that differ significantly from those in the United States. The information below concerning Zambia is provided for general reference only, and may not be totally accurate in a particular location or circumstance. Traffic circulates on the left side of the road, and there are many British-style roundabouts rather than intersections with traffic lights. There is no left turn on red. Seat belts are mandatory, as are helmets for motorcyclists. A child seat is not mandatory by law, but is highly recommended for safeguarding children. The speed limit is 50 km/30 mph in Lusaka and 100 km/60 mph outside of city limits. However, speed limits are rarely respected, and most cars drive 80 km/50 mph in the city and 120 km/75 mph outside town. Most vehicles operate at even faster speeds on the road from Lusaka to Livingstone. Drivers under the influence of alcohol who are involved in accidents are tested at Lusaka's University Teaching Hospital (UTH).

Driving on Zambian roads can be hazardous. Most roads do not have shoulders or sidewalks, pedestrians and livestock use the roadways both day and night. While the main roads in Lusaka as well as the principal highways linking Lusaka with the major provincial capitals are generally maintained, many secondary roads are in poor repair. During the rainy season (end of October to mid-March), travelers who do not have a four-wheel drive vehicle will encounter problems driving on rural roads. Even in daylight, passing another vehicle can be particularly dangerous given the general condition of roads. Driving at night can be hazardous and is discouraged. When breakdowns occur, local drivers place a few branches behind the car to indicate trouble, but this is hardly visible at night. As a result, many drivers use their high beams at night to detect stopped vehicles and pedestrians.

Since 2000, Americans have been involved in a number of serious car accidents. There are no emergency services for injured or stranded drivers. Car accident victims are vulnerable to theft by those who pretend to be "helpful." It is advisable to have a cell phone when undertaking a trip outside of town, although many parts of the country do not have cell phone service.

City traffic is comprised mostly of cars and minibuses; motorcycles are rare. Minibuses serve as the primary means of inter-city travel in Zambia. They are often overcrowded and seldom punctual. Drivers often use pass using road shoulders or opposing traffic lanes. Often they will stop with little or no warning, in order to pick up or drop off passengers. Some luxury buses do ply the routes between Lusaka and Livingstone and the Copperbelt.

Visit the web site of the national tourist office at http://www.zambia tourism.com.

Aviation Safety Oversight: As there is no direct commercial air service between the United States and Zambia, the U.S. Federal Aviation Administration (FAA) has not assessed Zambia's Civil Aviation Authority for compliance with International Civil Aviation Organization (ICAO) aviation safety standards. For more information, travelers may visit the FAA's web site at http://www.faa.gov.

Special Circumstances: Perpetrators of fraud often target foreigners, including Americans. While such fraud schemes in the past have been largely associated with Nigeria, they are now prevalent throughout Africa, including Zambia. For additional information, please consult The Department of State's publication International Financial Scams. In addition, Americans are advised to exercise caution when approached with unsolicited offers to purchase gemstones or precious metals for export as the Embassy has received multiple recent complaints from Americans who have been victimized as a result of involvement in these deals.

U.S. citizens are encouraged to carry a copy of their U.S. passports with them at all times, so that, if questioned by local officials, proof of identity and U.S. citizenship is readily available. Zambian police do not provide the Embassy with timely notification of the arrest of American citizens. If you are detained, you should insist on your right to contact a U.S. consular officer.

Visa cards are accepted in major supermarkets, restaurants, stores, and hotels in Lusaka and Livingstone (Victoria Falls). Credit card fraud is increasing in Zambia and there have been several cases involving fraudulent charges, including some at major hotels catering primarily to foreign visitors. Many businesses use carbon-paper documents to process payment. These documents are not secure and can pose a threat to cardholders. The Embassy urges caution when using debit or credit cards at any point of purchase, especially if the transaction is not processed electronically. Normally, American travelers can withdraw money (in local currency) from ATMs in major cities in Zambia using their ATM cards or credit cards from the United States. However, from time to time, the banks lose their connections with the credit card exchanges, thus making withdrawals impossible. Zambian banks and bureaux de change will not accept dollar-denominated notes issued before 1990.

Travel to military areas and photographing military facilities, airports, bridges, and other facilities deemed to be of security relevance, are prohibited. Often these sites are not clearly marked and the first notification a tourist would receive is a police officer demanding their film and/or camera. Authorities may also challenge photography of areas other than tourist attractions. Service providers in Zambia, including the tourism sector, are not subject to the same standards of safety oversight that exist in the United States; visitors should evaluate risks carefully. Travelers are cautioned to observe local or park regulations and heed all instruction given by tour guides. Even in the most serene settings, wild animals can pose a threat to life and safety.

Large numbers of travelers visit tourist destinations, including South Luangwa National Park and Living-

stone (Victoria Falls), without incident. However, American citizens are advised to avoid rafting and other whitewater boating activities on the Zambezi River below Victoria Falls during the high-water season, February-June. During high water, the Batoka Gorge section of the river becomes unpredictable and several tourists have been involved in fatal accidents.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the U. S. for similar offenses. Persons violating Zambian laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Zambia are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

It is against both Zambian and U.S. law to buy, possess or transport animals or animal products, such as tortoise shell, rhino horn, elephant ivory, tusks of any animal or any items made out of these materials. In Zambia, penalties range from large fines to mandatory five-year prison sentences. The Zambian Wildlife Authority has screeners at international ports of entry/exit and WILL prosecute offenders to the fullest extent of the law. While many of these items are sold in open markets aimed at foreign tourists, it remains the responsibility of the customer to ensure that he/she is not purchasing a prohibited item.

Further instructions on the importation of items to the U.S. may be found on the following web-site at http://www.customs.gov.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in Zambia are encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration website so that they can obtain updated information on travel and security within Zambia. Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency. The U.S. Embassy is located at the corner of Independence and United Nations Avenues. The mailing address is PO Box 31617, Lusaka, Zambia. Telephone exchanges have recently changed within Zambia. When calling from the United States, please contact the American Embassy during regular work hours, Monday through Thursday from 7:30 a.m. to 5:00 p.m., and on Friday from 7:30 a.m. to 12:30 p.m. by dialing 011-260-21-125-0955. For after-hours emergencies involving American citizens, please dial 011-260-21-125-0955 extension 1. The fax number is 260-21-125-2225. The web site is http://zambia.usembassy.gov.

Intercountry Adoption

November 2008

The information in this section has been edited from a report available through the U.S. Department of State Office of Children's Issues. For more information detailed, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Zambia is not party to The Hague Convention on Protection of Children and Co-operation in Respect of Intercountry Adoption (Hague Adoption Convention).

There was a brief five-month suspension of foreign adoptions in Zambia from December 2007 until May 2008. No formal explanation was given for the suspension. The Ministry of Community Development and Social Welfare has not announced its revised intercountry adoption procedures to date. Until the Ministry finalizes their procedures, it is premature for prospective adoptive parents to make arrangements to come to Zambia to continue with their adoption. The U.S. Embassy in Lusaka is in consultation with the Ministry and will post further updates on this website once they are available.

Who Can Adopt? To bring an adopted child to United States from Zambia, you must be found eligible to adopt by the U.S. Government. The U.S. Government agency responsible for making this determination is the Department of Homeland Security, U.S. Citizenship and Immigration Services (USCIS).

For detailed information on these requirements for adoption, please review the *Intercountry Adoption* section of this publication and visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

In addition to these U.S. requirements for prospective adoptive parents, Zambia also has the following eligibility requirements for prospective adoptive parents.

Residency Requirements: Based on the Zambian Adoption Act, prospective adoptive parents must reside in Zambia for at least 12 months in order to adopt a Zambian child. The prospective adoptive parents may be required to foster the child for three months. At a minimum, U.S. citizens with an approved I-600A or I-600 indicating the completion of the home study must complete the three month fostering requirement.

Age Requirements: Prospective adoptive parent(s) must be at least 25 years of age. If the prospective parents are a couple, at least one parent must be 25 years of age and at least 21 years older than the child. If related to the child, the age requirement is 21 years old.

Marriage Requirements: Prospective adoptive parents may be married

or single; however, single men cannot adopt a female child unless the court finds special circumstances warranting the adoption.

Income Requirements: Prospective adoptive parents must be able to demonstrate adequate finances.

Who Can Be Adopted? In addition to any Zambian requirements for children to be eligible for intercountry adoption, a child must meet the definition of an orphan under U.S. law for you to bring him or her home back to the United States. Learn more about these U.S. requirements.

Zambia's Adoption Authority: Ministry of Community Development and Social Services, Department of Social Welfare

Prospective adoptive parents may contact Social Welfare officers and Juvenile Inspectors of the Provincial and District Social Welfare offices to apply for adoption (Information provided in the "Contact Information" tab).

The Process: The first step in adopting a child from Zambia is usually to select a licensed agency in the United States that can help with your adoption. Adoption service providers must be licensed by the U.S. state in which they operate.

U.S. adoption agencies must be registered with the Commissioner of Juvenile Welfare in order to provide adoption services in Zambia. Currently, there are no registered U.S. adoption agencies licensed to work in Zambia. Prospective adoptive families may also hire an attorney to assist them with Zambian legal requirements. The U.S. Embassy in Lusaka has a list of lawyers who will work with U.S. citizens available at http://www.usemb.org.zm/wwwhlawyers.htm. The Embassy cannot restrict applicants from using other attorneys or recommend the services of any specific attorney.

For US-based agencies, it is suggested that prospective adoptive parents contact the Better Business Bureau and/or the licensing office of the appropriate state Government agency in the U.S. state where the agency is located or licensed.

To bring an adopted child from Zambia to the United States, you must apply to be found eligible to adopt (Form I-600A) by the U.S. Government, Department of Homeland Security, U.S. Citizenship and Immigration Services (USCIS).

Prospective adoptive families must apply to the Commissioner for Juvenile Welfare for permission to adopt. If foreign citizen prospective adoptive parents are resident in Zambia, Zambian social workers will interview them and conduct a home study. Parents await approval by the provincial adoption committee.

If you are eligible to adopt, and a child is available for intercountry adoption, the central adoption authority in Zambia will provide you with a referral to a child. The child must be eligible to be adopted according to Zambia's requirements. The child must also meet the definition of an orphan under U.S. law.

An adoption agency places the child with the prospective adoptive parents upon approval by provincial adoption committee. Parents must foster the child in Zambia for three months. After three months, parents file an adoption application with the court of the First Class (provincial court). The child is assigned a guardian ad litem (social worker) who will represent the child's interests before the court, investigate what is in the child's best interests, and report his/her findings to the court at the adoption hearing.

Role of the Adoption Authority: Intercountry adoptions are overseen by the Ministry of Community Development and Social Services, Department of Social Welfare.

Role of the Court: A summons will be served to the adoptive parents, the child, and any person caring for the child (if applicable). The hearing is confidential. Once the adoption order is issued it must be recorded with the Registrar General's office and the child's details are entered into the register as an adopted child. Prospective adoptive parents have the option to file an adoption petition in the High Court of Zambia, however, this is a much lengthier process. Adoptions filed in the High Court can take up to two years to complete.

Adoption Application: After three months of fostering the potential adoptee, the prospective adoptive parents file an adoption application with the court of the first class (provincial court). Once the adoption process is near completion, the child will receive a new birth certificate in his or her adoptive name. The adoptive parents receive an adoption decree, which is the final document and signifies the successful completion of the process. Equipped with the two documents, the child applies for a new Zambian passport in the adopted name.

Time Frame: There is a mandatory three-month continuous (foster) care requirement and a 12-month residency requirement prior to finalizing an adoption. The foster care period can run concurrently with the 12-month residency period. If the residency requirement is waived in lieu of the mandatory fostering, adoption processing may be completed within a few months.

Adoption Fees:

- Fostering fee–approximately $12 USD
- Adoption court fee –approximately $12 USD
- Zambian passport fee –approximately $24 USD
- Registration/certificate of adoption –approximately $26 USD
- Costs as may be determined by the court–approximately $26 USD
- Attorney's fees (fees vary widely)–approximately $10,000–35,000 USD
- Adoption Agency–FEES VARY WIDELY

Documents Required:

- Evidence of adequate finances (home study information will suffice)
- Copies of birth certificates, passports, and marriage certificates of prospective adoptive parents
- Approved I-600A (this can serve as evidence that the adoptive parents were vetted for suitability by U.S. authorities and can be used to avoid the residency requirement)

For updates on document requirements and information on how to authenticate documents, visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

Bringing Your Child Home: Once your adoption is complete (or you have obtained legal custody of the child), there are a few more steps to take before you can head home. Specifically, you need to apply for several documents for your child before he or she can travel to the United States, such as a birth certificate, a passport or travel document for your child from the country in which he or she was born, and a U.S. Immigration Visa. For detailed and updated information on how to obtain these documents, review the *Intercountry Adoption* section on this publication and visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

Child Citizenship Act: For adoptions finalized abroad: The Child Citizenship Act of 2000 allows your new child to acquire American citizenship automatically when he or she enters the United States as lawful permanent residents. For adoptions finalized in the United States: The Child Citizenship Act of 2000 allows your new child to acquire American citizenship automatically when the court in the United States issues the final adoption decree. To learn more, review the *Intercountry Adoption* section on this publication and visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

After Adoption: Zambia does not have any post-adoption requirements.

Contact Information

U.S. Embassy in Zambia
The American Embassy
Corner of the United Nations and Independence Road
P.O. Box 31617
Lusaka, ZAMBIA
Tel: (260)-1-250955
Fax: (260)-1-252225

ZIMBABWE

Compiled from the November 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Republic of Zimbabwe

PROFILE

Geography

Area: 390,580 sq. km. (150,760 sq. mi.), slightly larger than Montana.
Cities: Capital—Harare (pronounced Ha-RAR-e), pop. 1.5 million. Other towns—Bulawayo, Chitungwiza, Mutare, Gweru, Kwekwe, Masvingo, Marondera.
Terrain: Desert and savanna.
Climate: Mostly subtropical.

People

Nationality: Noun and adjective—Zimbabwean (sing.), Zimbabweans (pl.).
Population: (2008 est.) 8 to 9 million.
Annual growth rate: (2006 World Bank est.): 0.8%. (Note: the population growth rate is depressed by an HIV/AIDS adult prevalence rate estimated to be 15.6% and a high level of net emigration.)
Ethnic groups: Shona 71%, Ndebele 16%, other African 11%, white 1%, mixed and Asian 1%.
Religions: Christianity 75%, offshoot Christian sects, animist, and Muslim.
Languages: English (official), Shona, Sindebele.
Education: Attendance—mandatory for primary level. Adult literacy—90.5% (2004 est.).
Health: Infant mortality rate—51.7/1,000 (2006 est.). Life expectancy—men 37 (2006), women 34 (2006).

Government

Type: Parliamentary.
Constitution: December 21, 1979.
Independence: April 18, 1980.
Government branches: Executive—President (chief of state and head of government), Cabinet. Legislative—bicameral (House of Assembly and Senate). Judicial—High Court, Court of Appeal, local and customary courts.
Administrative subdivisions: Town Councils and District Councils.
Political subdivisions: Town Councils and District Councils.
Political parties: Zimbabwe African National Union-Patriotic Front (ZANU-PF); Movement for Democratic Change (MDC); United People's Party (UPP).

Economy

GDP: (2007 IMF est.) U.S. $1.437 billion.
Real GDP growth rate: (2007 IMF est.): -6.1%.
Real per capita GDP: (Reliable estimates of current GDP and population size are unavailable.)
Avg. inflation rate: 1,694,000% year-on-year, May 2008, by official accounts; private sector estimates are roughly one and half times the official figure.
Natural resources: Deposits of more than 40 minerals including ferrochrome, gold, silver, platinum, copper, asbestos; 19 million hectares of forest (2000).
Agriculture: (15% of GDP) Types of crops and livestock—corn, cotton, tobacco, wheat, coffee, tea, sugarcane, peanuts, cattle, sheep, goats, pigs.
Industry: manufacturing, public administration, commerce, mining, transport and communication.
Trade: (2007) U.S. exports—U.S. $105.2 million. U.S. imports—U.S. $71.8 million. Partners (2000 est.)—South Africa 22%, U.K. 10%, Germany 9%, U.S. 8%. Total imports (2004)—U.S. $1.989 billion: most of these imports were construction and agricultural machinery, transportation equipment, data processing equipment and software, industrial machinery, pharmaceuticals, fertilizers, and general manufactured products. Major suppliers—South Africa 34%, U.K. 10.8%, Germany 7.3%, U.S. 6%. (Although China is now said to be the second-largest trading partner, no statistics are available.)

PEOPLE AND HISTORY

Primarily of the Bantu group of south and central Africa, the black Zimba-

bweans are divided into two major language groups, which are subdivided into several ethnic groups. The Mashona (Shona speakers), who constitute about 75% of the population, have lived in the area the longest and are the majority language group. The Matabele (Sindebele speakers), representing about 20% of the population and centered in the southwest around Bulawayo, arrived within the last 150 years. An offshoot of the South African Zulu group, they maintained control over the Mashona until the white occupation of Rhodesia in 1890.

More than half of white Zimbabweans, primarily of English origin, arrived in Zimbabwe after World War II. Afrikaners from South Africa and other European minorities, including Portuguese from Mozambique, also are present. Until the mid-1970s, there were about 1,000 white immigrants per year, but from 1976 to 1985 a steady emigration resulted in a loss of more than 150,000, leaving about 100,000 in 1992. Renewed white emigration in the late 1990s and early 2000s reduced the white population to less than 50,000. English, the official language, is spoken by the white population and understood, if not always used, by more than half of the black population.

Zimbabwe boasts one of Africa's highest literacy rates. Primary and secondary schools were segregated until 1979. In the first decade after independence in 1980, the educational system was systematically enlarged by the Zimbabwean Government, which was committed to providing free public education to all citizens on an equal basis. Though in the late 1970s only 50% of the black children (5-19 years old) were listed officially as attending rural schools, today most children attend primary school despite the fact that school fees are now charged for all schools at all levels. Primary through post-secondary enrollment has expanded from 1 million to about 2.9 million since independence. There is an impressive network of independent private schools and church-run mission schools that have significantly more resources and thus significantly higher school fees than government-run schools. Higher education is offered at seven state-run universities, the most prominent being the University of Zimbabwe in Harare and the National University of Science and Technology in Bulawayo, and three private church-run universities, Africa University (Methodist), Catholic University, and Solusi University (Seventh Day Adventist). There is also a large network of teacher-training, nursing, and polytechnic colleges.

Early History

Archaeologists have found Stone-Age implements and pebble tools in several areas of Zimbabwe, a suggestion of human habitation for many centuries, and the ruins of stone buildings provide evidence of early civilization. The most impressive of these sites is the "Great Zimbabwe" ruins, after which the country is named, located near Masvingo. Evidence suggests that these stone structures were built between the 9th and 13th centuries A.D. by indigenous Africans who had established trading contacts with commercial centers on Africa's southeastern coast.

In the 16th century, the Portuguese were the first Europeans to attempt colonization of south-central Africa, but the hinterland lay virtually untouched by Europeans until the arrival of explorers, missionaries, ivory hunters, and traders some 300 years later. Meanwhile, mass migrations of indigenous peoples took place. Successive waves of more highly developed Bantu peoples from equatorial regions supplanted the original inhabitants and are the ancestors of the region's Africans today.

British Settlement and Administration

In 1888, Cecil Rhodes obtained a concession for mineral rights from local chiefs. Later that year, the area that became Southern and Northern Rhodesia was proclaimed a British sphere of influence. The British South Africa Company was chartered in 1889, and the settlement of Salisbury (now Harare, the capital) was established in 1890. In 1895, the territory was formally named Rhodesia after Cecil Rhodes under the British South Africa Company's administration.

Following the abrogation of the company's charter in 1923, Southern Rhodesia's white settlements were given the choice of being incorporated into the Union of South Africa or becoming a separate entity within the British Empire. The settlers rejected incorporation, and Southern Rhodesia was formally annexed by the United Kingdom that year. Until 1980, Rhodesia was an internally self-governing colony with its own legislature, civil service, armed forces, and police. Although Rhodesia was never administered directly from London, the United Kingdom always retained the right to intervene in the affairs of the colony, particularly in matters affecting Africans.

After 1923, European immigrants concentrated on developing Rhodesia's rich mineral resources and agricultural potential. The settlers' demand for more land led in 1934 to the passage of the first of a series of land apportionment acts that reserved certain areas for Europeans.

In September 1953, Southern Rhodesia was joined in a multiracial Central African Federation with the British protectorate of Northern Rhodesia and Nyasaland in an effort to pool resources and markets. Although the federation flourished economically, the African population, who feared they would not be able to achieve self-government with the federal structure dominated by White Southern Rhodesians, opposed it. The federation was dissolved at the end of 1963 after much crisis and turmoil, and Northern Rhodesia and Nyasaland became the independent states of Zambia and Malawi in 1964.

Unilateral Declaration Of Independence (UDI)

The European electorate in Rhodesia, however, showed little willingness to accede to African demands for

increased political participation and progressively replaced more moderate party leaders. In April 1964, Prime Minister Winston Field, accused of not moving rapidly enough to obtain independence from the United Kingdom, was replaced by his deputy, Ian Smith. Prime Minster Smith led his Rhodesian Front Party to an overwhelming victory in the 1965 elections, winning all 50 of the first roll seats and demoralizing the more moderate European opposition.

Although prepared to grant independence to Rhodesia, the United Kingdom insisted that the authorities at Salisbury first demonstrate their intention to move toward eventual majority rule. Desiring to keep their dominant position, the white Rhodesians refused to give such assurances. On November 11, 1965, after lengthy and unsuccessful negotiations with the British Government, Prime Minister Smith issued a Unilateral Declaration of Independence (UDI) from the United Kingdom.

Post-UDI Events

The British Government considered the UDI unconstitutional and illegal but made clear that it would not use force to oppose it. On November 12, 1965, the United Nations also determined the Rhodesian Government and UDI to be illegal and called on member states to refrain from assisting or recognizing the Smith regime. The British Government imposed sanctions on Rhodesia and requested other nations to do the same.

On December 16, 1966, the UN Security Council, for the first time in history, imposed mandatory economic sanctions on a state. Rhodesia's primary exports including ferrochrome and tobacco, were placed on the selective sanctions list, as were shipments of arms, aircraft, motor vehicles, petroleum, and petroleum products to Rhodesia. On May 29, 1968, the Security Council unanimously voted to broaden the sanctions by imposing an almost total embargo on all trade

with, investments in, or transfers of funds to Rhodesia and imposed restrictions on air transport to the territory.

In the early 1970s, informal attempts at settlement were renewed between the United Kingdom and the Rhodesian administration. Following the April 1974 coup in Portugal and the resulting shifts of power in Mozambique and Angola, pressure on the Smith regime to negotiate a peaceful settlement increased. In addition, sporadic antigovernment guerilla activity, which began in the late 1960s, increased dramatically after 1972, causing destruction, economic dislocation, casualties, and a slump in white morale. In 1974, the major African nationalists groups—the Zimbabwe African Peoples Union (ZAPU) and the Zimbabwe African National Union (ZANU), which split away from ZAPU in 1963—were united into the "Patriotic Front" and combined their military forces, at least nominally.

In 1976, because of a combination of embargo-related economic hardships, the pressure of guerilla activity, independence and majority rule in the neighboring former Portuguese territories, and a U.K.-U.S. diplomatic initiative, the Smith government agreed in principle to majority rule and to a meeting in Geneva with black nationalist leaders to negotiate a final settlement of the conflict. Blacks represented at the Geneva meeting included ZAPU leader Joshua Nkomo, ZANU leader Robert Mugabe, UANC chairman bishop Abel Muzorewa, and former ZANU leader Rev. Nadabaningi Sithole. The meeting failed to find a basis for agreement because of Smith's inflexibility and the inability of the black leaders to form a common political front.

On September 1, 1977 a detailed Anglo-American plan was put forward with proposals for majority rule, neutrally administered with pre-independence elections, a democratic constitution and the formation of an integrated army. Reactions were mixed, but no party rejected them. In the interim, on March 3, 1978, the Smith administration signed the "internal settlement" agreement in Salisbury with Bishop Muzorewa, Rev. Sithole, and Chief Jeremiah Chirau. The agreement provided for qualified majority rule and elections with universal suffrage. Following elections in April 1979, in which his UANC party won a majority, Bishop Muzorewa assumed office on June 1, becoming "Zimbabwe-Rhodesia's" first black prime minister. However, the installation of the new black majority government did not end the guerilla conflict that had claimed more than 20,000 lives since 1972.

Shortly after British Prime Minister Margaret Thatcher's conservative government took power in May 1979, the British began a new round of consultations that culminated in an agreement among the Commonwealth countries as the basis for fresh negotiations among the parties and the British involving a new constitution, free elections and independence.

The British and the African parties began deliberations on a Rhodesian settlement at Lancaster House in London on September 10, 1979. On December 10, 1979, in preparation for the transition under British authority to officially recognized independence, the "Zimbabwe-Rhodesia" reverted de facto to colonial status. On December 12, British Governor Lord Christopher Soames arrived in Salisbury to reassert British authority over the colony. His arrival signaled the end of the Rhodesian rebellion and the "internal settlement," as well as the beginning of Zimbabwe's transition to independence. The United Kingdom lifted all remaining sanctions against Zimbabwe that day. The United States lifted sanctions effective December 16.

On December 21, after 3 months of hard bargaining, the parties signed an agreement at Lancaster House calling for a cease-fire, new elections, a transition period under British rule, and a new constitution implementing majority rule while protecting minority rights. The agreement specified that upon the granting of independence, the country's name would be Zimbabwe. The same day, the UN Security Council endorsed the settlement agreement and formally voted unanimously to call on member nations to remove sanctions.

During the transition period, nine political parties campaigned for the February 27-29 pre-independence elections. The elections were supervised by the British Government and monitored by hundreds of observers, most of whom concluded that, under the prevailing circumstances, the elections were free and fair and reflected the will of the people. Robert Mugabe's ZANU (PF) party won an absolute majority and was asked to form Zimbabwe's first government.

In a series of public statements during the transition period, Prime Minister Mugabe indicated that he was committed to a process of national reconciliation and reconstruction as well as moderate socioeconomic change. His priorities were to integrate the various armed forces, reestablish social services and education in rural areas, and resettle the estimated one million refugees and displaced persons. Mugabe also announced that his government would begin investigating ways of reversing past discriminatory policies in land distribution, education, employment, and wages.

Mugabe stated that Zimbabwe would follow a nonaligned foreign policy and would pursue a pragmatic relationship with South Africa. He noted that while Zimbabwe opposed apartheid and would support democratic change in South Africa, it would not provide bases for anti-South African guerillas.

The British Government formally granted independence to Zimbabwe on April 18, 1980. Most nations recognized Zimbabwe following independence. The United States was the first nation to open an embassy in Salisbury (Harare) on that day. Parliament convened for the first time on May 13, 1980. Zimbabwe became a member of the United Nations on August 25, 1980.

In seeking national reconciliation, Prime Minister Mugabe's first cabinet comprised members of ZANU-PF, PF-ZAPU, and independent white members of parliament (MPs) and senators. The government embarked on an ambitious reconstruction and development program and instituted increases in minimum wages. Land redistribution proceeded under four experimental models on land that the government had purchased at market rates from willing sellers.

Zimbabwe Since Independence

Prime Minister Mugabe's policy of reconciliation was generally successful during the country's first two years of independence, as the former political and military opponents began to work together. Although additional blacks were hired to fill new places in the civil service, there was no retribution for those whites who had worked for the Smith regime. Smith and many of his associates held seats in the parliament where they participated freely in debates. Likewise, Joshua Nkomo, Mugabe's rival as leader of the nationalist forces, was included in the first cabinet along with several other members of PF-ZAPU.

Splits soon developed, however. In 1981,several MPs from Smith's party left to sit as "independents," signifying that they did not automatically accept his anti-government posture. More importantly, government security officials discovered large caches of arms and ammunition on properties owned by ZAPU, and Nkomo and his followers were accused of plotting to overthrow Mugabe's government. Nkomo and his closest aides were expelled from the cabinet.

As a result of what they perceived as persecution of Nkomo (known as "Father Zimbabwe") and of his party, PF-ZAPU supporters, some of them deserters from the army, began a loosely organized and ill-defined campaign of dissidence against the government. Centering primarily in Matabeleland, home of the Ndebeles who were PF-ZAPU's main followers, this dissidence continued through 1987 and involved attacks on government personnel and installations, armed banditry aimed at disrupting security and economic life in the rural areas, and harassment of ZANU-PF members. Occasionally, some demanded that Nkomo and his colleagues be reinstated in the cabinet. More frequently, however, dissidents called for the return of farms and other properties seized from PF-ZAPU.

Because of the unsettled security situation immediately after independence and the continuing anti-government dissidence, the government kept in force a "state of emergency," which was first declared before UDI. This gave government authorities widespread powers under the "Law and Order Maintenance Act," including the right to detain persons without charge.

In 1983-84, the government declared a curfew in areas of Matabeleland and sent in the army in an attempt to suppress dissidents. Credible reports surfaced of widespread violence and disregard for human rights by the security forces during these operations, and the level of political tension rose in the country as a result. The pacification campaign, known as the "Gukuruhundi," or strong wind, resulted in as many as 20,000 civilian deaths. Nkomo and his lieutenants repeatedly denied any connection with the dissidents and called for an all-party conference to discuss the political problems facing the country. In the 1985 elections, ZANU-PF increased its majority, holding 67 of the 100 seats. ZANU-PF and PF-ZAPU agreed to unite in December 1987, and the parties formally merged in December 1989.

In October 1987, in accordance with the Lancaster House Accords, the constitution was amended to end the separate roll for white voters and to replace the whites whose reserved seats had been abolished; among the new members were 15 whites in the Senate and House of Assembly. Elections in March 1990 resulted in another overwhelming victory for Mugabe and his party, which won 117 of the 120 election seats. However, voter turnout was only 54%, and the campaign was not free and fair although the actual balloting was. Not satisfied with a de facto one-party state, Mugabe called on the ZANU-PF Central Committee to support the creation of a de jure one-party state in September 1990 and lost. The state of emergency was lifted in July 1990.

After the remaining restrictions of the Lancaster House agreement expired on April 18, 1990, the government embarked on a campaign of amending the existing constitution. Both the judiciary and human rights advocates fiercely criticized some of the first amendments, which were enacted in April 1991, because they restored corporal and capital punishment and denied recourse to the courts in cases of compulsory purchase of land by the government.

During the 1990s students, trade unionists and workers often demonstrated to express their discontent with the government. Students protested in October 1990 against proposals for an increase in government control of universities and again in May 1991 and May 1992, when they clashed with police. Trade unionists and workers were also vocal critics of the government during this time. In June 1992, police prevented trade unionists from holding anti-government demonstrations. In 1994, there was widespread industrial unrest. In August and September 1996, thousands of civil servants demanding salary increases organized a national strike and in October and November of the same year, nurses and junior doctors went on strike over salary issues. On November 14, 1997, about 50,000 war veterans demanded and received compensation equivalent to about U.S. $1,300 per person for their war service. This immense and unbudgeted expenditure created a huge fiscal deficit. The Zimbabwe dollar lost more than half its value on that day, and the Zimbabwe Stock Exchange collapsed. This event marked the beginning of Zimbabwe's ongoing macro-economic crisis.

In part through its control of the media, the huge parastatal sector of

the economy, and the security forces, the government managed to keep organized political opposition to a minimum through most of the 1990s. Beginning in 1999, however, Zimbabwe experienced a period of considerable political and economic upheaval. Opposition to President Mugabe and the ZANU-PF government had grown, in part due to worsening economic and human rights conditions. The opposition was led by the Movement for Democratic Change (MDC), which was established in September 1999.

The MDC's first opportunity to test opposition to the Mugabe government came in February 2000, when a referendum was held on a draft constitution proposed by the government. Among its elements, the new constitution would have permitted President Mugabe to seek two additional terms in office, granted government officials immunity from prosecution, and authorized government seizure of white-owned land. The referendum was handily defeated. Shortly thereafter, the government, through a loosely organized group of war veterans, sanctioned an aggressive land redistribution program often characterized by forced expulsion of white farmers and violence against both farmers and farm employees.

Parliamentary elections held in June 2000 were marred by localized violence, and claims of electoral irregularities and government intimidation of opposition supporters. Nonetheless, the MDC succeeded in capturing 57 of 120 seats in the National Assembly.

The March 2002 presidential election was preceded by months of intensive violence and intimidation against MDC supporters, and more than 50 people, mostly opposition supporters, were killed. President Mugabe was declared the winner over challenger Morgan Tsvangirai by a 56% to 42% margin. Most international observers condemned the election as seriously flawed—the pre-election environment was neither free nor fair, and the election itself was marred by significant fraud and rigging—but regional opinions were mixed. Soon after the election, the MDC filed a petition challenging Mugabe's victory, citing flaws in electoral laws, electoral irregularities and pre-election violence. As of the end of 2004, the case had not yet been decided.

As a result of the 2002 election, the United States, the EU, and other European countries imposed travel restrictions against senior Zimbabwean officials and embargoed the sale of arms to Zimbabwe. The U.S. and the EU also froze the financial assets of selected ruling party officials. The Commonwealth suspended Zimbabwe from council meetings for one year after its election observer team found the election neither free nor fair. At the mid-term suspension review in March 2003, the three-country committee charged with deciding Zimbabwe's fate decided to continue the suspension until the next Commonwealth meeting in December 2003. At this meeting, despite vigorous campaigning by South Africa, Zimbabwe was not invited to attend the meeting and the Commonwealth decided to continue with the suspension. Immediately after this, Mugabe withdrew Zimbabwe from the Commonwealth.

Following the 2002 presidential election, the political climate remained tense and intensely polarized. Violence escalated in the run up to rural council elections in September 2002 and various parliamentary by-elections that year. Parliamentary by-elections in Kuwadzana, Highfield, Zengeza, and Lupane in 2003 were marred by widespread intimidation and beatings. The government also passed legislation that curtailed free speech, free press, and rights of assembly. In March 2003, MDC leaders Morgan Tsvangirai, Welshman Ncube, and Renson Gasela went on trial for treason. Charges against Ncube and Gasela were subsequently dropped and in October 2004 Tsvangirai was found not guilty. In August 2005, the government dropped a second charge of treason against Tsvangirai.

The government subscribed to the electoral principles of the Southern African Development Community (SADC) in 2004 but failed to implement key elements of the principles in advance of the 2005 parliamentary elections. The campaign period and election day were largely non-violent, but the elections were not free and fair. The election process was marred by repressive legislation that limits freedom of speech and assembly; millions of expatriate Zimbabweans were not permitted to vote; the government used food distributions to influence an increasingly hungry population; an astonishingly high 10% (as high as 30% in some areas) of would-be voters were turned away; and discrepancies in officially announced results and the government's refusal to release key voting data led to questions about the possibility of fraud.

In May 2005, the government began Operation Murambatsvina (also known as Operation Restore Order), ostensibly to rid urban areas of illegal structures, illegal business enterprises, and criminal activities. A UN Special Envoy sent to Zimbabwe to assess the scope and impact of operation estimated that some 700,000 people nationwide lost their homes, their source of livelihood, or both. Families and traders, especially at the beginning of the operation, were often given no notice before police destroyed their homes and businesses. Others were able to salvage some possessions and building materials but often had nowhere to go, despite the government's statement that people should be returning to their rural homes. Thousands of families were left unprotected in the open in the middle of Zimbabwe's winter. The government interfered with non-governmental organization (NGO) efforts to provide emergency assistance to the displaced in many instances. Some families were removed to transit camps, where they had no shelter or cooking facilities and minimal food, supplies, and sanitary facilities. The operation continued into July 2005, when the government began a program to provide housing for the newly displaced. As of September 2007, housing construction fell far short of demand, and there were reports that beneficiaries were mostly civil servants and

ruling party loyalists, not those displaced. The government campaign of forced evictions continued in 2006, 2007, and 2008 albeit on a lesser scale.

In April 2007, South African President Thabo Mbeki, at the behest of SADC and the international community, was designated to serve as mediator between Robert Mugabe's government and the MDC. The mediation aimed to define a mutually agreed upon election date and procedures to rewrite the constitution. While the mediations were ongoing, Mugabe announced that "harmonized" elections would be held on March 29, 2008, despite Morgan Tsvangirai's protests that the mediation was still underway and that there was not enough time to campaign. As in 2005, the pre-election period was not free and fair. The environment was characterized by violence and a media environment that heavily favored Mugabe. Although Tsvangirai was allowed to campaign, Zimbabwean police did not grant permission to MDC to hold all of its rallies, and some MDC activists were intimidated and beaten in the weeks before the election. Foreign journalists were not granted permission to cover the story from Zimbabwe. Election day was largely peaceful, with international observers from the African Union, SADC, and the Pan African Parliament present; observers from Western nations, including the United States, were not invited.

The "harmonized" elections for the presidency, House of Assembly, Senate, and local government demonstrated a significant shift in the political environment. MDC secured a majority in the parliament, giving the MDC control of the legislative branch. In the presidential race, MDC's Tsvangirai secured 47.9%, while Mugabe came in second with 43.2%. Simba Makoni, who left Mugabe's ZANU-PF party in February 2008 to run as an independent, received 8.3%. The results in the presidential race were not released until May 2, 2008. This lengthy delay called into question the credibility and independence of the Zimbabwe Electoral Commission (ZEC). Initially the MDC challenged the results, asserting that Tsvangirai had secured the majority of votes needed to win the presidency. Because no candidate secured the 50%-plus-one needed, a runoff was set for June 27, 2008.

As of early June 2008, over 50 Zimbabweans had been killed, at least 2,000 injured, and over 30,000 displaced as a result of widespread post-election violence, including state-sponsored violence. Due to these and other events, and out of concern for the lives of his MDC supporters, Tsvangirai announced in late June that he would not contest the runoff election. Voters went to the polls on June 27, and Mugabe was inaugurated for a new term as president on June 29.

FOREIGN RELATIONS

Since independence, Zimbabwe has enunciated and follows a policy of "active nonalignment." In practice, this has meant that Zimbabwe usually adhered to positions established by the Non-Aligned Movement (NAM); the Organization of African Unity (OAU), now the African Union; or, until it withdrew in 2003, the Commonwealth. Zimbabwe took a particular interest in the search for independence for Namibia (South-West Africa) from South Africa. In addition, as chairman of the front-line states in southern Africa, Zimbabwe spoke out vigorously against the policies of apartheid in South African and frequently called for the imposition of economic sanctions against Pretoria. In November 1982, Zimbabwe was chosen by the OAU to hold one of the non-permanent seats in the UN Security Council for the following two years, which brought it onto the center stage of world events and gave it much-needed experience in international affairs. In 1986, Zimbabwe was the site of the NAM summit meeting; Prime Minister Mugabe became chairman of that organization, giving both Mugabe and Zimbabwe added international visibility and responsibility.

Zimbabwe maintains embassies in the Angola, Australia, Austria, Belgium, Botswana, Canada, China, Cuba, Democratic Republic of the Congo, Egypt, Ethiopia, France, Germany, Ghana, India, Iran, Italy, Japan, Kenya, Kuwait, Malawi, Malaysia, Mozambique, Namibia, Nigeria, Russia, South Africa, Sweden, Switzerland, Tanzania, United Kingdom, the United States, Serbia, Zambia, Indonesia, Brazil, and Libya. Fifty-three countries are represented in Harare, as are several international organizations including UN institutions, the European Union, and the World Bank. Zimbabwe is a member of many international organizations, including the International Monetary Fund (IMF); African Development Bank; The World Trade Organization; Southern African Development Community (SADC); Preferential Trade Area for Eastern and Southern Africa (PTA); African Caribbean and Pacific Countries (ACP, in association with the EU); Group of 77 (G-77); Group of 15 (G-15); NAM; African Union (AU); Customs Cooperation Council (CCC); and the World Federation of Trade Unions. Shortly after the March 2002 presidential election, the Commonwealth suspended Zimbabwe from leadership councils for one year after the Commonwealth's election observer team found the conduct of the election seriously flawed. After this suspension was upheld in December 2003, Mugabe withdrew Zimbabwe from the Commonwealth. The IMF closed its Zimbabwe office in October 2004.

Historically, Zimbabwe's closest links have been with the U.K.; however, in the past eight years, this relationship has been very strained. The government has demonized Britain in the press, blaming the country for Zimbabwe's problems, and claiming that Britain reneged on promises made at Lancaster House to provide money for land reform. As with the U.S., thousands of Zimbabweans studied in the U.K., and private links remain close; however, official relations are strained.

Other West European countries have ties with Zimbabwe. The Scandina-

vian countries share certain philosophical affinities and have provided much assistance, as have France, Canada, and the Federal Republic of Germany. Portugal and Greece maintain links partly because of the sizable Portuguese and Greek communities in the country. Similar historical ties have led to the establishment of relations with India and Pakistan, and to a lesser extent, with Bangladesh. The government's "Look East" policy has led to closer diplomatic relations with East Asian countries such as Malaysia and China.

Zimbabwe maintains diplomatic relations with virtually every African country, although some ties are closer than others. African nations with embassies in Harare are Algeria, Angola, Botswana, D.R.C., Egypt, Ethiopia, Ghana, Kenya, Libya, Malawi, Mozambique, Namibia, Nigeria, South Africa, Sudan, Tanzania, and Zambia.

Zimbabwe developed and maintains close ties with a number of revolutionary states and organizations. Among these are the People's Republic of China, Cuba, the Democratic People's Republic of Korea, Iran, Libya, and the Palestine Liberation Organization.

GOVERNMENT

According to Zimbabwe's constitution, the president is head of state and head of government, and is elected by popular majority vote. Parliament is bicameral and sits for up to a 5-year term. On October 1, 2007 Constitutional Amendment 18, which provides for significant changes in the country's electoral dispensation, went into effect. The amendment set out the framework to harmonize presidential and parliamentary elections, to reduce the presidential term of office from 6 years to 5, to increase the number of seats in the House of Assembly and in the Senate, to empower parliament to serve as an electoral college should the office of president become vacant for any reason, and to empower the Zimbabwe Electoral Commission (ZEC) to delimit parliamentary and local constituencies. The 210-member House of Assembly is entirely elected by voters in 210 constituencies. Sixty of the 93 Senators are directly elected by voters. Other Senators include 10 provincial governors and 5 others that are appointed by the president, 16 chiefs that are elected by other chiefs, plus the president and deputy president of the Council of Chiefs.

The Zimbabwean constitution institutionalizes majority rule and protection of minority rights. The elected government controls senior appointments in the public service, including the military and police, and the independent Public Service Commission is charged with making appointments at lower levels on an equitable basis.

The judiciary is headed by the chief justice of the Supreme Court who, like the other justices, is appointed by the president on the advice of the Judicial Service Commission. The constitution has a bill of rights containing extensive protection of human rights. The bill of rights could not be amended for the first 10 years of independence except by unanimous vote of the parliament.

Zimbabwe is divided into ten provinces, each administered by a provincial governor appointed by the president. The provincial administrator and representatives of several service ministries assist the provincial governor.

Principal Government Officials

Last Updated: 11/12/08

Pres.: **Robert MUGABE**
Vice Pres.: **Joseph MSIKA**
Vice Pres.: **Joyce MUJURU**
Min. of Agriculture: **Rugare GUMBO**
Min. of Defense: **Sidney SEKERAMAYI**
Min. of Economic Development: **Sylvester NGUNI**
Min. of Education, Sport, & Culture: **Anneas CHIGWEDERE**
Min. of Energy & Power Development: **Michael NYAMBUYA**
Min. of Finance: **Samuel MUMBENGEGWI**
Min. of Foreign Affairs: **Simbarashe MUMBENGEGWI**
Min. of Health: **David PARIRENYATWA**
Min. of Higher & Tertiary Education: **Stanislaus MUDENGE**
Min. of Home Affairs: **Kembo MOHADI**
Min. of Indigenization & Empowerment: **Josiah TUNGAMIRAI**
Min. of Industry & Trade: **Obert MPOFU**
Min. of Information & Publicity: **Sikhanyiso NDLOVU**
Min. of Legal & Parliamentary Affairs: **Patrick CHINAMASA**
Min. of Local Govt.: **Ignatius CHOMBO**
Min. of Mines: **Amos MIDZI**
Min. of National Security: **Didymus MUTASA**
Min. of Policy Implementation: **Webster SHAMU**
Min. of Public Services: **Nicholas GOCHE**
Min. of Rural Housing & Social Amenities: **Emmerson MNANGAGWA**
Min. of Science & Technology: **Olivia MUCHENA**
Min. of Small- & Medium-Scale Enterprises: **Sithembiso NYONI**
Min. of State Affairs Responsible for Land & Resettlement Programs: **Paul MANGWANA**
Min. of State Enterprises, Antimonopolies, & Anticorruption: **Samuel UNDENGE**
Min. of Tourism: **Francis NHEMA**
Min. of Transport & Communications: **Chris MUSHOWE**
Min. of Water Resources & Infrastructural Development: **Munacho MUTEZO**
Min. of Women's Affairs, Gender, & Community Development: **Oppah MUCHINGURI**
Min. of Youth Development & Employment: **Ambrose MUTIHIRI**
Min. Without Portfolio: **Elliot MANYIKA**
Governor, Reserve Bank of Zimbabwe: **Gideon GONO**
Ambassador to the US: **Simbi Veke MUBAKO**
Permanent Representative to the UN, New York: **Boniface Guwa CHIDYAUSIKU**

Zimbabwe maintains an embassy in the United States at 1608 New Hampshire Ave., NW, Washington, DC 20009 (tel. 202-332-7100). A Zimbabwean mission to the United Nations is located at 19 East 47th St., New York, NY.

ECONOMY

Properly managed, Zimbabwe's wide range of resources should enable it to

support sustained economic growth. The country has an important percentage of the world's known reserves of metallurgical-grade chromite. Other commercial mineral deposits include coal, platinum, asbestos, copper, nickel, gold, and iron ore. However, for the country to benefit from these mineral deposits, it must attract foreign direct investment.

In the early 1970s, the economy experienced a modest boom. Real per capita earnings for blacks and whites reached record highs, although the disparity in incomes between blacks and whites remained, with blacks earning only about one-tenth as much as whites. After 1975, however, Rhodesia's economy was undermined by the cumulative effects of sanctions, declining earnings from commodity exports, worsening guerilla conflict, and increasing white emigration. When Mozambique severed economic ties, the Smith regime was forced to depend on South Africa for access to the outside world. Real gross domestic product (GDP) declined between 1974 and 1979. An increasing proportion of the national budget (an estimated 30%-40% per year) was allocated to defense, and a large budget deficit raised the public debt burden substantially.

Following the Lancaster House settlement in December 1979, Zimbabwe enjoyed a brisk economic recovery. Zimbabwe inherited one of the strongest and most complete industrial infrastructures in sub-Saharan Africa, as well as rich mineral resources and a strong agricultural base. Real growth for 1980-81 exceeded 20%. However, depressed foreign demand for the country's mineral exports and the onset of a drought cut sharply into the growth rate in 1982, 1983, and 1984. In 1985, the economy rebounded strongly due to a 30% jump in agricultural production. However it slumped in 1986 to a zero growth rate and registered a 3% contraction in GDP in 1987 due primarily to drought and a foreign exchange crisis. Growth in 1988-90 averaged about 4.5%.

Since the mid-1990s, this infrastructure has been deteriorating rapidly, but remains better than that of most African countries. Poor management of the economy and political turmoil have led to considerable economic hardships. The Government of Zimbabwe's chaotic land reform program, recurrent interference with the judiciary, and maintenance of unrealistic price controls and exchange rates have led to a sharp drop in investor confidence. Since 1999, the national economy has contracted by as much as 40%; inflation vaulted over 1,000,000% (year on year) in May 2008; and there have been persistent shortages of foreign exchange, fuel, and food. Direct foreign investment has all but evaporated. In a desperate attempt to control inflation, the government forced firms and supermarkets to reduce prices by half in July 2007, which resulted in severe shortages of basic and other commodities.

Agriculture is no longer the backbone of the Zimbabwean economy. Large-scale commercial farming has been effectively destroyed over the course of the last eight years under the government's controversial land reform efforts starting in 2000. Corn is the largest food crop and tobacco had traditionally been the largest export crop, followed by cotton. Tobacco production in 2006, however, slumped to its lowest level—about 50 million kg—since independence, off from a peak in 2000 of 237 million kg, before recovering to 73 million kg in 2007. Gold production, another former key foreign currency source, was less than one-third of its 1999 level in 2007. Poor government management has exacerbated meager corn harvests in years of drought or floods, resulting in significant food shortfalls every year since 2001.

Paved roads link the major urban and industrial centers, but the condition of urban roads and the unpaved rural road network has deteriorated significantly since 1995 for lack of maintenance. Rail lines connect with an extensive central African railroad network, although railway track condition has also worsened in recent years, along with locomotive availability and utilization. The electric power supply has become erratic and blackouts are common due to unreliable or nonexistent coal supplies to the country's large thermal plants and power plant breakdowns. Telephone service is problematic, and new lines are difficult of obtain. Municipal water supply is also erratic.

The largest industries are metal products, food processing, chemicals, textiles, clothing, furniture and plastic goods. Most manufacturers have sharply scaled back operations due to the poor operating climate and foreign exchange shortages. Zimbabwe is not eligible for preferred trade status under the African Growth and Opportunity Act (AGOA). Zimbabwean producers still export lumber products, certain textiles, chrome alloys, and automobile windscreens to the U.S.

Zimbabwe is endowed with rich mineral resources. Exports of gold, asbestos, chrome, coal, platinum, nickel, and copper could lead to an economic recovery one day. No commercial deposits of petroleum have been discovered, although the country is richly endowed with coal-bed methane gas that has yet to be exploited.

With international attractions such as Victoria Falls, the Great Zimbabwe stone ruins, Lake Kariba, and extensive wildlife, tourism historically has been a significant segment of the economy and contributor of foreign exchange. The sector has contracted sharply since 1999, however, due to the country's declining international image.

Energy Resources

With considerable hydroelectric power potential and plentiful coal deposits for thermal power station, Zimbabwe is less dependent on oil as an energy source than most other comparably industrialized countries, but it still imports 40% of its electric power needs from surrounding countries—primarily Mozambique. Only about 15% of Zimbabwe's total energy consumption is accounted for by oil, all of which is imported. Zimbabwe imports about 1.2 billion liters of oil per year. Zimbabwe also has substantial coal reserves that are utilized for

power generation, and coal-bed methane deposits recently discovered in Matabeleland province are greater than any known natural gas field in Southern or Eastern Africa. In recent years, poor economic management and low foreign currency reserves have led to serious fuel shortages.

