INTRODUCTION AND ABBREVIATIONS

The majority of the information in these volumes was provided by the U.S. Department of State and is the most recent release of that information as of January 2009. However, changes in countries and governments occur rapidly. Therefore, the reader is advised to check directly with the consulate of the country he or she intends to visit before making final plans. The reader is also advised to visit www.state.gov for more detailed and current information on travel to the countries of the world.

Events in all parts of the world—Europe, Asia, the Americas, and Africa—demonstrate the dynamic changes that quickly change the world's political and economic structures. This 2010 edition continues the tradition of *Countries of the World* in meeting the need for current information by monitoring and presenting pertinent U.S. government publications. The U.S. Department of State (State Department) and Central Intelligence Agency (CIA) publications present current basic information available on the countries of the world, their leaders, and U.S. embassies worldwide. Key government reports from these and other federal agencies have been gathered together in these volumes.

Beginning with the 2004 edition, *Countries of the World* has been re-structured to make the information more accessible to the reader. In past editions, separate sections were devoted to:

- Key Officers of Foreign Service Posts
- Chiefs of State and Cabinet Members of Foreign Governments
- Travel Warnings and Consular Information Sheets from U.S. State Department

The information in these sections was presented country by country. In this edition, the individual country information in these sections has been moved to each country's "Background Note."

Beginning in the 2006 edition, general sections on "Intercountry Adoption" and "International Parental Child Abduction" were added and country specific information concerning intercountry adoption and international parental child abduction was included in the appropriate country "Background Notes."

For this 2010 edition, all 202 "Background Notes" from the previous publication of Countries of the World 2009 have been updated. In addition, the sections on International Treaty Organizations and Foreign Travel have been updated, revised, and reformatted as new information has been made available through the U.S. Department of State, U.S. Customs, the Office of U.S. Trade Representative, and the Center for Disease Control and Prevention. Since the 2009 edition, the sections on "Visa Requirements of Foreign Governments" and "Tips for Travelers" are no longer published by the Department of State. However, readers may find country specific information on entry requirements and special circumstances (as applicable) within the "Background Notes." Country specific information on intercountry adoption procedures and international parental child abduction has been updated as well and can again be found within the "Background Notes" of those countries to which this information is pertinent.

ORGANIZATION

The two volumes in this set contain four sections:

- Status of the World's Nations
- Background Notes
- International Treaty Organizations
- Foreign Travel

A comprehensive index is included at the end of volume two.

Status of the World's Nations

This section begins the set by providing tables listing the independent nations of the world and the dependencies and areas of special sovereignty. Also included are alphabetical and chronological checklists of new nations since 1943.

Background Notes

This section contains the "Background Notes" on the countries of the world compiled by the State Department. These concise guides provide information on a country's leaders, politics, economy, and relations with the United States. "Background Notes" appear on the State Department's web site at http://www.state.gov. The maps appearing in the "Background Notes" were created by Maryland Cartographics, Inc. and were added by the editors to supplement the government information. They were not part of the original government publication. In this edition, the "Background Notes" have also been supplemented by the editors with the following additional State Department and CIA information: Principal U.S. Embassy Officials; Principal Government Officials; and Travel Warnings and Consular Information Sheets.

Principal U.S. Embassy Officials

This section contains information from the State Department's report *Key Officers of Foreign Service Posts*. The address and telephone number of each embassy, consulate, or foreign service post are listed. Names and assignments are shown for principal U.S. embassy officials to aid in making direct inquiry. A key to abbreviations related to foreign service assignments follows:

ACM	Assistant Chief of Mission
ADB	Asian Development Bank
ADV	Adviser
AGR	Agricultural Section (USDA/FAS)
AID	Agency for International Development
AIT	American Institute in Taiwan
ALT	Alternate
AMB	Ambassador
AMB OMS	Ambassador's Office Management Specialist
APHIS	Animal and Plant Health Inspection Service
APO	Army Post Office
ARSO	Assistant Regional Security Officer
ATF	Alcohol, Tobacco, and Firearms
ATO	Agricultural Trade Office (USDA/FAS)
B.P.	Boite Postale
BBG	Broadcasting Board of Governors
BCAO	Branch Cultural Affairs Officer
BO	Branch Office (of Embassy)
BUD	Budget
BUREC	Bureau of Reclamation
C.P.	Caixa Postal
CA	Consular Agent
CAO	Cultural Affairs Officer
CDC	Centers for Disease Control
Cdr	Commander
CEO	Cultural Exchange Officer
CG	Consul General, Consulate General
CHG	Charge d'Affaires
CINCAFSOUTH	Commander-in-Chief Allied Forces Southern Europe

USTTA US	Travel and Tourism Agency
USUN US	Mission to the United Nations
VC	Vice Consul
VOA	Voice of America

Principal Government Officials

The information in this part of the "Background Note" is taken from the Central Intelligence Agency directory, *Chiefs of State and Cabinet Members of Foreign Governments*, which is updated monthly. The directory is intended to be used primarily as a reference aid and includes as many governments of the world as is considered practicable, some of them not officially recognized by the United States. In the directory, regimes with which the United States has no diplomatic exchanges are indicated by the initials NDE (no diplomatic exchange). The spelling of personal names follows transliteration systems generally agreed upon by government agencies, except in the case in which officials have stated a preference for alternate spellings of their names.

Although the head of the central bank is listed for each country, in most cases he or she is not a Cabinet member. Ambassadors to the United States and Permanent Representatives to the United Nations in New York have also been included. A key to the abbreviations related to members of foreign governments follows:

Adm.	Admiral
Admin.	Administrative/Administration
Asst.	Assistant
Brig.	Brigadier
Capt.	Captain
Cdr.	Commander
Cdte.	Comandante
Chmn.	Chairman
Col.	Colonel
Comdr.	Commodore
Ctte.	Committee
Del.	Delegate
Dep.	Deputy
Dept.	Department
Dir.	Director
Div.	Division
Dr.	Doctor
Eng.	Engineer
Fd. Mar.	Field Marshal
Fed.	Federal
Gen.	General
Govt.	Government
Intl.	International
Lt.	Lieutenant
Maj.	Major
Mar.	Marshal
Mbr.	Member
Min.	Minister, Ministry
NDE	No Diplomatic Exchange
Org.	Organization
Pres.	President
Prof.	Professor
RAdm.	Rear Admiral

Ret.	Retired
Sec.	Secretary
VAdm.	Vice Admiral
VMar.	Vice Marshal

Consular Information Sheets, Travel Warnings, and Travel Alerts

Consular Information Sheets (also referred to as Country Specific Information) are available for every country of the world. These pages include such information as location of the U.S. embassy or consulate in the subject country, unusual immigration practices, health conditions, minor political disturbances, unusual currency and entry regulations, crime and security information, and drug penalties. Consular Information Sheets generally do not include advice, but present information in a factual manner so the traveler can make his or her own decisions concerning travel to a particular country.

Where applicable, country entries will also include information concerning international parental child abduction laws and/or intercountry adoption requirements and procedures. This country specific information provides only a general look at what are often very complex policies and procedures of a particular country. Readers should consult the website of the State Department at http://www.state.gov for more details and updated information.

Travel Warnings are issued to describe long-term, protracted conditions that make a country dangerous or unstable. A Travel Warning is also issued when the U.S. Government's ability to assist American citizens is constrained due to the closure of an embassy or consulate or because of a drawdown of its staff. Travel Alerts (formerly known as Public Announcements) are issued to disseminate information about short-term conditions, generally within a particular country, that pose imminent risks to the security of U.S. citizens. Natural disasters, terrorist attacks, coups, anniversaries of terrorist events, election-related demonstrations or violence, and high-profile events such as international conferences or regional sports events are examples of conditions that might generate a Travel Alert.

International Treaty Organizations

This section provides information in "Background Note" format on important international organizations of which many of the world's nations are members.

Foreign Travel

This section provides useful information on travel to the countries of the world. Information is provided on customs, passports and visas, health concerns, vaccination requirements, international parental child abduction laws, intercountry adoption regulations, and numerous other travel related topics. A new section has been added containing an abridged version of the State Department's *Foreign Embassies and Consulates in the United States.* Travelers may wish to contact the offices of the country to which they wish to travel for specific information on entry requirements, customs, laws, and safety issues. Also included in this section is important U.S. government advice on global terrorism and its prevalence in countries and regions of the world.

Government Advice:
How and Where to Seek the State Department's Assistance When Doing Business Abroad

This section, primarily in question and answer format, provides explanations of the U.S. government services available to those engaged in business activities in other countries. Information on who to contact and how to make contacts by mail and telephone is outlined. In addition, contact information for the state and regional offices of the U.S. Department of Commerce devoted to international trade is provided.

Country Reports on Terrorism: 2007

This section, previously called *Patterns of Global Terrorism* (in the 2006 edition), presents a summary of the status of the U.S. government's efforts to combat international terrorism and summarizes the acts of terrorism recorded during 2006–07. It also provides descriptions of terrorist activities in the regions of the world and profiles active terrorist organizations.

FOR MORE INFORMATION

Government data presented in these volumes represents the most current release of such data as of March 2008. However, some articles have been condensed and edited to be suitable for book format. Also, it must again be emphasized that because events and conditions in the world can change dramatically and quickly, readers should consult the web site of the State Department at http://www.state.gov for the latest information releases.

The State Department has also established a toll-free number to assist individuals who need additional information or do not have access to the website. This toll-free number, 1-888-407-4747, is available from 8:00 a.m. to 8:00 p.m. Eastern Standard Time, Monday through Friday (except U.S. holidays). Callers who are unable to use toll-free numbers, such as those calling from overseas, may obtain information and assistance during these hours by calling 1-317-472-2328.

Persons seeking information or assistance outside of these hours, including on weekends or holidays, should call 1-202-647-5225.

Status of the World's Nations

STATUS OF THE WORLD'S NATIONS

Listing of Nations, Dependencies, and Areas of Special Sovereignty

Editor's note: This section was adapted from *Geographic Notes*, issued by the Bureau of Intelligence and Research, U.S. State Department in April 1992 and updated by the editors of this volume in March 2008.

OVERVIEW

In this survey, the term "nation" refers to a people politically organized into a sovereign state with a definite, internationally recognized territory. The number of such nations has almost tripled since the end of World War II. On the eve of the war there were 70 nations; as of March 2008, there were 194.

In 1990 and 1991 several important changes took place in the status of the world's nations. Two nations, Yemen and Germany, were formed in 1990, each by unification of two formerly separate nations. In the case of Germany, the former German Democratic Republic was subsumed by the Federal Republic of Germany. The Republic of Yemen was formed by union of the former Yemen Arab Republic and the People's Democratic Republic of Yemen. Also in 1990, Namibia finally realized its Independence; the UN had terminated its status as a South African mandate in 1966.

The year 1990 also began a period of turmoil in the former Soviet Union. The independence of the three Baltic States—Estonia, Latvia, and Lithuania—was recognized by the central Soviet government in August 1991. The United States established diplomatic relations with the democratically elected governments of the Baltic States in September 1991. In December 1991 the 12 former Soviet republics became separate sovereign nations.

With the breakup of Yugoslavia, Bosnia and Herzegovina declared independence along with its neighbor Serbia and Montenegro in 1992. In 1993 Czechoslovakia dissolved into Slovakia and the Czech Republic. Also in 1993, Eritrea declared its independence from Ethiopia. In 2002, East Timor declared itself a nation after separating from Indonesia. Montenegro separated from Serbia to become an independent nation on June 3, 2006. On February 17, 2008, Kosovo declared its independence from Serbia.

The magnitude of these changes, though noteworthy, is not unprecedented in recent history. The unsettled international situations following each of the World Wars fostered the creation of new nations without an equal dissolution of existing ones. As a result of World War I, three nations in Europe ceased to exist—Austria, Hungary, Montenegro, and Serbia—but they were replaced by four new nations: Austria-Hungary, Czechoslovakia, and Yugoslavia. Poland reappeared on the map of Europe after an interval of almost a century and a quarter during which it had been partitioned among Austria-Hungary, Germany, and Russia.

In the early part of World War II, Estonia, Latvia, and Lithuania were forcibly incorporated into the USSR. Other nations disappeared temporarily from the world community during the period that led up to World War II. These include Ethiopia in 1936, Austria in 1938, and Czechoslovakia in 1939. In the aftermath of World War II, however, two new nations emerged through the partition of Germany and Israel was created within the United Kingdom's Palestine League of Nations Mandate.

Proliferation of Nations

The dramatic increase in the number of nations since World War II has occurred primarily through the breakup of larger territorial entities, particularly in Africa, along the southern periphery of Asia, in the Caribbean, and in the Pacific Ocean. The dissolution of the Soviet Union follows this proliferation pattern.

Several periods since 1945 were marked particularly by the emergence of new nations from colonial powers. In 1960 alone, 14 new nations appeared from French-controlled parts of Africa. Of the 69 nations formed worldwide between 1961 and 1992, 42 had been wholly or partly under British sovereignty at some time in their history, including seven of the 11 new Pacific island nations. Between September 1974 and November 1975, all five of Portugal's overseas provinces in Africa became nations.

Several exceptional situations since World War II have caused irregularities in the sovereignty structure. Syria in 1958 joined Egypt to form the United Arab Republic, a union that endured three years. In 1962 the West Indies Federation, just a few months before its scheduled independence, was dissolved in favor of sovereignty for Jamaica and Trinidad and Tobago. In another instance in which nations unsuccessfully attempted to merge, Kenya, Uganda, Tanganyika, and Zanzibar considered the creation of an East African federation with a single national government. These plans failed to materialize, but in April 1964 Tanganyika and Zanzibar merged to become one nation, Tanzania.

Geographical Attributes

The largest nation by size of territory is Russia, followed, in order by Canada, China, the United States, Brazil, and Australia, all with more than 5 million square kilometers of total area. The largest nation by population is China, followed, in order by India, the United States, and Indonesia, all with more than 190 million people. The Holy See (Vatican City) is the world's smallest nation, in both land area and population.

Of the 194 nations, 39 are islands that border no other country, 44 are landlocked, and the remaining 111 face one or more oceans or their embayments. As nations delimit their 200-nautical-mile exclusive economic zones (EEZs) under the provisions of the 1982 United Nations Convention on the Law of the Sea, including negotiating maritime boundaries with neighboring nations, some may face the possibility of being "zonelocked."

Dependent Areas

Government control over land areas varies widely, from full sovereignty to none. The term "dependent areas" encompasses a broad category of political entities that fall in some way within the jurisdiction of a nation. In this survey, dependent areas are "overseas" territories associated with a nation; they do not include offshore islands that belong to or make up civil divisions of a nation. Australia, Denmark, France, Netherlands, New Zealand, Norway, Portugal, Spain, the United Kingdom, and the United States maintain dependent areas. The level of political dependence ranges from self-governing in domestic affairs to administered directly from the national capital. The latter case often includes minor scattered islands with little or no permanent population.

Except for a sector of Antarctica, there are no significant land areas that are not either under the control of a nation or claimed by one. Antarctic claims have been made by seven of the 28 consultative nations to the 1959 Antarctic Treaty,* although the legal status of those claims remains in suspension under the provisions of the treaty. The unclaimed sector of Antarctica is between 90 and 150 degrees west longitude.

The United States has asserted no claim of sovereignty in Antarctica, although it reserves the right to make one; it recognizes none of the claims within the Antarctic Treaty area (south of 60 degrees south latitude) made by other nations.

*Argentina, Australia, Chile, France, New Zealand, Norway, and the United Kingdom are the seven signatories of the 1959 Antarctic Treaty which have claims in Antarctica. The remaining consultative nations are Belgium, Brazil, Bulgaria, China, Ecuador, Finland, Germany, India, Italy, Japan, Netherlands, Peru, Poland, Russia, South Africa, South Korea, Spain, Sweden, Ukraine, United States, and Uruguay.

NATIONS, DEPENDENCIES, AREAS OF SPECIAL SOVEREIGNTY

The following information is provided as reference material only. The data do not necessarily correspond to official statistics published by the various states. Status of the World's Nations should not be considered legally definitive.

Diplomatic Relations

The United States has established diplomatic relations with 189 of the listed nations. These are designated by an asterisk (*).

Name of Nation

The short-form name of the nation is commonly used; the long form is used for official documents and formal occasions. In a few instances no short form exists; the long form must serve for all usages. Conversely, a long form may not exist or may seldom be used.

Sovereignty

The sovereignty of dependencies and areas of special sovereignty is identified; where required, a note clarifies an entity's political status.

Capitals

For each state the conventionally accepted capital city name, recommended for use on maps, is listed. In the several instances where states have more than one capital, information on each is given. Some dependencies have no capital city and may be administered from another dependency of the same nation. In the case of small multi-island insular states or dependencies, the island on which the capital is located is given, unless it has the same name.

UN Membership

UN membership is indicated by a (+).

Independent States[1] in the World as of August 19, 2008

	Short-form name	Long-form name	FIPS[2]	Capital
1.	Afghanistan *+	**Islamic Republic of Afghanistan**	AF	*Kabul*

Other

Taiwan[6]	(no long-form name)	TW	*T'ai-pei*

Notes

Note 1: In this listing, the term "independent state" refers to a people politically organized into a sovereign state with a definite territory recognized as independent by the US.

Note 2: Federal Information Processing Standard (FIPS) 10-4 codes.

Note 3: With the establishment of diplomatic relations with China on January 1, 1979, the US Government recognized the People's Republic of China as the sole legal government of China and acknowledged the Chinese position that there is only one China and that Taiwan is part of China.

Note 4: "Congo" is the official short-form name for both the Republic of the Congo and the Democratic Republic of the Congo. To distinguish one from the other, the U.S. Department of State adds the capital in parentheses. This practice is unofficial and provisional.

Note 5: Israel proclaimed Jerusalem as its capital in 1950. The U.S., like nearly all other countries maintains its embassy in Tel Aviv.

Note 6: Claimed by both the Government of the People's Republic of China and the authorities on Taiwan. Administered by the authorities on Taiwan (see note 3)

Notes

Note 1: Federal Information Processing Standard (FIPS) 10-4 codes.

Note 2: Antarctica consists of the territory south of 60 degrees south latitude. This area includes claims by Argentina, Australia, Chile, France, New Zealand, Norway, and the United Kingdom, the legal status of which remains in suspense under the terms of the Antarctic Treaty of 1959. The United States recognizes no claims to Antarctica.

Note 3: Chagos Archipelago (including Diego Garcia).

Note 4: U.K.Overseas Territory (also claimed by Argentina).

Note 5: French Guiana, Guadeloupe, Martinique and Reunion are departments (first-order administrative units) of France, and are therefore not dependencies or areas of special sovereignty. They are included in this list only for the convenience of the user. The Department of Guadeloupe includes the nearby islands of Marie-Galante, La Desirade, and Iles des Saintes, as well as Saint Barthelemy and the northern three-fifths of Saint Martin (the rest of which belongs to Netherlands Antilles). The islands of Bassas da India, Europa Island, Glorioso Islands, Juan de Nova Island, and Tromelin Island are administered from Reunion; all these islands are claimed by Madagascar, and Tromelin Island is claimed by Mauritius.

Note 6: "French Southern and Antarctic Lands" includes Île Amsterdam, Île Saint-Paul, Îles Crozet, and Îles Ker-

guelen in the southern Indian Ocean, along with the French-claimed sector of Antarctica, "Terre Adélie." The United States does not recognize the French claim to "Terre Adélie" (see note 2).

Note 7: The Bailiwick of Guernsey includes the islands of Alderney, Guernsey, Herm, Sark, and nearby smaller islands.

Note 8: Under a Sino-British declaration of September 1984, Hong Kong reverted to Chinese control on July 1, 1997. It is now a semi-autonomous entity that exists pursuant to international agreement and maintains its own government apart from the People's Republic of China.

Note 9: Administered from Oslo, Norway, through a governor resident in Longyearbyen, Svalbard.

Note 10: Under the Sino-Portuguese Joint Declaration on the Question of Macau signed in 1987, Macau reverted to Chinese control on December 20, 1999. It is now a semi-autonomous entity that exists pursuant to international agreement and maintains its own government apart from the People's Republic of China.

Note 11: Netherlands Antilles comprises two groupings of islands: Curaçao and Bonaire are located off the coast of Venezuela; Saba, Sint Eustatius, and Sint Maarten (the Dutch two-fifths of the island of Saint Martin) lie 800 km to the north.

Note 12: South China Sea islands occupied by China but claimed by Vietnam.

Note 13: The territory of Saint Helena includes the Island group of Tristan da Cunha; Saint Helena also administers Ascension Island.

Note 14: South China Sea islands claimed in entirety by China and Vietnam and in part by the Philippines and Malaysia; each of these states occupies some part of the islands.

Note 15: U.K. military bases on the island of Cyprus.

Note 16: The joint force headquarters under the Commander of the British forces, Cyprus administers both sovereign base areas from Episkopi.

Note 17: The island of Saint Martin is divided: the northern three-fifths form the French collectivity of Saint-Martin, while the southern two-fifths (Sint Maarten) are part of the Netherlands Antilles.

Alphabetical Checklist of 127 New Nations Since 1943

Algeria	July 5, 1962
Angola	Nov. 11, 1976
Antigua and Barbuda	Nov. 1, 1981
Armenia	Sept. 23, 1991
Azerbaijan	Aug. 30, 1991
Bahamas, The	July 10, 1973
Bahrain	Aug. 14, 1971
Bangladesh	Apr. 4, 1972
Barbados	Nov. 30, 1966
Belarus	Aug. 25, 1991
Belize	Sept. 21, 1981
Benin	Aug. 1, 1960
Bosnia and Herzegovina	April 1, 1992
Botswana	Sept. 30, 1966
Brunei	Jan. 1, 1984
Burkina	Aug. 5, 1960
Burma	Jan. 4, 1948
Burundi	July 1, 1962
Cambodia	Nov. 8, 1949
Cameroon	Jan. 1, 1960
Cape Verde	July 5, 1975
Central African Republic	Aug. 13, 1960
Chad	Aug. 11, 1960
Comoros	Dec. 31, 1976
Congo, Dem. Rep. of (Zaire)	June 30, 1960
Congo, Rep. of	Aug. 15, 1960
Côte d'Ivoire (Ivory Coast)	Aug. 7, 1960
Croatia	June 25, 1991
Cyprus	Aug. 16, 1960
Czech Republic	Jan. 1, 1993
Djibouti	June 27, 1977
Dominica	Nov. 3, 1978
East Timor	May 20, 2002
Equatorial Guinea	Oct. 12, 1968
Eritrea	April 27, 1993
Estonia	Sept. 6, 1991
Fiji	Oct. 10, 1970
Gabon	Aug. 17, 1960
Gambia, The	Feb. 18, 1965
Georgia	April 9, 1991
Ghana	Mar. 6, 1957
Grenada	Feb. 7, 1974
Guinea	Oct. 2, 1958
Guinea-Bissau	Sept. 10, 1974
Guyana	May 26, 1966
Iceland	June 17, 1944
India	Aug. 15, 1947
Indonesia	Dec. 28, 1949
Israel	May 15, 1948
Jamaica	Aug. 6, 1962
Jordan	Mar. 22, 1946
Kazakhstan	Dec. 6, 1991
Kenya	Dec. 12, 1963
Kiribati	July 12, 1979
Korea, North	Sept. 9, 1948
Korea, South	Aug. 15, 1948
Kosovo	Feb. 17, 2008
Kuwait	June 19, 1961
Kyrgyzstan	Aug. 31, 1991
Laos	July 19, 1949
Latvia	Sept. 6, 1991
Lebanon	Nov. 22, 1943
Lesotho	Oct. 4, 1966
Libya	Dec. 24, 1951
Lithuania	Sept. 6, 1991
Macedonia	Nov. 20, 1991
Madagascar	June 27, 1960
Malawi	July 6, 1964
Malaysia	Aug. 31, 1957
Maldives	July 26, 1966
Mali	Sept. 22, 1960
Malta	Sept. 21, 1964
Marshall Islands	Oct. 21, 1986
Mauritania	Nov. 28, 1960
Mauritius	Mar. 12, 1968
Micronesia, Federated States of	Nov. 3, 1986
Moldova	Aug. 27, 1991
Montenegro	June 3, 2006
Morocco	Mar. 2, 1956
Mozambique	June 25, 1975
Namibia	March 21, 1990
Nauru	Jan. 31, 1968
Niger	Aug. 3, 1960
Nigeria	Oct. 1, 1960
Pakistan	Aug. 14, 1947
Palau	Jan. 1, 1981
Papua New Guinea	Sept. 16, 1976
Philippines	July 4, 1946
Qatar	Sept. 3, 1971
Russia	Aug. 24, 1991
Rwanda	July 1, 1962
Saint Kitts and Nevis	Sept. 19, 1983
Saint Lucia	Feb. 22, 1979
Saint Vincent and the Grenadines	Oct. 27, 1979
São Tomé and Príncipe	July 12, 1975
Senegal	Aug. 20, 1960
Serbia	April 11, 1992
Seychelles	June 28, 1976
Sierra Leone	Apr. 27, 1961
Singapore	Aug. 9, 1965
Slovakia	Jan. 1, 1993
Slovenia	June 25, 1991
Solomon Islands	July 7, 1978
Somalia	July 1, 1960
Sri Lanka	Feb. 4, 1948
Sudan	Jan. 1, 1956
Suriname	Nov. 25, 1975
Swaziland	Sept. 6, 1968
Syria	Jan. 1, 1944
Tajikistan	Sept. 9, 1991
Tanzania	Dec. 9, 1961
Togo	Apr. 27, 1960
Tonga	June 4, 1970
Trinidad and Tobago	Aug. 31, 1962
Tunisia	Mar. 20, 1956
Turkmenistan	Oct. 27, 1991
Tuvalu	Oct. 1, 1978
Uganda	Oct. 9, 1962
Ukraine	Dec. 1, 1991
Uzbekistan	Aug. 31, 1991
United Arab Emirates	Dec. 2, 1971
Vanuatu	July 30, 1980
Vietnam	Mar. 8, 1949
Western Samoa	Jan. 1, 1962
Yemen	May 22, 1990
Zambia	Oct. 24, 1964
Zimbabwe	Apr. 18, 1980

Chronological Checklist of 127 New Nations Since 1943

1943	Nov. 22	Lebanon

Background Notes on Countries of the World

THE WORLD

December 2008

Editor's Note: This entry on The World is an abstract of current, key facts to provide a global context for the various national entries in this Yearbook. This information was provided by the U.S. Central Intelligence Agency; Background Notes on individual countries are from the U.S. Department of State.

PROFILE

Background

Globally, the 20th century was marked by: (a) two devastating world wars; (b) the Great Depression of the 1930s; (c) the end of vast colonial empires; (d) rapid advances in science and technology, from the first airplane flight at Kitty Hawk, North Carolina (US) to the landing on the moon; (e) the Cold War between the Western alliance and the Warsaw Pact nations; (f) a sharp rise in living standards in North America, Europe, and Japan; (g) increased concerns about the environment, including loss of forests, shortages of energy and water, the decline in biological diversity, and air pollution; (h) the onset of the AIDS epidemic; and (i) the ultimate emergence of the US as the only world superpower. The planet's population continues to explode: from 1 billion in 1820, to 2 billion in 1930, 3 billion in 1960, 4 billion in 1974, 5 billion in 1988, and 6 billion in 2000. For the 21st century, the continued exponential growth in science and technology raises both hopes (e.g., advances in medicine) and fears (e.g., development of even more lethal weapons of war).

GEOGRAPHY

The surface of the earth is approximately 70.9% water and 29.1% land. The former portion is divided into large water bodies termed oceans. The World Factbook recognizes and describes five oceans, which are in decreasing order of size: the Pacific Ocean, Atlantic Ocean, Indian Ocean, Southern Ocean, and Arctic Ocean.

The land portion is generally divided into several, large, discrete landmasses termed continents. Depending on the convention used, the number of continents can vary from five to seven. The most common classification recognizes seven, which are (from largest to smallest): Asia, Africa, North America, South America, Antarctica, Europe, and Australia. Asia and Europe are sometimes lumped together into a Eurasian continent resulting in six continents. Alternatively, North and South America are sometimes grouped as simply the Americas, resulting in a continent total of six (or five, if the Eurasia designation is used).

North America is commonly understood to include the island of Greenland, the isles of the Caribbean, and to extend south all the way to the Isthmus of Panama. The easternmost extent of Europe is generally defined as being the Ural Mountains and the Ural River; on the southeast the Caspian Sea; and on the south the Caucasus Mountains, the Black Sea, and the Mediterranean. Africa's northeast extremity is frequently delimited at the Isthmus of Suez, but for geopolitical purposes, the Egyptian Sinai Peninsula is often included as part Africa. Asia usually incorporates all the islands of the Philippines, Malaysia, and Indonesia. The islands of the Pacific are often lumped with Australia into a "land mass" termed Oceania or Australasia.

Although the above groupings are the most common, different continental dispositions are recognized or taught in certain parts of the world, with some arrangements more heavily based on cultural spheres rather than physical geographic considerations.

Area: *total:* 510.072 million sq km; *land:* 148.94 million sq k; *water:* 361.132 million sq km; *Note:* 70.9% of the world's surface is water, 29.1% is land

Area—comparative: land area about 16 times the size of the US

Land boundaries: the land boundaries in the world total 251,060 km (not counting shared boundaries twice); two nations, China and Russia, each border 14 other countries. *Note:* 45 nations and other areas are landlocked, these include: Afghanistan, Andorra, Armenia, Austria, Azerbaijan, Belarus, Bhutan, Bolivia, Botswana, Burkina Faso,

Burundi, Central African Republic, Chad, Czech Republic, Ethiopia, Holy See (Vatican City), Hungary, Kazakhstan, Kosovo, Kyrgyzstan, Laos, Lesotho, Liechtenstein, Luxembourg, Macedonia, Malawi, Mali, Moldova, Mongolia, Nepal, Niger, Paraguay, Rwanda, San Marino, Serbia, Slovakia, Swaziland, Switzerland, Tajikistan, Turkmenistan, Uganda, Uzbekistan, West Bank, Zambia, Zimbabwe; two of these, Liechtenstein and Uzbekistan, are doubly landlocked

Coastline: 356,000 km. *Note:* 94 nations and other entities are islands that border no other countries, they include: American Samoa, Anguilla, Antigua and Barbuda, Aruba, Ashmore and Cartier Islands, The Bahamas, Bahrain, Baker Island, Barbados, Bermuda, Bouvet Island, British Indian Ocean Territory, British Virgin Islands, Cape Verde, Cayman Islands, Christmas Island, Clipperton Island, Cocos (Keeling) Islands, Comoros, Cook Islands, Coral Sea Islands, Cuba, Cyprus, Dominica, Falkland Islands (Islas Malvinas), Faroe Islands, Fiji, French Polynesia, French Southern and Antarctic Lands, Greenland, Grenada, Guam, Guernsey, Heard Island and McDonald Islands, Howland Island, Iceland, Isle of Man, Jamaica, Jan Mayen, Japan, Jarvis Island, Jersey, Johnston Atoll, Kingman Reef, Kiribati, Madagascar, Maldives, Malta, Marshall Islands, Martinique, Mauritius, Mayotte, Federated States of Micronesia, Midway Islands, Montserrat, Nauru, Navassa Island, New Caledonia, New Zealand, Niue, Norfolk Island, Northern Mariana Islands, Palau, Palmyra Atoll, Paracel Islands, Philippines, Pitcairn Islands, Puerto Rico, Reunion, Saint Barthelemy, Saint Helena, Saint Kitts and Nevis, Saint Lucia, Saint Pierre and Miquelon, Saint Vincent and the Grenadines, Samoa, Sao Tome and Principe, Seychelles, Singapore, Solomon Islands, South Georgia and the South Sandwich Islands, Spratly Islands, Sri Lanka, Svalbard, Tokelau, Tonga, Trinidad and Tobago, Turks and Caicos Islands, Tuvalu, Vanuatu, Virgin Islands, Wake Island, Wallis and Futuna, Taiwan

Maritime claims: a variety of situations exist, but in general, most countries make the following claims measured from the mean low-tide baseline as described in the 1982 UN Convention on the Law of the Sea: territorial sea—12 nm, contiguous zone—24 nm, and exclusive economic zone—200 nm; additional zones provide for exploitation of continental shelf resources and an exclusive fishing zone; boundary situations with neighboring states prevent many countries from extending their fishing or economic zones to a full 200 nm

Climate: a wide equatorial band of hot and humid tropical climates—bordered north and south by subtropical temperate zones—that separate two large areas of cold and dry polar climates

Terrain: the greatest ocean depth is the Mariana Trench at 10,924 m in the Pacific Ocean

Elevation extremes: *lowest point:* Bentley Subglacial Trench -2,540 m. *Note:* in the oceanic realm, Challenger Deep in the Mariana Trench is the lowest point, lying -10,924 m below the surface of the Pacific Ocean. *highest point:* Mount Everest 8,850 m

Natural resources: the rapid depletion of nonrenewable mineral resources, the depletion of forest areas and wetlands, the extinction of animal and plant species, and the deterioration in air and water quality (especially in Eastern Europe, the former USSR, and China) pose serious long-term problems that governments and peoples are only beginning to address

Land use: *arable land:* 10.57%; *permanent crops:* 1.04%; *other:* 88.38% (2005); *Irrigated land:* 2,770,980 sq km (2003)

Natural hazards: large areas subject to severe weather (tropical cyclones), natural disasters (earthquakes, landslides, tsunamis, volcanic eruptions)

Environment—current issues: large areas subject to overpopulation, industrial disasters, pollution (air, water, acid rain, toxic substances), loss of vegetation (overgrazing, deforestation, desertification), loss of wildlife, soil degradation, soil depletion, erosion; global warming becoming a greater concern

Geography—Note: the world is now thought to be about 4.55 billion years old, just about one-third of the 13.7-billion-year age estimated for the universe

PEOPLE

Population: 6,706,993,152 (July 2008 est.)

Age structure: *0-14 years:* 27.3% (male 944,665,142/female 887,471,328); *15-64 years:* 65.1% *65 years and over:* 7.6% (male 222,808,372/female 284,647,297) (2008 est.)

Median age: *male:* 27.4 years; *female:* 28.7 years (2008 est.)

Population growth rate: 1.188% (2008 est.)

Birth rate: 20.18 births/1,000 population (2008 est.)

Death rate: 8.23 deaths/1,000 population (2008 est.)

Sex ratio: *at birth:* 1.07 male(s)/female; *under 15 years:* 1.06 male(s)/female; *15-64 years:* 1.02 male(s)/female; *65 years and over:* 0.78 male(s)/female; *total population:* 1.01 male(s)/female (2008 est.)

Infant mortality rate: *total:* 42.09 deaths/1,000 live births; *male:* 44.91 deaths/1,000 live births; *female:* 39.09 deaths/1,000 live births (2008 est.)

Life expectancy at birth: *total population:* 66.26 years; *male:* 64.3 years; *female:* 68.3 years (2008 est.)

Total fertility rate: 2.61 children born/woman (2008 est.)

HIV/AIDS—adult prevalence rate: NA

HIV/AIDS—people living with HIV/AIDS: NA

HIV/AIDS—deaths: NA

Religions: Christians 33.32% (of which Roman Catholics 16.99%, Protestants 5.78%, Orthodox 3.53%, Anglicans 1.25%), Muslims 21.01%, Hindus 13.26%, Buddhists 5.84%, Sikhs 0.35%, Jews 0.23%, Baha'is 0.12%, other religions 11.78%, nonreligious 11.77%, atheists 2.32% (2007 est.)

Languages: Mandarin Chinese 13.22%, Spanish 4.88%, English 4.68%, Arabic 3.12%, Hindi 2.74%,

Portuguese 2.69%, Bengali 2.59%, Russian 2.2%, Japanese 1.85%, Standard German 1.44%, Wu Chinese 1.17% (2005 est.). *Note:* percents are for "first language" speakers only

Literacy: *definition:* age 15 and over can read and write; *total population:* 82%; *male:* 87%; *female:* 77%. *Note:* over two-thirds of the world's 785 million illiterate adults are found in only eight countries (India, China, Bangladesh, Pakistan, Nigeria, Ethiopia, Indonesia, and Egypt); of all the illiterate adults in the world, two-thirds are women; extremely low literacy rates are concentrated in three regions, South and West Asia, Sub-Saharan Africa, and the Arab states, where around one-third of the men and half of all women are illiterate (2005 est.)

GOVERNMENT

Political subdivisions: 266 nations, dependent areas, and other entities

Legal system: all members of the UN are parties to the statute that established the International Court of Justice (ICJ) or World Court

ECONOMY

Overview

Global output rose by 5.2% in 2007, led by China (11.4%), India (9.2%), and Russia (8.1%). The 14 other successor nations of the USSR and the other old Warsaw Pact nations again experienced widely divergent growth rates; the three Baltic nations continued as strong performers, in the 8%-10% range of growth. From 2006 to 2007 growth rates slowed in all the major industrial countries except for the United Kingdom (3.1%). Analysts attribute the slowdown to uncertainties in the financial markets and lowered consumer confidence. Worldwide, nations varied widely in their growth results. Externally, the nation-state, as a bedrock economic-political institution, is steadily losing control over international flows of people, goods, funds, and technology. Internally, the central government often finds its control over resources slipping as separatist regional movements - typically based on ethnicity - gain momentum, e.g., in many of the successor states of the former Soviet Union, in the former Yugoslavia, in India, in Iraq, in Indonesia, and in Canada. Externally, the central government is losing decisionmaking powers to international bodies, notably the EU. In Western Europe, governments face the difficult political problem of channeling resources away from welfare programs in order to increase investment and strengthen incentives to seek employment. The addition of 80 million people each year to an already overcrowded globe is exacerbating the problems of pollution, desertification, underemployment, epidemics, and famine. Because of their own internal problems and priorities, the industrialized countries devote insufficient resources to deal effectively with the poorer areas of the world, which, at least from an economic point of view, are becoming further marginalized. The introduction of the euro as the common currency of much of Western Europe in January 1999, while paving the way for an integrated economic powerhouse, poses economic risks because of varying levels of income and cultural and political differences among the participating nations. The terrorist attacks on the US on 11 September 2001 accentuated a growing risk to global prosperity, illustrated, for example, by the reallocation of resources away from investment to anti-terrorist programs. The opening of war in March 2003 between a US-led coalition and Iraq added new uncertainties to global economic prospects. After the initial coalition victory, the complex political difficulties and the high economic cost of establishing domestic order in Iraq became major global problems that continued through 2007.

GWP (gross world product): $65.61 trillion (2007 est.)

GDP (official exchange rate): $54.62 trillion (2007 est.)

GDP—real growth rate: 5.2% (2007 est.)

GDP—per capita (PPP): $10,000 (2007 est.)

GDP—composition by sector: *agriculture:* 4%; *industry:* 32%; *services:* 64% (2007 est.)

Labor force: 3.131 billion (2007 est.)

Labor force—by occupation: *agriculture:* 40.2%; *industry:* 20.5%; *services:* 39.4% (2007 est.)

Unemployment rate: 30% combined unemployment and underemployment in many non-industrialized countries; developed countries typically 4%-12% unemployment (2007 est.)

Household income or consumption by percentage share: lowest 10%: 2.5%; highest 10%: 29.8% (2002 est.)

Investment (gross fixed): 22.7% of GDP (2007 est.)

Inflation rate (consumer prices): developed countries 1% to 4% typically; developing countries 5% to 20% typically; national inflation rates vary widely in individual cases, from declining prices in Japan to hyperinflation in one Third World countries (Zimbabwe); inflation rates have declined for most countries for the last several years, held in check by increasing international competition from several low wage countries (2005 est.)

Industries: dominated by the onrush of technology, especially in computers, robotics, telecommunications, and medicines and medical equipment; most of these advances take place in OECD nations; only a small portion of non-OECD countries have succeeded in rapidly adjusting to these technological forces; the accelerated development of new industrial (and agricultural) technology is complicating already grim environmental problems

Industrial production growth rate: 5% (2007 est.)

Electricity—production: 18.96 trillion kWh (2007 est.)

Electricity—consumption: 16.88 trillion kWh (2007 est.)

Electricity—exports: 655.6 billion kWh (2007 est)

Electricity—imports: 627.9 billion kWh (2007 est.)

Electricity—production by source: fossil fuel: NA; hydro: NA; nuclear: NA; other: NA

Oil—production: 84.79 million bbl/day (2007 est.)

Oil—consumption: 85.37 million bbl/day (2007 est.)
Oil—exports: 66.19 million bbl/day (2005)
Oil—imports: 65.41 million bbl/day (2005)
Oil—proved reserves: 1.332 trillion bbl (1 January 2008 est.)
Natural gas—production: 3.021 trillion cu m (2007 est.)
Natural gas—consumption: 3.198 trillion cu m (2007 est.)
Natural gas—exports: 929.9 billion cu m (2007 est.)
Natural gas—imports: 957.6 billion cu m (2007)
Natural gas—proved reserves: 175.4 trillion cu m (1 January 2008 est.)
Exports: $13.89 trillion f.o.b. (2006 est.)
Exports—commodities: the whole range of industrial and agricultural goods and services.
Top ten—share of world trade: electrical machinery, including computers 14.8%; mineral fuels, including oil, coal, gas, and refined products 14.4%; nuclear reactors, boilers, and parts 14.2%; cars, trucks, and buses 8.9%; scientific and precision instruments 3.5%; plastics 3.4%; iron and steel 2.7%; organic chemicals 2.6%; pharmaceutical products 2.6%; diamonds, pearls, and precious stones 1.9% (2006 est.)
Exports—partners: US 13.7%, Germany 7.3%, China 6.2%, France 4.6%, UK 4.5%, Japan 4.1% (2007)
Imports: $13.74 trillion f.o.b. (2006 est.)
Imports—commodities: the whole range of industrial and agricultural goods and services
Top ten—share of world trade: see listing for exports
Imports—partners: China 10.7%, Germany 9.23%, US 8.28%, Japan 5.14%, France 3.99% (2007)
Economic aid—recipient: ODA, $106.4 billion (2005)
Debt—external: $51.78 trillion
Note: this figure is the sum total of all countries' external debt, both public and private (2004 est.)
Stock of direct foreign investment—at home: World total DFI $14 trillion
Top ten recipients of DFI: US $1.966 trillion; UK $1.324 trillion; France $872.4 billion; Germany $811.0 billion; HK $780.4 billion; China $758.9 billion; Belgium $703.9 billion; Netherlands $535.1 billion; Canada $527.4 billion; Spain $487.8 billion (year-end 2007 est.)
Top ten sources of DFI: US $2.627 trillion; UK $1.741 trillion; France $1.211 trillion; Germany $1.123 trillion; Netherlands $811.4 billion; HK $716.2 billion; Spain $613.9 billion; Switzerland $591.5 billion; Belgium $537.6 billion; Japan $527.8 billion (year-end 2007 est.)
Market value of publicly traded shares: $53.51 trillion (2006)

COMMUNICATIONS

Telephones—main lines in use: 1,263,367,600 (2005)
Telephones—mobile cellular: 2,168,433,600 (2005)
Telephone system: general assessment: NA; domestic: NA; international: NA
Radio broadcast stations: AM NA, FM NA, shortwave NA
Television broadcast stations: NA
Internet users: 1,018,057,389 (2005)

TRANSPORTATION

Airports: total airports—49,024
Top ten by passengers: Atlanta—84,846,639; Chicago—77,028,134; London—67,530,197; Tokyo—65,810,672; Los Angeles—61,041,066; Dallas/Fort Worth—60,226,138; Paris—56,849,567; Frankfurt—52,810,683; Beijing—48,654,770; Denver—47,325,016
Top ten by cargo (metric tons): Memphis—3,692,081; Hong Kong—3,609,780; Anchorage—2,691,395; Seoul—2,336,572; Tokyo—2,280,830; Shanghai—2,168,122; Paris—2,130,724; Frankfurt—2,127,646; Louisville (US)—1,983,032; Singapore—1,931,881 (2006)
Heliports: 1,359 (2007)
Railways: total: 1,370,782 km (2006)
Roadways: *total:* 68,937,575 km (2008)
Waterways: 671,886 km (2004)
Ports and terminals: Top ten container ports (TEUs): Singapore—24,792,400; Hong Kong—23,539,000; Shanghai—21,710,000; Shenzhen (China)—18,468,890; Busan (South Korea)—12,030,000; Kaohsiung (Taiwan)—9,774,670;—Rotterdam—9,603,000; Dubai (UAE)—8,923,465; Hamburg—8,861,545; Los Angeles—8,469,853 (2006)

MILITARY

Military expenditures—percent of GDP: roughly 2% of gross world product (2005 est.)

TRANSNATIONAL ISSUES

Disputes—international: stretching over 250,000 km, the world's 322 international land boundaries separate 194 independent states and 70 dependencies, areas of special sovereignty, and other miscellaneous entities; ethnicity, culture, race, religion, and language have divided states into separate political entities as much as history, physical terrain, political fiat, or conquest, resulting in sometimes arbitrary and imposed boundaries; most maritime states have claimed limits that include territorial seas and exclusive economic zones; overlapping limits due to adjacent or opposite coasts create the potential for 430 bilateral maritime boundaries of which 209 have agreements that include contiguous and non-contiguous segments; boundary, borderland/resource, and territorial disputes vary in intensity from managed or dormant to violent or militarized; undemarcated, indefinite, porous, and unmanaged boundaries tend to encourage illegal cross-border activities, uncontrolled migration, and confrontation; territorial disputes may evolve from historical and/or cultural claims, or they may be brought on by resource competition; ethnic and cultural clashes continue to be responsible for much of the territorial fragmentation and internal displacement of the estimated 6.6 million people and cross-border displacements of 8.6 million refugees around the world as of early 2006;

just over one million refugees were repatriated in the same period; other sources of contention include access to water and mineral (especially hydrocarbon) resources, fisheries, and arable land; armed conflict prevails not so much between the uniformed armed forces of independent states as between stateless armed entities that detract from the sustenance and welfare of local populations, leaving the community of nations to cope with resultant refugees, hunger, disease, impoverishment, and environmental degradation

Refugees and internally displaced persons: the United Nations High Commissioner for Refugees (UNHCR) estimated that in December 2006 there was a global population of 8.8 million registered refugees and as many as 24.5 million IDPs in more than 50 countries; the actual global population of refugees is probably closer to 10 million given the estimated 1.5 million Iraqi refugees displaced throughout the Middle East (2007)

Trafficking in persons: current situation: approximately 800,000 people, mostly women and children, are trafficked annually across national borders, not including millions trafficked within their own countries; at least 80% of the victims are female and up to 50% are minors; 75% of all victims are trafficked into commercial sexual exploitation; almost two-thirds of the global victims are trafficked intra-regionally within East Asia and the Pacific (260,000 to 280,000 people) and Europe and Eurasia (170,000 to 210,000 people)

Tier 2 Watch List: Albania, Argentina, Armenia, Azerbaijan, Bahrain, Burundi, Cameroon, Central African Republic, Chad, China, Costa Rica, Cote d'Ivoire, Cyprus, Democratic Republic of the Congo, Dominican Republic, Egypt, Equatorial Guinea, Gabon, The Gambia, Guatemala, Guinea, Guinea-Bissau, Guyana, India, Jordan, Libya, Malaysia, Montenegro, Mozambique, Niger, Panama, Republic of the Congo, Russia, South Africa, Sri Lanka, Tajikistan, Uzbekistan, Venezuela, Zambia, Zimbabwe

Tier 3: Algeria, Burma, Cuba, Fiji, Iran, Kuwait, Moldova, North Korea, Oman, Papua New Guinea, Qatar, Saudi Arabia, Sudan, Syria (2008)

Illicit drugs: *cocaine:* worldwide coca leaf cultivation in 2007 amounted to 232,500 hectares; Colombia produced slightly more than two-thirds of the worldwide crop, followed by Peru and Bolivia; potential pure cocaine production decreased 7% to 865 metric tons in 2007; Colombia conducts aggressive coca eradication campaign, but both Peruvian and Bolivian Governments are hesitant to eradicate coca in key growing areas; 551 metric tons of export-quality cocaine (85% pure) is documented to have been seized or destroyed in 2005; US consumption of export quality cocaine is estimated to have been in excess of 380 metric tons

opiates: worldwide illicit opium poppy cultivation continued to increase in 2007, with a potential opium production of 8,400 metric tons, reaching the highest levels recorded since estimates began in mid-1980s; Afghanistan is world's primary opium producer, accounting for 95% of the global supply; Southeast Asia - responsible for 9% of global opium - saw marginal increases in production; Latin America produced 1% of global opium, but most was refined into heroin destined for the US market; if all potential opium was processed into pure heroin, the potential global production would be 1,000 metric tons of heroin in 2007

AFGHANISTAN

Compiled from the November 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Islamic Republic of Afghanistan

PROFILE

Geography

Area: 647,500 sq. km. (249,935 sq. mi.); slightly smaller than Texas.

Cities: Capital—Kabul (1,780,000; 1999/2000 UN est.). Other cities (1988 UN est.; current figures are probably significantly higher)—Kandahar (226,000); Herat (177,000); Mazar-e-Sharif (131,000); Jalalabad (58,000); Konduz (57,000).

Terrain: Landlocked; mostly mountains and desert.

Climate: Dry, with cold winters and hot summers.

People

Nationality: Noun and adjective—Afghan(s).

Population: 31,056,997 (June 2006 est.). More than 3.5 million Afghans live outside the country, mainly in Pakistan and Iran, although over 5 million have returned since the removal of the Taliban.

Annual population growth rate: (2006 est.) 2.67%. Main ethnic groups: Pashtun, Tajik, Hazara, Uzbek, Turkmen, Aimaq, Baluch, Nuristani, Kizilbash.

Religions: Sunni Muslim 80%, Shi'a Muslim 19%, other 1%.

Languages: Dari (Afghan Persian), Pashto.

Education: Education: Approximately 6 million children, of whom some 35% are girls.

Literacy: (2008 est.) 28.1% (male 43%, female 12%), but real figures may be lower given breakdown of education system and flight of educated Afghans during three decades of war and instability.

Health: Infant mortality rate (2008 est.)—154.67 deaths/1,000 live births. Life expectancy (2008 est.)—44.04 yrs. (male); 44.39 yrs. (female).

Government

Type: Islamic Republic.

Independence: August 19, 1919.

Constitution: January 4, 2004.

Government branches: Executive—president (chief of state). Legislative—bicameral National Assembly (House of the People—249 seats, House of the Elders—102 seats). Judicial—Supreme Court, High Courts, and Appeals Courts.

Political subdivisions: 34 provinces.

Suffrage: Universal at 18 years.

Economy

GDP: (2007 est.) $8.4 billion.

GDP growth: (2008 est.) 11.5%.

GDP per capita: (2007 est.) $300.

Natural resources: Natural gas, oil, coal, copper, chromite, talc, barites, sulfur, lead, zinc, iron, salt, precious and semiprecious stones.

Agriculture: (estimated 38% of GDP): Products—wheat, opium, sheepskins, lambskins, corn, barley, rice, cotton, fruit, nuts, karakul pelts, wool, and mutton.

Industry: (estimated 24% of GDP): Types—small-scale production of textiles, soap, furniture, shoes, fertilizer, cement; hand-woven carpets; natural gas, coal, and copper.

Services: (estimated 38% of GDP): Transport, retail, and telecommunications.

Trade: (2006-2007 est.): Exports—$274 million (does not include opium): fruits and nuts, hand-woven carpets, wool, cotton, hides and pelts, precious and semiprecious gems. Major markets—Central Asian republics, United States, Russia, Pakistan, India. Imports—$3.8 billion: food, petroleum products, textiles, machinery, and consumer goods. Major suppliers—Central Asian republics, Pakistan, United States, India, Germany.

Currency: The currency is the afghani, which was reintroduced as Afghanistan's new currency in January 2003. At present, $1 U.S. equals approximately 49 afghanis.

PEOPLE

Afghanistan's ethnically and linguistically mixed population reflects its location astride historic trade and

invasion routes leading from Central Asia into South and Southwest Asia. While population data is somewhat unreliable for Afghanistan, Pashtuns make up the largest ethnic group at 38-44% of the population, followed by Tajiks (25%), Hazaras (10%), Uzbek (6-8%), Aimaq, Turkmen, Baluch, and other small groups. Dari (Afghan Farsi) and Pashto are official languages. Dari is spoken by more than one-third of the population as a first language and serves as a lingua franca for most Afghans, though Pashto is spoken throughout the Pashtun areas of eastern and southern Afghanistan. Tajik and Turkic languages are spoken widely in the north. Smaller groups throughout the country also speak more than 70 other languages and numerous dialects.

Afghanistan is an Islamic country. An estimated 80% of the population is Sunni, following the Hanafi school of jurisprudence; the remainder of the population—and primarily the Hazara ethnic group— predominantly Shi'a. Despite attempts during the years of communist rule to secularize Afghan society, Islamic practices pervade all aspects of life. In fact, Islam served as a principal basis for expressing opposition to communism and the Soviet invasion. Islamic religious tradition and codes, together with traditional tribal and ethnic practices, have an important role in personal conduct and dispute settlement. Afghan society is largely based on kinship groups, which follow traditional customs and religious practices, though somewhat less so in urban areas.

HISTORY

Afghanistan, often called the crossroads of Central Asia, has had a turbulent history. In 328 BC, Alexander the Great entered the territory of present-day Afghanistan, then part of the Persian Empire, and established a Hellenistic state in Bactria (present-day Balkh). Invasions by the Scythians, White Huns, and Turks followed in succeeding centuries. In AD 642, Arabs invaded the entire region and introduced Islam. Arab rule gave way to the Persians, who controlled the area until conquered by the Turkic Ghaznavids in 998. Mahmud of Ghazni (998-1030) consolidated the conquests of his predecessors and turned Ghazni into a great cultural center as well as a base for frequent forays into India. Following Mahmud's short-lived dynasty, various princes attempted to rule sections of the country until the destructive Mongol invasion of 1219 led by Genghis Khan.

Following Genghis Khan's death in 1227, a succession of petty chiefs and princes struggled for supremacy until late in the 14th century, when one of his descendants, Tamerlane, incorporated Afghanistan into his own vast Asian empire.

In 1747, Ahmad Shah Durrani, the founder of what is known today as Afghanistan, established his rule. A Pashtun, Durrani was elected king by a tribal council after the assassination of the Persian ruler Nadir Shah at Khabushan in the same year. Throughout his reign, Durrani consolidated chieftainships, petty principalities, and fragmented provinces into one country. His rule extended from Mashad in the west to Kashmir and Delhi in the east, and from the Amu Darya (Oxus) River in the north to the Arabian Sea in the south.

European Influence

During the 19th century, collision between the expanding British Empire in the subcontinent and czarist Russia significantly influenced Afghanistan in what was termed "The Great Game." British concern over Russian advances in Central Asia and growing influence in Persia precipitated two Anglo-Afghan wars. The first (1839-42) resulted not only in the destruction of a British army, but is remembered today as an example of the ferocity of Afghan resistance to foreign rule. The second Anglo-Afghan war (1878-80) was sparked by Amir Sher Ali's refusal to accept a British mission in Kabul. This conflict brought Amir Abdur Rahman to the Afghan throne. During his reign (1880-1901), the British and Russians officially established the boundaries of what would become modern Afghanistan through the demarcation of the Durand Line. The British retained effective control over Kabul's foreign affairs.

Habibullah, Abdur Rahman's son and successor, was assassinated in 1919, possibly by family members opposed to British influence. His third son, Amanullah, regained control of Afghanistan's foreign policy after launching the third Anglo-Afghan war with an attack on India in the same year. During the ensuing conflict, the war-weary British relinquished their control over Afghan foreign affairs by signing the Treaty of Rawalpindi in August 1919. In commemoration of this event, Afghans celebrate August 19 as their Independence Day.

Reform and Reaction

King Amanullah (1919-29) moved to end his country's traditional isolation in the years following the third Anglo-Afghan war. He established diplomatic relations with most major countries and—following a 1927 tour of Europe and Turkey during which he noted the modernization and secularization advanced by Ataturk—introduced several reforms intended to modernize Afghanistan. Some of these, such as the abolition of the traditional Muslim veil for women and the opening of a number of co-educational schools, quickly alienated many tribal and religious leaders. Faced with overwhelming armed opposition, Amanullah was forced to abdicate in January 1929 after Kabul fell to forces led by Bacha-i-Saqao, a Tajik brigand. Prince Nadir Khan, a cousin of Amanullah's, in turn defeated Bacha-i-Saqao in October of the same year and, with considerable Pashtun tribal support, was declared King Nadir Shah. Four years later, however, he was assassinated in a revenge killing by a Kabul student.

Mohammad Zahir Shah, Nadir Khan's 19-year-old son, succeeded to the throne and reigned from 1933 to 1973. In 1964, King Zahir Shah promulgated a liberal constitution providing for a two-chamber legislature

to which the king appointed one-third of the deputies. The people elected another third, and the remainder were selected indirectly by provincial assemblies. Although Zahir's "experiment in democracy" produced few lasting reforms, it permitted the growth of unofficial extremist parties on both the left and the right. These included the communist People's Democratic Party of Afghanistan (PDPA), which had close ideological ties to the Soviet Union. In 1967, the PDPA split into two major rival factions: the Khalq (Masses) faction headed by Nur Muhammad Taraki and Hafizullah Amin and supported by elements within the military, and the Parcham (Banner) faction led by Babrak Karmal. The split reflected ethnic, class, and ideological divisions within Afghan society. Zahir's cousin, Sardar Mohammad Daoud, served as his Prime Minister from 1953 to 1963. During his tenure as Prime Minister, Daoud solicited military and economic assistance from both Washington and Moscow and introduced controversial social policies of a reformist nature. Daoud's alleged support for the creation of a Pashtun state in the Pakistan-Afghan border area heightened tensions with Pakistan and eventually resulted in Daoud's dismissal in March 1963.

Daoud's Republic (1973-78) and the April 1978 Coup

Amid charges of corruption and malfeasance against the royal family and poor economic conditions created by the severe 1971-72 drought, former Prime Minister Daoud seized power in a military coup on July 17, 1973. Zahir Shah fled the country, eventually finding refuge in Italy. Daoud abolished the monarchy, abrogated the 1964 constitution, and declared Afghanistan a republic with himself as its first President and Prime Minister. His attempts to carry out badly needed economic and social reforms

met with little success, and the new constitution promulgated in February 1977 failed to quell chronic political instability. Seeking to exploit more effectively mounting popular disaffection, the PDPA reunified with Moscow's support. On April 27, 1978, the PDPA initiated a bloody coup, which resulted in the overthrow and murder of Daoud and most of his family. Nur Muhammad Taraki, Secretary General of the PDPA, became President of the Revolutionary Council and Prime Minister of the newly established Democratic Republic of Afghanistan.

Opposition to the Marxist government emerged almost immediately. During its first 18 months of rule, the PDPA brutally imposed a Marxist-style "reform" program, which ran counter to deeply rooted Afghan traditions. Decrees forcing changes in marriage customs and pushing through an ill-conceived land reform were resisted by virtually all Afghans. In addition, thousands of members of the traditional elite, the religious establishment, and the intelligentsia were imprisoned, tortured, or murdered. Conflicts within the PDPA also surfaced early and resulted in exiles, purges, imprisonments, and executions.

By the summer of 1978, a revolt began in the Nuristan region of eastern Afghanistan and quickly spread into a countrywide insurgency. In September 1979, Hafizullah Amin, who had earlier been Prime Minister and Minister of Defense, seized power from Taraki after a palace shootout. Over the next 2 months, instability plagued Amin's regime as he moved against perceived enemies in the PDPA. By December, party morale was crumbling, and the insurgency was growing.

The Soviet Invasion

The Soviet Union moved quickly to take advantage of the April 1978 coup. In December 1978, Moscow signed a new bilateral treaty of friendship and cooperation with Afghanistan, and the Soviet military assistance program increased significantly. The regime's survival increasingly was dependent upon Soviet military equipment and advisers as the insurgency spread and the Afghan army began to collapse.

By October 1979, however, relations between Afghanistan and the Soviet Union were tense as Hafizullah Amin refused to take Soviet advice on how to stabilize and consolidate his government. Faced with a deteriorating security situation, on December 24, 1979, large numbers of Soviet airborne forces, joining thousands of Soviet troops already on the ground, began to land in Kabul under the pretext of a field exercise. On December 26, these invasion forces killed Hafizullah Amin and installed Babrak Karmal, exiled leader of the Parcham faction, bringing him back from Czechoslovakia and making him Prime Minister. Massive Soviet ground forces invaded from the north on December 27.

Following the invasion, the Karmal regime, although backed by an expeditionary force that grew as large as 120,000 Soviet troops, was unable to establish authority outside Kabul. As much as 80% of the countryside, including parts of Herat and Kandahar, eluded effective government control. An overwhelming majority of Afghans opposed the communist regime, either actively or passively. Afghan freedom fighters (mujahidin) made it almost impossible for the regime to maintain a system of local government outside major urban centers. Poorly armed at first, in 1984 the mujahidin began receiving substantial assistance in the form of weapons and training from the U.S. and other outside powers.

In May 1985, the seven principal Peshawar-based guerrilla organizations formed an alliance to coordinate their political and military operations against the Soviet occupation. Late in 1985, the mujahidin were active in and around Kabul, launching rocket attacks and conducting operations against the communist government. The failure of the Soviet Union to win over a significant number of Afghan collaborators or to rebuild a viable Afghan army forced it to bear an increasing responsibility for fighting the resistance and for civilian administration. Soviet and popular displeasure with the Karmal regime led to its demise in May 1986. Karmal was replaced by Muhammad Najibullah, former chief of the Afghan secret police (KHAD). Najibullah had established a reputation for brutal efficiency during his tenure as KHAD chief. As Prime Minister, Najibullah was ineffective and highly dependent on Soviet support. Undercut by deep-seated divisions within the PDPA, regime efforts to broaden its base of support proved futile.

The Geneva Accords and Their Aftermath

By the mid-1980s, the tenacious Afghan resistance movement—aided by the United States, Saudi Arabia, Pakistan, and others—was exacting a high price from the Soviets, both militarily within Afghanistan and by souring the U.S.S.R.'s relations with much of the Western and Islamic world. Informal negotiations for a Soviet withdrawal from Afghanistan had been underway since 1982. In 1988, the Governments of Pakistan and Afghanistan, with the United States and Soviet Union serving as guarantors, signed an agreement settling the major differences between them. The agreement, known as the Geneva accords, included five major documents, which, among other things, called for U.S. and Soviet noninterference in the internal affairs of Pakistan and Afghanistan, the right of refugees to return to Afghanistan without fear of persecution or harassment, and, most importantly, a timetable that ensured full Soviet withdrawal from Afghanistan by February 15, 1989. About 14,500 Soviet and an estimated one million Afghan lives were lost between 1979 and the Soviet withdrawal in 1989. Significantly, the mujahidin were party neither to the negotiations nor to the 1988 agreement and, consequently, refused to accept the terms of the accords. As a result, the civil war continued after the Soviet withdrawal, which was completed in February 1989.

Najibullah's regime, though failing to win popular support, territory, or

international recognition, was able to remain in power until 1992 but collapsed after the defection of Gen. Abdul Rashid Dostam and his Uzbek militia in March. However, when the victorious mujahidin entered Kabul to assume control over the city and the central government, a new round of internecine fighting began between the various militias, which had coexisted only uneasily during the Soviet occupation. With the demise of their common enemy, the militias' ethnic, clan, religious, and personality differences surfaced, and the civil war continued.

Seeking to resolve these differences, the leaders of the Peshawar-based mujahidin groups established an interim Islamic Jihad Council in mid-April 1992 to assume power in Kabul. Moderate leader Prof. Sibghatullah Mojaddedi was to chair the council for 2 months, after which a 10-member leadership council composed of mujahidin leaders and presided over by the head of the Jamiat-i-Islami, Prof. Burhanuddin Rabbani, was to be set up for 4 months. During this 6-month period, a Loya Jirga, or grand council of Afghan elders and notables, would convene and designate an interim administration which would hold power up to a year, pending elections.

But in May 1992, Rabbani prematurely formed the leadership council, undermining Mojaddedi's fragile authority. In June, Mojaddedi surrendered power to the Leadership Council, which then elected Rabbani as President. Nonetheless, heavy fighting broke out in August 1992 in Kabul between forces loyal to President Rabbani and rival factions, particularly those who supported Gulbuddin Hekmatyar's Hezb-i-Islami. After Rabbani extended his tenure in December 1992, fighting in the capital flared up in January and February 1993. The Islamabad Accord, signed in March 1993, which appointed Hekmatyar as Prime Minister, failed to have a lasting effect. A follow-up agreement, the Jalalabad Accord, called for the militias to be disarmed but was never fully implemented. Through 1993, Hekmatyar's Hezb-i-Islami forces, allied with the Shi'a Hezb-i-Wahdat militia, clashed intermittently with Rabbani and Masood's Jamiat forces. Cooperating with Jamiat were militants of Sayyaf's Ittehad-i-Islami and, periodically, troops loyal to ethnic Uzbek strongman Abdul Rashid Dostam. On January 1, 1994, Dostam switched sides, precipitating large-scale fighting in Kabul and in northern provinces, which caused thousands of civilian casualties in Kabul and elsewhere and created a new wave of displaced persons and refugees. The country sank even further into anarchy, forces loyal to Rabbani and Masood, both ethnic Tajiks, controlled Kabul and much of the northeast, while local warlords exerted power over the rest of the country.

Rise and Fall of the Taliban

The Taliban had risen to power in the mid 90's in reaction to the anarchy and warlordism that arose after the withdrawal of Soviet forces. Many Taliban had been educated in madrassas in Pakistan and were largely from rural southern Pashtun backgrounds. In 1994, the Taliban developed enough strength to capture the city of Kandahar from a local warlord and proceeded to expand its control throughout Afghanistan, occupying Kabul in September 1996. By the end of 1998, the Taliban occupied about 90% of the country, limiting the opposition largely to a small mostly Tajik corner in the northeast and the Panjshir valley.

The Taliban sought to impose an extreme interpretation of Islam—based upon the rural Pashtun tribal code—on the entire country and committed massive human rights violations, particularly directed against women and girls. The Taliban also committed serious atrocities against minority populations, particularly the Shi'a Hazara ethnic group, and killed noncombatants in several well-documented instances. In 2001, as part of a drive against relics of Afghanistan's pre-Islamic past, the Taliban destroyed two huge Buddha statues carved into a cliff face outside of the city of Bamiyan.

From the mid-1990s the Taliban provided sanctuary to Osama bin Laden, a Saudi national who had fought with the mujahideen resistance against the Soviets, and provided a base for his and other terrorist organizations. Bin Laden provided both financial and political support to the Taliban. Bin Laden and his Al-Qaida group were charged with the bombing of the U.S. Embassies in Nairobi and Dar Es Salaam in 1998, and in August 1998 the United States launched a cruise missile attack against bin Laden's terrorist camp in southeastern Afghanistan. Bin Laden and Al-Qaida have acknowledged their responsibility for the September 11, 2001 terrorist attacks against the United States.

Following the Taliban's repeated refusal to expel bin Laden and his group and end its support for international terrorism, the U.S. and its partners in the anti-terrorist coalition began a military campaign on October 7, 2001, targeting terrorist facilities and various Taliban military and political assets within Afghanistan. Under pressure from U.S. military and anti-Taliban forces, the Taliban disintegrated rapidly, and Kabul fell on November 13, 2001.

Afghan factions opposed to the Taliban met at a United Nations-sponsored conference in Bonn, Germany in December 2001 and agreed to restore stability and governance to Afghanistan—creating an interim government and establishing a process to move toward a permanent government. Under the "Bonn Agreement," an Afghan Interim Authority was formed and took office in Kabul on December 22, 2001 with Hamid Karzai as Chairman. The Interim Authority held power for approximately 6 months while preparing for a nationwide "Loya Jirga" (Grand Council) in mid-June 2002 that decided on the structure of a Transitional Authority. The Transitional Authority, headed by President Hamid Karzai, renamed the government as the Transitional Islamic State of Afghanistan (TISA). One of the TISA's primary achievements was the drafting of a constitution that was ratified by a Constitutional Loya

Jirga on January 4, 2004. On December 7, 2004, the country was renamed the Islamic Republic of Afghanistan.

GOVERNMENT AND POLITICAL CONDITIONS

On October 9, 2004, Afghanistan held its first national democratic presidential election. More than 8 million Afghans voted, 41% of whom were women. Hamid Karzai was announced as the official winner on November 3 and inaugurated on December 7 for a five-year term as Afghanistan's first democratically elected president.

An election was held on September 18, 2005 for the "Wolesi Jirga" (lower house) of Afghanistan's new bicameral National Assembly and for the country's 34 provincial councils. Turnout for the election was about 53% of the 12.5 million registered voters. The Afghan constitution provides for indirect election of the National Assembly's "Meshrano Jirga" (upper house) by the provincial councils and by reserved presidential appointments.

The first democratically elected National Assembly since 1969 was inaugurated on December 19, 2005. Younus Qanooni and Sigbatullah Mojadeddi were elected Speakers of the Wolesi Jirga and Meshrano Jirga, respectively.

Afghanistan will hold a series of elections in 2009-2010. Presidential and provincial council elections are scheduled for fall 2009. National Assembly elections are scheduled for summer 2010.

Elections for district and village councils may be held in 2010 as well. Unlike previous election cycles, the elections will be coordinated by the Afghanistan Independent Election Commission (IEC), with assistance from the UN.

The government's authority is growing, although its ability to deliver necessary social services remains largely dependent on funds from the international donor community. U.S. assistance for Afghanistan's reconstruction from fiscal year 2001 to the present totals over $32 billion.

Donors pledged continued assistance for the rebuilding of the country at the June 2008 international Afghanistan support conference in Paris. Overall, the international community has made multi-year reconstruction and security assistance pledges to Afghanistan totaling over $42 billion.

With international community support, including more than 40 countries participating in Operation Enduring Freedom and NATO-led International Security Assistance Force (ISAF), the government's capacity to secure Afghanistan's borders to maintain internal order is increasing. Responsibility for security for all of Afghanistan was transferred to ISAF in October 2006. As of November 2008, approximately 70,000 Afghan National Army (ANA) soldiers and nearly 76,000 police, including border and civil order police, had received training.

In September 2008, the Joint Coordination and Monitoring Board, made up of key donors and the UN Assistance Mission in Afghanistan (UNAMA), approved the Afghan Government's request to increase the size of the ANA from 86,000 to 134,000 soldiers. Reform of the army and police, to include training, is an extensive and ongoing process, and the U.S. is working with NATO and international partners to further develop Afghanistan's National Security Forces.

Disarmament, Demobilization, and Reintegration (DDR) has also helped to further establish the authority of the Afghan central government. The DDR program, after receiving 63,000 military personnel, stopped accepting additional candidates in June 2005. Disarmament and demobilization of all of these candidates were completed at the end of June 2006.

A follow-on program targeting illegal militias, the Disbandment of Illegal Armed Groups (DIAG), was begun in 2005, under the joint auspices of Japan and the United Nations. The DIAG program is still ongoing.

Principal Government Officials

Last Updated: 11/12/08

Pres.: **Hamid KARZAI**
Vice Pres.: **Ahmad Zia MASOOD**
Vice Pres.: **Abdul Karim KHALILI**
Min. of Agriculture: **Obaidullah RAMIN**
Min. of Border & Tribal Affairs: **Mohammad Karim BRAHAWI**
Min. of Commerce & Industry: **Mohammad Amin FARHANG**
Min. of Communications: **Amirzai SANGIN**
Min. of Counternarcotics: **KHODAIDAD, Gen.**
Min. of Defense: **Abdul Rahim WARDAK**
Min. of Economy: **Mohammad Jalil SHAMS**
Min. of Education: **Mohammad Hanif ATMAR**
Min. of Energy & Water: **Ismail KHAN**
Min. of Finance: **Anwar Ul-Haq AHADY**
Min. of Foreign Affairs: **Rangin Dadfar SPANTA**
Min. of Hajj & Islamic Affairs: **Niamatullah SHAHRANI**
Min. of Health: **Sayed Mohammad Amin FATEMI**
Min. of Higher Education: **Mohammad Azam DADFAR**
Min. of Interior: **Ahmad Moqbel ZARAR**
Min. of Justice: **Mohammad Sarwar DANESH**
Min. of Martyrs, Disabled, & Social Affairs: **Nur Mohammad QARQIN**
Min. of Mines & Industries: **Ibrahim ADEL**
Min. of Public Works: **Surab Ali SAFARI**
Min. of Refugees & Repatriation: **Sher Mohammad ETEBARI**
Min. of Rural Rehabilitation & Development: **Ehsan ZIA**
Min. of Transportation: **Hamidullah QADERI**
Min. of Urban Development: **Yousef PASHTUN**
Min. of Women's Affairs: **Hasan Bano GHAZANFAR**
Min. of Youth & Culture: **Abdul Karim KHURAM**
National Security Adviser: **Zalmay RASSOUL, Dr.**
Governor, Central Bank: **Abdul Qadir FITRAT**
Ambassador to the US: **Said Tayeb JAWAD**
Permanent Representative to the UN, New York: **Zahir TANIN**

Afghanistan maintains an embassy in the United States at 2341 Wyoming Avenue, NW, Washington, DC 20008 (tel: 202-483-6410; email: info@embassyofafghanistan.org).

ECONOMY

In the 1930s, Afghanistan embarked on a modest economic development program. The government founded banks; introduced paper money; established a university; expanded primary, secondary, and technical schools; and sent students abroad for education.

Historically, there has been a dearth of information and reliable statistics about Afghanistan's economy. The 1979 Soviet invasion and ensuing civil war destroyed much of the country's limited infrastructure and disrupted normal patterns of economic activity. Gross domestic product fell substantially because of loss of labor and capital and disruption of trade and transport. Continuing internal strife hampered both domestic efforts at reconstruction as well as international aid efforts. However, Afghanistan's economy has grown at a fast pace since the 2001 fall of the Taliban, albeit from a low base. In 2007, GDP growth exceeded 7%. In 2008, 11.5% GDP growth is expected.

In June 2006, Afghanistan and the International Monetary Fund agreed on a Poverty Reduction and Growth Facility program for 2006-2009 that focuses on maintaining macroeconomic stability, boosting growth, and reducing poverty. Afghanistan is also rebuilding its banking infrastructure through the Da Afghanistan National Central Bank. The central bank manages $2.8 billion in reserves. Sixteen banks have been established and more than 171 branches in over twenty provinces with $1.5 billion of total assets, a fourfold increase in three years.

Agriculture

The main source of income in the country is agriculture, and in the past, Afghanistan produced enough food and food products to provide for the people, as well as to create a surplus for export. The major food crops produced are: corn, rice, barley, wheat, vegetables, fruits, and nuts. In Afghanistan, industry is also based on agriculture, and pastoral raw materials. The major industrial crops are: cotton, tobacco, madder, castor beans, and sugar beets. The Afghan economy continues to be overwhelmingly agricultural, despite the fact that only 12% of its total land area is arable and less than 6% currently is cultivated. Agricultural production is constrained by an almost total dependence on erratic winter snows and spring rains for water; irrigation is primitive. Relatively little use is made of machines, chemical fertilizer, or pesticides. Overall agricultural production dramatically declined following severe drought as well as sustained fighting, instability in rural areas, and deteriorated infrastructure. The easing of the drought and the end of civil war produced the largest wheat harvest in 25 years during 2003. Wheat production was an estimated 58% higher than in 2002. However, the country still needs to import an estimated one million tons of wheat to meet its requirements. Millions of Afghans, particularly in rural areas, remain dependent on food aid.

Opium has become a ready source of cash for many Afghans, especially following the breakdown in central authority after the Soviet withdrawal, and opium-derived revenues probably constituted a major source of income for the two main factions during the civil war in the 1990s. Opium is easy to cultivate and transport. Afghanistan produced a record opium poppy crop in 2007, supplying 93% of the world's opium. Much of Afghanistan's opium production is refined into heroin and is either consumed by a growing regional addict population or exported, primarily to Western Europe.

Afghanistan has begun counter-narcotics programs, including the promotion of alternative development, public information campaigns, targeted eradication policies, interdiction of drug shipments, as well as law enforcement and justice reform programs. These programs were first implemented in late 2005. In August 2008, the United Nations Office on Drugs and Crime estimated that 157,000 hectares of opium poppy were cultivated, representing a 19% decrease from 2007 and 2% of Afghanistan's agricultural land.

Trade and Industry

Afghanistan is endowed with natural resources, including extensive deposits of natural gas, petroleum, coal, copper, chromite, talc, barites, sulfur, lead, zinc, iron ore, salt, and precious and semiprecious stones. Unfortunately, ongoing instability in certain areas of the country, remote and rugged terrain, and an inadequate infrastructure and transportation network have made mining these resources difficult, and there have been few serious attempts to further explore or exploit them. The first significant investment in the mining sector is expected to commence in 2008, for the development of the Aynak cooper deposit in east-central Afghanistan. This project tender, awarded to a Chinese firm and valued at over $2.5 billion, is the largest international investment in Afghanistan to date. The Ministry of Mines also plans to move forward with oil, gas, and possibly iron ore tenders in 2008.

The most important resource has been natural gas, first tapped in 1967. At their peak during the 1980s, natural gas sales accounted for $300 million a year in export revenues (56% of the total). Ninety percent of these exports went to the Soviet Union to pay for imports and debts. However, during the withdrawal of Soviet troops in 1989, Afghanistan's natural gas fields were capped to prevent sabotage by the mujahidin.

Restoration of gas production has been hampered by internal strife and the disruption of traditional trading relationships following the collapse of the Soviet Union. The government expects to pass a hydrocarbons law, developed with donor assistance, to regulate future exploration and development of Afghanistan's oil and gas fields.

With the law in place, Afghanistan hopes to begin using natural gas to produce electricity. Trade in smuggled goods into Pakistan once constituted a major source of revenue for Afghan regimes, including the Taliban, and still figures as an important element in the Afghan economy, although efforts are underway to formalize this trade and remove non-tariff barriers limiting its expansion.

Transportation

In the 1960s, the United States helped build a highway connecting Afghanistan's two largest cities. It began in Kabul and wound its way through five of the country's core provinces—skirting scores of isolated and otherwise inaccessible villages; passing through the ancient market city of Ghazni; descending through Qalat; and eventually reaching Kandahar, founded by Alexander the Great. More than 35% of the country's population lives within 50 kilometers of this highway, called, appropriately, modern Afghanistan's lifeline.

In 1978, the Soviet Union invaded and, after more than two decades of war, the Kabul-Kandahar highway was devastated, like much of the country's infrastructure. Little could move along the lifeline that had provided so many Afghans with their means of livelihood and their access to healthcare, education, markets, and places of worship.

Restoration of the highway has been an overriding priority of President Hamid Karzai. It is crucial to extending the influence of the new government. Without the highway link, Afghanistan's civil society and economy would remain moribund and prey to divisive forces. The economic development that the highway makes possible will help guarantee the unity and long-term security of the Afghan people. The restored highway is a visually impressive achievement whose symbolic importance should not be underestimated. It marks a palpable transition from the recent past and represents an important building block for the future. An official in Herat likened the ring road to veins and arteries that nourish and bring life to the "heart" of Kabul and the body of the country. The highway will not end in Kandahar: there are plans to complete the circuit, extending it to Herat and then arcing it back through Mazar-e-Sharif to Kabul. The route is sometimes referred to as the Ring Road. As of December 2006, 100% of the Ring Road had been funded, with plans for completion in 2009.

Landlocked Afghanistan has no functioning railways, but the Amu Darya (Oxus) River, which forms part of Afghanistan's border with Turkmenistan, Uzbekistan, and Tajikistan, has barge traffic. During their occupation of the country, the Soviets completed a bridge across the Amu Darya. The bridge, reconstructed with U.S. assistance, reopened in 2007 and has opened vital trade routes between Afghanistan and its neighbors.

Afghanistan's national airline, Ariana, operates domestic and international routes, including flights to New Delhi, Islamabad, Dubai, Moscow, Istanbul, and Tehran. Civil aviation has been expanding rapidly and several private airlines now offer an alternative to Ariana and operate a domestic and international route network. The first, Kam Air, commenced domestic operations in November 2003. Many sections of Afghanistan's highway and regional road system are undergoing significant reconstruction, many with substantial U.S. assistance. The Asian Development Bank is also active in road development projects, mainly in the border areas with Pakistan.

Power

In 2001, Afghanistan produced 430 megawatts of electricity. Today the country produces 754 megawatts. International statistics maintained by the World Bank indicate the ratio of gross domestic product (GDP) growth to electrical production is approximately $1,000 to 300 kwh. The Afghan Government's current power plan sets a goal to deliver sufficient electricity to meet the needs of an economic growth rate of 9% per year. Additionally, the Afghan Government anticipates approximately 90% of urban businesses will have access to electrical power by the end of 2010. Finally, the plan's objective is to provide access to electricity to 65% of urban and 25% of rural households by the end of 2010.

Electricity distribution, rehabilitation, and infrastructure projects in all major urban centers are underway. Access of rural households to electricity has been increased by 7% and a renewable energy master plan has been approved. However, the lack of electrical power significantly affects the pace of development in Afghanistan. There is some potential for private funding of power-generation initiatives and business ventures. An example is the Aynak Copper Mine, where the Chinese developers are expected to build a power plant to provide energy for mining and processing needs.

Afghanistan is envisioned as the corridor for the Central Asian-South Asian (CASA) Regional Energy Market, intended to bring electric power from Kyrgyzstan and Tajikistan through Afghanistan into Pakistan. Under CASA-1000, the first phase of the project, 1,000 megawatts will reach Peshawar in Pakistan and 300 megawatts will reach Kabul. The North East Power System (NEPS) is used to import power to Kabul from three Central Asian neighbors. Other energy projects include: efforts to rehabilitate hydropower plants at Kajaki, Naghlu, and Darunta; the transmission line from Pul-e Khumri to Kabul to be built by India; the transmission lines from Naghlu to Jalalabad/Methar Lam; and the transmission lines from Kabul to Gardez (including a substation for Gardez) to be funded by the Asian Development Bank. The required 33% increase per year in electrical connections to meet 2010 goals will likely not be realized due to a $1.2 billion gap in funding the national energy sector plan.

De-mining

Afghanistan is one of the most heavily mined countries in the world; an estimated 200,000 Afghans have

been disabled by the explosive remnants of war (ERW). Between March 2006 and March 2007 an average 62 civilians were injured each month. As of March 2007 the United Nations Mine Action Program for Afghanistan (MAPA), responsible for demining in Afghanistan, employed approximately 8,500 Afghan personnel through funding and oversight of several non-governmental organizations (NGOs) deployed throughout the country.

With Afghanistan Government support, and in line with its Ottawa Convention commitments, MAPA has destroyed Afghanistan's known stockpile of landmines and strives to make Afghanistan mine-free by 2013. Since 1989, MAPA has cleared about 1.2 billion square meters of land and destroyed millions of ERW, including over 300,000 anti-personnel landmines.

Training programs are also provided to educate the public about the threat and dangers of ERW. These combined efforts have reduced ERW victims by over 50% in the past six years. The United States remains the leading single donor for Afghanistan's humanitarian demining efforts.

Refugees and Internally Displaced People

Afghanistan has had the largest refugee repatriation in the world in the last 30 years. Over 5 million Afghan refugees have returned to the country since 2002. The Ministry of Refugees and Repatriation (MORR) leads the Government of the Islamic Republic of Afghanistan in assisting its citizens in returning from exile. The United Nations High Commissioner for Refugees (UNHCR) leads the international community's response, in coordination with the International Organization of Migration (IOM), United Nations Children's Fund (UNICEF), the World Food Program (WFP), the World Health Organization (WHO), and a number of other national and international NGOs and donors. As of November 2008, approximately 3 million Afghans remained in neighboring countries. The U.S. provided more than $500 million in support to Afghan refugees, returnees, and other conflict victims between September 2001 and November 2008.

Health

In response to a strategy outlined by the Ministry of Health, the international community is supporting the government in rebuilding the primary health-care system. Since the fall of the Taliban in 2001, the health sector has seen significant progress in development, with reductions in morbidity (disease) and mortality (death). In 2001, 8% of the Afghan population had access to basic health care; today, 79% have access to basic health services. In 2001, Afghanistan was ranked the world's worst in infant mortality; in 2007 Afghanistan's infant mortality rates were falling due to the efforts of the Ministry of Public Health (MoPH) and its international partners. Since 2006, Afghanistan has reduced child mortality (five years and under) by 25%, saving 89,000 children in 2007. In 2006, 23,000 Afghans died from tuberculosis. In 2007, due to improved access to basic health care, only 12,000 Afghans died from this disease.

Immunization coverage has reached 83% of children under one year of age and additional progress has been made in updating routine immunizations for older children, adolescents, and adults. Finally, recent data showed that 70% of health facilities have at least one female provider on staff, compared to 45% during the Taliban era.

The MoPH developed the Basic Package of Health Services (BPHS), a program which includes maternal and newborn health, child health and immunization, public nutrition, communicable diseases, mental health, disability, and supply of essential drugs. The program has recently increased its coverage of the population from 77% to 82%.

There has been a marked increase in health infrastructure; the number of health facilities providing the BPHS has increased to 897 (from 746), the number of health facilities providing comprehensive emergency obstetric care has also increased to 89 (from 79), and the number of health facilities within the government's program of Integrated Management of Childhood Illnesses stands at 309 facilities located in eight provinces and 39 districts. Thirteen therapeutic feeding units have been established, and two additional midwifery schools were opened. Twelve mobile health facilities were established to provide basic health services to the nomadic Kuchi population. The number of health facilities providing direct observed treatment short courses (in the treatment of tuberculosis) increased to 55% (from 45%).

Approximately 40,000 insecticide bed nets were distributed to control the spread of malaria. Provincial teams in eight provinces were established to track the prevalence of avian flu. In total, 670 health facilities have been renovated or constructed.

FOREIGN RELATIONS

Before the Soviet invasion, Afghanistan pursued a policy of neutrality and nonalignment in its foreign relations. After the December 1979 invasion, Afghanistan's foreign policy mirrored that of the Soviet Union. Most Western countries, including the United States, maintained small diplomatic missions in Kabul during the Soviet occupation. Repeated Taliban efforts to occupy Afghanistan's seat at the UN and Organization of the Islamic Conference (OIC) were unsuccessful.

The fall of the Taliban in October 2001 opened a new chapter in Afghanistan's foreign relations. Afghanistan is now an active member of the international community, and has diplomatic relations with countries from around the world. In December 2002, the six nations that border Afghanistan signed a 'Good Neighbor' Declaration, in which they pledged to respect Afghanistan's independence and territorial integrity. In 2005 Afghanistan and its South Asia neighbors held the first

annual Regional Economic Cooperation Conference (RECC) promoting intra-regional relations and economic cooperation.

Pakistan

The 1978 Marxist coup strained relations between Pakistan and Afghanistan. Pakistan took the lead diplomatically in the United Nations, the Non-Aligned Movement, and the Organization of the Islamic Conference in opposing the Soviet occupation. During the war against the Soviet occupation, Pakistan served as the primary logistical conduit for the Afghan resistance. Pakistan initially developed close ties to the Taliban regime, and extended recognition in 1997.

Pakistan dramatically altered its policy in support of coalition efforts to remove the Taliban after September 11, 2001. Afghanistan and Pakistan are engaged in dialogue to resolve bilateral friction. Pakistan is also seeking to repatriate its Afghan refugee population, which is concentrated mostly in the Northwestern Frontier Province.

Iran

Afghanistan's relations with Iran have fluctuated over the years, with periodic disputes over the water rights of the Helmand River as the main issue of contention. Following the Soviet invasion, which Iran opposed, relations deteriorated. Iran supported the cause of the Afghan resistance and provided financial and military assistance to rebel leaders who pledged loyalty to the Iranian vision of Islamic revolution. Following the emergence of the Taliban and their harsh treatment of Afghanistan's Shi'a minority, Iran stepped up assistance to the Northern Alliance. Relations with the Taliban deteriorated further in 1998 after Taliban forces seized the Iranian consulate in Mazar-e-Sharif and executed Iranian diplomats. Since the fall of the Taliban, Afghanistan's relations with Iran have improved, but they suffered a setback in spring 2007 with the deportation of 200,000 undocumented Afghans from Iran. Iran has been active in Afghan reconstruction efforts, particularly in the western portion of the country.

Russia

During the reign of the Taliban, Russia became increasingly disenchanted over the Taliban's support for Chechen rebels and its provision of sanctuary to terrorist groups active in Central Asia and in Russia itself. Moscow provided military assistance to the Northern Alliance. Since the fall of the Taliban, the Karzai government has improved relations with Russia.

Tajikistan

Afghanistan's relations with Tajikistan have been complicated by political upheaval and civil war in Tajikistan, which spurred some 100,000 Tajiks to seek refuge in Afghanistan in late 1992 and early 1993. Also disenchanted by the Taliban's harsh treatment of Afghanistan's Tajik minority, Tajikistan facilitated assistance to the Northern Alliance. The Karzai government has sought to establish closer ties with its northern neighbor in order to capitalize on the potential economic benefits of increased trade. The 2007 opening of a U.S.-funded bridge across the Amu Darya river has facilitated bilateral trade flows between Afghanistan and Tajikistan.

UN Efforts

The UN has played an important role in Afghanistan for more than 20 years, assisting in the repatriation of Afghan refugees and providing humanitarian aid. The UN Assistance Mission in Afghanistan (UNAMA), launched in October 2001, was instrumental in helping restore peace and stability in Afghanistan after the fall of the Taliban, organizing the Afghan presidential elections held in October 2004 and National Assembly elections held in 2005.

The UN Security Council has now given UNAMA a leading role in international efforts to stabilize and help develop Afghanistan. UN Security Council Resolution 1806 adopted in March 2008 added a number of crucial tasks to the UN mission's overall function to promote peace and stability. A new Special Representative of the UN Secretary General, Mr. Kai Eide of Norway, was appointed. Since the June 2008 Paris International Conference in Support of Afghanistan, the UN mission is leading international efforts to help the Government of Afghanistan implement the Afghan National Development Strategy. UNAMA website: http://www.unama-afg.org.

U.S.-AFGHAN RELATIONS

The first extensive American contact with Afghanistan was made by Josiah Harlan, an adventurer from Pennsylvania who was an adviser in Afghan politics in the 1830s and reputedly inspired Rudyard Kipling's story "The Man Who Would be King." After the establishment of diplomatic relations in 1934, the U.S. policy of helping developing nations raise their standard of living was an important factor in maintaining and improving U.S.-Afghan ties. From 1950 to 1979, U.S. foreign assistance provided Afghanistan with more than $500 million in loans, grants, and surplus agricultural commodities to develop transportation facilities, increase agricultural production, expand the educational system, stimulate industry, and improve government administration.

In the 1950s, the U.S. declined Afghanistan's request for defense cooperation but extended an economic assistance program focused on the development of Afghanistan's physical infrastructure—roads, dams, and power plants. Later, U.S. aid shifted from infrastructure projects to technical assistance programs to help develop the skills needed to build a modern economy. The Peace Corps was active in Afghanistan between 1962 and 1979.

After the April 1978 coup, relations deteriorated. In February 1979, U.S. Ambassador Adolph "Spike" Dubs

was murdered in Kabul after Afghan security forces burst in on his kidnapers. The U.S. then reduced bilateral assistance and terminated a small military training program. All remaining assistance agreements were ended after the December 1979 Soviet invasion. Following the Soviet invasion, the United States supported diplomatic efforts to achieve a Soviet withdrawal. U.S. contributions to the refugee program in Pakistan played a major part in efforts to assist Afghans in need. This cross-border humanitarian assistance program aimed to increase Afghan self-sufficiency and help Afghans resist Soviet attempts to drive civilians out of the rebel-dominated countryside. During the period of Soviet occupation of Afghanistan, the U.S. provided about $3 billion in military and economic assistance to Afghans and the resistance movement.

After the fall of the Taliban, the U.S. supported the emergence of a broad-based government, representative of all Afghans, and actively encouraged a UN role in the national reconciliation process in Afghanistan. The U.S. has made a long-term commitment to help Afghanistan rebuild itself after years of war. The U.S. and others in the international community currently provide resources and expertise to Afghanistan in a variety of areas, including humanitarian relief and assistance, capacity-building, security needs, counter-narcotic programs, and infrastructure projects. The U.S. also supports the Afghan Government in its efforts to establish a framework for a vibrant civil society, one that emphasizes democratic principles through a rule of law and creates accountable and transparent forms of government. The United States and its international partners remain committed to helping Afghans realize their vision for a country that is stable, democratic, and economically successful, and to an Afghan Government committed to the protection of women's rights, human rights, and religious tolerance.

TRAVEL

Consular Information Sheet

June 16, 2008

Country Description: Afghanistan has made significant progress since the Taliban were deposed in 2001, but it still faces daunting challenges, including defeating terrorists and insurgents, dealing with years of severe drought, recovering from over two decades of civil strife, and rebuilding a shattered physical, economic and political infrastructure. Coalition and NATO forces under ISAF work in partnership with Afghan security forces to combat Taliban and al-Qaida elements who continue to seek to terrorize the population and challenge the government. The ISAF Coalition-Afghan partnership contained the spring offensive planned by insurgent forces, who have turned instead to isolated terrorist attacks, including suicide bombings and kidnappings. President Hamid Karzai was sworn in as President of the Islamic Republic of Afghanistan on December 7, 2004. He and his ministers work with the parliament, which first convened in late 2005, to establish policies and procedures to deal with the array of issues any government must address, as well as Afghanistan's unique challenges. The government is in the process of developing a more effective police force, a more robust legal system, and sub-national institutions that work in partnership with traditional and local leaders to meet the needs of the population. The U.S. works closely with the international community to provide coordinated support for these efforts. The recent Afghanistan-hosted Peace Jirga with Pakistan resulted in a commitment to cooperate in combating terrorism, facilitate the return of Afghan refugees, and support regional economic activity.

Entry Requirements: A passport and valid visa are required to enter and exit Afghanistan. Afghan entry visas are not available at Kabul International Airport. American citizens who arrive without a visa are subject to confiscation of their passport and face heavy fines and difficulties in retrieving their passport and obtaining a visa, as well as possible deportation from the country. Americans arriving in the country via military air usually have considerable difficulties if they choose to depart Afghanistan on commercial air, because their passports are not stamped to show that they entered the country legally. Those coming on military air should move quickly after arrival to legalize their status if there is any chance they will depart the country on anything other than military air. Visit the Embassy of Afghanistan web site at http://www.embassyofafghanistan.org for the most current visa information. The Consular office of the Embassy of Afghanistan is located at 2233 Wisconsin Avenue NW, Suite 216, Washington, DC 20007, phone number 202-298-9125.

Safety and Security: The latest Travel Warning for Afghanistan states clearly that the security situa-

tion remains critical for American citizens. There are remnants of the former Taliban regime and the terrorist al-Qaida network in various parts of Afghanistan, as well as narcotraffickers and other groups that oppose the strengthening of a democratic government. Those groups aim to weaken or bring down the new Government of Afghanistan, and often, to drive Westerners out of the country. They do not hesitate to use violence to achieve their aims. Terrorist actions may include, but are not limited to, suicide operations, bombings—including vehicle-borne explosives and improvised explosive devices—assassinations, carjackings, rocket attacks, assaults or kidnappings. There is an ongoing threat to kidnap U.S. citizens and Non-Governmental Organization (NGO) workers throughout the country. Since the beginning of 2007, more than three dozen foreigners have been kidnapped and held for extended periods of time, and six foreigners have been kidnapped and murdered; foreigners and Afghan nationals have been killed or injured in improvised explosive device attacks. Kabul continues to experience suicide bombers attacking Afghan government personnel as well as international civilians and military personnel. Riots—sometimes violent—have occurred in response to various political or other issues. Crime, including violent crime, remains a significant problem. Official Americans' use of the Kabul-Jalalabad road and other roads throughout the country is often restricted or completely curtailed because of security concerns. The country faces a difficult period in the near term, and American citizens could be targeted or placed at risk by unpredictable local events. There is also a real danger from the presence of millions of unexploded land mines and other ordnance. Terrorists continue to use roadside or vehicle-borne improvised explosive devices. Private Americans should not come to Afghanistan unless they have made arrangements in advance to address security concerns.

The absence of records for ownership of property, differing laws from various regimes and the chaos that comes from decades of civil strife have left property issues in great disorder. Afghan-Americans returning to Afghanistan to recover property, or Americans coming to the country to engage in business, have become involved in complicated real estate disputes and have faced threats of retaliatory action, including kidnapping for ransom and death. Large parts of Afghanistan are extremely isolated, with few roads, mostly in poor condition, irregular cell phone signals, and none of the basic physical infrastructure found in Kabul or the larger cities. Americans traveling in these areas who find themselves in trouble may not even have a way to communicate their difficulties to the outside world.

For the latest security information, Americans traveling abroad should regularly monitor the Department of State, Bureau of Consular Affairs' web site, where the current Travel Warnings and Travel Alerts, including the Travel Warning for Afghanistan, and the Worldwide Caution, can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll-free in the U.S. and Canada, or for callers outside the U.S. and Canada, a regular toll line at 1-202-501-4444. These numbers are available from 8:00 a.m. to 8:00 p.m. Eastern Time, Monday through Friday (except U.S. federal holidays).

Crime: A large portion of the Afghan population is unemployed, and many among the unemployed have moved to urban areas. Basic services are rudimentary or non-existent. These factors may directly contribute to crime and lawlessness. Diplomats and international relief workers have reported incidents of robberies and household burglaries as well as kidnappings and assault. Any American citizen who enters Afghanistan should remain vigilant for possible banditry, including violent attacks.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

Medical Facilities and Health Information: Well-equipped medical facilities are few and far between throughout Afghanistan. European and American medicines are available in limited quantities and may be expensive or difficult to locate. There is a shortage of basic medical supplies. Basic medicines manufactured in Iran, Pakistan, and India are available, but their reliability can be questionable. Several western-style private clinics have opened in Kabul: the DK-German Medical Diagnostic Center (www.medical-kabul.com), Acomet Family Hospital (www.afghancomet.com), and CURE International Hospital (ph. 079-883-830) offer a variety of basic and routine-type care; Americans seeking treatment should request American or Western health practitioners.

Afghan public hospitals should be avoided. Individuals without government licenses or even medical degrees often operate private clinics; there is no public agency that monitors their operations. Travelers will not be able to find Western-trained medical personnel in most parts of the country outside of Kabul, although there are some international aid groups temporarily providing basic medical assistance in various cities and villages. For any medical treatment, payment is required in advance. Commercial medical evacuation capability from Afghanistan is limited and could take days to arrange. Even medevac companies that claim to service the world may not agree to come to Afghanistan. Those with medevac insurance should confirm with the insurance provider that it will be able to provide

medevac assistance to this country. There have been outbreaks of Avian Influenza in poultry in Afghanistan, to include the areas of Nangahar, Laghman, and Wardak provinces, and in the city of Kabul, however, there have been no reported cases of the H5N1 virus in humans. Tuberculosis is an increasingly serious health concern in Afghanistan. For further information, please consult the CDC's Travel Notice on TB. http://wwwn.cdc.gov.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's web site at http://wwwn.cdc.gov/travel/default.aspx. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Afghanistan is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

All drivers face the potential danger of encountering land mines that may have been planted on or near roadways. An estimated 5-7 million landmines and large quantities of unexploded ordnance exist throughout the countryside and alongside roads, posing a danger to travelers. Robbery and crime are also prevalent on highways outside of Kabul. The transportation system in Afghanistan is marginal, although the international community is constructing modern highways and provincial roads. Vehicles are poorly maintained, often overloaded, and traffic laws are not enforced. Vehicular traffic is chaotic and must contend with numerous pedestrians, bicyclists and animals. Many urban streets have large potholes and are not well lit. Rural roads are not paved.

Aviation Safety Oversight: As there is no direct commercial air service between the United States and Afghanistan, the U.S. Federal Aviation Administration (FAA) has not assessed Afghanistan's Civil Aviation Authority for compliance with International Civil Aviation Organization (ICAO) aviation safety standards. For more information, travelers may visit the FAA's internet website at http://www.faa.gov.

U.S. Government personnel are not authorized to travel on Ariana Afghan Airlines or any other airline falling under the oversight of the Government of Afghanistan's Civil Aviation Authority, owing to safety concerns; however, U.S. Government personnel are permitted to travel on international flights operated by airlines from countries whose civil aviation authorities meet international aviation safety standards for the oversight of their air carrier operations under the FAA's International Aviation Safety Assessment (IASA) program.

Special Circumstances: Because of the poor infrastructure in Afghanistan, access to banking facilities is limited and unreliable. Afghanistan's economy operates on a "cash-only" basis for most transactions. Credit card transactions are not available. International bank transfers are limited. Some ATM machines exist at Standard Charter Bank and Afghan International Bank (AIB) in the Wazir Akbar Khan neighborhood of Kabul, but some travelers have complained of difficulties using them.

International communications are difficult. Local telephone networks do not operate reliably. Most people rely on satellite or cellular telephone communications even to make local calls. Cellular phone service is available locally in Kabul and some other cities. Injured or distressed foreigners could face long delays before being able to communicate their needs to family or colleagues outside of Afghanistan. Internet access through local service providers is limited.

In addition to being subject to all Afghan laws, U.S. citizens who are also citizens of Afghanistan may also be subject to other laws that impose special obligations on Afghan citizens. U.S. citizens who are also Afghan nationals do not require visas for entry into Afghanistan. The Embassy of Afghanistan issues a letter confirming your nationality for entry into Afghanistan. However, you may wish to obtain a visa as some Afghan-Americans have experienced difficulties at land border crossings because they do not have a visa in their passport. For additional information on dual nationality in general, see the Consular Affairs home page for our dual nationality flyer. U.S. citizens are encouraged to carry a copy of their U.S. passport with them at all times, so that, if questioned by local officials, proof of identity and U.S. citizenship are readily available. As stated in the Travel Warning, consular assistance for American citizens in Afghanistan is limited.

Islam provides the foundation of Afghanistan's customs, laws and practices. Foreign visitors—men and women—are expected to remain sensitive to the Islamic culture and not dress in a revealing or provocative manner, including the wearing of sleeveless shirts and blouses, halter-tops and shorts. Women in particular, especially when traveling outside of Kabul, may want to ensure that their tops have long sleeves and cover their collarbone and waistband, and that their pants/skirts cover their ankles. Almost all women in Afghanistan cover their hair in public; American women visitors should carry scarves for this purpose. Afghan customs authorities may enforce strict regulations concerning temporary importa-

tion into or export from Afghanistan of items such as firearms, alcoholic beverages, religious materials, antiquities, medications, and printed materials. American travelers have faced fines and/or confiscation of items considered antiquities upon exiting Afghanistan.

It is advisable to contact the Embassy of Afghanistan in Washington for specific information regarding customs requirements. Travelers en route to Afghanistan may transit countries that have restrictions on firearms, including antique or display models. If you plan to take firearms or ammunition to another country, you should contact officials at that country's embassy and those that you will be transiting to learn about their regulations and fully comply with those regulations before traveling. Please consult http://www.customs.gov for information on importing firearms into the United States.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law.

Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating Afghanistan's laws, even unknowingly, may be expelled, arrested or imprisoned. During the last several years, there have been incidents involving the arrest and/or detention of U.S. citizens. Arrested Americans have faced periods of detention—sometimes in difficult conditions—while awaiting trial. Penalties for possession, use, or trafficking in illegal drugs in Afghanistan are severe, and convicted offenders can expect long jail sentences and heavy fines. Another potentially-sensitive activity is proselytizing. Although the Afghan Constitution allows the free exercise of religion, proselytizing may be viewed as contrary to the beliefs of Islam and considered harmful to society. Proselytizing may lead to arrest and/or deportation. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in Afghanistan are encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration web site and to obtain updated information on travel and security within Afghanistan. Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency. The U.S. Embassy is located in Kabul on Great Massoud Road, local phone number 0700-108-001 or 0700-108-002, and for emergencies after hours 0700-201-908. The web site is http://kabul.usembassy.gov.

Intercountry Adoption

August 2007

The Department of State has occasionally received inquiries from American citizens concerned about the plight of the children of Afghanistan and wondering about the possibility of adopting them. In general, intercountry adoptions are private civil legal matters governed by the laws of the children's home country, which has the primary responsibility and jurisdiction for deciding what would be in the children's best interests. The U.S. Embassy in Kabul has confirmed that Afghan law, which is based on Islamic Shari'a law, does not currently permit full adoptions as they are generally understood in the United States.

Afghanistan does grant a more limited arrangement akin to guardianship; however, even if an Afghan court or other Afghan authority were to grant a U.S. citizen guardianship rights for an Afghan child, the child would likely be unable to immigrate to the United States, unless the citizen could establish both that the child qualifies as an "orphan" as defined in section 101(b)(1)(F) of the Immigration and Nationality Act and, under Afghan law, the "guardianship" order gave the citizen authority not only to care for the child but to bring the United States for the specific purpose of the child's adoption in the United States. Since Afghan law does not permit adoption, it is not clear that an Afghan guardianship order could give this authority.

The U.S. and international media have occasionally reported on the difficult situation faced by Afghanistan's children, and it is completely understandable that some American citizens want to respond to such stories by offering to open their homes and adopt these children in need. However, it is a generally agreed international principle that uprooting children during a war, natural disaster or other crisis may in fact exacerbate the children's situation. It can be extremely difficult in such circumstances to determine whether children who appear to be orphans truly are. It is also not uncommon in a hostile situation for parents to send their children out of the area, or for families to become separated during an evacuation. Even when it can be demonstrated that children are indeed orphaned or abandoned, they are often taken in by other relatives. Staying with relatives in extended family units is generally a better solution than uprooting a child completely. There are still ways in which U.S. citizens can help the children of Afghanistan. Many American non-governmental organizations (NGOs) working in Afghanistan say that what is needed most at this time are financial contributions. Individuals who wish to assist can do the most good by making a financial contribution to an established NGO that will be well placed to respond to Afghanistan's most urgent needs, including those related to the country's's children.

The Department of State continues to strongly warn U.S. citizens against travel to Afghanistan, which remains very dangerous.

Travel Warning

September 10, 2008

This Travel Warning provides updated information on the security situation in Afghanistan. The security threat to all American citizens in Afghanistan remains critical. This Travel Warning supersedes the Travel Warning for Afghanistan issued February 6, 2008.

The Department of State continues to strongly warn U.S. citizens against travel to Afghanistan. No part of Afghanistan should be considered immune from violence, and the potential exists throughout the country for hostile acts, either targeted or random, against American and other Western nationals at any time. Remnants of the former Taliban regime and the terrorist al-Qa'ida network, and other groups hostile to NATO-led military operations remain active. There is an on-going threat to kidnap and assassinate U.S. citizens and Non-Governmental Organization (NGO) workers throughout the country. Afghan authorities have a limited ability to maintain order and ensure the security of citizens and visitors. Travel in all areas of Afghanistan is unsafe due to military operations, landmines, banditry, armed rivalry among political and tribal groups, and the possibility of terrorist attacks, including attacks using vehicular or other improvised explosive devices (IEDs). The security environment remains volatile and unpredictable. Kabul, in particular has seen a rise in militant attacks, including rocket attacks, vehicle borne IEDs, and suicide bombings. The number of attacks in the south and southwestern areas of the country continues to be high as a result of insurgent and drug-related activity, but no part of the country is immune from attacks. Over 100 attacks were reported in Kabul over the past year, although many additional attacks were thwarted by Afghan and coalition forces. An additional 4,400 attacks occurred nationwide during the same timeframe. Incidents have occurred with some frequency on the Kabul-Jalalabad Road (commonly called Jalalabad Road). The road's use is highly restricted for Embassy employees and, if the security situation warrants, sometimes is curtailed completely. Foreigners throughout the country continue to be targeted for violent attacks and kidnappings, whether motivated by terrorism or criminal activity. In January, gunmen attacked the Serena Hotel and killed eight people, including an American contractor and a Norwegian journalist. In April, an assassination attempt against Afghan President Karzai showed the continued desire of the insurgency to destabilize the Afghan government. The July 2008 bombing of the Indian Embassy in downtown Kabul, near many western embassies and Afghan Government institutions, demonstrated the ability of the insurgents to undertake assaults within Kabul itself. Rocket fire and rocket propelled grenade (RPG) attacks have occurred with increasing frequency. In August, three female western non-governmental organization (NGO) employees, along with their male Afghan driver, were gunned down as they traveled south of Kabul. An American NGO worker and her driver were kidnapped in Kandahar in January. Other Americans were kidnapped in Afghanistan in February and August 2008.

Riots and incidents of civil disturbance can and do occur, often without warning. American citizens should avoid rallies and demonstrations; even demonstrations intended to be peaceful can turn confrontational and escalate into violence. Carjackings, robberies, and violent crime remain a problem. American citizens involved in property disputes—a common legal problem—have reported that their adversaries in the disputes have threatened their lives. Americans who find themselves in such situations cannot assume that either local law enforcement or the U.S. Embassy will be able to assist them.

From time to time depending on current security conditions, the U.S. Embassy places areas frequented by foreigners off limits to its personnel. Potential target areas include key national or international government establishments, international organizations and other locations with expatriate personnel, and public areas popular with the expatriate community. Private U.S. citizens are strongly urged to heed these restrictions as well and may obtain the latest information by consulting the embassy website below.

The United States Embassy's ability to provide emergency consular services to U.S. citizens in Afghanistan is limited, particularly for those persons outside the capital. U.S. citizens who choose to visit or remain in Afghanistan despite this Travel Warning are encouraged to register with the U.S. Embassy through the State Department's travel registration website, https://travelregistration.state.gov, and to obtain updated information on travel and security within Afghanistan. Americans without Internet access may register directly with the U.S. Embassy. Registering makes it easier for the Embassy to contact Americans in case of emergency. The U.S. Embassy is located at Great Masood Road between Radio Afghanistan and the Ministry of Public Health (the road is also known as Bebe Mahro (Airport Road), Kabul. The phone number is +93-70-108-001 or +93-70-108-002; the Consular Section can be reached for after-hours emergencies at +93-70-201-908. The Embassy website is http://afghanistan.usembassy.gov. Updated information on travel and security in Afghanistan may be obtained from the Department of State by calling 1-888-407-4747 toll free in the United States and Canada or, for callers outside the United States and Canada, a regular toll line at 1-202-501-4444. For further information, please consult the Country Specific Information for Afghanistan and the current Worldwide Caution, which are available on the Bureau of Consular Affairs Internet website at http://travel.state.gov.

ALBANIA

Compiled from the November 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Republic of Albania

PROFILE

Geography

Area: 28,748 sq. km. (slightly larger than Maryland).

Cities: Capital—Tirana (600,000, 2005 est.). Others—Durres (200,000, 2005 est.), Shkoder (81,000, 2005 est.), Vlore (72,000, 2005 est.).

Terrain: Situated in the southwestern region of the Balkan Peninsula, Albania is predominantly mountainous but flat along its coastline with the Adriatic Sea.

Climate: Mild, temperate; cool, wet winters; dry, hot summers.

People

Population: (2007 est.) 3,600,523.

Growth rate: (2007 est.) 0.529%.

Ethnic groups: (2004 est., Government of Albania) Albanian 98.6%, Greeks 1.17%, others 0.23% (Vlachs, Roma, Serbs, Montenegrins, Macedonians, Balkan Egyptians, and Bulgarians).

Religions: Muslim (Sunni and Bektashi) 70%, Albanian Orthodox 20%, and Roman Catholic 10%.

Languages: Albanian.

Health: (2007 est.) Life expectancy—males 74.95 years; females 80.53 years. Infant mortality rate—20.02 deaths per 1,000 live births.

Government

Type: Parliamentary democracy.

Constitution: Adopted by popular referendum November 28, 1998.

Independence: November 28, 1912 (from the Ottoman Empire).

Government branches: Executive—President (chief of state), Prime Minister (head of government), Council of Ministers (cabinet). Legislative—Unicameral People's Assembly or Kuvendi Populloor—140 seats (100 members elected by direct popular vote; 40 by proportional vote; all serve 4-year terms). Judicial—Constitutional Court, High Court, multiple district and appeals courts.

Suffrage: Universal at age 18.

Political parties: Democratic Party of Albania (PD); Albanian Socialist Party (PS); Socialist Movement for Integration (LSI); Albanian Republican Party (PR); Demo-Christian Party (PDK); Union for Human Rights Party (PBDNJ); New Democracy Party (PDR); Social Democratic Party (PSD); Social Democracy Party (PDS).

Economy

Real GDP growth: (2007): 6%; 6% (2008 forecast).

Inflation rate: (2007): 3% (average year-on-year annual).

Unemployment rate: (Q2 2007): 13.5%.

Natural resources: Oil, gas, coal, iron, copper and chrome ores.

GEOGRAPHY

Albania shares a border with Greece to the south/southeast, Macedonia to the east, Serbia (including Kosovo) to the northeast, and Montenegro to the northwest. Western Albania lies along the Adriatic and Ionian Sea coastlines. Albania's primary seaport is Durres, which handles 90% of its maritime cargo.

PEOPLE AND HISTORY

Over 90% of Albania's people are ethnic Albanian, and Albanian is the official language. Religions include Muslim (Sunni and Bektashi), Albanian Orthodox, and Roman Catholic.

Scholars believe the Albanian people are descended from a non-Slavic, non-Turkic group of tribes known as Illyrians, who arrived in the Balkans around 2000 BC. After falling under Roman authority in 165 BC, Albania was controlled nearly continuously by a succession of foreign powers until the mid-20th century, with only brief periods of self-rule.

Following the split of the Roman Empire in 395, the Byzantine Empire established control over present-day Albania. In the 11th century, Byzan-

tine Emperor Alexius I Comnenus made the first recorded reference to a distinct area of land known as Albania and to its people.

The Ottoman Empire ruled Albania from 1385-1912. During this time, much of the population converted to the Islamic faith, and Albanians also emigrated to Italy, Greece, Egypt and Turkey. Although its control was briefly disrupted during the 1443-78 revolt, led by Albania's national hero, Gjergj Kastrioti Skenderbeu, the Ottomans eventually reasserted their dominance. The League of Prizren (1878) promoted the idea of an Albanian nation-state and established the modern Albanian alphabet, updating a language that survived the hundreds of years of Ottoman rule despite being outlawed. By the early 20th century, the weakened Ottoman Empire was no longer able to suppress Albanian nationalism. Following the conclusion of the First Balkan War, Albanians issued the Vlore Proclamation of November 28, 1912, declaring independence and the Great Powers established Albania's borders in 1913. Albania's territorial integrity was confirmed at the Paris Peace Conference in 1919, after U.S. President Woodrow Wilson dismissed a plan by the European powers to divide Albania among its neighbors.

During the Second World War, Albania was occupied first by Italy (1939-43) and then by Germany (1943-44). After the war, Communist Party leader Enver Hoxha, through a combination of ruthlessness and strategic alliances, managed to preserve Albania's territorial integrity during the next 40 years, but exacted a terrible price from the population, which was subjected to purges, shortages, repression of civil and political rights, a total ban on religious observance, and increased isolation. Albania adhered to a strict Stalinist philosophy, eventually withdrawing from the Warsaw Pact in 1968 and alienating its final remaining ally, China, in 1978.

Following Hoxha's death in 1985 and the subsequent fall of Communism in 1991, Albanian society struggled to overcome its historical isolation and underdevelopment. During the initial transition period, the Albanian Government sought closer ties with the West in order to improve economic conditions and introduced basic democratic reforms, including a multiparty system.

In 1992, after the sweeping electoral victory of the Democratic Party, Sali Berisha became the first democratically elected President of Albania. Berisha began a more deliberate program of economic and democratic reform but progress on these issues stalled in the mid-1990s, due to political gridlock. At the same time, unscrupulous investment companies

defrauded investors all over Albania using pyramid schemes. In early 1997, several of these pyramid schemes collapsed, leaving thousands of people bankrupt, disillusioned, and angry. Armed revolts broke out across the country, leading to the near-total collapse of government authority. During this time, Albania's already inadequate and antiquated infrastructure suffered tremendous damage, as people looted public works for building materials. Weapons depots all over the country were raided. The anarchy of early 1997 alarmed the world and prompted intensive international mediation.

A UN Multinational Protection Force restored order, and an interim national reconciliation government oversaw the general elections of June 1997, which returned the Socialists and their allies to power at the national level. President Berisha resigned, and the Socialists elected Rexhep Meidani as President of the Republic.

During the transitional period of 1997-2002, a series of short-lived Socialist-led governments succeeded one another as Albania's fragile democratic structures were strengthened. Additional political parties formed, media outlets expanded, non-governmental organizations and business associations developed. In 1998, Albanians ratified a new constitution via popular referendum, guaranteeing the rule of law and the protection of fundamental human rights and religious freedom. Fatos Nano, Chairman of the Socialist Party, emerged as Prime Minister in July 2002.

On July 24, 2002, Alfred Moisiu was sworn in as President of the Republic. A nonpartisan figure, he was elected as a consensus candidate of the ruling and opposition parties. The peaceful transfer of power from President Meidani to President Moisiu was the result of an agreement between the parties to engage each other within established parliamentary structures. This "truce" ushered in a new period of political stability in Albania, making possible significant progress in democratic and economic reforms, rule of law initiatives, and the development of Albania's relations with its neighbors and the U.S. The "truce" between party leaders began to fray in summer 2003 and progress on economic and political reforms suffered noticeably due to political infighting. The municipal elections of 2003 and national elections of 2005 were an improvement over past years, adding to the consolidation of democracy despite the continued presence of administrative errors and inaccuracies in voter lists.

In 2005, the Democratic Party and its allies returned to power, pledging to fight crime and corruption, decrease the size and scope of government, and promote economic growth. Their leader, Sali Berisha, was sworn in as Prime Minister on September 11, 2005.

Since the election, Prime Minister Berisha's government has made the fight against corruption and organized crime a priority, although the former has met with limited success. The opposition has criticized the government's approach to fighting corruption and crime as unconstitutional and an attempt to undermine independent institutions. While previously relations between the government and opposition SP party were characterized as antagonistic, both sides have at times shown willingness to work together to achieve major policy objectives, such as the constitutional reforms of early 2008.

Another politically contentious process was the pre-electoral period prior to the 2007 local elections. Although the February 18, 2007 local elections were generally peaceful and democratic, over-politicized debate during the preceding months resulted in procedural and administrative problems during the conduct of the elections. A major positive step forward was the performance of the police force.

The fragility of the Albanian electoral system was tested again during the parliamentary by-election in zone 26 (Shijak) on March 11, 2007. The left-wing opposition parties withdrew their commissioners from the polling stations and the counting center, in spite of prior concessions from the Central Elections Commission (CEC) to the opposition's demands. Opposition commissioners left and took with them one of the seals that mark the ballots. By midday, the opposition candidate also announced his withdrawal from the parliamentary race. However, the right of citizens to vote prevailed and the process continued thanks to the technical arrangements of the CEC. The only visible sign of violence was the wounding of a Democratic Party commissioner, who was fired upon by a militant.

Both elections were an indication of lack of political will to cooperate and of the imminent need for a comprehensive electoral reform of the present Albanian electoral system.

On July 20, 2007 President Bamir Topi was elected within Parliament after six members of the opposition coalition broke ranks to vote for his candidacy. Out of 90 deputies present at the session, 85 voted for Topi, while Neritan Ceka, head of the opposition Democratic Alliance party, won five votes. Topi, 50, a former agriculture minister, now succeeds President Alfred Moisiu for a five-year mandate.

GOVERNMENT AND POLITICAL CONDITIONS

The unicameral People's Assembly (Kuvendi Popullor) consists of 140 seats, 100 of which are determined by direct popular vote. The remaining seats are distributed by proportional representation. All members serve 4-year terms. The Speaker of Parliament (Jozefina Topalli) has two deputies, who along with eight permanent parliamentary commissions assist in the process of legislating Albanian affairs.

The President is the head of state and elected by a three-fifths majority vote of all Assembly members. The President serves a term of 5 years with the right to one re-election. Although the position is largely ceremonial, the

Constitution gives the President authority to appoint and dismiss some high-ranking civil servants in the executive and judicial branches, and this authority can have political implications. The President is also commander in chief of the armed forces, and chairs the National Security Commission. The current President's term expires on July 23, 2012.

The Prime Minister is appointed by the President and approved by a simple majority of all members of the Assembly. The Prime Minister serves as the Chairman of the Council of Ministers (cabinet), which consists of the Prime Minister, Deputy Prime Minister, and other ministers. Members of the Council of Ministers are nominated by the Prime Minister, decreed by the President, and approved by a parliamentary vote.

Albania's civil law system is similar to that of other European countries. The court structure consists of a Constitutional Court, a Supreme Court, and multiple appeal and district courts. The Constitutional Court is comprised of nine members appointed by the Assembly for one 9-year term. The Constitutional Court interprets the Constitution, determines the constitutionality of laws, and resolves disagreements between local and federal authorities. The Supreme Court is the highest court of appeal and consists of 11 members appointed by the President with the consent of the Assembly for 9-year terms. The President chairs the High Council of Justice, which is responsible for appointing and dismissing other judges. The High Court of Justice is comprised of 15 members—the President of the Republic, the Chairman of the High Court, the Minister of Justice, three members elected by the Assembly, and nine judges of all levels elected by the National Judicial Conference.

The remaining courts are divided into three jurisdictions: criminal, civil, and military. There are no jury trials under the Albanian system of justice. A college of three judges, who are sometimes referred to as a "jury" by the Albanian press, render court verdicts.

Principal Government Officials

Last Updated: 11/12/08

Pres.: **Bamir TOPI**
Prime Min.: **Sali BERISHA**
Dep. Prime Min.: **Gazmend OKETA**
Min. of Agriculture: **Jemin GJANA**
Min. of Culture & Tourism: **Ylli PANGO**
Min. of Defense: **Gazmend OKETA**
Min. of Economy & Energy: **Genc RULI**
Min. of Education & Science: **Genc POLLO**
Min. of Environment, Forests, & Waters: **Lufter XHUVELI**
Min. of Finance: **Ridvan BODE**
Min. of Foreign Affairs: **Lulzim BASHA**
Min. of Health: **Nard NDOKA**
Min. of Integration: **Majlinda BREGU**
Min. of Interior: **Bujar NISHANI**
Min. of Justice: **Enkelejd ALIBEAJ**
Min. of Labor, Social Issues, & Equal Opportunity: **Koco BARKA**
Min. of Transportation: **Sokol OLLDASHI**
Governor, Bank of Albania: **Ardian FULLANI**
Ambassador to the US: **Aleksander SALLABANDA**
Permanent Representative to the UN, New York: **Adrian NERITANI**

ECONOMY

Albania remains one of the poorest countries in Europe. According to the Bank of Albania, per capita income was U.S. $3,500 in 2008. The official unemployment rate is 13.5%, and 18.5% of the population lives below the poverty line according to the World Bank's 2005 Poverty Assessment. Almost 60% of all workers are employed in the agricultural sector, although the construction and service industries have been expanding recently, the latter boosted significantly by ethnic Albanian tourists from throughout the Balkans. The GDP is comprised of agriculture (approximately 24%), industry (approximately 13%), service sector (approximately 39%), transport and communication (12%), construction (11%), and remittances from Albanian workers abroad—mostly in Greece and Italy (approximately 12.8%).

Albania was the last of the central and eastern European countries to embark upon democratic and free market reforms. Further, Albania started from a comparatively disadvantaged position, due to Hoxha's catastrophic economic policies. Transition from a centrally planned economy to a market-orientated system has been almost as difficult for Albania as the country's communist period.

The democratically elected government that assumed office in April 1992 launched an ambitious economic reform program meant to halt economic deterioration and put the country on the path toward a market economy. Key elements included price and exchange system liberalization, fiscal consolidation, monetary restraint, and a firm income policy. These were complemented by a comprehensive package of structural reforms, including privatization, enterprise and financial sector reform, and creation of the legal framework for a market economy and private sector activity.

Results of Albania's efforts were initially encouraging. Led by the agricultural sector, real GDP grew, and Albania's currency, the lek, stabilized. The speed and vigor of private entrepreneurial response to Albania's opening and liberalizing was better than expected. Beginning in 1995, however, progress stalled. The collapse of the infamous pyramid schemes of the 1990s and the instability that followed were a tremendous setback, from which Albania's economy continues to recover.

In recent years the Albanian economy has improved, although infrastructure development and major reforms in areas such as tax collection, property laws, and for improving the business climate in general are proceeding slowly. Between 2003-2007, Albania experienced an average 5.5% annual growth in GDP. Fiscal and monetary discipline has kept inflation relatively low, averaging roughly 2.5% per year between 2004-2006. In 2007, inflation increased to 3%, still within the target range set by the Bank of Albania. Albania's public debt reached 54.1% of GDP in 2007, and the growing trade deficit

was estimated at 22% of GDP in 2007. Economic reform has also been hampered by Albania's very large informal economy, which the International Monetary Fund (IMF) estimates equals 50% of GDP.

Albania's trade imbalance is severe. In 2007, Albanian trade had U.S. $4.15 billion in imports, and U.S. $1 billion in exports. Albania has concluded Free Trade Agreements (FTAs) with Macedonia, Croatia, Bulgaria, Romania, Bosnia, and Moldova. Albania also previously established an FTA with the UN Interim Administration Mission in Kosovo (UNMIK), which is expected to transfer to the Republic of Kosovo sometime in 2009. In April 2006, these bilateral agreements were replaced by a multiregional agreement that entered into force in May 2007 and that is based on the Central European Free Trade Agreement (CEFTA) model. However, combined trade with all these countries constitutes a small percentage of Albania's trade, while trade with EU member states (mainly Greece and Italy) accounts for nearly 68%. U.S. two-way trade with Albania is very low. In 2006, U.S. exports to Albania totaled $46.6 million. U.S. imports, during the same time period, totaled $3.44 million, making the U.S. the 17th overall trade partner of Albania. However, there are some discrepancies between U.S. and Albanian trade figures. Major U.S. investment to date has been limited to large-scale infrastructure contracts with the government; Lockheed Martin and Bechtel are principal U.S. participants. The Albanian Government signed a FTA with the EU as part of its Stabilization and Association Agreement negotiations. The interim agreement entered into force in December 2006, and it foresees a duty-free regime for almost 90% of agricultural and industrial products. On the fiscal side it will also significantly reduce revenue collection.

Albania is trying to attract foreign investment and promote domestic investment, but significant impediments exist. The Albanian Government faces the daunting task of rationalizing and uniformly applying business laws, improving transparency in business procedures, restructuring the tax systems (including tax collection), reducing corruption in the bureaucracy, and resolving property ownership disputes.

Business growth is further hampered by Albania's inadequate energy and transportation infrastructure. The capital, Tirana, and the main port of Durres, generally receive electricity most of the day, but frequent power outages plague every other major city, small town, and rural village. Although recent steps have been taken to improve the transportation infrastructure, Albania has a limited railway system and just one international airport. Because of the mountainous terrain and poor road condition, overland goods transport is arduous and costly.