DEFENSE

At independence, then-Prime Minister Mugabe declared integrating Zimbabwe's then three armed forces as one of his government's top priorities. A unified army was created by combining the Zimbabwe African National Liberation Army (ZANLA), the Zimbabwe Peoples' Revolutionary Army (ZIPRA), and the Rhodesian Security Forces (RSF). In July 1994, the combined Zimbabwe Defense Forces (ZDF) Headquarters was created. Currently the armed forces of Zimbabwe are completely integrated and are composed of an army (ZNA) and an air force (AFZ).

The Zimbabwe Defense Forces (ZDF) is under the command of the president, who is the commander-in-chief of the Defense Forces. He is assisted by the Minister of Defense, who is responsible for the administrative and logistical support of the Defense Forces, and the commander of the Defense Forces, who maintains operational control of the Defense Forces. Subordinate to the commander of the Defense Forces are the commander of the Zimbabwe National Army (ZNA) and the commander of the Air Force of Zimbabwe (AFZ).

The ZNA is authorized 40,000 members but endstrength estimates as of June 2008 indicated the ZNA had about 30,000 members serving. The ZNA's operational forces are based in Harare, Bulawayo, Masvingo, and Mutare. Operational forces include five infantry brigades, artillery brigade, mechanized brigade, field artillery regiment, engineer regiment, air defense regiment, commando regiment, and one airborne battalion. Today, the ZNA is beset by shortages of supplies, including food. It is mostly under-trained and its equipment is aged, not particularly reliable, and largely immobile. The AFZ is authorized 5,000 members, but only 4,000 were on active duty as of June 2008. It is estimated that half of Zimbabwe's aircraft are mission capable.

The Zimbabwe Republic Police numbers 25,000. The force is organized by province, and is comprised of uniformed national police, the Criminal Investigation Department, and traffic police. It also includes specialized support units including the (paramilitary) Police Support Unit and riot police and a Police Internal Security and Intelligence unit. The police commissioner-general exercises overall command of the force.

The U.S. Congress terminated support for military cooperation programs in 2001. Presently, the U.S. has no military-to-military cooperation with Zimbabwe other than through the President's Emergency Plan for AIDS Relief (PEPFAR) program.

U.S.-ZIMBABWEAN RELATIONS

After the Unilateral Declaration of Independence in November 1965, the United States recalled its Consul General from Salisbury, closed the U.S. Information Service (USIS) library, and withdrew its Agency for International Development (USAID) and trade promotion officials. After 1965, the small remaining American consular staff continued to operate under authority of exequaturs issued by Queen Elizabeth II. Following declaration of a republic, the United States closed its Consulate General on March 17, 1970.

In 1971, despite Administration opposition, the U.S. Congress passed legislation permitting the United States to import strategic materials, such as chrome, from Rhodesia. The legislation, which took effect January 1, 1972, was of little real economic benefit to the Rhodesian economy, and the United States continued to support the balance of the sanctions program. After the legislation was repealed in March 1977, the United States once again enforced all sanctions.

The United States supported the United Nations and the United Kingdom consistently in their efforts to influence Rhodesian authorities to accept the principles of majority rule. Beginning in 1976, the United States began to take a more active role in the search for a settlement in cooperation with the British. The Anglo-American proposals of late 1977, aimed at bringing a negotiated end to the dispute, lent the weight of the United States to the search for a peaceful settlement and were a counterpart to the Soviet-Cuban use of military power to increase their influence in southern Africa. The United States supported British efforts to bring about and implement the settlement signed at Lancaster House on December 21, 1979 and extended official diplomatic recognition to the new government immediately after independence. A resident Embassy was established in Harare on Zimbabwe's Independence Day, April 18, 1980. The first U.S. Ambassador arrived and presented his credentials in June 1980. Until the arrival in 1983 of a resident Ambassador in Washington, Zimbabwe's relations with the U.S. were handled by its Ambassador to the United Nations (UN) in New York.

At the Zimbabwe conference on reconstruction and development (ZIMCORD) in March 1981, the United States pledged $225 million over a 3-year period toward the government's goals of postwar reconstruction, distribution and development of land, and the development of skilled manpower. By the end of FY 1986, the United States had contributed $380 million, the majority in grants, with some loans and loan guarantees. However, in July 1986, the U.S. Government decided to discontinue future bilateral aid to Zimbabwe as a result of a continuing pattern of uncivil and undiplomatic statements and actions by the Government of Zimbabwe in the United Nations and elsewhere. Aid programs previously agreed upon were not

affected by the decision, nor were regional development programs that might benefit Zimbabwe. Full programming was restored in 1988.

USAID assistance to Zimbabwe since 2002 has focused on family planning, HIV/AIDS prevention, democracy and governance programs, emergency food aid, and assistance to internally displaced persons. The Centers for Disease Control and Prevention (CDC) began a direct assistance program in August 2000. CDC's program consists of prevention of HIV transmission; improved care of persons with HIV/AIDS; surveillance, monitoring, and evaluation of the epidemic; and health sector infrastructure support.

Since 2000, the United States has taken a leading role in condemning the Zimbabwean Government's increasing assault on human rights and the rule of law, and has joined much of the world community in calling for the Government of Zimbabwe to embrace a peaceful democratic evolution. In 2002 and 2003, the United States imposed targeted measures on the Government of Zimbabwe, including financial and visa sanctions against selected individuals, a ban on transfers of defense items and services, and a suspension of non-humanitarian government-to-government assistance. Despite strained political relations, the United States continues as a leading provider of humanitarian assistance to the people of Zimbabwe, providing about $400 million in humanitarian assistance from 2002-2007, most of which was food aid.

President Mugabe visited Washington informally in September 1980, and on official working visits in September 1983, July 1991, and in 1995, meeting with Presidents Carter, Reagan, Bush, and Clinton respectively. He has also led the Zimbabwean delegation to the UN on several occasions, including the UN General Assembly in 2008. Vice President George H.W. Bush visited Harare in November 1982 on a trip to several African countries.

TRAVEL

Consular Information Sheet

December 18, 2008

Country Description: Zimbabwe is a landlocked country in southern Africa. The Department of State issued a Travel Warning for Zimbabwe on December 13, 2008, warning U.S. citizens of the risks of traveling to Zimbabwe due to deteriorating safety and security conditions. Although tourist facilities are available in Victoria Falls, Great Zimbabwe, major cities, and selected game parks, all Americans should carefully evaluate the decision to travel to Zimbabwe at this time.

Entry Requirements: A passport, visa, return ticket, and adequate funds are required. U.S. citizens traveling to Zimbabwe for tourism, business, or transit can obtain a visa at the airports and border ports-of-entry, or in advance by contacting the Embassy of Zimbabwe at 1608 New Hampshire Ave. NW, Washington, DC 20009; telephone (202) 332-7100. American citizens considering travel to Zimbabwe to visit tourist destinations, including eco-tourist sites or hunting safaris, or for business purposes, are advised that the Government of Zimbabwe has declared that American visitors with proper documentation will be allowed entry without difficulty. However, the Government of Zimbabwe has also signaled an intention to refuse entry to Americans who are believed to have a bias against the Zimbabwean government. In some instances, Zimbabwean immigration officials have used materials found in searches of travelers and their luggage as an explanation to refuse entry. Visit the Embassy of Zimbabwe web site at http://www.zimbabwe-embassy.us/ for the most current visa information.

Americans entering Zimbabwe for tourism can expect to be granted a 30-day duration of stay. Extensions are possible, but normally require a personal visit to the Zimbabwe Immigration Office's public window, located in the center of Harare.

Americans intending to reside or work in Zimbabwe must obtain prior approval by the Zimbabwean Chief Immigration Officer. Such applications typically take a minimum of six weeks and should be made through the Embassy of Zimbabwe in Washington, DC. Since January 2007, several American citizens applying for or renewing residency or work permits have had their applications denied without explanation and been forced to depart the country.

Upon arrival in Zimbabwe, travelers should keep all travel documents readily available, as well as a list of residences or hotels where they will stay while in Zimbabwe. Travelers to Zimbabwe must carry some form of identification at all times. Although

the Government of Zimbabwe has rescinded their previous suspension of all aid and development work in Zimbabwe, Americans traveling to Zimbabwe to work in those fields should insure they have proper permission and documentation from the Zimbabwean government before entering the country.

U.S. citizens who intend to work in Zimbabwe as journalists must apply for accreditation with the Zimbabwean Embassy at least one month in advance of planned travel. The Government of Zimbabwe uses an extremely expansive definition of journalism and any formal interviews, filming or photography may be considered "presenting oneself as an accredited journalist," a crime punishable by arrest or detention. If you are in doubt about whether or not your purpose of travel constitutes journalism, please seek clarification from the Zimbabwean Embassy in Washington BEFORE you travel. It is no longer possible to seek accreditation after arrival in Zimbabwe. Journalists attempting to enter Zimbabwe without proper advance accreditation may be denied admission, detained for questioning, arrested or deported. Journalists seeking to file stories from Zimbabwe must comply with the requirements of the Access to Information and Protection of Privacy Act, which requires that journalists seek accreditation by paying a $100 (U.S.) application fee and, if accredited, a $500 (U.S.) accreditation fee.

U.S. citizen students and faculty at educational and other institutions who wish to do research in Zimbabwe should contact a host educational or research institution for affiliation prior to applying for a visa. Despite fulfilling all such requirements and receiving appropriate permission, legitimate researchers have been detained in the past by the police because the subject of their research was believed to be sensitive.

While there is no set legal limit on the amount of foreign currency that a person can carry into Zimbabwe, it is illegal to take more than $1,000 U.S. dollars out of the country, whether departing by road or air. Travelers seeking to depart with greater amounts of currency risk having the money confiscated and/or being prevented from leaving pending a court appearance.

Safety and Security: The political, social, economic, and security situations in Zimbabwe are volatile and could deteriorate quickly without warning. During the presidential elections in 2008, the Zimbabwe government authorized its security forces to suppress all dissent by whatever means it deemed necessary. In the past year, political leaders at the highest levels of the Zimbabwean government have condoned the security forces' use of violence against opponents of the government. The government has defended its right to treat individuals roughly, including those in custody, and has warned of more such actions.

The political situation in Zimbabwe remains fluid and subject to change at a moment's notice. American citizens should carefully evaluate the need to travel to Zimbabwe at this time. In late 2008, the political, humanitarian, and economic crisis in Zimbabwe resulted in civil demonstrations that were violently dispersed by security forces, as well as riots by military personnel, and a general deterioration of government services and infrastructure, including the collapse of the country's public health system. Americans traveling to Zimbabwe should avoid crowds. Zimbabwean authorities may forcefully disband demonstrations by labor unions and other civil groups. American citizens should avoid all public demonstrations and protests.

Communications infrastructure in Zimbabwe is very unreliable. Telephone and cell phone outages are common.

Following the March 29, 2008 presidential elections, there was widespread political violence, particularly in rural areas and high-density suburbs. Zimbabwean security forces, including some military and police, as well as so-called war veterans, created a climate of intimidation and fear across the country. There were numerous and widespread attacks on opposition supporters, renewed farm invasions, and arrests and beatings of election officials accused of vote tampering. These attacks resulted in numerous deaths and hundreds of injuries. The government's security forces also directed violence at common citizens, indiscriminately beating individuals on the street and in private establishments.

Resident and visiting Americans have been arrested, detained, and threatened with expulsion for activities that would not be considered crimes in the U.S., including the expression of opinions regarding the current political regime in Zimbabwe. On May 13, 2008 and on June 5, 2008, American and other diplomats were detained by government security forces for several hours outside Harare. On the second occasion, one Zimbabwean U.S. Embassy employee was physically assaulted and the entire group was threatened with violence. Americans should carefully evaluate the need to travel around Zimbabwe by road, and make alternate plans when possible. If traveling by road, Americans should make sure they have working communication devices, and, evidence of their citizenship such as a photocopy of the face page of their passport. Americans should also notify a trusted friend or family member of their itinerary and expected departure and arrival times.

The streets around State House, the official residence of the President, and the Botanical Gardens are particularly sensitive and a number of pedestrians and motorists, including Americans, have been assaulted by local security forces when walking or driving in that area. President Mugabe and other senior government officials travel around Harare accompanied by large and aggressive motorcades that have been known to run motorists off the road, and by security personnel who occasionally beat and harass drivers who fail to pull out of the way quickly enough. American citizens are advised to be aware of police vehicles flashing lights and sirens and move quickly off the road if overtaken by a motorcade.

American visitors have been detained in the past under suspicion of operating as journalists without accreditation for photographing cultural sites and areas that may not immediately appear to be sensitive. Tourists may also be subject to harassment or arrest for photographing police, roadblocks, occupied commercial farms, and government buildings or military installations, official residences or embassies, including the president's palace. Prior written permission must be obtained from the appropriate government office before taking such photographs. It is not always immediately apparent what the police deem sensitive and American citizens have been detained for hours for photographing such seemingly innocuous subjects as fruit carts and religious buildings such as churches, mosques and synagogues. American citizens are encouraged to be very aware of their surroundings before taking any pictures outside game parks and known tourist areas.

The government frequently uses road blocks to enforce order, particularly in urban centers. Road blocks can be particularly dangerous, and extreme caution should be used when approaching them. When instructed by police or other security officials to stop at a roadblock, comply with these instructions. If possible, carry a mobile phone or other means of communication. In November 2002, Zimbabwean police outside of Mutare killed an American citizen at a roadblock.

Other ongoing security conditions that could affect the safety of tourists in Zimbabwe include rising crime (see below) and the occupation of commercial farms by members of the National War Veterans' Association and others. The so-called war veterans have seized American-owned property, and residents and tourists alike should avoid areas where war veterans are active.

Visitors should be prepared for food shortages, including shortages of bread, milk, meat and other basic goods. Zimbabwe is currently experiencing a significant nationwide fuel shortage, as well. Travelers should carefully assess their fuel situation, keep their tanks full, and consider carrying extra fuel in sealed containers specifically designed for such purpose before making any long-distance journeys.

For the latest security information, Americans traveling abroad should regularly monitor the Department's web site, where the current Worldwide Caution Travel Alert, Travel Warnings and other Travel Alerts can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S. and Canada, or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: Crime is a serious problem in Zimbabwe, and is driven by the country's deteriorating economy.

Street crime in Zimbabwe is a serious problem. Americans and other foreigners are perceived to be wealthy and are frequently targeted by criminals who operate in the vicinity of hotels, restaurants, and shopping areas of the major cities and tourist areas such as Victoria Falls. Although the majority of crimes in Zimbabwe are non-violent, perpetrators are generally armed with weapons, which can include firearms. The downtown sector of Harare and its high density residential suburbs are particularly high-crime areas. A number of American visitors have been assaulted or robbed while walking in the town of Victoria Falls, especially after dark.

Travelers should secure their luggage at airports, railway and bus stations, and when making calls from public telephones. Purse-snatchers will often work in teams of two, with one person acting as a diversion. A typical mugging involves a group of young males who surround and overwhelm their victim in a public area. Avoid displaying or carrying unnecessary valuables, such as expensive jewelry, and do not carry large sums of money. Cell phones are of particular interest to local thieves. Always secure items such as passports, money, jewelry, and credit cards in hotel safety deposit boxes or safes when not being used. The use of credit cards is not recommended unless the exchange rate can be determined before their use.

Travelers should avoid driving at night outside the low-density suburban areas. Drivers should be alert for "smash and grabs," where thieves break the windows of cars stopped at intersections and take items from inside the car. Car doors should always be locked and the windows rolled up. Handbags, wallets, and other items should be placed out of sight under car seats or in the trunk of the car. While stopped in traffic, drivers should always be aware and look around to identify potential trouble. Drivers should always leave sufficient maneuver room between their vehicle and the one in front so they can drive away from danger. Travelers who suspect that their vehicle is being followed should drive to the nearest police station or other protected public area for assistance. Reducing idle times at traffic lights by slowing in advance to anticipate the changing of the light is an effective deterrent. Drivers should also be cautious of people using ploys to lure them out of their cars. In one ploy, an assailant will slash a tire and then offer to help with the flat, particularly on the road to Harare International Airport. Beware of drivers in vehicles without license plates who stop to render aid or who cause minor accidents. Always drive to a well-lit and populated area before making repairs or exchanging information.

Travelers are encouraged to make two photocopies of the biographic/identification page of their passport. They should leave one copy at home with friends or relatives and carry the second copy with them for identification purposes.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance.

The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

The local equivalent to the "911" emergency line in Zimbabwe for the police is 995/999; for fire fighters 994/999 and for ambulance: 993/999.

Medical Facilities and Health Information: Medical public medical infrastructure has effectively crumbled and medical facilities are extremely limited. There have been several instances where American citizens facing life-threatening illnesses or injuries have been turned away from hospitals because there were not sufficient beds or medical supplies available. Most serious illnesses or accidents require medical evacuation to South Africa. All travelers are strongly urged to obtain medical evacuation insurance coverage prior to arriving in Zimbabwe. Doctors, hospitals and air ambulance medical evacuation services often expect immediate cash payment for health services. Travelers are urged to carry an ample supply of prescription and other medications, as they will not likely be available in Zimbabwe. Provincial hospitals in rural areas, if still operating, have rudimentary staffing, equipment, and supplies, and are not equipped to provide medical care in case of a serious accident. The fuel shortage further diminishes emergency response capabilities. Emergency patients often must arrange their own transportation to medical facilities.

In late 2008, the deterioration of the health system impaired the government's ability to respond to a dangerous cholera outbreak which has killed nearly 1,000 people. Cholera is a potentially fatal bacterial infection of the intestine that causes severe diarrhea and dehydration. The disease is spread through untreated sewage and contaminated drinking water. The latest outbreak in Zimbabwe has exposed a shortage of potable water throughout the country and overwhelmed medical resources. Travelers to Zimbabwe should drink boiled or bottled water, use boiled or bottled water in food preparation, and regularly wash their hands with a sanitizer. American citizens may refer to the CDC's web site at http://www.cdc.gov.

Malaria is also prevalent throughout Zimbabwe, except in Harare, due to the capital's high altitude. The CDC strongly recommends that malaria prophylaxis and preventive measures be taken when traveling outside of Harare.

The U.S. Department of State is unaware of any HIV/AIDS entry restrictions for visitors to or foreign residents of Zimbabwe.

Tuberculosis is an increasingly serious health concern in Zimbabwe. For further information, please consult the CDC's Travel Notice on TB at http://wwwn.cdc.gov/travel.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's web site at http://wwwn.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith/en.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Zimbabwe is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

Zimbabweans drive on the left side of the road and many people drive over the speed limit. The main roads throughout Zimbabwe are generally in fair but deteriorating condition. Most lack passing lanes, shoulders, breakdown lanes, lighting, reflectors, and similar safety features.

Service stations frequently lack fuel or repair parts. Inter-city commuter bus travel, except by "luxury coaches," is dangerous due to overcrowding, inadequate maintenance, and unsafe drivers. Public bus drivers are often fatigued, fail to adhere to local speed limits, and often fail to obey traffic rules or regulations. Travelers are advised to avoid driving at night due to pedestrians (in dark clothing) and animals walking in the poorly lit roads. Motor vehicles often have no headlights or taillights and are difficult to see at night. Passing lanes are not always clearly marked, and road visibility at times can be restricted. In urban areas, lane markers are often faded, with both streetlights and traffic lights inoperative. Potholes are numerous on most roads.

It is illegal to operate a cellular telephone while driving in Zimbabwe. Drivers are required to wear seat belts or helmets if driving motorcycles. Car seats are not legally required for small children. Travelers should pack several pairs of latex gloves in the event of a road accident involving serious injuries or bleeding, as Zimbabwe has one of the highest rates of HIV/AIDS infection in southern Africa.

A nationwide fuel shortage makes internal travel difficult and unreliable, and severely restricts the response capability of police and other emergency services.

The Ministry of Transport is the government authority responsible for road safety in Zimbabwe. There is no national established network of road-

side emergency service. However, the Automobile Association of Zimbabwe, similar to the American Automobile Association, is willing to provide roadside emergency service to non-members for a fee. Travelers interested in contacting the service during their stay in Zimbabwe may contact AA Zimbabwe at 263-4-752-779. AA Zimbabwe's 24-hour emergency roadside helpline is 263-4-707-959.

Aviation Safety Oversight: The U.S. Federal Aviation Administration (FAA) has assessed the Government of Zimbabwe's Civil Aviation Authority as not being in compliance with International Civil Aviation Organization (ICAO) aviation safety standards for the oversight of Zimbabwe's air carrier operations. For more information, travelers may visit the FAA's web site at http://www.faa.gov.

Special Circumstances: The U.S. Embassy does not receive notification of the arrest of American citizens by the Zimbabwean police. Further, the Government of Zimbabwe does not always grant immediate or repeated visits to detained or incarcerated Americans by Embassy consular officers. In April 2007, two Americans were detained by Zimbabwean police in Harare. They were not charged with any crime, they were not asked if they would like legal representation, and they were not arraigned before a magistrate. The police failed to give consular notification, failed to grant consular visitation, and refused to provide Embassy staff any information about their whereabouts, despite repeated inquiries. In this case, the police officer in charge made comments which suggested that their refusal to provide information or consular access was at least partially motivated by political considerations and the strained state of U.S.-Zimbabwe relations. In August 2007, two more Americans arrested under similar circumstances were detained for two days and deported. Zimbabwean officials failed to notify U.S. consular officials of the arrests; after U.S. officials became aware of the detentions they were refused visitation.

U.S. citizens are encouraged to carry a copy of their U.S. passports with them at all times so that, if questioned by local officials, proof of identity and U.S. citizenship is readily available. If arrested, American citizens should ask to contact the American Embassy.

Under Executive Order 13288 of March 7, 2003, the United States placed sanctions on the property and economic assets of certain Zimbabwean government officials deemed most responsible for undermining Zimbabwe's democratic institutions. Under U.S. law, it is illegal for American citizens or residents to engage in any transaction or dealing with the targeted individuals or other entities designated by the Secretary of the Treasury under this sanctions program. It is not otherwise illegal for American citizens to transact business with Zimbabwean firms. U.S. citizens intending to engage in business or financial transactions in Zimbabwe are advised to consult the Department of Treasury's Office of Foreign Assets Control website at http://www.treas.gov/offices/enforcement/ofac for up-to-date information on these sanctions.

It is illegal to exchange foreign currency for local currency with anyone other than an authorized currency dealer affiliated with the Reserve Bank of Zimbabwe. Authorized currency dealers include the major banks, such as Standard Chartered and Barclays. Street vendors and private individuals may also offer this service, but they should be avoided. Travelers observed by the police engaging in illegal money transactions will be immediately arrested and jailed pending a hearing before a magistrate court.

Travelers to Zimbabwe should carefully consider the method of payment used for lodging and other expenses. Due to hyper-inflation, prices may fluctuate dramatically. Internationally convertible currency such as U.S. dollars or British pounds may be required for certain travel-related expenses such as hotel bills and airfare. Even in instances where use of foreign exchange is required or permitted, traveler's checks may not be accepted. Similarly, many banks and foreign exchange windows refuse to accept traveler's checks for conversion to local currency, and virtually none will cash them for foreign exchange. There have been recent instances in which Zimbabwean authorities seized foreign currency from tourists/visitors who were unable to present documentation that they declared these funds when entering the country. Using a credit card could significantly increase the cost of purchases, as credit card companies calculate the U.S. dollar equivalent using the official government rate, which may be significantly lower than that used by local shopkeepers and vendors. Visitors are encouraged to assess the currency situation in Zimbabwe at the actual time of travel.

Zimbabwe offers opportunities for observation of wildlife in its natural habitat and many tour operators still offer structured, safe excursions into parks and other wildlife viewing areas for close observation of flora and fauna. However, standards and training have declined markedly and it is a good idea to ascertain whether operators are trained and licensed. Even animals marketed as "tame" should be respected as wild and extremely dangerous. Two foreign visitors were killed by an elephant on a "safari walk" in Hwange National Park in March 2007. A foreign tourist died in August 2005 after an attack during a "lion walk" at The Lion and Cheetah Park, a game preserve near Harare. In February 2007 another foreign visitor was seriously injured during a "lion walk" with young lions at the same park. In 2004, an American tourist was killed by a crocodile while in a canoe at Mana Pools on the Zambezi River. U.S. citizens participating in nature excursions in Zimbabwe should be aware that even organized and licensed tour operators may encourage or allow tourists to participate in activities, such as walking or canoe safaris, which could pose great risks to personal safety. Travelers should keep a safe distance from animals at all times, remaining in vehicles or other protected enclosures when venturing into game parks. There have been a few instances in which tourists have

faced last-minute cancellations or have had to leave a game park earlier than planned as a result of labor unrest and/or ownership disputes. Visitors to Nyanga should avoid Pungwe Falls, Mterazi Falls, and the Honde Falls, as there have been numerous incidents of armed robbery, theft, assaults, and attempted rapes reported at these sites. Land mines along the Mozambique border, situated beyond the main tourist areas, make travel to that border area potentially hazardous.

Tourists who wish to hunt in Zimbabwe must be accompanied by a licensed operator, who is required to be registered and licensed by the Zimbabwe Ministry of Environment and Tourism. Travelers to Zimbabwe should ask for the operator's license number when booking a hunt and should check the authenticity of the license by contacting the Zimbabwe Association of Tour and Safari Operators (ZATSO) at pangeti@zct.co.zw or bown@zct.co.zw.

U.S. citizens who are temporarily carrying firearms and ammunition into Zimbabwe for purposes of hunting, and who cannot qualify for an exemption under the International Traffic in Arms Regulations (ITAR), may need an approved temporary export license (DSP73) from Department of State's Office of Defense Trade Controls. U.S. citizens should also contact the Embassy of Zimbabwe in Washington, D.C. to find out what permits are required by the government of Zimbabwe for importing weapons into the country. Travelers are advised to make sure that all of the necessary documentation is in order before departing the United States. The weapons also must be cleared through U.S. Customs when leaving the United States and upon reentry at the conclusion of one's trip.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating Zimbabwe's laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Zimbabwe are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in Zimbabwe are encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration web site so that they can obtain updated information on travel and security within Zimbabwe. Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency. The U.S. Embassy is located at 172 Herbert Chitepo Avenue, Harare, telephone (263-4) 250-593/4, after-hours telephone (263-4) 250-595; fax (263-4) 250-343. American citizen service hours are from 1:30 pm to 3:30 pm Monday through Thursday and from 8:00 am to 11:30 am on Fridays, except U.S. and Zimbabwean holidays. The mailing address is PO Box 3340, Harare. The e-mail address is ConsularHarare@state.gov.

Travel Warning

December 12, 2008

The Department of State warns U.S. citizens of the risks of traveling to Zimbabwe due to deteriorating safety and security conditions, and urges them to carefully consider their need to travel there. The political instability and economic crisis in Zimbabwe have resulted in small-scale civil demonstrations and riots by military personnel, and a general deterioration of government services and infrastructure, including the near collapse of the country's public health system. The Department of State therefore urges U.S. citizens visiting Zimbabwe to closely monitor the situation, keep travel documents up to date, and have contingency plans ready for their own personal health, safety and security.

Americans travelling to Zimbabwe should avoid crowds. Zimbabwean authorities may forcefully disband demonstrations by labor unions and other civil groups. American citizens should avoid all public demonstrations and protests.

The public health system in Zimbabwe no longer provides even basic services due to a lack of staff, electricity, clean water, and medical supplies. Americans who fall ill while in Zimbabwe may find it difficult to find treatment. In late 2008, the deterioration of the health system impaired the government's ability to respond to a dangerous cholera outbreak which has killed hundreds of people. Cholera is a potentially fatal bacterial infection of the intestine that causes severe diarrhea and dehydration. The disease is spread through untreated sewage and contaminated drinking water. The latest outbreak in Zimbabwe has exposed a shortage of potable water throughout the country and overwhelmed medical resources. Travelers to Zimbabwe should drink boiled or bottled water, use boiled or bottled water in food preparation, and regularly wash their hands with a sanitizer.

For additional information on cholera, American citizens may refer to the CDC's website at http://www.cdc.gov/nczved/dfbmd/disease_listing/cholera_gi.html. American citizens experiencing symptoms associated with cholera, such as severe diarrhea, should seek immediate medical attention. However, Harare's three public hospitals have virtually shut down. Private clinics, while operational, often lack staff, electricity, water, and medical supplies. As a result, there is no guarantee that

travelers who become ill will be able to obtain adequate emergency medical treatment in Zimbabwe.

For the latest security information, Americans traveling abroad should regularly monitor the Department's Internet web site at http://travel.state.gov where the current Worldwide Caution, Travel Warnings, and Travel Alerts can be found.

Up-to date information on security can also be obtained by calling 1-888-407-4747 toll free in the United States and Canada or, for callers outside the United States and Canada, a regular toll line at 1-202-501-4444.

These numbers are available from 8:00 a.m. to 8:00 p.m. Eastern Time, Monday through Friday (except U.S. federal holidays). Americans are also encouraged to read the Country Specific Information for Zimbabwe, available at http://travel.state.gov.

U.S. citizens living or traveling abroad are encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration web site at https://travelregistration.state.gov/ibrs/ui/ so that they can obtain updated information on travel and security. Americans without internet access may register directly with the nearest U.S. Embassy or Consulate. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency.

U.S. citizens may contact the American Citizens Services Unit of the U.S. Embassy in Harare for further information. The Embassy is located on 172 Herbert Chitepo Avenue, Harare. Telephone 263-4-250-593/4/5, e-mail consularharare@state.gov. The Embassy's Internet home page address is http://harare.usembassy.gov.

Department of State travel information and publications are available at Internet address: http://travel.state.gov. U.S. travelers may hear recorded information by calling the Department of State in Washington, D.C. at 202-647-5225 from their touch-tone telephone, or receive information by automated telefax by dialing 202-647-3000 from their fax machine.

Intercountry Adoption

June 2006

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services.

For more information, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is based on public sources and current understanding. Questions involving foreign and U.S. immigration laws and legal interpretation should be addressed respectively to qualified foreign or U.S. legal counsel.

Please Note: Intercountry adoption is rare in Zimbabwe. The Ministry of Labor and Social Welfare has a stated preference to place Zimbabwean children with parents of the same race. Inter-racial adoptions require the approval of the Minister of Social Welfare.

The Government of Zimbabwe occasionally has discouraged adoption of Zimbabwean children by foreigners and may make additional demands on the prospective adoptive parents before the adoption can be finalized.

These demands include but are not limited to counseling of children, additional referrals and home study visits. Interested U.S. citizens are strongly encouraged to contact U.S. consular officials in Harare before formalizing an adoption agreement to ensure that appropriate procedures have been followed that will make it possible for the Embassy to issue a U.S. immigrant visa for the child.

Patterns of Immigration: Please review current reports online at http://adoption.state.gov.

Adoption Authority:
Ministry of Labour and
Social Welfare
Harare Central District
Social Welfare Office
PO Box CY 562
Causeway
Harare, Zimbabwe
011-263-4-703-711

If the Ministry approves a request to adopt, the case is submitted to the Juvenile Courts to review the adoption application. If approved, the Court will issue an Adoption Order and release the child for immigration.

Eligibility Requirements for Adoptive Parents: Prospective adoptive parents who meet the residency requirements must be married and over the age of 25.

Single women 25 or older who are at least 21 years older than the prospective adoptive child may be approved by the Minister of Labor and Social Welfare. Single men may only adopt family members and must be approved by the Minister. All prospective adoptive parents must have a clean criminal record.

Residency Requirements: Prospective adoptive parents must be either citizens or legal residents of Zimbabwe. This requirement may be waived by the Minister of Labor and Social Welfare.

Time Frame: Adoptions in Zimbabwe take approximately three months once the Application to Adopt has been approved and the child has been identified. It is important to note the Ministry of Labour and Social Welfare has a stated preference to place Zimbabwean children with parents of the same race. Wait times for Caucasian and mixed-race children can be significantly longer than for indigenous children. Interracial adoptions require the approval of the Minister.

Adoption Agencies and Attorneys: Adoptions in Zimbabwe can only be facilitated through the Ministry of Labour and Social Welfare. A court order without the recommendation of the Ministry is not considered

a legal adoption and will not be considered valid for U.S. immigration purposes. All prospective adoptive parents should begin the adoption process with the Ministry or their district Social Welfare Office and in coordination with consular officers at the U.S. Embassy in Harare.

Currently, there are no licensed attorneys and/or facilitators authorized to handle adoption cases or issues in Zimbabwe. However, Zimbabwean law recently changed and in the coming months social work will be privatized to allow the Social Workers Agency Council to license private social workers to facilitate adoptions.

Adoption Fees: There are no fees from the Government of Zimbabwe and no court fees.

Adoptive parents have to obtain birth certificates for adopted children from the Registrar Generals Office of Births & Deaths in Harare or Bulawayo, for a nominal fee.

Adoption Procedures: There are two tracks to adoption in Zimbabwe:

- If the prospective adoptive parents have not yet identified a child, they may first file a general application to adopt in the district where they live; once the application is approved, the Ministry will work with them to identify an appropriate child. The Ministry may recommend a particular child for adoption.
- If the prospective adoptive parents have identified the child/children they wish to adopt, they must visit the Social Welfare Office in their district to open a case file by filing an application to adopt the child. Note: Not every child in a Zimbabwean orphanage is eligible for adoption and there is no central registry for identifying eligible children.

Once the Application to Adopt has been approved, the Ministry of Social Welfare will refer the case to the Juvenile Court for consideration and, if approved, the court will issue an Adoption Order and release the child for immigration. If the prospective adoptive parents are not domiciled in Zimbabwe, they must request a waiver of the residency requirement from the Ministry of Social Welfare before their application can be approved.

The U.S. Embassy is aware only of isolated cases where the residency requirement has been waived. "Nominated" or "directed" adoption, in which a birth parent(s) give up a child directly to prospective adoptive parents, is legal in Zimbabwe; however, such adoptions may not meet the requirements of U.S. immigration law. American citizens interested in a directed adoption should contact the U.S. Embassy in Harare before initiating legal action.

Required Documents: Identity documents (such as a passport), birth and marriage certificates, police clearances from both the U.S. and Zimbabwe, supporting documents attesting to one's eligibility, and three or four references from individuals not related to the potential adoptive parents. There are additional documentary requirements for the prospective adoptive child. A current list of these documents can be obtained by contacting the Zimbabwean Ministry of Labor and Social Welfare.

Embassy in the United States
1608 New Hampshire Avenue, NW
Washington D.C. 20009
Telephone (202) 3327100, (301) 2639826

U.S. Immigration Requirements: Prospective adopting parents are strongly encouraged to consult USCIS publication M-249, *The Immigration of Adopted and Prospective Adoptive Children*, as well as the Department of State publication, *Intercountry Adoptions*. Please see the *Intercountry Adoption* section of this book for more details and review current reports online at http://adoption.state.gov.

Additional Information: Specific questions about adoption in Zimbabwe may be addressed to the U.S. Embassy in Harare, Zimbabwe (ConsularHarare@state.gov). General questions regarding intercountry adoption may be addressed to the Office of Children's Issues, U.S. Department of State, CA/OCS/CI, SA-29, 4th Floor, 2201 C Street, NW, Washington, D.C. 20520-4818, toll-free Tel: 1-888-407-4747.

International Treaty Organizations

APEC

Last updated: November 2008

Official Name:

Asia-Pacific Economic Cooperation

Editor's note: The information in this article has been compiled and edited from *Fact Sheets, Press Releases, and Background Notes* available from the Bureau of East Asian and Pacific Affairs of the U.S. Department of State.

OVERVIEW

The Beginning

The APEC forum was established in 1989 to promote economic cooperation and integration in the Pacific region. The United States was a driving force in APEC's creation, as a means of anchoring the United States more firmly in the region in the post-Cold War era. APEC has grown to 21 members, including four other economies in the western hemisphere (Canada, Chile, Mexico and Peru). The first APEC Leaders' Meeting occurred in 1993 when the United States invited member economies' leaders to Blake Island, Washington. In 1995, APEC established a business advisory body, called the APEC Business Advisory Council (ABAC), which consists of three business executives from each member economy.

The Bogor Goals

At Blake Island, Leaders called for continued reduction of trade and investment barriers, envisioning an "Asia-Pacific community" that promotes prosperity through cooperation. In 1994, Leaders at Bogor, Indonesia, set the goals of reaching free trade and investment by 2010 for developed economies, and 2020 for developing economies.

Strengthening Multilateral and Regional Trade

APEC's early successes included helping to build consensus for conclusion of the Uruguay Round in 1994 and its role in pioneering the 1996 Information Technology Agreement. In Shanghai (2001), APEC's strong push for a new trade Round and support for a robust program of trade capacity-building assistance was critical to the successful launch of the Doha Development Agenda a few weeks later.

APEC has taken a number of steps to liberalize regional trade. For example, in 1999 it launched the APEC Open Skies Agreement, the first multilateral air services liberalization agreement in the world. In 2001, Leaders endorsed the U.S.-proposed "Shanghai Accord" that emphasizes implementation of APEC's commitments to open markets, structural reform, and capacity building. As part of the Accord, Leaders committed to develop and implement APEC transparency standards, reduce trade transaction costs in the Asia-Pacific region by 5 percent over 5 years, and pursue trade liberalization policies relating to information technology goods and services.

Counterterrorism

Following the September 11, 2001, terrorist attacks, leaders in Shanghai pledged counterterrorism cooperation. In Los Cabos this year, Leaders will build on the Shanghai Statement through commitments designed to protect key Pacific Rim infrastructure—trade, finance and information systems—from terrorist exploitation and attack.

APEC GROUPS

APEC senior officials oversee the 10 following working groups, covering broad areas of economic, educational, and environmental cooperation. In addition, APEC has a Committee on Trade and Investment with customs and standards and conformance subcommittees, and an Economic Committee.

Trade and Investment Data

Develops consistent and reliable data in merchandise trade, trade in services, and investment.

Trade Promotion

Develops proposals to exchange trade and industrial information and to promote economic and trade missions among economies of the region. Orga-

Participating Economies

Australia, Brunei Darussalam, Canada, Chile, People's Republic of China, Hong Kong, Indonesia, Japan, Republic of Korea, Malaysia, Mexico, New Zealand, Papua New Guinea, Peru, Republic of the Philippines, Russia, Singapore, Chinese Taipei, Thailand, USA, Vietnam.

nizes international seminars and meetings to promote trade, an Asia-Pacific trade fair, and a training course on trade promotion.

Industrial Science and Technology

Promotes economic growth by expanding technology flows and focusing on science and technology issues that network potential partners together in the Asia-Pacific region.

Human Resource Development

Seeks ways to exchange information among Asia-Pacific economies in such areas as business administration, industrial training and innovation, project management, and development planning. In this working group, the United States hosted an APEC education ministerial in Washington, DC, in August 1992 and sponsors the APEC Partnership for Education Program, which promotes university partnerships among U.S. and Asian/South Pacific universities, outreach and cooperative education activities, and private sector training.

Energy Cooperation

Develops cooperative projects, such as a regional database on energy supply and demand, and exchanges views on, among other things, coal utilization, technology transfer, and resource exploration and development.

Marine Resource Conservation

Exchanges information on policy and technical aspects of marine pollution and advancement of integrated coastal zone planning. Exchanges information on and develops recommendations for dealing with red tide/ toxic algae pollution problems.

Telecommunications

Compiles annual survey on APEC telecommunications development activities, including a description of each member country's telecommunications environment. Explores ways to establish and develop regional networks, initially by encouraging electronic data interchange. Exchanges information on policy and regulatory developments in each member's telecommunications sector. Disseminates a manual on how to approach training in a telecommunications organization, followed by a pilot project reviewing needs and recommending solutions in a selected organization.

Transportation

Studies and recommends ways to improve infrastructure, facilitate movement of passengers and freight, collect and exchange data, and enhance transportation safety and security. This U.S.-led working group is one of three added in March 1991. The United States proposed it because of the importance of improved transportation links to continued economic growth in the region. In June 1995, the United States hosted an APEC transportation ministerial.

Tourism

Studies one of the region's most important industries, focusing on tourism data exchange, barriers to expansion, training programs, and current projects in APEC member economies.

Fisheries

Surveys the pattern of APEC fisheries cooperation to develop fisheries resources. Reports on the role of APEC in coordinating and complementing the work of existing organizations and promoting cooperative relations among APEC participants.

THE UNITED STATES AND APEC

APEC plays a crucial role in pushing for global trade liberalization through the World Trade Organization, and repeatedly blazed a path for the rest of the world to follow. APEC's signature Bogor Goals of complete liberalization for industrialized economies by 2010 and developing economies by 2020 provide a consistent push in the right direction.

APEC was the first regional forum to respond to the September 11 attacks, and it contributes to the fight against terrorism via a range of secure trade and counterterrorism initiatives. An APEC initiative led by the U.S. and Australia set up a regionwide alert system to stop use of stolen passports. APEC was also the first regional forum to react to SARS, and the first regional body to do work to prevent, prepare for, and respond to a potential influenza pandemic.

APEC and the Asia Pacific

Since 1989, when the Asia-Pacific Economic Cooperation (APEC) forum began, the Asia-Pacific region has been the most economically dynamic part of the world, with real GDP across all APEC economies rising by an impressive 66% from 1989 to 2005. APEC's 21 member economies now account for 60% of the global economy. The United States exported $575 billion—or nearly two- thirds (64%) of total U.S. goods exports—to APEC economies in 2005.

APEC member economies sustain their growth through an ever-deepening commitment to open and secure trade and investment, as well as economic reform. By progressively reducing tariffs and eliminating trade barriers, APEC member economies have become more efficient and have led the world in poverty reduction and social development. The annual gathering of APEC Leaders, initiated under U.S. leadership in 1993, is the most important multilateral gathering in the Asia-Pacific

region. APEC brings high level attention to issues of regional and global consequence, and provides a regular forum for the 21 APEC Leaders to meet and address issues of common concern. APEC has grown to include over 100 formal and informal dialogues and meetings, tackling issues that are critical to the future prosperity, security and development of the Asia-Pacific region.

U.S. Policy toward APEC

APEC is the only regional institution that brings together the leaders of all the region's major economies annually. The United States views APEC as the premier organization in the Asia-Pacific, enabling our government and people to contribute to the prosperity, security and healthy development of the region. Through APEC, the United States aims to create opportunities for sustainable growth by pushing consistently for accelerated trade and investment liberalization, while promoting hands on trade facilitation projects and capacity building. The United States works within APEC to prevent threats to sustainable growth by cooperating to ensure secure travel, transport and trade throughout the region.

Why APEC Matters to Americans — October 16, 2001

Released by the Bureau of East Asian and Pacific Affairs, U.S. Department of State

In 1989 when former President George Bush was President of the United States the Asia-Pacific Economic Cooperation (APEC) forum was established to promote economic integration around the Pacific Rim and to sustain economic growth. APEC currently has 21 members: Australia; Brunei Darussalam; Canada; Chile; People's Republic of China, Hong Kong, China; Indonesia; Japan; Republic of Korea; Malaysia; Mexico; New Zealand; Papua New Guinea; Peru; Republic of the Philippines; Russia; Singapore; Chinese Taipei; Thailand; USA; Vietnam.

The United States, recognizing the value of top-level meetings to advance the work of creating a Pacific community, invited member economies' leaders to Blake Island, Washington, to meet informally to discuss major issues in the APEC region. This gathering of economic leaders has become the single most important institution in the Asia Pacific region. It brings top level attention to APEC's vision of free trade and investment as well as providing a forum for Leaders to meet on a regular basis both as a group and bilaterally to discuss current issues and resolve disputes.

The economic health of the APEC region is vitally important to America's continued prosperity. Economic growth across the APEC region waned this year, largely in response to the slowing U.S. economy and the weakening global demand for many of the Asian members' exports (particularly electronics). Many members have lowered their 2001 growth projections in light of poor performance during the first half of the year, although most will still post positive results. APEC is home to our biggest customers in the world, with a total of $500 billion in exports in 2000. APEC remained a powerful trading group accounting for about half of the world exports and imports. We in turn have played a critical role in Asian recovery, providing a market that bought nearly $700 billion worth of goods and services from other APEC economies last year.

APEC has played an important role in promoting trade and investment liberalization in the region. As a result of these efforts, APEC markets are considerably more open today than they were ten years ago, creating new opportunities for American business and creating new employment for American workers.

The challenge posed by the higher profile APEC launched at Blake Island was also widely seen as galvanizing a successful conclusion of the Uruguay Round Table negotiation by demonstrating an alternative path to liberalizing trade talks if global talks were to fail.

APEC has also played a complementary role to the International Monetary Fund and other international financial institutions in fostering a rapid Asian economic recovery. APEC encourages its members to pursue appropriate macroeconomic policies that stimulate domestic demand, and microeconomic polices to promote financial and corporate restructuring and attract investment. APEC is promoting increased transparency, openness and predictability based on the rule of law. APEC seeks to eliminate impediments to trade and investment by encouraging member economies to reduce barriers, adopt transparent, market-oriented policies and address such issues as unequal labor productivity, restricted mobility of business persons and outdated telecommunications regulatory practices.

APEC can serve a crucial role in advancing long-term projects and initiatives that will assist its members to reform their economies and implement the policy changes that will sustain the economic recovery. It also can help foster development of the physical and human capital necessary to sustain growth in the 21st century.

APEC also promotes discussion among Leaders and undertakes programs to assure that the social infrastructure exists to allow APEC economies to take advantage of trade and investment opportunities and that economic growth translates into real social progress. For example, APEC works to advance environmental and labor standards, improve basic education, fight disease, promote the growth and development of small business, and integrate women into economic life.

APEC works directly with the private sector to produce results with broad benefits. Public-private collaboration on customs projects is becoming a model for the benefits that the public sector can derive from partnership with business constituents. Other public-private partnerships this year in APEC focuses on developing e-commerce and region-wide information technology training programs.

A revived Asia-Pacific region means more exports from and investments by U.S. companies, more jobs for Americans and more U.S. economic growth. APEC's motto could be “prosper thy neighbor.” The United States is committed to ensuring APEC plays that constructive role.

The United States is a regional leader in countering the dangers of pandemic disease, as well as defending the integrity of financial systems. The United States strives to help its APEC partners build societies for sustainable growth by cooperating to foster good governance, wipe out corruption, and improve corporate culture and practice.

Human resources development and education are the common paths to social development, and U.S. assistance initiatives aim to produce lasting outcomes.

16th APEC Leaders' Meeting

November 23, 2008

At the 16th Annual Asia-Pacific Economic Cooperation (APEC) leaders Meeting in Lima, Peru, President George W. Bush and fellow APEC leaders reaffirmed their commitment to enhancing economic growth, prosperity, security, and the quality of life for all citizens in the Asia-Pacific community.

The leaders discussed the current global financial turmoil and its impact on the Asia-Pacific region. The leaders pledged to take coordinated action to restore stability to financial markets and economic growth. They endorsed the principles and the specific actions to implement those principles identified in the declaration issued at the Summit on Financial Markets and the World Economy.

The leaders also took concerted action to promote their shared goal of free and open trade and investment in the Asia-Pacific. The leaders endorsed a work program to strengthen regional economic integration and accelerate progress towards a Free Trade Area of the Asia-Pacific. The leaders agreed on 15 sets of model measures for free trade agreement (FTA) issue-specific chapters to promote high-quality FTAs.

The leaders resolved to agree this year on a framework that leads to an ambitious conclusion to the WTO Doha Development Agenda and to refrain from raising barriers. The leaders challenged their counterparts within and outside of APEC to build on progress achieved to deliver a strong market-opening outcome that creates new trade flows in agriculture, industrial goods, and services. The leaders pledged to reach agreement this year on modalities that leads to an ambitious and balanced conclusion to the Doha Round. The leaders agreed to refrain from raising barriers to investment or to trade in goods or services, imposing export restrictions, and implementing measures to stimulate exports that violate international trade rules.

The leaders also took important steps to resolve practical problems confronting commerce by:

- Launching an action plan to improve investment climates and increase investment flows.
- Endorsing steps to reduce trade transaction costs by 5 percent by 2010.
- Agreeing on the APEC Digital Prosperity Checklist to promote information and communication technologies as a drivers for economic growth.
- Reaffirming their commitment to strengthen protection and enforcement of Intellectual Property Rights and streamline patent procedures.

The leaders welcomed continued efforts by APEC to ensure the safety of the region's food supply.

They endorsed the launch of the Partnership Training Institute Network (PTIN) to strengthen food safety training and called for additional steps to enhance food and product safety in 2009.

The leaders committed to work together to address high food prices. Leaders pledged regional cooperation, across a range of issues, to address the underlying factors behind high food prices, including efforts on trade, agricultural productivity, and promotion of research and development. They affirmed that concluding the Doha negotiations will be key to addressing high food prices.

The leaders reaffirmed their support for APEC efforts to address the interlinked challenges of energy security and climate change. Leaders endorsed the Major Economies Leaders' Declaration on Energy Security and Climate Change and reaffirmed their commitment to reaching an equitable and effective post-2012 international climate change arrangement at the UN Climate Change Conference in Copenhagen. They expressed appreciation for financial support from Australia, Japan, and the United States for the Clean Technology Fund.

Leaders reaffirmed their commitment to meet the energy needs of regional economies through the operation of well functioning markets that promote trade in energy goods and services, as well as foster an improved investment climate for the development of energy resources.

President Bush continued to champion key transnational security issues in APEC. Leaders commended APEC efforts to enhance regional emergency preparedness for natural disasters, including development of a strategic plan for increasing cooperation. Leaders directed APEC economies to increase technical cooperation and capacity building to improve food security, fostering increased agricultural productivity and improved markets, regulatory institutions, and distribution systems.

APEC has made progress in working with private industry to protect the food supply from terrorism, and is taking steps to help economies clamp down on terrorist financing. Leaders also urged APEC members to strengthen cooperation to combat corruption and increase transparency.

ASEAN

Last Updated: November 2008

Official Name:
Association of Southeast Asian Nations

Editor's note: The information in this article has been compiled and edited from ASEAN *Background Notes, Press Releases,* and *Fact Sheets* made available 2001–2008 from the Bureau of East Asian and Pacific Affairs of the U.S. Department of State.

PROFILE

The Association of Southeast Asian Nations (ASEAN) was formed in 1967 by Indonesia, Malaysia, the Philippines, Singapore, and Thailand to promote political and economic cooperation and regional stability. U.S. relations with ASEAN have been excellent since its inception.

The ASEAN chairmanship rotates annually on an alphabetical basis. The current chair is Vietnam.

The ASEAN Declaration in 1976, considered ASEAN's foundation document, formalized the principles of peace and cooperation to which ASEAN is dedicated.

Brunei joined in 1984, shortly after its independence from the United Kingdom, and Vietnam joined ASEAN as its seventh member in 1995. Laos and Burma were admitted into full membership in July 1997 as ASEAN celebrated its 30th anniversary. Cambodia became ASEAN's tenth member in 1999.

The Association commands far greater influence on Asia-Pacific trade, political, and security issues than its members could achieve individually. ASEAN's success has been based largely on its use of consultation, consensus, and cooperation.