MILITARY AFFAIRS

Since the fall of communism in Albania in 1991, the country has played a constructive role in resolving several of the inter-ethnic conflicts in south central Europe, promoting peaceful dispute resolution and discouraging ethnic Albanian extremists. Albania sheltered many thousands of Kosovar refugees during the 1999 conflict, and now provides logistical assistance for Kosovo Force (KFOR) troops. Albania is part of the international Stabilization Force (SFOR) serving in Bosnia, and Albanian peacekeepers are part of the International Security Assistance Force in Afghanistan and the international stabilization force in Iraq. Albania has been a steadfast supporter of U.S. policy in Iraq, and was one of only four nations to contribute troops to the combat phase of Operation Enduring Freedom.

Albania continues to work with the international community to restructure its armed forces and strengthen democratic structures pursuant to its NATO Membership Action Plan. NATO members continue to encourage Albania to address military reforms that will bring it closer to membership. Since 1999, Albania has spent approximately $108 million annually on military expenditures, roughly 1.35% of its GDP. According to Government of Albania projections, military expenditure will reach 2% of GDP in 2008. With bilateral and multilateral assistance, the Ministry of Defense is transitioning to a smaller, voluntary, professional military, and reducing the vast amounts of excess weaponry and ammunition that litter the country and pose a significant public hazard and proliferation risk. The Albanian Government and the international community are working together on a project that will make Albania a mine-free country by 2010. Most high- and medium-priority mine clearance has been completed in the mined areas of northeast Albania, a legacy of the 1999 Kosovo crisis.

Albania and the U.S. enjoy a military partnership and are signatories to treaties including the 2003 Prevention of Proliferation of Weapons of Mass Destruction and the Promotion of Defense and Military Relations and the 2004 Supplementary Agreement to the Partnership for Peace Status of Forces Agreement, which defines the status of American military troops in Albania and further enables military cooperation. In May 2003, Albania, Croatia, Macedonia, and the U.S. created the Adriatic Charter, modeled on the Baltic Charter, as a mechanism for promoting regional cooperation to advance each country's NATO candidacy. In spite of strong EU objections, Albania also signed in May 2003 a bilateral agreement with the United States on non-surrender of persons, based on Article 98 of the statute of International Criminal Court.

In 2004 President Bush authorized the use of the Nunn-Lugar Cooperative Threat Reduction program funds for projects in Albania, marking the first time such funds are used outside the former Soviet Union. With this funding the United States is assisting the Government of Albania with the destruction of a stockpile of chemical agents left over from the communist regime. Under this program, Albania became the first nation in the world to complete destruction of declared chemical weapons holdings under the

Chemical Weapons Convention in July 2007. Albania received an invitation to become a NATO member at the April 2008 NATO Summit in Bucharest. The U.S. Senate unanimously ratified Albania's Protocols of Accession to NATO September 25, and President Bush signed the Accession Protocols October 24, 2008.

FOREIGN RELATIONS

Albania is currently pursuing a path of greater Euro-Atlantic integration. Its primary long-term goals are to gain NATO and EU membership and to promote closer bilateral ties with its neighbors and with the U.S. Albania is a member of a number of international organizations, as well as multiple regional organizations and initiatives, including the Organization for Security and Cooperation in Europe (OSCE), the UN, the Stability Pact, the Adriatic Charter, and the World Trade Organization (WTO). In June 2006, Albania and the EU signed a Stabilization and Association Agreement, the first step to EU membership, which will focus on implementing essential rule of law reforms and curbing corruption and organized crime.

Albania maintains generally good relations with its neighbors. It re-established diplomatic relations with the Federal Republic of Yugoslavia following the ousting of Slobodan Milosevic in 2000, and maintains excellent relations with the Republic of Montenegro, which gained its independence after the dissolution of the Serbia and Montenegro union in 2006. Albanian, Macedonian, and Italian law enforcement agencies are cooperating with increasing efficiency to crack down on the trafficking of arms, drugs, contraband, and human beings across their borders. Albania has also arrested and prosecuted several ethnic-Albanian extremists on charges of inciting interethnic hatred in Macedonia and Kosovo. Tensions occasionally arise with Greece over the treatment of the Greek minority in Albania or the Albanian community in Greece, but overall relations are good.

U.S.-ALBANIAN RELATIONS

Albania enjoys friendly and cooperative bilateral relations with the U.S. Pro-U.S. sentiment is widespread among the population. Even while the U.S., which had closed its mission to Albania in 1946, was being vilified by communist propaganda during the Hoxha regime, ordinary Albanians remembered that Woodrow Wilson had protected Albanian independence in 1919. Albanians credit the NATO bombing of Serbia in 1999 with saving thousands of Kosovo Albanians, and they greatly appreciate the U.S. Government's continued support for a stable, free, and democratic Kosovo.

In 2003, Albania and the U.S. signed and ratified a number of agreements, including a treaty on the Prevention of Proliferation of Weapons of Mass Destruction and the Promotion of Defense and Military Relations; the Adriatic Charter; and an Agreement regarding the non-surrender of persons to the International Criminal Court. The U.S. strongly supports Albania's EU and NATO membership goals. Working towards NATO membership, the U.S. and Albania signed a Supplementary Agreement to the Partnership for Peace. NATO Protocols. Status of Forces Agreement, an important step in strengthening bilateral cooperation and enhancing security, peace, and stability in the region. The US Senate unanimously ratified Albania's Protocols of Accession to NATO September 25, and President Bush signed the Accession Protocols October 24, 2008.

Since FY 1991, the U.S. has provided Albania with more than $616 million in assistance, not counting U.S. Department of Agriculture (USDA) food aid. The aid has served to facilitate Albania's transition from the most isolated and repressive communist state in Europe to a modern democracy with a market-oriented economy, and to support long-term development. In 2007, the U.S. gave over $21.1 million to Albania under the Support for East European Democracy (SEED) Act program. Albania was among the first countries selected to participate in the Threshold Program under the Millennium Challenge Account, winning a grant of $13.8 million and a Second Threshold grant of $16 million in 2008. The program targets two critical stumbling blocks to development—corruption and rule of law.

Despite daunting problems at home, Albania has wholeheartedly supported the U.S. in the global war on terrorism by freezing terrorist assets, shutting down non-governmental organizations (NGOs) with possible links to terrorist financing, expelling extremists, and providing hundreds of military troops for the U.S.-led actions in Afghanistan and Iraq. Albania has played a moderating role in the region and has fully supported UN mediation efforts in Kosovo.

TRAVEL

Consular Information Sheet

November 4, 2008

Country Description: Albania is a parliamentary democracy that is transforming its economy into a market-oriented system. Albania's per capita income is among the lowest in Europe, but economic conditions in the country are steadily improving. Tourist facilities are not highly developed in much of the country, and though Albania's economic integration into European Union markets is slowly underway, many of the goods and services taken for granted in other European countries are not yet available. Hotel accommodations are limited outside of major cities.

Entry and Exit Requirements: A passport is required. All travelers entering or exiting Albania must have six months or more validity on their passport. Customs officers strictly enforce this law. U.S. citizens do not require a visa prior to entering Albania, but those traveling without a visa will be charged a fee for an entry stamp at the point of entry, which is valid for a stay of up to 90 days. This fee is currently 10 Euros, or the equivalent in any easily convertible currency, including U.S. dollars. Travelers without a visa who intend to stay in Albania for more than 90 days should be aware that Albanian law allows a traveler without a visa to remain in Albania for 90 days only within a specific 180-day period. That 180-day period is defined from the first day of entry. For example, a traveler entering without a visa on January 1 may remain in Albania for 90 days total during the period of time between January 1 and June 28. Departing Albania during this time period does not "restart the clock." Travelers attempting to reenter Albania without a visa and within 180 days of a previous entry and after an aggregate stay of 90 days may be denied entry. For stays exceeding 90 days within a 180-day period, those interested must apply for a Residency Permit at the police station with jurisdiction over the city of residence. Information on how to apply for a residency permit is available on the Embassy of Albania web site at http://www.embassyofalbania.org. There is also a departure fee of ten Euros, or the equivalent in any easily convertible currency, including U.S. dollars. Visit the Embassy web site at http://www.embassyofalbania.org/consular.html#visa for the most current visa information.

Dual Nationality: The Albanian government considers any person in Albania of Albanian parents to be an Albanian citizen. In addition to being subject to all Albanian laws affecting U.S. citizens, dual nationals may be subject to Albanian laws that impose special obligations. Male Albanian citizens are subject to compulsory military service regulations. If such persons are found guilty of draft evasion in Albania, they are subject to prosecution by the Albanian court. Those who might be affected should inquire at an Albanian Embassy or Consulate outside Albania regarding their status before traveling. In some instances, dual nationality may hamper U.S. Government efforts to provide protection abroad.

Safety and Security: Although the overall security situation in Albania has improved in recent years, organized criminal activity continues to operate in all regions, and corruption is pervasive. The U.S. Government maintains security procedures regarding the travel of U.S. Government employees to the northern administrative districts of Shkoder, Malesi E Madhe and Tropoje (with the exception of the route along the national road to Montenegro and the city of Shkoder) and to the southern town of Lazarat, with such travel restricted to secure vehicles with escort. Recently, travel restrictions for U.S. Government employees have been lifted for overnight stays in the city of Shkoder. In most cases, police assistance and protection is limited. A high level of security awareness should be maintained at all times. Taking photographs of anything that could be perceived as being of military or security interest may result in problems with authorities. All gatherings of large crowds should be avoided, particularly those involving political causes or striking workers.

For the latest security information, Americans traveling abroad should regularly monitor the Department of State, Bureau of Consular Affair's Internet site at http://travel.state.gov, where the current Travel Warnings and Travel Alerts, including the Worldwide Caution Travel Alert, can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S., or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: In the latest State Department assessment, Albania's crime rating is "medium." Crime against foreigners is rare in Albania, as targeting foreigners is often viewed as too risky. Visitors should maintain the same personal security awareness that they would in any metropolitan U.S. city. Caution should be exercised in bars in Tirana where violent incidents, some involving the use of firearms, have occurred in the past, particularly in the early morning hours. Within the last years there have been fewer cases of carjacking compared with previous years. Anyone who is carjacked should surrender the vehicle without resistance. Armed crime continues to be more common in northern and northwestern Albania than in the rest of the country. Street crime is fairly common in Albania, particularly at night. Criminals do not seem to deliberately target U.S. citizens or other foreigners, but do seek targets of opportunity, and select those who appear to have anything of value. Vehicle theft is still one of the biggest problems in Albania. Pick-pocketing is widespread; U.S. citizens have reported the theft of their passports by pickpockets.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while over-

seas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

Medical Facilities and Health Information: Medical facilities and capabilities in Albania are limited beyond rudimentary first aid treatment. Emergency and major medical care requiring surgery and hospital care is inadequate due to lack of specialists, diagnostic aids, medical supplies, and prescription drugs. Travelers with previously diagnosed medical conditions may wish to consult their physicians before travel. As prescription drugs may be unavailable locally, travelers may also wish to bring extra supplies of required medications.

Recent electricity shortages have resulted in sporadic blackouts throughout the country, which can affect food storage capabilities of restaurants and shops. While some restaurants and food stores have generators to properly store food, travelers should take care that food is cooked thoroughly to reduce the risk of food-borne illness. Water in Albania is not potable. Visitors should plan to purchase bottled water or drinks while in country.

The U.S. Department of State is unaware of any HIV/AIDS entry restrictions for visitors to or foreign residents of Albania.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's web site at http://wwwn.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith/en.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Albania is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

Major roads in Albania are often in very poor condition. Traveling by road throughout Albania is the most dangerous activity for locals and tourists. Vehicle accidents are the major cause of death, according to police statistics. Electricity shortages have resulted in sporadic blackouts throughout the country that can happen any hour of the day or night. Such outages affect traffic signals and street lights, making driving increasingly treacherous at any time of day. Travel at night outside the main urban areas is dangerous and should be avoided due to deplorable road conditions. During the winter months, travelers may encounter dangerous snow and icy conditions on the roads throughout mountainous regions in northern Albania. Buses travel between most major cities almost exclusively during the day, but they are often unreliable and uncomfortable. Many travelers looking for public transport prefer to use privately owned vans, which function as an alternate system of bus routes and operate almost entirely without schedules or set fares. Please note that many of these privately owned vans may not have official permission to operate a bus service and may not adhere to accepted safety and maintenance standards. Persons wishing to use privately owned vans should exercise caution. There are no commercial domestic flights and few rail connections.

Aviation Safety Oversight: As there is no direct commercial air service to the United States by Albanian carriers, the U.S. Federal Aviation Administration (FAA) has not assessed Albania's Civil Aviation Authority for compliance with International Civil Aviation Organization (ICAO) aviation safety standards. For further information, travelers may visit the FAA's Internet web site at http://www.faa.gov.

Special Circumstances: Albania's customs authorities may enforce strict regulations concerning temporary importation into or export from Albania of some items. It is advisable to contact the Embassy of Albania in Washington, D.C. or one of Albania's Consulates in the United States for specific information regarding customs requirements. As noted previously, the Albanian government considers any person in Albania of Albanian parents to be an Albanian citizen. In addition to being subject to all Albanian laws affecting U.S. citizens, dual nationals may be subject to Albanian laws that impose special obligations. Male Albanian citizens are subject to compulsory military service regulations. Albania is a cash economy. Credit cards and travelers checks are not generally accepted, except at the major new hotels in Tirana and some international airline offices. Travelers' checks can be changed at banks in larger towns.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses.

Persons violating Albania's laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for

possession, use, or trafficking in illegal drugs in Albania are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Under Albanian law, police can detain any individual for up to 10 hours without filing formal charges. U.S. citizens are encouraged to carry a copy of their U.S. passports with them at all times to show proof of identity and U.S. citizenship if questioned by local officials.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in Albania are encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration web site and to obtain updated information on travel and security within Albania. Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency. The U.S. Embassy is located at Rruga Elbasanit 103, tel. (355) (4) 247285; fax (355) (4) 232222. The U.S. Embassy web site is http://tirana.usembassy.gov.

Intercountry Adoption

June 2008

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is based on public sources and our current understanding. Questions involving foreign and U.S. immigration laws and legal interpretation should be addressed respectively to qualified foreign or U.S. legal counsel.

The Hague Convention on Intercountry Adoption: The Hague Convention on Intercountry Adoption, to which the United States became a party on April 1, 2008, establishes legal and regulatory requirements for intercountry adoption. Albania is a party to The Hague Convention on Protection of Children and Co-operation in Respect of Intercountry Adoption (the Convention) and with which the Convention is in force for the United States.

Adoption Authority: The government office responsible for adoptions in Albania is the Albanian Adoption Committee, located within the Ministry of Justice.

Eligibility to Adopt: Under Albanian law, prospective adoptive parents must be a minimum of 18 years older than the adopted child. Both married and single prospective adoptive parents are permitted. Under U.S. immigration law, at least one parent must be 25 years old or older (at least 24 years old at the time he or she files the advanced processing application and at least 25 years old at the time he or she files the orphan petition).

Residency Requirements: There are no residency requirements for U.S. citizens wishing to adopt a child in Albania.

Time Frame: Prospective adoptive parents should expect a time frame up to six months after a child has been identified.

Adoption Agencies and Attorneys: All adoptions must be processed by an adoption agency accredited by the Albanian Adoption Committee. Currently, two U.S. adoption agencies have been accredited. Both agencies are listed on the U.S. Embassy website: http://tirana.usembassy.gov. It is essential that prospective adoptive parent(s) seeking to adopt from a Convention country use an accredited adoption service provider. The U.S. Department of State maintains a current list of accredited adoption service providers. The list of accredited adoption service providers is also provided on the website of The Hague Permanent Bureau at www.hcch.net.

Adoption Fees: Adoptive parents can expect to pay three different fees. The agency fee, which may differ depending up on the adoption service provider selected, is between $10,000 and $11,000. In addition a fee of $1,000 must be paid to the Albanian Adoption Committee. A fee of $500.00 must also be paid to the orphanage where the child lived prior to adoption.

The U.S. Embassy in Albania discourages the payment of any fees that are not properly receipted, "donations," or "expediting" fees, that may be requested from prospective adoptive parents. Such fees have the appearance of "buying" a baby and put all future adoptions in Albania at risk.

Adoption Procedures: Individuals may not deal directly with the Albanian Adoption Committee or with individual orphanages or biological parents. The Albanian child must have a certificate from the Albanian Adoption Committee stating that s/he is adoptable.

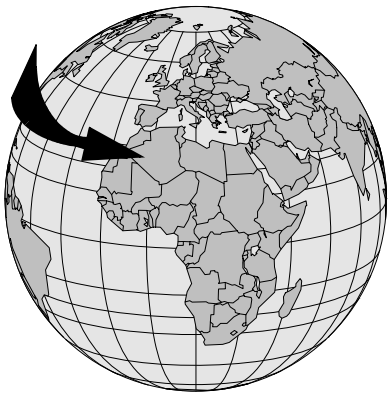
This means that the child has been in an orphanage for at least six months with no contact from his/her biological parent(s), and that the orphanage has been unsuccessful in placing the child with an Albanian family. The prospective adoptive parent(s) may not go to an orphanage to select a child without authorization from the Albanian Adoption Committee. (Authorized local adoption agencies, i.e., International Children's Alliance, or Bethany Christian Services, may contact the Albanian Adoption Committee to obtain authorization for the prospective adoptive parents to visit an orphanage). In general the Committee will propose a child whom

the prospective adoptive parent(s) may accept if they wish. In addition, the final court decision and the child's travel documentation cannot be issued until 14 days after the court date. The child must remain in Albania during these 14 days, although s/he may reside with the adoptive parent(s) during that time.

Please remember: when traveling back to the U.S., your newly adopted child may need to obtain a transit visa. If the country of transit requires a visa for Albanian nationals, this process can take up to one week. (this procedure is separate from the U.S. immigrant visa process.) Therefore, prospective adoptive parent(s) should be prepared to arrive in Albania a day or two before the court date and to remain afterwards for approximately three weeks.

Required Documents:

- A written request clearly stating the reasons why he/she/they want(s) to adopt a child.
- Adoption application; the form is called Preliminary Application for International Adoption. The agency facilitating the case will provide the form to the PAP.
- Birth certificate, marriage certificate of the adopting parent(s). Divorce decree and former spouse's death certificate, if applicable.
- Police records of the adopting parent(s) (PAPs) must have a clean police record.
- Personal, family, and social information on the adopting parents (usually included in the Home Study).
- Medical information on the adopting parent(s). Medical information is addressed by a physician that is contracted by the adoption service provider in the U.S.
- Home Study completed by an authorized home study preparer.
- Financial statement from adopting parents.
- Warranty deed (the Albanian Adoption Committee requires evidence that PAPs own their own home).
- Reference letter from adopting parent's employer.
- Family and home pictures.



All the above-mentioned documents are submitted to one of the adoption agencies accredited by the Albanian Adoption Committee.

Embassy of the Republic of Albania
2100 S. Street, N.W.
Washington, D.C. 20008
Tel: (202) 223-4942 or (202) 393-2396
Fax: (202) 628-7324

U.S. Immigration Requirements: As of April 1, 2008, U.S. citizens wishing to adopt in a Convention country must begin the process by filing with the U.S. Citizenship and Immigration Services (USCIS) a form I-800A *Application for Determination of Suitability to Adopt a Child from a Convention Country*. Prospective adoptive parents are strongly encouraged to consult the Department of Homeland Security, USCIS website (www.uscis.gov) to download forms and filing instructions.

Additional Information: For information on intercountry adoption and international parental child abduction, and security information for U.S. citizens traveling abroad, call Toll Free 1-888-407-4747. This number is available from 8:00 a.m. to 8:00 p.m. EST/EDT, Monday through Friday (except U.S. federal holidays). Callers who are unable to use toll-free numbers, such as those calling from overseas, may obtain information and assistance during these hours by calling 1-202-501-4444.

ALGERIA

Compiled from the October 2007 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
People's Democratic Republic of Algeria.

PROFILE

Geography

Location: Northern Africa, bordering the Mediterranean Sea, between Morocco and Tunisia.

Area: Total—2,381,740 sq. km. Land—2,381,740 sq. km.; water—0 sq. km. More than three times the size of Texas.

Cities: Capital—Algiers; Oran, Constantine, Annaba.

Terrain: Mostly high plateau and desert; some mountains; narrow, discontinuous coastal plain. Mountainous areas subject to severe earthquakes, mud slides.

Climate: Arid to semiarid; mild, wet winters with hot, dry summers along coast; drier with cold winters and hot summers on high plateau; a hot, dust/sand-laden wind called sirocco is especially common in summer.

Land use: Arable land—3%; permanent crops—0%, permanent pastures—13%; forests and woodland—2%.

People

Nationality: Noun—Algerian(s); adjective—Algerian.

Population: (2007 est.) 33,333,216.

Annual growth rate: (2007 est.) 1.22%. Birth rate (2007 est.)—17.11 births/1,000 population; death rate (2007 est.)—4.62 deaths/1,000 population.

Ethnic groups: Arab-Berber 99%, European less than 1%.

Religions: Sunni Muslim (state religion) 99%, Christian and Jewish 1%.

Languages: Arabic (official), Berber (national language), French.

Education: Literacy (age 15 and over can read and write)—total population 70% (2004 est.); female 60% (2004 est.).

Health: (2007 est.) Infant mortality rate—28.78 deaths/1,000 live births. Life expectancy at birth—total population, 73.52 years; male 71.91 years, female 75.21 years.

Work force: (2006) 9.31 million.

Unemployment rate: (2006 est.) 23%; Algerian Government estimates 13%.

Government

Type: Republic.

Independence: July 5, 1962 (from France).

Constitution: September 8, 1963; revised November 19, 1976, November 3, 1988, February 23, 1989, and November 28, 1996.

Government branches: Legal system based on French and Islamic law; judicial review of legislative acts in ad hoc Constitutional Council composed of various public officials, including several Supreme Court justices; Algeria has not accepted compulsory International Court of Justice (ICJ) jurisdiction.

Political subdivisions: 48 provinces (wilayates; singular, wilaya).

Suffrage: 18 years of age; universal.

National holidays: Independence Day, July 5, 1962; Revolution Day, November 1, 1954.

Political parties: National Liberation Front (FLN), National Democratic Rally (RND), Movement for National Reform (MRN), Movement of Society for Peace (MSP), Workers' Party (PT), Algerian National Front (FNA), Islamic Renaissance Movement (MNI), Party of Algerian Renewal (PRA), Movement of National Understanding (MEN).

Economy

GDP: (2006) $92.22 billion.

GDP growth rate: (2006) 5.6%.

Per capita GDP: (PPP, 2006) $7,777.

Agriculture: Products—wheat, barley, oats, grapes, olives, citrus, fruits; sheep, cattle.

Industry: Types—petroleum, natural gas, light industries, mining, electrical, petrochemical, food processing, pharmaceuticals, cement, seawater desalination. Sector Information as% GDP: (2006) Agriculture 9.4%, services 32.5%, industry 58.1%.

Currency: Algerian dinar.

Inflation: GDP deflator (2004) 10.2%.

Trade: Exports (f.o.b., 2006 est.)—$55.6 billion: petroleum, natural gas, and petroleum products 97.52%. Partners (2005 est.)—U.S. 23.5%, Italy 16.7%, France 11.4%, Spain 11.25%. Imports (f.o.b., 2006 est.)—$27.6 billion: capital goods, food and beverages, consumer goods. Partners (2005)—France 28%, Italy 7.8%, Germany 6.3%, U.S. 5.4%, China 6.6%, Spain 7.2%.

Budget: (2006 est.) Revenues—$59.26 billion; expenditures—$49.14 billion, including capital expenditures of $5.8 billion.

Debt: (external, 2006 est.) $5 billion.

U.S. economic assistance: (2005 est.) $4.40 million (MEPI, IMET).

GEOGRAPHY

Algeria, the second-largest state in Africa, has a Mediterranean coastline of about 998 kilometers (620 mi.). The Tellian and Saharan Atlas mountain ranges cross the country from east to west, dividing it into three zones. Between the northern zone, Tellian Atlas, and the Mediterranean is a narrow, fertile coastal plain—the Tell (Arabic for hill)—with a moderate climate year round and rainfall adequate for agriculture. A high plateau region, averaging 914 meters (3,000 ft.) above sea level, with limited rainfall, great rocky plains, and desert, lies between the two mountain ranges. It is generally barren except for scattered clumps of trees and intermittent bush and pastureland. The third and largest zone, south of the Saharan Atlas mountain range, is mostly desert. About 80% of the country is desert, steppes, wasteland, and mountains. Algeria's weather varies considerably from season to season and from one geographical location to another. In the north, the summers are usually hot with little rainfall. Winter rains begin in the north in October. Frost and snow are rare, except on the highest slopes of the Tellian Atlas Mountains. Dust and sandstorms occur most frequently between February and May.

Soil erosion—from overgrazing, other poor farming practices, and desertification—and the dumping of raw sewage, petroleum refining wastes, and other industrial effluents are leading to the pollution of rivers and coastal waters. The Mediterranean Sea, in particular, is becoming polluted from oil wastes, soil erosion, and fertilizer runoff. There are inadequate supplies of potable water.

PEOPLE

Ninety-one percent of the Algerian population lives along the Mediterranean coast on 12% of the country's total land mass. Forty-five percent of the population is urban, and urbanization continues, despite government efforts to discourage migration to the cities. About 1.5 million nomads and semi-settled Bedouin still live in the Saharan area.

Nearly all Algerians are Muslim, of Arab, Berber, or mixed Arab-Berber stock. Official data on the number of non-Muslim residents is not available; however, practitioners report it to be less than 5,000. Most of the non-Muslim community is comprised of Methodist, Roman Catholic and Evangelical faiths; the Jewish community is virtually non-existent. There are about 1,100 American citizens in the country, the majority of whom live and work in the oil/gas fields in the south.

Algeria's educational system has grown dramatically since the country gained its independence. In the last 12 years, attendance has doubled to more than 5 million students. Education is free and compulsory to age 16. Despite government allocation of substantial educational resources, population pressures and a serious shortage of teachers have severely strained the system. Modest numbers of Algerian students study abroad, primarily in Europe and Canada. In 2000, the government launched a major review of the country's educational system and in 2004 efforts to reform the educational system began.

Housing and medicine continue to be pressing problems in Algeria. Failing infrastructure and the continued influx of people from rural to urban areas have overtaxed both systems. According to the United Nations Development Program, Algeria has one of the world's highest per housing unit occupancy rates, and government officials have publicly stated that the country has an immediate shortfall of 1.5 million housing units.

HISTORY

Since the 5th century B.C., the native peoples of northern Africa (first identified by the Greeks as "Berbers") were pushed back from the coast by successive waves of Phoenician, Roman, Vandal, Byzantine, Arab, Turkish, and, finally, French invaders. The greatest cultural impact came from the Arab invasions of the 8th and 11th centuries A.D., which brought Islam and the Arabic language. The effects of the most recent (French) occupation—French language and European-inspired socialism—are still pervasive.

North African boundaries have shifted during various stages of the conquests. Algeria's modern borders were created by the French, whose colonization began in 1830. To benefit French colonists, most of whom were farmers and businessmen, northern Algeria was eventually organized into overseas departments of France, with representatives in the French National Assembly. France controlled the entire country, but the traditional Muslim population in the rural areas remained separated from the modern economic infrastructure of the European community.

Algerians began their uprising on November 1, 1954, to gain rights denied them under French rule. The revolution, launched by a small group of nationalists who called themselves the National Liberation Front (FLN), was a guerrilla war in which both sides targeted civilians and otherwise used brutal tactics. Eventually, protracted negotiations led to a cease-fire signed by France and the FLN on March 18, 1962, at Evian, France. The Evian Accords also provided for continuing economic, financial, technical, and cultural relations, along

with interim administrative arrangements until a referendum on self-determination could be held. Over 1 million French citizens living in Algeria at the time, called the pieds-noirs (black feet), left Algeria for France.

The referendum was held in Algeria on July 1, 1962, and France declared Algeria independent on July 3. In September 1962 Ahmed Ben Bella was formally elected president. On September 8, 1963, a Constitution was adopted by referendum. On June 19, 1965, President Ben Bella was replaced in a non-violent coup by the Council of the Revolution headed by Minister of Defense Col. Houari Boumediene. Ben Bella was first imprisoned and then exiled. Boumediene, as President of the Council of the Revolution, led the country as Head of State until he was formally elected on December 10, 1976. Boumediene is credited with building "modern Algeria." He died on December 27, 1978.

Following nomination by an FLN Party Congress, Col. Chadli Bendjedid was elected president in 1979 and re-elected in 1984 and 1988. A new constitution was adopted in 1989 that allowed the formation of political parties other than the FLN. It also removed the armed forces, which had run the government since the days of Boumediene, from a designated role in the operation of the government. Among the scores of parties that sprang up under the new

constitution, the militant Islamic Salvation Front (FIS) was the most successful, winning more than 50% of all votes cast in municipal elections in June 1990 as well as in the first stage of national legislative elections held in December 1991.

Faced with the real possibility of a sweeping FIS victory, the National People's Assembly was dissolved by presidential decree on January 4, 1992. On January 11, under pressure from the military leadership, President Chadli Bendjedid resigned. On January 14, a five-member High Council of State was appointed by the High Council of Security to act as a collegiate presidency and immediately canceled the second round of elections. This action, coupled with political uncertainty and economic turmoil, led to a violent reaction by Islamists. On January 16, Mohamed Boudiaf, a hero of the Liberation War, returned after 28 years of exile to serve as Algeria's fourth president. Facing sporadic outbreaks of violence and terrorism, the security forces took control of the FIS offices in early February, and the High Council of State declared a state of emergency. In March, following a court decision, the FIS Party was formally dissolved, and a series of arrests and trials of FIS members occurred resulting in more than 50,000 members being jailed. Algeria became caught in a cycle of violence, which became increasingly random and indiscriminate. On June 29, 1992, President Boudiaf was assassinated in Annaba in front of TV cameras by Army Lt. Lembarek Boumarafi, who allegedly confessed to carrying out the killing on behalf of the Islamists.

Despite efforts to restore the political process, violence and terrorism dominated the Algerian landscape during the 1990s. In 1994, Liamine Zeroual, former Minister of Defense, was appointed Head of State by the High Council of State for a three-year term. During this period, the Armed Islamic Group (GIA) launched terrorist campaigns against government figures and institutions to protest the banning of the Islamist parties. A breakaway GIA group—the Salafist Group for Preaching and Combat (GSPC)—also undertook terrorist activity in the country. Government officials estimate that more than 100,000 Algerians died during this period.

Zeroual called for presidential elections in 1995, though some parties objected to holding elections that excluded the FIS. Zeroual was elected president with 75% of the vote. By 1997, in an attempt to bring political stability to the nation, the National Democratic Rally (RND) party was formed by a progressive group of FLN members. In September 1998, President Liamine Zeroual announced that he would step down in February 1999, 21 months before the end of his term, and that presidential elections would be held.

Algerians went to the polls in April 1999, following a campaign in which seven candidates qualified for election. On the eve of the election, all candidates except Abdelaziz Bouteflika pulled out amid charges of widespread electoral fraud. Bouteflika, the candidate who appeared to enjoy the backing of the military, as well as the FLN and the RND party regulars, won with an official vote count of 70% of all votes cast. He was inaugurated on April 27, 1999 for a 5-year term.

President Bouteflika's agenda focused initially on restoring security and stability to the country. Following his inauguration, he proposed an official amnesty for those who fought against the government during the 1990s with the exception of those who had engaged in "blood crimes," such as rape or murder. This "Civil Concord" policy was widely approved in a nationwide referendum in September 2000.

Government officials estimate that 80% of those fighting the regime during the 1990s have accepted the civil concord offer and have attempted to reintegrate into Algerian society. Bouteflika also launched national commissions to study education and judicial reform, as well as restructuring of the state bureaucracy.

In 2001, Berber activists in the Kabylie region of the country, reacting to the death of a youth in gendarme custody, unleashed a resistance campaign against what they saw as government repression. Strikes and demonstrations in the Kabylie region were commonplace as a result, and some spread to the capital. Chief among Berber demands was recognition of Tamazight (a general term for Berber languages) as an official language, official recognition and financial compensation for the deaths of Kabyles killed in demonstrations, an economic development plan for the area and greater control over their own regional affairs. In October 2001, the Tamazight language was recognized as a national language, but the issue remains contentious as Tamazight has not been elevated to an official language.

Algeria's most recent presidential election took place on April 8, 2004. For the first time since independence, the presidential race was democratically contested through to the end. Besides incumbent President Bouteflika, five other candidates, including one woman, competed in the election. Opposition candidates complained of some discrepancies in the voting list; irregularities on polling day, particularly in Kabylie; and of unfair media coverage during the campaign as Bouteflika, by virtue of his office, appeared on state-owned television daily. Bouteflika was re-elected in the first round of the election with 84.99% of the vote. Just over 58% of those Algerians eligible to vote participated in the election.

In the years since Bouteflika was first elected, the security situation in Algeria has improved markedly. Terrorism, however, has not been totally eliminated, and terrorist incidents still occur, particularly in the provinces of Boumerdes, Tizi-Ouzou, and in the remote southern areas of the country. In April 2007, a series of bombings in Algiers targeted a government facility and police stations, killing 33 people. In addition, on July 11 a suicide bomber targeted military barracks in the Kabylie region, killing eight soldiers. The alleged mastermind behind the 2007 attacks was killed later in July during a raid led by Algerian security forces. In Sep-

tember 2005, Algeria passed a referendum in favor of President Bouteflika's Charter for Peace and National Reconciliation, paving the way for implementing legislation that will pardon certain individuals convicted of armed terrorist violence.

The new Charter builds upon the Civil Concord, and the Rahma (clemency) Law shields from prosecution anyone who laid down arms in response to those previous amnesty offers. The Charter specifically excludes from amnesty those involved in mass murders, rapes, or the use of explosives in public places. The Charter was implemented in March 2006, and the window for combatants to receive amnesty expired in September 2006. Approximately 2,500 Islamists were released under the Charter, many of whom are now suspected of having returned to militant groups in Algeria.

GOVERNMENT

Under the 1976 Constitution (as modified 1979, and amended in 1988, 1989, and 1996) Algeria is a multiparty state. The Ministry of the Interior must approve all political parties. According to the Constitution, no political association may be formed "based on differences in religion, language, race gender or region." Algeria has universal suffrage at the age of 18.

The head of state is the president of the republic. The president, elected to a five-year term, and constitutionally limited to two terms, is the head of the Council of Ministers and of the High Security Council. He appoints the prime minister as well as one-third of the upper house (the Council of the Nation). The prime minister presides over the Council of Ministers and serves as head of the government. The Algerian Parliament is bicameral, consisting of a lower chamber, the National People's Assembly (APN), with 380 members and an upper chamber, the Council of the Nation, with 144 members. The APN is elected every five years. Legislative elections were held in May 2007. Two-thirds of the Council of the Nation is elected by regional and municipal authorities; the rest are appointed by the president. The Council of the Nation serves a six-year term with one-half of the seats up for election or reappointment every three years. Either the president or one of the parliamentary chambers may initiate legislation. Legislation must be brought before both chambers before it becomes law. Sessions of the APN are televised.

Algeria is divided into 48 wilayates (states or provinces) headed by walis (governors) who report to the Minister of Interior. Each wilaya is further divided into communes. The wilayates and communes are each governed by an elected assembly.

Principal Government Officials

Last Updated: 11/12/08

Pres.: **Abdelaziz BOUTEFLIKA**
Prime Min.: **Ahmed OUYAHIA**
Min. of State & Personal Representative of the Head of State: **Abdelaziz BELKHADEM**
Min. of State for Interior & Local Govts.: **Noureddine Yazid ZERHOUNI**
Min. of State Without Portfolio: **Bouguerra SOLTANI**
Min. of Agriculture & Rural Development: **Rachid BENAISSA**
Min. of Commerce: **El Hachemi DJAABOUB**
Min. of Communication: **Abderrachid BOUKERZAZA**
Min. of Culture: **Khalida TOUMI**
Min. of Energy & Mining: **Chakib KHELIL**
Min. of Finance: **Karim DJOUDI**
Min. of Fisheries & Fishing Resources: **Smail MIMOUNE**
Min. of Foreign Affairs: **Mourad MEDELCI**
Min. of Health, Population, & Hospital Reform: **Said BARKAT**
Min. of Higher Education & Scientific Research: **Rachid HARRAOUBIA**
Min. of Housing & Urban Development: **Noureddine MOUSSA**
Min. of Industry & Promotion of Investments: **Abdelhamid TEMMAR**
Min. of Justice & Keeper of the Seals: **Tayeb BELAIZ**
Min. of Labor & Social Security: **Tayeb LOUH**
Min. of National Defense: **Abdelaziz BOUTEFLIKA**
Min. of National Education: **Boubekeur BENBOUZID**
Min. of National Solidarity & Family & Algerian Communities Abroad: **Djamal Ould ABBAS**
Min. of Postal Services, Information, & Communication Technologies: **Hamid BESSALAH**
Min. of Public Works: **Amar GHOUL**
Min. of Relations With the Parliament: **Mahmoud KHEDRI**
Min. of Religious Affairs: **Bouabdellah GHLAMALLAH**
Min. of Small & Medium-Sized Enterprises & Handicrafts: **Mustapha BENBADA**
Min. of Transport: **Amar TOU**
Min. of Urban Planning, the Environment, & Tourism: **Cherif RAHMANI**
Min. of Vocational & Educational Training: **El Hadi KHALDI**
Min. of War Veterans (Moudjahidine): **Mohamed Cherif ABBAS**
Min. of Water Resources: **Abdelmalek SELLAL**
Min. of Youth & Sports: **Hachemi DJIAR**
Min.-Del. to the Min. of National Solidarity & Family & Algerian Communities Abroad in Charge of Family Affairs & Women's Issues: **Nouara Saadia DJAAFAR**
Min.-Del. to the Min. of Higher Education & Scientific Research in Charge of Scientific Research: **Souad BENDJABALLAH**
Min.-Del. to the Min. of National Defense: **Abdelmalek GUENAIZIA**
Min.-Del. to the Min. of State for Foreign Affairs in Charge of Maghreb & African Affairs: **Abdelkader MESSAHEL**
Min.-Del. to the Min. of State for Interior & Local Govts. in Charge of Local Govts.: **Daho OULD KABLIA**
Sec. Gen. of the Govt.: **Ahmed NOUI**
Governor, Central Bank: **Mohamed LEKASASSI**
Ambassador to the US: **Amine KHERBI**
Permanent Representative to the UN, New York:

POLITICAL CONDITIONS

Terrorist violence in Algeria resulted in more than 100,000 deaths during the 1990s. Although the security situation in the country has improved, addressing the underlying issues that brought about the political turmoil of the 1990s remains the government's major task. President Bouteflika implemented the Charter on Peace and National Reconciliation on March 1, 2006, as one way to bring

closure. Thus far, it has successfully gained the surrender of a number of moderate Islamists, but paradoxically, has emboldened the more hardcore elements, in particular the Salafist Group for Preaching and Combat (GSPC), which changed its name in January 2007 to Al-Qaida in the Islamic Maghreb (AQIM).

In keeping with its amended Constitution, the Algerian Government espouses participatory democracy and free-market competition. The government has stated that it will continue to open the political process and encourage the creation of political institutions. Presidential elections took place in April 2004 and returned President Bouteflika to office with 84.99% of the vote. The next presidential elections are scheduled for 2009.

Algeria has more than 45 daily newspapers published in French and Arabic, with a total circulation of more than 1.5 million copies. There are 20 domestically printed weekly publications with total circulation of 622,000 and 11 monthly publications with total circulation of 600,000. In 2001, the government amended the Penal Code provisions relating to defamation and slander, a step widely viewed as an effort to rein in the press. While the Algerian press is relatively free to write as they choose, use of the defamation laws significantly increased the level of press harassment following President Bouteflika's April 2004 re-election victory, and as a result, the press began to self-censor. In July 2006, President Bouteflika pardoned all journalists convicted of defaming or insulting state institutions. The pardon effectively dismissed the charges against 67 people. Critics point out that according to the criminal code, insulting the president is punishable by prison sentence. Nevertheless, the pardon was widely seen as a significant step toward democracy. The government holds a monopoly over broadcast media; Algerian newspapers are widely seen to be the freest in the region.

Population growth and associated problems—unemployment and underemployment, inability of social services to keep pace with rapid urban migration, inadequate industrial management and productivity, a decaying infrastructure—continue to affect Algerian society. Increases in the production and prices of oil and gas over the past decade have led to exchange reserves reaching $80 billion. The government began an economic reform program in 1994, focusing on macroeconomic stability and structural reform. These reforms aimed at liberalizing the economy, making Algeria competitive in the global market, and meeting the needs of the Algerian people. In 2004, the government announced a $55 billion spending program to improve national infrastructure and social services; subsequent announcements have increased the proposed program to $120 billion.

ECONOMY

The hydrocarbons sector is the backbone of the Algerian economy, accounting for roughly 60% of budget revenues, nearly 30% of GDP, and over 97% of export earnings. Algeria has the ninth-largest reserves of natural gas in the world (2.7% of proven world total) and is the fourth-largest gas exporter; it ranks 14th for oil reserves (2006). Its key oil and gas customers are Italy, Germany, France, the Netherlands, Spain, the United Kingdom, and the United States. U.S. companies have played a major role in developing Algeria's oil and gas sector; of the $5.3 billion (on a historical-cost basis, according to statistics gathered by the U.S. Department of Commerce, Bureau of Economic Analysis) of U.S. investment in Algeria, the vast bulk is in the petroleum sector.

Faced with declining oil revenues and high-debt interest payments at the beginning of the 1990s, Algeria implemented a stringent macroeconomic stabilization program and rescheduled its $7.9 billion Paris Club debt in the mid-1990s. The macroeconomic program has been particularly successful at narrowing the budget deficit and at reducing inflation from of near-30% averages in the mid 1990s to almost single digits in 2000. Inflation was at 3.6% in 2004. Algeria's economy has grown by more than 5% in each of the past five years, posting 5.6% growth in 2006. The country's foreign debt fell from a high of $28 billion in 1999 to $5 billion in 2006; in that year Algeria paid off the last of its Paris Club debt. The spike in oil prices in 1999-2000 and 2004, the government's tight fiscal policy and conservative budgeting of oil prices from 2000 to present, a large increase in the trade surplus, and the near tripling of foreign exchange reserves have helped the country's finances.

The government pledges to continue its efforts to diversify the economy by attracting foreign and domestic investment outside the energy sector. The Algerian Government has had little success at reducing high unemployment, officially estimated at 13% in 2006, though international estimates put the figure higher, and at improving living standards.

Priority areas are banking and judicial reform, improving the investment environment, partial or complete privatization of state enterprises, and reducing government bureaucracy. The government has privatized certain sectors of the economy and embraced joint venture investment opportunities with traditionally state owned and operated entities.

In 2001, Algeria concluded an Association Agreement with the European Union, which was ratified in 2005 by both Algeria and the EU and took effect in September of that same year. The government is working toward accession to the World Trade Organization.

DEFENSE

Algeria's armed forces, known collectively as the Popular National Army (ANP), total 138,000 active members, with some 100,000 reservists. The president serves as Minister of National Defense. Military forces are supplemented by a 60,000-member

national gendarmerie, a rural police force, under the control of the president and a 30,000-member Sureté Nationale or Metropolitan Police force under the Ministry of the Interior. Eighteen months of national military service is compulsory for men.

Algeria is a leading military power in the region and has demonstrated remarkable success in its struggle against terrorism. The Algerian military, having fought a decade-long insurgency, has increased expenditures in an effort to modernize and return to a more traditional defense role.

Due to historical difficulties in acquiring U.S. military equipment, Algeria's primary military supplier has traditionally been Russia, and to a lesser extent China; Algeria recently made large purchases of advanced weaponry from the former. Algeria has, however, in recent years, begun to diversify its supplies of military equipment to include U.S.-made airborne surveillance aircraft and ground radars.

FOREIGN RELATIONS

Algeria has traditionally practiced an activist foreign policy and in the 1960s and 1970s was noted for its support of Third World policies and independence movements. Algerian diplomacy was instrumental in obtaining the release of U.S. hostages from Iran in 1980. Since his first election in 1999, President Bouteflika worked to restore Algeria's international reputation, traveling extensively throughout the world. In July 2001, he became the first Algerian President to visit the White House in 16 years. He has made official visits to France, South Africa, Italy, Spain, Germany, China, Japan, Portugal, Russia, the United Kingdom, and Latin American countries, among others, since his inauguration.

Algeria has taken the lead in working on issues related to the African continent. Host of the Organization of African Unity (OAU) Conference in 2000, Algeria also was key in bringing Ethiopia and Eritrea to the peace table in 2000. In 2001, the 37th summit of the OAU formally adopted the New Partnership for Africa's Development (NEPAD) to address the challenges facing the continent. Algeria has taken a lead in reviving the Union of the Arab Maghreb with its neighbors.

Since 1976, Algeria has supported the Polisario Front, which claims to represent the population of Western Sahara. Contending that the Sahrawis have a right to self-determination under the UN Charter, Algeria has provided the Polisario with support and sanctuary in refugee camps in the southwestern Algerian province of Tindouf. UN involvement in the Western Sahara includes MINURSO, a peacekeeping force, UNHCR, which handles refugee assistance and resettlement, and the World Food Program (WFP). Active diplomatic efforts to resolve the dispute under the auspices of the United Nations Secretary General are ongoing.

Algeria's support of self-determination for the Polisario is in opposition to Morocco's claim of sovereignty. The dispute remains a major obstacle to bilateral and regional cooperation. Although the land border between Morocco and Algeria was closed in the wake of a terrorist attack in 1994, the two have worked at improving relations, and in July 2004, Morocco lifted visa requirements for Algerians. Algeria reciprocated with the lifting of visa requirements for Moroccans on April 2, 2005.

Algeria has friendly relations with its other neighbors in the Mahgreb, Tunisia and Libya, and with its sub-Saharan neighbors, Mali and Niger. It closely monitors developments in the Middle East and has been a strong proponent of the rights of the Palestinian people, as well as a supporter of Iraq's democratic transition. Algeria has diplomatic relations with more than 100 foreign countries, and over 90 countries maintain diplomatic representation in Algiers. Algeria held a nonpermanent, rotating seat on the UN Security Council from January 2004 to December 2005. Algeria hosted 13 Arab leaders at the Arab League Summit, March 22-23, 2005.

U.S.-ALGERIAN RELATIONS

In July 2001, President Bouteflika became the first Algerian President to visit the White House since 1985. This visit, followed by a second meeting in November 2001, a meeting in New York in September 2003, and President Bouteflika's participation at the June 2004 G8 Sea Island Summit, is indicative of the growing relationship between the United States and Algeria. Since the September 11, 2001 terrorist attacks in the United States, contacts in key areas of mutual concern, including law enforcement and counter-terrorism cooperation, have intensified. Algeria publicly condemned the terrorist attacks on the United States and has been strongly supportive of the international war against terrorism. The United States and Algeria consult closely on key international and regional issues. The pace and scope of senior-level visits has accelerated. In April 2006, then-Foreign Minister Bedjaoui met with Secretary of State Condoleezza Rice.

In 2006, U.S. direct investment in Algeria totaled $5.3 billion, mostly in the petroleum sector, which U.S. companies dominate. American companies also are active in the banking and finance, services, pharmaceuticals, medical facilities, telecommunications, aviation, seawater desalination, energy production, and information technology sectors. Algeria is the United States' 3rd-largest market in the Middle East/North African region. U.S. exports to Algeria totaled $1.2 billion in 2005, an increase of more than 50% since 2003. U.S. imports from Algeria grew from $4.7 billion in 2002 to $10.8 billion in 2005, primarily in oil and liquefied natural gas (LNG). In March 2004, President Bush designated Algeria a beneficiary country for duty-free treatment under the Generalized System of Preferences (GSP).

In July 2001, the United States and Algeria signed a Trade and Investment Framework Agreement, which established common principles on which the economic relationship is founded and forms a platform for negotiating a bilateral investment treaty (BIT) and a free-trade agreement (FTA). The two governments meet on an ongoing basis to discuss trade and investment policies and opportunities to enhance the economic relationship. Within the framework of the U.S.-North African Economic Partnership (USNAEP), the United States provided about $1.0 million in technical assistance to Algeria in 2003. This program supported and encouraged Algeria's economic reform program and included support for World Trade Organization accession negotiations, debt management, and improving the investment climate. In 2003, USNAEP programs were rolled over into Middle East Partnership Initiative (MEPI) activities, which provide funding for political and economic development programs in Algeria.

Cooperation between the Algerian and U.S. militaries continues to grow. Exchanges between both sides are frequent, and Algeria has hosted senior U.S. military officials. In May 2005, the United States and Algeria conducted their first formal joint military dialogue in Washington, DC; the second joint military dialogue took place in Algiers in November 2006.

The NATO Supreme Allied Commander Europe and Commander, U.S. European Command, General James L. Jones visited Algeria in June and August 2005, and then-Secretary of Defense Donald Rumsfeld visited Algeria in February 2006. The United States and Algeria have also conducted bilateral naval and Special Forces exercises, and Algeria has hosted U.S. Navy and Coast Guard ship visits. In addition, the United States has a modest International Military Education and Training (IMET) Program ($824,000 in FY 2006) for training Algerian military personnel in the United States, and Algeria participates in the Trans-Sahara Counter-Terrorism Partnership (TSCTP).

The United States has implemented modest university linkages programs and has placed two English Language Fellows, the first since 1993, with the Ministry of Education to assist in the development of English as a Second Language (ESL) courses at the Ben Aknoune Training Center. In 2006, Algeria was again the recipient of a grant under the Ambassadors' Fund for Cultural Preservation. That fund provided a grant of $106,110 to restore the El Pacha Mosque in Oran. Algeria also received an $80,000 grant to fund microscholarships to design and implement an American English-language program for Algerian high school students in four major cities.

Initial funding through the Middle East Partnership Initiative (MEPI) has been allocated to support the work of Algeria's developing civil society through programming that provides training to journalists, businesspersons, legislators, Internet regulators, and the heads of leading nongovernmental organizations. Additional funding through the State Department's Human Rights and Democracy Fund will assist civil society groups focusing on the issues of the disappeared, and Islam and democracy.

In August 2005, then-Chairman of the Senate Foreign Relations Committee, Senator Richard G. Lugar, led a Presidential Mission to Algeria and Morocco to oversee the release of the remaining 404 Moroccan POWs held by the Polisario Front in Algeria. Their release removed a longstanding bilateral obstacle between Algeria and Morocco.

The official U.S. presence in Algeria is expanding following over a decade of limited staffing, reflecting the general improvement in the security environment. During the past three years, the U.S. Embassy has moved toward more normal operations and now provides most embassy services to the American and Algerian communities.

TRAVEL

Consular Information Sheet

November 10, 2008

Country Description: Algeria is the second-largest country in Africa, with over four-fifths of its territory covered by the Sahara desert. The country has a population of 35 million people mainly located near the northern coast. Algeria is a multi-party, constitutional republic. Facilities for travelers are available in populated areas, but sometimes limited in quality and quantity.

Entry Requirements: Passports and visas are required for U.S. citizens traveling to Algeria. The Algerian visa application must be typed. The Algerian Embassy no longer accepts handwritten visa applications. For further information on entry/exit requirements, travelers may contact the Embassy of the People's Democratic Republic of Algeria

at 2137 Wyoming Avenue NW, Washington, DC 20008, telephone (202) 265-2800. Visit the Embassy of the People's Democratic Republic of Algeria web site at http://www.algeria-us.org for the most current visa information.

Safety and Security: Terrorism continues to pose a threat to the safety and security of American citizens traveling to Algeria. Terrorist activities, including bombings, false roadblocks, kidnappings, ambushes, and assassinations, occur regularly. Since early 2007, vehicle-borne suicide bomb attacks have emerged as a terrorist tactic in Algeria, including in the capital. Suicide car bomb attacks in December 2007 targeted the UN Headquarters and the Algerian Constitutional Council in Algiers. The attacks occurred in areas where many diplomatic missions and residences are located. The group that claimed credit for the December attacks has pledged more attacks against foreign targets, and specifically American targets.

The Department of State warns American citizens against travel to the Kabylie region of Algeria. Since June 2008, the Kabylie region has seen a series of bombing and other terrorist attacks of increasing size and frequency, including a suicide car bomb attack at a gendarmerie school in Issers on August 19 that killed at least 43 people. While many of the attacks have targeted Algerian security forces, other targets have included a bus transporting the employees of a foreign company, and many of the victims of the attacks have been civilians.

The Travel Warning for Algeria contains the most current information concerning the threat from terrorism.

Embassy staffing is currently at full capacity, but may not be able to provide full emergency consular services in certain areas of the country due to security restrictions. U.S. Government employees traveling between cities must be accompanied by a security escort. The Department of State recommends that U.S. citizens avoid overland travel in Algeria. U.S. citizens should also carefully consider the security risks involved when using public transportation such as buses and taxis.

For the latest security information, Americans traveling abroad should regularly monitor the Department of State, Bureau of Consular Affair's Internet site at http://travel.state.gov, where the current Travel Warnings and Travel Alerts, including the Worldwide Caution Travel Alert, can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S. and Canada, or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: The crime rate in Algeria is moderately high and increasing. Serious crimes have been reported in which armed men posing as police officers have entered homes and robbed the occupants at gunpoint. False roadblocks/checkpoints have been employed to rob motorists (see Traffic Safety and Road Conditions section below). Some of these incidents resulted in the murder of the vehicles' occupants; there has been an increase in the kidnapping of vehicle occupants who appear to be wealthy. Petty theft and home burglary occur frequently, and muggings are on the rise, especially after dark in the cities. Theft of contents and parts from parked cars, pick-pocketing, theft on trains and buses, theft of items left in hotel rooms and purse snatching are common. Alarms, grills, and/or guards help to protect most foreigners' residences.

In many countries around the world, counterfeit and pirated goods are widely available. Transactions involving such products may be illegal under local law. In addition, bringing them back to the United States may result in forfeitures and/or fines. More information on this serious problem is available at http://www.cybercrime.gov/18usc2320.htm.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, to contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

The local equivalent to the "911" emergency line in Algeria is: 17 for the police and 14 in case of fire. These numbers may only be dialed from landline phones. From a mobile phone, dial 021-71-14-14 in case of fire; 021-23-63-81 for an ambulance; 021-73-53-50 for the police. Reliability and response time of emergency services vary, but are not to U.S. standards. Emergency operators may or may not speak French, and normally do not speak English.

Medical Facilities and Health Information: Hospitals and clinics in Algeria are available and improving in the large urban centers, but are still not up to Western standards. Doctors and hospitals often expect immediate cash payment for services. Most medical practitioners speak French; English is not widely used.

Prescription medicines are not always readily available. Some pharmacies may at times be out-of-stock. In addition, the medicine may be sold under a different brand name and may contain a different dosage than in the U.S. Please be aware that some newer medications may not yet be available in Algeria. It is usually easy to obtain over-the-counter products.

Emergency services are satisfactory, but response time is often unpredictable. In all cases, response time is not as fast as in the U.S.

Cases of tuberculosis are regularly reported, but do not reach endemic levels. Every summer, public health authorities report limited occurrences of water-borne diseases, such

as typhoid. In addition, HIV/AIDS is a concern in the remote southern part of the country, especially in border towns.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's website at http://wwwn.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en.

Further health information for travelers is available at http://www.who.int/ith/en.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Algeria is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

Algerian roads are overcrowded and traffic-related accidents kill a large number of people every year. Drivers will encounter police and military checkpoints on major roads within and on the periphery of Algiers and other major cities. Security personnel at these checkpoints expect full cooperation. Motorists should be aware that terrorists employ false roadblocks as a tactic for ambushes and kidnappings, primarily in the central regions of Boumerdes and Tizi Ouzou and some parts of eastern Algeria.

Travel overland, particularly in the southern regions, may require a permit issued by the Algerian government. For specific information concerning Algerian driver's permits, vehicle inspection, road tax, and mandatory insurance, contact the Algerian Embassy.

Aviation Safety Oversight: As there is no direct commercial air service between the United States and Algeria, the U.S. Federal Aviation Administration (FAA) has not assessed Algeria's Civil Aviation Authority for compliance with International Civil Aviation Organization (ICAO) aviation safety standards. For more information, travelers may visit the FAA's Internet web site at http://www.faa.gov.

Special Circumstances: Algeria maintains restrictions on the import and export of local currency. Foreign currency must be exchanged only at banks or authorized currency exchange locations, such as major hotels. Photography of military and government installations is prohibited. It is also illegal to import weapons, body armor, handcuffs or binoculars.

Proselytizing: Islam is the state religion of Algeria. The Algerian government allows non-Muslim religious worship only in structures exclusively intended and approved for that purpose. Activities such as proselytizing, engaging in activities which the Algerian authorities could view as encouraging conversion to another faith, and convening religious ceremonies in private residences are prohibited under a March 2006 law.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating Algerian laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Algeria are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in Algeria are encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration web site, and to obtain updated information on travel and security within Algeria. Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency. The U.S. Embassy is located at 5 Chemin Cheikh Bachir El-Ibrahimi, B.P. 408 (Alger-gare) 16000, in the capital city of Algiers. The telephone numbers is [213] 21 98 20 00 which can also be reached after hours. The fax number is 213 21 60 73 35. The U.S. Embassy work week is Saturday through Wednesday.

Intercountry Adoption

May 2008

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is based on public sources and our current understanding. Questions involving foreign and U.S. immigration laws and legal interpretation should be addressed respectively to qualified foreign or U.S. legal counsel.

The Hague Convention on Intercountry Adoption: Algeria is not a party to The Hague Convention on Protection of Children and Co-operation in Respect of Intercountry Adoption (the Convention). Therefore the entering into force of the Convention for the United States on April 1, 2008, did not change intercountry adoption processing for Algeria.

Algerian family law is based on an interpretation of Islamic Sharia law. Algerian law No 84/11, article 46 forbids "adoption." However, like most Muslim countries, Algeria deals with Sharia law's ban on adoption by replacing it with kafala. Under Algerian law (Family Code Chapter VII, article 116-125), Muslim couples may take into their family an abandoned child and give him their name. Algerian law defines kafala or recueil légal as a court authorization for couples to voluntarily commit to take a child into their family on the same basis as a father would do for his own biological child.

Algeria is the only Muslim country to authorize name changes for children taken in through the kafala process (Decree 92-24 of January 13, 1992). If the child has a known parent, the guardian can only be a blood relative. When the child is from unknown parents, it is not necessary for the legal guardian (kafil) to be a blood relative. When the child is an orphan, a completed kafala process gives full and irrevocable custody to the adoptive parents and is the legal equivalent of a full and final adoption in the United States. Thus, orphans—i.e. children with no parents—acquired via the kafala process in Algeria are in fact "adopted" in the legal sense of the word.

The prospective adoptive parent should start the application for kafala (recueil légal) at the Algerian Embassy in Washington, D.C.

A foreign country's determination that the child is an orphan does not guarantee that the child will be considered an orphan under the U.S. Immigration and Nationality Act. For more specific information on adoption in Algeria, please contact an attorney familiar with Algerian laws or the Embassy of Algeria in Washington, D.C. www.algeria-us.org.

Patterns of Immigration: Please review current reports online at http://adoption.state.gov.

Adoption Authority: Ministry of the Social Action and National Solidarity
Route Nationale N1 les vergers BP N31 Bir khadem–Alger—Algérie
Phone: +213 021 44 99 46;
+213 021 44 99 47
Fax: +213 021 44 97 26
Phone-Fax: +213 021 44 99 59

Eligibility to Adopt:

- The father must be of Muslim faith
- The father must be no more than 60 years old. The mother can be no more than 55 years old
- Prospective adoptive parents must be able to prove they have sufficient revenue to support the child

Time Frame: The time frame varies significantly.

Adoption Agencies and Attorneys: There are no adoption agencies operating in Algeria.

Adoption Fees: The U.S. Embassy cannot predict the approximate fee for the process of acquiring custody (kafala). The orphanages (pouponnieres) do not require any payment

Adoption Procedures: A completed adoption file containing the documents listed below may be mailed or hand-delivered to the Algerian Embassy in Washington D.C.

Required Documents:

- A handwritten request signed by the prospective adoptive parent
- A copy of a consular registration card
- Marriage certificate
- Birth certificates of both prospective adoptive parents
- Employment status and proof that you will be able to support the child financially
- Proof of revenue
- Proof you own/rent a house/apartment
- Police certificates for both prospective adoptive parents
- Medical certificates for both prospective adoptive parents

Once these documents are submitted, the Algerian Embassy conducts an investigation. The Embassy will send the file to Ministry of Foreign Affairs in Algeria which will forward it to the Ministry of Social Action and National Solidarity from which it will be finally transferred to the Orphanage (pouponiere).

Embassy of the People's Democratic Republic of Algeria
2118 Kalorama Rd, NW
Washington, D.C. 20008
Tel: (202) 265-2800
Fax: (202) 667-2174
Email: ambassadoroffice@yahoo.com

U.S. Immigration Requirements: Prospective adopting parents are strongly encouraged to consult USCIS publication M-249, *The Immigration of Adopted and Prospective Adoptive Children*, as well as the Department of State publication, *Intercountry Adoptions*. Please see the *Intercountry Adoption* section of this book for more details and review current reports online at http://adoption.state.gov.

U.S. Embassy: The U.S. Embassy is located at 5 Chemin Cheikh Bachir El-Ibrahimi, 16000, in the capital city of Algiers. The telephone numbers is [213] 70 08 20 00 which can also be reached after hours. The fax number is 213 21 60 73 35. The U.S. Embassy workweek is Saturday through Wednesday.

Additional Information: For information on intercountry adoption and

international parental child abduction, and security information for U.S. citizens traveling abroad, call Toll Free 1-888-407-4747. This number is available from 8:00 a.m. to 8:00 p.m. EST/EDT, Monday through Friday (except U.S. federal holidays). Callers who are unable to use toll-free numbers, such as those calling from overseas, may obtain information and assistance during these hours by calling 1-202-501-4444.

Travel Warning

August 22, 2008

This Travel Warning updates information on the current security situation in Algeria and warns American citizens against travel to the Kabylie region of the country. The threat from terrorism continues to pose a significant security risk. This supersedes the Travel Warning issued on March 26, 2008.

The Department of State urges U.S. citizens who travel to Algeria to evaluate carefully the risks posed to their personal safety. Terrorist attacks including bombings, false roadblocks, kidnappings, ambushes, and assassinations occur regularly. Since early 2007, the use of suicide bomb attacks, particularly vehicle-borne attacks, has emerged as a terrorist tactic in Algeria, including in the capital. The group that claimed credit for the December 11, 2007, suicide car-bomb attacks in Algiers has pledged more attacks against foreign targets, and specifically against American targets.

The Department of State warns American citizens against travel to the Kabylie region of Algeria. Since June 2008, the Kabylie region has seen a series of bombing and other terrorist attacks of increasing size and frequency, including a suicide car-bomb attack at a gendarmerie school in Issers on August 19 that killed at least 44 people. While many of the attacks have targeted Algerian security forces, other targets have included a bus transporting the employees of a foreign company, and many of the victims of the attacks have been civilians.

The Department of State recommends that U.S. citizens avoid overland travel in Algeria. Americans who reside or travel in Algeria should take prudent security measures while in the country, including making provisions for reliable and experienced logistical support. Visitors to Algeria are advised to stay only in hotels where adequate security is provided. All visitors to Algeria should remain alert and adhere to prudent security practices such as avoiding predictable travel patterns and maintaining a low profile.

The U.S. Government considers the potential threat to U.S. Embassy personnel assigned to Algiers sufficiently serious to require them to live and work under significant security restrictions. These practices limit, and may occasionally prevent, the movement of U.S. Embassy officials and the provision of consular services in certain areas of the country. The Government of Algeria requires U.S. Embassy personnel to seek permission to travel to the Casbah within Algiers or outside the province of Algiers and to have a security escort. Travel to the military zone established around the Hassi Messaoud oil center requires Government of Algeria authorization. Daily movement of Embassy personnel in Algiers is limited, and prudent security practices are required at all times. Travel by personnel within the city requires prior coordination with the Embassy's Regional Security Office. American visitors are encouraged to contact the Embassy's Consular Section for the most recent safety and security information concerning travel in the city of Algiers.

Americans living or traveling in Algeria are encouraged to register with the U.S. Embassy in Algiers through the State Department's travel registration website, https://travelregistration.state.gov, and to obtain updated information on travel and security within Algeria. Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate. By registering, American citizens make it easier for the Embassy to contact them in case of emergency. The U.S. Embassy is located at 5 Chemin Cheikh Bachir El-Ibrahimi in the El Biar district of Algiers. The telephone number is [213] 770 08 20 00, which can also be reached after hours. The fax number is [213] 21 98 22 99.

Updated information on travel and security in Algeria may be obtained from the Department of State by calling 1-888-407-4747 toll-free in the United States and Canada, or for callers outside the United States and Canada, a regular toll line at 1-202-501-4444. For further information, please consult the Country Specific Information for Algeria and the Worldwide Caution, which are available on the Bureau of Consular Affairs Internet website at http://travel.state.gov.

ANDORRA

Compiled from the May 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Principality of Andorra

PROFILE

Geography

Area: 468 sq. km. (180 sq. mi.); about half the size of New York City.
Cities: Capital-Andorra la Vella.
Terrain: Mountainous.
Climate: Temperate, cool, dry.

People

Nationality: Noun and adjective-Andorran(s).
Population: (2007) 83,137.
Annual growth rate: 2.4%.
Ethnic groups: Catalan, Spanish, French, Portuguese.
Religions: Roman Catholic.
Languages: Catalan (official), Spanish, French.
Education: Years compulsory—to age 16. Attendance—100%. Literacy—100%.
Health: Infant mortality rate (2006)—3/1,000. Life expectancy(2002)—76 yrs. male, 81 yrs. female.

Government

Type: Parliamentary democracy that retains as its heads of state two co-princes.
Constitution: Ratified in March 1993.
Independence: 1278.
Government branches: Heads of State—Two co-princes (President of France, Bishop of Seu d'Urgell in Spain). Executive—Head of Government (Cap de Govern) and eleven ministers (Executive Council). Legislative—Parliament (General Council), founded 1419, consisting of 28 members. Judicial—Civil cases heard in first instance by four judges (batlles) and in appeals by the one-judge Court of Appeals. The highest body is the five-member Superior Council of Justice. Criminal cases are heard by the Tribunal of Courts in Andorra la Vella.
Political subdivisions: Seven parishes (parroquies)—Andorra la Vella, Canillo, Encamp, La Massana, Ordino, Sant Julia de Lòria, and Escaldes make up the districts represented in the General Council.
Political parties: Andorran Liberal Party (PLA), CDA (Democratic Center of Andorra), and the Social Democratic Party (PS).
Suffrage: Universal at 18.

Economy

GDP: (2007) $3.66 billion.
Natural resources: Hydroelectric power, mineral water, timber, iron ore, lead.
Agriculture: Products—tobacco, sheep.
Industry: Types—tourism, (mainstay of the economy), tobacco products, furniture.
Trade: Major activities are commerce and banking; no official figures are available. Duty-free status.
Currency: Euro.

PEOPLE

Andorrans live in seven valleys that form Andorra's political districts. Andorrans are a minority in their own country; they make up only approximately 36% of the population or about 28,000 native Andorrans. Spanish, French, and Portuguese residents make up the other 64% of the population.

The national language is Catalan, a romance language related to the Provençal groups. French and Spanish are also spoken.

Education law requires school attendance for children up to age 16. A system of French, Spanish, and Andorran public schools provides education up to the secondary level. Schools are built and maintained by Andorran authorities, who pay also for Andorran teachers. French and Spanish schools pay for their own teachers. About 35% of Andorran children attend the French primary schools, 35% attend Spanish, and 29% attend Andorran schools. Andorran schools follow the Spanish curriculum, and their diplomas are

recognized by the Spanish education system. In July 1997, the University of Andorra was established. The number of students makes it impossible for the University of Andorra to develop a full academic program, and it serves principally as a center for virtual studies, connected to Spanish and French universities. The only two graduate schools in Andorra are the Nursing School and the School of Computer Science.

HISTORY

Andorra is the last independent survivor of the March states, a number of buffer states created by Charlemagne to keep the Muslim Moors from advancing into Christian France. Tradition holds that Charlemagne granted a charter to the Andorran people in return for their fighting the Moors. In the 800s, Charlemagne's grandson, Charles the Bald, made Count of Urgell overlord of Andorra. A descendant of the count later gave the lands to the diocese of Urgell, headed by Bishop of Seu d'Urgell.

In the 11th century, fearing military action by neighboring lords, the bishop placed himself under the protection of the Lord of Caboet, a Spanish nobleman. Later, the Count of Foix, a French noble, became heir to Lord Caboet through marriage, and a dispute arose between the French Count and the Spanish bishop over Andorra.

In 1278, the conflict was resolved by the signing of a pareage, which provided that Andorra's sovereignty be shared between the Count of Foix and the Bishop of Seu d'Urgell of Spain. The pareage, a feudal institution recognizing the principle of equality of rights shared by two rulers, gave the small state its territory and political form.

Over the years, the title was passed between French and Spanish rule until, in the reign of the French King Henry IV, an edict in 1607 established the head of the French state and the Bishop of Urgell as co-princes of Andorra.

Given its relative isolation, Andorra has existed outside the mainstream of European history, with few ties to countries other than France and Spain. In recent times, however, its thriving tourist industry along with developments in transportation and communications have removed the country from its isolation.

GOVERNMENT

Until recently, Andorra's political system had no clear division of powers into executive, legislative, and judicial branches. A constitution was ratified and approved in 1993. The constitution establishes Andorra as a sovereign parliamentary democracy that retains as its heads of state two co-princes.

The fundamental impetus for this political transformation was a recommendation by the Council of Europe in 1990 that, if Andorra wished to attain full integration into the European Union (EU), it should adopt a modern constitution, which guarantees the rights of those living and working there. A Tripartite Commission—made up of representatives of the co-princes, the General Council, and the Executive Council—was formed in 1990 and finalized the draft constitution in April 1991.

Under the 1993 constitution, the co-princes continue as heads of state, but the head of government retains executive power. The two co-princes serve co-equally with limited powers that do not include veto over govern-

ment acts. They are represented in Andorra by a delegate. As co-princes of Andorra, the President of France and the Bishop of Seu d'Urgell maintain supreme authority in approval of all international treaties with France and Spain, as well as all those, which deal with internal security, defense, Andorran territory, diplomatic representation, and judicial or penal cooperation. Although the institution of the co-princes is viewed by some as an anachronism, the majority sees them as both a link with Andorra's traditions and a way to balance the power of Andorra's two much larger neighbors.

Andorra's main legislative body is the 28-member General Council (Parliament). The sindic (president), the subsindic, and the members of the Council are elected in the general elections held every four years. The Council meets throughout the year on certain dates set by tradition or as required. The most recent general elections took place on April 24, 2005. The forthcoming Andorran elections will be held in March/April 2009.

At least one representative from each parish must be present for the General Council to meet. Historically, within the General Council, four deputies from each of the seven individual parishes provided representation. This system allowed the smaller parishes, which have as few as 562 voters, the same number of representatives as larger parishes, which have up to 4,014 voters. To correct this imbalance, a provision in the 1993 constitution introduced a modification of the structure and format for electing the members of the Council; under this format, half of the representatives are chosen by the traditional system, while the other half are selected from nationwide lists. A sindic and a subsindic are chosen by the General Council to implement its decisions. They serve four-year terms and may be reappointed once. They receive an annual salary. Sindics have virtually no discretionary powers, and all policy decisions must be approved by the Council as a whole.

Every four years, after the general elections, the General Council elects the head of government, who, in turn, chooses the other members of the Executive Council. The current council has eleven ministers.

The judicial system is independent. Courts apply the customary laws of Andorra, supplemented with Roman law and customary Catalan law. Civil cases are first heard by the batlles court -a group of four judges, two chosen by each co-prince. Appeals are heard in the Court of Appeals. The highest body is the five-member Superior Council of Justice. Andorra has no defense forces and only a small internal police force. All able-bodied men who own firearms must serve, without remuneration, in the small army, which is unique in that all of its men are treated as officers. The army has not fought for more than 700 years, and its main responsibility is to present the Andorran flag at official ceremonies.

POLITICAL CONDITIONS

Andorra held national elections on April 24, 2005. The ruling Andorran Liberal Party (PLA) won the elections but lost the absolute majority it had attained in the 2001 elections. After 10 years in power, Cap de Govern and PLA leader Marc Forné stepped down as Cap de Govern. His replacement is Former Foreign Minister Albert Pintat, who comes from the same party. The center-right PLA went from 15 to 14 seats in the 28-seat Parliament, while the center-left Social Democratic Party (PS) doubled its representation from 6 to 12 seats. The remaining 2 seats are held by CDA-Segle-21, a union of two center-right parties which are likely to join in a coalition with PLA. Since the ratification of the constitution in 1993, four coalition governments have been formed. The Pintat government's principal goals are to address housing scarcity, modernize the country's taxation system, and press forward with reforms required to remove Andorra from the Organization for Economic Cooperation and Development's (OECD) list of tax haven countries. There has been a redefinition of the qualifications for Andorran citizenship, a major issue in a country where only about 36% are legal citizens. In 1995, a law to broaden citizenship was passed but citizenship remains hard to acquire, with only Andorran nationals being able to transmit citizenship automatically to their children. Lawful residents in Andorra may obtain citizenship after 25 years of residence. Children of residents may opt for Andorran citizenship after 18 if they have resided virtually all of their lives in Andorra. Mere birth on Andorran soil does not confer citizenship. Dual nationality is not permitted. Non-citizens are allowed to own only a 33% share of a company. Only after they have resided in the country for 20 years, will they be entitled to own 100% of a company. A proposed law to reduce the necessary years from 20 to 10 is pending approval in Parliament.

By creating a modern legal framework for the country, the 1993 constitution has allowed Andorra to begin a shift from an economy based largely on tax-free shopping to one based on tourism and international banking and finance. Despite promising new changes, it is likely that Andorra will, at least for the short term, continue to confront a number of difficult issues arising from the large influx of foreign residents and the need to develop modern social and political institutions. In addition to questions of Andorran nationality and immigration policy, other priority issues will include dealing with housing scarcities and speculation in real estate, developing the tourist industry, defining its relationship with the European Union, and reforming the investment law to allow up to 100% foreign ownership in activities and sectors considered strategic.

Principal Government Officials

Last Updated: 11/12/08

Head of Govt.: **Albert PINTAT**
Head of State (Co-Prince): **Joan Enric VIVES i SICILIA, Bishop**

Head of State (Co-Prince): **Nicolas SARKOZY**
Min. of Economic Development, Tourism, Culture, & Higher Education & Spokesman: **Juli MINOVES**
Min. of Economy & Agriculture: **Joel FONT**
Min. of Education, Professional Training, Youth, & Sports: **Roser BASTIDA**
Min. of Finance & of the Presidency: **Ferran MIRAPEIX**
Min. of Foreign Affairs: **Meritxell MATEU**
Min. of Health, Welfare, Family, & Housing: **Montserrat GIL**
Min. of Justice & Interior: **Antoni RIBERAYGUA**
Min. of Territorial & Town Planning & Environment: **Xavier JORDANA**
Ambassador to the US: **Carles FONT**
Permanent Representative to the UN, New York: **Carles FONT**

ECONOMY

Andorra's national income in 2007 was approximately $3.66 billion, with tourism as its principal component. Attractive for shoppers from France and Spain because of low taxes, the country also has developed active summer and winter tourist resorts. With some 270 hotels and 400 restaurants, as well as many shops, the tourist trade employs a growing portion of the domestic labor force.

There is a fairly active trade in consumer goods, including imported manufactured items, which, because they are taxed at lower rates, are less expensive in Andorra than in neighboring countries. Andorra's tax-free status has also had a significant effect on its relationship with the European Union. Its negotiations with the Union began in 1987. An agreement that went into effect in July 1991 sets duty-free quotas and places limits on certain items—mainly milk products, tobacco, and alcoholic beverages. Andorra is permitted to maintain price differences from other EU countries, and visitors enjoy limited duty-free allowances.

In June 2004 Andorra signed a series of accords with the EU in the fields of economic, social, and cultural cooperation. Tax legislation was also approved that taxes interest from monetary products and fixed-interest investments belonging to non-residents while maintaining bank secrecy. The results of Andorra's elections thus far indicate that many support the government's reform initiatives and believe Andorra must, to some degree, integrate into the European Union in order to continue to enjoy its prosperity. Although less than 2% of the land is arable, agriculture was the mainstay of the Andorran economy until the upsurge in tourism. Sheep rising has been the principal agricultural activity, but tobacco growing is lucrative. Most of Andorra's food is imported.

In addition to handicrafts, manufacturing includes cigars, cigarettes, and furniture for domestic and export markets. A hydroelectric plant at Les Escaldes, with a capacity of 26.5 megawatts, provides 40% of Andorra's electricity; Spain provides the rest.

FOREIGN RELATIONS

Since the establishment of sovereignty with the ratification of the constitution in 1993, Andorra has moved to become an active member of the international community. In July 1993, Andorra established its first diplomatic mission in the world, to the United Nations. In early 1995, the United States and Andorra established formal diplomatic relations. Andorra has also expanded relations with other nations.

Andorra is a full member of the United Nations (UN), United Nations Educational, Scientific and Cultural Organization (UNESCO), United Nations Conference for Commerce and Development (UNCCD), International Center of Studies for Preservation and Restoration of Cultural Heritage (ICCROM), Telecommunications International Union (UIT), International Red Cross, Universal Copyright Convention, European Council, EUTELSAT, World Tourism Organization, Organization for Security and Cooperation in Europe (OSCE), Customs Cooperation Council (CCC), Interpol, and International Monetary Fund among others. Since 1991, Andorra has had a special agreement with the European Union. In 2008, Andorra announced its endorsement of the Proliferation Security Initiative, designed to combat illegal trafficking in weapons of mass destruction.

U.S.-ANDORRAN RELATIONS

As noted, the United States established diplomatic relations with Andorra in February 21, 1995. The two countries are on excellent terms. The U.S. Ambassador to Spain is also accredited as Ambassador to Andorra. United States Consulate General officials based in Barcelona are responsible for the day-to-day conduct of relations with Andorra. The Andorran Permanent Representative to the United Nations was accredited as Andorra's Ambassador to the United States in early 2008.

TRAVEL

Consular Information Sheet—Spain and Andorra

July 15, 2008

Country Description: Spain and Andorra are both highly developed and stable democracies with modern economies. Spain is a member of NATO and the European Union.

Entry Requirements: A passport is required for both countries. U.S. citizens can stay without a visa for a tourist/business stay of up to 90 days. That period begins when you enter any of the Schengen countries: Austria, Belgium, Denmark, Finland, France, Germany, Greece, Iceland, Italy, Luxembourg, the Netherlands, Norway, Portugal, Spain, and Sweden. Individuals who enter Spain or Andorra without a visa are not authorized to work. American citizens planning to study in Spain should be aware that Spanish immigration regulations require applications for student visas to be submitted 60 days before anticipated travel to Spain.

Note: Although European Union regulations require that non-EU visitors obtain a stamp in their passport upon initial entry to a Schengen country, many borders are not staffed with officers carrying out this function. If an American citizen wishes to ensure that his or her entry is properly documented, it may be necessary to request a stamp at an official point of entry.

Under local law, travelers without a stamp in their passport may be questioned and asked to document the length of their stay in Schengen countries at the time of departure or at any other point during their visit, and could face possible fines or other repercussions if unable to do so. In an effort to prevent international child abduction, many governments have initiated procedures at entry/exit points. These often include requiring documentary evidence of relationship and permission for the child's travel from the parent(s) or legal guardian not present. Having such documentation on hand, even if not required, may facilitate entry/departure.

For further information concerning entry requirements for Spain, travelers should contact the Embassy of Spain at 2375 Pennsylvania Avenue NW, Washington, DC 20037, telephone (202) 452-0100, or the nearest Spanish Consulate in Boston, Chicago, Houston, Los Angeles, Miami, New Orleans, New York, San Francisco, or San Juan. Spanish government web sites with information about entry requirements (in Spanish) can be found at http://www.mae.es and http://www.mir.es. Additional information may be obtained from the Tourist Office of Spain in New York, telephone (212) 265-8822, or via the Internet at www.spain.info.

For further information on entry requirements to Andorra, travelers should contact the Andorran Mission to the UN, 2 U.N. Plaza, 25th floor, New York, NY 10018, telephone (212) 750-8064 or via the Internet at http://www.andorra.ad. Visit the Embassy of Spain and Andorra web sites for the most current visa information.

Safety and Security: Spain and Andorra share with the rest of the world an increased threat of international terrorist incidents. Like other countries in the Schengen area, Spain's open borders with its Western European neighbors allow the possibility of terrorist groups entering and exiting the country with anonymity. Spain's proximity to North Africa makes it vulnerable to attack from Al Qaeda of the Maghreb terrorists. Americans are reminded to remain vigilant with regard to their personal security and to exercise caution.

In the deadliest terrorist attack in recent European history, on March 11, 2004, Islamic extremists bombed four commuter trains entering Madrid, causing 191 deaths and over 1,400 injuries. Spanish authorities tried the suspected terrorists and their co-conspirators in February 2007 and convicted 21 in October 2007.

The Basque Fatherland and Liberty (ETA) terrorist organization remains active in Spain. ETA has historically avoided targeting foreigners, directing their attacks against the police, military, local politicians, and Spanish government targets as well as attempts to disrupt transportation and daily life. However, foreigners have been killed or injured collaterally in ETA attacks, as was the case with the Barajas Airport bombing in December 2006, in which two Ecuadorian nationals were killed. In addition, bombs have been used as part of criminal extortion of businesses, particularly in the Basque region. The risk of "being in the wrong place at the wrong time" in event of an ETA action is a concern for foreign visitors and tourists. U.S. tourists traveling to Spain should remain vigilant, exercise caution, monitor local developments, and avoid demonstrations and other potentially violent situations.

For the latest security information, Americans traveling abroad should regularly monitor the Department's web site, where the current Worldwide Caution Travel Alert, Travel Warnings and other Travel Alerts can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S. and Canada, or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: While most of Spain has a moderate rate of crime and most of the estimated one million American tourists have trouble free visits to Spain each year, street crimes against tourists occur in the principal tourist areas. Madrid and Barcelona, in particular, report incidents of pickpocketing, mugging and occasional violent attacks, some of which require the victim to seek medical attention.

Although crimes occur at all times of day and night and to people of all ages, older tourists and Asian Americans seem to be particularly at risk. Criminals frequent tourist areas and major attractions such as museums, monuments, restaurants, outdoor cafes, Internet cafes, hotel lobbies, beach resorts, city buses, subways, trains, train stations, airports, and ATMs.

In Madrid, incidents have been reported in all major tourist areas, including the area near the Prado Museum, near Atocha train station, in Retiro Park, in areas of old Madrid including near the Royal Palace and in Plaza Mayor. There has been an increase in the number of passport and bag thefts reported at Madrid's Barajas Airport, local hotels, as well as in El Rastro (Madrid's flea market) and in the Metro.

In Barcelona, the largest number of incidents reported also occurred in major tourist areas, on Las Ramblas, Barcelona's El Prat airport, Sants train station, Metro stations, in the Sagrada Familia Area, in the Gothic Quarter, in Parc Güell, in Plaza Real, and along Barcelona's beaches. There has been a rise in the number of thefts reported at the Port Olimpic Area and nearby beaches.

Travelers should remain alert to their personal security and exercise caution. Travelers are encouraged to carry limited cash, only one credit card, and a copy of their passport; leaving extra cash, extra credit cards, passports and personal documents in a safe location. When carrying documents, credit cards or cash, you are encouraged to secure them in a hard-to-reach place and not to carry all valuables together in a purse or backpack.

Thieves often work in teams of two or more people. In many cases, one person distracts a victim while the accomplices perform the robbery. For example, someone might wave a map in your face and ask for directions, "inadvertently" spill something on you, or help you clean-up bird droppings thrown on by a third unseen accomplice. While your attention is diverted, an accomplice makes off with the valuables. Thieves may drop coins or keys at your feet to distract you and try to take your belongings while you are trying to help. Attacks are sometimes initiated from behind, with the victim being grabbed around the neck and choked by one assailant while others rifle through or grab the belongings. A group of assailants may surround the victim in a crowded popular tourist area or on public transportation, and only after the group has departed does the person discover he/she has been robbed. Purse-snatchers may grab purses or wallets and run away, or immediately pass the stolen item to an accomplice. A passenger on a passing motorcycle sometimes robs pedestrians. There have been increasing reports of thieves posing as plainclothes police officers, beckoning to pedestrians from cars and sometimes confronting them on the street and asking for documents or to inspect their cash for counterfeit bills, which they ultimately "confiscate" as evidence. The U.S. Embassy in Madrid has received several reports of cars on limited access motorways being pulled over by supposed unmarked police cars. The Spanish police do not operate in this fashion. American citizens are encouraged to ask for a uniformed law enforcement officer if approached.

Theft from vehicles is also common. "Good Samaritan" scams are unfortunately common, where a passing car or helpful stranger will attempt to divert the driver's attention by indicating there is a flat tire or mechanical problem. When the driver stops to check the vehicle, the "Good Samaritan" will appear to help the driver and passengers while the accomplice steals from the unlocked car. Drivers should be cautious about accepting help from anyone other than a uniformed Spanish police officer or Civil Guard. Items high in value like luggage, cameras, laptop computers, or briefcases are often stolen from cars. Travelers are advised not to leave valuables in parked cars, and to keep doors locked, windows rolled up, and valuables out of sight when driving.

While the incidence of sexual assault is statistically very low, attacks do occur. Spanish authorities have warned of availability of so-called "date-rape" drugs and other drugs, including "GBH" and liquid ecstasy. Americans should not lower their personal security awareness because they are on vacation.

A number of American citizens have been victims of lottery or advance fee scams in which a person is lured to Spain to finalize a financial transaction. Often the victims are initially contacted via internet or fax and informed they have won the Spanish Lottery (El Gordo), inherited money from a distant relative, or are needed to assist in a major financial transaction from one country to another. For more information, please see the Bureau of Consular Affairs web site on International Financial Scams.

Andorra has a low rate of crime.

In many countries around the world, counterfeit and pirated goods are widely available. Transactions involving such products may be illegal under local law. In addition, bringing them back to the United States may result in forfeitures and/or fines. More information on this serious problem is available at http://www.cybercrime.gov/18usc2320.htm.

The Embassy's U.S. Commercial Service has seen an upswing in a type of scam targeting U.S. businesses, utilizing the name of a legitimate Spanish concern and legitimate-appearing Spanish bank references. The scam usually involves a temptingly large order or business proposal. The U.S. Commercial Service in Spain at http://www.buyusa.gov/spain/en/ stands ready to counsel any U.S. firm which would like to verify the legitimacy of an unsolicited business proposal purporting to come from a Spanish firm.

Information for Victims of Crime:
The loss or theft abroad of a U.S. passport should be reported immediately to the local police and to the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to

local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, to contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, Consular Officers can help you to understand the local criminal justice process and to find an attorney if needed. Consular staff are prepared to assist victims of crime in anyway they can.

Medical Facilities and Health Information: Good medical care is available in both Spain and Andorra. Regulations regarding medications may vary from those in the U.S.; Americans with need for specific medications are encouraged to bring a supply sufficient for their anticipated period of stay as the medication may not be available and customs regulations may prohibit certain medications to be mailed from the United States to Spain or Andorra. The Department of State strongly urges Americans to consult with their medical insurance companies prior to traveling abroad to confirm whether their policy applies overseas and if it will cover emergency expenses such as a medical evacuation. U.S. medical insurance plans may not cover health costs incurred outside the United States unless supplemental coverage is purchased. Further, U.S. Medicare and Medicaid programs do not provide payment for medical services outside the United States. You should contact your insurance provider before departure so appropriate arrangements can be made. Many travel agents and private companies offer insurance plans that will cover health care expenses incurred overseas, including emergency services such as medical evacuations.

When making a decision regarding health insurance, Americans should consider that many foreign doctors and hospitals require payment in cash prior to providing service and that a medical evacuation to the United States may cost well in excess of $50,000. Uninsured travelers who require medical care overseas often face extreme difficulties, whereas travelers who have purchased overseas medical insurance have found it to be life saving when a medical emergency has occurred. When consulting with your insurer prior to your trip, please ascertain whether payment will be made to the overseas healthcare provider or if you will be reimbursed later for expenses that you incur. Some insurance policies also include coverage for psychiatric treatment and for disposition of remains in the event of death.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's web site at http://wwwn. cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith/en.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Spain and Andorra is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

Traffic in Madrid and Barcelona is faster-paced than in U.S. cities and can be unnerving due to unfamiliar signs or motorbikes weaving between traffic lanes. Drivers should always obey the closest traffic light, as there are separate pedestrian lights in the city. Drivers should be alert when driving at night in urban areas, due to the possibility of encountering drivers or pedestrians under the influence of alcohol. Night driving in isolated rural areas can be dangerous, because of farm animals and poorly marked roads. Rural traffic is generally heavier in July and August as well as during the Christmas and Easter seasons. Traffic regulations in effect in Spain include the prohibition on the use of a mobile phone without a hands-free device while driving a car. There is a fine of 300 euros for violation of this regulation and loss of driving privileges. In addition, all drivers and passengers are required to carry a reflective vest and put it on if they need to stop on the roadside. A reflective triangle warning sign for a vehicle stopped on the side of the road is also mandatory. Those renting vehicles are encouraged to check with the rental company about traffic regulations and safety equipment. U.S. citizens using U.S. issued drivers licenses must obtain International Driving Permits prior to their arrival if they plan to drive in Spain. Pedestrians should use designated crossing areas when crossing streets and obey traffic lights.

Public transportation in large cities is generally excellent. All major cities have metered taxis, and extra charges must be posted in the vehicle. Travelers are advised to use only clearly identified cabs and to ensure that taxi drivers always switch on the meter. A green light on the roof indicates that the taxi is available. Rail service is comfortable and reliable, but varies in quality and speed. Intercity buses are usually comfortable and inexpensive. For specific information concerning Spanish driving permits, vehicle inspection, road tax and mandatory insurance, please contact the Spanish National Tourist Organization offices in New York via the Internet at http://www.okspain.org. For information about driving in Andorra refer to the Andorran website at http://www.andorra.ad.

Aviation Safety Oversight: The U.S. Federal Aviation Administration (FAA) has assessed the Government of Spain's Civil Aviation Authority as

being in compliance with International Civil Aviation Organization (ICAO) aviation safety standards for oversight of Spain's air carrier operations. As there is no direct commercial air service between the United States and Andorra, the U.S. Federal Aviation Administration (FAA) has not assessed Andorra's Civil Aviation Authority for compliance with ICAO aviation safety standards. For more information, travelers may visit the FAA's web site at http://www.faa.gov.

Special Circumstances: It is advisable to contact the Embassy of Spain in Washington, DC or one of Spain's consulates in the United States for specific information regarding customs requirements. Spain's customs authorities encourage the use of an ATA (Admission Temporaire/Temporary Admission) Carnet for the temporary admission of professional equipment, commercial samples, and/or goods for exhibitions and fair purposes. ATA Carnet Headquarters, located at the U.S. Council for International Business, 1212 Avenue of the Americas, New York, NY 10036, issues and guarantees the ATA Carnet in the United States. For additional information, please call (212) 354-4480, or send an e-mail to atacarnet@uscib.org, or visit http://www.uscib.org for details.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offences. Persons violating Spain or Andorra's laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Spain and Andorra are severe, and convicted offenders can expect long jail sentences and heavy fines. The cities of Madrid and Barcelona and The Balearics Regional Government have banned the consumption of alcohol in the street, other than in registered street cafes and bars. Visitors to Madrid, Barcelona, Mallorca, Ibiza, and Menorca should be aware that failure to respect this law might result in the imposition of fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

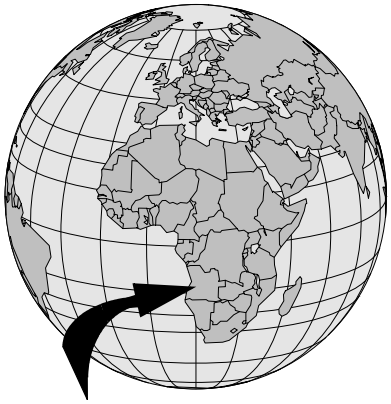
Registration and Embassy Locations: Americans living or traveling in Spain or Andorra are encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration web site to obtain updated information on travel and security within Spain or Andorra. Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate.

By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency. The U.S. Embassy is located at Serrano 75; telephone (34) (91) 587-2200, and fax (34) (91) 587-2303. U.S. citizens who register in the Consular Section at the U.S. Embassy, Consulate General, or one of the Consular Agencies listed below can obtain updated information on travel and security within Spain or Andorra. Additional information is available through the U.S. Embassy's home page at http://madrid.usembassy.gov.

The U.S. Consulate in Barcelona is located at Paseo Reina Elisenda 23-25; telephone (34)(93) 280-2227 and fax (34)(93) 205-5206. Visitors to Barcelona can access additional information from the Consulate General's web page at http://madrid.usembassy.gov/barcelonaen.html. There are six consular agencies in Spain, which provide limited services to American citizens, but are not authorized to issue passports. Anyone requesting service at one of the consular agencies should call ahead to verify that the service requested will be available on the day you expect to visit the agency.

Fuengirola (in Malaga Province), at Avenida Juan Gomez Juanito #8, Edificio Lucia 1C, Fuengirola 29640 Spain. Telephone (34)(952) 474-891 and fax (34)(952) 465-189. Hours 10:00 a.m. to 2:00 p.m.

La Coruna, at Canton Grande 6, La Coruna 15003 Spain. Telephone (34) (981) 213-233 and fax (34)(981 22 28 08). Hours 10:00 a.m. to 1:00 p.m.



Las Palmas, at Edificio Arca, Calle Los Martinez de Escobar 3, Oficina 7, Las Palmas, Gran Canaria 35007 Spain. Telephone (34)(928) 222-552 and fax (34)(928) 225-863. Hours 10:00 a.m. to 1:00 p.m.

Palma de Mallorca, Edificio Reina Constanza, Porto Pi, 8, 9-D, 07015 Palma de Mallorca 07015 Spain. Telephone (34)(971) 40-3707 or 40-3905 and fax (34)(971) 40-3971. Hours 10:30 a.m. to 1:30 p.m.

Seville, at Plaza Nueva 8-8 duplicado, 2nd Floor, Office E-2 No.4, Sevilla, 41101 Spain. Telephone: (34)(65) 422-8751 and fax (34)(91) 422-0791. Hours: 10:00 a.m. to 1:00 p.m.

Valencia, at Doctor Romagosa #1, 2-J, 46002, Valencia 46002 Spain. Telephone (34)(96)-351-6973 and fax (34)(96) 352-9565. Hours 10:00 a.m. to 2:00 p.m.

For Andorra, please contact the U.S. Consulate in Barcelona.

ANGOLA

Compiled from the October 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name
Republic of Angola (Republica de Angola)

PROFILE

Geography

Area: 1,246,700 sq. km. (481,400 sq. mi), about twice the size of Texas.
Cities: Capital—Luanda (est. pop. 5.0 million); Huambo (750,000); Benguela (600,000).
Terrain: A narrow, dry coastal strip extending from the far north (Luanda) to Namibia in the south; well-watered agricultural highlands; savanna in the far east and south; and rain forest in the north and the enclave of Cabinda.
Climate: Tropical and tropical highland.

People

Nationality: Noun and adjective—Angolan(s).
Population: (200 est.) 16,500,000.
Annual population growth rate: (2004) 2.8%.
Ethnic groups: Ovimbundu 37%, Kimbundu 25%, Bakongo 13%, mixed racial 2%, European 1%.
Religions: 2001 official est.) Roman Catholic 68%, various Protestant 20%; indigenous beliefs 12%.
Languages: Portuguese (official), Ovimbundu, Kimbundu, Bakongo, and others.
Education: Years compulsory—8. Enrollment (combined gross enrollment for primary, secondary, and tertiary schools, 2004 est.)—26%. Literacy (total population over 15 that can read and write, 2004 est.)—67.4% (female 54.2%, male 82.9%).
Health: Life expectancy (2004 est.)—total population 40.7 years. Infant mortality rate (2004 est.)—154/1,000.
Work force: (2003 est. 5.6 million) Agriculture—85%; industry and commerce—15%; services—6%.

Government

Type: Republic.
Independence: November 11, 1975.
Government branches: Executive—elected president (chief of state), appointed prime minister, and 31 appointed civilian ministers and 55 vice ministers. Legislative—elected National Assembly (223 seats). Judicial—Supreme Court (also functions as Constitutional Court).
Political subdivisions: Province, municipality, commune.
Political parties: 111 with legal status; in 1992, 12 won seats in the National Assembly. Ruling party—Popular Movement for the Liberation of Angola (MPLA). Opposition—National Union for the Total Independence of Angola (UNITA), Social Renewal Party (PRS), National Front for the Liberation of Angola (FNLA), Party for Democratic Progress—Angola National Alliance (PDP-ANA), Democratic Renewal Party (PRD), Party of the Alliance of Youth, Workers, and Peasants (PAJOCA), Liberal Democratic Party (PLD), Democratic Alliance (AD), Angolan Democratic Forum (FDA), Social Democratic Party (PSD), Front for Democracy (FPD), and the Angolan National Democratic Party (PNDA).
Suffrage: Universal age 18 and over.

Economy

GDP: (2007 est. using purchasing power parity) $91.29 billion.
Annual real GDP growth rate: (2007 est.) 21.1%.
Per capita GDP: (2007 est. using purchasing power parity) $5,600.
Avg. inflation rate: (2007) 12.2%.
Natural resources: Petroleum, diamonds, iron ore, phosphates, bauxite, uranium, gold, granite, copper, feldspar.
Agriculture: Products—bananas, sugarcane, coffee, sisal, corn, cotton, manioc, tobacco, vegetables, plantains; livestock; forest products; fisheries products.
Industry: Types—petroleum drilling and refining, mining, cement, basic metal products, fish processing, food processing, brewing, tobacco products, sugar refining, textiles.
Trade: Exports (2007 est)—petroleum $44.32 billion.Consisting of crude oil, diamonds, refined petroleum products, gas, coffee, sisal, fish and fish products, timber, cotton. Major markets (2006)—U.S. (38.1%), China (34.2%), Taiwan (5.8%),

France (4.9%), Chile (4.1%). Imports (2007)—$12.29 billion: machinery and electrical equipment, vehicles and spare parts; medicines, food, textiles, military goods. Major sources (2006)—U.S. (15.3%), Portugal (15%), South Korea (10.1%), China (8.8%), Brazil (8.2%), South Africa (6.7%), France (6.2%).

GEOGRAPHY

Angola is located on the South Atlantic Coast of West Africa between Namibia and the Republic of the Congo. It also is bordered by the Democratic Republic of the Congo to the north and east and Zambia to the east. The country is divided into an arid coastal strip stretching from Namibia to Luanda; a wet, interior highland; a dry savanna in the interior south and southeast; and rain forest in the north and in Cabinda. The upper reaches of the Zambezi River pass through Angola, and several tributaries of the Congo River have their sources in Angola. The coastal strip is tempered by the cool Benguela current, resulting in a climate similar to coastal Baja California. There is a short rainy season lasting from February to April. Summers are hot and dry, while winters are mild. The interior highlands have a mild climate with a rainy season from November through April followed by a cool dry season from May to October when overnight temperatures can fall to freezing. Elevations generally range from 3,000 to 6,000 feet. The far north and Cabinda enjoy rain throughout much of the year.

PEOPLE

Estimates of Angola's population vary widely, as there has been no census since 1970, but it is estimated at no less than 16 million. Angola has three main ethnic groups, each speaking a Bantu language: Ovimbundu 37%, Kimbundu 25%, and Bakongo 13%. Other groups include Chokwe, Lunda, Ganguela, Nhaneca-Humbe, Ambo, Herero, and Xindunga. In addition, mixed racial (European and African) people amount to about 2%, with a small (1%) population of whites, mainly ethnically Portuguese. Portuguese make up the largest non-Angolan population, with at least 30,000 (though many native-born Angolans can claim Portuguese nationality under Portuguese law). Portuguese is both the official and predominant language.

HISTORY

In 1482, when the Portuguese first landed in what is now northern Angola, they encountered the Kingdom of the Congo, which stretched from modern Gabon in the north to the Kwanza River in the south. Mbanza Congo, the capital, had a population of 50,000 people. South of this kingdom were various important states, of which the Kingdom of Ndongo, ruled by the ngola (king), was most significant. Modern Angola derives its name from the king of Ndongo. The Portuguese gradually took control of the coastal strip throughout the 16th century by a series of treaties and wars. The Dutch occupied Luanda from 1641-48, providing a boost for anti-Portuguese states. In 1648, Brazilian-based Portuguese forces re-took Luanda and initiated a process of military conquest of the Congo and Ndongo states that ended with Portuguese victory in 1671. Full Portuguese administrative control of the interior did not occur until the beginning of the 20th century.

Portugal's primary interest in Angola quickly turned to slavery. The slaving system began early in the 16th century with the purchase from African chiefs of people to work on sugar plantations in São Tomé, Principe, and Brazil. Many scholars agree that by the 19th century, Angola was the largest source of slaves not only for Brazil, but also for the Americas, including the United States. By the end of the 19th century, a massive forced labor system had replaced formal slavery and would continue until outlawed in 1961. It was this forced labor that provided the basis for development of a plantation economy and, by the mid-20th century, a major mining sector. Forced labor combined with British financing to construct three railroads from the coast to the interior, the most important of which was the transcontinental Benguela railroad that linked the port of Lobito with the copper zones of the Belgian Congo and what is now Zambia, through which it connects to Dar Es Salaam, Tanzania.

Colonial economic development did not translate into social development for native Angolans. The Portuguese regime encouraged white immigration, especially after 1950, which intensified racial antagonisms. As decolonization progressed elsewhere in Africa, Portugal, under the Salazar and Caetano dictatorships, rejected independence and treated its African colonies as overseas provinces. Consequently, three independence movements emerged: the Popular Movement for the Liberation of Angola (MPLA) led by Agostinho Neto, with a base among Kimbundu and the mixed-race intelligentsia of Luanda, and links to communist parties in Portugal and the East Bloc; the National Front for the Liberation of Angola (FNLA), led by Holden Roberto with an ethnic base in the Bakongo region of the north and links to the United States and the Mobutu regime in Kinshasa; and the National Union for the Total Independence of Angola (UNITA), led by Jonas Malheiro Savimbi with an ethnic and regional base in the Ovimbundu heartland in the center of the country and links to the People's Republic of China and apartheid South Africa.

From the early 1960s, elements of these movements fought against the Portuguese. A 1974 coup d'etat in Portugal established a military government that promptly ceased the war and agreed, in the Alvor Accords, to hand over power to a coalition of the three movements. The ideological differences between the three movements eventually led to armed conflict, with FNLA and UNITA forces, encouraged by their respective international supporters, attempting to wrest control of Luanda from the MPLA. The intervention of troops from South Africa on behalf of UNITA and Zaire on behalf of the

FNLA in September and October 1975 and the MPLA's importation of Cuban troops in November effectively internationalized the conflict. Retaining control of Luanda, the coastal strip, and increasingly lucrative oil fields in Cabinda, the MPLA declared independence on November 11, 1975, the day the Portuguese abandoned the capital. UNITA and the FNLA formed a rival coalition government based in the interior city of Huambo. Agostinho Neto became the first president of the MPLA government that was recognized by the United Nations in 1976. Upon Neto's death from cancer in 1979, then-Planning Minister José Eduardo dos Santos ascended to the presidency. The FNLA's military failures led to its increasing marginalization, internal divisions, and abandonment by international supporters. An internationalized conventional civil war between UNITA and the MPLA continued until 1989. For much of this time, UNITA controlled vast swaths of the interior and was

backed by U.S. resources and South African troops. Similarly, tens of thousands of Cuban troops remained in support of the MPLA, often fighting South Africans on the front lines. A U.S.-brokered agreement resulted in withdrawal of foreign troops in 1989 and led to the Bicesse Accord in 1991, which spelled out an electoral process for a democratic Angola under the supervision of the United Nations. When UNITA's Jonas Savimbi failed to win the first round of the presidential election in 1992 (he won 40% to dos Santos's 49%, which required a runoff), he called the election fraudulent and returned to war.

Another peace accord, known as the Lusaka Protocol, was brokered in Lusaka, Zambia, and signed in 1994. This agreement, too, collapsed into renewed conflict. The UN Security Council voted on August 28, 1997 to impose sanctions on UNITA. The Angolan military launched a massive offensive in 1999, which destroyed UNITA's conventional capacity and recaptured all major cities previously held by Savimbi's forces. Savimbi then declared a return to guerrilla tactics, which continued until his death in combat in February 2002.

On April 4, 2002, the Angolan Government and UNITA signed the Luena Memorandum of Understanding (MOU), which formalized the de facto cease-fire that prevailed following Savimbi's death. In accordance with the MOU, UNITA recommitted to the peace framework in the 1994 Lusaka Protocol, returned all remaining territory to Angolan Government control, quartered all military personnel in predetermined locations, and relinquished all arms. In August 2002, UNITA demobilized all military personnel. UN Security Council sanctions on UNITA were lifted on December 9, 2002. UNITA and the MPLA held their first post-war party congresses in 2003. The UNITA Congress saw the democratic transfer of power from interim leader General Paulo Lukumba "Gato" to former UNITA representative in Paris Isaias Henriqué Samakuva, while the MPLA Congress reaffirmed President dos Santos' leadership of party structures. Samakuva was reelected to a second 4-year term as UNITA party president at a UNITA party congress in July 2007.

The signing of the Memorandum of Understanding (MOU) for Peace and Reconciliation in Cabinda on August 1, 2006, was intended as a step toward ending conflict in Cabinda and in bringing about greater representation for the people of Cabinda. It followed a successful counterinsurgency campaign by the Angolan Armed Forces (FAA), who still maintain a strong troop presence there. The MOU rejected the notion of Cabindan independence, calls for the demobilization and reintegration of former Front for the Liberation of the Enclave of Cabinda (FLEC) fighters into various governmental positions, and creates a special political and economic status for the province of Cabinda. Many FLEC military combatants were integrated into the Angolan Armed Forces and National Police, including into some command positions. In addition, Cabindans were given designated numbers of vice ministerial and other positions in the Angolan Government. Some FLEC members, who did not sign onto the peace memorandum, continue their independence efforts through public outreach, infrequent low-level attacks against FAA convoys and outposts and occasional attacks on civilians.

GOVERNMENT AND POLITICAL CONDITIONS

Angola changed from a one-party Marxist-Leninist system ruled by the MPLA to a nominal multiparty democracy following the 1992 elections, in which President dos Santos won the first-round election with 49% of the vote to Jonas Savimbi's 40%; a runoff never took place. The Constitutional Law of 1992 establishes the broad outlines of government structure and delineates the rights and duties of citizens. The government is based on ordinances, decrees, and decisions issued by a president and his ministers or through legislation produced by the National Assembly and approved by the president. The parliament is generally subordinate to the executive.

Angola is governed by a president who is assisted by a prime minister and 31 cabinet ministers, all appointed by the president. Political power is concentrated in the presidency. The executive branch of the government is composed of the president (head of state and government), the prime minister, and the Council of Ministers. The Council of Ministers, composed of all government ministers and vice ministers, meets regularly to discuss policy issues. The president, the Council of Ministers, and individual ministers in their areas of competence have the ability to legislate by decree.

Of the 220 deputies in the National Assembly, 130 are elected at large, and 5 are elected to represent each of the 18 provinces. The Electoral Law also calls for the election of three additional deputies to represent citizens living abroad; however, those positions were not filled in the 1992 elections. Following the 1992 elections, the ruling MPLA controlled 59% of the Assembly's seats.

On June 4, 2008 President dos Santos officially called for legislative elections to be held on September 5, 2008, Angola's first election since 1992. The announcement followed a voter registration process that registered over 8 million Angolans. Due to technical difficulties on election day, voting was extended through September 6. As a result of the elections, which have been widely accepted by the international community as having reflected the will of the Angolan people, the MPLA won 81.6 percent of the electorate giving it 190 out of 220 seats in parliament. The remaining 30 parliamentary seats were won by the National Union for the Total Independence of Angola UNITA (16), the Social Renewal Party (PRS) (8), National Front for the Liberation of Angola (FNLA) (3), and Nova Democracia (2).

Presidential elections are planned for 2009, with municipal elections to follow. The central government administers the country through 18 provinces. Governors of the provinces are appointed by and serve at the pleasure of the president. The government has embarked on a program of decentralization, and in August 2007 the Council of Ministers passed a resolution to grant 50 municipalities control of their own budgets.

The legal system is based on Portuguese and customary law but is weak and fragmented. Courts operate in only a fraction of the 164 municipalities. A Supreme Court serves as the appellate tribunal; a Constitutional Court with powers of judicial review has never been constituted despite statutory authorization. Recently, the Supreme Court has acted as a Constitutional Court.

The 27-year-long civil war ravaged the country's political and social institutions. The government estimates that 4.7 million people were internally displaced by the civil war. In March 2007, the UN High Commissioner for Refugees (UNHCR) and Angola jointly celebrated the end of a 5-year organized voluntary repatriation program that returned home more than 400,000 Angolan refugees. UNHCR and the Angolan Government estimate that over 200,000 refugees remain outside Angola, and the government has assured that all remaining refugees have the right to return. Daily conditions of life throughout the country mirror the inadequate administrative infrastructure as well as weak social institutions. Government support for social institutions is often inadequate. Many hospitals are without medicines or basic equipment, schools are without books, and public employees often lack the basic supplies for their day-to-day work.

Principal Government Officials

Last Updated: 11/12/08

President: **Jose Eduardo DOS SANTOS**
Prime Minister: **Fernando "Nando" da Piedade Dias DOS SANTOS**
Min. of Agriculture & Rural Development: **Gilberto LUTUKUTA**
Min. of Commerce: **Joaquim Ekuma MUAFUMUA**
Min. of Culture: **Boaventura CARDOSO**
Min. of Defense: **Kundi PAIHAMA**
Min. of Education: **Antonio Burity DA SILVA**
Min. of Energy & Water: **Jose Botelho DE VASCONCELOS**
Min. of Environment & Urban Development: **Diakunpuna Sita JOSE**
Min. of External Relations: **Joao Bernardo DE MIRANDA**
Min. of Finance: **Jose Pedro DE MORAIS**
Min. of Fisheries: **Salamao XIRIMBIMBI**
Min. of Geology & Mines: **Manuel Antonio AFRICANO**
Min. of Health: **Sebastiao Sapuile VELSOS**
Min. of Industry: **Joaquim Duarte da Costa DAVID**
Min. of Interior: **Roberto Leal Monteiro NGONGO**
Min. of Justice: **Manuel ARAGAO**
Min. of Petroleum: **Desiderio DA COSTA**
Min. of Planning: **Ana Dias LOURENCO**
Min. of Public Administration & Employment: **Antonio Pitra NETO**
Min. of Public Works: **Francisco Higino CARNEIRO**
Min. of Science & Technology: **Joao Baptista NGANDAGINA**
Min. of Social Communication: **Pedro Henrick Vaal NETO**
Min. of Social Reintegration: **Joao Baptista KUSSUMUA**
Min. of Telecommunications: **Licinio Tavares RIBEIRO**
Min. of Territorial Administration: **Virgilio Fontes PEREIRA**
Min. of Tourism & Hotels: **Eduardo Jonatao CHINGUNJI**
Min. of Transport: **Andre Luis BRANDAO**
Min. of Veterans & Ex-Combatants: **Pedro Jose VAN DUNEM**
Min. of Women & Family Affairs: **Candida Celeste DA SILVA**
Min. of Youth & Sports: **Jose Marcos BARRICA**
Min. in the Office of the Presidency, Civil Affairs: **Jose da Costa e Silva LEITAO**
Min. in the Office of the Presidency, General Secretariat: **Jose Mateus de Adelino PEIXOTO**
Min. in the Office of the Presidency, Military Affairs: **Manuel Helder DIAS**
Governor, National Bank of Angola: **Amadeu MAURICIO**
Ambassador to the US: **Josefina Perpetua Pitra DIAKITE**
Permanent Representative to the UN, New York: **Ismael Abraao GASPAR MARTINS**

Angola maintains an embassy in the United States at 2100-2108 16th St., NW, Washington, DC 20009 (tel. 202-785-1156; fax 202-822-9049; web: www.angola.org). Angola also maintains consulates in New York City (attached to its Permanent Mission to the United Nations) at 866 UN Plaza, 48th St., Suite 552, New York, NY 10017 (tel. 212-233-3588, ext. 15; fax 212-980-9606; web: http://www2.un.int/public/Angola/) and in Houston at 3040 Post Oak Blvd., Suite 708, Houston, TX 77056 (tel. 713-212-3840; fax 713-212-3841).

ECONOMY

Angola has a fast-growing economy largely due to a major oil boom, but it also ranks in the bottom 10% of most socioeconomic indicators. The International Monetary Fund (IMF) estimates that Angola's real GDP increased by 23.4% in 2007. Angola is recovering from 27 years of nearly continuous warfare, and it remains beset by corruption and economic mismanagement. Despite abundant natural resources, and rising per capita GDP, it was ranked 161 out of 177 countries on the 2006 UN Development Program's (UNDP) Human Development Index. Subsistence agriculture sustains one-third of the population.

The rapidly expanding petroleum industry has reached its Organization of Petroleum Exporting Countries (OPEC) cap, producing approximately 2 million barrels per day (bpd). Angola's crude oil production is one of the highest in Africa, rivaling Nigeria. Crude oil accounts for 51.7% of GNP, 95% of exports, and 80% of government revenues. Angola also produces 40,000 bpd of locally refined oil. Oil production remains largely offshore and has few linkages with other sectors of the economy, though a local content initiative promulgated by the Angolan Government is pressuring oil companies to source from local businesses.

Block 15, located offshore of Soyo, currently provides 30% of Angola's crude oil production. ExxonMobil,

through its subsidiary Esso, is the operator with a 40% share. In 2005, Block 15's second major sub-field, Kizomba B, came online producing at about 250,000 bpd. BP, ENI-Agip, and Statoil are partners in the concession. Chevron operates Block 0, offshore Cabinda, which provides about 20% of Angola's crude oil production. Its partners in Block 0 are Sonangol (the Angolan state oil company), TotalFinaElf, and ENI-Agip. In 2007, Block 0 had a total production of 370,000 bpd, and drilling activity continues at a high level. Chevron also operates Angola's first deepwater section to go into production, Block 14, which started pumping in January 2000 and produced 105,000 bpd in 2006.

TotalFinaElf brought the first Kwanza Basin deepwater blocks online with production from its Block 17 concession that began in February 2002. Inauguration of the Dalia oilfield in December 2006 combined with the Girassol field already in operation brought Block 17's total production to approximately 500,000 bpd as of July 2007. Total expects to begin drilling in new oilfield Pazflor in 2009, bringing production to a peak 700,000 bpd by 2011. Exploration is ongoing in ultra-deep water concessions and in deepwater and shallow concessions in the Namibe Basin. BP made the first significant ultra-deepwater find in its Block 31 concession in 2002 and had reached nine significant discoveries by the end of 2005. BP expected to ship its first crude from the Plutonio oilfield in Block 18 in September 2007 and expects Plutonio to average 200,000 bpd in full production. Marathon also drilled a successful well in its Block 32 ultra-deep water concession. TotalFinaElf operates Angola's one refinery (in Luanda) for sole owner Sonangol; plans for a second refinery in Lobito with projected production of 200,000 bpd are moving forward. There are plans to increase capacity of the Luanda refinery from 40,000 bpd to 100,000 bpd. Chevron, Sonangol, BP, Total, and Eni are developing a $4-5 billion liquefied natural gas plant at Soyo, to be constructed by Bechtel, expected to start production in 2012.

Exports to Asian countries have grown rapidly in recent years, particularly to China. In late 2004, China's state oil company Sinopec entered the market offering two separate $1 billion signing bonus offers on two offshore blocks. Sinopec has also formed a partnership with Sonangol to operate Block 3/05 (formerly Block 3/80), whose operation was transferred from Total to Sonangol. Sonangol will seek to expand its operation of onshore and shallow water blocks. This includes the northern block of Cabinda's onshore concessions, which since the reduction in hostilities with separatist forces is now open to exploration. Sonangol and Sinopec will also be eyeing future concession rounds, particularly for 23 blocks in the Kwanza Basin onshore area and the relinquished parts of Blocks 15, 17, and 18, currently operated by Exxon, Total, and BP. During 2006, Angola was the leading source country in terms of dollar value for the crude oil China imported, importing U.S. $10.928 billion, up 16.5% year on year.

Diamonds make up most of Angola's remaining exports, with yearly production at 6 million carats. Diamond sales reached approximately $1.1 billion in 2006. Despite increased corporate ownership of diamond fields, much production is currently in the hands of small-scale prospectors, often operating illegally. Only eight large-scale mines are operating out of a total of 145 concessions. In June 2005, De Beers signed a $10 million prospecting contract with the government's diamond parastatal, ending a 4-year investment dispute between De Beers and the government. The government is making an increased effort to register and license prospectors. Legal sales of rough diamonds may occur only through the government's diamond-buying parastatal, although many producers continue to bypass the system to obtain higher prices. The government has established an export certification scheme consistent with the "Kimberley Process" to identify legitimate production and sales. Other mineral resources, including gold, remain largely undeveloped, though granite and marble quarrying have begun.

In the last decade of the colonial period, Angola was a major African agricultural exporter. Because of severe wartime conditions, including extensive laying of landmines throughout the countryside, agricultural activities came to a near standstill, and the country now imports over half of its food. Small-scale agricultural production has increased several-fold over the last 5 years due to demining efforts, infrastructure improvements, and the ability of returnees and internally displaced persons (IDPs) to safely return to agricultural areas, yet production of most crops remains below 1974 levels. Some efforts at commercial agricultural recovery have gone forward, notably in fisheries and tropical fruits, but most of the country's vast potential remains untapped. Recently passed land reform laws will attempt to reconcile overlapping traditional land use rights, colonial-era land claims, and recent land grants to facilitate significant commercial agricultural development.

An economic reform effort launched in 1998 was only marginally successful in addressing persistent fiscal mismanagement and corruption. In April 2000, Angola started an IMF staff-monitored program (SMP). The program lapsed in June 2001 over IMF concerns about lack of progress by Angola. Under the program, the Government of Angola did succeed in unifying exchange rates and moving fuel, electricity, and water prices closer to market rates. In March 2007, the government announced it was not interested in a formally-structured IMF program, but would continue to participate in Article IV consultations and other technical assistance on an ad hoc basis.

In December 2002, President dos Santos named a new economic team to oversee homegrown reform efforts. The new team succeeded in decreasing overall government spending, rationalizing the Kwanza exchange rate, closing regulatory loopholes allowing off-budget expenditures, and capturing all revenues in the state budget. New procedures were implemented to track the flow of funds between the Treasury, Banco

Nacional de Angola (the central bank), and the state-owned Banco de Poupanca e Credito, which operates the budget. The Angolan Government adopted a new investment code. Concerns remain about quasi-fiscal operations by the state oil company Sonangol, continued oil-backed commercial borrowing by the Angolan Government, and inadequate transparency and oversight in the management of public accounts. The Angolan commercial code, financial sector law, and telecommunications law all require substantial revision.

Angola is the third-largest trading partner of the United States in sub-Saharan Africa, largely because of its petroleum exports. U.S. exports to Angola primarily consist of industrial goods and services—such as oilfield equipment, mining equipment, chemicals, aircraft, and food. On December 30, 2003, President Bush approved the designation of Angola as eligible for tariff preferences under the African Growth and Opportunity Act (AGOA).

DEFENSE

The Angolan Armed Forces, known by its Portuguese acronym FAA, are headed by a chief of staff who reports to the civilian minister of defense. There are three services—the army, navy, and air force. Total manpower is about 140,000. The army is by far the largest of the services with about 130,000 personnel. The navy numbers about 3,000 and operates several small patrol craft and barges. Air force personnel total about 7,000; its equipment includes Russian-manufactured fighters and transport planes, Bell helicopters, and Italian trainers. The "Casa Militar," or presidential guard, answers directly to the Office of the President and is separate from FAA command and control structures.

FOREIGN RELATIONS

From 1975 to 1989, Angola was aligned with the Soviet Union and Cuba. Since then, it has focused on improving relationships with Western countries, cultivating links with other Portuguese-speaking countries, and asserting its own national interests in Central Africa through military and diplomatic intervention. It has entered the Southern African Development Community (SADC) in order to improve its ties with its largely anglophone neighbors to the south. In 1997, Zimbabwe and Namibia joined Angola in its military intervention in the Democratic Republic of the Congo, where Angolan troops fought in support of the Laurent and Joseph Kabila governments. It also has intervened in the Republic of the Congo (Brazzaville) in support of President Sassou-Nguesso. Angola has also engaged in a more robust economic relationship with the People's Republic of China. The P.R.C. has extended over U.S. $7 billion in credit to Angola. Angola has also received billion dollar lines of credit from Brazil and Germany.

Multilaterally, Angola has promoted the revival of the Community of Portuguese-Speaking Countries (CPLP) as a forum for cultural exchange and a means of expanding ties with Portugal and Brazil. During the peace process, the government fully cooperated with the UN Mission in Angola (UNMA), which concluded its mandate in mid-February 2003. Angola concluded a 2-year term on the UN Security Council in December 2004. In June 2007, it began a 3-year term on the Human Rights Council.

U.S.-ANGOLAN RELATIONS

The U.S. Mission in Angola includes four agencies—the Department of State, the U.S. Agency for International Development (USAID), the Department of Defense, and the Department of Health and Human Services' Centers for Disease Control and Prevention (HHS/CDC). In addition, a variety of federal agencies maintain relationships with the Angolan Government through ongoing projects, including the Federal Aviation Administration, the Department of Transportation, the Department of Commerce, the U.S. Trade Development Agency, and the Department of Energy.

The United States and Angola established formal diplomatic relations in 1993. Thereafter, the U.S. played a role in facilitating the Lusaka Protocol that sought an end to Angola's long-running civil war. Since war's end in 2002, United States foreign policy goals in Angola have sought to consolidate peace and security, promote economic prosperity, improve health, and encourage Angola's transition to democracy and respect for human rights. The U.S. has worked in partnership with Angola to remove thousands of landmines and help war refugees and internally displaced people return to their homes.

USAID's development program in Angola in FY 2007 was consistent with the country's status as a developing country at a pivotal juncture in its development and reconstruction. In FY 2006, the program budget was $25.5 million and focused on civil society strengthening, improved governance, and democratization; market-oriented economic analysis and economic reform policy; agricultural sector productivity; maternal and child health; HIV/AIDS prevention, education, and voluntary counseling; and workforce development. Angola also launched a major program to fight malaria through the President's Malaria Initiative (PMI). The Governing Justly and Democratically objective strengthens constituencies and institutions required for democratic governance by strengthening civil society organizations and promoting local government decentralization; fostering an independent media, government transparency, accountability, and capability, and improved dialogue between citizens and government; and laying the groundwork for free and fair elections. The Investing in People objective aims to improve maternal and child health and prevent the spread of HIV/AIDS and other infectious diseases by helping communities and institutions to provide necessary health services and to conduct HIV/AIDS prevention programs. The PMI

is the largest health program and expands efforts to scale up proven preventive and treatment interventions toward achievement of 85% coverage among vulnerable groups and 50% reduction in morbidity due to malaria. The Economic Growth objective fosters economic policy and financial sector reform; credit access for micro-, small-, and medium-sized enterprises; and expanded trade and investment.

To assist with economic reform, in FY 2007 the State Department provided $2.2 million to work on land tenure, economic policy, and the financial sector. An additional $143,000 in grants was provided to community development projects and non-governmental organization (NGO)-sponsored democracy and human rights projects. $152,000 in International Military Education and Training (IMET) funds was provided for English language training to the Angolan Armed Forces. Professional training for law enforcement personnel at the International Law Enforcement Academy (ILEA) in Gaborone, Botswana continued. The Safe Skies for Africa program provided around $800,000 in equipment and training to the Angolan civil aviation authority. As part of its public diplomacy program, the Embassy provided nearly $434,000 in English language training, educational exchanges and fellowships, and information resource services. The State Department provided $6 million for ongoing landmine, small arms, and munitions destruction projects throughout the country. These projects have played a major role in clearing agricultural land and opening critical road networks and increasing access in those areas of the country most impacted by landmines.

At the same time, the energy-based U.S. trading relationship continues to expand and spark other ties. One offshoot has been the development of a Sister City relationship between Lafayette, Louisiana and Cabinda and between Houston, Texas and Luanda. The Catholic University of Luanda has close links with a number of American institutions and has received support from the Angola Educational Assistance Fund, a U.S. non-profit organization organized by Citizens Energy of Boston. Sonangol has a longstanding program of educating its professionals in U.S. universities, complementing Chevron's policy of U.S. training for its own growing pool of Angolan professionals.

TRAVEL

Consular Information Sheet

June 20, 2008

Country Description: Angola is a large, developing country in southwest central Africa. The capital city is Luanda. Portuguese, the official language, is widely spoken throughout the country. Despite its extensive oil and mineral reserves and arable land suitable for large-scale production of numerous crops, Angola has some of the world's lowest social development indicators. Development was severely restricted by a 27-year long civil war that broke out upon independence in 1975, which destroyed the majority of the country's infrastructure. Since the conflict's conclusion in 2002, the government has initiated extensive infrastructure reconstruction and development projects, and there are growing signs of economic recovery. However, Angola still faces challenges with its infrastructure and with providing government services, especially in basic social services, aviation and travel safety, accommodation availability and quality and communications. Facilities for tourism, particularly outside the capital of Luanda, are often rudimentary.

Entry Requirements: Passport and visa are required and must be obtained in advance. An International Certificate of Vaccination is required. Visitors should allow several weeks for the processing of their visa application. Angola does not issue airport visas. Persons arriving without visas are subject to arrest or exclusion. Travelers may also encounter delays if they do not have at least one completely blank visa page in their passports for entry stamps. As of November 1, 2007, Angola no longer requires travelers to have an exit visa. Travelers whose international immunization cards do not show inoculations against yellow fever within the past ten years may be subject to exclusion, on-the-spot vaccination, and/or heavy fines. Visitors remaining in Angola beyond their authorized visa duration are subject to fines and arrest. It is illegal to attempt to carry local currency out of Angola and persons found attempting to carry local currency out of Angola are subject to having this currency confiscated by customs officers. Current information on entry requirements may be obtained from the Embassy of Angola at 2100-2108 16th Street NW, Washington, DC, tel. (202) 785-1156, fax (202) 785-1258.

Safety and Security: The overall security situation in Angola has improved markedly since the end of the civil war; however, Americans should still exercise caution when traveling in Angola. Although the war has ended, ground travel

throughout Angola can be problematic due to land mines, which were used extensively during the war. Travelers should not touch anything that resembles a mine or unexploded ordinance. Frequent checkpoints and poor infrastructure contribute to unsafe travel on roads outside of the city of Luanda. Police and military officials are sometimes undisciplined, but their authority should not be challenged. Travel in many parts of Luanda is relatively safe by day, but car doors should be locked, windows rolled up, and packages stored out of sight. Visitors should avoid travel after dark, and no travel should be undertaken on roads outside of cities after nightfall.

Americans located in, or planning to visit, the northern province of Cabinda should be aware of threats to their safety outside of Cabinda city. In 2007 and 2008 armed groups specifically targeted and attacked expatriates in Cabinda; these armed attacks resulted in the rape, robbery and murder of a small number of expatriates working in Cabinda. Those responsible have declared their intention to continue attacks against expatriates. Occasional attacks against police and Angolan Armed Forces (FAA) convoys and outposts also continue to be reported. These incidents, while small in overall numbers, have occurred with little or no warning. American citizens are, therefore, urged to exercise extreme caution when traveling outside of Cabinda city and limit travel to essential only.

Americans are advised to undertake only essential travel to Lunda North and South provinces. As the government of Angola is sensitive to the travel of foreigners in the diamond producing areas of the provinces, proper permission and documentation is required to frequent these areas. One can be subject to restriction or detention. There have been reports of crime or banditry in these areas, especially on roads leading into these areas.

Visitors to Angola are advised not to take photographs of sites and installations of military or security interest, including government buildings, as this can result in fines and possibly arrest.

For the latest security information, Americans traveling abroad should regularly monitor the Department's Internet web site, where the current Travel Warnings and Travel Alerts, including the Worldwide Caution Travel Alert, can be found. Up-to-date information on security can also be obtained by calling 1-888-407-4747 toll free in the U.S., or, for callers outside the U.S. and Canada, a regular toll line at 1-202-501-4444. These numbers are available from 8:00 AM to 8:00 PM Eastern Standard Time, Monday through Friday (except on U.S. federal holidays).

Crime: Crime is a serious problem throughout Angola. While most violent crime occurs between Angolans, foreigners have occasionally been attacked as well. Street crime is a regular occurrence in Luanda. The most common crimes are pick-pocketing, purse-snatching, vehicle theft, and vehicle break-ins. Armed muggings, robberies, and carjacking involving foreigners are not frequent but do occur. Americans are advised to avoid Roque Santeiro and Rocha Pinto, and to only travel the "Serpentine Road" in front of the U.S. Embassy by car. In general, movement around Luanda is safer by day than by night. Touring after dark should be avoided. Police and military officials are sometimes undisciplined, but their authority should not be challenged. Air travelers arriving in Luanda are strongly advised to arrange reliable and secure ground transportation in advance; there is no regular taxi service. American citizens are advised to avoid the use of the public transportation known as "candongueiros" or "taxistas"; these multi-passenger vans are largely unregulated and often dangerous.

Motorists should stop at all police checkpoints if so directed. Police officers may solicit bribes or request immediate payment of "fines" for alleged minor infractions. American citizens asked for bribes by the police should politely ask the traffic police to write them a ticket if the police allege a moving violation. If the police officer writes the ticket, then the motorist would pay the fine at the place indicated on the ticket. If no moving violation is alleged and the officer is asking for a bribe, the motorist should, without actually challenging the officer's authority, politely ask the officer for his/her name and badge number. Officers thus engaged will frequently let motorists go with no bribe paid if motorists follow this advice. Motorists are reminded to have all proper documents in the vehicle at all times (i.e. vehicle registration, proof of insurance, and driver's license), as the lack of documentation is a violation and can also be a reason an officer would solicit a bribe. Local law requires that every driver in Angola have the proper permission to drive. Further information on driving in Angola can be obtained from the Embassy of Angola. Police are not always responsive to reports of crime or requests for assistance. Most police are on foot and are assigned to designated stationary posts. The Rapid Intervention Police (PIR) unit is frequently seen patrolling various areas of the city. This unit, which is well trained and organized, will respond to major criminal incidents.

There have been police operations against illegal aliens and private companies resulting in deportation of illegal resident foreign nationals and loss of personal and company property. Independent entrepreneurs in Angola should carry relevant immigration and business documents at all times.

Travelers should be alert to fraud occasionally perpetrated by Luanda airport personnel. Immigration and customs officials sometimes detain foreigners without cause, demanding gratuities before allowing them to enter or depart Angola. Airport health officials sometimes demand that passengers arriving without proof of current yellow fever vaccination accept and pay for a vaccination at the airport. Travelers are advised to carry their yellow fever vaccination card and ensure their yellow fever vaccine is up-to-date. If travelers forget to bring their yellow fever vacci-

nation card and do not wish to receive the vaccine offered at the airport, they should be prepared to depart the country on the next available flight. Searches of travelers' checked baggage is common; travelers are advised to take precautions against this possibility. Travelers should also be aware that criminals sometimes attempt to insert items into baggage at the airport, particularly for flights from Luanda to South Africa. It is important that travelers maintain control of their carry-on baggage at all times, and if they believe something has been inserted into their baggage, they should report the incident immediately to airport authorities.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, to contact family members or friends, and explain how funds could be transferred. Although the investigation and prosecution of crimes are solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

In addition to reporting crime to local police and the U.S. Embassy in Angola, victims of crime who are residing in Angola are also encouraged to report the crime to the security department of their employer. Short-term visitors are encouraged to report the crime to the management of the hotel where they are staying if the crime occurred in or near the hotel. The local equivalent to the "911" emergency line in Angola for police is 113; for fire fighters: 115, and for ambulance services: 112. Please be advised that the emergency numbers listed may or may not have an English speaking operator available.

Medical Facilities and Health Information: Medical facilities and services are available in Angola, but are limited and often do not meet U.S. standards. Adequate care for medical emergencies is limited to Luanda, where there are some good private clinics that usually have a 24-hour service provided by a general practice physician and with specialists on call. A list of such facilities can be found at http://angola.usembassy.gov. Routine operations such as appendectomies can be performed. Local pharmacies provide a limited supply of prescriptions and over-the-counter medicines/drugs.

Travelers are, therefore, urged to carry with them an adequate supply of properly-labeled medications they routinely require for the duration of their projected stay in Angola. Malaria is endemic in most areas of Angola.

An outbreak of Marburg hemorrhagic fever, a severe and often fatal disease, occurred in Uige province in the spring of 2005; however, on November 7, 2005, the Ministry of Health of the Republic of Angola and the World Health Organization (WHO) declared that the Marburg outbreak in Angola had ended. This announcement came after 45 consecutive days without a new case of the illness.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's Internet site at http://wwwn.cdc.gov/travel. For information about outbreaks of infectious diseases abroad, consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith/en.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Angola is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

Since the end of the civil war in 2002, overland access to the interior has increased. However, fighting in most of the country damaged or destroyed many roads and bridges, and services for motorists outside urban areas cannot be counted on.

Road travel can be dangerous, especially during the rainy season (October - March), which can cause large potholes and erosion and due to the presence of landmines. Road conditions vary widely outside the capital from acceptable paved surfaces to virtually impassable dirt roads, particularly secondary routes. Many secondary roads, including secondary roads in urban areas, are impassable during the rainy season. Overloaded, poorly marked, and disabled vehicles, as well as pedestrians and livestock, pose hazards for motorists. Ground travel in rural areas should be undertaken during daylight hours only. Landmines also pose a continuing hazard to travelers. Many areas were heavily mined during the war, including roads, bridges, and railroad tracks. Areas with suspected landmines are generally clearly marked and travelers should heed these warnings. Primary roads are considered to be landmine free in most provinces, but travelers should not venture far from the margins of the road. Extensive government, commercial, and NGO demining projects continue throughout the country.

Traffic in Luanda is heavy and often chaotic, and roads are often in poor condition. Few intersections have traffic lights or police to direct vehicles. Drivers often fail to obey traffic signals and signs, and there are frequent vehicle breakdowns. Itinerant

vendors, scooters and pedestrians often weave in and out of traffic, posing a danger to themselves and to drivers.

Most public transportation, including buses and van taxis, should be avoided as the vehicles are generally crowded and may be unreliable.

Aviation Safety Oversight: As there is no direct commercial air service between the United States and Angola, the U.S. Federal Aviation Administration (FAA) has not assessed Angola's Civil Aviation Authority for compliance with International Civil Aviation Organization (ICAO) aviation safety standards. For more information, travelers may visit the FAA's Internet web site at www.faa.gov.

Special Circumstances: Angolan customs authorities may enforce strict regulations concerning temporary importation into or export from Angola of sensitive items including firearms, antiquities, and currency. It is advisable to contact the Embassy of Angola in Washington or one of Angola's consulates in the United States for specific information regarding customs requirements.

Financial Transactions: Angola is generally a cash-only economy; neither traveler's checks nor credit cards are used outside the capital of Luanda. In Luanda, credit cards are accepted in extremely limited circumstances, namely large hotels. Although, in April 2007 a major campaign was launched to expand credit card acceptance this effort has yet to expand beyond the capital city. In general, Automated Teller Machine's (ATMs) are only accessible to those individuals who hold accounts with local banks. Dollars are generally accepted in all provincial capitals; travelers should carry a sufficient supply of U.S. dollars with them. Only the newer series U.S. dollar bills (with large faces) are accepted.

U.S. dollars can be converted to local currency at exchange businesses authorized by the Angolan government. Angolan currency (the Kwanza) may not be taken out of the country and travelers, who attempt to carry currency out of Angola, are subject to having the currency confiscated.

Personal Identification: U.S. citizens are encouraged to carry a copy of their U.S. passports with them at all times so that, if questioned by local officials, proof of identity and U.S. citizenship is readily available. The Consular Section of the U.S. Embassy in Luanda can prepare copies of American passports at no charge for individuals who register with the Embassy. To avoid the risk of theft of or confiscation of original documentation, the U.S. Embassy recommends that Americans keep their passport in a secure place and carry a copy to avoid the possibility of authorities confiscating identity and travel documents.

Labor Disputes: American performers traveling to Angola to perform in concerts and/or other events should be aware that there have been several serious allegations made against talent agencies making arrangements for foreign performers. These allegations include, among other things, several charges of breach of contract and the forcible retention of passports and persons. Some of these incidents are currently under investigation by the Angolan police. Performers should assure themselves of the reputation of any agency they may contract with before traveling. Many find it useful to contact performers who have previously worked in Angola and are familiar with agencies in that country. Persons experiencing any incidents of this nature in Angola should report these to the local Angolan police and the U.S. Embassy.

Long Delays in Renewal of Visas: U.S. citizens who opt to renew their work or other visa while in Angola should expect delays of 2-10 weeks or more, during which time the Angolan immigration authorities will retain one's passport and one will not be able to travel. U.S. citizens are advised to plan accordingly, and if travel during this time cannot be avoided, one should apply for a second U.S. passport PRIOR to turning over the primary passport to Angolan authorities for visa renewal. To apply for a second U.S. passport, you must write a letter explaining the need for the second passport, as well as meet all the requirements for a normal application for passport renewal, including being able to show a current valid passport. Receiving a second passport will take 7-10 business days. Expatriates who stay beyond their visa expiration date are subject to steep fines.

Hotel Availability: Hotels are limited in Angola, and demand for the limited number of rooms is high. Hotels are often booked months in advance, especially in the capital city of Luanda. Only a few large hotels in Luanda accept credit cards; hotels in the provinces generally do not accept credit cards. Adequate hotels are found in most provincial capitals, but some provide limited amenities.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating Angolan laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Angola are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sex with children or using or disseminating child pornography in a foreign country is a crime prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in Angola are encouraged to register with the nearest U.S. Embassy or Consulate through the State Depart-

ment's travel registration web site, and to obtain updated information on travel and security within Angola. Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency.

The Consular Section is located at the American Embassy Complex, Rua Houari Boumedienne #32, in the Miramar area of Luanda, P.O. Box 6468, tel. (244)-222-641-000, (244)-222-447-028, (244)-222-445-481, 244-222-446-224; 24-hour duty officer (244)-923-404-209; fax (244)-222-641-259. The Consular Section may be contacted by e-mail at consular-luanda@state.gov. Further information on travel to Angola is also available at the Embassy web site at http://usembassy.state.gov/angola.

Intercountry Adoption

July 2008

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is based on public sources and our current understanding. Questions involving foreign and U.S. immigration laws and legal interpretation should be addressed respectively to qualified foreign or U.S. legal counsel.

Angola is not a party to The Hague Convention on Protection of Children and Co-operation in Respect of Intercountry Adoption (the Convention). Therefore the entering into force of the Convention for the United States on April 1, 2008, did not change intercountry adoption procedures. While adopting in Angola is not a complex process, it can take years to identify a child for adoption and to complete all of the required paperwork due to the inefficiencies of the Angolan bureaucracy and the fact that it takes an Act of the National Assembly to approve a foreign adoption. Prospective adoptive parents should note that Angolan adoption laws are being revised and they are very strict. To ensure that the adoption process is completed successfully and in a timely manner, the U.S. Embassy in Angola strongly suggests that adoptive parents consult an Angolan attorney.

Patterns of Immigration: Recent U.S. immigrant visa statistics indicate only one immigrant visa has been issued to an Angolan orphan in the last five fiscal years.

Adoption Authorities:
Ministry of Justice
Family Court Room
Sala da Familia
Tribunal Provincial de Luanda
Rua Amilcar Cabral No. 17
5th and 7th Floor
Luanda, Angola
No telephone numbers for the public are available

INAC–National Institute of the Child
Rua N'Gola M'Bambi
Luanda, Angola
Telephone: 244-222 322 611; 222 323 683; 222 322 753

After identifying a child, a document requiring permission to adopt the child should be submitted to the National Assembly (Parliament) for discussion and approval. The identification of the child is done privately. There are orphanages run by the government and others run by NGOs. After the identification of the child the orphanage or NGO contacts INAC (National Institute of the Child) for their opinion. INAC then must issue a document giving permission for the child to be adopted. Once INAC issues permission for the child to be adopted, a request for approval must then be sent to the National Assembly. There is no specific form to be submitted to the National Assembly. This process may take six to twelve months.

Eligibility to Adopt: Prospective adoptive parents may be married, single or common-law spouses. They must be at least 25 years old and at least 16 years older than the adopted child. Prospective adoptive parent(s) must be in full possession of his or her civil rights, in good physical and mental health, and financially capable of supporting and providing an education for the adopted child.

Residency Requirements: There are no residency requirements for prospective adoptive parents.

Time Frame: An intercountry adoption in Angola can take anywhere from two to three years to complete from the time the child is identified.

Adoption Agencies and Attorneys: There are no adoption agencies in Angola. Adoptions are handled exclusively by the Ministry of Justice. A list of adoption attorneys in Angola may be found at the web site of the U.S. Embassy in Luanda, Angola (http://luanda.usembassy.gov/wwwhlawyers.html) or may be picked up in person at the U.S. Embassy's consular section.

Adoption Fees: The U.S. Embassy in Angola discourages the payment of any fees that are not properly receipted, "donations," or "expediting" fees, that may be requested from prospective adoptive parents. Such fees have the appearance of "buying" a baby and put all future adoptions in Angola at risk.

Prospective adopting parents can expect to pay as much as $3,000.00 USD for government fees to complete the adoption. Attorney's fees are estimated to be an additional $10,000 USD.

Adoption Procedures: Adoption by proxy is prohibited. Adoption requires the consent of the parents or the legal representative of the prospective adoptive child. Consent will be waived with regard to a child or adolescent whose parents are unknown or who have been stripped of their parental rights. A home study is required and will be evaluated by a Judge of the Family Court Room from the Provincial Court after the approval of the Parliament (National

Assembly). Prospective adoptive parent(s) should contact a local orphanage to identify a child. After the identification of the child, the orphanage contacts the INAC (National Institute of the Child) for their opinion. INAC issues a document giving permission for the child to be adopted. The process of identifying the child for adoption and receiving approval from INAC can take 6-12 months. The adoptive parent(s) then submit a request to the Parliament (National Assembly) requesting the approval to adopt the child. Along with this request the adoptive parent attaches the following:

- A copy of the INAC document giving permission for the child to be adopted;
- Birth certificates of the adoptive parent(s);
- Marriage certificate (if applicable);
- Police clearance;
- Medical exam attesting good physical and mental health; and
- Proof of financial support.

The process of approval from the Parliament might take between twelve and eighteen months. In the meantime the adoptive parent(s) can submit a separate request to the Family Court Room requesting guardianship of the child. The request for guardianship can be submitted at the same time as the request to the National Assembly is submitted. {The request must be accompanied by the same documents listed above. A hearing will be scheduled at which the adoptive parent(s) must be present. If the child is 10 years old or more, he/she will also be heard by the Trustee at the Family Court Room. This process might take three to six months. If the child is not an orphan, the adoptive parent (s) will have to mention that on the adoptive parents request and the Trustee of the Family Court Room will send a notification for the parents to appear in person and consent to the adoption of the child. After the consent, the parental rights are terminated. Once the National Assembly approves the adoption, the adoptive parent(s) receives the determination. The judge orders the issuance of a new birth certificate with the adoptive parent(s) name(s) if they desire. To apply for an Angolan passport the adoptive parents have to contact Serviços de Migração e Estrangeiros (SME) in Luanda.

Required Documents:

- Initial application can be made by a letter and should include the personal data of the prospective adoptive parents and the personal data of the prospective adoptive child. It does not need to be notarized.
- Criminal background check and clearance. The USCIS FBI background check is sufficient.
- Medical Evaluation can be conducted in the U.S. or Angola.
- Proof of income.
- Birth certificate of the prospective adoptive parent(s).
- Birth certificate (if available) for the prospective adoptive child or a statement from the institution where the child has been cared for.
- Marriage certificate and divorce decree(s) of prospective adoptive parent (s), if applicable.
- Consent from any living biological parent(s) of the child to adopt.

All documents must be translated into Portuguese. The translation needs to be done in Angola. Any translator in Angola can do the translation. A list of translators is available from the Consular Section of the U.S. Embassy. The court will ask the translator to swear in court that the translation is correct.

Embassy of the Republic of Angola
2100-2108 16th Street, NW
Washington, DC 20009
Tel: 202-785-1156
Fax: 202-785-1258
http://www.angola.org/

U.S. Immigration Requirements: Prospective adopting parents are strongly encouraged to consult USCIS publication M-249, *The Immigration of Adopted and Prospective Adoptive Children*, as well as the Department of State publication, *Intercountry Adoptions*. Please see the *Intercountry Adoption* section of this book for more details and review current reports online at http://adoption.state.gov.

Additional Information: For information on intercountry adoption and international parental child abduction, and security information for U.S. citizens traveling abroad, call Toll Free 1-888-407-4747. This number is available from 8:00 a.m. to 8:00 p.m. EST/EDT, Monday through Friday (except U.S. federal holidays). Callers who are unable to use toll-free numbers, such as those calling from overseas, may obtain information and assistance during these hours by calling 1-202-501-4444.

ANTIGUA AND BARBUDA

Compiled from the July 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Antigua and Barbuda

PROFILE

Geography

Area: Antigua—281 sq. km. (108 sq. mi.); Barbuda—161 sq. km. (62 sq. mi.).

Cities: Capital—St. John's (pop. 30,000).

Terrain: Generally low-lying, with highest elevation 405 m. (1,330 ft.).

Climate: Tropical maritime.

People

Nationality: Noun and adjective—Antiguan(s), Barbudan(s).

Population: (2006) 84,097.

Annual population growth rate: (2005) 1.3%.

Ethnic groups: Almost entirely of African origin; some of British, Portuguese, and Levantine Arab origin.

Religions: Principally Anglican, with evangelical Protestant and Roman Catholic minorities.

Languages: English.

Education: (2005) Adult literacy—85.8%.

Health: (2006) Infant mortality rate—10/1,000. Life expectancy—men 70 years; women 74 years.

Work force: (2005) 30,000 (commerce and services, agriculture, other industry).

Unemployment: (2002) 13%.

Government

Type: Parliamentary democracy; independent sovereign state within the Commonwealth.

Constitution: 1981.

Independence: November 1, 1981.

Government branches: Executive—governor general (representing Queen Elizabeth II, head of state), prime minister (head of government), cabinet. Legislative—bicameral Parliament. Judicial—magistrate's courts, Eastern Caribbean Supreme Court (High Court and Court of Appeals), Privy Council in London.

Political subdivisions: Six parishes and two dependencies (Barbuda and Redonda).

Political parties: Antigua Labour Party (ALP), United Progressive Party (UPP, majority), Barbuda People's Movement (BPM).

Suffrage: Universal at 18.

Economy

GDP: (2007) $1.189 billion.

GDP growth rate: (2007) 3.8%.

Per capita GDP: (2007) $10,671.

Inflation: (2005) 0.9%.

Natural resources: Negligible.

Agriculture: Fish, cotton, livestock, vegetables, and pineapples.

Services: Tourism, banking, and other financial services.

Trade: (2005) Exports—$58 million (merchandise) and $454 million (commercial services). Major markets—European Union (23.2%), United States (7.7%), Anguilla (7.0%), St. Kitts and Nevis (10.3%), Netherlands Antilles (23.4%). Imports—$497 million (merchandise) and $197 million (commercial services). Major suppliers—United States (48.9%), Netherlands Antilles (10.2%), European Union (11.6%), Trinidad and Tobago (10.9%), Canada (3.7%).

Exchange rate: EC$2.70 = U.S. $1.

HISTORY

Antigua was first inhabited by the Siboney ("stone people"), whose settlements date at least to 2400 BC. The Arawaks—who originated in Venezuela and gradually migrated up the chain of islands now called the Lesser Antilles—succeeded the Siboney. The warlike Carib people drove the Arawaks from neighboring islands but apparently did not settle on either Antigua or Barbuda.

Christopher Columbus landed on the islands in 1493, naming the larger one "Santa Maria de la Antigua." The English colonized the islands in 1632. Sir Christopher Codrington established the first large sugar estate in Antigua in 1674, and leased Barbuda to raise provisions for his plantations. Barbuda's only town is named after him. Codrington and others brought

slaves from Africa's west coast to work the plantations. Antiguan slaves were emancipated in 1834, but remained economically dependent on the plantation owners. Economic opportunities for the new freedmen were limited by a lack of surplus farming land, no access to credit, and an economy built on agriculture rather than manufacturing. Poor labor conditions persisted until 1939, which saw the birth of the trade union movement in Antigua and Barbuda. The Antigua Trades and Labour Union became the political vehicle for Vere Cornwall Bird, who was elected as the Labour Union's president in 1943. The Antigua Labour Party (ALP), formed by Bird and other trade unionists, first ran candidates in the 1946 elections and became the majority party in 1951, beginning a long history of electoral victories. Voted out of office in the 1971 general elections that swept the progressive labor movement into power, Bird and the ALP returned to office in 1976, winning renewed mandates in every subsequent election under Vere Bird's leadership until 1994 and also under the leadership of his son, Lester Bird, until March 2004. In March 2004 the ALP lost power in national elections that gave the United Progressive Party (UPP) 13 of the 17 seats in Parliament. The ALP lost again to the Baldwin Spencer-led UPP in the March 2007 elections.

GOVERNMENT AND POLITICAL CONDITIONS

As head of state, Queen Elizabeth II is represented in Antigua and Barbuda by a governor general who acts on the advice of the prime minister and the cabinet. Antigua and Barbuda has a bicameral legislature: a 17-member Senate appointed by the governor general—mainly on the advice of the prime minister and the leader of the opposition—and a 17-member popularly elected House of Representatives. The prime minister is the leader of the majority party in the House and conducts affairs of state with the cabinet. The prime minister and the cabinet are responsible to the Parliament. Elections must be held at least every 5 years but may be called by the prime minister at any time. National elections were last held on March 23, 2007. Constitutional safeguards include freedom of speech, press, worship, movement, and association. Antigua and Barbuda is a member of the eastern Caribbean court system. Jurisprudence is based on English common law.

Principal Government Officials

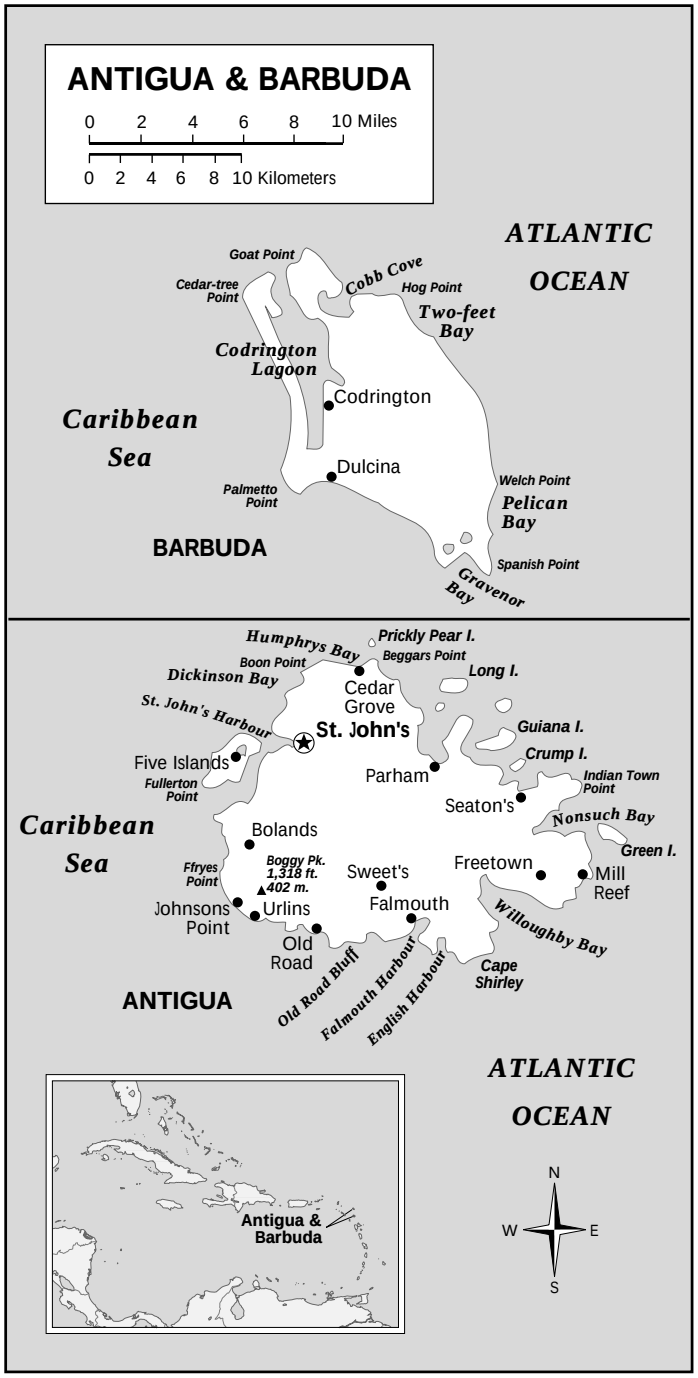
Last Updated: 11/12/08

Governor General: **James B. CARLISLE**
Prime Min.: **Baldwin SPENCER**
Dep. Prime Min.:
Min. of Agriculture Lands, Marine Resources, & Agro-Industries:
Min. of Barbuda Affairs: **Baldwin SPENCER**
Min. of Defense: **Baldwin SPENCER**
Min. of Education, Sports, & Youth Affairs: **Bertrand JOSEPH**
Min. of Finance & the Economy: **Eroll CORT**
Min. of Foreign Affairs & International Trade: **Baldwin SPENCER**
Min. of Health: **John Herbert MAGINLEY**
Min. of Housing & Social Transformation: **Hilson BAPTISTE**
Min. of Information & Broadcasting: **Baldwin SPENCER**
Min. of Justice & Public Safety: **Colin DERRICK**
Min. of Labor, Public Administration, & Empowerment: **Jacqui QUINN-LEANDRO**
Min. of Legal Affairs: **Justin SIMON**
Min. of National Security: **Baldwin SPENCER**
Min. of Tourism, Culture, & Civil Aviation: **Harold LOVELL**
Min. of Works, Transportation, & the Environment: **Wilmoth DANIEL**
Attorney General: **Justin SIMON**
Ambassador to the US: **Lionel HURST**
Permanent Representative to the UN, New York: **John W. ASHE**

Antigua and Barbuda maintains an embassy in the United States at 3216 New Mexico Ave. NW, Washington, DC 20016 (tel. 202-362-5122).

ECONOMY

Antigua and Barbuda's service-based economy grew by 3.8% in 2007, experiencing its third consecutive year of strong growth. Construction, banking and insurance, communications, and wholesale and retail trade sectors were the main contributors to economic growth, which was driven by a construction boom in hotels and housing, as well as projects related to the 2007 Cricket World Cup. The tourism and hospitality sector has largely recovered after the decrease in tourism following the September 11, 2001 terrorist attacks. It posted a strong performance in 2004, and in 2005 the sector was estimated at 50% of GDP.



To lessen its vulnerability to natural disasters and economic shocks, Antigua has sought to diversify its economy by encouraging growth in transportation, communications, Internet gambling, and financial services. Antigua and Barbuda's currency is the Eastern Caribbean Dollar (EC$), a regional currency shared among members of the Eastern Caribbean Currency Union (ECCU). The Eastern Caribbean Central Bank (ECCB) issues the EC$, manages monetary policy, and regulates and supervises commercial banking activities in its member countries. The ECCB has kept the EC$ pegged at EC$2.7=U.S. $1.

Antigua and Barbuda is a beneficiary of the U.S. Caribbean Basin Initiative that grants duty-free entry into the United States for many goods.

In 2005, 7.7% of its total exports went to the United States, and 48.9% of its total imports came from the United States. Antigua and Barbuda also belongs to the predominantly English-speaking Caribbean Community and Common Market (CARICOM) and the CARICOM Single Market and Economy (CSME).

FOREIGN RELATIONS

Antigua and Barbuda maintains diplomatic relations with the United States, Canada, the United Kingdom,

and the People's Republic of China, as well as with many Latin American countries and neighboring Eastern Caribbean states. It is a member of the United Nations, the Commonwealth of Nations, the Organization of American States, the Organization of Eastern Caribbean States, and the Eastern Caribbean's Regional Security System (RSS). Unlike some of its neighbors in the Eastern Caribbean, Antigua and Barbuda has withheld recognition of Taiwan and has established relations with the People's Republic of China.

U.S.-ANTIGUA AND BARBUDA RELATIONS

The United States has maintained friendly relations with Antigua and Barbuda since its independence. The United States has supported the Government of Antigua and Barbuda's effort to expand its economic base and to improve its citizens' standard of living. However, concerns over the lack of adequate regulation of the financial services sector prompted the U.S. Government to issue a financial advisory for Antigua and Barbuda in 1999. The advisory was lifted in 2001, but the U.S. Government continues to monitor the Government of Antigua and Barbuda's regulation of financial services.

The United States also has been active in supporting post-hurricane disaster assistance and rehabilitation through the U.S. Agency for International Development's (USAID) Office of Foreign Disaster Assistance and the Peace Corps. U.S. assistance is primarily channeled through multilateral agencies such as the World Bank and the Caribbean Development Bank (CDB), as well as through the USAID office in Bridgetown, Barbados. In addition, Antigua and Barbuda receives counter-narcotics assistance and benefits from U.S. military exercise-related and humanitarian civic assistance construction projects.

Antigua and Barbuda is strategically situated in the Leeward Islands near maritime transport lanes of major importance to the United States. Antigua has long hosted a U.S. military presence. The former U.S. Navy support facility, turned over to the Government of Antigua and Barbuda in 1995, is now being developed as a regional Coast Guard training facility. Antigua and Barbuda's location close to the U.S. Virgin Islands and Puerto Rico makes it an attractive transshipment point for narcotics traffickers. To address these problems, the United States and Antigua and Barbuda have signed a series of counter-narcotic and counter-crime treaties and agreements, including a maritime law enforcement agreement (1995), subsequently amended to include overflight and order-to-land provisions (1996); a bilateral extradition treaty (1996); and a mutual legal assistance treaty (1996).

In 2005, Antigua and Barbuda had 239,804 stay-over visitors, with nearly 28% of Antigua and Barbuda's visitors coming from the United States. It is estimated that 4,500 Americans reside in the country.

The United States maintains no official presence in Antigua. The Ambassador and Embassy officers are resident in Barbados and travel to Antigua frequently. However, a U.S. consular agent resident in Antigua assists U.S. citizens in Antigua and Barbuda.

TRAVEL

Consular Information Sheet

April 2, 2008

Country Description: Antigua and Barbuda is a dual island nation known for its beaches, and is a favorite destination for yachtsmen. Tourist facilities are widely available. English is the primary language. Banking facilities and ATMs are available throughout the island.

Entry Requirements: All Americans traveling by air outside the United States are required to present a passport or other valid travel document to enter or re-enter the United States. This requirement will be extended to sea travel (except closed loop cruises), including ferry service, by the summer of 2009. Until then, U.S. citizens traveling by sea must have government-issued photo identification and a document showing their U.S. citizenship (for example, a birth certificate or certificate of nationalization), or other WHTI compliant document such as a passport card for entry or re-entry to the U.S. Sea travelers should also check with their cruise line and countries of destination for any foreign entry requirements.

Applications for the new U.S. Passport Card are now being accepted. We expect cards will be available and mailed to applicants in spring 2008. The card may not be used to travel by air and is available only to U.S. citizens. Further information on the Passport Card is available at http://travel.state.gov/passport/ppt_card/ppt_card_3926.html and upcoming changes to U.S. passport policy can be found on the Bureau of Consular Affairs web site at http://travel.state.gov/travel/cbpmc/cbpmc_2223.html. We strongly encourage all American citizen travelers to apply for a U.S. passport well in advance of anticipated travel. American citizens can visit travel.state.gov or call 1-877-4USA-PPT (1-877-487-2778) for information on how to apply for their passports.

Immigration officials are strict about getting exact information about where visitors are staying, and will often request to see a return ticket or ticket for onward travel, as well as proof of sufficient funds to cover the cost of the visitor's intended stay.

There is a departure tax payable when departing the country. For further information on entry requirements, travelers can contact the Embassy of Antigua and Barbuda, 3216 New Mexico Avenue NW, Washington, DC 20016, telephone (202) 362-5122, or consulates in Miami. Additional information may be found on the home page of the Antigua and Barbuda Department of Tourism at http://www.antigua-barbuda.org.

Safety and Security: For the latest security information, Americans traveling abroad should regularly monitor the Department's Internet web site at http://travel.state.gov where the current Worldwide Caution Travel Alert, Travel Warnings and Travel Alerts can be found.

Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the

U.S., or for callers outside the U.S. and Canada, a regular toll line at 1-202-501-4444.

Crime: Petty street crime does occur, and valuables left unattended on beaches, in rental cars or in hotel rooms are vulnerable to theft. There has been an increase in crime in Antigua, including violent crimes, in the last six months. However, this increase has not, for the most part, affected visitors to the island. The Government of Antigua and Barbuda has taken steps to improve the effectiveness of the police in responding to crimes. As everywhere, visitors to Antigua and Barbuda are advised to be alert and maintain the same level of personal security used when visiting major U.S. cities.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, contact family members or friends, and explain how funds could be transferred.

Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

Medical Facilities and Health Information: There are many qualified doctors in Antigua and Barbuda, but medical facilities are limited to a public hospital and a private clinic and are not up to U.S. standards. The principal medical facility on Antigua is Holberton Hospital, on Hospital Road, St. John's (telephone (268) 462-0251). There is no hyperbaric chamber; divers requiring treatment for decompression illness must be evacuated from the island, to either Saba or Guadeloupe. Serious medical problems requiring hospitalization and/or medical evacuation to the United States can cost thousands of dollars. Doctors and hospitals often expect immediate cash payment for health services, and U.S. medical insurance is not always valid outside the United States. U.S.

Medicare and Medicaid programs do not provide payment for medical services outside the United States. Information on vaccinations and other health precautions, such as safe food and water and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's Internet site at http://www.cdc.gov/travel. For information about outbreaks of infectious diseases abroad, consult the World Health Organization's (WHO) website at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith/en.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Antigua and Barbuda is provided for general reference only, and may not be totally accurate in a particular location or circumstance. Traffic in Antigua and Barbuda moves on the left. Major roads are generally in good condition, but drivers may encounter wandering animals and slow moving heavy equipment.

There is relatively little police enforcement of traffic regulations. Buses and vans are frequently crowded and may travel at excessive speeds. Automobiles may lack working safety and signaling devices, such as brake lights.

Aviation Safety Oversight: The U.S. Federal Aviation Administration (FAA) has assessed the Government of Antigua and Barbuda's Civil Aviation Authority as being in compliance with International Civil Aviation Organization (ICAO) aviation safety standards for the oversight of Antigua and Barbuda'sair carrier operations. For more information, travelers may visit the FAA's internet website at http://www.faa.gov.

Special Circumstances: Like all Caribbean countries, Antigua can be affected by hurricanes. The hurricane season normally runs from June to the end of November, but there have been hurricanes in December in recent years. General information about natural disaster preparedness is available via the Internet from the U.S. Federal Emergency Management Agency (FEMA) at http://www.fema.gov.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offences. Persons violating Antigua and Barbuda's laws, even unknowingly, may be expelled, arrested or imprisoned.

Penalties for possession, use, or trafficking in illegal drugs in Antigua and Barbuda are severe, and convicted offenders can expect long jail sentences and heavy fines. Areas of detention are very uncomfortable. There are no beds, access to sanitary facilities is limited, and food is substandard.

Persons arrested on a Friday or Saturday are likely to remain in detention until regular working hours resume on Monday. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in Antigua and Barbuda are encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration website, and to obtain updated information on travel and security within Antigua and Barbuda. Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate.

By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency. The U.S. Embassy in Bridgetown is located in the Wildey Business Park in suburban Wildey, south and east of downtown Bridgetown. The main number for the Consular Section is (246) 431-0225; after hours, the Embassy duty officer can be reached by calling (246) 436-4950.

The website for Embassy Bridgetown is http://bridgetown.usembassy.gov. Hours of operation are 8:30 a.m.—4:00 p.m., Monday-Friday, except local and U.S. holidays.

The U.S. Consular Agent in Antigua provides passport, citizenship and notarial services, and assists Americans in distress. The Consular Agency is located in Suite #2, Jasmine Court, Friars Hill Rd, St. John's, Antigua. Contact information is as follows: telephone 1-268-463-6531, cellular 1-268-726-6531, or e-mail ANUWndrGyal@aol.com. The mailing address is P.O. Box W-1562, St. John's, Antigua. The Consular Agent is available by appointment only. The office is closed for local and U.S. Holidays.

International Parental Child Abduction

November 2008

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services.

For more information, please read the *International Child Abduction* section of this book and review current reports online at www.travel.state.gov.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is provided for general information only. Questions involving interpretation of specific foreign laws should be addressed to foreign legal counsel.

General Information: Antigua and Barbuda are not a party to the Hague Convention on the Civil Aspects of International Child Abduction, nor are there any international or bilateral treaties in force between Antigua and Barbuda and the United States dealing with international parental child abduction.

American citizens who travel to Antigua and Barbuda place themselves under the jurisdiction of local courts. American citizens planning a trip to Antigua and Barbuda with dual national children should bear this in mind.

Custody Disputes: In Antigua and Barbuda parents who are legally married share the custody of their children. If they are not married, by law the custody is granted to the mother unless there are known facts of inappropriate behavior, mental or social problems. Foreign court orders are not automatically recognized.

Enforcement of Foreign Judgments: Custody orders and judgments of foreign courts are not enforceable in Antigua and Barbuda if they potentially contradict or violate local laws and practices.

For example, an order from a U.S. court granting custody to an American mother will not be honored in Antigua and Barbuda if the mother intends to take the child to live outside Antigua and Barbuda.

Nor will Antigua and Barbuda courts enforce U.S. court decrees ordering a parent in Antigua and Barbuda to pay child support.

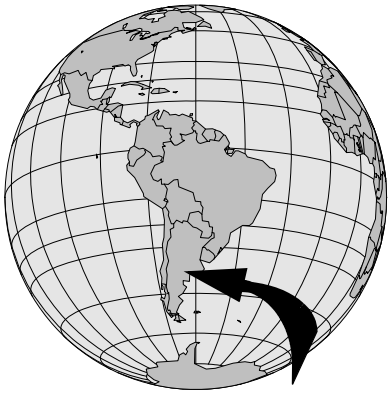
Visitation Rights: In cases where the father has custody of a child, the mother is guaranteed visitation rights. It has been the experience of the U.S. Embassy in Barbados that the father and the paternal grandparents of the child are generally open and accommodating in facilitating the right of the mother to visit and maintain contact with the child.

Dual Nationality: Dual nationality is recognized under Antiguan law. Children of Antigua and Barbuda parents and grandparents automatically acquire Antigua and Barbuda citizenship at birth, regardless of where the child was born.

They are free to enter and leave the country on Antigua and Barbuda passports even if they are entitled to hold the passport of another country.

Travel Restrictions: No exit visas are required to leave Antigua and Barbuda. However, a mother may face serious legal difficulties if she attempts to take her children out of Antigua and Barbuda without the permission of the father.

Immigration officials at the airport or border may ask to see such permission in writing before allowing children to exit.



Criminal Remedies: For information on possible criminal remedies, please contact your local law enforcement authorities or the nearest office of the Federal Bureau of Investigation (FBI). Information is also available on the Internet at the web site of the U.S. Department of Justice, Office of Juvenile Justice and Delinquency Prevention (OJJDP) at http://www.ojjdp.ncjrs.org. Persons who wish to pursue a child custody claim in an Antiguan court should retain an attorney in Antigua and Barbuda. The U.S. Embassy in Barbados maintains a list of attorneys willing to represent American clients. A copy of this list may be obtained by requesting one from the Embassy at:

U.S. Embassy Bridgetown
Consular Section
ALICO Building, Cheapside
P O Box 302
Bridgetown
Barbados
Telephone: [246] 431-0225
Fax: [246] 431-0179
Web site: www.usembassy.state.gov/bridgetown

Questions involving Antiguan law should be addressed to an Antiguan attorney or to the Embassy of Antigua and Barbuda in the United States at:

Embassy of Antigua and Barbuda
3216 New Mexico Avenue, NW
Washington, DC 20016
Telephone: (202) 362-5122/5166/5211
AmbLHurst@aol.com

For further information on international parental child abduction, contact the Office of Children's Issues, U.S. Department of State at 1-888-407-4747 or visit its web site on the Internet at http://travel.state.gov. You may also direct inquiries to: Office of Children's Issues, U.S. Department of State, Washington, DC 20520-4811; Phone: (202) 736-9090; Fax: (202) 312-9743.

ARGENTINA

Compiled from the December 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
The Argentine Republic

PROFILE

Geography

Area: 2.8 million sq. km. (1.1 million sq. mi.); about the size of the U.S. east of the Mississippi River; second-largest country in South America.

Climate: Varied; predominantly temperate, with extremes ranging from subtropical in the north to arid/sub-Antarctic in far south.

People

Nationality: Noun and adjective—Argentine(s).

Population: (July 2007 est.): 40.3 million.

Annual population growth rate: (2001) 1.05%.

Ethnic groups: European 97%, mostly of Spanish and Italian descent; Mestizo, Amerindian, or other nonwhite groups 3%.

Religions: Roman Catholic 70%, Protestant 9%, Muslim 1.5%, Jewish 0.8%, other 2.5%.

Languages: Spanish.

Education: Compulsory until age 18. Adult literacy (2001)—97%.

Health: Infant mortality rate—16.16/1,000. Life expectancy (2000 est.)—75.48 yrs.

Work force: Industry and commerce—35.8%; agriculture—9.5%; services—54.7%.

Government

Type: Republic.

Constitution: 1853; revised 1994.

Independence: 1816.

Government branches: Executive—president, vice president, cabinet. Legislative—bicameral Congress (72-member Senate, 257-member Chamber of Deputies). Judicial—Supreme Court, federal and provincial trial courts.

Political subdivisions: 23 provinces and one autonomous district (Federal Capital).

Political parties: Justicialist (Peronist), Radical Civic Union (UCR), numerous smaller national and provincial parties.

Suffrage: Universal adult.

Economy (200)

GDP: $261 billion.

Annual real growth rate: +8.7%.

Per capital GDP: $6,630 (estimated).

Natural resources: Fertile plains (pampas); minerals—lead, zinc, tin, copper, iron, manganese, oil, and uranium.

Agriculture: 8% of GDP; including agribusiness, about 55% of exports by value) Products—grains, oilseeds and by-products, livestock products.

Industry: (22.2% of GDP) Types—food processing, oil refining, machinery and equipment, textiles, chemicals and petrochemicals.

Trade: Exports ($55.9 billion)—oilseed by-products, vegetable oils, cars, fuels, grains. Major markets—MERCOSUR 23%; EU 18%; NAFTA 11%. Imports ($44.8 billion)—machinery, vehicles and transport products, chemicals. Major suppliers—MERCOSUR 36%; EU 17%, NAFTA 16%. Imported goods from the United States totaled approx. 12% of Argentine imported goods.

PEOPLE

Argentines are a fusion of diverse national and ethnic groups, with descendants of Italian and Spanish immigrants predominant. Waves of immigrants from many European countries arrived in the late 19th and early 20th centuries. Syrian, Lebanese, and other Middle Eastern immigrants number about 500,000 to 600,000, mainly in urban areas. Argentina's population is overwhelmingly Catholic, but it also has the largest Jewish population in Latin America, estimated at between 280,000 and 300,000. In recent years, there has been a substantial influx of immigrants from neighboring countries, particularly Paraguay, Bolivia, and Peru. The indigenous population, estimated at 700,000, is concentrated in the provinces of the north, northwest, and south. The Argentine population has one of Latin America's

lowest growth rates. Eighty percent of the population resides in cities or towns of more than 2,000, and over one-third lives in the greater Buenos Aires area.

HISTORY

Europeans arrived in the region with the 1502 voyage of Amerigo Vespucci. Spanish navigator Juan Diaz de Solias visited what is now Argentina in 1516. Spain established a permanent colony on the site of Buenos Aires in 1580, although initial settlement was primarily overland from Peru. The Spanish further integrated Argentina into their empire by establishing the Vice Royalty of Rio de la Plata in 1776, and Buenos Aires became a flourishing port. Buenos Aires formally declared independence from Spain on July 9, 1816. Argentines revere Gen. Jose de San Martin—who campaigned in Argentina, Chile, and Peru—as the hero of their national independence. Following the defeat of the Spanish, centralist and federalist groups waged a lengthy conflict between themselves to determine the future of the nation. A modern constitution was promulgated in 1853, and a national unity government was established in 1861.

Two forces combined to create the modern Argentine nation in the late 19th century: the introduction of modern agricultural techniques and integration of Argentina into the world economy. Foreign investment and immigration from Europe aided this economic revolution. Investment, primarily from Britain, came in such fields as railroads and ports. As in the United States, the migrants who worked to develop Argentina's resources—especially the western pampas—came from throughout Europe.

From 1880 to 1930, Argentina became one of the world's 10 wealthiest nations based on rapid expansion of agriculture and foreign investment in infrastructure. Conservative forces dominated Argentine politics until 1916, when their traditional rivals, the Radicals, won control of the government. The Radicals, with their emphasis on fair elections and democratic institutions, opened their doors to Argentina's rapidly expanding middle class as well as to groups previously excluded from power. The Argentine military forced aged Radical President Hipolito Yrigoyen from power in 1930 and ushered in another decade of Conservative rule. Using fraud and force when necessary, the governments of the 1930s attempted to contain the currents of economic and political change that eventually led to the ascendancy of Juan Domingo Peron (b. 1897). New social and political forces were seeking political power, including a modern military and labor movements that emerged from the growing urban working class.

The military ousted Argentina's constitutional government in 1943. Peron, then an army colonel, was one of the coup's leaders, and he soon became the government's dominant figure as Minister of Labor. Elections carried him to the presidency in 1946. He created the Partido Unico de la Revolucion, which became more commonly known as the Peronist or Justicialista party (PJ). He aggressively pursued policies aimed at empowering the working class and greatly expanded the number of unionized workers. In 1947, Peron announced the first 5-year plan based on the growth of industries he nationalized. He helped establish the powerful General Confederation of Labor (CGT). Peron's dynamic wife, Eva Duarte de Peron, known as Evita (1919-52), played a key role in developing support for her husband. Peron won reelection in 1952, but the military sent him into exile in 1955. In the 1950s and 1960s, military and civilian administrations traded power, trying, with limited success, to deal with diminished economic growth and continued social and labor demands. When military governments failed to revive the economy and suppress escalating terrorism in the late 1960s and early 1970s, the way was open for Peron's return.

On March 11, 1973, Argentina held general elections for the first time in 10 years. Peron was prevented from running, but voters elected his stand-in, Dr. Hector Campora, as President. Peron's followers also commanded strong majorities in both houses of Congress. Campora resigned in July 1973, paving the way for new elections. Peron won a decisive victory and returned as President in October 1973 with his third wife, Maria Estela Isabel Martinez de Peron, as Vice President. During this period, extremists on the left and right carried out violent acts with a frequency that threatened public order. The government resorted to a number of emergency decrees, including the implementation of special executive authority to deal with violence. This allowed the government to imprison persons indefinitely without charge.

Peron died on July 1, 1974. His wife succeeded him in office, but a military coup removed her from office on March 24, 1976, and the armed forces formally exercised power through a junta composed of the three service commanders until December 10, 1983. The armed forces applied harsh measures against those they considered extremists and many suspected of being their sympathizers. While they were able to gradually restore basic order, the human costs of what became known as "El Proceso," or the "Dirty War" were high. Conservative counts list between 10,000 and 30,000 persons as "disappeared" during the 1976-83 period. Serious economic problems, mounting charges of corruption, public revulsion in the face of human rights abuses and, finally, the country's 1982 defeat by the United Kingdom in an unsuccessful attempt to seize the Falklands/Malvinas Islands all combined to discredit the Argentine military regime. The junta lifted bans on political parties and gradually restored basic political liberties.

Democracy returned to Argentina in 1983, with Raul Alfonsin of the country's oldest political party, the Radical Civic Union (UCR), winning the presidency in elections that took place on October 30, 1983. He began a 6-year term of office on December 10, 1983. In 1985 and 1987, large turnouts for mid-term elections demonstrated

continued public support for a strong and vigorous democratic system. The UCR-led government took steps to resolve some of the nation's most pressing problems, including accounting for those who disappeared during military rule, establishing civilian control of the armed forces, and consolidating democratic institutions. However, failure to resolve endemic economic problems, and an inability to maintain public confidence undermined the effectiveness of the Alfonsin government, which left office 6 months early after Justicialista Party (PJ) candidate Carlos Saul Menem won the 1989 presidential elections.

President Menem imposed peso-dollar parity (convertibility) in 1992 to break the back of hyperinflation and adopted far-reaching market-based policies. Menem's accomplishments included dismantling a web of protectionist trade and business regulations, and reversing a half-century of statism by implementing an ambitious privatization program. These reforms contributed to significant increases in investment and growth with stable prices through most of the 1990s. Unfortunately, widespread corruption in the administrations of President Menem and his successor President Fernando De la Rua, who won election in 1999 at the head of a UCR-led coalition of center and center-left parties known as the "Alianza," shook confidence and weakened the recovery. Also, while convertibility defeated inflation, its permanence undermined Argentina's export competitiveness and created chronic deficits in the current account of the balance of payments, which were financed by massive borrowing. The contagion effect of the Asian financial crisis of 1998 precipitated an outflow of capital that gradually mushroomed into a 4-year depression that culminated in a financial panic in November 2001. In December 2001, amidst bloody riots, President De la Rua resigned.

A legislative assembly on December 23, 2001, elected Adolfo Rodriguez Saa (PJ) to serve as President and called for general elections to choose a new president within three months.

Rodriguez Saa announced immediately Argentina's default on $88 billion in debt (the largest sovereign debt default in history), but expressed his commitment to maintain the currency board and the peso's 1-to-1 peg to the dollar. Rodriguez Saa, however, was unable to rally support from within his own party for his temporary administration and this, combined with renewed violence in the Federal Capital, led to his resignation on December 30. Yet another legislative assembly elected Eduardo Duhalde (PJ) President on January 1, 2002 to complete the term

of former President De la Rua. Duhalde assumed office in the midst of a widespread public rejection of the "political class" in Argentina. Duhalde—differentiating himself from his three predecessors—quickly abandoned the peso's ten-year-old link with the dollar, a move that was followed by a sharp currency depreciation and rising inflation. In the face of increasing poverty and continued social unrest, Duhalde moved to bolster the government's social programs and to contain inflation. He was able to stabilize the social situation, but advanced presidential elections by six months in order to pave the way for a president elected with a popular mandate.

In the first round of the presidential election on April 27, 2003, former President Carlos Menem (PJ) won 24.3% of the vote, Santa Cruz Governor Nestor Kirchner (PJ) won 22%, followed by RECREAR candidate Ricardo Lopez Murphy with 16.4% and Affirmation for an Egalitarian Republic (ARI) candidate Elisa Carrio with 14.2%. Menem withdrew from the May 25 runoff election after polls showed overwhelming support for Kirchner in the second round of elections. President Kirchner assumed the presidency on May 25, 2003. He took office following the immense social and economic upheaval stemming from the financial crisis caused by a failed currency convertibility regime. Despite widespread concern, democracy and democratic institutions survived the crisis, and Nestor Kirchner took firm control as President. After taking office, Kirchner focused on consolidating his political strength and alleviating social problems. He pushed for changes in the Supreme Court and military and undertook popular measures, such as raising government salaries, pensions, and the minimum wage. On October 23, 2005, President Kirchner, bolstered by Argentina's rapid economic growth and recovery from its 2001/2002 crisis, won a major victory in the midterm legislative elections, giving him a strengthened mandate and control of a legislative majority in both the Senate and Chamber of Deputies. Many experts considered President Kirchner to be the most powerful Argentine president since democracy was restored in 1983. Although Kirchner enjoyed approval ratings of over 60%, he announced in July 2007 that he would not seek reelection and declared his wife, then-Senator Cristina Fernández de Kirchner, to be a candidate to succeed him. With the Peronist party under a trustee's control, President Kirchner smoothed the way for Fernández de Kirchner to compete under the Victory Front's (Frente para la Victoria, or FpV) banner in general elections in October. She won 45% of the vote and defeated her closest competitor, Elisa Carrió of the Civic Coalition, by 22.25 points. Thus, Cristina Fernández de Kirchner became the first Argentine woman elected to the presidency. "Cristina," as Argentines often refer to her, was sworn into office on December 10, 2007.

GOVERNMENT AND POLITICAL CONDITIONS

Argentina's constitution of 1853, as revised in 1994, mandates a separation of powers into executive, legislative, and judicial branches at the national and provincial level. Each province also has its own constitution, roughly mirroring the structure of the national constitution. The president and vice president are directly elected to 4-year terms. Both are limited to two consecutive terms; they are allowed to stand for a third term or more after an interval of at least one term. The president appoints cabinet ministers, and the constitution grants him considerable power, including authority to enact laws by presidential decree under conditions of "urgency and necessity" and the line-item veto.

Since 2001, senators have been directly elected, with each province and the Federal Capital represented by three senators. Senators serve six-year terms. One-third of the Senate stands for reelection every two years. Members of the Chamber of Deputies are directly elected to four-year terms. Voters elect half the members of the lower house every two years. Both houses are elected via a system of proportional representation. Female representation in Congress—at nearly one-third of total seats—ranks among the world's highest, with representation comparable to European Union (EU) countries such as Austria and Germany.

The constitution establishes the judiciary as an independent government entity. The president appoints members of the Supreme Court with the consent of the Senate. The president on the recommendation of a magistrates' council appoints other federal judges. The Supreme Court has the power to declare legislative acts unconstitutional.

Political Parties

The two largest traditional political parties are the Justicialist Party (PJ—also called Peronist), founded in 1945 by Juan Domingo Peron, and the Union Civica Radical (UCR), or Radical Civic Union, founded in 1891. Traditionally, the UCR has had more urban middle-class support and the PJ more labor support, but both parties have become more broadly based. Although both parties are currently undergoing a process of dramatic change and restructuring, they have maintained their nationwide structures. New emerging political forces, like the Civic Coalition (CC) and the National Proposal (PRO) parties, are concentrated in the urban centers and are working to build national party structures.

The PJ is led by former President Nestor Kirchner. The Victory Front (Frente para la Victoria, or FpV) is a coalition that includes Peronists and non-Peronists aligned with President Cristina Fernández de Kirchner and Nestor Kirchner.

The UCR's serious fragmentation and poor electoral performance since 2003 has seriously eroded its role as the main opposition party, and many analysts warn that the party is on the verge of extinction. While the national UCR leadership opposes the Fernández de Kirchner government,

its governors, several mayors, and many other representatives have aligned themselves with the Kirchners. In October 2007, several Radical deputies ran under the FpV ballot, and the Vice Presidential candidate with Cristina Fernandez de Kirchner, Julio Cobos, was a "Radical-K," as pro-Kirchner Radicals are called. Although the "Radical-K" representatives formed a separate bloc in the Lower House, they are still supportive of the FpV's policies. In the last presidential elections, the UCR did not run its own candidate and aligned itself with a former Peronist Economic Minister, Roberto Lavagna, who came in third with less than 17% of the national vote. Although seriously weakened, the UCR continues to retain some strength in a few provinces and several municipalities. The UCR is the only opposition political party with a nationwide structure.

The Civic Coalition (CC) is a political alliance led by the traditionally left-leaning Affirmation for an Egalitarian Republic (Afirmación por una República Igualitaria, or ARI) party, in conjunction with the Socialist party and the Union for All (Unión Por Todos) party. The CC came in second in the October 2007 presidential elections, positioning itself as the second largest political force. The CC's leader, Elisa Carrió, was a fierce critic of then-President Nestor Kirchner and continues to oppose Fernandez de Kirchner's policies. The Civic Coalition's electoral base is concentrated in large, urban centers, and has governors in the province of Santa Fe and the southern province of Tierra del Fuego.

The center-right Republican Proposal (Propuesta Republicana, or PRO) party represents another emerging political force with a larger representation in the Lower House than in the past. PRO is mostly based in the city of Buenos Aires, where its leader, Mauricio Macri, won the mayoral elections in June 2007 in a run-off with 60% of the vote, defeating then-Education Minister Daniel Filmus, who ran on the FpV ticket supported by then-President Kirchner.

Historically, organized labor—largely tied to the Peronist Party—and the armed forces also have played significant roles in national life. However, the Argentine military's public standing suffered as a result of its perpetration of human rights abuses, economic mismanagement, and defeat by the United Kingdom during the period of military rule (1976-83). The Argentine military today is a downsized, volunteer force fully subordinate to civilian authority.

Principal Government Officials

Last Updated: 11/12/08

President: **Cristina FERNANDEZ DE KIRCHNER**
Vice President: **Julio COBOS**
Chief of Cabinet: **Sergio MASSA**
Min. of Defense: **Nilda GARRE**
Min. of Economy & Production: **Carlos FERNANDEZ**
Min. of Education: **Juan Carlos TEDESCO**
Min. of Federal Planning, Public Investment, & Services: **Julio DE VIDO**
Min. of Foreign Relations, Intl. Trade, & Worship: **Jorge TAIANA**
Min. of Health: **Graciela OCANA**
Min. of Interior: **Florencio RANDAZZO**
Min. of Justice, Security, & Human Rights: **Anibal FERNANDEZ**
Min. of Labor, Employment, & Social Security: **Carlos TOMADA**
Min. of Science & Technology: **Lino BARANAO**
Min. of Social Development: **Alicia KIRCHNER**
Pres., Central Bank: **Martin REDRADO**
Ambassador to the US: **Hector TIMERMAN**
Permanent Representative to the UN, New York: **Jorge ARGUELLO**

ECONOMY

Argentina's economy has sustained a robust recovery following the severe 2001/2002 economic crisis, with five consecutive years of over 8% real growth in gross domestic product (GDP). Argentine GDP reached U.S. $261 billion in 2007, approximately U.S. $6,630 per capita, with investment increasing an estimated 14.4% for the year and representing approximately 23% of GDP. The economic expansion created jobs, with unemployment down from over 21% in 2002 to 8.0% in the second quarter of 2008. Poverty levels also dropped. According to government statistics, 20.6% of the population in the 28 largest urban areas remained below the poverty line in the first quarter of 2008, down from over 50% in the immediate aftermath of the economic crisis.

Argentina benefits from rich natural resources, a highly educated population, a globally competitive agricultural sector, and a diversified industrial base. Argentina's post-crisis move to a more flexible exchange rate regime, along with sustained global and regional growth, a boost in domestic aggregate demand via monetary, fiscal, and income distribution policies, and favorable international commodity prices and interest rate trends were catalytic factors in supporting renewed growth between 2003 and 2007. The economic resurgence also enabled the government to accumulate substantial official reserves (over $45 billion as of early November 2008) to help insulate the economy from external shocks. A higher tax burden, improved tax collection efforts, and the recovery's strong impact on tax revenues supported the government's successful efforts to maintain primary fiscal surpluses since 2003.

Argentina has continued to perform well in 2008, with full year real GDP growth projected at about 7%, according to the Argentine Central Bank's consensus survey. A range of economic experts have identified challenges to sustaining high levels of economic growth in the future, including capacity constraints; the need for substantial new investment in primary infrastructure; potential energy shortages in the face of high growth and energy prices maintained by the government below international market levels. Other challenges include the increasing scarcity

of skilled labor, inflation (8.5% in 2007 according to official statistics, but estimated by independent analysts to be significantly higher), and the heterodox policies employed to contain inflation. These include pressure on the private sector to limit price increases on some consumer goods, delays in the renegotiation of public service tariffs, export trade taxes, and export bans. Recent global financial turmoil and rapid declines in world commodity prices are also threats to Argentina's ability to continue its rapid rate of economic expansion.

Argentina's exchange rate policy is based on a managed float, and the 2009 budget estimates the average exchange rate at 3.19. Market analysts have considered the peso's real exchange rate undervalued in previous years. This, along with historically high global commodity prices, helped lift export volumes and values to record levels, resulting in an $11.2 billion trade surplus in 2007. Foreign trade was approximately 39% of GDP in 2007 (up from only 11% in 1990) and plays an increasingly important role in Argentina's economic development. Exports totaled approximately 21% of GDP in 2007 (up from 14% in 2002), and key export markets included MERCOSUR (23% of exports), the EU (18%), and NAFTA countries (11%). Two-way trade in goods with the U.S. in 2007 totaled about $9.7 billion (according to both U.S. and Argentine government statistics). Total two-way trade in services in 2007 was $4.0 billion (according to the Bureau of Economic Analysis, U.S. Department of Commerce). The production of grains, cattle, and other agricultural goods continues to be the backbone of Argentina's export economy. High technology goods and services are emerging as significant export sectors. A decline in global commodity prices and slower global growth levels in the second half of 2008 is expected to reduce Argentina's trade surplus levels in the medium term.

Nearly 500 U.S. companies are currently operating in Argentina, employing over 155,000 Argentine workers. U.S. investment in Argentina is concentrated in the manufacturing, information, and financial sectors. Other major sources of investment include Spain, Chile, Italy, France, Canada, Japan, and Brazil. Continuing Argentine arrears to international creditors and a large number of arbitration claims filed by foreign companies are legacies of the 2001/2002 economic crisis that remain to be resolved and adversely impact Argentina's investment climate. Outstanding debts include over $20 billion in default claims by international bondholders and between $7 billion and $8 billion owed to official creditors. President Cristina Fernandez de Kirchner announced in September 2008 that the government intends to pay debts to Paris Club creditors using Central Bank reserves. She further announced that the government would consider a proposal from private banks on the settlement with international bondholders of untendered Argentine Government debt.

NATIONAL SECURITY

The president and a civilian minister of defense control the Argentine armed forces. The Interior Ministry controls the paramilitary Gendarmeria (border police), the Federal Police, the Prefectura Naval (coast guard), and the Airport Security Police. The Argentine armed forces maintain close defense cooperation and military supply relationships with the United States. Other countries also have military relationships with the Argentine forces, principally Israel, Germany, France, Spain, Italy, Brazil, Chile, and Venezuela.

The current Minister of Defense has pursued an aggressive restructuring program based on the Argentine 1988 defense law. Priorities include emphasis on joint operations and peacekeeping. There has been minimal recapitalization due to budget constraints experienced over the past 5 years.

FOREIGN RELATIONS

Argentina's foreign policy priorities are focused on increasing regional partnerships, including expanding the MERCOSUR regional trade bloc by integrating Venezuela and Bolivia as new full members. Argentina has played a positive role in promoting human rights and democratic institutions in the hemisphere, particularly in Haiti. Argentina currently has nearly 600 peacekeeping troops in Haiti in support of MINUSTAH, reflecting its traditionally strong support of UN peacekeeping operations. As a member of the Board of Governors of the International Atomic Energy Agency, Argentina has been a strong voice in support of nuclear non-proliferation issues.

U.S.-ARGENTINE RELATIONS

The U.S. has a positive bilateral relationship with Argentina based on many common strategic interests, including non-proliferation, counternarcotics, counterterrorism, and issues of regional stability, as well as the strength of commercial ties. Argentina is a participant in the Three-Plus-One regional mechanism (Argentina, Brazil, Paraguay, and the U.S.), which focuses on coordination of counter-terrorism policies in the tri-border region. Argentina has endorsed the Proliferation Security Initiative, and has implemented the Container Security Initiative, a program of the U.S. Department of Homeland Security which provides for the selective scanning of shipping containers for weapons of mass destruction components. In 2004, Argentina signed a Letter of Agreement with the Department of State opening the way for enhanced cooperation with the U.S. on counternarcotics issues and enabling the U.S. to begin providing financial assistance to the Government of Argentina for its counternarcotics efforts. In recognition of its contributions to international security and peacekeeping, the U.S. Government designated Argentina as a major non-NATO ally in

January 1998. The Office of the Secretary of Defense and the Argentine Ministry of Defense hold an annual Bilateral Working Group Meeting, alternating between Argentina and Washington, DC.

U.S.-Argentine cooperation also includes science and technology initiatives in the fields of space, peaceful uses of nuclear energy, and the environment. In June 2007, the U.S. and Argentina modernized a bilateral civil aviation agreement to update safety and security safeguards and allow a significant increase in flight frequencies between the two countries, which hold excellent potential for increased tourism and business travel. An active media, together with widespread interest in American culture and society, make Argentina a receptive environment for the information and cultural exchange work of the U.S. Embassy. The Fulbright scholarship program has more than tripled the annual number of U.S. and Argentine academic grantees since 1994, and the U.S. Embassy is actively working to increase other education exchanges.

U.S. Embassy Functions

The U.S. Mission in Buenos Aires carries out the traditional diplomatic function of representing the U.S. Government and people in discussions with the Argentine Government, and more generally, in relations with the people of Argentina. The Embassy is focused on increasing people-to-people contacts, and promoting outreach and exchanges on a wide range of issues.

Political, economic, and science officers deal directly with the Argentine Government in advancing U.S. interests but are also available to brief U.S. citizens on general conditions in the country. Officers from the U.S. Foreign Service, Foreign Commercial Service, and Foreign Agricultural Service work closely with the hundreds of U.S. companies that do business in Argentina, providing information on Argentine trade and industry regulations and assisting U.S. companies starting or maintaining business ventures in Argentina.

The Embassy's Consular Section monitors the welfare and whereabouts of more than 20,000 U.S. citizen residents of Argentina and more than 250,000 U.S. tourists each year. Consular personnel also provide American citizens passport, voting, notary, Social Security, and other services. With the end of Argentine participation in the visa waiver program in February 2002, Argentine tourists, students, and those who seek to work in the United States must have nonimmigrant visas.

The Consular Section processes nonimmigrant visa applications for persons who wish to visit the United States for tourism, studies, temporary work, or other purposes, and immigrant visas for persons who qualify to make the United States a permanent home.

Attaches accredited to Argentina from the Department of Justice—including the Drug Enforcement Administration and the Federal Bureau of Investigation—the Department of Homeland Security, the Federal Aviation Administration, and other federal agencies work closely with Argentine counterparts on international law enforcement cooperation, aviation security, and other issues of concern.

The Department of Defense is represented by the U.S. Military Group and the Defense Attache Office. These organizations ensure close military-to-military contacts, and defense and security cooperation with the armed forces of Argentina.

TRAVEL

Consular Information Sheet

October 2, 2008

Country Description: Last year Argentina's charm, natural beauty and diversity attracted more than 400,000 American citizen visitors, and this year's total is expected to be even higher. Buenos Aires and other large cities have well-developed tourist facilities and services, including many four- and five-star hotels. The quality of tourist facilities in smaller towns outside the capital varies. The country suffered a major financial crisis in 2001-2002. While it has made a dramatic recovery, continued economic hardship has been linked to a rise in street crime.

Entry Requirements: A valid passport is required for U.S. citizens to enter Argentina. U.S. citizens do not need a visa for visits of up to 90 days for tourism and business. U.S. citizens who arrive in Argentina with expired or damaged passports may be refused entry and returned to the United States at their own expense. The U.S. Embassy cannot provide guarantees on behalf of travelers in such situations, and therefore encourages U.S. citizens to ensure their travel documents are valid and in good condition prior to departure from the United States.

Different rules apply to U.S. citizens who also have Argentine nationality, depending on their dates of U.S. naturalization. For more information, check the Argentine Ministry of the Interior web site at www.mininterior.gov.ar/migraciones. Most dual nationals are permitted 60-day visits. Dual nationals who stay beyond their permitted time are required to depart on an Argentine passport.

The application process for an Argentine passport is lengthy, and the U.S. Embassy is not able to provide assistance in obtaining Argentine passports or other local identity documents. Children under 21 years of age who reside in Argentina, regardless of nationality, are required to present a notarized document that certifies both parents' permission for the child's departure from Argentina when the child is traveling alone, with only one parent, or in someone else's custody. An airport tax is collected upon departure, payable in dollars or Argentine pesos.

American citizens wishing to enter Brazil are required to obtain a visa in advance from the Brazilian Embassy or consulate nearest to the traveler's place of residence. The U.S. Embassy in Buenos Aires cannot assist travelers to obtain Brazilian visas.

Visit the Embassy of Argentina's web site at www.embassyofargentina.us for the most current visa information.

Safety and Security: Traffic accidents are the primary threat to life and limb in Argentina. Pedestrians and drivers should exercise caution. Drivers frequently ignore traffic laws and vehicles often travel at excessive speeds. The rate and toll of traffic accidents has been a topic of much media attention over the past year. The Institute of Road Safety and Education, a private Buenos Aires organization dedicated to transportation safety issues, reports that Argentina has the highest traffic mortality rate in South America per 100,000 inhabitants.

Care should be exercised when traveling in Brazil and Paraguay, near the Argentine border, where criminal entities are known to operate. These organizations are involved in the trafficking of illicit goods, and some individuals in the area have been designated by the U.S. Treasury Department for financially supporting terrorist organizations.

The U.S. government is supportive of coordinated efforts by Argentina, Brazil, and Paraguay to combat illegal activity in that region. Americans crossing from Argentina into Paraguay or Brazil may wish to consult the most recent Country Specific Information for those countries.

Demonstrations are common in metropolitan Buenos Aires and occur in other major cities as well. Protesters on occasion block streets, highways, and major intersections, causing traffic jams and delaying travel. While demonstrations are usually nonviolent, hooligans in some of the groups sometimes seek confrontation with the police and vandalize private property. Groups occasionally protest in front of the U.S. Embassy and U.S.-affiliated businesses. U.S. citizens should take common-sense precautions and avoid gatherings or any other event where crowds have congregated to protest. Information about the location of possible demonstrations is available from a variety of sources, including the local media. Additional information and advice may be obtained from the U.S. Embassy at the telephone numbers or email address listed at the end of this document.

Domestic flight schedules can be unreliable. Occasional work stoppages, over-scheduling of flights and other technical problems can result in flight delays, cancellations, or missed connections. Consult local media for information about possible strikes or slow-downs before planning travel within Argentina.

Public transportation is generally reliable and safe. The preferred option for travel within Buenos Aires and other major cities is by radio taxi or "remise" (private car with driver). The best way to obtain safe taxis and remises is to call for one or go to an established stand, rather than hailing one on the street. Hotels, restaurants, and other businesses can order remises or radio taxis, or provide phone numbers for such services, upon request. Passengers on buses, trains, and the subway should be alert for pickpockets and should also be aware that these forms of transport are sometimes interrupted by strikes or work stoppages.

Argentina is a geographically diverse country with mountains, forests, expansive deserts, and glaciers, making it a popular destination for outdoor and adventure sports. Despite the best efforts of local authorities,

assisting visitors lost or injured in such remote areas can be problematic. American citizens have been killed in recent years while mountain climbing, skiing, trekking, and hunting. Travelers visiting isolated and wilderness areas should learn about local hazards and weather conditions and always inform park or police authorities of their itineraries. Reports of missing or injured persons should be made immediately to the police so that a search can be mounted or assistance rendered.

For the latest security information, Americans traveling abroad should regularly monitor the Department of State, Bureau of Consular Affairs' web site at http://travel.state.gov, where the current Travel Warnings and Travel Alerts, as well as the Worldwide Caution, can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the United States, or for callers outside the United States and Canada, a regular toll line at 1-202-501-4444. These numbers are available from 8:00 a.m. to 8:00 p.m. Eastern Time, Monday through Friday (except U.S. federal holidays).

Crime: Most American citizens visit Argentina without incident. Nevertheless, street crime in the larger cities, especially greater Buenos Aires and Mendoza, is a problem for residents and visitors alike. As in any big city, visitors to Buenos Aires and popular tourist destinations should be alert to muggers, pickpockets, scam artists, and purse-snatchers on the street, in hotel lobbies, at bus and train stations, and in cruise ship ports. Criminals usually work in groups and travelers should assume they are armed. Criminals employ a variety of ruses to distract and victimize unsuspecting visitors.

A common scam is to spray mustard or a similar substance on the tourist from a distance. A pickpocket will then approach the tourist offering to help clean the stain, and while doing so, he or an accomplice robs the victim. Thieves regularly nab unattended purses, backpacks, laptops, and luggage, and criminals will often distract visitors for a few seconds to steal valuables. While most American victims are not physically injured when robbed, criminals typically do not hesitate to use force when they encounter resistance. Visitors are advised to immediately hand over all cash and valuables if confronted. Thieves will target visitors wearing expensive watches or jewelry.

Your passport is a valuable document and should be guarded. Passports and other valuables should be locked in a hotel safe, and a photocopy of your passport should be carried for identification purposes. The U.S. Embassy has observed a notable rise in reports of stolen passports in the past year. Some travelers have received counterfeit currency in Argentina. Unscrupulous vendors and taxi drivers sometimes pretend to help tourists review their pesos, then trade bad bills for good ones. Characteristics of good currency can be reviewed at the Argentine Central Bank web site at www.bcra.gov.ar.

Along with conventional muggings, so-called express kidnappings continue to occur. Victims are grabbed off the street based on their appearance and vulnerability. They are made to withdraw as much money as possible from ATM machines, and then their family or co-workers are contacted and told to deliver all the cash that they have on hand or can gather in a couple of hours. Once the ransom is paid, the victim is usually quickly released unharmed. There have been some foreign victims. Visitors are particularly advised not to let children and adolescents travel alone.

Travelers worldwide are advised to avoid packing valuables in their checked baggage. In Argentina, officials have publicly acknowledged the systematic theft of valuables and money from checked baggage at Buenos Aires airports. Authorities are working to resolve the problem and have made a number of arrests, but travelers should exercise continued care and caution.

In many countries around the world, counterfeit and pirated goods are widely available. Transactions involving such products may be illegal under local law. In addition, bringing them back to the United States may result in forfeitures and/or fines. More information on this serious problem is available at http://www.cybercrime.gov/18usc2320.htm.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, contact family members or friends and explain how funds can be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed. The Argentine Federal Police have established a special Tourist Police Unit to receive complaints and investigate crimes against tourists. The unit, located at Corrientes 436 in Buenos Aires, responds to calls around the clock at 4346-5748 or toll-free 0800-999-5000 from anywhere in the country. The local equivalent to the "911" emergency line in the city of Buenos Aires or in the surrounding Province of Buenos Aires is 911 for police assistance. In the city of Buenos Aires, dial 100 in case of fire and 107 for an ambulance. In the Province of Buenos Aires, fire and ambulance numbers vary by location.

Medical Facilities and Health Information: The public health system in Argentina provides emergency and non-emergency services free of charge to all, regardless of nationality or immigration status. However, the quality of non-emergency care in public hospitals is generally below U.S. standards. Medical care in private hospitals in Buenos Aires is generally good, but varies in quality outside the capital. Serious medical problems requiring hospitalization in private facilities and/or medical evacuation to the United States can cost

thousands of dollars or more. Private physicians, clinics, and hospitals often expect immediate cash payment for health services. The U.S. Department of State is unaware of any HIV/AIDS entry restrictions for visitors to or foreign residents of Argentina.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Preventions hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's Internet site at http://wwwn.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www. who.int/ith.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policies apply overseas and will cover prior conditions and emergency expenses such as a medical evacuation, which could cost tens of thousands of dollars. If not covered, visitors are encouraged to consider purchasing travel insurance. No Medicare benefits are available abroad.

Traffic Safety and Road Conditions: Driving in Argentina is generally more dangerous than driving in the United States. By comparison, drivers in Argentina tend to be very aggressive, especially in the capital city of Buenos Aires, and frequently ignore traffic regulations. U.S. driver's licenses are valid in the capital and the province of Buenos Aires, but Argentine or international licenses are required to drive in the rest of the country. For further information, please contact the Argentine Automobile Club, Av. Libertador 1850, 1112 Capital Federal, telephone (011) (54)(11) 4802-6061, or contact the Embassy of Argentina as listed in the above section on Entry Requirements.

Aviation Safety Oversight: The U.S. Federal Aviation Administration (FAA) has assessed the Government of Argentina's Civil Aviation Authority as being in compliance with International Civil Aviation Organization (ICAO) aviation safety standards for oversight of Argentina's air carrier operations. For more information, travelers may visit the FAA web site at http://www.faa.gov.

Special Circumstances: In addition to being subject to all Argentine laws affecting U.S. citizens, dual nationals may also be subject to other laws that impose special obligations on Argentine citizens. In some instances, dual nationality may hamper U.S. Government efforts to provide protection abroad. Please see our information on Customs Regulations.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can also be more severe than in the United States for similar offenses.

Persons violating Argentina's laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Argentina are strict, and convicted offenders can expect lengthy jail sentences and fines. Engaging in sexual conduct with children and using or disseminating child pornography in a foreign country are crimes prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in Argentina are encouraged to register with the U.S. Embassy through the State Department's travel registration web site, so that they can obtain updated information on travel and security within Argentina. Americans without Internet access may register directly with the U.S. Embassy. By registering, American citizens make it much easier for the Embassy or Consulate to contact them in case of emergency. The U.S. Embassy is located at Avenida Colombia 4300 in the Palermo neighborhood of Buenos Aires (near the Plaza Italia stop on the "D" line subway). The main Embassy switchboard telephone is (54) (11) 5777-4533. Recorded consular information, including instructions on whom to contact in case of an American citizen emergency, is available at tel. (54) (11) 4514-1830. The Consular Section fax is (54) (11) 5777-4293. The Consular Section is open to the public from 8:30 a.m. to noon and 2:30 p.m. to 4 p.m. Monday through Friday, except on American and Argentine holidays. Additional information on Embassy services is available on the Internet at http://argentina.usembassy.gov or by e-mail: BuenosAires-ACS@state.gov.

Intercountry Adoption

April 2006

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is based on public sources and current understanding. Questions involving foreign and U.S. immigration laws and legal interpretation should be addressed respectively to qualified foreign or U.S. legal counsel.

Please Note: Presently, intercountry adoption is not permitted in Argentina. Adoption is restricted to Argentine citizens and permanent resident aliens residing in Argentina.

The following information is for U.S. citizens who permanently reside in Argentina who wish to adopt Argentine children.

Patterns of Immigration: Because of the current Argentine government restrictions on intercountry adoption, the U.S. Embassy in Buenos Aires has issued no immigrant visas to Argentine orphans during the past five fiscal years.

Adoption Authority:
Secretaria National de la Ninez, Adolescencia y Familia
Av. Peron 524 piso 1 (for adoptions)
Tel: 4338-5800 into. 6012

Eligibility Requirements for Adoptive Parents: The government of Argentina requires that prospective adoptive parents must be at least 30 years of age if single.

There is no minimum age if married, but the couple must have been married for at least 3 years and have no offspring. At least one of the prospective adoptive parents must be at least 18 years older than the adoptee.

If a couple can prove that they are physically unable to have a child the court will consider marriages of less than 3 years.

Married couples must adopt jointly, except in the following cases:

- Legal separation decree
- Spouse declared mentally incompetent by a court or
- Judicial declaration of absence of spouse (presumption of death)

Residency Requirements: Applicants must be Argentine nationals or permanent resident aliens of Argentina for at least the five years immediately preceding the application for guardianship, which is the first step in the adoption process.

Time Frame: Once the guardianship is granted by the court, it takes between six months and one year to obtain the final adoption decree.

Adoption Agencies and Attorneys: There are some private agencies that help with adoption processing. However, adoptive parents must apply directly to the Consejo Nacionalde Niñez, Adolescencia y Familia.

Adoption Fees: There are no fixed fees to conclude an adoption in Argentina. The filing of the petition for guardianship to lead to adoption is free of charge. Prospective adoptive parents are responsible for their attorneys' fees, although some courts do provide free legal assistance. The judge may set fees for other services rendered.

Adoption Procedures: Biological parents may relinquish their children for adoption only through the courts. This release is irrevocable and can only be signed at the court by appointment set by a judge at least 60 days after the child's birth. It cannot be done immediately following the birth. The law provides for the 60-day window after the birth of the child to allow the birth mother time to think about her decision. During this 60-day period, the court may review the personal conditions of the biological parents, their age, ability to take care of the child, reasons for the release for adoption and any other considerations and information pertinent to this act. A judge may request the opinion of, technical advice from, and/or the effective participation of a Defensor de Menores e Incapaces from the Ministerio Publico de la Defensa to determine the best interests of the child.

A release by the biological parents will not be necessary in those instances when the child is a ward of the court, already an orphan on the streets, or has been housed in a government institution continuously for more than one year without any indication of interest from the birth parent.

Prospective adoptive parents must file an application with the court having jurisdiction over their domicile. In that application, they may indicate their preference for the child's gender and age, and whether they consider themselves capable to adopt a child with health or other problems. The prospective adoptive parents' names will be placed on a single nationwide list by filing date and be made public. The Consejo de la Niñez, Adolescencia y Familia will inform them when their turn is reached.

The court will then release a child in guardianship to the prospective adoptive parents. The child will remain under the jurisdiction of the court for the full period of guardianship. In no case will the child be permitted to depart Argentina. Application for adoption can only be filed after the guardianship period of not less than six months and not more than twelve months has elapsed. Birth parents will lose all rights and obligations after that time and these rights will be transferred to the prospective adoptive parents.

The application for adoption must be filed with the court having jurisdiction over the prospective parents' domicile or at the court that granted the guardianship. The adopted child will be granted the father's surname or compound father and mother's surname if requested by the parents. The adoptive parents may request the issuance of a new birth certificate identifying the adoptive parents as the child's parents.

After the adoption is finalized, the parents may apply to the Argentine Federal Police for the issuance of a passport. See http://www.policiafederal.gov.ar. To travel outside of Argentina, the child must carry signed written permission from both parents or from the non-traveling parent (if traveling with only one parent).

By Argentine law, the adoptive parents must inform the child of his/her adoption before the age of 18. (According to the laws of Argentina, adopted children have the right to know their true biological identity and will have access to their adoption file once they have reached the age of 18.) This is a commitment that the adopting parents must sign at the court at the time the adoption is granted.

Required Documents:

- Prospective adoptive parent's proof of Argentine citizenship or legal permanent residence in Argentina for the last five years
- A copy of the prospective adoptive parents' marriage certificate (if applicable)
- Evidence of good conduct
- Evidence of financial ability

Note: Additional documentation may be requested.

Embassy of Argentina
1600 New Hampshire Ave., N.W.
Washington, D.C. 20009
tel. (202) 939-6400

Argentina also has consulates in Los Angeles, Miami, Atlanta, Chicago, New York, and Houston.

U.S. Immigration Requirements: Prospective adoptive parents are strongly encouraged to consult USCIS publication M-249, *The Immigration of Adopted and Prospective Adoptive Children,* as well as the Department of State publication, *Intercountry Adoptions.*

Please see the *Intercountry Adoption* section of this book for more details and review current reports online at http://adoption.state.gov.

U.S. Embassy:
4300 Avenida Colombia
1425 Buenos Aires
Argentina
Main Tel: (011)(54)(11) 5777-4533
Recorded consular information: (54)(11) 4514-1830
Consular Section Immigrant Visa Unit fax is: (54)(11) 5777- 4448
Email: BuenosAires.IV@state.gov
http://argentina.usembassy.gov

Additional Information: Specific questions about adoption in Argentina may be addressed to the U.S. Embassy in Buenos Aires.

General questions regarding intercountry adoption may be addressed to the Office of Children's Issues, U.S. Department of State, CA/OCS/CI, SA-29, 4th Floor, 2201 C Street, NW, Washington, D.C. 20520-4818, toll-free Tel: 1-888-407-4747.

ARMENIA

Compiled from the February 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Republic of Armenia

PROFILE

Geography

Area: 29,800 sq. km. (11,500 sq. mi.); slightly larger than Maryland.

Cities: Capital—Yerevan.

Terrain: High plateau with mountains, little forest land.

Climate: Highland continental, hot summers, cold winters.

People

Nationality: Noun—Armenian(s). Adjective—Armenian.

Population: (official est.) 3,213,011 de jure (3,002,594 de facto). These figures represent the final results of the October 2001 census, as announced in January 2003.

Ethnic groups: Armenian 98%; Yezidi 1.2%; Russian, Greek, and other 0.8%.

Religions: Armenian Apostolic Church (more than 90% nominally affiliated).

Languages: Armenian (96%), Russian, other.

Education: Literacy—99%.

Health: Infant mortality rate—20/1,000. Life expectancy—66.6 years.

Work force: (1.24 million; 10.5% unemployed) Industry and construction—24.5%; agriculture and forestry—24.6%; trade—17.3%; education—13.4%; other—22.2%.

Government

Type: Republic.

Constitution: Approved in November 2005 referendum.

Independence: 1918 (First Armenian Republic); 1991 (from Soviet Union).

Government branches: Executive—president (head of state) with wider powers relative to other branches, prime minister (head of cabinet), Council of Ministers (cabinet). Legislative—unicameral National Assembly (parliament). Judicial—Constitutional Court.

Political subdivisions: 10 marzes (provinces) in addition to the city of Yerevan, which has the status of a province.

Political parties: Republican Party of Armenia, Prosperous Armenia, Armenian Revolutionary Federation (ARF) Dashnaktsutyun, Country of Law (Orinats Yerkir), and the Heritage Party. Other parties include: People's Party of Armenia, National Accord Party, Republic Party, New Times Party, United Labor Party, Dashink Party, National Democratic Union, and the Armenian National Movement. In addition, there are dozens of other registered parties, many of which become active only during national campaigns, if at all.

Suffrage: Universal at 18.

Economy (2007)

GDP: $9.18 billion.

GDP growth rate: 13.8%.

Per capita GDP: (2006) $1,989.

Inflation: 6.6%.

Natural resources: Copper, zinc, gold, and lead; hydroelectric power; small amounts of gas and petroleum.

Agriculture: Products—fruits and vegetables, wines, dairy, some livestock.

Industry: Types—chemicals, electronic products, machinery, processed food, synthetic rubber, and textiles.

Trade: Exports—$1,218.5 million: precious and semi-precious stones and metals, mining products, foodstuffs, brandy. Export partners (2006)—Germany 14.7%, Netherlands 12.6%, Russia 12.1%, Israel 10.6%, Switzerland 7.2%, U.S. 6.5%. Imports—$3,281.8 million: natural gas, petroleum, precious stones and metals, tobacco products, foodstuffs, textiles. Import partners (2006)—Russia 13.9%, Ukraine 7.5%, Turkmenistan 7.7%, Germany 6.6%, Belgium 5.5%, Iran 5.2%.

PEOPLE AND HISTORICAL HIGHLIGHTS

Ethnic groups in Armenia include Armenians (95%), Kurds, Russians, Greeks, and others. More than 90% of the population is nominally affiliated with the Armenian Apostolic Church. Languages are Armenian (96%),

Russian, and others. Armenia first emerged into history around 800 BC as part of the Kingdom of Urartu or Van, which flourished in the Caucasus and eastern Asia Minor until 600 BC. After the destruction of the Seleucid Empire, the first Armenian state was founded in 190 BC. At its zenith, from 95 to 65 BC, Armenia extended its rule over the entire Caucasus and the area that is now eastern Turkey, Syria, and Lebanon. For a time, Armenia was the strongest state in the Roman East. It became part of the Roman Empire in 64 BC and adopted a Western political, philosophical, and religious orientation.

In 301 AD, Armenia became the first nation to adopt Christianity as a state religion, establishing a church that still exists independently of both the Roman Catholic and the Eastern Orthodox churches. During its later political eclipses, Armenia depended on the church to preserve and protect its unique identity. From around 1100 to 1350, the focus of Armenian nationalism moved south, as the Armenian Kingdom of Cilicia, which had close ties to European Crusader states, flourished in southeastern Asia Minor until conquered by Muslim states. Between the 4th and 19th centuries, Armenia was conquered and ruled by, among others, Persians, Byzantines, Arabs, Mongols, and Turks. For a brief period from 1918 to 1920, it was an independent republic. In late 1920, the communists came to power following an invasion of Armenia by the Red Army, and in 1922, Armenia became part of the Trans-Caucasian Soviet Socialist Republic. In 1936, it became the Armenian Soviet Socialist Republic. Armenia declared its independence from the Soviet Union on September 21, 1991.

GOVERNMENT AND POLITICAL CONDITIONS

Armenians voted overwhelmingly for independence in a September 1991 referendum, followed by a presidential election in October 1991 that gave 83% of the vote to Levon Ter-Petrossian. Ter-Petrossian had been elected head of government in 1990, when the Armenian National Movement defeated the Communist Party. Ter-Petrossian was re-elected in 1996. Following public demonstrations against Ter-Petrossian's policies on Nagorno-Karabakh, the President resigned in January 1998 and was replaced by Prime Minister Robert Kocharian, who was elected President in March 1998.

Following the October 27, 1999 assassination in Parliament of Prime Minister Vazgen Sargsian, Parliament Speaker Karen Demirchian, and six other officials, a period of political instability ensued during which an opposition headed by elements of the former Armenian National Movement government attempted unsuccessfully to force Kocharian to resign. Kocharian was successful in riding out the unrest. Kocharian was reelected in March 2003 in a contentious election that the Organization for Security and Cooperation in Europe (OSCE) and the U.S. Government deemed to fall short of international standards. As a result of the May 2007 parliamentary elections, 103 seats of the 131 in the National Assembly (90 elected on a proportional basis and 41 on a district-by-district majoritarian basis) are members of pro-governmental parties.

The Republican Party and Prosperous Armenia formed a coalition; the ARF Dashnaksutyun Party signed a cooperation agreement with this coalition. The Heritage Party and Orinats Yerkir remain opposition parties. While in the past opposition parties, despite philosophical differences, tended to vote together on key legislative issues, there has been no agreement among the opposition parties to date to do so. Armenia is set to elect a new president on February 19, 2008, who will assume office in April 2008. After serving two consecutive 5-year terms, President Kocharian is constitutionally barred from seeking office a third term, and is stepping down. His hand-picked successor, Prime Minister Serge Sargsyan of the Republican Party, is widely viewed as the frontrunner in the presidential race. Former president Levon Ter-Petrossian is also a candidate. During the presidential election campaign, some opposition parties and presidential candidates have accused the government of harassing their supporters and denying them equal access to TV media. The Government of Armenia's stated aim is to build a Western-style parliamentary democracy as the basis of its form of government. However, international observers have questioned the inherent fairness of parliamentary and presidential elections during each of the previous nationwide elections (1995, 1999, and 2003) as well as during the 2005 constitutional referendum, citing polling deficiencies, lack of cooperation by the electoral commission, poor maintenance of electoral lists, and access to polling places. The 2007 parliamentary elections, however, demonstrated an improvement over previous elections. The new constitution in 2005 increased the power of the legislative branch and allows for more independence of the judiciary; the executive branch nevertheless retains more power than most European countries.

The Government's human rights record remained poor in 2007; while there were some improvements in a few areas, serious problems remained. Security forces beat pretrial detainees. Impunity and corruption remained a problem. There were reports of arbitrary arrest and detention, and incarceration of individuals for political reasons. Lengthy pretrial detention remained a problem. There were limits on press freedom, as well as incidents of violence, intimidation, and self-censorship in the press. The law places some restrictions on religious freedom. Societal violence against women continued to be a problem. Trafficking of persons was a problem, which the government took only limited measures to address.

Principal Government Officials

Last Updated: 11/12/08

Pres.: **Serzh SARGSIAN**
Prime Min.: **Tigran SARGSIAN**
President's Chief of Staff:

Min. of Agriculture: **Aramayis GRIGORIAN**
Min. of Culture & Youth: **Hasmik POGHOSIAN**
Min. of Defense: **Seyran OHANIAN**
Min. of Economy: **Nerses YERITSIAN**
Min. of Education & Science: **Spartak SEYRANIAN**
Min. of Emergency Situations: **Mher SHAHGELDIAN**
Min. of Energy & Natural Resources: **Armen MOVSISIAN**
Min. of Environmental Protection: **Aram HARUTIUNIAN**
Min. of Finance: **Tigran DAVTIAN**
Min. of Foreign Affairs: **Eduard NALBANDIAN**
Min. of Health: **Harutyun KUSHKIAN**
Min. of Justice: **Gevorg DANIELIAN**
Min. of Labor & Social Affairs: **Arsen HAMBARTSUMIAN**
Min. of Sport & Youth Affairs: **Armen GRIGORIAN**
Min. of Territorial Admin.: **Armen GEVORGIAN**
Min. of Transport & Communication: **Gurgen SARGSIAN**
Min. of Urban Planning: **Vardan VARDANIAN**
Chmn., National Bank: **Artur JAVADIAN**
Ambassador to the US: **Tatoul MARKARIAN**
Permanent Representative to the UN, New York: **Armen MARTIROSIAN**

Armenia's embassy in the U.S. is at 2225 R Street, NW, Washington, DC, 20008; tel: 202-319-1976; fax: 202-319-2984.

ECONOMY

Armenia is the second most densely populated of the former Soviet republics. It is a landlocked country between the Black and the Caspian Seas, bordered on the north by Georgia, to the east by Azerbaijan, on the south by Iran, and to the west by Turkey. Up until independence, Armenia's economy was based largely on industry—chemicals, electronic products, machinery, processed food, synthetic rubber, and textiles—and highly dependent on outside resources. Agriculture accounted for only 20% of net material product and 10% of employment before the breakup of the Soviet Union in 1991. In recent years, the construction sector has taken off, fueled by an ambitious government-backed construction project in the capital, and remittances to relatives by ethnic Armenians living in Russia and the United States.

Like other New Independent States of the former Soviet Union, Armenia's economy still suffers from the legacy of a centrally planned economy and the breakdown of former Soviet trading networks. While investment from these states in support of Armenian industry has virtually disappeared, and few major enterprises are still able to function, Russian entities have nevertheless increased their exposure in the mining, energy, telecommunications, and transportation sectors. In addition, the effects of the 1988 earthquake, which killed more than 25,000 people and made 500,000 homeless, are still being felt, though international donors and diaspora Armenian groups continue to fund reconstruction efforts in the earthquake zone. Although a cease-fire has held since 1994, the 20-year-old conflict with Azerbaijan over Nagorno-Karabakh has not been resolved, in spite of intensive efforts by the OSCE Minsk group to reach a settlement.

The consequent closure of both the Azerbaijani and Turkish borders resulting from the war has prevented Armenian from realizing its economic potential, because of Armenia's dependence on outside supplies of energy and most raw materials. Land routes through Azerbaijan and Turkey are closed, though air connections to Turkey exist; land routes through Georgia and Iran are inadequate or unreliable. In 1992-93, GDP fell nearly 60% from its 1989 level. The national currency, the dram, suffered hyperinflation for the first few years after its introduction in 1993. Since 2005, however, the dram has continued to appreciate versus the dollar, going from an annual average of 458 drams in 2005 to 342 in 2007. The currency's appreciation stems largely from growing remittances by diaspora Armenians in Russia and the United States, a weakening dollar, and gradual increase in the productivity of Armenian industry.

In spite of the Nagorno-Karabakh conflict, where a cease-fire has been in effect since 1994, the Government of Armenia has been able to carry out wide-ranging economic reforms that have paid off in dramatically lower inflation and steady growth. Armenia has registered strong economic growth since 1995, with double-digit growth rates in the past 6 years.

The structure of Armenia's economy has changed substantially since 1991, with sectors such as construction and services replacing agriculture and industry as the main contributors to the economic growth. The diamond processing industry, which was one of the leading export sectors in 2000-2004 and also a major recipient of foreign investment, faced a dramatic decrease in output since 2005 due to raw material supply problems with Russia and overall decline in international diamond markets. Other industrial sectors driving industrial growth include energy, metallurgy, and food processing.

Armenia maintains a floating exchange rate regime with no explicit exchange rate target. The nominal exchange rate of the Armenian dram with major currencies was fairly stable between 1998 and 2003; however, it has strengthened sharply starting in 2004, recording around 46% nominal appreciation against the U.S. dollar compared to January 2004. The main causes of the appreciation of the dram are the global weakening of the U.S. dollar, a large inflow of foreign currency to Armenia from remittances, as well as increases in domestic productivity and incomes. The sharp appreciation of the dram has already affected negatively the external competitiveness of the Armenian products.

Armenia is highly dependent on import of energy fuel, mainly from Russia. The Armenia Nuclear Power Plant (ANPP) provides around 40% of electricity generation for the country, and hydro and thermal plants provide roughly 30% each.

Steady economic progress has earned Armenia increasing support from international institutions. The International Monetary Fund (IMF),

World Bank, European Bank for Reconstruction and Development (EBRD), as well as other international financial institutions (IFIs) and foreign countries are extending considerable grants and loans. These loans are targeted at reducing the budget deficit, stabilizing the local currency; developing private businesses; energy; the agriculture, food processing, transportation, and health and education sectors.

In December 2005, the U.S. Millennium Challenge Corporation approved a 5-year $235 million Compact with the Government of Armenia, which focuses on rehabilitation of irrigation networks and upgrading of rural transport infrastructure.

Continued progress will depend on the ability of the government to strengthen its macroeconomic management, including increasing revenue collection, improving the investment climate, and making strides against corruption. A liberal foreign investment law was approved in June 1994, and a Law on Privatization was adopted in 1997, as well as a program on state property privatization. The government joined the World Trade Organization on February 5, 2003.

Environmental Issues

Armenia is trying to address its environmental problems. It has established a Ministry of Nature Protection and has introduced a pollution fee system by which taxes are levied on air and water emissions and solid waste disposal, with the resulting revenues used for environmental protection activities.

Deforestation by mining concerns in certain parts of the country have resulted in periodic protests by environmental non-governmental organizations (NGOs), and stirred controversy over government policies to support investment in the mining sector.

Armenia is interested in cooperating with other members of the Commonwealth of Independent States (CIS—a group of 12 former Soviet republics) and with members of the international community on environmental issues. Despite strong pressure from the international community, the Armenian Government has often reiterated its reluctance to decommission the existing nuclear power plant unless there is a reliable alternative source of energy which could become a decent substitute for Metsamor.

Armenia has signed a statement of cooperation with the U.S. to conduct a preliminary Environmental Impact Assessment (EIA) and Feasibility Study for a new nuclear power generation unit in Armenia.

DEFENSE AND MILITARY ISSUES

Armenia established a Ministry of Defense in 1992. Border guards subject to the National Security Service patrol Armenia's borders with Georgia and Azerbaijan, while Russian Border Guards continue to monitor its borders with Iran and Turkey.

The Conventional Armed Forces in Europe (CFE) Treaty was ratified by the Armenian parliament in July 1992. The treaty establishes comprehensive limits on key categories of military equipment, such as tanks, artillery, armored combat vehicles, combat aircraft, and combat helicopters, and provides for the destruction

of weaponry in excess of those limits. Armenian officials have consistently expressed determination to comply with its provisions in spite of concerns they have about Azerbaijan exceeding that country's treaty limits. Armenia has provided data on armaments as required under the CFE Treaty and is receptive to CFE inspections. There are indications that Armenia is trying to establish mechanisms to ensure fulfillment of its arms control obligations. Armenia is not a significant exporter of conventional weapons, but it has provided substantial support, including materiel, to ethnic Armenian separatists in the disputed enclave of Nagorno-Karabakh located within Azerbaijan's borders.

In March 1993, Armenia signed the multilateral Chemical Weapons Convention, which calls for the eventual elimination of chemical weapons. Armenia acceded to the nuclear Non-Proliferation Treaty as a non-nuclear weapons state in July 1993. The U.S. and other Western governments continue to discuss efforts and initiatives to establish effective nuclear export control systems with Armenia.

FOREIGN RELATIONS

Armenia is a member of the United Nations, the Council of Europe, the Organization for Security and Cooperation in Europe (OSCE), the Commonwealth of Independent States, NATO's Partnership for Peace, the Euro-Atlantic Partnership Council, the International Monetary Fund, the International Bank for Reconstruction and Development, and the World Trade Organization.

Nagorno-Karabakh

In 1988, the territory of Nagorno-Karabakh, a predominantly ethnic Armenian enclave within Azerbaijan, voted to secede and join Armenia. This act was the catalyst that led Armenia and Azerbaijan into a full-scale armed conflict that claimed the lives of over 30,000 on both sides. Armenian support for the separatists led to an economic embargo by Azerbaijan, which has had a negative impact on Armenia's foreign trade and made imports of food and fuel more expensive, three-quarters of which previously transited Azerbaijan under Soviet rule.

Peace talks in early 1993 were disrupted by the seizure of Azerbaijan's Kelbajar district by Nagorno-Karabakh Armenian forces and the forced evacuation of thousands of ethnic Azeris. Turkey in protest then followed with an embargo of its own against Armenia. A cease-fire was declared between Azeri and Armenian/Nagorno-Karabakh forces in 1994 and has been maintained by both sides since then in spite of occasional shooting along the line of contact. All Armenian governments have thus far resisted domestic pressure to recognize the self-proclaimed independence of the "Nagorno-Karabakh Republic," while at the same time announcing they would not accept any peace accords that returned the enclave to Azerbaijani rule. Approximately 526,000 of the estimated 800,000 ethnic Azeris who fled during the Karabakhi offensives still live as internally displaced persons in Azerbaijan, while roughly 235,000 of 360,000 ethnic Armenians who fled Azerbaijan since 1988 remain refugees.

Negotiations to peacefully resolve the conflict have been ongoing since 1992 under the aegis of the Minsk Group of the OSCE. The Minsk Group is currently co-chaired by the U.S., France, and Russia. Negotiations have intensified since 2004.

According to Armenia's Office of the Geographer, Karabakhi Armenians, supported by the Republic of Armenia, now hold about 9% of Azerbaijan and have refused to withdraw from Azeri territories they control until an agreement on the status of Nagorno-Karabakh is reached. Armenia and Azerbaijan continue to observe the cease-fire that has been in effect since May 1994, and in late 1995 both also agreed to OSCE field representatives being based in Tbilisi, Georgia, to monitor the cease-fire and facilitate the peace process.

U.S.-ARMENIAN RELATIONS

The dissolution of the Soviet Union in December 1991 brought an end to the Cold War and created the opportunity for bilateral relations with the New Independent States (NIS) as they began a political and economic transformation. The U.S. recognized the independence of Armenia on December 25, 1991, and opened an Embassy in Yerevan in February 1992.

The United States has made a concerted effort to help Armenia and other NIS during their difficult transition from totalitarianism and a command economy to democracy and open markets. The cornerstone of this continuing partnership has been the Freedom for Russia and Emerging Eurasian Democracies and Open Markets (FREEDOM) Support Act, enacted in October 1992. Under this and other programs, the U.S. to date has provided nearly $2 billion in humanitarian and technical assistance for Armenia. U.S. assistance programs in Armenia are described in depth on the website at: http://www.usaid.am/main/en/129.

On March 27, 2006 Armenia signed a Millennium Challenge Compact with the United States; the agreement entered into force on September 29, 2006. Provided the Armenian Government makes progress on mutually agreed-upon policy performance criteria (corruption, ruling justly, and investing in people), the agreement will provide $235 million to Armenia over five years to reduce rural poverty through the improvement of rural roads and irrigation networks.

U.S.-Armenian Economic Relations

In 1992 Armenia signed three agreements with the U.S. affecting trade between the two countries. The agreements were ratified by the Armenian parliament in September 1995 and entered into force in the beginning of 1996. They include an "Agreement on Trade Relations," an "Investment Incentive Agreement,"

and a treaty on the "Reciprocal Encouragement and Protection of Investment" (generally referred to as the Bilateral Investment Treaty, or BIT). Armenia does not have a bilateral taxation treaty with the U.S. The 1994 Law on Foreign Investment governs all direct investments in Armenia, including those from the U.S.

Approximately 70 U.S.-owned firms currently do business in Armenia, including Dell, Microsoft, and IBM. Recent major U.S. investment projects include the Hotel Armenia/ Marriott; the Hotel Ani Plaza; Tufenkian Holdings (carpet and furnishing production, hotels, and construction); several subsidiaries of U.S.-based information technology firms, including Viasphere Technopark, an IT incubator; Synopsys; a Greek-owned Coca-Cola bottling plant; jewelry and textile production facilities; several copper and molybdenum mining companies; and the Hovnanian International Construction Company.

U.S. Support To Build a Stable Market Economy

The U.S. continues to work closely with international financial institutions like the International Monetary Fund and the World Bank to help Armenia in its transition to a free-market economy. Armenia has embarked upon an ambitious reform program, which has resulted in a double-digit GDP growth for the last 6 years. U.S. economic assistance programs, primarily under the administration of the U.S. Agency for International Development (USAID), have three objectives: to promote sustainable private sector economic growth; to strengthen non-executive governmental systems and civil society to build a more robust democracy; and to ensure a smooth transition towards primary healthcare and the rationalization of social support systems of the government. Other agencies, including the Departments of State, Agriculture, Treasury, Defense, Commerce, Energy, Justice, and the Peace Corps sponsor various assistance projects. The U.S.-Armenia Task Force, established in 2000, is a bilateral commission that meets every 6 months to review the progress and objectives of U.S. assistance to Armenia. The last meeting was held in Washington, DC, in October 2007.

Specific USAID programs focus on private sector competitiveness and workforce development in selected industries, including information technology and tourism; development of the financial sector and fiscal authorities to achieve an enabling environment for businesses; and reforms promoting the efficient and safe use of energy and water; democracy and good governance programs, including the promotion of a well-informed and active civil society, support to decentralization of authority, independent justice sector and the parliament to ensure the separation of power; social sector reform, including benefits and public services administration for vulnerable populations; health sector reform, including improvement of primary healthcare (PHC) services with an emphasis on preventive care; strengthening of reproductive, maternal, and child healthcare countrywide to ensure access to quality PHC services in rural areas; public education programs; and training for PHC providers.

The U.S. Department of Agriculture's (USDA) Caucasus Agricultural Development Initiative provides targeted and sustained technical and marketing assistance to small and medium-sized agribusinesses, farmer-marketing associations, and the Government of Armenia. USDA's goal is to sustain the productivity of the agricultural sector by expanding access to markets and credit, increasing efficiency, and modernizing agriculture systems. USDA's priority assistance areas are: Farm Credit, Food Safety and Animal Health, support to the Armenian private sector through the NGO CARD, Agricultural Statistics and Agricultural Education. Also, as a training component of USDA projects in Armenia, the U.S. Department of Agriculture's Cochran Fellowship Program provides training to Armenian agriculturists in the United States.

U.S. Humanitarian Assistance

Over the past 16 years, the U.S. has provided nearly $2 billion in assistance to Armenia, the highest per capita amount in the NIS. Humanitarian aid originally accounted for up to 85% of this total, reflecting the economic paralysis caused by closed borders with Turkey and Azerbaijan related to the Nagorno-Karabakh conflict, destruction in northern Armenia left from the devastating 1988 earthquake, and the closure of most of the country's factories.

As conditions in Armenia have improved, with the stabilization of the economy and increased energy production—including the restarting of the Armenian Nuclear Power Plant near the capital—U.S. assistance programs have progressed from humanitarian priorities to longer-term development goals.

U.S. Support To Achieve Democracy

Technical assistance and training programs have been provided in municipal administration, intergovernmental relations, public affairs, foreign policy, diplomatic training, rule of law, and development of a constitution. Specific programs are targeted at promoting elections that meet international standards, strengthening political parties, and promoting the establishment of an independent judiciary and independent media. This includes financing for programs that support civil society organizations, local non-governmental organizations (NGO) capacity building, National Assembly professional development, and local and community-level governance.

State Department and USAID educational exchange programs play an important role in supporting democratic and free-market reforms. Assistance in the translation and publication of printed information also has been provided. Exchange programs in the U.S. for Armenian lawyers, judges, political party members, business people, government officials, NGO activists, journalists,

and other public figures focus on a range of topics, including the American judicial and political system, privatization, specific business sectors, the media, and civil society. The State Department has funded an ongoing project to provide Internet connectivity to schools at various levels throughout the country; these centers provide both educational and community-building opportunities.

USAID has funded international and domestic groups to monitor national elections. USAID also has funded programs to educate voters and to strengthen the role of an array of civic organizations in the democratic process.

TRAVEL

Consular Information Sheet

June 9, 2008

Country Description: Armenia is a constitutional republic with a developing economy. Tourist facilities, especially outside Yerevan, the capital, are not highly developed, and many of the goods and services taken for granted in other countries may be difficult to obtain.

Entry Requirements: A passport and visa are required. U.S. citizens may purchase visas for a stay of up to 21 days online at http://www.armeniaforeignministry.am/ for the fee of USD 60. At this time a visa valid for 120 days may also be obtained upon arrival at the port of entry for the fee of 15,000 Armenian Drams. Visas for up to 120 days may be purchased at the Armenian Embassy in Washington, D.C. or the Consulate General in Los Angeles for the fee of USD 69. For further information on entry requirements, contact the Armenian Embassy at 2225 R Street NW, Washington, DC 20008, tel. (202) 319-1976 and (202) 319-2983; the Armenian Consulate General in Los Angeles at 50 N. La Cienega Blvd., Suite 210, Beverly Hills, CA 90211, tel. (310) 657-7320, or visit the Embassy of Armenia's web site at http://www.armeniaemb.org for the most current visa information.

Safety and Security: A cease-fire has been in effect since 1994 around the self-proclaimed "Republic of Nagorno-Karabakh," an unrecognized ethnic Armenian enclave within Azerbaijan. However, reports of intermittent gunfire along the cease-fire line and along the border with Azerbaijan continue. Because of the existing state of hostilities, consular services are not available to Americans in Nagorno-Karabakh. Travelers should exercise caution near the Armenia-Azerbaijan border and consult the Country Specific Information for Azerbaijan if considering travel to Nagorno-Karabakh from Armenian territory. Armenia's land borders with Turkey, Azerbaijan, and the Nakhichevan Autonomous Republic of Azerbaijan remain closed and continue to be patrolled by armed troops who stop all people attempting to cross. There are still land mines in numerous areas in and near the conflict zones.

Several political rallies occurred in Yerevan in the spring of 2004 and in the fall of 2005. Though the majority of these demonstrations were peaceful, police forcibly removed protesters from the scene in at least one instance in 2004. Political rallies in the run-up to the May 2007 Parliamentary elections were mostly peaceful. However, some demonstrators were beaten by police during one march in central Yerevan. Americans should be mindful that even demonstrations intended to be peaceful could turn confrontational and possibly escalate into violence. American citizens are therefore urged to avoid the areas of demonstrations if possible, and to exercise caution if within the vicinity of any demonstrations.

Armenia is an earthquake and landslide-prone country. In addition to these natural disasters, there exists the possibility of chlorine gas spills and radiation poisoning due to industrial accidents; the Soviet-era Armenia Nuclear Power plant is located in Metsamor, approximately 20 kilometers southwest of Yerevan. The plant was closed temporarily in 1988 following a devastating earthquake, but reopened in 1995. Armenia is currently under international pressure to close the plant permanently, due to safety concerns.

For the latest security information, Americans traveling abroad should regularly monitor the Department of State, Bureau of Consular Affairs' web site at http://travel.state.gov where the current Travel Warnings and Travel Alerts, including the Worldwide Caution Travel Alert, can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S. and Canada or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: Crime against foreigners is relatively rare in Armenia. Break-ins, particularly of vehicles, and theft are the most common crimes, but there have been instances of violent crime as well. In May 2004, an American citizen was murdered in Yerevan; the crime remains unsolved. While the incidence of violent crime remains lower than in most U.S. cities, American citizens are urged to exercise caution and to avoid traveling alone after dark in Yerevan. Several American investors have also reported being involved in disputes over property ownership, and have had to seek legal recourse through a long, and in the majority of cases, unsuccessful court proceeding.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

Medical Facilities and Health Information: Though there are many competent physicians in Armenia, medical care facilities are limited, especially outside the major cities. The U.S. Embassy maintains a list of English-speaking physicians in the area. Most prescription medications are available, but the quality varies. Elderly travelers and those with existing health problems may be at risk due to inadequate medical facilities.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's web site at http://wwwn.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith/en.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Armenia is provided for general reference only and may not be totally accurate in a particular location or circumstance.

Travel in Armenia requires caution. Public transportation, while very inexpensive, may be unreliable and uncomfortable. Travel at night is not recommended, and winter travel can be extremely hazardous in mountain areas and higher elevations.

Travelers should avoid the old highway between the towns of Ijevan and Noyemberyan in the Tavush region, as well as the main highway between the towns of Kirants and Baghanis/Voskevan. The U.S. Embassy has designated this portion of the road off-limits to all U.S. government personnel because of its proximity to the cease-fire line between Armenian and Azerbaijani forces, a line which has seen numerous cease-fire violations over the years.

On weekends, there are an increased number of intoxicated drivers on Armenian roads. American citizens are urged to exercise particular vigilance while traveling on the main highway from Yerevan to the resort areas of Tsaghadzor and Sevan. Traffic police will attempt to stop individuals driving erratically and dangerously, but police presence outside of Yerevan is limited. Armenia does have emergency police and medical services, but they may take time to reach remote regions.

With the exception of a few major arteries, primary roads are frequently in poor repair, with sporadic stretches of missing pavement and large potholes. Some roads shown as primary roads on maps are unpaved and can narrow to one lane in width, while some newer road connections have not yet been marked on recently produced maps. Secondary roads are normally in poor condition and are often unpaved and washed out in places. Street and road signs are poor to nonexistent. Truck traffic is not heavy except on the main roads linking Yerevan to Iran and Georgia.

Minibuses are considered more dangerous than other forms of public transportation. Travelers who choose to ride minibuses should exercise caution because these vehicles are often overcrowded and poorly maintained, commonly lack safety measures including seatbelts, and are frequently involved in accidents.

Though crime along roadways is rare, the police themselves sometimes seek bribes during traffic stops. Drivers in Armenia frequently ignore traffic laws, making roadways unsafe for unsuspecting travelers. Pedestrians often fail to take safety precautions and those driving in towns at night should be especially cautious. In cities, a pedestrian dressed in black crossing an unlit street in the middle of the block is a common occurrence.

The quality of gasoline in Armenia ranges from good at some of the more reliable stations in cities to very poor. The gasoline and other fuels sold out of jars, barrels, and trucks by independent roadside merchants should be considered very unreliable.

Aviation Safety Oversight: As there is no direct commercial air service between the United States and Armenia, the U.S. Federal Aviation Administration (FAA) has not assessed Armenia's Civil Aviation Authority for compliance with Inter-

national Civil Aviation Organization (ICAO) aviation safety standards. For more information, travelers may visit the FAA's web site at http://www.faa.gov.

Travelers on Armavia International Airways may experience prolonged delays, sudden cancellation of flights, and flights departing earlier than scheduled. In addition to frequent delays, flights are sometimes overcrowded with passengers without seats standing in the aisle along with excess unsecured cabin luggage. Even basic safety features such as seat belts are sometimes missing. Air travel to Armenia via European carriers is typically more reliable. Ticketed passengers on flights leaving Yerevan should reconfirm their reservation 24 hours prior to departure.

Special Circumstances: Armenia remains largely a cash-only economy. Credit cards are accepted at some businesses, including major hotels and restaurants in Yerevan, but rarely outside of the capital. Limited facilities exist for cashing traveler's checks and wiring money into the country. There are a number of ATMs in the center of Yerevan. Dollars are readily exchanged at market rates. Travelers may experience problems with local officials seeking bribes to perform basic duties.

Armenian customs authorities may enforce strict regulations concerning temporary importation into or export from Armenia of items such as firearms, pornographic materials, medication, and communications equipment. For export of antiquities and other items that could have historical value, such as paintings, carpets, old books, or other artisan goods, a special authorization is required in advance from the Armenian Ministry of Culture. It is advisable to contact the Embassy of Armenia in Washington, D.C. or Consulate General in Los Angeles for specific information regarding customs requirements.

Dual Nationality: Recent changes to Armenian legislation now permit Armenian citizens to hold dual citizenship. This means that U.S. citizens who emigrated from Armenia to the U.S. and subsequently acquired U.S. citizenship without explicitly giving up their Armenian citizenship may be able to (re)acquire Armenian citizenship along with all the associated rights and duties, e.g. the right to vote in Armenian elections and/or the duty for certain males to perform military service.

The new law also means that dual citizens need to enter and leave Armenia on their Armenian passport, i.e. they would no longer need an Armenian visa. U.S. citizens interested in obtaining Armenian citizenship must register their dual citizenship with Passport and Visa Department of the Police of the Republic of Armenia (formerly OVIR) by simply presenting proof of their other citizenship (e.g. passport). For more information, please consult with Passport and Visa Department of the Police (tel.: +37410-501439) and/or http://www.armeniaforeignministry.am.

Compulsory Military Service: In addition to being subject to all Armenian laws affecting U.S. citizens, dual nationals are also subject to other laws that impose special obligations on Armenian citizens. Male U.S. citizens over the age of 18 who are also considered to be Armenian citizens may be subject to conscription and compulsory military service upon arrival, and to other aspects of Armenian law while in Armenia. Since the summer of 2005, Armenian authorities have regularly detained U.S. citizens on these grounds upon their arrival in or departure from Armenia. In most cases, ethnic Armenian travelers who are accused of evading Armenian military service obligations are immediately detained and later found guilty of draft evasion. Penalties for those convicted are stiff and, by law, include jail time or a substantial fine. Those who may be affected are strongly advised to consult with Armenian officials and inquire at an Armenian embassy or consulate to their status before traveling.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offences. Persons violating Armenian laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Armenia are severe, and convicted offenders can expect long jail sentences and heavy fines.

Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in Armenia are encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration web site, and to obtain updated information on travel and security within Armenia. Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate. The American Citizen Services section of the U.S. Embassy in Yerevan maintains a computer terminal in the consular waiting room available to U.S. citizens for registration. The U.S. Embassy provides Internet access to the general public through the American Corners program and through the U.S. Embassy's Information Resource Center. American Corners are located in Yerevan (2 Amiryan Street, phone: +374-10 561383), Gyumri (68 Shirakatsi Street, phone: +374-312 22153), Vanadzor (25, Vardanants Street, phone: +374-322-21672, and Kapan (6, Shahumyan Street, phone: +374-0285-22151). By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency. The U.S. Embassy in Yerevan

is located at 1 American Avenue, tel. 011 (37410) 46-47-00 and fax: 011 (37410) 46-47-42. The Consular Section is open from 9:00 a.m. until 5:00 p.m., with time reserved for American citizen services from 1:30 p.m. until 4:30 p.m., Monday through Friday, except for official U.S. Embassy holidays. For more information, see the Embassy's web site at http://yerevan.usembassy.gov.

Intercountry Adoption

November 2008

The information in this section has been edited from a report available through the U.S. Department of State Office of Children's Issues. For more information detailed, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Armenia is party to The Hague Convention on Protection of Children and Co-operation in Respect of Intercountry Adoption (Hague Adoption Convention). Therefore, all adoptions between Armenia and the United States must meet the requirements of the Convention and United States law implementing the Convention. For detailed and updated information on these requirements, please review the *Intercountry Adoption* section of this publication and visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

Who Can Adopt? Adoption between the United States and Armenia is governed by The Hague Adoption Convention. Therefore to adopt from Armenia, you must first be found eligible to adopt by the United States Government. In addition to the United States requirements for prospective adoptive parents, Armenia also has the following requirements for prospective adoptive parents.

Residency Requirements: Prospective adoptive parents do not have to fulfill any residency requirements to adopt in Armenia.

Age Requirements: Single prospective adoptive parents must be at least 18 years older than the adopted child.

Marriage Requirements: Both single individuals and married couples are eligible to adopt.

Who Can Be Adopted? Because Armenia is party to The Hague Adoption Convention, children from Brazil must meet the requirements of the Convention in order to be eligible for adoption. In addition to Armenia's requirements, a child must meet the definition of a Convention adoptee for you to bring him or her back to the United States.

There are many children living in orphanages, however, ONLY those children whose parents have died, disappeared, or signed a statement of relinquishment of their parental rights, and whose families do not visit them, thus abandoning them, are available for adoption. In addition, consent for child adoption can only be given after the birth of the child.

Relinquishment Requirements: If biological parents are alive, the biological parents must sign a statement of relinquishment in order for a child to be eligible for adoption.

Age Requirements: A child's name must be listed on the national registry list for three months before he or she is declared available for intercountry adoption. For this reason, it is impossible to adopt a very young infant from Armenia.

Waiting Period: The names of children available for adoption are listed by the Ministry of Labor and Social Issues. A child's name must remain on the list for three months before he/she is declared available for intercountry adoption.

Armenia's Adoption Authority: National Adoption Committee of the Republic of Armenia

The Process: The first step in adopting a child from Armenia is to select an adoption service provider in the United States that has been accredited. After you choose an accredited adoption service provider, you apply to be found eligible to adopt (Form I-800A) by the USCIS. Once the United States Government determines that you are "eligible" and "suitable" to adopt, you or your agency will forward your information to the adoption authority in Armenia.

If both the United States and Armenia determine that you are eligible to adopt, and a child is available for intercountry adoption, the central adoption authority in Armenia may provide you with a referral for a child. In Armenia, the adoptive parents identify a child from the children eligible for inter-country adoption listed in the registry kept by the Ministry of Labor and Social Issues. The prospective parents or their representative may go to the Ministry and view the list, or they may visit orphanages directly and identify a child. Once they identify a child, they must verify his/her status by reviewing the list.

Once the child has been identified, the prospective parents or their representative must submit their documents to the municipality in which the child resides. Once those documents are received, a court date is set.

After you accept a match with a child, you will apply to the USCIS for provisional approval to adopt that particular child (Form I-800). After this, your adoption service provider or you will submit a visa application to a Consular Officer at the United States Embassy. If the Consular office determines that the child appears eligible to immigrate to the United States, he/she will notify Armenia's adoption authority (Article 5 letter). For Convention country adoptions, prospective adoptive parent(s) may not proceed with the adoption or obtain custody for the purpose of adoption until this takes place.

Adoptive parents and the child, if over 14, must be present for court proceedings. The court may request the presence of biological parents, orphanage representatives, or the child if the child is over the age of 10. The court proceedings are closed to the public.

Cases may be rejected on the basis of incomplete or fraudulent paperwork, among other issues addressed in

Armenian law. Prospective adoptive parents may be disqualified based on mental disease, drug addiction, alcoholism, tuberculosis, HIV/AIDS, or other infectious diseases.

The process for finalizing the adoption (or gaining legal custody) in Armenia generally includes the following.

Role of the Adoption Authority: The National Adoption Committee reviews the prospective adoptive parents' registration documents and issues a conclusion on the ability to adopt.

Role of the Court: Once the child has been identified and the remaining documents are submitted, a court date is set. During the hearing, the judge makes decisions on any requests to change the child's name, birth date, etc. After the hearing, the court will issue a preliminary decision and 30 days later the Government registers the final court decision.

Role of Adoption Agencies: Armenian law does not recognize the involvement of professional facilitators, adoption agencies, or attorneys. It does allow prospective adoptive parents to grant power of attorney to an individual to handle most aspects of the adoption process on their behalf. Some United States adoption agencies have contacts with experienced local individuals who can be given power of attorney.

Time Frame: From start to finish, an adoption timeframe of one to two years is common. Once approval to adopt has been granted, it can take up to six months to identify a child and several more months to secure the proper paperwork from the different Government agencies to support an application to adopt that particular child.

Adoption Application: The prospective adoptive parents submit the adoption application to the National Adoption Committee.

Adoption Fee: The official fees necessary to procure the documents needed in support of the adoption are approximately $65 USD. The practice of charging official and unofficial expediting fees varies depending on the particular Government agency or local office. In addition, the attorneys or other individuals assisting the prospective adoptive parents with the adoption may charge fees for services rendered.

In the adoption services contract that you sign at the beginning of the adoption process, your agency will itemize the fees and estimated expenses related to your adoption process.

Documents Required: Please note that fraud is pervasive in Armenia. Fabricated documents or real documents fraudulently obtained are readily available. As a result, the United States Embassy in Yerevan must carefully investigate all visa cases.

The following is a list of documents required to request registration as prospective adoptive parents.