ASEAN took the first steps toward an ASEAN Free Trade Area (AFTA) in 1993, when it agreed to eliminate most tariffs on manufactured goods between members over the following decade.

Every year following the ASEAN Ministerial Meeting in July, ASEAN holds its Post-Ministerial Conference (PMC), where it meets with its ten Dialogue Partners. These are Australia, Canada, China, European Union, India, Japan, Republic of Korea, New Zealand, Russia, and the United States. The Secretary participated in the July 2000 meeting in Bangkok.

In 1994, ASEAN took the lead in establishing the ASEAN Regional Forum (ARF), which now has 26 members and meets each year at the ministerial level just before the PMC. The ARF is the only region-wide governmental security forum. Its goal is to promote regional stability and peace, and it is now looking at the overlap between confidence building measures, where it has been active, and preventive diplomacy.

GEOGRAPHY

Located in Southeast Asia on the Malay Peninsula and the islands to the south and east in the South China Sea, the ten ASEAN states adjoin some of the most important sea lanes in the world. The ASEAN states lie astride the Equator and extend from roughly 1,600 kilometers (1,000 mi.) north to 800 kilometers (500 mi.) south.

HISTORY

ASEAN was founded officially on August 8, 1967, with the signing of the Bangkok Declaration by the foreign ministers of the original five members. The organization was created to strengthen regional cohesion and self-reliance through economic, social, and cultural cooperation. It developed slowly during its first decade, partly because of diverse economic interests, varied historical experience, and the initially fragile political ties among the five original states.

Brunei Darussalam, formerly a British protectorate, joined ASEAN as its sixth member state in January 1984, shortly after attainment of full independence.

To curb external interference, in 1971 the ASEAN nations set as their goal the establishment of a zone of peace, freedom, and neutrality (ZOPFAN) for Southeast Asia, and this was included in the Bali Declaration signed by the ASEAN heads of

government in 1976. This concept remains a long-term objective. The fall of the Republic of Vietnam in 1975 led to a new phase of ASEAN relations.

In 1976, the first ASEAN summit conference was convened in Bali, Indonesia, and collaboration among ASEAN states took a major step forward with the signing of the Declaration of ASEAN Concord. Aimed at promoting cooperative activities in industry, trade, and other fields, this declaration remains the major "constitutional base" for ASEAN cooperation. It also authorized the formation of the ASEAN Secretariat in Jakarta.

Growing Cooperation

The Vietnamese invasion of Cambodia, starting in December 1978, played a key role in furthering ASEAN collaboration. During the 1980s, the ASEAN nations successfully managed passage of yearly UN General Assembly resolutions calling for an end to Vietnamese occupation and were instrumental in the 1991 peace settlement in Cambodia. These accomplishments and the political cooperation thus fostered have been ASEAN's major political achievements.

Diverse economic interests and levels of development have limited the extent of economic cooperation between member nations. However, the collapse of international commodity prices in the mid-1980s and the subsequent downturn in the economies of several ASEAN nations spurred regional leaders to initiate serious economic reforms and trade liberalization plans. The December 1987 ASEAN summit gave new impetus to reducing internal trade barriers and establishing joint industrial projects; it also fostered closer coordination on economic issues by ASEAN governments, particularly in international forums. The 1989 creation of APEC (Asia-Pacific Economic Cooperation, an informal economic grouping of the U.S., Canada, Japan, South Korea, Australia, New Zealand, and ASEAN, which expanded in 1991 to include the People's Republic of China, Taiwan, and Hong Kong) has provided an additional important venue in which ASEAN representatives can meet and discuss issues of broader regional importance. ASEAN economic ministers in 1991 agreed to move toward an ASEAN Free Trade Area (AFTA). The decision to create AFTA was taken by ASEAN heads of government at the fourth ASEAN summit in January 1992.

INSTITUTIONS

Since its inception, ASEAN gradually has developed a number of formal, regular consultative meetings and committees, but it has only a very limited permanent structure. Decisions are made by consensus and often are achieved through informal, ad hoc consultations. However, there are several formal bodies that consult and make decisions on various common issues.

Foreign Ministers' Meetings

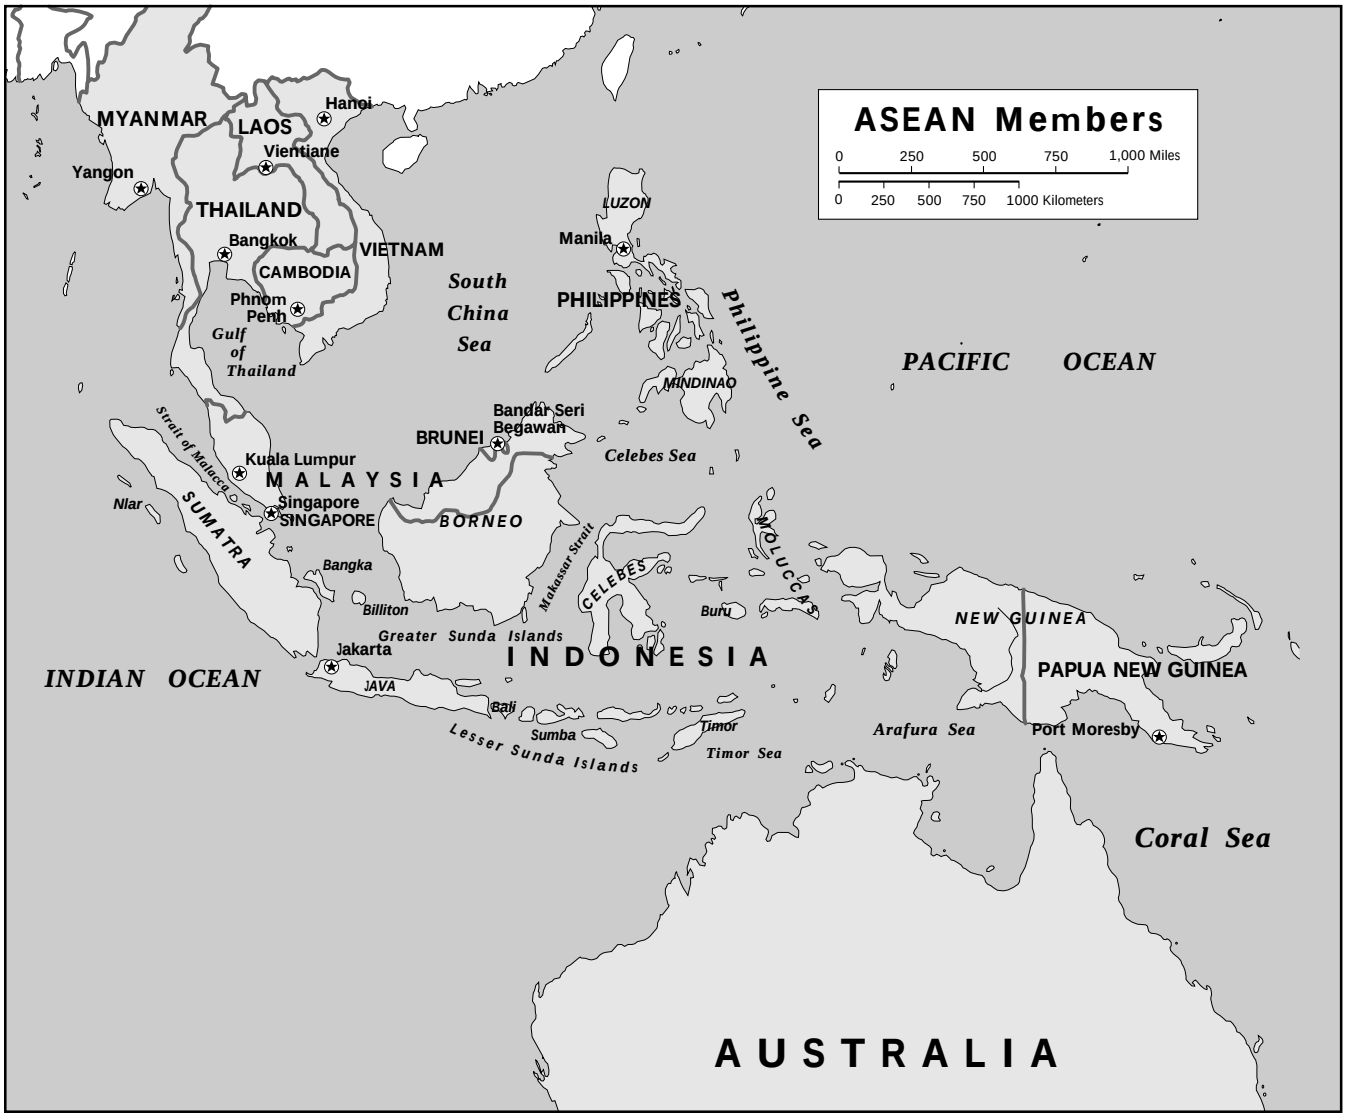
The periodic meetings of the six foreign ministers constitute the principal decision-making body for ASEAN. In addition to their regular annual sessions in June or July, the foreign ministers gather on other occasions as needed. The venue of the ministerial meetings rotates annually among the six countries.

The foreign ministers' meetings have assumed a prominent role partially as a result of events in Indochina. Recognizing the importance of a unified front on the Cambodia question, ASEAN has used the foreign ministers' consultations to reaffirm their common stand. Periodic meetings of senior officials plan for and supplement the work of the foreign ministers. In addition, an ASEAN Standing Committee, composed of ambassadors resident in the venue of the ministerial meeting and chaired by the foreign minister of the host country, meets as needed.

ASEAN

Members:
Brunei, Burma (Myanmar), Cambodia, Indonesia, Laos, Malaysia, Philippines, Singapore, Thailand, Vietnam.

Regional Forum (ARF) Members:
The ten members of ASEAN plus Australia, Bangladesh, Canada, China, European Union, India, Japan, Democratic Peoples' Republic of Korea, Republic of Korea, Mongolia, New Zealand, Pakistan, Papua New Guinea, Russia, Timor Leste (East Timor), and the United States.



Economic Ministers' Meetings

The economic ministers usually meet twice a year to discuss common approaches to economic questions and to review cooperative programs. Decisions on economic questions are then referred to the foreign ministers or heads of government for final approval. Various sectoral committees, subcommittees, and working groups have been established to deal with specific economic and social issues. Regular ministerial consultations also are held in such sectors as labor, social welfare, education, energy, and information.

The ASEAN Secretariat

The ASEAN Secretariat is located in Jakarta in a headquarters building provided by the Indonesian Government. The ASEAN states have not favored development of a strong central coordinating authority. The Secretariat is limited in size and is tasked mainly with serving the various ministerial meetings and committees. It has been suggested that the Secretariat might serve as a regional research, information, and statistical center, but this and other roles have not yet been authorized.

Complementing the ASEAN Secretariat, each government maintains its own National Secretariat in its Foreign Ministry; these vary in size and function. The six National Secretariats are responsible to their own governments.

ASEAN Post-Ministerial Conference (PMC)

ASEAN began establishing "Dialogue Partner" relationships in 1977 with countries that have major interests in the region. There are now ten Dialogue Partners. Each July, the ASEAN Foreign Ministers meet with the Dialogue Partners at the Post-Ministerial Conference (PMC), immediately following the ASEAN Ministerial Meeting, thus the name "PMC."

In recent years, ASEAN has been struggling to redefine the PMC and find a useful place for it between the ARF with its security portfolio and APEC with its economic agenda. The last several PMCs focused increasingly on international economic and political issues and on transnational issues, such as crime, narcotics, trafficking in persons, environment, and health. This year, however, transnational issues were omitted from the PMC agenda.

The U.S. feels that the PMC has an important role in ASEAN's relations with the rest of the Asia-Pacific region. We believe it could most usefully serve as a forum for discussing transnational issues and political issues outside the region, subjects not covered by either ARF or APEC. Transnational issues are threats common to all PMC participants. ASEAN identified them as priority concerns for the ASEAN region in its own 1998 Hanoi Plan of Action (HPA). We hope the PMC will return to a discussion of transnational issues next year.

ASEAN Regional Forum (ARF)

The ASEAN Regional Forum (ARF) draws together 26 countries involved in the security of the Asia-Pacific region. The ARF, which first met in 1994, provides a forum in which members can discuss regional political and security issues and develop cooperative measures to contribute to the maintenance of peace and security and the avoidance of conflict.

ARF meetings are held at the Foreign Minister level, annually in late July, in conjunction with the ASEAN Post Ministerial Conference (PMC). Chairmanship of the ARF is in line with the annual rotation of the Chairmanship of ASEAN. The principal formal ARF document is the ARF Chairman's Statement issued after every ARF ministerial meeting. The Senior Officials Meeting (SOM) and the Inter-Sessional Support Group on Confidence Building Measures (ISG/CBMs) support the work of Ministers.

The ARF is characterized by minimal institutionalization and consensus decision-making. Participants have agreed on a three-stage evolution of confidence-building, preventive diplomacy and, in the longer term, approaches to conflict resolution.

The ARF's work program includes encouragement and development of confidence-building measures, such as promoting participation in international arms control and non-proliferation regimes and the production of Annual Security Outlooks by participating states.

Since 2000, the ARF has begun to develop its preventive diplomacy function, focusing on concepts and principles of preventive diplomacy as a framework for ARF activities. Specific tools are foreseen in efforts to enhance the role of the ARF Chair develop an experts/eminent persons register.

ARF currently has 26 participants: Australia, Bangladesh, Brunei Darussalam, Cambodia, Canada, China, European Union, India, Indonesia, Japan, Democratic Peoples' Republic of Korea, Republic of Korea, Laos, Malaysia, Myanmar (Burma), Mongolia, New Zealand, Pakistan, Papua New Guinea, Philippines, Russian Federation, Singapore, Thailand, Timor Leste (East Timor), United States, Vietnam.

The U.S. strongly supports the ARF and has sponsored or co-sponsored several confidence-building measures and ARF workshops, notably on preventive diplomacy. Development of multilateral approaches to regional concerns will enhance regional peace, security, and stability and promote improved relations between and among states of the Asia-Pacific region and their partners from outside the region.

ECONOMY

The ASEAN region is one of the world's economic success stories in agriculture, industry, and trade. The economies range from resource-rich but still largely agricultural Indonesia, to the highly industrialized city-state of Singapore. The ASEAN nations are mainly committed to market- and export-oriented economic growth strategies. Their dynamic economies averaged annual GDP growth of about 7% during the 1970s but experienced stagnation or recession in the mid-1980s due to slackening world trade and deteriorating commodity and oil prices. Since the late 1980s, growth rates have increased steadily and in 1990 ranged from 2.1% for the Philippines to 12% for Thailand; the combined ASEAN economies grew 7.6% in 1990.

Except for Singapore and Brunei, the ASEAN economies are still largely agricultural, producing commodities such as rubber, palm oil, rice, copra, and coffee for export, though manufacturing sectors in Malaysia, Thailand, and Indonesia are of increasing importance in each economy. Singapore has a highly diversified commercial and industrial economy, with growing emphasis on the service sector. Commercialized cultivation and processing of primary agricultural products are important industries in Indonesia, Malaysia, Thailand, and the Philippines.

ASEAN accounts for 72% of world exports of rubber and is the world's largest source of tropical timber. Mineral resources include 26% of the world's tin exports and significant amounts of copper, coal, nickel, and tungsten. Indonesia, Malaysia, and Brunei are important energy exporters, producing most of East Asia's petroleum and natural gas.

THE UNITED STATES AND ASEAN

July 31, 2007

The year 2007 marked the 30th anniversary of the U.S. relationship with the Association of Southeast Asian Nations (ASEAN). Since the first ASEAN-U.S. Dialogue meeting in Manila in 1977, the United States and ASEAN have forged a close and constructive partnership that addresses issues of importance to all.

Economic Ties

The United States economic ties with ASEAN are robust. Two-way trade was $168 billion last year and, collectively, ASEAN is America's fourth largest trading partner. To date, U.S. companies have invested nearly $90 billion in ASEAN countries. In August 2006, U.S. Trade Representative Susan Schwab and her ASEAN counterparts signed the U.S.-ASEAN Trade and Investment Framework Arrangement. The Arrangement established a regular and formal dialogue on trade and investment matters and a joint work plan.

Enhanced Partnership

U.S.-ASEAN relations were elevated to a new level when President Bush and ASEAN leaders announced the Enhanced Partnership Joint Vision Statement in November 2005.

Secretary of State Condoleezza Rice and ASEAN Foreign Ministers signed the Enhanced Partnership Plan of Action in July 2006. The Plan guides cooperation as ASEAN advances toward its goal of political, economic and social integration. The United States and ASEAN cooperate closely on critical transnational challenges such as terrorism, narcotics trafficking, infectious diseases, and protecting the environment.

Some highlights of the Enhanced Partnership include:

- The U.S. Agency for International Development (USAID) is supporting capacity building on HIV/

AIDS treatment, care and support, and other public health issues.

- The Fulbright Commission has launched an ASEAN Visiting Scholars Program, open to foreign affairs officials, scholars and researchers.
- The USAID Regional Development Mission supports ASEAN's Environmentally Sustainable Cities Initiative, including 12 pilot projects in 5 countries.

Plan of Action

In 2006, President Bush and ASEAN leaders identified eight priority areas within the Plan of Action:

- Economic cooperation
- Health
- Scholarships
- Information and communications technology
- Transport
- Energy
- Disaster management
- Environmental management

The U.S. Department of State, USAID, the U.S. Trade Representative, the U.S. Department of Commerce and other partners outside the U.S. Government have developed numerous cooperation programs in these priority areas. Under the Plan of Action, these programs include well over 100 activities in the political and security, economic, educational and cultural fields.

Security Cooperation

The ASEAN Regional Forum (ARF) serves as the primary multilateral institution for regional security engagement for the U.S. in Asia. ARF provides a useful forum for discussion on security matters of importance to the Asia-Pacific region and progress on some of these issues. Through this 27-member forum, the United States has partnered with other ARF member countries to strengthen the institution, particularly in the areas of non-traditional security. Nonproliferation, disaster relief, maritime security, and civil-military coordination through multilateral exercises are some of the transnational security areas that should be reinforced as core issues for cooperation. The U.S. has funded capacity-building workshops in maritime security and nonproliferation; and has worked with the Philippines, as well as Australia and Indonesia, on a proposed 2009 ARF Disaster Relief Exercise.

United States Cooperation with Southeast Asia

September 7, 2007

On September 7, 2007, President Bush met with leaders from seven Southeast Asian economies participating in the Asia-Pacific Economic Cooperation (APEC) Meetings. These countries are also members of the Association of Southeast Asian Nations (ASEAN).

President Bush announced, and the leaders of the ASEAN nations welcomed, the creation of the position of united states ambassador to ASEAN. This ambassador will work with ASEAN nations to deepen the already strong and robust U.S.-ASEAN relationship.

President Bush and the Southeast Asian leaders hailed the growing cooperation under the U.S.-ASEAN Enhanced Partnership, announced under the leadership of President Bush and ASEAN leaders in 2005. They also discussed other regional issues, including U.S.-ASEAN trade cooperation, the disconcerting human rights situation in Burma, regional security, and counterterrorism cooperation.

President Bush and the ASEAN leaders noted the wide range of work accomplished on eight priority areas for cooperation under the Enhanced Partnership Since 2005. All this work is in addition to the substantial bilateral cooperation between the United States and individual ASEAN countries:

Economics: The United States and ASEAN have developed an extensive program of cooperation to support ASEAN's economic integration. On intellectual property rights, for example, more than 800 ASEAN officials have attended workshops, training, and other activities organized by the U.S. Patent and Trademark Office.

Health: The United States has supported an expert on pandemic preparedness and avian influenza at the ASEAN Secretariat in Jakarta. We have also provided support and technical assistance to help ASEAN tackle HIV/AIDS and other public health problems.

Scholarships: The Fulbright Commission has launched an ASEAN Visiting Scholars Program open to foreign affairs officials, scholars, and researchers working on issues central to the U.S.-ASEAN relationship.

Information and Communications Technology (ICT): The United States is supporting an assessment of ASEAN's integration of the region's ICT sectors and has provided increased ICT capability to the ASEAN Secretariat.

Transport: The United States has provided an assessment of the logistics sector in ASEAN, including its transport and communications infrastructure. This work contributed to ASEAN's plans to integrate freight, transport, and other logistics services to move goods more cheaply and efficiently.

Disaster Management: The U.S. has been a major provider of assistance in response to natural disasters in Southeast Asia. We will continue to provide support and training for disaster response and management in the coming year.

Environment: The U.S. supports environmental programs and improved wildlife conservation in Southeast Asia. The U.S.-supported ASEAN-Wildlife Enforcement Net-

work (ASEAN-WEN) has already broken several wildlife trafficking rings and was showcased by the Convention on International Trade in Endangered Species of Fauna and Flora (CITES).

Energy: The U.S. and ASEAN have organized workshops on clean energy, energy efficiency, and clean coal.

President Bush and the leaders of ASEAN nations also discussed the important progress made in trade and investment relations under the U.S.-ASEAN Trade and Investment Framework Agreement (TIFA) signed in 2006.

Ongoing consultations under the TIFA are aimed at supporting deeper intra-ASEAN economic integration and U.S.-ASEAN trade ties in the specific areas of the ASEAN Single Window for customs clearance, pharmaceutical regulatory harmonization, and sanitary and phytosanitary policy.

The President and ASEAN Leaders discussed the importance and benefits to Southeast Asian countries of success in the Doha Round of World Trade Organization (WTO) negotiations. The United States and Singapore have a highly successful Free Trade Agreement (FTA), signed in 2003. The United States and Thailand launched FTA negotiations in 2004, and the United States and Malaysia commenced FTA talks in 2006.

Assisting in Disaster Preparedness

July 21, 2008

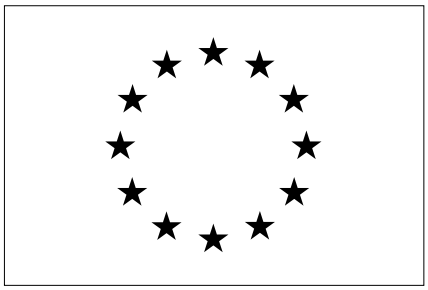
The United States provides approximately $16.8 million in annual disaster preparedness and mitigation assistance in the East Asia and Pacific region. This funds efforts to lessen the impact of disasters and to improve the response capabilities of governments and assisting agencies. In addition, when major disasters occur, U.S. agencies, led by USAID's Office of Foreign Disaster Assistance (OFDA), respond with generous assistance.

Bilateral Assistance: USAID, which provides the bulk of U.S. disaster assistance, focuses strongly on Southeast Asia. Programs aim to help mitigate floods, droughts, tsunamis, and other natural disasters. These efforts build up local and national government response capabilities, provide forecasting capabilities, and minimize the public health risks of disasters.

Past U.S. Disaster Assistance in the Region

- 2004 Tsunami
- Cyclone Nargis in Burma
- Typhoon Frank in the Philippines
- Sichuan, China Earthquake

U.S. Annual Financial Assistance in the Region (estimated)



- Bilateral- $8 million
- Regional- $500,000
- Through U.S. PACOM and ARF—$3.35 million
- Tsunami Warning Systems—$4.975 million

Regional Efforts: U.S. assistance helps Southeast Asian nations implement ASEAN's goals for disaster management and emergency response. U.S. assistance includes support for the establishment of an ASEAN Emergency Response Assistance Team for Cyclone Nargis relief, assistance for an ASEAN-wide Incident Command System for ASEAN response to domestic crises, and work on developing more effective needs assessments for disasters.

APEC's Task Force on Emergency Preparedness (TFEP) programs have strengthened community resilience to natural disasters and pandemics, improved disaster communication and damage assessment, and exchanged strategies on large-scale disaster recovery. The U.S., through TFEP, aims to mitigate business disruption, promote the economic benefits of disaster risk reduction investments, and highlight the importance of public-private partnerships.

U.S. Pacific Command (PACOM) and the ASEAN Regional Forum (ARF): Joint efforts strengthen the ability of regional governments to coordinate in the event of large disasters requiring major, multilateral, civil-military responses. ARF efforts grow out of and sometimes expand the work of PACOM's Multinational Planning Augmentation Team (MPAT) Program and Center of Excellence for Disaster Management and Humanitarian Affairs (COE-DMHA). These centers develop coordination between regional militaries and with the humanitarian community. Programs include multinational exercises, development of common operating procedures, and raised awareness of international standards. ARF plans to host a Disaster Relief Exercise in the Philippines in mid-2009.

Intergovernmental Oceanographic Commission (IOC): The U.S. will continue to support the International Tsunami Information Center and the Pacific Tsunami Warning System. The U.S. provides interim tsunami forecast services for the Indian Ocean and other regions while working with the IOC to deliver tsunami warning expertise and capabilities to the Member States.

EUROPEAN UNION

Last Updated: January 2009

Official Name:
European Union (EU)

Editor's note: The information in this article was compiled from *Fact Sheets* and releases available through the Bureau of European and Eurasian Affairs of the U.S. Department of State 2007 and 2008.

PROFILE

The European Union (EU) is one of the United States' strongest strategic partners, with the importance of the relationship reflected in our close cooperation on regional crises and conflicts, our extensive collaboration on a wide range of global challenges, from counter-terrorism to nonproliferation, and our deep trade and investment relations.

Geography

Area: 4,326,243 sq km
Cities: Capital—Brussels, Belgium (European Commission, EU Council); Strasbourg, France (most European Parliament plenary sessions); Luxembourg City, Luxembourg (European Court of Justice).
Terrain: mainly flat along the Baltic and Atlantic coasts; mountainous in the central and southern areas.
Climate: cold temperate; potentially subarctic to temperate in the north; mild, wet winters, and hot, dry summers in the south.

People

Nationality: EU (Every person holding the nationality of a Member State is a citizen of the Union. Citizenship of the Union complements and does not replace national citizenship. This provision currently applies to Austrian, Belgian, British, Bulgarian, Cypriot, Czech, Danish, Dutch, Estonian, Finnish, French, German, Greek, Hungarian, Irish, Italian, Latvian, Lithuanian, Luxembourg, Maltese, Polish, Portuguese, Romanian, Slovak, Slovenian, Spanish, and Swedish citizens).
Population: 490,426,060
Religion: Roman Catholic, Protestant, Orthodox Christian, Muslim, Jewish.
Languages: Bulgarian, Czech, Danish, Dutch, English, Estonian, Finnish, French, German, Greek, Hungarian, Gaelic (Irish—from 2007), Italian, Latvian, Lithuanian, Maltese, Polish, Portuguese, Romanian, Slovak, Slovene, Spanish, Swedish (note—only official languages of the European Union are listed).
Health: total: 10 births/1,000 population; 10 deaths/1000 population (2007 est).
Life Span: male: 75.6 years; female: 82 years (2007 est.).
Unemployment: 8.5% (2006 est.).

Government

Type: supranational/mixed intergovernmental.
Founded: November 1, 1993 (Treaty on European Union (Maastricht Treaty) establishing the EU entered into force). (Belgium, France, Germany, Italy, Luxembourg and the Netherlands signed the Treaty of Rome on March 25, 1957—see History.)
Member States: Austria, Belgium, Bulgaria, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, UK; note—Canary Islands (Spain), Azores and Madeira (Portugal), and French Guyana, Guadeloupe, Martinique and Reunion (France), which are legally part of EU Member States, are sometimes listed separately as territories forming part of the EU.
Government branches: Executive—European Commission; legislative—EU Council, European Parliament; judicial—Court of Justice of the European Communities, Court of First Instance.
Political parties: (in European Parliament) European People's Party-European Democrats (EPP-ED); Socialist Group (Party of European Socialists -PES); Group of the Alliance of Liberals and Democrats for Europe (ALDE); Independence/Democracy Group (IND/DEM); Group of Greens/European Free Alliance (Greens/EFA); Confederal Group of the European United Left-Nordic Green Left (EUL/NGL); Union for Europe of the Nations Group (UEN).

Suffrage: determined by national legislation in the individual Member States.

Economy

GDP: (2006) $13.08 trillion.
Annual Growth Rate: (2007) 2.9%.
Per Capita Income: (2004) $29,900 (2006 est).
Inflation Rate: 1.9% (2007 est.).
Natural Resources: iron ore, arable land, natural gas, petroleum, coal, copper, lead, zinc, hydropower, uranium, potash, fish.
Agriculture: Products—wheat, barley, oilseeds, sugar beets, wine, grapes, dairy products, cattle, sheep, pigs, poultry, fish.
Industry: Type—ferrous and nonferrous metal production and processing, metal products, petroleum, coal, cement, chemicals, pharmaceuticals, aerospace, rail transportation equipment, passenger and commercial vehicles, construction equipment, industrial equipment, shipbuilding, electrical power equipment, machine tools and automated manufacturing systems, electronics and telecommunications equipment, fishing, food and beverage processing, furniture, paper, textiles, tourism, media, financial services.
Trade: (2003) Exports—machinery, motor vehicles, aircraft, plastics, pharmaceuticals and other chemicals, fuels, iron and steel, nonferrous metals, wood pulp and paper products, textiles, meat, dairy products, fish, alcoholic beverages. Major markets—U.S., China, Japan, Switzerland. Imports—machinery, vehicles, aircraft, plastics, crude oil, chemicals, textiles, metals, foodstuffs, clothing. Major suppliers—U.S., China, Japan and Switzerland.

HISTORY

Following World War II, traditional European rivals sought to solidify peace by bringing their nations together under a common institutional structure. Influenced by his compatriot Jean Monnet, French Foreign Minister Robert Schuman officially tabled a plan on May 9, 1950 to pool French and German coal and steel production under an organization that would be open to other European countries. German Chancellor Konrad Adenauer supported this proposal, and six founding countries—Belgium, France, Germany, Italy, Luxembourg and the Netherlands—took an early step toward European integration by establishing the European Coal and Steel Community (ECSC) the following year.

After failing to establish a European Defense Community in the 1950s, the six countries then decided to set up a common market. With the entry into force of the Treaty of Rome in 1957, they created the European Economic Community (EEC), with an objective of liberating the movement of goods, capital, workers and services. (The European Atomic Energy Community (EURATOM) was also established at this time.) The Treaty of Rome established the basic institutions and decision-making mechanisms still in place in today's European Union. As of July 1, 1968, the EEC abolished customs duties between Member States on manufactured goods. New policies, including a common agricultural policy (CAP) and a common trade policy, were in place by the end of the 1960s.

The success of the European integration project during a period of steady economic growth in the 1960s set the stage for a first enlargement—the accession of the UK, Ireland and Denmark—in 1973. Further "deepening" of European integration followed: the Community acquired executive authority in social, regional, and environment policies. The benefits of economic convergence became more evident in the context of the 1970s energy crisis and financial turmoil, which led to the launch of the European Monetary System in 1979. In the same year, the first direct elections to the European Parliament (EP) took place. Previously, delegates from national parliaments had represented their country's legislative bodies at the EP in Strasbourg, France.

The Community further expanded southward with the accession of Greece (1981, the second enlargement), followed by Spain and Portugal (1986, the third enlargement). These accessions led the EEC to adopt "structural programs" in order to reduce economic and social disparities among its regions.

During the 1960s and 1970s, the Community began to assert itself on the international scene with the conclusion of agreements with southern Mediterranean countries. Starting in 1963, the EEC signed four successive Lome Conventions, which guaranteed trading advantages and development aid for Member States' former colonies in Africa, the Caribbean, and the Pacific (ACP).

World recession and internal disputes over Member States' financial burdens gave way, from 1985 onward, to renewed efforts for economic integration, enshrined in the 1985 "Single European Act" (SEA) and marked by the 1992 "Single Market Project." The SEA set January 1, 1993 as the date by which an internal single market was to be established and, by extending the practice of majority voting rather than unanimity in the EU Council, gave Community institutions the means of adopting the 300 Community-wide Directives required to abolish the remaining barriers and obstacles to intra-Community trade. In 1995, the Community entered into the "Barcelona" partnership with twelve southern Mediterranean countries. The partnership, reinforced by agreements on social, cultural, and human cooperation, was intended to lead to a free-trade area.

The collapse of the Berlin Wall and German unification prompted Member States to negotiate the 1992 Treaty on European Union (the "Maastricht Treaty"). In addition to establishing the European Union, the Maastricht Treaty set an ambitious program of further integration: establishment of Economic and Monetary Union (EMU) by 1999 (part of the "First or 'Community' Pillar"), setting up of a Common Foreign and Security Policy (CFSP) ("Second Pillar"); and cooperation on Justice and Home Affairs (JHA) ("Third Pillar"). Shortly thereafter, in 1995, Austria, Finland and Sweden joined the EU—the fourth enlargement.

Signed in 1997 and entering into force on May 1, 1999, the Amsterdam Treaty partially streamlined the EU institutional structure. Its most significant effects were: (1) to transfer aspects of Justice and Home Affairs policy to the Community Pillar, enabling the Commission to propose decisions to be taken by the EU Council by qualified majority voting instead of by consensus, and (2) to establish a High Representative for the CFSP (who also serves as Secretary-General of the Council Secretariat). Ten countries in Central and Eastern Europe and Cyprus began accession procedures in 1997, followed by Malta. The prospect of eastward enlargement raised significant resource concerns and prompted the adoption in March 1999 of the "Agenda 2000" package, which covered amendments to the CAP and EU structural policies, as well as a budgetary framework through 2006.

In May 1998, EU heads of government officially designated eleven Member States eligible to adopt a single currency. Greece initially did not qualify, and Sweden, the UK and Denmark "opted out." On January 1, 1999, the euro became the official currency of the EU, and the European Central Bank (ECB) put euro notes and coins into circulation on January 1, 2002. Today, thirteen countries use the euro: Austria, Belgium, Finland, France, Germany, Greece, Ireland, Italy, Luxembourg, the Netherlands, Portugal, Slovenia, and Spain.

Streamlining the size and procedures of EU institutions to make the expanded EU more efficient was also an aim of the 2003 Treaty of Nice. A year later, in May 2004, Cyprus, the Czech Republic, Estonia, Hungary, Latvia, Lithuania, Malta, Poland, Slovakia, and Slovenia joined the EU, bringing total membership to 25. In 2007, Bulgaria and Romania joined the EU, which currently stands at 27 members. Formal Candidate countries currently include Turkey and Croatia, as well as the Republic of Macedonia.

In October 2004, Member States signed an EU Constitutional Treaty in Rome, intending that it take effect on November 1, 2006. French and Dutch voters rejected the treaty through referenda in 2005, thereby suspending the ratification process. A new effort, undertaken in June 2007, calls for the creation of an Intergovernmental Conference to form a political agreement, known as the Reform Treaty. In contrast to the Constitutional Treaty, the Reform Treaty would amend existing treaties rather than replace them. The IGC approved the new reform treaty, called the Lisbon Treaty, in October 2007. The Lisbon Treaty must be ratified by all 27 national Parliaments. So far, only Ireland has indicated that it is constitutionally bound to hold a referendum. The Lisbon Treaty would ideally streamline the decision making process of the EU and abolish the rotating Presidency of the Council, replacing it with a more permanent President of the Council. The Lisbon Treaty would also combine the role of the High Representative for Common Foreign and Security Policy, currently Javier Solana, and the EU Commissioner for External Relations, currently Benita Ferrero-Walder, into a single position, in an effort to combine the face and the purse strings of European foreign policy.

MAJOR INSTITUTIONS

The European Commission

The role and responsibilities of the European Commission place it at the center of the EU's decision-making process. Acting as the EU's policy and executive engine, the Commission is composed of 25 Commissioners, one from each Member State and is supported by a substantial staff located primarily in Brussels, Belgium. In matters relating to economic integration ("First or 'Community' Pillar"), only the Commission has the right to propose legislation for approval by the EU Council and European Parliament. As "guardian of the Treaties," the Commission ensures that EU laws are applied and upheld throughout the EU, prosecuting Member States and other institutions for failing to follow treaty precepts or otherwise apply Community law. The Commission has full authority to enforce Community competition policy, and its policing of implementation of Community legislation preserves the integrity of the EU single market. The Commission likewise manages and develops the Common Agriculture Policy (CAP), implements the budget, and represents the European Community in its areas of competence, notably including international trade negotiations.

The Commission President is appointed by agreement of the EU heads of government and is subject to approval by the European Parliament. Commissioners serve for a renewable five-year term. New Commissioners are identified by Member State governments in consultation with the President-designate of the Commission and are normally put in place at the beginning of the term of the Commission President. The entire Commission must be confirmed as a collective whole by the European Parliament before its formal appointment by common accord of EU governments.

The European Council

The Council of Ministers of the European Union (the "EU Council") is the body in which representatives of the individual Member State governments, usually ministers, legislate for the EU, set its political objectives, coordinate national policies and resolve differences among their governments and with other EU bodies. Legally speaking, there is only one Council, but it meets in nine different formations, depending on the matters on its agenda. Foreign ministers usually meet at least once a month in the General Affairs and External Relations Council (GAERC), which deals with major foreign policy issues and plays a coordinating role. Ministers for the Economy and Finance (ECOFIN) and ministers responsible for agriculture also hold monthly meetings.

Ministers for Justice and Home Affairs (JHA) hold regular meetings to coordinate policies within their competence.

The Council holds formal sessions in its Brussels headquarters, except in April, June and October, when all sessions take place in Luxembourg. Most formations of the Council also meet informally (tasking no legally binding decisions) in the country holding the EU Presidency, usually once in the course of the Presidency's six-month term. The most prominent of these informal meetings is the so-called "Gymnich" meeting of foreign ministers, named for a town in Germany where the first such meeting took place.

The Council takes most decisions under the Community Pillar by qualified majority voting (QMV) but endeavors to reach the broadest possible consensus before approving legislation. Unanimity is required for a number of specific areas related to economic integration (e.g. taxation), constitutional matters such as amendments to the treaties, the launching of a new common policy, the accession of a new Member State, and matters falling within the EU's Common Foreign and Security Policy, European Security and Defense Policy, and aspects of law enforcement and judicial cooperation. The number of votes cast by each Member State when the EU Council votes by qualified majority voting was determined by the Nice Treaty and roughly correlates to the size of its population.

The European Parliament

Members of the European Parliament are directly elected by EU citizens for five-year terms; elections follow national election procedures. Members do not sit in national delegations; rather, they sit in groups according to political affiliation (including Socialists, Christian-Democrats/Conservatives, Liberals, Greens, etc.).

Parliament's powers have gradually grown with the entry into force of the Single European Act (1986), the Maastricht Treaty (1993) and the Treaty of Amsterdam (1999). Parliament shares decision-making power on an equal footing with the Council in many areas under the Community Pillar to which the "co-decision procedure" applies. The European Parliament is one of the two branches with budgetary authority—the Council is the other. The signature of the EP president brings the overall EU budget into effect.

The European Parliament also plays a role in the process of selecting the President and other members of the Commission. The European Council's nomination of the President is subject to approval by the Parliament. The EP holds U.S.-style public hearings of Commission nominees before taking a formal vote to approve the nomination of the Commission as a body. Parliament has the power to censure the Commission, but the Treaties do not allow for the dismissal of individual Commissioners by Parliament.

The European Court of Justice

The European Court of Justice (ECJ) ensures uniform interpretation and application of both the Treaties establishing the European Communities and the secondary legislation and other law adopted under their authority. To enable it to carry out that task, the Court has wide jurisdiction to hear various types of cases. For example, the Court has the authority to hear and issue binding judgments in lawsuits that seek to annul a law adopted by the EU, to compel an EU institution to act, or to require that a Member State comply with EU law. The ECJ may issue clarifications of EU law (in response to a request for a preliminary ruling from any Member State court) and hears appeals on legal questions arising out of cases at the Court of First Instance. The ECJ currently has 25 justices and eight advocates-general, who are appointed by common accord of the governments of the Member States and who hold office for six-year renewable terms.

U.S.-EU RELATIONS

The United States and the EU are important partners who maintain a robust agenda of cooperation in areas such as the Middle East, Balkans, Ukraine, Central Asia, and Africa.

In pursuit of Middle East peace, the United States and the EU cooperate, with the United Nations and Russia, in the "Quartet." The EU has made significant contributions to the goal of promoting good governance, democracy, and strong civil societies throughout the Middle East. The United States and the EU also work together in promoting reform throughout the Middle East.

The United States and EU share a commitment to a free and democratic Iraq. The United States and EU supported preparations for Iraq's January 2005 elections and are cooperating to support Iraq's continuing political transition. The United States and EU co-hosted an International Conference on Iraq in June, 2005 in Brussels that marked the creation of a new international partnership to support the Iraqi Transitional Government.

In the Western Balkans, the United States and the EU are working together to strengthen democracy, ensure stability, and promote the region's integration into Euro-Atlantic structures, and are urging all parties to meet their obligations to cooperate with the International Criminal Tribunal for the Former Yugoslavia. The United States and EU also cooperate closely in the process intended to culminate in resolving Kosovo's future status.

The United States and the EU share a commitment to promoting democracy throughout Eurasia. The United States and the EU cooperated closely during the presidential election campaign in Ukraine, and especially following the flawed November 2004 second-round vote. In Afghanistan, the EU is a close partner with the United States in supporting democratic development and reconstruction. A combination of NATO security

forces and EU civilian rule of law assistance are contributing to the stabilization of a democratic Afghanistan. Most notably, in 2003 the EU pledged $1.3 billion to Afghanistan over a five-year period to support reconstruction and development.

The United States and the EU cooperate on many African issues, including supporting efforts by the African Union to restore peace in the Darfur region of Sudan. The United States welcomed the EU's peacekeeping mission in Africa's Great Lakes region and supported its joining the Tripartite Commission as an observer. The United States consults regularly with the EU on assistance programs, including efforts to combat HIV/AIDS throughout Africa.

ECONOMY

The institutions of the European Union were originally created to oversee the operation of the several economic communities that later became the Single European Market. Even as the EU's political integration has continued, the area of greatest integration has always been in the economic sphere: goods, capital, and labor move freely between Member States (with some exceptions), businesses in all Member States are increasingly subject to common basic rules, and thirteen of the 27 Member States use a common currency, the euro. The twelve euro-area countries share a common monetary policy administered by the European Central Bank in Frankfurt, Germany. The EU strives to eliminate internal barriers to the free flow of goods, services, labor, and capital, and to promote the overall convergence of living standards. Internationally, the EU aims to strengthen Europe's trade position and capitalize on the political and economic leverage that a large, unified market brings.

Growth

The EU is the world's largest economic area (the U.S. is second) with a 2006 GDP of $13.08 trillion; however, growth in many of the EU's Member States in the recent past has been slow. Between 2001 and 2003, the overall growth rate dropped from 1.8 percent to 1.0 percent. The EU economy staged a modest, short-lived recovery in 2004, and increased to 3.2% in 2006. Within the euro area, growth varies as much as 4.5 percentage points between the fastest and slowest-growing economies. In 2005, many of the EU's largest economies, including Germany, France and Italy, will grow by less than two percent. Outside the euro area, growth is forecast to remain strong, particularly in the Central and Eastern European countries that joined the EU in May 2004.

In spring 2000, the EU committed to a ten-year strategic goal of transforming the EU into a more competitive, knowledge-based economy capable of sustaining higher levels of growth. Focusing on labor market reform, macroeconomic and fiscal policy, and promotion of e-commerce and entrepreneurship, the EU's "Lisbon Agenda" was an attempt to stimulate growth while remaining committed to the EU social model. Some suggest that it has so far failed to achieve its goals in large part because national governments (which retain authority over employment policy, immigration, large public sector workforces, entitlement programs and pensions) have not completed the necessary reforms. With euro area unemployment at 8.6 percent, generous social programs continue to strain national economies. The European Commission relaunched the Lisbon Agenda in March 2005, promising three percent growth and six million new jobs by 2010. The revamped strategy focuses on developing political consensus within Member States to make the changes necessary to complete elimination of barriers in the internal market, reduce the regulatory burden on business, improve labor market flexibility, provide incentives to work and increase investment in human capital.

Fiscal and Monetary Policy

Introduced in 1999, the euro is currently the official currency of thirteen of the 27 EU Member States. United Kingdom, Denmark and Sweden chose to retain their national currencies, and newer EU members have yet to adopt the euro. Prior to the euro's launch in 1999, national currency exchange rates of countries intending to join the euro were fixed within an Exchange Rate Mechanism. Following the January 2002 introduction of euro notes and coins into general circulation, national currencies were removed from circulation. Each of the euro area countries agreed to abide by a shared fiscal policy rule book known as the Stability and Growth Pact (SGP). This agreement generally obliges national governments to limit government budget deficits to 3 percent of GDP and established a target debt-to-GDP ratio of below sixty percent. Although enforcement actions have been forgiving—France and Germany, for example, avoided sanctions despite missing SGP targets—countries violating the SGP are technically subject to sanctions by the European Commission. As of March 2005, national governments have been granted budget leeway to achieve structural reforms and to combat prolonged stagnation, negative growth or other factors, such as the cost of German reunification or state pensions. The revised standards still require deficits to remain close to the targets; they may only temporarily exceed the three percent limit. The ten Member States that joined the EU in May 2004 may adopt the euro after complying with the SGP targets and meeting other applicable criteria.

The euro area's monetary policy is set by the European Central Bank (ECB), which must devise a monetary policy to accommodate a wide range of domestic policies and economic conditions within euro area Member States. The Treaties require that the ECB's primary objective be to maintain price stability (i.e., to keep inflation low). Euro-area national governments have sometimes criticized the ECB for guarding against inflation at the expense of interest rate flexibility that could enable struggling economies to gain traction. The ECB's consistent overnight interest rate of two percent has been cred-

ited with creating favorable conditions for growth in Spain and Ireland, but has been blamed for hindering growth in France, Germany, Italy, and Portugal.

Trade

The EU is the world's largest exporter of goods and services. In 2006, excluding internal EU trade, the EU exported $1.33 billion worth of goods to non-EU countries, compared to $987 billion in 2003. The EU's exports grew rapidly between 1996 and 2000 but have grown more slowly since. Except for 2002, the EU as a whole has posted a trade deficit every year since 1999; it was $62 billion in 2004. The EU is a major exporter of chemicals, transport equipment, and industrial machinery. The EU has large trade deficits in raw materials and energy, and a small deficit in food and drink.

The U.S. is the EU's main trading partner by a wide margin. In 2006, the U.S. consisted of 13.8% of all imports to the EU. U.S. goods and services exports to the EU reached $283 billion in 2004, while U.S. goods and services imports from the EU totaled $388 billion. Asian economies such as Japan and China, however, account for an increasingly important share of EU trade.

The EU's two-way merchandise trade with China grew to $223 million in 2004, while merchandise trade with Japan was $149 million. Internal trade between euro area and non-euro area countries was down one percent in the first quarter of 2005, but the EU's external trade was up four percent, particularly with Russia and Norway.

Member States have given almost exclusive authority to the EU to negotiate trade treaties that bind the Member States. The European Community (EC) is a full member of the World Trade Organization and plays an active role in the Doha Development Round to foster international trade in services and agricultural products. Bilaterally, the EC maintains framework agreements to facilitate trade flows with thirty-five countries worldwide, mostly elsewhere in Europe, in North Africa, and in the Middle East.

Foreign Direct Investment

The EU is both a major destination for foreign direct investment (FDI) and a major source of FDI. U.S. foreign direct investment in the EU totaled $83.3 billion in 2004; EU FDI into the U.S. totaled $46.6 billion. Following strong year-upon-year growth in the late 1990s, however, inward and outward flows of FDI have contracted since 2001. The EU is a net recipient of FDI from Japan, receiving $81 billion in 2003. Conversely, the EU is a net investor in Canada ($86 billion in outward investment in 2003), and China ($29 billion in outward investment in 2003). Growth of intra-EU FDI has increased rapidly in recent years and has increased much faster than FDI in non-EU countries.

The pattern of foreign investment by European firms reflects deep commercial ties with the United States. U.S. and EU businesses invest heavily and operate profitably on both sides of the Atlantic. U.S. affiliates in Europe accounted for 56 percent of the aggregate output of U.S. affiliates worldwide.

European firms were the largest foreign investors in 44 U.S. states and the second largest foreign investor in the remaining six. Sales by U.S. affiliates in Europe totaled $1.5 trillion in 2002, more than double those of U.S. affiliates in the Asia/Pacific region. European affiliate sales in the U.S. were $1.2 trillion in 2002, more than three times the value of U.S. imports from Europe.

Intra-firm trade involving foreign affiliates is particularly important to the transatlantic trade and investment relationship. Approximately 58 percent of U.S. imports from the EU in 2004 involved trade between related parties, as did 30 percent of U.S. exports to Europe in 2003.

This high level of intra-firm trade has contributed to the persistence of the U.S. trade deficit with Europe even as the dollar has lost value against the euro since 2002.

Budget

The EU's budget is essentially made up of Member State contributions. Equivalent to roughly one percent of the Member States' combined gross national income (GNI), it will be approximately 129.2 billion in 2008. The UK receives a rebate on its contribution. In June 2005, the EU failed to agree on a budget plan for 2007 through 2013, due in part to a disagreement between the UK and France over the persistence of the UK budget rebate and the funding of the Common Agricultural Policy (CAP). Costs attributable to the CAP constitute the EU's largest annual budget item, benefiting farmers across the EU, especially in France. Payments to net-recipient Member States, designed to reduce economic and social disparities among EU countries and regions, are another budget item which has become more contentious with the accession of ten new states poorer than the EU average.

2008 U.S.-EU SUMMIT

June 10, 2008

On June 10, 2008, President George W. Bush reaffirmed his support for a strong Europe capable of being a strong partner with the United States in the advance of freedom and prosperity around the world. President Bush met with the leadership of the European Union (EU), Slovenian Prime Minister and European Council President Janez Jansa and European Commission President José Manuel Barroso, at Brdo Castle in Slovenia to advance our efforts to jointly confront global challenges.

Holding the U.S.-EU Summit in Slovenia, a country once behind the Iron Curtain and now a member of NATO and the EU, is a compelling example of the success of our common vision of a Europe whole, free, and at peace.

Advancing Transatlantic Partnership And Global Prosperity

The U.S.-European commercial relationship is the engine of the world economy. In their discussions, President Bush and European Union leaders discussed how to remove barriers to increase trade and investment to grow our economies and help lift people out of poverty.

The president and EU leaders noted their strong commitment to achieving a prompt, ambitious, and balanced outcome in the WTO Doha Development Agenda that creates new market access and economic opportunities that promote development and alleviate poverty. The United States and EU called on all WTO members to make meaningful contributions that are necessary to advance the negotiations, achieve a breakthrough on modalities in the next few weeks, and conclude an agreement as soon as possible.

At the Summit, the president gained support for his strategy for addressing the increase in global food prices:

- Provide assistance to target countries vulnerable to food price increases;
- Assist countries capable of rapidly increasing staple food production; and
- Advance trade liberalization and increase use of advanced agricultural technologies to increase the supply of food.

The United States and the EU agreed to join and work together in efforts to save more lives, by working to train health workers, especially in Africa, and to treat those suffering from seven major neglected tropical diseases.

The leaders reiterated their commitment to continue to work in the Major Economies Meetings process to support negotiations toward a climate change agreement by the end of 2009 under the UN Framework Convention on Climate Change. The president underscored the need for all major economies to develop national climate change plans and goals and to have them reflected in binding international commitments.

Summit leaders advanced significant measures to enhance European energy security by launching an initiative for the U.S. and EU to work together with Ukraine to promote transparency and efficiency in its energy sector and by endorsing the development of the Nabucco and Turkey-Greece-Italy pipeline projects to diversify sources of natural gas to Europe. Building on the extensive work of the United States and the EU on African development, the Summit pledged U.S.-EU commitment to help realize Africa's development potential; combat infectious diseases such as HIV/AIDS and malaria; foster human rights, democracy, and good governance; and cultivate investment, entrepreneurship, and economic growth. President Bush's recent trip to Africa advanced this work, as have the recently adopted EU-Africa Strategy and Action Plan and G8 efforts

The leaders renewed their commitment to deepening transatlantic economic integration through the Transatlantic Economic Council (TEC). The TEC is making progress on addressing a range of regulatory issues that stand in the way of closer integration between Europe and the United States. The president underscored that the TEC must be a forum that delivers results and that to fulfill the TEC's promise, each side must follow through on the commitments it makes in the forum.

Global Security, Peace, Human Rights and Democracy

The strategic partnership between the United States and the EU is firmly anchored in common values and a determination to ensure global security, promote peace, protect human rights, and advance democracy.

The president and his counterparts affirmed the dual track strategy with regard to Iran; agreed to fully and effectively implement UN Security Council Resolutions 1737, 1747, 1803 and other pertinent resolutions; affirmed that we are ready to supplement these sanctions with additional measures; and underscored continuing concern about Iran's regional policies, especially its continued support for terrorist organizations.

The United States and Europe:

- Welcomed the election of Michel Sleiman as president of Lebanon and discussed ways to support Lebanon's legitimate government and its institutions, including through improved enforcement of existing UN Security Council Resolutions, which call for, among other things, the disarmament of illegal militias;
- Looked forward to the full implementation of the Doha agreement and a full resumption of the functioning of all democratic institutions of the state of Lebanon;
- Called on concerned parties, including Syria, to comply with UN Security Council Resolutions 1559, 1701, 1757, and other relevant resolutions, including full cooperation with the Special Tribunal for Lebanon; and
- Rejected the use of violence as a means to achieve political ends.

The leaders discussed how to advance peace in the Middle East and strengthen the Palestinian security sector and their own economic development initiatives. They agreed to pursue complementary efforts to support the Parties' efforts to reach a political agreement by the end of 2008 especially those in the region, to follow through on and increase their pledges and deliver assistance to the Palestinian Authority. The leaders

agreed that Serbia should have the opportunity to become a full partner in the European family of nations. The United States and Europe also agreed to support the stability and security of Kosovo and its regional integration and to assist Kosovo in its economic and institutional development.

The U.S. and the EU agreed to work with Iraq to hasten its ability to join the WTO. The EU is giving substantial assistance to Iraq and is negotiating an EU-Iraq Trade and Cooperation Agreement, and the U.S. welcomes the EU's desire to expand its diplomatic presence in Iraq.

The United States and Europe are enhancing strategic cooperation to assist Afghanistan, including expanding the size and scope of justice and police reform assistance and counter-narcotics efforts.

The leaders discussed the aspirations of Ukraine, Georgia, and Moldova and committed to help these countries achieve their reform goals as soon as possible. They expressed support for President Saakashvili's peace initiatives on Abkhazia and encouraged direct talks between the Georgian Government and the Abkhaz, while reaffirming a commitment to Georgia's sovereignty and territorial integrity.

The leaders welcomed China's recent decision to hold talks with the Dalai Lama's representatives and encouraged both parties to move forward with a substantive, constructive and results-oriented dialogue at an early date. The leaders also urged China to take substantive steps to address its poor human rights record.

The United States and Europe committed to work together to accelerate the deployment of the UN/African Union Hybrid Mission in Darfur.

The leaders called on the government of Zimbabwe immediately to cease the state-sponsored violence and intimidation against its people and ensure a free and fair presidential runoff election on June 27.

The U.S. and the EU agreed to work together to further support democratic values and institutions in Latin America and called on the Cuban government to unconditionally release all political prisoners. The leaders agreed to expand cooperation to combat terrorism finance, including preventing misuses of charities and bulk cash smuggling to finance terrorism, and to increase information sharing.

The U.S. and the EU called for geographical expansion of the G8 Global Partnership against the Spread of Weapons and Materials of Mass Destruction (WMD).

Transatlantic Economic Council Report to the EU-U.S. Summit 2008

Review of progress under the framework for advancing transatlantic economic integration between the European Union and the United States of America

Believing that transatlantic economic integration will maximize economic benefits for their citizens through competition and stronger growth, while maintaining high standards of safety and protection, at their last summit meeting in April 2007, the leaders of the European Union (EU) and the United States of America (United States) committed their governments to increasing the efficiency and transparency of transatlantic economic cooperation and to accelerating the reduction and elimination of barriers to international trade and investment with the ultimate objective of achieving a barrier free transatlantic market.

The leaders of the European Union and the United States of America agreed on a Framework for Advancing Transatlantic Economic Integration (the Framework) and established the Transatlantic Economic Council (TEC) to oversee the efforts outlined in the Framework, with the goal of accelerating progress and guiding work between EU-U.S. Summits.

The TEC was requested to report annually to the EU-U.S. Summit leaders on the TEC's achievements (part 1) and on areas where more progress is needed (part 2).

TEC Achievements

The outcomes of two TEC meetings so far show the firm commitment of both sides to reach their common objective of greater economic integration. The meetings have shown clear signs of steady progress towards a more convergent transatlantic regulatory environment in a number of priority areas.

The regular and close contacts between the European Commission and the U.S. government in the context of the TEC have allowed both sides to deepen their political dialogue and offered a platform to informally discuss strategic issues of common interest. Representing the most important bilateral economic relationship in the world, built on shared values, including a belief in open economies, unfettered competition, the rule of law and well-regulated markets with a high level of safety and protection, the TEC is mindful that the European Union and the United States lead by example as to how to overcome economic barriers both in their bilateral relationship and in the world economy.

Since the 2007 Summit meeting, the TEC has:

- Adopted working arrangements on its composition, working methods, and relations with stakeholders, legislators and regulators;
- Convened a Group of Advisers comprised of the heads of existing transatlantic dialogues to provide input and guidance to the TEC on priorities for transatlantic economic integration; the Co-chairs of the TEC have consulted this Group of Advisers before each meeting of the TEC and informed them of the TEC's accomplishments afterwards;
- Appointed senior officials and heads of regulatory agencies as members of the EU-U.S. High-Level Regulatory Cooperation Forum; the Forum has met twice

over the past year, serving as a platform for exchanging best regulatory practices within and between sectors and for seeking early upstream consultation and more compatible regulatory approaches to upcoming regulatory matters and decisions;

- Assembled in Washington on 9 November 2007 and on 13 May 2008 in Brussels, reflecting the high-level political commitment to transatlantic economic cooperation on both sides of the Atlantic and demonstrating the intention of the European Commission and U.S. government to move rapidly towards achieving their common objectives in the areas mentioned in the following sections.

Fostering Cooperation and Reducing Regulatory Burdens

The TEC is committed to:

- Removing barriers to transatlantic commerce;
- Rationalizing, reforming, and, where appropriate, reducing regulations to empower the private sector;
- Achieving more effective, systematic and transparent regulatory cooperation to reduce costs associated with regulation to consumers and producers and to enhance consumer confidence and safety;
- Removing unnecessary differences between our regulations to foster economic integration;
- Reinforcing the existing transatlantic dialogue structures in regulatory cooperation both by intensifying sector-by-sector EU-U.S. regulatory cooperation and the dialogue between the European Commission services and the U.S. Office of Management and Budget (OMB) on methodological issues.

Over the past year, the European Commission and the U.S. government have taken the following steps to reduce barriers to transatlantic economic integration.

The EU-U.S. High-Level Regulatory Cooperation Forum convened on 8 November 2007 and on 25 April 2008 and discussed closer cooperation in matters of product safety, early warning systems concerning forthcoming regulation that may be of common interest, regulatory issues presented by new technologies, impact and risk assessments methodologies, and the role of public consultations in the regulatory process.

The EU-U.S. High-Level Regulatory Cooperation Forum submitted its report "Towards enhanced cooperation between the European Union and the United States of America on the safety of (imported) products" to the TEC, including concrete recommendations on how to overcome current constraints on effective information sharing.

The exchange of non-confidential (and, in some sectors, confidential) information regarding product recalls and other market removals for safety reasons is well established. The importance of discussing the exchange of confidential (pre- or post-recall) information in additional sectors has been acknowledged, paying due attention to the need for confidentiality arrangements.

The EU-U.S. High-Level Regulatory Cooperation Forum also submitted the final joint OMB/Secretariat General report "Review of the Application of EU and U.S. Regulatory Impact Assessment Guidelines on the Analysis of Impacts on International Trade and Investment" to the TEC. The report seeks to advance the goal of ensuring that impact assessments and analyses of future regulations take due account of the impact of such regulations on international trade and investment.

Since the TEC's November 2007 meeting, the Occupational Safety and Health Administration (OSHA) has met with domestic and foreign stakeholders—including several meetings with European Commission counterparts—to better understand and discuss systems and issues related to conformity assessment (CA) of electrical products, including suppliers declaration of conformity (SDoC). On the basis of these meetings, OSHA has decided to publish a new request for information (RFI) concerning the use of SDoC for certain electrical and electronic equipment used in the workplace. Further, as an additional step to facilitate trade in electrical products with respect to conformity assessment procedures for the safety of such products, in April 2008 OSHA proposed to increase the number of locations where product certification functions can be performed by Nationally Recognized Testing Laboratories.

At the TEC meeting in November 2007, the subject of the treatment of poultry meat with pathogen reduction substances was discussed. The European Commission has undertaken to act on this issue before the next EU-U.S. Summit, after receiving scientific advice. In this sense, the Commission consulted the European Food Safety Authority on the possible effects of the treatment on antimicrobial resistance and the Scientific Committee on Health and Environment and the Scientific Committee on Emerging and Newly Identified Health Risks on the environmental risk and on the risk of emergence of microbial resistance associated with the use of these substances. The Commission has reviewed these scientific opinions and, in the light of those opinions, which provide no scientific basis for the continuation of the import ban, it will in the coming weeks come forward with a proposal for allowing the use of pathogen reduction treatments for poultry meat in the EU Member States and in imported poultry products. In line with its previous commitment, the Commission will actively solicit Member State and European Parliament support and will make best endeavors to achieve the final adoption of the relevant EU legislation before the next TEC meeting, planned for autumn 2008.

The European Commission and the U.S. government will seek to intensify their cooperation on agriculture, sanitary and phyto-sanitary measures, and food safety, and the TEC will review the state of progress at its

next meeting. The U.S. Federal Communications Commission plans to initiate a rulemaking to consider allowing suppliers declarations of conformity for products that currently require certification and have a good record of compliance with relevant requirements. The U.S. Food and Drug Administration (FDA) and the European Commission have agreed to meet regularly to further their cooperation in the peer review of invalidated alternative methods to animal testing used to determine the safety of cosmetic ingredients (including some products regulated in the United States as drugs and in the European Union as cosmetics). The next expert meeting will be held in July 2008.

A first set of specific projects on medicinal products have been agreed following the administrative simplification workshop held in Brussels in November 2007. These results will provide important benefits for industry, patients, and regulatory authorities. The collaboration on inspections will result in more effective use of resources and a higher safety level of products from third countries. Work will continue to identify other areas for intensified collaboration. In addition, U.S. and EU authorities have recently announced a series of successes in their work on biomarker development and validation for various medicinal product development purposes. Finally, FDA and the European Medicines Agency (EMEA) have agreed recently on an implementation work plan for veterinary medicinal products regulation and have agreed on a process for offering parallel scientific advice to veterinary medicinal products manufacturers that wish to receive such advice simultaneously from the FDA and EMEA.

The European Union and the United States have achieved good progress in their co-operation on auto safety with the recent adoption—in March 2008—of two Global Technical Regulations (GTRs) on glazing and head restraints at the United Nations Economic Commission for Europe (UN-ECE). Furthermore, they are committed to work towards the adoption of GTRs on electronic stability control and pedestrian protection this year. In order to reduce unnecessary costs for transatlantic trade, the European Commission has proposed legislation that would allow the continued import of products into the EU with dual labelling of measurement units.

The European Commission and the United States government have continued their bilateral cooperation on chemicals regulation. In addition they have cooperated in multilateral fora. In relation to the EU's Registration, Evaluation, and Authorization of Chemicals (REACH) regulation and its implementation, they agreed to continue their discussion of issues including the placing of products on the candidate list, the "Only Representative" provision, and openness and transparency in REACH Implementation Projects. The Commission acknowledges that REACH presents an unprecedented challenge both for European and third country producers and will therefore, within its competence, undertake the necessary steps to ensure transparent implementation, legal certainty and non-discriminatory trade.

EU-U.S. cooperation on developing biofuels is advanced and on-going, following a common work plan agreed in February 2008. A White Paper on Internationally Compatible Biofuel Standards has been developed with the cooperation of European, American and Brazilian standards bodies. It carefully delineates those aspects of technical standards for biofuels that are already more or less compatible, those aspects that would be too difficult to make compatible, and those aspects that can be brought into closer alignment through continued effort. Additionally, U.S., EU and Brazilian measurement experts are working to develop common standards for calibrating and validating the accuracy of measurement results. This work complements ongoing standards efforts in the private sector and will enable purchasers globally to verify test results for biofuels they purchase.

The EU and the United States signed a comprehensive air transport agreement at the EU-U.S. summit in April 2007. That agreement was provisionally applied as of 30 March 2008 and is already delivering major benefits to our consumers, airlines, communities, and economies. As envisioned in the agreement, a second stage of negotiations, aimed at further liberalization, will begin on 15/16 May 2008.

Lighthouse Priority Projects

The European Commission and U.S. government have pursued work on the priority issues for transatlantic economic integration identified at the April 2007 Summit (the so-called "Lighthouse projects"), and the TEC has achieved progress on a number of them.

Intellectual Property Rights: The EU-U.S. cooperation on IP enforcement has been a success story. In the past year, the activities have focused in particular on joint enforcement efforts at the WTO and in third countries, in particular in China and Russia; joint organization of seminars in Russia (digital piracy), in Latin America and in ASEAN countries; and development of IP networks of EU and U.S. diplomats in third countries, starting with Russia and China. Closer customs co-operation, including joint border enforcement actions, has been an area of particular attention this year, namely the first joint customs cooperation project (Operation INFRASTRUCTURE) was a success. In addition, the United States and the European Union are working together and with other trading partners to negotiate a strong Anti-Counterfeiting Trade Agreement, which they will seek to conclude by the end of 2008.

Further, the United States Patent and Trademark Office and the European Commission have agreed to a roadmap to advance global patent harmonization. During the remainder of 2008, they will elaborate on the roadmap to identify implementation options and engage in consultations with stakeholders.

Secure trade: The European Commission and the United States Government recalled their commitment to

the multi-layered, risk based approach in supply chain security and to fully implementing the U.S.-EU Joint Customs Cooperation Committee Roadmap Towards Mutual Recognition of Trade Partnership Programs, adopted on 6 March 2008. The United States Customs and Border Protection (CBP) and the European Commission will work to implement the Roadmap and achieve mutual recognition of the U.S. and EU supply chain security programs—that is, the U.S. Customs-Trade Partnership Against Terrorism (C-TPAT) and the EU Authorized Economic Operator (AEO) program—in 2009, including by exchanging best practices and cooperating on supply chain security measures.

The United States and EU have also put in place the agreed exchange of customs officials specializing in risk management, starting by stationing in April 2008 EU customs officials at the U.S. National Targeting Center—Cargo.

The European Commission and the U.S. government will include in their discussions on secure trade the issue of the eventual implementation of the U.S. legislation on 100% scanning of containers. The European Commission recalled its concern about this issue and took note that certain U.S. legislators have flagged their willingness to look into this issue.

Financial Markets: In the 2007 "Framework for Advancing Transatlantic Economic Integration," the U.S. government and the European Commission confirmed their common objective "to promote and seek to ensure conditions for the U.S. Generally Accepted Accounting Principles (U.S. GAAP) and International Financial Reporting Standards (IFRS) to be recognized in both jurisdictions without the need for reconciliation by 2009 or possibly sooner." The U.S. Securities and Exchange Commission (SEC) in November 2007, took the decision to abolish the requirement for reconciliation to U.S. GAAP for foreign companies using IFRS as issued by the International Accounting Standards Board (IASB), and solicited comment on the possibility of allowing domestic companies to file using IFRS. The European Commission will propose a decision on the equivalence of U.S. GAAP in the course of 2008. To this end, a European Commission working paper on convergence between IFRS and third country national GAAPs has been prepared. This working paper reflects the advice by the Committee of the European Securities Regulators (CESR), which takes a positive stance towards accepting U.S. GAAP as being equivalent to IFRS. The EU and the United States will also continue to monitor the situation in the coming months in the framework of the informal Financial Market Regulatory Dialogue (FMRD).

A joint statement by European Commissioner McCreevy and SEC Chairman Cox on the common willingness of the United States and EU to work together on mutual recognition in securities was released on 1 February 2008. Subsequently, SEC and the European Commission staffs have intensified their work on defining a process for carrying out a comparability assessment of EU and U.S. securities regimes which they hope to finalize by mid 2008. Thereafter, comparability assessments can begin. Mutual recognition in securities regulation would have the potential to facilitate access of EU and U.S. investors to a broader and deeper transatlantic market, increase the availability of information about foreign investment opportunities, promote greater diversification of securities portfolios, significantly reduce transatlantic trading and transaction costs, and increase oversight coordination among regulators. The TEC also encourages the implementation of other approaches to facilitate cross-border financial services, such as providing relief from local licensing requirements for securities firms engaging in cross-border business with certain sophisticated investors. The TEC discussed issues related to enhancing the openness and competitiveness of global insurance and reinsurance markets while maintaining high levels of consumer protection through the promotion of more comparable, efficient, cost-effective and modern prudential regulatory standards and practices. Currently, U.S. and European regulators and supervisors are engaged in significant efforts to modernize insurance and reinsurance regulation and supervision. The TEC urged both sides to make significant strides by the end of 2008 to identify the steps that need to be taken to create a true level playing field for EU and U.S. insurance companies operating in each other's jurisdiction, including reform of the collateral rules applied to EU reinsurers currently operating in the United States and proposals regarding the treatment of third country insurers and reinsurers in the European Commission's Solvency II Framework Directive Proposal. These discussions should continue to take place in the context of the FMRD, led by the European Commission and the U.S. Treasury, as well as between the National Association of Insurance Commissioners (NAIC), the Committee of European Insurance and Occupational Pensions Supervisors (CEIOPS) and the European Commission in the EU-U.S. Insurance Dialogue.

Innovation and Technology: Under the auspices of the EC-U.S. Task-Force on Biotechnology Research, a working group on bio-based products was established and several EC-U.S. scientific workshops paved the way to the identification of three joint research priorities related to innovative and eco-efficient bio-based products: plant cell walls in relation to bio-refining; plant oils as industrial feedstock; and biopolymers. The research projects selected in 2008 to address these priorities under the EC Research Framework Programme have a strong involvement of U.S. partners.

The November 2007 TEC meeting resulted in a commitment for the United States and EU to work together to improve international enforcement in the fight against fraud and illegal spam and spyware in light of the enactment of the Undertaking Spam, Spyware and Fraud Enforcement With Enforcers Beyond Borders Act of 2006 (the "U.S. SAFE WEB Act") and the adoption of

Regulation (EC) No. 2006/2004 of the European Parliament and of the Council. U.S. and EU officials have since begun developing a mutual assistance agreement on the enforcement of consumer protection laws.

The U.S. and EU have agreed to undertake the development of a joint pilot project involving the use of radio frequency identification (RFID) technology to track radioactive isotopes and to explore a second joint pilot project on postal bag tracking. The U.S. and EU will hold a joint symposium on the societal benefits of RFID, together with a workshop on RFID and privacy, in September 2008.

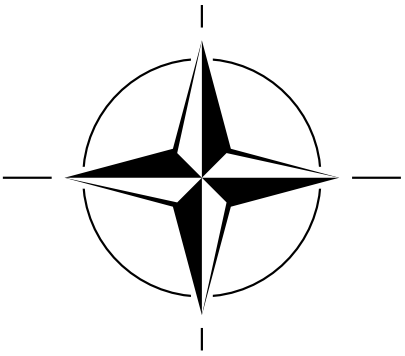
In December 2007, the U.S. and EU conducted an exchange of innovation experts on the mechanisms by which energy and sustainability are driving innovation within the European Union.

Investment: At its November 2007 meeting, the TEC launched an Investment Dialogue aimed at reducing barriers to transatlantic investment and promoting open investment regimes globally. Through the Investment Dialogue, the United States and the European Commission have prepared a joint "open investment statement" for submission to the U.S.-EU Summit, in which they affirm their shared commitment to preserve and promote open investment policies at home and globally. The two sides are working to address the challenges of rising protectionism around the globe and have held productive discussions regarding sovereign wealth investment, U.S. and EU investment regimes, and third country investment regimes and barriers. The United States and EU will continue their work as outlined in the Investment Dialogue work plan.

The way ahead

The TEC's working arrangements have proved to be a successful innovation which has given new political impetus to EU-U.S. economic cooperation with the objective of overcoming disagreements. A number of goals identified in the 2007 Framework have been achieved in the first year of its work. However, much remains to be done. The first year has confirmed that regulatory cooperation and economic integration entail arduous technical work to be successful and require the continued attention of and commitment by the political leadership to press for progress. This is a long-term project.

The TEC underlines that, as its central objective is to remove unnecessary constraints on and provide a common regulatory environment for transatlantic economic activity, the priorities for its work should be stakeholder-driven. The TEC emphasizes its appreciation of the counsel it has received from its Group of Advisors and of the Group's efforts to reach out to the wider stakeholder communities and to convey in a broad and balanced fashion the views of citizens, consumers and producers on both sides of the Atlantic.



The TEC emphasizes the importance of upstream regulatory cooperation to minimize unnecessarily divergent regulatory approaches. The High-Level Regulatory Cooperation Forum has proved its value as a unique platform to bring together top officials involved in sectoral and horizontal regulatory dialogues to exchange views and identify best practices, to build trust and confidence among regulators, and to foster effective working relationships. The TEC has welcomed the reports and presentations of the Forum co-chairs, which allowed the TEC to gain greater insights into the technical complexities of regulatory convergence.

The TEC underscores that transatlantic economic integration and the reduction of regulatory burdens can be constrained by existing legislation or new legislative initiatives. The TEC's efforts would benefit from more active engagement between the legislatures on both sides of the Atlantic. The TEC underlines the importance of a structured, institutionalized dialogue between the European Parliament and U.S. Congress, so that legislators are more vigilant of the potential impacts on transatlantic trade and investment stemming from their legislative work and avoid initiatives that might undermine transatlantic economic integration efforts.

The 2007 Framework recognized the multi-year nature of our work program. In order to bring the initiatives launched in 2007 to fruition, the TEC resolves to continue our work on all elements of the Framework, giving particular attention to intellectual property rights, secure trade and financial markets, and to take stock of progress in a third meeting before the end of this year.

The United States and the European Union share the largest economic relationship in the world. They also share core values, including a belief in the importance of open economies, transparency and the rule of law. These bonds are strong. They inform the U.S. and EU approach to each project they pursue. It is because of the breadth and depth of what unites the United States and the European Union that they expect the TEC to continue playing a vital role in the U.S.-EU relationship.

The European Commission and the United States government affirm their strong commitment to ensure the continuity of the TEC process as the key joint governance mechanism for the transatlantic economy into the uture.

NATO

Last Updated: December 2008

Official Name:

North Atlantic Treaty Organization

Editor's Note: The information in this article was compiled and edited from *Fact Sheets* and releases available 2006–2008 through the Bureau of European and Eurasian Affairs of the U.S. Department of State and updated by the editors.

BACKGROUND

NATO, or the North Atlantic Treaty Organization, is an international alliance of 26 countries of Europe and North America created to ensure the peace and security of the North Atlantic region. Signed April 4, 1949, the North Atlantic Treaty is NATO's founding document that details the principles upon which NATO was established.

NATO was founded to fulfill its goal of safeguarding the freedom and security of its members by way of political and military means. NATO's members consult together to address security issues of concern and work jointly to take whatever action is necessary to defend against threats. One principle that guides NATO is the policy that an attack against one member is considered an attack against all members. On September 12, 2001, this principle of collective defense was acted on after the terrorist attacks against the United States, when NATO invoked Article 5 of the NATO treaty, declaring the attacks to be an attack against all of the NATO member countries. All NATO decisions are made by the member countries on the basis of consensus. The North Atlantic Council, or NAC, is the main decision-making body in NATO, made up of permanent representatives from each member country which meets regularly in discussion. The NAC also consults with Heads of Government, Foreign Ministers, and Defense Ministers and establishes committees to provide advice on military policy and strategy to NATO's political leaders.

Key Events in NATO History

April 4, 1949: The North Atlantic Treaty, NATO's founding document, was signed.

March 24, 1999: NATO began a 78-day air campaign against the military forces of Yugoslavia's Slobodan Milosevic. Following the campaign, the Kosovo Force (KFOR), a NATO-led international peace-enforcement force, entered Kosovo to maintain security in Kosovo.

Sept. 12, 2001: NATO declared the terrorist attacks on the United States to be an attack against all NATO member countries within the terms of Article 5 of the North Atlantic Treaty.

May 28, 2002: The NATO-Russia Council was established at the NATO-Russia Summit, strengthening the commitment between NATO and Russia.

May 21, 2003: The NATO alliance agreed to support Poland in its leadership of a sector in the stabilization force in Iraq.

August 2003: NATO took over command and coordination of the International Security Assistance Force (ISAF). This is the first mission outside the Euro-Atlantic area in NATO's history.

August 2004: NATO established a Training Implementation Mission in Iraq.

Member Countries

Belgium, Bulgaria, Canada, Czech Republic, Denmark, Estonia, France, Germany, Greece, Hungary, Iceland, Italy, Latvia, Lithuania, Luxembourg, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Turkey, United Kingdom, United States.

U.S.-NATO RELATIONS

On September 12, 2001, NATO took the historic action of invoking—for the first time—Article 5 of the NATO treaty. This Article embodies the principle of collective defense—that an attack on one member is an attack on all. The Alliance backed up this action by sending five AWACs aircraft and a detachment of 200 personnel to the United States in October 2001. These aircraft logged 3,000

hours patrolling American skies and protecting North American airspace. In addition, NATO ships patrolled the Eastern Mediterranean to keep terrorists from infiltrating into Europe. All NATO Allies have participated in either Operation Enduring Freedom, the military campaign against al Qaeda and the former Taliban regime, or in the current International Security Assistance Force in Afghanistan.

U.S. security today requires us to look closely at NATO, which is already the strongest security Alliance in history, and find ways to make it even stronger. To confront and eliminate such global threats as terrorism and proliferation of weapons of mass destruction, we must ally with countries that share our values and act effectively with us. Since the end of the Cold War, Europe's newest democracies have proven themselves as able partners, whether securing stability in the Balkans or fighting terrorism in Afghanistan.

The enlargement of NATO will cement these benefits for the United States and its Allies, making the whole of NATO much stronger than the sum of the capabilities of individual members. NATO enlargement will help to enhance the political and economic stability for all countries in the Euro-Atlantic area. By helping Europe's newer democracies as they strengthen good governance, rule of law, and human rights, NATO will also facilitate a better long-term environment for American trade and investment.

NATO STRUCTURE

North Atlantic Council

The NAC is the principal forum for consultation and cooperation between NATO member governments on all issues affecting their common security. Its decisions are based on consensus, with each member having an equal right to express its views. The NATO Secretary General is chair. The NAC meets at least twice a year in ministerial session. It also meets weekly at the level of Permanent Representatives, who hold ambassadorial rank.

North Atlantic Council/ Defense Ministers (NAC/D)

The NAC/D deals with overall issues of defense and meets twice yearly when member countries are represented by their Defense Ministers.

Defense Planning Committee (DPC)

The DPC deals with defense planning and other issues related to NATO's integrated military structure. It is composed of all countries except France (which withdrew from NATO's integrated military structure in 1966). Like the NAC, it meets regularly at ambassadorial level and twice yearly with Defense Ministers, normally in conjunction with the NAC/D.

Nuclear Planning Group

This group has authority for nuclear matters. All countries except France participate. Iceland participates as an observer.

Military Committee

The highest military authority in the alliance; is composed of the chiefs of staff of each country. Iceland, which has no military forces, is represented by a civilian member. The Military Committee advises the NAC and the DPC on military measures necessary for the common defense and provides guidance to the NATO commanders.

Regional Commands

The strategic area covered by the North Atlantic Treaty is divided into two regional commands: Allied Command Europe and Allied Command Atlantic, with a regional planning group for North America. With the exception of France and Iceland, all countries assign forces to the integrated military command structure. The NATO Defense area covers the territories of member nations in North America, in the Atlantic area north of the Tropic of Cancer, and in Europe, including Turkey. However, events occurring outside the area which affect the preservation of peace and security in the treaty area also may be considered by the NAC.

NORTH ATLANTIC COOPERATION COUNCIL

The precursor to the Euro-Atlantic Partnership Council, North Atlantic Cooperation Council (NACC) was established in November 1991 to conduct NATO's outreach program to the former Warsaw Pact states.

The North Atlantic Cooperation Council (NACC) joined the North Atlantic Treaty Organization (NATO) allies and the newly free and independent states of Central and Eastern Europe, the Baltics, and the former Soviet Union in a program of political security dialogue, partnership, and cooperation. Subjects discussed in regular meetings between allies and partner states include defense planning and budgeting, democratic concepts of civil-military relations, defense conversion, and scientific and environmental topics. Members also discussed current political issues of common concern. In this way, the NACC complemented the Organization on Security and Cooperation in Europe (OSCE), NATO, the European Union, and the Council of Europe in building a Euro-Atlantic community of stable, democratic, and market-oriented societies from Vancouver to Vladivostok.

As the advent of glasnost and perestroika in the Soviet Union and the crumbling of communist control in Eastern Europe changed the nature of the European security challenge, NATO turned from a posture of confrontation with the East to one of dialogue and cooperation. The June 1990 Turnberry North Atlantic Council ministerial and July 1990 London NATO summit extended the hand of friendship to NATO's former

adversaries and called for the alliance to institute a liaison program with the Warsaw Pact states. The June 1991 Copenhagen North Atlantic Council ministerial developed this theme in its statement on "Partnership with the Countries of Central and Eastern Europe."

In their October 3, 1991, joint statement, Secretary of State Baker and German Foreign Minister Hans-Dietrich Genscher proposed the institutionalization of the NATO liaison program in a North Atlantic Cooperation Council. The following month, the Rome NATO summit formally established the NACC as a forum in which allies could offer their experience and expertise to partner countries on security and related issues.

In its first year, NACC developed a solid basis of cooperation and dialogue. The first NACC ministerial, held on December 20, 1991, in Brussels, brought together representatives of the 16 NATO allies, the Baltic states, the U.S.S.R., Poland, Czechoslovakia, Hungary, Bulgaria, and Romania. Participants pledged to uphold CSCE principles, support arms control efforts, and work together in building a Europe whole and free.

The second NACC ministerial held on March 10, 1992, in Brussels, admitted all the states of the former Soviet Union except Georgia (which joined the following month). Ministers adopted the first NACC work plan, which spelled out a program of intensified consultations and cooperative activities focused on security and related issues, including political, military, economic, scientific, and environmental subjects. Specific topics for cooperation included defense planning, conceptual approaches to arms control, democratic concepts of civilian-military relations, civil-military coordination of air- traffic management, defense conversion, and enhanced participation in NATO's "Third Dimension" scientific and environmental programs. Ministers also pledged to cooperate in disseminating information about NATO in the partner countries and gave their support to the NACC's ad hoc High Level Group charged with facilitating entry-into-force of the Conventional Armed Forces in Europe (CFE) Treaty.

Georgia and Albania joined in June 1992 and the Czech-Slovak split in January 1993 created two new members. Finland, Slovenia, and Sweden attended ministerial meetings as observers.

A major step forward in NACC cooperation came at the December 1992 ministerial in Brussels. Ministers adopted a work plan for 1993 that included for the first time a provision for joint planning and training for peace-keeping Subsequently, the NACC established an Ad Hoc Group on Cooperation in Peace-keeping to coordinate activities in this area The NACC welcomed the participation in Ad Hoc Group deliberations of three non-NACC states with extensive peace-keeping experience—Finland, Sweden, and Austria A representative from the OSCE also attends.

Building on the momentum of cooperation created by the NACC, NATO established in January 1994 a program within the framework of NACC called the Partnership for Peace (PFP). PFP activities complement other activities undertaken in the framework of the NACC and are designed to intensify political and military cooperation between the Alliance and members of the Partnership. The PFP is open to states participating in NACC and other OSCE states able and willing to contribute to the Partnership.

At their meeting in Brussels in December 1994, ministers reviewed progress on implementing PFP and held extensive consultations on regional issues. At the Noordwijk NAC in May 1995, the Secretary of State presented U.S. initiatives to "intensify the relationship between NATO and its partners," including on ensuring democratic and civilian control of the military, widening the Partnership's focus, and working more closely together on exercise planning.

The 1996 work plan, adopted by ministers at the December 6, 1995, NACC Ministerial in Brussels, continues and expanded NACC/PFP work on peace-keeping and other topics.

The NACC established itself as an important element in post-Cold War Europe's security architecture. The NACC was succeeded by the Euro-Atlantic Partnership Council (EAPC) in 1997. The EAPC is a multilateral forum created to improve relations between NATO and non-NATO countries in Europe and those parts of Asia on the European periphery. The 49 member states meet to cooperate and consult on a range of political and security issues. The EAPC works alongside the Partnership for Peace. In addition to the 26 members of NATO, there are 23 partner countries that participate in discussions. They are: Austria, Finland, Ireland, Sweden, and Switzerland in Europe; 12 former Soviet republics-Armenia, Azerbaijan, Belarus, Georgia, Kazakhstan, Kyrgyzstan, Moldova, Russia, Tajikistan, Turkmenistan, Ukraine, and Uzbekistan; and Albania, Bosnia and Herzegovina, Croatia, The Former Yugoslav Republic of Macedonia, Montenegro, and Serbia in the Balkans.

NATO ADAPTATION/ ENLARGEMENT

Bulgaria, Estonia, Latvia, Lithuania, Romania, Slovakia, and Slovenia joined NATO on March 29, 2004 in Washington, DC. Secretary of State Colin Powell accepted ratification documents known as instruments of accession from the prime ministers of the seven nations, making their countries formally eligible to join the 55-year-old alliance. The United States is the depositary nation for the North Atlantic Treaty, which means that new members must submit their accession documents to a U.S. official.

Significance

The event marked an important step forward toward President Bush's goal

of a Europe "whole, free, and at peace." With the addition of the seven nations, nearly 40% of NATO's membership is comprised of former communist countries.

Invitation to Membership

In November 2002, at the Prague Summit, NATO leaders invited the seven nations to join the Alliance. The nations then were required to demonstrate that they could take on the new responsibilities and commitments of NATO membership. In May 2003, the U.S. Senate passed a resolution ratifying the NATO invitation and by February 2004, all 19 NATO allies had ratified similar resolutions.

Qualifying for Membership

The seven countries committed themselves to the shared values of freedom and democracy that are the foundation of the Alliance. The seven countries pursued rigorous political, economic and defense reforms. They already have contributed to NATO operations in Bosnia, Kosovo, and Afghanistan.

The U.S. and its NATO Allies decided at the Prague Summit that the invitees were ready to join based on their individual accomplishments under NATO's Membership Action Plan (MAP) and their contributions to the Global War on Terrorism. The MAP was created in April 1999 to help candidate countries to prepare themselves for membership in the Alliance. Under MAP, aspirants adopt an Annual National Program (ANP) that sets objectives and specific benchmarks for reform that will strengthen their country's candidacy. The ANP reforms encompass a broad range of issues, including anti-corruption measures, protections for classified information, and establishment of coherent National Military Strategies. Aspirants receive practical and technical support from NATO, which regularly assesses their progress.

The total cost for the last enlargement is estimated at $1.5 billion over ten years; of this, the U.S. share is $400 million. The present round of enlargement is expected to carry similar costs, with greater benefits, as the previous round in 1999. That round of enlargement reduced the U.S. share of NATO's budget and the costs of its Balkan operations.

Through their strong and unwavering support for the anti-terrorism coalition and assistance in bringing stability to Bosnia and Kosovo, current aspirants have already shown that they can make positive contributions to NATO operations. They have clearly demonstrated their willingness and ability to participate in the work of the Alliance. The three newest allies have sent troops to the Balkans, Afghanistan, and other peacekeeping operations. They have also made excellent progress in building their capabilities and thus their contribution to common defense. NATO is committed to an open door policy: any European democracy that is willing and able to contribute to security in the Euro-Atlantic area can become a member of the Alliance. Enlargement is not a new phenomenon but an ongoing process, as illustrated by previous successful rounds of enlargement: Turkey and Greece in 1952, Germany in 1955, Spain in 1982, and the Czech Republic, Hungary, and Poland in 1999. Those countries not selected will continue to participate in MAP and work towards future membership.

Adding to NATO's Security Capabilities

- Bulgaria: engineers and minesweepers;
- Romania: unmanned aerial vehicles and mountain troops;
- Slovakia: nuclear, biological and chemical defense units;
- Slovenia: mountain warfare troops;
- Estonia: military divers and mine countermeasures;
- Latvia: explosive ordnance disposal;
- Lithuania, Bulgaria, Latvia, Slovakia, and Slovenia will provide special operations forces.

At the NATO Summit in 2008, leaders considered the invitations for three Balkan nations-Croatia, Albania, and Macedonia-to join the Atlantic Alliance. The United States has taken a clear position that NATO should welcome these countries into the Membership Action Plan, and NATO membership must remain open to all of Europe's democracies that seek it. NATO must make clear that it welcomes the aspirations of Georgia and Ukraine for membership in NATO and offers them a clear path forward toward that goal.

NATO PARTNERSHIP FOR PEACE

A U.S. initiative, Partnership for Peace (PFP) was launched by the January 1994 NATO summit to establish strong links between NATO, its new democratic partners in the former Soviet bloc, and some of Europe's traditionally neutral countries to enhance European security.

It provides a framework for enhanced political and military cooperation for joint multilateral activities, such as humanitarian assistance, peacekeeping, and crisis management and enables Partners to improve their interoperability with NATO. It enables PFP members to consult with NATO when faced with a direct threat to its security but does not extend NATO security guarantees. Participation in PFP does not guarantee entry into NATO, but it is the best preparation for states interested in becoming NATO members.

PFP's utility has been demonstrated by the success of the NATO peacekeeping operations in Bosnia (IFOR and SFOR), in which 13 PFP Partners have worked side by side with NATO Allies. There are 33 member countries: Albania, Armenia, Austria, Azerbaijan, Belarus, Bosnia and Herzegovina, Bulgaria, Croatia, Czech Republic, Estonia, Finland, The Former Yugoslav Republic of

Macedonia, Georgia, Hungary, Ireland, Kazakhstan, Kyrgyzstan, Latvia, Lithuania, Moldova, MOntenegro, Poland, Romania, Russia, Serbia, Slovakia, Slovenia, Sweden, Switzerland, Tajikistan, Turkmenistan, Ukraine, and Uzbekistan. Once a country has joined the PFP, it submits a Presentation Document to NATO explaining what resources it will contribute to PFP activities and the steps that it will take to meet PFP political goals, such as democratic control of the military. A unique Individual Partnership Program (IPP), is then agreed to with the alliance. IPPs set forth shared objectives, (for instance, establishing democratic control over military forces; developing transparency in defense planning and budgetary processes; developing interoperability with NATO forces) and list activities planned to meet those objectives.

Partners can assign personnel on a full-time basis to NATO Headquarters in Brussels and to the Partnership Coordination Cell (PCC) at Supreme Headquarters Allied Powers Europe (SHAPE) in Mons, Belgium. Legislation which would enable Partners to accredit ambassadors to NATO is pending in Brussels. Partners may participate in an optional Defense Planning and Review Process (PARP) designed to evaluate and enhance a partner nation's interoperability with NATO. Participating states work with NATO to develop interoperability objectives, which can be used to help refine IPPs.

CONVENTIONAL ARMED FORCES IN EUROPE (CFE) TREATY

The Treaty on Conventional Armed Forces in Europe (or CFE Treaty), signed in Paris on November 19, 1990, by the 22 members of NATO and the former Warsaw Pact, is a landmark arms control agreement that established parity in major conventional forces/armaments between East and West from the Atlantic to the Urals. It provides an unprecedented basis for lasting European security and stability. The original CFE Treaty (which is of unlimited duration) entered into force in 1992. Following the demise of the Warsaw Pact and the enlargement of NATO in the 1990s, the then 30 CFE States Parties signed the Adaptation Agreement at the Istanbul OSCE Summit on 19 November 1999, to amend the CFE Treaty to take account of the evolving European geo-strategic environment.

The CFE Treaty covers the entire land territory of the States Parties in Europe from the Atlantic Ocean to the Ural Mountains (ATTU). It thus excludes much of the territory of Russia and all the territory of the U.S. and Canada—all signatories of the original and Adapted Treaty. The conventional forces of all three countries that are stationed in Europe are subject to CFE limits. The 30 CFE States Parties are: Armenia, Azerbaijan, Belarus, Belgium, Bulgaria, Canada, Czech Republic, Denmark, France, Georgia, Germany, Greece, Hungary, Iceland, Italy, Kazakhstan, Luxembourg, Moldova, Netherlands, Norway, Poland, Portugal, Romania, Russia, Slovak Republic, Spain, Turkey, Ukraine, United Kingdom, and United States. However, on JUly 14, 2007, Russia notified the other CFE signatories of its intended suspension of the treaty.

The original CFE Treaty set equal limits for East and West in the ATTU on key conventional armaments essential for conducting surprise attacks or initiating large-scale offensive operations. Those armaments/equipment include: battle tanks, armored combat vehicles, and artillery pieces, as well as combat aircraft (except for naval air) and attack helicopters. In addition to limitations on the number of armaments in each category, the Treaty also provides for central zonal limits to prevent destabilizing force concentrations in Europe and for regional ("flank") limits, which were modified by the Flank Agreement of May 1996. Whereas the original CFE Treaty established an East-West group structure for limiting NATO and Warsaw Pact conventional armaments, the Adapted Treaty provides for a system of national and territorial ceilings (the former limits the number of armaments each state may possess, while the latter limits the total number of Treaty-limited equipment present within a State Party's borders); an accession mechanism for new States Parties; enhanced verification and transparency regimes; and honoring current Treaty commitments pending entry into force of the Adapted Treaty. The Adapted Treaty will facilitate NATO enlargement and reinforce the territorial sovereignty of individual States Parties. The principal accomplishment of the CFE Treaty has been the large-scale reduction or destruction of conventional military equipment in the ATTU during the first 5 years the Treaty was in effect. By the end of the Treaty's reduction period in 1995, when equipment limits took effect, the 30 States Parties completed and verified by inspection the destruction or conversion of over 52,000 battle tanks, armored combat vehicles, artillery pieces, combat aircraft and attack helicopters. In addition, they have conducted/accepted over 4000 intrusive on-site inspections of military units/installations, and of specified areas.

ADRIATIC CHARTER

Secretary of State Colin Powell, together with his colleagues, Foreign Ministers Meta, Picula and Mitreva, signed the Adriatic Charter in Tirana, Albania, May 2, 2003. The Adriatic Charter, an initiative in the spirit of the 1998 U.S.-Baltic Charter, was proposed jointly by the Presidents of Albania, Croatia, and Macedonia to President Bush at the NATO Prague Summit in November 2002. President Bush welcomed the Adriatic initiative as a strong contribution toward his vision of a Europe whole, free, and at peace.

The Charter builds on the achievements of the NATO Prague Summit by reinforcing continued U.S. support for the Alliance's "Open Door," underscoring the goal of Albania's,

Croatia's, and Macedonia's eventual full integration into NATO and other Euro-Atlantic institutions.

The Charter:

- Underlines Albania's, Croatia's, and Macedonia's dedication to strengthening their individual and cooperative efforts to intensify domestic reforms that enhance the security, prosperity and stability of the region.

- Highlights the tremendous accomplishments of Albania, Croatia, and Macedonia on the path of Euro-Atlantic integration, outlines areas of continuing focus, and reiterates the intention of the United States to continue assisting the countries in implementing necessary reforms. Notes also that each aspirant country will be judged individually on its progress toward meeting standards for membership in Euro-Atlantic bodies.

- Reaffirms the parties' shared political commitment to strengthen democratic institutions, civil society, rule of law, market economies, and NATO-compatible militaries; to fight corruption and crime; and to protect human rights and civil liberties for all individuals in Albania, Croatia, Macedonia and the other countries of southeast Europe.

- Promotes the stability and Euro-Atlantic integration of all the countries of southeast Europe by bolstering political, defense, and economic cooperation among the partners and between them and their neighbors.

At the NATO Summit in Bucharest in April 2008, NATO Allies agreed that all three countries met NATO membership criteria. Albania and Croatia received invitations to begin the accession process to join NATO. Macedonia will be extended an invitation as soon as a mutually acceptable resolution to its name issue is found. The Adriatic Charter Partners decided in September 2008 to invite Bosnia and Herzegovina and Montenegro to join the Charter. Bosnia and Herzegovina and Montenegro, in an exchange of notes, have since affirmed and adhered to the principles outlined in the Adriatic Charter. On December 4, all six Partners signed an addendum to the Charter to officially welcome Bosnia and Herzegovina and Montenegro.

SPECIAL ISSUES

As of November 2008, the following were listed as special issues by the US Mission to NATO. More information on these and other topics concerning U.S. policy and cooperation with NATO may be found at http://nato.usmission.gov.

Afghanistan

Afghanistan is NATO's highest political and operational priority. With its expansion into eastern Afghanistan in October 2006, NATO's International Security Assistance Force (ISAF) is now responsible for providing security assistance throughout Afghanistan. ISAF's primary role is to support the Government of Afghanistan (GOA) in providing and maintaining a secure environment in order to facilitate reconstruction and development.

ISAF currently has more than 37,000 soldiers from 39 nations, working closely with Afghan National Security Forces. Of the approximately 20,000 U.S. troops in Afghanistan, approximately 16,000 are under ISAF command, mainly in Regional Command East, making the U.S. the largest single contributor to ISAF.

ISAF's 25 Provincial Reconstruction Teams (PRTs) are assisting Afghan provincial and local authorities in reconstruction, governance, and security efforts. There are 5 PRTs in the North (Kunduz, Meymana, Pol-e Khomri, Mazar-e-Sharif and Feyzabad); 4 in the West (Herat, Farah, Qala-e-Naw and Chaghcharan); 4 in the South (Kandahar, Lashkar Gah, Tarin Kowt and Qalat) and 12 in the East (Bagram, Bamyan, Sharan, Ghazni, Gardez, Asadabad, Jalalabad, Panjshir, Mitharlam, Kowst Nurestan, and Wardak). The U.S. currently leads 12 PRTs under ISAF: 10 in the East, 1 in the West and a joint PRT with Romania in the South.

Securing and reconstructing Afghanistan is a long-term endeavor that will require sustained investment. NATO is working in partnership with the Government of Afghanistan, and closely with the UN, EU, and other international organizations for Afghanistan's long-term development and stability.

Kosovo

More than 7 years after Operation Allied Force ended the Milosevic regime's policy of ethnic cleansing, NATO remains firmly engaged in Kosovo. The NATO-led Kosovo Force (KFOR) is the Alliance's largest military mission in the Balkans and second largest overall behind Afghanistan, with over 16,000 troops from more than 25 countries participating. In addition to providing security in Kosovo, KFOR supports the UN in policing and other civilian functions that are focused on rebuilding a civil society. NATO will continue to conduct prudent military planning in order to ensure KFOR's ability to respond to any future contingency as well as seek to optimize the Alliance's footprint in Kosovo as needed. In February 2008, UN Special Envoy Ahtisaari presented a Comprehensive Proposal for a Kosovo Status Settlement that, if approved as part of a new U.N. Security Council Resolution, calls on NATO to remain as the international military presence that would work closely with major international partners, including the European Union. The proposal also calls on NATO to take on the additional mission to supervise the establishment of a small, lightly armed security force and appropriate civilian oversight. NATO will continue to participate as part of the Contact Group Plus and will remain committed to maintaining peace and stability in post-status Kosovo.

Western Balkans

NATO remains committed to promoting a peaceful and stable environment in the Balkans and maintains three regional headquarters in Bosnia and Herzegovina (NATO HQ Sarajevo); Macedonia (NATO HQ Skopje); and Albania (NATO HQ Tirana) that are charged with assisting the defense reform efforts of those respective countries. NATO also has a military liaison office in Belgrade, Serbia that is designed to foster closer cooperation between NATO and the Serbian Ministry of Defense. In 2006, Bosnia and Herzegovina, Montenegro, and Serbia joined NATO's Partnership for Peace following the Riga Summit. NATO remains committed to providing financial assistance to the Balkans through the NATO SouthEast Europe Trust Fund Initiative which assists the transition of redundant military personnel to civilian life.

Darfur

NATO is supporting to the African Union Mission in Sudan (AMIS), by providing strategic airlift, and training in command and control and operational planning.

Early in 2005, the African Union (AU) began significantly expanding its peacekeeping mission in Darfur in an attempt to halt the continuing violence in the region. On April 26, 2005, the African Union asked NATO to consider the possibility of providing logistical support to its operation in Darfur.

Less than one month later, NATO's North Atlantic Council agreed on initial military options for possible NATO support to the African Union Mission in Sudan (AMIS), leading to the provision of strategic airlift; training in command and control and operational planning; assistance for the AU with "lessons learned" from AMIS, and improvement of the AU mission's ability to use information in Darfur.

The first airlift flights began on July 1, 2005. By June 2007, NATO had airlifted more than 24,000 African Union peacekeepers into Darfur, as well as over 500 civilian police, significantly boosting the force on the ground,. NATO has also trained several hundred AU officers in strategic-level planning and operational procedures, and provided support to a UN-led map exercise.

The May 5, 2006 Darfur Peace Agreement raised hopes for a transition to peace in this conflict-ravaged region of Sudan. Following consultations between NATO and the AU, AU Commission Chairperson Alpha Oumar Konare on June 2, 2006 sent a letter to Secretary General de Hoop Scheffer requesting additional assistance for AMIS including: certification of the troops that are earmarked for the mission; and supporting the AU in setting up a Joint Operations Center for AMIS.