- Copy of the prospective adoptive parents' United States passports
- USCIS approval (either of the Form I-600A in a transition case or the Form I-800A in a new case)
- Copy of certificate of home study, including a description of the family and the home where the adopted child will reside
- Work verification letters indicating position, salary, and three letters of reference
- Tax return for the most recent tax year
- Copy of marriage certificate, if applicable
- Copy of divorce decree, or spouse's death certificate, if applicable
- Spousal consent (if only one spouse is legally adopting the child)
- Medical evaluation report confirming that the prospective adoptive parent(s) do not suffer from any type of psychological condition, alcoholism or drug abuse, HIV AIDS or other STD, active tuberculosis or other infectious diseases
- Local police check for prospective adoptive parents
- Power of Attorney if documents will be submitted through an authorized representative

The following is a list of documents that must be submitted to the regional court presiding over the child's district:

- Full names of the prospective adoptive parent(s) and child
- Notification of prospective adoptive parents' plans to change the child's name, date or place of birth, or to list themselves as parents on new documents
- Prospective adoptive parents' passports or other identification
- Prospective adoptive parents' marriage certificate, if applicable
- Spousal consent (if married and only one spouse is legally adopting the child)
- Child's consent if the child is over 10 years of age
- Child's birth certificate and medical records
- Statement of child's centralized registration from the Ministry of Social Security
- Written consent of adoptive parents, birth parents, and the orphanage. If applicable, death certificates of birth parents and consent of biological grandparents if the biological parents are not legal adults.
- Government approval of prospective adoptive parents

For updates on document requirements and information on how to

authenticate documents, visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

Bringing Your Child Home: Once your adoption is complete (or you have obtained legal custody of the child), there are a few more steps to take before you can head home. Specifically, you need to apply for several documents for your child before he or she can travel to the United States, such as a birth certificate, a passport or travel document for your child from the country in which he or she was born, and a U.S. Immigration Visa.

For detailed and updated information on how to obtain these documents, review the Intercountry Adoption section on this publication and visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

Child Citizenship Act: For adoptions finalized abroad: The Child Citizenship Act of 2000 allows your new child to acquire American citizenship automatically when he or she enters the United States as lawful permanent residents. For adoptions finalized in the United States: The Child Citizenship Act of 2000 allows your new child to acquire American citizenship automatically when the court in the United States issues the final adoption decree. To learn more, review the *Intercountry Adoption* section on this publication and visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

After Adoption: According to Armenian law, there are no post-adoption requirements for intercountry adoptions.

ARUBA

Compiled from the July 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Aruba

PROFILE

Geography

Area: 180 sq. km. (112 sq. mi.).

Cities: Capital—Oranjestad (pop. 60,000, 2003).

Terrain: Flat with a few hills; scant vegetation.

Climate: Subtropical.

People

Nationality: Noun and adjective—Aruban(s).

Population: (2006) 103,484.

Annual growth rate: 2.2%.

Ethnic groups: Mixed white/Caribbean Amerindian 80%.

Religions: Roman Catholic 81%, Protestant 3%, Hindu, Muslim, Methodist, Anglican, Adventist, Evangelist, Jehovah's Witness, Jewish.

Languages: Dutch (official); Papiamento, Spanish, and English also are spoken.

Education: Literacy—97%.

Health: Infant mortality rate—5.2/1,000. Life expectancy—75 years for men, 81.9 years for women.

Work force: (41,501) Most employment is in wholesale and retail trade and repair, followed by hotels and restaurants and oil refining. Unemployment—about 6.9% (2005).

Government

Type: Parliamentary democracy.

Independence: Part of the Kingdom of the Netherlands.

Government branches: Executive—monarch represented by a governor (chief of state), prime minister (head of government), Cabinet. Legislative—unicameral parliament. Judicial—Joint High Court of Justice appointed by the monarch.

Political subdivisions: Aruba is divided into eight regions—Noord/Tank Leendert, Oranjestad (west), Oranjestad (east), Paradera, Santa Cruz, Savaneta, Sint Nicolaas (north), and Sint Nicolaas (south).

Political parties: People's Electoral Movement (MEP), Aruba People's Party (AVP), Network (RED), Aruba Patriotic Movement (MPA), Real Democracy (PDR), Aruba Liberal Organization (OLA), Aruba Patriotic Party (PPA), Aruba Democratic Alliance (ALIANSA), Socialist Movement of Aruba (MSA).

Suffrage: Universal at 18 years.

Economy

GDP: (2005) $2.26 billion.

Growth rate: (2005) 2.4%.

Per capita GDP: (2006) $23,426.

Natural resources: Beaches. Tourism/services and oil refining are dominant factors in GDP.

Trade: Exports—$2.61 billion (f.o.b., including oil re-exports & free zone, 2006) oil products, live animals and animal products, art and collectibles, machinery and electrical equipment, transport equipment. Major markets—U.S. (43.61%), Venezuela (5.9%), Netherlands Antilles (16.67%), Netherlands (9.60%). Imports—$2.84 billion: crude petroleum, food, manufactures. Major suppliers—U.S. (57.50%), Netherlands (11.79%), Netherlands Antilles (3.32%).

PEOPLE AND HISTORY

Aruba's first inhabitants were the Caquetios Indians from the Arawak tribe. Fragments of the earliest known Indian settlements date back to about 1000 A.D. Spanish explorer Alonso de Ojeda is regarded as the first European to arrive in about 1499. The Spanish garrison on Aruba dwindled following the Dutch capture of nearby Bonaire and Curacao in 1634. The Dutch occupied Aruba shortly thereafter, and retained control for nearly two centuries. In 1805, during the Napoleonic wars, the English briefly took control over the island, but it was returned to Dutch control in 1816. A 19th-century gold rush was followed by prosperity brought on by the opening in 1924 of an oil refinery. The last decades of the 20th century saw a boom in the tourism industry. In 1986 Aruba seceded

from the Netherlands Antilles and became a separate, autonomous member of the Kingdom of the Netherlands. Movement toward full independence was halted at Aruba's prerogative in 1990. Aruba has a mixture of people from South America and Europe, the Far East, and other islands of the Caribbean.

GOVERNMENT

Part of the Kingdom of the Netherlands, Aruba has full autonomy on all internal affairs with the exception of defense, foreign affairs, and some judicial functions. The constitution was enacted in January 1986. Executive power rests with a governor, while a prime minister heads an eight-member Cabinet. The governor is appointed for a 6-year term by the monarch and the prime minister and deputy prime minister are elected by the legislature, or Staten, for 4-year terms. The Staten is made up of 21 members elected by direct, popular vote to serve 4-year terms. Aruba's judicial system, mainly derived from the Dutch system, operates independently of the legislature and the executive. Jurisdiction, including appeal, lies with the Common Court of Justice of Aruba and the Supreme Court of Justice in the Netherlands.

Principal Government Officials

Last Updated: 11/12/08

Governor: **Fredis REFENJOL**
Prime Minister: **Nelson ODUBER**
Min. of Education: **Fredis REFENJOL**
Min. of Finance & Economic Affairs: **Nilo SWAEN**
Min. of General Affairs & Utilities: **Nelson ODUBER**
Min. of Justice: **Rudy CROES**
Min. of Public Health: **Booshi WEVER**
Min. of Public Works: **Marisol TROMP**
Min. of Sports, Culture, & Labor: **Ramon LEE**
Min. of Tourism & Transportation: **Eddy BRIESEN**
Attorney General: **Ruud ROSINGH**
Pres., Central Bank: **A.R. CARAM**

POLITICAL CONDITIONS

In the parliamentary elections of September 23, 2005, the People's Electoral Movement (MEP) gained 11 of the 21 seats available. Voter turnout had been 85%. MEP had also won the previous September 2001 elections with 12 seats, forming Aruba's first one-party government. Despite losing one seat in the 2005 elections, the party retained a slim majority in Parliament. MEP's biggest rival, the Aruba People's Party (AVP) obtained 8 seats and remained the largest opposition party on the island.

ECONOMY

Through the 1990s and into the 21st century Aruba posted growth rates around 5%. However, in 2001, a decrease in demand and the terrorist attack on the United States led to the first economic contraction in 15 years. Deficit spending has been a staple in Aruba's history, and modestly high inflation has been present as well, although recent efforts at tightening monetary policy may correct this. Oil processing is the dominant industry in Aruba, despite the expansion of the tourism sector. Approximately 1.3 million tourists per year visit Aruba, with 75% of those from the United States. The sizes of the agriculture and manufacturing industries remain minimal.

FOREIGN RELATIONS

Although Aruba conducts foreign affairs primarily through the Dutch Government, it also has strong relations with other Caribbean governments. Aruba is an observer in the Caribbean Community (CARICOM), an associate member of the World Trade Organization through the Netherlands, and is a full member of the Association of Caribbean States.

TRAVEL

Consular Information Sheet

April 2, 2008

Country Description: Aruba is an autonomous part of the Kingdom of the Netherlands. Tourist facilities are widely available.

Entry Requirements: All Americans traveling by air outside the United States are required to present a passport or other valid travel document to enter or re-enter the United States. This requirement will be extended to sea travel (except closed loop cruises), including ferry service, by the summer of 2009. Until then, U.S. citizens traveling by sea must have government-issued photo identification and a document showing their U.S. citizenship (for example, a birth certificate or certificate of nationalization), or other WHTI compliant document such as a passport card for entry or re-entry to the U.S. Sea travelers should also check with their cruise line and countries of destination for any foreign

entry requirements. Applications for the new U.S. Passport Card are now being accepted. Based on current projections, we expect the passport card to be in full production beginning in July 2008. The card may not be used to travel by air and is available only to U.S. citizens. Further information on the Passport Card is available at http://travel.state.gov/passport/ppt_card/ppt_card_3926.html and upcoming changes to U.S. passport policy can be found on the Bureau of Consular Affairs web site at http://travel.state.gov/travel/cbpmc/cbpmc_2223.html. We strongly encourage all American citizen travelers to apply for a U.S. passport well in advance of anticipated travel. American citizens can visit travel.state.gov or call 1-877-4USA-PPT (1-877-487-2778) for information on how to apply for their passports.

In addition visitors to Aruba may be asked to show onward/return tickets, proof of sufficient funds and proof of lodging accommodations for their stay. Length of stay for U.S. citizens is granted for thirty days and may be extended to 180 days by the office of immigration.

For further information, travelers may contact the Royal Netherlands Embassy, 4200 Linnean Avenue NW, Washington, DC 20008, telephone (202) 244-5300, or the Dutch Consulate in Los Angeles, Chicago, New York, Houston or Miami. Visit the web site for the Embassy of the Netherlands at http://www.netherlands-embassy.org and the Aruban Department of Immigration at http://www.aruba.com for the most current visa information.

Safety and Security: There are no known extremist groups, areas of instability or organized crime on Aruba, although drug trafficking rings do operate on the island.

For the latest security information, Americans traveling abroad should regularly monitor the Department's Internet web site, where the current Worldwide Caution Travel Alert, Travel Warnings and Travel Alerts, can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S., or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: The crime threat in Aruba is generally considered low although travelers should always take normal precautions when in unfamiliar surroundings. There have been incidents of theft from hotel rooms and armed robberies have been known to occur. Valuables left unattended on beaches, in cars and in hotel lobbies are easy targets for theft. Car theft, especially that of rental vehicles for joy riding and stripping, can occur. Vehicle leases or rentals may not be fully covered by local insurance when a vehicle is stolen or damaged. Be sure you are sufficiently insured when renting vehicles and jet skis.

Parents of young travelers should be aware that the legal drinking age of 18 is not always rigorously enforced in Aruba, so extra parental supervision may be appropriate. Young female travelers in particular are urged to take the same precautions they would when going out in the United States, e.g. to travel in pairs or in groups if they choose frequenting Aruba's nightclubs and bars, and if they opt to consume alcohol, to do so responsibly.

Anyone who is a victim of a crime should make a report to Aruban police as well as report it immediately to the nearest U.S. consular office. Do not rely on hotel/restaurant/tour company management to make the report for you.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, to contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility

of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

Medical Facilities and Health Information: Medical care is good in Aruba. There is one hospital, Dr. H.E. Oduber Hospital, whose medical standards can be compared with an average small hospital in the U.S. The hospital has three classes of services and patients are accommodated according to the level of their insurance (i.e. first class: one patient to a room, TV, better food; second class: two to three patients to a room, shared bathroom, etc; third class: 15 to 20 people in one hall). There is a small medical center in San Nicolas. The many drug stores, or "boticas" provide prescription and over the counter medicine. Emergency services are usually quick to respond. There are no country-specific health concerns.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's Internet site at http://www.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) website at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Aruba is provided for general reference only and may not be totally accurate for a particular location or circumstance.

Driving in Aruba is on the right-hand side of the road. Local laws require drivers and passengers to wear seat belts and motorcyclists to wear helmets. Children under 5 years of age should be in a child safety seat; older children should ride in the back seat. Right turns on red are prohibited in Aruba.

Aruba's main thoroughfare, L.G. Smith Boulevard, is well lit and most hotels and tourist attractions can be easily located. There is a speed limit in Aruba and driving while intoxicated may result in the loss of a driver's license and/or a fine. However, these are not consistently enforced. Drivers should be alert at all times for speeding cars, which have caused fatal accidents. In the interior areas of the island, drivers should be alert for herds of goats or donkeys that may cross the roads unexpectedly.

Buses provide convenient and inexpensive service to and from many hotels and downtown shopping areas. Taxis, while expensive, are safe and well regulated. As there are no meters, passengers should verify the price before entering the taxi. The emergency service telephone number is 911. Police and ambulance tend to respond fast to emergency situations.

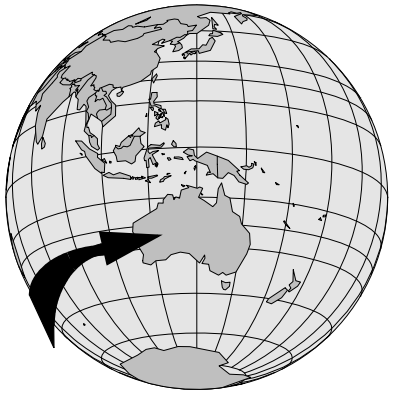
Also, travelers may wish to visit the website of the country's national tourist office and national authority responsible for road safety in Aruba for information: http://www.aruba.com/pages/traffictips.htm.

Aviation Safety Oversight: The U.S. Federal Aviation Administration (FAA) has assessed the Government of Aruba's Civil Aviation Authority as being in compliance with International Civil Aviation Organization (ICAO) aviation safety standards for oversight of Aruba's air carrier operations.

For more information, travelers may visit the FAA's Internet web site at http://www.faa.gov.

Special Circumstances: The time-share industry and other real estate investments are two of the fastest-growing tourist industries in Aruba. Time-share buyers are cautioned about contracts that do not have a "non-disturbance or perpetuity protective clause" incorporated in the purchase agreement. Such a clause gives the time-share owner perpetuity of ownership should the facility be sold. Americans have also sometimes complained that the time-share units are not adequately maintained, despite generally high annual maintenance fees.

Potential investors should be aware that failed land development schemes involving time-share investments could result in financial losses. Interested investors may wish to seek professional advice regarding investments involving land development projects. Real estate investment problems that reach local courts are rarely settled in favor of foreign investors.



An unusually competitive fee to rent jet skis or other water sports equipment could indicate that the dealer is unlicensed or uninsured. Visitors planning to rent jet skis or other water sports equipment should carefully review all liability and insurance forms presented to them before signing any contracts or agreements. The renter is often fully responsible for replacement costs and fees associated with any damages that occur during the rental period. Visitors may be required to pay these fees in full before being allowed to leave Aruba, and may be subject to civil or criminal penalties if they cannot or will not make payment.

Dutch law in principle does not permit dual nationality. However, there are several exceptions to the rule. For example, American citizens who are married to Dutch citizens are exempt from the requirement to abandon their American nationality when they apply to become a Dutch citizen by naturalization. For detailed information, contact the Embassy of the Netherlands in Washington, DC or one of the Dutch consulates in the U.S.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating Aruba's laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Aruba are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in Aruba are encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration website, and to obtain updated information on travel and security within Aruba. Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency. The U.S. Consulate General is located at J.B. Gorsiraweg 1, Willemstad, Curaçao, telephone number (599-9) 461-3066; fax (599-9) 461-6489; e-mail address: acscuracao@state.gov.

AUSTRALIA

Compiled from the September 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Commonwealth of Australia

PROFILE

Geography

Area: 7.7 million sq. km. (3 million sq. mi.); about the size of the 48 contiguous United States.

Cities: (2007) Capital—Canberra (pop. 340,000). Other cities—Sydney (4.3 million), Melbourne (3.8 million), Brisbane (1.9 million), Perth (1.6 million), Adelaide (1.2 million), Darwin (117,000), Hobart (207,484).

Terrain: Varied, but generally low-lying.

Climate: Relatively dry and subject to drought, ranging from temperate in the south to tropical in the far north.

People

Nationality: Noun and adjective—Australian(s).

Population: (2008 est.) 21 million.

Annual population growth rate: 1.6%.

Ethnic groups: European 92%, Asian 6%, Aboriginal 2%.

Religions: (2006) Catholic 26%, Anglican 19%, other Christian 19%, other non-Christian 5%, no religion 19% and not stated 12%.

Languages: English.

Education: Years compulsory—to age 15 in all states except Tasmania, where it is 16. Literacy—over 99%.

Health: Infant mortality rate—4.7/1,000. Life expectancy—males 78 yrs., females 83 yrs.

Work force: (10.8 million) Agriculture—3.0%; mining—4.9%; manufacturing—10.3%; services—75%; public administration and defense—3.8%.

Government

Type: Democratic, federal-state system recognizing British monarch as sovereign.

Constitution: Passed by the British Parliament on July 9, 1900.

Independence (federation) January 1, 1901.

Government branches: Head of state is the British monarch, who is also the Australian sovereign, represented by an appointed governor general. Legislative—bicameral Parliament (76-member Senate, 150-member House of Representatives). The House of Representatives selects as head of government the Prime Minister, who then appoints his cabinet. Judicial—independent judiciary.

Political subdivisions: Six states and two territories.

Political parties: Australian Labor, Liberal, the Greens, the Nationals, and Family First. The Australian Labor Party currently forms the government.

Suffrage: Universal and compulsory over 18.

Budget: (revenue) FY 2008–2009 $A319.5 billion; FY 2009–2010 $A336.9 billion.

Defense: $A22.7 billion or 1.80% of GDP for FY 2008-2009. (2007 Exchange rate: US$1 = AUS$1.21).

Economy

GDP: (2007 est.) $908.8 billion.

Inflation rate: (year to June 2008) 4.5% per annum.

Reserve Bank official interest rate: 7.25% (August 2008).

Trade: Exports ($142 billion, 2007 estimate)—coal, iron ore, non-monetary gold, crude petroleum, and bovine meat. Major markets—China, Japan, South Korea, U.S. ($8.6 billion), and New Zealand. Imports ($159 billion, 2007 estimate)—passenger motor vehicles, crude petroleum, computers, medicaments, and telecommunications equipment. Major suppliers—China, United States ($19.2 billion), Japan, Singapore, and Germany.

PEOPLE

Australia's indigenous inhabitants, a hunting-gathering people collectively referred to today as Aboriginals and Torres Straits Islanders, arrived more than 40,000 years ago. Although their technical culture remained static—depending on wood,

bone, and stone tools and weapons—their spiritual and social life was highly complex. Most spoke several languages, and confederacies sometimes linked widely scattered tribal groups. Indigenous population density ranged from one person per square mile along the coasts to one person per 35 square miles in the arid interior. When Captain James Cook claimed Australia for Great Britain in 1770, the native population may have numbered 300,000 in as many as 500 tribes speaking many different languages. In 2006 the indigenous population was approximately 517,200, representing about 2.5% of the population. Since the end of World War II, the government and the public have made efforts to be more responsive to aboriginal rights and needs, most recently with Prime Minister Kevin Rudd's historic apology to the indigenous people in February 2008.

Immigration has been vital to Australia's development since the beginning of European settlement in 1788. For generations, most settlers came from the British Isles, and the people of Australia are still predominantly of British or Irish origin, with a culture and outlook similar to those of Americans. Non British/Irish immigration has increased significantly since World War II through an extensive, planned immigration program. Since 1945 around 6.6 million migrants have settled in Australia, including 690,000 refugee and humanitarian entrants. About 80% have remained; 24 percent—almost one in four—of Australians are foreign-born. Britain, Ireland, Italy, Greece, New Zealand, and the former Yugoslavia were the largest sources of post-war immigration, but New Zealand is closing on Britain as the largest source country for permanent migrants to Australia, with India, China, and the Philippines making up the rest of the top five. Since the end of World War II, Australia's population has more than doubled.

Australia's humanitarian and refugee program of about 13,000 per year is in addition to other immigration programs. In recent years, refugees from Africa, the Middle East, and Southwest Asia have comprised the largest element in Australia's refugee program. Although Australia has scarcely more than three people per square kilometer, it is one of the world's most urbanized countries. Less than 2.5% of the population lives in remote or very remote areas.

Cultural Achievements

Much of Australia's culture is derived from European roots, but distinctive Australian features have evolved from the environment, aboriginal culture, and the influence of Australia's neighbors. The vigor and originality of the arts in Australia—film, opera, music, painting, theater, dance, and crafts—have achieved international recognition.

Australian actors and comedians such as Nicole Kidman, Rachel Griffiths, Cate Blanchett, Geoffrey Rush, Paul Hogan, Hugh Jackman, the late Heath Ledger, and Dame Edna Everage (Barry Humphries) have achieved enormous popularity in the United States. Directors such as Peter Weir, Philip Noyes, and Russell Mulcahy, the conductor Sir Charles Mackerras, and singers and musicians such as Olivia Newton-John, The Wiggles, AC/DC, Dame Joan Sutherland, Dame Nellie Melba, and Kylie Minogue are well known.

Australian artists with international reputations include Sidney Nolan, Russell Drysdale, Pro Hart, and Arthur Boyd. Writers who have achieved world recognition include Thomas Keneally, Colleen McCullough, Nevil Shute, Morris West, Jill Ker Conway, Peter Carey, Robert Hughes, Germaine Greer, and Nobel Prize winner Patrick White.

In sports, too, Australian athletes are internationally renowned, particularly in swimming, diving, cricket, tennis, rugby, and golf. Australia's share of Olympic medals and world titles is proportionately larger than its share of the world's population.

HISTORY

Australia was uninhabited until stone-culture peoples arrived, perhaps by boat across the waters separating the island from the Indonesia archipelago more than 40,000 years ago. Portuguese, Spanish, Dutch, and English explorers observed the island before 1770, when Captain Cook explored the east coast and claimed it for Great Britain (three American colonists were crew members aboard Cook's ship, the Endeavour).

On January 26, 1788 (now celebrated as Australia Day), the First Fleet under Capt. Arthur Phillip landed at Sydney, and formal proclamation of the establishment of the Colony of New South Wales followed on February 7. Many but by no means all of the first settlers were convicts, many condemned for offenses that today would often be thought trivial. The mid-19th century saw the beginning of government policies to emancipate convicts and assist the immigration of free persons. The discovery of gold in 1851 led to increased population, wealth, and trade.

The six colonies that now constitute the states of the Australian Commonwealth were established in the following order: New South Wales, 1788; Tasmania, 1825; Western Australia, 1829; South Australia, 1836; Victoria, 1851; and Queensland, 1859. Settlement preceded these dates in most cases. Discussions between Australian and British representatives led to adoption by the British Government of an act to constitute the Commonwealth of Australia in 1900. In 1911, control of the Northern Territory was transferred from South Australia to the Commonwealth. Also that year, the Australian Capital Territory (where the national capital, Canberra, is located), was established. The Northern Territory and Australian Capital Territory were granted self-government in 1978 and 1988, respectively.

The first federal Parliament was opened at Melbourne in May 1901 by the Duke of York (later King George V). In May 1927, the seat of

government was transferred to Canberra, a planned city designed by American Walter Burley Griffin. The first session of Parliament in Canberra was opened by another Duke of York (later King George VI). Australia passed the Statute of Westminster Adoption Act on October 9, 1942, which officially established Australia's complete autonomy in both internal and external affairs and formalized a situation that had existed for years. The Australia Act (1986) eliminated almost all remaining vestiges of British legal authority, including the ability to appeal to the British Privy Council.

GOVERNMENT

The Commonwealth government was created with a Constitution patterned partly on the U.S. Constitution, although it does not include a "bill of rights." Powers of the Commonwealth are specifically defined in the Constitution, and the residual powers remain with the states. Proposed changes to the Constitution must be approved by the Parliament and the people, via referendum.

Australia is an independent nation within the Commonwealth. Queen

Elizabeth II is the head of state and since 1973 has been officially styled "Queen of Australia." The Queen is represented federally by a governor-general and in each state by a governor. By convention, the Governor-General generally acts on the advice of the Prime Minister and other Ministers. However the Governor-General has "reserve powers," including the power to dismiss ministers, last exercised in 1975.

The federal Parliament is bicameral, consisting of a 76-member Senate and a 150-member House of Representatives. Twelve senators from each state are elected for 6-year terms, with half elected every 3 years. Each territory has two senators who are elected for 3-year terms, concurrent with that of the House. Seats in the House of Representatives are allocated among the states and territories roughly in proportion to population. The two chambers have equal powers, except all proposals for appropriating revenue or imposing taxes must be introduced in the House of Representatives. Under the prevailing Westminster parliamentary system, the leader of the political party or coalition of parties that wins a majority of the seats in the House of Representatives is named Prime Minister. The Prime Minister and the cabinet wield actual power and are responsible to the Parliament, of which they must be elected members. General elections are held at least once every 3 years; the last general election was in November 2007.

Each state is headed by a premier, who is the leader of the party with a majority or a working minority in the lower house of the state legislature. (Queensland is an exception, with a unicameral parliament). Australia's two self-governing territories have political systems similar to those of the states, but with unicameral assemblies. Each territory is headed by a chief minister who is the leader of the party with a majority or a working minority in the territory's legislature. More than 670 local councils assist in the delivery of services such as road maintenance, sewage treatment, and the provision of recreational facilities.

At the apex of the court system is the High Court of Australia. It has general appellate jurisdiction over all other federal and state courts and possesses the power of constitutional review.

Principal Government Officials

Last Updated: 11/12/08

Governor Gen.: **Quentin BRYCE**
Prime Min.: **Kevin Michael RUDD**
Dep. Prime Min.: **Julia GILLARD**
Min. for Aging: **Justine ELLIOTT**
Min. for Agriculture, Fisheries, & Forestry: **Tony BURKE**
Min. for Broadband, Communications, & the Digital Economy: **Stephen CONROY**
Min. for Climate Change & Water: **Penny WONG**
Min. for Competition Policy & Consumer Affairs: **Chris BOWEN**
Min. for Defense: **Joel FITZGIBBON**
Min. for Defense Science & Personnel: **Warren SNOWDON**
Min. for Education: **Julia GILLARD**
Min. for Employment & Workplace Relations: **Julia GILLARD**
Min. for Employment Participation: **Brendan O'CONNOR**
Min. for the Environment, Heritage, & the Arts: **Peter GARRETT**

Min. for Finance & Deregulation: **Lindsay TANNER**
Min. for Foreign Affairs: **Stephen SMITH**
Min. for Health & Aging: **Nicola ROXON**
Min. for Housing: **Tanya PLIBERSEK**
Min. for Human Services: **Joe LUDWIG**
Min. for Immigration & Citizenship: **Chris EVANS**
Min. for Infrastructure, Transport, Regional Development, & Local Govt.: **Anthony ALBANESE**
Min. for Innovation, Industry, Science, & Research: **Kim CARR**
Min. for Resources & Energy: **Martin FERGUSON**
Min. for Small Business, Independent Contractors, & the Service Economy: **Craig EMERSON**
Min. for Social Inclusion: **Julia GILLARD**
Min. for Sport: **Kate ELLIS**
Min. for the Status of Women: **Tanya PLIBERSEK**
Min. for Superannuation & Corporate Law: **Nick SHERRY**
Min. for Tourism: **Martin FERGUSON**
Min. for Trade: **Simon CREAN**
Min. for Veterans' Affairs: **Alan GRIFFIN**
Min. for Youth: **Kate ELLIS**
Treasurer: **Wayne SWAN**
Special Min. of State: **John FAULKNER**
Attorney Gen.: **Robert McCLELLAND**
Governor, Reserve Bank: **Glenn STEVENS**
Ambassador to the US: **Dennis RICHARDSON**
Permanent Representative to the UN, New York: **Robert HILL**

Australia maintains an embassy in the United States at 1601 Massachusetts Avenue NW, Washington, DC 20036 (tel. 202-797-3000), and consulates general in New York (212-351-6500), San Francisco (415-536-1970), Honolulu (808-524-5050), Los Angeles (310-229-4800), Chicago (312-419-1480) and Atlanta (404-760-3400).

POLITICAL CONDITIONS

Three political parties dominate the center of the Australian political spectrum. The Liberal Party (LP), nominally representing urban business interests, and its smaller Coalition partner, The Nationals, nominally representing rural interests, are the more conservative parties. The Australian Labor Party (ALP) nominally represents workers, trade unions, and left-of-center groups. While the ALP, founded by labor unions, traditionally had been moderately socialist in its policies and approaches to social issues, today it is best described as a social democratic party. All political groups are tied by tradition to welfare programs. Over the last decade, Australia has increased assistance to families while imposing obligations on those receiving unemployment benefits and disability pensions. There is strong bipartisan sentiment on many international issues, including Australia's commitment to its alliance with the United States.

The ALP, under the leadership of Kevin Rudd, defeated the Liberal/National coalition, led by then-Prime Minister John Howard, in the November 24, 2007 election. The ALP

now holds 83 seats in the House of Representatives, against 65 for the Liberal/National coalition, and 2 independents. The composition of the Senate is 37 seats for the Coalition, 32 for the ALP, five seats for the Greens, one for Family First, and one independent.

Rudd and the ALP won the election with a message promising "new leadership" after 11 years of the Howard government. Rudd portrayed himself as an "economic conservative," while criticizing unpopular Howard government policies on workplace relations reform, climate change, and the war on Iraq. The Rudd government has ratified the Kyoto Protocol and is working with the international community on combating climate change. It is undoing some of the labor market reforms instituted by the Howard government, such as statutory individual contracts. The new Australian government's foreign policy is likely to show strong continuity with that of its predecessors, stressing relations with four key countries: the United States, Japan, China, and Indonesia. The Rudd government strongly supports U.S. engagement in the Asia-Pacific region and has pledged to maintain Australian troops in Afghanistan. It withdrew Australia's combat troops from Iraq in 2008, however, leaving air, naval, and training assets in and around Iraq.

ECONOMY

Australia's advanced market economy is dominated by its services sector (72% of GDP), yet it is the agricultural and mining sectors (8% of GDP combined) that account for the bulk of Australia's exports (52%). Australia's comparative advantage in the export of primary products is a reflection of the natural wealth of the Australian continent and its small domestic market; 21 million people occupy a continent the size of the contiguous United States. The relative size of the manufacturing sector has been declining for several decades, but has now steadied at around 10% of GDP. Australia currently enjoys a record high terms-of-trade that is over 30% above its long-run average, reflecting the rise in global commodity prices created by booming demand in China and the drop in prices for imports for manufactured goods, mainly from China.

Since the 1980s, Australia has undertaken significant structural reform of its economy and has transformed itself from an inward-looking, highly protected, and regulated marketplace to an open, internationally competitive, export-oriented economy. Key economic reforms included unilaterally reducing high tariffs and other protective barriers to free trade, floating the Australian dollar, deregulating the financial services sector, including liberalizing access for foreign banks, increasing flexibility in the labor market, reducing duplication and increasing efficiency between the federal and state branches of government, privatizing many government-owned monopolies, and reforming the taxation system, including introducing a broad-based Goods and Services Tax (GST) and large reductions in income tax rates.

Australia is now in its 17th year of uninterrupted economic expansion and enjoys a higher standard of living than any G7 country other than the United States. Australia's economic standing in the world is a result of a commitment to best-practice macroeconomic policy settings, including the delegation of the conduct of monetary policy to the independent Reserve Bank of Australia, and a broad acceptance of prudent fiscal policy where the government aims for fiscal balance over the economic cycle. The Australian Government has zero net debt and, through the "Future Fund," is building a net asset position to deal with future liabilities resulting from an aging population. The Australian economy is expected to grow at around 2.8% in 2008—a figure that could drop as the Australian economy shows signs of slowing down.

Two issues, national infrastructure and climate change, currently dominate thinking about economic policy in Australia. The Australian economy is booming and operating at close to capacity with unemployment near a 32-year low of 4.3%, and participation in the labor market at an all-time high (65.3%). Both the federal and state governments have recognized the need to invest heavily in water, transport, ports, telecommunications, and education infrastructure to expand Australia's supply capacity. While receiving above-average rainfall in many areas during the last half of 2007, a drier than expected winter season in mid-2008 has reinforced the intense economic and political pressure on governments to build dams, water-recycling facilities, and desalination plants in cities such as Brisbane, Canberra, and Perth, which have been significantly affected by the drought conditions of the last five years. The largest river system in Australia, the Murray-Darling, and related coastal lakes and wetlands in South Australia are critically threatened and the government has developed a plan to improve irrigation infrastructure and efficiency and buy back unused water allocations along the river.

A second significant issue is climate change. A report commissioned by then-Prime Minister John Howard recommended a domestic carbon emissions trading scheme and that Australia take an active role in developing a future global carbon emissions trading system. Under Prime Minister Kevin Rudd, Australia is committed to adopting a domestic carbon trading system by 2010. The government released a "Green Paper" laying out the key elements of the emissions trading scheme in July 2008, and is expected to release a "White Paper" confirming the final design in early December.

The Australia-U.S. Free Trade Agreement (AUSFTA) entered into force on January 1, 2005. The AUSFTA was the first FTA the United States concluded with a developed economy since the U.S.-Canada FTA in 1988. Australia also has FTAs with Singapore, Thailand, and Chile, and is pursuing other FTAs, including with China and Japan. A burgeoning trade relationship marked by ongoing, multi-billion dollar resource export

contracts and rising manufactured imports has driven FTA negotiations with China. Parallel efforts are underway with Malaysia and the Association of Southeast Asian Nations (ASEAN). The new Rudd government has restated its commitment to achieving high-quality FTAs with economies in the Asia-Pacific.

FOREIGN RELATIONS

Australia has been active participant in international affairs since World War I and Australian forces have fought beside the United States and other Allies in every significant conflict from then to the present day. In 1944, it concluded an agreement with New Zealand dealing with the security, welfare, and advancement of the people of the independent territories of the Pacific (the ANZAC pact). After World War I, Australia played a role in the Far Eastern Commission in Japan and supported Indonesian independence during that country's revolt against the Dutch. Australia was one of the founders of the United Nations and the South Pacific Commission, and in 1950, it proposed the Colombo Plan to assist developing countries in Asia. In addition to contributing to UN forces in Korea—it was the first country to announce it would do so after the United States—Australia sent troops to assist in putting down the 1948-1960 communist revolt in Malaya and later to combat the 1963-1965 Indonesian-supported invasion of Sarawak. The United States, Australia, and New Zealand signed the ANZUS Treaty in 1951, which remains Australia's pre-eminent formal security treaty alliance. Australia sent troops to assist South Vietnamese and U.S. forces in Vietnam, and joined coalition forces in the Persian Gulf conflict in 1991, in Afghanistan in 2001, and in Iraq in 2003.

Australia has been active in the Australia-New Zealand-U.K. agreement and the Five-Power Defense Arrangements—successive arrangements with Britain and New Zealand to ensure the security of Singapore and Malaysia.

One of the drafters of the UN Charter, Australia has given firm support to the United Nations and its specialized agencies. It was a member of the Security Council in 1986-87, a member of the Economic and Social Council for 1986-89, and a member of the UN Human Rights Commission for 1994-96 and 2003-2005. Australia recently declared its intention to seek a non-permanent seat on the UN Security Council for 2013-2014. Australia takes a prominent part in many other UN activities, including peacekeeping, nonproliferation and disarmament negotiations, and narcotics control. Australia also is active in meetings of the Commonwealth Regional Heads of Government and the Pacific Islands Forum, and has been a leader in the Cairns Group—countries pressing for agricultural trade reform in World Trade Organization (WTO) negotiations—and in founding the APEC forum. In 2002, Australia joined the International Criminal Court.

Australia has devoted particular attention to relations between developed and developing nations, with emphasis on the ten countries of the Association of Southeast Asian Nations (ASEAN) and the island states of the South Pacific. Australia is an active participant in the ASEAN Regional Forum (ARF), which promotes regional cooperation on security issues, and has been a member of the East Asia Summit since its inauguration in 2005. In September 1999, acting under a UN Security Council mandate, Australia led an international coalition to restore order in East Timor upon Indonesia's withdrawal from that territory. In 2006, Australia participated in an international peacekeeping operation in Timor-Leste (formerly East Timor). Australia led a regional mission to restore law and order in Solomon Islands in 2003 and again in 2006. Australia is part of the Asia Pacific Partnership on Clean Development and Climate, which also includes the United States.

In 2006, the government committed to doubling Australia's official development assistance to $4 billion a year by 2010. Australia budgeted $A3.16 billion for FY 2007-2008 and has budgeted $A3.7 billion for FY 2008-2009. The Australian aid program is currently concentrated in Southeast Asia (Papua New Guinea and Indonesia are the largest recipients) and the Pacific Islands. Selected aid flows are allocated to Africa, South Asia, and reconstruction in Afghanistan and Iraq. Contributions to multilateral organizations and other expenses account for about one-third of the foreign assistance budget.

ANZUS AND DEFENSE

The Australia, New Zealand, United States (ANZUS) security treaty was concluded at San Francisco on September 1, 1951, and entered into force on April 29, 1952. The treaty bound the signatories to recognize that an armed attack in the Pacific area on any of them would endanger the peace and safety of the others. It committed them to consult in the event of a threat and, in the event of attack, to meet the common danger in accordance with their respective constitutional processes. The three nations also pledged to maintain and develop individual and collective capabilities to resist attack.

In 1984, the nature of the ANZUS alliance changed after the Government of New Zealand refused access to its ports by nuclear-weapons-capable and nuclear-powered ships of the U.S. Navy. The United States suspended defense obligations to New Zealand, and annual bilateral meetings between the U.S. Secretary of State and the Australian Foreign Minister replaced annual meetings of the ANZUS Council of Foreign Ministers. The first bilateral meeting was held in Canberra in 1985. At the second, in San Francisco in 1986, the United States and Australia announced that the United States was suspending its treaty security obligations to New Zealand pending the restoration of port access. Since 1985, U.S. Secretaries of State and Defense and the Australian Foreign and Defense Ministers have held 19 Australia-U.S. Ministerial consultations (AUSMIN), alternating

between Australia and the United States. The next AUSMIN is scheduled to take place in the United States in 2009.

The U.S.-Australia alliance under the ANZUS Treaty remains in full force. AUSMIN meetings are supplemented by consultations between the U.S. Combatant Commander, Pacific and the Australian Chief of Defense Force. There also are regular civilian and military consultations between the two governments at lower levels.

ANZUS has no integrated defense structure or dedicated forces. However, in fulfillment of ANZUS obligations, Australia and the United States conduct a variety of joint activities. These include military exercises ranging from naval and landing exercises at the task-group level to battalion-level special forces training to numerous smaller-scale exercises, assigning officers to each other's armed services, and standardizing, where possible, equipment and operational doctrine. The two countries also operate joint defense facilities in Australia.

Following the terrorist attacks on the United States on September 11, 2001, then-Prime Minister Howard and U.S. President George Bush jointly invoked the ANZUS Treaty for the first time on September 14, 2001. Australia was one of the earliest participants in Operation Enduring Freedom. Australian Defense Forces participated in coalition military action against Iraq in Operation Iraqi Freedom. Australian combat forces withdrew from Iraq in mid-2008 but military and civilian specialists continue to participate in the training of Iraqi security forces and the reconstruction of Iraq. Australia has approximately 1,000 troops deployed in Afghanistan and also provides significant development and capacity building assistance to the country. Based on growing defense commitments, Australia decided to increase the Australian Army from 26,000 to 30,000 over the next several years. This will enable the reestablishment of two infantry battalions, as well as enabling troops, such as a new unmanned aerial vehicle (UAV) unit.

The Australian Government has stated its intention to maintain its investment in future capability of the Australian Defense Force (ADF). To do so, the government has committed to a 3% annual growth in real defense funding through 2018 to ensure the ADF can continue to meet capability and interoperability goals. The Australian Defense Force numbers about 51,000 active duty personnel, with planned increases to 57,000 within the next decade. The Royal Australian Navy's (RAN) front-line fleet currently includes 12 frigates, including 4 of the Adelaide class and 8 Australian-built ANZAC class. In August 2004, Australia selected the Aegis Combat Control System for its three air warfare destroyers (AWD), which will start coming into service in 2014. A decision on a fourth AWD is expected in 2008. The F/A-18 fighter, built in Australia under license from the U.S. manufacturer, is the principal combat aircraft of the Royal Australian Air Force, backed by the U.S.-built F-111 strike aircraft. In October 2002, Australia became a Level III partner in the U.S.-led Joint Strike Fighter (JSF) program. Additionally, the Australian Government signed the JSF Production, Sustainment and Follow-on Development MOU in 2006. Australia is projected to buy up to 100 JSF aircraft with deliveries starting in 2013 and running through 2020, with its decision on the JSF expected in 1st quarter 2009. The F-111 strike aircraft are scheduled to exit service by 2010 and will be replaced by 24 Boeing F/A-18F Super Hornet fighters as an interim strike capability with deliveries commencing in 2010. The Royal Australian Air Force (RAAF) took delivery of the last aircraft in its buy of 4 Lockheed C-17 strategic airlift aircraft in 2008. In addition, Boeing will provide the Commonwealth of Australia's RAAF with an Airborne Early Warning and Control (AEW&C) system based on the Next-Generation 737-700 aircraft as the airborne platform. Recent U.S. sales to the Australian Army include the M1A1 AIM tank, as well as Hellfire and JAVELIN munitions. Future opportunities include CH-47 helicopter replacements, navy helicopter replacements, light and medium cargo aircraft replacements and artillery systems. The U.S. and Australia signed a Defense Cooperation Treaty in Sydney in September 2007. This treaty, when implemented, will facilitate the trade of defense equipment and technology between the countries. The treaty is currently awaiting ratification by the U.S. Senate.

U.S.-AUSTRALIAN RELATIONS

The World War II experience, similarities in culture and historical background, and shared democratic values have made U.S. relations with Australia exceptionally strong and close. Ties linking the two nations cover the entire spectrum of international relations—from commercial, cultural, and environmental contacts to political and defense cooperation. Two-way trade reached almost $26 billion in 2006. More than 459,700 Americans visited Australia in 2007. In September 2007, the United States and Australia signed an agreement launching a twelve-month exchange student work and travel pilot program. While Australia enjoys a similar program with approximately twenty other countries, this was the first program of its kind for the United States. The pilot program will facilitate the hands-on experience of Australian and Americans working in each others' country and will deepen and enhance our bilateral relationship even further.

Traditional friendship is reinforced by the wide range of common interests and similar views on most major international questions. For example, both attach high priority to controlling and eventually eliminating chemical weapons, other weapons of mass destruction, and anti-personnel landmines; and both work closely on global environmental issues such as slowing climate change and preserving coral reefs. The Australian Government and opposition share the view that Australia's security depends on firm ties with the United States, and the ANZUS Treaty enjoys broad bipartisan support. Recent Presidential visits to Australia (in

1991, 1996, 2003, and 2007), a Vice Presidential visit in February 2007, and Australian Prime Ministerial visits to the United States (in 1995, 1997, 1999, 2001, 2002, 2003, 2004, 2005, 2006, and 2008) have underscored the strength and closeness of the alliance.

The bilateral Australia-U.S. Free Trade Agreement (AUSFTA) entered into force on January 1, 2005. This comprehensive agreement, only the second FTA the U.S. had negotiated with a developed nation, substantially liberalized an already vibrant trade and investment relationship. The AUSFTA also creates a range of ongoing working groups and committees designed to explore further trade reform in the bilateral context. Both countries share a commitment to liberalizing global trade. They work together very closely in the World Trade Organization (WTO), and both are active members of the Asia-Pacific Economic Cooperation (APEC) forum.

A number of U.S. institutions conduct scientific activities in Australia because of its geographical position, large land mass, advanced technology, and, above all, the ready cooperation of its government and scientists. In 2005, a bilateral science and technology agreement was renewed. Under another agreement dating back to 1960 and since renewed, the U.S. National Aeronautics and Space Administration (NASA) maintains in Australia one of its largest and most important programs outside the United States, including a number of tracking facilities vital to the U.S. space program. Indicative of the broad-ranging U.S.-Australian cooperation on other global issues, a Mutual Legal Assistance Treaty (MLAT) was concluded in 1997, enhancing already close bilateral cooperation on legal and counter-narcotics issues. In 2001, the U.S. and Australia signed a new tax treaty and a bilateral social security agreement. The U.S. Studies Centre was launched in 2006 at the University of Sydney with Commonwealth funding of A$25 million.

TRAVEL

Consular Information Sheet

September 29, 2008

Country Description: Australia is a highly developed stable democracy with a federal-state system. Tourist facilities are widely available.

Entry Requirements: American citizens are required to have a valid U.S. passport to enter Australia. Americans must enter with an Australian visa or, if eligible, through Electronic Travel Authority (ETA). The ETA replaces a visa and allows a stay of up to three months. It may be obtained for a small service fee at http://www.eta.immi.gov.au. Airlines and many travel agents in the United States are also able to issue ETA's. Please note that American citizens, who overstay their ETA or visa, even for short periods, may be subject to exclusion, detention, and removal. More information about the ETA, other visas, and entry requirements may be obtained from the Embassy of Australia at 1601 Massachusetts

Avenue, NW, Washington, DC 20036, telephone (202) 797-3000, or via the Australian Embassy home page on the Internet at http://www.austemb.org. Visa inquires may be directed to the Australian Visa Information Service at 888-990-8888.Visit the Embassy of Australiaweb site at http://www.austemb.org for the most current visa information.

Safety and Security: Australia has instituted an alert system for possible terrorist attacks. The threat levels range from "low" to "high." The Australian Attorney General's Office maintains a website with up-to-date information regarding the current assessment of the terrorism threat at http://www.nationalsecurity.gov.au.

American citizens are reminded to maintain a high level of vigilance and to take appropriate steps to increase their security awareness. Travelers may also contact the Australian National Security Hotline at 61-1-800-123-400.

For the latest security information, Americans traveling abroad should regularly monitor the Department of State, Bureau of Consular Affair's Internet site at http://travel.state.gov, where the current Travel Warnings and Travel Alerts, including the Worldwide Caution Travel Alert, can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S. and Canada, or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: Visitors should be aware that street crime, burglaries, and car thefts are a daily occurrence in Australia's larger cities. Weapons are increasingly used in such crimes, which also may be associated with drug trafficking and usage.

Foreign visitors are sometimes targets for pickpockets, purse-snatchers and petty thieves. There have also been reports of drink spiking in some areas.

Appropriate, common sense precautions should be taken, especially at night, to avoid becoming a target of opportunity. To call for fire/police/ambulance services throughout Australia, dial "000" for urgent assistance.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

Every state in Australia has a crime victim assistance program that includes crimes against international visitors. Information on these local programs may be found at http://www.vaonline.org.

The local equivalent to the "911" emergency line in Australia is: 000 (Triple 0).

Medical Facilities and Health Information: Excellent medical care is available. Serious medical problems requiring hospitalization and/or medical evacuation to the United States can cost thousands of dollars. Most doctors and hospitals expect immediate cash/credit card payment for health services.

Visitors are cautioned that Australian fauna can be dangerous. From jellyfish off the Great Barrier Reef to crocodiles and sharks, poisonous insects and snakes, the continent and its waters host wildlife that merit awe and respect in equal doses. Further information on Australian wildlife may be obtained from the Wet Tropics Management Authority Information on Marine Life at http://www.wettropics.gov.au/vi/vi_marine.html and the Wet Tropics Management Authority information on animals at http://www.wettropics.gov.au/vi/vi_animals.html. Swimmers should use safety precautions, swim between the flags only where a lifeguard is present, and never swim alone. Scuba diving can be a treacherous sport. Over the past few years there have been numerous deaths related to diving incidents. Divers are urged to follow recommended precautions and never dive alone.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's internet site at wwwn.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith/en.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Australia is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

Visitors are reminded that all traffic operates on the left side of the road, and that all vehicles use right-hand drive. Visitors should use caution when crossing streets and when driving. When crossing roads, pedestrians are reminded to look carefully in all directions. Seat belts are mandatory. Speed limits and laws regarding driving while intoxicated are rigorously enforced. Roads and streets are frequently narrower and less graded than U.S. highways. Out-

side the major metropolitan areas, most highways are two-lane roads with significant distances between destinations. Speed limits vary throughout Australia. For a list of State Roads and Traffic Authorities and other sites concerning traffic rules and regulations, travelers may visit http://www.rta.nsw.gov.au/relatedwebsites.html.

Drivers are urged to exercise caution while passing or merging with adjacent traffic. When driving in rural areas, particularly in the Northern Territory where there are no speed limits, drivers should be cautious of free-roaming animals and "road-trains" (several semi-truck trailers connected together). It is dangerous to pass road-trains, and it is advisable to pull over and allow on-coming road-trains to pass to avoid being sideswiped. A number of fatalities have occurred in the Northern Territory when vehicles driven at high rates of speed have skidded and overturned after hitting the loose gravel shoulder of the road. U.S. drivers, especially those inexperienced with 4-wheel drive vehicles, should exercise common-sense judgment when driving in outback Australia.

For specific information concerning Australian driving permits, vehicle inspection, road tax, mandatory insurance, and the rental and operation of motor vehicles in Australia, contact the Australian Tourist Commission at http://www.australia.com.

Aviation Safety Oversight: The U.S. Federal Aviation Administration (FAA) has assessed the Government of Australia's Civil Aviation Authority as being in compliance with International Civil Aviation Organization (ICAO) aviation safety standards for oversight of Australia's air carrier operations. For more information, travelers may visit the FAA's web site at http://www.faa.gov.

Special Circumstances: Australian customs authorities enforce very strict regulations concerning the importation from all countries of items such as agricultural and wood products, as well as very strict quarantine standards for other products, animals, and pets. These regulations also apply to items tourists bring with them. It is advisable to contact the Embassy of Australia in Washington or one of Australia's consulates in the United States for specific information regarding customs requirements, or see the Australian Government's Department of Agriculture, Fisheries and Forestry at http://www.aqis.gov.au.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating Australia's laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Australia are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in Australia are encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration web site so that they can obtain updated information on travel and security Australia. Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency.

In the Australian Capital Territory (ACT) or Queanbeyan: For emergency services (i.e. the arrest, death or serious injury of American citizens) please contact the U.S. Embassy in Canberra. The Embassy is located on Moonah Place, Yarralumla, ACT 2600, telephone (61) (2) 6214-5600, fax (61) (2) 6273-3191, web site http://canberra.usembassy.gov.

Note: Passports and other routine citizen services for Canberra and the rest of the ACT are provided by the U.S. Consulate in Sydney.

In New South Wales, Norfolk Island, Lord Howe Island and Queensland: For registration, passport, and other consular services for American citizens, please contact the U.S. Consulate General in Sydney located on Level 59, MLC Centre, 19-29 Martin Place, Sydney NSW 2000, telephone (61) (2) 9373-9200, fax (61) (2) 9373-9184, web site http://sydney.usconsulate.gov/sydney/index. html. Hours open to the public: 8:00 a.m. to 11:30 a.m., Monday to Friday (except American and Australian holidays and the first Wednesday of each month). For emergency services (i.e. the arrest, death or serious injury of American citizens) after 5:00 p.m. weekdays or on holidays and weekends please call (61) (2) 4422-2201.

In Victoria, Tasmania, South Australia and the Northern Territory: For registration, passport and other consular services for American citizens, please contact the U.S. Consulate General in Melbourne located at 553 St. Kilda Road, Melbourne, VIC 3004, telephone (61) (3) 9526-5900, fax (61) (3) 9525-0769, web site http://melbourne.usconsulate.gov/melbourne/index.html. Hours open to the public: 8:30 a.m. to 12:30 p.m. Monday to Friday (except American and Australian holidays and the last Wednesday of each month). For emergency services (i.e. the arrest, death or serious injury of American citizens) after 4:30 p.m. or on holidays and weekends, please call (61) (3) 9389-3601.

In Western Australia: For registration, passport, and other consular services for American citizens, please contact the U.S. Consulate

General in Perth located at 16 St. Georges Terrace, Perth WA 6000, telephone: (61)(8) 9202-1224, fax (61)(8) 9231-9444; web site http://perth.usconsulate.gov/perth. Hours open to the public for American Citizen Services: 8:30-11:30 a.m. Monday through Thursday. For emergency services (i.e. the arrest, death, or serious injury of an American citizen), outside of business hours please call (61) (8) 9476-0081.

International Parental Child Abduction

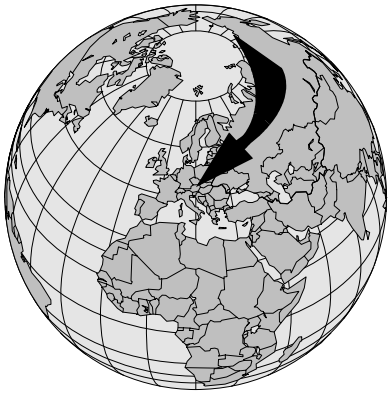
November 2008

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *International Child Abduction* section of this book and review current reports online at www.travel.state.gov/childabduction.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is provided for general information only. Questions involving interpretation of specific foreign laws should be addressed to foreign legal counsel.

General Information: Custody in Australia is referred to as "parental responsibility." Unless there is a court order to the contrary, the parents of a child are assumed to have "joint parental responsibility." A court-issued "residence" order specifies who will be the primary physical custodian of the child. A "contact" order is similar to a U.S. visitation or access order. Australian family courts adjudicate petitions on a case-by-case basis with the judge applying the "best interests of the child" standard. The amount of access allowed a non-custodial parent is also decided on a case-by-case basis, and may be denied under certain egregious circumstances. Legitimacy of the child is not a factor in a judge's determination.

If your child has a claim to Australian citizenship, you may be able to prevent the issuance of an Australian passport to your child. Please contact a consular officer at the Australian Embassy in Washington, D.C. (202-797-3000) for further information. There is also an Australian Consulate in California (310-229-4800).



The Hague Convention: The United States is a party to the Hague Convention on the Civil Aspects of International Child Abduction. Its purpose is to discourage international parental child abduction and to ensure that children who are abducted or wrongfully retained, are returned to their country of habitual residence. The Convention does not deal with child custody itself, but determines the jurisdiction where those custody issues should be adjudicated.

The Hague Convention entered into force between the United States and Australia on July 1, 1988. Therefore, Hague Convention provisions for return would apply to children abducted to or retained in Australia after July 1, 1988. Under certain circumstances, parents and legal guardians of children taken to Australia prior to July 1, 1988, may still submit applications for access to the child under the Hague Convention.

The designated Central Authority for all of Australia is the Commonwealth Attorney General's Department, International Family Law Section, which is part of the Family Law and Legal Assistance Division. Their address is Robert Garran Offices, National Circuit, Barton, ACT 2600, Australia. The international telephone number is 011-61-2-6250-6724 and the international telefax number is 011-61-2-6250-5917. The Section maintains a website, which is located at http://www.law.gov.au/childabduction. For more information, please read the *International Parental Child Abduction* section of this book and review current reports online at www.travel.state.gov/childabduction.

Criminal Remedies: For information on possible criminal remedies, please contact your local law enforcement authorities, or the nearest office of the Federal Bureau of Investigation. Information is also available on the Internet at the web site of the U.S. Department of Justice, Office of Juvenile Justice and Delinquency Prevention at http://www.ojjdp.ncjrs.org. You should be aware that filing criminal child abduction charges in the United States against a taking parent may jeopardize an Australian Hague Convention case.

For further information on international parental child abduction, contact the Office of Children's Issues, U.S. Department of State at 1-888-407-4747 or visit its web site on the Internet at http://travel.state.gov. You may also direct inquiries to: Office of Children's Issues, U.S. Department of State, Washington, DC 20520-4811; Phone: (202) 736-9090; Fax: (202) 312-9743.

AUSTRIA

Compiled from the November 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Republic of Austria

PROFILE

Geography

Area: 83,857 sq. km. (32,377 sq. mi.); slightly smaller than Maine.
Cities: Capital—Vienna (2007 pop. 1.68 million). Other cities—Graz, Linz, Salzburg, Innsbruck, Klagenfurt.
Terrain: Alpine (64%), northern highlands that form part of the Bohemian Massif (10%), lowlands to the east (26%).
Climate: Continental temperate.

People

Nationality: Noun and adjective—Austrian(s).
Population: (2007) 8,332,000.
Annual growth rate: (2007) 0.4%.
Ethnic groups: Germans, Turks, Serbs, Croats, Slovenes, and Bosnians; other recognized minorities include Hungarians, Czechs, Slovaks, and Roma.
Religions: Roman Catholic 73.6%, Lutheran 4.7%, Muslim 4.2%, other 5.5, no confession 12.0%.
Languages: German about 90%.
Education: Years compulsory—9. Attendance—99%. Literacy—98%.
Health: (2007) Infant mortality rate—3.6 deaths/1,000. Life expectancy—men 77.4 years, women 82.9 years.
Work force: (2007, 4.2 million) Services—67%; agriculture and forestry—5%, industry—28%.

Government

Type: Federal Parliamentary democracy.
Constitution: 1920; revised 1929 (reinstated May 1, 1945).
Government branches: Executive—federal president (chief of state), chancellor (head of government), cabinet. Legislative—bicameral Federal Assembly (Parliament). Judicial—Constitutional Court, Administrative Court, Supreme Court.
Political parties: Social Democratic Party, People's Party, Freedom Party, Greens, Alliance—Future-Austria.
Suffrage: Universal over 18.
Political subdivisions: Nine Bundeslander (federal states).
Defense: (2007) 0.8% of GDP.

Economy

GDP: (2007) $373.6 billion
Real GDP growth rate: (2007) 3.4%.
Per capita income: (2007) $44,890.
Natural resources: Iron ore, crude oil, natural gas, timber, tungsten, magnesite, lignite, cement.
Agriculture: 1.9% of 2007 GDP) Products—livestock, forest products, grains, sugarbeets, potatoes.
Industry: (31.2% of 2007 GDP) Types—iron and steel, chemicals, capital equipment, consumer goods.
Services: 66.9% of 2007 GDP.
Trade: (2007) Exports—$156.4 billion: iron and steel products, timber, paper, textiles, electrotechnical machinery, chemical products, foodstuffs. Imports—$155.9 billion: machinery, vehicles, chemicals, iron and steel, metal goods, fuels, raw materials, foodstuffs. Principal trade partners—European Union, Switzerland, U.S., and China.

PEOPLE

Austrians are a homogeneous people; about 90% speak German as everyday language. However, there has been a significant amount of immigrants, particularly from former Yugoslavia and Turkey, over the last two decades. Only two numerically significant autochthonous minority groups exist—18,000 Slovenes in Carinthia (south central Austria) and about 19,400 Croats in Burgenland (on the Hungarian border). The Slovenes form a closely-knit community. Their rights as well as those of the Croats are protected by law and generally respected in practice. Some

Austrians, particularly near Vienna, still have relatives in the Czech Republic, Slovakia, and Hungary. About 74% of all Austrians are Roman Catholic. The church abstains from political activity. Small Lutheran minorities are located mainly in Vienna, Carinthia, and Burgenland. There are some Islamic communities, concentrated in Vienna and Vorarlberg.

HISTORY

Austrian history as such dates back to 976, when Leopold von Babenberg became the ruler of much of present-day Austria. In 1276 Rudolf I became the first Habsburg to ascend to the throne.

The Habsburg Empire

Although never unchallenged, the Habsburgs ruled Austria for nearly 750 years. Through political marriages, the Habsburgs were able to accumulate vast land wealth encompassing most of Central Europe and stretching even as far as the Iberian Peninsula. After repulsing challenges from the Ottoman Empire in the 16th and 17th centuries, Austrian territory became increasingly consolidated in the central European part of the Danube basin.

In 1848 Franz Josef I ascended to the throne and remained in power until his death in 1916. Franz Josef saw many milestones in Austrian history. The Compromise of 1867 gave greater political rights to Hungary within the Empire, creating what became known as the Dual Monarchy. Political unity deteriorated further in the beginning of the 20th century, culminating, under the stress of World War I, in the collapse of the Empire and proclamation of an Austrian Republic on territory roughly identical to modern day Austria. In 1919, the Treaty of St. Germain officially ended Habsburg rule and established the Republic of Austria.

Political Turmoil During the Inter War Years Leads to Anschluss

From 1918 to 1934, Austria experienced sharpening political strife. In the late 1920s and early 1930s, paramilitary political organizations were engaged in strikes and violent conflicts. Unemployment rose to an estimated 25%. In 1934, a corporatist and authoritarian government came into power in Austria. Austrian National Socialists (NS) launched an unsuccessful coup d'etat in July 1934. Though the government sought to preserve Austrian independence, in February 1938, under renewed threats of military intervention from Germany, Chancellor Kurt Schuschnigg was forced to accept Austrian National Socialists (Nazis) in his government. On March 12, Germany sent its military forces into Austria and annexed the country ("Anschluss"), an action that received enthusiastic support among most Austrians.

The Holocaust in Austria

From March 1938 to April 1945, most of the Jewish population of the country was murdered or forced into exile. Other minorities, including the Sinti and Roma, homosexuals, and many political opponents of the Nazis also received similar treatment. Prior to 1938, Austria's Jewish population constituted 200,000 persons, or about 3% to 4% of the total population. Most Jews lived in Vienna, where they comprised about 9% of the population. Following Anschluss, the Germans rapidly applied their anti-Jewish laws in Austria. Jews were forced out of many professions and lost access to their assets. In November 1938, the Nazis launched the Kristallnacht pogrom in Austria as well as in Germany. Jewish businesses were vandalized and ransacked.

Thousands of Jews were arrested and deported to concentration camps. Jewish emigration increased dramatically. Between 1938 and 1940, over half of Austria's Jewish population fled the country. Some 35,000 Jews were deported to the Ghettos in Eastern Europe. Some 67,000 Austrian Jews (or one-third of the total 200,000 Jews residing in Austria) were sent to concentration camps. Those in such camps were murdered or forced into dangerous or severe hard labor that accelerated their death. Only 2,000 of those in the death camps survived until the end of the war.

Austria Post World War II

After liberation in April 1945, the victorious allies divided Austria into zones of occupation similar to those in Germany with a four-power administration of Vienna. Under the 1945 Potsdam agreements, the Soviets took control of German assets in their zone of occupation. These included 7% of Austria's manufacturing plants, 95% of its oil resources, and about 80% of its refinery capacity.

The properties were returned to Austria under the Austrian State Treaty. This treaty, signed in Vienna on May 15, 1955, came into effect on July 27, and, under its provisions, all occupation forces departed by October 25, 1955. Austria became free and independent for the first time since 1938.

Austrian Compensation Programs and Acknowledgement of its Nazi Role

During the immediate postwar period, Austrian authorities introduced certain restitution and compensation measures for Nazi victims, but many of these initial measures were later seen as inadequate and containing flaws and injustices. There is no official estimate of the amount of compensation made under these programs.

More disturbing for many was the continuation of the view that prevailed since 1943 that Austria was the "first free country to fall a victim" to Nazi aggression. This "first victim" view was in fact fostered by the Allied Powers themselves in the Moscow Declaration of 1943, in which the Allies declared as null and void the Anschluss and called for the

restoration of the country's independence. The Allied Powers did not ignore Austria's responsibility for the war, but nothing was said explicitly about Austria's responsibility for Nazi crimes on its territory. With the collapse of the Soviet Union in 1991, greater attention was given in many countries to unresolved issues from World War II, including Austria. On November 15, 1994, Austrian President Thomas Klestil addressed the Israeli Knesset, noting that Austrian leaders "... spoke far too rarely of the fact that some of the worst henchmen of the NS dictatorship were in fact Austrians.....In the name of the Republic of Austria, I bow my head before the victims of that time." Since 1994, Austria has committed to providing victims and heirs some $1 billion in total compensation.

GOVERNMENT

The Austrian president convenes and concludes parliamentary sessions and under certain conditions can dissolve Parliament. However, no Austrian president has dissolved Parliament in the Second Republic. The custom is for Parliament to call for new elections if needed. The president requests a party leader, usually the leader of the strongest party, to form a government. Upon the recommendation of the Federal Chancellor, the president also appoints cabinet ministers.

The Federal Assembly (Parliament) consists of two houses—the National Council (Nationalrat), or lower house, and the Federal Council (Bundesrat), or upper house. Legislative authority resides in the National Council. Its 183 members serve for a maximum term of four years in a three-tiered system, on the basis of proportional representation. The National Council may dissolve itself by a simple majority vote or the president may dissolve it on the recommendation of the Chancellor. The nine state legislatures elect the 62 members of the Federal Council for 5- to 6-year terms. The Federal Council only reviews legislation passed by the National Council and can delay but not veto its enactment.

The highest courts of Austria's independent judiciary are the Constitutional Court; the Administrative Court, which handles bureaucratic disputes; and the Supreme Court, for civil and criminal cases. While the Supreme Court is the court of highest instance for the judiciary, the Administrative Court acts as the

supervisory body over government administrative acts of the executive branch, and the Constitutional Court presides over constitutional issues. The Federal President appoints the justices of the three courts for specific terms.

The legislatures of Austria's nine Bundeslander (states) elect the governors. Although most authority, including that of the police, rests with the federal government, the states have considerable responsibility for welfare matters and local administration. Strong state and local loyalties have roots in tradition and history.

Principal Government Officials

Last Updated: 11/12/08

Pres.: **Heinz FISCHER**
Chancellor: **Alfred GUSENBAUER**
Vice Chancellor: **Wilhelm MOLTERER**
Min. for Agriculture, Forestry, Environment, & Water Management: **Josef PROELL**
Min. for Economics & Labor: **Martin BARTENSTEIN**
Min. for Education, Arts, & Culture: **Claudia SCHMIED**
Min. for European & International Affairs: **Ursula PLASSNIK**
Min. for Finance: **Wilhelm MOLTERER**
Min. for Health, Family, & Youth: **Andrea KDOLSKY**
Min. for Interior: **Maria FEKTER**
Min. for Justice: **Maria BERGER**
Min. for National Defense: **Norbert DARABOS**
Min. for Science & Research: **Johannes HAHN**
Min. for Social & Consumer Protection: **Erwin BUCHINGER**
Min. for Transportation, Innovation, & Technology: **Werner FAYMANN**
Min. for Women, Media, & Public Service: **Heidrun SILHAVY**
State Sec. in the Chancellery: **Reinhold LOPATKA**
State Sec. in the Chancellery: **Andreas SCHIEDER**
State Sec. in the Min. for Economics & Labor: **Christine MAREK**
State Sec. in the Min. for Finance: **Christoph MATZNETTER**
State Sec. in the Min. for European & International Affairs: **Hans WINKLER**
State Sec. in the Min. for Transportation, Innovation, & Technology: **Christa KRANZL**
Pres., Austrian National Bank: **Herbert SCHIMETSCHEK**
Ambassador to the US: **Eva NOWOTNY**
Permanent Representative to the UN, New York: **Gerhard PFANZELTER**

Austria maintains an embassy in the United States at 3524 International Court, NW, Washington, DC 20008 (tel. 202-895-6700). Consulates General are in New York, Chicago, and Los Angeles, and honorary consulates are in Anchorage, Atlanta, Boston, Buffalo, Charlotte, Columbus, Denver, Detroit, Honolulu, Houston, Indianapolis, Kansas City, Miami, Milwaukee, New Orleans, Philadelphia, Pittsburgh, Portland, Richmond, St. Paul, St. Louis, St. Thomas, Salt Lake City, San Francisco, San Juan, and Seattle.

POLITICAL CONDITIONS

Since 1955, Austria has enjoyed political stability. A Socialist elder statesman, Dr. Karl Renner, organized an Austrian administration in the aftermath of the war, and the country held general elections in November 1945. All three major parties—the conservative People's Party (OVP), the Socialists (later Social Democratic Party or SPO), and Communists—governed until 1947, when the Communists left the government. The OVP then led a governing coalition with the SPO that governed until 1966.

Between 1970 and 1999, the SPO governed the country either alone or with junior coalition partners. In 1999, the OVP formed a coalition with the right wing, populist Freedom Party (FPO). The SPO, which was the strongest party in the 1999 elections, and the Greens formed the opposition. The FPO had gained support because of populist tactics, and many feared it would represent right wing extremism. As a result, the European Union (EU) imposed a series of sanctions on Austria. The U.S. and Israel, as well as various other countries, also reduced contacts with the Austrian Government. After a period of close observation, the EU lifted sanctions, and the U.S. revised its contacts policy. In the 2002 elections, the OVP became the largest party, and the FPO's strength declined by more than half. Nevertheless, the OVP renewed its coalition with the FPO in February 2003. In national elections in October 2006, the SPO became the largest party, edging the OVP. On January 11, 2007, an SPO-led Grand Coalition took office, with the OVP as junior partner. In July 2008, following months of dispute between the ruling parties, the coalition collapsed when Vice Chancellor Wilhelm Molterer (OVP) called for early elections. New elections are scheduled for September 28, 2008.

The Social Democratic Party traditionally draws its constituency from blue- and white-collar workers. Accordingly, much of its strength lies in urban and industrialized areas. In the 2006 national elections, it garnered 35.3% of the vote. In the past, the SPO advocated state involvement in Austria's key industries, the extension of social security benefits, and a full-employment policy. Beginning in the mid-1980s, it shifted its focus to free market-oriented economic policies, balancing the federal budget, and European Union membership.

The People's Party advocates conservative financial policies and privatization of much of Austria's nationalized industry. It finds support from farmers, large and small business owners, and some lay Catholic groups, mostly in the rural regions of Austria. In 2006, it received 34.3% of the vote. The Greens won 11.1% of the vote in 2006, becoming the third-largest party in parliament. The rightist Freedom Party traditionally had a base in classic European liberalism. However, after losing much of its support in the 2002 elections and suffering a split, the FPO won slightly more of the vote in 2006—11%—than it did in 2002, due to a populist, anti-immigration theme. The Alliance-Future-Austria (BZO) split from the FPO in 2005. All the FPO's Federal Ministers and

most of its parliamentarians joined the BZO, and that party formally became the junior partner in the governing coalition. The BZO was unable to draw significant popular support away from the FPO, but managed to enter parliament in 2006 with 4.1% of the vote.

ECONOMY

Austria has a well-developed social market economy with a high standard of living. Until the late 1980s, the government and its state-owned industries conglomerate played a very important role in the Austrian economy. However, starting in the early 1990s, the group broke apart, state-owned firms started to operate largely as private businesses, and the government wholly or partially privatized many of these firms. Although the government"s privatization work in past years has been very successful, it still operates some firms, state monopolies, utilities, and services. The Schussel government's privatization program further reduced government participation in the economy. The Gusenbauer government did not reverse privatizations, and did not undertake any further privatizations. Austria enjoys well-developed industry, banking, transportation, services, and commercial facilities. Most industrial and commercial enterprises in Austria are relatively small on an international scale.

Austria has a strong labor movement. The Austrian Trade Union Federation (OGB) comprises constituent unions with a total membership of about 1.3 million—about 39% of the country's wage and salary earners. The OGB has always pursued a moderate, consensus-oriented wage policy, cooperating with industry, agriculture, and the government on a broad range of social and economic issues in what is known as Austria's "social partnership." Because of a scandal involving a bank the OGB owned, the OGB lost much of its political influence and is still trying to recover.

Austrian farms, like those of other west European mountainous countries, are small and fragmented, and production is relatively expensive. Since Austria became a member of the EU in 1995, the Austrian agricultural sector has been undergoing substantial reform under the EU's common agricultural policy (CAP). Although Austrian farmers provide about 80% of domestic food requirements, the agricultural contribution to gross domestic product (GDP) has declined since 1950 to less than 2%.

Austria has achieved sustained economic growth and belongs to the richest countries in the EU (4th after Luxembourg, Ireland, and the Netherlands). After a period of low growth of only around 1.0% annually during 2001-2003, Austria's economy recovered again in 2004 and 2005 and grew 2.5% and 2.9%, respectively, driven by booming exports in response to strong world economic growth. Primarily due to higher growth in Europe, particularly Central and Eastern Europe, and continued export growth, Austrian real GDP grew 3.3% in 2006 and 3.4% in 2007. The strong economic growth helped reduce Austria's unemployment rate to 4.4% in 2007. Predictions are for the economy to grow 2.2%-2.3% in 2008 and 1.4%-1.9% in 2009; however, these projections include a high risk of downward revision.

Austria became a member of the EU on January 1, 1995. Membership brought economic benefits and challenges and has drawn an influx of foreign investors. Austria also has made progress in generally increasing its international competitiveness. As a member of the Economic and Monetary Union (EMU), Austria has integrated its economy with those of other EU member countries, especially with Germany's. On January 1, 1999, Austria introduced the new Euro currency for accounting purposes.

In January 2002, Austria introduced Euro notes and coins in place of the Austrian schilling. Economists agree that the economic effects in Austria of using a common currency with the rest of the members of the Euro-zone have been positive. Trade with other EU-27 countries accounts for about 73% of Austrian imports and exports. Expanding trade and investment in the new EU members of central and eastern Europe that joined the EU in May 2004 and January 2007 represent a major element of Austrian economic activity. Austrian firms have sizable investments in and continue to move labor-intensive, low-tech production to these countries. About one-half of Austria's foreign direct investment is concentrated in the countries of central, eastern, and southeastern Europe. Austria still has the potential to attract EU firms seeking convenient access to developing markets in central and eastern Europe and the Balkan countries.

Total trade with the United States in 2007 reached $13.0 billion. Imports from the United States amounted to $5.1 billion, constituting a U.S. market share in Austria of 3.3%. Austrian exports to the United States in 2007 were $7.9 billion, or 5.1% of total Austrian exports. Approximately 350 U.S. firms have made investments in Austria. Investment flows indicate that U.S. foreign direct investment in Austria reached a new record total of about $12.1 billion, which represents about 10% of the total in Austria and moves the U.S. to the number two position among foreign investors in Austria.

FOREIGN RELATIONS

The 1955 Austrian State Treaty ended the four-power occupation and recognized Austria as an independent and sovereign state. In October 1955, the Federal Assembly passed a constitutional law in which "Austria declares of her own free will her perpetual neutrality." The second section of this law stated that "in all future times Austria will not join any military alliances and will not permit the establishment of any foreign military bases on her territory." The date on which this provision passed—October 26—became Austria's National Day. From then, Austria shaped its foreign policy on the basis of neutrality.

In recent years, however, Austria began to reassess its definition of neutrality, granting overflight rights for the UN-sanctioned action against Iraq in 1991, and, since 1995, contemplating participation in the EU's evolving security structure. Also in 1995, it joined the Partnership for Peace with NATO, and subsequently participated in peacekeeping missions in Bosnia.

Austrian leaders emphasize the unique role the country plays both as an East-West hub and as a moderator between industrialized and developing countries. Austria is active in the United Nations and experienced in UN peacekeeping efforts. It attaches great importance to participation in the Organization for Economic Cooperation and Development and other international economic organizations, and it has played an active role in the Organization for Security and Cooperation in Europe (OSCE). Austria has participated in the UN-mandated International Security Assistance Force (ISAF) in Afghanistan since 2002. In August 2005, Austria deployed 93 soldiers to the northern Afghan city of Kunduz to help support the parliamentary and provincial elections. Austria has a contingent of 160 peacekeepers in Chad as part of the EU mission there, aiding victims of civil unrest in Darfur. Austria has also participated in international reconstruction assistance efforts and has provided about 8.5 million Euros since 2002 to combat drugs, to strengthen women's rights, and for mine removal.

Vienna hosts the Secretariat of the OSCE and the headquarters of the International Atomic Energy Agency, the UN Industrial Development Organization, and the UN Drug Control Program. Other international organizations in Vienna include the Organization of Petroleum Exporting Countries, the International Institute for Applied Systems Analysis, the Comprehensive Test Ban Treaty Organization, and the Wassenaar Arrangement (a technology-transfer control agency).

Austria traditionally has been active in "bridge-building to the east," increasing contacts at all levels with eastern Europe and the states of the former Soviet Union. Austrians maintain a constant exchange of business representatives, political leaders, students, cultural groups, and tourists with the countries of central and eastern Europe. Austrian companies are active in investing and trading with those countries as well. In addition, the Austrian Government and various Austrian organizations provide assistance and training to support the changes underway in the region.

U.S.-AUSTRIAN RELATIONS

Austria's political leaders and people recognize and appreciate the essential role the U.S. played in the country's reconstruction and in the Austrian State Treaty. It is in the interest of the U.S. to maintain and strengthen these strong relations and to maintain Austria's political and economic stability.

TRAVEL

Consular Information Sheet

July 29, 2008

Country Description: Austria is a highly developed stable democracy with a modern economy.

Entry Requirements: A valid passport is required. U.S. citizens can stay without a visa for tourist/business for up to 90 days. That period begins when you enter any of the Schengen countries: Austria, Belgium, the Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Italy, Latvia, Lithuania, Luxembourg, the Netherlands, Norway, Poland, Portugal, Slovakia, Slovenia, Spain, and Sweden. For further information concerning entry requirements for Austria, travelers should visit the Embassy of Austria's web site at http://www.austria.org for the most current visa information. The Embassy of Austria is located at 3524 International Court NW, Washington, DC 20008, tel: (202) 895-6711, and the Austrian Consulates General are located in Chicago, Los Angeles, and New York.

Note: Although European Union regulations require that non-EU visitors obtain a stamp in their passport upon initial entry to a Schengen country, many borders are not staffed with officers carrying out this function. If an American citizen wishes to ensure that his or her entry is properly documented, it may be necessary to request a stamp at an official point of entry. Under local law, travelers without a stamp in their passport may be questioned and asked to document the length of their stay in Schengen countries at the time of departure or at any other point during their visit, and could face possible fines or other repercussions if unable to do so.

Safety and Security: Austria remains largely free of terrorist incidents. However, like other countries in the Schengen area, Austria's open borders with its Western European neighbors allow the possibility of terrorist groups entering/exiting the country with anonymity. Americans are reminded to remain vigilant with regard to their personal security and to exercise caution.

Every year, a number of avalanche deaths occur in Austria's alpine regions. Many occur when skiers/snowboarders stray from the designated ski slopes. Leaving the designated slopes to ski off-piste may pose serious risks and may delay rescue attempts in case of emergency. Skiers/snowboarders should monitor weather and terrain conditions, and use the available avalanche rescue equipment. Avalanche beepers (transceivers) are the most common rescue devices and, when properly used, provide the fastest way of locating an avalanche victim, usually enabling authorities to begin rescue operations within minutes.

For the latest security information, Americans traveling abroad should regularly monitor the Department of State, Bureau of Consular Affairs' web site at http://travel.state.gov, where the current Travel Warnings and Travel Alerts, as well as the Worldwide Caution, can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S. and Canada, or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: Austria has a low crime rate, and violent crime is rare. However, crimes involving theft of personal property have increased in recent years. Travelers should be particularly careful not to leave valuables at their table while serving themselves from the breakfast buffet. Travelers are also targets of pickpockets who operate where tourists tend to gather. Some of the spots where such crimes are most frequently reported include Vienna's two largest train stations, the plaza around St. Stephan's Cathedral and the nearby pedestrian shopping areas (in Vienna's First District).

There has been an increase in thefts and pick pocketing on public transportation lines, especially on those lines coming in and out of the city center. U.S. citizens are advised to secure personal belongings and always take precautions while on public transportation and in public places such as cafes and tourist areas. Many citizens have had to disrupt travel plans while awaiting replacements for lost and stolen passports since emergency passports are generally only authorized in rare circumstances such as critical medical emergencies.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

Medical Facilities and Health Information: Excellent medical care is widely available. The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and if it will cover emergency expenses such as a medical evacuation. U.S. medical insurance plans seldom cover health costs incurred outside the United States unless supplemental coverage is purchased. Further, U.S. Medicare and Medicaid programs do not provide payment for medical services outside the United States. However, many travel agents and private companies offer insurance plans that will cover health care expenses incurred overseas, including emergency services such as medical evacuations.

Information on vaccinations and other health precautions, such as safe

food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's web site at http://wwwn.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith/en.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Austria is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

Road conditions in Austria are generally excellent. During the winter, however, roads in alpine areas may become dangerous due to snowfall, ice, or avalanches. Some mountain roads may be closed for extended periods and tire chains are often required. Drivers should exercise caution during the heavily traveled vacation periods (December-February, Easter, July-August). Extra caution is recommended when driving through autobahn construction zones, particularly on the A-1 East/West Autobahn. Reduced lanes and two-way traffic in these zones have resulted in several deadly accidents in recent years.

Traffic information and road conditions are broadcast on the English language channel fm4, located between 91 and 105 FM depending on the locale.

A U.S. driver's license alone is not sufficient to drive in Austria. The U.S. driver's license must be accompanied by an international driver's permit (obtainable in the U.S. from American Automobile Association and the American Automobile Touring Alliance) or by an official translation of the U.S. driver's license, which can be obtained at one of the Austrian automobile clubs (OEAMTC or ARBOE). This arrangement is only acceptable for the first six months of driving in Austria, after which all drivers must obtain an Austrian license.

Austria requires all vehicles using the autobahn to display a highway tax sticker "Autobahn Vignette" on the inside windshield of the vehicle. The sticker may be purchased at border crossings, gas stations in Austria, as well as small "Tabak" shops located in Austrian towns. Fines for failing to display a valid autobahn vignette on the windshield of your car are usually around $120.00.

Austrian autobahns have a maximum speed limit of 130 km/hr, although drivers often drive much faster and pass aggressively. The use of hand-held cell phones while driving is prohibited. Turning right on red is also prohibited throughout Austria. The legal limit for blood alcohol content in Austria is.05 percent and penalties for driving under the influence tend to be stricter than in many U.S. states.

Tourists driving rented vehicles should pay close attention to the provisions of their rental contract. Many contracts prohibit drivers from taking rented vehicles into eastern European countries. Drivers attempting to enter countries listed as "prohibited" on the car rental contract may be arrested, fined, and/or charged with attempted auto theft.

Austrian police are authorized to hold the rented vehicle for the car rental company Emergency roadside help and information may be reached by dialing 123 or 120 for vehicle assistance and towing services (Austrian automobile clubs), 122 for the fire department, 133 for police, and 144 for ambulance. Visit the website of Austria's national tourist office and national authority responsible for road safety at http://austria-tourism.at/us.

Aviation Safety Oversight: The U.S. Federal Aviation Administration (FAA) has assessed the Government of Austria's Civil Aviation Authority as being in compliance with International Civil Aviation Organization (ICAO) aviation safety standards for oversight of Austria's air carrier operations. For more information, travelers may visit the FAA's web site at http://www.faa.gov.

Special Circumstances: Travelers using U.S. issued debit cards in Austrian Automatic Teller Machines (ATMs) may encounter problems. If the request for cash is rejected, travelers should check their accounts immediately to see whether the money was in fact debited from their account. If this is the case, they should notify their banking institution immediately. Prompt action may result in a refund of the debited amount.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating Austria's laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Austria are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in Austria are encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration web site so that they can obtain updated information on travel and security within Austria. Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency.

The Consular Section of the U.S. Embassy is located in the Marriott Hotel Building, on the fourth floor of Parking 12A, in the First District. The Embassy web site is http://vienna.usembassy.gov/en/index.html and includes security updates and other information helpful to American citizens.

Citizens requiring consular assistance may also send an email to ConsulateVienna@state.gov, or may contact the Consular Section through the U.S. Embassy switchboard at (43) (1) 31-339.

Intercountry Adoption

June 2008

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is based on public sources and our current understanding. Questions involving foreign and U.S. immigration laws and legal interpretation should be addressed respectively to qualified foreign or U.S. legal counsel.

The Hague Convention on Intercountry Adoption: The Hague Convention on Intercountry Adoption, to which the United States became a party on April 1, 2008, establishes legal and regulatory requirements for intercountry adoption. Austria is a party to The Hague Convention on Protection of Children and Co-operation in Respect of Intercountry Adoption (the Convention) and with which the Convention is in force for the United States.

There are few Austrian children eligible for intercountry adoption. Prospective adoptive parents must be legal residents of Austria.

Patterns of Immigration: Please review current reports online at http://adoption.state.gov.

Adoption Authorities: The government offices responsible for adoptions in Austria are the nine provinces, including the City of Vienna. Please review current reports online at http://adoption.state.gov for a list of agencies and addresses.

Eligibility to Adopt: The Austrian government prefers that the prospective adoptive parents be married, although the law does not officially specify this. If married, the couple must apply jointly. If not married, only one of the potential adoptive parents (if applicable) may apply. The adopting father must be at least 30 years old and the adopting mother 28 years old. If the adoptive parents already have children of their own (either biological or adopted), they may have less of a chance to adopt. The adoptive parents must also meet certain personal, social, health, and economic conditions determined by the court. Finally, the adoptive parents must have no criminal record.

Residency Requirements: The adoptive parents need to be legal residents of Austria.

Time Frame: Austrian adoptions take about 12 months to complete. This includes the 6 months during which the child lives with the adoptive parents while under the supervision of provincial adoption authorities and an additional 6 months needed to complete legal requirements.

Adoption Agencies and Attorneys: There are adoption agencies and attorneys specialized in adoption cases in Austria. A list of attorneys specializing in family law is available at the U.S. Embassy home page at http://www.usembassy.at.

Because Austria is a Convention country, adoption services must be provided by an accredited agency, temporarily accredited agency, approved person, supervised provider, or exempted provider. It is essential that prospective adoptive parent(s) seeking to adopt from a Convention country use an accredited adoption service provider. The U.S. Department of State maintains a current list of accredited adoption service providers. The list of accredited adoption service providers is also provided on the website of The Hague Permanent Bureau at www.hcch.net.

Adoption Fees: Prospective adoptive parents can expect to pay notary fees and that of any attorney selected. There are court costs (approximately $60) and an adoption contract of a similar amount to be paid in connection with an adoption. The U.S. Embassy in Austria discourages the payment of any fees that are not properly receipted, "donations," or "expediting" fees, that may be requested from prospective adoptive parents.

Adoption Procedures: If the child is legitimate, the adopting parent(s) must enter into a contract with the child's biological father (if contact can be made). This contract must contain certain legal requirements, including both the birth parent's consent. If the child is an orphan or illegitimate child, his/her legal guardian must sign the adoption contract. In addition, the child's mother (again, if contact is possible) must give her written consent to the adoption, unless she herself signed the adoption contract as legal guardian of the child. All signatures on the adoption contract as well as the biological mother's signature on her consent to the adoption must be notarized either by an Austrian notary public (within Austria) or by a notary public outside of Austria whose signature is authenticated

via the "apostille" procedure. A fact sheet outlining this latter procedure may be accessed on Internet at http://www.HCCH.net (Hague Legalization Convention).

If the court is satisfied that the adoption would be in the best interest of the child, it issues a decree (Beschluss) certifying the adoption contract. This decree makes the adoption final and legally valid, and a new birth certificate for the child giving any new name(s) may be obtained from the appropriate Bureau of Vital Statistics (Standesamt). If the court does not approve the adoption, the contract is void.

Although it is possible for this entire process to be carried out by the prospective parents or parent alone, it may be advisable to engage the assistance of a local Austrian attorney.

Required Documents: The adoption contract and the mother's release are submitted to the appropriate Austrian court with a petition for certification (Bestätigung). The court may require evidence of the adopting parent's financial status. The court may also require a "home study" in the United States or at the place of residence abroad through an appropriate agency.

Austrian Embassy

Washington D.C. 20008
Phone: 202-895-6711
Fax: 202-895-6773
Web site: http://www.austria.org

Austria also has consulates in Chicago, Los Angeles, and New York.

U.S. Immigration Requirements: As of April 1, 2008, U.S. citizens wishing to adopt in a Convention country must begin the process by filing with the U.S. Citizenship and Immigration Services (USCIS) a form I-800A *Application for Determination of Suitability to Adopt a Child from a Convention Country*. Prospective adoptive parents are strongly encouraged to consult the Department of Homeland Security, USCIS website (www.uscis.gov) to download forms and filing instructions.

Additional Information: For information on intercountry adoption and international parental child abduction, and security information for U.S. citizens traveling abroad, call Toll Free 1-888-407-4747. This number is available from 8:00 a.m. to 8:00 p.m. EST/EDT, Monday through Friday (except U.S. federal holidays). Callers who are unable to use toll-free numbers, such as those calling from overseas, may obtain information and assistance during these hours by calling 1-202-501-4444.

International Parental Child Abduction

November 2008

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *International Child Abduction* section of this book and review current reports online at www.travel.state.gov/childabduction.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is provided for general information only. Questions involving interpretation of specific foreign laws should be addressed to foreign legal counsel.

General Information: The Hague Convention on the Civil Aspects of International Child Abduction (the "Hague Convention") came into force between the United States and Austria on October 1, 1988. Therefore, Hague Convention provisions for return would apply to children abducted or retained after October 1, 1988.

Parents and legal guardians of children taken to or retained in Austria prior to October 1, 1988 may still submit applications for access to the child under the Hague Convention in some cases.

For more information, please read the *International Parental Child Abduction* section of this book and review current reports online at www.travel.state.gov/childabduction.

Criminal Remedies: For information on possible criminal remedies, please contact your local law enforcement authorities or the nearest office of the Federal Bureau of Investigation. Information is also available on the Internet at the web site of the U.S. Department of Justice, Office of Juvenile Justice and Delinquency Prevention at http://www.ojjdp.ncjrs.org.

Please note that criminal charges may complicate a Hague Convention case. Contact the country officer in the Office of Children's Issues for specific information. For further information on international parental child abduction, contact the Office of Children's Issues, U.S. Department of State at 1-888-407-4747 or visit its web site on the Internet at http://travel.state.gov. You may also direct inquiries to: Office of Children's Issues, U.S. Department of State, Washington, DC 20520-4811; Phone: (202) 736-9090; Fax: (202) 312-9743.

AZERBAIJAN

Compiled from the May 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Republic of Azerbaijan

PROFILE

Geography

Location: South Caucasus; bordered by Russia to the north, the Caspian Sea to the east, Iran to the south, and Georgia and Armenia to the west.

Area: 33,774 sq. mi. (includes Nakhchivan and Nagorno-Karabakh); slightly smaller than Maine.

Cities: Capital—Baku.

Terrain: Caucasus Mountains to the north, lowland in the central area through which the Kura River flows.

Climate: Dry, subtropical with hot summers and mild winters; forests, meadows, and alpine tundra in the mountains.

People

Nationality: Noun—Azerbaijani(s), Azeri. Adjective—Azerbaijani, Azeri.

Population: (January 2008) 8,629,900 (Government of Azerbaijan).

Population growth rate: (2007 est.) 1.1%(Government of Azerbaijan).

Net migration rate: (2006 est.) 4.38 migrant(s)/1,000 population.

Ethnic groups: (1999 census) Azeri 90.6%, Dagestani 2.2%, Russian 1.8%, Armenian 1.5%, other 3.9%. Note: the separatist Nagorno-Karabakh region is populated almost entirely by Armenians.

Religions: Muslim 93.4% (majority Shi'a), Russian Orthodox 2.5%, Armenian Orthodox Church 2.3%, and other 1.8%.

Languages: Azerbaijani 89%, Russian 3%, Armenian 2%, and other 6%.

Education: Literacy—97%.

Health: Infant mortality rate—83.41/1,000 live births (2000 est.). Life expectancy (2007 est.)—65.96 years.

Work force: (3 million) Agriculture and forestry—42.3%; industry—6.9%; construction—4.2%; other—46.6%.

Government

Type: Republic.

Constitution: Approved in November 1995 referendum.

Independence: August 30, 1991 (from Soviet Union).

Government branches: Executive—president (chief of state), prime minister (head of government), Council of Ministers (cabinet). Legislative—unicameral National Assembly (parliament). Judicial—Supreme Court.

Political subdivisions: 78 rayons, 11 cities, and 1 autonomous republic.

Political parties: New Azerbaijan Party, Musavat Party, Popular Front Party, Liberal Party, Democratic Party, National Independence Party, Democratic Reforms Party, Civil Solidarity Party, Hope Party, Justice Party, others. There are more than 40 registered political parties in Azerbaijan and many small, unregistered parties.

Suffrage: 18 years of age; universal.

Economy

GDP: (2007) $28.94 billion.

GDP real growth rate: (2007) 24.7%; (2008 est.): 16.1% (International Monetary Fund, Government of Azerbaijan).

Per capita GDP: (2007 est.) $3,862.

Inflation rate: (2007) 28.96% (Economic Research Center); 16.5% (Government of Azerbaijan).

Unemployment rate: (est.)15%-20%.

Natural resources: Petroleum, natural gas, iron ore, nonferrous metals, alumina.

Agriculture: Products—cotton, tobacco, grain, rice, grapes, fruit, vegetables, tea, cattle, pigs, sheep, goats.

Industry: Types—petroleum and natural gas, petroleum products, oilfield equipment, steel, iron ore, cement, chemicals, petrochemicals.

Trade: Exports—$1.557 billion (2008, first quarter), $6.1 billion (2007): oil and gas, chemicals, oilfield equipment, textiles, cotton. Imports—$1.214 billion (2008, first quarter), $5.1 billion (2007): machinery and parts, consumer durables, foodstuffs, textiles. Major trade part-

Due to its location astride the trade routes connecting Europe to Central Asia and the Near East and on the shore of the Caspian Sea, Azerbaijan was fought over by Russia, Persia, and the Ottomans for several centuries. Finally, the Russians split Azerbaijan's territory with Persia in 1828 by the Treaty of Turkmenchay, establishing the present frontiers and extinguishing the last native dynasties of local Azerbaijani khans. The beginning of modern exploitation of the oil fields in the 1870s led to a period of unprecedented prosperity and growth in the years before World War I.

At the collapse of the Russian Empire in 1917, an independent republic was proclaimed in 1918 following an abortive attempt to establish a Transcaucasian Republic with Armenia and Georgia. Azerbaijan received de facto recognition by the Allies as an independent nation in January 1920, an independence terminated by the arrival of the Red Army in April. Incorporated into the Transcaucasian Federated Soviet Socialist Republic in 1922, Azerbaijan became a union republic of the U.S.S.R. (Soviet Union) in 1936. The late 1980s were characterized by increasing unrest, eventually leading to a violent confrontation when Soviet troops killed 190 nationalist demonstrators in Baku in January 1990. Azerbaijan declared its independence from the U.S.S.R. on August 30, 1991.

ners—Italy, Russia, Turkey, Israel, U.S., Iran, other EU, and other countries formerly part of the Soviet Union.

HISTORICAL HIGHLIGHTS

Azerbaijan combines the heritage of two venerable civilizations—the Seljuk Turks of the 11th century and the ancient Persians. Its name is thought to be derived from the Persian phrase "Land of Fire," referring both to its petroleum deposits, known since ancient times, and to its status as a former center of the Zoroastrian faith. The Azerbaijani Republic borders the Iranian provinces of East and West Azerbaijan, although they have not been united into a single state in modern times.

Little is known about Azerbaijan's history until its conquest and conversion to Islam by the Arabs in 642 AD. Centuries of prosperity as a province of the Muslim caliphate followed. After the decline of the Arab Empire, Azerbaijan was ravaged during the Mongol invasions but regained prosperity in the 13th-15th centuries under the Mongol II-Khans, the native Shirvan Shahs, and under Persia's Safavid Dynasty.

GOVERNMENT AND POLITICAL CONDITIONS

Although the Government of Azerbaijan consists of three branches, Azerbaijan has a strong presidential system in which the legislative and judicial branches have only limited independence. The executive branch is made up of a president, his apparat, a prime minister, and the cabinet of ministers. The legislative branch consists of the 125-member parliament (Milli Majlis). Members, all of whom are elected from territorial districts, serve 5-year terms. The judi-

cial branch, headed by a Constitutional Court, is nominally independent.

Azerbaijan declared its independence from the former Soviet Union on August 30, 1991, with Ayaz Mutalibov, former First Secretary of the Azerbaijani Communist Party, becoming the country's first President. Following a March 1992 massacre of Azerbaijanis at Khojali in Nagorno-Karabakh (a predominantly ethnic Armenian region within Azerbaijan), Mutalibov resigned and the country experienced a period of political instability.

The old guard returned Mutalibov to power in May 1992, but less than a week later his efforts to suspend scheduled presidential elections and ban all political activity prompted the opposition Popular Front Party (PFP) to organize a resistance movement and take power. Among its reforms, the PFP dissolved the predominantly Communist Supreme Soviet and transferred its functions to the 50-member upper house of the legislature, the National Council.

Elections in June 1992 resulted in the selection of PFP leader Abulfez Elchibey as the country's second President. The PFP-dominated government, however, proved incapable of either credibly prosecuting the Nagorno-Karabakh conflict or managing the economy, and many PFP officials came to be perceived as corrupt and incompetent. Growing discontent culminated in June 1993 in an armed insurrection in Ganja, Azerbaijan's second-largest city. As the rebels advanced virtually unopposed on Baku, President Elchibey fled to his native province, the Azerbaijani exclave of Nakhchivan.

The National Council conferred presidential powers upon its new Speaker, Heydar Aliyev, former First Secretary of the Azerbaijani Communist Party (1969-81) and member of the U.S.S.R. Politburo and U.S.S.R. Deputy Prime Minister (until 1987). Elchibey was formally deposed by a national referendum in August 1993, and Aliyev was elected to a 5-year term as President in October with only token opposition. Aliyev won re-election to another 5-year term in 1998, in an election marred by serious irregularities.

Presidential elections that took place on October 15, 2003 resulted in the election of Ilham Aliyev, the son of Heydar Aliyev. The election did not meet international standards. Ilham Aliyev assumed the office of president on October 31, 2003. Heydar Aliyev died December 12, 2003. The next presidential elections will take place on October 15, 2008.

Azerbaijan's first parliament was elected in 1995. The present 125-member unicameral parliament was elected in November 2005 in an election that showed improvements in democratic processes, but still did not meet international standards. A majority of parliamentarians are from the President's "New Azerbaijan Party," although the 2005 elections brought in a much more diverse parliament, with up to 10 opposition members and a sizeable number of independents.

Many of these independents may have close ties to government, while as many as 20 others are business leaders whose political affiliations are not clear.

According to the constitution, the speaker of parliament stands next in line to the president. The parliament, however, is historically a weak body with little real influence. The current Speaker is Oktay Asadov, and the next parliamentary elections will take place in 2010.

Principal Government Officials

Last Updated: 11/12/08

President: **Ilham ALIYEV**
Prime Minister: **Artur RASIZADE**

ECONOMY

Azerbaijan is an economy in transition in which the state continues to play a dominant role. It has important oil reserves and a significant agronomic potential based on a wide variety of climatic zones. During the late 1990s, in cooperation with the International Monetary Fund (IMF), Azerbaijan pursued a successful economic stabilization program, with annual growth exceeding 10% since 2000. In 2007 Azerbaijan's gross domestic product increased by 24.7%, with growth in 2008 estimated at 16.1%. Increases in oil production have largely driven this rapid growth as the oil sector accounted for 52.8% of GDP in 2007. Output expansion

has been largely driven by oil-sector foreign direct investment (FDI) and related spillover effects in the construction and transportation sectors, although there have also been substantial gains in agriculture. Inflation officially reached nearly 17% in 2007, while unofficial consumer price index (CPI) calculations indicate inflation in excess of 28%. In the first quarter of 2008, inflation reached 9.61% and is a major risk that could accelerate in the context of further increases in fiscal spending, high oil prices, and an inflexible exchange rate. Importantly, the higher inflation also reflects customs restrictions that are in place due to supply constraints that limit import competition and monopolies that continue to control many sectors of the economy. The national currency, the manat, is stable and was allowed to appreciate against the dollar by 6.1% in 2005, 5.4% in 2006, and 3.4% in 2007. The IMF has warned that significantly more appreciation (roughly 10%) will be necessary to prevent inflation from increasing.

The 2008 budget increased government expenditures by about 80% over the 2007 budget, with significant increases in military spending, social assistance, wage increases, and capital spending. Part of the increase in expenditures was financed by revenues from the oil fund. The IMF has expressed concern about the impact on inflation and macroeconomic stability as well as governance if the capital budget is not well managed. The State Oil Fund (SOFAZ) was established as an extra-budgetary fund to ensure macroeconomic stability, transparency in the management of oil revenue, and the safeguarding of resources for future generations. All oil revenue profits from the development of new oil fields now flow into SOFAZ, and are held offshore. SOFAZ assets amounted to $3.34 billion by April 2008. Nevertheless, SOFAZ's sterilization effect is limited since it does not cover SOCAR, the State Oil Company. Both the IMF and the World Bank continue to emphasize the need to coordinate the budget planning process to integrate a medium-term spending framework with financing plans and the government's broader oil-revenue management strategy. Progress on economic reform has generally lagged. The government has undertaken regulatory reforms in some areas, including substantial opening of trade policy, but inefficient public administration, in which commercial and regulatory interests are co-mingled, limits the impact of these reforms. The government has largely completed privatization of agricultural lands and small and medium-sized enterprises. Azerbaijan is still plagued by an arbitrary tax and customs administration, a weak court system, monopolistic regulation of the market, and corruption.

For more than a century the backbone of the Azerbaijani economy has been petroleum. Now that Western oil companies are able to tap deepwater oilfields untouched by the Soviets because of poor technology, Azerbaijan is considered one of the most important spots in the world for oil exploration and development. Proven oil reserves in the Caspian Basin, which Azerbaijan shares with Russia, Kazakhstan, Turkmenistan, and Iran are comparable in size to the North Sea, although exploration is still in the early stages.

Azerbaijan has concluded 21 production-sharing agreements with various oil companies. Azerbaijan celebrated first oil for the Baku-Tbilisi-Ceyhan (BTC) pipeline in May 2005, and the official completion ceremony was held in Turkey in July 2006. The BTC pipeline is now operational and has a maximum capacity of one million barrels per day. A parallel Baku-Tbilisi-Erzurum gas export pipeline opened in September 2006, but, due to technical issues in the offshore Shah Deniz gas field, has operated only intermittently. Eastern Caspian producers in Kazakhstan also have expressed interest in accessing this pipeline to transport a portion of their production.

Environmental Issues

Azerbaijan faces serious environmental challenges. Soil throughout the region was contaminated by DDT and toxic defoliants used in cotton production during the Soviet era. Caspian petroleum and petrochemicals industries also have contributed to present air and water pollution problems. Several environmental organizations exist in Azerbaijan, yet few funds have been allocated to begin the necessary cleanup and prevention programs. Over-fishing by poachers is threatening the survival of Caspian sturgeon stocks, the source of most of the world's supply of caviar. The Convention on International Trade in Endangered Species (CITES) has listed as threatened all sturgeon species, including all commercial Caspian varieties. CITES imposed a ban on most Caspian caviar in January 2006, but lifted it in January 2007.

DEFENSE AND MILITARY ISSUES

In July 1992, Azerbaijan ratified the Treaty on Conventional Armed Forces in Europe (CFE), which establishes comprehensive limits on key categories of conventional military equipment and provides for the destruction of weaponry in excess of those limits. Although Azerbaijan did not provide all data required by the treaty on its conventional forces at that time, it has accepted on-site inspections of forces on its territory. Azerbaijan approved the CFE flank agreement in May 1997. It also has acceded to the nuclear Non-Proliferation Treaty as a non-nuclear weapons state. Azerbaijan participates in the North Atlantic Treaty Organization's (NATO) Partnership for Peace.

FOREIGN RELATIONS

Azerbaijan is a member of the United Nations, the Organization for Security and Cooperation in Europe (OSCE), NATO's Partnership for Peace, the Euro-Atlantic Partnership, the World Health Organization, GUAM Organization for Democracy and Economic Development, the European Bank for Reconstruction and Development, the Council of Europe, the Community of Democracies, the International Monetary Fund, and the World Bank.

Nagorno-Karabakh

The major domestic and international issue affecting Azerbaijan is the dispute over Nagorno-Karabakh, a predominantly ethnic Armenian region within Azerbaijan. The current conflict over Nagorno-Karabakh began in 1988 when ethnic Armenian demonstrations against Azerbaijani rule broke out in both Nagorno-Karabakh and Armenia, and the Nagorno-Karabakh Supreme Soviet voted to secede from Azerbaijan. In 1990, after violent episodes in Nagorno-Karabakh, Baku, and Sumgait, the Soviet Union's Government in Moscow declared a state of emergency in Nagorno-Karabakh, sent troops to the region, and forcibly occupied Baku. In April 1991, Azerbaijani militia and Soviet forces targeted Armenian paramilitaries operating in Nagorno-Karabakh; Moscow also deployed troops to Yerevan. Azerbaijan declared its independence from the U.S.S.R. on August 30, 1991. In September 1991, Moscow declared it would no longer support Azerbaijani military action in Nagorno-Karabakh. Armenian militants then stepped up the violence. In October 1991, a referendum in Nagorno-Karabakh approved independence.

More than 30,000 people were killed in the fighting from 1992 to 1994. In May 1992, Armenian and Karabakhi forces seized Susha (the historical, Azerbaijani-populated capital of Nagorno-Karabakh) and Lachin (thereby linking Nagorno-Karabakh to Armenia). By October 1993, Armenian and Karabakhi forces had succeeded in occupying almost all of Nagorno-Karabakh, Lachin, and large areas in southwestern Azerbaijan. As Armenian and Karabakhi forces advanced, hundreds of thousands of Azerbaijani refugees fled to other parts of Azerbaijan.

In 1993, the UN Security Council adopted resolutions calling for the cessation of hostilities, unimpeded access for international humanitarian relief efforts, and the eventual deployment of a peacekeeping force in the region. The UN also called for immediate withdrawal of all ethnic Armenian forces from the occupied territories of Azerbaijan. Fighting continued, however, until May 1994 when Russia brokered a cease-fire. Negotiations to resolve the conflict peacefully have been ongoing since 1992 under the aegis of the Minsk Group of the OSCE. The Minsk Group is currently co-chaired by Russia, France, and the U.S. and has representation from Turkey, the U.S., several European nations, Armenia, and Azerbaijan. Despite the 1994 cease-fire, sporadic violations, sniper fire, and landmine incidents continue to claim over 100 lives each year.

Since 1997, the Minsk Group Co-Chairs have presented a number of proposals to serve as a framework for resolving the conflict. One side or the other rejected each of those proposals, but negotiations have continued at an intensified pace since 2004.

U.S.-AZERBAIJAN RELATIONS

The dissolution of the Soviet Union in December 1991 brought an end to the Cold War and created the opportunity to build relations with its successor states as they began a political and economic transformation. The United States opened an Embassy in Azerbaijan's capital, Baku, in March 1992.

The United States has been actively engaged in international efforts to find a peaceful solution to the Nagorno-Karabakh conflict. The U.S. has played a leading role in the Minsk Group, which was created in 1992 by the Conference on Security and Cooperation in Europe—now the OSCE—to encourage a peaceful, negotiated resolution to the conflict between Azerbaijan and Armenia. In early 1997, the U.S. heightened its role by becoming a Co-Chair of the Minsk Group, along with Russia and France.

The U.S. supports American investment in Azerbaijan. U.S. companies are involved in three offshore oil development projects with Azerbaijan and have been exploring the emerging investment opportunities in Azerbaijan in other fields, such as telecommunication. The United States is committed to aiding Azerbaijan in its transition to democracy and its formation of an open market economy. The Freedom Support Act, enacted in October 1992, has been the cornerstone of U.S. efforts to help Azerbaijan during this transition. Under the Freedom Support Act, the U.S. was providing approximately $48 million in humanitarian, democracy, and reform assistance to Azerbaijan in FY 2006.

The U.S. and Azerbaijan have signed a bilateral trade agreement, which entered into force in April 1995 and confers to Azerbaijan the status of most favored nation. The United States also has a bilateral investment treaty with Azerbaijan.

U.S. Humanitarian Assistance

U.S. humanitarian programs in Azerbaijan focus on community development, health and economic opportunities, and support services, including training and business management consultations for vulnerable populations. Under a new humanitarian initiative, the Department of State will complete six Small Reconstruction Projects (SRP) in Azerbaijan. These projects raise the standard of beneficiaries by improving conditions in beneficiary institutions such as schools, clinics, orphanages, and homes for the elderly. A new focus on quality health services and practices focuses on better use of health resources and health care practices through health care reform, healthy lifestyles, and the rights and responsibilities of the patient. Technical assistance is being provided to the Ministry of Health to develop policy, legal and regulatory, and finance reforms. In FY 2006, the U.S. Department of Agriculture (USDA) was funding the final year of a $3.4 million national child vaccination program. The program was financed by a grant that included 10,800 metric tons of wheat to be sold in Azerbaijan. The proceeds will help complete the vaccinations of 450,000 children. The U.S. continues its humanitarian demining efforts in

Azerbaijan. The Peace Corps, which began working in Azerbaijan in 2003, has 55 volunteers. Some teach English at the secondary level and others work with non-governmental organizations engaged in small and micro enterprise development.

TRAVEL

Consular Information Sheet

June 19, 2008

Country Description: Azerbaijan is a constitutional republic with a developing economy. Western-style amenities are found in the capital, Baku, but they are generally not available outside that city.

Entry Requirements: A passport and visa are required. Travelers may obtain single-entry visas for USD 131 by mail or in person from either the Azerbaijani embassy in Washington, D.C. or any other Azerbaijani embassy offering consular services. Travelers may also obtain single-entry, 30-day visas at the airport upon arrival for USD 131. Visas are not available at the land borders with Georgia or Russia. Double-entry, 90-day visas (cost: USD 131) and one-year multiple-entry visas (cost: USD 250) are only available through an Azerbaijani embassy or through the Ministry of Foreign Affairs.

A letter of invitation from a contact in Azerbaijan is required, and travelers who expect to travel in the region should request a one-year, multiple-entry visa. According to Azerbaijani law, foreign nationals intending to remain in Azerbaijan for more than 30 days must register with local police within three days of their arrival. Foreign citizens should approach the passport section of the local district police office and fill out an application form. The registration fee is AYM 9.90 (approximately USD 12).

American citizens of Armenian ancestry have had visa applications denied by the Government of Azerbaijan on the grounds that their safety cannot be guaranteed.

U.S. citizens who obtain a one-entry visa at the port of entry are permitted to remain in Azerbaijan for up to one month, after which an extension of stay must be requested (cost: USD 131). For persons in Azerbaijan, visa applications, extensions or renewals are made at the Ministry of Foreign Affairs, Shikhali Gurbanov St., 4, Baku; tel. (9-9412) 492 34 01. For additional information, please contact the Embassy of Azerbaijan, 2741 34th Street NW, Washington, DC 20008 (tel. 202-337-3500); e-mail: azerbaijan@azembassy.com.

American citizens should ensure that their visas and/or local identification cards, for stays of longer than 30 days, are current and valid, and that they carry local identification cards, if applicable, at all times. It is advisable to carry a photocopy of your current passport and valid visa if you do not normally carry your passport as well. Visit the Embassy of Azerbaijan web site at http://www.azembassy.us/ for the most current visa information.

Safety and Security: As a result of the Nagorno-Karabakh conflict, ethnic Armenian forces control Azerbaijan's Nagorno-Karabakh region, and a large portion of additional Azerbaijani territory surrounding Nagorno-Karabakh in the southwest part of the country, along the borders with Iran and Armenia. A cease-fire has been in effect in Nagorno-Karabakh since 1994, although reports of gunfire along the cease-fire line and along the border with Armenia continue. Anti-personnel mines are a danger in areas close to the front lines. It is not possible to enter the self-proclaimed "Republic of Nagorno-Karabakh," which is not recognized by the United States, from other areas of Azerbaijan. Travelers are cautioned to avoid travel to Nagorno-Karabakh and the surrounding occupied areas. Because of the existing state of hostilities, consular services are not available to Americans in Nagorno-Karabakh.

American citizens of Armenian ancestry considering travel to Azerbaijan should remain particularly vigilant when visiting the country, as the Government of Azerbaijan has claimed that it is unable to guarantee their safety.

The next Presidential election in Azerbaijan will be held in October 2008. In the past, political rallies occurred in Baku in the period before and immediately after the elections. While the majority of these demonstrations were peaceful, some became confrontational and escalated into violence. Americans are reminded that even protests intended to be peaceful may turn violent and travelers are advised to avoid all demonstrations.

For the latest security information, Americans traveling abroad should regularly monitor the Department of State, Bureau of Consular Affair's Internet site at http://travel.state.gov, where the current Travel Warnings and Travel Alerts, including the Worldwide Caution Travel Alert, can

be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S., or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: Baku has experienced a trend away from casual stealth street crime, such as pick-pocketing, towards more targeted and aggressive attacks. These attacks tend to be against males, usually involve alcohol, and usually occur late at night. The attacks typically involve multiple attackers on a lone victim using overwhelming numbers and a quick, violent attack to end resistance or flight. Violent crimes tend to be more frequent in the winter, despite the presence of fewer tourists and foreigners in general at this time of year. Many recent attacks have resulted in injuries. There have also been reports of foreigners being held up at knife- or gunpoint at or near ATMs during hours of darkness. Visitors should not walk alone at night.

All incidents of crime should be reported to the local police and U.S. Embassy. The Police Office of Crimes By and Against Foreigners has an English-speaking officer available at all times who may be reached at (994 12) 490-95-32 or, after hours, at 490-94-52).

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime are solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

The local equivalents of the "911" emergency lines in Azerbaijan are: 101-Fire Brigade, 102-Police, 103-Ambulance, 104-Gas services, and 112-Ministry of Emergency Situations.

Medical Facilities and Health Information: A few Western-type medical clinics, the quality of which is comparable to those in Western countries, are operating in Baku; the quality of these clinics is good. However, medical facilities outside the capital remain inadequate, unsanitary, and unsafe. There is often a shortage of basic medical supplies, including disposable needles and vaccines. Bring adequate amounts of prescription medicines for the duration of your visit, as pharmacies often do not carry all brands or doses.

Tuberculosis (TB) is an increasingly serious health concern in Azerbaijan. For further information, please consult the Centers for Disease Control and Prevention's (CDC) Travel Notice on TB http://wwwn.cdc.gov/travel/yellowBookCh4-TB.aspx.

Avian Influenza: In 2006, the WHO and Azerbaijani authorities confirmed several human cases of the H5N1 strain of avian influenza, commonly known as "bird flu." Travelers to Azerbaijan and other countries affected by the virus are cautioned to avoid poultry farms, contact with animals in live food markets, and any surfaces that appear to be contaminated with feces from poultry or other animals. In addition, the CDC and WHO recommend eating only fully cooked poultry and eggs. For the most current information and links on avian influenza in Azerbaijan, see the State Department's Avian Influenza Fact Sheet or visit the web site of the U.S. Embassy in Baku at http://azerbaijan.usembassy.gov.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC site at http://wwwn.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith/en.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Azerbaijan is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

Driving hazards such as open manholes, debris, sinkholes, and potholes are common. Most drivers do not pay attention to traffic regulations, signals, lanes, pedestrians, or other drivers. Drivers often travel at extremely high speed, and accidents are frequent and often serious. Driving in Baku should be considered extremely hazardous. Outside the city, even where roads are present, conditions are similar. Roads are often in poor repair and unlit, and lack lane markings, traffic signs, and warnings. Many rural roads are largely unpaved.

Public transportation throughout the country is overcrowded and poorly maintained. The U.S. Embassy strongly discourages use of the Baku Metro. Train travel in the Caucasus region is not secure.

Aviation Safety Oversight: As there is no direct commercial air service between the United States and Azerbaijan, the U.S. Federal Aviation Administration (FAA) has not assessed Azerbaijan's Civil Aviation Authority for compliance with International Civil Aviation Organization (ICAO) aviation safety standards. For more information, travelers may visit the FAA's web site at http://www.faa.gov. Travelers on regional airlines

among the countries of the Caucasus may experience prolonged delays and sudden cancellations of flights. In addition to frequent delays, flights are often overcrowded, with passengers without seats standing in the aisle along with excess unsecured cabin luggage. Even basic safety features such as seat belts are sometimes missing. Air travel to Azerbaijan on international carriers via Europe is typically more reliable.

Special Circumstances: The Republic of Azerbaijan's economy is mostly cash-only. Traveler's checks and credit cards are accepted only in some hotels and a few restaurants and supermarkets. The national currency is the new manat, introduced on January 1, 2006, at the rate of 1 new manat = 5,000 old manat. Old manats were phased out after January 1, 2007. Commercial establishments generally enforce the requirement that purchases be made with new manats. Azerbaijani customs authorities may enforce strict regulations concerning temporary importation into or export from Azerbaijan of items such as firearms, religious materials, antiquities including carpets, medications, and caviar, and any amount of currency over USD 1000. It is advisable to contact the Embassy of Azerbaijan in Washington for specific information regarding customs requirements.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating Azerbaijan's laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Azerbaijan are severe and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in Azerbaijan are encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration website and to obtain updated information on travel and security within Azerbaijan. Americans without Internet access may register directly with the U.S. Embassy. By registering, American citizens make it easier for the Embassy to contact them in case of emergency. The U.S. Embassy is located at Azadlig Prospekt 83; tel. (9-9412) 498-03-35, 36, or 37; (9-9412) 490-66-71; email: ConsularBaku@state.gov; web site: http://azerbaijan.usembassy.gov. Travelers are encouraged to notify the Embassy before their permanent departure from the country.

Intercountry Adoption

June 2008

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is based on public sources and our current understanding. Questions involving foreign and U.S. immigration laws and legal interpretation should be addressed respectively to qualified foreign or U.S. legal counsel.

The Hague Convention on Intercountry Adoption: The Hague Convention on Intercountry Adoption, to which the United States became a party on April 1, 2008, establishes legal and regulatory requirements for intercountry adoption. Azerbaijan is a party to The Hague Convention on Protection of Children and Co-operation in Respect of Intercountry Adoption (the Convention) and with which the Convention is in force for the United States.

In late December 2006, the adoption process in Azerbaijan essentially stopped due to the publication of amended laws meant to bring domestic legislation into conformity with The Hague Convention. The U.S. Embassy in Baku, Azerbaijan has engaged the Azerbaijani government on this issue at all levels, and continues to seek clarification about the future of intercountry adoptions given the recent legal changes. The procedure and timetable for completing already pending cases, i.e. those begun under the former legislative framework, is also not yet known.

Although adoptions remain technically open, the future of intercountry adoptions in Azerbaijan remains uncertain. A number of U.S. adoption service providers have decided already that the situation is in too much a state of flux for them to operate comfortably. The latest legislative changes have not improved the situation. There are no guarantees that adoptions will be achieved on a regular basis and in a transparent manner, and no assurances that currently pending adoptions will be processed expeditiously.

Patterns of Immigration: Please review current reports online at http://adoption.state.gov.

Adoption Authority: In March 2007, the State Committee for Family, Women and Children's Issues was named the new governing authority, replacing the State Adoption Commission. No further information on the Committee's activities with respect to intercountry adoption is available at this time.

Eligibility to Adopt: Married couples may adopt. Azerbaijani law does not officially prohibit singles from adopting, but in practice, single men are not allowed to adopt. Prospective adoptive parents may also face difficulties.

Residency Requirements: There are no residency requirements for Azerbaijan.

Time Frame: It is not possible to predict how long it would take to complete a new adoption at this time.

Adoption Agencies and Attorneys: Because Azerbaijan is a Convention country, adoption services must be provided by an accredited agency, temporarily accredited agency, approved person, supervised provider, or exempted provider. It is essential that prospective adoptive parent(s) seeking to adopt from a Convention country use an accredited adoption service provider. The Department maintains a current list of accredited adoption service providers. The list of accredited adoption service providers is also provided on the website of The Hague Permanent Bureau at www.hcch.net.

Adoption Fees: Under Azeri law, there is no fee for the adoption itself, but there are fees for issuing and notarizing many of the required documents, and some parents have reported a required donation to the orphanage where the children reside. The U.S. Embassy in Azerbaijan discourages the payment of any fees that are not properly receipted, "donations," or "expediting" fees, that may be requested from prospective adoptive parents. Such fees have the appearance of "buying" a baby and put all future adoptions in Azerbaijan at risk.

Adoption Procedures: The current procedures for processing intercountry adoptions in Azerbaijan remain unclear due to recent changes in the governing legislation and responsible authority.

Embassy of the Republic
of Azerbaijan
2741 34th Street, N.W.
Washington, D.C. 20008
Tel: 202-337-3500
Email: consul@azembassy.com
Internet: http://www.azembassy.us

U.S. Immigration Requirements: As of April 1, 2008, U.S. citizens wishing to adopt in a Convention country must begin the process by filing with the U.S. Citizenship and Immigration Services (USCIS) a form I-800A *Application for Determination of Suitability to Adopt a Child from a Convention Country*.

Prospective adoptive parents are strongly encouraged to consult the Department of Homeland Security, USCIS website (www.uscis.gov). While the U.S. Embassy in Baku, Azerbaijan, handles some steps in the immigration process for adopted children from Azerbaijan, most of this process occurs at the U.S. Embassy in Tbilisi, Georgia. For more information, please see the Embassy Tbilisi web site at: http://georgia.usembassy.gov/visasadopt.html.

U.S. Embassy Baku, Azerbaijan
83 Azadliq Prospekt
Baku, Azerbaijan
Tel: (994 12) 98 03 35

E-mail: consularbaku@state.gov
Internet: www.baku.usembassy.gov

Additional Information: For information on intercountry adoption and international parental child abduction, and security information for U.S. citizens traveling abroad, call Toll Free 1-888-407-4747. This number is available from 8:00 a.m. to 8:00 p.m. EST/EDT, Monday through Friday (except U.S. federal holidays). Callers who are unable to use toll-free numbers, such as those calling from overseas, may obtain information and assistance during these hours by calling 1-202-501-4444.

BAHAMAS

Compiled from the September 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Commonwealth of The Bahamas

PROFILE

Geography

Area: 13,939 sq. km. (5,382 sq. mi.); slightly larger than Connecticut and Rhode Island combined.

Cities: Capital—Nassau, New Providence. Second-largest city—Freeport, Grand Bahama.

Terrain: Low and flat.

Climate: Semitropical.

People

Nationality: Noun and adjective—Bahamian(s).

Population: (2008 est.) 307,451.

Annual growth rate: (2008 est.) 0.57%.

Ethnic groups: African 85%, European 12%, Asian and Hispanic 3%.

Religions: Baptist (32%), Roman Catholic, Anglican, Evangelical Protestants, Methodist, Church of God, Rastafarian, Traditional African.

Languages: English (official); Creole.

Education: (2003) Years compulsory—through age 16. Attendance—92%. Literacy—95.5%.

Health: (2008 est.) Infant mortality rate—23.67/1,000. Life expectancy—65.72 years.

Work force: (2004) 176,330; majority employed in the tourism, government, and financial services sectors.

Government

Type: Constitutional parliamentary democracy.

Independence: July 10, 1973.

Government branches: Executive—British monarch (nominal head of state), governor general (representative of the British monarch), prime minister (head of government), and cabinet. Legislative—bicameral Parliament (40-member elected House of Assembly, 16-member appointed Senate). Judicial—Privy Council in U.K., Court of Appeal, Supreme Court, and magistrates' courts.

Political parties: Free National Movement (FNM), Progressive Liberal Party (PLP), Bahamas Democratic Movement (BDM).

Suffrage: (2007) Universal over 18; 150,689 registered voters.

Economy

GDP: (2007 est., official exchange rate) $6.586 billion.

Growth rate: (2007 est.) 3.1%.

Per capita GDP: (2007 est.) $25,000.

Natural resources: Salt, aragonite, timber.

Tourism: (including tourism-driven construction and manufacturing) 60% of GDP.

Government spending: (2004) 20% of GDP.

Financial services/business services: 36% of GDP.

Construction: (2004; 10% of GDP) Products—largely tourism related.

Manufacturing: (2004; 8% of GDP) Products—plastics, pharmaceuticals, rum.

Agriculture and fisheries: (2004; 3% of GDP) Products—fruits, vegetables, lobster, fish.

Trade: (2006) Exports ($674 million)—mineral products and salt, rum, animal products, chemicals, fruits, and vegetables. Export partners (2006)—U.S. (21%), Singapore (16%), Spain (14.9%), Poland (14.8%), Germany (6.8%), Guatemala (5.9%). Imports ($2.401 billion)—foodstuffs and animals, machinery and transport equipment, manufactures, chemicals, mineral fuels. Import partners (2006)—U.S. (23%), Brazil (16.8%), Japan (11.6%), South Korea (8.3%), Italy (6.4%), Singapore (4.4%).

PEOPLE

Eighty-five percent of the Bahamian population is of African heritage. About two-thirds of the population resides on New Providence Island (the location of Nassau). Many ancestors arrived in the Bahamas when the islands served as a staging area for the slave trade in the early 1800s. Others accompanied thousands of British loyalists who fled the American colonies during the Revolution-

ary War. Haitians form the largest immigrant community in The Bahamas. 30,000–50,000 are estimated to be resident legally or illegally, concentrated on New Providence, Abaco and Eleuthera islands.

School attendance is compulsory between the ages of 5 and 16. The government fully operates 158 of the 210 primary and secondary schools in The Bahamas. The other 52 schools are privately operated. Enrollment for state primary and secondary schools is 50,332, with more than 16,000 students attending private schools. The College of The Bahamas, established in Nassau in 1974, provides programs leading to bachelors and associates degrees. Several non-Bahamian colleges also offer higher education programs in The Bahamas.

HISTORY

In 1492, Christopher Columbus made his first landfall in the Western Hemisphere in The Bahamas. Spanish slave traders later captured native Lucayan Indians to work in gold mines in Hispaniola, and within 25 years, all Lucayans perished. In 1647, a group of English and Bermudan religious refugees, the Eleutheran Adventurers, founded the first permanent European settlement in The Bahamas and gave Eleuthera Island its name. Similar groups of settlers formed governments in The Bahamas until the islands became a British Crown Colony in 1717.

The late 1600s to the early 1700s were the golden age for pirates and privateers. Many famous pirates—including Sir Francis Drake and Blackbeard—used the islands of The Bahamas as a base. The numerous islands and islets with their complex shoals and channels provided excellent hiding places for the plundering ships near well-traveled shipping lanes. The first Royal Governor, a former pirate named Woodes Rogers, brought law and order to The Bahamas in 1718 when he expelled the buccaneers.