NATO is considering possible support to proposed AU/UN "hybrid" mission in Darfur, which is planned to include more than 20,000 troops.

Somalia

On 7 June 2007, NATO agreed, in principle, to respond positively to the 22 May 2007 request of the African Union Commission, to provide strategic airlift for AU states who are willing to deploy in Somalia under the AU Mission in Somalia (AMISOM). The assistance will be similar to the airlift NATO provided to the AU for its peacekeeping mission in Darfur.

Iraq

At the 2004 Istanbul Summit, NATO Heads of State and Government agreed to assist Iraq with the training of its security forces. In response to a request by the Iraqi Government, NATO has established a Training Mission in Iraq and is running a training centre for senior security and defense officials on the outskirts of Baghdad.

The aim of the Training Mission and the Joint Staff College at Ar-Rustamiyah is to help Iraq build the capability of its Government to address the security needs of the Iraqi people. NATO is training and mentoring middle and senior level personnel from the Iraqi security forces in Iraq and outside of Iraq, at NATO schools and training centers. The Alliance also plays a role in coordinating offers of equipment and training from individual NATO and partner countries.

To date, approximately 2,500 mid- and senior-level officers have been trained under the auspices of NATO's Training Mission in Iraq and in NATO facilities in Europe. In addition to the training center, NATO members have contributed to equipping the Iraqi army. With the donation in November 2005 of seventy-seven tanks and four tank-recovery vehicles, the total of NATO donations to the Iraqi Armed Forces in 2005 was 100 million euros.

Russia

The establishment of the NATO-Russia Council at the Rome Summit on 28 May 2002 opened a new chapter in NATO-Russia relations. The Council brings together the 26 NATO Allies and Russia as equal partners in areas of common interest to identify and pursue opportunities for joint action in 9 priority areas. These are: combating terrorism, crisis management, non-proliferation, arms control, theater missile defense, search and rescue at sea, mil-mil cooperation and defense reform, civil emergency planning, and new threats and challenges.

Chaired by NATO's Secretary General, meetings of the NATO-Russia Council are held at least monthly at the level of ambassadors and military representatives; twice yearly at the level of foreign and defense ministers and chiefs of staff; and occasionally at summit level. There are currently some 21 subgroups meeting regularly at working level.

NRC accomplishments to date include implementation of an Action Plan on terrorism; two civil emergency planning exercises in Russia; work on developing a joint theater missile defense capability; ongoing development of capabilities to share military and civilian air pictures; reciprocal nuclear security exercises in Russia, the UK, and (shortly) U.S.;

enhanced capabilities on mutual search and rescue at sea; regular political dialogue as well as exchanges of views on defense and security issues; and robust military-to-military cooperation, including three field training exercises to be held in 2006 and Russian naval participation in NATO's maritime interdiction effort Operation Active Endeavor.

The U.S. seeks to deepen this relationship by increasing the interoperability of our military forces and civilian personnel in order to more effectively face the common tasks ahead. We hope that Russia joins us in seeking to make the NRC a success and ensuring that NRC cooperation results in tangible progress in areas where our interests coincide.

Ukraine

The world's skies were made a little safer when the controlled destruction of 1000 Ukrainian man-portable air defense systems (MANPADS) was completed on September 20, 2006 in northeast Ukraine, outside the city of Shostka. These weapons, deemed by Ukraine to be excess to its defense needs, were but the first installment in a 12-year weapons and munitions destruction project being undertaken by Ukraine and NATO in a NATO-Partnership for Peace Trust Fund initiative—the largest such multilateral destruction project of its kind.

The United States is the lead sponsor of the first three-year phase of this project to which it already has contributed over $3.64 million. 12 other countries and the European Union have pledged over 5.6 million (approximately $7.2 million). Ukraine is providing most of the operational funding and in-kind support. A total of approximately $27 million will be required from donors to complete the project. Additional contributions, including those from non-NATO members, will be welcomed.

In addition to the MANPADS that were destroyed, 15,000 tons of stockpiled excess and unstable munitions, including ammunition for automatic weapons, artillery shells, and mortar rounds, and 400,000 small arms and light weapons, are scheduled to be destroyed during the first phase. By the end of the twelve-year project, a total of 1.5 million small arms and light weapons, and 133,000 tons of munitions will have been safely destroyed.

The impetus for this extraordinary project is twofold. First, Ukraine has suffered several major explosions of unstable ordnance in some of its munitions depots. Controlled destruction of the remaining dangerous ordnance will reduce the public safety threat and health risk to Ukrainians who live near such depots. Second, the destruction of weapons and munitions that are no longer needed by Ukraine to defend itself will ensure that they are never obtained by illicit arms traffickers, criminals, or terrorists.

OAS

Last Updated: November 2008

Official Name:

Organization of American States

Editor's Note: The information for this article is reprinted from *the OAS Fact Sheet 2005* available through the Bureau of Western Hemisphere Affairs of the U.S. Department of State. Additional information available in 2008 has been added by the editor where applicable.

PROFILE

Established: April 14, 1890, as the International Union of American Republics. Became the Pan American Union in 1910, then the Organization of American States in 1948 with the adoption of the OAS Charter in Bogotá, Colombia.

Purposes: To strengthen peace and security in the hemisphere; promote representative democracy; ensure the peaceful settlement of disputes among members; provide for common action in the event of aggression; and promote economic, social, and cultural development.

Members: 35-Antigua and Barbuda, Argentina, the Bahamas, Barbados, Belize, Bolivia, Brazil, Canada, Chile, Colombia, Costa Rica, Cuba, Dominica, Dominican Republic, Ecuador, El Salvador, Grenada, Guatemala, Guyana, Haiti, Honduras, Jamaica, Mexico, Nicaragua, Panama, Paraguay, Peru, Saint Kitts and Nevis, Saint Lucia, Saint Vincent and the Grenadines, Suriname, Trinidad and Tobago, the United States, Uruguay, and Venezuela.

Cuba is a member, although its present government has been excluded from participation since 1962 for incompatibility with the principles of the inter-American system.

Permanent observers: 60-Algeria, Angola, Armenia, Austria, Azerbaijan, Belgium, Bosnia and Herzegovina, Bulgaria, China, Croatia, Cyprus, Czech Republic, Denmark, Egypt, Equatorial Guinea, Estonia, European Union, Finland, France, Georgia, Germany, Ghana, Greece, the Holy See, Hungary, India, Ireland, Israel, Italy, Japan, Kazakhstan, Korea, Latvia, Lebanon, Luxembourg, Morocco, Netherlands, Nigeria, Norway, Pakistan, Philippines, Poland, Portugal, Qatar, Romania, Russia, Saudi Arabia, Serbia, Slovakia, Slovenia, Spain, Sri Lanka, Sweden, Switzerland, Thailand, Tunisia, Turkey, Ukraine, the United Kingdom, and Yemen.

Languages: (official) English, French, Portuguese, and Spanish.

Principal organs: General Assembly, Meeting of Consultation of Foreign Ministers, Permanent Council, Inter-American Council for Integral Development (CIDI), Inter-American Commission on Human Rights (IACHR), and the General Secretariat.

Specialized organizations: Inter-American Commission of Women (CIM), Inter-American Children's Institute (IIN), Inter-American Indian Institute (IAII), Pan American Institute of Geography and History (PAIGH), Inter-American Institute for Cooperation on Agriculture (IICA), and the Pan American Health Organization (PAHO).

Other entities: Inter-American Agency for Cooperation and Development (IACD), Inter-American Court of Human Rights, Inter-American Drug Abuse Control Commission (CICAD), Justice Studies Center, Inter-American Juridical Committee (IAJC), Inter-American Committee Against Terrorism (CICTE), Inter-American Defense Board (IADB), Inter-American Defense College (IADC), Inter-American Telecommunication Commission (CITEL), Inter-American Development Bank (IDB), the Pan American Development Foundation (PADF).

HISTORY

The Organization of American States, the oldest regional international organization in the world, traces its origins to the Congress of Panama, convoked by Simon Bolivar in 1826 and attended by representatives from Central and South America. That congress drafted the Treaty of Perpetual Union, League and Confederation, signed by the delegates but ratified only by Gran Colombia (today's Colombia, Ecuador, Panama, and Venezuela).

Hemispheric countries continued the discussion of an inter-American system during the rest of the 19th century. The first concrete step was taken in 1889, when the First International Conference of American States convened in Washington, DC. On April 14, 1890, delegates created the International Union of American Republics "for the prompt collection and distribution of commercial information." They also established the Commercial Bureau of the American Republics in Washington as the Union's secretariat, with the participation of 18 Western Hemisphere nations, including the United States. In 1910, the Commercial Bureau became the Pan American Union, and American philanthropist Andrew Carnegie donated $5 million to construct a permanent headquarters in Washington, DC, which is today the historic OAS building on 17th Street & Constitution Avenue, N.W.

The experience of World War II convinced hemispheric governments that unilateral action could not ensure the territorial integrity of the American nations in the event of extra-continental aggression. To meet the challenges of global conflict in the postwar world and to contain conflicts within the hemisphere, they adopted a system of collective security, the Inter-American Treaty of Reciprocal Assistance (Rio Treaty) signed in 1947 in Rio de Janeiro.

The OAS Charter was adopted at the Ninth International Conference of American States in Bogotá, Colombia in 1948. It reaffirmed the fundamental rights and duties of states, proclaimed the goals of the new organization, and established its organs and agencies. That conference also approved the American Treaty on Pacific Settlement (Pact of Bogotá) and the American Declaration of the Rights and Duties of Man. The OAS Charter proclaims the organization to be a regional agency within the UN system.

The basic objectives of the OAS, as laid out in its Charter, are to strengthen peace and security; promote the effective exercise of representative democracy; ensure the peaceful settlement of disputes among members; provide for common action in the event of aggression; seek solutions to political, juridical, and economic problems that may arise; promote, by cooperative action, economic, social, educational, scientific, and cultural development; and limit conventional weapons so as to devote greater resources to economic and social development.

Concern over slow economic development led the United States and 19 other OAS members to establish the Inter-American Development Bank in 1959. This reflected concern that the World Bank, which included Latin American countries in its list of eligible borrowers, was preoccupied with infrastructure and not sufficiently attuned to the need for "social" lending as well as industrial and agricultural aid. In 1960, the OAS adopted the Act of Bogotá, which called for a hemisphere-wide commitment to economic and social development. This set the stage for OAS support for the Alliance for Progress.

The 1948 OAS Charter has been amended four times: by the 1967 Protocol of Buenos Aires, which went into effect in February 1970; by the 1985 Protocol of Cartagena, which took effect in November 1988; by the 1993 Protocol of Managua, which took effect in March 1996; and by the 1992 Protocol of Washington, which took effect in September 1997.

The Buenos Aires Protocol created the annual General Assembly and gave equal status to the Permanent Council; the Economic and Social Council; and the Council for Education, Science, and Culture. The Cartagena Amendments strengthened the role of the Secretary General; provided procedures to facilitate peaceful settlement of disputes; removed obstacles, involving border disputes, to the entry of Belize and Guyana; and called for strengthening economic and social development by taking measures to increase trade, enhance international financial cooperation, diversify exports, and promote export opportunities.

The Managua Protocol created the Inter-American Council for Integral Development (CIDI) to replace the Economic and Social Council and the Council for Education, Science, and Culture. The key objectives of CIDI are to serve as a forum for technical policy-level discussions on matters related to development, to be a catalyst and promoter of development activities in response to mandates from the Summits of the Americas, and to strengthen a hemispheric partnership among OAS countries to promote cooperation for development and to help eliminate extreme poverty in the hemisphere.

Ratification of the Washington Protocol made the OAS the first regional political organization to permit suspension of a member whose democratically constituted government is overthrown by force. This protocol also amended the OAS Charter to include the eradication of extreme poverty as one of the organization's essential purposes.

The OAS helps preserve democracy by mobilizing the hemisphere in the face of threats to democratic rule. It acted under the mandate of General Assembly Resolution 1080 (1991) to support democracy in Haiti, Peru, Guatemala, and Paraguay. It also provides development and other assistance designed to strengthen democratic institutions, observe elections, promote human rights, increase trade, fight drugs, and protect the environment.

On September 11, 2001, the OAS adopted the Inter-American Democratic Charter, designed to strengthen and preserve representative democracy in the hemisphere. The Democratic Charter prescribes steps to be taken in the event of an unconstitutional interruption of the democratic order or the unconstitutional alteration of the constitutional regime that seriously impairs the democratic order of a member state.

The OAS was the first international organization to condemn the September 11, 2001, attacks on the United States. In 2001-02, as a hemispheric response against terrorism, OAS

members successfully negotiated the Inter-American Convention Against Terrorism (CICTE), which was opened for signature at the June 2002 OAS General Assembly. It entered into force on July 9, 2003, and provides for increased law enforcement cooperation against terrorism.

In recent years, OAS member states have successfully negotiated major international agreements to curb hemispheric arms trafficking, provide for transparency in conventional weapons acquisition, combat corruption, fight narcotics and money laundering, and define fair telecommunications standards. OAS contributions in the fields of international law, juridical cooperation, and facilitation of regional trade have been substantial and have provided the basis for effective observance of a host of regional treaties concluded since 1889. Information on treaties, conventions, and other inter-American legal instruments is available from the Secretariat of Legal Affairs at the OAS website at http://www.oas.org.

The OAS is implementing important portions of the Action Plans from the Summits of the Americas held in Miami (1994); Santiago, Chile (1998); Quebec City, Canada (2001); and Mar del Plata, Argentina (2005), as well as a Special Summit in Monterrey, Mexico (2004). The Santiago Summit assigned the OAS Secretariat responsibility for maintaining records and serving as the institutional memory of the summit process. The Mar del Plata summit focused on the theme of "Creating Jobs to Fight Poverty and Strengthen Democratic Governance." The OAS Secretariat's website is http://www.summit-americas.org.

STRENGTHENING DEMOCRACY

The United States is committed to strengthening and working with the OAS, the premier multilateral forum for dealing with political issues in the Western Hemisphere. This reflects the U.S. Government's determination to promote a program of "relevant multilateralism" that engages multilateral diplomacy to resolve regional problems that threaten the democratic and economic security of the peoples of the Americas, and to reinforce our bilateral and multilateral relationships with our hemispheric neighbors and between our shared hemispheric agenda and the rest of the world.

The promotion of peace, democracy, and good governance are core OAS concerns. The OAS adopted the flagship Inter-American Democratic Charter on September 11, 2001, in the shadow of the terrorist attacks against the United States.

Article 1 states: "The peoples of the Americas have a right to democracy and their governments have an obligation to promote and defend it."

The Democratic Charter defines the essential elements of representative democracy in very specific terms, including: respect for human rights and fundamental freedoms; holding free and fair elections; a pluralistic system of political parties and organizations; separation of powers; independence of the branches of government; freedom of expression and of the press; and constitutional subordination of all state institutions to the legally constituted civilian authority.

In the event that one of the OAS members should fail to uphold the essential elements of democratic life, the Democratic Charter allows a member state or the Secretary General to request an immediate convocation of the Permanent Council to consider the facts, deploy diplomatic efforts, or use other political mediation. If there is a clear interruption of democratic order, or if an undemocratic alteration is not remedied, the document calls for a General Assembly that may, among other things, suspend the offending government from the inter-American system, which requires a two-thirds vote of the member states.

At the 2005 OAS General Assembly-hosted by the United States for the first time since 1974 in Fort Lauderdale, Florida under the theme "Delivering the Benefits of Democracy"-Secretary of State Condoleezza Rice stated: "The Democratic Charter must become the core of a principled, effective multilateralism for the Americas. Together, we must insist that leaders who are elected democratically have a responsibility to govern democratically."

The Declaration of Florida-and Resolutions 2154 and 2251, adopted at the 2005 and 2006 General Assemblies, respectively-mark an important multilateral commitment to advance the hemisphere's democratic agenda. Building on previous achievements of the inter-American community to address threats to democracy - Resolution 1080, the Washington Protocol and the Quebec Summit - the declaration and the accompanying resolutions empower and give the Secretary General a new mandate to develop initiatives to strengthen implementation of the Democratic Charter to proactively address threats to democracy.

In recent years, the OAS has invoked Resolution 1080, the Washington Protocol, and the Inter-American Democratic Charter on multiple occasions to support representative democracy in situations where republican government was threatened, including Haiti (1991), Peru (1992), Guatemala (1993), Paraguay (1996), and Venezuela (2002). With each new crisis, the OAS has strengthened its resolve to find peaceful, constitutional solutions to key political crises in the hemisphere.

The OAS has become the leading Election Observation organization in the hemisphere since its first 1990 mission to Nicaragua. The Organization has successfully observed presidential, legislative, regional and special elections throughout the hemisphere. Representing a multilateral organization, OAS observers are often able to establish closer relationships with and gain greater access to political and electoral institutions than other observer groups.

The OAS, in addition, has the institutional capacity to organize larger electoral missions and keep observers on the ground longer than other organizations.

In 2006, the newly formed OAS Secretariat for Political Affairs (SPA), led by former Argentine Foreign Minister Dante Caputo, wholly committed to a tripartite program of democracy promotion, good governance, and crisis prevention in the hemisphere. The SPA consists of a tripartite division into a Department for the Promotion of Democracy, Department for the Promotion of Governance, and a Department for Crisis Prevention and Special Missions.

The Secretariat for Political Affairs coordinates the OAS electoral missions, develops projects to consolidate democratic governance through cooperative work with legislatures and governments, political parties, grassroots civic development and civil society organizations. The SPA also provides advice and assistance in the modernization of electoral laws, civil and electoral registries, and civil administration. Finally, the SPA develops and manages crisis-prevention, peace-building, crisis resolution, and post-conflict recovery programs to hemispheric countries, including boundary dispute negotiation and a program for humanitarian demining in Central America and the Andean region.

Another means of strengthening democracy is the Justice Studies Center of the Americas, established by the November 1999 Special General Assembly. This center fulfills an important goal of the 1998 Santiago Summit and is the result of close consultations among Ministers of Justice, Attorneys General, and others interested in this initiative. The Center is located in Chile, and its primary task is to promote reform in the justice sector throughout the hemisphere, focusing in the first stage on criminal justice issues.

FIGHTING TERRORISM

OAS Foreign Ministers were meeting in Lima, Peru, on September 11, 2001, to adopt and sign the new Inter-American Democratic Charter. Their response to the terrorist attacks was an immediate condemnation and a focus on a united hemispheric response. They met again in Washington, DC. On September 21, 2001, to approve a resolution calling on member states to take effective measures to combat terrorism. At Brazil's initiative, the 22 signatories of the Inter-American Treaty of Reciprocal Assistance, known as the Rio Treaty, met and declared that an attack against one member is an attack against all and committed themselves to providing mutual assistance in the war against terrorism. Secretary of State Colin L. Powell told the assembled ministers: "We, the united democracies of the Western Hemisphere, join the world in the global campaign against terrorism. We have pledged to deny terrorists and their networks the ability to operate within our territories. We have resolved to hold to account all those responsible for aiding, financing, and otherwise supporting and harboring terrorists."

The Inter-American Committee Against Terrorism (CICTE), reinvigorated in the wake of the September 11 attacks, met in Washington, DC on January 28-29, 2002, where Attorney General John Ashcroft headed the U.S. delegation. Delegates approved a work plan for CICTE to coordinate steps to prevent and combat terrorism in the hemisphere.

OAS members began negotiation of the text of the Inter-American Convention Against Terrorism in November 2001, in the aftermath of the terrorist attacks of 9/11, and a text was agreed upon in March 2002. The Convention commits state parties to endeavor to become party to ten international conventions and protocols relating to terrorism (listed in the Convention), consistent with U.N. Security Council Resolution 1373. The Convention also commits state parties to take certain measures to prevent, combat, and eradicate the financing of terrorism and to deny safe haven to suspected terrorists.

The Treaty further requires that the terrorist acts covered under the specified international conventions and protocols be criminalized as predicate crimes to money laundering. The Convention provides for enhanced cooperation in a number of areas, including exchanges of information, border control measures, and law enforcement actions.

Opened for signature in June 2002, the OAS convention entered into force internationally on July 10, 2003, 30 days after the sixth signatory deposited its instrument of ratification. The Convention entered into force internationally on July 10, 2003, after six countries became party. On October 7, 2005, the U.S. Senate gave its advice and consent to the President's ratification of the Inter-American Convention against Terrorism. On November 2, 2005, President Bush signed the instrument of ratification.

The United States deposited the instrument of ratification at the Organization of American States headquarters in Washington, D.C. in a ceremony on November 15, 2005, and became party to the Convention 30 days thereafter in accordance with the Convention's terms.

The Convention is a powerful indication of this region's resolve to fight terrorism in all its forms, enhancing hemispheric security by improving regional cooperation in the fight against terrorism, denying safe haven to terrorists, and by facilitating the exchange of information, technical assistance, and training in a wide number of complex areas, including the prevention and eradication of terrorist financing, the improvement of border and customs controls, and the prevention, investigation, and prosecution of terrorist acts.

FOSTERING HEMISPHERIC SECURITY AND PROTECTING THE DEMOCRATIC STATE

In 1991, the 21st OAS General Assembly began examining security issues ranging from proliferation and arms transfers to "cooperation for hemispheric security." In 1995 the 25th General Assembly instructed the Permanent Council to establish the Committee on Hemispheric Security, which created the region's first permanent forum for the consideration of arms control, defense, nonproliferation, and security issues. The Committee on Hemispheric Security is composed of 34 member states and has a chairman and 3 vice-chairs that are elected for a 12-month period.

Since 1991, the OAS has built an impressive record of achievement in the development of confidence- and security-building measures (CSBMs). These security accomplishments include: the March 1994 Buenos Aires governmental experts' meeting on CSBMs (the first regional dialogue on CSBMs); the November 10, 1995, "Declaration of Santiago on Confidence and Security Building Measures;" the February 1998 "Declaration of San Salvador;" the "2003 Miami Declaration on Confidence and Security Building Measures," a regional roster of CSBMs Experts; the world's first Register of Antipersonnel Landmines (APL); and two path breaking conventions: the 1999 Inter-American Convention on Transparency in Conventional Weapons Acquisition, which entered into force in November 2002, and the 1998 Inter-American Convention Against the Illicit Manufacturing of and Trafficking in Firearms, Ammunition, Explosives, and Other Related Materials.

In 2002-03, OAS member states undertook a comprehensive review of the hemispheric security architecture, culminating in a Special Conference on Security that took place in Mexico in October 2003. The Declaration on Security in the Americas provides a practical guide for resolving interstate border tensions, lowering pressure for arms spending, promoting democratic norms, and fostering a climate of confidence, trust, transparency, and cooperation in our Hemisphere. In addition, the OAS has been active in preventive diplomacy. The OAS, with technical support from PAIGH, has provided cartographers, facilitators, conciliators, offered its good offices, and brokered agreements to resolve disputes between Belize and Guatemala, Honduras and Nicaragua, Costa Rica and Nicaragua, and El Salvador and Honduras.

The OAS has been involved in many conflict resolution and national reconciliation activities, such as disarmament and demobilization in Colombia.

HUMAN RIGHTS: THE INTER-AMERICAN COMMISSION

Located in Washington, DC, the Inter-American Commission on Human Rights (IACHR) is distinguished from other multilateral organizations' human rights entities by its political autonomy. Its seven commission members are elected in their own right, not as representatives of governments. IACHR autonomy is further enhanced by its prerogative to initiate human rights investigations without the approval of the Secretary General or the Permanent Council. In response to a Santiago Summit initiative, in 1998 the IACHR established a Special Rapporteur for Freedom of Expression, with a mandate to support and promote freedom of the press.

Human rights in the inter-American system are based on the 1948 American Declaration of the Rights and Duties of Man and the 1969 American Convention on Human Rights. The United States signed the American Convention on Human Rights in 1977, but has not yet ratified it.

The IACHR and Inter-American Court of Human Rights-located in San Jose, Costa Rica-give the OAS an active and, at times, forceful role in promoting and protecting human rights. Through private persuasion and published reports on human rights infringements, the IACHR has been instrumental in improving OAS members' human rights practices and has helped to resolve conflicts. The IACHR's annual report has chapters on human rights problems in general, details regarding individual cases, and country status reports. The IACHR also publishes special reports, which have been effective in challenging abuses in specific countries. From 1990-94, special on-site reports on Haiti kept the international spotlight focused on the dire human rights situation there and were praised by local and international organizations. The IACHR played a key role in the 1989 release of almost 2,000 political prisoners held by the Sandinista regime in Nicaragua.

FIGHTING CORRUPTION

The 1994 Miami Summit of the Americas plan of action charged the OAS with finding a hemispheric approach to fight corruption. The Inter-American Convention Against Corruption, negotiated under OAS auspices during 1995-96, is the world's first comprehensive multilateral anticorruption agreement. The Convention entered into force on March 6, 1997, when Paraguay and Bolivia became the first countries to deposit their instruments of ratification. A total of 29 countries, including the United States, have now ratified or acceded to the Convention. The Convention provides for institutional development and enforcement of anticorruption measures by fostering mutual legal assistance, technical cooperation, extradition, and seizure of assets. The OAS Permanent Council's Committee on Juridical and Political Affairs has a Probity and Ethics Working Group that focuses on promoting effective implementa-

tion of the Convention. The OAS Department of International Legal Affairs (ILA) carries out activities, including workshops funded by the U.S., to assist member states in developing the preventive measures provided for in the Convention and in implementing anti-corruption activities specified in the Country Report recommendations published by the Committee of Experts to the Follow-up Mechanism of the Inter-American Convention Against Corruption (MESISIC). The first Country Reports were published on Argentina, Colombia, Nicaragua and Paraguay. In September 2006, the U.S. provided a grant to the OAS, in the amount of $1,042,750, to establish an Inter-American Anti-Corruption Fund to support OAS member states in fulfilling their commitments under the Convention. Twenty-seven OAS Member States, including the U.S., are parties to the Follow-up Mechanism.

COMBATING DRUG ABUSE AND TRAFFICKING

The OAS narcotics program was launched at the Inter-American Specialized Conference on Traffic in Narcotic Drugs in April 1986—the first Western Hemisphere meeting to deal with all aspects of the drug problem. In accordance with the program of action adopted at that meeting, the OAS General Assembly in November 1986 created the Inter-American Drug Abuse Control Commission (CICAD), which meets twice a year to direct the program and assess the drug situation in the hemisphere. Originally composed of 11 member governments, the commission has been expanded to 34 because of growing interest in the program and concern about the drug problem. The first projects were implemented in 1988. The program has identified five priority lines of action: development of domestic and international law, establishment of an inter-American drug information system, demand reduction, alternative development, and strengthening national drug commissions. CICAD's website is http://www.cicad.oas.org. In 1996, the OAS produced a counter-narcotics strategy that will guide collective actions in the 21st century, and in 1999, it established a multilateral evaluation mechanism (MEM), as mandated by the Santiago Summit of the Americas. Under the MEM, experts evaluate individual country submissions documenting efforts to combat drug abuse and trafficking; the first full round of evaluations was published in January 2003. The OAS also has produced internationally acclaimed model legislation on precursor chemicals and money laundering control.

PROMOTING SUSTAINABLE DEVELOPMENT, THE ENVIRONMENT, AND FREE TRADE

The Inter-American Council for Integral Development (CIDI) was created in 1996 when the Protocol of Managua charter amendments entered into force. CIDI replaced the Inter-American Economic and Social Council (CIES) and the Inter-American Council for Education, Science, and Culture (CIECC). CIDI is responsible for coordinating OAS development and technical cooperation activities in a partnership intended to attract financial support from donor countries, international development institutions, and other sources. CIDI's Permanent Executive Committee (CEPCIDI), the Inter-American Committee on Education, the Inter-American Committee on Culture, the Inter-American Committee on Sustainable Development (CIDS), the Inter-American Committee on Science and Technology (COMCYT), the Inter-American Committee on Ports (CIP), and other committees and ministerial-level meetings and their subgroups provide guidance and evaluation to the OAS secretariat on relevant policies, projects, and other activities. They also bring together technical and policymaking officials from the hemisphere to agree on joint priorities and initiatives. CIDI ministerials have been tasked by the Summit of the Americas with follow-up the implementation of initiatives in their specific fields.

On November 15, 1999, a Special General Assembly adopted the Statute of the Inter-American Agency for Cooperation and Development (IACD). Created as the result of a U.S. initiative, the IACD will maximize use of existing resources, improve the management and delivery of technical cooperation, and better position the OAS to attract additional external resources to finance technical cooperation. The IACD's management board, composed of nine elected member states, provides operational guidance, while policy guidance comes from CIDI in both its annual and sectoral ministerial level meetings, from CIDI's executive committee and subsidiary bodies. IACD's statutes entered into force on January 1, 2000. Members elected in 2006 to serve on the Management Board are the United States, Argentina, Bahamas, Colombia, El Salvador, Grenada, Mexico Nicaragua and St. Vincent and the Grenadines.

The Secretary General appointed Ambassador Alfonso Quiñonez to the position of Executive Secretary for Integral Development and Director General of the Inter-American Agency for Cooperation and Development and the CIDI ratified his appointment on May 22, 2006.

CIDI's Special Multilateral Fund, known by its Spanish acronym FEMCIDI, is composed of the voluntary contributions of the member states. While a member state is free to decide the level of its commitment, once a pledge is made to this fund, the country is legally obligated to pay the amount pledged, and a country is not allowed to request projects unless it has pledged by the deadline established.

The projects presented must receive a favorable evaluation (conducted by outside experts) in order to be considered for funding. Projects chosen to be

funded are those that receive the highest evaluation scores within their individual sectoral accounts. Horizontal cooperation funds (provided by Mexico, Brazil, Argentina and the U.S.) provide further assistance to lesser developed and smaller economies.

The OAS Scholarships and Training Program awards an average of 360 graduate fellowships each year. There also is a small undergraduate scholarship program, available only to students from Caribbean and Central American nations. A third program finances travel to training courses offered by member states. Although these scholarships have to date been financed by the OAS Regular Fund (assessed quota payments by member states), a Capital Fund for Scholarships and Training has been established to attract outside funding.

For 25 years, the OAS has helped member states incorporate environmental considerations into development projects. International development institutions have recognized the organization's in-house expertise and leadership role, and a number of these institutions have undertaken cooperative initiatives with the OAS or contracted the organization to serve as an executing agency for their environmental projects. The biggest boost for the OAS' environmental efforts came at the 1996 Summit of the Americas on Sustainable Development, held in Santa Cruz, Bolivia. The Santa Cruz Declaration and Plan of Action gave the OAS a strong mandate to coordinate follow-up to those decisions. At the policy level, this takes place through the Inter-American Committee on Sustainable Development (CIDS), a meeting of government officials within the framework of CIDI. At the technical level, this occurs in the Inter-Agency Task Force, a group of representatives of technical cooperation agencies such as the World Bank, Inter-American Development Bank, UN programs, and U.S. and Canadian aid and environmental agencies. The OAS Secretariat's Unit for Sustainable Development and the Environment has a website at http://www.oas.org/usde; the Unit for Science and Technology has one at http://www.redhucyt.oas.org/ocyt.

The 1999 OAS General Assembly created a committee on civil society participation to develop mechanisms to accredit representatives from civil society and non-governmental organizations in OAS activities. The committee completed a set of guidelines, which the Permanent Council approved in December 1999. The OAS has a long history of cooperation with civil society organizations, which has been enhanced by the Summit of the Americas consultative process. Non-governmental organizations have made significant contributions to the work of the IACHR, the Sustainable Development and Environment Unit, the Unit for the Promotion of Democracy, and CIDI. The new OAS civil society guidelines are designed to complement, but not modify the rules governing CIDI, its inter-American committees, and other inter-American specialized conferences and organizations. The guidelines establish an accreditation process similar to that used within the UN system.

The OAS trade unit, in cooperation with the Inter-American Development Bank (IDB) and the UN Economic Commission for Latin America and the Caribbean (ECLAC), provides technical support to the negotiating groups created by the Miami Summit process to deal with issues involved in the creation of a Free Trade Area in the Americas (FTAA). The trade unit also has sponsored training courses on trade issues for officials from Latin American and Caribbean countries, held at Georgetown University in Washington, DC. The OAS' highly regarded trade information service, known as SICE, provides trade data and information on trade agreements, investment treaties and national regulations, as well as business directories and other sources of contacts, in a data bank at http://www.sice.oas.org. SICE also manages the FTAA website at http://www.ftaa-alca.org, in addition to the FTAA's Secure Document Distribution Service.

The Inter-American Telecommunication Commission (CITEL), which has active private sector participation, provides an impartial forum for resolving issues of keen commercial interest, such as coordination of standards and radio frequency spectrum use. In response to a Santiago Summit mandate, CITEL is developing best practices guidelines for universal service and interconnection and working to reduce standards-based trade barriers. One particularly important CITEL accomplishment was the endorsement in October 1999 of the Inter-American Mutual Recognition Agreement for the Assessment of Conformity of Telecommunications Equipment, also a Santiago Summit initiative. CITEL is a semiautonomous entity that reports to the OAS General Assembly through the Permanent Council. CITEL's website is http://www.citel.oas.org.

TRAFFICKING IN PERSONS

Member states participated in the first OAS Trafficking in Persons Experts meeting in Margarita Island, Venezuela, March 14-17, 2006. The meeting yielded a number of positive recommendations and conclusions that were considered by the OAS Meeting of Ministers of Justice (REMJA VI) in April 2006 in Santo Domingo. OAS member states agreed to the importance of establishing anti-trafficking procedures and programs focusing on prevention initiatives, victim protection, prosecution of traffickers, and mechanisms for exchange of information and experiences. In an effort to ensure that discussions continue in an integrated and crosscutting approach, member states have agreed to encourage additional discussion in the Committee on Hemispheric Security. Anti-trafficking in persons programs, such as capacity building and awareness training are managed through the Department for the Prevention of Threats against Public Security's OAS coordinator. The official website is http://www.oas.org/atip.

ORGANIZATION

The General Secretariat is the permanent and central organ of the OAS, executing programs and policies decided upon by the General Assembly and the two councils. Directed by the Secretary General, it occupies a key position within the inter-American system and serves the entire organization and all member states. The Secretary General and the Assistant Secretary General are elected by the General Assembly for 5-year terms. They can be reelected once and cannot be succeeded by a person of the same nationality.

Senior secretariat officials appointed by the Secretary General include the assistant secretaries for legal affairs and management, the director general of the development agency (IACD), the executive secretaries of the commission of women (CIM) and the drug abuse control commission (CICAD), the directors of various units, including trade and promotion of democracy, and the executive director of the human rights commission. Secretariat personnel conduct the activities of all the OAS units and serve as the staff for the commissions, councils, and other bodies.

The staff of the General Secretariat is composed of personnel chosen mainly from the member states, with consideration given to geographic representation. Staff members are considered international civil servants. The OAS Secretariat also maintains a small office in many member states.

The General Assembly is the supreme organ of the OAS. It holds a regular session each year, either in one of the member states or at headquarters in Washington, DC. In special circumstances, and with the approval of two-thirds of the member states, the Permanent Council can convoke a special session of the General Assembly. Delegations are usually headed by foreign ministers. In addition to deliberating on current issues, the General Assembly approves the program-budget; sets the bases for fixing member-state quota assessments; establishes measures for coordinating the activities of the organs, agencies, and entities of the OAS; and determines the general standards that govern the operation of the General Secretariat. General Assembly decisions usually take the form of resolutions, which must be approved by a majority of all members (two-thirds for agenda, budget, and certain other questions).

A consultation meeting of foreign ministers can be called by any member state, either "to consider problems of an urgent nature and of common interest to the American States" (as stated in the OAS Charter) or to serve as an organ of consultation in cases of armed attack or other threats to international peace and security (per the Rio Treaty). In either case, the request must be directed to the Permanent Council of the OAS, which decides by absolute majority vote if the meeting is to be called. In cases between member states, the affected parties are excluded from voting. Should an armed attack take place within the territory of an American state or within the Western Hemisphere security zone defined by the Rio Treaty, a meeting of consultation is held without delay. Until the ministers of foreign affairs can assemble, the Permanent Council is empowered to act as a provisional organ of consultation and make decisions.

The Permanent Council, composed of ambassadors representing each member state, usually meets every two weeks throughout the year in Washington, DC. The council, its standing committees, and special working groups conduct the day-to-day business of the OAS, which involves implementing mandates from the General Assemblies, designing and assessing activities to promote democracy and strengthen human rights, considering requests from members, debating and approving resolutions on current issues, and dealing with reports from subsidiary organs.

In an emergency, a special session of the council can be called immediately by its chairman or at the request of any member. The chair rotates every three months, in alphabetical order. Unlike the UN Security Council, no member can exercise a veto in the Permanent Council. OAS members place great importance on obtaining consensus before decisions are made. The Permanent Council also serves provisionally as the organ of consultation (for meetings of foreign ministers) and every year acts as the preparatory committee for the General Assembly.

The Inter-American Council for Integral Development meets annually at the ministerial level; its subsidiary entities meet more frequently. CIDI also convokes ministerial-level sectoral meetings in areas such as labor, education, social development, sustainable development and culture to consider specialized issues in the priority areas of the Strategic Plan.

SPECIALIZED ORGANIZATIONS AND OTHER ENTITIES

Much important inter-American business is conducted by separate entities, some of which are independent, some fully or partially funded by the OAS, and others consisting simply of periodic hemispheric meetings which receive support from the OAS Secretariat. Subjects covered include agriculture, labor, copyrights, private international law, highways, ports and harbors, railways, telecommunications, health and sanitation, statistics, travel, child welfare, women's issues, Indian affairs, and tourism. The conferences are attended by high-level officials and technical experts to further inter-American cooperation in these fields.

The Inter-American Children's Institute (IIN), founded in 1927 and headquartered in Montevideo, Uruguay, is concerned with the problems of minors and families, including trafficking, child labor, commercial sexual exploitation, international abduction of minors by one of their parents, and war-affected children. It serves as a center for social action and programs in the fields of health,

education, social legislation, legislation on adoptions, social service, and statistics. IIN has contributed extensively to international jurisprudence in the field of family law; the most recent example of this work is model legislation on intercountry adoption. IIN's website is http://www.iin.oas.org.

The Inter-American Commission of Women (CIM), established in 1928, was the first international organization focusing on women's issues. It works to extend the civil, political, economic, social, and cultural rights of women in the hemisphere. Now concerned with women's integration into development and decision-making processes, domestic violence, trafficking in persons, and women's human rights, CIM research and seminars have focused on women and politics, women and employment, violence against women and most recently HIV/AIDS. The Inter-American Convention on the Prevention, Punishment and Eradication of Violence against Women (Convention of Belem do Para) was drafted under the auspices of the CIM. It was opened for signature at the OAS General Assembly in 1994 and has been signed by 32 OAS members. In April 2000, the CIM ministerial approved the Inter-American Program on the Promotion of Women's Human Rights and Gender Equity and Equality. CIM's website is http://www.oas.org/cim.

The Inter-American Defense Board (IADB) is an entity of the Organization of American States of the OAS. Its statutes were recently adopted during the a special session of the OAS General Assembly. Under the statutes, the Board's central role is to provide the OAS and its member states with technical, educational and consultancy services on matters related to military and defense issues in the hemisphere in order to contribute to the fulfillment of the OAS Charter.

The IADB has as one of its principal organizations the Inter-American Defense College, established in 1962. The College is the preeminent hemispheric institution dedicated to developing and providing opportunities to military officers and civilian officials from OAS member states for advanced academic courses related to military and defense issues, the inter-American system and related disciplines. Over the past decade 20% of the student enrollment has been civilians. Instruction is based on distinguished speakers from throughout the hemisphere who are experts on matters of defense in the Americas.

The Inter-American Development Bank (IDB), the first of the regional development banks, was established in 1959 to provide lending attuned to the development needs of Latin America and the Caribbean. In addition to nations of the hemisphere, 15 European nations plus Japan and Israel are now members, but only Latin American and Caribbean members are eligible borrowers. The IDB's ordinary capital window provides development funds at market-related terms, while its Fund for Special Operations offers financing at concessional terms for projects in countries classified as economically less developed. The bank's website is http://www.iadb.org.

The Inter-American Institute for Cooperation in Agriculture (IICA), founded in 1942 and headquartered in San Jose, Costa Rica, assists member states in promoting agricultural health and food safety, strengthening national agricultural institutional systems, and building trade capacity in agricultural commodities.

IICA supports efforts to increase agricultural productivity, employment opportunities in rural sectors, and rural participation in development activities. IICA also has an excellent record in preventing the spread of threatening animal and plant diseases and in helping members develop sustainable methods of food production. Policy direction comes from ministers of agriculture in each member country, who form the Inter-American Board of Agriculture (IABA). IICA's website is http://www.iica.int.

The Pan American Health Organization (PAHO), created in 1902, has served as the Western Hemisphere arm of the UN World Health Organization (WHO) since 1948. It coordinates hemispheric efforts to combat disease and promote physical and mental health. It has contributed significantly to eradicating communicable diseases and promoting improved sanitation and health conditions. PAHO's website is http://www.paho.org.

The Pan American Institute of Geography and History (PAIGH), headquartered in Mexico City, encourages the coordination, standardization, and publication of regional geographic, historical, cartographic, and geophysical studies. Member countries receive information and technical assistance for the sustainable development of their natural resources. PAIGH also assists member countries in identifying risks posed by natural disasters and has provided technical expertise to assist in mapping disputed borders between member countries.

Established in 1928, PAIGH preserves and documents historical data through research and publication. It also facilitates cooperative relationships between U.S. agencies and other countries in such vital areas as aviation safety and natural disaster mitigation. The organization is in the initial phase of developing a "global map of the Americas" which will assist in the decision making process within the countries of the hemisphere. PAIGH's website is http://www.ipgh.org.

The Inter-American Indian Institute (IAII), created by the Patzcuaro Convention in 1940 and headquartered in Mexico City, initiates, coordinates, and directs research to promote better understanding of the health, education, and economic and social problems of Indian populations. It provides a forum for government representatives to discuss approaches to address the many challenges facing indigenous communities in the Americas. The U.S. withdrew from the IAII in December 2000.

The Pan American Development Foundation (PADF) is a quasi-public international organization that, although created by the OAS in 1962, receives more than half its financial support from U.S. corporations and other private sources. Intended to serve as a social service partner for corporations operating in Latin American and the Caribbean, PADF has channeled more than $100 million into development projects that mobilize private sector support in recipient countries. It also coordinates disaster relief. The PADF qualifies for charitable donations under the U.S. Internal Revenue Code Section 501(c)(3). PADF's website is http://www.padf.org.

THE U.S. AND THE OAS

The U.S. Mission to the Organization of American States (OAS) is headed by U.S. Permanent Representative Hector E. Morales. The OAS is the premier multilateral forum in the Western Hemisphere. Its 35 members are countries from North, South, and Central America, the Caribbean, and Canada. The charter of the OAS states that its basic objectives are to:

- strengthen peace and security;
- promote the effective exercise of representative democracy;
- ensure the peaceful settlement of disputes among members;
- provide for common action in the event of aggression;
- seek solutions to political, juridical, and economic problems that may arise;
- promote, by cooperative action, economic, social, educational, scientific, and cultural development; and
- limit conventional weapons so as to devote greater resources to economic and social development.

As a member of the OAS, the United States is committed to strengthening and working with the organization. This reflects the U.S. Government's determination to make optimal use of multilateral diplomacy to resolve regional problems and to engage its neighbors on topics of hemispheric concern.

OAS and U.S. Officials

Secretary General: Jose Miguel Insulza (Chile), assumed charge May 26, 2005.

Address:
Organization of American States
17th St. and Constitution Ave., NW
Washington, DC 20006
(tel. 202-458-3000)
website: http://www.oas.org

U.S. Representative to the OAS—
Mr. Hector E. Morales

Address:
U.S. Permanent Mission to the OAS
WHA/USOAS, Rm. 5914
U.S. Department of State
Washington, DC 20520
(tel. 202-647-9376)

U.S. ACCOMPLISHMENTS AT THE SPECIAL SUMMIT OF THE AMERICAS

November 1, 2005

At the Fourth Summit of the Americas, President Bush joined the other 33 democratically elected leaders of the Western Hemisphere in addressing common 21st Century challenges. In particular, the leaders focused on:

- Creating decent job opportunities, especially for the region's poor;
- Creating conditions to achieve sustained economic growth through greater trade and development;
- Fighting poverty; and
- Strengthening democratic governance and institutions.

The President encouraged his fellow leaders to make the strategic leap from commitment to achievement, and emphasized that words must lead to tangible results. President Bush and the United States will continue to lead and work for greater prosperity, security, and opportunity for the people of this hemisphere. At the Summit the President specifically raised the following programs for the hemisphere.

Infrastructure Facility Of The Americas: President Bush made available funds to launch a new institution to assess infrastructure project proposals from private and public sponsors. The Facility will promote high-return, job-creating projects by providing assessments and advice on: (1) engineering feasibility; (2) economic feasibility; (3) financial structure; and (4) public concession tendering, legal matters, and implementation.

United States and Uruguay Sign Bilateral Investment Treaty: The agreement demonstrates U.S. commitment to create new economic opportunities together with those countries in the hemisphere that are willing to help themselves by implementing sound economic policies. The United States is Uruguay's largest trading partner, and the stock of U.S. foreign direct investment in Uruguay was $533 million in 2004.

Central American and Caribbean Fund: The U.S. Overseas Private Investment Corporation (OPIC) will invite proposals from qualified private sector fund managers to organize a Central America and Caribbean Fund that could reach $135 million. The Fund will invest predominately in companies operating in the following countries: Barbados, Belize, Costa Rica, Dominica, Dominican Republic, El Salvador, Grenada, Guatemala, Guyana, Haiti, Honduras, Jamaica, Nicaragua, Panama, St. Lucia, and St. Vincent & the Grenadines.

Opportunity Zones: President Bush urged Heads of State to join him in developing Opportunity Zones in five to be identified countries. These programs through public and private cooperatives, encourage new business ownership opportunities, particularly for disadvantaged citizens.

Inter-American Development Bank (IDB) Reform: The President called for the shareholders of the IDB to implement measures that will better employ the bank's assets, encourage accountability and performance, and address the debt sustainability of the poorest countries in the region, including through grants and debt relief.

Private Sector Disaster Relief: The President announced that three distinguished private sector leaders—Steven S Reinemund, Robert W. Lane and Maria Elena Lagomasino—have agreed to launch a nationwide effort to encourage private donations for relief and reconstruction in response to the three recent hurricanes that struck Central America.

Protecting Children: President Bush announced strong American support for a significantly expanded effort over the next four years in Latin America and the Caribbean to remove children from exploitative work and provide them with educational opportunities. In support of the above goals, the United States Department of Labor has committed $16 million to continue and expand our fight against the worst forms of child labor in the Americas.

Commerce, Industry And Economy Ministerial On Competitiveness: President Bush recommended that the OAS convene the first ever joint Commerce, Industry and Economy Ministerial to bring high-level officials together to focus on competitiveness. This unprecedented meeting will identify concrete actions that governments may take alone, or in concert, to enhance the region's ability to compete more successfully in the global marketplace.

OSCE

Last updated: March 2008

Official Name:
Organization for Security and Cooperation in Europe

Editor's note: Information for this article was compiled and edited from *Fact Sheets* and *Reports* available through the Bureau of European and Eurasian Affairs of the U.S. Department of State and updated with information available through the Office of the U.S. Mission to the OSCE.

PROFILE

The Organization for Security and Cooperation in Europe (OSCE) is a multilateral forum involving all European states and several Central Asian countries, as well as the United States and Canada.

The original Conference on Security and Cooperation in Europe (CSCE) was formalized in Helsinki, Finland, on August 1, 1975, when 35 leaders from Europe and North America signed the Final Act or Helsinki Accords. This document is a politically binding agreement composed of three major parts ("baskets") addressing military, economic, and human rights issues. The Helsinki Final Act initiated a diplomatic process—the "Helsinki Process"—with periodic review conferences to assess its implementation and elaborate/extend its provisions. Summits were held in: Helsinki (1975), Paris (1990), Helsinki (1992), Budapest (1994), Lisbon (1996), and Istanbul (1999). At the Budapest Summit, CSCE was renamed OSCE, effective January 1, 1995, and most of its bodies were renamed and given new or additional responsibilities.

The OSCE has adopted several important measures. The Vienna Document of 1994 (VD-94) builds upon the Vienna Document of 1992 and enhances several confidence- and security-building measures. The 1995 Global Exchange of Military Information (GEMI) requires members to exchange detailed information on conventional armaments/equipment and military personnel. In addition, a Defense Planning measure requires members to improve transparency regarding the size, structure, training, and equipment of armed forces. Finally, the program for Military Contacts and Cooperation involves exchanges and liaison arrangements.

The OSCE is based in Vienna. Delegations of OSCE participants meet almost daily in the framework of the Permanent Council to discuss and decide on a wide range of political and security issues. The Chairman-in-Office (C-I-O) of the OSCE, the Foreign Minister of an OSCE state, has overall responsibility for executive action. The C-I-O is assisted by the Troika, which is made up of the preceding, current, and succeeding Chairmen.

The OSCE also has a Secretary General that supports the C-I-O in all aspects of his activities and serves as the Chief Administrative Officer. The Secretariat provides operational support to the Organization. OSCE also has the Conflict Prevention Center to support implementation of CSBMs, and a Forum for Security Cooperation to conduct negotiations on European security and arms control and disarmament, review implementation of CSBMs, and organize the Annual Implementation Assessment Meeting.

OSCE Member States

There are 56 member states: Albania, Andorra, Armenia, Austria, Azerbaijan, Belarus, Belgium, Bosnia and Herzegovina, Bulgaria, Canada, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Georgia, Germany, Greece, Holy See, Hungary, Iceland, Ireland, Italy, Kazakhstan, Kyrgyzstan, Latvia, Liechtenstein, Lithuania, Luxembourg, Macedonia, Malta, Moldova, Monaco, Montenegro, Netherlands, Norway, Poland, Portugal, Romania, Russia Federation, San Marino, Serbia, Slovak Republic, Slovenia, Spain, Sweden, Switzerland, Tajikistan, Turkey, Turkmenistan, Ukraine, United Kingdom, United States, and Uzbekistan.

There are also 11 partners for cooperation: Afghanistan, Algeria, Egypt, Israel, Japan, Jordan, Mongolia, Morocco, Thailand, Tunisia, and South Korea.

FORUM FOR SECURITY COOPERATION

The Forum for Security Cooperation (FSC), created in 1992 at the Helsinki Summit of the former Conference on Security and Cooperation in Europe (CSCE), is an integral part of the Organization for Security and Cooperation in Europe (OSCE) and its principal forum for discussing/negotiating arms control and security issues. The FSC opened in Vienna on September 22, 1992, and has been meeting on a continuous basis, under rotating chairmanships in Vienna, Austria ever since. From September 2003 to January 2004, the United States will assume the FSC chairmanship. The FSC is responsible for conducting negotiations on arms control, disarmament and confidence/security-building measures (CSBMs).

In December 2001, the FSC was tasked to: address those aspects of new security challenges falling within its mandate, and update its activities accordingly; be closely connected with the overall OSCE work on current security issues; facilitate implementation of existing politico-military commitments; and serve as a venue to negotiate new measures in order to enhance security by fostering stability, transparency and predictability.

At the December 2002 OSCE Ministerial, the Foreign Ministers of its then 55 member states (including the United States) declared that arms control and CSBMs remain indispensable to the U.S. comprehensive approach to security and tasked the FSC to contribute to common responses to emerging security challenges. They added that OSCE has a unique role in promoting democracy, peace and stability throughout the Euro-Atlantic region by building confidence through dialogue, transparency and addressing the root causes of threats to stability.

FSC Activities: 1992-2002

- Monitoring/improving the implementation of Vienna Document 1999 of the Negotiations on Confidence-and Security-Building Measures, a political document containing major CSBMs agreed to by OSCE member states.
- Conducting an Annual Implementation Assessment Meeting to review the status and enhance full implementation of all agreed CSBMs by the OSCE participating states.
- Reviewing the implementation of other OSCE commitments, including: Code of Conduct on Politico-Military Aspects of Security; OSCE Document on Small Arms and Light Weapons; Principles Governing Non-Proliferation; and Principles Governing Conventional Arms Transfers.
- Remaining informed of the status of implementation of regional agreements, such as those in accordance with Annex 1-B of the General Framework Agreement for Peace in Bosnia-Herzegovina (Articles II, IV and V).
- Strengthening efforts by FSC member states to prevent and combat terrorism as mandated by the Bucharest Plan of Action for Combating Terrorism.

Additional FSC Activities for 2003

- Implementing a Charter on Combating Terrorism.
- Developing a strategy to address Threats to Security and Stability in the 21st century.
- Implementing an Annual Security Review Conference.

OPEN SKIES TREATY

The Treaty on Open Skies establishes a regime of unarmed aerial observation flights over the entire territory of its participants. The Treaty is designed to enhance mutual understanding and confidence by giving all participants, regardless of size, a direct role in gathering information about military forces and activities of concern to them. Open Skies is the most wide-ranging international effort to date to promote openness and transparency of military forces and activities.

The original concept of mutual aerial observation was proposed by President Eisenhower in 1955; the Treaty itself was an initiative of President George H.W. Bush in 1989. The Treaty was negotiated by the then-members of NATO and the Warsaw Pact, and was signed in Helsinki, Finland, on March 24, 1992. The United States ratified it in 1993. The Treaty entered into force on January 1, 2002.

Membership

The 35 States party to the Open Skies Treaty are: Belarus, Belgium, Bosnia and Herzegovina, Bulgaria, Canada, Croatia, Czech Republic, Denmark, Estonia, Finland, France, Georgia, Germany, Greece, Hungary, Iceland, Italy, Kyrgyz Republic, Latvia, Lithuania, Luxembourg, Netherlands, Norway, Poland, Portugal, Romania, Russian Federation, Slovakia, Slovenia, Spain, Sweden, Turkey, Ukraine, United Kingdom, and United States. The Treaty depositaries are Canada and Hungary.

The Open Skies regime covers the national territories—land, islands, and internal and territorial waters - of all the States Parties, and thus includes the territory of most member states of the Organization for Security and Cooperation in Europe (OSCE). The Treaty is of unlimited duration and open to accession by other states as follows:

- States of the former Soviet Union that have not already become States Parties to the Treaty may accede to it at any time;
- Other members of the OSCE may apply for accession to the Treaty at any time;

- Any other interested state may apply for accession to the Treaty six months after it enters into force (i.e., from July 1, 2002 onward).

All applications for accession (i.e., categories 2 and 3 above) are subject to a consensus decision by the Open Skies Consultative Commission (OSCC), the Vienna-based organization charged with facilitating implementation of the Treaty, to which all States Parties belong.

Basic Elements

Territory. The Treaty specifies that all territory of the States Parties is open to observation on a reciprocal basis. Observed States Parties may restrict observation flights only for reasons of flight safety and not for reasons of national security.

Aircraft. Observation aircraft may be provided by either the observing state party or (the "taxi option") by the observed state party, at the latter's choice. All Open Skies aircraft and sensors must pass specific certification and pre-flight inspection procedures to ensure that they meet Treaty standards and that only Treaty-permitted sensors are installed. The official U.S. Open Skies aircraft is the OC-135B (a military version of the Boeing 707).

Sensors. Open Skies aircraft may have video, optical panoramic and framing cameras for daylight photography, infrared line scanners for a day/night capability, and synthetic aperture radar for a day/night all weather capability. Photographic image quality will permit recognition of major military equipment (e.g., permit a State Party to distinguish between a tank and a truck), thus allowing significant transparency of military forces and activities. Sensor categories may be added and capabilities improved by agreement among States Parties. All equipment used in Open Skies must be commercially available to all participants in the regime.

Quotas. Each State Party has agreed to an annual quota of observation flights it is willing to receive - its passive quota of observation flights. Each State Party may conduct as many observation flights—its active quota—as its passive quota. During the first three years after EIF, each State will be obliged to accept no more than seventy-five percent of its passive quota. Since the overall annual passive quota for the United States is 42, this means that it will be obligated to accept no more than 31 observation flights a year during this three-year period.

Data Sharing/Availability. Collected imagery from Open Skies missions will be available to any State Party willing to pay the costs of reproduction. The Treaty provides that at the request of any State Party, the observing state will provide it a copy of the data collected during a mission over the observed state. As a result, the data available to each State Party is much greater than that which it can collect itself under the Treaty quota system.

Implementation

Provisional application of portions of the Treaty took place from signature in 1992 until entry into force in 2002. During that period, participants conducted joint trial flights for the purpose of training flight crews and testing equipment and sensors. Now that the Treaty has entered into force, formal observation flights began in August 2002—in accordance with the agreed distribution of active and passive quotas. Since the signature of the Open Skies Treaty in 1992, the security environment in Europe has changed significantly.

Nevertheless, the Open Skies Treaty remains an important element of the European security structure, along with the Treaty on Conventional Armed Forces in Europe (CFE), and the Vienna Document 1999 Agreement on Confidence-and Security-Building Measures (CSBMS) under the auspices of the OSCE.

OSCE AND U.S. POLICY OBJECTIVES

March 1, 2007

Overview

U.S. participation in the OSCE advances America's interest in promoting democracy, strengthening respect for human rights and fundamental freedoms, and furthering arms control, economic prosperity and sustainable environmental policies. The pillars of the March 2006 U.S. National Security Strategy—promoting freedom, justice, human dignity, and effective democracies—are also the OSCE's prime objectives. The OSCE also has a role to play in helping to win the global war against terrorism through a number of initiatives in the areas of arms control, border and travel document security, and advancing freedom, security, and prosperity. Promoting these and other interests collectively through the OSCE allows the United States to share costs and political responsibility with other states and, at the same time, to coordinate actions to avoid duplication and maximize success.

Promoting democracy and respect for human rights is fundamental to achieving sustainable security in Europe and Eurasia. The OSCE's core democracy and human rights mission is crucial to that effort. All OSCE participating states have accepted the same commitments to respect fundamental freedoms and human rights, and all are being held to the same standards on implementation of those commitments. The United States is committed to expanding activities in the security and economic/environmental dimensions and preserving OSCE democracy and human rights promotion activities, including the important election observation work done by the Office for Democratic Institutions and Human Rights (ODIHR).

The U.S. contribution (and related costs) to the OSCE's field missions and OSCE extra-budgetary contributions in the region were funded in FY

2006 through the Support for Eastern European Democracy (SEED) and FREEDOM Support Act (FSA) accounts. The U.S. contribution to the OSCE was approximately $36 million in FY 2006, including funds from Diplomatic and Consular Programs (D&CP), FSA, and SEED accounts. The estimated FY 2007 contribution is $42.5 million.

Promoting Democracy

Drawing on a time-tested standardized methodology, OSCE election observation missions enjoy worldwide respect for their objectivity and credibility. The electoral workload has been challenging, even for an organization with as much experience as the OSCE. In 2006, the OSCE conducted ten election observation and assessment missions, most notably in Ukraine, Serbia, Tajikistan, Georgia, Azerbaijan, and Belarus. In those countries and elsewhere, ODIHR assisted with expertise to improve presidential and parliamentary elections and/or to provide robust election observation missions that documented the degree to which elections met OSCE commitments and international standards. In Ukraine, for example, the OSCE undertook several programs in cooperation with the Government of Ukraine to improve the reliability of voter lists and improve electoral laws. These and other changes greatly contributed to the 2006 parliamentary elections' transparency, which were widely considered to be the freest and fairest in Ukrainian history.

The United States invited ODIHR to observe the November 2006 mid-term congressional elections. The group of ODIHR experts subsequently produced a report on U.S. election methodologies, including improvements since the 2004 presidential election and areas for further improvement. The United States has welcomed ODIHR's election assistance and continues to engage in productive dialogue with its representatives.

ODIHR's election observation methodology, based on sound, standardized criteria applied in an objective and fair manner, represents the gold standard in this field. It served as the model and inspiration for the UN's 2005 Declaration of Principles for International Election Observation and its accompanying Code of Conduct. Despite that success, there continue to be calls by some states, most notably Russia, to review election-related commitments and revise ODIHR's methodology in an effort to undermine ODIHR's autonomy or effectiveness. The United States considers ODIHR's methodology and practice to be sound and objective, needing at most minor fine-tuning to build on its accumulated experience. The real issue is not methodology but the lack of political will among some participating states to implement existing commitments and to allow the voice of the electorate to be heard. We will continue to lead by example and call on states to act on ODIHR's post-election recommendations and to allow ODIHR to continue its important electoral work undeterred.

Fight Against Intolerance

The OSCE tackles the challenges of intolerance and discrimination through programs and projects in the fields of legislative reform, law enforcement training, capacity building for tolerance-focused NGOs, education on the Holocaust and anti-Semitism, and all forms of anti-ethnic, racial or religious prejudice projects to counter media manifestations of hate, while still protecting freedom of expression. The United States has provided significant political and financial support to the activities of the OSCE's ODIHR in these areas and elsewhere.

Thanks to intense efforts by the U.S. Government, in close collaboration with NGO partners, the OSCE in 2005 appointed three Personal Representatives of the Chairman-in-Office on tolerance issues. Throughout 2006, these Representatives—on Anti-Semitism, on Intolerance Against Muslims, and on Racism, Xenophobia and Discrimination, Including Against Christians and Members of Other Religions—traveled to OSCE states to raise awareness of OSCE commitments and to spread support for projects to assist states in implementing these commitments. The United States strongly supported their reappointment by the Spanish chairmanship in early 2007. The representatives work closely with ODIHR in a cooperative environment, but are free to travel and undertake new projects independent of ODIHR. They also take part in NGO roundtables and OSCE expert meetings throughout the year. The United States supports the Spanish goal of reviewing the role of the three representatives with a view to enhancing their effectiveness.

The OSCE's Conference on Anti-Semitism and on Other Forms of Intolerance, held in Cordoba in June 2005, kept the spotlight on anti-Semitism as well as other tolerance issues—racism, xenophobia, and anti-Muslim and anti-Christian discrimination. The United States is working closely with Romania, the new Spanish Chairmanship and other States to develop a high-level conference on Combating Discrimination, Promoting Mutual Respect and Understanding, Following Up On the Cordoba Conference on Anti-Semitism and Other Forms of Intolerance, that will take place in Bucharest in June 2007.

The tolerance decisions approved at the 2005 Ljubljana and 2006 Brussels ministerial meetings called for strengthened implementation of OSCE tolerance commitments in participating states and provided enhanced commitments in the fields of legislation, law enforcement, education, and the media, underscoring the need for governments to speak out against all acts and manifestations of hate. We continue to encourage the OSCE to step up ODIHR education programs to counter intolerance against Muslims and to increase its tolerance work and its training on media freedom in, and with the full cooperation of, the Mediterranean partner states.

Individual projects on law enforcement training and Holocaust education have been introduced in several states in Western Europe and Eurasia. Three expert-level seminars in

2006—on hate crimes data collection, tolerance education, and intercultural dialogue—have provided platforms for the launch of new ODIHR projects. ODIHR's ongoing work to build NGO capacity to combat intolerance allows the OSCE, its participating states, and civil society to work in concert, thus multiplying the effects of our individual efforts to promote mutual understanding and respect for diversity, and in this way to contribute to democracy and stability throughout the OSCE region.

Anti-Trafficking Efforts

Trafficking in persons is a transnational problem, requiring engagement with multiple foreign governments and NGOs.

this makes it ideal for OSCE attention. The Maastricht Action Plan of 2003 on combating trafficking in human beings has provisions for specialized police training, legislative advice, and other assistance, which are being provided by ODIHR and the field missions. The OSCE's Special Representative for Trafficking and the Anti-Trafficking Assistance Unit are supporting these efforts, in particular by providing the framework and coordination within the OSCE to expand states' combined efforts. The OSCE has taken the lead in the international community in establishing a strong code of conduct for its mission personnel to ensure that they do not encourage trafficking. This issue was addressed on a broader scale with the adoption at the 2005 Ljubljana ministerial of steps to prevent international mission members and peacekeeping troops from contributing to trafficking in persons. The OSCE has also crafted an economic component to its anti-trafficking plan directed toward at-risk individuals in source countries and businesses that might be misused by traffickers, such as hotels and tour operators exploiting the sex trade. The aim is to reduce demand in destination countries by raising awareness about the plight of victims trafficked for purposes of labor and commercial sexual exploitation.

Border Management and Security

At the 2005 OSCE ministerial conference, OSCE states adopted a "Border Security Management Concept," by which they committed to promoting previously agreed OSCE standards for open and secure borders in a free, democratic, and more integrated OSCE area. Now, the OSCE is working to find new ways to facilitate capacity building for border services and reinforce cross-border co-operation in the OSCE region.

The OSCE trained 800 Georgia border guards in a training assistance mission that ended in June 2006 and was replaced by a program (2006-2007) to train trainers in the reconstituted Georgia Border Guards in the Ministry of Interior. The United States will continue to work with the OSCE throughout 2007 to find ways to help targeted states, such as Tajikistan.

Combating the Threat of Illicit Drugs

In October 2006, the OSCE conducted, together with the UN Office on Drugs and Crime (UNODC), an expert workshop to address the threat of illicit drugs. The United States used the forum to highlight the need for increased attention to the issue and to promote increased international cooperation through existing tools. The U.S. Government works through our embassies to ensure that U.S.-funded OSCE projects are coordinated with our bilateral programs.

OSCE Field Missions

In 2006, the OSCE, through its field missions and institutions, carried out, with the concurrence of the host governments, an ambitious range of activities that support political stability and democratic and economic development.

Ukraine: The Yushchenko Administration, which took office after the dramatic events of the Orange Revolution in 2004, has been more willing than its predecessors to expand the scope of OSCE activities in Ukraine. The OSCE's project coordinator in Ukraine (PCU) continues to develop and implement projects in all three of OSCE's dimensions. The PCU was actively involved in promoting transparency, civil society, and the rule of law for the parliamentary and local elections held on March 26, 2006. To help strengthen the electoral process, the PCU worked with the Ukrainian Central Election Commission to develop a new, computerized, voter registry and to help implement the new election law. To increase public awareness of the elections and improve coordination of the OSCE's election-related activities with local authorities, the PCU set up regional centers throughout Ukraine.

The PCU and the regional centers continue to build on their efforts to provide ethics training for journalists on covering elections, information to Ukrainian citizens on their legal rights as voters, the judicial system relating to the election process, and to assist local authorities in updating voter lists. The PCU continues to implement projects to support the transition of former Ukrainian military personnel to civilian life through seminars on entitlements and retraining opportunities, assist the Ukraine judicial system and legislature to resolve contradictions between civil and commercial codes, increase public awareness of trafficking in persons, and promote economic capacity-building. Finally, at the end of 2006, the PCU began implementation of a project to destroy dangerous stockpiles of old ammunition at Novobogdanovka.

Georgia: The OSCE Mission helps Georgia to continue its development into a liberal, market-based democracy. The Mission's election reform efforts continue, with training for the election commission and NGOs as well as with support for strengthening local self-government. The Mission assists with the integration of persons belonging to national minorities. The Mission supports the monitoring of official anti-corruption initiatives, the development of small- and medium-size enterprises by offering entrepreneurial training, and

water management in the Black Sea and Caspian basins. The Mission supports the professional capacity of regional outlets and is assisting in the establishment of a public broadcasting service. The Mission offers human rights training at state institutions, monitors and handles human rights cases, and assists authorities and civil society in fighting trafficking and torture. The Mission has major programs to help reform the justice and penal systems. The United States supports a peaceful resolution of the conflicts in South Ossetia and Abkhazia that respects the sovereignty and territorial integrity of Georgia. Resolution of the Georgia-South Ossetia conflict remains a major OSCE priority, and the Mission participates in the work of existing conflict resolution mechanisms, such as the Joint Control Commission and meetings in Vienna. The Mission's winter 2006 Needs Assessment Study for South Ossetia led to a donors' conference that raised pledges for short- and long-term projects, now being implemented, that bring ethnic Georgians and Ossetians together and benefit all residents of the conflict zone. The Mission supports weapon destruction and recycling throughout Georgia. The Border Guards Training Program of 2006-2007 will have trained a cadre of trainers by the time it ends in June 2007. Reform of policing in Georgia will continue, with a special focus on coordinated international efforts.

Georgia, Abkhazia and South Ossetia and the Istanbul Commitments: On May 30, 2005, Georgia and Russia agreed on a Joint Statement addressing key remaining issues relating to the 1999 OSCE Istanbul Summit commitments on Russian forces in Georgia. Since then, withdrawals have continued from two Russian bases. Issues remain regarding the withdrawal from a third Russian base at Gudauta. The joint statement also identified other steps that Georgia and Russia have agreed to take in order to complete the Istanbul commitments.

Moldova and Transnistria: The OSCE and its Mission in Moldova are working to find long-term solutions to the situation in the breakaway region of Transnistria. The United States strongly supports the work of the OSCE in Moldova, which assists in our own strategy—as well as that of the EU—for finding a peaceful resolution that respects the sovereignty and territorial integrity of Moldova. The United States has urged all sides to work transparently with the OSCE to make concrete progress toward a political settlement, and has urged Russia to fulfill the commitments it made during the OSCE's 1999 Istanbul Summit to complete withdrawal of its forces from Moldova.

In late 2005, the two sides and three mediators of the conflict negotiations (Russia, Ukraine, and the OSCE) agreed to invite the United States and the EU to join the talks as observers. While this was a positive step, there was little progress during the next several rounds of negotiations due in large part to Transnistrian intransigence, such as on proposals to reduce tensions through sharing military data and permitting the inspection of Transnistrian military-industrial enterprises. In March 2006, the Transnistrian side suspended its participation in the talks over the decision by the Ukrainian government to implement its bilateral customs agreement with Moldova and to invite the EU to assist in monitoring the Ukraine-Moldova border. There was no progress during 2006 on fulfillment of Russia's 1999 Istanbul commitment on military withdrawal from Moldova. The United States and NATO allies have made clear that they regard fulfillment of Istanbul commitments on both Georgia and Moldova as essential for NATO allies to move forward with ratification of the adapted CFE Treaty.

Belarus: The Government of Belarus' unabated repression of fundamental freedoms and human rights remains a significant concern of the United States and many other OSCE participating states. The United States welcomed the Belarusian invitation to the OSCE to observe the March 19 presidential elections, but was deeply concerned by increasing attacks by the Belarusian government against the political opposition, independent newspapers, and civil society in the run-up to the elections. The OSCE has played a crucial role in the international community's efforts to address Belarusian authorities' harassment and detention of the opposition and independent media before and after the Belarusian election. The OSCE office in Minsk has offered to help Belarusian authorities meet OSCE commitments and to help NGO groups work for the benefit of the country.

it has also been able to meet with political prisoners in jail and report on developments in the country. However, the government continues to stymie the office's work. It insists on a cumbersome government approval process for all office projects and has criticized the office's reporting activities. The United States coordinated closely with the EU and other concerned partners to bring public pressure to bear on the Belarusian government to live up to its OSCE commitments.

The Balkans: The majority of the OSCE's resources continue to be invested in missions in the Balkans, a legacy of the OSCE's major role before and after the Balkan wars. In general, missions in the Balkans, many of which originated as part of immediate post-conflict international stabilization efforts, are much larger than the field presences in the former Soviet Union. Overall, the OSCE's work in the Balkans is a success story.

Problems that still require assistance in the form of resources and attention of the international community include trafficking of drugs, weapons and human beings, and organized crime.

OSCE success stories in the Balkans include:

- **Kosovo:** the development of functioning institutions at central government and municipal levels, and the creation of a model police school.

- **Bosnia and Herzegovina:** substantial progress toward the formation of a unified and professional military.

- **Macedonia:** inter-ethnic cooperation and integration in the wake of 2001 violence; elections and human rights monitoring.

- **Serbia:** legislative, judicial and police reform; reconciliation and stabilization in South Serbia.

- **Croatia:** development of democratic institutions; training of police; enhancement of media freedom.

- **Albania:** judicial and election reform; police assistance.

- **Bosnia, Croatia, and Serbia:** capacity building for domestic war crimes trials.

- **Region-wide:** government transparency and accountability; capacity building and awareness-raising to combat trafficking in human beings; promotion of NGOs and civil society; progress on return of refugees and internally displaced persons (IDPs).

Eighty percent of all OSCE field mission personnel are working in the seven Balkan missions (the other eleven missions, in the former Soviet Union, make up the remaining twenty percent). At the urging of the United States, the OSCE has made some progress in reducing the size and budgets of its Balkans' missions, but additional reductions are needed.

Kosovo: During 2006, the OSCE Mission in Kosovo (OMiK) expanded its field presence by establishing municipal monitoring teams of human rights and democratization officers in each of Kosovo's 30 municipalities. Roughly half of OMiK's staff of 1,000 is now deployed throughout Kosovo while the other half continues to work out of its main headquarters in Pristina. The expansion of the field presence has improved OMiK's ability to monitor and report on developments in the municipalities and to serve as the international community's eyes and ears in the field once a status settlement is reached. The Mission has continued to perform its traditional institution- and democracy-building functions. It also played an important role in monitoring human rights, building local governing capacity, and contributing to the development of a professional police and judiciary.

Bosnia and Herzegovina: As the overall international presence continues to draw down, the work of the OSCE Mission remains essential for assisting BiH's democratic transition. The Mission played a key role in helping the government develop its military reform laws, which have created a single, national armed forces under civilian control. Passage of this legislation constituted a major step in fulfilling the requirements for future NATO membership. In addition, the Mission has focused on education reform in a country where many schools are still ethnically divided; trial monitoring (particularly of war crimes and human trafficking trials) to ensure fairness in the judicial system; public administration reform to improve governance at the local level; and overall political reform following the October 2006 national elections. The Mission monitors legal cases that have been transferred to Bosnia by the International Criminal Tribunal for the Former Yugoslavia (ICTY) pursuant to Rule 11 bis of the ICTY's Rules of Procedure and Evidence.

The Mission is also working to help government authorities implement the reform pledges outlined in their "Jobs and Justice Agenda." The agenda focuses on promoting reform in five strategic areas: the economy, law enforcement, defense, education and public administration. The OSCE Mission's role is becoming increasingly important as the role of the High Representative is reduced.

Macedonia: Among the primary tasks of the OSCE Spillover Monitor Mission to Skopje are monitoring and assisting with the implementation of the 2001 Ohrid Framework Agreement. Many of the Mission's activities focus on preventing ethnic tensions through the implementation of confidence-building measures and the training of a multi-ethnic police force. It has expanded its focus to training police in community-based law enforcement, enhancing rule of law, and improving local self-government and the media. The Mission designs, or identifies and supports grassroots projects that promote inter-ethnic cooperation and confidence, including projects in primary and secondary education. Other activities support border training and judicial and electoral reform. The Mission's monitoring function will play an important role during 2007, when a decision over the future status of neighboring Kosovo is expected. The Mission maintains two field offices outside of Skopje in areas of past tensions. The Mission has largely succeeded in its most resource-intensive project, increasing minority representation in the police force, and is gradually drawing down. From 2005 to the beginning of 2007, the Mission reduced its total staff from 338 to 259. the Mission currently has a staff of 72 international personnel, less than a third than it had in September 2001.

Serbia: The Mission continues to focus on reform activities that are designed to prepare Serbia for integration into Euro-Atlantic structures. Mission activities emphasize strengthening the rule of law, including the judiciary, especially to combat organized crime; security sector reform, including law enforcement; and strengthening democratic institutions, including parliament. The Mission also pays special attention to South Serbia, national minority/tolerance issues, and reconciliation/regional cooperation issues. The Mission enjoys solid support at all levels of government in Serbia.

Montenegro: Following Montenegro's independence, an OSCE mission was established there in June 2006. The Mission is supporting democratization processes, and judicial and police reform. It conducts police training, assists legislators in drafting national laws, and is helping to create a national mechanism for monitoring prisons to help prevent torture.

Albania: A primary focus of the OSCE Presence in Albania in 2006 was electoral assistance, particularly in the lead up to the February 2007 local elections.

Together with ODIHR, the Presence worked with government and electoral authorities to help further enhance the electoral process in line with prior OSCE/ODIHR recommendations.

Throughout 2006, the Presence also provided technical assistance to Albanian authorities on property restitution, police training, parliamentary capacity building, legislative and judicial reform, good government, anti-corruption measures, and combating trafficking in human beings. The four field offices of the Presence are crucial in allowing the OSCE to carry out programs efficiently outside of the capital, and have also assisted other international organizations and governments with local contacts and support for complementary projects.

Croatia: The OSCE Mission is approaching a wind-down phase and has focused its work on a limited number of key issues, in particular refugee and IDP return and housing restitution. The Mission is supporting the work of the International Criminal Tribunal for the Former Yugoslavia (ICTY) by monitoring domestic war crimes trials, including cases that have been transferred to Croatia by the ICTY pursuant to Rule 11 bis of the ICTY's Rules of Procedure and Evidence. It also is working on promoting rights of persons belonging to minorities, on police training, and on electoral reform. The Mission is planning on a December 2007 closure of the OSCE presences in Croatia, with administrative wrap-up work to conclude by the middle of 2008.

Armenia and Azerbaijan: The OSCE's focus in these two countries in 2006 remained on advancing democratization and respect for human rights, and resolving the unresolved conflicts. In Armenia, the OSCE field presence carried out programs to combat corruption and trafficking in human beings, to reform the penal system, and to ensure the safe disposal of surplus toxic rocket fuel (mélange) left over from the Soviet era. The OSCE Office in Baku used its monitoring of trials of Azeri opposition members to develop recommendations for judicial reform in Azerbaijan. The office monitored and reported on the parliamentary elections and continues to track Azerbaijan's efforts to address shortcomings that became apparent. The Office is active in promoting media freedom and protection of journalists.in October 2006 it organized a visit by the OSCE's Special Representative on Freedom of the Media for a series of high-level meetings.

Nagorno-Karabakh Conflict: Meetings of the "Minsk Group" co-chairs (United States, Russia, and France) with the OSCE and with the Foreign Ministers and presidents of Armenia and Azerbaijan continued throughout 2006. In February 2006, the presidents met with each other and with the co-chairs in France. They met again under the co-chairs' auspices in Bucharest in June and Minsk in November. Although a hoped-for breakthrough did not materialize by the end of 2006, the sides were close to agreement on basic principles for a settlement agreement. The co-chairs will continue to meet with the two sides in 2007 and hope for visible progress after the May elections in Armenia.

Central Asia: U.S. goals in Central Asia are to support the development of democratic, market-oriented, and fully sovereign states contributing to regional stability, security, and human rights. The United States seeks to revitalize ancient ties between Central and South Asia, and to create new links in energy, trade, transport, and communications. At the same time, we continue to support further integration of these nations into the Euro-Atlantic community. The OSCE plays an important role in advancing these goals. The OSCE conducts key human dimension activities, especially through its field missions, including its anti-torture program, and work to strengthen the freedom of media and rule of law and to assist independent journalists. Equally critical is addressing the abuse of law, stemming restrictive NGO legislation, and halting crackdowns on civil society.

A promising growth area for OSCE programming in Central Asia in support of U.S. goals are those activities focused on transnational issues, such as terrorism, trafficking (human beings, drugs and arms), border security, and police training. Several Central Asian states have shown willingness to cooperate with the OSCE on these issues, including implementation of the Bucharest Plan of Action for Combating Terrorism and the activities of the OSCE's police unit. The United States is exploring possible ways to increase cooperation in these areas. Several Central Asian governments have expressed an interest in increased activities in the Economic and Environmental Dimension. The OSCE is doing excellent work through its Environment and Security program to address environmental hot spots that could be destabilizing. The Central Asians have shown enthusiasm for this program, which centers on promoting technical and scientific cooperation between states.

Kazakhstan: Participating states are pressing the Kazakhstanis to bring their country in line with OSCE standards given Kazakhstan's bid to chair the OSCE in 2009. The OSCE Center in Almaty has sought to assist Kazakhstan to uphold OSCE core principles through programs promoting free and fair elections, legal education for lawyers, police training, and civil society development. The OSCE's efforts may be complicated by the Government of Kazakhstan's insistence in late 2006 to limit the OSCE Center's mandate to six months rather than the previous length of one year—a bureaucratic move that will necessitate future twice-yearly discussion and negotiation of the Center's mandate. Kazakhstan's human rights and democracy records remained poor in 2006. Beginning in November 2006, local government officials executed surprise demolitions of Hare Krishna homes, despite negative publicity and

diplomatic pressure to cease. Against the OSCE Media Freedom Representative's recommendation, President Nazarbayev signed into law restrictive amendments to Kazakhstan's media law. Libel laws in Kazakhstan still restrict freedom of expression, as journalists continued to be convicted in 2006 for allegedly insulting the dignity and honor of the president.

Kyrgyzstan: Throughout 2006, Kyrgyzstan stalled on constitutional reform. Protests in November finally forced the adoption of a new constitution that gave some hope to those wanting to see less power concentrated in the president and more checks and balances. However, many of these hopes were dashed when a second revised constitution that restored many presidential powers was drafted in December and enacted in January. The Government of Kyrgyzstan failed to rescind restrictive libel laws or to transform state TV and radio into independent entities as promised by President Bakiyev. Nevertheless, Kyrgyzstan maintains one of the most vibrant civil societies and media in Central Asia.

The OSCE's work in Kyrgyzstan has also contributed to progress. The OSCE's police assistance work in particular is a noteworthy success story. The police have handled recent public demonstrations well due partly to the anti-riot training they have received. The public's attitude towards the police has improved since the OSCE began its program, and the OSCE has delivered a variety of police equipment, which has received extensive positive press coverage. This assistance is designed to aid transparency and fight corruption within the police force by providing the tools needed to train those who are in a position to uphold the rule of law and maintain a reputable, honest, and respected police force.

Tajikistan: Tajikistan hosts the largest of the OSCE Central Asian field presences. Its activities include demining and civic education for youth. Tajikistan has been an active and enthusiastic supporter of OSCE counter-terrorism and border initiatives, including strengthening travel document security. The OSCE Center in Dushanbe's Small Arms/Light Weapons (SALW) and conventional ammunition programs, under the guidance of the OSCE SALW and Stockpiles of Conventional Ammunition Documents, is a major success story, with at least seven countries, including the United States, making financial and in-kind contributions to infrastructure and capacity-building, as well as destruction of surpluses.

The OSCE has worked with the Tajiks on election reform and other basic OSCE commitments.

Tajikistan's revised election law promulgated in 2004 was an improvement over previous legislation, but significant shortcomings remain.

Presidential elections were held on November 6, 2006 in Tajikistan. ODIHR assessed that democratic practices were not fully tested in this election because of the lack of genuine competition. The election process also revealed substantial shortcomings, according to the Election Observation Mission's preliminary report, including the lack of a credible challenger, election legislation requiring significant improvement to meet OSCE commitments, and media which is still largely under government control. However, some aspects of the election merited positive comment, including a calm and peaceful election period, an election process that was administered efficiently, and free media time afforded to candidates. NGOs are still perceived as a threat and the Government of Tajikistan continues to enforce bureaucratic roadblocks to NGOs seeking to register. In the case of media, some local independent media stations have not received broadcast licenses, and other independent media outlets have been prevented from broadcasting.

Uzbekistan: Uzbekistan continued to take numerous steps backward on political reform during 2006. According to a little-known 2002 parliamentary resolution, Uzbekistan's next presidential election is to take place in December 2007. To date, Uzbek authorities have not indicated a desire to receive assistance in preparation for the election. During 2006, the government continued to pressure international NGOs and to repress civil society and opposition activities. In 2006, the Government of Uzbekistan forced 16, U.S.-based NGOs to close. In addition, throughout much of 2006, the OSCE Center in Tashkent was prevented from conducting any projects, and the Government of Uzbekistan successfully lobbied to change the Center to a project coordinator's office, seeking a much narrower focus for the OSCE's work in Uzbekistan. Nonetheless, the project coordinator's office was allowed to engage in a few projects by year's end, and still serves as an important resource and venue for human rights and democracy supporters.

Turkmenistan: The OSCE is the only international organization in which Turkmenistan is a full member and which is present on the ground in Ashgabat, offering the government and people opportunities for concrete cooperation to build a democratic future and reminding the government of its human rights obligations. In 2006, the OSCE maintained pressure on Turkmenistan to improve human rights, particularly regarding access to prisoners, freedom of association and religion, public access to the internet, and loosening restrictions on NGOs. The United States will continue to work with other OSCE members to improve the situation in Turkmenistan. The change in leadership due to President Niyazov's death in December 2006 may present opportunities for additional engagement with Turkmenistan in 2007, particularly on border security issues, combating drug trafficking and electoral reform.

Issues Affecting OSCE's Activities and Effectiveness

Russia, as well as a number of participating states (mostly from the CIS) that host OSCE field missions, continue to be strongly critical of the OSCE's field operations and the work of ODIHR. They assert that there are

"double standards" on human rights, ODIHR "interference" in domestic issues, excessive concentration of OSCE activities in the former Soviet republics, and lack of balance in OSCE activities that emphasize the human dimension over the economic and security dimensions. They have singled out for special mention the OSCE's election-related activities, specifically election observation procedures, asserting that a lack of standardized election criteria has led to politicized election assessments.

The United States strongly disagrees with these criticisms. Supported by the vast majority of participating states, we have continuously stressed that there are no OSCE double standards on human rights. All OSCE states signed on to the same commitments to respect fundamental freedoms and human rights and hold free and fair elections. There are also no OSCE double standards on election assessments: OSCE observer missions have standard assessment criteria, listed in a publicly accessible election observation handbook, and standard advance training. The OSCE's human dimension work is not concentrated exclusively to "east of Vienna:" while the core mandate of the OSCE's field missions is to help countries meet OSCE standards, efforts to combat trafficking in persons are directed toward the entire OSCE region, and several events in 2006 were concentrated in western European capitals on anti-Semitism and racism. CIS criticism of ODIHR "interference" in domestic affairs is also unwarranted: participating States agreed in Moscow in 1991 that human dimension commitments are "matters of direct and legitimate concern to all participating states and do not belong exclusively to the internal affairs of the state concerned." While the United States is always open to suggestions on ways to make the OSCE more effective, adaptations or changes must not come at the expense of its democracy and rights promotion activities. At the same time, we oppose revision of the OSCE's democratic principles and election monitoring standards.

OSCE Scales of Contribution and Budget

Following U.S. consultations with its major OSCE partners, the OSCE's 56 states agreed to a 2007 budget of $220 million (zero nominal growth from the adopted 2006 budget), a budget that is sufficient for the OSCE to carry out its core activities to promote democracy and human rights. The OSCE Scales of Contribution for 2008-2010 will need to be renegotiated over the course of 2007. Given very tight U.S. budget constraints, we will seek to reduce the level of our contribution to the organization. This effort will meet stiff resistance from most other major players, who believe the United States is capable of paying much more, rather than less, of the organization's costs.

Brussels Ministerial

The December 4-5, 2006 OSCE ministerial in Brussels allowed the United States to achieve a number of significant goals, including protecting ODIHR and the operation of the OSCE generally, while putting an end to the time-consuming reform process that had dominated discussions over the past year. The ministerial endorsed a number of draft decisions of importance to the United States on issues such as tolerance (including references to the three tolerance representatives and a conference on anti-Semitism and other forms of intolerance), a U.S.-initiated decision on the sexual exploitation of children, and trafficking in persons. Other decisions adopted included those on counter-terrorism, criminal justice, and economic issues, including energy security. The United States capitalized on opportunities at the ministerial to demonstrate support for the Istanbul commitments and proposed positive ideas for movement on the unresolved conflicts in Moldova, Georgia, and Nagorno-Karabakh. In the political-military arena, three decisions were taken on managing and destroying stockpiles of excess small arms and light weapons and conventional ammunition, as well as on support for full implementation of UNSCR 1540 relating to better controls on weapons of mass destruction and related components. The reform process launched by the Ljubljana Roadmap Decision in 2005 concluded in Brussels, with agreement on several decisions on the internal functioning of the organization, the Secretariat, and the intergovernmental process. These included formal agreement on rules of procedure (which codified existing practice); elimination of the moribund senior council; creation of three sub-committees of the Permanent Council on an experimental basis; and agreement to launch negotiations on a convention on legal status and privileges and immunities for the OSCE. The ministerial deferred a decision on the question of the chairmanship of the OSCE in 2009 to no later than the Madrid ministerial at the end of 2007. The decision adopted in Brussels welcomed the interest by Kazakhstan in chairing the organization in 2009, but also pointed out that the highest functional responsibilities of the OSCE are a reflection of willingness and capacity to exercise leadership on the implementation of OSCE commitments, norms, and values. The decision took note that Kazakhstan has committed to a program of political action and reforms, and also committed to exercise leadership in upholding OSCE standards.

IMPLEMENTING THE U.S. AGENDA IN 2007 AND BEYOND

In 2007, U.S. priorities for the OSCE included:

- Increase the OSCE's effectiveness in transformational diplomacy to help all OSCE participating States reach their objectives to become fully democratic and prosperous nations at peace and helping to improve collective security.

- Continue to promote final settlement talks and resolution of regional conflicts in Moldova, Nagorno-Karabakh, and Georgia.

In Georgia, continue to support the OSCE Mission's implementation of projects identified by the needs assessment survey for South Ossetia, continue to develop broader international support for resolution of the conflict. In Moldova, engage the parties to the Transnistria conflict in the U.S. role of observer in the negotiating process, while working with the mediators to press the Transnistrian authorities to return to the negotiations. In the Nagorno-Karabakh conflict, the United States will work with its fellow Minsk Group co-chairs (France and Russia) to resolve differences between the Armenian and Azerbaijani sides in pursuit of a settlement agreement.

- Enhance OSCE activities in Central Asia and the Caucasus, including efforts at regional cooperation on border control, combating terrorism, and implementation of confidence- and security-building measures (CSBMs). Press for fundamental democratic reforms and protection of human rights, including freedom of assembly, the media, and religion.

- Seek ways to utilize OSCE expertise in developing and implementing programs aimed at combating terrorism, particularly through the strengthening of border security management.

- Increase the OSCE's outreach to partner countries, particularly Afghanistan, as well as the OSCE Mediterranean Partners for Cooperation. In Afghanistan, seek ways the OSCE could become more actively engaged in the reconstruction and stabilization effort, such as designing a program to strengthen border management and security, and encouraging participation by Afghanistan in OSCE programs aimed at promoting religious and ethnic tolerance and democratic institution-building.

- Consider areas where the OSCE could lend particular expertise on current problems, such as on providing a forum for dialogue on countering radical Islam, and addressing the pressing issue of energy security within the OSCE's Economic and Environmental framework.

- Participate actively in negotiations on a convention to give the OSCE international legal status, while ensuring that such negotiations do not reopen the acquis of OSCE commitments.

Promoting the Human Dimension

- Work to keep the annual OSCE Human Dimension Implementation Meeting (HDIM) an effective forum for raising human rights cases, supporting human rights defenders, defending U.S. positions and practices on issues such as human rights and capital punishment, and integrating follow up on issues raised at the HDIM into the OSCE Ministerial agenda.

- Ensure that NGOs remain able to participate fully in the HDIM and the OSCE's other human dimension events.

- Prepare OMiK for its role in Kosovo after a settlement is reached on Kosovo's final status. Once a status settlement is reached, we expect the OSCE Mission in Kosovo to operate as the international community's eyes and ears in the field, proactively monitoring and reporting on the implementation of the terms of the agreement.

- Intensify efforts to strengthen implementation of existing OSCE election standards, and ensure that the OSCE continues to be able to provide election-related assistance and effective monitoring and recommendations, including: support OSCE election observation missions: Russia, Albania, Serbia, Montenegro, Armenia, Turkmenistan, Uzbekistan, and others will hold elections in 2007; continue to defend the OSCE's frank and public assessments of whether elections meet OSCE standards; support ODIHR follow through on recommendations from election observation missions; continue to work with Russia and other CIS countries to increase their participation in election observation missions. Such participation carries the potential for strengthening support for improved election procedures in these countries.

- Intensify efforts to promote rule of law, not "rule by law."

- Combat the growing trend of using restrictive NGO legislation to repress civil society.

- Develop more effective ways to help human rights defenders.

- Promote implementation of the OSCE's Action Plan to Combat Trafficking and engagement by the Anti-Trafficking Assistance Unit.

- Continue efforts in the Balkans to build democratic institutions; promote human rights, including inter-ethnic tolerance and protection of national minorities; fight organized crime and corruption, and bring persons indicted for war crimes to justice.

- Work closely with EU members and other OSCE participating states to maintain emphasis on a Belarusian democracy after the presidential elections and to press the Belarusian Government on accountability.

- Ensure a successful conference on Combating Discrimination, Promoting Mutual Respect and Understanding, follow-up to the Cordoba conference on Anti-Semitism and Other Forms of Intolerance in Bucharest in June.

Focusing the Political—Military Dimension

- Continue to strengthen the OSCE's work in the political-military dimension.

- Continue to engage Russia actively on security issues, including discussing new initiatives on counter-terrorism and on practical ideas for strengthening the political-military dimension.

- Encourage continued progress on implementation of Istanbul commitments relating to the Russian military presence in Georgia, and continue to press for resumption of Russian military withdrawal from Moldova. The U.S. remains committed to moving ahead with ratification of the Adapted CFE Treaty as soon as Russia fulfills its 1999 commitments on troop withdrawal, as well as to helping Russia to complete the withdrawals that it has set for itself.

- Increase counter-terrorism work by using the Forum for Security Cooperation (FSC), the newly created Security Working Group and the Annual Security Review Conference (ASRC) to encourage participating states to meet existing commitments and to identify additional measures that the OSCE can take to fight terrorism.

- Counter proliferation of weapons, by promoting implementation of political-military agreements, including on Man Portable Air Defense Systems (MANPADS), small arms and light weapons (SALW), and stockpiles of conventional ammunition.

- continue to coordinate the development of best practice guides for stockpiles of conventional ammunition.

- Support full implementation by the participating states of UNSCR 1540, which bars non-state actors from obtaining weapons of mass destruction (WMD), and activities by the OSCE to work in cooperation with the UN 1540 Committee in New York.

- Promote full compliance with all political-military commitments, including Vienna Document 1999 and the OSCE Code of Conduct on Politico-Military Aspects of Security, to maintain security and stability in the OSCE region.

- Work closely with the Russian Federation on a May 31-June 1 conference, organized by the OSCE's Action against Terrorism Unit (ATU), which will focus on ways public-private partnerships (PPP) can help governments combat terrorism.

Strengthening the Economic and Environmental Dimension

- Press the Economic and Environmental Subcommittee to focus more on a concrete program of activities.

- Energize the Economic Dimension by developing additional areas in which the OSCE can provide added value, particularly in the field of energy security.

U.S. POLICY AND OSCE

U.S. participation in the OSCE advances America's national interest in promoting democracy, strengthening respect for human rights and fundamental freedoms, arms control, economic prosperity, and sustainable environmental policies. The OSCE also has a role to play in helping to win the global war against terrorism. Taking action together with other countries through the OSCE is effective because it allows the United States to share costs and political responsibility, as well as to coordinate and avoid duplication, with like-minded nations. The OSCE's common principles give the U.S. and other OSCE participating states shared values and commitments on which to act. From mediating regional conflicts to addressing human rights violations, the OSCE can bring the weight of 56 nations acting together to bear on problems that the U.S. cannot solve alone. All participating states in the OSCE have made public commitments to democracy and human rights, market economics, and political-military security policies that promote greater regional stability. In the post-Communist era, the OSCE has made a significant contribution toward achieving America's goal of a Europe whole, free and at peace. To achieve fully a democratic, prosperous and secure Euro-Atlantic area from Vancouver to Vladivostok, there is still clearly more to do. The OSCE can build on its experience to help reach that goal, with U.S. support and guidance.

The U.S. Mission to the OSCE

The United States Mission to the OSCE is the office of about 30 staff members who represent U.S. interests in OSCE activities and choices, including the Permanent Council, the principal policy-making body, the Open Skies Consultative Commission, and the Forum for Security Cooperation. The Mission also works to monitor implementation of the Conventional Armed Forces in Europe (CFE) Treaty.

Mission staff members are drawn from several other U.S. government agencies, such as Department of State, the Office of the Secretary of Defense, and the Office of the Joint Chiefs of Staff. In 2004, the U. S. Mission played a leading role in the OSCE's Office for Democratic Institutions and Human Rights (ODIHR) as that group established its largest election observation mission in Ukraine.

The Mission also served in to support elections in Afghanistan, Georgia, and ten other elections in OSCE participating States.

U.S. Goals and Objectives

In 2008, the U. S. Mission to the OSCE listed the specific U.S. goals and objectives within the OSCE as follows:

- Preserving the effectiveness of the OSCE in its missions and scope

- Engaging all OSCE participating states

- Resolving the "Frozen Conflicts," through supporting the OSCE Missions in Georgia and Moldova
- Combating terrorism, through efforts that include expanding OSCE efforts to destroy surplus conventional munitions and small arms and light weapons and through support of the initiatives taken at the 2004 Annual Security Review Conference
- Combating intolerance and discrimination, with a special commitment to combatting anti-Semitism, anti-Muslim sentiment, racism, and xenophobia
- Combating trafficking in persons, by promoting legislative reform, law enforcement cooperation, the development of non-governmental organizations (NGOs), and other programs of prevention and support for victims
- Enhancing security across the OSCE region:, through a commitment to upholding various arms control initiatives.

The Inauguration of the Annual Security Review Conference

The OSCE held its first Annual Security Review Conference in June 2003 in Vienna. The aim of the annual conference, which was a U.S. initiative, is to assess progress in combating terrorism and to review OSCE activities in the security field. Ambassador Cofer Black, the State Department's Coordinator for Counterterrorism, addressed the conference and suggested that the OSCE take action to improve travel document security, one of the biggest problems in the war on terror. This led to the initiative approved at Maastricht to improve handling and issuance procedures for travel documents described above.

OSCE & FOREIGN RELATIONS

OSCE Field Operations

The OSCE has about 3,600 staff members in several missions and field activities around the world. The mandate of each mission is specific to the needs of the country in which it is established. In general, the missions are expected to facilitate political processes toward conflict resolution and to keep the OSCE community informed of progress and new developments.

In early 2008, the OSCE had missions or other field activity posts as follows:

South Eastern Europe

- Presence in Albania
- Mission to Bosnia and Herzegovina
- Office in Zagreb
- Mission to Montenegro
- Mission to Serbia
- Mission in Kosovo
- Spillover Monitor Mission to Skopje

Eastern Europe

- Office in Minsk
- Mission to Moldova
- Project Coordinator in Ukraine

Caucasus

- Office in Baku
- Mission to Georgia
- Office in Yerevan
- Personal Representative of the Chairman-in-Office on the Conflict Dealt with by the Minsk Conference

Central Asia

- Center in Ashgabad
- Center in Astana
- Center in Bishkek
- Project Coordinator in Uzbekistan
- Center in Dushanbe

UNITED NATIONS

Last Updated: January 2009

Official Name:
United Nations

Editor's note: The information for this article was compiled and edited from *UN Fact Sheet*s and other releases available through the Bureau of International Organization Affairs of the U.S. Department of State.

PROFILE

Beginnings, Purpose, and Structure

In 1942, President Franklin Roosevelt, flanked by the leaders of 26 Allied countries, first coined the term "United Nations" to describe the continued fight against the Axis Powers. Following World War II, the allies adopted the term to define a worldwide body of nations. On June 26, 1945, fifty nations signed the United Nations Charter in San Francisco, California. The United States Senate ratified the UN Charter on July 28, 1945. The United Nations came into effect on October 24, 1945. October 24 is now celebrated around the globe as UN Day.

The United Nations' aims are set out in the preamble to the UN Charter: to maintain international peace and security; to develop friendly relations among nations; to achieve international cooperation in solving economic, social, cultural, and humanitarian problems and in promoting respect for human rights and fundamental freedoms; and to be a center for harmonizing the actions of nations in attaining these common ends.

The principal organs of the United Nations include the Security Council, the General Assembly, the Economic and Social Council (ECOSOC), the International Court of Justice, and the Secretariat. (The Trusteeship Council, an original principal organ, suspended operations in 1994 when it fulfilled its function by overseeing the independence of the UN's last remaining trust territory.)

In addition to its principal organs, the United Nations system is made up of a complex mix of commissions and funds created by the General Assembly, such as UNICEF (UN Children's Fund) and the World Food Program; specialized agencies, such as the World Health Organization and the International Monetary Fund; and other UN entities, such as the Office of the High Commissioner for Human Rights and the peacekeeping missions established by the Security Council.

The headquarters of the United Nations is located in New York City. The General Assembly building and the Secretariat were built in 1949 and 1950 on land donated by the Rockefeller family. The property is now considered international territory. Under special agreement with the United States, certain diplomatic privileges and immunities have been granted, but generally the laws of New York City, New York State, and the United States apply.

The regular biennial budget of the UN in 2004-05, as revised, was $3.608 billion. For the calendar year 2003, the United States' assessed contribution to the UN regular budget was $362 million. In addition, the United States' assessed contribution to UN specialized agencies amounted to well over $400 million.

The United States also contributed $1.1 billion in assessments to the peacekeeping budget in calendar year 2004; $72 million for the support of the international war crimes tribunals for Rwanda and the former Yugoslavia; and, nearly $5 million for preparatory work relating to the UN Capital Master Plan. Moreover, each year the United States provides a significant amount in voluntary contributions to the UN and UN-affiliated organizations and activities (largely for humanitarian and development programs). In sum, U.S. contributions (both cash and in kind) to the UN system in 2003 were well over $3 billion.