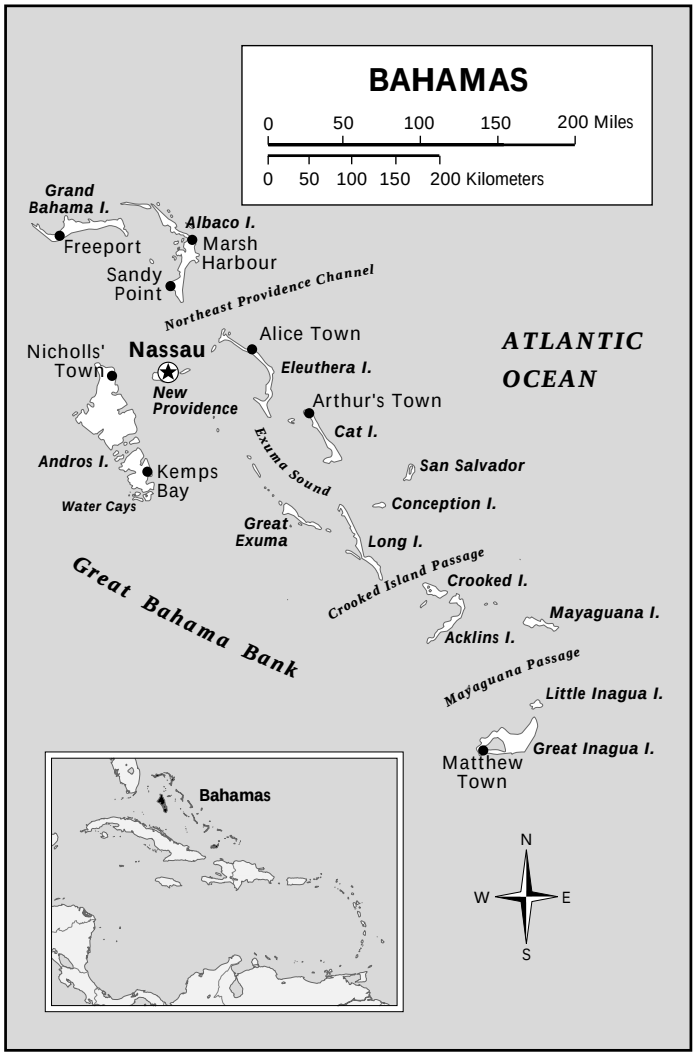
During the American Revolution, American colonists loyal to the British flag settled in The Bahamas. These Loyalists and new settlers from Britain brought Colonial building skills and agricultural expertise. Until 1834, when Britain abolished slavery, they also brought slaves, importing the ancestors of many modern Bahamians from Western Africa.

Proximity to the U.S. continued to provide opportunity for illegal shipping activity. In the course of the American Civil War, The Bahamas prospered as a center of Confederate blockade-running. During Prohibition, the islands served as a base for American rumrunners. Today, the Bahamas is a major transshipment point for narcotics on the way to the U.S. Bahamians achieved self-government through a series of constitutional and political steps, attaining internal self-government in 1964 and full independence within the Commonwealth on July 10, 1973. Since independence, The Bahamas has continued to develop into a major tourist and financial services center.

GOVERNMENT AND POLITICAL CONDITIONS

The Bahamas is an independent member of the Commonwealth of Nations. It is a parliamentary democracy with regular elections. As a Commonwealth country, its political and legal traditions closely follow those of the United Kingdom. The Bahamas recognizes the British monarch as its formal head of state, while an appointed Governor General serves as the Queen's representative in The Bahamas. A bicameral legislature enacts laws under the 1973 constitution.

The House of Assembly consists of 41 members, elected from individual constituencies for 5-year terms. As under the Westminster system, the government may dissolve the Parliament and call elections at any time. The House of Assembly performs all major legislative functions. The leader of the majority party serves as prime minister and head of government. The Cabinet consists of at least nine members, including the prime minister and ministers of executive departments. They answer politically to the House of Assembly.



The Senate consists of 16 members appointed by the Governor General, including nine on the advice of the prime minister, four on the advice of the Leader of the Opposition, and three on the advice of the prime minister after consultation with the Leader of the Opposition.

The Governor General appoints the Chief Justice of the Supreme Court on the advice of the prime minister and the Leader of the Opposition. The Governor General appoints the other justices with the advice of a judicial commission. The Privy Council of the United Kingdom serves as the highest appellate court.

Local government districts elect councils for town planning, business licenses, traffic issues and maintaining government buildings. In some large districts, lower level town councils also have minor responsibilities.

For decades, the white-dominated United Bahamian Party (UBP) ruled The Bahamas, then a dependency of the United Kingdom, while a group of influential white merchants, known as the "Bay Street Boys," dominated the local economy. In 1953, Bahamians dissatisfied with UBP rule formed the opposition Progressive Liberal Party (PLP). Under the leadership of Lynden Pindling, the PLP won control of the government in 1967 and led The Bahamas to full independence in 1973.

A coalition of PLP dissidents and former UBP members formed the Free National Movement (FNM) in 1971. Former PLP cabinet minister and member of Parliament Hubert Ingraham became leader of the FNM in 1990, upon the death of Sir Cecil Wallace-Whitfield. Under the leadership of Ingraham, the FNM won control of the government from the PLP in the August 1992 general elections.

The PLP regained power in 2002 under the leadership of Perry Christie, but the FNM, again led by Ingraham, returned to government by capturing 23 of the 41 seats in the House of Assembly during the May 2007 election. The next election must be held no later than May 2012.

Principal Government Officials

Last Updated: 11/12/08

Governor Gen.: **Arthur Dion HANNA**
Prime Min.: **Hubert INGRAHAM**
Dep. Prime Min.: **Theodore Brent SYMONETTE**
Min. of Agriculture & Marine Resources: **Lawrence CARTWRIGHT**
Min. of Education: **Carl BETHEL**
Min. of the Environment & Maritime Affairs: **Earl DEVEAUX**
Min. of Finance: **Hubert INGRAHAM**
Min. of Foreign Affairs & Immigration: **Theodore "Brent" SYMONETTE**
Min. of Health: **Hubert MINNIS, Dr.**
Min. of Housing & National Insurance: **Kenneth RUSSELL**
Min. of Labor & Social Development: **Dion FOULKES**
Min. of Lands & Local Govt.: **Byran WOODSIDE**
Min. of Legal Affairs: **Claire HEPBURN**
Min. of National Security: **Orville "Tommy" TURNQUEST**
Min. of Public Works & Transport: **Neko GRANT**
Min. of Tourism & Aviation: **Vincent VANDERPOOL-WALLACE**
Min. of Youth, Sports, & Culture: **Desmond BANNISTER**
Attorney Gen.: **Michael BARNETT**
Governor, Central Bank: **Wendy CRAIGG**
Ambassador to the US: **Cornelius SMITH**
Permanent Representative to the UN, New York: **Paulette A. BETHEL**

The Bahamas maintains an embassy in the United States at 2220 Massachusetts Ave., NW, Washington, DC 20008 (tel: 202-319-2660) and Consulates General in New York at 231 East 46th Street, New York, NY 10017 (tel: 212-421-6420), and in Miami at Suite 818, Ingraham Building, 25 SE Second Ave., Miami, FL 33131 (tel: 305-373-6295).

ECONOMY

The Bahamas is driven by tourism and financial services. Tourism and tourism-driven construction and manufacturing provide an estimated 60% of the gross domestic product (GDP). Tourism employs about half the Bahamian work force. In 2005, more than 5 million tourists visited The Bahamas, 87% from the United States. However, tourist arrivals declined to 4.7 million in 2006 and 4.6 million in 2007. There are about 110 U.S.-affiliated businesses operating in The Bahamas, and most are associated with tourism and banking. With few domestic resources and little industry, The Bahamas imports nearly all its food and manufactured goods from the United States. American goods and services tend to be favored by Bahamians due to cultural similarities and heavy exposure to American advertising. The Bahamian economy, due to its heavy dependence on U.S. tourism and trade, is deeply affected by U.S. economic performance.

Following economic struggles in 2001-2002 fueled by a drop in tourism after September 11, 2001, The Bahamas has enjoyed a period of economic recovery and an upturn in large-scale private sector investments in tourism, which will boost construction and provide long-term employment. Future goals include continued development of tourism properties, including increased Bahamian ownership, redevelopment of the Grand Bahama

economy following major hurricane losses in 2004, and the expansion of the robust Bahamian financial sector.

Economic challenges facing The Bahamas include meeting continued employment demands, jumpstarting a lagging privatization process, and monitoring increasing levels of government debt. Another major challenge for Bahamians will be to prepare for hemispheric free trade. Currently, Bahamians do not pay income or sales taxes. Most government revenue is derived from high tariffs and import fees. Reduction of trade barriers will probably require some form of taxation to replace revenues when the country becomes a part of the Free Trade Area of the Americas (FTAA). As evident by domestic opposition to the Caribbean Single Market Economy (CSME), the advantages of free trade may be hard for the government to sell. The Bahamian Government was expected to sign the Economic Partnership Agreement (EPA) with the European Union on August 30, 2008, but the signing was delayed.

A number of planned hotel projects have promised to increase economic growth and create short- and long-term employment. The Atlantis Resort and Casino on Paradise Island remains a major tourist draw and an engine of the economy. The future of the Baha Mar hotel project was called into question after casino operator Harrah's pulled out of the deal in March 2008. The government promises to expand Nassau International Airport and has turned over management to private operators. The Bahamian Government also has adopted a proactive approach to courting foreign investors and has conducted major investment missions to the Far East, Europe, Latin America, India, and Canada. The government continues to pay particular attention to China to encourage tourism and investment. For their part, the Chinese are funding the construction of a new $30 million sports stadium in New Providence. While the new FNM government has expressed a desire to increase Bahamian ownership interests in developments, The Bahamas' dependence on foreign investment is unlikely to change. Financial services constitute the second-most important sector of the Bahamian economy, accounting for up to 15% of GDP, due to the country's status as a tax haven and offshore banking center.

As of 2005, the government had licensed 262 banks and trust companies in The Bahamas. The Bahamas promulgated the International Business Companies (IBC) Act in January 1990 to enhance the country's status as a leading financial center. The act served to simplify and reduce the cost of incorporating offshore companies in The Bahamas. Within 9 years, more than 84,000 IBC-type companies had been established. In February 1991, the government also legalized the establishment of Asset Protection Trusts in The Bahamas. In 2000, in response to multilateral organizations' concerns, the government passed a legislative package of stronger measures to better regulate the financial sector and prevent money laundering in the country's banking sector, including creation of a Financial Intelligence Unit and enforcement of "know-your-customer" rules. Some of these measures have been challenged in Bahamian courts, and the number of offshore banks registered in The Bahamas has declined substantially since 2002.

As many as half of the IBCs have also closed shop. As a result, the government is considering additional legislation to keep the industry competitive while complying with international standards, including possible reform of the regulatory structure.

Agriculture and fisheries together account for 3% of GDP. The Bahamas exports lobster and some fish but does not raise these items commercially. There is no large-scale agriculture, and most agricultural products are consumed domestically. Following an outbreak of citrus canker on Abaco in 2005, The Bahamas lost a main agricultural export, and the Ministry of Agriculture banned the export of plant materials from Abaco.

The Bahamas imports more than $250 million in foodstuffs per year, representing about 80% of its food consumption. The Bahamian Government maintains the value of the Bahamian dollar on a par with the U.S. dollar. The Bahamas is a beneficiary of the U.S.-Caribbean Basin Trade Partnership Act (CBTPA), Canada's CARIBCAN program, and the European Union's Lome IV Agreement. Although The Bahamas participates in the political aspects of the Caribbean Community (CARICOM), it has not entered into joint economic initiatives, like the CSME, with other Caribbean states.

The Bahamas has a few notable industrial firms: the Freeport pharmaceutical firm, PFC Bahamas (formerly Syntex); the BORCO oil facility, also in Freeport, which transships oil in the region; the Commonwealth Brewery in Nassau, which produces Heineken, Guinness, and Kalik beers; and Bacardi Corp., which distills rum in Nassau for shipment to U.S. and European markets. Other industries include sun-dried sea salt in Great Inagua, a wet dock facility in Freeport for repair of cruise ships, and mining of aragonite—a type of limestone with several industrial uses—from the sea floor at Ocean Cay.

The Hawksbill Creek Agreement established a duty-free zone in Freeport, The Bahamas' second-largest city, with a nearby industrial park to encourage foreign industrial investment. The Hong Kong-based firm Hutchison Whampoa operates the container port in Freeport. The Bahamian Parliament approved legislation in 1993 that extended most Freeport tax and duty exemptions through 2054.

Business Environment

The Bahamas offers attractive features to the potential investor: a stable democratic environment, relief from personal and corporate income taxes, timely repatriation of corporate profits, proximity to the United States with extensive air and telecommunications links, and a good pool of skilled professional workers. The Government of The Bahamas welcomes foreign investment in tour-

ism and banking and has declared an interest in agricultural and industrial investments to generate local employment, particularly in white-collar or skilled jobs. Despite its interest in foreign investment to diversify the economy, the Bahamian Government responds to local concerns about foreign competition and tends to protect Bahamian business and labor interests. As a result of domestic resistance to foreign investment and high labor costs, growth can stagnate in sectors which the government wishes to diversify.

The country's infrastructure is best developed in the principal cities of Nassau and Freeport, where there are relatively good paved roads and international airports. Electricity is generally reliable, although many businesses have their own backup generators. In Nassau, there are three daily newspapers, several weeklies, and international newspapers available for sale. There also are six radio stations. Both Nassau and Freeport have a television station. Cable TV and satellite also are available locally and provide most American programs with some Canadian and European channels.

Areas of Opportunity

The best U.S. export opportunities remain in the traditional areas of foodstuffs and manufactured goods: vehicles and automobile parts; hotel, restaurant, and medical supplies; and computers and electronics. Bahamian tastes in consumer products roughly parallel those in the United States. Merchants in southern Florida have found it profitable to advertise in Bahamian publications. Most imports are subject to high but nondiscriminatory tariffs.

FOREIGN RELATIONS

The Bahamas has strong bilateral relationships with the United States and the United Kingdom, represented by an ambassador in Washington and High Commissioner in London. The Bahamas also associates closely with other nations of the Caribbean Community (CARICOM). The Bahamas has an ambassador to Haiti and works closely with the United States and CARICOM on political and migration issues related to Haiti. The Bahamas has diplomatic relations with Cuba, including embassies in each other's capitals. A repatriation agreement was signed with Cuba in 1996, and there are commercial and cultural contacts between the two countries.

The Bahamas also enjoys a strengthening relationship with China. The Commonwealth of The Bahamas became a member of the United Nations in 1973 and the Organization of American States in 1982.

The Bahamas holds membership in a number of international organizations: the UN and some specialized and related agencies, including Food and Agriculture Organization (FAO), International Civil Aviation Organization (ICAO), and the International Labor Organization (ILO); International Monetary Fund (IMF); International Telecommunication Union (ITU); World Bank; World Meteorological Organization (WMO); World Health Organization (WHO); OAS and related agencies, including Inter-American Development Bank (IDB), Caribbean Development Bank (CDB), and Pan-American Health Organization (PAHO); the Caribbean Community (CARICOM), excluding its Common Market; the International Criminal Police Organization (INTERPOL); Universal Postal Union (UPU); International Maritime Organization (IMO); World Intellectual Property Organization (WIPO); and obtained observer status in the World Trade Organization (WTO) in 2001.

U.S.-BAHAMIAN RELATIONS

The United States historically has had close economic and commercial relations with The Bahamas. The countries share ethnic and cultural ties, especially in education, and The Bahamas is home to approximately 30,000 American residents. In addition, there are about 110 U.S.-related businesses in The Bahamas and, in 2005, 87% of the 5 million tourists visiting the country were American.

As a neighbor, The Bahamas and its political stability are especially important to the United States. The U.S. and the Bahamian Government have worked together on reducing crime and addressing migration issues. With the closest island only 45 miles from the coast of Florida, The Bahamas often is used as a gateway for drugs and illegal aliens bound for the United States. The United States and The Bahamas cooperate closely to handle these threats. U.S. assistance and resources have been essential to Bahamian efforts to mitigate the persistent flow of illegal narcotics and migrants through the archipelago. The United States and The Bahamas also actively cooperate on law enforcement, civil aviation, marine research, meteorology, and agricultural issues. The U.S. Navy operates an underwater research facility on Andros Island.

The Department of Homeland Security's Bureau of Customs and Border Protection maintains "preclearance" facilities at the airports in Nassau and Freeport. Travelers to the U.S. are interviewed and inspected before departure, allowing faster connection times in the U.S.

TRAVEL

Consular Information Sheet

September 24, 2008

Country Description: The Bahamas is a developed, English-speaking Caribbean nation composed of hundreds of islands covering a territory approximately the size of California. Tourism and financial services comprise the two largest sectors of the economy. Independent from the United Kingdom since 1973, the Bahamas is a Commonwealth nation with a century-old democratic tradition. The capital, Nassau, is located on New Providence Island.

Entry Requirements: All Americans traveling to and from the United States by air must have a passport. The passport requirement will be extended to sea travel, except on cruises originating and ending at the same point in the United States, as early as summer 2008. U.S. citizens who are returning from the Cayman Islands by sea, and who are not subject to the passport requirement, may present government-issued photo identification and a document showing their U.S. citizenship (for example, a birth certificate or certificate of nationalization).

Further information on upcoming changes to U.S. passport policy can be found on the Bureau of Consular Affairs web site at: http://travel.state.gov. We strongly encourage all American citizen travelers to apply for a U.S. passport well in advance of anticipated travel.

U.S. citizens do not need to obtain visas to visit the Bahamas. However, U.S. citizens planning on an extended stay of several months may be asked to provide proof or evidence of financial solvency upon entry to Bahamian immigration authorities. Travelers arriving via private watercraft are charged docking fees.

Safety and Security: The water sports and scooter rental industries in the Bahamas are not carefully regulated. Visitors should rent equipment only from reputable operators, and should insist on sufficient training before using the equipment. Every year people are killed or injured due to improper, careless or reckless operation of scooters, jetskis, and personal watercraft. Visitors should insist on seeing proof that operators have sufficient medical and liability insurance.

Travelers should also invest in low-cost traveler's insurance that includes medical evacuations, as most American insurance companies do not cover this (please refer to the section on medical facilities in this document for additional information).

For the latest security information, Americans traveling abroad should regularly monitor the Department's web site, where the current Worldwide Caution Travel Alert, Travel Warnings and other Travel Alerts can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll-free in the U.S. and Canada, or for callers outside the U.S. and Canada, a regular toll line at 1-202-501-4444.

Crime: Although The Bahamas has a high crime rate, areas frequented by tourists during the day are not generally prone to violent crime. Visitors should exercise caution and good judgment at all times. Criminals tend to target restaurants and nightclubs frequented by tourists. One common approach is for criminals to entice victims into accepting a ride, either as a "personal favor" or by claiming to offer taxi service, and then robbing and/or assaulting the passenger once they are in the car. Visitors should use only clearly marked taxis with yellow license plates and make a note of the license plate number for their records.

Travelers should avoid walking alone after dark or in isolated areas, and avoid placing themselves in situations where they are alone with strangers. Be cautious on deserted areas of beaches at all hours. Hotel guests should always lock their doors and never open their hotel room door without first verifying the identity of the person knocking. Further, hotel guests should never leave valuables unattended, especially on beaches. Visitors should store passports/identity documents, airline tickets, credit cards, and extra cash in hotel safes. Automated teller machines (ATMs) are available; however, visitors should try not to use them, especially after dark. Avoid wearing expensive jewelry, particularly expensive watches, which criminals have specifically targeted. Visitors should take care to ride only in taxis with seatbelts.

Visitors are advised to report crime to the Royal Bahamas Police Force as quickly as possible. Early reports frequently improve the likelihood of identifying and apprehending suspected perpetrators.

The U.S. Embassy has received numerous reports of sexual assaults, including assaults against teen-age girls. Most assaults have been perpetrated against intoxicated young women, some of whom had reportedly

been drugged. To minimize the potential for sexual assault, the Embassy recommends that young women stay in groups, consume alcohol in moderation or not at all, ride only in licensed taxis, and not accept rides or drinks from strangers.

The legal age in The Bahamas for consumption of alcoholic beverages is 18. Parents should be aware, however, that minimum age requirements are not strongly enforced. It is easy for teenagers to obtain alcoholic beverages and underage drinking is prevalent. Many of the arrests, accidents and violent crimes suffered by U.S. citizens in The Bahamas involve alcohol. Engaging in high-risk behavior such as excessive consumption of alcohol can ultimately be dangerous because it greatly increases the vulnerability of an individual to opportunistic crime.

In many countries around the world, including The Bahamas, counterfeit and pirated goods are available. Transactions involving such products may be illegal under local law. In addition, attempting to bring such goods back to the United States may result in forfeitures and/or fines. More information on this serious problem is available at http://www.cybercrime.gov/18usc2320.htm.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

Medical Facilities and Health Information: High-quality medical care is generally available, but expensive, in Nassau and Freeport. Medical care is limited outside of Nassau and Freeport. Bahamian doctors and hospitals do not usually accept U.S. medical insurance policies and typically expect immediate cash payment for professional services. It is the patient's responsibility to seek reimbursement later from their insurance companies. Serious health problems requiring hospitalization and/or medical evacuation to the United States can cost thousands of dollars. Persons with serious or life-threatening conditions who wish to return to U.S. medical facilities for treatment normally must be airlifted.

There is a chronic shortage of blood at Princess Margaret Hospital in Nassau, where most emergency surgery is performed. Travelers with rare blood types should know the names and locations of possible blood donors should the need arise. The Lyford Cay Hospital has a hyperbaric chamber for treatment of decompression illness.

Ambulance service is available, but may not be able to respond quickly in the event of a major emergency or disaster.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's website at http://wwwn.cdc.gov/travel. For information about outbreaks of infectious diseases abroad, consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith/en.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning the Bahamas is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

Traffic in the Bahamas moves on the left side of the roadway. Roads in Nassau and Freeport are generally adequate, but traffic congestion in Nassau is endemic. Rural roads can be narrow, winding, and in poor condition. Flooding frequently occurs on roads in low-lying areas throughout the Bahamas, including Nassau and Freeport. Drivers should be alert for unmarked construction zones throughout the Bahamas.

Travel by moped or bicycle can be quite hazardous, especially in the heavy traffic conditions prevalent in Nassau. Travelers should exercise appropriate caution when renting motorbikes. Those who choose to ride a moped or bicycle should follow the Bahamian helmet law and drive defensively. Accidents involving U.S. tourists on motorbikes have resulted in severe injuries and fatalities.

Pedestrians need to remember that vehicular traffic comes from the right, as many tourists have been struck by cars after failing to check properly for oncoming traffic.

Emergency ambulance service is generally available and can be reached by dialing 911. Roadside assistance is also widely available through private towing services, listed in the phone book.

For specific information concerning driver's permits, vehicle inspection, road tax, and mandatory insurance in the Bahamas, please contact the Bahamas Tourist Board in New York at http://bahamas.com, (tel.1-800-823-3136).

Aviation Safety Oversight: The U.S. Federal Aviation Administration (FAA) has assessed the Government of the Bahamas' Civil Aviation

Authority as being in compliance with International Civil Aviation Organization (ICAO) aviation safety standards for oversight of the Bahamas' air carrier operations. For more information, travelers may visit the FAA's web site at http://www.faa.gov.

Customs Regulations: The Bahamas' customs authorities may enforce strict regulations concerning temporary importation or exportation of firearms. It is advisable to contact the Embassy of the Commonwealth of the Bahamas in Washington or one of the Bahamian consulates in the U.S. for specific information regarding customs requirements.

Tourists who arrive by private boat are required to declare firearms to Bahamian Customs and leave firearms on the boat while in the Bahamas.

Boating/Fishing: Boaters should be aware that long-line fishing in Bahamian waters is illegal. All long-line fishing gear is required to be stowed below deck while transiting through Bahamian waters. Fishermen should note that stiff penalties are imposed for catching crawfish (lobster) or other marine life out of season or in protected areas.

Time-Shares: U.S. citizens should exercise caution when considering time-share investments and be aware of the aggressive tactics used by some time-share sales representatives. Bahamian law allows time-share purchasers five days to cancel the contract for full reimbursement. Disputes that arise after that period can be very time-consuming and expensive to resolve through the local legal system.

Hurricanes: The Bahamas, like all countries in the Caribbean basin, is vulnerable to hurricanes. Hurricane season officially runs from June 1 to November 30, although hurricanes have been known to occur outside that time period. Visitors to the Bahamas during hurricane season are advised to monitor weather reports in order to be prepared for any potential threats. General information about disaster preparedness is available via the Internet from the U.S. Federal Emergency Management Agency (FEMA) at http://www.fema.gov.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating Bahamian laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in the Bahamas are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in the Bahamas are encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration web site so that they can obtain updated information on travel and security within the Bahamas. Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency. The U.S. Embassy is located next to McDonald's restaurant on Queen Street in downtown Nassau; telephone (242) 322-1181, after hours: (242) 328-2206.

The Consular Section's American Citizen Services hours are 9:00 a.m.–11:00 a.m. and 1:00 p.m.–3:00 p.m. Monday-Thursday, and 9:00 a.m.–11:00 a.m. on Fridays. The Embassy is closed on local and U.S. holidays. You may wish to visit the Embassy's web site at http://nassau.usembassy.gov or contact the Consular Section by e-mail at acsn@state.gov.

The U.S. Embassy is also responsible for consular services in the Turks and Caicos Islands (TCIS), a United Kingdom (British) overseas territory. U.S. citizens may obtain updated information on travel and security in TCIS from the U.S. Embassy in Nassau or the Country Specific Information for the Turks and Caicos.

Intercountry Adoption

June 2001

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is based on public sources and current understanding. Questions involving foreign and U.S. immigration laws and legal interpretation should be addressed respectively to qualified foreign or U.S. legal counsel.

Please Note: Bahamian law allows adoption by any person with legal status in The Bahamas (even foreign tourists). However, the number of children is very small and the waiting list for prospective adoptive parents is very long. Therefore, The Bahamas follows an "unofficial regulation" whereby Bahamian citizens or legal residents are given preference in adopting children. Blood relatives of a child are especially given preference.

General: The following is a guideline for U.S. citizens who are interested in adopting a child in The Bahamas and applying for an immigrant visa for the child to return to the United States. This process involves complex Bahamian and U.S. legal require-

ments. U.S. consular officers give each petition careful consideration on a case-by-case basis to ensure that the legal requirements of both countries have been met, for the protection of the prospective adoptive parent(s), the biological parent(s), and the child.

Interested U.S. citizens are strongly encouraged to contact U.S. consular officials in The Bahamas before formalizing an adoption agreement to ensure that appropriate procedures have been followed which will make it possible for the Embassy to issue a U.S. immigrant visa for the child.

Availability of Children for Adoption: Recent U.S. immigrant visa statistics show that there were no immigrant visas given within the last five years.

Adoption Authority: The Bahamas Department of Social Services is the government office responsible for adoption.

Adoption Procedures: The entire adoption procedure requires a minimum of three months and frequently takes longer. The Department of Social Services acts as the representative of the child's interests and a lawyer is required to guide the process through the Supreme Court.

It is not a violation of Bahamian law for a parent or legal guardian to remove a child from The Bahamas for adoption elsewhere. A third party may legally remove the child provided the parent(s) or guardian has given consent.

Age and Civil Status: Children may be adopted by foreigners, if they are orphans (both or only known parent deceased), if they have been abandoned (the court must be satisfied that parents cannot be found), or released for adoption by their parents or legal guardian (if the child was born out-of-wedlock, only the mother needs to release the child for adoption). Children are required to be adopted in The Bahamas, unless the guardian (ad litem) grants permission otherwise.

There is no age limit set under the adoption regulations. Single people may adopt, as well as married couples.

Adoption Agencies and Attorneys: The Embassy maintains a separate list of Lawyers who practice in the Turks & Caicos Islands. Please review current reports online at http://travel.state.gov/family for a list of agencies.

Doctors: The U.S. Embassy maintains current lists of doctors and sources for medicines should either you or your child experience health problems while in The Bahamas.

Documentary Requirements: The following is a list of the required documents that are provided by the local Bahamian attorney, which will include the following:

- Originating summons
- Statement of support
- Affidavit of support application (court order)
- Summons for appearance
- Undertakings of Court
- Order (issued by court)
- Memo of appearance
- Report from guardian ad litem
- Granting of adoption

The list of documents needed for the prospective adoptive parents to complete the adoption process will be in the hands of the attorneys.

U.S. Immigration Requirements: A Bahamian child adopted by an American citizen must obtain an immigrant visa before he or she can enter the U.S. as a lawful permanent resident.

Please see the *Intercountry Adoption* section of this book for more details and review current reports online at http://adoption.state.gov.

Embassy of the Commonwealth of the Bahamas
2201 Wisconsin Ave. NW
Washington, D.C. 20008
Tel: 202-319-2660

U.S. Embassy
Queen Street (P.O. Box N-8197)
Nassau, Bahamas
Tel: 242-322-1181 and 242-328-2206

Fees: The lawyer's fee is usually between $1000—$3000

Additional Information: Prospective adoptive parents are strongly encouraged to consult USCIS publication M-249, *The Immigration of Adopted and Prospective Adoptive Children,* as well as the Department of State publication, *Intercountry Adoption*s.

Questions: Specific questions regarding adoptions in The Bahamas may be addressed to the Consular Section of the U.S. Embassy. You may also contact the Office of Children's Issues, SA-29, 2201 C Street, NW, U.S. Department of State, Washington, DC 20520-2818, telephone 1-888-407-4747 with specific adoption questions.

International Parental Child Abduction

November 2008

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *International Child Abduction* section of this book and review current reports online at www.travel.state.gov/childabduction.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is provided for general information only. Questions involving interpretation of specific foreign laws should be addressed to foreign legal counsel.

General Information: The Hague Convention on the Civil Aspects of International Child Abduction (the "Hague Convention") came into force

between the United States and The Bahamas on January 1, 1994. Therefore, Hague Convention provisions for return would apply to children abducted or retained after January 1, 1994. Parents and legal guardians of children taken to The Bahamas prior to January 1, 1994, may still submit applications for access to the child under the Hague Convention in some cases. The Bahamas is currently listed as a country of concern in the State Department's Compliance Report, which is submitted to Congress on a yearly basis, for their implementation of the Hague Convention for the return of children to the United States. Hague applications sent to The Bahamas for return of abducted children have not been acted on for years; Bahamian courts have then refused to order the return of abducted children on the grounds that they have become acclimated to life in The Bahamas.

For more information, please read the *International Parental Child Abduction* section of this book and review current reports online at www.travel.state.gov/childabduction.

Criminal Remedies: For information on possible criminal remedies, please contact your local law enforcement authorities or the nearest office of the Federal Bureau of Investigation. Information is also available on the Internet at the web site of the U.S. Department of Justice, Office of Juvenile Justice and Delinquency Prevention at http://www.ojjdp.ncjrs.org. Please note that criminal charges may complicate a Hague Convention case. Contact the country officer in the Office of Children's Issues for specific information.

For further information on international parental child abduction, contact the Office of Children's Issues, U.S. Department of State at 1-888-407-4747 or visit its web site on the Internet at http://travel.state.gov. You may also direct inquiries to: Office of Children's Issues, U.S. Department of State, Washington, DC 20520-4811; Phone: (202) 736-9090; Fax: (202) 312-9743.

BAHRAIN

Compiled from the October 2007 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Kingdom of Bahrain

PROFILE

Geography

Area: 727 sq. km. (274 sq. mi.); approximately four times the size of Washington, DC. Bahrain is an archipelago of 36 islands located off the eastern coast of Saudi Arabia. The four main islands are joined by causeways, and make up about 95% of the total land area.

Cities: Capital—Manama, pop. (2002 est.) 148,000. Other cities—Al Muharraq.

Terrain: Low desert plain (highest elevation point—122 m).

Climate: Hot and humid from May-September, with average highs ranging from 30º-40º C (86º-104º F). Maximum temperatures average 20º-30º C (68º-86º F) the remainder of the year.

People

Nationality: Noun and adjective—Bahraini(s).

Population: (July 2007 est.) 708,535, including about 235,108 non-nationals.

Annual growth rate: (2007 est.) 1.39%.

Ethnic groups: Bahraini 63%, Asian 19%, other Arab 10%, Iranian 8%.

Religions: 98% Muslim (approximately Shi'a 70%, Sunni 30%), with small Christian, Jewish and Hindu communities.

Languages: Arabic (official), English, Farsi, and Urdu are also widely spoken.

Education: Education is not compulsory, but is provided free to Bahrainis and non-nationals at all levels, including higher education. Estimated net primary school attendance (1991-2001)—84%. Adult literacy, age 15 and over (2003 est.)—89.1% for the overall population (male 91.9%, female 85%).

Health: Infant mortality rate (2007 est.)—16.18 deaths/1,000 live births. Life expectancy—72 yrs. males, 77 yrs. females.

Work force: (2006 est.) 352,000 of which 44% are foreigners.

Government

Type: Constitutional hereditary monarchy.

Independence: August 15, 1971 (from the United Kingdom).

Constitution: Approved and promulgated May 26, 1973; suspended on August 26, 1975; the National Action Charter was approved by a national popular referendum on February 14-15, 2001, and a new constitution was issued on February 14, 2002.

Government branches: Executive—King (chief of state); Prime Minister (head of government); Council of Ministers (cabinet) is appointed by the King and headed by the Prime Minister. Legislative—The bicameral parliament (al-Majlis al-Watani) consists of a 40-member elected Council of Representatives (elected in December 2006; next election scheduled for 2010) and a 40-member Shura (Consultative) Council appointed by the King. Members of both chambers serve four-year terms. Judicial—High Civil Appeals Court. The judiciary is independent with right of judicial review.

Political subdivisions: 12 municipalities (manatiq) Al Hidd, Al Manamah, Al Mintaqah al Gharbiyah, Al Mintaqah al Wusta, Al Mintaqah ash Shamaliyah, Al Muharraq, Ar Rifa' wa al Mintaqah al Janubiyah, Jidd Hafs, Madinat Hamad, Madinat 'Isa, Juzur Hawar, Sitrah.

Political parties: al Wifag, al Asala, al Minbar, al Mustaqbil.

Suffrage: Universal at age 18.

Economy

GDP: (2006 est.) $12.07 billion.

Real GDP growth rate: (2006 est.) 7.1%.

Per capita GDP: (2006 est.) $20,600.

Natural resources: Oil, aluminum, textiles, natural gas, fish, pearls.

Agriculture: (less than 1% of GDP) Products—fruit, vegetables, poultry, dairy products, shrimp, fish.

Industry: Types—oil and gas (13.1% of GDP), manufacturing (12.4% of GDP), aluminum.

Services: Finance (24.2% of GDP), transport and communications (8.9% of GDP), real estate (9.2% of GDP); government services (14.8% of GDP).

Trade: (2006 est.) Exports—$12.62 billion: oil and other mineral products, aluminum, textiles. Major markets— Saudi Arabia (3.2%), U.S. (3%), Japan (2.3%). Imports—$9.04 billion: crude oil, machinery and appliances, transport equipment, foodstuffs. Major suppliers—Saudi Arabia (37.3%), Japan (6.8%), U.S. (6.2%), U.K. (6.2%), Germany (5%), U.A.E. (4.2%).

PEOPLE

Bahrain is one of the most densely populated countries in the world; about 89% of the population lives in the two principal cities of Manama and Al Muharraq. Approximately 66% of the indigenous population is originally from the Arabian Peninsula and Iran. Bahrain currently has a sizeable foreign labor force (about 34% of the total population). The government's policies on naturalization remain controversial. In June 2002, the King issued a decree allowing citizens of the Gulf Cooperation Council (GCC) to take up dual Bahraini nationality. Opposition political groups charge that the government is granting citizenship to foreign nationals who have served in the Bahraini armed forces and security services to alter the demographic balance of the country, which is primarily Shi'a. According to passport officials, about 40,000 individuals have been naturalized over the past 50 years (about 10% of the total population).

The indigenous population is 98% Muslim. Although some two-thirds of the indigenous population is Shi'a Muslim, the ruling family and the majority of government, military, and corporate leaders are Sunni Muslims. The small indigenous Christian and Jewish communities make up the remaining 2% of the population. Roughly half of foreign resident community are non-Muslim, and include Christians, Hindus, Baha'is, Buddhists and Sikhs.

Bahrain has invested its oil revenues in developing an advanced educational system. The first public schools for girls and boys were opened in the 1920s. The government continues to pay for all schooling costs. Although school attendance is not compulsory, primary and secondary attendance rates are high, and literacy rates are currently among the highest in the region.

Higher education is available for secondary school graduates at the Bahrain University, Arabian Gulf University and specialized institutes including the College of Health Sciences—operating under the direction of the Ministry of Health—which trains physicians, nurses, pharmacists, and paramedics. The government has identified providing educational services to the Gulf Cooperation Council as a potential economic growth area, and is actively working to establish Bahrain as a regional center for higher education.

HISTORY

The site of the ancient Bronze Age civilization of Dilmun, Bahrain was an important center linking trade routes between Mesopotamia and the Indus Valley as early as 5,000 years ago. The Dilmun civilization began to decline about 2,000 B.C. as trade from India was cut off. From 750 B.C. on, Assyrian kings repeatedly claimed sovereignty over the islands. Shortly after 600 B.C., Dilmun was formally incorporated into the new Babylonian empire. There are no historical references to Bahrain until Alexander the Great's arrival in the Gulf in the 4th century B.C. Although Bahrain was ruled variously by the Arab tribes of Bani Wa'el and Persian governors, Bahrain continued to be known by its Greek name Tylos until the 7th century, when many of its inhabitants converted to Islam. A regional pearling and trade center, Bahrain came under the control of the Ummayad Caliphs of Syria, the Abbasid Caliphs of Baghdad, Persian, Omani and Portuguese forces at various times from the 7th century until the Al Khalifa family, a branch of the Bani Utbah tribe that have ruled Bahrain since the 18th century, succeeded in capturing Bahrain from a Persian garrison controlling the islands in 1783.

In the 1830s the Al Khalifa signed the first of many treaties establishing Bahrain as a British Protectorate. Similar to the binding treaties of protection entered into by other Persian Gulf principalities, the agreements entered into by the Al Khalifa prohibited them from disposing of territory and entering into relationships with any foreign government without British consent in exchange for British protection against the threat of military attack from Ottoman Turkey. The main British naval base in the region was moved to Bahrain in 1935 shortly after the start of large-scale oil production.

In 1968, when the British Government announced its decision (reaffirmed in March 1971) to end the treaty relationships with the Persian Gulf sheikdoms, Bahrain initially joined the other eight states (Qatar and the seven Trucial Sheikhdoms now the United Arab Emirates) under British protection in an effort to form a union of Arab emirates. The nine sheikhdoms still had not agreed on terms of union by 1971, however, prompting Bahrain to declare itself fully independent on August 15, 1971.

Bahrain promulgated a constitution and elected its first parliament in 1973, but just two years later, in August 1975, the Amir disbanded the National Assembly after it attempted to legislate the end of Al-Khalifa rule and the expulsion of the U.S. Navy from Bahrain.

In the 1990s, Bahrain suffered from repeated incidents of political violence stemming from the disaffection of the Shi'a majority. In response, the Amir instituted the first Bahraini cabinet change in 20 years in 1995 and also and increased the membership of the Consultative Council,

which he had created in 1993 to provide advice and opinion on legislation proposed by the cabinet and, in certain cases, suggest new laws on its own, from 30 to 40 the following year. These steps led to an initial decline in violent incidents, but in early 1996 a number of hotels and restaurants were bombed, resulting in several fatalities. Over 1,000 people were arrested and held in detention without trial in connection with these disturbances. The government has since released these individuals.

GOVERNMENT AND POLITICAL CONDITIONS

Shaikh Hamad bin Isa Al Khalifa succeeded the throne in March 1999, after the death of his father Shaikh Isa bin Hamad Al Khalifa, Bahrain's ruler since 1961. He championed a program of democratic reform shortly after his succession. In November 2000, Shaikh Hamad established a committee to create a blueprint to transform Bahrain from a hereditary emirate to a constitutional monarchy within 2 years.

The resulting "National Action Charter" was presented to the Bahraini public in a referendum in February 2001. In the first comprehensive public vote in Bahrain since the 1970s, 94.8% of voters overwhelmingly endorsed the charter.

That same month, Shaikh Hamad pardoned all political prisoners and detainees, including those who had been imprisoned, exiled or detained on security charges. He also abolished the State Security Law and the State Security Court, which had permitted the government to detain individuals without trial for up to 3 years.

On February 14, 2002, one year after the referendum endorsing his National Action Charter, Shaikh Hamad pronounced Bahrain a constitutional monarchy and changed his status from Amir to King. He simultaneously announced that the first municipal elections since 1957 would be held in May 2002, and that a bicameral parliament, with a representative lower house, would be reconstituted with parliamentary elections in October 2002. As part of these constitutional reforms, the government also created an independent financial watchdog empowered to investigate cases of embezzlement and violations of state expenditure in July 2002.

Turnout for the May 2002 municipal elections was 51%, with female voters making up 52% percent of voters. Turnout for the 2002 parliamentary

elections—the first in almost three decades—was 53% in the first round and 43% in the second round, despite the fact that four political societies, including the largest Shi'a society, organized a boycott to protest constitutional provisions enacted by the King that gave the appointed upper chamber of parliament voting rights equal to the elected lower chamber. The new parliament held its first joint sitting in December 2002. Bahrain held its second set of parliamentary and municipal elections in November and December 2006. All registered political societies participated in the elections and a Shia society, Al Wifaq, now represents the largest single bloc inside the Council of Representatives. Thirty-two of the Council's 40 members represent Sunni and Shia Islamist societies. One woman, Lateefah Al-Qauod, ran uncontested and became the first woman elected to parliament in Bahrain.

Bahrain has a complex system of courts, based on diverse legal sources, including Sunni and Shi'a Sharia (religious law), tribal law, and other civil codes and regulations created with the help of British advisers in the early 20th century. In 2001, Shaikh Hamad created the Supreme Judicial Council to regulate these courts and separate the administrative and judicial branches of government.

Principal Government Officials

Last Updated: 11/12/08

King: **HAMAD bin Isa al-Khalifa**
Prime Min.: **KHALIFA bin Salman al-Khalifa**
Dep. Prime Min.: **ALI bin Khalifa bin Salman al-Khalifa**
Dep. Prime Min.: **Jawad al-ARAIDH**
Dep. Prime Min.: **MUHAMMAD bin Mubarak al-Khalifa**
Min. of King's Court Affairs: **ALI bin Isa bin Salman al-Khalifa**
Min. of Communication: **ALI bin Khalifa bin Salman al-Khalifa**
Min. of Education: **Majid bin Ali Hasan al-NUAYMI**
Min. of Electricity & Water: **ABDALLAH bin Salman al-Khalifa**
Min. of Finance & Economy: **AHMAD bin Muhammad bin Hamad bin Abdallah al-Khalifa**
Min. of Foreign Affairs: **KHALID bin Ahmad al-Khalifa**
Min. of Health: **Faysal al-HAMMER, Dr.**
Min. of Industry & Commerce: **HASAN bin Abdallah al-Fakhru**
Min. of Information: **Jihad BUKAMAL**
Min. of Interior: **RASHID bin Abdallah bin Ahmad al-Khalifa**
Min. of Islamic Affairs: **KHALID bin Ali al-Khalifa**
Min. of Justice: **KHALID bin Ali al-Khalifa**
Min. of Labor: **Majid bin Muhsin al-ALAWI**
Min. of Municipalities & Agricultural Affairs: **Mansur bin RAJAB**
Min. of Oil & Gas: **Abd al-Husayn MIRZA**
Min. of Public Works & Housing: **Fahmi bin Ali al-JAWDAR**
Min. of Social Affairs: **Fatima bint Ahmad al-BALUSHI**
Min. of Transportation: **ALI bin Khalifa bin Salman al-Khalifa**
Min. of State for Cabinet Affairs: **AHMAD bin Atiyatallah al-Khalifa**
Min. of State for Defense: **MUHAMMAD bin Abdallah al-Khalifa**
Min. of State for Foreign Affairs: **Nizar al-BAHARNA**
Min. of State for Shura Council Affairs & Parliament: **Abd al-Aziz bin Muhammad al-FADHIL**
Attorney Gen.: **ABD al-Rahman bin Jabir al-Khalifa**
Dir., Bahrain National Security Agency: **KHALIFA bin Abdallah al-Khalifa**
Governor, Central Bank of Bahrain: **Rashid bin Muhammad al-MARAJ**
Ambassador to the US: **Houda Ezra Ibrahim NUNU**
Permanent Representative to the UN, New York: **Tawfiq Ahmad Khalil al-MANSUR**

Bahrain maintains an embassy in the United States at 3502 International Drive N.W., Washington, D.C. 20008; tel: [1] (202) 342-1111; fax: [1] (202) 362-2192. The Bahraini Mission to the UN is located at 866 Second Avenue, New York, NY 10017; tel: [1] (212)223-6200; fax [1] (212) 319-0687.

ECONOMY

The first Gulf state to discover oil, Bahrain's reserves are expected to run out in 10-15 years. Accordingly, Bahrain has worked to diversify its economy over the past decade and has stabilized its oil production at about 40,000 barrels per day (b/d). Revenues from oil and natural gas currently account for 11.1% of GDP yet currently provide about 76% of government income. The state-owned Bahrain Petroleum Company refinery built in 1935, the first in the Gulf, has a capacity of about 260,000 b/d. Saudi Arabia provides most of the crude for refinery operation via pipeline. Through an agreement with Saudi Arabia, Bahrain also receives half of the net output and revenues from Saudi Arabia's Abu Saafa offshore oilfield.

The Bahrain National Gas Company operates a gas liquefaction plant that utilizes gas piped directly from Bahrain's oilfields. Gas reserves should last about 50 years at present rates of consumption. However, rising domestic demand spurred by a recent development boom has highlighted the need to increase gas supplies. The Gulf Petrochemical Industries Company is a joint venture of the petrochemical industries of Kuwait, the Saudi Basic Industries Corporation, and the Government of Bahrain. The plant, completed in 1985, produces ammonia and methanol for export. Growth in the hydrocarbons sector will be contingent upon new discoveries—Bahrain awarded exploration rights to Malaysia's Petronas and the U.S.'s Chevron Texaco after the resolution of Bahrain's long-standing territorial dispute with Qatar, but no meaningful finds have been announced to date. Bahrain's other industries include the majority state-owned Aluminum Bahrain (Alba)—which operates the largest aluminum smelter in the world outside Eastern Europe with an annual production of about 843,000 metric tons (mt) in 2005 after the completion of an expansion program—and related factories, such as the Aluminum Extrusion Company and the Gulf Aluminum Rolling Mill. Other plants include the Arab Iron and Steel Company's iron ore pelletizing plant (4 million tons annually) and a shipbuilding and repair yard.

Bahrain's development as a major financial center has been the most

widely heralded aspect of its diversification effort. Bahrain is a regional financial and business center; international financial institutions operate in Bahrain, both offshore and onshore, without impediments, and the financial sector is currently the largest contributor to GDP at 27.6%. Some 370 offshore banking units and representative offices are located in Bahrain, as well as 65 American firms. Bahrain has also made a concerted effort to become the leading Islamic finance center in the Arab world, standardizing regulations of the Islamic banking industry. It currently has 32 Islamic commercial, investment and leasing banks as well as Islamic insurance (takaful) companies—the largest concentration of Islamic financial institutions in the Middle East.

Bahrain is working to develop other service industries such as information technology, healthcare and education. The government has used its oil revenues to build an advanced infrastructure in transportation and telecommunications. The state monopoly—Batelco—was broken in April 2003 following the establishment of the Telecommunications Regulatory Authority (TRA). Since that time, the TRA has granted some 63 licenses in the interest of promoting healthy industry competition.

Bahrain plans to expand its airport, one of the busiest in the Gulf. More than 4.8 million passengers transited Bahrain International Airport in 2005. A modern, busy port offers direct and frequent cargo shipping connections to the U.S., Europe, and the Far East. To boost its competitiveness as a regional center, Bahrain is building a new port and has privatized port operations.

The government of Bahrain moved toward privatizing the production of electricity and water by licensing Al Ezzal to construct an independent power plant at a cost of $500 million. The company commenced operations in May 2006. In January 2006, the government announced the sale of the Al Hidd Power Plant for $738 million to Hidd Power Company, a consortium of British, Japanese, and Belgian companies. Regional tourism is also a significant source of income. The government continues to favor large-scale tourism projects. It opened the only Formula One race track in the Middle East in 2004, and has awarded tenders for several tourist complexes. New hotel and spa projects are progressing within the context of broader real estate development, much of which is geared toward attracting increased tourism.

Government revenues continue to be largely dependent on the oil industry. Bahrain has received significant budgetary support and project grants from Saudi Arabia, Kuwait, and the United Arab Emirates. Buoyed by rising oil revenues, the 2007-2008 budget approved by the parliament in July 2006 provides for sizable increases in urban development, education, and social spending. Ministry of Defense spending will account for 13% of current spending in 2007 and 2008 based on the new budget. The Ministry of Education and Ministry of the Interior also receive substantial budget allocations. Significant capital outlays have been allocated to improving housing and infrastructure in line with government efforts to raise the standard of living of the Shi'a population and to attract foreign investment.

The government has also started to extend protections to workers. Private sector employees won permission to form unions in late 2002; King Hamad has given his tentative approval for the formation of unions in government departments. In June 2006, Bahrain passed laws legalizing the existence of multiple trade federations and codifying several protections for workers engaged in union activity. As part of the government's labor reform program, it has formed a Labor Market Regulatory Authority and established a fund to support the training of Bahraini workers. In 2006, bilateral trade exceeded $1 billion for the first time, representing almost 50% growth over 2005. The U.S.-Bahrain Free Trade Agreement took effect on August 1, 2006 and is generating increased U.S. commercial interest in Bahrain.

DEFENSE

The Bahrain Defense Force (BDF) numbers about 12,000 personnel and consists of army, navy, air force, air defense, and royal guard units. The public security forces and the coast guard are separate from the BDF and report to the Ministry of the Interior. Bahrain also has a national guard that consists of about 1,200 personnel. Bahrain's defense spending since 1999 has been steady. The government spends around $630 million annually on the military, about 20% of current expenditures. The parliamentary process has produced spirited debate over government spending, particularly defense spending, but no actual reductions.

With the help of the U.S. and the Gulf Cooperation Council (GCC), Bahrain has made significant efforts to upgrade its defense systems and modernize its armed forces over the last 20 years. In 1982, the GCC gave Bahrain $1.7 billion for this purpose. Since the 1991 Gulf War, the U.S. has provided military and defense technical assistance and training to Bahrain from Foreign Military Sales (FMS), commercial sources, excess defense article sales (EDA) and under the International Military and Education Training (IMET) program. The U.S. Office of Military Cooperation in Bahrain is attached to the U.S. Embassy and manages the security assistance mission.

U.S. military sales to Bahrain since 2000 total $608.9 million. Principal U.S. military systems acquired by the BDF include eight Apache helicopters, 54 M60A3 tanks, 22 F-16C/D aircraft, 20 Cobra helicopters, 20 M109A5 Howitzers, 1 Avenger AD system, and the TPS-59 radar system. Bahrain has received $410 million in U.S. EDA acquisition value delivered since the U.S.-Bahraini program began in 1993.

Military exercises are conducted on a regular basis to increase the BDF's readiness and improve coordination with the U.S. and other GCC forces. The BDF also sends personnel to the United States for military training.

This training includes courses from graduate level professional military education down to entry level technical training.

FOREIGN RELATIONS

Since achieving independence in 1971, Bahrain has pursued a policy of close consultation with neighboring states. Bahrain became a member of the United Nations and the Arab League in 1971. In 1981 it joined its five neighbors—Saudi Arabia, Oman, Kuwait, the U.A.E. and Qatar—to form the strategic Gulf Cooperation Council (GCC). Bahrain has complied with GCC efforts steps to coordinate economic development and defense and security planning. In December 1994, for example, Bahrain concurred with the GCC decision to drop secondary and tertiary boycotts against Israel. Bahrain also responded positively to Kuwait's request to deploy the GCC collective defense force, "Peninsula Shield," during the build up and execution of Operation Iraqi Freedom (OIF) in 2003.

In addition to maintaining strong relations with its largest financial backers, Saudi Arabia, Kuwait and the U.A.E., Bahrain has worked to improve its relations with Qatar and has proper, but not warm, relations with Iran. Bahrain-Iran relations have been strained since the discovery in 1981 of an Iran-sponsored coup plot in Bahrain. Bahraini suspicions of the Iranian role in local unrest in the mid-1990s remain. On March 16, 2001, the International Court of Justice (ICJ) announced its judgment on the long-standing maritime delimitation and territorial dispute between Bahrain and Qatar. The binding judgment awarded sovereignty over the Hawar Islands and Qit'at Jaradah to Bahrain and sovereignty over Zubarah (part of the Qatar Peninsula), Janan Island and Fasht ad Dibal to Qatar. The peaceful settlement of this dispute has allowed for renewed co-operation, including plans to construct a causeway between the two countries.

Bahrain's strategic partnership with the U.S. has intensified since 1991. Bahraini pilots flew strikes in Iraq during the 1991 Gulf War, and the country was used as a base for military operations in the Gulf. Bahrain also provided logistical and basing support to international Maritime Interdiction efforts to enforce UN sanctions and prevent illegal smuggling of oil from Iraq in the 1990s. Bahrain also provided extensive basing and overflight clearances for a multitude of U.S. aircraft operating in support of Operation Enduring Freedom (OEF) and Operation Iraqi Freedom (OIF). Bahrain also deployed forces in support of Coalition operations during both OEF and OIF. Bahrain has delivered humanitarian support and technical training to support the reconstruction of the Iraqi banking sector, and has offered support for each stage of Iraq's political transformation. Bahrain has also cooperated effectively on criminal investigation issues in support of the campaign on terrorism; the Bahrain Monetary Agency (which became the Central Bank of Bahrain in September 2006) moved quickly to restrict terrorists' ability to transfer funds through Bahrain's financial system. In October 2006, Bahrain joined the U.S. and 23 other countries in a Proliferation Security Initiative interdiction exercise in the Persian Gulf.

U.S.-BAHRAINI RELATIONS

The American Mission Hospital, affiliated with the National Evangelical Church, has operated continuously in Bahrain for more than a century. Bahrain has also been a base for U.S. naval activity in the Gulf since 1947. When Bahrain became independent, the U.S.-Bahrain relationship was formalized with the establishment of diplomatic relations. The U.S. embassy at Manama was opened September 21, 1971, and a resident ambassador was sent in 1974. The Bahraini embassy in Washington, DC, opened in 1977. In October 1991, Amir Isa bin Salman Al Khalifa made a state visit to Washington. In 2001, Amir Hamad bin Isa Al-Khalifa made his first visit to the U.S. after succeeding his father in 1999. He returned to Washington on an official visit in January 2003. King Hamad made an official visit to Washington in November 2004 to meet with President Bush and cabinet-level officials.

Bahrain and the United States signed a Defense Cooperation Agreement in October 1991 granting U.S. forces access to Bahraini facilities and ensuring the right to pre-position material for future crises. Bahrain is the headquarters of the U.S. Navy's Fifth Fleet. The U.S. designated Bahrain a Major Non-NATO Ally in October 2001.

TRAVEL

Consular Information Sheet

June 27, 2008

Country Description: Bahrain is a hereditary kingdom governed by the Al-Khalifa family. In 2002, the country adopted a new constitution that reinstated a parliament, which consists of one elected and one appointed chamber. Islamic ideals and beliefs provide the conservative foundation of the country's customs, laws and practices. Bahrain is a modern, developed country and tourist facilities are widely available. The capital is Manama.

Entry Requirements: A passport and a visa are required. Passports should be valid for at least six months after date of arrival. U.S. passport holders outside of Bahrain may apply and pay for a two-week tourist visa online through the Bahraini government web site at http://www.evisa.gov.bh, or may obtain it upon arrival at the airport. U.S. diplomatic passport holders receive a no-fee two-week visa.

Prior to travel, visitors may obtain five-year multiple-entry visas valid for stays as long as one month from Bahraini embassies overseas. Bahrain assesses heavy fines on visitors who fail to depart Bahrain at the end of their authorized stay. The amount of the fine is determined by a formula related to the visa type, duration, and location of issuance. An exit tax is included in the ticket price for flights out of Bahrain, and no additional exit fees are required upon departure. Residents of Bahrain who intend to return must obtain a re-entry permit before departing. For further information on entry/exit requirements, travelers may contact the Embassy of the Kingdom of Bahrain, 3502 International Drive NW, Washington, DC 20008, telephone (202) 342-1111; or the Bahrain Permanent Mission to the U.N., 2 United Nations Plaza, East 44th St., New York, NY 10017, telephone (212) 223-6200. Visit the Embassy of Bahrain web site at www.bahrainembassy.org for the most current visa information.

Safety and Security: Americans in Bahrain should maintain a high level of security awareness. Spontaneous demonstrations take place in Bahrain from time to time in response to world events or local developments. We remind American citizens that even demonstrations intended to be peaceful can turn confrontational and possible escalate into violence. American citizens are therefore urged to avoid the areas of demonstrations if possible, and to exercise caution if within the vicinity of any demonstrations. American citizens should stay current with media coverage of local events and be aware of their surroundings at all times.

Information regarding demonstrations in Bahrain can be found on the U.S. Embassy Manama's web site at http://bahrain.usembassy.gov/information_for_travelers.html. Visiting U.S. citizens should register with the U.S. Embassy in Manama upon arrival. The Department of State remains concerned about the possibility of terrorist attacks against U.S. citizens and interests throughout the world. Americans should maintain a low profile, vary routes and times for all required travel, and treat mail and packages from unfamiliar sources with caution. In addition, U.S. citizens are urged to avoid contact with any suspicious, unfamiliar objects, and to report the presence of the objects to local authorities.

Please report any security concerns to the U.S. Embassy's Regional Security Office at telephone (973) 1724-2700 during office hours or (973) 1727–5126 after hours.

For the latest security information, Americans traveling abroad should regularly monitor the Department's Internet web site, where the current Worldwide Caution Travel Alert, Middle East and North Africa Travel Alert, Travel Warnings and other Travel Alerts can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S. and Canada or, for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: The crime rate in Bahrain is low and violent crime is rare. However, burglary, petty theft, and robberies do occur. Visiting Americans are urged to take the same security precautions in Bahrain that one would practice in the United States. Hotel room doors should be locked when visitors are in their rooms, and travelers are encouraged to store valuables in hotel room safes when they are available. Women are encouraged to keep their purses firmly under their arms, and men should avoid keeping their wallets in their hip pockets while in the old market area. The U.S. Embassy in Manama recommends that travelers using local taxis insist on the use of a meter since unexpectedly high fares may otherwise be charged. Bahrain has a professional police force, and visitors are encouraged to contact the police if problems are encountered.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the U.S. Embassy. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the U.S. Embassy for assistance. The Embassy staff can, for example, assist you to find appropriate medical care, contact family members or friends and explain how to transfer funds. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

Medical Facilities and Health Information: Basic modern medical care and medicines are available in several hospitals and health centers in Bahrain. Two government hospitals, several private hospitals, and numerous private clinics located throughout the country offer a wide range of medical services. Cardiac care, general surgery, internal medicine, obstetrics, gynecology, pediatrics, orthopedics and dentistry

services are readily available, as are x-rays, CT-scan and MRI testing. The government hospitals house both trauma and ICU units. Pharmacies are common throughout Bahrain and carry a wide range of medications. Prescriptions are normally required.

Payment at all medical facilities is due at the time of service. Some hospitals have limited direct billing capability for certain insurance carriers. Billing and insurance practices vary among the medical facilities.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's web site at http://wwwn.cdc.gov/travel/default.aspx. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith/en.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Bahrain is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

Travel by road in Bahrain is generally safe although unsafe driving practices are common. Highways and major roads in the northern third of Bahrain are four to six lanes wide and well maintained; roads in villages and older parts of Manama and Muharraq are narrow and twisting. As in the United States, traffic in Bahrain moves on the right. Roundabouts (traffic circles) follow the British system, with those automobiles within the traffic circle having right of way over those attempting to enter. Although the Bahraini penal code calls for fines of up to 100 dinars ($270.00) or imprisonment of up to six months for driving above posted speed limits, it is not uncommon for drivers to drive well over the posted speed limits of 50-120 km per hour. The law allows the police to detain drivers for traffic violations until they can appear before a magistrate. It is illegal to use a cell phone while driving.

Under Bahraini law, any sign of having consumed alcohol may be taken as prima facie evidence of driving under the influence, which can lead to imprisonment and/or fines of up to 1,000 Bahraini Dinars (2,700 U.S. dollars). Except for minor accidents, drivers may not move their vehicles after an accident until a report has been filed with the traffic police. This is true even in cases of single-car accidents. Insurance companies may not provide coverage if the cars are moved. However, drivers involved in minor, non-injury accidents no longer need to wait at the scene for the police. Individuals should get their vehicles off the road to avoid further accidents. Drivers can call the accident hotline at 199 (if there are no injuries) or 999 (when someone is injured) where they will be directed to one of five centers to file the accident report. This report must be filed within 24 hours of the accident. Both drivers may be prohibited from leaving the country until the matter is resolved if an accident results in legal proceedings. The main switchboard at the traffic department is 1787-2222.

Emergency numbers are as follows:

Fire/Ambulance/Police: 999

Traffic/Accidents: 199
(no injuries) OR 999 (injuries)

Visit the web site of Bahrain's national authority responsible for road safety at http://www.traffic.gov.bh/main.htm.

Aviation Safety Oversight: As there is no direct commercial air service between the United States and Bahrain, the U.S. Federal Aviation Administration (FAA) has not assessed Bahrain's Civil Aviation Authority for compliance with International Civil Aviation Organization (ICAO) aviation safety standards. For more information, travelers may visit the FAA's web site at http://www.faa.gov.

Special Circumstances: Individuals subject to Bahraini court orders arising from indebtedness, labor disagreements, or other legal disputes may be prevented from departing Bahrain until their cases are resolved. Instances have occurred in which departure was prohibited for several years, since the legal process can be both lengthy and complex. The Consular Section of the U.S. Embassy in Manama maintains a list of local attorneys capable of representing Americans.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Persons violating Bahrain's laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for breaking the law can be more severe than in the United States for similar offenses. Disrespect to officials in word or deed can result in heavy fines. Travelers who are driving should be aware that one drink may be sufficient grounds for a DUI arrest. Penalties for possession, use, or trafficking in illegal drugs in Bahrain are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in Bahrain are encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration web site, and to obtain updated information on travel and security within Bahrain. Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency. The U.S. Embassy is located at Bldg. 979, Road no. 3119, Zinj District (next to Al Ahli Sports Club). The mailing address is P.O. Box 26431, Manama, Bahrain. The telephone number is (973) 1724-2700. The after-hours number is (973) 1727-5126. The Consular Section's fax number is (973) 1725-6242. The Embassy's website, which includes consular information and the most recent messages to the American community in Bahrain, is at http://bahrain.usembassy.gov. The workweek in Bahrain is Sunday through Thursday.

Intercountry Adoption

June 2001

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is based on public sources and current understanding. Questions involving foreign and U.S. immigration laws and legal interpretation should be addressed respectively to qualified foreign or U.S. legal counsel. The Ministry of Islamic and Justice Affairs has informed the American Embassy in Manama, that adoption is not possible in Bahrain. Muslims from birth may support a child whose father is not known, however, the child cannot inherit or take the name of the family providing support, nor can the child depart Bahrain with this family.

These restrictions extend to third country national children, who are considered citizens of Bahrain when the biological father is not known. Prospective American Guardians may want to review our Shari'a Adoption Flyer on Guardianship in Muslim Countries.

Specific questions regarding adoption issues may be addressed to:

Embassy of the State of Bahrain
3502 International Drive, NW
Washington, D.C. 20008
Phone: (202) 342-0741
Fax: (202) 362-2192
Bahrain also has a consulate in New York City, New York.

U.S. Embassy Manama
Box 26431
Manama, Bahrain
Zinj, Bahrain

Additional Information: Prospective adoptive parents are strongly encouraged to consult USCIS publication M-249, *The Immigration of Adopted and Prospective Adoptive Children*, as well as the Department of State publication, *Intercountry Adoption*s for general information on intercountry adoptions.

Questions: Specific questions regarding adoption in Bahrain may be addressed to the Consular Section of the U.S. Embassy or Consulate in Bahrain. You may also contact the Office of Children's Issues, SA-29, 2201 C Street, NW, U.S. Department of State, Washington, DC 20520-2818, telephone 1-888-407-4747 with specific questions.

International Parental Child Abduction

November 2008

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *International Child Abduction* section of this book and review current reports online at www.travel.state.gov/childabduction.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is provided for general information only. Questions involving interpretation of specific foreign laws should be addressed to foreign legal counsel.

General Information: Bahrain is not a party to the Hague Convention on the Civil Aspects of International Child Abduction, nor are there any international or bilateral treaties in force between Bahrain and the United States dealing with international parental child abduction. American citizens who travel to Bahrain are subject to the jurisdiction of Bahraini courts, as well as to the country's laws and regulations. This holds true for all legal matters including child custody. Parents planning to travel with their children to Bahrain should bear this in mind.

Custody Disputes: There is no specific law in Bahrain governing child custody, with each dispute examined on a case-by-case basis. When child custody disputes arise between parents, one of whom is a citizen of Bahrain, custody decisions are based on Islamic (Sharia) law. Two separate Islamic courts, representing the jurisprudence of the Sunni and Shia Islamic sects, enforce divergent interpretations of Islamic law. In general, the marriage contract determines which court will exercise jurisdiction. If the contract is silent on this issue, the court representing the husband's sect will have jurisdiction. Non-Bahraini nationals, whether married to a Bahraini or other national, may file custody cases through a lawyer approved to practice in Bahrain in the court in which the marriage was legalized, whether Sunni, Shia or civil. Non-Muslims are permitted to file cases in the Bahrain civil court.

In determining issues of custody, Bahraini courts consider the parents' religion, place of permanent residence, income, and the mother's subsequent marital status. Priority is generally given to a Muslim father,

irrespective of his nationality. Under Sharia law a Muslim mother is usually granted custody of girls under the age of nine and boys under the age of seven, at which time custody is transferred to the father. If the mother is unavailable, an infant may be given to the grandmother on the mother's side until s/he reaches the age of seven or nine.

If the court finds the mother "incompetent," custody of the child, regardless of age, can be given to the father, or to the child's paternal grandmother. A finding of incompetence is left to the discretion of the Sharia judge. Sharia courts have found parents incompetent if they are not Muslim or if they engage in behavior that is considered to be inconsistent with the Islamic faith.

Remarriage to a non-Bahraini may be considered grounds for a finding of incompetence. Under Sharia law, if a mother removes a child from the father thus denying him access, the mother's custody rights can be severed. If both the mother and father are ruled incompetent, custody of the children is given to the women on the father's side of the family.

If a child has attained the "age of discretion," that child may be allowed to choose the parent with whom he or she wishes to live. Since the "age of discretion" has no clear definition, a Bahraini lawyer should be contacted to discuss any specific case. Persons who wish to pursue a child custody claim in a Bahraini court should retain an attorney in Bahrain.

The U.S. Embassy in Manama maintains a list of attorneys willing to represent American clients. A copy of this list may be obtained by contacting the Embassy or the U.S. Department of State. U.S. government officials cannot recommend an attorney and make no claim as to the professional ability or integrity of the attorneys on this list. The U.S. government does not pay legal expenses. A copy of this list may be obtained by contacting the following offices.

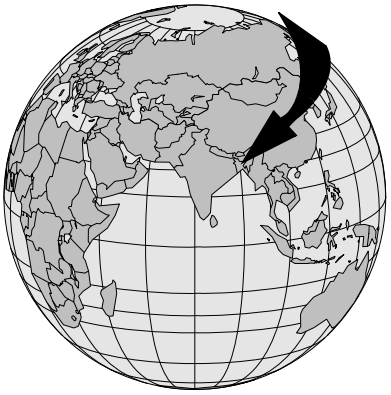
American Embassy
Box 26431
Manama, Bahrain
Phone: 973-273-300
After hours: 973-275-126
Fax: 973-272-594
Work Week: Saturday through Wednesday

U.S. Department of State
Office of Children's Issues
SA-29
U.S. Department of State
2201 C Street, NW
Washington, DC 20520-2818
Phone: (202) 736-9090
Fax: (202) 312-9743

Specific questions regarding child custody in Bahrain should be addressed to a Bahraini attorney or to the Embassy of Bahrain at:

Embassy of the State of Bahrain
3502 International Drive, NW
Washington, DC 20008
Phone: (202) 342-0741
Fax: (202) 362-2192

Enforcement of Foreign Judgments: Custody orders and judgments of foreign courts are not enforceable in Bahrain if they potentially contradict or violate local laws and practices. For example, an order from a U.S. court granting custody to an American mother may not be honored in Bahrain if the mother intends to take the child to live outside Bahrain. Courts in Bahrain will not enforce U.S. court decrees ordering a parent in Bahrain to pay child support.



Visitation Rights: Non-custodial parents (both the mother and father) are entitled to visitation by prior arrangement of the competent court. Neither the court nor a custodial parent has the authority to stop a non-Bahraini parent from entering Bahrain to visit the child.

Dual Nationality: Dual nationality is not recognized under Bahraini law. Children of Bahraini fathers automatically acquire Bahraini citizenship at birth, regardless of where the child was born. Bahraini women can only transmit citizenship in rare instances when there is official intervention from the Bahraini government. Bahrainis must enter and leave the country on Bahraini passports even if they are entitled to hold the passport of another country.

Travel Restrictions: No exit visas are required to leave Bahrain. When a custody case is before the local court, children, regardless of their nationality, are generally subject to court-imposed travel restrictions. Either parent can request that a court issue an order restricting the travel of minor children, and immigration authorities will enforce that travel restriction. This travel restriction applies to children who are American citizens.

Criminal Remedies: For information on possible criminal remedies, please contact your local law enforcement authorities or the nearest office of the Federal Bureau of Investigation (FBI). Information is also available on the Internet at the web site of the U.S. Department of Justice, Office of Juvenile Justice and Delinquency Prevention (OJJDP) at http://www.ojjdp.ncjrs.org.

For further information on international parental child abduction, contact the Office of Children's Issues, U.S. Department of State at (202) 736-9090 or visit its web site on the Internet at http://travel.state.gov/childabduction.

BANGLADESH

Compiled from the August 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
People's Republic of Bangladesh

PROFILE

Geography

Area: 147, 570 sq. km. (55,813 sq. mi.); about the size of Wisconsin.
Cities: Capital—Dhaka (pop. 10 million). Other cities—Chittagong (2.8 million), Khulna (1.8 million), Rajshahi (1 million).
Terrain: Mainly flat alluvial plain, with hills in the northeast and southeast.
Climate: Semitropical, monsoonal.

People

Nationality: Noun and adjective—Bangladeshi(s).
Population: (July 2007 CIA est.) 150 million.
Annual growth rate: (July 2007 CIA est.): 2.06%.
Ethnic groups: Bengali 98%, tribal groups, non-Bengali Muslims.
Religions: Muslim 88.3%; Hindu 10.5%; Christian 0.3%, Buddhist 0.6%, others 0.3%.
Languages: Bangla (official, also known as Bengali), English.
Education: Attendance— 61%. Literacy—(2008 UNDP Report)—47.5%.
Health: Infant mortality rate (below 1)—65/1,000. Life expectancy—61 years (male), 62 years (female).
Work force: (60.3 million) Agriculture—62.3%; manufacturing and mining—7.6%; others—30.1%.

Government

Type: Parliamentary democracy.
Independence: 1971 (from Pakistan).
Constitution: 1972; amended 1974, 1979, 1986, 1988, 1991, 1996, 2004.
Government branches: Executive—president (chief of state), prime minister (head of government), cabinet. Legislative—unicameral Parliament (345 members). Judicial—civil court system based on British model.
Political subdivisions: Divisions, districts, subdistricts, unions, villages.
Political parties: 30-40 active political parties. Largest ones include Bangladesh Nationalist Party (BNP), the Awami League (AL), the Jatiya Party, and the Jamaat-e-Islami Party.
Suffrage: Universal at age 18.

Economy

Fiscal year: July 1 to June 30.
Annual GDP growth rate: (FY 2006) 6.7%; (FY 2007) 6.51%; (FY 2008 World Bank est.): below 6.0%.
GDP: $63 billion.
Per capita GDP: (2007 est.) $520.
Inflation: (December 2007) 11.59% (point to point basis) and 9.11% (monthly average basis).
Exchange rate: FY 2003: U.S $1=Taka 57.90; FY 2006: U.S $1=Taka 69.43; FY 2007 (January) U.S $1=Taka 69.69.
Annual budget: (FY 2008) $12.44 billion.
Natural resources: Natural gas, fertile soil, water.
Agriculture: (21.1% of GDP) Products—rice, jute, tea, sugar, wheat.
Industry: (Manufacturing; 17.8% of GDP) Types—garments and knitwear, jute goods, frozen fish and seafood, textiles, fertilizer, sugar, tea, leather, ship-breaking for scrap, pharmaceuticals, ceramic tableware, newsprint.
Trade: (FY 2007) Total imports (FY 2007)—17.15 billion: capital goods, food grains, petroleum, textiles, chemicals, vegetable oils. Growth rate over previous fiscal year: 16.35%. Total exports (FY 2007)—$12.16 billion: garments and knitwear, frozen fish, jute and jute goods, leather and leather products, tea, urea fertilizer, ceramic tableware. Growth rate over previous fiscal year: 15.59%. Exports to U.S. (Jan.-Dec. 2007)—$3.43 billion. Imports from U.S. (Jan.-Dec. 2007)—$466 million.

GEOGRAPHY

Bangladesh is a low-lying, riparian country located in South Asia with a largely marshy jungle coastline of 710 kilometers (440 mi.) on the northern littoral of the Bay of Bengal. Formed by a deltaic plain at the confluence of the Ganges (Padma), Brahmaputra (Jamuna), and Meghna

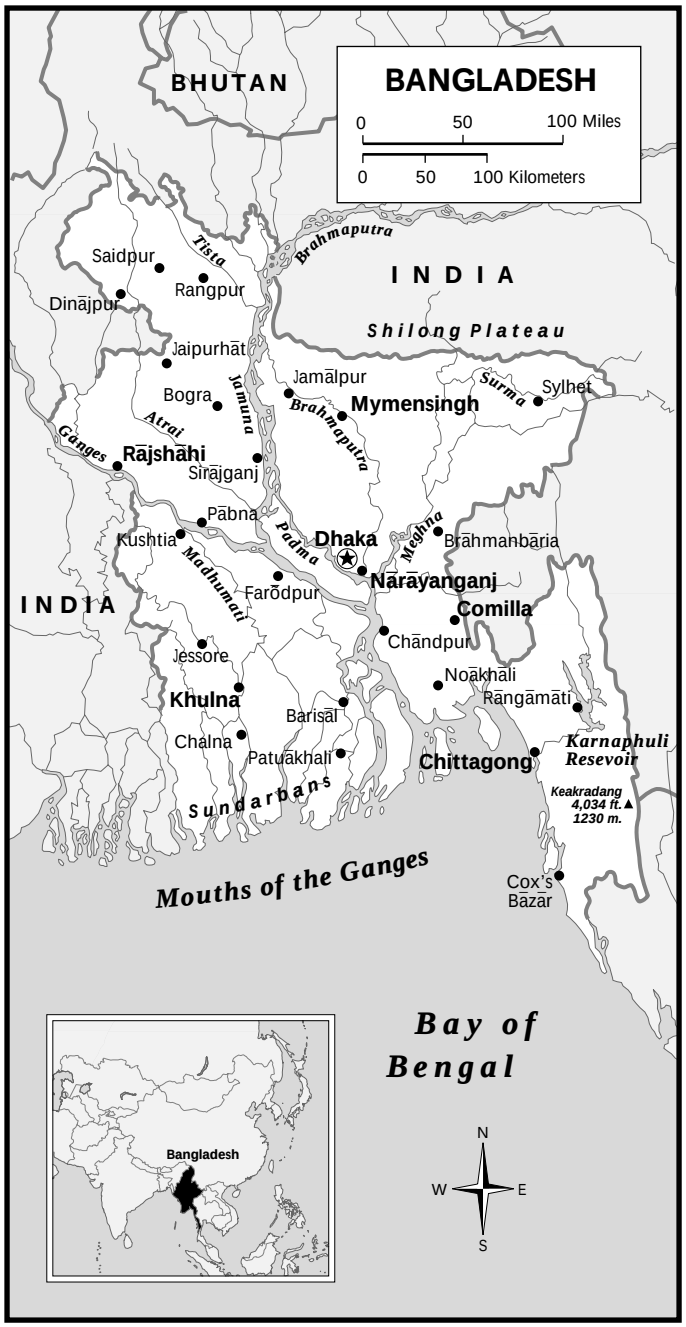
Rivers and their tributaries, Bangladesh's alluvial soil is highly fertile but vulnerable to flood and drought. Hills rise above the plain only in the Chittagong Hill Tracts in the far southeast and the Sylhet division in the northeast. Straddling the Tropic of Cancer, Bangladesh has a subtropical monsoonal climate characterized by heavy seasonal rainfall, moderately warm temperatures, and high humidity. Natural calamities, such as floods, tropical cyclones, tornadoes, and tidal bores affect the country almost every year. Bangladesh also is affected by major cyclones—on average 16 times a decade.

Urbanization is proceeding rapidly, and it is estimated that only 30% of the population entering the labor force in the future will be absorbed into agriculture, although many will likely find other kinds of work in rural areas. The areas around Dhaka and Comilla are the most densely settled. The Sundarbans, an area of coastal tropical jungle in the southwest and last wild home of the Bengal Tiger, and the Chittagong Hill Tracts on the southeastern border with Burma and India, are the least densely populated.

PEOPLE

The area that is now Bangladesh has a rich historical and cultural past, combining Dravidian, Indo-Aryan, Mongol/Mughul, Arab, Persian, Turkic, and west European cultures. Residents of Bangladesh, about 98% of whom are ethnic Bengali and speak Bangla, are called Bangladeshis. Urdu-speaking, non-Bengali Muslims of Indian origin, and various tribal groups, mostly in the Chittagong Hill Tracts, comprise the remainder. Most Bangladeshis (about 88.3%) are Muslims, but Hindus constitute a sizable (10.5%) minority. There also are a small number of Buddhists, Christians, and animists. English is spoken in urban areas and among the educated.

Sufi religious teachers succeeded in converting many Bengalis to Islam, even before the arrival of Muslim armies from the west. About 1200 AD, Muslim invaders established political control over the Bengal region. This political control also encouraged conversion to Islam. Since then, Islam has played a crucial role in the region's history and politics, with a Muslim majority emerging, particularly in the eastern region of Bengal.



HISTORY

Bengal was absorbed into the Mughul Empire in the 16th century, and Dhaka, the seat of a nawab (the representative of the emperor), gained some importance as a provincial center. But it remained remote and thus a difficult to govern region—especially the section east of the Brahmaputra River—outside the mainstream of Mughul politics. Portuguese traders and missionaries were the first Europeans to reach Bengal in the latter part of the 15th century. They were followed by representatives of the Dutch, the French, and the British East India Companies. By the end of the 17th century, the British presence on the Indian subcontinent was centered in Calcutta. During the 18th and 19th centuries, the British gradually extended their commercial contacts and administrative control beyond Calcutta to Bengal. In 1859, the British Crown replaced the East India Company, extending British dominion from Bengal, which became a region of India, in the east to the Indus River in the west.

The rise of nationalism throughout British-controlled India in the late 19th century resulted in mounting animosity between the Hindu and Muslim communities. In 1885, the All-India National Congress was founded with Indian and British membership. Muslims seeking an organization of their own founded the All-India Muslim League in 1906. Although both the League and the Congress supported the goal of Indian self-government within the British Empire, the two parties were unable to agree on a way to ensure the protection of Muslim political, social, and economic rights. The subsequent history of the nationalist movement was characterized by periods of Hindu-Muslim cooperation, as well as by communal antagonism. The idea of a separate Muslim state gained increasing popularity among Indian Muslims after 1936, when the Muslim League suffered a decisive defeat in the first elections under India's 1935 constitution. In 1940, the Muslim League called for an independent state in regions where Muslims were in the majority. Campaigning on that platform in provincial elections in 1946, the League won the majority of the Muslim seats contested in Bengal. Widespread communal violence followed, especially in Calcutta.

When British India was partitioned and the independent dominions of India and Pakistan were created in 1947, the region of Bengal was divided along religious lines. The predominantly Muslim eastern half was designated East Pakistan—and made part of the newly independent Pakistan—while the predominantly Hindu western part became the Indian state of West Bengal. Pakistan's history from 1947 to 1971 was marked by political instability and economic difficulties. Dominion status was rejected in 1956 in favor of an "Islamic republic within the Commonwealth." Attempts at civilian political rule failed, and the government imposed martial law between 1958 and 1962, and again between 1969 and 1971.

Almost from the advent of independent Pakistan in 1947, frictions developed between East and West Pakistan, which were separated by more than 1,000 miles of Indian territory. East Pakistanis felt exploited by the West Pakistan-dominated central government. Linguistic, cultural, and ethnic differences also contributed to the estrangement of East from West Pakistan. Bengalis strongly resisted attempts to impose Urdu as the sole official language of Pakistan. Responding to these grievances, Sheikh Mujibur Rahman in 1948 formed a students' organization called the Chhatra League. In 1949, Maulana Abdul Hamid Khan

Bhasani and some other Bengali leaders formed the East Pakistan Awami Muslim League (AL), a party designed mainly to promote Bengali interests. This party dropped the word Muslim from its name in 1955 and came to be known as Awami League. Mujib became president of the Awami League in 1966 and emerged as leader of the Bengali autonomy movement. In 1966, he was arrested for his political activities. After the Awami League won almost all the East Pakistan seats of the Pakistan national assembly in 1970-71 elections, West Pakistan opened talks with the East on constitutional questions about the division of power between the central government and the provinces, as well as the formation of a national government headed by the Awami League. The talks proved unsuccessful, however, and on March 1, 1971, Pakistani President Yahya Khan indefinitely postponed the pending national assembly session, precipitating massive civil disobedience in East Pakistan. Mujib was arrested again; his party was banned, and most of his aides fled to India and organized a provisional government. On March 26, 1971, following a bloody crackdown by the Pakistan Army, Bengali nationalists declared an independent People's Republic of Bangladesh. As fighting grew between the army and the Bengali mukti bahini ("freedom fighters"), an estimated 10 million Bengalis, mainly Hindus, sought refuge in the Indian states of Assam and West Bengal. On April 17, 1971, a provisional government was formed in Meherpur district in western Bangladesh bordering India with Sheikh Mujibur Rahman, who was in prison in Pakistan, as President, Syed Nazrul Islam as Acting President, and Tajuddin Ahmed as Prime Minister.

The crisis in East Pakistan produced new strains in Pakistan's troubled relations with India. The two nations had fought a war in 1965, mainly in the west, but the refugee pressure in India in the fall of 1971 produced new tensions in the east. Indian sympathies lay with East Pakistan, and in November, India intervened on the side of the Bangladeshis. On December 16, 1971, Pakistani forces surrendered, and Bangladesh— meaning "Bengal country"— was born; the new country became a parliamentary democracy under a 1972 constitution.

The first government of the new nation of Bangladesh was formed in Dhaka with Justice Abu Sayeed Choudhury as President, and Sheikh Mujibur Rahman ("Mujib")—who was released from Pakistani prison in early 1972—as Prime Minister.

Sheikh Mujibur Rahman, 1972-75

Mujib came to office with immense personal popularity but had difficulty transforming this popular support into the political strength needed to function as head of government. The

new constitution, which came into force in December 1972, created a strong executive prime minister, a largely ceremonial presidency, an independent judiciary, and a unicameral legislature on a modified Westminster model. The 1972 constitution adopted as state policy the Awami League's (AL) four basic principles of nationalism, secularism, socialism, and democracy.

The first parliamentary elections held under the 1972 constitution were in March 1973, with the Awami League winning a massive majority. No other political party in Bangladesh's early years was able to duplicate or challenge the League's broad-based appeal, membership, or organizational strength. Relying heavily on experienced civil servants and members of the Awami League, the new Bangladesh Government focused on relief, rehabilitation, and reconstruction of the economy and society. Economic conditions remained precarious, however. In December 1974, Mujib decided that continuing economic deterioration and mounting civil disorder required strong measures. After proclaiming a state of emergency, Mujib used his parliamentary majority to win a constitutional amendment limiting the powers of the legislative and judicial branches, establishing an executive presidency, and instituting a one-party system, the Bangladesh Krishak Sramik Awami League (BAKSAL), which all members of Parliament (and senior civil and military officials) were obliged to join.

Despite some improvement in the economic situation during the first half of 1975, implementation of promised political reforms was slow, and criticism of government policies became increasingly centered on Mujib. In August 1975, Mujib, and most of his family, were assassinated by mid-level army officers. His daughters, Sheikh Hasina and Sheikh Rehana, were out of the country. A new government, headed by former Mujib associate Khandakar Moshtaque, was formed.

Ziaur Rahman, 1975-81

Successive military coups resulted in the emergence of Army Chief of Staff Gen. Ziaur Rahman ("Zia") as strongman. He pledged the army's support to the civilian government headed by President Chief Justice Sayem. Acting at Zia's behest, Sayem dissolved Parliament, promising fresh elections in 1977, and instituted martial law.

Acting behind the scenes of the Martial Law Administration (MLA), Zia sought to invigorate government policy and administration. While continuing the ban on political parties, he sought to revitalize the demoralized bureaucracy, to begin new economic development programs, and to emphasize family planning. In November 1976, Zia became Chief Martial Law Administrator (CMLA) and assumed the presidency upon Sayem's retirement 5 months later, promising national elections in 1978.

As President, Zia announced a 19-point program of economic reform and began dismantling the MLA. Keeping his promise to hold elections, Zia won a 5-year term in June 1978 elections, with 76% of the vote. In November 1978, his government removed the remaining restrictions on political party activities in time for parliamentary elections in February 1979. These elections, which were contested by more than 30 parties, marked the culmination of Zia's transformation of Bangladesh's Government from the MLA to a democratically elected, constitutional one. The AL and the Bangladesh Nationalist Party (BNP), founded by Zia, emerged as the two major parties.

In May 1981, Zia was assassinated in Chittagong by dissident elements of the military. The attempted coup never spread beyond that city, and the major conspirators were either taken into custody or killed. In accordance with the constitution, Vice President Justice Abdus Sattar was sworn in as acting president. He declared a new national emergency and called for election of a new president within 6 months—an election Sattar won as the BNP's candidate. President Sattar sought to follow the policies of his predecessor and retained essentially the same cabinet, but the army stepped in once again.

Hussain Mohammed Ershad, 1982-90

Army Chief of Staff Lt. Gen. H.M. Ershad assumed power in a bloodless coup in March 1982. Like his predecessors, Ershad suspended the constitution and—citing pervasive corruption, ineffectual government, and economic mismanagement—declared martial law. The following year, Ershad assumed the presidency, retaining his positions as army chief and CMLA. During most of 1984, Ershad sought the opposition parties' participation in local elections under martial law. The opposition's refusal to participate, however, forced Ershad to abandon these plans. Ershad sought public support for his regime in a national referendum on his leadership in March 1985. He won overwhelmingly, although turnout was small. Two months later, Ershad held elections for local council chairmen. Pro-government candidates won a majority of the posts, setting in motion the President's ambitious decentralization program. Political life was further liberalized in early 1986, and additional political rights, including the right to hold large public rallies, were restored. At the same time, the Jatiya (National) Party, designed as Ershad's political vehicle for the transition from martial law, was established.

Despite a boycott by the BNP, led by President Zia's widow, Begum Khaleda Zia, parliamentary elections were held on schedule in May 1986. The Jatiya Party won a modest majority of the 300 elected seats in the National Assembly. The participation of the Awami League—led by the late President Mujib's daughter, Sheikh Hasina Wajed—lent the elections some credibility, despite widespread charges of voting irregularities. Ershad resigned as Army Chief of Staff and retired from military service in preparation for the presidential elections, scheduled for October. Protesting that martial law was still in effect, both the BNP and the AL refused to put up opposing

candidates. Ershad easily outdistanced the remaining candidates, taking 84% of the vote. Although Ershad's government claimed a turnout of more than 50%, opposition leaders, and much of the foreign press, estimated a far lower percentage and alleged voting irregularities.

Ershad continued his stated commitment to lift martial law. In November 1986, his government mustered the necessary two-thirds majority in the National Assembly to amend the constitution and confirm the previous actions of the martial law regime. The President then lifted martial law, and the opposition parties took their elected seats in the National Assembly.

In July 1987, however, after the government hastily pushed through a controversial legislative bill to include military representation on local administrative councils, the opposition walked out of Parliament. Passage of the bill helped spark an opposition movement that quickly gathered momentum, uniting Bangladesh's opposition parties for the first time. The government began to arrest scores of opposition activists under the country's Special Powers Act of 1974. Despite these arrests, opposition parties continued to organize protest marches and nationwide strikes. After declaring a state of emergency, Ershad dissolved Parliament and scheduled fresh elections for March 1988.

All major opposition parties refused government overtures to participate in these polls, maintaining that the government was incapable of holding free and fair elections. Despite the opposition boycott, the government proceeded. The ruling Jatiya Party won 251 of the 300 seats. The Parliament, while still regarded by the opposition as an illegitimate body, held its sessions as scheduled, and passed a large number of bills, including, in June 1988, a controversial constitutional amendment making Islam Bangladesh's state religion and provision for setting up High Court benches in major cities outside of Dhaka. While Islam remains the state religion, the provision for decentralizing the High Court division has been struck down by the Supreme Court.

By 1989, the domestic political situation in the country seemed to have quieted. The local council elections were generally considered by international observers to have been less violent and more free and fair than previous elections. However, opposition to Ershad's rule began to regain momentum, escalating by the end of 1990 in frequent general strikes, increased campus protests, public rallies, and a general disintegration of law and order.

On December 6, 1990, Ershad offered his resignation. On February 27, 1991, after 2 months of widespread civil unrest, an interim government headed by Acting President Chief Justice Shahabuddin Ahmed oversaw what most observers believed to be the nation's most free and fair elections to that date.

Khaleda Zia, 1991–96

The center-right BNP won a plurality of seats and formed a government with support from the Islamic fundamentalist party Jamaat-I-Islami, with Khaleda Zia, widow of Ziaur Rahman, obtaining the post of prime minister. Only four parties had more than 10 members elected to the 1991 Parliament: The BNP, led by Prime Minister Begum Khaleda Zia; the AL, led by Sheikh Hasina; the Jamaat-I-Islami (JI), led by Ghulam Azam; and the Jatiya Party (JP), led by acting chairman Mizanur Rahman Choudhury while its founder, former President Ershad, served out a prison sentence on corruption charges.

The electorate approved still more changes to the constitution, formally re-creating a parliamentary system and returning governing power to the office of the prime minister, as in Bangladesh's original 1972 constitution. In October 1991, members of Parliament elected a new head of state, President Abdur Rahman Biswas.

In March 1994, controversy over a parliamentary by-election, which the opposition claimed the government had rigged, led to an indefinite boycott of Parliament by the entire opposition. The opposition also began a program of repeated general strikes to press its demand that Khaleda Zia's government resign and a caretaker government supervise a general election. Efforts to mediate the dispute, under the auspices of the Commonwealth Secretariat, failed. After another attempt at a negotiated settlement failed narrowly in late December 1994, the opposition resigned en masse from Parliament. The opposition then continued a campaign of marches, demonstrations, and strikes in an effort to force the government to resign. The opposition, including the Awami League's Sheikh Hasina, pledged to boycott national elections scheduled for February 15, 1996.

In February, Khaleda Zia was reelected by a landslide in voting boycotted and denounced as unfair by the three main opposition parties. In March 1996, following escalating political turmoil, the sitting Parliament enacted a constitutional amendment to allow a neutral caretaker government to assume power and conduct new parliamentary elections; former Chief Justice Mohammed Habibur Rahman was named Chief Adviser (a position equivalent to prime minister) in the interim government. New parliamentary elections were held in June 1996 and the Awami League won plurality and formed the government with support from the Jatiya Party led by deposed president Ershad; party leader Sheikh Hasina became Prime Minister.

Sheikh Hasina, 1996–2001

Sheikh Hasina formed what she called a "Government of National Consensus" in June 1996, which included one minister from the Jatiya Party and another from the Jatiyo Samajtantric Dal, a very small leftist party. The Jatiya Party never entered into a formal coalition arrangement, and party president H.M. Ershad withdrew his support from the government in September 1997. Only

three parties had more than 10 members elected to the 1996 Parliament: The Awami League, BNP, and Jatiya Party. Jatiya Party president, Ershad, was released from prison on bail in January 1997.

Although international and domestic election observers found the June 1996 election free and fair, the BNP protested alleged vote rigging by the Awami League. Ultimately, however, the BNP party decided to join the new Parliament. The BNP soon charged that police and Awami League activists were engaged in large-scale harassment and jailing of opposition activists. At the end of 1996, the BNP staged a parliamentary walkout over this and other grievances but returned in January 1997 under a four-point agreement with the ruling party. The BNP asserted that this agreement was never implemented and later staged another walkout in August 1997. The BNP returned to Parliament under another agreement in March 1998.

In June 1999, the BNP and other opposition parties again began to abstain from attending Parliament. Opposition parties staged an increasing number of nationwide general strikes, rising from 6 days of general strikes in 1997 to 27 days in 1999. A four-party opposition alliance formed at the beginning of 1999 announced that it would boycott parliamentary by-elections and local government elections unless the government took steps demanded by the opposition to ensure electoral fairness. The government did not take these steps, and the opposition subsequently boycotted all elections, including municipal council elections in February 1999, several parliamentary by-elections, and the Chittagong city corporation elections in January 2000.

In July 2001, the Awami League government stepped down to allow a caretaker government to preside over parliamentary elections. Political violence that had increased during the Awami League government's tenure continued to increase through the summer in the run up to the election. In August, Khaleda Zia and Sheikh Hasina agreed during a visit of former President Jimmy Carter to respect the results of the election, join Parliament win or lose, foreswear the use of hartals (violently enforced strikes) as political tools, and if successful in forming a government allow for a more meaningful role for the opposition in Parliament. The caretaker government was successful in containing the violence, which allowed a parliamentary general election to be successfully held on October 1, 2001.

Khaleda Zia, 2001–2006

The four-party alliance led by the BNP won over a two-thirds majority in Parliament. Begum Khaleda Zia was sworn in on October 10, 2001, as Prime Minister for the third time (first in 1991, second after the February 15, 1996 elections).

Despite her August 2001 pledge and all election monitoring groups declaring the election free and fair, Sheikh Hasina condemned the election, rejected the results, and boycotted Parliament. In 2002, however, she led her party legislators back to Parliament, but the Awami League again walked out in June 2003 to protest derogatory remarks about Hasina by a State Minister and the allegedly partisan role of the Parliamentary Speaker. In June 2004, the AL returned to Parliament without having any of their demands met for an apology to Sheikh Hasina and guarantees of a neutral Speaker. They then attended Parliament irregularly before announcing a boycott of the entire June 2005 budget session.

On August 17, 2005, near-synchronized blasts of improvised explosive devices in 63 out of 64 administrative districts targeted mainly government buildings and killed two persons. An extremist Islamist outfit named Jamiatul Mujahideen, Bangladesh (JMB) claimed responsibility for the blasts aimed to press home their demand for replacement of the secular legal system with Islamic sharia courts. Subsequent attacks on the courts in several districts killed 28 people, including judges, lawyers, and police personnel guarding the courts. A government campaign against the Islamic extremists led to the arrest of hundreds of senior and mid-level JMB leaders. Six top JMB leaders were tried and sentenced to death for their role in the murder of two judges; another leader was tried and sentenced to death in absentia in the same case.

In February 2006, the AL returned to Parliament, raised demands for early elections, and requested significant changes in the electoral and caretaker government systems to stop alleged moves by the ruling coalition to rig the next election. The AL blames the ruling party for several high-profile attacks on opposition leaders, and asserts that the ruling party is bent on eliminating Sheikh Hasina and the Awami League as a viable force.

The BNP and its allies accuse the AL of maligning Bangladesh at home and abroad out of jealousy over the government's performance on development and economic issues. Dialogue between the Secretaries General of the main ruling and opposition parties failed to sort out the electoral reform issues.

Caretaker Government, October 2006–Present

The 13th Amendment to the constitution required the president to offer the position of the Chief Adviser to the immediate past Chief Justice of the Supreme Court, Justice K.M. Hasan, once the previous parliamentary session expired on October 28, 2006. The AL opposed Justice Hasan, alleging that he belonged to ruling BNP in his past life and that the BNP government in 2004 amended the constitution to extend retirement age for the Supreme Court judges to make sure that Justice Hasan became the Chief Adviser during the next elections to help BNP win the election. Justice Hasan declined the position, and after two days of violent protests, President Iajuddin Ahmed also assumed the role of Chief Adviser to the caretaker government.

On January 3, 2007, the Awami League announced that they would boycott the January 22 parliamen-

tary elections. The Awami League planned a series of country-wide general strikes and transportation blockades.

On January 11, 2007, President Iajuddin Ahmed declared a state of emergency, resigned as Chief Adviser, and indefinitely postponed parliamentary elections. On January 12, 2007, former Bangladesh Bank governor Fakhruddin Ahmed was sworn in as the new Chief Adviser, and ten new advisers (ministers) were appointed. Under emergency provisions, the government suspended certain fundamental rights guaranteed by the constitution and detained a large number of politicians and others on suspicion of involvement in corruption and other crimes.

In January 2008, a reshuffle of the caretaker government took place, which included the appointment of special assistants to help oversee the functioning of the administration.

On July 16, 2007 the government arrested Awami League president and former Prime Minister Sheikh Hasina on charges of extortion during her tenure as Prime Minister. Hasina was released on parole in June 2008 and allowed to travel to the United States for medical treatment. The cases against her continue. On September 3, 2007, the government arrested BNP chairperson and former Prime Minister Khaleda Zia on charges of corruption. While legal cases against Zia continue, there are negotiations underway regarding her release from prison.

Municipal elections were held in thirteen city corporations and municipalities on August 4, 2008. These elections were judged free and fair by international and domestic observers. The Election Commission has completed registration of over 80 million voters in preparation for parliamentary elections, which will be held in late December 2008. Amendments to the Representation of the People's Ordinance have been promulgated, and political parties have been instructed to register by October 15 in preparation for national elections. The government has also announced plans to hold upazila (sub-district) elections during the third week of October.

GOVERNMENT

The president, while chief of state, holds a largely ceremonial post; the real power is held by the prime minister, who is head of government. The president is elected by the legislature (Parliament) every 5 years. The president's circumscribed powers are substantially expanded during the tenure of a caretaker government. (Under the 13th Amendment, which Parliament passed in March 1996, a caretaker government assumes power temporarily to oversee general elections after dissolution of the Parliament.) In the caretaker government, the president has control over the Ministry of Defense, the authority to declare a state of emergency, and the power to dismiss the Chief Adviser and other members of the caretaker government. Once elections have been held and a new government and Parliament are in place, the president's powers and position revert to their largely ceremonial role. The Chief Adviser and other advisers to the caretaker government must be appointed within 15 days from the day the current Parliament expires. The prime minister is appointed by the president. The prime minister must be a Member of Parliament (MP) whom the president feels commands the confidence of the majority of other MPs. The cabinet is composed of ministers selected by the prime minister and appointed by the president. At least 90% of the ministers must be MPs. The other 10% may be non-MP experts or "technocrats" who are not otherwise disqualified from being elected MPs. According to the constitution, the president can dissolve Parliament upon the written request of the prime minister.

The legislature is a unicameral, 300-seat body. All of its members are elected by universal suffrage at least every five years. Parliament amended the constitution in May 2004, making a provision for adding 45 seats reserved for women and to be distributed among political parties in proportion to their numerical strength in Parliament. The AL did not take its share of the reserved seats, arguing that they did not support the indirect election or nomination of women to fill these seats. Several women's groups also demanded direct election to fill the reserved seats for women.

Bangladesh's judiciary is a civil court system based on the British model; the highest court of appeal is the appellate court of the Supreme Court. At the local government level, the country is divided into divisions, districts, subdistricts, unions, and villages. Local officials are elected at the union level and selected at the village level. All larger administrative units are run by members of the civil service.

Principal Government Officials

Last Updated: 11/12/08

The country has a caretaker government until a general election is held. Although Iajuddin Ahmed is President and Minister of Defense, all of the other Cabinet portfolios are held by Caretaker Advisers (CAs). The Chief CA is roughly equivalent to a prime minister.

Pres.: **Iajuddin AHMED**
Chief CA: **Fakhruddin AHMED**
CA for Agriculture: **Sajjadul KARIM**
CA for Chittagong Hills Tract Affairs: **Raja ROY**
CA for Civil Aviation & Tourism: **Mahbub JAMIL**
CA for Commerce: **Hossain Zillur RAHMAN**
CA for Communications: **Ghulam QUADER**
CA for Cultural Affairs:
Min. of Defense: **Iajuddin AHMED**
CA for Education: **Hossain Zillur RAHMAN**
CA for Energy & Mineral Resources: **M. TAMIM**
CA for Environment & Forests: **Debashish ROY**
CA for Finance & Planning: **Mirza Azizul ISLAM**
CA for Fisheries & Livestock: **Sajjadul KARIM**
CA for Food & Disaster Management: **A. M. M. Shawkat ALI**

CA for Foreign Affairs: **Iftekhar Ahmed CHOWDHURY**
CA for Health: **A. M. M. Shawkat ALI**
CA for Home Affairs: **M. A. MATIN**
CA for Housing & Public Works: **Ghulam QUADER**
CA for Industries: **Mahbub JAMIL**
CA for Information:
CA for Jute & Textiles: **Anwarul IQBAL**
CA for Labor & Employment: **Anwarul IQBAL**
CA for Land: **A. F. Hassan ARIFF**
CA for Law, Justice, & Parliamentary Affairs: **A. F. Hassan ARIFF**
CA for Liberation War Affairs: **M. A. MATIN**
CA for Local Govt., Rural Development, & Cooperatives: **Anwarul IQBAL**
CA for Overseas Employment & Expatriates' Welfare: **Iftekhar Ahmed CHOWDHURY**

CA for Primary & Mass Education: **Rasheda K. CHOWDHURY**
CA for Religious Affairs: **A. F. Hassan ARIFF**
CA for Science & Information & Communications Technology: **Manik Lal SAMADDAR**
CA for Shipping: **M. A. MATIN**
CA for Social Welfare: **M. A. MALEK**
CA for Water: **Sajjadul KARIM**
CA for Women's & Children's Affairs: **Rasheda K. CHOWDHURY**
CA for Youth & Sports: **Mahbub JAMIL**
Governor, Bangladesh Bank: **Salehuddin AHMED**
Ambassador to the US: **M. Humayun KABIR**
Permanent Representative to the UN, New York: **Ismat JAHAN**

Bangladesh maintains an embassy in the United States at 3510 International Drive NW, Washington, DC 20008 (tel: 202-244-0183; fax: 202-244-5366). Bangladesh has Consulates General in New York and Los Angeles.

POLITICAL CONDITIONS

Despite serious problems related to a dysfunctional political system, weak governance, and pervasive corruption, Bangladesh remains one of the few democracies in the Muslim world. Bangladeshis regard democracy as an important legacy of their bloody war for independence and vote in large numbers. However, democratic institutions and practices remain weak. Under the state of emergency, political activities remain restricted. The current government has announced that national elections will take place during the third week of December 2008 and has pledged to hand over power to the elected representatives of the people as soon as these polls take place. The Chief of the Army Staff, General Moeen U. Ahmed, has asserted publicly that neither he nor the Bangladesh military have any political ambitions. Bangladesh is generally a force for moderation in international forums, and it is also a long-time leader in international peacekeeping operations. Its activities in international organizations, with other governments, and its regional partners to promote human rights, democracy, and free markets are coordinated and high profile. In May 2005, Bangladesh became a member of the United Nations Human Rights Council.

Bangladesh lies at the strategic crossroads of South and Southeast Asia. Potential terrorist movements and activities in or through Bangladesh pose a potentially serious threat to India, Nepal, Bhutan, and Burma, as well as Bangladesh itself. The Bangladesh Government routinely denies Indian allegations that Indian insurgents in northeast India operate out of Bangladesh and that extremist Islamist forces are overwhelming Bangladesh's traditionally moderate character. It also denies there is any international terrorist presence in Bangladesh. The Bangladesh Government, however, banned a number of Islamic extremist groups in recent years. In February 2002, the government banned Shahdat al Hiqma, in February 2005 it banned Jagrata Muslim Janata, Bangladesh (JMJB) and Jama'atul Mujahideen Bangladesh (JMB), and in October 2005 it banned Harkatul Jehad Al Islami (HUJI). Following the August 17, 2005 serial bombings in the country, the government launched a crackdown on extremists. In 2006, seven senior JMB leaders were sentenced to death for their role in the 2005 murder of two judges. Six of the seven were executed in March 2007; another leader was tried and sentenced to death in absentia in the same case. In May 2005, the Rapid Action Battalion (RAB) killed six alleged Indian rebels in a raid on a house near the border with India in north-eastern Maulvibazar district. In June 2006, army and RAB personnel killed 10 gunrunners, who media reports described as suspected Indian insurgents, in a remote forest in southeastern Rangamati Hill district. In March 2008, the U.S. Government listed Harkatul Jihadi Islami (HUJI)-Bangladesh a foreign terrorist organization. Given its size and location, a major crisis in Bangladesh could have important consequences for regional stability, particularly if significant refugee movements ensue.

ECONOMY

Although one of the world's poorest and most densely populated countries, Bangladesh has made major strides to meet the food needs of its increasing population, through increased domestic production augmented by imports. The land is devoted mainly to rice and jute cultivation, although wheat production has increased in recent years; the country is largely self-sufficient in rice production. Nonetheless, an estimated 10% to 15% of the population faces serious nutritional risk. Bangladesh's predominantly agricultural economy depends heavily on an erratic monsoonal cycle, with periodic flooding and drought. Although improving, infrastructure to support transportation, communications, and power supply is poorly developed. Bangladesh is limited in its reserves of coal and oil, and its industrial base is weak. The country's main endowments include its vast human resource base, rich agricultural land, relatively abundant water, and substantial reserves of natural gas.

Since independence in 1971, Bangladesh has received more than $30 billion in grant aid and loan commitments from foreign donors, about $15 billion of which has been disbursed. Major donors include the World

Bank, the Asian Development Bank, the UN Development Program, the United States, Japan, Saudi Arabia, and west European countries. Bangladesh historically has run a large trade deficit, financed largely through aid receipts and remittances from workers overseas. Foreign reserves dropped markedly in 2001 but stabilized in the $3 to $4 billion range (or about 3 months' import cover). In January 2007, reserves stood at $3.74 billion, and they increased to $5.39 billion by January 2008, according to the Bank of Bangladesh, the central bank.

Moves Toward a Market Economy

Following the violent events of 1971 during the fight for independence, Bangladesh—with the help of large infusions of donor relief and development aid—slowly began to turn its attention to developing new industrial capacity and rehabilitating its economy. The static economic model adopted by its early leadership, however—including the nationalization of much of the industrial sector—resulted in inefficiency and economic stagnation. Beginning in late 1975, the government gradually gave greater scope to private sector participation in the economy, a pattern that has continued. A few state-owned enterprises have been privatized, but many, including major portions of the banking and jute sectors, remain under government control. Population growth, inefficiency in the public sector, resistance to developing the country's richest natural resources, and limited capital have all continued to restrict economic growth.

In the mid-1980s, there were encouraging, if halting, signs of progress. Economic policies aimed at encouraging private enterprise and investment, denationalizing public industries, reinstating budgetary discipline, and liberalizing the import regime were accelerated. From 1991 to 1993, the government successfully followed an enhanced structural adjustment facility (ESAF) with the International Monetary Fund (IMF) but failed to follow through on reforms in large part because of preoccupation with the government's domestic political troubles. In the late 1990s the government's economic policies became more entrenched, and some of the early gains were lost, which was highlighted by a precipitous drop in foreign direct investment in 2000 and 2001. In June 2003 the IMF approved 3-year, $490-million plan as part of the Poverty Reduction and Growth Facility (PRGF) for Bangladesh that aimed to support the government's economic reform program up to 2006. Seventy million dollars was made available immediately. In the same vein the World Bank approved $536 million in interest-free loans.

Efforts to achieve Bangladesh's macroeconomic goals have been problematic. The privatization of public sector industries has proceeded at a slow pace—due in part to worker unrest in affected industries—although on June 30, 2002, the government took a bold step as it closed down the Adamjee Jute Mill, the country's largest and most costly state-owned enterprise. The government also has proven unable to resist demands for wage hikes in government-owned industries. Access to capital is impeded. State-owned banks, which control about three-fourths of deposits and loans, carry classified loan burdens of about 50%.

The IMF and World Bank predict GDP growth over the next 5 years will be about 6.0%, well short of the 8%-9% needed to lift Bangladesh out of its severe poverty. The initial impact of the end of quotas under the Multi-Fiber Arrangement has been positive for Bangladesh, with continuing investment in the ready-made garment sector, which has experienced annual export growth of around 20%. Downward price pressure means Bangladesh must continue to cut final delivered costs if it is to remain competitive in the world market. Foreign investors in a broad range of sectors are increasingly frustrated with the politics of confrontation, the level of corruption, and the slow pace of reform. While investors view favorably recent steps by the interim government to address corruption, governance, and infrastructure issues, most believe it is too early to assess the long-term impact of these developments.

Agriculture

Most Bangladeshis earn their living from agriculture. Although rice and jute are the primary crops, maize and vegetables are assuming greater importance. Due to the expansion of irrigation networks, some wheat producers have switched to cultivation of maize which is used mostly as poultry feed. Tea is grown in the northeast. Because of Bangladesh's fertile soil and normally ample water supply, rice can be grown and harvested three times a year in many areas. Due to a number of factors, Bangladesh's labor-intensive agriculture has achieved steady increases in food grain production despite the often unfavorable weather conditions. These include better flood control and irrigation, a generally more efficient use of fertilizers, and the establishment of better distribution and rural credit networks. With 28.8 million metric tons produced in 2005-2006 (July-June), rice is Bangladesh's principal crop. By comparison, wheat output in 2005-2006 was 9 million metric tons. Population pressure continues to place a severe burden on productive capacity, creating a food deficit, especially of wheat. Foreign assistance and commercial imports fill the gap. Underemployment remains a serious problem, and a growing concern for Bangladesh's agricultural sector will be its ability to absorb additional manpower. Finding alternative sources of employment will continue to be a daunting problem for future governments, particularly with the increasing numbers of landless peasants who already account for about half the rural labor force.

Industry and Investment

Fortunately for Bangladesh, many new jobs—1.8 million, mostly for women—have been created by the country's dynamic private ready-made garment industry, which grew at double-digit rates through most of the 1990s. The labor-intensive process of ship-breaking for scrap has

developed to the point where it now meets most of Bangladesh's domestic steel needs. Other industries include sugar, tea, leather goods, newsprint, pharmaceutical, and fertilizer production. The country has done less well, however, in expanding its export base—garments account for more than three-fourths of all exports, dwarfing the country's historic cash crop, jute, along with leather, shrimp, pharmaceuticals, and ceramics.

Despite the country's politically motivated general strikes, poor infrastructure, and weak financial system, Bangladeshi entrepreneurs have shown themselves adept at competing in the global garments marketplace. Bangladesh exports significant amounts of garments and knitwear to the U.S. and the European Union (EU) market.

As noted, the initial impact of the end of quotas on Bangladesh's ready-made garment industry has been positive. Downward price pressures, however, mean Bangladesh must continue to cut final delivered costs if it is to remain competitive in the world market.

The Bangladesh Government continues to court foreign investment, something it did fairly well in the 1990s in private power generation and gas exploration and production, as well as in other sectors such as cellular telephony, textiles, and pharmaceuticals. In 1989, the same year it signed a bilateral investment treaty with the United States, it established a board of investment to simplify approval and start-up procedures for foreign investors, although in practice the board has done little to increase investment. Bangladesh also has established export processing zones in Chittagong (1983), Dhaka (1994), Comilla (2000), Mongla (2001), Iswardi (2005), Uttara (2006), and Karnafully (2007).

The most important reforms Bangladesh should make to be able to compete in a global economy are to privatize state-owned enterprises (SOEs), deregulate and promote foreign investment in high-potential industries like energy and telecommunications, and take decisive steps toward combating corruption and strengthening rule of law.

DEFENSE

The Bangladesh Army, Navy, and Air Force are composed of regular military members. The 110,000-member, seven-division army is modeled and organized along British lines, similar to other armies on the Indian subcontinent. However, it has adopted U.S. Army tactical planning procedures, training management techniques, and noncommissioned officer educational systems. It also is eager to improve its peacekeeping operations capabilities and is working with the U.S. military in that area. The United States gave the Bangladesh Air Force four U.S. C-130 B transport aircraft in 2001 under the excess defense article (EDA) program. These aircraft will improve the military's disaster response and peacekeeping capabilities. The Bangladesh Navy is mostly limited to coastal patrolling, but in 2001 it paid to have an ULSAN-class frigate built in South Korea.

In addition to traditional defense roles, the military has been called on to provide support to civil authorities for disaster relief and internal security. Since the proclamation of the state of emergency on January 11, 2007, the military has played a central role in the formulation and execution of key government strategies, including the anti-corruption campaign. The Bangladesh Air Force and Navy, with about 7,000 personnel each, perform traditional military missions. A Coast Guard has been formed, under the home ministry, to play a stronger role in the area of anti-smuggling, anti-piracy, and protection of offshore resources. Recognition of economic and fiscal constraints has led to the establishment of several paramilitary and auxiliary forces, including the 40,000-member Bangladesh rifles; the Ansars and village defense parties organization, which claim 64 members in every village in the country; and a 5,000-member specialized police unit known as the armed police. In 2004, a new police unit called the Rapid Action Battalion (RAB) was constituted with personnel drawn from the military and different law enforcement agencies. RAB is designed to fight hardcore criminal gangs. Bangladesh Rifles, under the authority of the home ministry, are commanded by army officers who are seconded to the organization.

In addition to in-country military training, some advanced and technical training is done abroad, including grant aid training in the United States. China, Pakistan, and Eastern Europe are the major defense suppliers to Bangladesh, but military leaders are trying to find affordable alternatives to Chinese equipment.

A 2,300-member Bangladesh Army contingent served with coalition forces during the 1991 Gulf War. As of September 2007, Bangladesh's 9,728 peacekeepers deployed around the world made it the second-largest troop contributor to international peacekeeping operations. Troops are deployed in Cote d'Ivoire, Liberia, Sudan, Congo, Ethiopia and Eritrea, Western Sahara, Georgia, Timor Leste, Kosovo, Sierra Leone, and Afghanistan.

FOREIGN RELATIONS

Bangladesh pursues a moderate foreign policy that places heavy reliance on multinational diplomacy, especially at the United Nations.

Participation in Multilateral Organizations

Bangladesh was admitted to the United Nations in 1974 and was elected to a Security Council term in 1978 and again for a 2000-01 term. Then Foreign Minister Choudhury served as president of the 41st UN General Assembly in 1986. The government has participated in numerous international conferences, especially those dealing with population, food, development, and women's issues. In 1982-83, Bangladesh

played a constructive role as chairman of the "Group of 77," an informal association encompassing most of the world's developing nations. It has taken a leading role in the "Group of 48" developing countries and the "Developing-8" group of countries. It is also a participant in the activities of the Non-aligned Movement.

Since 1975, Bangladesh has sought close relations with other Islamic states and a role among moderate members of the Organization of the Islamic Conference (OIC). In 1983, Bangladesh hosted the foreign ministers meeting of the OIC. The government also has pursued the expansion of cooperation among the nations of South Asia, bringing the process—an initiative of former President Ziaur Rahman—through its earliest, most tentative stages to the formal inauguration of the South Asian Association for Regional Cooperation (SAARC) at a summit gathering of South Asian leaders in Dhaka in December 1985. Bangladesh hosted the last SAARC summit in November 2005, and Prime Minister Khaleda Zia had reassumed its chairmanship. In the latest summit, Bangladesh has participated in a wide range of ongoing SAARC regional activities. The head of the current caretaker government participated in the April 2007 SAARC summit in India.

In recent years, Bangladesh has played a significant role in international peacekeeping activities. Several thousand Bangladeshi military personnel are deployed overseas on peacekeeping operations. Under UN auspices, Bangladeshi troops have served or are serving in Sierra Leone, Somalia, Rwanda, Mozambique, Kuwait, Ethiopia-Eritrea, Kosovo, East Timor, Georgia, Congo, Cote d'Ivoire and Western Sahara, Bosnia, and Haiti. Bangladesh responded quickly to President Clinton's 1994 request for troops and police for the multinational force for Haiti and provided the largest non-U.S. contingent.

Bilateral Relations With Other Nations

Bangladesh is bordered on the west, north, and east by a 2,400-kilometer land frontier with India, and on the southeast by a land and water frontier (193 kilometers) with Burma.

India. India is Bangladesh's most important neighbor. Geographic, cultural, historic, and commercial ties are strong, and both countries recognize the importance of good relations. During and immediately after Bangladesh's struggle for independence from Pakistan in 1971, India assisted refugees from East Pakistan, intervened militarily to help bring about the independence of Bangladesh, and furnished relief and reconstruction aid.

Indo-Bangladesh relations are often strained, and many Bangladeshis feel India likes to play "big brother" to smaller neighbors, including Bangladesh. Bilateral relations warmed in 1996, due to a softer Indian foreign policy and the new Awami League government. A 30-year water-sharing agreement for the Ganges River was signed in December 1996, after an earlier bilateral water-sharing agreement for the Ganges River lapsed in 1988. Bangladesh remains extremely concerned about a proposed Indian river linking project, which the government says could turn large parts of Bangladesh into a desert The Bangladesh Government and tribal insurgents signed a peace accord in December 1997, which allowed for the return of tribal refugees who had fled into India, beginning in 1986, to escape violence caused by an insurgency in their homeland in the Chittagong Hill Tracts. The implementation of most parts of this agreement has stalled, and the army maintains a strong presence in the Hill Tracts. Arms smuggling and reported opium poppy cultivation are concerns in this area. Occasional skirmishes between Bangladeshi and Indian border forces sometimes escalate and seriously disrupt bilateral relations. Much to Bangladesh's displeasure, India has erected a barbed-wire fence on part of its border with Bangladesh to prevent alleged illegal migration of Bangladeshis into India.

The BNP and other political parties view the Indian Government as a major benefactor of the Awami League and blame negative international media coverage of Bangladesh on alleged Indian manipulation. Former Prime Minister Khaleda Zia, however, visited the Indian capital in March 2006 and reviewed bilateral relations with her Indian counterpart. Two agreements—the Revised Trade Agreement and the Agreement on Mutual Cooperation for Preventing Illicit Drug Trafficking in Narcotic Drugs and Psychotropic Substances and Related Matters—were signed between the two countries during this visit. Indian Foreign Minister Pranab Mukherjee met with the Chief Adviser in Dhaka on February 26, 2007. Mukherjee invited Ahmed to the April 3-4, 2007, SAARC summit in Delhi, and both sides pledged to put Bangladesh-India relations on "an irreversible higher trajectory." Mukherjee again visited Bangladesh after Cyclone Sidr hit the southwestern coastal districts on November 15, 2007 and offered help to rebuild 10 of the devastated villages. Bangladesh Army Chief General Moeen U. Ahmed paid a six-day visit to India beginning late February 2008 at the invitation of his Indian counterpart. He met with Mukherjee and the Chief Minister of West Bengal province, besides meeting military officials. During this visit, Ahmed announced that passenger trains could start running between Dhaka and Kolkata by April 14.

Pakistan. Bangladesh enjoys warm relations with Pakistan, despite the strained early days of their relationship. Landmarks in their reconciliation are:

- An August 1973 agreement between Bangladesh and Pakistan on the repatriation of numerous individuals, including 90,000 Pakistani prisoners of war stranded in Bangladesh as a result of the 1971 conflict;
- A February 1974 accord by Bangladesh and Pakistan on mutual recognition followed more than 2 years later by establishment of formal diplomatic relations;
- The organization by the UN High Commissioner for Refugees (UNHCR) of an airlift that moved

almost 250,000 Bengalis from Pakistan to Bangladesh, and non-Bengalis from Bangladesh to Pakistan; and

- Exchanges of high-level visits, including a visit by Prime Minister Benazir Bhutto to Bangladesh in 1989 and visits by Prime Minister Zia to Pakistan in 1992 and in 1995. President Pervez Musharraf visited Bangladesh in 2002. Prime Minister Shaukat Aziz visited Bangladesh in 2004.

Prime Minister Khaleda Zia visited Pakistan in 2006.

Still to be resolved are the division of assets from the pre-1971 period and the status of more than 250,000 non-Bengali Muslims (known as "Biharis") remaining in Bangladesh but seeking resettlement in Pakistan.

Burma. Bilateral ties with Burma are good, despite occasional border strains and an influx of more than 270,000 Muslim refugees (known as "Rohingya") from predominantly Buddhist Burma. As a result of bilateral discussions, and with the cooperation and assistance of the UNHCR, most of the Rohingya refugees have now returned to Burma. As of 2007, about 20,000 refugees remain in camps in southern Bangladesh. Thousands of other Burmese, not officially registered as refugees, are squatting on the bank of the river Naaf or living in Bangladeshi villages in the southeastern tip. Bangladesh and Burmese officials are negotiating a deal to establish direct road link between the capitals of the two countries.

Russia. The former Soviet Union supported India's actions during the 1971 Indo-Pakistan war and was among the first to recognize Bangladesh. The U.S.S.R. initially contributed considerable relief and rehabilitation aid to the new nation. After Sheikh Mujib was assassinated in 1975 and replaced by military regimes, however, Soviet-Bangladesh relations cooled.

In 1989, the U.S.S.R. ranked 14th among aid donors to Bangladesh. The Soviets focused on the development of electrical power, natural gas and oil, and maintained active cultural relations with Bangladesh. They financed the Ghorasal thermal power station—the largest in Bangladesh. Russia conducted an aggressive military sales effort in Dhaka and won a $124-million deal for eight MIG-29 fighters. Bangladesh began to open diplomatic relations with the newly independent Central Asian states in 1992.

China. China traditionally has been more important to Bangladesh than the former U.S.S.R., even though China supported Pakistan in 1971. As Bangladesh's relations with the Soviet Union and India cooled in the mid-1970s, and as Bangladesh and Pakistan became reconciled, China's relations with Bangladesh grew warmer. An exchange of diplomatic missions in February 1976 followed an accord on recognition in late 1975.

Since that time, relations have grown stronger, centering on trade, cultural activities, military and civilian aid, and exchanges of high-level visits, beginning in January 1977 with President Zia's trip to Beijing. The largest and most visible symbol of bilateral amity is the Bangladesh-China "Friendship Bridge," completed in 1989 near Dhaka, as well as extensive military hardware in the Bangladesh inventory and warm military relations between the two countries. In the 1990s, the Chinese also built two 210-megawatt power plants outside of Chittagong; mechanical faults in the plants cause them to shut down frequently for days at a time, heightening the country's power shortage. In April 2005, Bangladesh and China signed nine memoranda of understanding on trade and other issues during the visit to Dhaka of Prime Minister Wen. The opening of a Taiwanese trade center in Dhaka in 2004 displeased China, but the Bangladesh government moved quickly to repair the crack and closed the trade center. In August 2005 former Prime Minister Khaleda Zia visited China.

Other countries in South Asia. Bangladesh maintains friendly relations with Bhutan, Maldives, Nepal, and Sri Lanka and strongly opposed the Soviet invasion of Afghanistan. Bangladesh has cordial relations with the government of Afghan President Hamid Karzai, and Bangladeshi non-governmental organizations (NGOs) are active in Afghan reconstruction efforts. Bangladesh and Nepal recently agreed to facilitate land transit between the two countries. Bangladesh is considering importing electricity from Nepal and Bhutan through India to meet its energy shortfall.

U.S.-BANGLADESH RELATIONS

Although the U.S. relationship with Bangladesh was initially troubled because of strong U.S. ties with Pakistan, U.S.-Bangladesh friendship and support developed quickly following Bangladesh's independence from Pakistan in 1971.

U.S.-Bangladesh relations are excellent. These relations were boosted in March 2000 when President Clinton visited Bangladesh, the first-ever visit by a sitting U.S. President, when Secretary of State Colin Powell visited in June 2003, as well as when Secretary of Defense Donald Rumsfeld visited in June 2004. A centerpiece of the bilateral relationship is a large U.S. aid program, which will total about $110 million in fiscal year 2008. U.S. economic and food aid programs, which began as emergency relief following the 1971 war for independence, now concentrate on long-term development. U.S. assistance objectives include stabilizing population growth, protecting human health, encouraging broad-based economic growth, and building democracy. In total, the United States has provided more than $4.3 billion in food and development assistance to Bangladesh. Food aid under Titles I, II, and III of PL-480 (congressional "food-for-peace" legislation) has been designed to help Bangladesh meet minimum food requirements, promote food production, and moderate fluctuation in consumer prices. Other U.S. development assistance emphasizes family planning and health,

agricultural development, and rural employment. The United States works with other donors and the Bangladesh Government to avoid duplication and ensure that resources are used to maximum benefit.

Since 1986, with the exception of 1988-89, when an aircraft purchase made the trade balance even, the U.S. trade balance with Bangladesh has been negative, due largely to growing imports of ready-made garments. Jute carpet backing is the other major U.S. import from Bangladesh. Total imports from Bangladesh were about $2.6 billion (excluding services) in FY 2005, up from $2.1 billion in 2002. In 2007 total imports reached $3.4 billion. U.S. exports to Bangladesh (some $333 million—excluding services—in 2005, and $456 million in 2007) include wheat, fertilizer, cotton, communications equipment, aircraft, and medical supplies, a portion of which is financed by the U.S. Agency for International Development (USAID). A bilateral investment treaty was signed in 1989.

Another trade related issue between the two countries involves the export processing zones (EPZs). The government provides several tax, foreign exchange, customs and labor incentives to investors in the EPZs. One such incentive provided in recent years was an exemption from certain labor laws, which had the practical effect of prohibiting trade unions from the zones. The U.S. Generalized System of Preferences (GSP) law requires the beneficiary country to satisfy certain conditions relating to labor rights. On July 13, 2004, the government passed a bill allowing limited trade unionism in the EPZs effective November 1, 2006. Implementation of the law has been slow, however, and a U.S. labor organization has filed a petition with the U.S. Government to suspend Bangladesh's GSP privileges in the absence of progress on labor rights issues.

Relations between Bangladesh and the United States were further strengthened by the participation of Bangladesh troops in the 1991 Gulf war coalition, and alongside U.S. forces in numerous UN peacekeeping operations, including Haiti in 1994, as well as by the assistance of a U.S. naval task force after a disastrous March 1991 cyclone in Bangladesh. The relief efforts of U.S. troops are credited with having saved as many as 200,000 lives. In response to Bangladesh's worst flooding of the century in 1998, the United States donated 700,000 metric tons of food grains, helping to mitigate shortages. In July 2006, the U.S. Navy's hospital ship Mercy visited Bangladesh and U.S. personnel worked with Bangladeshi medical personnel to provide medical treatment to Bangladeshi patients. Between 2005 and 2008, the United States obligated $2.2 million in grant aid funding (Foreign Military Financing) to purchase Defender class small boats for the Coast Guard of Bangladesh, and allocated $934,000 in IMET (International Military Education and Training) for 2007.

In addition to heavy flooding at the end of summer 2007, Cyclone Sidr hit the country on November 15, causing widespread devastation and affecting the lives of millions of people. Following the cyclone, U.S. troops and two U.S. naval vessels assisted in the delivery of relief supplies to cyclone victims, and USAID provided approximately $19.5 million in food and relief items. High levels of assistance continue to be provided to Bangladesh by the United States, through USAID in particular, which will provide an estimated $110 million in aid in fiscal year 2008.

Additionally, Bangladesh has become a valuable United States ally in the Global War on Terror. As part of the war effort, the Government of Bangladesh has begun to address problems of money laundering and weak border controls to ensure that Bangladesh does not become a terrorist safe-haven.

TRAVEL

Consular Information Sheet

June 17, 2008

Country Description: Bangladesh is a democratic republic with a parliamentary form of government. On January 11, 2007, President Iajuddin Ahmed declared a state of emergency. On May 12, 2008, the Chief Adviser announced that national parliamentary elections would be held in the third week of December, 2008. Bangladesh remains a developing country with poor infrastructure. Tourist facilities outside major cities and tourist areas are minimal.

Entry Requirements: A passport, visa and onward/return ticket are required. All travelers to Bangladesh, including American citizens, must have a valid visa in their valid passport prior to arrival. Although airport visas (landing permits) are available upon arrival by air, the U.S. Embassy

in Dhaka does not recommend this option for most categories of travelers as working hours may not coincide with flight arrival times and precise formalities can vary. Additionally, if issued, landing permit validity is usually limited to a maximum of fifteen days. A valid visa in an expired or cancelled U.S. passport is not acceptable to the Bangladeshi authorities; if you are issued a new U.S. passport, you will need a new visa.

If you intend to use Dhaka as a hub from which to visit other countries in the region, ensure that you obtain a multiple-entry visa before arrival. If you intend to work for a non-governmental organization (NGO) in Bangladesh, you should ensure that your sponsor has provided you with up-to-date advice on the kind of visa you must obtain before arrival. It is difficult and time-consuming to change your immigration status once you have arrived in Bangladesh.

Visas to Bangladesh which are expiring may be extended at the Directorate of Immigration and Passport, located at Sher-e-Bangla Nagar, Agargaon, Dhaka. The phone numbers are (880-2) 913-1891 and 913-4011.

New visa rules, introduced in October 2006, require foreign nationals who come to Bangladesh to work or for long-term visits to have the appropriate work permits and clearances on arrival. There are increased financial penalties for overstaying visas. Additionally, those who overstay for more than 90 days face the possibility of being charged with violating the Foreigners Act of 1946. For further information on these rules, please check with the nearest Bangladeshi Embassy or Consulate (U.S. addresses listed below) before traveling, or visit the Bangladeshi Immigration Police web site at www.immi.gov.bd, which provides further details on rules relating to foreigner registrations.

There are two exit requirements:

- When traveling by air, there is a departure tax on all foreigners except children under the age of two. This tax is often included when air tickets are purchased. Otherwise, it is collected at the airport at the time of departure. The amount of the departure tax varies, depending on the destination (e.g., the departure tax for the U.S. is the most expensive, at USD $43). There is no travel tax for transit passengers transiting Bangladesh without a visa and in country for 72 hours or fewer. These requirements may be subject to change, and travelers are advised to check with the Embassy of Bangladesh before traveling.

- Departing foreign nationals are also required to comply with the income tax ordinance of 1984 and submit an income tax clearance certificate/income tax exemption certificate to local airline offices upon departure from Bangladesh. More information can be obtained from the Bangladesh Board of Revenue web site at http://www.nbr-bd.org.

For further information on entry requirements and possible exceptions to the exit requirements, please contact the Embassy of the People's Republic of Bangladesh, 3510 International Drive NW, Washington, DC 20008, telephone 202-244-0183, fax 202-244-5366, web site http://www.bangladoot.org, or the Bangladeshi Consulates in New York at 211 E. 43rd Street, Suite 502, New York, NY 10017, telephone 212-599-6767 or Los Angeles at 10850 Wilshire Boulevard, Suite 1250, Los Angeles, CA 90024, telephone 310-441-9399. Visit the Embassy of Bangladesh web site at http://www.bangladoot.org for the most current visa information.

Safety and Security: Bangladesh is currently under a state of emergency. As of May, 2008, national parliamentary elections have been scheduled for the third week of December, 2008. The security situation in Bangladesh is fluid, and Americans are urged to check with the U.S. Embassy for the latest information. Spontaneous demonstrations take place in Bangladesh from time to time. American citizens are reminded that even demonstrations intended to be peaceful can turn confrontational and escalate into violence quickly and unexpectedly. American citizens are therefore urged to avoid the areas of demonstrations if possible, and to exercise caution if within the vicinity of any demonstrations. American citizens should stay up-to-date with media coverage of local events and be aware of their surroundings at all times. Information regarding demonstrations in Bangladesh can be found on the U.S. Embassy Dhaka's web site at http://dhaka.usembassy.gov.

A terrorist bombing campaign in the second half of 2005, political violence throughout the country at the end of 2006, and threats to U.S. and Western interests led to increased security around U.S. Government facilities. On August 17, 2005, a banned Islamist terrorist group, Jamaatul Mujahideen Bangladesh (JMB), claimed responsibility for nearly 500 coordinated small bomb blasts in virtually every part of Bangladesh that killed two persons and injured several dozen. The most recent JMB bombing occurred on December 8, 2005, and the Bangladeshi government subsequently apprehended the known senior leadership of JMB. Six JMB leaders convicted of complicity in JMB attacks were executed on March 29, 2007. JMB and other extremist groups are small in number but remain active and may resume violent activities.

Demonstrations, political activity, and hartals (nationwide strikes) were initially banned during the state of emergency, but the rules restricting political activity have been slightly relaxed as part of the process leading up to the planned elections in the third week of December 2008. Prior to the state of emergency, rallies, marches, demonstrations and hartals took place frequently. In August 2007, violent protests involving thousands of demonstrators occurred in several cities in Bangladesh, including Dhaka. Authorities imposed a curfew to restore calm.

Protests involving workers from the large garment-manufacturing industry are not uncommon. Visitors to Bangladesh should check with the Consular Section of the U.S. Embassy in Dhaka for updated information on the current political situation.

U.S. citizens are advised against traveling to the Khagrachari, Rangamati and Bandarban Hill Tracts districts (collectively known as the Chittagong Hill Tracts) due to kidnappings and other security incidents, including those involving foreign nationals. Foreigners traveling in the Chittagong Hill Tracts are required to register with local authorities. Additionally, the U.S. Embassy has in the past received reports of incidents of kidnapping, arms and narcotics smuggling and clashes between local Bangladeshis and Rohingyan refugees in areas near Rohingyan refugee camps in the Teknaf, Kutupalong, Ukhia, and Ramu areas of the Cox's Bazar district. The U.S. Embassy also recommends against travel to these areas. Individuals who choose to visit these districts are urged to exercise extreme caution.

For the latest security information, Americans traveling abroad should regularly monitor the Department of State, Bureau of Consular Affairs web site at http://travel.state.gov where the current Travel Warnings and Travel Alerts, including the Worldwide Caution Travel Alert, can be found. Americans traveling to or living in Bangladesh who are registered at the U.S. Embassy will receive updated security information about Bangladesh via e-mail. All Demonstration Notices and Warden Messages are posted on the Embassy's web site at http://dhaka.usembassy.gov. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S. and Canada, or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: Urban crime can be organized or opportunistic, conducted by individuals or groups, and commonly encompasses fraud, theft (larceny, pick-pocketing, snatch-and-grab), robbery (armed and unarmed), carjacking, rape, assault, and burglary (home and auto). Incidents of crime and levels of violence are higher in low-income residential and congested commercial areas, but are on the rise in wealthier areas as well. Visitors should avoid walking alone after dark, carrying large sums of money, or wearing expensive jewelry. Valuables should be stored in hotel safety deposit boxes and should not be left unattended in hotel rooms. Police are generally responsive to reports of crimes against Americans. Crimes, however, often go unsolved.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime are solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

The local equivalent to the "911" emergency line in Bangladesh is 999. This connects you to the Dhaka Metro Police Exchange. There is no guarantee that English will be spoken or understood at the Dhaka Metro Police Exchange. The Police Exchange can only transfer calls to the appropriate police station within the Dhaka metropolitan area, and then the caller will have to speak with that police station in order to actually have any police services performed. There is similarly no guarantee that English will be spoken or understood at the local police station.

Outside of Dhaka, the caller will need to add the city code for Dhaka, so dial 02-999. The caller will again be connected to the Dhaka Metro Police Exchange, which should be able to provide the number of the appropriate police station within Bangladesh, but the Dhaka Metro Police Exchange is unlikely to be able to transfer the call to a police station outside Dhaka. The caller would have to hang up and dial the number provided by the Dhaka Metro Police Exchange. The ability to speak and/or understand English is even more unlikely at local police stations outside of Dhaka.

Medical Facilities and Health Information: Medical facilities in Bangladesh do not approach U.S. standards, even in tourist areas. There is limited functioning ambulance service in Bangladesh. Several hospitals in Dhaka (e.g., Apollo Hospital and Square Hospital) have emergency rooms that are equipped at the level of a community hospital. Hospitals in the provinces are less well equipped and supplied. There have been reports of counterfeit medications within the country, but medication from major pharmacies and hospitals is generally reliable. Medical evacuations to Bangkok or Singapore are often necessary for serious conditions or invasive procedures.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's internet site at http://wwwn.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith/en.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road condi-

tions that differ significantly from those in the United States. The information below concerning Bangladesh is provided for general reference only, and may not be totally accurate in a particular location or circumstance. The Bangladeshi road network is in poor condition and poorly maintained. The streets of Dhaka are extremely congested; bicycle rickshaws compete with three-wheeled mini-taxis (CNGs), cars, overloaded buses, and trucks on limited road space. Also, driving on the left-hand side of the road may be confusing to American visitors. Inter-city roads are narrow. Driving at night is especially dangerous. Streetlights are rare even in cities. Road accidents are common in Bangladesh. Fatal head-on collisions on inter-city roads are common. When vehicle accidents occur, a crowd quickly gathers and violence can occur when the crowd becomes unruly. Travelers are strongly urged not to use public transportation, including buses, rickshaws, and three-wheeled baby taxis due to their high accident rate and crime issues. An alternative to consider is a rental car and driver.

Aviation Safety Oversight: The U.S. Federal Aviation Administration (FAA) has assessed the Government of Bangladesh's Civil Aviation Authority as not being in compliance with International Civil Aviation Organization (ICAO) aviation safety standards for the oversight of Bangladesh's air carrier operations. For more information, travelers may visit the FAA's web site at http://www.faa.gov.

Special Circumstances: Bangladesh is a country crisscrossed with rivers, and thus uses a wide network of water-based public transportation. Ferries and other boats compete with the railroads as a major means of public transport. Typically overloaded and top-heavy, ferries do capsize, particularly during the monsoon season from May to October or during unexpected thunderstorms or windstorms. Every year there are dozens of fatalities resulting from ferry accidents. Bangladeshi customs authorities may enforce strict regulations concerning temporary importation into or export from Bangladesh of items such as currency, household appliances, alcohol, cigarettes and weapons. There is no restriction as to the amount of U.S. currency visitors may bring into Bangladesh; however, they must declare to customs authorities if they are carrying more than USD $5,000 at the time of arrival. It is advisable to contact the Bangladeshi Embassy or Consulates for specific information regarding customs requirements.

Land disputes are extremely common in Bangladesh and are extremely difficult to resolve through legal channels. Court cases can last for months, and sometimes years, without there ever being a final and accurate determination of which party has legitimate claim to the title.

The U.S. Embassy currently has on file nearly twenty cases of American citizens who claim to be victimized in land-grabbing disputes. Rarely are these simple cases of a legitimate property owner and an opportunistic land-grabber. More often, it is a case of disagreement between an owner who believes he has historical ownership of the property and a new owner who has just purchased the same property. One of them has been swindled, both of them have deeds, and it is next to impossible to determine whose deed is valid.

The dangers in becoming involved in a property dispute range from being threatened by bullies to being involved in a lengthy court dispute. Those involved in a court dispute run the risk of having cases filed against them, and may be arrested and jailed, sometimes for months.

American Citizens wishing to purchase property in Bangladesh should be thoroughly aware of the risks they take and should only purchase property from a seller whose ownership is beyond doubt. Additionally, they should recognize the risks associated if they are not physically present to oversee their property. American Citizens should bear in mind that the U.S. Embassy cannot protect personal property in the absence of owners and cannot take sides in a legal dispute. A marriage must be entered into with the full and free consent of both individuals. The parties involved should feel that they have a choice. If an American citizen is being forced into a marriage against his/her will, help and advice are available. For more information, please contact the American Citizens Services unit directly at DhakaACS@state.gov, or 011-88-02-885-5500 from the United States, 02-885-5500 from inside Bangladesh, or 885-5500 from anywhere in the city of Dhaka. All travelers to Bangladesh should retain their passports and their return plane tickets to ensure independence to travel.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating Bangladeshi laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Bangladesh are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in Bangladesh are encouraged to register with the U.S. Embassy through the State Department's travel registration website and to obtain updated information on travel and security within Bangladesh. Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate. By registering, American citizens make it easier for the Embassy or Consulate to con-

tact them in case of emergency. The U.S. Embassy is located approximately four miles south of Zia International Airport, and five miles north of downtown in the Diplomatic Enclave, Madani Avenue, Baridhara, Dhaka, telephone (88-02) 885-5500, fax number (88-02) 882-3744. The workweek is Sunday through Thursday. The Consular Section is open for American Citizens Services Sunday through Thursday from 1:00 p.m. to 4:00 p.m. For emergency services and general information during business hours, please call (88-02) 882-3805. For emergency services after hours, please call (88-02) 885-5500 and ask for the duty officer. The Embassy's Internet home page is http://dhaka.usembassy.gov.

Intercountry Adoption

November 2006

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is based on public sources and current understanding. Questions involving foreign and U.S. immigration laws and legal interpretation should be addressed respectively to qualified foreign or U.S. legal counsel.

Please Note: Bangladeshi law does not allow for full adoptions of Bangladeshi children. Americans considering adoption of Bangladeshi children must obtain guardianship from a Bangladeshi court and subsequently adopt the child in the United States. Prospective American guardians may also want to see our Shari'a Adoption Flyer on Guardianship in Muslim Countries.

In addition, only citizens of Bangladesh may be appointed/declared guardians of a Bangladeshi child. Since Bangladesh allows for dual citizenship, however, American citizens who are also Bangladeshi citizens may be appointed guardians of Bangladeshi children.

Patterns of Immigration: Please review current reports online at http://adoption.state.gov.

Guardianship Authority: The relevant Family Court is the sole authority to award guardianship and issue guardianship certificate. The Ministry of Home Affair issues No Objection Certificate to issue a Bangladesh passport and Immigration and Passport office issues a passport. There is no public contact information for Family Court. Family Court is located in all district of Bangladesh and if it is required by an applicant to contact, he/she may contact the concerned Desk Officer or dealing section of the Family Court in person.

Eligibility Requirements: Prospective guardians must be at least 18 years old being of sound mind and capable of maintaining through provision of food, shelter and education and provide proof of Bangladeshi citizenship. The Court has the duty to look at the character and capacity of the proposed guardian in considering the welfare of the minor. The proposed ward must be a minor (below the age of 18 years).

Residency Requirements: There are no residency requirements. However, as noted above, prospective guardians must be citizens of Bangladesh.

Time Frame: There are no set time frame and fee for legal guardianship in Bangladesh. The following, however, are rough estimates of the processing times for specific stages of the process. Processing time at orphanage is about 3 days to 1 month. Processing time at Family Court is about 1-3 months. Processing time at Ministry of Home Affairs: 15 days to 2 months.

Adoption Agencies and Attorneys: There are no adoption agencies in Bangladesh. There are at least 25,000 lawyers in Bangladesh who may initiate guardianship proceedings. Prospective guardians who choose to work with U.S. adoption service providers in the context of obtaining guardianship of Bangladeshi children are advised to fully research any adoption agency or facilitator they plan to use.

Guardianship Fees: There is a Government court fee of Tk.60. Lawyer's fee: No set fee but ranging from Tk.5000 to Tk.50,000 = roughly $85 to $850. There is no official fee at the orphanage. But many request/accept donations. There is no fee at Ministry of Home Affairs.

Requirements for Obtaining Legal Guardianship:

- Biological parent must sign an irrevocable release of the child before a Notary Public, 1st Class Magistrate or the relevant Family Court in Bangladesh.
- An application for legal guardianship must be made to the Family Court. In Bangladesh, the Family Court has sole jurisdiction over family matters.
- A No Objection Certificate must be obtained from the Home Ministry for issuance of International Passport in the name of the minor.
- The No Objection and Legal Guardianship' certificates should be presented to the Bangladesh Passport Office for the child's passport. Prospective guardians' names should be listed as the legal guardians in the child's passport.

Required Documents:

- Birth Certificate of the minor.
- Guardianship Certificate.
- Irrevocable release/undertaking of the biological parents (if any) of the child before a Notary Public, 1st Class Magistrate or before the relevant Family Court in Bangladesh.
- No Objection certificate from the Ministry of Home Affairs.

The Bangladeshi procedure for authenticating documents to be used in Bangladesh is as follows:

- Any foreign document should be attested by the Bangladeshi Mission abroad and then re-attested by the Foreign Ministry in Bangladesh. If the document is of a legal nature, then it should revalidated by the relevant treasury in Bangladesh.

- Any Bangladeshi (local) document can be treated as authenticated if it is attested by any First Class Government officer, any Magistrate or any Notary Public in Bangladesh.

Embassy of the People's Republic of Bangladesh, Washington D.C.

Additional Information: Specific questions about guardianship in Bangladesh may be addressed to the U.S. Embassy in Dhaka, Bangladesh, via e-mail at: DhakaAdoptions @state.gov. General questions regarding intercountry adoption may be addressed to the Office of Children's Issues, U.S. Department of State, CA/OCS/CI, SA-29, 4th Floor, 2201 C Street, NW, Washington, D.C. 20520-4818, toll-free Tel: 1-888-407-4747.

BARBADOS

Compiled from the October 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Barbados

PROFILE

Geography

Area: 431 sq. km. (166 sq. mi.); about three times the size of Washington, DC.
Cities: Capital—Bridgetown.
Terrain: Generally flat, hilly in the interior.
Climate: Tropical.

People

Nationality: Noun and adjective—Barbadian(s); informally "Bajan(s)."
Population: (2006 estimate) 279,912.
Annual population growth rate: (2005) 0.3%.
Ethnic groups: Predominantly of African descent 90%, White 4%, Asian or mixed 6%.
Religions: Protestant 67% (Anglican 40%, Pentecostal 8%, Methodist 7%, other 12%), Roman Catholic 4%, none 17%, other 12%.
Languages: English.
Education: (2005) Adult literacy—99.7%.
Health: (2005) Infant mortality rate—11.0/1,000. Life expectancy—men 70.8 years; women 74.8 years.
Work force: (2006) 142,000 (tourism, government, manufacturing, construction, mining, agriculture, fishing).
Unemployment: (2006) 7.6%.

Government

Type: Parliamentary democracy; independent sovereign state within the Commonwealth.
Independence: November 30, 1966.
Constitution: 1966.
Government branches: Executive—governor general (representing Queen Elizabeth II, head of state), prime minister (head of government), cabinet. Legislative—bicameral Parliament. Judicial—magistrate's courts, Supreme Court (High Court and Court of Appeals), Caribbean Court of Justice in Trinidad and Tobago.
Political subdivisions: Eleven parishes and the city of Bridgetown.
Political parties: Barbados Labour Party (BLP, incumbent), Democratic Labour Party (DLP), People's Empowerment Party (PEP).
Suffrage: Universal at 18.

Economy

GDP: (2006) $2.976 billion.
GDP growth rate: (2006) 3.8%.
Per capita GDP: (2006 est.) $17,300.
Inflation: (2006) 7.6%.
Natural resources: Petroleum, fish, quarrying, natural gas.
Agriculture: Sugar accounts for less than 1% of GDP and 80% of arable land.
Manufacturing and construction: Food, beverages, infrastructure, electronic components, textiles, paper, chemicals.
Services: Tourism, banking and other financial services, and data processing.
Trade: (2005) Exports—$359 million (merchandise) and $1.41 billion (commercial services). Major markets—United States (13.4%), European Union (12.4%), Trinidad and Tobago (10.8%), St. Lucia (6.1%), and Jamaica (5%). Imports—$1.6 billion (merchandise) and $636 million (commercial services). Major suppliers—United States (35.9%), Trinidad and Tobago (21.2%), European Union (13.3%), Japan (7.6%), and Canada (3.4%).
Exchange rate: BDS$2 = U.S. $1.

PEOPLE

About 90% of Barbados' population is of African descent, 4% European descent, and 6% Asian or mixed. About 40% of Barbadians are Anglican, and the rest mostly Roman Catholic, Methodist, Baptist, and Moravian. There also are small Jewish and Muslim communities. Barbados' population growth rate has been very low, less than 1% since the 1960s, largely due to family planning efforts and a high emigration rate.

HISTORY

British sailors who landed on Barbados in the 1620s at the site of present-day Holetown on the Caribbean coast found the island uninhabited. As elsewhere in the eastern Caribbean, Arawak Indians may have been annihilated by invading Caribs, who are believed to have subsequently abandoned the island.

From the arrival of the first British settlers in 1627-28 until independence in 1966, Barbados was a self-funding colony under uninterrupted British rule. Nevertheless, Barbados always enjoyed a large measure of local autonomy. Its House of Assembly, which began meeting in 1639, is the third-oldest legislative body in the Western Hemisphere, preceded only by Bermuda's legislature and the Virginia House of Burgesses.

As the sugar industry developed into the main commercial enterprise, Barbados was divided into large plantation estates, which replaced the small holdings of the early British settlers. Some of the displaced farmers relocated to British colonies in North America. To work the plantations, slaves were brought from Africa; the slave trade ceased a few years before the abolition of slavery throughout the British empire in 1834.

Plantation owners and merchants of British descent dominated local politics. It was not until the 1930s that the descendants of emancipated slaves began a movement for political rights. One of the leaders of this movement, Sir Grantley Adams, founded the Barbados Labour Party in 1938. Progress toward more democratic government for Barbados was made in 1951, when the first general election under universal adult suffrage occurred. This was followed by steps toward increased self-government, and in 1961, Barbados achieved the status of self-governing autonomy.

From 1958 to 1962, Barbados was one of 10 members of the West Indies Federation, and Sir Grantley Adams served as its first and only prime minister. When the federation was terminated, Barbados reverted to its former status as a self-governing colony. Following several attempts to form another federation composed of Barbados and the Leeward and Windward Islands, Barbados negotiated its own independence at a constitutional conference with the United Kingdom in June 1966. After years of peaceful and democratic progress, Barbados became an independent state within the British Commonwealth on November 30, 1966.

GOVERNMENT AND POLITICAL CONDITIONS

Under its constitution, Barbados is a parliamentary democracy modeled on the British system. The governor general represents the monarch. Control of the government rests with the cabinet, headed by the prime minister and responsible to the Parliament.

The bicameral Parliament consists of the House of Assembly and Senate. The 30 members of the House are elected by universal suffrage to 5-year terms. Elections may be called at any time the government wishes to seek a new mandate or if the government suffers a vote of no-confidence in Parliament. The Senate's 21 members are appointed by the governor general—12 with the advice of the prime minister, two with the advice of the leader of the opposition, and seven at the governor general's discretion to represent segments of the community.

Barbados has an independent judiciary composed of magistrate courts, which are statutorily authorized, and a Supreme Court, which is constitutionally mandated. The Supreme Court consists of the high court and the court of appeals, each with four judges. The Chief Justice serves on both the high court and the court of appeals. The court of last resort is the Caribbean Court of Justice. The island is divided into 11 parishes and the city of Bridgetown for administrative purposes. There is no local government. The two main political parties—the Barbados Labour Party (BLP), the Democratic Labour Party (DLP)—are both moderate and have no major ideological differences; electoral contests and political disputes often have personal overtones. The major political problems facing Barbados today are in promoting economic growth: creating jobs, encouraging agricultural diversification, attracting foreign investment, and promoting tourism.

In January 15, 2008 parliamentary elections, voters gave a majority to the DLP, led by David Thompson. This election ended 14 years of rule by the BLP. New Prime Minister Thompson has pledged to focus on domestic issues, particularly the cost of living, healthcare, and crime.

Principal Government Officials

Last Updated: 11/12/08

Governor Gen.: **Clifford HUSBANDS, Sir**
Prime Min.: **David THOMPSON**
Min. of Agriculture & Rural Development: **Haynesley BENN**
Min. of Community Development & Culture: **Steve BLACKETT**
Min. of Defense & Security:
Min. of Education & Human Resource Development: **Ronald JONES**
Min. of Family, Youth Affairs, Sports, & the Environment: **Esther BYER-SUKOO, Dr.**
Min. of Finance, Economic Affairs & Development, & Energy: **David THOMPSON**
Min. of Foreign Affairs, Foreign Trade, & International Business: **Christopher SINCKLER**
Min. of Health, National Insurance, & Social Security: **David ESTWICK, Dr.**
Min. of Home Affairs: **Freundel STUART**
Min. of Housing & Lands: **Michael LASHLEY**
Min. of Information:
Min. of Labor & the Civil Service: **David THOMPSON**
Min. of Social Care, Constituency Empowerment, & Urban Development: **Denis LOWE, Dr.**
Min. of Tourism: **Richard SEALY**
Min. of Trade, Industry, & Commerce: **George HUTSON**
Min. of Transport, Works, & International Transport: **John BOYCE**

Min. in the Prime Min.'s Office & Leader of Gov't. Business: **Maxine MCCLEAN, Rev.**
Min. of State for Foreign Affairs, Foreign Trade, & Intl. Business: **Donville INNISS**
Min. of State in the Min. of Social Care, Constituency Empowerment, & Urban Development: **Patrick TODD**
Min. of State in the Prime Min.'s Office (Employment, Labor Relations, & the Social Partnership): **Arni WALTERS**
Min. of State in the Prime Min.'s Office (Finance & Energy): **Darcy BOYCE**
Attorney Gen.: **Freundel STUART**
Governor, Central Bank: **Marion WILLIAMS**
Ambassador to the US: **Michael KING**
Permanent Representative to the UN, New York: **Christopher HACKETT**

Barbados maintains an embassy in the United States at 2144 Wyoming Avenue, NW, Washington, D.C. 20008 (tel. 202-939-9200), a consulate general in New York City at 800 2nd Avenue, 18th Floor, New York, NY 10017 (tel. 212-867-8435), and a consulate general in Miami at 150 Alhambra Circle, Suite 1270, Coral Gables, FL 33134 (tel. 305-442-1994).

ECONOMY

Since independence, Barbados has transformed itself from a low-income economy dependent upon sugar production into an upper-middle-income economy based on tourism. Barbados is now one of the most prosperous countries in the western hemisphere outside of the United States and Canada. The economy went into a deep recession in 1990 after 3 years of steady decline brought on by fundamental macroeconomic imbalances. After a painful readjustment process, the economy began to grow again in 1993. Growth rates averaged between 3%-5% since then until 2001, when the economy contracted 2.8% in the wake of the September 11 terrorist attacks and the global drop-off in tourism. Growth picked up again in 2004 and 2005, and the economy grew by 3.8% in 2006.

Tourism drives the economy in Barbados, but offshore banking and financial services have become an increasingly important source of foreign exchange and economic growth. The sugar industry, once dominant, now makes up less than 1% of GDP and employs only around 500 people. The labor force totaled 142,000 persons at the end of 2006. The average rate of unemployment during the last quarter of 2006 was estimated at 7.6%.

The current account deficit expanded to 12.5% of GDP, and government debt rose above 80% of GDP in 2006. Barbados hosted the final matches of the Cricket World Cup in 2007, and much of the country's investment during 2006 and the beginning of 2007 was directed toward accommodating the expected influx of visitors. As a result of these preparations, growth was registered in all sectors, especially transportation, communications, construction, and utilities. The government and private sector are both working to prepare the country for the Caribbean Community

(CARICOM) Single Market and Economy (CSME)—a European Union-style single market.

FOREIGN RELATIONS

As a small nation, the primary thrust of Barbados' diplomatic activity has been within international organizations. The island is a member of the Commonwealth and participates in its activities. Barbados was admitted to the United Nations in December 1966. Barbados joined the Organization of American States (OAS) in 1967.

On July 4, 1973, Barbados, Trinidad and Tobago, Guyana, and Jamaica signed a treaty in Trinidad to found the Caribbean Community and Common Market (CARICOM). In May 1974, most of the remaining English-speaking Caribbean states joined CARICOM, which now has 15 members. Barbados also is a member of the Caribbean Development Bank (CDB), established in 1970, with headquarters in Bridgetown. The Eastern Caribbean's Regional Security System (RSS), which associates Barbados with six other island nations, also is headquartered in Barbados. In July 1994, Barbados joined the newly established Association of Caribbean States (ACS).

Barbados has diplomatic missions headed by resident ambassadors or high commissioners in Canada, the United Kingdom, the United States, and Venezuela, and at the European Union (Brussels) and the UN. It also has resident consuls general in Toronto, Miami, and New York City. Brazil, Canada, China, Cuba, the United Kingdom, the United States, and Venezuela have ambassadors or high commissioners resident in Barbados.

U.S.-BARBADIAN RELATIONS

In 1751, George Washington visited Barbados as a young man, making what is believed to have been his only trip abroad. The U.S. Government has been represented on Barbados since 1823. From 1956 to 1978, the United States operated a naval facility in Barbados.

The United States and Barbados have had friendly bilateral relations since Barbados' independence in 1966. The United States has supported the government's efforts to expand the country's economic base and to provide a higher standard of living for its citizens. Barbados is a beneficiary of the U.S. Caribbean Basin Initiative. U.S. assistance is channeled primarily through multilateral agencies such as the Inter-American Development Bank and the World Bank, as well as the U.S. Agency for International Development (USAID) office in Bridgetown. In May 1997, Prime Minister Owen Arthur hosted President Clinton and 14 other Caribbean leaders during the first-ever U.S.-regional summit in Bridgetown, Barbados.

The summit strengthened the basis for regional cooperation on justice and counter narcotics issues, finance and development, and trade. Barbados receives counternarcotics assistance and is eligible to benefit from the U.S. military's exercise-related and humanitarian assistance construction program.

Barbados and U.S. authorities cooperate closely in the fight against narcotics trafficking and other forms of transnational crime. In 1996, the United States and Barbados signed a mutual legal assistance treaty (MLAT) and an updated extradition treaty covering all common offenses, including conspiracy and organized crime.

A maritime law enforcement agreement was signed in 1997. A popular tourist destination, Barbados had around 570,000 tourists in 2006, mainly cruise ship visitors. The majority of tourists are from the U.K., Germany, the Caribbean, and the United States. An estimated 3,000 Americans reside in the country.

TRAVEL

Consular Information Sheet

April 2, 2008

Country Description: Barbados is an independent Caribbean island nation with a developed economy. The capital is Bridgetown. Facilities for tourism are widely available. The U.S. Embassy in Barbados has consular responsibility over Antigua and Barbuda, Dominica, St. Kitts and Nevis, St. Lucia, St. Vincent and the Grenadines, as well as the British dependent territories of Anguilla, British Virgin Islands and Montserrat, and the French islands of Martinique, Guadeloupe, St. Barthelemy and St. Martin.

Entry Requirements: All Americans traveling by air outside the United States are required to present a passport or other valid travel document to enter or re-enter the United States. This requirement will be extended to sea travel (except closed loop cruises), including ferry service, by the summer of 2009. Until then, U.S. citizens traveling by sea must have government-issued photo identification and a document showing their U.S. citizenship (for example, a birth certificate or certificate of nationalization), or other WHTI compliant document such as a passport card for entry or re-entry to the U.S. Sea travelers should also check with their cruise line and countries of destination for any foreign entry requirements.

Applications for the new U.S. Passport Card are now being accepted. Based on current projections, we expect the passport card to be in full production beginning in July 2008. The card may not be used to travel by air and is available only to U.S. citizens. Further information on the Passport Card is available at http://travel.state.gov/passport/ppt_card/ppt_card_3926.html and upcoming changes to U.S. passport policy can be found on the Bureau of Consular Affairs web site at http://travel.state.gov/travel/cbpmc/cbpmc_2223.html. We strongly encourage all American citizen travelers to apply for a U.S. passport well in advance of anticipated travel. American citizens can visit travel.state.gov or call 1-877-4USA-PPT (1-877-487-2778) for information on how to apply for their passports.

No visa is needed to enter Barbados for stays up to 28 days. There is a departure tax for travelers over the age of twelve. For further information, travelers may contact the Embassy of Barbados, 2144 Wyoming Avenue NW, Washington, DC 20008, telephone (202) 939-9200, fax (202) 332-7467, e-mail: barbados@oas.org; or the consulates of Barbados in Los Angeles, Miami or New York.

Safety and Security: For the latest security information, Americans traveling abroad should regularly monitor the Department's Internet web site where the current Worldwide Caution Travel Alert, Travel Warnings and Travel Alerts can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S. and Canada, or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: Crime in Barbados is characterized by petty theft and street crime. Incidents of violent crime, including rape, occur. Visitors should be especially vigilant on the beaches at night. Visitors should try to secure valuables in a hotel safe and take care to always lock and secure hotel room doors and windows.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, to contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

Medical Facilities and Health Information: The main medical facility in Barbados is Queen Elizabeth Hospital, http://www.qeh.gov.bb. Medical care is generally good, but medical transport can take hours to respond and ambulance attendants are prohibited from applying lifesaving techniques during transport. Minor problems requiring a visit to the emergency room can involve a wait of several hours; private clinics and physicians offer speedier service. Serious medical problems requiring hospitalization and/or medical evacuation to the United States can cost thousands of dollars. Doctors and hospitals often expect immediate cash payment for health services, and U.S. medical insurance is not always valid outside the United States. U.S. Medicare and Medicaid programs do not provide payment for medical services outside the United States.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's Internet site at http://www.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) website at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from

those in the United States. The information below concerning Barbados is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

Driving in Barbados is on the left-hand side of the road. Taxis and buses are generally safe. Buses and vans and small buses are often crowded and tend to travel at high rates of speed. Night driving should be done with caution because of narrow roads with no shoulders and pedestrian/bicycle traffic. For specific information concerning Barbados driving permits, vehicle inspection, road tax and mandatory insurance, contact the Barbados Tourism Authority at (212) 986-6516, http://www.barbados.org.

Aviation Safety Oversight: As there is no direct commercial air service between the United States and Barbados, the U.S. Federal Aviation Administration (FAA) has not assessed Barbados' Civil Aviation Authority for compliance with International Civil Aviation Organization (ICAO) aviation safety standards. For more information, travelers may visit the FAA's internet website at http://www.faa.gov.

Special Circumstances: All Caribbean countries can be affected by hurricanes. The hurricane season normally runs from June to the end of November, but there have been hurricanes in December in recent years. General information about natural disaster preparedness is available via the Internet from the U.S. Federal Emergency Management Agency (FEMA) at http://www.fema.gov.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offences. Persons violating Barbados' laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Barbados are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in Barbados are encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration website, and to obtain updated information on travel and security within Barbados. Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency. The U.S. Embassy in Bridgetown in located in the Wildey Business Park in suburban Wildey, south and east of downtown Bridgetown. The main number for the Consular Section is (246) 431-0225; after hours, the Embassy duty officer can be reached by calling (246) 436-4950. The website for Embassy Bridgetown is http://bridgetown.usembassy.gov.

Intercountry Adoption

March 2006

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is based on public sources and current understanding. Questions involving foreign and U.S. immigration laws and legal interpretation should be addressed respectively to qualified foreign or U.S. legal counsel. Prospective adoptive parents are advised to fully research any adoption agency or facilitator they plan to use for adoption services.

Please Note: Only citizens of countries with which Barbados has diplomatic or consular relations may adopt Barbadian children. The United States has diplomatic relations with Barbados.

Patterns of Immigration: Please review current reports online at http://adoption.state.gov.

Adoption Authority: The adoption agency for all of Barbados is the Child Care Board, located at: The Fred Edghill Building, Cheapside, Fontabelle, Barbados. The phone number is 1 (246) 426-2577. There are no private adoption agencies operating in Barbados.

Eligibility Requirements for Adoptive Parents: Both married and single people may adopt. Prospective adoptive parents who are already related to the child they plan to adopt must be at least 18 years old. Otherwise, at least one prospective adoptive parent must be 25 years old and at least 18 years older than the child.

Residency Requirements: The adoption of a Barbadian child can take place in Barbados or in the applicants' country of residence. Applicants wishing to adopt a child in Barbados will be required to reside in the island for a period of at least 18 months. If applicants wish the adoption to take place in their country of residence, the applicants are required to come to Barbados for at least a few weeks in order to receive the child into their care and must attend the High Court hearing for the license to take the child out of Barbados for the purpose of adoption.

Time Frame: It will typically take non-Barbadians, including U.S. citizens, between six months and a year to adopt a Barbadian child, but it can

take longer due to sometimes-lengthy Barbadian court procedures.

Adoption Agencies and Attorneys: Private agencies are not allowed to provide adoption services. All adoptions must go through the Child Care Board.

Adoption Fees: Average adoption attorney fees in Barbados are approximately U.S. $3000, which includes court fees. However, fees may vary depending on the attorney. It is necessary for the applicants to use an attorney in Barbados who will apply for the license on their behalf. There are no fees for filing adoption paperwork with the Child Care Board.

Adoption Procedures: The laws that govern adoptions in Barbados are the Child Care Act and the Adoption Act. The Child Care Board administers these laws. Upon being notified of a prospective parent's intent to adopt, the Child Care Board will contract a social welfare agency abroad to do a home study. The home study conducted for U.S. immigration procedures (form I-600A) is acceptable. Upon completion of the home study, the adoptive parents should submit it to the Child Care Board for review. After the Child Care Board approves the home study, the Child Care Board will identify a child based on the adoptive parents' requests. The adoptive parents (using an attorney) will then need to obtain an order from a Barbadian court authorizing the care and custody of the minor. The adoptive parents are required to come to Barbados to attend the High Court hearing for the license and to receive the child into their care.

Required Documents: A completed home study and supporting documents:

- Birth certificate of each prospective adoptive parent;
- Marriage certificate and divorce documents (if applicable);
- Medical report of each prospective adoptive parent, to be conducted in the parent's country of residence;
- Police reference;
- Three (3) personal references known for a period of at least five (5) years and not family members;
- Statement of applicant(s) income.

If the adoption is completed in Barbados, the adoptive parents should apply to the Office of the Registrar for a new birth certificate. If the adoption is to take place in the adoptive parents' country of residence, the child must have a passport issued by Barbados Immigration in order to apply for a an immigrant visa.

Embassy of Barbados
2144 Wyoming Avenue, NW
Washington, DC 20008
Telephone: (202) 939-9200
Fax: (202) 332-7467

There are also consulates of Barbados in Los Angeles, Miami, and New York.

U.S. Immigration Requirements: Prospective adopting parents are strongly encouraged to consult USCIS publication M-249, *The Immigration of Adopted and Prospective Adoptive Children,* as well as the Department of State publication, *Intercountry Adoptions.*

Please see the *Intercountry Adoption* section of this book for more details and review current reports online at http://adoption.state.gov.

U.S. Embassy Bridgetown
Consular Section
The ALICO Building
Cheapside
Bridgetown, Barbados
Telephone: (246) 431-0225
Fax: (246) 431-0179
Email: consularbridge2@state.gov
http://bridgetown.usembassy.gov

Additional Information: Specific questions about adoption in Barbados may be addressed to the U.S. Embassy in Bridgetown. General questions regarding intercountry adoption may be addressed to the Office of Children's Issues, U.S. Department of State, CA/OCS/CI, SA-29, 4th Floor, 2201 C Street, NW, Washington, D.C. 20520-4818, toll-free Tel: 1-888-407-4747.

International Parental Child Abduction

November 2008

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *International Child Abduction* section of this book and review current reports online at www.travel.state.gov/childabduction.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is provided for general information only. Questions involving interpretation of specific foreign laws should be addressed to foreign legal counsel.

General Information: Barbados is not a party to the Hague Convention on the Civil Aspects of International Child Abduction, nor are there any international or bilateral treaties in force between Barbados and the United States dealing with international parental child abduction. American citizens who travel to Barbados place themselves under the jurisdiction of local courts. American citizens planning a trip to Barbados with dual national children should bear this in mind.

Custody Disputes: In Barbados, if parents are legally married they share the custody of their children. If they are not married, by law the custody is granted to the mother unless there are known facts of inappropriate behavior, mental or social problems. Foreign court orders are not automatically recognized.

Enforcement of Foreign Judgments: Custody orders and judgments of foreign courts are not enforceable in Barbados.

Visitation Rights: In cases where one parent has been granted custody of a child, the other parent is usually granted visitation rights.

The American Embassy in Bridgetown has reported few problems for non-custodial parents exercising their visitation rights. If a custodial parent fails to allow visitation, the non-custodial parent may appeal to the court.

Dual Nationality: Dual nationality is recognized under Barbadian law.

Passports for Minors and the Children's Passport Issuance Alert Program: For more information on these topics, see the *International Parental Child Abduction* section of this publication and review current reports from the U.S. Department of State at www.travel.state.gov/childabduction.

Travel Restrictions: No exit visas are required to leave Barbados.

Criminal Remedies: For information on possible criminal remedies, please contact your local law enforcement authorities or the nearest office of the Federal Bureau of Investigation (FBI). Information is also available on the Internet at the web site of the U.S. Department of Justice, Office of Juvenile Justice and Delinquency Prevention (OJJDP) at http://www.ojjdp.ncjrs.org.

Persons who wish to pursue a child custody claim in a Barbadian court should retain an attorney in Barbados. The U.S. Embassy in Barbados maintains a list of attorneys willing to represent American clients. A copy of this list may be obtained by requesting one from the Embassy at:

U.S. Embassy Bridgetown
Consular Section
ALICO Building
Cheapside
Barbados

Mailing Address:
P O Box 302
Bridgetown
Barbados
Telephone: [246] 431-0225
Fax: [246] 431-0179
Web site:
http://www.usembassy.state.gov

The workweek for the Embassy is Monday through Friday from 8:00am to 4:30pm.

Questions involving Barbadian law should be addressed to a Barbadian attorney or to the Embassy of Barbados in the United States at:

Embassy of Barbados
2144 Wyoming Avenue, NW
Washington, DC 20008
Telephone: (202) 939-9200

BELARUS

Compiled from the October 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Republic of Belarus

PROFILE

Geography

Area: 207,600 sq. km. (80,100 sq. mi.); slightly smaller than Kansas.
Cities: Capital—Minsk.
Terrain: Landlocked, low-lying with thick forests, flat marshes and fields.
Climate: Cold winters, cool and moist summers, transitional between continental and maritime.

People

Nationality: Noun—Belarusian(s). Adjective—Belarusian.
Population: (July 2008 est.): 9,685,768 (Urban 73%; rural 27%).
Ethnic groups: Belarusian (81.2%), Russian (11.4%), Polish (3.9%), Ukrainian (2.4%), Jewish (0.3%), other (0.8%).
Religions: (2004 est.) Eastern Orthodox 80%, Catholic 14%, Protestant 2%, other (including Autocephalous Orthodox, Jewish, Muslim, and Krishna) 4%.
Languages: Belarusian and Russian (official).
Education: Literacy—98%.
Health: Infant mortality rate (2008 est.)—6.53/1,000. Life expectancy (2008 est.)—70.34 years (men 64.63 years, women 76.4 years).
Work force: (4.3 million as of December 31, 2005): Industry—34.7%; agriculture and forestry–14%; construction—7.9%; transportation, communications—7.6%; trade, catering–12.2%; education—10.7%; other—24.3%.

Government

Type: Republic.
Constitution: March 30, 1994; revision by unrecognized national referendum of November 24, 1996, gave presidency greatly expanded powers and became effective November 27, 1996.
Independence: 1991 (from Soviet Union).
Government branches: Executive—president (head of state), prime minister (head of government), Council of Ministers (cabinet). Legislative—bicameral: the House of Representatives (110 deputies) and the Council of the Republic (64 deputies). Judicial—Supreme Court; Constitutional Court.
Political subdivisions: Six oblasts (regions) and one municipality.
Political parties: Belarus has 17 registered political parties, including: Agrarian Party (AP); Belarusian Communist Party (KPB); Green Party; Belarusian Social and Sports Party; Belarusian Patriotic Movement (BPR); Belarusian Popular Front (BNF); Belarusian Social-Democrat Party (BSDP); Social-Democratic Hramada Party; Belarusian Socialist Party; United Civic Party (UCP); Liberal Democratic Party of Belarus (LDBP); Party of Communists Belarusian (PKB); Party of Popular Accord; Republican Party of Labor and Justice (RPPS); Social Democratic Party of Popular Accord (PPA); Women's Party Nadezhda. Several of these parties exist in name only. Other, unregistered parties are also active, such as: Belarusian Party of Labor, Christian Conservative Party, and Party of Freedom and Progress.
Suffrage: Universal at age 18.

Economy

GDP: (2007) $44.77 billion.
GDP growth rate: (2007) 8.2%.
Per capita GDP: (2007) $10,600.
Natural resources: Forest land, peat deposits, potash, small amounts of oil and natural gas.
Agriculture: Products—grain, potatoes, vegetables, flax, beef, milk.
Industry: Types—machinery and transport equipment, chemical products, fabrics, and consumer goods.
Trade: (2007) Exports—$24.47 billion (refined petroleum, potash fertilizers, machinery and transport equipment, chemicals, foodstuffs, metals, and textiles). Major markets–Russia, Germany, Netherlands, Poland, Great Britain, Ukraine, and Latvia. Imports–$28.32 billion (mineral products, machinery and equipment, metals, crude oil and natural gas, chemicals, foodstuffs). Major

suppliers–Russia, Germany, Ukraine, Poland, Italy, Lithuania.

Exchange rate: (October 2008) 2,113.5 BYR (Belarusian rubles)=U.S. $1.

HISTORICAL HIGHLIGHTS

While archeological evidence points to settlement in today's Belarus at least 10,000 years ago, recorded history begins with settlement by Baltic and Slavic tribes in the early centuries A.D. With distinctive features by the ninth century, the emerging Belarusian state was then absorbed by Kievan Rus' in the 9th century. Belarus was later an integral part of what was called Litva, which included today's Belarus as well as today's Lithuania. Belarus was the birthplace of the Grand Duchy of Lithuania. Belarusian was the state language of the Grand Duchy until 1697, in part owing to the strong flowering of Belarusian culture during the Renaissance through the works of leading Belarusian humanists such as Frantzisk Skaryna. Belarus was the site of the Union of Brest in 1597, which created the Greek Catholic Church, for long the majority church in Belarus until suppressed by the Russian empire, and the birthplace of Thaddeus Kosciuszko, who played a key role in the American Revolution. Occupied by the Russian empire from the end of the 18th century until 1918, Belarus declared its short-lived National Republic on March 25, 1918, only to be forcibly absorbed by the Bolsheviks into what became the Soviet Union (U.S.S.R.). Suffering devastating population losses under Soviet leader Josif Stalin and the German Nazi occupation, including mass executions of the Jewish population, Belarus was retaken by the Soviets in 1944. It declared its sovereignty on July 27, 1990, and independence from the Soviet Union on August 25, 1991. It has been run by the authoritarian Alexander Lukashenko since 1994.

GOVERNMENT

The constitution provides for a popularly elected president who serves a 5-year term. The bicameral parliament consists of the 64-seat Council of the Republic and the 110-seat Chamber of Representatives. The Council of the Republic is the house of territorial representation. Eight members of the Council are appointed directly by the president of the Republic of Belarus, while local regional councils elect the rest. The deputies to the House of Representatives are elected directly by the voters. The president appoints the prime minister, who is the head of government.

POLITICAL CONDITIONS

Since his election in July 1994 as the country's first President, Alexander Lukashenko has consolidated power steadily in the executive branch through authoritarian means and has dominated all branches of government. He used a non-democratic referendum in November 1996 to amend the 1994 constitution to broaden his powers and illegally extend his term in office. He began to count his 5-year term in 1996, thereby adding 2 years to his first term in office. Based on the unrecognized 1996 constitution, Lukashenko announced that presidential elections were to be held in 2001. In 2004, he engineered a fraudulent referendum that removed term limits on the presidency. Independent exit polling of the referendum showed results far different from those officially announced. In 2006, Lukashenko took advantage of this provision to "win" another term in an undemocratic election. In January 2007, he further consolidated his rule through local elections that failed to meet international standards.

In October 2000, parliamentary elections occurred for the first time since the disputed referendum of 1996. According to the Organization for Security and Cooperation in Europe's Office for Democratic Institutions and Human Rights (OSCE/ODIHR), these elections failed to meet international democratic standards. Based on the unrecognized 1996 constitution, Lukashenko announced presidential elections in 2001. International monitors noted sweeping human rights violations and undemocratic practices throughout the election period, including massive vote-counting fraud. These irregularities led the OSCE/ODIHR to find that these elections also failed to meet Belarus' OSCE commitments for democratic elections. March 2003 local elections and October 2004 parliamentary elections also failed to meet international standards of freedom and fairness. In 2004, Lukashenko called a referendum on removing presidential term limits. According to official results, the referendum passed by a wide margin, and Lukashenko allies won across-the-board victories in simultaneous parliamentary elections. OSCE/ODIHR observers declared that the parliamentary elections fell far short of international standards, citing abuses in the campaign period and the vote counting. The referendum was also conducted with little regard for democratic principles. Independent exit polling showed results far different from those officially announced.

The March 19, 2006 presidential election marked another low point in the government's treatment of its own citizens. OSCE/ODIHR observers noted that the election failed to meet international standards, was characterized by a disregard for the basic rights of freedom of assembly, association, and expression, and included a highly problematic vote count. Authorities detained many opposition and civic activists during the campaign and used force against demonstrators protesting the fraudulent election. Opposition presidential candidate Aleksandr Kozulin was beaten and arrested during post-election protests. He was sentenced to a five year jail term. The Belarusian authorities released Kozulin on August 16, 2008.

Belarus held parliamentary elections in late September 2008. Despite Belarusian authorities' public assurances that the elections would be "unprecedentedly" democratic and transparent, the OSCE/ODIHR election observation mission determined the elections fell short of OSCE standards. The authorities denied registration for approximately 20 percent of opposition candidates as well as candidates overall. While candidates were allotted their mandatory campaign airtime on various media outlets, restrictions on this access made it difficult for candidates to adequately present their platforms to the public. OSCE/ODIHR observers noted good access to polling stations during early voting and election day. However, the Belarusian authorities fell short on access for OSCE/ODIHR and other observers to the vote count, a crucial aspect for determining the transparency of the elections. OSCE/ODIHR observers assessed transparency of the vote count to have been bad or very bad in 48 percent of observed cases. The OSCE recognized minor improvements in the conduct of the elections, but the lack of a transparent vote count made it impossible to determine the validity of the elections. The Department of State issued a statement following OSCE/ODIHR's preliminary assessment, expressing disappointment with the failure of the Belarusian elections to meet international standards.

Although government restrictions on basic freedoms spiked in connection with elections, they continued even in non-election periods. Efforts to further infringe upon press freedoms included the continued use of libel laws, restrictions on foreign funding, pressure on businesses not to advertise with independent media, limitations on access to newsprint and printing presses, prohibiting access to state distribution networks, censorship, restrictions on the import of media-related materials, temporary and permanent suspension of independent and opposition periodicals, confiscation in quantity of printed publications, and detention of those distributing such material. In December 2004, the government adopted new legislation establishing criminal penalties for "discrediting Belarus" and organizing activities of an unregistered non-governmental organization (NGO). The government has continued to make use of its monopoly on television broadcasting to present biased news coverage and to minimize the presentation of opposing points of view. All Internet service providers in Belarus operate through a state-controlled portal. Despite constitutional provisions, a 1998 government decree limited citizens' rights to express their own opinions. A new media law, signed on August 4 and due to come into force in February 2009. The law prohibits Belarusian media outlets from obtaining technical or monetary support from foreign organizations or individuals unless they are co-founders, requires re-registration of most existing media and accreditation of journalists, and subjects online news media to the same requirements as print and broadcast media. These new restrictions threaten to undermine the last outlets of free speech online in Belarus.

The 1994 and 1996 constitutions both provide for freedom of peaceful assembly; however, the regime severely restricts this right in practice. Demonstrations require an application at least 15 days in advance of the event, and the local government must then respond positively or negatively at least 5 days prior to the event. Applications by opposition groups are usually

rejected. Following many unsanctioned demonstrations, police and other security officials detain, harass, and beat demonstration participants. Police also often film sanctioned events.

The constitution provides for freedom of religion; however, the authorities restrict this right in practice. Although Article 16 of the 1996 amended constitution reaffirms the equality of religions and denominations before the law, it also contains restrictive language stipulating that cooperation between the state and religious organizations "is regulated with regard for their influence on the formation of spiritual, cultural, and country traditions of the Belarusian people."

The government also restricts religious freedom in accordance with the provisions of a 2002 law on religion and a 2003 concordat with the Belarusian Orthodox Church (BOC), a branch of the Russian Orthodox Church (ROC) and the only officially recognized Orthodox denomination. Although there is no state religion, the concordat grants the BOC privileged status. Protestants in particular have attracted negative attention. Numerous anti-Semitic acts and attacks on religious monuments, buildings, and cemeteries have occurred with little discernible response from the government. Authorities have kept many religious communities waiting as long as several years for decisions about property registration or restitution. Authorities also harassed and fined members of certain religious groups, especially those that the authorities appear to regard as bearers of foreign cultural influence or as having a political agenda. Foreign missionaries, clergy, and humanitarian workers affiliated with churches have faced many government-imposed obstacles, including deportation and visa refusal or cancellation.

On December 17, 2007, President Lukashenko abolished exit stamps in favor of a computerized system that verifies the validity of passports. At the same time, however, he authorized the Interior Ministry to ban travel by individuals who had access to state secrets, who were facing criminal prosecution or civil suits, and who had outstanding financial commitments.

In late December 2007, authorities included opposition party leader Anatoliy Lebedko on the travel ban list because he faced allegations of libel against government officials. Authorities also banned travel by opposition youth leader Aleksandr Atroshchenkov. Human-rights observers feared that additional opposition activists would likely be included on the government's travel ban list, which is estimated to include the names of 100,000 persons.

The constitution provides for the right of workers, except for state security and military personnel, to voluntarily form and join independent unions and to carry out actions in defense of workers' rights, including the right to strike. In practice, however, these rights are limited. The Belarusian Free Trade Union (FTUB) was established in 1991 and registered in 1992. Following the 1995 Minsk metro workers strike, the President suspended its activities. In 1996, FTUB leaders formed a new umbrella organization, the Belarusian Congress of Democratic Trade Unions (BCDTU), which encompasses four leading independent trade unions and is reported to have about 15,000 members. In late 2003, the BCDTU became a member of the International Confederation of Free Trade Unions (ICFTU).

In May 2001, a complaint was lodged with the International Labor Organization (ILO) by several trade union organizations alleging the government was attempting to destroy the independent unions. A campaign was carried out to raise international awareness about trade unions and to put pressure on the Belarusian authorities. Late in 2001, the regime attempted to further restrict the unions by refusing to turn over dues paid by members. Once it became clear that the unions and the FTUB were adjusting to this change, the government embarked on a takeover of the FTUB and several of its branch unions in June of 2002. The FTUB subsequently became an arm of the government, and the election of Leonid Kozik to the position of Chairman of the FTUB has been challenged by the ILO.

In November 2003, the ILO approved the establishment of a Commission of Inquiry to investigate alleged serious violations of workers' rights in the country. That same month the Ministry of the Economy informed the ILO that all activities related to its technical assistance project to labor unions must cease because the registration of the project was denied. In 2004, the ILO presented the government with a list of 12 recommendations to improve its treatment of independent unions. A January 2006 ILO mission found that the government had not implemented any of these recommendations. As a result, in June 2007, the European Union (EU) suspended Belarus' trading preferences under the Generalized System of Preferences (GSP). The United States had suspended GSP preferences in 2000 due to Belarus' failure to take steps that would allow the right of association and collective bargaining.

In March 2004 the government began forcing state employees (some 80% of Belarusian workers) to sign short-term work contracts. Although contracts may be concluded for a period of five years, most expire after one year, which essentially grants the government the opportunity to annually fire anyone in its employ. Many members of independent unions, political parties, and civil society groups have lost their jobs when their contracts were not renewed.

Principal Government Officials

Last Updated: 11/12/08

Pres.: **Aleksandr LUKASHENKO**
Prime Min.: **Sergey SIDORSKIY**
First Dep. Prime Min.: **Vladimir SEMASHKO**
Dep. Prime Min.: **Ivan BAMBIZA**
Dep. Prime Min.: **Viktor BURYA**
Dep. Prime Min.: **Andrey KOBYAKOV**
Dep. Prime Min.: **Aleksandr KOSINETS**

Permanent Representative to the UN, New York: **Andrey DAPKYUNAS**

Belarus' embassy in the U.S. is at 1619 New Hampshire Ave., NW, Washington, DC 20009; tel: 202-986-1606; fax: 202-986-1805; website: http://www.belarusembassy.org.

ECONOMY

As part of the former Soviet Union, Belarus had a relatively well-developed industrial base; it retained this industrial base following the breakup of the U.S.S.R. The country also has a broad agricultural base and a high education level. Among the former republics of the Soviet Union, it had one of the highest standards of living. But Belarusians now face the difficult challenge of moving from a state-run economy with a high priority on military production and heavy industry to a civilian, free-market system.

After an initial outburst of capitalist reform from 1991-94, including privatization of state enterprises, creation of institutions of private property, and development of entrepreneurship, Belarus has greatly slowed under Lukashenko, and in many cases, reversed its pace of privatization and other market reforms while emphasizing the need for a "socially oriented market economy." About 80% of all industry remains in state hands, and foreign investment has been hindered by a climate hostile to business. The banks, which had been privatized after independence, were renationalized under Lukashenko. The government has also renationalized companies using the "Golden Share" mechanism, which allows government control in all companies with foreign investment, as well as through other administrative means.

Economic output, which declined for several years, revived in the late 1990s and early 2000s, but the economy has been dependent on heavy discounts in oil and natural gas prices from Russia. Belarus has historically re-exported the oil and oil products at world market prices, using the windfall profits to subsidize state enterprises. In December 2006, Belarus and Russian gas giant Gazprom signed a deal which will eventually end Russia's subsidies of gas for Belarus. Under the deal, Gazprom raised prices for Belarus gas deliveries in 2007 to $100 per 1,000 cubic meters, a significant rise from the subsidized previous price of $46, but still far less than the price paid by EU member states. The price for Russian gas will continue to increase incrementally until 2011, when it will equal the price paid by EU members. Additionally, Gazprom will gradually acquire a 50% stake in Beltransgaz, the Belarusian gas pipeline firm. In January 2007, Russia followed up with a steep duty on oil deliveries, which caused a significant drop in revenue from exports of oil products and Russian-sourced crude oil. The increase in gas prices and simultaneous moves by Moscow to reduce the profitability of refining Russian oil in Belarus for re-export disrupted plans to upgrade industries ranging from oil refining to cement production.

Peat, the country's most valuable mineral resource, is used for fuel, for fertilizer, and in the chemical industry. Belarus also has deposits of clay, sand, chalk, dolomite, phosphorite, and rock and potassium salt. Forests cover about a third of the land, and lumbering is an important occupation. Potatoes, flax, hemp, sugar beets, rye, oats, and wheat are the chief agricultural products. Dairy and beef cattle, pigs, and chickens are raised. Belarus has only small reserves of petroleum and natural gas, and it imports most of its oil and gas from Russia. The main branches of industry produce tractors and trucks, earthmovers for use in construction and mining, metal-cutting machine tools, agricultural equipment, motorcycles, chemicals, fertilizer, textiles, and consumer goods. The chief trading partners are Russia, Germany, Ukraine, and Poland.

The massive April 26, 1986 nuclear accident at the Chernobyl power plant, across the border in Ukraine, had a devastating effect on Belarus. As a result of the radiation released, agriculture in a large part of the country was destroyed and many villages were abandoned. Resettlement and medical costs were substantial and long-term. Many living in Chernobyl afflicted zones have infrequent access to medical treatment due to remoteness, inadequate equipment, and substantial costs. Although the Belarusian authorities claim otherwise, many radiation monitoring stations, especially in rural areas, are either ill-equipped, poorly staffed, and/or no longer in operation. Resettlement of those in affected areas remains incomplete.

Due to the economic and political climate, little new foreign investment

has occurred in recent years. In 2002, two major companies, the Swedish furniture firm Ikea and Russian beer producer Baltika, ended operations in Belarus due to unrealized government commitments or unwelcome interference. Ford Motors did the same in 1999. Economic pressures in 2007 may have led to the unexpected and non-transparent sale of a state telecommunications company to an Austrian firm.

Growth continued to be robust in 2007. Consumer price inflation averaged about 8.3% in 2007, but higher energy import prices are expected to drive up inflation in 2008 and subsequent years. Large wage increases, which were typical in the 1990s and early 2000s, fueled some increased consumption but also made Belarusian firms less competitive. Close to 20% of enterprises and a majority of collective farms currently operate at a loss, a percentage that has remained steady since 2002. The government made progress in reining in its fiscal policies, largely due to constraints imposed by financial difficulties caused by the earlier economic slowdown. Belarus continues to be heavily dependent on Russia, with the potential for greater economic dependency in a long-proposed EU-style union between the two states. Prospects for an eventual union state remain weak, however, largely due to the apparent lack of interest on the part of the leadership of both countries. However, Russia, Belarus, and Kazakhstan have announced plans to move ahead with the formation of a customs union in 2008 that they expect to be completed by 2010.

The World Bank announced a new 4-year country assistance strategy for Belarus in December 2007, which focuses on global environment and energy challenges, enhances the competitiveness of the Belarusian economy to assure rising incomes, and protects the welfare of the most vulnerable. As part of the strategy, the World Bank is financing improvements to schools, hospitals, and homes for orphans, the elderly, and the disabled throughout Belarus, with particular emphasis on improving the energy efficiency of those facilities. In 2004, Belarus rejected a World Bank loan to help fight AIDS and tuberculosis. International Monetary Fund (IMF) cooperation is currently limited to policy and technical consultations.

Environmental Issues

Belarus has established ministries of energy, forestry, land reclamation, and water resources and state committees to deal with ecology and safety procedures in the nuclear power industry. The most serious environmental issue in Belarus results from the accident in 1986 at the Chernobyl nuclear power plant. About 70% of the nuclear fallout from the plant landed on Belarusian territory, and about 20% of the land remains contaminated. But government restrictions on residence and use of contaminated land are not strictly enforced, and the government announced plans in 2004 to increase agricultural production in the contaminated regions. The government receives U.S. assistance in its efforts to deal with the consequences of the radiation. Belarus also faces growing air, land, and water pollution levels from potash mining in the south of the country.

DEFENSE AND MILITARY ISSUES

The United States continues to support Belarus' adherence to arms control agreements and treaties into which it has previously entered, including the Open Skies Treaty, which Belarus ratified in 2001. Cooperation in all such agreements has been exemplary.

Humanitarian aid continues to be the primary engagement between the U.S. military and Belarus. Humanitarian assistance programs have provided a tangible, long-lasting service and have encouraged goodwill toward the U.S. Government and the U.S. military. Renovation of the Gomel Emergency Treatment Hospital was recently concluded. The hospital received more than $600,000 in humanitarian assistance, which included funds for general renovation and the establishment of its blood transfusion center. The humanitarian aid program has two principal elements - the Humanitarian Assistance Program-Excess Property donates non-lethal goods and technical assistance for humanitarian purposes while other assistance focuses on projects such as the refurbishment of medical facilities and the construction of school buildings.

Direct military to military cooperation continues to be minimal. Belarus currently has no International Military Education and Training (IMET) program, and bilateral exercises and cooperation are nonexistent. There is a great desire on the Belarusian side to re-establish such cooperation and contacts, but it has not been possible due to the political situation. The only program that is still functional within this category is the attendance of Belarusian military officers at George C. Marshall Center programs.

Belarus is currently cooperating with the North Atlantic Treaty Organization, through the Partnership for Peace Trust Fund, to destroy a total of 700,000 conventional landmines. Belarus also has a stockpile of over 3 million non-conventional anti-personnel mines, which it pledged to destroy by March 2008. However, the bidding process for the project of destroying the mines is still ongoing. In addition, there are numerous World War II-vintage minefields, which are still in place and kill or injure several Belarusians every year.

The Ministry of Defense is experiencing success in the area of military reform. Planned changes include combining the Air and Air Defense Forces, downsizing the force structure about 30% from 83,000 to 60,000, transitioning from a conscript to a contract force, and modernizing the command and control structure by creating a Ground Forces Command between the Ministry of Defense and the units in the field. Implementation of these reforms will take an unspecified amount of time.

There have been numerous reports of Belarusian sales or delivery of weapons or weapons-related technologies to states of concern, including state sponsors of terrorism. In April and September 2004, the United States imposed sanctions on a Belarusian entity, Belvneshpromservice, pursuant to the Iran Nonproliferation Act of 2000 for the transfer to Iran of items on a multilateral export control list, or items having the potential of making a material contribution to weapons of mass destruction (WMD), or cruise or ballistic missile systems.

FOREIGN RELATIONS

Under an arrangement with the former U.S.S.R., Belarus was an original member of the United Nations. It also is a member of the Commonwealth of Independent States (CIS - a group of 12 former Soviet republics) and its customs union, the Belarusian and Russian Union State, the Eurasian Economic Community, the Collective Security Treaty Organization (CSTO), the Organization for Security and Cooperation in Europe (OSCE), the North Atlantic Treaty Organization's (NATO) Partnership for Peace, the North Atlantic Cooperation Council, the Non-Aligned Movement, the International Organization for Migration (IOM), the International Monetary Fund, and the World Bank.

Following the recognition of Belarus as an independent state in December 1991 by the European Community, EU-Belarus relations initially experienced a steady progression. The signature of the Partnership and Cooperation Agreement (PCA) in 1995 signaled a commitment to political, economic, and trade cooperation. Significant assistance was provided to Belarus within the framework of the TACIS technical assistance program and also through various aid programs and loans. However, progress in EU-Belarus relations stalled in 1996 after serious setbacks in the development of democracy. The EU did not recognize the 1996 constitution that replaced the 1994 constitution. Neither the PCA nor its trade-related elements were implemented, and Belarus was not invited to join the EU's Neighborhood Policy. Belarusian membership in the Council of Europe was not supported, bilateral relations at the ministerial level were suspended, and EU technical assistance programs were frozen. In 1998, relations were further worsened when President Lukashenko evicted several western ambassadors from their homes in the Drozdy area of Minsk. In 2004, the Council of Europe adopted a report written by special rapporteur Christos Pourgourides calling on Belarusian authorities to suspend various high-level officials after conducting a thorough investigation of the cases of several prominent Belarusian political figures who have disappeared and remain unaccounted for. In line with the U.S., the EU spoke strongly against the government's conduct of the 2006 election, noting that additional restrictive measures would be imposed against those officials responsible for abuses. After the election, the U.S. and EU imposed travel restrictions and financial sanctions against those responsible for abuses. The EU also launched a two-year, two million Euro project to support Belarusian access to independent information, which complements U.S. assistance programs. In June 2007, the EU announced the withdrawal of GSP trade preferences for Belarus, following an assessment by the International Labor Organization that Belarus had not acted to ensure the protection of labor rights and freedom of association. After the September 2008 parliamentary elections, the EU issued a statement expressing its concern about the conduct of the elections, which despite some progress did not correspond to the OSCE's democratic standards. In October 2008, the EU suspended its visa sanctions for six months on numerous Belarusian officials, including President Lukashenko, in response to Belarus' release of political prisoners in August.

Acknowledging the lack of progress in relation to bilateral relations and the internal situation following the position adopted in 1997, the EU adopted a benchmark approach in 1999, whereby relations would be gradually improved upon fulfillment of the four benchmarks set by the OSCE. In 2000, some moderately positive developments toward the implementation of recommendations made by the OSCE Advisory and Monitoring Group (AMG) were observed, but were not sufficient in the realm of access to fair and free elections. The Belarusian authorities, objecting to the OSCE AMG's activities, forced it to shutdown by failing to renew visas or extend accreditation of its professional staff. The Belarusian authorities agreed to a successor OSCE presence after 14 EU member countries and the U.S. imposed visa restrictions on the travel of high-ranking Belarusian officials. The OSCE Office in Minsk formally came into existence on January 1, 2003 with a mandate to "assist the Belarusian authorities in further promoting institution-building, in further consolidating the Rule of Law and in developing relations with civil society, in accordance with OSCE principles and commitments."

Russia is the largest partner for Belarus in the economic and political fields. In terms of trade, over one-third of Belarusian exports go to Russia. Due to the structure of Belarusian industry, Belarus relies heavily on other CIS countries, and Russia in particular, both for export markets and for the supply of raw materials, subsidized energy, and components. The steep increase in the price of natural gas in 2007, as well as higher tariffs on Russian-sourced oil and oil products, has contributed to a crisis in the Belarusian economy, forcing the regime to cut popular subsidies and to borrow from outside sources to finance the budget. Belarus received a $1.5 billion stabilization loan from Russia in late 2007 and has asked for another loan in 2008.

The framework for the Russia-Belarusian Union was set out in the Treaty on the Formation of a Community of Russia and Belarus (1996), the Treaty on Russia-Belarus Union, the Union Charter (1997), and the Treaty of the Formation of a Union State (1999). The integration treaties contain commitments to monetary

union, equal rights, single citizenship, and a common foreign and defense policy. They also have established a range of institutions modeled after the EU. After protracted disputes and setbacks, the two countries' customs duties were unified as of March 2001. Belarus has made progress in monetary stabilization in the context of ongoing negotiation with the Russian Central Bank on monetary union. However, Belarus has repeatedly pushed back the date for implementing a monetary union. A dispute with Russia in late 2006 and early 2007 over gas prices and oil import duties raised further doubts about the future of the union, and many of the provisions of the union have yet to be implemented. Most recently, talks in October 2008 focused on plans to move forward with unification of customs rates for the Union State, supposedly to be completed by the end of the year, and the use of the Russian ruble for mutual payments. South Ossetia and Abkhazia have both expressed interest in joining the Union State, and in order for them to do so, their application must first be approved by the Union Parliament, and then the presidents of Belarus and Russia must approve the Parliament's resolution to accept Abkhazia and South Ossetia.

U.S.-BELARUSIAN RELATIONS

The United States recognized Belarusian independence on December 25, 1991. After the two countries established diplomatic relations, the U.S. Embassy in Minsk was officially opened on January 31, 1992. Ambassador David H. Swartz, the first Ambassador to Belarus, officially assumed post on August 25, 1992, the first anniversary of Belarusian independence, and departed post on completion of his term in late January 1994. On November 7, 1994, Ambassador Kenneth S. Yalowitz assumed post. He was succeeded by Ambassador Daniel V. Speckhard, who served from August 1997 to August 2000, spending one year recalled to Washington because of a dispute between the government and Western embassies over the confiscation of diplomatic residences. Michael G. Kozak served as U.S. Ambassador from October 2000 to August 2003. George A. Krol served as U.S. Ambassador from September 2003 to July 2006. Karen B. Stewart replaced Ambassador Krol as U.S. Ambassador and arrived in Belarus on September 18, 2006. She was recalled on March 12, 2008 following a threat of expulsion by the Belarusian authorities and the recall of Belarus' Ambassador to the U.S. Belarus subsequently voluntarily reduced the staff at its U.S. missions, excluding the mission to the UN, to five persons and demanded the U.S. reciprocate by reducing the U.S. Embassy in Minsk to five diplomats. When the U.S. refused to comply, the Belarusian authorities expelled several U.S. diplomats to reduce U.S. Embassy staffing to five diplomats. The U.S. has imposed no restrictions on Belarus' diplomatic missions to the U.S.

The two countries exchanged top-level official visits in the early years of independence. Stanislav Shushkevich, the Chairman of the Supreme Soviet of the Republic of Belarus, met with President Clinton in Washington in July 1992, and President Clinton visited Belarus in January 1994. After this high point, bilateral relations cooled following the election of President Alexander Lukashenko in July 1994.

In September 1995 three hot air balloons participating in the Coupe Gordon Bennett race entered Belarusian air space. Race organizers had informed the Belarusian authorities about the race in May, and flight plans had been filed, nevertheless, the Belarusian air force shot down one balloon, killing two American citizens, and forced the other two to land. The crews of the other two balloons were fined for entering Belarus without a visa and released. Belarus to date has not apologized or offered compensation for these killings.

In November 1996, the Lukashenko regime conducted an internationally unrecognized constitutional referendum, which resulted in the dissolution of Belarus' legitimate parliament and the centralization of power in the executive branch. In that same year, the Belarusian authorities provoked a diplomatic crisis by demanding and, in contravention of international law, eventually confiscating diplomatic residences in the Drozdy housing compound, including the U.S. Ambassador's residence. This action led the United States and other countries to withdraw their ambassadors from Belarus until the Belarusian authorities provided compensation and guarantees of respect for international law. In addition, Lukashenko used his newly centralized power to repress human rights throughout the country, including persecuting members of the illegally disbanded Belarusian Parliament (13th Supreme Soviet) and former members of his own government.

As a result of these events and tendencies, the United States announced in 1997 its decision to pursue a "selective engagement" policy with the Belarusian authorities. This policy included downgrading government-to-government contacts to the level of Assistant Secretary and below, as well as restricting U.S. Government assistance to the Belarusian authorities, with some exceptions including humanitarian assistance and exchange programs with state-run educational institutions. At the same time, the U.S. greatly expanded contacts with Belarusian civil society to promote democratization in Belarus.

Since 1997, despite growing U.S. engagement with Belarusian society, official bilateral relations have remained at a low level. In 2003, the United States, in tandem with the European Union, proposed a step-by-step, gradual approach to improve bilateral relations: the United States would respond positively to genuine efforts by Belarusian authorities to improve Belarus' human rights and electoral practices. Belarusian authorities failed to take the steps that warranted a positive response.

In October 2004, the U.S. Congress passed, and the President signed, the Belarus Democracy Act, which was

designed to promote democratization. In signing the act, President Bush noted that the authorities were turning Belarus into "a regime of repression in the heart of Europe," and set out the U.S. policy of working "with our allies and partners to assist those seeking to return Belarus to its rightful place among the Euro-Atlantic community of democracies." After a deeply flawed presidential election in March 2006, the U.S., acting with the EU, imposed travel restrictions and targeted financial sanctions against Belarusian officials implicated in human rights abuses and election fraud. The financial sanctions prohibited U.S. persons from engaging in financial transactions with named persons. On January 12, 2007, President Bush signed the Belarus Democracy Reauthorization Act, which repeated the call for targeted sanctions against Belarusian officials and continued assistance for democracy building activities. In August 2007, the U.S. widened application of travel restrictions on Belarusians to include directors and deputy directors of state enterprises. In November 2007, the Treasury Department froze the U.S. assets of Belarus' oil and chemical conglomerate, Belneftekhim, because of Alexander Lukashenko's control of the company. After the Belarusian authorities released the last of its political prisoners in August 2008, the U.S. suspended sanctions for six months on two Belneftekhim subsidiaries: Lakokraska and Polotsk Steklovolokno. The U.S. will assess the situation in Belarus at the end of this period and consider whether to extend the suspensions. To underscore U.S. support for the Belarusian people's democratic aspirations, the President and Secretary of State have frequently met with Belarusian pro-democracy activists, most recently during a December 2007 visit to Washington, DC of leaders of Belarusian pro-democracy political parties and NGO leaders.

U.S.-Belarusian Economic Relations

The U.S. Government continues to support the development of the private sector in Belarus and its transition to a free market economy. With the advent of the Lukashenko regime, Belarusian authorities have pursued a generally hostile policy toward the private sector and have refused to initiate the basic economic reforms necessary to create a market-based economy. Most of the Belarusian economy remains in government hands. The government, in particular the presidential administration, exercises control over most enterprises in all sectors of the economy. In addition to driving away major foreign investors, largely through establishment of a "Golden Share" requirement which allows government control in all companies with foreign investment, Belarus' centralization and command approach to the economy has left only a trickle of U.S. Government and international assistance programs in this field.

In February 1993, a bilateral trade treaty guaranteeing reciprocal most-favored-nation status entered into force. In January 1994, the U.S. and Belarus signed a bilateral investment treaty, which has been ratified by Belarus but has not been ratified by the U.S. Senate. In addition, due to continuing repression of labor rights in Belarus, the U.S. removed Belarus from the Generalized System of Preferences (GSP) in 2000.

The United States has encouraged Belarus to conclude and adhere to agreements with the International Monetary Fund (IMF) on macroeconomic stabilization and related reform measures, as well as to undertake increased privatization and to create a favorable climate for business and investment. Although there has been some American direct private investment in Belarus, its development has been relatively slow. An Overseas Private Investment Corporation agreement was signed in June 1992 but has been suspended since 1995 because Belarus did not fulfill its obligations under the agreement. Belarus is eligible for Export-Import Bank short-term financing insurance for U.S. investments, but because of the adverse business climate, no projects have been initiated. The IMF granted Belarus standby credit in September 1995, but it fell off the program and did not receive the second tranche of funding, which had been scheduled for regular intervals throughout 1996. Since that time, Belarus has had an ongoing discussion to relaunch IMF-backed reforms, including an IMF Staff-Monitored Program (SMP) in 2001, which ended in September of that year with relatively disappointing results. In early 2004, Belarus halted negotiations on a follow-on stand-by arrangement due to disagreements with the IMF on macroeconomic policy and the claim that it did not require IMF funding.

Because of the unpredictable, and at times hostile, environment for investors, the U.S. Government currently does not encourage U.S. companies to invest in Belarus. Belarus' continuing problems with an opaque, arbitrary legal system, a confiscatory tax regime, cumbersome licensing system, price controls, and lack of an independent judiciary create a business environment not conducive to prosperous, profitable investment. In fact, several U.S. investors have left Belarus, including the Ford Motor Company.

U.S. Assistance to Belarus

U.S. Government assistance programs in Belarus support and encourage civil society development, access to independent information, pro-democracy forces, and the emergence of democracy in a very difficult and challenging environment. Most assistance is in the form of training and exchanges, as well as small grants and capacity-building for local non-governmental organizations. The U.S. also supports external radio and television broadcasting into Belarus, and external websites. Because the Belarusian authorities have not embraced market reforms, the U.S. is able to program only modest activities in support of private entrepreneurs. The U.S. provides some health program funding and supports international organizations' efforts in Belarus to combat the growing problem of trafficking in persons. With very limited exceptions, including humanitarian assistance and exchange programs involving state-

run educational institutions, bilateral assistance is not channeled through the Government of Belarus.

For FY 2007, the U.S. provided $11.34 million to Belarus. Assistance is provided to Belarus under the Freedom for Russia and Emerging Eurasian Democracies and Open Markets (FREEDOM) Support Act (FSA) enacted in October 1992. U.S. Government assistance to Belarus peaked in 1994 at a level of approximately $76 million (consisting of more than $16 million in FREEDOM Support Act funds and some $60 million in funds from various U.S. Government agencies). However, U.S. assistance levels dropped sharply due to the lack of progress in democratic and economic reforms after Alexander Lukashenko came to power in mid-1994.

Belarus was previously a recipient of assistance under the U.S. Defense Department's Cooperative Threat Reduction (CTR) Program, whose objective is to reduce the threat posed to the United States by weapons of mass destruction remaining on the territory of the former Soviet Union by promoting denuclearization and demilitarization and preventing weapons proliferation. However, in February 1997, due to the Belarusian authorities' poor record on human rights, President Clinton de-certified Belarus, thus rendering the country ineligible for further CTR assistance and placing restrictions on other security-related assistance as well. The United States and Belarus signed a government-to-government umbrella agreement on CTR assistance in 1992, seven agency-to-agency CTR implementing agreements, and one memorandum of understanding and cooperation. The umbrella agreement was extended for one year in October 1997 but has now expired.

For more detailed information on U.S. Government assistance to Belarus, please see the annual reports to Congress on U.S. Government Assistance to and Cooperative Activities with Eurasia, which are available in the Bureau of European and Eurasian Affairs section on the State Department's website. A fact sheet on Foreign Operations Appropriated Assistance to Belarus for FY 2007 can be found at http://www.state.gov/p/eur/rls/fs/107776.htm Information is also available on the U.S. Agency for International Development's (USAID) website at the address: http://www.usaid.gov.

TRAVEL

Consular Information Sheet

November 24, 2008

Country Description: Belarus became an independent republic on August 25, 1991, after the breakup of the Soviet Union. In November 1996, a constitutional referendum, not recognized by the international community, centralized power in the executive branch (president), headed by Aleksandr Lukashenka. Economic and political reform in Belarus has stalled or is being reversed under his authoritarian government. The Belarusian Government's human rights record remains very poor. President Lukashenka gained a third five-year term as president in March 2006, in an election that international observers judged to be seriously flawed. Democratic nations, including the U.S. and EU, condemned the subsequent governmental crackdown on peaceful protests in Minsk, and imposed visa restrictions and other sanctions on senior officials. Both Belarusian and Russian are official languages, and Russian is widely spoken throughout the country, particularly in the cities. Tourist facilities are not highly developed, but food and lodging in the capital and some regional centers are adequate.

Entry Requirements: A passport and visa are required. Travelers must obtain a visa in advance to visit or transit through Belarus. Travelers who do not have a visa cannot register at hotels. U.S. citizens visiting or residing in Belarus are required to register with the local office of the Citizenship and Migration Department of the Ministry of Interior (formerly OVIR) within three business days after arrival. The registration fee is one National Minimum Tariff Unit (currently about $17). Failure to register can result in fines and difficulties when departing. U.S. citizens staying in hotels are automatically registered at check-in. Visa validity dates are strictly enforced; travelers should request visas of sufficient length to allow for changes in arrival and departure plans, and should carefully review the beginning and ending dates of their visas before traveling.

A valid exit visa is necessary to depart Belarus. Generally, the visa issued by a Belarusian Embassy or Consulate is valid for both entry and exit. Photocopies of visas may be helpful in the event of loss, but note that a copy of a visa will not be sufficient for entry or departure, as Belarusian border officials always require original travel documents.

Travelers who overstay their visa's validity—even for one day—will be prevented from leaving until they have been granted an extension by the Department of Citizenship and Migration. United States citizens without valid visas face delays in leaving Belarus and may have

trouble finding adequate accommodation. By Belarusian law, travelers with an expired visa may not check in at any hotel or other lodging establishment.

U.S. citizens traveling through Belarus to other countries are strongly advised that there is a transit visa requirement for entering and leaving Belarus. Transit visas are required even for travelers transiting on direct overnight trains with no stops or transfers on Belarusian territory. Transit visas should be obtained prior to any journey that requires travel through Belarus. Commonwealth of Independent States (CIS) and Russian visas are no substitute for this transit visa. Most travel agencies, including those in Russia and CIS countries, as well as train ticket sales personnel, are often not aware of this visa requirement and may not seek a transit visa for a traveler unless instructed by the traveler to do so.

U.S. citizens attempting to transit Belarus without a valid Belarusian transit visa have been denied entry into the country and forcibly removed from trains. In some instances, local border and railway authorities have threatened passengers who did not possess a valid transit visa with jail or extorted "fines." American citizens are advised not to pay any border or railway officials for transit visas or "transit visa fines," as these officials are not authorized to issue such visas. Americans finding themselves in Belarus without transit visas, if confronted by border or train personnel, should request to be put in contact with consular officials at the U.S. Embassy in Minsk.

U.S. citizens traveling to Belarus via Russia are reminded that they must possess a Russian transit visa in addition to their Belarusian visa. Russian Embassies outside of the United States, including the Russian Embassy in Belarus, generally do not issue transit or tourist visas to Americans. Russian transit visas are not normally obtainable at Russian airports.

The Law on the Legal Status of Foreign Citizens and Stateless Persons in the Republic of Belarus states that all foreign citizens may be granted permission for a temporary stay (up to 90 days within a chronological year), temporary residence (up to one year), or permanent residence. Belarusian Embassies and Consulates will issue visas for temporary stays. A temporary stay visa will allow the bearer to be present physically in Belarus for a maximum of 90 days within the 365-day period for which the visa is issued. Once an individual has spent 90 days in Belarus, at one time or through a combination of visits, he or she will not be eligible to receive another visa until the original 365-day period has passed.

Individuals who receive visas for a temporary stay, but wish to remain in Belarus for longer than 90 days, must apply for temporary or permanent residence with the Ministry of Interior. Individuals must make the application in Belarus within the 90 days allotted for a temporary stay. Permission for temporary residence can be granted to students, spouses, or close relatives of Belarusian citizens, or for "work, business, or other activities." Travelers may contact the Consular Section at the U.S. Embassy in Minsk for information about application procedures for temporary or permanent residence. Every foreigner entering Belarus is required to fill out a migration card. This card should be retained for the whole period of stay and should be presented to the border authorities when exiting Belarus.

Foreign citizens without a valid Belarusian visa, migration card, or proper registration with the Department of Citizenship and Migration as a temporary visitor or resident can be subject to sanctions up to and including deportation under the provisions of the Code of Administrative Violations. Depending on the circumstances, deportees also can be banned from returning to Belarus for a period from one to ten years.

Foreign citizens visiting and transiting Belarus also should be prepared to demonstrate sufficient financial means to support their stay. For individuals staying in Belarus for less than one month, this amount is equal to approximately $15/day/person. For those staying for longer than one month, the requirements call for $375/month/person. Belarusian officials may request this proof of funds at the time of visa application, at the border, or during registration. According to the Ministry of Interior, cash, credit cards, paid hotel reservations, or a letter from an inviting party pledging full financial support are sufficient means to demonstrate financial wherewithal.

Belarus requires all foreign nationals (other than accredited diplomats) entering the country to purchase medical insurance at the port-of-entry, regardless of any other insurance they might have. Costs for this insurance will vary according to the length of stay. (Subject to change, current information puts costs at approximately $1 for a one or two day stay, $15 for a stay of up to 31 days, and $85 for a stay of one year.)

Travelers entering Belarus by air with more than 35 kilograms of luggage (77 pounds) will be charged 2 Euros per kilogram in excess of that limit. The fee must be paid in dollars or Euros. In accordance with current customs regulations, foreigners may enter Belarus with up to $10,000 and exit the country with up to $3,000 without submitting a written declaration. For additional information on customs rules for Belarus please see the Belarusian State Customs Committee official web site.

The Belarusian Government enforces a requirement for special permits to travel in "protected border zones." The Government of Belarus has not provided information defining the parameters of those zones. Travelers should be alert for warning signs, road barriers, and/or border guard posts, and are advised not to cross into such areas without permission.

Foreign missionaries may not engage in religious activities outside the institutions that invited them unless they have a religious worker visa.

One-year validity, multiple-entry, "spiritual activities" visas, which are required of foreign missionaries, can be difficult to get, even for faiths that are registered with the government and have a long history in the country. Approval often involves a difficult bureaucratic process.

A law enacted in 2002 required all religious groups and organizations, including recognized "traditional" religions such as Russian Orthodoxy, Roman Catholicism, Orthodox Judaism, Sunni Islam, and Lutheranism, to re-register; most organizations have done so. Unregistered religious groups may not legally gather for religious purposes. Many unregistered groups continue to meet, however, leaving them vulnerable to selective implementation of the law by authorities. The law also stipulates that only Belarusian citizens can head religious organizations in Belarus. In recent years, authorities have harassed, warned, fined, and briefly detained members of some unregistered and so-called "non-traditional" faiths for engaging in unsanctioned worship or proselytism. The U.S. Embassy strongly recommends that any U.S. citizen who chooses to attend a religious service of an unregistered religious group do so only after consulting with members of the group about the risk of harassment or possible arrest by local law enforcement authorities. U.S. citizens are also urged to contact the U.S. Embassy should they encounter any problems with authorities due to their participation in such services or events.

Naturalized U.S. citizens originally from Belarus do not automatically lose Belarusian citizenship upon naturalization. Such individuals retain Belarusian citizenship unless they take specific steps to renounce it. The Belarusian authorities will allow naturalized U.S. citizens from Belarus to enter the country without a valid Belarusian passport on a "certificate of return" issued by Belarusian Embassies and Consulates, but please note that a valid Belarusian passport will be required to leave the country. It can take two to four weeks to receive a new Belarusian passport. For additional information please consult with the Embassy of Belarus at http://www.belarusembassy.org. Belarusian citizens, including dual nationals, are subject to Belarusian laws requiring service in Belarus' armed forces, as well as other laws pertaining to passports and nationality. American-Belarusian dual nationals of military age who do not wish to serve in the Belarusian armed forces should contact the Embassy of Belarus in Washington, D.C. to learn more about an exemption or deferment from Belarusian military service before going to Belarus. Without this exemption or deferment document, they may not be able to leave Belarus without completing military service, or may be subject to criminal penalties for failure to serve.

Children born to Belarusian parent(s) before August 15, 2002, even if born in the United States and in possession of a U.S. passport, may not be issued a Belarusian visa for travel to Belarus. The Belarusian government considers these children to be Belarusian citizens until age 16, when they may choose to accept or reject that claim to citizenship. Instead of a visa, a "certificate of return" is issued that will allow the child to enter Belarus. It is imperative that parents of such children understand that, in order to leave the country, the child will be required to have a Belarusian passport if he/she does not already have one. It can take anywhere from two to four weeks to complete the application procedures and receive a new Belarusian passport. (Note: if the parent left Belarus on a series PP passport, given to Belarusians who reside abroad and have cancelled their local registration, then Belarus would not require the child to reject his/her claim to citizenship). For children born to one Belarusian parent and one foreign parent after 2002, the parents must by mutual consent agree to Belarusian citizenship for the child, regardless of the place of birth. If the parents cannot reach consensus, Belarus would only force Belarusian citizenship on a child in cases where the child would be left stateless.

Visit the Embassy of Belarus web site at http://www.belarusembassy.org for the most current visa information, or contact the Embassy of Belarus at 1619 New Hampshire Avenue, NW, Washington, DC 20009, tel: 202-986-1606, fax: 202-986-1805, consul @belarusembassy.org.

Safety and Security: Both organized and spontaneous demonstrations occur in Belarus. Localized street disturbances relating to political events occur most frequently in Minsk or larger cities. In some instances, authorities may use force to disperse protesters; bystanders, including foreign nationals, may face the possibility of arrest, beating, or detention. Even demonstrations intended to be peaceful can sometimes become confrontational and escalate into violence. For this reason, it is recommended that American citizens avoid all demonstrations and protest gatherings.

Security personnel may at times place foreign visitors under surveillance. Hotel rooms, telephones, and fax machines may be monitored, and personal possessions in hotel rooms may be searched. Taking photographs of anything that could be perceived as being of military or security interest may result in problems with authorities. These sites are not always clearly marked and application of these restrictions is subject to interpretation.

For the latest security information, Americans traveling abroad should regularly monitor the Department's web site, where the current Worldwide Caution Travel Alert, Middle East and North Africa Travel Alert, Travel Warnings and other Travel Alerts can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S. and Canada, or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: Belarus has a moderate incidence of street crime. Though violent crime against foreigners is rare, criminals have been known to use force if met with resistance from victims.

Common street crimes, such as muggings and pickpocketings, occur most frequently near public transportation venues, near hotels frequented by foreigners, and/or at night in poorly lit areas.

American citizens and other foreigners in Belarus have also been the victims of car theft, car vandalism, and hotel and residential break-ins. Foreigners visiting nightclubs and discos should pay particular attention to their surroundings, as criminal elements may rob unsuspecting patrons after surreptitiously drugging their drinks. Travelers should keep a copy of their passport in a separate location from their original.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the U.S. Embassy in Minsk. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the U.S. Embassy in Minsk for assistance. The Embassy staff can, for example, assist you to find appropriate medical care, contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

The local equivalents to the "911" emergency line in Belarus are: 111 Fire and Rescue Squad, 102 Police, 103 Ambulance (Medical Emergency).

Medical Facilities and Health Information: Medical care in Belarus is limited. There is a severe shortage of basic medical supplies, including anesthetics, vaccines and antibiotics. Elderly travelers and those with existing health problems may be at risk due to inadequate medical facilities. Travelers are encouraged to ensure that they bring an adequate supply of prescription medications in the event that there are delays in departing Belarus. Tuberculosis is an increasingly serious health concern in Belarus. For further information, please consult the CDC's Travel Notice on TB at http://wwwn.cdc.gov.

The U.S. Department of State is unaware of any HIV/AIDS entry restrictions for visitors to Belarus on a 30 day visit. Long-term residents or students must obtain an HIV/AIDS test in Belarus and submit the results to the Department of Citizenship and Migration.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's web site at http://wwwn.cdc.gov/travel.

For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith/en.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Belarus is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

American citizens on short-term visits to Belarus (up to 90 days) are permitted to drive with a valid U.S. state license. U.S. citizens should, therefore, always carry their passports with them to prove date of entry into the country in the event that police stop them. If residing in Belarus for more than 90 days, one should apply for a Belarusian driver's license. Drivers will be required to successfully complete a two-part test in Russian; the first part is a computer-based multiple-choice test on local driving rules, and the second part is a driving test. To receive a local driver's license, drivers will also need to complete a medical exam at a special medical clinic, which will include a general physical, a chest x-ray, and an eye exam.

Radar traps and road construction sites, both often unlit at night, are widespread. Except for a stretch of the main east-west highway, where the speed limit is 100 km/h (60 mph), the maximum speed limit on divided highways or main roads outside village, town or city limits is 90 km/h (55 mph). Speed limits in cities are 60 km/h unless marked and will usually range between 40 km/h and 70 km/h, with frequent radar traps. Visible and hidden dangers exist, including potholes, unlit or poorly lit streets, inattentive and dark-clothed pedestrians walking on unlit roads, drivers and pedestrians under the influence of alcohol, and disregard for traffic rules. Driving in winter is especially dangerous because of ice and snow. Driving with caution is urged at all times. Radio-dispatched taxi services are generally reliable, arrive promptly once called and usually offer the lowest fare. Most radio-dispatched taxis are metered, although fares can vary greatly and are considerably higher in the late evening and overnight hours. The use of informal taxis or "gypsy cabs" is not recommended.

Minsk has a clean, safe, and efficient subway system that easily reaches most of the city center. Service is stopped briefly during the early morning hours, but otherwise runs regularly throughout the day. Ticket prices are extremely low by western standards. Though their routes are extensive, buses and trolleys lack heating or cooling capabilities and are usually crowded.

Travelers on all public transportation should be wary of pickpockets and other petty crime. For travelers interested in car rental, only one major

western rental agency currently operates in Minsk. In general, rental car networks in Belarus are not well developed.

Travelers may experience significant delays (of several hours) in crossing the border by road into neighboring countries. Visit the web site of the Republic of Belarus National Tourism Agency at http://belarustourism.by.

Aviation Safety Oversight: As there is no direct commercial air service between the United States and Belarus, the U.S. Federal Aviation Administration (FAA) has not assessed Belarus' Civil Aviation Authority for compliance with International Civil Aviation Organization (ICAO) aviation safety standards. For more information, travelers may visit the FAA's web site at http://www.faa.gov.

Special Circumstances: Traveler's checks are not widely accepted in Belarus. Most hotels accept either American Express or Visa credit cards. In addition, one hotel in Minsk, "Planeta," provides cash from Visa credit cards during business hours. Travelers face arrest if they attempt to buy items with currency other than Belarusian rubles. Authorized currency exchange centers are widely available throughout major cities.

ATMs are also available for use, and it has become easier to use credit cards and debit cards in Belarus, especially in Minsk; however, this does not mean that it is safer to do so. There have been reports of instances in which U.S. citizens have had their card numbers "skimmed" and the money in their debit accounts stolen or their credit cards fraudulently charged. ("Skimming" is the theft of credit card information by an employee of a legitimate merchant or bank, manually copying down numbers or using a magnetic stripe reader.) In addition to skimming, the risk of physical theft of credit or debit cards also exists. To prevent such theft, the Embassy recommends that travelers keep close track of their personal belongings and only carry what is needed when out. If travelers choose to use credit cards, they should regularly check their account status to ensure its integrity.

Persons seeking to marry in Belarus should consult the information located on the Embassy web site at http://minsk.usembassy.gov.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating Belarusian laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Belarus are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States. Access for U.S. consular officers to U.S. citizens in detention is often limited and/or delayed. Although U.S. citizens are able to obtain legal representation, there has been at least one case of delayed notification, hindered consular access, limited medical treatment, and trial behind closed doors.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in Belarus are encouraged to register with the U.S. Embassy through the State Department's travel registration web site and to obtain updated information on travel and security within Belarus. Americans without Internet access may register directly with the U.S. Embassy. By registering, American citizens make it easier for the Embassy to contact them in case of emergency. The U.S. Embassy is located in Minsk at 46 Starovilenskaya Ulitsa; telephone (375) 17-210-12-83 or after hours (375) 17-226-16-01, fax (375) 17-234-78-53 or (375) 17-217-71-60 (consular section). The Consular Section may also be reached by email at ConsularMinsk@state.gov.

Intercountry adoption

February 2006

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is based on public sources and current understanding. Questions involving foreign and U.S. immigration laws and legal interpretation should be addressed respectively to qualified foreign or U.S. legal counsel.

Please Note: The Government of Belarus has not completed any U.S. adoptions of Belarusian children since October 2004. Although the Government of Belarus changed its adoption procedures in 2005, intercountry adoptions involving U.S. families have yet to proceed. Thus, the information in this flyer relates to how the process should work, according to Belarusian law, if and when the Government of Belarus again begins allowing U.S. adoptions.

The very small number of immigrant visas that the U.S. Government was able to issue to Belarusian orphans in Fiscal Year 2005 reflects adoptions approved in Belarus before the Belarusian government stopped processing adoptions. The Department of State encourages U.S. citizens contemplating adopting from Belarus to monitor closely the Important Notices page of the U.S. Department of State, Bureau of Consular Affairs web site for the most recent information on Belarusian adoptions.

The government of Belarus stresses that American citizens interested in adopting a child in Belarus should not travel to that country until the stipulated adoption procedures have been completed. Belarus requires post placement reports on Belarusian orphans for the first five years after an adoption.

Patterns of Immigration: Please review current reports online at http://adoption.state.gov.

Belarusian National Adoption Center
Ms. Natalia Pospelova, Director
Platonova Str. 22, 11 th Floor
Minsk, BELARUS
Tel: 375—17-232-6701
Fax: 375—17-231-0617

Eligibility Requirements for Adoptive Parents: A prospective parent may be married, single, divorced, or widowed. A prospective parent must be at least 16 years older than the adoptive child. Single parents are permitted to adopt a child of either sex.

Residential Requirements: There are no residency requirements for Belarusian adoptions.

Time Frame: The adoption process in Belarus from start to finish generally takes 18 months.

Adoption Agencies and Attorneys: Although foreign adoption agencies are permitted to facilitate adoptions in Belarus, the actual adoption procedures are handled exclusively through Belarusian government bodies, while the foreign agency is restricted to a purely liaison role. Please review current reports online at http://travel.state.gov/family for a list of agencies.

Adoption Fees: Adoptive parents can expect to pay $18,000 to $25,000 to complete an adoption in Belarus.

Adoption Procedures: Interested American citizens should find and work with a licensed adoption agency or provider that employs representatives or facilitators in Belarus. Because prospective parents are advised that they should not travel to Belarus until a suitable child has been selected for them, a representative in Belarus is absolutely essential in order to work through the adoption process. Applicants must send their completed application, together with Russian language translations of all documents, to the consular section of the Belarusian Embassy in Washington, D.C. After verifying and notarizing the documents, the Embassy transmits them to the Belarusian Ministry of Foreign Affairs in Minsk.

The consular department of the Ministry of Foreign Affairs in Minsk checks to see that the application has been verified and properly notarized and then passes the application to the Ministry of Education in Minsk (Ministerstvo Narodnovo Obrazovaniya, or MNO). The MNO reviews the application and decides whether or not to allow the process of selecting a child for the applicant(s) to go forward. Once it has been established that there is no possibility of a child's adoption by a Belarusian family, the National Adoption Center (NAC) gains the consent of the child's guardian or orphanage director, the district (municipal) department of education, and the regional (oblast) department of education within a respective regional executive council and then initiates putting the child's name on the List of Children for Intercountry Adoption.

Identifying Foreign Prospective Adoptive Parents: Each child's case is then considered individually when the child is matched with foreign adoptive parents and the NAC forwards his/her case to the Council on Intercountry Adoption for its consideration. If the Council approves the adoption of the child to the prospective parents, the case is sent back to the NAC. The NAC will prepare the case for the Minister of Education's decision. If the Minister of Education personally approves it, the adoption case is forwarded to a regional court or the Minsk City Court (for Minsk children).

Foreign prospective adoptive parents are notified of the prospective match after it is approved by the Minister of Education. Belarusian authorities will also inform the prospective adoptive parents when their court hearing date has been set.

At this time point in the process, the prospective parents should contact the U.S. Embassy in Belarus. The U.S. Embassy is responsible for investigating whether the child meets the definition of "orphan" in the U.S. Immigration and Nationality Act. This usually consists of an interview with the parents and adopted child as well as a review of the child's medical records and other documents. When the prospective parents arrive in Belarus, they will meet the child in the presence of a representative of the local guardianship and custody authority and then go to the appropriate regional court or to the Minsk City Court. The respective court then considers the case and rules for or against the adoption of the Belarusian child to foreign adoptive parents.

Please see the *Intercountry Adoption* section of this book for more details and review current reports online at http://adoption.state.gov.

Post-Adoption Reporting Requirements: Belarusian law requires that adoptive parents register their child with the Belarusian consular office that covers the child's new place of residence. Parents should do this as soon as possible after they and the child have entered the United States. Belarusian law also requires that the appropriate social services agency in the child's new country of residence visit the child at least once a year for the first five years following the adoption and provide a report to the Government of Belarus. Parents of Belarusian adopted children may, however, choose to provide to the Belarusian embassy or consular office their own annual reports on the children's well being. Such reports serve to reassure the Government of Belarus that the United States and its citizens adequately care for and protect Belarusian adopted children.

Belarusian Citizenship: Under Belarusian law, children adopted from Belarus remain citizens of

Belarus at least until their 16th birthdays, notwithstanding the children's acquisition of a new citizenship in their new country.

When the child turns 16, the adoptive parents may apply to the Belarusian embassy in Washington to have the child's Belarusian citizenship terminated. Parents with more detailed questions concerning this process should contact the Belarusian embassy.

Embassy of the
Republic of Belarus
1619 New Hampshire Avenue, NW

Additional Information: Specific questions about adoption in Belarus may be addressed to the U.S. Embassy in Belarus. General questions regarding intercountry adoption may be addressed to the Office of Children's Issues, U.S. Department of State, CA/OCS/CI, SA-29, 4th Floor, 2201 C Street, NW, Washington, D.C. 20520-4818, toll-free Tel: 1-888-407-4747.

BELGIUM

Compiled from the August 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Kingdom of Belgium

PROFILE

Geography

Area: 32,547 square kilometers (12,566 sq. mi.), about the size of Maryland.
Cities: Capital—Brussels (pop. 1,018,804). Other cities—Antwerp (466,203); Ghent (235,143); Charleroi (201,550); Liège (188,907); Bruges (116,982); and Namur (107,653).

People

Population: (2006) 10,511,382.
Annual population growth rate: (2006.) 0.7%.
Population density: 861 per sq. mi. Linguistic regions—(Dutch-speaking) Flanders 57.9%; (French-speaking) Wallonia 31.7%; (legally bilingual) Brussels Capital Region 9.7%; German-speaking 0.7%.
Religions: Predominantly Roman Catholic, with Protestant, Jewish, Muslim, Anglican, Greek and Russian Orthodox, as well as secularism, "recognized" religions receiving government subsidies.
Languages: Dutch, French, German.
Education: Literacy—99%.

Government

Type: Parliamentary democracy under a constitutional monarch.
Independence: 1830.
Constitution: 1994 (revised).
Government branches: Executive—King (head of state), Prime Minister (head of government), Council of Ministers (cabinet). Legislative—bicameral parliament (Senate and House of Representatives).
Political parties: Christian Democratic, Liberal, Socialist, Green, Vlaams Belang.
Suffrage: Over 18, compulsory.
Political subdivisions: Ten provinces, three regions, three communities, 589 municipalities.

Economy

GDP: (PPP, 2007) $369.57 billion.
Annual real growth rate: (2007) 2.8%.
Per capita income: (PPP, 2007) $35,200.
Natural resources: Coal.
Agriculture: (1% of GDP) Products—livestock, including dairy cattle, grain, cigarettes, milk, tobacco, potatoes, and other fruits and vegetables.
Industry: (24.3% of GDP) Types—engineering and metal products, motor vehicle assembly, transportation equipment, scientific instruments, processed food and beverages, chemicals, basic metals, textiles, glass, petroleum
Trade: Exports (2007)—$352.1 billion: transportation equipment, diamonds, metals and metal products, foodstuffs, chemicals. Export partners: Germany 19.7%, France 16.9%, Netherlands 12%, U.K. 7.9%, U.S. 6.2%, Italy 5.2%. Imports (2007)—$322.9 billion: Machinery and equipment, chemicals, diamonds, foodstuffs, pharmaceuticals, transportation equipment, oil products. Import partners (2007): Netherlands 18.3%, Germany 17.3%, France 11.4%, U.K. 6.6%, Ireland 5.7%, U.S. 5.4%.

GEOGRAPHY AND PEOPLE

Belgium is located in Western Europe, bordered by the Netherlands, Germany, Luxembourg, France, and the North Sea. Although generally flat, the terrain becomes increasingly hilly and forested in the southeast (Ardennes) region. Climate is cool, temperate, and rainy; summer temperatures average 77°F, winters average 45°F. Annual extremes (rarely attained) are 10°F and 100°F.

Geographically and culturally, Belgium is at a crossroads of Europe, and during the past 2,000 years has witnessed a constant ebb and flow of different races and cultures. Consequently, Belgium is one of Europe's true melting pots with Celtic, Roman, Germanic, French, Dutch, Spanish, and Austrian cul-

tures having made an imprint. Belgium is divided ethnically into the Dutch-speaking Flemings and French-speaking Walloons, the 70,000 residents of the eastern German cantons, and the bilingual capital of Brussels. The population density is the second highest in Europe, after the Netherlands.

HISTORY

Belgium derives its name from the Belgae, a Celtic tribe. The Belgae were forced to yield to Roman legions during the first century B.C. For some 300 years thereafter, what is now Belgium flourished as a province of Rome. But Rome's power gradually lessened. In about A.D. 300, Attila the Hun invaded what is now Germany and pushed Germanic tribes into northern Belgium. About 100 years later, the Germanic tribe of the Franks invaded and took possession of Belgium.

The northern part of present-day Belgium became an overwhelmingly Germanized and Germanic-Frankish-speaking area, whereas in the southern part people continued to be Roman and spoke derivatives of Latin. After coming under the rule of the Dukes of Burgundy and, through marriage, passing into the possession of the Hapsburgs, Belgium was occupied by the Spanish (1519-1713) and the Austrians (1713-1794).

Under these various rulers, and especially during the 500 years from the 12th to the 17th century, the great cities of Ghent, Bruges, Brussels, and Antwerp took turns at being major European centers for commerce, industry (especially textiles), and art. Flemish painting—from Van Eyck and Breugel to Rubens and Van Dyck—became the most prized in Europe. Flemish tapestries hung on castle walls throughout Europe.

Following the French Revolution, Belgium was invaded and annexed by Napoleonic France in 1795. Following the defeat of Napoleon's army at the Battle of Waterloo, fought just a few miles south of Brussels, Belgium was separated from France and made part of the Netherlands by the Congress of Vienna in 1815.

In 1830, Belgium won its independence from the Dutch as a result of an uprising of the Belgian people. A constitutional monarchy was established in 1831, with a monarch invited in from the House of Saxe-Coburg Gotha in Germany.

Belgium was invaded by Germany in 1914 and again in 1940. Those invasions, plus disillusionment over postwar Soviet behavior, made Belgium one of the foremost advocates of collective security within the framework of European integration and the Atlantic partnership.

Since 1944, when British, Canadian, and American armies liberated Belgium, the country has lived in security and at a level of increased well-being.

Language, economic, and political differences between Dutch-speaking Flanders and Francophone Wallonia have led to increased divisions in Belgian society. The Industrial Revolution of the late 18th and the 19th century accentuated the linguistic North-South division. Francophone Wallonia became an early industrial boom area, affluent and politically dominant. Dutch-speaking Flanders remained agricultural and was economically and politically outdistanced by Brussels and Wallonia. The last 50 years have marked the rapid economic development of Flanders, resulting in a corresponding shift of political and economic power to the Flemish, who now constitute an absolute majority (58%) of the population.

Demonstrations in the early 1960s led to the establishment of a formal linguistic border in 1962, and elaborate rules made to protect minorities in linguistically mixed border areas. In 1970, Flemish and Francophone cultural councils were established with authority in matters of language and culture for the two-language groups. Each of the three economic regions—Flanders, Wallonia, and Brussels—was granted a significant measure of political autonomy.

Since 1984, the German language community of Belgium (in the eastern part of Liège Province) has had its own legislative assembly and executive, which have authority in cultural, language, and subsequently educational affairs.

In 1988-89, the Constitution was again amended to give additional responsibilities to the regions and communities. The most sweeping change was the devolution of educational responsibilities to the community level. As a result, the regions and communities were provided additional revenue, and Brussels was given its own legislative assembly and executive.

Another important constitutional reform occurred in the summer of 1993, changing Belgium from a unitary to a federal state. It also reformed the bicameral parliamentary system and provided for the direct election of the members of community and regional legislative councils. The bilingual Brabant province, which contained the Brussels region, was split into separate Flemish and Walloon Brabant provinces. The revised Constitution came into force in 1994.

A parliamentary democracy, Belgium has been governed by successive coalitions of two or more political parties. The centrist Christian Democratic Party often provided the Prime Minister. In the 1999 general election, Belgian voters rejected Jean Luc Dehaene's longstanding coalition government of Christian Democrats and Socialists and voted into power a coalition led by Flemish Liberal Leader Guy Verhofstadt.

The first Verhofstadt government (1999-2003) was a six-party coalition between the Flemish and Francophone Liberals, Socialists, and Greens. It was the first Liberal-led coalition in generations and the first six-party coalition in 20 years. It also was the first time the Greens had participated in Belgium's federal government. In the general election of 2003, the Greens suffered significant losses, while the Socialists posted strong gains and the Liberals also

had modest growth in electoral support. Liberal Prime Minister Guy Verhofstadt reconstituted the coalition as a four-party government in July 2003, with only the Liberals and Socialists in power.

In the 2007 general elections, the Flemish Christian Democratic CD&V recouped the lost ground, becoming the country's largest party. The two Socialist parties and Prime Minister Guy Verhofstadt's Open VLD lost support.

The Francophone Liberal MR became the largest party of Wallonia and Brussels. Following the election, the King tasked CD&V leader Yves Leterme with forming a new government. The ruling coalition is composed of Flemish Christian Democrats (CD&V), Francophone Christian Democrats (CDH), Flemish Liberals (Open VLD), Francophone Liberals (MR), and the Francophone Socialists (PS).

GOVERNMENT AND POLITICAL CONDITIONS

National Government

Belgium is a hereditary constitutional monarchy. The current monarch is King Albert II, who took the oath of office on August 9, 1993. As titular head of state, the King plays a largely ceremonial and symbolic role in the nation. His primary political function is to designate a political leader to attempt to form a new cabinet following either an election, the resignation of a government, or a parliamentary vote of no confidence. The King is seen as playing a symbolic unifying role, representing a common national Belgian identity.

The Belgian Parliament consists of a Senate and a House of Representatives. The House of Representatives has 150 directly elected members. The Senate has 71 elected members. The executive branch of the government consists of ministers and secretaries of state (junior ministers) drawn from the political parties that form the government coalition. The number of ministers is limited to 15, and they have no seat in Parliament. The Council of Ministers is chaired by the Prime Minister and consists of the ministerial heads of the executive departments. The allocation of powers between the Parliament and the Council of Ministers is somewhat similar to the United States—the Parliament enacts legislation and appropriates funds—but the Belgian Parliament does not have the same degree of independent power that the U.S. Congress has. Members of political parties represented in the government are expected to support all bills presented by the Cabinet. The House of Representatives is the "political" body that votes on motions of confidence and budgets. The Senate deals with long-term issues and votes on an

equal footing with the Chamber on a limited range of matters, including constitutional reform bills and international treaties.

The parties in the current House are the Flemish Christian Democrats (CD&V) and New Flemish Alliance (N-VA), 30 seats; Francophone Liberals (MR), 23 seats; Francophone Socialists (PS), 20 seats; Flemish Liberals (Open VLD), 18 seats; Flemish Far Right (VB), 17 seats; Flemish Socialists (SP.A) and Spirit 14 seats; Francophone Christian Democrats (CDH), 10 seats; Francophone Greens (Ecolo) 8 seats; List Dedecker, 5 seats; Flemish Greens (Groen!) 4 seats; Francophone Far Right (FN), 1 seat.

The Prime Minister and his ministers administer the government and the various public services. Ministers must defend their policies and performance in person before the House.

The Council of Ministers

At the federal level, executive power is wielded by the Council of Ministers. The Prime Minister chairs the Council. Each minister heads a governmental department. No single party or party "family" across linguistic lines holds an absolute majority of seats in Parliament. Consequently, the Council of Ministers reflects the weight of political parties that constitute the governing coalition in the House.

Principal Government Officials

Last Updated: 11/12/08

King: **ALBERT II**
Prime Min.: **Yves LETERME**
Vice Prime Min.: **Patrick DEWAEL**
Vice Prime Min.: **Joelle MILQUET**
Vice Prime Min.: **Laurette ONKELINX**
Vice Prime Min.: **Didier REYNDERS**
Vice Prime Min.: **Jo VANDEURZEN**
Min. of Civil Service & Public Enterprise: **Inge VERVOTTE**
Min. of Climate & Energy: **Paul MAGNETTE**
Min. of Defense: **Pieter DE CREM**
Min. of Development Cooperation: **Charles MICHEL**
Min. of Employment: **Joelle MILQUET**
Min. of Enterprise & Streamlining: **Vincent VAN QUICKENBORNE**
Min. of Finance & Institutional Reform: **Didier REYNDERS**
Min. of Foreign Affairs: **Karel DE GUCHT**
Min. of Interior: **Patrick DEWAEL**
Min. of Justice & Institutional Reform: **Jo VANDEURZEN**
Min. of Migration & Asylum Policy: **Annemie TURTELBOOM**
Min. of Pensions & Social Integration: **Marie ARENA**
Min. of Self-Employed & Agriculture: **Sabine LARUELLE**
Min. of Social Affairs & Public Health: **Laurette ONKELINX**
Governor, National Bank: **Guy QUADEN**
Ambassador to the US: **Dominique STRUYE de Swielande**
Permanent Representative to the UN, New York: **Jan GRAULS**

The Belgian embassy is located at 3330 Garfield Street NW, Washington, DC 20008 (tel. 202-333-6900; fax 202-333-3079).

The Electoral System

The number of seats in the House of Representatives is constitutionally set at 150, elected from 11 electoral districts. Each district is given a number of seats proportional to its total population (not number of eligible voters) ranging from 4 for the Luxembourg district to 24 for Antwerp. The districts are divided along linguistic lines: 5 Flemish, 5 Walloon, and the bilingual district of Brussels.

The Senate consists of 71 seats. For electoral purposes, Senators are divided into three categories: 40 directly elected; 21 elected by the community parliaments; and 10 "coopted" Senators. For the election of the 25 Flemish and 15 francophone directly elected Senators, the country is divided into three electoral districts—Flanders, Wallonia, and the Brussels Capital Region. Of the 21 Senators representing the communities, 10 are elected by the Flemish Parliament, 10 by the French Community Parliament, and 1 by the German-language Parliament.

The remaining category, the 10 "coopted" senators, are elected by the first two groups of senators. The princes and princesses of the royal line are also members of the Senate—currently Prince Phillippe, Prince Laurent, and Princess Astrid.

In Belgium, there are no "national" parties operating on both sides of the linguistic border. Consequently, elections are a contest among Flemish parties in Dutch-speaking Flanders and Francophone parties in Wallonia. Only in officially bilingual Brussels can voters choose from either Flemish or Francophone parties. Several months before an election, the parties form a list of candidates for each district. Parties are allowed to place as many candidates on their "list" as there are seats available. The formation of the list is an internal process that varies with each party. The number of seats each party receives and where on a list a candidate is placed, or how many individual votes a candidate receives, determines whether a candidate is elected. Since no single party holds an absolute majority in Parliament, after each election the strongest party or "party family" will create a coalition with other parties to form the government. Voting is compulsory in Belgium; more than 90% of eligible voters participate. Belgium has 25 seats in the European Parliament.

Belgium's Linguistic Divide

In August 1980, the Belgian Parliament passed a devolution bill and amended the Constitution, establishing "Community autonomy." As a result, in Flanders, the Flemish Parliament and government are competent for both regional and community affairs; in Wallonia, the Francophone Community Parliament and government are competent for community affairs, while the Walloon Regional Parliament and government are responsible for regional affairs. Subsequent constitutional reform established a community Parliament and government governments for the German-speaking cantons in 1983, and a regional Parliament and government for the Brussels Capital Region in 1989. The regional and community governments have jurisdiction over transportation, public works, water policy, cultural matters, education,

public health, environment, housing, zoning, economic and industrial policy, agriculture, foreign trade, and oversight of provincial and local governments. They rely on a system of revenue sharing with the federal government for most of their funds. They have the authority to levy taxes (mostly surcharges) and contract loans. Moreover, they have obtained treaty-making power for those issues coming under their respective jurisdictions.

Of total public spending—interest payments not considered—more than 40% is authorized by the regions and communities.

Provincial and Local Government

In addition to three regions and three cultural communities, Belgium also is divided into 10 provinces and 589 municipalities.

The provincial governments are primarily administrative units and are politically weak. A governor appointed by the King presides over each province. Each governor is supported by an elected Provincial Council of 47 to 84 members (depending on the size of the province), which sits only four weeks a year. Municipal governments, on the other hand, are vigorous political entities with significant powers and a history of independence dating from medieval times. Many national politicians originate from municipal political bases; and many often double as mayor or alderman in their hometowns in addition to their federal and regional political positions.

Political Parties

From the creation of the Belgian state in 1830 and throughout most of the 19th century, two political parties dominated Belgian politics: the Catholic Party and the Liberal Party. In the late 19th century the Socialist Party arose, representing the emerging industrial working class. These three groups still dominate Belgian governments, but they have evolved substantially in character and face new electoral challengers.

The Christian Democratic Parties. After World War II, the Catholic (subsequently Christian Democratic) Party severed its formal ties with the Church. It became a mass party of the center (more like a political party in the United States). In 1968, the Christian Democratic Party responded to linguistic tensions in the country by dividing into two independent parties, now known as the Center Democratic and Humanistic (CDH) in Francophone Wallonia and the Flemish Christian Democrats (CD&V) in Flanders. The two parties share similar policies, but not on institutional issues. The CD&V is the country's largest party, while the CDH is among the smaller parties.

The Socialist Parties. The modern Belgian Socialist parties are labor- and city-based parties. Despite the post-World War II dominance of the Christian Democrats, the Socialists headed several postwar governments. The Socialists also split along linguistic lines in 1978. The francophone Socialists dominate the cities and towns of Wallonia's industrial basin. The Flemish Socialists' support is less concentrated. The two parties are of almost equal strength.

The Liberal Parties. In modern times, the Liberal Parties in Belgium have chiefly appealed to business people, property owners, shopkeepers, and the self-employed. In American terms, the Liberals' positions could be considered to reflect a more conservative free market oriented economic ideology. This non-interventionist ideology is reflected also in the parties' strong support for gay marriage, homosexual adoption, and euthanasia. The two current Liberal parties were formed in 1971, after the original all-Belgium Liberal Party split along linguistic lines. They are the Flemish Liberals and Democrats (Open VLD) (Prime Minister Verhofstadt's party) in Flanders and the Reform Movement (MR) in Wallonia. The latter is the largest party in Wallonia and Brussels.

Greens. The Flemish (Groen!) and Francophone (ECOLO) ecologist parties made their Parliamentary breakthrough in 1981. Following significant gains in the 1999 general elections, the two Green parties joined a federal coalition cabinet for the first time in their history in Prime Minister Verhofstadt's first six-party coalition government. The parties experienced significant losses in the May 2003 election, however; with ECOLO winning only four seats in the Chamber and AGALEV failing to win any seats. They were thus excluded from the new coalition formed by returning Liberal Prime Minister Verhofstadt in 2003. Following the election, AGALEV changed its name to "Groen!." The two parties made a slight recovery in the 2007 general elections.

The Linguistic Parties. A postwar phenomenon in Belgium was the emergence of linguistic-based parties, which were formed to defend the cultural, political, and economic interests of one of the linguistic groups or regions of Belgian society.

The far-right Vlaams Belang (Flemish Interest) is the most militant Flemish regional party, with a separatist, anti-immigration, law and order platform. The Vlaams Belang was formerly called the Vlaams Bloc, until a 2004 high court ruling confirmed a lower court verdict that the Bloc was a "racist" party. Faced with further legal problems, the Bloc disbanded and resurrected itself as the Vlaams Belang, with the same party leaders and basically the same radical party policy. The Vlaams Belang was the second most popular party in the 2007 general elections, with 19% of the Flemish vote.

In Brussels and Wallonia, the small far-right Front National (FN) managed to hold on to its only House seat in the 2007 general elections.

The now-defunct Volksunie Party (VU) was the most militant Flemish regional party in Parliament in the 1950s and 1960s, drawing nearly one-quarter of Belgium's Dutch-speaking electorate at the height of its popularity. However, as much of the VU's nationalist agenda was realized through subsequent constitutional reforms that saw the devolution of significant power to the Regions, the

VU suffered severe setbacks. It ultimately splintered into a traditional Flemish nationalist faction, the NVA (currently in alliance with the CD&V), and a more liberal faction, Spirit (in an electoral alliance with the Flemish Socialist Party).

Labor Unions

Belgium is a highly unionized country, and organized labor has been a powerful influence in politics, although less so in recent elections. About 53% of all private sector and public service employees are labor union members. Unlike many American unions, Belgian labor unions take positions on a wide range of political issues, including education, public finance, defense spending, environmental protection, women's rights, abortion, and other issues. They also provide a range of services, including the administration of unemployment benefits and health insurance programs.

Belgium's three principal trade union organizations are the Confederation of Catholic Labor Unions (CSC/ACV), the Belgian Socialist Confederation of Labor (FGTB/ABVV), and the Confederation of Liberal Labor Unions (CGSLB/ACLVB). Until the 1950s, the FGTB/ABVV was the largest confederation; since then, however, the CSC/ACV has become the leading trade union force.

The Confederation of Catholic Labor Unions (CSC/ACV). Organized in 1912, the CSC/ACV rejected the Marxist concept of "class struggle" and seeks to achieve a just social order based on Christian principles. The CSC/ACV is not formally linked to its party political counterparts, the Christian Democratic parties (CD&V and CDH) but exercises influence in their councils. The CSC/ACV is the leading union in all Flemish provinces and in Wallonia's Luxembourg province. It has almost equal strength with the socialist confederation in the Brussels area.

The Belgian Socialist Confederation of Labor (FGTB/ABVV). The FGTB/ABVV derives from the Socialist Trade Union Movement, established in the late 19th century in Walloon industrial areas, Brussels, and urban areas of Flanders. Today, the FGTB/ABVV is the leading union in the Hainaut, Namur, and Liège provinces and matches the CSC/ACV in Brussels.

The Confederation of Liberal Labor Unions (CGSLB/ACLVB). With 240,000 members, this is the smallest of the major union groups. Drawing primarily from management positions, the Brussels-based CGLB/ACVB is Belgium's most probusiness union.

Current Issues

Belgium is a member of the European Economic and Monetary Union. Budgetary issues, the aging population, and the low employment rate remain key concerns of the government.

Belgium's reaction to the September 11, 2001 terrorist attacks was strong and supportive. For example, Belgium played a key role in helping to obtain EU-wide agreement on a European arrest warrant and in facilitating extradition of terrorist suspects. In support of Operation Enduring Freedom, Belgium contributed a navy frigate in the Mediterranean, AWAC crews for surveillance flights over the United States, as well as aircraft for humanitarian assistance to Afghanistan. Belgium has contributed ground troops to ISAF since 2002 and provides humanitarian and reconstruction assistance to both Afghanistan and Iraq. In 2006, Belgium sent about 400 peacekeepers to Lebanon in support of the UN mission there.

Current issues before the government include improving the climate for foreign investment, dealing with rising health care costs, and adjusting the federal social security system to a rapidly aging population.

Belgium continues to increase its counter-terrorism capabilities by adding domestic legislative, judicial, intelligence, and law enforcement tools that increase its ability to prevent or respond to terrorism. The government also cooperates closely with other European states and the United States in investigating cases of international terrorism. Belgium operates within UN and EU frameworks concerning the freezing of terrorist assets, and in 2007 enacted a domestic legal framework to act independently.

ECONOMY

Belgium, a highly developed market economy, belongs to the Organization for Economic Cooperation and Development (OECD), a group of leading industrialized democracies. With a geographic area about equal to that of Maryland, and a population of 10.5 million, Belgian per capita GDP ranks among the world's highest. In 2007, the per capita income (PPP) was $35,200. The federal government has managed to present balanced budgets in recent years, but public debt remains high, at 91% of 2007 GDP. GDP growth in 2007 was 2.8%.

Densely populated Belgium is located at the heart of one of the world's most highly industrialized regions. The first country to undergo an industrial revolution on the continent of Europe in the early 1800s, Belgium developed an excellent transportation infrastructure of ports, canals, railways, and highways to integrate its industry with that of its neighbors. One of the founding members of the European Community (EC), Belgium strongly supports deepening the powers of the present-day European Union to integrate European economies further.