The United Nations currently has 192 member states. The official languages of the United Nations are Arabic, Chinese, English, French, Russian, and Spanish. More information about the UN is available on its web site at www.un.org.

HISTORY

The idea for the United Nations was elaborated in declarations signed at the wartime Allied conferences in Moscow and Tehran in 1943. President Franklin Roosevelt suggested the name "United Nations." From August to October 1944, representatives of the U.S. U.K., France, U.S.S.R., and China met to elaborate the plans at the Dumbarton Oaks Estate in Washington, D.C. Those and later talks produced proposals outlining the purposes of the organization, its membership and organs, as well as arrangements to maintain international peace and security and international economic and social cooperation. These proposals were discussed and debated by governments and private citizens worldwide.

On April 25, 1945, the United Nations Conference on International Organizations began in San Francisco. The 50 nations represented at the conference signed the Charter of the United Nations two months later on June 26. Poland, which was not represented at the conference, but for which a place among the original signatories had been reserved, added its name later, bringing the total of original signatories to 51.

The UN came into existence on October 24, 1945, after the Charter had been ratified by the five permanent members of the Security Council-China, France, U.S.S.R., U.K., and U.S.-and by a majority of the other 46 signatories. The U.S. Senate, by a vote of 89 to 2, gave its consent to the ratification of the UN Charter on July 28, 1945. In December 1945, the Senate and the House of Representatives, by unanimous votes, requested that the UN make its headquarters in the U.S. The offer was accepted and the UN headquarters building was constructed in New York City in 1949 and 1950 beside the East River on donated land, which is considered international territory. Under special agreement with the U.S., certain diplomatic privileges and immunities have been granted, but generally the laws of New York City, New York State, and the U.S. apply. UN membership is open to all "peace-loving states" that accept the obligations of the UN Charter and, in the judgment of the organization, are able and willing to fulfill these obligations. The General Assembly determines admission upon recommendation of the Security Council.

Preamble to Charter of the United Nations

We the Peoples of the United Nations Determined

- To Save succeeding generations from the scourge of war, which twice in our lifetime has brought untold sorrow to mankind, and
- To Reaffirm faith in fundamental human rights, in the dignity and worth of the human person, in the equal rights of men and women of nations large and small, and
- To Establish conditions under which justice and respect for the obligations arising from treaties and other sources of international law can be maintained, and
- To promote social progress and better standards of life in larger freedom,

And for these ends

- To Practice tolerance and live together in peace with one another as good neighbors, and
- To Unite our strength to maintain international peace and security, and
- To Ensure, by the acceptance of principles and the institution of methods, that armed force shall not be used, save in the common interest, and
- To Employ international machinery for the promotion of the economic and social advancement of all peoples,

Have resolved to combine our efforts to accomplish these aims. Accordingly, our respective Governments, through representatives assembled in the city of San Francisco, who have exhibited their full powers found to be in good and due form, have agreed to the present Charter of the United Nations and do hereby establish an international organization to be known as the United Nations.

AREAS OF RESPONSIBILITY

Maintaining the Peace

The UN's role in international collective security is defined by the UN Charter, which gives the Security Council the power to:

- Investigate any situation threatening international peace;
- Recommend procedures for peaceful resolution of a dispute;
- Call upon other member nations to completely or partially interrupt economic relations as well as sea, air, postal, and radio communications, or to sever diplomatic relations; and
- Enforce its decisions militarily, if necessary.

The United Nations has helped prevent many outbreaks of international violence from growing into wider conflicts. It has opened the way to negotiated settlements through its service as a center of debate and negotiation, as well as through UN-sponsored fact-finding missions, mediators, and truce observers. UN peacekeeping forces, comprised of troops and equipment supplied by member nations, have usually been able to limit or prevent conflict. Some conflicts, however, have proven to be beyond the capacity of the UN to influence. Key to the success of UN peacekeeping efforts is the willingness of the parties to a conflict to come to terms peacefully through a viable political process.

UN peacekeeping initiatives have ranged from small, diplomatic or political delegations to large mobili-

zations, the most extensive of which was the 500,000-strong 1950-53 defense of South Korea against an attack by North Korea. In the first few years following the end of the Cold War the number of peacekeeping operations increased dramatically. The proliferation of operations reflected the view that, in the post-Cold War era, the UN could play an important role in defusing regional conflicts. Some of the peacekeeping operations of the early 1990s also saw an expansion of the traditional peacekeeping mandate to include such responsibilities as supervising elections, monitoring human rights, training police, and overseeing civil administration. From 1995 to mid-1999 there was a sharp decline in the number of UN peacekeepers in the field, from a high of around 70,000 to 12,000. The assumption by NATO of major peacekeeping responsibilities in the former Yugoslavia (and the resultant termination of UNPROFOR's mandate) accounted for much of the decrease. Other factors included the closeout of UN operations in Mozambique in January 1995, Somalia in March 1995, El Salvador in April 1995, and Rwanda in March 1996. With the U.S. and the UN taking a much harder look at proposed peacekeeping operations, the only major new UN mission set up in this period outside the former Yugoslavia was the UNAVEM III operation in Angola.

Beginning in June 1999, new missions in Kosovo and East Timor and expanded missions in Sierra Leone and the Congo dramatically increased both the costs and personnel levels of UN peacekeeping operations. They also added a new level of complexity to peacekeeping efforts, with a greater emphasis on civilian administration in East Timor and Kosovo. From July 1999 to June 2001, overall UN peacekeeping personnel levels increased by 31,000, with even more personnel authorized but not deployed.

As of July 31, 2002, there were 691 U.S. personnel (659 civilian police, and 32 military observers) in worldwide UN peace operations, accounting for 1.5% of total UN peacekeepers. As Commander-in-Chief, the President of the United States never gives up command authority over U.S. troops. When large numbers of U.S. troops are involved and when the risk of combat is high, operational control of U.S. forces will remain in American hands, or in the hands of a trusted military ally such as a NATO member. But the President must

[1]Year in parentheses indicates date of admission; countries with no date were original members in 1945.
[2]By Resolution 2758 (XXVI) of Oct. 25, 1971, the General Assembly decided "to restore all its rights to the People's Republic of China and to recognize the representative of its Government as the only legitimate representative of China to the United Nations."
[3]In December 1991, Russia assumed the permanent Security Council seat previously held by the U.S.S.R.

retain the flexibility, which has served the U.S. well throughout its history, to allow temporary foreign operational control of U.S. troops when it serves U.S. interests, just as it has often served U.S. interests to have foreign forces under U.S. operational control.

Arms Control and Disarmament

The 1945 UN Charter envisaged a system of regulation that would ensure "the least diversion for armaments of the world's human and economic resources." The advent of nuclear weapons came only weeks after the signing of the Charter and provided immediate impetus to concepts of arms limitation and disarmament. In fact, the first resolution of the first meeting of the General Assembly (January 24, 1946) was entitled "The Establishment of a Commission to Deal with the Problems Raised by the Discovery of Atomic Energy" and called upon the commission to make specific proposals for "the elimination from national armaments of atomic weapons and of all other major weapons adaptable to mass destruction."

The UN has established several forums to address multilateral disarmament issues. The principal ones are the First Committee of the UN General Assembly and the UN Disarmament Commission. Items on the agenda include consideration of the possible merits of a nuclear test ban, outer-space arms control, efforts to ban chemical weapons, nuclear and conventional disarmament, nuclear-weapon-free zones, reduction of military budgets, and measures to strengthen international security.

The Conference on Disarmament is the sole forum established by the international community for the negotiation of multilateral arms control and disarmament agreements. It has 66 members representing all areas of the world, including the five major nuclear-weapon states (China, France, the Russian Federation, the U.K., and the U.S.). While the conference is not formally a UN organization, it is linked to the UN through a personal representative of the Secretary-General; this representative serves as the secretary general of the conference. Resolutions adopted by the General Assembly often request the conference to consider specific disarmament matters. In turn, the conference annually reports on its activities to the General Assembly.

Human Rights

The pursuit of human rights was one of the central reasons for creating the United Nations. World War II atrocities and genocide led to a ready consensus that the new organization must work to prevent any similar tragedies in the future. An early objective was creating a legal framework for considering and acting on complaints about human rights violations. The UN Charter obliges all member nations to promote "universal respect for, and observance of, human rights" and to take "joint and separate action" to that end. The Universal Declaration of Human Rights, though not legally binding, was adopted by the General Assembly in 1948 as a common standard of achievement for all. The General Assembly regularly takes up human rights issues. The UN Human Rights Commission (UNHRC), under ECOSOC, is the primary UN body charged with promoting human rights, primarily through investigations and offers of technical assistance. As discussed, the High Commissioner for Human Rights is the official principally responsible for all UN human rights activities (see, under "The UN Family," the section on "Office of the UN High Commissioner for Human Rights").

The U.S. considers the United Nations to be a first line of defense of the principles enshrined in the Universal Declaration of Human Rights. It is also a means by which those principles can be applied more broadly around the world. A case in point is support by the United Nations for countries in transition to democracy. Technical assistance in providing free and fair elections, improving judicial structures, drafting constitutions, training human rights officials, and transforming armed movements into political parties have contributed significantly to democratization worldwide. The United Nations is also a forum in which to support the right of women to participate fully in the political, economic, and social life of their countries.

International Conferences

The member countries of the UN and its specialized agencies—the "shareholders" of the system—give guidance and make decisions on substantive and administrative issues in regular meetings held throughout each year. Governing bodies made up of member states include not only the General Assembly, ECOSOC, and the Security Council, but also counterpart bodies dealing with the governance of all other UN system agencies.

For example, the World Health Assembly and the Executive Board oversee the work of WHO. Each year, the U.S. Department of State accredits U.S. delegations to more than 600 meetings of governing bodies.

When an issue is considered particularly important, the General Assembly may convene an international conference to focus global attention and build a consensus for consolidated action. High-level U.S. delegations use these opportunities to promote U.S. policy viewpoints and develop international agreements on future activities. Recent examples include:

- The UN Conference on Environment and Development (UNCED), Rio de Janeiro, Brazil, June 1992, led to the creation of the UN Commission on Sustainable Development to advance the conclusions reached in Agenda 21, the final text of agreements negotiated by governments at UNCED;

- The World Conference on Population and Development, Cairo, Egypt, September 1994, approved a program of action to address the critical challenges and interrela-

tionships between population and sustainable development over the next 20 years;

- The World Summit on Trade Efficiency, Columbus, Ohio, October 1994, cosponsored by UN Conference on Trade and Development (UNCTAD), the city of Columbus, and private-sector business, focused on the use of modern information technology to expand international trade;

- The World Summit for Social Development, Copenhagen, Denmark, March 1995, underscored national responsibility for sustainable development and secured high-level commitment to plans that invest in basic education, health care, and economic opportunity for all, including women and girls;

- The Fourth World Conference on Women, Beijing, China, September 1995, sought to accelerate implementation of the historic agreements reached at the Third World Conference, Nairobi, Kenya, 1985;

- The Second UN Conference on Human Settlements (Habitat II), Istanbul, Turkey, June 1996, considered the challenges of human settlement development and management in the 21st century; and

- The UN Conference on Financing for Development, Monterrey, Mexico, March 2002, broke new ground in development discussions with the U.S. calling for a "new compact for development" defined by greater accountability for rich and poor nations alike.

PRINCIPAL ORGANS

Security Council—New York

The Security Council has five permanent members (China, France, Russia, the United Kingdom, and the U.S.—informally known as the P-5), each with the right to veto, and 10 non-permanent members elected by the General Assembly for two-year terms. Five non-permanent members are elected from Africa and Asia combined. One non-permanent member comes from Eastern Europe, two from Latin America, and two from Western Europe and other areas. The 2004 non-permanent members are: Algeria, Angola, Benin, Brazil, Chile, Germany, Pakistan, the Philippines, Romania, and Spain. The president (or chair) of the Council rotates monthly in English alphabetical order of the members.

Under the UN Charter, the Security Council has "primary responsibility for the maintenance of international peace and security," and all UN members "agree to accept and carry out the decisions of the Security Council in accordance with the present Charter." Other organs of the UN make recommendations to member governments. The Security Council, however, has the power under the Charter to make decisions that member states must carry out. Unlike other representative bodies, the Security Council is always in session. A representative of each Council member must always be available so that the Council can meet at any time.

Decisions in the 15-member Security Council on all substantive matters require the affirmative votes of nine members, including the support of all five permanent members. A negative vote by a permanent member (also known as a veto) prevents adoption of a proposal that has received the required number of affirmative votes. Abstention is not regarded as a veto.

Under Chapter VI of the Charter, "Pacific Settlement of Disputes," the Security Council "may investigate any dispute, or any situation which might lead to international friction or give rise to a dispute." The Council may "recommend appropriate procedures or methods of adjustment" if it determines that the situation might endanger international peace and security. These recommendations are not binding on UN members.

Under Chapter VII, the Council has broader power to decide what measures are to be taken in situations involving "threats to the peace, breaches of the peace, or acts of aggression." In such situations, the Council is not limited to recommendations but may take action, including the use of armed force "to maintain or restore international peace and security." Decisions taken under Chapter VII, both with regard to military action and to economic sanctions, are binding on all UN member states.

Starting with the UN Truce Supervision Organization (UNTSO) in 1948, the Security Council has dispatched peacekeeping missions to the world's conflicts. These missions have helped prevent or limit many outbreaks of international violence from growing into wider conflicts.

In the wake of the September 11, 2001 attacks, the Security Council, acting under Chapter VII of the UN Charter, adopted Resolution 1373, which obliges all member states to take action against international terrorism. The resolution also established the Counter Terrorism Committee within the Council to monitor progress in the war against terrorism and implementation of the resolution. The international community has adopted 13 UN counterterrorism conventions, 12 of which have entered into force. These conventions create a legal framework that the United States believes will combat international terrorism. The United States has signed and ratified the 12 resolutions that have entered into force. The 13th will open for signature on September 14, 2005.

General Assembly—New York

All UN member states are members of the General Assembly. The Assembly has six main committees: Disarmament and International Security; Economic and Financial; Social, Humanitarian, and Cultural; Special Political and Decolonization; Administrative and Budgetary; and Legal. Other committees address UN procedures, membership, and specific

issues, including peacekeeping, outer space, and UN Charter reform. The General Assembly meets in regular session once a year under a president elected from among the representatives. The regular session usually begins in mid-September and ends in mid-December. Special sessions can be convened at the request of the Security Council, a majority of UN members, or, if the majority concurs, a single member. A special session was held in October 1995 at the head of government level to commemorate the UN's 50th anniversary.

Voting in the General Assembly on important questions is by a two-thirds majority of those present and voting. Voting questions may include recommendations on peace and security; election of members to organs; admission, suspension, and expulsion of members; and budgetary matters. Other questions are decided by majority vote. Each member state has one vote. Apart from the approval of budgetary matters, including the adoption of a scale of assessment, General Assembly resolutions are not binding on the members. The Assembly may make recommendations on any matter within the scope of the UN, except on matters of peace and security under Security Council consideration. Since the late 1980s, virtually all budgetary decisions at the UN have been taken by consensus.

As the only UN organ in which all members are represented, the Assembly serves as a forum for members to launch initiatives on international questions of peace, economic progress, and human rights. It can initiate studies; make recommendations; develop and codify international law; promote human rights; and advance international economic, social, cultural, and educational programs.

The Assembly may take action on maintaining international peace if the Security Council is unable to exercise its primary responsibility, usually due to disagreement among the permanent members. The "Uniting for Peace" resolutions, adopted in 1950, empower the Assembly to convene in emergency special sessions to recommend collective measures—including the use of armed force—in the case of a breach of the peace or act of aggression. Two-thirds of the members must approve any such recommendation. Emergency special sessions under this procedure have been held on ten occasions, most recently in 1997.

Developing countries constitute a majority among the UN's 192 members. Because of their numbers, developing countries are often able to determine the agenda of the Assembly, the character of its debates, and the nature of its decisions. For many developing countries, the UN General Assembly is the source of much of their diplomatic influence and the principal forum for their foreign relations initiatives. When an issue is considered particularly important, the General Assembly may convene an international conference to focus global attention and build a consensus for consolidated action. High-level U.S. delegations use these opportunities to promote U.S. policy viewpoints and develop international agreements on future activities.

The General Assembly has also been active in the fight against terrorism. On September 12, 2001, it adopted a resolution condemning the terrorist attacks against the United States. In its 56th and 57th Sessions, the General Assembly also passed resolutions calling on all states to prevent terrorism and to strengthen international cooperation in fighting terrorism. On April 13, 2005, the General Assembly unanimously adopted the International Convention for the Suppression of Acts of Nuclear Terrorism.

Economic and Social Council—New York

The General Assembly elects the 54 members of the Economic and Social Council (ECOSOC). Eighteen are elected each year for three-year terms. The U.S. has always been a member.

Under the UN Charter, ECOSOC is responsible for identifying solutions to international economic, social, and health problems, as well as facilitating international cultural and education cooperation and encouraging respect for human rights. ECOSOC meets for one annual four-week session and for shorter ad hoc, procedural, or special meetings. Voting is by simple majority.

ECOSOC coordinates the work of fourteen specialized UN agencies, ten functional commissions, and five regional commissions. Through much of its history, ECOSOC had served primarily as a discussion vehicle. ECOSOC had little authority to force action, which a number of member states felt marginalized the agency's utility. However, beginning in 1992, the U.S. and other nations began an effort to make ECOSOC more relevant by strengthening its policy responsibilities in economic, social, and related fields, particularly in the area of development.

The resulting reform made ECOSOC the oversight and policy-setting body for UN operational development activities and established smaller executive boards for the UN Development Program (UNDP), UN Population Fund (UNFPA), and UN Children's Fund (UNICEF). The creation of an oversight body and smaller executive boards provides those agencies with operating guidance and promotes more effective management. The reform also gave ECOSOC a strong hand in ensuring that UN agencies coordinated their work on issues of common interest, such as narcotics control, human rights, the alleviation of poverty, and the prevention of HIV/AIDS.

One positive impact of this reform was the manner in which the UN development system began to respond more coherently and efficiently to humanitarian crises around the world. Secretary-General Kofi Annan's recent reform initiatives have attached considerable importance to further strengthening coordination among relief agencies.

Another positive reform outcome was the ECOSOC decision in 1994 to authorize the creation of the Joint United Nations Program on HIV/AIDS (UNAIDS). This Program acts

as the main advocate for worldwide action against HIV/AIDS and has brought together into one consolidated global program the AIDS-related resources and expertise of UNICEF, UNDP, UNFPA, UNESCO, the UN International Drug Control Program, the World Health Organization, the International Labor Organization, and the World Bank. UNAIDS has been instrumental in the expanded global response to HIV/AIDS, eliminating duplication among agencies and enhancing the ability of member states to respond effectively to the AIDS pandemic. UNAIDS began operating in January 1996.

International Court of Justice—The Hague, Netherlands

The International Court of Justice (ICJ) is the principal judicial organ of the UN. Established in 1946, its main functions are to decide cases submitted to it by states and to give advisory opinions on legal questions submitted to it by the General Assembly or Security Council, or by such specialized agencies authorized to do so by the General Assembly in accordance with the UN Charter.

The Court is composed of 15 judges elected by the General Assembly and the Security Council from a list of persons nominated by the national groups in the Permanent Court of Arbitration. Judges serve for nine years and may be re-elected. No two may be nationals of the same country. One-third of the Court is elected every three years. A U.S. citizen has always been a member of the Court. Questions before the Court are decided by a majority of judges present. Only states may be parties in cases before the International Court of Justice. This requirement does not preclude private interests from being the subject of proceedings if one state brings a case against another. Jurisdiction of the Court is based on the consent of each UN member state to comply with an ICJ decision in a case to which it is a party. Any judgments reached are binding. If a party fails to perform its obligations under an ICJ decision, the other party may seek recourse in the Security Council. State parties to the Court's statute may declare their recognition of the compulsory jurisdiction of the Court for a wide range of international disputes. The U.S. accepted the Court's compulsory jurisdiction in 1946, but withdrew its acceptance following the Court's decision in a 1986 case involving activities in Nicaragua. Examples of cases include:

- a complaint by the U.S. in 1980 that Iran was detaining American diplomats in Tehran in violation of international law;
- a complaint filed by Iran in 1992 alleging that the United States violated a treaty obligation by attacking three Iranian oil platforms. The U.S. filed a counterclaim with respect to Iranian attacks on U.S. shipping interests in the Persian Gulf;
- a dispute over the course of the maritime boundary dividing the U.S. and Canada in the Gulf of Maine area, filed in 1981, judgment in 1984; and
- a complaint filed by the Democratic Republic of the Congo (DROC) in 1999 against Rwanda alleging violations of human rights and international humanitarian law committed on DROC territory.

Secretariat—New York

The Secretariat is composed of international civil servants who carry out the daily tasks of the United Nations. It provides studies, information, and facilities needed by UN bodies for their meetings. It also carries out tasks as directed by the Security Council, the General Assembly, the Economic and Social Council, and other UN bodies. The Charter provides that the staff be chosen by application of the "highest standards of efficiency, competence, and integrity," with due regard for the importance of recruiting on a wide geographical basis.

The Charter provides that the staff shall not seek or receive instructions from any authority other than the UN. Each UN member is obligated to respect the international character of the Secretariat and not seek to influence its staff.

Under the UN Charter, the chief administrative officer of the UN and the head of the Secretariat is the Secretary-General of the United Nations, appointed to a five-year term by the General Assembly on the recommendation of the Security Council. Kofi Annan, the first Secretary-General from sub-Saharan Africa, began his first term on January 1, 1997. He was reappointed to a second term beginning January 1, 2002.

The Secretary-General's duties include helping resolve international disputes, administering peacekeeping operations, organizing international conferences, gathering information on the implementation of Security Council decisions, and consulting with member governments regarding various initiatives. The Secretary-General may bring to the attention of the Security Council any matter that, in his or her opinion, may threaten international peace and security. In 1997, the General Assembly established a position of Deputy Secretary-General. Since 1998, Louise Frechette of Canada has held this position. Other senior UN officials, such as the Under-Secretaries-General for Political Affairs and Peacekeeping, also advise the Secretary-General. The Secretary-General also appoints Special Representatives and Envoys to mediate conflict in the world's trouble spots.

THE UN FAMILY

In addition to the principal UN organs, the UN family includes over 60 programs or specialized agencies, often headquartered in one of the UN offices around the world. Some agencies existed prior to UN creation and are related to it by agreement. Others were established by the General Assembly. Each provides expertise in a specific area. Some of those programs and agencies (with the location of their headquarters) are described

below. A diagram of the entire UN system can be found at www.un.org/aboutun/chart. A map showing principal UN offices around the world can be found at http://www.un.org/aroundworld/map.

Funds and Programs

UN Children's Fund (UNICEF). New York City. UNICEF provides long-term humanitarian and developmental assistance to children and mothers in developing countries. UNICEF relies on contributions from governments and private donors. Its programs emphasize developing community-level services to promote the health and well being of children. UNICEF was awarded the Nobel Peace Prize in 1965.

UN Development Program (UNDP). New York City. UNDP is the largest multilateral source of grant technical assistance in the world. Voluntarily funded, it provides expert advice, training, and limited equipment to developing countries, with increasing emphasis on assistance to the poorest countries. It focuses on six areas of assistance: democratic governance, poverty reduction, crisis prevention and recovery, energy and the environment, information technology, and HIV/AIDS.

UN Environment Program (UNEP). Nairobi, Kenya. UNEP coordinates UN environmental activities, assisting developing countries in implementing environmentally sound policies. UNEP has developed guidelines and treaties on issues such as the international transport of potentially harmful chemicals, transboundary air pollution, and the contamination of international waterways.

The UN High Commissioner for Refugees (UNHCR). Geneva, Switzerland. UNHCR protects and supports refugees at the request of a government or the UN and assists in their return or resettlement. UNHCR was awarded the Nobel Peace Prize in 1954 and 1982.

World Food Program (WFP). Rome, Italy. The WFP distributes food commodities to long-term refugees and displaced persons, and provides emergency food assistance during natural and man-made disasters. In 2004, the WFP fed 113 million people in 80 countries, including most of the world's refugees and internally displaced people.

Specialized Agencies

Food and Agriculture Organization (FAO). Rome, Italy. FAO programs seek to raise levels of nutrition and standards of living; to improve agricultural productivity, to promote rural development; and, by these means, to provide access of all people at all times to the food they need for an active and healthy life.

International Civil Aviation Organization (ICAO). Montreal, Canada. ICAO develops the principles and techniques of international air navigation and fosters the planning and development of international air transport to ensure safe and orderly growth.

The ICAO Council adopts standards and makes recommendations concerning air navigation, the prevention of unlawful interference, and the facilitation of border-crossing procedures for international civil aviation.

International Labor Organization (ILO). Geneva, Switzerland. The ILO seeks to strengthen worker rights, improve working and living conditions, create employment, and provide information and training opportunities. ILO programs include the occupational safety and health hazard alert system and the labor standards and human rights programs.

International Maritime Organization (IMO). London, England. The IMO's main objective is to facilitate cooperation among governments on technical matters affecting international shipping to achieve the highest possible degree of maritime safety and navigational efficiency. It also attempts to improve the marine environment through the prevention of pollution caused by ships and other craft and deals with legal matters connected with international shipping.

International Telecommunication Union (ITU). Geneva, Switzerland. The ITU brings together governments to coordinate the establishment and operation of global communication networks and services, including telegraph, telephone, radio communications, Internet, and the information society. It fosters cooperation and partnership among its members and offers technical assistance in this area.

UN Educational, Scientific and Cultural Organization (UNESCO). Paris, France. UNESCO's purpose is to contribute to peace and security by promoting cooperation among nations through education, science, culture, and communication to further universal respect for justice, the rule of law, human rights, and fundamental freedoms without distinction of race, sex, language, or religion.

Universal Postal Union (UPU). Bern, Switzerland. The UPU attempts to secure the organization and improvement of the postal services, to promote international collaboration, and provide technical assistance in this area. The member countries constitute a single postal territory.

World Intellectual Property Organization (WIPO). Geneva, Switzerland. The purpose of WIPO is to promote international cooperation in the field of intellectual property rights. It works in the areas of both industrial and literary-artistic property.

World Meteorological Organization (WMO). Geneva, Switzerland. WMO coordinates global scientific activity to allow increasingly prompt and accurate weather prediction and other services for public, private, and commercial use.

World Health Organization (WHO). Geneva, Switzerland. WHO acts as a coordinating authority on pressing global public health issues.

WHO's objective, as set out in its Constitution, is the attainment of all peoples of the highest possible level of health.

Other Related Bodies

World Bank. Washington, DC. The World Bank is one of the world's main sources of development assistance. It focuses on the poorest people in the poorest countries.

International Atomic Energy Agency (IAEA). Vienna, Austria. The role of IAEA is to promote the contribution of atomic energy for peace, health, and prosperity throughout the world and to enhance the safety and security of radioactive materials and nuclear facilities worldwide. It has the responsibility of creating and implementing the safeguard provisions of various nuclear non-proliferation and nuclear free zone treaties.

International Monetary Fund (IMF). Washington, DC. The purposes of the IMF are to promote international monetary cooperation through consultation and collaboration, to promote exchange stability and orderly exchange arrangements, and to assist in the establishment of a multilateral system of payments and the elimination of foreign exchange restrictions.

REFORM OF THE UNITED NATIONS

The United Nations is currently engaged in one of the most important debates in its history: how to reform itself, strengthen itself as an institution, and ensure that it addresses effectively the threats and challenges of the 21st century. The United States is leading the effort to strengthen and reform the UN.

Budget, Management, and Administrative Reform: The U.S. seeks to ensure the highest standards of integrity and promote efficiency within the UN system, so that member states receive the greatest benefit from resources invested in the institution. Meaningful institutional reform must include measures to improve internal oversight and accountability, to identify cost savings, and to allocate resources to high priority programs and offices.

Peace Building Commission: The U.S. strongly supports the Secretary-General's idea of a Peace Building Commission that would allow the UN to be more effective in galvanizing the work of the international community to help countries after the fighting has stopped. Such a Commission would play an important role in helping countries in post-conflict situations. It could provide reconstruction and humanitarian support and set the stage for long-term development.

Human Rights Council: The U.S. supports the Secretary-General's initiative to replace the Commission on Human Rights with a smaller, action-oriented Human Rights Council, whose membership should not include states with a record of abuse. The problems with the current Commission, where human-rights abusers sit in judgment of democratic countries, are well known. The Council's mandate would be to address the most egregious human rights abuses, provide technical assistance, and promote human rights as a global priority.

Democracy Initiatives and the UN Democracy Fund: President Bush in his September 2004 UN General Assembly speech put this proposal on the table, as democracy promotion is one of our core aims. The goal is to create a mechanism for supporting new and emerging democracies, providing assistance that would help develop civil society and democratic institutions.

Comprehensive Convention on Terrorism: The U.S. strongly supports the adoption of the Comprehensive Convention on Terrorism (CCIT), a subject of longstanding debate. This would be an important symbolic achievement in the UN's global effort to counter terrorism.

Development: The United States plays a leading, active, and positive role in development. The U.S. has a commitment to building healthy institutions and strong economies, through trade, foreign investment, and aid. As agreed in the Monterrey Consensus, the focus should be on supporting good governance and sound economic policies.

UN SECRETARIES GENERAL

Trygve Lie (Norway)—Feb. 1, 1946-April 10, 1953

Dag Hammarskjold (Sweden)—April 10, 1953-Sept. 8, 1961

U Thant (Burma)—Nov. 3, 1961-Dec. 31, 1971 (initially appointed acting Secretary General; formally appointed Nov. 30, 1962)

Kurt Waldheim (Austria)—Jan. 1, 1972-Dec. 31, 1981

Javier Perez de Cuellar (Peru)—Jan. 1, 1982-Dec. 31, 1991

Boutros Boutros-Ghali (Egypt)—Jan. 1, 1992-Dec. 31, 1996

Kofi Annan (Ghana)—Jan. 1, 1997-Dec 31, 2006

Ban Ki-moon (South Korea)—Jan. 1, 2007-present

U.S. REPRESENTATION

The U.S. Permanent Mission to the UN in New York is headed by the U.S. Permanent Representative to the UN, with the rank of Ambassador Extraordinary and Plenipotentiary. Ambassador John R. Bolton has served in that position since August 1, 2005.

The mission acts as the channel of communication for the U.S. Government with the UN organs, agencies, and commissions at the UN headquarters and with the other permanent missions accredited to the UN and the non-member observer missions. The U.S. mission has a professional staff made up largely of career Foreign Service officers, including

specialists in political, economic, social, financial, legal, and military issues. The United States also maintains missions to international organizations in Geneva, Rome, Vienna, Nairobi, Montreal, and Paris. These missions report to the Department of State and receive guidance on questions of policy from the President, through the Secretary of State.

The Assistant Secretary of State for International Organization Affairs coordinates relations with the UN and its family of agencies. The U.S. Mission to the United Nations is located at 140 East 45th Street, New York, NY 10017 (tel. 212-415-4000). More information about the U.S. Mission to the UN is available on the mission's web site at www.usunnewyork.usmission.gov.

U.S. Representatives to the United Nations

Edward R. Stettinius, Jr.—March 1946-June 1946

Herschel V. Johnson (acting)—June 1946-January 1947

Warren R. Austin—Jan. 1947-Jan. 1953

Henry Cabot Lodge, Jr.—Jan. 1953-Sept. 1960

James J. Wadsworth—Sept. 1960-Jan. 1961

Adlai E. Stevenson—Jan. 1961-July 1965

Arthur J. Goldberg—July 1965-June 1968

George W. Ball—June 1968-Sept. 1968

James Russell Wiggins—Oct. 1968-Jan. 1969

Charles W. Yost—Jan. 1969-Feb. 1971

George W. Bush—Feb. 1971-Jan. 1973

John P. Scali—Feb. 1973-June 1975

Daniel P. Moynihan—June 1975-Feb. 1976

William W. Scranton—March 1976-Jan. 1977

Andrew Young—Jan. 1977-April 1979

Donald McHenry—April 1979-Jan. 1981

Jeane J. Kirkpatrick—Feb. 1981-April 1985

Vernon Walters—May 1985-Jan. 1989

Thomas R. Pickering—March 1989-May 1992

Edward J. Perkins—May 1992-Jan. 1993

Madeleine K. Albright—Feb. 1993-Jan. 1997

Bill Richardson—Feb. 1997-Sept 1998

A. Peter Burleigh (acting)—Sept 1998-Aug 1999

Richard Holbrooke—Aug. 1999-Jan. 2001.

James B. Cunningham (acting)—Feb. 2001-Sept. 2001

John Negroponte—Sept. 2001-June 2004.

John C. Danforth—June 2004–Jan. 2005

Anne W. Patterson (acting) Jan.–Aug. 2005

John R. Bolton—August 2005–Dec. 2006

Zalmay Khalilzad—March 2007–Jan. 2009

Susan Rice—Jan. 2009–present

U.S. POLICY IN THE UNITED NATIONS SECURITY COUNCIL

September 21, 2006

The United States looks to work with the United Nations, particularly with the United Nations Security Council (UNSC), to address the varied challenges facing the international community.

Ending the Genocide in Sudan

As a result of the conflict in Darfur, which the United States has called a genocide, thousands of people have been killed, nearly 2 million internally displaced, and over 200,000 made refugees in Chad. With the African Union and other international partners, the United States led the way in achieving the Darfur Peace Agreement (DPA), signed on May 5, 2006, between the largest rebel group and the Sudanese government. The UN Security Council issued a Presidential Statement on May 9, supporting the implementation of the DPA, and two UN Security Council Resolutions, 1679 and 1706. The latter resolution called for the deployment of a UN peacekeeping force to Darfur. The United States is working intensively with other Security Council members to ensure that the transition of the African Union forces to a UN-led operation will take place as soon as possible.

Nonproliferation and Iran

Iran's pursuit of nuclear weapons represents a threat to the entire international community. In defiance of repeated calls from the United Nations Security Council and the International Atomic Energy Agency, the Iranian regime is continuing its nuclear program. The United States, with its international partners, will continue to make every effort to achieve a successful diplomatic outcome, but there must be consequences, such as Security Council sanctions, for Iran's continued defiance.

A Lasting Peace in Lebanon

The United States worked with the other members of the Security Council to establish conditions for a lasting peace in Lebanon. The enhancement of the UN peacekeeping operation in Lebanon will help the democratic Lebanese government to regain control over its territory. It also will help to provide the conditions for the full implementation of Resolution 1559, which calls for the end of foreign interference in Lebanese internal affairs and for the disbanding and disarming of militias in Lebanon.

Nonproliferation and North Korea

In response to North Korea's launch of several ballistic missiles on July 5, 2006, the United Nations Security Council unanimously adopted Resolution 1695. The United States participated in and fully supported the Japanese-led efforts in making this

resolution possible. In concert with its regional partners, the United States has urged the North Koreans to return without delay to the six-party talks for the denuclearization of the Korean peninsula. This would allow North Korea to gain economic assistance and security, and to integrate itself into the region.

U.S. Financial Contributions to the UN System

September 20, 2007

In 2006, the United States contributed:

- 41.5%, or $1.12 billion, of the budget of the World Food Program (WFP), which provides over 4 million tons of food to 87.8 million people in 78 countries each year;
- 24%, or $346 million, of the budget of the United Nations High Commissioner for Refugees (UNHCR) to protect and safeguard the rights and well-being of 20.8 million refugees, returnees, stateless persons, and internally displaced persons in 116 countries; and
- 9.4%, or $260 million, of the budget of the United Nations Children's Fund (UNICEF) to feed, educate, and protect children in 157 countries, including providing over 3 billion doses of vaccines to children.

U.S. Leadership and Engagement in the United Nations

The United States co-founded and continues to be the leading financial supporter of the United Nations. The U.S. believes that the UN has an essential role to play in fostering international peace and security, fighting poverty through development, providing humanitarian assistance, eradicating disease, advancing freedom, and promoting human rights and democracy. The United States is committed to ensuring good stewardship of United Nations resources so that these universal goals are met effectively and efficiently. The United States has been the largest contributor to the United Nations every year since its creation in 1945. In fiscal year 2006, the U.S. contributed over $5.3 billion to the United Nations system to support UN agencies and peacekeeping operations. The U.S. contribution to UN peacekeeping alone totaled nearly $870 million in fiscal year 2006.

As the UN's largest contributor, the U.S. will continue to call for the accountable use of these funds. In particular, the U.S. has proposed using the General Assembly's biennial budget process to reward programs that achieve desired results, while terminating low priority, poorly performing, or unnecessary programs.

In addition, the U.S. has called for a maximum of accountability and transparency in the management of all UN programs and funds. Stronger internal oversight and improved reporting require adequate resources and greater independence for the key Office of Internal Oversight Services. A fair and open procurement system is also necessary to ensure accountability and transparency.

U.S. Commitment to the UN's Founding Ideals

September 20, 2007

UN Reforms Secured Through U.S. Diplomatic Engagement Since 2005

- Creation of an independent Ethics Office;
- Additional resources for the Office of Internal Oversight Services;
- Expanded financial disclosure program;
- Strengthened "whistleblower" protections;
- Use of International Public Sector Accounting Standards;
- Support for establishment of the Independent Audit Advisory Committee;
- Support for mechanism to adjudicate staff grievances.

The United Nations was created 60 years ago to advance freedom, democracy, peace, security, human rights, and prosperity for all people.

The United States is not alone in its commitment both to these ideals and to ongoing reform of UN operations. In 2005, more than 170 heads of state and governments expressed a global consensus that wide-ranging UN reform is imperative.

U.S. Priorities for UN Reform Include:

- Strengthening the UN's internal oversight body to better identify, obtain, and deploy the resources to accomplish its mandate;
- Institutionalizing a system-wide approach to enforcing ethical conduct;
- Enhancing transparency and accountability through procurement reform;
- Increasing the UN's effectiveness and efficiency through results-based management.

Ethics

UN employees around the world must abide by the highest standards of ethical conduct. With the number of peacekeeping operations at an all-time high and growing, it is all the more essential for the UN Department of Peacekeeping Operations to consistently and comprehensively enforce its zero-tolerance policy on sexual exploitation and abuse by UN peacekeepers of the vulnerable citizens they are entrusted with protecting. The establishment of an independent Ethics Office and enhanced "whistleblower" protections for UN staff who report wrongdoing were positive steps.

Now, the Secretary-General should ensure the office's jurisdiction over all UN funds and programs, and guarantee full protection for whistleblowers. The Secretary-General has led the way in publicly disclosing his finances, and all senior UN officials should follow his example. UN staff should not only benefit the people they serve by their work, but also should set a standard for ethical public service.

Effectiveness and Efficiency

Member States and United Nations officials should ensure careful stewardship of the UN's limited resources. Effective, results-based management will maximize resources available to improve the lives of the world's neediest people, who have the most to gain from reform. The General Assembly's biennial budget process is a powerful reform tool and should be used to reward programs that achieve desired results, while terminating low priority, poorly performing, or unnecessary programs. This approach requires measurable standards for success and regular performance assessments.

The UN Secretariat must ensure that the restructuring of the Department of Peacekeeping Operations and the creation of the new Department of Field Support strengthen UN capacity to backstop a growing number of peacekeepers.

Accountability and Transparency

Accountability and transparency are at the heart of any well-run, effective organization. The UN must enhance accountability and transparency through a stronger, more independent Office of Internal Oversight Services with adequate and flexible funding; improved reporting practices; and a fair, open, and cost-effective procurement system.

Standards for Leadership

To accomplish its mission, the United Nations requires leaders, staff, and Member States whose conduct reflects the ideals of the UN Charter. Nations that violate these ideals or are under UN sanctions should not be elected to limited membership bodies, such as the UN Security Council or the Human Rights Council, or to leadership positions in any UN body.

A Mission of Liberation Around the World

September 25, 2007

President Bush addressed the United Nations General Assembly and called on every UN member to join a mission of liberation from tyranny, hunger, disease, illiteracy, and poverty. Achieving the promise of the UN's commitment to "freedom, justice, and peace" laid out in the Universal Declaration of Human Rights requires both confronting long-term threats and answering the immediate needs of today. The UN must work to free people from tyranny and violence, hunger and disease, illiteracy and ignorance, and poverty and despair.

Liberation From Tyranny And Violence

Terrorists and extremists who kill the innocent are a threat to civilized people everywhere. All civilized nations must work together to stop them by sharing intelligence about their networks, choking off their finances, and capturing or killing their operatives. In the long run, the best way to defeat the extremists is to defeat their dark ideology with a more hopeful vision of liberty. Citizens in Lebanon, Afghanistan, and Iraq have made the choice for democracy, and every civilized nation has a responsibility to stand with them. The extremists are doing everything in their power to bring down these young democracies, and the people of Lebanon, Afghanistan, and Iraq have asked for our help.

The United States salutes the many nations that have recently taken strides toward liberty—including Ukraine, Georgia, Kyrgyzstan, Mauritania, Liberia, Sierra Leone, and Morocco. Every civilized nation has a responsibility to stand up for people suffering under dictatorship. In Belarus, Cuba, North Korea, Zimbabwe, Syria, and Iran, brutal regimes deny their people the fundamental rights enshrined in the Universal Declaration. Americans are also outraged by the situation in Burma, where a military junta has imposed a 19-year reign of fear. President Bush announced a series of steps to help bring peaceful change to Burma. The President urges the United Nations and all nations to use their diplomatic and economic leverage to help the Burmese people reclaim their freedom. The United States will:

- Tighten economic sanctions on the leaders of the regime and their financial backers.
- Impose an expanded visa ban on those responsible for the most egregious violations of human rights, as well as their family members.
- Facilitate the efforts of humanitarian groups working to alleviate suffering in Burma.

The United Nations must insist on free speech, free assembly, and, ultimately, free and competitive elections in Cuba as the nation transitions from the long dictatorship of Fidel Castro.

The United Nations must insist on freedom for the people of Zimbabwe. President Robert Mugabe's government has cracked down violently on peaceful calls for reform, and forced millions to flee their homeland. The United Nations must live up to its promise to promptly deploy peacekeeping forces to Darfur. The U.S. has provided more than $2 billion in humanitarian and peacekeeping aid to Darfur since 2005, and has responded to the repression in Sudan and genocide in the Darfur region with tough sanctions against those responsible for the violence. The President looks forward to attending a Security Council meeting on Peace and Security in Africa, chaired by French President Nicolas Sarkozy.

Liberation From Hunger And Disease

Today, more than half of the world's food assistance comes from America.

The President has also proposed using a portion of U.S. emergency food assistance to purchase the crops of local and regional farmers. This would help build up local agriculture and break the cycle of famine in the developing world, and the President urges the United States Congress to support this approach. The President calls on UN member states to work together to turn the tide against HIV/AIDS and to eliminate malaria.

In 2003, the United States launched a $15 billion Emergency Plan for AIDS Relief—the largest national commitment to combat a single disease in history. This effort has helped bring life-saving treatments to more than a million people in sub-Saharan Africa. The President has announced a plan to double this initial commitment with an additional $30 billion over five years.

The President's Malaria Initiative is spending $1.2 billion over five years to combat malaria in 15 African countries. This funding is providing bed nets, indoor spraying, and anti-malaria medicine with the goal of reducing mortality by 50 percent in the most vulnerable groups.

The Global Fund is working with governments and the private sector to fight HIV/AIDS, TB, and malaria around the world. The United States is the fund's largest donor at about 30 percent.

Liberation From Illiteracy And Ignorance

The United States is joining with nations around the world to help them provide a better education for their people. In partnership with other nations, America has: helped train more than 600,000 teachers and administrators; distributed tens of millions of textbooks; and helped nations raise standards in their schools. Last May, the President committed to provide an additional $525 million over the next five years to make our international education programs even more robust.

On September 24, First Lady Laura Bush announced that the basic education initiative will focus on: Ethiopia, Ghana, Honduras, Liberia, Mali, and Yemen.

Liberation From Poverty And Despair

In the long run, the best way to lift people out of poverty is through trade and investment. Open markets ignite growth, encourage investment, increase transparency, strengthen the rule of law, and help countries help themselves.

The United States has both the will and the flexibility to help conclude a successful Doha Round, and the President urges other leaders to direct their negotiators to demonstrate the same spirit. The Doha round of trade talks is a once-in-a-generation opportunity to open up markets, create new trade flows, and help millions escape poverty, and the President is optimistic that we can reach a good agreement.

The United States will continue to pursue market-opening agreements that increase trade and investment. We recently signed free trade agreements with Peru, Colombia, Panama, and South Korea. These agreements embody the values of open markets, transparent and fair regulation, respect for private property, and resolving disputes under international law rules. They are now moving towards a Congressional vote, and the President urges Congress to approve them as soon as possible.

Through the Millennium Challenge Account, the United States is delivering economic assistance to developing nations in innovative ways. The Millennium Challenge Account increases aid to nations that govern justly, fight corruption, invest in the education and health of their people, and promote economic freedom.

We have signed Millennium Challenge Compacts with 14 nations, most recently with Morocco. Together, these are worth nearly $4.6 billion, and we have just approved two more compacts with Mongolia and Tanzania.

WORLD TRADE ORGANIZATION

Last Updated: July 2008

Official Name:
World Trade Organization

Editor's note: The information in this article was compiled and edited from *Background Notes* and *Fact Sheets* available through the U.S. Department of State. Additional information has been added from releases and reports available from the U.S. Department of State as of July 2008.

BACKGROUND

The World Trade Organization (WTO), established on January 1, 1995, is a multilateral institution charged with administering rules for trade among member countries. Currently, there are 153 official member countries. The United States and other countries participating in the Uruguay Round of Multilateral Trade Negotiations (1986–1994) called for the formation of the WTO to embody the new trade disciplines adopted during those negotiations.

The WTO functions as the principal international body concerned with multilateral negotiations on the reduction of trade barriers and other measures that distort competition. The WTO also serves as a platform for countries to raise their concerns regarding the trade policies of their trading partners. The basic aim of the WTO is to liberalize world trade and place it on a secure basis, thereby contributing to economic growth and development.

The Uruguay Round

Progress toward multilateral trade liberalization takes place through rounds of negotiations. Eight rounds have been completed since 1948. The eighth round, the Uruguay Round, began in Punta del Este, Uruguay, in September 1986 and concluded at Marrakech, Morocco, in April 1994.

On December 15, 1993, 123 countries, accounting for more than 90% of world trade, concluded a historic agreement to reform international trade. The Uruguay Round of multilateral trade negotiations, conducted under the auspices of the General Agreement on Tariffs and Trade (GATT), extended the GATT's rules to new areas of trade and updated its organization to conform to a more dynamic global trading system.

The WTO effectively replaced the GATT on January 1, 1995.

The Doha Round

At the WTO Ministerial Conference in Doha, Qatar, held in November 2001, the Doha Development Agenda (DDA) was launched. The WTO reiterated its goals of promoting economic development and alleviating poverty through international trade. It recognized the particular vulnerability of the least-developed countries in the world, and pledged commitment to address the marginalization of those poor countries in international trade and to improve their participation in the multilateral trading system. Twenty-one subjects were listed in the Doha Declaration, among them decisions clarifying the objectives of developing country member governments. These included issues relating to agriculture, subsidies, textiles and clothing, technical barriers to trade, trade-related investment measures, and rules of origin. Other subjects covered included services, intellectual property rights, transparency, trade and the environment, electronic commerce, and technical cooperation. The Declaration set the date of January 1, 2005, for adopting all but two of the negotiations. The original deadline of January 1, 2005 was missed. It was extended to the end of 2006, but that deadline was also missed. Efforts then focused on achieving a breakthrough in 2007 and 2008.

SPECIFIC AREAS OF FOCUS

Tariffs

Previously existing as well as newly established tariffs will be "bound." Once bound, a tariff cannot be increased without compensation to other countries. In addition, all countries were required to begin reducing tariffs in 1995, with specific schedules established for each member. For developed countries, tariffs will be reduced a minimum of 15% per product line and an overall average of 36%

over a six-year implementation period. Developing countries are permitted smaller reduction commitments and longer implementation periods (10 years to cut tariffs by 24%). Important gains include 50–100% cuts in tariffs on electronic items (such as semiconductors and computer parts) and harmonization of tariffs in the chemical sector at low rates.

Services

The agreement on trade in services establishes new rules in more than 150 service sectors and subsectors (such as advertising, law, accounting, information and computer services, environmental services, engineering, and tourism), thus enabling U.S. firms operating overseas to be treated as fairly as local firms.

Intellectual Property

The agreement on trade-related intellectual property rights establishes improved safeguards to protect intellectual property rights. Computer programs and databases are protected under copyright. Patents for virtually all types of inventions, including those in pharmaceuticals and chemicals, are protected for up to 20 years.

Agriculture

The agreement on agriculture requires that all members reduce aggregate support to their domestic agricultural sectors by 20% from a 1986–88 base period. (The U.S. already has reduced domestic support so that further reductions will not be necessary.)

Agricultural products, which represent 10% of total U.S. merchandise exports, were the second-largest contributor to the overall U.S. trade balance in 1992. Since the U.S. is the world's major exporter of agricultural products, with a share of world trade averaging about 15% in recent years, increased market access and reduced subsidies for agriculture will create important opportunities for U.S. producers and exporters. An agricultural export subsidy agreement specifies reductions in spending on export subsidies (36% over six years for developed countries, 24% over 20 years for developing countries) and outlaws the extension of subsidies to new products not subsidized during a 1986–90 base period.

An agreement on sanitary and phytosanitary measures establishes a scientific standard for measures restricting plant and animal product imports on the basis of health or safety concerns, thereby eliminating import restrictions based on arbitrary or unsubstantiated health concerns.

Environment

Although environmental issues were not included in the original Uruguay Round, the U.S. initiated discussion of the environment in the late stages of the negotiations. The new Committee on Trade and Environment in the WTO will review the relationship of economic and environmental objectives in trade negotiations.

STRUCTURE AND PROCEDURES

Under the Uruguay Round Agreement, the World Trade Organization replaced the GATT, with responsibility for enforcing the revised international trade rules, providing procedures for negotiating additional reductions of trade barriers, and settling disputes arising in areas covered by the new trade agreements.

Trade and Environment

The WTO agreement recognizes the importance of environmental concerns. This addresses a key interest among U.S. environmental and conservation groups, which have often expressed concern that international trade agreements have failed to take environmental issues into account.

A WTO committee on trade and environment aims to ensure the responsiveness of the multilateral trading system to environmental objectives.

Decision-making

The U.S. has successfully retained the practice of general decision-making by consensus followed under the GATT since 1947. Consensus is achieved "if no member, present at the meeting where the decision is taken, formally objects to the proposed decision." This continues to enable the U.S. to prevent a decision that it perceives to be contrary to its interest.