With exports equivalent to over two-thirds of GNP, Belgium depends heavily on world trade. Belgium's trade advantages are derived from its central geographic location and a highly skilled, multilingual, and productive work force.

The Belgian industrial sector can be compared to a complex processing machine: It imports raw materials and semi-finished goods that are further processed and re-exported. Except for its coal, which is no longer economical to exploit, Belgium has

virtually no natural resources. Nonetheless, most traditional industrial sectors are represented in the economy, including steel, textiles, refining, chemicals, food processing, pharmaceuticals, automobiles, electronics, and machinery fabrication. Despite the heavy industrial component, services account for 74.6% of GDP. Agriculture accounts for only 1.4% of the GDP.

Belgian Economy in the 20th Century

For 200 years through World War I, French-speaking Wallonia was a technically advanced, industrial region, while Dutch-speaking Flanders was predominantly agricultural. This disparity began to fade during the interwar period. As Belgium emerged from World War II with its industrial infrastructure relatively undamaged, the stage was set for a period of rapid development, particularly in Flanders. The postwar boom years contributed to the rapid expansion of light industry throughout most of Flanders, particularly along a corridor stretching between Brussels and Antwerp (now the second-largest port in Europe after Rotterdam), where a major concentration of petrochemical industries developed.

The older, traditional industries of Wallonia, particularly steelmaking, began to lose their competitive edge during this period, but the general growth of world prosperity masked this deterioration until the 1973 and 1979 oil price shocks sent the economy into a period of prolonged recession. In the 1980s and 1990s, the economic center of the country continued to shift northward to Flanders.

Foreign Investment

Foreign investment contributed significantly to Belgian economic growth in the 1960s. In particular, U.S. firms played a leading role in the expansion of light industrial and petrochemical industries in the 1960s and 1970s. The Belgian Government encourages new foreign investment as a means to promote employment. With regional devolution, Flanders, Brussels, and Wallonia now have substantial autonomy in courting potential foreign investors, as each deems appropriate.

Foreign direct investment totaled more than $354 billion (cumulative) in 2006. U.S. and other foreign companies in Belgium account for approximately 11% of the total work force, with the U.S. share at about 6%. U.S. companies are heavily represented in the chemical sector, automotive assembly, and petroleum refining. A number of U.S. service industries followed in the wake of these investments—banks, law firms, public relations, accounting, and executive search firms.

The resident American community in Belgium now exceeds 20,000. Attracted by the EU 1992 single-market program, many U.S. law firms and lawyers have settled in Brussels since 1989.

Monetary

On May 1, 1998, Belgium became a first-tier member of the European Monetary Union. Belgium switched from the Belgian franc (BF) to the Euro as its currency after January 1, 2002.

Trade

About 78% of Belgium's trade is with fellow EU member states. Given this high percentage, Belgium seeks to diversify and expand trade opportunities with non-EC countries. Belgium ranks as the 11th-largest market for the export of U.S. goods and services. If goods in transit to other European countries are excluded, Belgium ranks as the 12th-largest market for U.S. goods.

Bilaterally, there are few points of friction with the U.S. in the trade and economic area. The Belgian authorities are, as a rule, anti-protectionist and try to maintain a hospitable and open trade and investment climate. As a result, the U.S. Government focuses its market-opening efforts on the EU Commission and larger member states. Moreover, the Commission negotiates on trade issues for all member states, which, in turn lessens bilateral trade disputes with Belgium.

Employment

The social security system, which expanded rapidly during the prosperous 1950s and 1960s, includes a medical system, unemployment insurance coverage, child allowances, invalid benefits, and other benefits and pensions. With the onset of a recession in the 1970s, this system became an increasing burden on the economy and accounted for much of the government budget deficits. The national unemployment figures mask considerable differences between Flanders and Wallonia. Unemployment in Wallonia is mainly structural, while in Flanders it is cyclical. Flanders' unemployment level equals only half that of Wallonia. The southern region continues a difficult transition out of sunset industries (mainly coal and steel), while sunrise industries (chemicals, high-tech, and services) dominate in Flanders.

Belgium's unemployment rate was 7% in 2007. A total of 4.4 million people make up Belgium's labor force. The majority of these people (73%) work in the service sector. Belgian industry claims 25% of the labor force and agriculture only 2%. As in other industrialized nations, pension and other social entitlement programs have become a major concern as the "baby boom" generation approaches retirement.

Budget

Although Belgium is a wealthy country, public expenditures far exceeded income for many years, and taxes were not diligently pursued. The Belgian Government reacted with poor macroeconomic policies to the 1973 and 1979 oil price hikes by hiring the redundant work force into the public sector and subsidizing industries like coal, steel, textiles, glass, and shipbuilding, which had lost their international competitive edge. As a result, cumulative government debt reached 121% of GDP by the end of the 1980s. However, thanks to Bel-

gium's high personal savings rate, the Belgian Government financed the deficit from mainly domestic savings, minimizing the deleterious effects on the overall economy.

The federal government ran a 7.1% budget deficit in 1992 at the time of the EU's Treaty of Maastricht, which established conditions for Economic and Monetary Union (EMU) that led to adoption of the common Euro currency on January 1, 2002. Among other criteria spelled out under the Maastricht treaty, the Belgian Government had to attain a budget deficit of no greater than 3% of GDP by the end of 1997; Belgium achieved this, with a total budget deficit in 2001 (just prior to implementation of the Euro currency) that amounted to 0.2% of GDP. The government has balanced the budget every year since. Belgium's accumulated public debt remains high, but the liberal-socialist coalition government has paid it down to 91% of 2007 GDP.

FOREIGN RELATIONS

The Concert of Nations sanctioned the creation of Belgium in 1830 on the condition that the country remains strictly neutral. During the two World Wars, Belgium tried but was unable to follow a policy of neutrality due to the German invasions. In 1948, Belgium signed the Treaty of Brussels with Great Britain, France, the Netherlands, and Luxembourg, and a year later became one of the founding members of NATO.

Belgium remains a strong proponent of both NATO and European defense efforts. Belgium also is a strong advocate of strengthening economic and political integration within the EU. Having federalized their own country, many Belgians view themselves as the ultimate "European federalists."

Both NATO (since 1966) and the EU have their headquarters in Brussels; SHAPE (Supreme Headquarters Allied Powers Europe, NATO's military headquarters) is in the south of the country, near Mons.

Belgium supported the expansion of NATO and EU membership to the new democracies of central and eastern Europe and is actively engaged in the Organization for Security and Cooperation (OSCE) in Europe. Belgium served as the Chair-in-Office of the OSCE in 2006. Belgium sits on the United Nations Security Council during 2007-2008.

U.S.-BELGIAN RELATIONS

The United States and Belgium are good friends and allies, despite occasional disagreements on a limited number of foreign policy issues. Good will and affection for Americans continues as a result of the U.S. role during and after the two World Wars, which was exhibited in 2004 during the 60th anniversary commemorations of the Battle of the Bulge and the liberation of Belgium. Continuing to celebrate cooperative U.S. and Belgian relations, 2007 marks the 175tth anniversary of the nations' relationship.

The U.S. appreciates Belgian activism in international affairs, including its participation in the International Security Assistance Force in Afghanistan, its reconstruction and development assistance to Iraq, its peacekeeping missions in the Balkans and Lebanon, its frequent provision of airlift in international crises, and its hosting of 2005 and 2007 transatlantic dialogues between European foreign ministers and the Secretary of State. During the January 17, 2006 visit by Prime Minister Verhofstadt, President Bush thanked him for his "leadership" in helping "the people of the Congo realize their full potential." The U.S. continues to believe that Belgium could be even more active in sharing international security concerns.

As an outward-looking nation, Belgium works closely with the United States bilaterally and in international and regional organizations to encourage economic and political cooperation and assistance to developing countries. Belgium has welcomed hundreds of U.S. firms to its territory, many of which have their European headquarters there.

TRAVEL

Consular Information Sheet

October 3, 2008

Country Description: Belgium is a highly developed and stable democracy with a modern economy. Tourist facilities are widely available.

Entry Requirements: Belgium is a party to the Schengen agreement. As such, U.S. citizens may enter Belgium for up to 90 days for tourist or business purposes without a visa. The passport should be valid for at least three months beyond the period of stay. Sufficient funds and a return airline ticket are required. For further details about travel into and within Schengen countries, please see our fact sheet. For further information concerning entry requirements, contact the Embassy of Belgium at 3330 Garfield Street NW, Washington, DC 20008, telephone (202) 333-6900; or one of the Belgian Consulates General in Atlanta, Los Angeles, or New York. Visit the Belgian Embassy web site at http://www.diplobel.org/usa for the most current visa information.

Belgian law requires that everyone carry some form of official identification at all times, which must be displayed upon request to any Belgian police official. A U.S. passport suffices for these purposes. See the section on "Special Circumstances" below for information on new business visitor and employee registration requirements.

Safety and Security: Belgium remains largely free of terrorist incidents. Belgian law enforcement and security officials, in close cooperation with neighboring countries, maintain a solid anti-terrorism effort and a peaceful environment for tourists and business. However, like other countries that are members of the Schengen Agreement of free cross-border movement, Belgium's open borders with its European neighbors allow the possibility for terrorist groups to enter/exit the country with anonymity.

Prior police approval is required for public demonstrations in Belgium, and police oversight is routinely provided to ensure adequate security for participants and passers-by. Nonetheless, situations may develop that could pose a threat to public safety. U.S. citizens are advised to avoid areas where public demonstrations are taking place.

For the latest security information, Americans traveling abroad should regularly monitor the Department's Internet web site at http://travel.state.gov, where the current Worldwide Caution Travel Alert, Travel Warnings and Travel Alerts can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S., or, for callers outside the U.S. and Canada, a regular toll line at 1-202-501-4444.

Crime: Belgium remains relatively free of violent crime, but low-level street crime is common. Visitors should always be watchful and aware of their surroundings, however, because muggings, purse snatchings, and pick pocketing occur frequently, particularly in the major cities. Transportation hubs like the Metro (subway) and train stations are also frequented by thieves who take advantage of disoriented travelers who are carrying luggage. In Brussels, pick pocketing, purse snatching, and theft of light luggage and laptops are common at the three major train stations—the North Station (Noordstation or Gare du Nord), the Central Station (Centraal Station or Gare Central) and especially at the South Station (Zuidstation or Gare du Midi). The latter is a primary international train hub, and travelers are advised to pay very close attention to their personal belongings when in the station. Common ploys are to distract the victim by spraying shaving cream or another substance on his or her back or asking for directions while an accomplice steals the luggage. It is a good idea to remain in physical contact with hand luggage at all times, and not to place carry-on luggage on overhead racks in trains.

Another growing problem, especially in Brussels, is theft from vehicles, both moving and parked. Do not leave valuables in plain sight where a thief may spot them. Thieves will sometimes position themselves at stop lights to scan for valuables in stopped cars. If they see a purse or other valuable item they break the window and steal the item while the victim is stunned. Expensive car stereos and GSP navigational devices are often stolen from parked cars. Always drive with windows up and doors locked.

Travelers to Brussels should be aware that small groups of young men sometimes prey on unwary tourists, usually at night and often in Metro stations. Items such as expensive mobile phones and MP3 players are often the target. Travelers should carry only a minimum amount of cash, credit cards, and personal identification. Wearing expensive jewelry and watches is discouraged.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can assist you to find appropriate medical care, contact family members or

friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

Medical Facilities and Health Information: Good medical facilities are widely available in Belgium. The large university hospitals can handle almost every medical problem. Hospitals in Brussels and Flemish-speaking Flanders will probably have English-speaking staff. Hospitals in French-speaking Wallonia may not have staff members who are fluent in English, however. The Embassy Consular Section maintains a list of English-speaking doctors, which can be found on the Embassy web site at http://brussels.usembassy.gov/medical_facilities.html. Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's web site at http://wwwn.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Belgium is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

Belgian urban highways are generally well built and maintained with extensive lighting systems, but rain and fog often reduce visibility. Rural roads are less likely to be illuminated at night. Belgian rules for right-of-way differ from those in the U.S., and new drivers should thoroughly understand these rules before driving in Belgium. For instance, traffic coming from the right generally has priority at uncontrolled intersections and roundabouts, even if coming from a smaller street. The maximum speed limit on Belgian highways is 120 kilometers (72 miles) per hour, but is not always posted except at Belgium's borders and on roads leaving major airports. The maximum speed in urban areas is normally 50 km (30 miles) per hour. Claims of ignorance may not prevent a significant fine for speeding, which can also lead to the vehicle's being impounded if the driver is unable to pay the fine on the spot. Belgian police also conduct breath analysis checks for alcohol use, particularly at night and during major holidays.

Roadside assistance and information on road conditions are available in English from Touring Mobilis, tel: 0900 10280. Belgian police will also provide information on road conditions, tel: 02-642-6666. Visit the website of Belgium's national tourist office at http://www.visitbelgium.com.

Aviation Safety Oversight: The U.S. Federal Aviation Administration (FAA) has assessed the Government of Belgium's Civil Aviation Authority as being in compliance with International Civil Aviation Organization (ICAO) aviation safety standards for oversight of Belgium's air carrier operations. For more information, travelers may visit the FAA's website at http://www.faa.gov.

Special Circumstances: While most forms of monetary transactions are available (cash, credit cards), U.S. money orders cannot be negotiated in Belgium. Personal checks may only be cleared through a bank at which a person holds an account and clearance can take from two to four weeks. Banks and exchange facilities may refuse U.S. dollar denominations of $50 and $100 if they are not equipped with devices to identify counterfeit currency. Automated Teller Machines (ATMs) are widespread in Belgium and accept most U.S. ATM cards to withdraw funds. Travelers seeking to purchase Euros are more likely to find a more favorable exchange rate at banks than at money exchange facilities located at tourist locations, train stations, and airports. Please see our Customs Information.

Non-EU citizens visiting Belgium and staying in a private residence are required by Belgian law to register with local Commune authorities within three days of their arrival. Any change in visa or resident status must also be requested through Commune authorities and must be completed prior to the expiration of the current status. Given the requirements to change status in Belgium, it is nearly impossible to do so within the 90 days permitted to remain in Belgium without a visa under the Visa Waiver Program.

New Business Visitor and Employee Registration Requirement: Since April 1, 2007 non-Belgian employers and self-employed persons or their employees who carry out short term assignments in Belgium must declare these activities in advance.

This mandatory "Limosa" declaration applies to: (1) Employees and apprentices, who come to Belgium to execute certain temporary work and who, because of the nature of their short term assignment, are not subject to the Belgian social security system; (2) Self-employed people and self-employed apprentices who come to work in Belgium temporarily, irrespective of whether they are subject to the Belgian social security system. Some exceptions to this general obligation exist. Certain persons may be exempted, especially for short-term assignments. For more information about the Limosa declaration, visit https://www.socialsecurity.be/foreign/en/employer_limosa/home.html. For more information about working in Belgium, please see http://www.employment.belgium.be/home.aspx.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses.

Persons violating Belgian laws, even unknowingly, may be expelled, arrested, or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Belgium are severe, and convicted offenders can expect long jail sentences and heavy fines.

Engaging in illicit sexual conduct with children or using or disseminating child pornography in a foreign country is a crime that is prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in Belgium are encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration web site so that they can obtain updated information on travel and security within Belgium. Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate.

By registering, American citizens make it easier for the Embassy to contact them in case of emergency. The U.S. Embassy in Brussels is located at 25 Boulevard du Regent. The telephone number from the U.S. is 011-32-2-508-2111. Within Belgium, the telephone number is 02-508-2111. The Embassy's fax number is 02-511-2725.

The Consular Section's fax number is 02-513-0409. The American Citizen Services Unit of the Consular Section is open from 1:30 to 4:30 p.m. Monday through Friday, except for American and Belgian holidays. Further information can be obtained at the Embassy's web site at http://brussels.usembassy.gov.

Intercountry Adoption

May 2006

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is based on public sources and current understanding. Questions involving foreign and U.S. immigration laws and legal interpretation should be addressed respectively to qualified foreign or U.S. legal counsel.

Please Note: Belgium is not a country of origin for intercountry adoption.

Patterns of Immigration: Recent U.S. immigrant visa statistics indicate only one immigrant visa was issued to a Belgian orphan in the last five fiscal years.

Adoption Authority: Residents of the Flemish-speaking part of Belgium should contact:

Kind en Gezin
Hallepoortlaan 27
1060 Brussels
Tel.: (02) 533 1476

Residents of the French-speaking part of Belgium should contact:

Autorité Communautaire pour l'Adoption Internationale (ACAI)
Boulevard Leopold II, 44,
1080 Brussels
Tel.: (02) 413 2726

Residents of the German-speaking community should contact:

Ministerium der Deutschsprachigen Gemeinschaft
Zentrale Behörde der Deutschsprachigen Gemeinschaft für Adoptionen
Gospertstrasse 1
B-4700 Eupen
Fax.: +32 (87) 55 64 74
Tel.: + 32 (87) 59 63 46

These organizations will provide you with detailed information on the adoption procedures and with a list of recognized adoption agencies in Belgium.

Eligibility Requirements for Adoptive Parents: Minimum age requirement is 25. The civil status depends on the laws of the country of origin of the child to be adopted. Please note there are no Belgian children for adoption, only third country national children.

Residency Requirements: Prospective adoptive parents must be resident in Belgium to adopt in third countries.

Time Frame: The time it takes to complete an adoption varies, depending on the child's country of origin.

Adoption Agencies and Attorneys: Prospective adoptive parents should contact the adoption authority for the region of Belgium where they reside for information on Belgian adoption agencies. Prospective adoptive parents are advised to fully research any adoption agency or facilitator they plan to use for adoption services.

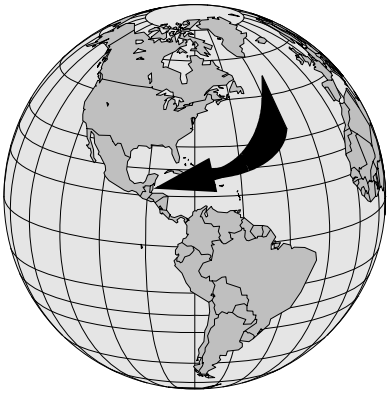
Adoption Fees: Most fees will depend on the child's country of origin. Belgian fees forgetting pre-approved (including the home study) vary depending on which community (Flemish-speaking, French speaking) prospective adoptive parents reside in.

Adoption Procedures: An application must be submitted in writing to one of the adoption authorities listed above. Upon receipt of the application, two meetings with a social worker will be scheduled. If the social worker approves, the applicant(s) will begin a one-year period of registration that will include a monthly meet-

ing at the adoption agency. If the agency so recommends, the applicant(s) will be referred to an 'adoption jury,' which will make a decision as to whether the applicant is fit to adopt. That decision, if positive, is followed by a home study, a psychological evaluation and a medical examination. At that point the applicant will be introduced to the child.

This process can take up to three years. After the prospective parents and child have met, the legal adoption procedure, which can take another year, begins. This procedure requires the written consent of both biological parents if they are living, or sole, surviving parent, if applicable. After their consent is obtained, an 'adoption act' is prepared and a request to legalize the adoption is submitted to court with a copy to the General Prosecutor. The Prosecutor investigates and offers his opinion to the judge who makes the final decision on full adoption.

Required Documents: Prospective adoptive parents will have to undergo a home study, a psychological evaluation and medical examination, once they are approved by an adoption jury to adopt.



Embassy of Belgium
3330 Garfield Street N.W.
Washington, D.C. 20008
Tel.: (202) 333-6900
Fax (202) 333-5457
E-mail: washington@diplobel.org

Belgium also has Consulates in Atlanta, Chicago, Los Angeles, and New York.

U.S. Immigration Requirements: Prospective adoptive parents are strongly encouraged to consult USCIS publication M-249, *The Immigration of Adopted and Prospective Adoptive Children*, as well as the Department of State publication, *Intercountry Adoptions*. Please see the *Intercountry Adoption* section of this book for more details and review current reports online at http://adoption.state.gov.

U.S. Embassy in Belgium:
Boulevard du Regent 25
1000 Brussels
Tel.: (02) 508-2537
Fax: (02) 513- 0409
E-mail: uscitizenbrussels@state.gov

Additional Information: Specific questions about adoption in Belgium may be addressed to the U.S. Embassy in Brussels. Questions about adoption in third countries should be directed to the U.S. Embassies in those countries. General questions regarding intercountry adoption may be addressed to the Office of Children's Issues, U.S. Department of State, CA/OCS/CI, SA-29, 4th Floor, 2201 C Street, NW, Washington, D.C. 20520-4818, toll-free Tel: 1-888-407-4747.

BELIZE

Compiled from the October 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Belize

PROFILE

Geography

Area: 22,966 sq. km. (8,867 sq. mi.); slightly larger than Massachusetts.

Cities: Capital—Belmopan (2005 pop. est. 13,500) Other cities and towns—Belize City (60,800), Corozal (8,800), Orange Walk (15,300), San Ignacio & Santa Elena (16,800), Dangriga (10,800), Punta Gorda (5,000), and San Pedro (8,400).

Terrain: Flat and swampy coastline, low mountains in interior.

Climate: Subtropical (dry and wet seasons). Hot and humid. Rainfall ranges from 60 inches in the north to 200 inches in the south annually.

People

Nationality: Noun and adjective—Belizean(s).

Population: (2007 est.) 314,300

Annual growth rate: (2007 est.)1.8%.

Ethnic groups: Creole, Garifuna, Mestizo, Mayan.

Religions: Roman Catholic, Anglican, Methodist, other Protestant, Muslim, Hindu, and Buddhist.

Languages: English (official), Creole, Spanish, Garifuna, Mayan.

Education: Years compulsory—9. (2005 est.) Attendance—60%. Literacy—76.5%.

Health: (2006) Infant mortality rate—19.6/1,000. Life expectancy—67.4 years.

Work force: (April 2006, 112,806) Services—60%. Agriculture, hunting, forestry, and fishing—22%. Industry and commerce—16%.

Government

Type: Parliamentary democracy

Independence: September 21, 1981.

Constitution: September 21, 1981.

Government branches: Executive—British monarch (head of state), represented by a governor general; prime minister (head of government, 5-year term). Legislative—bicameral National Assembly. Judicial—Supreme Court, Court of Appeal, district magistrates.

Political subdivisions: Six districts.

Political parties: People's United Party (PUP), United Democratic Party (UDP), National Alliance for Belizean Rights (NABR). National Reform Party (NRP), Vision Inspired By the People (VIP), People's National Party (PNP), We the People (WTP).

Suffrage: Universal adult.

Economy

GDP: (2006) $1.22 billion.

Annual growth rate: (2007) 1.6%; (2006) 5.6%.

Per capita income: (2005) $3,650.

Avg. inflation rate: (2006) 4.3%.

Natural resources: Arable land, timber, seafood, minerals.

Economy: Primary sectors (12.5% of GDP, 2006): Agriculture, forestry, fishing, and mining. Secondary sectors (17.8% of GDP, 2006): Manufacturing, electricity and water supply, and construction. Tertiary sectors (60.9% of GDP, 2006): Hotels and restaurants, financial intermediation, and transport and communication.

Trade: Exports (2006)—$268.2 million: cane sugar, clothing, citrus concentrate, lobster, fish, banana, and farmed shrimp. Major markets—U.S. (41.8%), U.K., CARICOM. Imports (2006)—$660.4 million: food, consumer goods, machinery, mineral fuels and lubricants. Major suppliers—U.S. (38.7%), Central America and Mexico.

Exchange rate: Since 1976 Belizean banks have bought U.S. dollars at the rate of 2.0175 and sold them at 1.9825, making for an effective fixed rate of Belize $2=U.S. $1.

PEOPLE

Belize is the most sparsely populated nation in Central America. It is larger than El Salvador and compares in size to the State of Massachusetts. Slightly more than half of the population lives in rural areas.

About one-fourth live in Belize City, the principal port, commercial center, and former capital. More than one-third of the population is comprised of persons younger than 14 years of age.

Most Belizeans are of multiracial descent. About 43.7% of the population is of mixed Mayan and European descent (Mestizo); 29.8% are of African and Afro-European (Creole) ancestry; about 11.0% are Mayan; and about 6.6% are Afro-Amerindian (Garifuna). The remainder, about 8.9%, includes European, East Indian, Chinese, Middle Eastern, and North American groups.

English, the official language, is spoken by virtually all except the refugees who arrived during the past decade. Spanish is the native tongue of about 50% of the people and is spoken as a second language by another 20%. The various Mayan groups still speak their indigenous languages, and an English Creole dialect similar to the Creole dialects of the English-speaking Caribbean Islands is spoken by most. The rate of functional literacy is 76%. About 50% of the population is Roman Catholic; the Anglican Church and other Protestant Christian groups account for most of the remaining 50%. Mennonite settlers number about 8,500.

HISTORY

The Mayan civilization spread into the area of Belize between 1500 BC and AD 300 and flourished until about AD 1200. Several major archeological sites—notably Caracol, Lamanai, Lubaantun, Altun Ha, and Xunantunich—reflect the advanced civilization and much denser population of that period. European contact began in 1502 when Christopher Columbus sailed along the coast. The first recorded European settlement was established by shipwrecked English seamen in 1638. Over the next 150 years, more English settlements were established. This period also was marked by piracy, indiscriminate logging, and sporadic attacks by Indians and neighboring Spanish settlements. Great Britain first sent an official representative to the area in the late 18th century, but Belize was not formally termed the "Colony of British Honduras" until 1840. It became a crown colony in 1862. Subsequently, several constitutional changes were enacted to expand representative government.

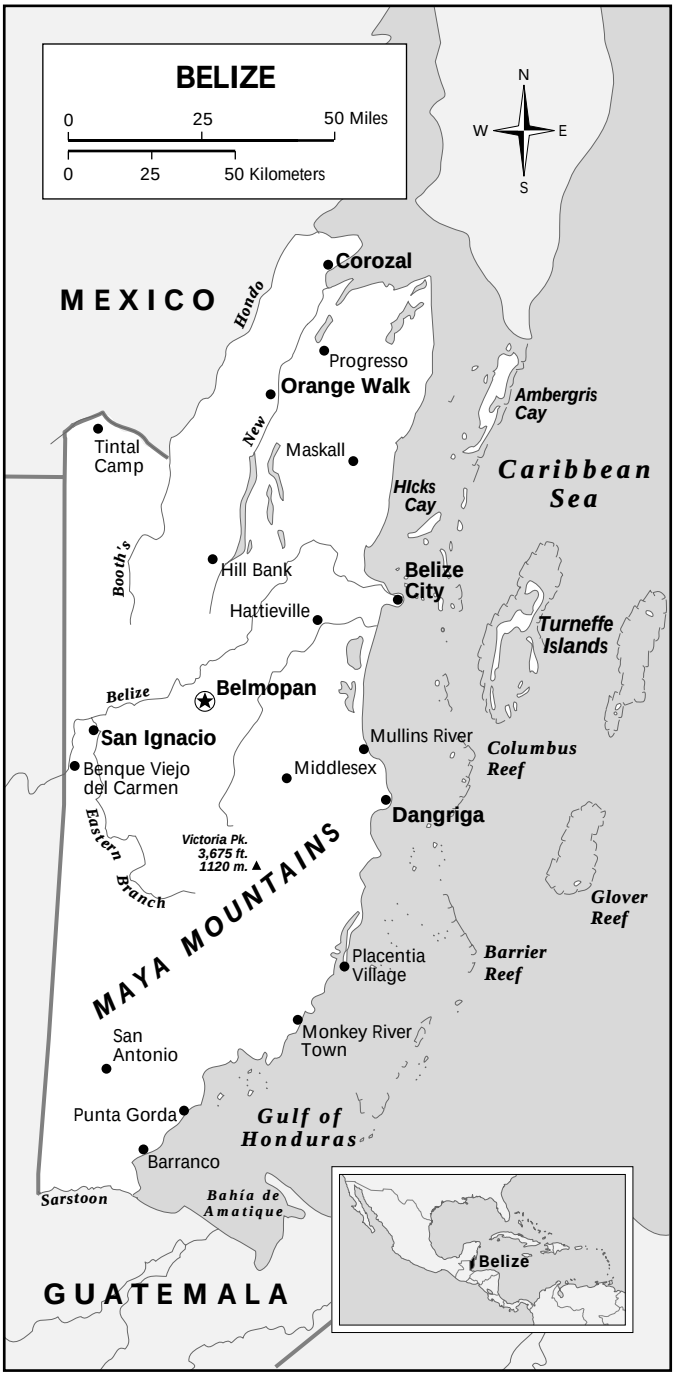
Full internal self-government under a ministerial system was granted in January 1964. The official name of the territory was changed from British Honduras to Belize in June 1973, and full independence was granted on September 21, 1981.

GOVERNMENT

Belize is a parliamentary democracy based on the Westminster model and is a member of the Commonwealth. Queen Elizabeth II is head of state and is represented in the country by Governor General Dr. Colville N. Young, Sr., a Belizean and Belize's second governor general. The primary executive organ of government is the cabinet, led by a prime minister (head of government). Cabinet ministers are members of the majority political party in parliament and usually hold elected seats in the National Assembly concurrently with their cabinet positions.

The National Assembly consists of a House of Representatives and a Senate. The 29 members of the House are popularly elected to a maximum 5-year term. The governor general appoints the Senate's 12 members. Six are appointed in accordance with the advice of the prime minister, 3 with the advice of the leader of the opposition. The Belize Council of Churches and the Evangelical Association of Churches, the Belize Chamber of Commerce and Industry and the Belize Business Bureau, and the National Trade Union Congress and the Civil Society Steering Committee each advise the Governor General on the appointment of one senator each. The Senate is headed by a president, who is a nonvoting member appointed by the governing party.

Members of the independent judiciary are appointed. The judicial system includes local magistrates, the Supreme Court, and the Court of Appeal. Cases may, under certain circumstances, be appealed to the Privy Council in London.



However, in 2001 Belize joined with most members of the Caribbean Common Market (CARICOM) to establish a "Caribbean Court of Justice," which was inaugurated on April 16, 2005. The country is divided into six districts: Corozal, Orange Walk, Belize, Cayo, Stann Creek, and Toledo.

POLITICAL CONDITIONS

In national elections on February 7, 2008, the United Democratic Party (UDP) prevailed over the incumbent People's United Party (PUP). The UDP won 25 of the 31 seats in the House of Representatives, while the PUP won the other six seats. UDP leader Dean Barrow replaced PUP leader Said Musa as Prime Minister.

The PUP governed Belize from 1998-2008; the UDP from 1993-98; the PUP from 1989-1993; and the UDP from 1984-89. Before 1984, the PUP had dominated the electoral scene for more than 30 years and was the party in power when Belize became independent in 1981. Third-party alternatives to the two-party system have arisen in the recent years, but these parties garnered less than 2% of the vote in the February 2008 elections.

The previous government implemented an economic adjustment program, with the aim of (1) increasing revenues, (2) decreasing public sector expenditures, (3) narrowing the fiscal deficit to 1% of GDP, (4) improving the balance of payments, and (5) increasing the country's foreign reserves. Belize's outstanding public debt at the end of June 2007 was U.S. $1.17 billion, an amount that is equivalent to approximately 90.4% of GDP. On January 31, 2007 the Government of Belize officially announced that the holders of Bel-

ize's public external commercial indebtedness agreed to exchange their existing claims against the country for new bonds to be issued by Belize maturing in 2029. Belize traditionally maintains a deep interest in the environment and sustainable development. A lack of government resources seriously hampers these goals. On other fronts, the government is working to improve its law enforcement capabilities. A long-standing territorial dispute with Guatemala continues, although cooperation between the two countries has increased in recent years across a wide spectrum of common interests, including trade and environment.

Seeing itself as a bridge, Belize is actively involved with the Caribbean nations of CARICOM, and also has taken steps to work more closely with its Central American neighbors as a member of SICA (Central American Integration System).

Principal Government Officials

Last Updated: 11/12/08

Governor Gen.: **Colville YOUNG, Sir**
Prime Min.: **Dean BARROW**
Dep. Prime Min.: **Gaspar VEGA**
Min. of Agriculture & Fisheries: **Rene MONTERO**
Min. of Communications: **Melvin HULSE**
Min. of Culture: **Marcel CARDONA**
Min. of Economic Development, Commerce, Industry, & Consumer Protection: **Erwin CONTRERAS**
Min. of Education: **Patrick FABER**
Min. of Finance: **Dean BARROW**
Min. of Foreign Affairs: **Wilfred ELRINGTON**
Min. of Foreign Trade: **Wilfred ELRINGTON**
Min. of Health: **Pablo MARIN**
Min. of Housing: **Michael FINNEGAN**
Min. of Human Development: **Eden MARTINEZ**
Min. of Labor: **Gabriel MARTINEZ**
Min. of Local Government: **Gabriel MARTINEZ**
Min. of National Security: **Carlos PERDOMO**
Min. of Natural Resources & the Environment: **Gaspar VEGA**
Min. of Public Service: **John SALDIVAR**
Min. of Public Utilities: **Melvin HULSE**
Min. of Rural Development: **Gabriel MARTINEZ**
Min. of Tourism: **Manuel HEREDIA, Jr.**
Min. of Transport: **Melvin HULSE**
Min. of Works: **Anthony MARTINEZ**
Min. of Youth & Sports: **Marcel CARDONA**
Attorney Gen.: **Wilfred ELRINGTON**
Governor, Central Bank: **Jorge Meliton AUIL**
Ambassador to the US: **Nestor MENDEZ**
Permanent Representative to the UN, New York:

Belize maintains an embassy in the United States at 2535 Massachusetts Avenue NW, Washington, DC 20008 (tel: 202-332-9636; fax: 202-332-6888) and a consulate in Los Angeles. Belize travel information office in New York City: 800-624-0686.

ECONOMY

Forestry was the only economic activity of any consequence in Belize until well into the 20th century, when the supply of accessible timber began to dwindle. Cane sugar then became the

principal export. Exports were augmented by expanded production of citrus, bananas, seafood, and apparel. The agricultural sector suffered from damage resulting from hurricanes that struck Belize in late 2007. The farm shrimp industry, a chief export earner until 2005, continues to decline. The service sector and nascent petroleum sector lead Belize's economic growth.

The country has about 809,000 hectares of arable land, only a small fraction of which is under cultivation. To curb land speculation, the government enacted legislation in 1973 that requires non-Belizeans to complete a development plan on land they purchase before obtaining title to plots of more than 10 acres of rural land or more than one-half acre of urban land.

Domestic industry is limited, constrained by relatively high-cost labor and energy and a small domestic market. Some 185 U.S. companies have operations in Belize, including Archer Daniels Midland, Texaco, and Esso. Tourism attracts the most foreign direct investment, although significant U.S. investment also is found in the telecommunications and agriculture sectors. A combination of natural factors—climate, the longest barrier reef in the Western Hemisphere, numerous islands, excellent fishing, safe waters for boating, jungle wildlife, and Mayan ruins—support the thriving tourist industry. Development costs are high, but the Government of Belize has designated tourism as one of its major development priorities. In 2006, tourist arrivals totaled 958,813 (about 70% from the United States). Belize's investment policy is codified in the Belize Investment Guide, which sets out the development priorities for the country. A Country Commercial Guide for Belize is available from the U.S. Embassy's Economic/Commercial section and on the Web at: http://belize.usembassy.gov/investing_in_belize2.html.

Infrastructure

A major constraint on the economic development of Belize continues to be the scarcity of infrastructure investments. As part of its financial austerity measures started in late 2004, the government froze expenditures on several capital projects. Although electricity, telephone, and water utilities are all relatively good, Belize has the most expensive electricity in the region. Large tracts of land, which would be suitable for development, are inaccessible due to lack of roads. Some roads, including sections of major highways, are subject to damage or closure during the rainy season. Ports in Belize City, Dangriga, and Big Creek handle regularly scheduled shipping from the United States and the United Kingdom, although draft is limited to a maximum of 10 feet in Belize City and 15 feet in southern ports. American Airlines, Continental Airlines, U.S. Air, Delta Airlines, and TACA provide international air service to gateways in Dallas, Houston, Miami, Charlotte, Atlanta, and San Salvador.

Trade

Belize's economic performance is highly susceptible to external market changes, a fact that is reflected in its 1.6% real growth rate for 2007. World commodity price fluctuations and continuation of preferential trading agreements, especially with the United States and the European Union (cane sugar) and the United Kingdom (bananas), greatly impact Belize's economic performance.

Belize continues to rely heavily on foreign trade. Imports in 2006 totaled $660.4 million, while total exports were $268.2 million. The United States continues to be Belize's number-one trading partner. Through November 2007, the United States provided 33.5% of all Belizean imports and accounted for 27.2% of Belize's total exports. Other major trading partners include Mexico, the United Kingdom, Western Europe, Guatemala, Canada, and the CARICOM member states. In 2006-2007, Taiwan and Japan emerged as new trading partners with Belize.

Belize aims to stimulate the growth of commercial agriculture through CARICOM. However, Belizean trade with the rest of the Caribbean is small compared to that with the United States and Europe. The country is a beneficiary of the Caribbean Basin Initiative (CBI) program, which forms part of the U.S.-Caribbean Basin Trade Partnership Act—signed into law by President Clinton on May 8, 2000—a comprehensive U.S. Government program designed to stimulate investment in Caribbean nations by providing duty-free access to the U.S. market for most Caribbean products. Significant U.S. private investments in citrus and shrimp farms have been made in Belize under CBI. U.S. trade preferences allowing for duty-free re-import of finished apparel cut from U.S. textiles have significantly expanded the apparel industry. European Union (EU) and U.K. preferences also have been vital for the expansion and prosperity of the sugar and banana industries.

NATIONAL SECURITY

The Belize Defense Force (BDF), established in January 1973, is comprised of a light infantry force of regulars and reservists along with small air and maritime wings. The BDF, currently under the command of Brigadier General Lloyd Gillett, assumed total defense responsibility from British Forces Belize (BFB) on January 1, 1994. The United Kingdom continues to maintain the British Army Training Support Unit Belize (BATSUB) to assist in the administration of the Belize Jungle School. The BDF receives military assistance from the United States and the United Kingdom.

FOREIGN RELATIONS

Belize's principal external concern has been the dispute involving the Guatemalan claim to Belizean territory. This dispute originated in Imperial Spain's claim to all "New World" territories west of the line established in the Treaty of Tordesillas in 1494. Nineteenth-century efforts to resolve the problems led to later differences over interpretation and

implementation of an 1859 treaty intended to establish the boundaries between Guatemala and Belize, then named British Honduras. Guatemala contends that the 1859 treaty is void because the British failed to comply with all its economic assistance clauses. Neither Spain nor Guatemala ever exercised effective sovereignty over the area.

Negotiations have been underway for many years, including one period in the 1960s in which the U.S. Government sought unsuccessfully to mediate. A 1981 trilateral (Belize, Guatemala, and the United Kingdom) "Heads of Agreement" was not implemented due to continued contentions. Belize became independent on September 21, 1981, with the territorial dispute unresolved. Significant negotiations between Belize and Guatemala, with the United Kingdom as an observer, resumed in 1988. Guatemala recognized Belize's independence in 1991, and diplomatic relations were established.

Eventually, on November 8, 2000, the two parties agreed to respect an "adjacency zone" extending one kilometer east and west from the border. Around this time, the Government of Guatemala insisted that the territorial claim was a legal one and that the only possibility for a resolution was to submit the case to the International Court of Justice (ICJ). However, the Government of Belize felt that taking the case to the ICJ or to arbitration represented an unnecessary expense of time and money. So the Belizean Government proposed an alternate process, one under the auspices of the Organization of American States (OAS).

Since then, despite efforts by the OAS to jumpstart the process, movement has been limited to confidence-building measures between the parties. In November 2007, the Secretary General of the OAS recommended that the dispute be referred to the International Court of Justice.

In order to strengthen its potential for economic and political development, Belize has sought to build closer ties with the Spanish-speaking countries of Central America to complement its historical ties to the English-speaking Caribbean states. In 2005 Belize joined other Central American countries participating in the Cooperating Nations Information Exchange System (CNIES), which assists in locating, identifying, tracking, and intercepting civil aircraft in Belize's airspace. Belize and other Central American countries signed the Conjunta Centroamerica-USA (CONCAUSA) agreement on regional sustainable development. Belize held the presidency of the Central American Integration System (SICA) for a 6-month period in 2007. Belize is a member of CARICOM, which was founded in 1973. It became a member of the OAS in 1990.

U.S.-BELIZEAN RELATIONS

The United States and Belize traditionally have had close and cordial relations. The United States is Belize's principal trading partner and major source of investment funds. It is also home to the largest Belizean community outside Belize, estimated to be 70,000 strong. Because Belize's economic growth and accompanying democratic political stability are important U.S. objectives, Belize benefits from the U.S. Caribbean Basin Initiative. International crime issues dominate the agenda of bilateral relations between the United States and Belize. The United States is working closely with the Government of Belize to fight illicit narcotics trafficking, and both governments seek to control the flow of illegal migrants to the United States through Belize. Belize and the United States brought into force a Stolen Vehicle Treaty, an Extradition Treaty, and a Mutual Legal Assistance Treaty between 2001 and 2003. The United States is one of the largest providers of economic assistance to Belize, contributing $2.5 million in various bilateral economic and military aid programs to Belize in FY 2006. Of this amount, nearly half a million dollars was provided by the U.S. Military Liaison Office. The U.S. Agency for International Development (USAID) closed its Belize office in August 1996 after a 13-year program during which USAID provided $110 million worth of development assistance to Belize. Belize still benefits from USAID regional programs. In addition, during the past 42 years, almost 2,000 Peace Corps volunteers have served in Belize. As of February 2008, the Peace Corps had 63 volunteers working in Belize. The U.S. military has a diverse and growing assistance program in Belize that has included the construction and renovation of several schools and youth hostels, medical assistance programs, and drug reduction programs. Private North American investors continue to play a key role in Belize's economy, particularly in the tourism sector.

TRAVEL

Consular Information Sheet

November 5, 2008

Country Description: Belize is a developing country. Tourism facilities vary in quality, from a limited number of business class hotels in Belize City and resorts on the cayes to a range of ecotourism lodges and very basic accommodations in the countryside. Crime is a growing concern.

Entry Requirements: All U.S. citizens must have a U.S. passport valid for the duration of their visit to Belize. U.S. citizens do not need visas for tourist visits of up to thirty days, but they must have onward or return air tickets and proof of sufficient funds to maintain themselves while in Belize.

Visitors for purposes other than tourism, or who wish to stay longer than 30 days, must obtain visas from the government of Belize. All tourists and non-Belizean nationalities are required to pay an exit fee of U.S.$35 when leaving Belize. Additional information on entry and customs requirements may be obtained from the Embassy of Belize at 2535 Massachusetts Avenue, N.W., Washington, DC 20008, Tel. (202) 332-9636 or at their web site http://www.embassyofbelize.org.

Information is also available at the Belizean Consular offices in Miami, and Los Angeles, or at the Belizean Mission to the UN in New York. Visit the Embassy of Belize web site at http://usembassy.state.gov/belize for the most current visa information.

Safety and Security: Visitors should exercise caution and good judgment when visiting Belize. Crime can be a serious problem (see Crime), particularly in Belize City and remote areas. Road accidents are common (see Traffic Safety and Road Conditions) and traffic fatalities have included Americans. Public buses and taxis are frequently in poor condition and lack safety equipment. Medical care is limited and emergency response services such as ambulances or paramedics may be either unavailable or limited in capability or equipment.

Boats serving the public, especially water taxis, often do not carry sufficient safety equipment, may carry an excess number of passengers and may sail in inclement weather. Rental diving equipment may not always be properly maintained or inspected, and some local dive masters fail to consider the skill levels of individual tourists when organizing dives to some of Belize's more challenging sites. Deaths and serious mishaps have occurred as a result of negligent diving tour operators and the lack of strict enforcement of tour regulations. The Embassy strongly recommends that anyone interested in scuba diving and snorkeling while in Belize check the references, licenses and equipment of tour operators before agreeing to or paying for a tour. Safety precautions and emergency response capabilities may not be up to U.S. standards.

Following a fatal accident at the Cave Branch Archeological Park in September 2008, the Belize Tourism Board (BTB) is implementing new regulations, effective and legally enforced beginning October 15, 2008, to improve safety at cave tubing attractions. Those policies will include an enhanced, mandatory guest-to-guide ratio of eight-to-one for all operating cave tubing tour companies in Belize. Additional signage will be posted in each cave tubing excursion site, informing participants of park rules and current water conditions and/or warnings. Mandatory specialty training for each cave tubing guide will continue and include education on new regulations. Helmets will also be required for each cave tubing participant starting January 1, 2009. Furthermore, the National Institute of Culture and History (NICH), which manages the Cave Branch Archeological Park, will be installing additional monitoring equipment for cave tubing excursions which measure currents and other factors needing to be taken into considerations to ensure participant safety.

Cave tubing participants are urged to exercise due caution and their own best judgment regarding safety and river conditions at the time of their tour, particularly during the rainy/hurricane season from June 1 through November 30. Rainfall upstream from tour sites, sometimes miles away, can cause rapid changes in current strength and water level conditions without notice.

The border between Belize and Guatemala is in dispute, but the dispute thus far has not affected travel between the two countries. There have not been any terrorist activities in Belize.

For the latest security information, Americans traveling abroad should regularly monitor the Department's Internet web site, where the current Travel Warnings and Travel Alerts, including the Worldwide Caution Travel Alert, can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S. and Canada, or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: The incidence of crime, including violent crimes such as armed robbery, shooting, stabbing, murder, and rape, is on the rise. The Embassy has noted an increase in recent years in reports of crimes against tourists at resorts and on the roadways and river ways. The incidence of crimes such as theft, burglary, purse snatching and pickpocketing rises around the winter holidays and spring break. Several victims who resisted when confronted by criminals have received serious personal injuries, including gunshot

wounds. Although the majority of reported incidents are in Belize City, crime occurs in all districts including tourist spots such as San Pedro, Caye Caulker, and Placencia.

Sexual harassment and/or assault of females traveling alone or in small groups have occurred this past year. Several American travelers have been the victims of sexual assaults in recent years. One of these occurred after the victim accepted a lift from an acquaintance, while another occurred during an armed robbery at an isolated resort. One of these assaults has resulted in the death of the victim.

The Embassy recommends that visitors travel in groups and only in daylight hours, stay off the streets after dark, in urban and rural areas, and avoid wearing jewelry, or carrying valuable or expensive items. As a general rule, valuables should not be left unattended, including in hotel rooms and on the beach.

Care should be taken when carrying high value items such as cameras, or when wearing expensive jewelry on the street. Women's handbags should be zipped and held close to the body. Men should carry wallets in their front pants pocket. Large amounts of cash should always be handled discreetly.

If traveling by taxi, use only vehicles with green license plates, do not get in a taxi that is occupied by more than the driver, and do not let the driver pick up additional fares.

Armed robberies of American tourist groups occurred during the summer of 2006 in the Mountain Pine Ridge and Caracol regions of the western district of Belize. Due to increased police patrols, coordinated tours among resort security managers, and the arrest of two of the "highway bandits," there have not been any additional robberies since June, 2006. In the past, criminals have targeted popular Mayan archeological sites in that region. Visitors should travel in groups and should stick to the main plazas and tourist sites. Although there are armed guards posted at some of the archeological sites, armed criminals have been known to prey on persons walking from one site to another. Victims who resist when confronted by these armed assailants frequently suffer personal injury.

Travel on rural roads, especially at night, increases the risk of encountering criminal activities. Widespread narcotics and alien smuggling activities can make remote areas especially dangerous. Though there is no evidence that Americans in particular are targeted, criminals look for every opportunity to attack, so all travelers should be vigilant.

Rather than traveling alone, use a reputable tour organization. It is best to stay in groups, travel in a caravan consisting of two or more vehicles, and stay on the main roads. Ensure that someone not traveling with you is aware of your itinerary. Travelers should resist the temptation to stay in budget hotels, which are generally more susceptible to crime, and stay in the main tourist destinations. Do not explore back roads or isolated paths near tourist sites. And remember always to pay close attention to your surroundings.

Americans visiting the Belize-Guatemala border area should consider carefully their security situation and should travel only during daylight hours. Vehicles should be in good operating condition, adequately fueled, and carry communications equipment. Persons traveling into Guatemala from Belize should check the Country Specific Information for Guatemala and the U.S. Embassy web site at http://guatemala.usembassy.gov for the latest information about crime and security in Guatemala. A lack of resources and training impedes the ability of the police to investigate crimes effectively and to apprehend serious offenders. As a result, a number of crimes against Americans in Belize remain unresolved. Nonetheless, victims of crime should report immediately to the police all incidents of assault, robbery, theft or other crimes as well as notifying the U.S. Embassy in Belmopan, telephone 822-4011(after hours and weekends 610-5030). Tourists may contact the Belizean tourist police unit in addition to the main police office for assistance.

In addition to reporting crimes to local police, American citizens should report all criminal incidents to the U.S. Embassy in Belmopan, telephone 822-4011 (after hours and weekends 610-5030).

The embassy staff can assist an American with finding appropriate medical care, contacting family members or friends, and having funds transferred, as well as in determining whether any assistance is available from the victim's home state. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help explain the local criminal justice process and assist in finding an attorney if needed.

Drug use is common in some tourist areas. American citizens should avoid buying, selling, holding, or taking illegal drugs under any circumstances. Penalties for possession of drugs or drug paraphernalia are generally more severe than in the U.S.

In many countries around the world, counterfeit and pirated goods are widely available. Transactions involving such products may be illegal under local law. In addition, bringing them back to the United States may result in forfeitures and/or fines. More information on this serious problem is available at http://www.cybercrime.gov.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of

local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

Medical Facilities and Health Information: Medical care for minor conditions is generally available in urban areas. Trauma or advanced medical care is limited even in Belize City; it is extremely limited or unavailable in rural areas. Serious injuries or illnesses often necessitate evacuation to another country. The Government of Belize reported an outbreak of dengue fever in April, May and June of 2005. Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's internet site at http://www.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) website at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith/en.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. Driving in Belize requires one's full attention, and drivers must take extraordinary efforts to drive defensively to avoid dangerous situations. The information below concerning Belize is provided for general reference only, and may not be totally accurate in a particular location or circumstance. Valid U.S. driver's licenses and international driving permits are accepted in Belize for a period of three months after entry. Driving is on the right-hand side of the road. Buses and private vehicles are the main mode of transportation in Belize; no trains operate in the country. Roadside assistance can be difficult to summon, as there are very few public telephones along the road and emergency telephone numbers do not always function properly. The Belizean Department of Transportation is responsible for road safety.

Roads in Belize vary from two-lane paved roads to dirt tracks. The few paved roads are high-crowned roads, which can contribute to cars overturning, and have few markings or reflectors. Even in urban areas, few streets have lane markings, leading many motorists to create as many lanes as possible in any given stretch of street or road. Bridges on the major highways are often only single lanes.

The Manatee Road, leading from the Western Highway to Dangriga, is unpaved, easily flooded after storms and without services. The Southern Highway from Dangriga to Punta Gorda is mostly completed and in good condition, except for a short portion that is under construction. Service stations are plentiful along the major roads, although there are some significant gaps in the rural areas.

Poor road and/or vehicle maintenance causes many fatal accidents on Belizean roads. Speed limits are 55 miles per hour on most highways and 25 miles per hour on most other roads, but they are seldom obeyed or even posted. Many vehicles on the road do not have functioning safety equipment such as turn signals, flashers, or brake lights. Seatbelts for drivers and front-seat passengers are mandatory, but child car seats are not required. Driving while intoxicated is punishable by a fine; if an alcohol-related accident results in a fatality, the driver may face manslaughter charges. Moreover, Americans can and have been imprisoned in Belize for accidents, even where alcohol is not involved.

Unusual local traffic customs include: pulling to the right before making a left turn; passing on the right of someone who is signaling a right-hand turn; stopping in the middle of the road to talk to someone while blocking traffic; carrying passengers, including small children, in the open beds of trucks; and tailgating at high speeds.

Bicycles are numerous and constitute a traffic hazard at all times; bicyclists often ride contrary to traffic and do not obey even basic traffic laws such as red lights or stop signs. Few bicycles have lights at night. It is common to see bicyclists carrying heavy loads or passengers, including balancing small children on their laps or across the handlebars. The driver of a vehicle that strikes a bicyclist or pedestrian is almost always considered to be at fault, regardless of circumstances. Americans who have struck cyclists in Belize have faced significant financial penalty or even prison time.

Driving at night is not recommended, due to poor signage and road markings, a tendency not to dim the lights when approaching other vehicles, and drunk driving. Pedestrians, motorcyclists and bicyclists without lights, reflectors, or reflective clothing also constitute a very serious after-dark hazard. Local wildlife and cattle also are road hazards in rural areas. For safety reasons, travelers should not stop to offer assistance to others whose vehicles apparently have broken down.

Aviation Safety Oversight: The U.S. Federal Aviation Administration (FAA) has assessed the Government of Belize's Civil Aviation Authority as not being in compliance with International Civil Aviation Organization (ICAO) aviation safety standards for the oversight of Belize's air carrier operations. For more information, travelers may visit the FAA's internet website at http://www.faa.gov.

Special Circumstances: Belize is vulnerable to tropical storms, especially from June 1 until November 30 of each year. General information on weather conditions may be obtained at: http//www.nhc.noaa.gov.

It is not possible to access most U.S. bank accounts through automated teller machines (ATMs) in Belize.

However, travelers can usually obtain cash advances from local banks, Monday through Friday, using major international credit cards.

Dual Nationality: A person who is a citizen of both the U.S. and Belize is able to enter Belize with only a Belizean passport; such a dual national should be aware, however, that he/she must have a U.S. passport in order to board a flight to the U.S. from Belize, and that average processing time for a passport at the U.S. Embassy in Belize is approximately 10 working days.

Belize customs authorities may enforce strict regulations concerning temporary importation into or export from Belize of firearms. It is advisable to contact the Embassy of Belize in Washington or one of Belize's Consulates in the U.S. for specific information regarding customs requirements.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating Belize laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Belize are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States. Belize has strict laws making possession of a firearm or ammunition illegal unless a valid permit is obtained. Penalties for firearms violations are severe.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in Belize are encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration website, and to obtain updated information on travel and security within Belize. Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency.

The U.S. Embassy is located in the capital city of Belmopan, approximately 50 miles west of Belize City. The U.S. Embassy is on Floral Park Road, Belmopan and the telephone number is 822-4011. The Embassy is open from 8:00 a.m. to 5:00 p.m., Monday through Friday, except for the 12:00 noon to 1:00 p.m. lunch hour, and U.S. and Belizean holidays. The Embassy Internet address is http://usembassy.state.gov/belize/; e-mail embbelize@state.gov.

Intercountry Adoption

July 2008

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is based on public sources and our current understanding. Questions involving foreign and U.S. immigration laws and legal interpretation should be addressed respectively to qualified foreign or U.S. legal counsel.

The Hague Convention on Intercountry Adoption: The Hague Convention on Intercountry Adoption, to which the United States became a party on April 1, 2008, establishes legal and regulatory requirements for intercountry adoption.

Belize is a party to The Hague Convention on Protection of Children and Co-operation in Respect of Intercountry Adoption (the Convention) and with which the Convention is in force for the United States.

Patterns of Immigration: Please review current reports online at http://adoption.state.gov.

Adoption Authority: The government office responsible for adoptions in Belize is the Belize Human Services Department:

Human Services Department
2nd Floor, Commercial Center
P.O. Box 41
Belize City, Belize
Central America
Phone: ++501-227-7451
or 501-227-2057
Fax: ++501-227-1276

Eligibility Requirements for Adoptive Parents: The government of Belize requires that at least one of the prospective adoptive parents must be a minimum of 25 years old and no fewer than 12 years older than the child. Single men cannot adopt female children. These restrictions can be waived if the court finds that special circumstances are warranted.

Residency Requirements: The Belize Supreme Court only processes adoptions for Belizean citizen children. According to Section 137 of the Belize Families and Children's Act, a person who is not a citizen of Belize may adopt a Belizean child if he or she:

- Does not have a criminal record;
- Has a current recommendation concerning his/her suitability to adopt a child from his/her country's probation and welfare office or other competent authority; and
- Has satisfied the court that his/her country of origin will respect and recognize the adoption order.

Belizean law prohibits the issuance of a final adoption order unless the non-Belizean prospective adoptive parent resides in Belize with the Belizean

child for 12 months. A social worker will visit periodically to assess the parent-child relationship. Adoptive parents who are not citizens of Belize may receive an interim adoption decree, which the Government of Belize recognizes as permission for the prospective adoptive parent to take the child out of Belize and pursue a subsequent adoption in accordance with the laws of his/her own country.

Time Frame: The processing time for adoptions can vary, depending on the circumstances of the case. The Belize Department of Human Services reports that "ward adoptions" (children in the custody of the Department of Human Services) can take up one year or more to process because of the need for home study reports, matching, placement and legal proceedings.

For independent adoptions (children not in the custody of the Department of Human Services) the processing time is shorter. Because the adoption is child-specific–that is, the prospective adoptive parents have already selected a child–matching and placement are not necessary. These adoption proceedings take from 3 months to one year.

Adoption Agencies and Attorneys: Prospective adoptive parents are advised to fully research any adoption agency or facilitator they plan to use for adoption services.

Because Belize is a Convention country, adoption services must be provided by an accredited agency, temporarily accredited agency, approved person, supervised provider, or exempted provider.

It is essential that prospective adoptive parent(s) seeking to adopt from a Convention country use an accredited adoption service provider.

The U.S. Department of State maintains a current list of accredited adoption service providers. The list of accredited adoption service providers is also provided on the website of The Hague Permanent Bureau at www.hcch.net.

Adoption Fees: The U.S. Embassy in Belize discourages the payment of any fees that are not properly receipted, "donations," or "expediting" fees, that may be requested from prospective adoptive parents. Such fees have the appearance of "buying" a baby and put all future adoptions in Belize at risk. Attorney's fees for adoption services in Belize range from $1,500to $5,000 (U.S. dollars). The cost can vary based on the attorney selected, the type of adoption (local vs. international) and the number of children being adopted. Attorneys' fees include all costs related to the adoption process, such as court costs and filing fees. U.S. citizens adopting a child in Belize should report any exorbitant fees to the U.S. Embassy in Belize or to the U.S. Department of State.

Adoption Procedures: Children in Belize may only be adopted through the judicial process. There are no private adoptions nor adoptions through extra-judicial processes. If the prospective adoptive parents legally reside in Belize, the Belize Family Courts may handle the adoption. If the adoptive parents reside outside of Belize and are not citizens of Belize, the adoption must be processed through the Supreme Court of Belize.

International adoptions occur before a Supreme Court Judge and require the services of a local attorney authorized to present cases to the Supreme Court. Those persons desirous of information regarding the forms and procedures to follow for adoptions should contact a Belizean attorney.

A list of attorneys can be found at: http://belize.usembassy.gov/list_of_lawyers.html Belizean law only provides for the adoption of children who are citizens of Belize.

A child who is not a Belizean citizen cannot be the subject of an adoption in a Belizean court, although Belizean courts can issue custody orders for any child residing in Belize.

Adoption of Belizean citizen children must occur within the Belizean court system. Belize does not grant custody of its children for emigration and adoption outside of Belize. However, the Chief Justice of Belize has determined that the "Provisional," "Interim" or "Preliminary" Adoption decrees often issued by the Supreme Court can be considered permission for the prospective adoptive parents to take the child out of Belize and to pursue a concurrent adoption process in accordance with the laws of their own country.

Age And Civil Status Requirements: An adoption order cannot be made unless the applicant—or in the case of joint application, one of the applicants—is at least twenty-five years old and is at least twelve years older than the child.

Civil status is not relevant in regards to adoption orders except in the case of a male adopting a female child; single men cannot adopt female children.

Both of these restrictions can be waived if the court finds that special circumstances warrant an exceptional adoption order.

Required Documents: The following documents are required by the Belize Human Services Department:

- A valid police certificate;
- An approved home study;
- Proof of home government approval to adopt (for U.S. citizens, this is an approved I-800 or I-800A).

U.S. Immigration Requirements: As of April 1, 2008, U.S. citizens wishing to adopt in a Convention country must begin the process by filing with the U.S. Citizenship and Immigration Services (USCIS) a form I-800A *Application for Determination of Suitability to Adopt a Child from a Convention Country*.

Prospective adoptive parents are strongly encouraged to consult the Department of Homeland Security, USCIS website (www.uscis.gov) to download forms and filing instructions.

Additional Information: For information on intercountry adoption and international parental child abduction, and security information for U.S. citizens traveling abroad, call Toll Free 1-888-407-4747. This number is available from 8:00 a.m. to 8:00 p.m. EST/EDT, Monday through Friday (except U.S. federal holidays).

Callers who are unable to use toll-free numbers, such as those calling from overseas, may obtain information and assistance during these hours by calling 1-202-501-4444.

BENIN

Compiled from the June 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Republic of Benin

PROFILE

Geography

Area: 116,622 sq. km. (43,483 sq. mi.).

Cities: Capital—Porto-Novo (pop. 295,000). Political and economic capital—Cotonou (pop. 2 million).

Terrain: Mostly flat plains of 200 meters average elevation, but the Atacora Mountains extend along the northwest border, with the highest point being Mont Sokbaro 658 meters.

Climate: Tropical, average temperatures between 24º and 31ºC. Humid in south; semiarid in north.

People

Nationality: Noun and adjective—Beninese (singular and plural).

Population: (2007) 7.9 million.

Annual growth rate: (2006 est.) 2.73%.

Ethnic groups: African 99% (42 ethnic groups, most important being Fon, Adja, Yoruba, and Bariba), Europeans 5,500.

Religions: Indigenous beliefs (animist) 50%, Christian 30%, Muslim 20%.

Languages: French (official), Fon and Yoruba in the south; Nagot, Bariba and Dendi in the north.

Education: (2007) Literacy—Total population 35%; men 48%, women 23%.

Health: (2005) Infant mortality rate—89/1,000. Life expectancy—55 yrs.

Work force: The labor market is characterized by an increased reliance on informal employment, family helpers, and the use of apprentices. Training and job opportunities are not well matched.

Government

Type: Republic under multiparty democratic rule.

Independence: August 1, 1960.

Constitution: December 10, 1990.

Government branches: Executive—President, elected by popular vote for 5-year term, appoints the Cabinet. Legislative—Unicameral, 83-seat National Assembly directly elected by popular vote for 4-year terms. Judicial—Constitutional Court, Supreme Court, High Court of Justice.

Political subdivisions: Twelve departments: Alibori, Atakora, Atlantique, Borgou, Collines, Couffo, Donga, Littoral, Mono, Oueme, Plateau, and Zou.

Political parties: (partial listing of major parties) La Renaissance du Bénin (RB), Party of Democratic Renewal (PRD), Social-Democrat Party (PSD), African Movement for Development and Progress (MADEP), Party of Democratic Renewal-Rainbow (PRD-Arc-en-ciel), Alliance Etoile, Action Front for Democratic Renewal (FARD-ALAFIA), African Congress for Renewal (CAR-DUNYA), Impulse for Progress and Democracy (IPD), Alliance for Democracy and Progress (ADP), National Union for Democracy and Progress (UNDP), New Generation for the Republic (NGR), Our Common Cause (NCC), Ensemble, National Rally for Democracy (RND), Rally for Progress and Renewal (RPR), Movement for the People Alternative (MAP), National Rally for Unity and Democracy (RUND), Congress of African Democrat (CAD), Movement for Citizens' Commitment and Awakening (MERCI), Democratic Union for Economic and Social Development (UDES), Rally for Democracy and Progress (RDP), Communist Party of Benin (PCB).

Economy

GDP: (2007) $5.92 billion.

GDP growth rate: (2007) 4.2%.

Per capita GDP: (2007) $749.

Inflation rate: (2007) 1.3%.

Natural resources: Small offshore oil deposits, unexploited deposits of high quality marble limestone, and timber.

Agricultural: Products—corn, sorghum, cassava, tapioca, yams, beans, rice, cotton, palm oil, cocoa, peanuts, poultry, and livestock. Arable land—

13%. Permanent crops 4%, permanent pastures 4%, forests and woodland 31%.

Business and industry: Textiles, cigarettes, food and beverages, construction materials, petroleum.

Trade: Exports—$259 million: cotton, crude oil, palm products, cocoa. Imports—$1.2 billion: foodstuffs, tobacco, petroleum products, energy, and capital goods. Major trade partners—Nigeria, France, China, Italy, Brazil, Libya, Indonesia, U.K., Cote d'Ivoire.

GEOGRAPHY

Benin, a narrow, north-south strip of land in West Africa, lies between the Equator and the Tropic of Cancer. Benin's latitude ranges from 6º30N to 12º30N and its longitude from 10E to 3º40E. Benin is bounded by Togo to the west, Burkina Faso and Niger to the north, Nigeria to the east, and the Bight of Benin to the south. With an area of 112,622 square kilometers, roughly the size of Pennsylvania, Benin extends from the Niger River in the north to the Atlantic Ocean in the south, a distance of 700 kilometers (about 500 mi.). Although the coastline measures 121 kilometers (about 80 mi.), the country measures about 325 kilometers (about 215 mi.) at its widest point. It is one of the smaller countries in West Africa: eight times smaller than Nigeria, its neighbor to the east. It is, however, twice as large as Togo, its neighbor to the west. A relief map of Benin shows that it has little variation in elevation (average elevation 200 meters).

The country can be divided into four main areas from the south to the north. The low-lying, sandy, coastal plain (highest elevation 10 meters) is, at most, 10 kilometers wide. It is marshy and dotted with lakes and lagoons communicating with the ocean. The plateaus of southern Benin (altitude between 20 meters and 200 meters) are split by valleys running north to south along the Couffo, Zou, and Oueme Rivers. An area of flat lands dotted with rocky hills whose altitude seldom reaches 400 meters extends around Nikki and Save. Finally, a range of mountains extends along the northwest border and into Togo; this is the Atacora, with the highest point, Mont Sokbaro, at 658 meters. Two types of landscape predominate in the south. Benin has fields of lying fallow, mangroves, and remnants of large sacred forests. In the rest of the country, the savanna is covered with thorny scrubs and dotted with huge baobab trees. Some forests line the banks of rivers. In the north and the northwest of Benin the Reserve du W du Niger and Pendjari National Park attract tourists eager to see elephants, lions, antelopes, hippos, and monkeys.

Benin's climate is hot and humid. Annual rainfall in the coastal area averages 36 cm. (14 in.), not particularly high for coastal West Africa. Benin has two rainy and two dry seasons. The principal rainy season is from April to late July, with a shorter less intense rainy period from late September to November. The main dry season is from December to April, with a short cooler dry season from late July to early September. Temperatures and humidity are high along the tropical coast. In Cotonou, the average maximum temperature is 31ºC (89ºF); the minimum is 24ºC (75ºF).

Variations in temperature increase when moving north through a savanna and plateau toward the Sahel. A dry wind from the Sahara called the Harmattan blows from December to March. Grass dries up, the vegetation turns reddish brown, and a veil of fine dust hangs over the country, causing the skies to be overcast. It also is the season when farmers burn brush in the fields.

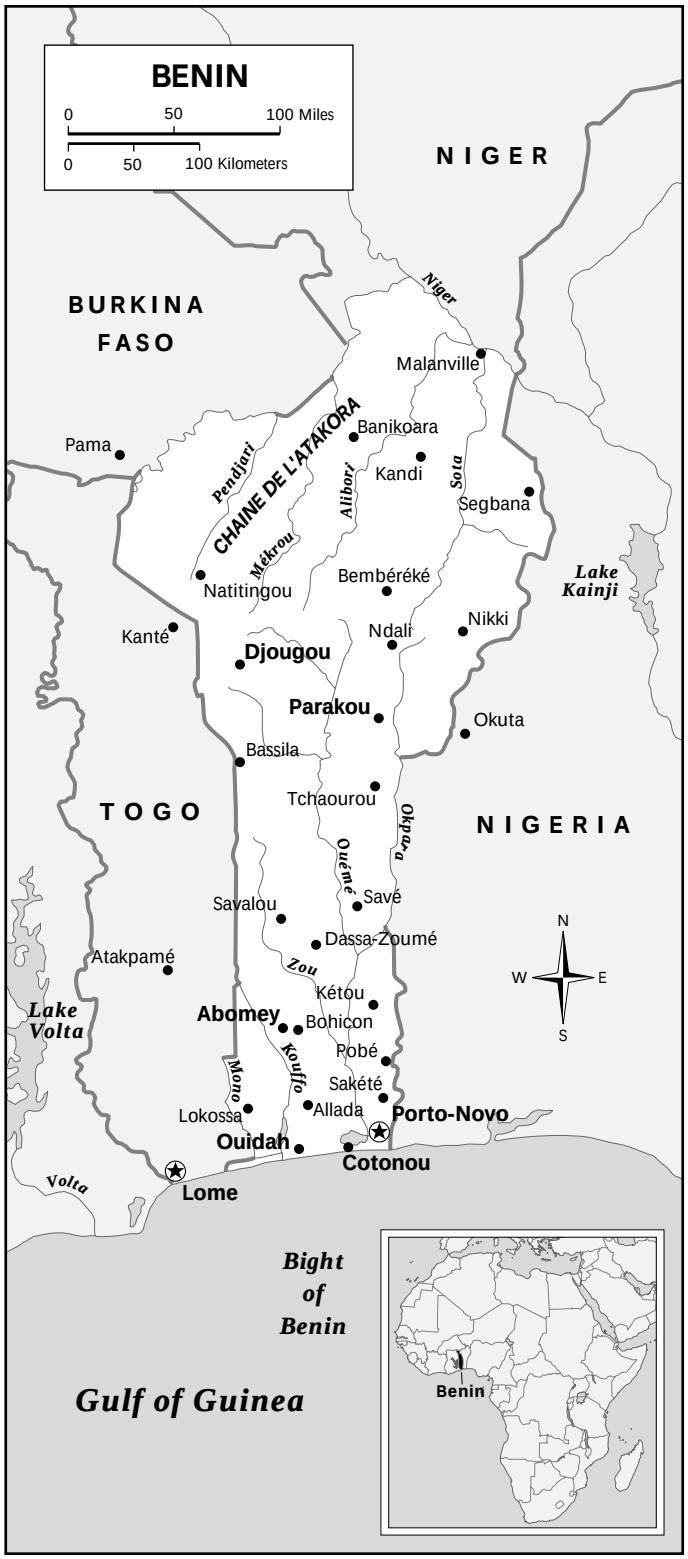
PEOPLE

The majority of Benin's 7.86 million people live in the south. The population is young, with a life expectancy of 53 years. About 42 African ethnic groups live in this country; these various groups settled in Benin at different times and also migrated within the country. Ethnic groups include the Yoruba in the southeast (migrated from Nigeria in the 12th century); the Dendi in the north-central area (they came from Mali in the 16th century); the Bariba and the Fulbe (Peul) in the northeast; the Betammaribe and the Somba in the Atacora Range; the Fon in the area around Abomey in the South Central and the Mina, Xueda, and Aja (who came from Togo) on the coast.

Recent migrations have brought other African nationals to Benin that include Nigerians, Togolese, and Malians. The foreign community also includes many Lebanese and Indians involved in trade and commerce. The personnel of the many European embassies and foreign aid missions and of nongovernmental organizations and various missionary groups account for a large number of the 5,500 European population.

Several religions are practiced in Benin. Animism is widespread (50%), and its practices vary from one ethnic group to the other. Arab merchants introduced Islam in the north and among the Yoruba. European missionaries brought Christianity to the south and central areas of Benin. Muslims account for 20% of the population and Christians for 30%. Many nominal Muslims and Christians continue to practice animistic traditions. It is believed that voodoo originated in Benin and was introduced to Brazil and the Caribbean Islands by slaves taken from this particular area of the Slave Coast.

HISTORY



Benin was the seat of one of the great medieval African kingdoms called Dahomey. Europeans began arriving in the area in the 18th century, as the kingdom of Dahomey was expanding its territory. The Portuguese, the French, and the Dutch established trading posts along the coast (Porto-Novo, Ouidah, Cotonou), and traded weapons for slaves. Slave trade ended in 1848. Then, the French signed treaties with Kings of Abomey (Guézo, Toffa, Glèlè) to establish French protectorates in the main cit-

ies and ports. However, King Behanzin fought the French influence, which cost him deportation to Martinique. As of 1900, the territory became a French colony ruled by a French Governor. Expansion continued to the North (kingdoms of Parakou, Nikki, Kandi), up to the border with former Upper Volta. On December 4, 1958, it became the République du Dahomey, self-governing within the French community, and on August 1, 1960, the Republic of Benin gained full independence from France.

Post-Independence Politics

Between 1960 and 1972, a succession of military coups brought about many changes of government. The last of these brought to power Major Mathieu Kérékou as the head of a regime professing strict Marxist-Leninist principles. The Revolutionary Party of the People of Benin (PRPB) remained in complete power until the beginning of the 1990s. Kérékou, encouraged by France and other democratic powers, convened a national conference that introduced a new democratic constitution and held presidential and legislative elections. Kérékou's principal opponent at the presidential poll, and the ultimate victor, was Prime Minister Nicéphore Soglo. Supporters of Soglo also secured a majority in the National Assembly.

Benin was thus the first African country to effect successfully the transition from dictatorship to a pluralistic political system. In the second round of National Assembly elections held in March 1995, Soglo's political vehicle, the Parti de la Renaissance du Benin, was the largest single party but lacked an overall majority. The success of a party formed by supporters of ex-president Kérékou, who had officially retired from active politics, encouraged him to stand successfully at both the 1996 and 2001 presidential elections.

During the 2001 elections, however, alleged irregularities and dubious practices led to a boycott of the runoff poll by the main opposition candidates. The four top-ranking contenders following the first round presidential elections were Mathieu Kérékou (incumbent) 45.4%, Nicephore Soglo (former president) 27.1%, Adrien Houngbedji (National Assembly Speaker) 12.6%, and Bruno Amoussou (Minister of State) 8.6%. The second round balloting, originally scheduled for March 18, 2001, was postponed for days because both Soglo and Houngbedji withdrew,

alleging electoral fraud. This left Kérékou to run against his own Minister of State, Amoussou, in what was termed a "friendly match."

In December 2002, Benin held its first municipal elections since before the institution of Marxism-Leninism. The process was smooth with the significant exception of the 12th district council for Cotonou, the contest that would ultimately determine who would be selected for the mayoralty of the capital city. That vote was marred by irregularities, and the electoral commission was forced to repeat that single election. Nicephore Soglo's Renaisance du Benin (RB) party won the new vote, paving the way for the former president to be elected Mayor of Cotonou by the new city council in February 2002.

National Assembly elections took place in March 2003 and were generally considered to be free and fair. Although there were some irregularities, these were not significant and did not greatly disrupt the proceedings or the results. These elections resulted in a loss of seats by RB—the primary opposition party. The other opposition parties, the Party for Democratic Renewal (PRD) led by the former Prime Minister Adrien Houngbedji and the Alliance Etoile (AE), joined the government coalition. Former West African Development Bank Director Boni Yayi won the March 2006 election for the presidency in a field of 26 candidates. International observers including the United Nations, Economic Community of West African States (ECOWAS), and others called the election free, fair, and transparent. President Kérékou was barred from running under the 1990 constitution due to term and age limits. President Yayi was inaugurated on April 6, 2006.

Benin held legislative elections on March 31, 2007 for the 83 seats in the National Assembly. The "Force Cowrie for an Emerging Benin" (FCBE) party, closely linked to President Yayi, won a plurality of the seats in the National Assembly, providing the president with considerable influence over the legislative agenda.

Principal Government Officials

Last Updated: 11/12/08

Pres.: **Thomas YAYI Boni**
Min. of State in Charge of the Economy, Economic Forecasting, Development, & Evaluations of Public Action: **Pascal Irene KOUPAKI**
Min. of State in Charge of National Defense: **Issifou Kgui N'DOURO**
Min. of Admin. & Institutional Reform: **Idrissou Sina Bio GOUNOU**
Min. of Agriculture, Animal Husbandry, & Fisheries: **Roger DOVONOU**
Min. in Charge of Relations With Institutions & Spokesman for the Govt.: **Alexandre HOUTONDJI**
Min. of Culture, Tourism, & Handicrafts: **Soumanu TOLEBA**
Min. of Decentralization, Local Communities, & Land Management: **Dmolo Issa MOKO**
Min. of Environment & Conservation of Nature: **Juliette Koudenoukpo BIAOU**
Min. of Family & Children: **Gnimbr DANSOU**
Min. of Finance: **Soul Man LAWANI**
Min. of Foreign Affairs, African Integration, Francophonie, & Beninese Diaspora: **Moussa OKANLA**
Min. of Health: **Kessile TCHALA**
Min. of Higher Education & Scientific Research: **Vicentia BOCCO**
Min. of Industry, Commerce, & Small & Medium Scale Enterprises: **Gregoire AKOFODJI**
Min. of Interior & Public Security: **Felix HESSOU**
Min. of Justice, Legislation, & Human Rights, & Keeper of the Seals: **Cassa Gustave ANANI**
Min. of Microfinance & Youth & Women's Employment: **Sakinatou Abdou Alfa Orou SIDI**
Min. of Mines, Energy, & Water: **Sacca LAFIA**
Min. of Primary Education, Literacy, & National Languages: **Christine OUINSAVI**
Min. of Secondary Education, Vocational Training, & Technical Training: **Bernadette Sohoudji AGBOSSOU**
Min. of Urban Development, Land Reform, & Erosion Prevention: **Francois Gbendoukpo NOUDEGBESSI**
Min. of Work & Public Service: **Emmanuel TIANDO**
Min. of Youth, Sports, & Leisure: **Ganiou SOGLO**
Min.-Del. for Budget in the Office of the Minister of Finance: **Albert Segbegnon HOUNGBO**
Min.-Del. to the Pres. in Charge of Communications & New Technologies: **Dsir ADADJA**
Min.-Del. to the Pres. for Transport & Public Works: **Armand ZINZINDOHOUE**
Governor, Central Bank: **Charles Konan BANNY**
Ambassador to the US: **Cyrille Segbe OGUIN**
Permanent Representative to the UN, New York: **Jean-Marie EHOUZOU**

Benin maintains an embassy in the United States at 2124 Kalorama Road, Washington, DC 20008, tel. 202-232-6656. The Permanent Representative of the Republic of Benin to the United Nations is located at 4 East 73rd Street, New York, NY 10021 tel. 212-249-6014, fax 212-734-4735.

ECONOMY

Benin's economy is chiefly based on agriculture. Cotton accounts for 40% of GDP and roughly 80% of official export receipts. There also is production of textiles, palm products, and cocoa. Corn, beans, rice, peanuts, cashews, pineapples, cassava, yams, and other various tubers are grown for local subsistence. Benin began producing a modest quantity of offshore oil in October 1982. Production ceased in recent years but exploration of new sites is ongoing. A modest fishing fleet provides fish and shrimp for local subsistence and export to Europe. A number of formerly government-owned commercial activities are now privatized, and the government, consistent with its commitments to the IMF and World Bank, has plans to continue on this path. Smaller businesses are privately owned by Beninese citizens, but some firms are foreign owned, primarily French and Lebanese. The private commercial and agricultural sectors remain the principal contributors to growth.

Economic Development

Since the transition to a democratic government in 1990, Benin has undergone a remarkable economic recovery. A large injection of external

investment from both private and public sources has alleviated the economic difficulties of the early 1990s caused by global recession and persistently low commodity prices (although the latter continues to affect the economy). The manufacturing sector is confined to some light industry, which is mainly involved in processing primary products and the production of consumer goods.

Benin is dependent on imported electricity, mostly from Ghana, which currently accounts for a significant proportion of the country's imports. Benin has several initiatives to attract foreign capital to build electricity generation facilities in Benin in order to break this dependency. The service sector has grown quickly, stimulated by economic liberalization and fiscal reform. Membership of the CFA Franc Zone offers reasonable currency stability. Benin sells its products mainly to France and, in smaller quantities, to the Netherlands, Korea, Japan, and India. France is Benin's leading source for imports. Benin also is a member of the West African economic community ECOWAS.

In March 2003, the World Bank and International Monetary Fund (IMF) agreed to support a comprehensive debt reduction package for Benin under the enhanced Heavily Indebted Poor Countries (HIPC) Initiative. Debt relief under HIPC amounts to approximately $460 million. Benin received $27.1 million in 2002 and received $32.9 million in 2003. HIPC will reduce Benin's debt-to-export ratio, freeing up considerable resources for education, health, and other anti-poverty programs.

Despite its growth, the economy of Benin still remains underdeveloped and dependent on subsistence agriculture, cotton production, and regional trade. Inflation has subsided over the past several years. Real economic growth for 2007 was 4.2%. Commercial and transport activities, which make up a large part of GDP, are vulnerable to developments in Nigeria, including fuel shortages.

FOREIGN RELATIONS

Abroad, Benin has strengthened ties with France, the former colonial power, as well as the United States and the main international lending institutions. Benin also has adopted a mediating role in the political crises in Liberia, Guinea-Bissau, and Togo and provided a contribution to the UN force in Haiti. In early 2003, Benin provided a peacekeeping contingent to the ECOWAS stabilization force in Cote d'Ivoire. Benin's democratic standing, stability, and positive role in international peacekeeping have helped Benin's international stature continue to grow. Benin enjoys stable relations with Nigeria, the main regional power. Benin held a seat on the UN Security Council; its membership term ended December 31, 2005.

U.S.-BENINESE RELATIONS

The United States and Benin have had an excellent history of relations in the years since Benin embraced democracy. The U.S. Government continues to assist Benin with the improvement of living standards that are key to the ultimate success of Benin's experiment with democratic government and economic liberalization, and are consistent with U.S. values and national interest in reducing poverty and promoting growth. The bulk of the U.S. effort in support of consolidating democracy in Benin is focused on long-term human resource development through U.S. Agency for International Development (USAID) programs.

Efforts to pursue this national interest are spearheaded by USAID, which has effective programs focused on primary education, family health (including family planning), women's and children's health, and combating sexually transmitted diseases, especially the spread of HIV. USAID's Democracy and Governance program also emphasizes encouraging greater civil society involvement in national decision making; strengthening mechanisms to promote transparency and accountability; improving the environment for decentralized private and local initiatives; and enhancing the electoral system and the national legislature. A panoply of military-to-military cooperation programs reinforces democratizing efforts. U.S.-Benin military cooperation is now being expanding, both bilaterally and within a broader regional framework.

In February 2006, the Government of Benin signed a 5-year $308 million Millennium Challenge Compact (MCC) to increase investment and private sector activity in Benin. The program removes key constraints to growth and supports improvements in physical and institutional infrastructures in four critical sectors: land, financial services, justice, and markets. The proposed projects reinforce each other, contributing to an economic rate of return of 17%.

The U.S. advances the ethos of law enforcement by working with Beninese authorities to crack down on crimes, help eradicate corruption, promote good governance, the rule of law, and greater official accountability. The U.S. Public Affairs Office in Cotonou leads the U.S.-Benin cultural, professional, and educational exchanges, with a focus on helping educate the Government of Benin and the public on the trade opportunities and advantages of the African Growth and Opportunity Act. The PA Office also helps in expanding efforts to build a more responsible media. The U.S. Peace Corps program in Benin provides ongoing opportunities for increased understanding between Beninese and Americans. The approximately 110 volunteers promote sustainable development through activities in health, education, the environment, and small enterprise development. The U.S. Peace Corps program in Benin is one of the most successful in Africa, in part because of Beninese receptivity and collaboration. Currently, trade between Benin and the United States is small, but interest in American products is growing. The United States is interested in promoting increased trade with Benin in order

to contribute to U.S. trade with Benin's neighbors, particularly Nigeria, Niger, and Burkina Faso, which receive large amounts of their own imports through the port of Cotonou. Such trade also is facilitated by Benin's membership in the Economic Community of West African States (ECOWAS) and in the CFA franc monetary zone. The U.S. Government also works to stimulate American investment in key sectors such as energy, telecommunications, and transportation. Benin has been eligible for the African Growth and Opportunity Act (AGOA) since the program began in 2000. It qualified for AGOA textile and apparel benefits in January 2004.

TRAVEL

Consular Information Sheet

April 28, 2008

Country Description: Benin is a developing country in West Africa. Its political capital is Porto Novo; however, its administrative capital, Cotonou, is Benin's largest city and the site of most government, commercial, and tourist activity.

Entry Requirements: A passport and visa are required. Visas are not routinely available at the airport. Visitors to Benin should also carry the WHO Yellow Card ("Carte Jaune") indicating that they have been vaccinated for yellow fever. Contact the Embassy of Benin for the most current visa information. The Embassy is located at: 2124 Kalorama Road, NW, Washington, DC 20008; Tel: 202-232-6656.

Safety and Security: U.S. citizens should avoid crowds, political rallies, and street demonstrations and maintain security awareness at all times.

U.S. citizens should not walk on the beach alone at any time of day. It is also highly recommended not to carry a passport or valuables when walking in any part of the city. Travelers should carry a notarized photocopy of the photo page of their passport (see Crime section). They should not walk around the city after dark, and should take particular care to avoid the beach and isolated areas near the beach after dark.

The ocean currents along the coast are extremely strong and treacherous with rough surf and a strong undertow, and several people drown each year.

For the latest security information, Americans traveling abroad should regularly monitor the Department of State, Bureau of Consular Affair's Internet site at http://travel.state.gov, where the current Travel Warnings and Travel Alerts, including the Worldwide Caution Travel Alert, can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S. and Canada, or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: Street robbery is a significant problem in Cotonou. Robbery and mugging occurs along the Boulevard de France (the beach road by the Marina and Novotel Hotels) and on the beaches near hotels frequented by international visitors. Most of the reported incidents involve the use of force, often by armed persons, with occasional minor injury to the victim. Travelers should avoid isolated and poorly-lit areas and should not walk around the city or the beaches between dusk and dawn. Even in daylight hours, foreigners on the beach near Cotonou are frequent victims of robberies. When visiting the beach, travelers should not bring valuables and should carry only a photocopy of their passport. If you are a victim of crime, you should contact the U.S. Embassy immediately. There has been a continued increase in the number of robberies and carjacking incidents after dark, both within metropolitan Cotonou and on highways and rural roads outside of major metropolitan areas. Motorists are urged to be wary of the risk of carjacking. Keep the windows of your vehicle rolled up and the doors locked, and stay alert for signs of suspicious behavior by other motorists or pedestrians that may lead to carjacking, such as attempts to stop a moving vehicle for no obvious reason. Travelers should avoid driving outside the city of Cotonou after dark and should exercise extreme caution when driving in Cotonou after dark. Overland travel to Nigeria is dangerous near the Benin/Nigeria border due to unofficial checkpoints and highway banditry.

Travelers should avoid the use of credit cards and automated teller machines (ATMs) in Benin due to a high rate of fraud. Perpetrators of business and other kinds of fraud often target foreigners, including Americans. While such fraud schemes in the past have been largely associated with Nigeria, they are now prevalent throughout West Africa, including Benin, and are more frequently perpetrated by Beninese criminals. Business scams are not always easy to recognize, and any unsolicited business proposal should be carefully scrutinized. There are, nevertheless, some indicators that are warnings of a probable scam. Look out for:

- Any offer of a substantial percentage of a very large sum of money to be transferred into your account, in return for your "discretion" or "confidentiality;"
- Any deal that seems too good to be true;
- Requests for signed and stamped, blank letterhead or invoices, or for bank account or credit card information;
- Requests for urgent air shipment, accompanied by an instrument of payment whose genuineness cannot immediately be established;
- Solicitations claiming the soliciting party has personal ties to high government officials;
- Requests for payment, in advance, of transfer taxes or incorporation fees;
- Statements that your name was provided to the soliciting party either by someone you do not know or by "a reliable contact;"
- Promises of advance payment for services to the Beninese government; and
- Any offer of a charitable donation.

These scams, which may appear to be a legitimate business deal requiring advance payments on contracts, pose a danger of both financial loss and physical harm. Recently more American citizens have been targeted. The perpetrators of such scams sometimes pose as attorneys.

One common ploy is to request fees for "registration" with fictitious government offices or regulatory authorities. The best way to avoid becoming a victim of advance-fee fraud is common sense—if it looks too good to be true, it probably is. Travelers should carefully check out any unsolicited business proposal originating in Benin before committing any funds, provide any goods or services, or undertake any travel. Scams may also involve persons posing as singles on Internet dating sites or as online acquaintances who then get into trouble and require money to be "rescued." If you are asked to send money by someone you meet online please contact the U.S. Embassy before doing so.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

Medical Facilities and Health Information: Medical facilities in Benin are limited and not all medicines are available. Travelers should bring their own supplies of prescription drugs and preventive medicines. Not all medicines and prescription drugs available in Benin are USFDA-approved. Malaria is a serious risk to travelers to Benin. For information on malaria, its prevention, protection from insect bites, and anti-malarial drugs, please visit the CDC travelers' health web site at http://wwwn.cdc.gov/travel.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's Internet site at http://wwwn.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith/en.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Benin is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

With the exception of the road linking Cotonou in the south to Malanville on the border with Niger in the north, and from Parakou in central Benin to Natitingou in the northwestern part of the country, roads in Benin are generally in poor condition and are often impassable during the rainy season. Benin's unpaved roads vary widely in quality; deep sand and potholes are common. During the rainy season from mid-June to mid-September, dirt roads often become impassable. Four-wheel drive vehicles with full spare tires and emergency equipment are recommended.

Most of the main streets in Cotonou are paved, but side streets are often dirt with deep potholes. Traffic moves on the right, as in the United States. Cotonou has no public transportation system; many Beninese people rely on bicycles, mopeds, motorbikes, and zemidjans (moped taxis). All official Americans are required to wear safety helmets when on a motorcycle and are strongly discouraged from using zemidjans. Travelers using zemidjans, particularly at night, are much more vulnerable to being mugged, assaulted or robbed. Buses and bush taxis offer service in the interior.

Gasoline smuggled from Nigeria is widely available in glass bottles and jugs at informal roadside stands throughout Cotonou and much of the country. This gasoline is of unreliable quality, often containing water or other contaminants that can damage

or disable your vehicle. Drivers should purchase fuel only from official service stations. There are periodic gas shortages, which can be particularly acute in the north of the country where there are few service stations.

U.S. citizens traveling by road should exercise extreme caution. Poorly maintained and overloaded transport and cargo vehicles frequently break down and cause accidents. Drivers often place branches or leaves in the road to indicate a broken down vehicle is in the roadway. Undisciplined drivers move unpredictably through traffic. Construction work is often poorly indicated. Speed bumps, commonly used on paved roads in and near villages, are seldom indicated. Drivers must be on guard against people and livestock wandering into or across the roads. Nighttime driving is particularly hazardous as vehicles frequently lack headlights and/or taillights, and brake lights are often burned out.

With few exceptions, Cotonou and other cities lack any street lighting, and lighting on roads between population centers is non-existent. The U.S. Embassy in Cotonou prohibits non-essential travel outside of metropolitan areas after dusk by official Americans and strongly urges all U.S. citizens to avoid night driving as well. There have been numerous carjackings and robberies on roads in Benin after dark, several of which resulted in murder when the driver refused to comply with the assailants' demands. The National Police periodically conduct vehicle checks at provisional roadblocks in an effort to improve road safety and reduce the increasing number of carjackings. When stopped at such a roadblock, you must have all of the vehicle's documentation available to present to the authorities.

Aviation Safety Oversight: As there is no direct commercial air service between the United States and Benin, the U.S. Federal Aviation Administration (FAA) has not assessed Benin's Civil Aviation Authority for compliance with International Civil Aviation Organization (ICAO) aviation safety standards. For more information, travelers may visit the FAA's Internet web site at http://www.faa.gov.

Special Circumstances: U.S. citizens are advised to keep a notarized photocopy of the photo page of their passport with them at all times when traveling in Benin. The Embassy has had a few reports of officials requesting a "gift" to facilitate official administrative matters (e.g., customs entry). Such requests should be politely but firmly declined. It is prohibited to photograph government buildings and other official sites, such as military installations, without the formal consent of the Government of Benin. In general, it is always best to be courteous and ask permission before taking pictures of people. Beninese citizens may react angrily if photographed without their prior approval. Obtaining customs clearance at the port of Cotonou for donated items shipped to Benin from the United States may be a lengthy process. In addition, to obtain a waiver of customs duties on donated items, the donating organization must secure prior written approval from the Government of Benin. Please contact the U.S. Embassy in Cotonou for more detailed information.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating Benin laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Benin are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in Benin are encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration web site so that they can obtain updated information on travel and security within Benin.

Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency. The U.S. Embassy is located at Rue Caporal Anani Bernard in Cotonou.

The Embassy's mailing address is B.P. 2012, Cotonou, Benin. The 24-hour telephone numbers are (229) 21-30-06-50, 21-30-05-13, and 21-30-17-92. The Embassy's general fax number is (229) 21-30-06-70; the Consular Section's fax number is (229) 21-30-66-82; http://cotonou.usembassy.gov.

Intercountry Adoption

September 2006

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is based on public sources and current understanding. Questions involving foreign and U.S. immigration laws and legal interpretation should be addressed respectively to qualified foreign or U.S. legal counsel.

Patterns of Immigration: Recent immigration visa statistics show that only one immigrant visa has been issued to a Beninese orphan in the last five years.

Adoption Authority: An adoption request must be filed in the local court of the town/city where the child resides. Adoptions are handled by the courts in Benin.

Eligibility Requirements for Adoptive Parents: A Beninese child can be adopted by a Beninese citizen or by a citizen of another country. Adoptive parents must be either a couple who has been married for five years OR the spouse of a biological parent OR an unmarried individual of at least 35 years of age.

Exceptions to these requirements may be obtained by a court order from the local court where the child resides.

Residency Requirements: There is no residency requirement for adoption in Benin.

Time Frame: Adoptions in Benin can take several months. It is likely to take longer if the child you are adopting does not live in a major city. In addition to the actual petition for adoption, adoptive parents must also provide birth certificates for all parties (including any biological parent still living) and this process can take several months.

Adoption Agencies and Attorneys: Adopting a child in Benin can be done independently by the prospective parent(s). It is advisable to retain a lawyer to assist with the court proceedings. An attorneys list may be found on the U.S. Embassy web site at: http://cotonou.usembassy.gov/listoflawyers.html.

Adoption Fees: Adoptive parents must pay court fees and fees to obtain other needed paperwork. The initial fee to submit documents is only 2000 fCFA (approx. $4), but in some cases there may be additional fees. For example, one family paid for the printing of a book of new forms required to obtain local birth certificates because the local government could not afford to pay for it, and there was no other way to get the birth certificate they needed to continue the processing of their adoption petition. Local courts may also have their own fee structures for filing petitions.

Adoption Procedures: An adoption request can be filed by a couple who has been married at least five years, the spouse of one of the biological parents, or an unmarried individual of at least 35 years of age. There is no maximum age defined in the law. All adoptive parents must be childless and the age difference between the parent(s) and the child must be at least 15 years. The local judge hearing the case can make an exception if he/she believes it is warranted and grant an adoption to parent(s) who have biological or adoptive children already.

The granting of consent for the child's adoption by the biological parent(s) or guardian of the child must take place in the presence of a judge, a notary public or (if outside of Benin) a consular officer at a Beninese Embassy. Prospective parent(s) are required to submit a written request to the Tribunal along with a certified agreement to adopt the child, birth certificates (for themselves, the child and any biological parent), a marriage certificate (if applicable), a document of consent by the biological parent(s) and paperwork documenting their ability to support the child financially (e.g. bank statements etc. Although there is a new Family Code in Benin that is supposed to regularize procedures and forms throughout the country, it has not been fully implemented and different localities may have different procedures or may not know/have access to the appropriate forms or procedures for family related issues. The adoption process can be complicated and lengthy and a local lawyer is probably the best resource for the questions of any prospective adoptive parent(s).

Required Documents: Prospective parent(s) are required to submit a written request along with a certified agreement to adopt the child, birth certificates (for themselves, the child and any biological parent), a marriage certificate (if applicable), a document of consent by the biological parent(s) and paperwork documenting their ability to support the child financially (e.g. bank statements etc.).

Embassy of the Republic of Benin

2124 Kalorama Road, N.W.

Washington, DC 20008

Telephone: (202) 232-6656

Fax: (202) 265-1996

U.S. Immigration Requirements: Prospective adoptive parents are strongly encouraged to consult USCIS publication M-249, *The Immigration of Adopted and Prospective Adoptive Children*, as well as the Department of State publication, *Intercountry Adoptions*.

Please see the *Intercountry Adoption* section of this book for more details and review current reports online at http://adoption.state.gov.

U.S. Embassy Cotonou

Rue Caporal Bernard Anani

01 BP 2012

Cotonou, Benin

Additional Information: Specific questions about adoption in Benin may be addressed to the U.S. Embassy in Benin. General questions regarding intercountry adoption may be addressed to the Office of Children's Issues, U.S. Department of State, CA/OCS/CI, SA-29, 4th Floor, 2201 C Street, NW, Washington, D.C. 20520-4818, toll-free Tel: 1-888-407-4747.

BERMUDA

Compiled from the May 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Bermuda

PROFILE

Geography

Area: 58.8 sq. km. (22.7 sq. mi.).
Cities: (2000 census) Capital—Hamilton (pop. 3,461). Other city—St. George (pop. 3,306).
Terrain: Hilly islands.
Climate: Semi-tropical.

People

Nationality: Noun and adjective—Bermudian(s).
Population: (2007 est.) 64,009.
Annual growth rate: (2006 est.) 0.61%.
Ethnic groups: Black 54.8%, white 34%, mixed and other 11.1%.
Religions: (2000) Anglican 23%, Roman Catholic 15%, African Methodist Episcopal 11%, 7th Day Adventist 7%, Methodist 4%, other 40% (none or not stated).
Languages: English.
Education: Years compulsory—to age 16. Bermuda placed third overall of six developed nations (including the U.S.) in the 2005 Adult Literacy and Life Skills Survey.
Health: (2006 est.) Infant mortality rate—8.3 per thousand. Life expectancy—men 76 yrs., women 80 yrs.
Work force: (2004 est.) Sales—19%; services—19%; clerical—19%; professional and technical—17%; administrative and managerial—15%; agriculture and fishing—3%; laborers—3%.

Government

Type: British Overseas Territory with significant autonomy.
Constitution: June 8, 1968; amended 1989 and 2003.
Government branches: Chief of State—Queen Elizabeth II, British monarch (head of state, represented by a governor). Head of Government—Premier, Ewart Brown. Legislative—Senate (upper house, 11 members appointed by the governor, the premier, and the opposition); House of Assembly (lower house; 36 seats elected by popular vote). Judicial—Supreme Court.
Political subdivisions: Nine parishes.
Political parties: Progressive Labor Party (PLP), United Bermuda Party (UBP), National Liberal Party (NLP).
Suffrage: Universal at 18.

Economy

GDP: (nominal, 2005) $4.9 billion. Sectors—21% ($926.5 million) from international companies; 16% ($712 million) from real estate and rental; 12% ($536 million) from financial intermediation; 9% ($379 million) from wholesale, retail trade, and repair services; 6% ($245.8 million) from the hotel and restaurant sector; 6% ($272.4 million) from construction; and 30% ($1.5 billion) from other sectors.
GDP growth rate: (2005 provisional) 4.6%.
Per capita nominal GDP: (2005 prov.) $76,403.
Inflation rate: Annual inflation rate for 2005 was 4.0%.
Natural resource: Limestone, used primarily for building.
Agriculture: Products—semitropical produce, dairy products, flowers, honey.
Industry: Types—re/insurance finance, tourism, structural concrete products, paints, perfumes, furniture.
Trade: Exports (2006, includes re-exports)—$25 million: semitropical produce, light manufactures. Imports (2006)—$1.06 billion: food, clothing, household goods, chemicals, live animals, machinery, transport, and miscellaneous manufactures. Major suppliers—U.S. ($752.6 million), United Kingdom, Canada, Caribbean countries (mostly oil from Netherlands Antilles).

HISTORICAL HIGHLIGHTS

Bermuda is an archipelago consisting of seven main islands and many smaller islands and islets lying about 1,050 kilometers (650 mi.) east of North Carolina. The main islands—

with hilly terrain and subtropical climate—are clustered together, connected by bridges, and are considered to be a geographic unit, referred to as the Island of Bermuda. Bermuda was discovered in 1503 by a Spanish explorer, Juan de Bermudez, who made no attempt to land because of the treacherous reef surrounding the uninhabited islands.

In 1609, a group of British colonists led by Sir George Somers was shipwrecked and stranded on the islands for 10 months. Their reports aroused great interest about the islands in England, and in 1612 King James extended the Charter of the Virginia Company to include them. Later that year, about 60 British colonists arrived and founded the town of St. George, the oldest continuously inhabited English-speaking settlement in the Western Hemisphere. When representative government was introduced to Bermuda in 1620, it became a self-governing colony.

Due to the islands' isolation, for many years Bermuda remained an outpost of 17th-century British civilization, with an economy based on the use of the islands' endemic cedar trees for shipbuilding and the salt trade. Hamilton, a centrally located port founded in 1790, became the seat of government in 1815.

Slaves from Africa were brought to Bermuda soon after the colony was established. The slave trade was outlawed in Bermuda in 1807, and all slaves were freed in 1834. Today, about 61% of Bermudians are of African descent.

The establishment of a formal constitution in 1968 bolstered internal self-government; debate about independence ensued, although a 1995 independence referendum was defeated. The current government re-opened the independence debate in 2004.

GOVERNMENT AND POLITICAL CONDITIONS

Bermuda is the oldest self-governing overseas territory in the British Commonwealth. Its 1968 constitution provides the island with formal responsibility for internal self-government, while the British Government retains responsibility for external affairs, defense, and security. The Bermudian Government is consulted on any international negotiations affecting the territory. Bermuda participates, through British delegations, in the UN and some of its specialized and related agencies.

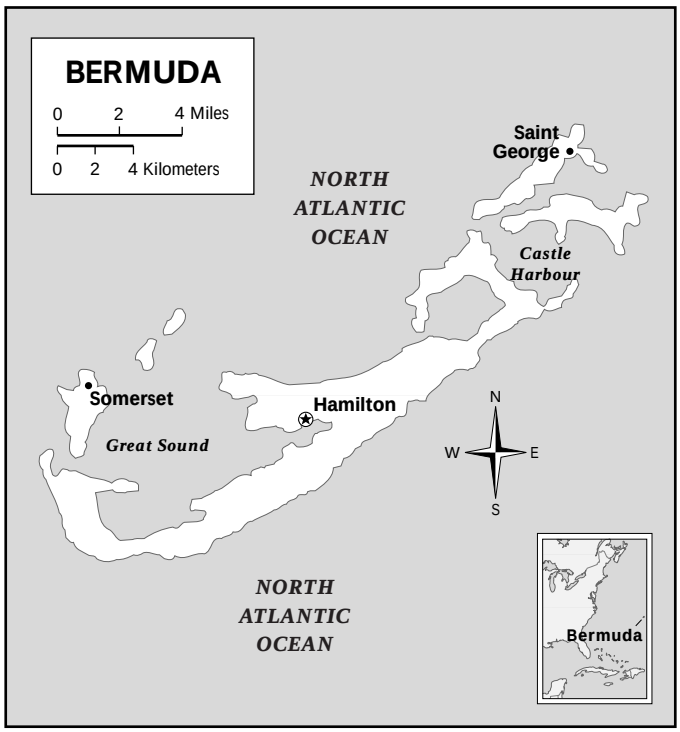
Government Structure

Queen Elizabeth II is head of state and is represented in Bermuda by a governor, whom she appoints. Internally, Bermuda has a parliamentary system of government.

The premier is head of government and leader of the majority party in the House of Assembly. The cabinet is composed of ministers selected by the premier from among members of the House of Assembly and the Senate.

The 36-member House is elected from 36 electoral districts (one representative from each district) for a term not to exceed 5 years. The Senate, or reviewing house, serves concurrently with the House and has 11 members—five appointed by the governor in consultation with the premier, three by the opposition leader, and three at the governor's discretion.

The judiciary is composed of a chief justice and associate judges appointed by the governor. For administrative purposes, Bermuda is divided into nine parishes, with Hamilton and St. George considered autonomous corporations.



Political Conditions

Bermuda's first political party, the Progressive Labor Party (PLP), was formed in May 1963 with predominantly black adherents. In 1965, the two-party system was launched with the formation of the United Bermuda Party (UBP), which had the support of the majority of white voters and of some black voters. A third party, the Bermuda Democratic Party (BDP), was formed in the summer of 1967 with a splinter group from the PLP as a nucleus; it disbanded in 1970. It was later replaced by the National Liberal Party (NLP), which currently holds no parliamentary seats. Bermuda's first election held on the basis of universal adult suffrage and equal voting took place on May 22, 1968; previously, the franchise had been limited to property owners. In the 1968 election, the UBP won 30 House of Assembly seats, while the PLP won 10 seats and the BDP lost the 3 seats it had previously held. The UBP continued to maintain control of the government, although by decreasing margins in the Assembly, until 1998 when the PLP won the general election for the first time.

Unsatisfied aspirations, particularly among young blacks, led to a brief civil disturbance in December 1977, following the execution of two men found guilty of the 1972-73 assassinations of Governor Sir Richard Sharples and four others. In the 1980s, the increasing prosperity of Bermudians, combined with limited land area, caused a housing shortage. Despite a general strike in 1981 and economic downturn in the early 1980s, Bermuda's social, political, and economic institutions remained stable.

Both political parties have discussed the possibility of complete independence. An independence referendum called by a sharply divided UBP in the summer of 1995 was resoundingly defeated and resulted in the resignation of the premier and UBP leader, Sir John Swan. Just over 58% of the electorate voted in the independence referendum, which had to be postponed one day due to disruptions caused by Hurricane Felix.

Of those voting, over 73% voted against independence, while only 25% voted in favor. Vote results may have been distorted by the Progressive Labor Party (PLP) call to boycott the referendum.

Eventual independence from the United Kingdom (U.K.) has been a goal of the PLP since the party's inception in 1963. In February 2004 then-Premier (and PLP party leader) Alex Scott announced his decision to commence an open and objective debate on the subject of independence.

The government-appointed Bermuda Independence Commission held hearings island-wide where there was considerable focus on the mechanics of deciding independence, whether through an independence referendum, a general election, or some combination of the two. However, several recent polls indicated little support for independence. The international and local business communities continue to take a wait-and-see attitude.

Currently citizens of Britain's overseas territories, including Bermuda, are entitled to British citizenship. The British Overseas Territories Bill, passed in February 2002, provides automatic acquisition of British citizenship, including automatic transmission of citizenship to their children; the right of abode, including the right to live and work in the U.K. and the European Union (EU); the right not to exercise or to formally renounce British citizenship; and the right to use the fast track European Union/European Economic Area (EU/EEA) channel at the airport, free of U.K. immigration controls. The U.K. has said that citizens of an independent Bermuda would no longer be automatically entitled to British citizenship and the EU benefits that accrue to it.

There are no conditions attached to the grant of British citizenship to the overseas territories, a fact of particular importance to Bermuda where the issue of independence is being debated.

A 1999 U.K. government White Paper states: "The new grant of British citizenship will not be a barrier, therefore, to those Overseas Territories choosing to become independent of Britain. Our Overseas Territories are British for as long as they wish to remain British. Britain has willingly granted independence where it has been requested; and we will continue to do so where this is an option."

Following a bitter and divisive general election on December 18, 2007—which many predicted would be very close—the Progressive Labor Party (PLP) under Premier Ewart Brown was returned to power with the same number of seats as it had going into the election.

The opposition United Bermuda Party (UBP) lost its third successive election, and opposition leader Michael Dunkley lost his seat in the House of Assembly. He was appointed opposition leader in the Senate. The UBP elected member of parliament Kim Swan as opposition leader and Cole Simons as deputy. Mr. Swan is a first-time member of parliament whose previous public service was as a UBP senator.

Principal Government Officials

Last Updated: 11/12/08

Governor: **Richard GOZNEY, Sir**
Premier: **Alex SCOTT**
Dep. Premier: **Ewart BROWN**
Min. of Education: **Terry LISTER**
Min. of Environment: **Neletha BUTTERFIELD**
Min. of Finance: **Paula COX**
Min. of Health & Family Services: **Patrice PARRIS**
Min. of Housing, Works, & Engineering: **Ashfield DEVENT**
Min. of Justice: **Larry MUSSENDEN**
Min. of Labor & Home Affairs: **Randy NORTON**
Min. of Legislative Affairs: **Michael SCOTT**
Min. of Sports & Community Affairs: **Dale BULTER**
Min. of Tourism, Telecommunications, and e-Commerce: **Renee WEBB**
Min. of Transport: **Ewart BROWN**
Min. of Works, Engineering, Parks, & Housing: **Alex SCOTT**
Attorney Gen.: **Larry MUSSENDEN**
Cabinet Sec.:
Chmn., Bermuda Monetary Authority:

Bermuda's interests in the U.S. are represented by the United Kingdom, whose embassy is at 3100 Massachusetts Avenue, NW, Washington, DC 20008; tel: 202-588-6500; fax: 202-588-7870. The Bermudian Government's Department of Tourism has offices in New York and Toronto.

ECONOMY

Bermuda has enjoyed steady economic prosperity since the end of World War II, although the island experienced a mild recession in 2001-02, paralleling the recession in the U.S. Bermuda enjoys one of the highest per capita incomes in the world. Its economy is based primarily upon international business and tourism. In 2006, international business, business services, and tourism accounted for 91.7% of the total balance of payments current account receipts of foreign exchange. However, the role of international business in the economy is expanding, whereas that of tourism is generally contracting.

Bermuda is an offshore financial center with a robust financial regulatory system. The government cooperates with the United States and the international community to prevent money laundering and terrorist financing and continues to update its legislation and procedures in conformance with international standards. Bermuda first enacted specific money laundering legislation in 1997, passing the Proceeds of Crime Act (PCA) to apply money laundering controls to financial institutions such as banks, deposit companies, trust companies, and investment businesses, including broker-dealers and investment managers. Insurance companies are covered to the extent that they are judged susceptible to the risk of money laundering abuse. Amendments in 2000, effective June 1, 2001, expanded the scope of the legislation to cover the proceeds of all indictable offenses, including tax evasion, corruption, fraud, counterfeiting, theft, and forgery. The Bermuda Monetary Authority Amendment (No. 3) Act 2004 clarified the authority of the BMA to respond to requests from overseas regulators for information about clients.

In December 2002, Parliament passed the Bermuda Monetary Authority Amendment Act 2002, expanding the list of BMA objectives to include action to combat financial crime. It underpins the BMA's existing role in checking systems and controls in financial institutions and paves the way for the BMA to expand its role in administering UN sanctions and other measures on a delegated basis. In order to implement provisions of relevant UN Security Council antiterrorism resolutions, the act—among other provisions—prescribes the manner by which the finance minister may delegate to the BMA the power to block accounts.

Bermuda enacted the Investment Business Act (IBA) in 1998 to regulate the island's financial services industry. In response to international directives, the government passed the Investment Business Act 2003 to further refine its terms. The act creates a balance between government regulation on the one hand and the competitive needs of Bermuda's most important industry—international business—on the other hand. By updating its regulatory framework, Bermuda has enhanced its reputation globally as an international standard-bearer. In return, international businesses registered in Bermuda are recognized as having met or surpassed the most stringent international criteria.

In 2006, Bermuda considered additional legislation to further enhance its compliance with international financial standards. The Collective Investment Scheme Act, a plan to institute a formal licensing regime for investment schemes, was passed by parliament at the end of 2006 under the name of the Investment Funds Act 2006. The act was implemented in early March 2007.

In 2006, 14,267 international companies were registered in Bermuda, many U.S.-owned. They are an important source of foreign exchange for the island, and spent an estimated $1.004 billion in Bermuda in 2006. The growing importance of international business is reflected in its increased share of GDP, up from 13.9% in 2004 to 21.9% in 2005 at $1.062 billion. Additionally, it is now the island's largest employer, with 4,489 jobs in 2006.

Historically important for employment and tax revenue, Bermuda's tourism industry had been experiencing difficulties for many years, but showed a slight improvement in 2006. In 1996, Bermuda welcomed 571,700 visitors to the island. By 2004, that figure had dropped to 477,757 but increased to 641,747 in 2006. Occupancy rates for 2006 averaged 63.8%, and were higher in the smaller hotels than at larger properties. Visitors contributed an estimated $475 million to the economy in 1996, but that figure declined to $392.3 million in 2005. Visitor spending increased in recent years to $464 million in 2006. Bermuda has little in the way of exports or manufacturing; almost all manufactured goods and foodstuffs must be imported. The value of imports rose from $551 million in 1994 to $964 million in 2005. The U.S. is Bermuda's primary trading partner, with $776.7 million in U.S. imports in 2006. The U.K., Canada, and the Caribbean countries (mainly the Netherlands Antilles) also are important trading partners. Exports from Bermuda, including imports into the small free port that are subsequently re-exported, decreased from $35 million in 1993 to $26 million in 2006. Duty on imports is a major source of revenue for the Government of Bermuda. In 2005-2006, the government obtained $224.2 million, or 27.9%, of its revenue base from imports. Heavy importation duties are reflected in retail prices. Even though import duties are high, wages have kept up for the most part with the cost of living, and poverty—by U.S. standards—appears to be practically nonexistent. Although Bermuda imposes no income, sales, or profit taxes, it does levy a real estate tax.

Bermuda is home to immigrants from other countries. According to the 2000 census, 79% of the population is Bermuda-born and 21% is foreign-born. U.K. immigrants comprise 28% of the immigrant population; U.S., 20% (although the U.S. Consulate estimates that the figure is closer to 40%); Canada, 15%; Caribbean, 12%; and Portugal/Azores, 10%. In February 1970, Bermuda converted from its former currency, the pound, to a decimal currency of dollars pegged to the U.S. dollar.

FOREIGN RELATIONS AND U.S.-BERMUDIAN RELATIONS

The United Kingdom is formally responsible for Bermuda's foreign and defense policy. U.S. policy toward the U.K. is the basis of U.S.-Bermudian relations. In the early 20th century, as modern transportation and communication systems developed, Bermuda became a popular destination for wealthy U.S., British, and Canadian tourists. While the tariff enacted in 1930 by the U.S. against its trading partners ended Bermuda's once-thriving agricultural export trade—primarily fresh vegetables to the U.S.—it helped spur the overseas territory to develop its tourist industry, which is second only to international business in terms of economic importance to the island.

During World War II, Bermuda became a significant U.S. military site because of its location in the Atlantic Ocean. In 1941, the U.S. signed a lend-lease agreement with the U.K. giving the British surplus U.S. Navy destroyers in exchange for 99-year lease rights to establish naval and air bases in Bermuda. The bases consisted of 5.8 square kilometers (2.25 sq. mi.) of land largely reclaimed from the sea. The U.S. Naval Air Station was on St. David's Island, while the U.S. Naval Air Station Annex was at the western end of the island in the Great Sound.

Both bases were closed in September 1995 (as were British and Canadian bases), and the lands were formally returned to the Government of Bermuda in 2002.

The Government of Bermuda has begun to pursue some international initiatives independent of the U.K. in recent years. Bermuda signed a cultural memorandum of understanding with Cuba in 2003. The island also joined the Caribbean Community (CARICOM) as an associate member in 2003. The U.S. Coast Guard (USCG) provided search and rescue assistance immediately following Hurricane Fabian in September 2003 but Bermuda declined subsequent offers of reconstruction assistance from the U.S. and U.K., preferring to accept assistance from its Caribbean neighbors. The USCG continues to provide search and rescue as needed.

An estimated 8,500 U.S. citizens live in Bermuda, many of them employed in the international business community. There also are a large number of American businesses incorporated in Bermuda, although no actual figures are available. Despite the trend of American businesses moving to Bermuda or other offshore jurisdictions to escape U.S. taxes, Bermuda maintains that the island is not a "tax haven" and that it taxes both local and foreign businesses equally.

While U.S. visitors to Bermuda are critical to the island's tourism industry, the number of U.S. visitors to Bermuda is declining. In 2006 only 76% of air arrivals originated from the U.S. compared to 83.9% in 1990. The number of air and cruise passengers from the U.S. totaled 464,000 in 2000. That number fell to 451,924 American passengers in 2006. Another 3,861 Americans sailed to the island via private yacht in 2006.

In 2005, 74% of Bermuda's imports came from the U.S. Areas of opportunity for U.S. investment are principally in the re-insurance and financial services industries, although the former U.S. base lands also may present long-term investment opportunities.

TRAVEL

Consular Information Sheet

June 27, 2008

Country Description: Bermuda is a highly developed British overseas territory with a stable democracy and modern economy. Tourist facilities are widely available.

Entry Requirements: Travelers may contact the British Consulate in New York, telephone (212) 745-0273/3206/0281, or the British consulate in Atlanta, Boston, Chicago, Dallas, Los Angeles, or San Francisco; Internet: http://www.britain-info.org or the Bermuda Department of Immigration at http://www.immigration.gov.bm.

All Americans traveling by air outside of the United States are required to present a passport or other valid travel document to enter or re-enter the United States. This requirement will be extended to sea travel (except closed loop cruises), including ferry service, by the summer of 2009. Until then, U.S. citizens traveling by sea must have government-issued photo identification and a document showing their U.S. citizenship (for example, a birth certificate or certificate of nationalization), or other WHTI compliant document such as a passport card for entry or re-entry to the U.S. Sea travelers should also check with their cruise line and countries of des-

tination for any foreign entry requirements. Applications for the new U.S. Passport Card are now being accepted. Based on current projections, we expect the passport card to be in full production beginning in July 2008. The card may not be used to travel by air and is available only to U.S. citizens. Further information on the passport card is available at http://travel.state.gov/passport/ppt_card/ppt_card_3926.html and upcoming changes to U.S. passport policy can be found on the Bureau of Consular Affairs web site at http://travel.state.gov/travel/cbpmc/cbpmc_2223.html. We strongly encourage all American citizen travelers to apply for a U.S. passport well in advance of anticipated travel. American citizens can visit travel.state.gov or call 1-877-4USA-PPT (1-877-487-2778) for information on how to apply for their passports.

Safety and Security: For the latest security information, Americans traveling abroad should regularly monitor the Department's Internet web site, where the current Worldwide Caution Travel Alert, Travel Warnings and Travel Alerts can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S., or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: Bermuda has a moderate but growing crime rate. Examples of common crimes include theft of unattended baggage and items from rental motorbikes, purse snatching (often perpetrated against pedestrians by thieves riding motorbikes), mugging, and theft from hotel rooms. Valuables left in hotel rooms (occupied and unoccupied) or left unattended in public areas are vulnerable to theft. The Consulate regularly receives reports of thefts of money, valuables, and passports and advises that travelers keep their hotel windows and doors locked at all times. Criminals often target transportation systems and popular tourist attractions.

Travelers should exercise caution when walking after dark or visiting out-of-the-way places on the island, as they can be vulnerable to theft and sexual assault, and because narrow and dark roadways can contribute to accidents. There have been incidents of sexual assault and acquaintance rape, and the use of "date rape" drugs such as Rohypnol has been reported in the media and confirmed by local authorities; one local advocacy group reports an increase in reporting the use of these drugs and accompanying sexual assault. Travelers should also note an increase in gang presence in Bermuda and should take regular precautions to avoid confrontation. The back streets of Hamilton are often the setting for nighttime assaults, particularly after the bars close.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

Medical Facilities and Health Information: Good medical care is available, though extremely expensive. The hospital performs general surgery and has an intensive care unit. Serious or complex medical problems will likely require medical evacuation to the United States.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's Internet site at http://www.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) website at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Bermuda is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

Traffic in Bermuda moves on the left side of the road and the roads are very narrow, often with no defined shoulder. The maximum speed limit in the city of Hamilton is 25 kph (15 mph) and 35 kph (21 mph) on the rest of the island. Under Bermudian law, non-residents are not allowed to own, rent, or drive four-wheeled vehicles. Non-residents must rely on taxis, the excellent local bus system, or motor scooters. Traffic is moderate, but road accidents - particularly involving motorbikes - are common and often result in serious injuries or death.

Rental motor scooters are readily available, and the required helmet is provided. However, visitors should carefully consider whether or not it is worth the risk to ride a scooter. Motor scooters provide the greatest road peril in Bermuda; local operators tend to abuse the speed limit more than other drivers, and they will often pass on the left or right with no warning. Those unfamiliar with driving on the left are likely to find the roundabouts and regulations for yielding at junctions confusing and dangerous. In addition, vehicles often stop on the side of the road, blocking one lane of traffic. Main roads, while generally in good condition, are extremely narrow and tend to be bor-

dered by heavy vegetation or low stone walls. Travelers who rent scooters should be aware that scooter accidents involving visitors are relatively common, and they can be fatal or involve serious injuries.

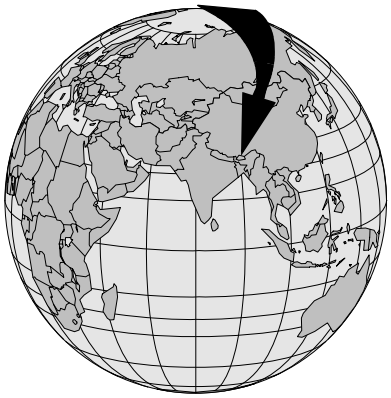
Taxis are readily available. The local bus system, which is excellent and relatively inexpensive, services the length of the island and stops close to most beaches, hotels, the downtown shopping area, and other points of interest. In addition, water ferry service to a variety of stops around the island is available seven days a week, and is a very safe and enjoyable mode of transportation. For specific information concerning Bermuda driver's permits, vehicle inspection, road tax and mandatory insurance, please contact the Bermuda Department of Tourism offices at 310 Madison Avenue, Suite 201, New York, NY, telephone (212) 818-9800, or via the Internet at http://www.bermudatourism.com.

Emergency services may be called at 911, and response time is generally good.

Aviation Safety Oversight: The U.S. Federal Aviation Administration (FAA) has assessed the Government of Bermuda's Civil Aviation Authority as being in compliance with International Civil Aviation Organization (ICAO) aviation safety standards for the oversight of Bermuda's air carrier operations. For more information, travelers may visit the FAA's internet website at http://www.faa.gov.

Special Circumstances: ATMs are widely available in Bermuda. Local banks may not accept checks drawn on U.S. accounts, but some Front Street stores catering to the tourist trade will accept U.S. checks as payment. The local American Express office will cash U.S. checks up to $500.00 for a three-percent fee. Credit cards are widely accepted at all establishments.

U.S. citizens who are taking prescription medication must inform Bermuda customs officials at the point of entry. Medicines must be in labeled containers. Travelers should carry a copy of the written prescription and a letter from the physician or pharmacist confirming the reason the medicine is prescribed.



Bermuda customs authorities may enforce strict regulations concerning temporary importation into or export from Bermuda of items such as animals, arms, ammunition and explosives, building sand, crushed rock, gravel, peat and synthetic potting media, foodstuffs (animal origin), fumigating substances, gaming machines, historic articles (relating to Bermuda), lottery advertisements and material, motorcycles, motor vehicles, obscene publications, organotin anti-fouling paint, plants, plant material, fruits and vegetables (living or dead, including seeds), pesticides, prescription drugs, prohibited publications, seditious publications, soil, VHF radios, radar and citizens band (CB) radios. For additional information on temporary admission, export and customs regulations and tariffs, please contact Bermuda Customs at telephone 1-441-295-4816, or email customs@bdagov.bm, or visit the Bermuda Customs web site at http://www.customs.gov.bm.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating Bermuda's laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Bermuda are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in Bermuda are encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration website, and to obtain updated information on travel and security within Bermuda. Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency.

The U.S. Consulate General is located at Crown Hill, 16 Middle Road, Devonshire DV03, and telephone 1-441-295-1342. Office hours for American Citizens Services are 1:30-3:30 Monday-Wednesday and 8:30-10:30 on Thursdays, except Bermudian and U.S. holidays. American citizens in need of after-hours emergency assistance may call the duty officer at telephone 1-441-335-3828.

BHUTAN

Compiled from the October 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Kingdom of Bhutan

PROFILE

Geography

Area: 46,500 sq. km.

Cities: Capital—Thimphu (pop. approx. 55,000) Other significant cities—Paro, Phoentsholing, Punakha, Bumthong.

Terrain: Mountainous, from the Himalayas to lower-lying foothills and some savannah.

Climate: Alpine to temperate to subtropical with monsoon season from June to September.

People

Nationality: Noun and adjective—Bhutanese.

Population: Approximately 672,425 (according to the 2005 census).Domestic and international estimates of the population vary greatly.

Annual growth rate: 2.082% (2007 est.). Density—45 per sq. km.

Ethnic groups: Drukpa 50% (which is also inclusive of Sharchops), as well as ethnic Nepalese (Lhotsampas) 35%, and indigenous or migrant tribes 15%.

Religions: Lamaistic Buddhist 75% (state religion), Indian- and Nepalese-influenced Hinduism 25%.

Languages: Dzongka (official language), English (medium of instruction), Sharchop, Nepali.

Education: Years compulsory—11. Literacy—59.5% (Ministry of Education General Statistics 2007). Primary school net enrollment rate 82.1% (UNDP). Women's literacy—59.5% (2007).

Health: Infant mortality rate (2007 est.)—total: 96.37 deaths/1,000 live births; male: 94.09 deaths/1,000 live births; female: 98.77 deaths/1,000 live births. Life expectancy—total population 67 years; male 69.1 years; female 59.5 years (Ministry of Education General Statistics 2007).

Work force: (2005) Agriculture—94%; industry—1%; services—5%. The unemployment rate is 3.1% (2005 est.).

Government

Type: constitutional monarchy. The Royal Government, prompted by the King, initiated a draft constitution in 2003, which was published in 2005. On July 18, 2008, the parliament formally adopted the constitution, marking the final step in Bhutan's historic transition from absolute monarchy to parliamentary democracy.

National Day: December 17 (1907).

Government branches: Executive—prime minister, cabinet. Legislative—parliament (National Council and National Assembly). The king appoints five members of the National Council and the remaining members are elected. Elections for the National Council (upper house) took place in December 2007. The 47-member National Assembly (lower house) was elected in March 2008. Judicial—High Court (Thrimkhang Gogma), District Courts, and local area arbitration.