Amendments

The agreement permits amendments but ensures that an amendment of the substantive rights and obligations not be binding on the U.S. without acceptance of the amendment. In contrast, amendments to pure procedural provisions of the Uruguay Round agreements will be binding on all members in order to avoid the destabilizing effect that would result if different members were subject to different procedural rules.

Waivers

The agreement allows members to grant waivers of substantive provisions in the various Uruguay Round agreements, but only in exceptional circumstances. In the case of an obligation subject to phased-in implementation, such as those in the agreement on trade-related intellectual property issues (TRIPs), which has not yet been fulfilled by the requesting member, members may grant a waiver only by consensus. Also, the waiver provision substantially increases the threshold for obtaining waivers, from two-thirds of members present to three-quarters of all members. Any waivers granted are subject to specific conditions, including a date on which the waiver will terminate.

Interpretations

Under the WTO, the reports of dispute settlement panels do not constitute "authoritative" interpreta-

tions of the relevant agreements. Only the members themselves—acting through the Ministerial Conference or General Council—can adopt such an interpretation. The agreement also states that interpretations not be used in a manner that undermine amendment provisions.

Non-application

The agreement does not permit sector non-application. Thus, for example, India is precluded from not applying the TRIPs agreement to the U.S. With respect to WTO members that accede to the WTO but are not "original members" (generally, are not GATT contracting parties), a member can invoke "global" non-application. Thus, with respect to acceding members, the U.S. can choose not to apply the GATT and the Uruguay Round agreements to that country as a whole.

Definitive Application

In joining the WTO agreement, members agree to the definitive application of the obligations of the Uruguay Round multilateral trade agreements. (Accession to the multilateral trade agreements, such as the agreement on government procurement, is limited to those members who affirmatively accept these agreements.) Annex 1 to the WTO agreement eliminates the protocol of provisional application and corresponding provisions in protocols of accession to the GATT that had the effect of allowing certain existing legislation of contracting parties that are inconsistent with the GATT. However, Annex 1 includes a clause that protects from GATT challenge U.S. maritime laws relating to sabotage ("Jones Act").

U.S.-WTO COOPERATION

Benefits to the U.S. Economy

Exports of goods and services have been steadily rising as a share of the U.S. economy's total output. An increase in U.S. export opportunities helps stimulate greater capital investment; technological innovation; higher productivity; job growth; and rising living standards. Export growth is important not only for U.S. export producers but also for U.S. industries which provide the intermediate and capital goods used by producers of exports as well as the U.S. firms and workers supporting the export process. A large and growing share of the U.S. work force depends on U.S. exports for employment. The substantial reductions in trade barriers negotiated in the Uruguay Round will result in lower prices for imported intermediate and final products and a greater variety of goods for American consumers.

Competition in the U.S. market from increased imports stimulates U.S. industries to improve their productivity, quality, and technology; this can benefit both the firms and U.S. consumers who buy their goods at reduced prices.

U.S. Trade Policy

U.S. trade policy aims to raise standards of living in the U.S. and around the world. Trade accounts for one-quarter of the U.S. gross domestic product; for many nations, the figure is much higher. In a changing and more interdependent world, the key to prosperity and improved living standards is engagement rather than withdrawal and protectionism. The Administration is committed to harnessing the forces of change for the benefit of all Americans and the people of all nations through reducing trade barriers and promoting sustainable development.

When the General Agreement on Tariffs and Trade (GATT) began after World War II, it dealt only with tariffs. Later, the U.S. began to address non-tariff barriers to global trade. Opening new markets is critical to fostering global growth and creating jobs both in the United States—richer countries are able to buy more goods and services from the U.S.—and abroad. But sustainable development also is important to such growth, and it has both environmental and social dimensions. As President Clinton cautioned in January 1994:

"While we continue to tear down anti-competitive practices and other barriers to trade, we simply have to ensure that our economic policies also protect the environment and the well-being of workers."

More nations are recognizing that economic growth must occur at a rate that the environment can sustain. The U.S. strongly favored the establishment of the World Trade Organization's Committee on Trade and Environment to discuss the environmental aspects of sustainable development. Another dimension of sustainable development is that a rise in productivity should occur in tandem with the growth of middle classes, the rise in standards of living, and the improvement of internationally recognized labor standards. Such labor standards include freedom of association, freedom to organize and bargain collectively, freedom from forced or compulsory labor, a minimum age for the employment of children, and conditions of work.

The U.S. supports improved environmental and labor standards; at the same time, it will resist efforts to use them as protectionist tools.

U.S. Objectives

The principal trade negotiating objectives of the United States regarding the improvement of the General Agreement on Tariffs and Trade (GATT) and multilateral trade negotiation agreements were:

- To enhance the status of the GATT;
- To improve the operation and extend the coverage of the GATT and such agreements and arrangements to products, sectors, and conditions of trade not adequately covered; and
- To expand country participation in particular agreements or arrangements, where appropriate.

The agreement establishing the WTO facilitates the implementation of trade agreements in the diverse areas of trade in goods, trade in services, and the protection of trade-related intellectual property rights. The WTO encompasses the former GATT structure and extends it to new disciplines that have not been adequately covered in the past. By bringing together disciplines on government practices affecting trade in goods and services and the protection of intellectual property rights under one institutional umbrella, the WTO agreement also facilitates the "cross-retaliation" mechanism of the integrated dispute settlement understanding. In addition, the WTO resolves the "free rider" problem in the world trading system. WTO benefits only extend to its members who have agreed to adhere to all of the Uruguay Round agreements and who submit schedules of market access commitments for industrial goods, agricultural goods, and services. This eliminates the shortcomings of the former GATT system in which, for example, only a handful of countries voluntarily adhered to disciplines on subsidies under the 1979 Tokyo Round agreement. The WTO agreement establishes a number of institutional rules (described below) that are applied to all Uruguay Round agreements. It establishes an international organization with a stature commensurate with that of the World Bank and the International Monetary Fund. The organization is similar to that of the existing GATT Secretariat.

U.S. DOHA DEVELOPMENT AGENDA

July 24, 2006

The United States has been the leader in seeking to promote development through the Doha Round of trade negotiations. A key to development through trade is agriculture. The World Bank has estimated that 63% of goods trade gains for developing countries comes from agriculture and 93% of that benefit derives from greater market access.

The United States has lower agricultural tariffs than the EU or advanced developing economies. The US average bound tariff is 12%; the EU average bound tariff is 23%. The global average bound tariff is 62% and India's average bound tariff is 114%.

The United States offered a far bolder package of agricultural tariff cuts than anyone else. The U.S. October proposal would require the developed countries to cut average agricultural tariffs by over 60%. Developing countries should offer a two-thirds reduction of this amount.

By contrast, the EU—trying to protect its market—would offer a far more limited tariff cut of 39–48% for developed countries and less than two-thirds of that for advanced developing countries. The EU and developing countries also propose substantial loopholes that could exempt many agricultural commodities from the tariff-cutting formulas altogether. For example, India's proposal would seek to shield up to 98% of its agricultural imports from tariff reduction, while the EU's would result in little if any new market access for key commodities. The United States has fewer trade-distorting agricultural supports than the EU. Total 2005 US trade-distorting agricultural domestic support is $12.5 billion with an allowed level of $19.1 billion. Total 2005 EU trade-distorting agricultural domestic support is $33 billion (est.) with an allowed level of $88 billion. The United States would make real cuts in allowed support in existing farm programs. The U.S. has proposed to cut its most trade-distorting subsidies by 60%. The EU proposal would not require any changes in its current farm programs.

MINISTERIAL CONFERENCE

The Sixth Ministerial Conference was held in Hong Kong from 13-18 December 2005. The main objective of the conference was to settle a number of issues that will shape the final agreement of the Doha agenda. At the conclusion of the 2005 ministerial meeting, the then 149 members of the WTO agreed to an end date for all agricultural export subsidies, came to an agreement on cotton, created solid duty-free, quota-free access for the 32 least-developed members of the WTO, and came to an agreement on trade in services.

The United States, the European Union, and Japan lead the world in agricultural subsidies for their farmers. Brazil, joined by certain third parties, brought a complaint to the WTO over U.S. cotton subsidies, and in 2004, a WTO dispute resolution panel issued a mixed verdict on the complaint. The panel agreed with the United States that income support provided to U.S. cotton farmers and others that is decoupled from production and prices did not depress or suppress world cotton prices ("Decoupled" support means farmers are paid according to the number of acres they planted and the cotton they produced in the past, regardless of how they cultivate those fields in the present. Thus, farmers do not receive extra support for excess cotton produced.) However, the panel agreed with Brazil that some U.S. farm payments cause adverse effects to Brazil, and that export credit guarantees for some agricultural commodities are prohibited. In total, the WTO panel decided $3.2 billion in annual cotton subsidies and $1.6 billion in export credits paid by the U.S. in cotton and other commodities were illegal under WTO rules. This was a significant victory for Brazil and the third parties to the dispute.

Foreign Travel

Planning Your Trip: Know Before You Go!

Editor's note: The information below was compiled and edited from reports available through the U.S. State Department's Bureau of Consular Affairs as of January 2009. References are made to documents the reader can obtain from various other agencies or by visiting the State Department's web site at www.state.gov.

HOW TO HAVE A SAFE TRIP

Register Your Travel: Why It's Important

The State Department strongly encourages American citizens planning travel abroad to register their travel with the Department of State. Travel registration makes it possible to contact a traveler if necessary, whether because of a family emergency in the United States or because of a crisis in the place the traveler is visiting. Registration is a free service provided by the State Department, and is easily accomplished online at http://travelregistration.state.gov.

Note that, in accordance with the Privacy Act, the Department of State may not release information about those registered without their express written authorization.

If your family needs to reach you because of an emergency, they can pass a message to you through the Office of Overseas Citizens Services, which can be contacted from within the United States at 1-888-407-4747 (toll free), and from overseas at 202-501-4444. The Office of Overseas Citizens Services will contact the U.S. Embassy or Consulate in the country in which you are traveling in order to pass the message to you.

The State Department also advises leaving a detailed itinerary and copies of your passport biographical-data page with a friend or relative in the United States.

How to Register (It's Easy)

You can either register online at https://travelregistration.state.gov.

or

If you would like to contact an embassy or consulate you can go to http://usembassy.state.gov for access to U.S. Embassy and Consulate web pages.

INFORMATION RESOURCES

Travelers should familiarize themselves with their destinations, both to get the most enjoyment out of the visit and to avoid known dangers. Travelers should also be aware of restrictions on items that may be taken overseas and even on items that may be brought into the U.S. upon return.

The Consular Information Program

The Consular Information Program consists of three main components that provide information to the American public about travel to specific countries: Country Specific Information, Travel Warnings and Travel Alerts. The U.S. Department of State issues fact sheets called Country Specific Information on over 200 countries. The sheets contain information on entry requirements, crime and security conditions, areas of instability, road safety and other details relevant to travel.

The Department of State also issues Travel Warnings and Travel Alerts. Travel warnings are issued when the State Department recommends deferral of travel by Americans to a country because of civil unrest, dangerous conditions, terrorist activity and, in some cases, because the U.S. has no diplomatic relations with the country and may have great difficulty in assisting Americans in distress. Travel Alerts are issued as a means to disseminate information quickly about terrorist threats and other relatively short-term or transnational conditions that could pose significant risks to American travelers.

Country Specific Information, Travel Warnings and Travel Alerts are updated regularly and are accessible through the State Department's travel information website at http://www.travel.state.gov. For specific questions regarding an emergency involving an American citizen overseas, contact the Office of Overseas Citizens Services at (202) 647-5225.

There are three ways to access Country Specific Information, Travel Warnings and Travel Alerts.

On the Internet: http:// travel.state.gov

By Fax: on a fax machine, dial 202-647-3000 and follow the voice prompts.

By Telephone: dial (888) 407-4747 from within the U.S., or, from overseas, (202) 501-4444. These numbers are available from 8:00 a.m. to 8:00 p.m. Eastern Time, Monday through Friday (except U.S. federal holidays).

Background Notes

Background Notes are factual publications that contain information on countries with which the United States has diplomatic relations. They include facts on each country's land, people, history, government, political conditions, economy, and relations with other countries and the United States. Background notes can be accessed via the Internet at http://www.travel.state.gov. This information can also be found in the country sections of this book.

Other Resources

For more information that can help you plan a wonderful (and trouble-free) trip, go to http://www.travel.state.gov.

CUSTOMS AND IMPORT RESTRICTIONS

Customs Restrictions of Foreign Destinations—What You Cannot Take to Other Countries

Many countries have restrictions on what may be brought into the country, including food, pets, and medications. Even over-the-counter medications may be prohibited in some countries. Check with the embassies of your destination countries as to prohibited items.

A listing of foreign embassies and consulates in the U.S. is available on the Department of State's website at http://www.state.gov. Foreign embassy and consulate contact information can also be found on the Country Specific Information for each country.

U.S. Customs Restrictions—What You Cannot Bring Back With You

Some items may not be brought into the U.S., or may only be brought in under certain restrictions. For information on U.S. customs regulations and procedures, review reports at http://www.cbp.gov. General customs information is also available in the *Foreign Travel* section of this book.

There are special rules for products made from endangered wildlife. Many wildlife and wildlife products are prohibited either by U.S. or foreign laws from import into the United States, and you risk confiscation and a possible fine if you attempt to bring them into the U.S. when you return. Watch out for the following prohibited items:

- All products made from sea turtles
- All ivory, both Asian and African elephant, and rhinoceros
- Furs from spotted cats
- Furs from marine mammals
- Feathers and feather products from wild birds
- Most crocodile and caiman leather
- Most coral, whether in chunks or in jewelry

You may import an object made of ivory if it is an antique. To be an antique the ivory must be at least 100 years old, and you will need documentation that authenticates the age of the ivory. You may import other antiques containing wildlife parts under the same conditions: they must be accompanied by documentation proving they are at least 100 years old. Certain other requirements for antiques may also apply.

For more information, contact the U.S. Fish and Wildlife Service, Division of Law Enforcement, P.O. Box 3247, Arlington, VA 22203-3247, or call 800-358-2104, or visit http://www.fws.gov.

Taking a Pet Overseas

If you decide to take your pet with you when you go abroad, you should check with the embassies of the destination countries as to specific requirements that must be met before a pet may be brought into the country. Many countries have strict health, quarantine, agriculture, wildlife, and customs requirements and prohibitions. A listing of foreign embassies and consulates in the U.S. is available on the Department of State's website at http://www.state.gov. Foreign embassy and consulate contact information can also be found on the Country Specific Information for each country.

Note: In a crisis in which chartered or military aircraft or ships are used to evacuate Americans from a danger area, pets will not normally be permitted on the carrier. The pet owner will need to make other arrangements in order to remove the pet from the area. (Service animals, such as guide dogs, are not considered pets and will be accommodated if possible.)

Places to Receive Mail

If you will be abroad for an extended period, you may want to arrange for the delivery of your mail. Some banks and international credit card companies handle mail for customers at their overseas branches. In addition, post offices in many countries will hold mail for travelers under their General Delivery (Poste Restante) services. U.S. Embassies and Consulates do not handle private mail. Check with the embassy of your destination country to see if that will be possible there. A listing of foreign embassies and consulates in the U.S. is available on the Department of

State's website at http://www.state.gov. Foreign embassy and consulate contact information can also be found on the Country Specific Information for each country.

HEALTH

What You Need to Know in Advance of Travel

All travelers should familiarize themselves with conditions at their destination that could affect their health (high altitude or pollution, types of medical facilities, required immunizations, availability of required pharmaceuticals, etc.). While some of this information may be found in the documents listed above, the key resource for health information is the Travelers' Health page of the Centers for Disease Control (CDC) website at http://www.cdc.gov/travel. The CDC website also provides general guidance on health precautions, such as safe food and water precautions and insect-bite protection. The CDC also maintains an international travelers' hotline at 1-877-FYI-TRIP (1-877-394-8747) or, by fax, at 1-888-CDC-FAXX (1-888-232-3299).

Vaccination, Infectious Diseases, Pandemic Influenza, Foot & Mouth Disease, Chemical/Biological/Nuclear Incidents

General guidance on vaccinations and other health precautions may be found on the Travelers' Health page of the Centers for Disease Control (CDC) website at http://wwwn.cdc.gov/travel. Some general information from the CDC is available in the *Foreign Travel* section of this book.

Fact Sheets on foot and mouth disease, responding to chemical, biological, radiological or nuclear incidents and other health issues may be found at http://travel.state.gov/travel.

For information about pandemic influenza, see http://www.pandemicflu.gov or the website above. Information about infectious diseases abroad may also be found on the website of the World Health Organization at http://www.who.int/en, and further health information for travelers is available at http://www.who.int/ith.

Insurance, Medicare & Medicaid, Medical Evacuation

Obtaining medical treatment and hospital care abroad can be expensive, and medical evacuation to the U.S. can cost more than $50,000. Note that U.S. medical insurance is generally not accepted outside the United States, nor do the Social Security Medicare and Medicaid programs provide coverage for hospital or medical costs outside the United States.

If your insurance policy does not cover you abroad, it is a good idea to consider purchasing a short-term policy that does. There are health insurance policies designed specifically to cover travel. Many travel agents and private companies offer insurance plans that will cover health care expenses incurred overseas including emergency services such as medical evacuations. The names of some of the companies offering short-term health and emergency assistance policies are listed on the Bureau of Consular Affairs website at http://travel.state.gov/travel.

Bringing Medications or Filling Prescriptions Abroad

A traveler going abroad with a preexisting medical problem should carry a letter from the attending physician, describing the medical condition and any prescription medications, including the generic names of prescribed drugs. Any medications being carried overseas should be left in their original containers and be clearly labeled. Travelers should check with the foreign embassy of the country they are visiting to make sure any required medications are not considered to be illegal narcotics. A listing of foreign embassies and consulates in the U.S. is available on the Department of State's website at http://www.state.gov. Foreign embassy and consulate contact information can also be found on the Country Specific Information for each country.

If you wear eyeglasses, take an extra pair with you. Pack medicines and extra eyeglasses in your hand luggage so they will be available in case your checked luggage is lost. To be extra secure, pack a backup supply of medicines and an additional pair of eyeglasses in your checked luggage.

If you have allergies, reactions to certain medications, foods, or insect bites, or other unique medical problems, consider wearing a "medical alert" bracelet. You may also wish to carry a letter from your physician explaining required treatment should you become ill.

Information on filling a prescription abroad and other health issues may be found at http://travel.state.gov/travel.

Doctors and Hospitals

If an American citizen becomes seriously ill or injured abroad, a U. S. consular officer can assist in locating medical services and informing family or friends. If necessary, a consular officer can also assist in the transfer of funds from the United States. (Note, however, that payment of hospital and all expenses is the responsibility of the traveler.) For more information, go to http://travel.state.gov/travel.

SPECIAL PLANNING CONSIDERATIONS

Student Travelers

Many college students travel during school breaks. While most students will have a safe and enjoyable adventure,

for some the trip will become a nightmare with a serious impact on the rest of their lives. Students planning travel may want to review http://www.travel.state.gov/travel.

Senior Travelers

Local conditions: Be aware of any effects the local topography or climate may have on you: If you are sensitive to altitude or to humidity, or to other attributes of your destination, consult with your physician.

Don't over-program: The additional physical activity undertaken during travel can be quite strenuous, and sudden changes in diet and climate can have serious health consequences for the unprepared traveler.

Pack wisely: Don't pack so much that you will end up lugging around heavy suitcases. Dress conservatively—a wardrobe that is flashy may attract the attention of thieves or con artists, while clothing that is very casual may result in being barred from some tourist sites overseas. Include a change of clothing in your carry-on luggage.

Traveling With Disabilities

Individual countries have their own standards of accessibility for disabled travelers. Some countries have nondiscrimination laws that help to protect travelers with disabilities, while other countries do not. Preparation before you go can help ensure that your planned destination will be accessible, safe and enjoyable. Travelers with disabilities should review the Department of Transportation pamphlets *New Horizons for the Air Traveler with a Disability* and *Plane Talk: Facts for Passengers with Disabilities*. Both of these publications are available at the Department of Transportation's website http://www.dot.gov. In addition, travelers with disabilities should discuss the trip with a physician.

Research in advance: Learn about planned stops and ask questions about services available. Consider the level of health care available, as well as local transportation needs to and from the airport, luggage assistance, and whether other help will be needed to leave the airport terminal. When making reservations, inform the travel agent or carrier of your disability and the equipment you use, and, if necessary, request a wheelchair be brought to the gate upon arrival and any other assistance needed while flying and at the airport. In all cases, ask that your needs and requests be documented as part of the reservation, and take down the name of the agent. That way, if there is a problem, you may be able to quickly show that you are entitled to the service you requested.

Seek medical advice: Talk to your physician about the activities you have planned and your general physical condition, any immunizations that might be needed, and medications, whether prescription or over the counter, that you might need for your trip.

Carry a letter from your attending physician, describing your medical condition and any prescription medications, including the generic names of prescribed drugs.

Your medications: If you take prescription medication, make sure you have enough to last the duration of the trip, including extra medicine in case you are delayed. Pack your medication in your carry-on bag, since checked baggage is occasionally lost. Always carry your prescriptions in their labeled containers, not in a pill pack.

Documentation of immunizations: Take with you proper documentation of immunizations.

Health and Evacuation Insurance: Make sure you have adequate health insurance coverage while abroad, including coverage of medical evacuation (not covered by most domestic policies). Note that U.S. Medicare and Medicaid programs do not provide payment for medical services outside the United States.

Service dogs: Some countries have restrictions on service dogs. If you intend to travel with a service dog, be sure to check on possible restrictions with the embassy or consulate of each country you will visit. This and other country information may be found on each country's Country Specific Information in the country articles in this book. If service dogs are permitted, learn about quarantine or vaccination requirements. Find out what documents are needed, including international health certificates and rabies inoculation certificates, and if the documents need to be translated. Talk with your vet about tips for traveling with a dog, and how travel will affect the animal. You may also want to ensure that hotels will accommodate your service dog, and that there will be an adequate area for the dog to relieve itself.

Maintenance on equipment: Have a maintenance check done on any equipment you will take with you, to ensure that everything is in working order before you leave. You may want to research the availability of wheelchair and medical equipment providers in the areas you plan to visit.

Carry written plans: Carry with you your written itinerary and directions of where you wish to go. These can be shown to people who might be able to help you if you are lost. Another useful tool is a point-and-conversation guide.

REQUIRED TRAVEL DOCUMENTS AND OTHER IMPORTANT DOCUMENTATION

Passport Requirements & How to Apply for a Passport

A passport is an internationally recognized travel document that verifies the identity and nationality of the

bearer. Only the U.S. Department of State and U.S. Embassies and Consulates have the authority to grant, issue or verify U.S. passports. For travel overseas and to facilitate reentry into the U.S., a valid U.S. passport is the best documentation available. A valid passport is required to enter and leave most foreign countries. Some countries may allow you to enter with only a birth certificate, or with a birth certificate and a driver's license. Note, however, that rules established under the U.S. Intelligence Reform and Terrorism Prevention Act of 2004, require that all persons, including U.S. citizens, traveling by air, must present a valid passport to reenter the United States. (Until September 30, 2007, U.S. citizens who have applied for but not yet received passports can enter and depart the United States by air to Western Hemisphere countries with a government-issued photo identification and official proof of application for a passport.

The proof may be obtained at http://travel.state.gov. This accommodation does not affect entry requirements of other countries, and U.S. citizens who are traveling to a country that requires a visitor to have a passport must still obtain one.

If you are traveling by land or sea, make certain that you can return to the United States with the proof of citizenship that you take with you. U.S. regulations require that you document both your U.S. citizenship and your identity when you reenter the United States.

Some countries require that a traveler's U.S. passport be valid at least six months or longer beyond the dates of the trip. In addition, with the number of international child custody cases on the rise, several countries have instituted passport requirements to help prevent child abductions. (Mexican law, for example, requires a child traveling alone, or with only one parent, or in someone else's custody, to carry written, notarized consent from the absent parent or parents if the child is not in possession of a U.S. passport.) Contact the embassy of the foreign destination for more information. A listing of foreign embassies and consulates in the U.S. is available on the Department of State's website at http://www.state.gov. Foreign embassy and consulate contact information can also be found on the Country Specific Information for each country.

How to Apply for a U.S. Passport

Apply for your passport several months before your planned trip, and, if you will need visas from foreign embassies, allow even more time. Even if you don't have specific travel plans, but have family living abroad or are waiting to find a bargain trip, it is a good idea to apply as early as possible.

Information about applying for a U.S. passport may be found at http://www.travel.state.gov/passport.

Adoption Abroad

If you plan to adopt a child overseas, be aware that, in order to bring the child to the U.S. to live, the child must be issued a U.S. immigrant visa in the country of adoption. In addition to other requirements that must be met before a visa may be issued, U.S. law must be satisfied as to the legality of the adoption process that took place. Please see the *Intercountry Adoption* section of this book for further information. Persons interested in adopting abroad should also consult the State Department website at www.state.gov. The U.S. Government considers foreign adoptions to be a private, legal matter within the judicial sovereignty of the nation in which the child is residing. U.S. authorities have no right to intervene on behalf of American citizens in the courts of the country where the adoption takes place, and prospective parents must comply with the laws of that country.

Entry Requirements of Foreign Countries

To view information about entry requirements maintained on the website of the country you plan to visit, go to its embassy's or consulate's website, which may be found at http://www.state.gov. You should also review the Country Specific Information for the country you plan to visit.

If a visa is required by the country you will visit, obtain it from the appropriate foreign consular representative before proceeding abroad. Allow sufficient time for processing your visa application, especially if you are applying by mail. Most foreign consular representatives in the U.S. are located in principal cities, and, in many instances, a traveler may be required to obtain the visa from the consular office in the area of his/her residence. As soon as you receive your visa, check it to make sure no mistakes were made. Processing and visa fees vary, and fees may not be refundable.

Schengen Agreement

24 European countries are party to the Schengen agreement. This agreement eliminates all internal border controls between them. To enter one Schengen country is to gain up to 90 days of continuous travel between the member states. American citizens traveling for business or tourism are not required to have a visa for this initial entry into the Schengen area, but must have a passport valid three months beyond the proposed stay. (For a two week business trip, the passport must be valid for four months, for a two month holiday the passport must be valid for five months, for example.)

Please note, that while business and tourism visits of less than 90 days to the Schengen countries are visa-free, if you are traveling to Europe for any other reason-employment, study, internship, etc., your host country may require a visa for that purpose, to be obtained before you leave the U.S. Please check with the Embassy or Consulate of the country(ies) you are going for their specific requirements.

Although European Union regulations require that non-EU visitors obtain a stamp in their passports upon initial entry to a Schengen country, many borders are not staffed with officers carrying out this function. If an American citizen wishes to ensure that his or her entry is properly documented, it may be necessary to request a stamp at an official point of entry. Under local law, travelers without a stamp in their passports may be questioned and asked to document the length of their stay in Schengen countries at the time of departure or at any other point during their visit, and could face possible fines or other repercussions if unable to do so.

The member parties of the Schengen agreement are: Austria, Belgium, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Slovak Republic, Slovenia, Spain, and Sweden.

Work Authorization, Residence Permits

If you plan to work or reside at your destination, check with that country's Embassy or Consulate in the U.S. to learn about any special documentation requirements (such as work authorization or a residence visa). A listing of foreign embassies and consulates in the U.S. is available on the Department of State's website at http://www.state.gov. Foreign embassy and consulate contact information can also be found on the Country Specific Information for each country.

Additional Fees

All international flights are subject to U.S. immigration and customs fees, paid in advance when the ticket is purchased. In addition, many countries have departure fees that are collected at the time of ticket purchase or upon exiting the foreign country. Expenses usually are greater than expected, and travelers should plan to have at least enough cash handy at the end of the trip to pay any unexpected departure fee. Credit cards may be difficult to use in the country you are visiting, or at the airport at which you need to pay a fee.

Dual Nationality

The concept of dual nationality means that a person is a citizen of two countries at the same time. Each country has its own citizenship laws based on its own policy.Persons may have dual nationality by automatic operation of different laws rather than by choice. For example, a child born in a foreign country to U.S. citizen parents may be both a U.S. citizen and a citizen of the country of birth.

A U.S. citizen may acquire foreign citizenship by marriage, or a person naturalized as a U.S. citizen may not lose the citizenship of the country of birth. U.S. law does not mention dual nationality or require a person to choose one citizenship or another. Also, a person who is automatically granted another citizenship does not risk losing U.S. citizenship. However, a person who acquires a foreign citizenship by applying for it may lose U.S. citizenship. In order to lose U.S. citizenship, the law requires that the person must apply for the foreign citizenship voluntarily, by free choice, and with the intention to give up U.S. citizenship.

Intent can be shown by the person's statements or conduct. The U.S. Government recognizes that dual nationality exists but does not encourage it as a matter of policy because of the problems it may cause. Claims of other countries on dual national U.S. citizens may conflict with U.S. law, and dual nationality may limit U.S. Government efforts to assist citizens abroad. The country where a dual national is located generally has a stronger claim to that person's allegiance.

However, dual nationals owe allegiance to both the United States and the foreign country. They are required to obey the laws of both countries. Either country has the right to enforce its laws, particularly if the person later travels there. Most U.S. citizens, including dual nationals, must use a U.S. passport to enter and leave the United States. Dual nationals may also be required by the foreign country to use its passport to enter and leave that country. Use of the foreign passport does not endanger U.S. citizenship. Most countries permit a person to renounce or otherwise lose citizenship.

Information on losing foreign citizenship can be obtained from the foreign country's embassy and consulates in the United States. Americans can renounce U.S. citizenship in the proper form at U.S. embassies and consulates abroad.

WHAT TO TAKE WITH YOU

Don't bring anything you would hate to lose. Leave at home:

- Valuable or expensive-looking jewelry
- Irreplaceable family objects
- All unnecessary credit cards
- Social Security card, library card, and similar items that may be in your wallet.
- Do bring medical necessities (see the health sections above regarding medications and insurance).

Leave Copies of Documents and Itinerary with Relatives in the U.S.

Leave a copy of the itinerary with family or friends at home in case they need to contact you in an emergency.

Make two photocopies of the passport identification page, airline tickets, driver's license and the credit cards you plan to take. Leave one copy of each with family or friends

at home, and pack the other copies separately from the originals. Leave a copy of the serial numbers of your travelers' checks with a friend or relative at home. Carry your copy with you in a separate place and, as you cash the checks, cross them off the list.

Plan for the Unexpected
Take with you items that you will need if your trip is unexpectedly extended. These items may include extra money or medications.

EMERGENCIES: CONSULAR ASSISTANCE AND CRISES ABROAD

Assistance from American Consuls

U.S. consular officers are located in over 260 Foreign Service posts abroad. In addition, consular agents in approximately 46 foreign cities without U.S. embassies or consulates provide a more limited but still important series of emergency and other consular services.

Providing assistance to Americans during a crisis abroad, such as political upheaval or a natural disaster, is one of the most critical tasks consular officer perform. During a crisis, consular officers look for missing Americans and help Americans return to the U.S., among many other duties to assist Americans.

The State Department strongly encourages American citizens planning travel abroad to register their travel with the Department of State so that we may find you during a crisis. Travel registration is free, it's confidential, and it's easily accomplished online at https://travelregistration.state.gov.

Consuls also advise and help Americans who are in serious legal, medical or financial trouble, including health emergencies, arrests, deaths, missing persons, and destitution. For information about emergency assistance to Americans in trouble abroad, note the following websites:

Finding a hospital or doctor abroad:
http://travel.state.gov/travel/tips/emergencies/emergencies_1195.html

Victims of crime: http://travel.state.gov/travel/tips/emergencies/emergencies_1748.html

Financial emergencies or destitution:
http://travel.state.gov/travel/tips/emergencies/emergencies_1198.html

Obtaining funds from the U.S. (OCS trust):
http://travel.state.gov/travel/tips/brochures/brochures_1224.html

Missing persons: http://travel.state.gov/travel/tips/emergencies/emergencies_1195.html

Arrests: http://travel.state.gov/travel/tips/emergencies/emergencies_1199.html

Deaths: http://travel.state.gov/travel/tips/emergencies/emergencies_1205.html#death

Passport replacement: http://travel.state.gov/travel/tips/emergencies/emergencies_1197.html

Consular officers also perform non-emergency services, including providing information on absentee voting, selective service registration, and acquisition and loss of U.S. citizenship. They can arrange for the transfer of Social Security and other U.S. government benefits to beneficiaries residing abroad, provide U.S. tax forms, and notarize documents. They can also provide information on how to obtain foreign public documents.

Note, however, that because of the limited number of consular officers and the growing number of U.S. tourists and residents abroad, consuls cannot provide tourism or commercial services. For example, consuls cannot perform the work of travel agencies, lawyers, information bureaus, banks, or the police, nor can they obtain work, residence or driving permits, act as interpreters, search for missing luggage, or settle commercial disputes for U.S. citizens. For information about routine consular services performed by consuls abroad, see http://travel.state.gov.

Consular duty personnel are available for emergency assistance 24 hours a day, 7 days a week, at U.S. embassies, consulates, and consular agencies overseas and in Washington, D.C. To contact the Office of Overseas Citizens Services in the U.S. call 1-888-407-4747 (during business hours) or 202-647-5225 (after hours). Contact information for U.S. embassies, consulates, and consular agencies overseas may be found at http://www.state.gov/countries.

When the family of an American traveler needs to reach him or her because of an emergency at home or because family members are worried about the traveler's welfare, they should call 1-888-407-4747. The State Department will relay the message to the consular officers in the country in which the traveler is thought to be, and the consular officers will try to locate the traveler, pass on urgent messages, and, consistent with the Privacy Act, report back to the inquiring family.

Victims of Crime

Consular officers are committed to assisting American citizens who become victims of crime while abroad. Familiar with local government agencies and resources in the country where they work, consular officers can help American crime victims to:

- replace a stolen passport;

- contact family, friends, or employers;
- obtain appropriate medical care;
- address other emergency needs that arise as a result of the crime;
- provide information about the local criminal justice process and about the case itself;
- obtain information about local resources to assist victims, including foreign crime victim compensation programs;
- obtain information about U.S. crime victim assistance and compensation programs; and
- obtain a list of local attorneys who speak English.

Passport Fraud

Passport fraud is attempted by U.S. citizens and non-citizens for a variety of criminal purposes—money laundering, narcotics trafficking, illegal entry into the U.S., terrorism, etc. In processing lost/stolen passport cases, the Department of State must take special precautions that may delay the issuance of a new, full validity passport. If you suspect a U.S. passport is being used fraudulently, do not hesitate to contact the nearest American embassy or consulate or in the U.S., the nearest Passport Agency.

Scams

Financial scams originating from overseas are a real and growing problem. Individual American citizens have lost considerable sums of money on these scams, ranging from a few hundred dollars to hundreds of thousands of dollars. While confidence schemes have long existed, the advent of the internet has greatly increased their prevalence, and the Department of State receives daily inquiries from victims. Scams may involve internet dating, inheritance, work permits, overpayment, and money-laundering.

For information about these scams and what you can do to protect yourself (or what to do if you are the victim of a scam), visit the Department of State website at http://travel.state.gov.

International Child Custody Disputes

There are legal limits to the assistance that U.S. authorities can provide to parents involved in a child custody dispute. When an American child is abducted overseas by a parent, the U.S. Government's role is to help the remaining parent by locating the child, monitoring the child's welfare, and providing information about child custody laws and procedures in the country where the child has been taken. Consular officers overseas can issue a U.S. passport to a child involved in a custody dispute, if the child appears in person at a U.S. Embassy or Consulate, and if there is no court order from the foreign court of that country barring the child's departure from the country. Parents who are involved in a custody dispute overseas should find out whether the foreign country to which the child has been taken is party to the Hague Convention on the Civil Aspects of International Child Abduction. Under the Hague Convention, a child who has been wrongfully removed from a parent may be returned to his or her place of habitual residence.

For further information on international child abduction and the Hague Convention, see the *International Parental Child Abduction* section of this book and visit the Department of State website at http://www.travel.state.gov/childabduction or contact the Office of Children's Issues at 202-647-7000.

If you are overseas and would like information on this subject, contact the nearest U.S. embassy or consulate for guidance.

Arrests Abroad

When you are in a foreign country, you are subject to its laws, and American officials are limited as to how they can assist you. They cannot, for instance, represent you in legal proceedings or pay your legal fees or other expenses. They can, however, perform a variety of vital services, which include providing a list of attorneys, assisting in contacting your family in the U.S. if you wish it, helping you obtain money from family in the U.S., and monitoring your health and welfare and the conditions under which you are being held.

If you are arrested, immediately ask to speak to a consular officer at the nearest U.S. Embassy or Consulate. Under international agreements, the U.S. Government has a right to provide consular assistance to you upon your request. If your request to speak to your consul is turned down, keep asking—politely, but persistently. For information on how consuls assist American arrestees, see http://travel.state.gov.

Special Warning About Drug Offenses Abroad

Every year, several hundred Americans are arrested abroad on drug charges. Persons caught with illegal drugs in a foreign country are subject to the drug laws of that country, not those of the U.S.; as always, ignorance of the law is no excuse. In many countries, the burden of proof is on the accused to show that he or she is innocent of the charges. Some Americans take advantage of an offer of an all-expenses-paid vacation abroad in exchange for carrying a small package in the luggage. When, to their surprise, they are caught, the fact that they did not know that there were drugs in that package will not reduce the charges against them. Every aspect of a drug arrest abroad can be different from U.S. practice. For instance:

- few countries provide a jury trial
- many countries do not permit pre-trial release on bail

- pre-trial detention, often in solitary confinement, can last several months
- prisons may lack even minimal comforts, such as beds, toilets, and washbasins
- diets are often inadequate and require supplements from relatives and friends
- officials may not speak English
- physical abuse, confiscation of property, degrading treatment and extortion are possible
- persons convicted may face sentences ranging from fines and jail time, to years of hard labor, and even the death penalty
- penalties for drug possession and for drug trafficking are often the same abroad, so possession of one ounce of marijuana could result in years in a foreign jail

As with any arrest of a U.S. citizen abroad, consular officers perform a variety of services. For more information about arrests abroad, see http://travel.state.gov.

Terrorism

Terrorist acts occur unpredictably, making it impossible to protect yourself absolutely. The first and best protection is to avoid travel to areas where there has been a persistent record of terrorist attacks or kidnappings. Most terrorist attacks are the result of careful planning. Just as a car thief will first be attracted to an unlocked car with the key in the ignition, terrorists are looking for the most accessible targets.

The chances that a tourist, traveling with an unpublished program or itinerary, would be the victim of terrorism are slight. In addition, many terrorist groups, seeking publicity for political causes within their own country or region, may not be looking for American targets. Nevertheless, the following pointers may help you avoid becoming a target of opportunity. These precautions may provide some degree of protection, and can serve as practical and psychological deterrents to would-be terrorists.

- Schedule direct flights if possible, and avoid stops in high-risk airports or areas.
- Be cautious about what you discuss with strangers or what others may overhear.
- Try to minimize the time spent in the public area of an airport, which is a less protected area. Move quickly from the check-in counter to the secured areas. Upon arrival, leave the airport as soon as possible.
- As much as possible, avoid luggage tags, dress and behavior that may draw attention to yourself.
- Keep an eye out for abandoned packages or briefcases, or other suspicious items. Report them to airport authorities and leave the area promptly.
- Avoid obvious terrorist targets, such as places where Westerners are known to congregate.
- Watch for people following you or “loiterers” observing your comings and goings.
- Report any suspicious activity to local police, and the nearest U.S. embassy or consulate.
- Keep a mental note of safe havens, such as police stations, hotels, and hospitals. Formulate a plan of action for what you will do if a bomb explodes or there is gunfire nearby.
- Select your own taxicabs at random. Don’t take a vehicle that is not clearly identified as a taxi. Compare the face of the driver with the one on his or her posted license.
- If possible, travel with others.
- Be sure of the identity of visitors before opening the door of your hotel room. Don’t meet strangers at your hotel room, or at unknown or remote locations.
- Refuse unexpected packages.
- Check for loose wires or other suspicious activity around your car.
- Be sure your vehicle is in good operating condition.
- Drive with car windows closed in crowded streets. Bombs can be thrown through open windows.
- If you are ever in a situation where somebody starts shooting, drop to the floor or get down as low as possible. Don’t move until you are sure the danger has passed. Do not attempt to help rescuers and do not pick up a weapon. If possible, shield yourself behind a solid object. If you must move, crawl on your stomach.

Hijacking/Hostage Situations

While every hostage situation is different, there are some general considerations to keep in mind. U.S. Government policy is firm: we do not make concessions to terrorists. When Americans are abducted overseas, we look to the host government to exercise its responsibility under international law to protect all persons within its territories and to bring about the safe release of hostages.

We work closely with these governments from the outset of a hostage-taking incident to ensure that our citizens and other victims are released as quickly and safely as possible.

- At the outset of a terrorist incident, the terrorists typically are tense, high-strung and may behave irrationally. It is extremely important that you remain calm and alert, and control your own behavior.

- Avoid resistance and sudden or threatening movements. Do not struggle or try to escape unless you are certain of being successful. Don't try to be a hero, endangering yourself and others.

- Consciously put yourself in a mode of passive cooperation. Talk normally. Do not complain, avoid belligerency, and comply with all orders and instructions.

- If questioned, keep your answers short. Don't volunteer information or make unnecessary overtures.

- Make a concerted effort to relax. Prepare yourself mentally, physically and emotionally for the possibility of a long ordeal.

- Try to remain inconspicuous, avoid direct eye contact and the appearance of observing your captors' actions.

- Avoid alcoholic beverages. Eat what they give you, even if it does not look or taste appetizing, but keep consumption of food and drink at a moderate level. A loss of appetite and weight is normal.

- If you are involved in a lengthier, drawn-out situation, try to establish a rapport with your captors, avoiding political discussions or other confrontational subjects.

- Establish a daily program of mental and physical activity.

- Think positively and avoid a sense of despair. You are a valuable commodity to your captors, and it is important to them to keep you alive and well.

How to Access Funds in the U.S.

U.S. consuls can assist Americans abroad who are temporarily destitute due to unforeseen circumstances. Americans who find themselves in these circumstances should contact the nearest U.S. Embassy or Consulate (see http://usembassy.state.gov for contact information) or the State Department's Office of Overseas Citizens Services at 1-888-407-4747 (during business hours) or 202-647-5225 (after hours). Consular officers can help destitute Americans contact family, bank, or employer to arrange for transfer of funds. In some cases, these funds can be wired through the Department of State.

How to Get Your Passport Replaced

If your U.S. passport is lost or stolen while you are overseas, report it immediately to the local police and to the nearest U.S. Embassy or Consulate. A consul can issue a replacement passport, often within 24 hours. Links to contact information for U.S. Embassies and Consulates may be found at http://usembassy.state.gov. If your U.S. passport is lost or stolen in the U.S., report it to the Department of State by following instructions found at http://www.travel.state.gov.

RESIDING ABROAD

Whether you are planning to move abroad or are already residing outside of the U.S., you should review the information that appears above about safe travel and consular services available to you, since most of it applies equally to U.S. citizens residing abroad. The following is information about services you are more likely to need if you are residing abroad.

Marriage Abroad

U.S. consular officers abroad cannot perform marriages. Depending on the law of the foreign country, local civil or religious officials generally perform marriages. Procedures vary from country to country, and some require lengthy preparation. Many countries have requirements that the parties have been resident in that country for a specified period of time before a marriage may be performed there. There may be requirements for blood tests, etc. There may be requirements for parental consent. There are also, in many countries, a requirement that documents certifying the end of a previous relationship (such as a death or divorce certificate) be submitted, translated into the local language and authenticated. Some countries require an affidavit by the parties as proof of legal capacity to enter into a marriage contract. (This affidavit can be executed at a U.S. Embassy or Consulate.) The process can be time-consuming and expensive, and, therefore, persons planning to marry in a foreign country should find out the requirements of that particular country before beginning travel. Contact the embassy or tourist information bureau of the country where you plan to marry to learn the specific requirements.

A listing of foreign embassies and consulates in the U.S. is available on the Department of State's website at http://www.state.gov. Foreign embassy and consulate contact information can also be found on the Country Specific Information for each country. If you are already abroad, consult with the nearest U.S. Embassy or Consulate.

Once your marriage has taken place abroad, U.S. consular officers can authenticate your foreign marriage document. Note that this authentication simply signifies that your foreign marriage documents are real; it does not necessarily mean that your marriage will be recognized by your home state in the U.S. If you are married abroad and need confirmation that your marriage will be recognized in the United States, consult the Attorney General of your state of residence in the United States.

Birth Abroad of a U.S. Citizen

Most children born abroad to a U.S. citizen parent or parents acquire U.S. citizenship at birth. As soon as possible after the birth, the U.S. citizen parent should contact the nearest U.S. Embassy or Consulate. If the consul determines that the child has acquired U.S. citizenship, a consular officer prepares a Consular Report of Birth Abroad of a Citizen of the United States of America (Form FS-240). This document is recognized in the United States as proof of acquisition of U.S. citizenship, and it is acceptable evidence of citizenship for obtaining a passport, entering school, and most other purposes. Failure to document a child promptly as a U.S. citizen may cause hardship for the parents or child later on when attempting to obtain a passport or register for school. For further information, visit the Department of State website at http://www.travel.state.gov.

Divorce Abroad

The validity of divorces obtained overseas will vary according to the requirements of an individual's state of residence. Consult the authorities of your state of residence in the United States for these requirements. For further information about recognition of a divorce obtained abroad, go to the Department of State website at http://www.travel.state.gov.

Death of a U.S. Citizen Abroad

One of the most important tasks of U.S. consular officers abroad is to provide assistance to the families of U.S. citizens who die abroad. Each year, over 6,000 Americans die abroad. Most of them are Americans who live overseas, but, each year, a few thousand Americans die while on short visits abroad.

One of the most important tasks of U.S. consular officers abroad is to provide assistance to the families of U.S. citizens who die abroad.

When an American citizen dies abroad, consular officers:

- confirm the death, identity and U.S. citizenship of the deceased
- make notification to the next-of-kin if they do not already know about the death, providing information about disposition of the remains and the effects of the deceased, and provides guidance on forwarding funds to cover costs
- serve as provisional conservator of the estate, absent a legal representative in country
- prepare documents for disposition of the remains in accordance with instructions from the next-of-kin or legal representative, and oversee the performance of disposition of the remains and of the effects of the deceased
- send signed copies of the Consular Report of Death of an American Citizen Abroad to the next-of-kin or legal representative, for use in settling estate matters in the U.S.

Federal Benefits Services Abroad

Prior to your move abroad you should contact the federal agency (Social Security Administration, Veterans Affairs, Railroad Retirement Board, or Office of Personnel Management) from which you receive a monthly check to report your change of address. This will help you avoid a lost or delayed check. Even if your payments are being sent to a bank, you must provide the federal agency with your new address. You should also contact the U.S. Embassy or Consulate nearest your place of residence upon your arrival and advise them of your current address. Each time you move while living abroad, you should notify the U.S. Embassy or Consulate at least 60 days prior to your move. This will enable the federal agency to update its records so your checks are sent to your new address.

In many countries, you are able to have your monthly checks deposited directly into your account at either a financial institution in the country where you live or a U.S. financial institution. To determine if direct deposit is available in the country where you plan to reside, or to sign up for direct deposit, contact the federal agency from which you receive payment.

If your check does not arrive or you have other questions about your federal benefits, contact a consular officer at the nearest U.S. Embassy or Consulate. If the consular officer cannot answer your inquiry, he or she will contact the regional federal benefits officer for your area and make inquiries on your behalf.

Driver's License

It is illegal to drive without a valid license and insurance in many countries. You should check with the Embassy of the country where you plan to reside, to find out more about driver's license requirements. A listing of foreign embassies and consulates in the U.S. is available on the Department of State's website at http://www.state.gov. Foreign embassy and consulate contact information can also be found on the Country Specific Information for each country.

Many countries do not recognize a U.S. driver's license. Some, however, will accept an international driver's permit. It is nevertheless a good idea to qualify for a local driver's license as soon as possible, since international driver's permits are not always valid for the length of a stay abroad, and often are only valid if presented in conjunction with a valid U.S. or local license. To renew a U.S. driver's license, contact the Department of Motor Vehicles in your home state.

Absentee Voting in U.S. Elections

Americans who reside abroad are usually eligible to vote by absentee ballot in all federal elections and may also be eligible to vote in many state and local U.S. elections. Eligibility depends upon the laws and regulations of your state of residence in the United States. To vote absentee, you must meet state voter registration requirements and apply to the state of your last domicile for a ballot as early as permitted. If possible, register for absentee voting before you move abroad. Check with your local voting authority for requirements and procedures. After you have registered for an absentee ballot, and if your state ballot does not arrive in sufficient time, you may be eligible to use a Federal Write-in Absentee Ballot (FWAB). You should contact the Voting Assistance Officer at the nearest U.S. Embassy or Consulate for additional information, or visit the Department of State website at http://www.travel.state.gov.

Selective Service Registration

Section I-202 of the Presidential Proclamation of July 2, 1980, reinstituting registration under the Military Selective Service Act, states: "Citizens of the United States who are to be registered and who are not in the United States on any of the days set aside for their registration, shall present themselves at a U.S. Embassy or Consulate for registration before a diplomatic or consular officer of the United States or before a registrar duly appointed by a diplomatic or consular officer of the United States. Check with the nearest U.S. Embassy or Consulate if you need to comply." For more information on living abroad, visit the Department of State website at http://travel.state.gov.

PASSPORT AGENCIES

NOTE: The easiest way to get your passport is to apply at one of over 9,000 public places that accept passport applications.

If you need your passport urgently, generally in less than 2 weeks, you may contact one of our Passport Agencies listed below. All agencies take applications only by appointment. Please call in advance.

THERE IS NO CHARGE FOR AN APPOINTMENT AT A PASSPORT AGENCY. CUSTOMERS SHOULD NOT PAY ANYONE OR ANY BUSINESS MAKING SUCH A CHARGE.

Foreign Embassies and Consulates in the United States

Editor's note: The information below was compiled and edited from reports and directories available through the U.S. State Department's Bureau of Consular Affairs as of December 2008.

FOREIGN EMBASSIES IN THE UNITED STATES

Information on visa and passport requirements, customs and duties, and general information for travelers can often be obtained by contacting the embassy or consulate for the country to which you plan to travel. This listing of chanceries and offices is compiled from information available through the U.S. Department of State website. Additional offices and up-to-date listings may be found at the Department of State website (www.state.gov). All offices listed here are located in Washington, D.C., unless otherwise noted.

The Foreign Consular Offices in the United States list is available to the public for a fee through the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402 (Telephone Number {202} 512-1800) and on the Department of State Internet web site under: http://www.state.gov.