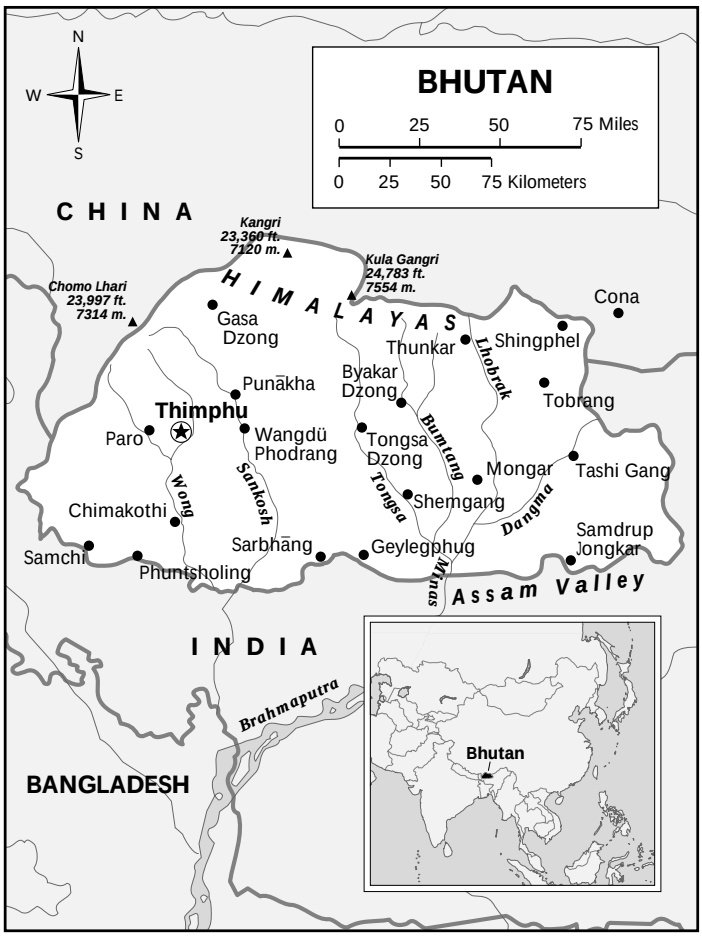
Political subdivisions: 20 (dzongkhags).

Political parties: Two. Druk Phuensum Tshogpa (DPT) and People's Democratic Party (PDP).

Suffrage: Registered resident with legitimate citizenship, age 18 and above.

Economy

GDP: (purchasing power parity 2007 est.) U.S. $3.359 billion.



Real growth rate: (2007) 8.5%.

Per capita GDP PPP: (2007 est.) U.S. $5,200.

Natural resources: Hydroelectric power, construction, timber, gypsum, calcium carbide.

Sectors as percent of GDP: (all figures, 2006-2007) Agriculture—22.3%; industry—37.9%; services—39.8%.

Trade: Principal exports (2006-2007)—electricity 26.5%, recorded media 16.8%, palm oil 7.4%, copper wire 6.2%. Principal imports (2006-2007)—diesel fuel 7.9%, copper wires 7.3%, crude palm oil 5.5%, petrol 3.1%. Major trade partners—India, Hong Kong, Japan, Germany, Singapore, and Thailand.

PEOPLE

The people of Bhutan can be divided into three broad ethnic categories—Ngalops, Sharchops, and Lhotsampas. The Ngalops make up the majority of the population, living mostly in the western and central areas. The Ngalops are thought to be of Tibetan origin, arriving in Bhutan during the 8th and 9th centuries A.D. and bringing Buddhism with them.

Most Ngalops follow the Drukpa Kagyupa discipline of Mahayana Buddhism. In a country that is deeply rooted within the Buddhist religion, many people's sect of religion, as opposed to their ethnic group, characterizes them.

The Ngalops predominate in the government, and the civil service and their cultural norms have been declared by the monarchy to be the standard for all citizens.

The Sharchops, who live in the eastern section of Bhutan, are considered to be descendants of the earliest major group to inhabit Bhutan. Most follow the Ningmapa discipline of Mahayana Buddhism. Sharchop is translated as "people of the east."

The Ngalops, Sharchops, and the indigenous tribal people are collectively known as Drukpas and account for about 65% of the population. The national language is Dzongka, but English is the language of instruction in schools and an official working language for the government.

The Lhotsampas are people of Nepali descent, currently making up 35% of the population. They came to Bhutan in the 19th and 20th centuries, mostly settling in the southern foothills to work as farmers. They speak a variety of Nepali dialects and are predominantly Hindu.

HISTORY

Bhutan's early history is steeped in mythology and remains obscure. It may have been inhabited as early as 2000 B.C., but not much was known until the introduction of Tibetan Buddhism in the 9th century A.D. when turmoil in Tibet forced many monks to flee to Bhutan. In the 12th century A.D., the Drukpa Kagyupa school was established and remains the dominant form of Buddhism in Bhutan today. The country's political history is intimately tied to its religious history and the relations among the various monastic schools and monasteries.

The consolidation of Bhutan occurred in 1616 when Ngawana Namgyal, a lama from Tibet, defeated three Tibetan invasions, subjugated rival religious schools, codified an intricate and comprehensive system of law, and established himself as ruler (shabdrung) over a system of ecclesiastical and civil administrators. After his death, infighting and civil war eroded the power of the shabdrung for the next 200 years when in 1885, Ugyen Wangchuck was able to consolidate power and cultivated closer ties with the British in India.

In 1907, Ugyen Wangchuck was elected as the hereditary ruler of Bhutan, crowned on December 17, 1907, and installed as the head of state Druk Gyalpo (Dragon King). In 1910, King Ugyen and the British signed the Treaty of Punakha which provided that British India would not interfere in the internal affairs of Bhutan if the country accepted external advice in its external relations.

When Ugyen Wangchuck died in 1926, his son Jigme Wangchuck became the next ruler, and when India gained independence in 1947, the new Indian Government recognized Bhutan as an independent country. In 1949, India and Bhutan signed the Treaty of Peace and Friendship, which provided that India would not interfere in Bhutan's internal affairs but would be guided by India in its foreign policy. Succeeded in 1952 by his son Jigme Dorji

Wangchuck, Bhutan began to slowly emerge from its isolation and began a program of planned development. Bhutan became a member of the United Nations in 1971, and during his tenure the National Assembly was established and a new code of law, as well as the Royal Bhutanese Army and the High Court.

In 1972, Jigme Singye Wangchuck ascended the throne at age 16. He emphasized modern education, decentralization of governance, the development of hydroelectricity and tourism and improvements in rural developments. He was perhaps best known internationally for his overarching development philosophy of "Gross National Happiness." It recognizes that there are many dimensions to development and that economic goals alone are not sufficient.

Satisfied with Bhutan's transitioning democratization process, he abdicated in December 2006 rather than wait until the promulgation of the new constitution in 2008. His son, Jigme Khesar Namgyel Wangchuck, became King upon his abdication.

GOVERNMENT AND POLITICAL CONDITIONS

Traditionally a decentralized theocracy and, since 1907, a monarchy, Bhutan completed its successful transition to a constitutional monarchy in 2008. Bhutanese officials began preparations for the first-ever elections in 2006, shortly before King Jigme Singye Wangchuck abdicated in December 2006. The National Council of the new bicameral parliament was elected in December 2007, and National Assembly elections followed in March 2008.

The Druk Phuensum Tshogpa (DPT) won 44 out of 47 seats in the latter election in which 80% of the 320,000 registered voters cast a ballot. Migration by Nepalis into southern Bhutan began in the early 19th century. Currently these and other ethnic Nepalis, referred to as Lhotsampas, comprise 35% of Bhutan's population. In 1988, the government census led to the branding of many ethnic Nepalis as illegal immigrants. Local Lhotshampa leaders responded with anti-government rallies demanding citizenship and attacks against government institutions. Between 1998-1993, thousands of ethnic Nepalis fled to refugee camps in Nepal alleging ethnic and political repression. Currently, 107,000 refugees reside in seven camps. Bhutan and Nepal have been working for over seven years to resolve the refugee problem and repatriate certain refugees living in Nepal. The resettlement of Bhutanese refugees from the camps in Nepal to the U.S., Australia, and New Zealand is proceeding. The transition to democracy may improve the situation: of its 47 candidates, the DPT fielded nine Nepali-speakers. Officials from both the DPT and PDP have said that resolving the grievances of ethnic Nepalis is a priority.

The spiritual head of Bhutan, the Je Khempo—the only person besides the king who wears the saffron scarf, an honor denoting his authority over all religious institutions—is nominated by monastic leaders and appointed by the king. The Monk Body is involved in advising the government on many levels. Bhutan is divided into 20 districts or dzongkhags, each headed by a district officer (dzongda) who must be elected. Larger dzongkhags are further divided into subdistricts called dungkhags. A group of villages are grouped to form a constituency called gewog, administered by a locally elected leader entitled a gup. There are 201 elected gups. In 2002, the National Assembly created a new structure for local governance at the geog level. Each local area is responsible for creating and implementing its own development plan, in coordination with the district.

Principal Government Officials

Last Updated: 11/12/08

King: **Jigme Khesar Namgyel WANGCHUCK**
Prime Minister: **Jigme THINLEY**
Min. of Agriculture: **Pema GYAMTSHO**
Min. of Economic Affairs: **Khandu WANGCHUK**
Min. of Education: **Thakur Singh POWDYEL**
Min. of Finance: **Wangdi NORBU**
Min. of Foreign Affairs: **Ugyen TSHERING**
Min. of Health: **Zangley DUKPA**
Min. of Home & Cultural Affairs: **Minjur DORI**
Min. of Information & Communication: **Nandalal RAI**
Min. of Labor & Human Resources: **Dorji WANGDI**
Min. of Trade & Industry:
Min. of Works & Human Settlements: **Yeshey ZIMBA**
Chief Justice: **Sonam TOBGYE**
Chmn., Royal Advisory Council: **Rinzin GYALTSHEN**
Permanent Representative to the UN, New York: **Daw PENJO**

The United States and the Kingdom of Bhutan have not established formal diplomatic relations; however, the two governments have informal and cordial relations.

Bhutan maintains a Permanent Mission to the United Nations in New York. The address is 763 First Avenue, New York, NY 10017; tel: 212-682-2268, fax: 212-661-0551.

ECONOMY

The economy, one of the world's smallest and least developed, is based on hydroelectricity, tourism, agriculture, and forestry. Rugged terrain makes it difficult to develop roads and other infrastructure. Despite this constraint, hydroelectricity and construction continue to be the two major industries of growth for the country.

The Tala hydroelectric project, completed March 2007, has bolstered government revenue and exports, and will continue to do so for the next several years.

Additionally, India has committed to funding three more hydroelectric projects and other industrial development. As these two economic sectors contribute to increased productivity, Bhutan's development prospects are positive.

The Bhutanese Government expects the tourism sector to expand as well; however, restrictions on visitor numbers and minimum per-day spending requirements will impede rapid growth. Bhutan's tenth five-year plan (2008-2013) focuses on ways to manage the country's new-found wealth with special emphasis on three development areas: rural, regional, and private-sector. India has pledged to support the plan and promised to double the amount of aid given to Bhutan in the previous five-year plan. The parliament has not yet finalized the tenth five-year plan; it intends to do so during the next session later in 2008.

Bhutan's economy has been on an upturn due to recent subregional economic cooperation efforts. Already this plan has strengthened the current trade relations with India, as well as opened an avenue of trade with Bangladesh. In May 2003, the Bilateral Free Trade Agreement between Bangladesh and Bhutan was re-signed. Bangladesh is Bhutan's second largest trade partner, after India. In January 2004, as a member of the South Asian Association for Regional Cooperation (SAARC), Bhutan also joined the South Asian Free Trade Agreement (SAFTA). In February 2004 Bhutan joined the Bangladesh, Indian, Myanmar, Singapore, and Thailand Economic Cooperation Forum (BIMSTEC). Bhutan has applied for membership in the World Trade Organization and is in the process of developing clear legal and regulatory systems designed to promote business development.

FOREIGN RELATIONS

India

India is Bhutan's largest trade and development partner, providing significant amounts of foreign aid and investment. Traditionally, the 1949 Treaty of Peace and Friendship governed relations between the countries. In February 2007, India and Bhutan signed a new treaty removing the clause that India will "guide" Bhutan's foreign policy and allowing Bhutan to purchase military equipment from other countries. However, bilateral ties remain close, demonstrated by Indian Prime Minister Manmohan Singh's May 2008 visit to Thimpu during which he addressed the newly elected parliament. Prime Minister Jigme Thinley returned the gesture when he made his first official trip abroad as prime minister to New Delhi in July 2008.

In recent years, insurgents on the Indian side of the border from the United Liberation Front of Assam (ULFA) and the Bodos have used Bhutan as a safe haven. In December 2003, Bhutan military troops expelled Indian insurgents from Assam. Through this joint effort with India, Bhutan strengthened border security and continued cooperation with the Indian military.

China

Bhutan and China do not have diplomatic relations, although they have engaged in 17 rounds of high-level talks regarding a border dispute over three Chinese-built roads which the Bhutanese Government alleges encroach on its territory. Although the current official trade between the countries is minimal, the Chinese Government announced that trade had increased by 3,000% from 2006 to 2007.

Nepal

These two countries established diplomatic relations in 1983. Nepal and Bhutan are currently negotiating to resolve a 16-year-old refugee situation, in which 100,000 refugees are residing in seven UNHCR camps in Nepal.

Most of the refugees claim they are Bhutanese citizens, while Bhutan alleges that most are non-nationals or "voluntary emigrants," who forfeited their citizenship rights. In 2003, a joint Bhutan-Nepal verification team categorized refugees from one camp into four groups, but progress remains stalled.

United Nations

Bhutan became a member of the United Nations in 1971. Bhutan does not have diplomatic relations with any of the permanent members of the UN Security Council. Bhutan was elected to the UN Commission on Human Rights in 2003 and served until 2006.

Other Countries

Bhutan enjoys diplomatic relations with seven European nations, which form The "Friends of Bhutan" group, together with Japan. These countries are Switzerland, Denmark, Sweden, Norway, the Netherlands, Finland, and Austria. Also known as donor nations, they contribute generously to Bhutanese development and social programs. Bhutan also has diplomatic relations with South Korea, Canada, Australia, Kuwait, Thailand, Bahrain, Bangladesh, the Maldives, Sri Lanka, and Pakistan.

DEFENSE

Bhutan has 8,000 members in five military branches: the Royal Bhutan Army, Royal Bodyguard, National Militia, Royal Bhutan Police, and Forest Guards. In FY 2002, the Bhutanese Government spent 1.9% of its GDP on the military or U.S. $9.3 million. India maintains a permanent military training presence in Bhutan through IMTRAT, the Indian Military Training Team.

U.S.-BHUTAN RELATIONS

The U.S. Embassy in New Delhi, India, has consular responsibilities for Bhutan, but U.S. citizens also may request assistance from U.S. Embassies in Kathmandu, Nepal, or Dhaka, Bangladesh. The United States and Bhutan do not have diplomatic relations, and the United States does not give foreign assistance to Bhutan. Informal contact is maintained through the U.S. Embassy and the Bhutanese Embassy in New Delhi. Bhutan does participate in a regional

program for South Asia sponsored by the U.S. Agency for International Development (USAID) that helps countries develop their power infrastructure (SARI-E). A few Bhutanese military officers have attended courses at the Asia-Pacific Center for Security Studies. The U.S. Government annually brings several Bhutanese participants to United States through its International Visitors Program.

TRAVEL

Consular Information Sheet

April 25, 2008

Country Description: Bhutan is a small, land-locked Himalayan country that completed its transition from an absolute monarchy to a constitutional monarchy in April 2008; the country is now led by a king and a democratically-elected government. The United States has consular, but not full diplomatic, relations with Bhutan. There is no U.S. diplomatic or consular presence in Bhutan. The U.S. Embassy in New Delhi handles assistance to U.S. citizens.

Entry Requirements: Independent travel is not permitted in Bhutan. Visitors are required to book travel through a registered tour operator in Bhutan. This may be done directly or through a travel agent abroad. Further information, including a list of authorized tour operators in Bhutan, may be obtained through the Bhutanese Department of Tourism, PO Box 126, Thimphu, Bhutan, telephone +975-2-323251, 2-323252; fax +975-2-323695 or at www.tourism.gov.bt. Entry by air is available only via India, Bangladesh, Nepal, and Thailand. The border with China is closed. The minimum daily tariff is set by the Bhutanese Department of Tourism and cannot be negotiated. The rate includes all accommodations, all meals, transportation, services of licensed guides and porters, and cultural programs where and when available. The rate is the same for both cultural tours and treks. Travelers should contact the Department of Tourism for the latest daily tariff. At this time, the only carrier servicing Bhutan is Druk Air, the Bhutanese government airline. More information on the airline is available at www.drukair.com.bt. Druk Air will board only travelers with visa clearance from the Tourism Authority of Bhutan. A passport and visa are required for entry into and exit from Bhutan. Visa applications are available from selected travel agencies. Travel agencies will usually arrange for a traveler's entry visa and clearance. Most visitors, including those on official U.S. government business, should obtain visas prior to entering the country. For additional entry/exit information, please contact the Bhutan Mission to the United Nations (Consul General), 763 First Avenue, New York, NY 10017, telephone (212) 682-2268, fax (212) 661-0551.

Safety and Security: Recent efforts to resettle to the U.S. many of the approximately 100,000 Bhutanese refugees of Nepali ethnic origin currently living in Nepalese refugee camps, coupled with the transition to democracy, have given rise to some civil unrest in usually peaceful Bhutan. Bhutanese Maoists and Communist groups (including the Bhutan Communist Party and the Bhutan Tiger Force operating from the camps in Nepal), who denounce the monarchy and demand that the refugees be repatriated to Bhutan, have been linked to violence in the country. There were about half-a-dozen small bombs set off between October 2006 and August 2007; then on January 20, 2008, four bombs were set off simultaneously. Most of the bombings took place in small cities and towns on the southwestern border, near India, except for one in the capital, Thimphu.

For the latest security information, Americans traveling abroad should regularly monitor the Department's Internet web site, where the current Travel Warnings and Travel Alerts, including the Worldwide Caution Travel Alert, can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S. and Canada, or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: There is relatively little crime in Bhutan. Petty crime, such as pick-pocketing and purse snatching, is occasionally reported.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the U.S.

Embassy in New Delhi or the U.S. Consulate in Kolkata. If you are the victim of a crime while in Bhutan, in addition to reporting to local police, please contact the U.S. Embassy in New Delhi for assistance. The Embassy's consular staff can, for example, assist you to find appropriate medical care, contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

Medical Facilities and Health Information: Medical facilities in the populated areas in Bhutan such as Thimphu or Paro are available, but may be limited or unavailable in rural areas. If Americans need urgent medical care, they should try to get to the General Hospital in the capital city, Thimphu. Medical services may not meet Western standards, and some medicines are in short supply. Certain emergency medical services are provided free of charge to all tourists. Visitors planning to trek in Bhutan should pay special attention to the risk of altitude illness. Treks in Bhutan can take visitors days or weeks away from the nearest medical facility. Helicopter evacuation from remote areas is available in Bhutan through the registered tour operators, or by contacting the U.S. Embassy in New Delhi.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's Internet site at http://wwwn.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www. who.int/ith.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Bhutan is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

General road conditions outside of urban areas are poor, and emergency services generally are not available. Because of the mountainous terrain, roads tend to have steep drop-offs and blind curves. However, because tourists to Bhutan are required to arrange their trips through registered tour operators, tourists do not drive themselves, but travel in groups with experienced drivers.

Visit the web site of Bhutan's national tourist office and national authority responsible for road safety at http://www.mti.gov.bt.

Aviation Safety Oversight: As there is no direct commercial air service between the United States and Bhutan, the U.S. Federal Aviation Administration (FAA) has not assessed Bhutan's Civil Aviation Authority for compliance with International Civil Aviation Organization (ICAO) aviation safety standards. For more information, travelers may visit the FAA's Internet web site at http://www.faa.gov.

Special Circumstances: Visitors are advised to carry cash or travelers checks, since credit cards are not widely accepted in Bhutan. When credit cards are accepted, an extra service fee, usually a percentage of the overall purchase, is often charged.

Druk Air, the only carrier servicing Bhutan, has rigid restrictions on the amount and size of luggage passengers may carry into the country. Passengers are advised to book bulky items ahead as unaccompanied baggage, since the aircraft servicing Bhutan have limited space available for large bags, and airline employees may not load large pieces of luggage. Flights into and out of Paro Airport are restricted to daylight hours and are dependent on suitable weather conditions. Flights are sometimes delayed or cancelled, particularly during the monsoon season between June and August.

Passengers are advised to allow at least 24 hours transit time for connecting flights from Paro Airport and to travel on non-restricted air tickets so that they can be rebooked on the first available air carrier if a connecting flight is missed. Bhutanese customs authorities enforce strict regulations concerning temporary importation into or export from Bhutan of items such as firearms, ammunition, explosives and military stores; narcotics and drugs (except medically-prescribed drugs); tobacco products; wildlife products, especially those of endangered species; and antiques.

It is advisable to contact the Bhutan Mission to the United Nations (Consul General), 763 First Avenue, New York, NY 10017, telephone (212) 682-2268, fax (212) 661-0551 for specific information regarding customs requirements.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating Bhutanese laws, even unknowingly, may be expelled, arrested or imprisoned. Bhutan recently implemented extremely strict restrictions on the sale or use of cigarettes and other tobacco products. A traveler caught selling tobacco products could be charged with illegal smuggling and fined or imprisoned. Smoking is pro-

hibited in public places. Penalties for possession, use, or trafficking in illegal drugs in Bhutan are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: There is no U.S. Embassy or Consulate in Bhutan. Although no formal diplomatic relations exist between the United States and Bhutan, informal contact is maintained through the U.S. Embassy in New Delhi, India. Updated information on travel and security in Bhutan may be obtained at the U.S. Embassy in New Delhi, at any other U.S. Consulate in India, or at the U.S. Embassy in Kathmandu, Nepal, as well as the U.S. Embassy in Bangkok, Thailand. Americans living or traveling in Bhutan are encouraged to register through the State Department's travel registration web site or with the U.S. Embassy in New Delhi to obtain updated information on travel and security within Bhutan. Americans without Internet access may register directly with the U.S. Embassy in New Delhi in person or via mail. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency.

The U.S. Embassy in New Delhi is located on Shanti Path, Chanakya Puri, New Delhi 110 021, India. Tel. +91-11-2419-8000, fax +91-11-2419-8407, web page http://newdelhi.usembassy.gov. The U.S. Consulate in Kolkata is located at 5/1 Ho Chi Minh Sarani, Kolkata 700 071, India. Tel. +91-33-3984-2400, fax +91-33-2282-2335, web page http://kolkata.usconsulate.gov.

The U.S. Embassy in Kathmandu is located at Maharajgunj in Kathmandu, Nepal, telephone (977) (1) 400-7200. The Consular Section can be reached through the Embassy switchboard at (977) (1) 4000-7200, directly by fax (977) (1) 400-7281 or email at sonsktm@state.gov. The U.S. Embassy Kathmandu's official web site is http://nepal.usembassy.gov.

The U.S. Embassy in Bangkok is located at 120/22 Wireless Road, Bangkok, Thailand, tel. +66-2-205-4000; fax +66-2-205-4103, web page http://bangkok.usembassy.gov.

Intercountry Adoption

July 2007

Bhutan is a small land-locked Himalayan country with limited tourism and medical facilities. Americans have adopted only one Bhutanese child in the past seven fiscal years, and there are no standardized procedures for doing so. No U.S.-based adoption service providers or adoption agencies operate in Bhutan, and there is no U.S. diplomatic or consular presence in the country. The U.S. Embassy in New Delhi, India handles all emergency assistance to U.S. citizens. Americans considering travel to Bhutan should read the Country Specific Information for Bhutan for additional general information.

BOLIVIA

Compiled from the May 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Republic of Bolivia

PROFILE

Geography

Area: 1.1 million sq. km. (425,000 sq. mi.); about the size of Texas and California combined.

Cities: Capital—La Paz (administrative—pop. 800,385); Sucre (constitutional—292,080). Other major cities—Santa Cruz (1,486,115), Cochabamba (587,220), El Alto (858,716). (Population estimates 2004).

Terrain: High plateau (altiplano), temperate and semitropical valleys, and the tropical lowlands.

Climate: Varies with altitude—from humid and tropical to semiarid and cold.

People

Nationality: Noun and adjective—Bolivian(s).

Population: (July 2008 estimated) 9,247,816.

Annual population growth rate: 1.42%.

Religions: Predominantly Roman Catholic; minority Protestant.

Languages: Spanish (official); Quechua, Aymara, Guarani.

Education: (2001) Years compulsory—ages 7-14. Literacy—86.7%.

Health: (2008) Infant mortality rate—49.1 per 1,000 births.

Work force: (2007, 4.4 million) Nonagricultural employment—2.48 million; services, including government—42%; industry and commerce—58%.

Ethnic groups: (2001) 55% indigenous (primarily Aymara, and Quechua), 30% mestizo or mixed, 15% European.

Government

Type: Republic.

Independence: August 6, 1825.

Constitution: 1967; revised 1994. New constitution drafted in 2007, a referendum to approve the document is scheduled for January 25, 2009.

Government branches: Executive—president and cabinet. Legislative—bicameral Congress. Judicial—five levels of jurisdiction, headed by Supreme Court with a separate Constitutional Court.

Political subdivisions: Nine departments (similar to states).

Political parties: Movement Toward Socialism (MAS), Social Democratic Power (PODEMOS), Nationalist Revolutionary Movement (MNR), National Unity (UN)

Suffrage: Universal adult, obligatory.

Economy (2007)

GDP: $13.9 billion.

Annual growth rate: 4.6%.

Per capita income: $4,084 (PPP 2007 IMF estimate).

Natural resources: Hydrocarbons (natural gas, petroleum); minerals (zinc, silver, lead, gold, and iron).

Agriculture: 14.5% of GDP) Major products—Soybeans, cotton, potatoes, corn, sugarcane, rice, wheat, coffee, beef, barley, and quinoa. Arable land—27%.

Industry: (30.5% of GDP) Types—Mineral and hydrocarbon extraction, manufacturing, commerce, textiles, food processing, chemicals, plastics, mineral smelting, and petroleum refining.

Services: including government (55%).

Trade: Exports—$4.7 billion (2007). Major export products—natural gas, tin, zinc, coffee, silver, wood, gold, jewelry, soybeans, and byproducts. Major export markets—U.S. (8.6%), Brazil (45.2%), Colombia (6.7%) Argentina (9.2%), Republic of Korea (4.3%), and Japan (6.6%). Imports—$3.25 billion. Major products—machinery and transportation equipment, consumer products, construction and mining equipment. Major suppliers—U.S. (9.7%), Argentina (16.4%), Brazil (30%), Chile (10.4%), Peru (8.1%).

PEOPLE

According to the 2001 Census, Bolivia's ethnic distribution is estimated to be 55% indigenous, 15%

European, and 30% mixed or mestizo (all categories are self-identified). The largest of the approximately three dozen indigenous groups are the Quechua (29% or 2.5 million), Aymara (24% or 2 million), Chiquitano (1% or 180,000), and Guarani (1% or 125,000). No other indigenous groups represent more than 0.5% of the population. There are small German, Croatian, Serbian, Asian, Middle Eastern, and other minorities, many of whose members descend from families that have lived in Bolivia for several generations.

Bolivia is one of the least developed countries in South America. Almost two-thirds of its people, many of whom are subsistence farmers, live in poverty. Population density ranges from less than one person per square kilometer in the southeastern plains to about 10 per square kilometer (25 per sq. mi.) in the central highlands. The annual population growth rate is about 1.39% (2008).

La Paz is the highest of the world's capital cities—3,600 meters (11,800 ft.) above sea level. The adjacent city of El Alto, at 4,200 meters (13,800 ft.) above sea level, is one of the fastest-growing in the hemisphere. Santa Cruz, the nation's commercial and industrial hub, located in the eastern lowlands, is also experiencing rapid population and economic growth.

The great majority of Bolivians are Roman Catholic (the official religion), although Protestant denominations are expanding rapidly. Many indigenous communities interweave pre-Columbian and Christian symbols in their religious practices.

About half of the people speak Spanish as their first language. Approximately 90% of the children attend primary school but often for a year or less. The literacy rate is low in many rural areas. Under President Morales, a number of areas have been declared "illiteracy free" but the resulting level of literacy is often quite basic, restricted to the ability to sign names and recognize numbers.

The socio-political development of Bolivia can be divided into three distinct periods: pre-Columbian, colonial, and republican. Important archaeological ruins, gold and silver ornaments, stone monuments, ceramics, and weavings remain from several important pre-Columbian cultures. Major ruins include Tiwanaku, Samaipata, Incallajta, and Iskanwaya. The country abounds in other sites that are difficult to reach and have seen little archaeological exploration.

The Spanish brought their own tradition of religious art which, in the hands of local indigenous and mestizo builders and artisans, developed into a rich and distinctive style of architecture, painting, and sculpture known as "Mestizo Baroque." The colonial period produced not only the paintings of Perez de Holguin, Flores, Bitti, and others but also the work of skilled but unknown stonecutters, woodcarvers, goldsmiths, and silversmiths. An important body of native baroque religious music from the colonial period was recovered in recent years and has been performed internationally to wide acclaim since 1994.

Bolivian artists of stature in the 20th century include, among others, Guzman de Rojas, Arturo Borda, Maria Luisa Pacheco, and Marina Nunez del Prado. Bolivia has rich folklore. Its regional folk music is distinctive and varied. The "devil dances" at the annual carnival of Oruro are one of the great folkloric events of South America, as is the lesser known carnival at Tarabuco.

HISTORY AND POLITICAL CONDITIONS

The Andean region probably has been inhabited for some 20,000 years. Beginning about the 2nd century B.C., the Tiwanakan culture developed at the southern end of Lake Titicaca. This culture, centered around and named for the great city of Tiwanaku, developed advanced architectural and agricultural techniques before it disappeared around 1200 A.D., probably because of extended drought. Roughly contemporaneous with the Tiwanakan culture, the Moxos in the eastern lowlands and the Mollos north of present-day La Paz also developed advanced agricultural societies that had dissipated by the 13th century. In about 1450, the Quechua-speaking Incas entered the area of modern highland Bolivia and added it to their empire. They controlled the area until the Spanish conquest in 1525.

During most of the Spanish colonial period, this territory was called "Upper Peru" or "Charcas" and was under the authority of the Viceroy of Lima. Local government came from the Audiencia de Charcas located in Chuquisaca (La Plata—modern Sucre). Bolivian silver mines produced much of the Spanish empire's wealth, and Potosi, site of the famed Cerro Rico—"Rich Mountain"—was, for many years, the largest city in the Western Hemisphere. As Spanish royal authority weakened during the Napoleonic wars, sentiment against colonial rule grew. Independence was proclaimed in 1809, but 16 years of struggle followed before the establishment of the republic, named for Simon Bolivar, on August 6, 1825.

Independence did not bring stability. For nearly 60 years, coups and short-lived constitutions dominated Bolivian politics. Bolivia's weakness was demonstrated during the War of the Pacific (1879-83), when it lost its seacoast and the adjoining rich nitrate fields to Chile. An increase in the world price of silver brought Bolivia a measure of relative prosperity and political stability in the late 1800s. During the early part of the 20th century, tin replaced silver as the country's most important source of wealth. A succession of governments controlled by the economic and social elites followed laissez-faire capitalist policies through the first third of the century. Living conditions of the indigenous peoples, who constituted most of the population, remained deplorable. Forced to work under primitive conditions in the mines and in nearly feudal status on large estates, they were denied access to education, economic opportunity, or

political participation. Bolivia's defeat by Paraguay in the Chaco War (1932-35) marked a turning point. Great loss of life and territory discredited the traditional ruling classes, while service in the army produced stirrings of political awareness among the indigenous people. From the end of the Chaco War until the 1952 revolution, the emergence of contending ideologies and the demands of new groups convulsed Bolivian politics.

Revolution and Turmoil

The Nationalist Revolutionary Movement (MNR) emerged as a broadly based party. Denied its victory in the 1951 presidential elections, the MNR led the successful 1952 revolution. Under President Victor Paz Estenssoro, the MNR introduced universal adult suffrage, carried out a sweeping land reform, promoted rural education, and nationalized the country's largest tin mines.

Twelve years of tumultuous rule left the MNR divided. In 1964, a military junta overthrew President Paz Estenssoro at the outset of his third term. The 1969 death of President Rene Barrientos, a former member of the junta elected President in 1966, led to a succession of weak governments. Alarmed by public disorder, the military, the MNR, and others installed Col. (later General) Hugo Banzer Suarez as President in 1971. Banzer ruled with MNR support from

1971 to 1974. Then, impatient with schisms in the coalition, he replaced civilians with members of the armed forces and suspended political activities.

The economy grew impressively during most of Banzer's presidency, but human rights violations and eventual fiscal crises undercut his support. He was forced to call elections in 1978, and Bolivia again entered a period of political turmoil. Elections in 1978, 1979, and 1980 were inconclusive and marked by fraud. There were coups, counter-coups, and caretaker governments. In 1980, Gen. Luis Garcia Meza carried out a ruthless and violent coup. His government was notorious for human rights abuses, narcotics trafficking, and economic mismanagement. Later convicted in absentia for crimes, including murder, Garcia Meza was extradited from Brazil and began serving a 30-year sentence in 1995.

After a military rebellion forced out Garcia Meza in 1981, three other military governments in 14 months struggled with Bolivia's growing problems. Unrest forced the military to convoke the Congress elected in 1980 and allow it to choose a new chief executive. In October 1982—22 years after the end of his first term of office (1956-60)—Hernan Siles Zuazo again became President. Severe social tension, exacerbated by economic mismanagement and weak leadership, forced him to call early elections and relinquish power a year before the end of his constitutional term.

Return to Democracy

In the 1985 elections, the Nationalist Democratic Action Party (ADN) of Gen. Banzer won a plurality of the popular vote (33%), followed by former President Paz Estenssoro's MNR (30%) and former Vice President Jaime Paz Zamora's Movement of the Revolutionary Left (MIR, at 10%). But in the congressional runoff, the MIR sided with MNR, and Paz Estenssoro was chosen for the fourth time as president. When he took office in 1985, he faced a staggering economic crisis. Economic output and exports had been declining for several years. Hyperinflation had reached an annual rate of 24,000%. Social unrest, chronic strikes, and drug trafficking were widespread.

In four years, Paz Estenssoro's administration achieved economic and social stability. The military stayed out of politics and all major political parties publicly and institutionally committed themselves to democracy. Human rights violations, which badly tainted some governments earlier in the decade, were greatly reduced. However, Paz Estenssoro's remarkable accomplishments were not won without sacrifice. The collapse of tin prices in October 1985, coming just as the government was moving to reassert its control of the mismanaged state mining enterprise, forced the government to lay off over 20,000 miners. The highly successful shock treatment that restored Bolivia's financial system also led to some unrest and temporary social dislocation.

MNR candidate Gonzalo Sanchez de Lozada finished first in the 1989 elections (23%), though, again, no candidate received a majority of popular votes, so Congress determined who would be president. The Patriotic Accord (AP) between Gen. Banzer's ADN and Jaime Paz Zamora's MIR, the second- and third-place finishers (at 22.7% and 19.6%, respectively), led to Paz Zamora's assuming the presidency.

Paz Zamora was a moderate, center-left president whose political pragmatism in office outweighed his Marxist origins. He continued the economic reforms begun by Paz Estenssoro. Paz Zamora also took a fairly hard line against domestic terrorism, authorizing a 1990 attack on terrorists of the Nestor Paz Zamora Committee and the 1992 crackdown on the Tupac Katari Guerrilla Army (EGTK).

The 1993 elections continued the tradition of open, honest elections and peaceful democratic transitions of power. The MNR defeated the ruling coalition, and Gonzalo "Goni" Sanchez de Lozada was named president by a coalition in Congress. Sanchez de Lozada pursued an aggressive economic and social reform agenda, relying heavily on successful entrepreneurs-turned-politicians like him. The most dramatic program—"capitalization," a form of privatization under which investors acquired 50% ownership and management control of the state oil corporation, telecommunications system, airlines, railroads, and electric utilities, with moneys directed to the pension system instead of the Treasury—was strongly opposed by certain segments of society, with frequent and sometimes violent protests from 1994 through 1996.

In the 1997 elections, Gen. Hugo Banzer, leader of the ADN, defeated the MNR candidate. The Banzer government continued the free market and privatization policies of its predecessor, and the relatively robust economic growth of the mid-1990s continued until regional, global, and domestic factors contributed to a decline in economic growth. Job creation remained limited throughout this period, and public perception of corruption was high. Both factors contributed to increasing social protests during the second half of Banzer's term.

Banzer instructed special police units to physically eradicate the illegal coca of the Chapare region. The policy produced a sudden and dramatic four-year decline in Bolivia's illegal coca crop, to the point that Bolivia became a relatively small supplier of coca for cocaine. In 2001, Banzer resigned from office after being diagnosed with cancer. He died less than a year later. Banzer's U.S.-educated Vice President, Jorge Quiroga, completed the final year of the term.

In the 2002 national elections, former President Sanchez de Lozada (MNR) again placed first with 22.5% of the vote, this time followed by coca-growing syndicate leader Evo Morales (Movement Toward Socialism, MAS) with 20.9%. The MNR platform featured three overarching objectives: economic reactivation (and job creation), anti-corruption, and social inclusion.

A four-year economic recession, tight fiscal situation, and longstanding tensions between the military and police led to the February 12-13, 2003, violence that left more than 30 people dead and nearly toppled Sanchez de Lozada's government. The government stayed in power, but was unpopular.

Trouble began again in September 2003 when a group of tourists became trapped in the town of Sorata. After days of unfruitful negotiations, Bolivian security forces launched a rescue operation, but on the way out, were ambushed by armed peasants and a number of people were killed on both sides. The incident ignited passions throughout the highlands and united a loose coalition of protestors to pressure the government into halting the proposed project to export liquefied natural gas, most likely through Chile. Anti-Chile sentiment and memories of three major cycles of non-renewable commodity exports (silver through the 19th century, guano and rubber later in that century, and tin in the 20th century) touched a nerve with many citizens. Tensions grew and La Paz was subjected to protesters' blockades. Violent confrontations ensued, and most of the approximately 60 deaths occurred when security forces tried to bring supplies into the besieged city.

In the end, large demonstrations forced Sanchez de Lozada to resign on October 17, 2003. Vice President Carlos Mesa Gisbert assumed office and restored order. Mesa appointed a non-political cabinet and promised to revise the constitution through a constituent assembly, revise the hydrocarbons law, and hold a binding referendum on the country's natural gas deposits. The referendum took place on July 18, 2004, and Bolivians voted overwhelmingly in favor of development of the nation's hydrocarbons resources. But the referendum did not end social unrest. Large-scale protests led to Congress approving a confiscatory hydrocarbons law on May 17, 2005. After a brief pause, demonstrations resumed, particularly in La Paz and El Alto. President Mesa offered his resignation on June 6, and Eduardo Rodriguez, the president of the Supreme Court, assumed office in a constitutional transfer of power. Rodriguez announced that he was a transitional president, and called for early elections within six months.

Current Administration

On December 18, 2005, MAS candidate Juan Evo Morales Ayma was elected to the presidency by 54% of the voters. During his campaign, Morales, a coca union leader of indigenous descent, vowed to nationalize hydrocarbons and alleviate poverty and discrimination toward indigenous people. Morales was and remains highly critical of the "neo-liberal" economic policies that have been implemented in Bolivia over the past several decades. On January 22, 2006, Morales and his Vice President Alvaro García Linera were inaugurated into office.

Since then, President Morales has moved to fulfill his campaign promises, including raising the ceiling for licit coca cultivation from 12,000 hectares to 20,000 hectares. On May 1, 2006, the government issued a decree "nationalizing" the hydrocarbons sector and calling for the renegotiation of contracts with hydrocarbons companies. In November 2006, the government and companies signed new contracts that should result in higher revenues for the government; however, vagaries in the contracts are requiring further negotiations and clarification. Morales has continued to promote greater state control of natural resource industries, particularly hydrocarbons and mining. These policies have pleased Morales' supporters, but have complicated Bolivia's relations with some of its neighboring countries, foreign investors, and members of the international community.

President Morales also secured passage of legislation convoking a special election for delegates to a constituent assembly to draft a new constitution. The MAS performed well in those elections, capturing 137 of 255 seats. The assembly convened on August 6, 2006, and planned to complete its work by August 2007; however, the Congress extended its mandate to December 14, 2007. Since the outset, the assembly faced political deadlock over the constituent assembly's voting rules. Although rules were ostensibly clarified in February 2007, the subject reemerged in August, after the legality of a vote to exclude the location of the capital was contested by the opposition. An agreement could not be reached, and the opposition delegates walked out of the assembly. The MAS approved a constitution without the opposition vote in November 2007. On December 14, 2007, Morales presented the constitutional text to the National Congress to legislate a referendum for its approval in 2008.

GOVERNMENT ORGANIZATION

The 1967 constitution, revised in 1994, provides for balanced executive, legislative, and judicial powers. The traditionally strong executive, however, tends to overshadow the Congress, whose role is generally limited to deliberating legislation initiated by the executive. The judiciary, consisting of a Supreme Court, an independent Constitutional Court, and departmental and lower courts, has long been plagued by corruption and inefficiency. Through revisions to the constitution in 1994, and subsequent laws, the government has initiated potentially far-reaching reforms in the judicial system.

For the first time in history, Bolivians chose their departmental prefects (similar to governors) by popular vote on December 18, 2005. Bolivia's nine departments received greater autonomy under the administrative decentralization law of 1995, although several departments—especially Santa Cruz and Tarija—are seeking increased autonomy. In a July 2006 referendum, Bolivia's four eastern departments voted in favor of increasing regional autonomy, and the other five provinces opposed the measure. The autonomy movement rallied around Sucre's August 2007 demand that the constituent assem-

bly consider moving all branches of government to the traditional capital. Civic committees in six departments (Santa Cruz, Tarija, Beni, Pando, Cochabamba, and Chuquisaca) supported hunger strikes and protests in Sucre, which led to Bolivian Government-sponsored talks between Sucre and La Paz leaders, which were inconclusive as of March 2008. The Santa Cruz government approved an autonomy statute in December 2007; the governments of the other eastern departments followed Santa Cruz's lead. Santa Cruz held a popular referendum on its autonomy statute on May 4, 2008, in which the majority of voters voted for autonomy. The Bolivian Government considered this referendum to be illegal and does not recognize its results. Some government-aligned parliamentarians have advocated popular elections for the civic committees, which they claim disproportionately represent elite and opposition interests.

Bolivian cities and towns are governed by directly elected mayors and councils. Municipal elections were held in December 2004, with councils elected to 5-year terms. The popular participation law of April 1994, which requires a 20% allocation of national revenues to municipalities for discretionary use, has enabled previously neglected communities to make improvements in their facilities and services.

Principal Government Officials

Last Updated: 11/12/08

Pres.: **Juan Evo MORALES Ayma**
Vice Pres.: **Alvaro GARCIA Linera**
Min. of Defense: **Walker SAN MIGUEL Rodriguez**
Min. of Education: **Maria Magdalena CAJIAS de la Vega**
Min. of Finance: **Luis Alberto ARCE Catacora**
Min. of Foreign Relations & Worship: **David CHOQUEHUANCA Cespedes**
Min. of Govt.: **Alfredo Octavio RADA Velez**
Min. of Health & Sports: **Jorge RAMIRO Tapia**
Min. of Hydrocarbons: **Saul AVALOS Cortes**
Min. of Labor: **Walter Juvenal DELGADILLO**
Min. of Legal Defense & State Recovery: **Hector ARCE Zaconeta**
Min. of Mining & Metals: **Luis Alberto ECHAZU Alvarado**
Min. of Planning & Development: **Carlos VILLEGAS Quiroga**
Min. of the Presidency: **Juan Ramon QUINTANA Taborga**
Min. of Production & Microenterprise: **Susana RIVERO Guzman**
Min. of Rural Development & Agriculture: **Carlos ROMERO**
Min. of Services & Public Works: **Oscar COCA Antezana**
Min. Without Portfolio for Justice: **Celima TORRICO Rojas**
Min. Without Portfolio for Water: **Rene GONZALO Orellana**
Presidential Del. for Political Affairs:
Presidential Del. for Public Transparency & Integrity:
Pres., Central Bank:
Ambassador to the US: **Gustavo GUZMAN Saldana**
Permanent Representative to the UN, New York: **Efrain Hugo SILES ALVARADO**

Bolivia maintains an embassy in the United States at 3014 Massachusetts Ave., NW, Washington, DC 20008 (tel. 202-483-4410); consulates in Los Angeles, San Francisco, Miami, New Orleans, and New York; and honorary consulates in Atlanta, Chicago, Cincinnati, Houston, Mobile, Seattle, St. Louis, and San Juan.

ECONOMY

Bolivia's estimated 2006 gross domestic product (GDP) totaled $10.3 billion. Economic growth was estimated at about 4.5%, and inflation was estimated at about 4.3%.

In 1985, the Government of Bolivia implemented a far-reaching program of macroeconomic stabilization and structural reform aimed at maintaining price stability, creating conditions for sustained growth, and alleviating poverty. The most important change involved the "capitalization" (privatization) of numerous public sector enterprises. Parallel legislative reforms locked in place market-oriented policies that encouraged private investment. Foreign investors were accorded national treatment, and foreign ownership of companies was virtually unrestricted. Many of these reforms are currently under review. Nationalizations have taken place in both the hydrocarbon and mining sectors, and the government announced it would nationalize the country's biggest telephone company. The role of the state in the economy continues to be a primary goal of the Morales administration. Foreign direct investment (FDI) inflows have dwindled, as has long-term investment across most industrial sectors.

The hydrocarbon sector provides the most prominent example of the current investment climate. Bolivia has the second-largest natural gas reserves in South America. The Bolivian state oil corporation, Yacimientos Petrolíferos Fiscales Bolivianos (YPFB), has contracts to supply Brazil with natural gas through existing pipelines until 2019. Moreover, in 2006, YPFB signed a "ramp-up" contract with Argentina that steadily increases export levels until 2010, when gas deliveries to Argentina should be more than four times current levels. It does not appear, however, that Bolivia will be able to supply both the domestic market and these contractual obligations. It was estimated that from 2006 to 2007, production would actually decrease slightly as lack of investment led to stagnating production. Companies appeared to be investing only what was necessary to maintain current operations.

In April 2000, violent protests over plans to privatize the water utility in the city of Cochabamba led to nationwide disturbances. The government eventually cancelled the contract without compensation to the investors, returning the utility to public control. International shareholders' outstanding claims were finally resolved in January 2006, when the Government of Bolivia agreed to purchase 80% of the shares in Aguas del Tunari, the joint venture company originally selected to manage the Cochabamba water concession.

Bolivian exports were approximately $3.7 billion for 2006, up from $652 million in 1991. Imports were $2.9

billion in 2006. Bolivia enjoyed a $500 million trade surplus in the first half of 2006. Bolivian tariffs are uniformly low (10%), with capital equipment entering duty-free or incurring 5% tariffs.

Bolivia's trade with neighboring countries is growing, in part because of several regional preferential trade agreements. Bolivia is a member of the Andean Community (CAN) and enjoys nominally free trade with other member countries (Peru, Ecuador, and Colombia). Bolivia is also an associate member of MERCOSUR (Southern Cone Common Market). The Andean Trade Promotion and Drug Eradication Act (ATPDEA) allows numerous Bolivian products to enter the United States duty-free, including alpaca and llama products and, subject to a quota, cotton textiles. The Bolivian Government worked to extend ATPDEA benefits beyond their February 2008 expiration date (now extended to December 2008).

In 2006, the United States exported $277 million of merchandise to Bolivia and imported $362 million. Bolivia's major exports to the United States are tin, gold, jewelry, and wood products, with textiles playing an increasingly important role. Its major imports from the United States are electronic equipment, chemicals, vehicles, wheat, and machinery. A bilateral investment treaty (BIT) between the United States and Bolivia came into effect in 2001.

Agriculture accounts for roughly 12.8% of Bolivia's GDP. The amount of land cultivated by modern farming techniques is increasing rapidly in the Santa Cruz area, where weather allows for two crops a year. Soybeans are the major cash crop, sold in the CAN market. The extraction of minerals and hydrocarbons accounts for another 11% of GDP and manufacturing around 17%.

The Government of Bolivia remains heavily dependent on foreign assistance to finance development projects. At the end of 2006, the government owed $3.2 billion to foreign creditors, with 12% of this amount owed to other governments and the balance owed to multilateral development banks. Between 1986 and 1998, Bolivia attended seven rounds of negotiations with Paris Club creditors and received U.S. $1.35 billion of bilateral debt forgiveness. The United States forgave almost all of Bolivia's bilateral debt between 1999 and 2002 and strongly supported efforts to have multilateral institutions do the same. Bolivia received U.S. $1.95 billion in debt relief from HIPC (Heavily Indebted Poor Countries) I in 1998 and HIPC II in 2001, including almost complete bilateral debt forgiveness.

In June 2005, the G-8 countries decided to provide renewed World Bank and International Monetary Fund (IMF) debt relief for the 18 participant nations of HIPC I and II through the Multilateral Debt Relief Initiative (MDRI). Bolivia received U.S. $232.5 million in debt relief from the IMF in January 2006 and approximately U.S. $1.5 billion in debt relief from the World Bank in June 2006. The Inter-American Development Bank (IDB) forgave $1 billion in debt in March 2007. Bolivia was one of three countries in the Western Hemisphere selected for eligibility for the Millennium Challenge Account in 2004. Bolivia qualified again in 2005 and 2006, and presented a proposal to the Millennium Challenge Corporation in December 2005, which has been superseded by a new proposal submitted September 2007.

FOREIGN RELATIONS

Bolivia traditionally has maintained normal diplomatic relations with all hemispheric states except Chile. Relations with Chile, strained since Bolivia's defeat in the War of the Pacific (1879-83) and its loss of the coastal province of Atacama, were severed from 1962 to 1975 in a dispute over the use of the waters of the Lauca River. Relations were resumed in 1975, but broken again in 1978, over the inability of the two countries to reach an agreement that might have granted Bolivia sovereign access to the sea. They are maintained today below the ambassadorial level. In the 1960s, relations with Cuba were broken following Castro's rise to power, but resumed under the Paz Estenssoro administration in 1985. Under President Morales, relations between Bolivia and Cuba have improved considerably, and Cuba has sent doctors and teachers to Bolivia. Relations have also improved with Venezuela, which has provided financial assistance to Bolivian municipalities, armed forces, and police since Morales took office. The Bolivian and Venezuelan Governments are also working closely together in the petrochemical industry, with plans to expand cooperation into the mining sector and advance the Venezuelan-sponsored Bolivarian Alternative for the Americas (ALBA) trading bloc. The Bolivian Government announced it would pursue formal relations with Iran and Libya in September 2007, with plans to cooperate in the petrochemical industry and increase Bolivian exports to both countries.

Bolivia has pursued a foreign policy with a heavy economic component and the Morales government seems to be following in this same tradition. Bolivia has become more active in the Organization of American States (OAS), the Rio Group, and in MERCOSUR, with which it signed an association agreement in 1996. Bolivia promotes its policies on sustainable development and the empowerment of indigenous people.

Bolivia is a member of the UN and some of its specialized agencies and related programs, the Organization of American States (OAS), CAN, Non-Aligned Movement, International Parliamentary Union, Latin American Integration Association (ALADI), World Trade Organization (WTO), Rio Treaty, Rio Group, Amazon Pact, and an associate member of Mercosur. As an outgrowth of the 1994 Summit of the Americas, Bolivia hosted a hemispheric summit conference on sustainable development in December 1996.

U.S.-BOLIVIAN RELATIONS

Although President Morales has been publicly critical of U.S. policies, the United States and Bolivia have a tradition of cordial and cooperative relations. Development assistance from the United States to Bolivia dates from the 1940s, and the U.S. remains a major partner for economic development, improved health, democracy, and the environment. In 1991, the U.S. Government forgave all of the $341 million debt owed by Bolivia to the U.S. Agency for International Development (USAID) as well as 80% ($31 million) of the amount owed to the Department of Agriculture for food assistance. The United States has also been a strong supporter of forgiveness of Bolivia's multilateral debt under the HIPC initiatives.

The United States Government channels its development assistance to Bolivia through USAID. USAID is well known in Bolivia, especially in rural areas where thousands of projects have been implemented. USAID has been providing assistance to Bolivia since the 1960s and works with the Government of Bolivia, the private sector, and the Bolivian people to achieve equitable and sustainable development. USAID/Bolivia provides about $85 million annually in development assistance through bilateral agreements with the Bolivian Government and unilateral agreements with other organizations. USAID programs are implemented by non-governmental organizations (NGOs), the private sector, and the Bolivian Government. USAID's programs support Bolivia's National Development Plan and are designed to address key issues, such as poverty and the social exclusion of historically disadvantaged populations, focusing efforts on Bolivia's peri-urban and rural populations. USAID's programs in Bolivia strengthen democratic institutions; provide economic opportunities for disadvantaged populations through business development and trade; improve family health; promote sustainable use of natural resources and biodiversity conservation; provide farmers alternatives to illicit coca cultivation; and improve food security.

Public criticisms of the U.S. Government were made on a number of fronts in 2007, including of USAID-supported democracy programs and, in particular, the U.S. Government's non-partisan support across the political spectrum. The Bolivian Government lobbied for an extension of ATPDEA trade preferences and approval of a compact with the Millennium Challenge Corporation (MCC). President Morales delivered a $657 million proposal on September 24, 2007 to MCC officials, which focuses on transportation and agriculture development in northern Bolivia. On February 27, 2008, the U.S. Congress approved an ATPDEA extension, which is set to expire on December 31, 2008.

The control of illegal narcotics is a major issue in the bilateral relationship. For centuries, Bolivian coca leaf has been chewed and used in traditional rituals, but in the 1970s and 1980s the emergence of the drug trade led to a rapid expansion of coca cultivation used to make cocaine, particularly in the tropical Chapare region in the Department of Cochabamba (not a traditional coca growing area). In 1988, a new law, Law 1008, recognized only 12,000 hectares in the Yungas as sufficient to meet the licit demand of coca. Law 1008 also explicitly stated that coca grown in the Chapare was not required to meet traditional demand for chewing or for tea, and the law called for the eradication, over time, of all "excess" coca.

To accomplish that goal, successive Bolivian governments instituted programs offering cash compensation to coca farmers who eradicated voluntarily, and the government began developing and promoting suitable alternative crops for peasants to grow. Beginning in 1997, the government launched a more effective policy of physically uprooting the illegal coca plants, and Bolivia's illegal coca production fell over the next 4 years by up to 90%.

This "forced" eradication remains controversial, however, and well-organized coca growers unions have blocked roads, harassed police eradicators, and occasionally used violence to protest the policy. In response, previous government security forces have used force. In some cases confrontations between security forces and coca growers or distributors have resulted in injuries and fatalities, raising human rights concerns. The Morales government has embarked on a policy of voluntary eradication and social control. Although violent confrontations between police and coca growers/distributors have decreased under the new approach, its long-term efficacy remains to be proven.

Bolivia plans to expand, at least for a limited time, legal coca production to 20,000 hectares and stresses development of legal commercial uses for coca leaf. Although the U.S. prefers long-term limits that track more closely with current estimated legal domestic demand of around 4,000 to 6,000 hectares, it will continues to support counter-narcotics efforts in Bolivia as the 20,000 hectare proposal is still significantly below current cultivation, which has oscillated between about 23,000 and 28,000 hectares since 2001.

The United States also heavily supports parallel efforts to interdict the smuggling of coca leaves, cocaine, and precursor chemicals. The U.S. Government has, in large measure, financed alternative development programs and the counter-narcotics police effort. The U.S. recertified Bolivia as not having "failed demonstrably" in 2007 to cooperate on counter-narcotics issues, finding Bolivia's interdiction efforts strongly positive, though against a backdrop of steadily rising production and trafficking of cocaine. Recent Bolivian governments have supported U.S. Government counter-narcotics programs.

In addition to working closely with Bolivian Government officials to strengthen bilateral relations, the U.S. Embassy provides a wide range of services to U.S. citizens and busi-

nesses. Political and economic officers deal directly with the Bolivian Government in advancing U.S. interests, but are also available to provide information to American citizens on local economic and political conditions in the country. Commercial officers work closely with numerous U.S. companies that operate direct subsidiaries or have investments in Bolivia, providing information on Bolivian trade and industry regulations and administering several programs intended to aid U.S. companies starting or maintaining businesses in Bolivia.

The Consular Section of the Embassy, and the two consular agencies in Cochabamba and Santa Cruz, provide vital services to the estimated 13,000 American citizens resident in Bolivia. Among other services, the Consular Section and the consular agencies assist Americans who wish to participate in U.S. elections while abroad and also provide notarial services. Some 40,000 U.S. citizens visit annually. The Consular Section also offers passport and emergency services to tourists as needed during their stay in Bolivia.

The Consular Section is currently analyzing a new Bolivian regulation that would require U.S. citizens entering Bolivia for tourism to obtain a visa. The Consular Section will provide information about this new visa requirement on the Embassy's website at http://bolivia.usembassy.gov. In addition to the services provided to U.S. citizens, the Consular Section adjudicates thousands of immigrant and non-immigrant visas at the Embassy in La Paz each year.

TRAVEL

Consular Information Sheet

December 12, 2007

Country Description: Bolivia is a constitutional democracy and one of the least-developed countries in South America. Tourist facilities are generally adequate, but vary greatly in quality. The capital is La Paz, accessible by Bolivia's international airport in El Alto.

Entry Requirements: A U.S. passport valid for at least six months from the date of proposed entry into Bolivia is required to enter and depart Bolivia.

Effective December 1, 2007, U.S. citizens seeking to enter Bolivia as tourists must have an entry visa. Bolivian tourist visas can be applied for by mail or in person at Bolivian consulates in the U.S., as well as at Bolivian ports of entry, such as at Bolivia's international airports and at land border crossings. Bolivian tourist visas are valid for five years from the date of issuance and allow the bearer to enter the country three times in a year for a cumulative stay of not more than ninety days.

The cost of the tourist visa is $100 U.S. dollars. The $100 fee can be paid in cash, by deposit to the Bolivian Consulate's bank account or by money order. Tourists applying for their visa upon arrival to Bolivia must pay this fee in cash to immigration authorities. In addition to the $100 fee, the applicant must present a visa application form with a 4x4 color photograph, a passport with a validity of not less than 6 months, evidence of a hotel reservation or a letter of invitation in Spanish, proof of economic solvency (credit card, cash or a current bank statement), and an International Vaccination Certificate for yellow fever.

Please visit the Embassy of Bolivia web site at http://www.bolivia-usa.org for details on how to apply or contact

the nearest Bolivian Embassy or Consulate. Bolivian consulates in the United States are located in Houston, Los Angeles, Miami, Oklahoma City, New York, San Francisco, Seattle, and Washington, DC.

U.S. citizens whose passports are lost or stolen in Bolivia must obtain a replacement passport and present it, together with a police report of the loss or theft, to a Bolivian government immigration office in order to obtain permission to depart. For more information on replacement passport procedures, please consult the U.S. Embassy's web site at http://bolivia.usembassy.gov. An exit tax is charged when departing Bolivia by air. Travelers with Bolivian citizenship or residency pay an additional fee upon departure. While the Bolivian Government does not currently require travelers to purchase round-trip air tickets in order to enter the country, some airlines have required travelers to purchase round-trip tickets prior to boarding aircraft bound for Bolivia.

Some tourists arriving by land report that immigration officials did not place entry stamps in their passports, causing problems at checkpoints and upon departure.

Additional Requirements for Minors: In an effort to prevent international child abduction, the Bolivian Government has initiated procedures at entry/exit points. Minors (under 18) who are citizens or residents of Bolivia and who are traveling alone, with one parent or with a third party, must present a copy of their birth certificate and written authorization from the absent parent(s) or legal guardian, specifically granting permission to travel alone, with one parent or with a third party. When a parent is deceased, a notarized copy of the death certificate is required in lieu of the written authorization. If documents are prepared in the United States, the documents must be translated into Spanish, notarized, and authenticated by the Bolivian Embassy or a Bolivian consulate within the United States. If documents are prepared in Bolivia, only notarization by a Bolivian notary is required. Using these documents, a travel permit may be obtained from the Juzgado del Menor. This requirement does not apply to children who enter the country with a U.S. passport as tourists, unless they hold dual U.S./Bolivian citizenship or have been in Bolivia for more than 90 consecutive days.

The new visa requirement states that unaccompanied minors to Bolivia must present an official Parental Authorization and Consent Certificate duly provided by the appropriate authorities. Until the government of Bolivia provides further specifics on this document, we recommend that all unaccompanied minors to Bolivia carry a letter of permission from their parents or legal guardians authorizing travel.

Safety and Security: The countrywide emergency number for the police, including highway patrol, is 911. The corresponding number for the fire department is 119. The National Tourism Police has offices in La Paz and Cochabamba, with plans to expand to Santa Cruz, providing free assistance to tourists. These services include English-speaking officials who may assist tourists in filing police reports of lost/stolen documents or other valuables. The La Paz office is located at Plaza del Stadium, Edificio Olympia, planta baja, Miraflores, telephone number 222-0516, open 24 hours per day. The Cochabamba office is located at Plaza 14 de Septiembre, Edificio Prefectura, tel. (4) 451-0023, open 0730 to 2000, seven days a week. Protests, strikes, and other civic actions can occur at any time and disrupt transportation on a local and national level. This is particularly true before, during and after elections or other changes in government. While protest actions generally begin peacefully, they have the potential to become violent. The police have used tear gas to break up protests. In addition to rallies and street demonstrations, protesters sometimes block roads; they have reacted with force when travelers attempt to pass through or go around roadblocks and occasionally have used explosives to press their point.

U.S. citizens should avoid roadblocks and demonstrations. Demonstrations protesting government or private company policies occur frequently, even in otherwise peaceful times. Roadblocks and demonstrations in June 2005 led to the closure of the El Alto airport in La Paz; similar actions in 2006 led to the closure of the Viru Viru International Airport in Santa Cruz. Both incidents resulted in cancellation and/or diversion of flights and other inconveniences to travelers. U.S. citizens planning travel to or from Bolivia should take into consideration the possibility of disruptions to air service in and out of La Paz and other airports. Americans should monitor Bolivian media reports for updates. The Embassy strongly recommends that U.S. citizens avoid areas where roadblocks or public demonstrations are occurring or planned. Political rallies should similarly be avoided in light of press reports of violence at some rallies in various parts of Bolivia.

U.S. citizens who find themselves in a roadblock should not attempt to "run" a roadblock, as this may aggravate the situation and lead to physical harm. Taking alternative, safe routes, or returning to where the travel started may be the safest courses of action under these circumstances. U.S. citizens embarking on road trips should monitor news reports and may contact the American Citizen Services Unit of the U.S. Embassy in La Paz at (591)(2)216-8297 or the U.S. consular agencies in Cochabamba at (591)(4)425-6714 and/or Santa Cruz at (591) (3) 351-3477 for updates. Given that roadblocks may occur without warning and have stranded travelers for several days, travelers should take extra food and water.

The U.S. Embassy also advises its employees to maintain at least two weeks' supply of drinking water and canned food in case roadblocks affect supplies, as occurred in January 2007 around Cochabamba. For more information on emergency preparedness, please consult the Federal Emergency Management Authority (FEMA) web site at http://www.fema.gov. That web site includes

a Spanish language version. Americans living or traveling in Bolivia are encouraged to register and update their contact information at the U.S. Embassy in La Paz and/or the U.S. consular agencies in Cochabamba and Santa Cruz, Bolivia. Registration may be done online and in advance of travel. Information on registering may be found at the Department of State's travel registration web site.

Increased political and social tensions in Bolivia have recently led to violent protests and marches throughout Bolivia. Clashes between opposing social groups and the authorities continue to break out, often at short notice. On November 24-25, 2007, there were serious violent disturbances in Sucre which left hundreds injured and claimed the lives of three individuals.

In January 2007, political and social strife in Cochabamba led to violent confrontations, resulting in three confirmed deaths and over one hundred injured. A U.S. citizen was among those injured.

In February and October 2003, approximately one hundred people died during violent demonstrations and protests in downtown La Paz and the nearby city of El Alto. These demonstrations also affected Cochabamba and other towns and villages in the Altiplano. While the protests and demonstrations subsided, many of the underlying social, political, and economic causes remain, and in January 2007 several intercity roads, including Bolivia's major east-west highway, were closed by blockades for several weeks. Since 2000 the resort town of Sorata, located seventy miles north of La Paz, has been cut off by blockades on three occasions, ranging from one week to one month. Visitors contemplating travel to Sorata should contact the Consular Section in La Paz prior to travel.

In the Chapare region between Santa Cruz and Cochabamba and the Yungas region northeast of La Paz violence and civil unrest, primarily associated with anti-narcotics activities, periodically create a risk for travelers to those regions. Confrontations between area residents and government authorities over coca eradication have resulted in the use of tear gas and stronger force by government authorities to quell disturbances. Pro-coca groups have expressed anti-U.S. sentiments and may attempt to target U.S. Government or private interests. U.S. citizen visitors to the Chapare or Yungas regions are encouraged to check with the Consular Section of the U.S. Embassy prior to travel. Violence has also erupted between squatters unlawfully invading private land and security forces attempting to remove them. For the latest security information, Americans traveling abroad should regularly monitor the Department of State, Bureau of Consular Affair's Internet site at http://travel.state.gov, where the current Travel Warnings and Travel Alerts, including the Worldwide Caution Travel Alert, can be found. Travelers interested in the most recent information provided to American citizens registered with the Embassy should visit the U.S. Embassy La Paz web site at http://bolivia.usembassy.gov/travel_warnings__announcements.html. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S. and Canada, or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: The U.S. Department of State currently classifies Bolivia as a medium to high crime threat country. Street crime, such as pick pocketing, assaults following ATM withdrawals, and theft from parked vehicles, occurs with some frequency in Bolivia. U.S. citizens have also had backpacks, passports and other property stolen at bus terminals or while traveling on buses as well as at Internet cafes and in other situations where the U.S. citizen is distracted or the property left unattended. Theft of cars and car parts, particularly late-model four-wheel-drive vehicles, is common. Hijacking of vehicles has occurred, and travelers should take appropriate precautions to avoid being victimized. In November 2003, an American citizen was murdered during an attempted carjacking in Santa Cruz.

The Coronilla Hill, a Cochabamba landmark adjacent to the main Bus Terminal and near several markets, hostels, and restaurants, has become an increasingly dangerous place for tourists and local citizens alike. The local police, tourist authorities, and press have declared the area off limits and cautioned people to enter the area at their own peril. American citizens have been assaulted in the area. The police have made several sweeps of the area in an attempt to bring the population of street people, most of whom are reportedly drug addicts and alcohol abusers, under control. Nonetheless, incidents of crime continue. Police reports indicate that the thieves in that area have gone from purse snatching and burglary to increasingly violent assaults on passersby. The Embassy therefore recommends that U.S. citizens avoid this area.

Beginning in June 2007, the U.S. Embassy in La Paz began receiving reports of U.S. citizens traveling by bus from Copacabana to La Paz being kidnapped and robbed of their ATM cards and other valuables. This crime reportedly involves U.S. citizens taking an evening bus from Copacabana. While the bus is scheduled to stop at the La Paz bus terminal, the driver will stop short of that location, typically near the General Cemetery late at night. Disembarking and disoriented passengers then have little option but to hail a waiting taxi. Thieves in collusion with the taxi driver enter the taxi to blindfold and coerce the U.S. citizen(s) into surrendering cash, cameras, ATM cards, and other valuables. U.S. citizen victims to date report that once the thieves withdrew funds using the ATM cards the U.S. citizens were released without further harm. U.S. citizens traveling from Copacabana should try to arrive during daylight hours, verify the final destination, and buy tickets directly at the Copacabana bus terminal rather than from third parties.

Bolivian police state that there are eight organized criminal groups operating in the La Paz area. The techniques employed by these groups vary, but there are a few major pat-

terns that can be identified. There have been reports of "false police"—persons using police uniforms, identification, and even buildings modified to resemble police stations—intercepting and robbing foreign tourists including U.S. citizens. Under Bolivian law, police need a warrant from the "fiscal" or prosecutor to detain a suspect. Any searches or seizures must occur at a bona fide police station in the presence of the fiscal. The warrant requirement also applies to suspected drug trafficking cases, although such searches and seizures may occur without a fiscal present. If detained, U.S. citizens should request to see the warrant and demand immediate contact with the nearest U.S. Consular Office (in La Paz, Cochabamba or Santa Cruz).

According to press reports, criminals using the "false police" method focus on foreigners in areas frequented by tourists including bus terminals and tourist markets such as Sagarnaga Street in La Paz. The perpetrators will identify a potential victim and have an accomplice typically driving a white taxi offer taxi services to the potential victim. They focus on European/American tourists who are not wearing a traditional "trekker" backpack and are traveling without a large number of bags. A few blocks after the potential victim boards the taxi another accomplice, pretending to be a recently arrived tourist, boards the taxi with the potential victim. With all the accomplices then in place, the "false police" stop the taxi, "search" the passengers, and rob the victim. As part of this scam, the false police may take the victim to a "false police" station.

A similar variation also introduces a "tourist" to the victims. This introduction can take place on a bus, taxi, train, or just walking down the street. The "tourist" will befriend the victims and might seek assistance in some manner. After a period of time, the "police" intercept the victims and the "tourist." At this point, the "police" discover some sort of contraband (usually drugs) on the "tourist." The entire group is then taken to the "police station." At this point, the "police" seize the documents, credit cards, and ATM cards of the victims. The perpetrators obtain pin numbers, sometimes by threat of violence, and the scam is complete.

Another technique again introduces a "tourist" to the victims. This "tourist" can be any race or gender and will probably be able to speak the language of the victims. This meeting can happen anywhere and the goal of the "tourist" is to build the trust of the victims. Once a certain level of trust is obtained, the "tourist" suggests a particular mode of transportation to a location (usually a taxi). The "taxi" picks up the victims and the "tourist" and delivers the group to a safe house in the area. At this point the victims are informed that they are now kidnapped and are forced to give up their credit cards and ATM cards with pin numbers.

Bolivian police sources state that two Austrian citizens fell victim to this scam and had their bank accounts emptied through use of their ATM card. The perpetrators then suffocated the victims and buried them in clandestine graves, where police found their bodies on April 3, 2006. During that timeframe, a Spanish citizen also purportedly fell prey to this scam, and his body was found nearby. In most instances, the victims are released, but the murder of the victims is still a possibility. The techniques and the perpetrators are convincing. Authentic uniforms, badges, and props help persuade the victims that the situation is real and valid. All tourists visiting Bolivia should exercise extreme caution. Visitors should be suspicious of all "coincidences" that can happen on a trip. If the tourist has doubts about a situation, the tourist should immediately remove him/herself from the scene.

Thefts of bags, wallets, and backpacks are a problem throughout Bolivia, but especially in the tourist areas of downtown La Paz and the Altiplano. Most thefts involve two or three people who spot a potential victim and wait until the bag or backpack is placed on the ground, often at a restaurant, bus terminal, Internet café, etc. In other cases, the thief places a disagreeable substance on the clothes or backpack of the intended victim, and then offers to assist the victim with the removal of the substance. While the person is distracted, the thief or an accomplice grabs the bag or backpack and flees. In such a situation, the visitor should decline assistance, secure the bag/backpack, and walk briskly from the area. To steal wallets and bags, thieves may spray water on the victim's neck, and while the person is distracted, an accomplice takes the wallet or bag. At times the thief poses as a policeman, and requests that the person accompany him to the police station, using a nearby taxi. The visitor should indicate a desire to contact the U.S. Embassy and not enter the taxi. Under no circumstances should you surrender ATM or credit cards, or release a PIN number. While most thefts do not involve violence, in some instances the victim has been physically harmed and forcibly searched for hidden valuables. This is particularly true in "choke and rob" assaults where the victims, including U.S. citizens, reported being choked from behind until they lost consciousness and later awoke to find all of their possessions gone. These assaults have happened during both day and night. Visitors should avoid being alone on the streets, especially at night and in isolated areas. In 2001, female tourists reported being drugged and raped by a tourist guide in the city of Rurrenabaque in the Beni region. Visitors should be careful when choosing a tour operator and should not accept any type of medication or drugs from unreliable sources. The Embassy also has received reports of sexual assaults against female hikers in the Yungas Valley, near the town of Coroico. Visitors to Coroico are advised to avoid hiking alone or in small groups.

Information for Victims of Crime:
The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropri-

ate medical care, contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

Medical Facilities and Health Information: Throughout the country, both personal hygiene and sanitary practices in food handling are far below U.S. standards. As a result, gastrointestinal illness is widespread among both local people and visitors. Medical care in large cities is adequate for most purposes but of varying quality. Ambulance services are limited to non-existent.

Medical facilities are generally not adequate to handle serious medical conditions. Pharmacies are located throughout Bolivia and prescription and over the counter medications are widely available. Western Bolivia, dominated by the Andes and high plains (Altiplano), is largely insect-free. However, altitude sickness is a major problem. Eastern Bolivia is tropical, and visitors to that area are subject to related illnesses. Dengue is endemic throughout eastern Bolivia, including in Santa Cruz city. Since January 2007, however, there have been several thousand cases, representing a significantly increased incidence, and part of a region-wide trend. Although dengue is usually not a fatal disease, there have been a small number of fatalities. News media periodically report outbreaks of rabies, particularly in the larger cities.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's Internet site at http://wwwn.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith/en.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

High Altitude Health Risks: Official U.S. Government travelers to La Paz are provided with the following information: The altitude of La Paz ranges from 10,600 feet to over 13,000 feet (3,400 to 4,000 meters) above sea level. Much of Western Bolivia is at the same altitude or higher, including Lake Titicaca, the Salar de Uyuni, and the cities of Oruro and Potosi. The altitude alone poses a serious risk of illness, hospitalization, and even death, even for those in excellent health.

Prior to departing the U.S. for high-altitude locations (over 10,000 feet above sea level), travelers should discuss the trip with their personal physician and request information on specific recommendations concerning medication and lifestyle tips at high altitudes. Coca-leaf tea is a popular beverage and folk remedy for altitude sickness in Bolivia. Possession of this tea, which is sold in bags in most Bolivian grocery stores, is illegal in the United States. The State Department's Office of Medical Services cautions official U.S. Government travelers planning to visit La Paz to consider the following risks and advice.

Sickle cell anemia or sickle cell trait: 30 percent of persons with sickle cell trait are likely to have a crisis at elevations of more than 8,000 feet. U.S. citizens with this condition have required urgent medical evacuation from La Paz to the U.S.

Heart disease: Any person who has heart disease, or known risk factors for heart disease, should consult their doctor about their risks of ascending to altitude, and whether any testing of their heart would be in order. Even U.S. citizens who adjust well initially to the altitude in La Paz have subsequently suffered heart attacks and been hospitalized.

Lung disease: Anyone with emphysema should consult closely with their doctor and seriously reconsider coming to La Paz or surrounding, high altitude areas. Anyone with asthma should consult their doctor; mild asthma may be manageable at high altitude, but it is important to remember that emergency care and intensive respiratory care are very, very limited even in the city of La Paz, and are absent outside the city. U.S. citizens with respiratory ailments have previously been medically evacuated from La Paz to other countries to receive medical treatment.

Given potential complications from altitude sickness, pregnant women should consult their doctor before travel to La Paz and other high-altitude areas of Bolivia.

All people, even healthy and fit persons, will feel symptoms of hypoxia (lack of oxygen) upon arrival at high altitude. Most people will have increased respiration and increased heart rate. Many people will have headaches, difficulty sleeping, lack of appetite, minor gastric and intestinal upsets, and mood changes. Many travelers limit physical activity for the first 36 to 48 hours after arrival and avoid alcohol and smoking for at least one week after arrival.

For additional information, travelers should visit the World Health Organization's web site at http://www.who.int/ith/en/ as well as the CDC's travel warning on high altitude sickness at http://wwwn.cdc.gov/travel.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Bolivia is provided for general reference only, and may not be totally accurate in a particular location or circumstance. U.S. citizens planning on driving in Bolivia, despite the hazards

described below, should obtain an international driver's license through their local automobile club before coming to Bolivia.

Road conditions in Bolivia are hazardous. Although La Paz, Santa Cruz, and Cochabamba are connected by improved highways, the vast majority of roads in Bolivia are unpaved. Few highways have shoulders, fencing or barriers, and highway markings are minimal. Yielding for pedestrians in the cities is not the norm. For trips outside the major cities, especially in mountainous areas, a four-wheel-drive vehicle is highly recommended. Travel during the rainy season (November through March) is difficult, as most routes are potholed, and some roads and bridges are washed out. Added dangers are the absence of formal training for most drivers, poor maintenance and overloaded vehicles, lack of lights on some vehicles at night, and intoxicated or overly tired drivers, including commercial bus and truck drivers.

The majority of intercity travel in Bolivia is by bus, with varying levels of safety and service. Bus accidents, at times attributed to drunk drivers or mechanical failures, have caused scores of deaths and severe injuries. In recent years there have been major bus crashes on the highway between La Paz and Oruro, Cochabamba and Santa Cruz, and on the Yungas road. The old Yungas road is considered one of the most dangerous routes in the world. Taxis, vans, and buses dominate intracity transportation. From a crime perspective, public transportation is relatively safe and violent assaults are rare. However, petty theft of unattended backpacks and other personal items does occur. For reasons of safety, visitors are advised to use radio taxis whenever possible. U.S. citizens taking unlicensed taxis have reported being robbed and assaulted.

Drivers of vehicles involved in traffic accidents are expected to remain at the scene until the arrival of local police authorities. Any attempt to leave the scene is in violation of Bolivian law. The Embassy believes any attempt to flee the scene of an accident would place the driver and passengers at greater risk of harm than remaining at the scene until the arrival of local police.

Aviation Safety Oversight: The U.S. Federal Aviation Administration (FAA) has assessed the Government of Bolivia's Civil Aviation Authority as being in compliance with International Civil Aviation Organization (ICAO) aviation safety standards for oversight of Bolivia's air carrier operations. For more information, travelers may visit the FAA's web site at http://www.faa.gov.

There are limited flights within Bolivia and to neighboring countries. Flight delays and cancellations are common. In April 2007, Bolivia's transportation superintendent suspended the domestic and international operations of Lloyd Aereo Boliviano (LAB), citing the firm's frequent flight cancellations and shaky finances. This action has resulted in missed connecting flights and disruption to travelers' itineraries. U.S. citizens should keep this information in mind when making travel plans.

Special Circumstances: In the run-up to the July 2006 Constituent Assembly elections, President Morales accused the United States military of infiltrating Bolivia with operatives disguised as "students and tourists." As an apparent result of these comments, some U.S. citizens have reported harassment by Bolivian officials and been subjected to unwanted media attention. In one case, a local Bolivian newspaper wrongly identified an American citizen as an operative for the Central Intelligence Agency. In October 2006, two American citizens apparently seeking to view a government conference in Cochabamba were detained and denounced by the Bolivian Government as "spies" then ordered to leave Bolivia. Americans planning on traveling to Bolivia should be aware of the political atmosphere and the possibility of unwanted attention from pro-governmental groups and other Bolivian officials.

For information on in-country visa procedures and requirements, please consult the Bolivian Immigration Service at fax/telephone (591-2) 211-0960, street address Avenida Camacho entre Loayza y Bueno, La Paz, Bolivia. In emergency cases, the Immigration Service may permit temporary residency applicants to retrieve their passports from those applications. However, under current regulations in such cases the applicant would need to commence the application anew, including paying the corresponding fees. Any U.S. documents, such as birth, marriage, divorce or death certificates, to be presented in Bolivia must first be authenticated in the U.S. at the nearest Bolivian Embassy or consulate. For information on those procedures, please consult the Department of State Office of Authentications web site at http://www.state.gov/m/a/auth, and the nearest Bolivian Embassy or consulate.

Marriage: Please see our information on marriage in Bolivia, available on the Embassy's web site at http://bolivia.usembassy.gov.

Mountain Trekking and Climbing Safety: U.S. citizens are advised to exercise extreme care when trekking or climbing in Bolivia. Since June 2002, four American citizens have died in falls while mountain climbing in Bolivia. Three of the deaths occurred on Illimani, a 6,402-meter peak located southeast of La Paz. Many popular trekking routes in the Bolivian Andes cross passes as high as 16,000 feet. Trekkers must have adequate clothing and equipment, not always available locally, and should be experienced mountain travelers. It is not prudent to trek alone. Solo trekking is the most significant factor contributing to injuries and robberies.

The safest option is to join an organized group and/or use a reputable firm to provide an experienced guide and porter who can communicate in both Spanish and English. If you develop any of the following symptoms while climbing at altitude—severe headache, weakness, vomiting, shortness of breath at rest, cough, chest tightness, unsteadiness—descend to a lower altitude

immediately. Trekkers and climbers are strongly encouraged to purchase adequate insurance to cover expenses in case of injury or death.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating Bolivian laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Bolivia are severe, and convicted offenders can expect long jail sentences and heavy fines. Foreigners who bought dynamite at local markets have been detained by the police; products available on the open market may not be legal for a foreigner to possess. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

It often takes years to reach a decision in Bolivian legal cases, whether involving property disputes, civil, or criminal matters. Depending on the circumstances of the case, the court can order a defendant held in jail for the duration of the case. Prison conditions are primitive, and prisoners are expected to pay for food and lodging. For further information, please see the Annual Human Rights Report for Bolivia at http://www.state.gov/g/drl/rls/shrd/2005/63949.htm. Lists of local Bolivian attorneys and their specialties are available from the Consular Section of the U.S. Embassy in La Paz and the Consular Agencies in Santa Cruz and Cochabamba at http://bolivia.usembassy.gov.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov. Pending U.S. implementation of the Hague Convention on Intercountry Adoptions, under Bolivian law U.S. citizens who are not resident in Bolivia are not permitted to adopt Bolivian children.

Registration and Embassy Locations: Americans living or traveling in Bolivia are encouraged to register with the nearest U.S. Embassy or Consular Agency through the State Department's travel registration web site, and to obtain updated information on travel and security within Bolivia. Americans without Internet access may register directly with the nearest U.S. Embassy or Consular Agencies in Cochabamba and Santa Cruz. By registering, American citizens make it easier for the Embassy or Consular Agency to contact them in case of emergency.

The U.S. Embassy is located at 2780 Avenida Arce in La Paz, between calles Cordero and Campos; telephone (591-2) 216-8297 during business hours 8:30 a.m.-5:30 p.m., or (591-2) 216-8000 for after-hours emergencies; fax (591-2) 216-8808; Internet http://bolivia.usembassy.gov. The U.S. Embassy in La Paz is open for American Citizen Services Monday and Thursday from 1:30PM to 5:00PM and Tuesdays and Fridays from 08:30 to12:30 and from 2:00PM to 4:00PM, except U.S. and Bolivian holidays. Questions should be directed to the email address USCit.Services.Bolivia@gmail.com or consularlapaz@state.gov.

There are two consular agencies in Bolivia, which provide limited services to American citizens, but are not authorized to issue passports. Anyone requesting service at one of the consular agencies should call ahead to verify that the service requested would be available on the day you expect to visit the agency.

Santa Cruz: The Consular Agency in Santa Cruz is located at 146 Avenida Roque Aguilera (Tercer Anillo); telephone (591-3) 351-3477, 351-3479, or 351-3480; fax (591-3) 351-3478. The U.S. Consular Agency in Santa Cruz is open to the public Mondays from 09:00 to 12:30 and from 2:00PM to 5:00PM and on Tuesday through Friday from 09:00 to 12:30, except U.S. and Bolivian holidays.

Cochabamba: The Consular Agency in Cochabamba is located at Avenida Oquendo 654, Torres Sofer, room 601; telephone (591-4) 411-6313; fax (591-4) 425 -6714.

The U.S. Consular Agency in Cochabamba is open to the public Monday through Friday from 08:30 a.m.—12:30 p.m. and Tuesday and Thursday afternoons from 2:00 p.m. to 3:00 p.m., excluding U.S. and Bolivian holidays.

Intercountry Adoption

April 2008

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is based on public sources and our current understanding. Questions involving foreign and U.S. immigration laws and legal interpretation should be addressed respectively to qualified foreign or U.S. legal counsel.

The Hague Convention on Intercountry Adoption: The Hague Convention on Intercountry Adoption, to which the United States became a party on April 1, 2008, establishes legal and regulatory requirements for intercountry adoption.

Bolivia is a party to The Hague Convention on Protection of Children and Co-operation in Respect of Intercountry Adoption (the Convention) and with which the Convention is in force for the United States.

Patterns of Immigration: Please review current reports online at http://adoption.state.gov.

Adoption Authority: The governmental authority responsible for adoption matters in Bolivia is the Vice-Ministry of Gender and Genera-

tional Affairs (Viceministerio de Género y Asuntos Generacionales), which may be reached via the following contact information:

Av. 16 de Julio #1219
La Paz, Bolivia
Telephone: 591–2–212 4725;
591–2–212 4727
Email: vicejunite@alamo.entelnet.bo

Eligibility Requirements for Adoptive Parents: Bolivia allows both married and single people to adopt. Prospective adoptive parents must be between 25 to 50 years of age or 15 years older than the adopted child to adopt a child in Bolivia.

Residency Requirements: U.S. citizens must be legal residents of Bolivia in order to adopt in Bolivia.

Time Frame: Bolivian adoptions can be time-consuming. Recent experience suggests that the total time required will be several months to over one year. When a married couple is adopting, it is sufficient for one spouse to remain in Bolivia for the duration of the adoption process; it is not necessary that both do so. However, both adoptive parents must be present for the preliminary hearing on provisional placement, the evaluation, and the ratification of the adoption by the court. At least one prospective adoptive parent should plan to stay in Bolivia for approximately four to six weeks. Adoptive parents are advised NOT to make travel plans for an adoptive child until they have the child's U.S. visa. The Immigrant Visa Unit at the U.S. Embassy in La Paz will do its best to process adoption visa paperwork quickly; however, unexpected delays in the adoption process are possible. The U.S. Citizenship and Immigration Service and consular officials have no authority to intervene in any Bolivian legal process.

Adoption Agencies and Attorneys: Prospective adoptive parents are advised to fully research any adoption agency or facilitator they plan to use for adoption services.

Because Bolivia is a Convention country, adoption services must be provided by an accredited agency, temporarily accredited agency, approved person, supervised provider, or exempted provider. It is essential that prospective adoptive parent(s) seeking to adopt from a Convention country use an accredited adoption service provider. The Department maintains a current list of accredited adoption service providers The list of accredited adoption service providers is also provided on the website of The Hague Permanent Bureau at www.hcch.net.

Adoption Fees: The U.S. Embassy in Bolivia discourages the payment of any fees that are not properly receipted, "donations," or "expediting" fees, that may be requested from prospective adoptive parents. Such fees have the appearance of "buying" a baby and put all future adoptions in Bolivia at risk.

Adoption Procedures: Bolivia has two types of adoptions: national and intercountry. However, Bolivia does not allow intercountry adoptions to countries that have not ratified The Hague Convention on Intercountry Adoption, including the United States.

The following information is provided for use in cases in which the adoptive parents are resident in Bolivia or hold dual U.S.-Bolivian nationality.

In order to be eligible for adoption, a Bolivian child must be "abandoned." Abandonment is a legal finding made by the Bolivian court, and must occur before the child is assigned to prospective adoptive parents. In effect, this prohibits so-called "direct" adoptions, in which the birth parent gives a child directly (or via an intermediary) to specific prospective adoptive parents for adoption.

In addition, this effectively bars adoptive parents from searching for and locating a child on their own. Prospective adoptive parents must work with the Vice-Ministry of Gender and Generational Affairs to locate a child that is eligible for adoption. Once the prospective adoptive parents are matched with a child, they must then apply to the Bolivian court that has jurisdiction over the child. A Bolivian attorney must submit the request for adoption to the Vice-Ministry of Gender and Generational Affairs along with a copy a social worker's report of the prospective adoptive child. Adoption proceedings can, by law, take from 25 to 45 working days from the date of the first hearing, although it is not uncommon for the procedures to take even longer. The length of the process often depends on which court has jurisdiction over the case.

Please see the *Intercountry Adoption* section of this book for more details and review current reports online at http://adoption.state.gov.

Required Documents: The following is a general list of documents that are required for adoption in Bolivia. Prospective adoptive parents should be aware that other documents may be required.

Prospective adoptive parents are advised to have several extra copies of each document on hand when traveling to Bolivia. Documents to be submitted by the prospective adoptive parents include (but are not limited to) the following:

- The adoptive parents' birth certificates;
- The adoptive parents' marriage certificate(s), if applicable;
- Home study conducted by an approved adoption service provider;
- Physical and psychological health certificates;
- Financial and employment certifications;
- 2-3 Personal references and police clearances; and
- Evidence that prospective parent(s) has participated in and completed a parenting workshop (this may be undertaken in the United States).

U.S. Immigration Requirements: As of April 1, 2008, U.S. citizens wishing to adopt in a Convention country must begin the process by filing with the U.S. Citizenship and Immigration Services (USCIS) a form I-800A *Application for Determination of Suitability to Adopt a Child from a Convention Country*.

Prospective adoptive parents are strongly encouraged to consult the Department of Homeland Security, USCIS website to download forms and filing instructions.

Embassy of Bolivia
3014 Massachusetts Ave., N.W.
Washington, D.C. 20008
Tel: (202) 483-4410

Bolivia also has Consulates General in Houston, Miami, New York, Oklahoma City and Seattle.

American Embassy
Consular Section
Avenida Arce 2780, between calles Cordero and Campos
La Paz, Bolivia

Additional Information: For information on intercountry adoption and international parental child abduction, and security information for U.S. citizens traveling abroad, call Toll Free 1-888-407-4747.

This number is available from 8:00 a.m. to 8:00 p.m. EST/EDT, Monday through Friday (except U.S. federal holidays).

Callers who are unable to use toll-free numbers, such as those calling from overseas, may obtain information and assistance during these hours by calling 1-202-501-4444.

BOSNIA AND HERZEGOVINA

Compiled from the May 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Bosnia and Herzegovina

PROFILE

Geography

Area: 51,129 sq. km, slightly smaller than West Virginia.

Cities: Capital—Sarajevo (est. pop 387,876); Banja Luka (220,407); Mostar (208,904); Tuzla (118,500); Bihac (49,544).

Terrain: Mountains in the central and southern regions, plains along the Sava River in the north.

Climate: Hot summers and cold winters; areas of high elevation have short, cool summers and long, severe winters; mild, rainy winters in the southeast.

People

Nationality: Bosniak (Muslim), Bosnian Croat, Bosnian Serb.

Population: (July 2004 est.) 4,007,608 (note: all data dealing with population are subject to considerable error because of the dislocations caused by military action and ethnic cleansing).

Population growth rate: (2004 est.) 0.45%.

Ethnic groups: Bosniak 48.3%, Serb 34.0%, Croat 15.4%, others 2.3%. (Source: UNDP Human Development Report 2002—Bosnia-Herzegovina).

Religions: Muslim (40%); Orthodox (31%); Catholic (15%); Protestant (4%); other (10%).

Languages: Bosnian, Serbian, Croatian (formerly "Serbo-Croatian").

Education: Mandatory 8-9 years of primary school (depending on region), 3-4 years in secondary school (vocational/liberal arts), and 3-5 years in universities (depending on major). In Bosnia and Herzegovina, there are 1,089 primary schools with 350,000 students and 289 secondary schools with 162,000 students. The main public universities are in larger cities (Sarajevo, Mostar, Banja Luka, Tuzla, Bihac, Zenica) and there are a number of private institutions of higher education. Adult literacy rate—male 94.1%, female 78.0%.

Health: Infant mortality rate: (2005 est.)—21.05 deaths/1,000 live births. Life expectancy (2005 est.)—male 70.09, female 75.8.

Work force: (2001 est.) 1.026 million.

Government

Type: Parliamentary democracy.

Constitution: The Dayton Agreement, signed December 14, 1995, included a new constitution now in force.

Independence: April 1992 (from Yugoslavia).

Government branches: Executive—Chairman of the Presidency and two other members of three-member rotating presidency (chief of state), Chairman of the Council of Ministers (head of government), Council of Ministers (cabinet). Legislative—bicameral parliamentary assembly, consisting of national House of Representatives and House of Peoples (parliament). Judicial—Supreme Court, Constitutional Court, both supervised by the Ministry of Justice.

Political subdivisions: Two Entities: Federation of Bosnia and Herzegovina (divided into 10 cantons) and Republika Srpska. In accordance with Annex 2, Article V, of the Dayton Peace Agreement that left the unresolved status of Brcko subject to binding international arbitration, an Arbitration Tribunal was formed in mid-1996. On March 5, 1999, the Tribunal issued its Final Award. The Final Award established a special District for the entire pre-war Brcko Opstina, under the exclusive sovereignty of Bosnia and Herzegovina. The territory of the District belongs simultaneously to both Entities, the Republika Srpska and the Federation, in condominium. Therefore, the territories of the two Entities overlap in the Brcko District. In accordance with the Final Award, the District is self-governing and has a single, unitary, multiethnic, democratic Government; a unified and multiethnic police force operating under a single command structure and an indepen-

dent judiciary. The District Government exercises, throughout the prewar Brcko Opstina, those powers previously exercised by the two Entities and the former three municipal governments. The Brcko district is demilitarized.

Political parties: Party of Democratic Action (SDA); Croatian Democratic Union of BiH (HDZ-BiH); Serb Democratic Party (SDS); Party for Bosnia and Herzegovina (SBiH); Croatian Democratic Union-1990 (HDZ-1990); Bosnian Party (BOSS); Social Democratic Union (SDU); Croatian Party of Rights (HSP); Civic Democratic Party (GDS); Alliance of Independent Social Democrats (SNSD); Social Democratic Party (SDP); Socialist Party of Republika Srpska (SPRS); Party for Democratic Progress (PDP); National Democratic Union (DNZ); Democratic Peoples' Alliance (DNS); Bosnian Patriotic Party (BPS); Work for Progress (RzB); Serb Radical Party (SRS).

Suffrage: Universal at age 18.

Economy

Nominal GDP: (2007 Central Bank and IMF figures): $14.6 billion.

GDP real growth rate: (2007 Central Bank figure): 5.8%.

Nominal GDP per capita: $3,802.

Inflation rate: (2007 est.) 4.9%.

Natural resources: Hydropower, coal, iron ore, bauxite, manganese, forests, copper, chromium, lead, zinc, cobalt, nickel, clay, gypsum, salt, sand, forests.

Agriculture: Products—wheat, corn, fruits, vegetables, livestock.

Industry: Steel, aluminum, minerals, vehicle assembly, textiles, tobacco products, wooden furniture, explosives, munitions, aircraft repair, domestic appliances, oil refining.

Trade: (2007 Central Bank figures): Exports—$4.2 billion. Imports—$9.9 billion.

PEOPLE AND HISTORICAL HIGHLIGHTS

The three main ethnic groups in present-day Bosnia and Herzegovina are Bosniak, Serb, and Croat, and languages are Bosnian, Serbian, and Croatian (formerly "Serbo-Croatian"). Nationalities are Bosniak (Muslim), Bosnian Serb, and Bosnian Croat. Religions include Islam, Serb Orthodoxy, Roman Catholicism, Judaism, some Protestant sects, and some others.

For the first centuries of the Christian era, Bosnia was part of the Roman Empire. After the fall of Rome, Bosnia was contested by Byzantium and Rome's successors in the west. Slavs settled the region in the 7th century, and the kingdoms of Serbia and Croatia split control of Bosnia in the 9th century. The 11th and 12th centuries saw the rule of the region by the kingdom of Hungary. The medieval kingdom of Bosnia gained its independence around 1200 A.D. Bosnia remained independent until 1463, when Ottoman Turks conquered the region.

During Ottoman rule, many Bosnians converted from Christianity to Islam. Bosnia was under Ottoman rule until 1878, when it was given to Austria-Hungary as a colony. While those living in Bosnia came under the rule of the Austro-Hungarian Empire, South Slavs in Serbia and elsewhere were calling for a South Slav state. World War I began when Serb nationalist Gavrilo Princip assassinated the Archduke Franz Ferdinand in Sarajevo. Following the Great War, Bosnia became part of the South Slav state of Yugoslavia, only to be given to the Nazi-puppet state, the Independent State of Croatia (NDH) in World War II. During this period, many atrocities were committed against Jews, Serbs, and others who resisted the occupation. The Cold War saw the establishment of the Communist Federal Republic of Yugoslavia under Josip Broz Tito, and the reestablishment of Bosnia as a republic with its medieval borders within the federation of Yugoslavia. Yugoslavia's unraveling was hastened by Slobodan Milosevic's rise to power in 1986. Milosevic's embrace of Serb nationalism led to intrastate ethnic strife. Slovenia and Croatia both declared independence from Yugoslavia in 1991. On March 1, 1992, the Bosnian Government held a referendum on independence. Bosnia's parliament declared the republic's independence on April 5, 1992. However, this move was opposed by Serb representatives, who favored remaining in Yugoslavia. Bosnian Serbs, supported by neighboring Serbia, responded with armed force in an effort to partition the republic along ethnic lines to create a "greater Serbia." Full recognition of Bosnia and Herzegovina's independence by the United States and most European countries occurred on April 7, and Bosnia and Herzegovina was admitted to the United Nations on May 22, 1992.

In March 1994, Muslims and Croats in Bosnia signed an agreement creating the Federation of Bosnia and Herzegovina. This narrowed the field of warring parties to two. The conflict continued through most of 1995, and many atrocities were committed, including acts of genocide committed by members of the Army of Republika Srpska in and around Srebrenica from July 12-22, 1995, where approximate 8,000 Bosnian Muslim men and boys were killed. The conflict ended with the November 21, 1995 Dayton Peace Agreement, which was formally signed on December 14, 1995 in Paris.

Radovan Karadzic and Ratko Mladic, the political and military leaders of the Bosnian Serb separatist movement, were indicted by the International Criminal Tribunal for the Former Yugoslavia (www.un.org/icty) in The Hague in July 1995 on charges of genocide and crimes against humanity stemming from their role in the Srebrenica massacre. Karadzic and Mladic remain at large.

Bosnia and Herzegovina today consists of two Entities—the Federation of Bosnia and Herzegovina, which is largely Bosniak and Croat, and the Republika Srpska, which is primarily Serb. In July 2000, the Constitutional Court of Bosnia and Herzegovina rendered a decision whereby Bosniaks, Croats, and Serbs are recognized as constituent people throughout the territory of Bosnia and Herzegovina. In March 2002, this decision was

formally recognized and agreed by the major political parties in both Entities. The most recent national elections took place in October 2006, electing new state presidency members; Entity governments; and state, Entity, and cantonal parliaments. The traditionally nationalist parties (SDS, HDZ, SDA) lost ground to emerging opposition parties (SNSD, SBiH, HDZ-1990), although the opposition parties relied heavily on ethnically based messages to appeal to voters. A six-party coalition has formed a national government. The next national elections are scheduled for October 2010.

Bosnia and Herzegovina introduced the direct election of mayors at municipal elections held in October 2004. The next municipal elections are scheduled for fall 2008. The international community retains an extraordinary civilian and military presence in BiH stemming from the Dayton Peace Accords. The Dayton Accords created the position of High Representative, an international official charged with overseeing imple-

mentation of the civilian aspects of the agreement. The current High Representative (since July 2007) is Slovakia's Miroslav Lajcak (www.ohr.int).

In December 1995, NATO deployed a 60,000-troop Implementation Force (IFOR) to oversee implementation of the military aspects of the peace agreement. IFOR transitioned into a smaller Stabilization Force (SFOR) in 1996.

With the end of the SFOR mission in December 2004, the European Union (EU) assumed primary responsibility for military stabilization operations.

Approximately 2,200 EU troops remain deployed in Bosnia (www.euforbih.org). NATO maintains a small headquarters operation with responsibility to assist with defense reform and efforts against persons indicted for war crimes and counterterrorism (www.afsouth.nato.int/NHQSA/index.htm).

GOVERNMENT AND POLITICAL CONDITIONS

General Government Framework Information and Information Regarding the President and the Cabinet. Under the provisions of the Dayton Peace Accords, the Entities have competencies in areas such as finance, taxation, business development, and general legislation. Entities and cantons control their own budgets, spending on infrastructure, health care, and education.

Ongoing reforms have led to the creation of a single, multi-ethnic military under state-level command and control to replace the previous Entity-based institutions and a state-level Indirect Taxation Authority (ITA) that is responsible for the implementation of a state-wide value-added tax (VAT), revenues from which fund the governments of the state of Bosnia and Herzegovina as well as the two Entities. Customs, which had been collected by agencies of the two Entities, also is now collected by a new single state customs service.

Presidency. The Presidency in Bosnia and Herzegovina rotates among three members (Bosniak, Serb, Croat), each elected for a 4-year term. The three members of the Presidency are directly elected (the Federation votes for the Bosniak/Croat, and the Republika Srpska for the Serb).

The Presidency is responsible for:

- Conducting the foreign policy of Bosnia and Herzegovina;
- Appointing ambassadors and other international representatives, no more than two-thirds of whom may come from the Federation;
- Representing Bosnia and Herzegovina in European and international organizations and institutions and seeking membership in such organizations and institutions of which it is not a member;
- Negotiating, denouncing, and, with the consent of the Parliamentary Assembly, ratifying treaties of Bosnia and Herzegovina;
- Executing decisions of the Parliamentary Assembly;
- Proposing, upon the recommendation of the Council of Ministers, an annual budget to the Parliamentary Assembly;
- Reporting as requested, but no less than annually, to the Parliamentary Assembly on expenditures by the Presidency;
- Coordinating as necessary with international and non-governmental organizations in Bosnia and Herzegovina;
- Exercising command and control over the Armed Forces of Bosnia and Herzegovina in peacetime, crises, and war, and;
- Performing such other functions as may be necessary to carry out its duties, as may be assigned to it by the Parliamentary Assembly, or as may be agreed by the Entities.

The Chair of the Council of Ministers is nominated by the Presidency and approved by the House of Representatives. He is then responsible for appointing a Foreign Minister, Minister of Defense, Minister of Foreign Trade, and others as appropriate. The Council is responsible for carrying out the policies and decisions in the fields of defense, intelligence, foreign policy; foreign trade policy; customs policy; monetary policy; finances of the institutions and for the international obligations of Bosnia and Herzegovina; immigration, refugee, and asylum policy and regulation; international and inter-Entity criminal law enforcement, including relations with Interpol; establishment and operation of common and international communications facilities; regulation of inter-Entity transportation; air traffic control; facilitation of inter-Entity coordination; and other matters as agreed by the Entities.

Legislature. The Parliamentary Assembly is the lawmaking body in Bosnia and Herzegovina. It consists of two houses: the House of Peoples and the House of Representatives.

The House of Peoples includes 15 delegates, two-thirds of whom come from the Federation (5 Croats and 5 Bosniaks) and one-third from the Republika Srpska (5 Serbs). Nine members of the House of Peoples constitutes a quorum, provided that at least three delegates from each group are present. Federation representatives are selected by the House of Peoples of the Federation, and Republika Srpska representatives are selected by the Republika Srpska National Assembly.

The House of Representatives is comprised of 42 members, two-thirds elected from the Federation and one-third elected from the Republika Srpska.

Federation representatives are elected directly by the voters of the

Federation, and Republika Srpska representatives are directly elected by Republika Srpska voters. The Parliamentary Assembly is responsible for enacting legislation as necessary to implement decisions of the Presidency or to carry out the responsibilities of the Assembly under the constitution; deciding upon the sources and amounts of revenues for the operations of the institutions of Bosnia and Herzegovina and international obligations of Bosnia and Herzegovina; approving a budget for the institutions of Bosnia and Herzegovina; and deciding whether to consent to the ratification of treaties.

Judiciary. The Constitutional Court of Bosnia and Herzegovina is the supreme, final arbiter of legal matters. It is composed of nine members: four are selected by the House of Representatives of the Federation, two by the Assembly of the Republika Srpska, and three by the President of the European Court of Human Rights after consultation with the Presidency. The Constitutional Court's original jurisdiction lies in deciding any constitutional dispute that arises between the Entities or between Bosnia and Herzegovina and an Entity or Entities. The Court also has appellate jurisdiction within the territory of Bosnia and Herzegovina. Both the Federation and the Republika Srpska government have established lower court systems for their territories.

Principal Government Officials

Last Updated: 11/12/08

Bosnia's central government is headed by a tripartite presidency, with one representative of each of the three major ethnic constituencies. The chairmanship of the presidency rotates among the three presidency members every eight months.

National Govt.

Presidency Chmn. (Bosniak): **Haris SILAJDZIC**

Bosnia and Herzegovina maintains an embassy in the United States at 2109 E Street NW, Washington, DC 20037 (tel.: 202-337-1500; fax: 202-337-1502).

ECONOMY

Bosnia and Herzegovina was among the poorer areas of the old Yugoslav Federation. For the most part, agriculture remains in private hands, but farms have been small and inefficient, and net food imports increased dramatically in the aftermath of the 1992-1995 war. Industry still is overstaffed, reflecting the legacy of the centrally-planned economy. Under Tito, military industries were widespread in Bosnia, which hosted a large share of Yugoslavia's defense plants. During the war, three years of interethnic strife damaged or destroyed much of the economy and infrastructure in Bosnia, caused the death of about 100,000 people, and displaced half of the population.

Considerable progress has been made since peace was reestablished following the Dayton Accords. Still regarded as a transition economy, Bosnia and Herzegovina (BiH) sees the long-term goal of EU membership as a driver to further economic

growth and development. Due to Bosnia and Herzegovina's strict currency board regime, which links the Konvertibilna Marka (BAM) to the Euro, inflation has remained relatively low and, as a result, the BAM is one of the most stable currencies in Southeast Europe. The banking sector has been fully reformed, with a significant inflow of foreign banks (foreign ownership currently stands at 85% of the banking sector) providing businesses with easier access to capital and a better range of banking services.

Per capita GDP in 2007 was approximately U.S. $3,802, with a total nominal GDP of approximately U.S. $14.6 billion. The estimated real GDP growth rate for 2007 was 5.8%, and projected growth for 2008 is around 6%. While official unemployment is approximately 40%, "unofficial" estimates of unemployment that include the large gray economy are approximately 18%-22%. Bosnia and Herzegovina's most immediate task remains economic revitalization. The country needs meaningful progress in structural reforms to strengthen the basis for sustained, private sector-led growth. In order to improve the business climate, private sector growth—especially small and medium enterprises (SMEs)—and foreign direct investment (FDI) acceleration are needed to spur increased economic growth and job creation. Privatization has been slow, and unemployment remains high. The introduction of a value-added tax in 2006 has increased the government's tax revenues and resulted in a budget surplus.

BiH's top economic priorities are: acceleration of EU integration by concluding a Stabilization and Association Agreement (SAA), which has been initialed but not formally signed; strengthening the fiscal system; public administration reform; World Trade Organization (WTO) membership; and securing economic growth by fostering a dynamic, competitive private sector. To date, work on these priorities has been inconsistent. The country has received a substantial amount of foreign assistance but must prepare for declining assistance flows in the future.

FOREIGN RELATIONS

The implementation of the Dayton Accords of 1995 has focused the efforts of policymakers in Bosnia and Herzegovina, as well as the international community, on regional stabilization in the former Yugoslavia. However, donor resources for Bosnia and Herzegovina have diminished due to competing assistance priorities elsewhere in the region and globally. Bosnia and Herzegovina's relations with its neighbors Croatia, Montenegro and Serbia have been fairly stable since the signing of Dayton in 1995. The U.S. role in the Dayton Accords and their implementation has been key to successes in Bosnia and Herzegovina. Since the Dayton Accords were signed, over $14 billion in foreign aid has moved into Bosnia and Herzegovina, approximately $940 million of it coming from Support for East European Democracy (SEED) funds.

As stated above, this support has been key to the growth and revitalization of the economy and infrastructure in the republic. In addition to SEED funding, U.S. Agency for International Development (USAID) programs have been crucial to the redevelopment of Bosnia and Herzegovina. USAID has programming in the following areas: economic policy reform and restructuring; private sector development (the Business Development Program); infrastructure rebuilding; democratic reforms in the media, political process and elections, and rule of law/legal code formulation; and training programs for women and diplomats.

Bosnia and Herzegovina is a member of the United Nations (1992); International Monetary Fund (IMF) (1992), World Bank (1995), Organization for Security and Cooperation in Europe (OSCE) (1992); and the Council of Europe (2002). It also participates in regional cooperation through the Stability Pact, Central-European Initiative (CEI), Southeast Europe Co-operation Initiative (SECI), Southeast Europe Co-operation Process (SEECP), Adriatic-Ionic Initiative (AII) and others.

U.S.-BOSNIAN RELATIONS

The 1992-95 war in Bosnia and Herzegovina was ended with the crucial participation of the United States in brokering the 1995 Dayton Accords. After leading the diplomatic and military effort to secure the Dayton agreement, the United States has continued to lead the effort to ensure its implementation. The United States maintains command of the NATO headquarters in Sarajevo. The United States has donated hundreds of millions of dollars to help with reconstruction, humanitarian assistance, economic development, and military reconstruction in Bosnia and Herzegovina. The U.S. Agency for International Development (USAID) has played a large role in post-war Bosnia and Herzegovina, including programs in economic development and reform, democratic reform (media, elections), infrastructure development, and training programs for Bosnian professionals, among others. Additionally, there are many nongovernmental organizations (NGOs) that have likewise played significant roles in the reconstruction.

TRAVEL

Consular Information Sheet

December 1, 2008

Country Description: Since the December 1995 signing of the Dayton Peace Accords, there has been significant progress in restoring peace and stability in Bosnia and Herzegovina. Significant progress has been made in reconstructing the physical infrastructure that was devastated by the war. Nonetheless, political tensions among the ethnic groups persist. Hotels and travel amenities are available in the capital, Sarajevo, and other major towns, but they are relatively expensive. In the more remote areas of the country, public facilities vary in quality.

Entry and Exit Requirements: A passport is required for travel to Bosnia and Herzegovina. American citizens do not require a visa for tourist stays up to three months. Travelers who are not staying at a hotel (i.e. a private residence) must register with the local police within 24 hours of arrival. U.S. citizens planning to remain in Bosnia and Herzegovina for more than three months must obtain a visa prior to travel, or apply for a temporary residence permit from the local police station having jurisdiction over their place of residence. Applications for temporary residence permits should be submitted 15 days prior to the expiration of the initial three month tourist visa. A police certificate indicating that the applicant has no criminal record is required for this permit and should be obtained from the applicant's state of residence in the U.S. For additional information please contact the Embassy of Bosnia and Herzegovina, at 2109 E. Street, NW, Washington, DC 20037, telephone 202-337-6473. Visit the Embassy of Bosnia and Herzegovina web site at http://www.bhembassy.org for the most current visa information.

Beginning in May 2008, the immigration authorities of Bosnia and Herzegovina began to strictly enforce a provision of a Bosnian law that requires any unaccompanied minor (under 18) to have written permission from both parents in order to enter and leave the country. If traveling with one parent only, the minor is required to have written permission for the trip from the non-traveling parent.

Safety and Security: Landmines remain a problem in Bosnia and Herzegovina. As of 2008, there are still an estimated 13,000 minefields and an estimated 222,000 active land mines. The area of suspected landmine contamination is estimated at over 2000 square kilometers more than 4% of the country's territory. These devices have killed more than 400 people since 1996. While most urban areas have been largely cleared, special care should be taken when near the former lines of conflict, including the suburbs of Sarajevo. The de-mining community recommends staying on hard surfaced areas and out of abandoned buildings. Families traveling with children in Bosnia and Herzegovina should be especially aware of the danger posed by mines and unexploded ordnances.

Localized political difficulties continue and random violence may occur with little or no warning.

Bosnian criminals use firearms and explosives to settle personal, business, and political disputes. In October 2008, an explosive device detonated in a public shopping mall in Vitez, killing a store security guard. The foreign community is rarely the target of such violence, but there is always the danger of being in the wrong place at the wrong time. While most Bosnian citizens appreciate the assistance of the international community, occasional anti-foreign sentiment is sometimes encountered.

For the latest security information, Americans traveling abroad should regularly monitor the Department's Internet web site at http://travel.state.gov where the current Travel Warnings and Travel Alerts, including the Worldwide Caution Travel Alert, can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S., or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: The overall crime rate throughout the country remains relatively low—the most common being confrontational crimes and residential break-ins. Pick-pocketing and vehicle break-ins are also a problem. Most pickpockets operate in pairs and employ distraction methods to execute their craft. There are also documented cases of pick-pocketing and other scams to get money from foreign passengers aboard public transportation. Travelers should take normal precautions to protect their property from theft and exercise common sense personal security measures, traveling in groups, and staying in well-lighted areas after dark. Confrontations with local citizens resulting from traffic incidents or public disagreements should be avoided.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the near-

est U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. embassy or consulate for assistance. The embassy/consulate staff can, for example, assist you to find appropriate medical care, to contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

The local equivalent to the "911" emergency line in Bosnia and Herzegovina is: Police—122; Ambulance—124 and Fire—123.

Medical Facilities and Health Information: The lack of adequate medical facilities, especially outside Sarajevo, may cause problems for visitors. Because many medicines are not obtainable, travelers should bring their own supply of prescription drugs and preventive medicines. Private practitioners and dentists are becoming more common; however, quality of care varies and rarely meets U.S. or western European standards. All major surgery is performed in public hospitals.

The U.S. Department of State is unaware of any HIV/AIDS entry restrictions for visitors to or foreign residents of Bosnia and Herzegovina.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's internet site at http://www.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) website at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Bosnia and Herzegovina is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

Road travel is possible throughout most of the country. However, some roads are still damaged from the war, and poorly maintained. Roads are sometimes blocked due to landslides, de-mining activity, and traffic accidents. Bosnia and Herzegovina is among the rare countries in Europe that has fewer than ten kilometers of four-lane highway. The existing, two-lane roads between major cities are quite narrow at places, lack guardrails, and are full of curves. Travel by road can be risky due to poorly maintained roads, and morning and evening fog in the mountains. Driving in winter is hazardous due to fog, snow, and ice. Local driving habits are poor, and many vehicles are in bad condition. Many accidents occur when drivers exceed safe speeds along winding mountain roads. Accidents involving drunk driving are an increasing problem. Driving after dark is especially dangerous, and street lighting is not common outside the major towns. Road construction may be poorly marked, and automobiles share the road with heavy vehicles and agricultural equipment. Travelers are encouraged to convoy with other vehicles, if possible, and to plan their trip to ensure they travel only during daylight hours.

Although the number of service stations outside major cities has increased in recent years, many do not offer mechanical or other services. The emergency number for vehicle assistance and towing service is 1282; ambulances can be called at 124, and police at 122.

Speed limit traffic signs are not always obvious or clear. The speed limit on the majority of roads is 60 km/h, and on straight stretches of road it is generally 80 km/h. The use of seat belts is mandatory. Talking on a cell phone while driving is prohibited. The tolerated percentage of alcohol in the blood is .03%.

In order to drive legally in Bosnia and Herzegovina, you must have an international driving permit in addition to your U.S. license. Visit the website of the Bosnia and Herzegovina's national tourist office and national authority responsible for road safety http://www.bihamk.ba.

Aviation Safety Oversight: As there is no direct commercial air service between the United States and Bosnia and Herzegovina, the U.S. Federal Aviation Administration (FAA) has not assessed Bosnia and Herzegovina's Civil Aviation Authority for compliance with International Civil Aviation Organization (ICAO) aviation safety standards. For more information, travelers may visit the FAA's Internet web site at http://faa.gov/safety/programs_initiatives/oversight/iasa.

During the winter months, flights into and out of Sarajevo are frequently delayed or cancelled due to heavy fog. Travelers should be prepared for last-minute schedule changes, lengthy delays, and alternate routings, or time-consuming overland transportation.

Special Circumstances: Bosnia and Herzegovina is still predominantly a cash economy. Although the use of credit cards has become more widespread in recent years, travelers still should not expect to use them to cover all expenses. Automated Teller Machines (ATMs) are available at international banks in Sarajevo and other major cities and towns, but their number is limited. Traveler's checks can be cashed in banks in major cities, but often with delays of a few weeks or strict monthly limits. Cash transfers from abroad may also involve delays. The convertible mark, the Bosnian currency since June 1998, is pegged to the euro under a

currency-board regime, which guarantees its stability. All official payments must be made in convertible marks, though many private stores and service providers also accept euros. Any bank in Bosnia and Herzegovina should be able to exchange U.S. dollars into the convertible marks with the usual bank commission (being between 1% and 2%).

Photographing military installations, including airports, equipment, bridges, government checkpoints, troops and the U.S. Embassy is forbidden. If in doubt, please ask permission before taking photographs.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating Bosnia and Herzegovina laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Bosnia and Herzegovina are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in Bosnia and Herzegovina are encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration website and to obtain updated information on travel and security within Bosnia and Herzegovina. Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency.

The U.S. Embassy is located at Alipasina 43, telephone (387)(33) 445-700, fax: (387)(33) 221-837; Internet address http://www.usembassy.ba. On weekends, holidays, and after hours, an Embassy duty officer can be reached at telephone (387)(33) 445-700. If after dialing you receive a recorded message, press "0," and then ask for the duty officer.

Intercountry Adoption

March 2006

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is based on public sources and current understanding. Questions involving foreign and U.S. immigration laws and legal interpretation should be addressed respectively to qualified foreign or U.S. legal counsel.

Please Note: While there is nothing in Bosnian law that specifically prohibits foreigners from applying to adopt a Bosnian child, the law stresses that there must be overwhelming justification and exceptionally compelling reasons for a foreigner to be permitted to do so. The definition of "overwhelming justification" is judged on a case-by-case basis. The law says specifically that a foreign citizen may appear as an adoptive parent "if the adoption is in the best interest of the child and if the child cannot be adopted in Bosnia and Herzegovina." The Ministry of Social Policy in the Bosnian entity where the child is living (either the Federation or the Republika Srpska, RS) must approve his/her adoption by foreigners. In practice, it is extremely difficult to obtain this approval. Immigrant visas for Bosnian citizens are issued at the U.S. Embassy in Zagreb, Croatia.

Patterns of Immigration: Please review current reports online at http://adoption.state.gov.

Adoption Authority: In both entities of Bosnia and Herzegovina, the Federation and the Republika Srpska, adoptions are the responsibility of the municipal Centers for Social Work, the Bosnian equivalent of the county or municipal social services department in the United States. The municipal Center for Social Work prepares an adoption case for submission to the Ministry of Social Policy of the entity in question, which makes the final determination in the case. The Ministry of Social Policy will also seek the approval of the Ministry of Internal Affairs of the Federation or Republika Srpska, depending on where child is located.

Eligibility Requirements for Adoptive Parents: Bosnian law requires that at least one adoptive parent be between the ages of 25 and 45, and that there be at least an 18-year age difference between that parent and the child. In exceptional circumstances, persons older than 45 may be permitted to adopt, but the age difference between the parent and child may not exceed 45 years. In practice, children are placed only with married couples.

In addition, persons falling into any of the following groups are prohibited from adopting Bosnian children:

- persons whose parental rights have been taken away;
- persons with a limited or no ability to work;
- persons who provide insufficient guarantees that they will raise the child correctly;
- persons who are mentally ill, retarded, or suffering from any illness that could endanger the health and life of the adopted child.

Residency Requirements: There are no residency requirements for Bosnia.

Time Frame: The municipal Center for Social Work publishes its decision regarding its recommendation on an adoption within two months of receiving the adoption application. However, in practice it usually takes longer for the Center to make a decision. Once the Center reaches a decision they then forward the application package to the Ministry of Social Policy with their recommendation. The Ministry is supposed to reach a decision about a request for adoption in two months. Once the Ministry makes a decision, it is sent back to the Center that accepted the application. If the decision is favorable, the prospective adoptive parents must be personally present at the official ceremony (act) of adoption.

Adoption Agencies and Attorneys: There are no U.S. adoption agencies operating in Bosnia. The U.S. Embassy in Sarajevo maintains lists of attorneys. Please review current reports online at http://adoption.state.gov for a list of agencies.

Adoption Fees: The Bosnian government does not charge a fee for its role in the adoption process.

Adoption Procedures: Persons who wish to apply to adopt a particular child can do so by contacting the Center for Social Work of the municipality/district in which the child is resident and submitting the documents listed below. The Center for Social Work is the Bosnian equivalent of the county or municipal social services department in the United States.] Prospective adoptive parents who do not have a particular child in mind can contact the Center for Social Work for a designated area to inquire if there are any children eligible for adoption. If the Center affirms that a child is eligible for intercountry adoption, the Center will request the documents listed below to determine the eligibility of the prospective adoptive parent(s). It should be noted that it is entirely possible that a Center will not respond at all to an inquiry from a foreign national, since under Bosnian law, intercountry adoption is permitted only in exceptional circumstances (typically when there is a compelling medical need, or one of the adopting parents is of Bosnian origin).

The Center then forwards the application package, along with its recommendation, to the Ministry of Social Policy. The Ministry makes a final decision and sends the package back to the Center. The Center then notifies the prospective adoptive parents. If the decision is favorable, the prospective adoptive parents must be personally present at the official ceremony (act) of adoption.

This is an official act signed by the adoptive parents in person and representatives of the government. It takes place at the Center for Social Work. The court then issues an official decision or decree ratifying the proceedings conducted by the Center for Social Work. The court does not have the authority to overrule the Ministry's decision.

Required Documents: There is no specific application form. The prospective adoptive parent(s) must write a signed letter to the relevant Center for Social Work providing basic information about them. It can be submitted by mail or through an authorized representative. The application must be accompanied by the following documents about each of the adoptive parents:

- Certified Birth certificate.
- Certified Marriage certificates (if applicable).
- Medical certificate of good health, preferably provided by a hospital or general practice clinic, rather than a private physician.
- Proof of citizenship (certified copy of a birth certificate, naturalization certificate or passport).
- Police certificate (i.e., certificate that no criminal record exists) issued by local law enforcement authorities from every place of residence where the applicant has lived for more than a year since the age of 18.
- Court certificate (i.e., certificate proving that the prospective adoptive parent is not under any court investigation at the present time).
- Certificate about capacity for gainful employment. This should take the form of a resume of previous employment records, and an original letter (on official stationery) signed by the current employer, stating the job title, if the position is full- or part-time, how long the person has been employed and the salary.
- Certificate proving that the prospective adoptive parent has never been charged with child neglect or abuse. This may take the form of an official letter from the local department of child welfare.
- Documents testifying to the prospective adoptive parent's income and property.
- Home study (social worker's analysis) about the prospective adoptive family, including its ability to care for a child. For non-Bosnian applicants, including Americans, the social services department of the applicant's country must conduct the study.

All original documents and the application letter must be in English and each must be accompanied by a translation into Bosnian/Serbian/Croatian done by an official court translator. It is easier and less expensive to have the translations done in Bosnia. The U.S. Embassy in Sarajevo can provide a list of court translators. The Embassy itself cannot, however, do the translations.

The Embassy of Bosnia and Herzegovina
2019 E. Street, N.W.,
Washington, DC 2003
Tel: (202)337-1500.
Bosnia also has consulates in New York and Chicago.

U.S. Immigration Requirements: Prospective adopting parents are strongly encouraged to consult USCIS publication M-249, *The Immigration of Adopted and Prospective Adoptive Children*, as well as the Department of State publication, *Intercountry Adoptions.*

Please see the *Intercountry Adoption* section of this book for more details and review current reports online at http://adoption.state.gov.

Additional Information: Specific questions about intercountry adoption in Bosnia & Herzegovina may be addressed to the U.S. Embassy in Sarajevo. General questions regarding intercountry adoption may be addressed to the Office of Children's Issues, U.S. Department of State, CA/OCS/CI, SA-29, 4th Floor, 2201 C Street, NW, Washington, D.C. 20520-4818, toll-free Tel: 1-888-407-4747.

For information on intercountry adoption of children and international parental child abduction, call Overseas Citizens Services at 1-888-407-4747.

BOTSWANA

Compiled from the November 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Republic of Botswana

PROFILE

Geography

Area: 582,000 sq. km. (224,710 sq. mi.), about the size of Texas.

Cities: (2001 census) Capital—Gaborone (pronounced ha-bo-ro-neh), pop. 186,007. Other towns—Francistown (83,023), Selebi-Phikwe (49,849), Molepolole (54,561), Kanye (40,628), Serowe (42,444), Mahalapye (39,719), Lobatse (29,689), Maun (43,776), Mochudi (36,962).

Terrain: Desert and savanna.

Climate: Mostly subtropical.

People

Nationality: Noun and adjective—Motswana (sing.), Batswana (pl.).

Population: (est) 1.84 million.

Annual population growth rate: (2008) 1.434%.

Ethnic groups: Tswana 79%; Kalanga 11%; Kgalagadi, Herero, Bayeyi, Hambukush, Basarwa ("San"), Khoi, whites 10%.

Religions: Christianity 70%, none 20%, indigenous beliefs 6%, other 4%.

Languages: English (official), Setswana, Ikalanga.

Education: Adult literacy—81%.

Health: (2008) Life expectancy—50.6 years. Infant mortality rate—44.01/1,000.

Work force: (2005/2006 est.) 548,600 employed; total including unemployed, 651,500.

Government

Type: Republic, parliamentary democracy.

Independence: September 30, 1966.

Constitution: March 1965.

Government branches: Executive—president (chief of state and head of government), cabinet. Legislative—popularly elected National Assembly; advisory House of Chiefs. Judicial—High Court, Court of Appeal, local and customary courts, industrial labor court.

Political subdivisions: Five town councils and nine district councils.

Political parties: Botswana Democratic Party (BDP)—48 seats, Botswana National Front (BNF)—12 seats, Botswana Congress Party (BCP)—1 seat, Botswana Alliance Movement (BAM)—0 seats.

Suffrage: Universal at 18.

Economy

Nominal GDP: (2007) $11.9 billion.

Real GDP growth rate: (2007 est) 4.8%.

Per capita nominal GDP: (2007) $6,742.

Natural resources: Diamonds, copper, nickel, coal, soda ash, salt, gold, potash.

Agriculture: (1.7% of real GDP, 2006/2007) Products—livestock, sorghum, white maize, millet, cowpeas, beans.

Industry: Types—mining (42% of real GDP, 2006/2007) diamonds, copper, nickel, coal; tourism, textiles, construction, tourism, beef processing, chemical products production, food and beverage production.

Trade: (2007): Exports—$7.2 billion: diamonds, nickel, copper, meat products, textiles, hides, skins, and soda ash. Partners—EU, South Africa. Imports—$4.2 billion: machinery, transport equipment, manufactured goods, food, chemicals, fuels. Major suppliers—South Africa, EU, and U.S.

PEOPLE AND HISTORY

The Batswana, a term also used to denote all citizens of Botswana, refers to the country's major ethnic group (the "Tswana" in South Africa), which came into the area from South Africa during the Zulu wars of the early 1800s. Prior to European contact, the Batswana lived as herders and farmers under tribal rule.

In the 19th century, hostilities broke out between the Batswana and Boer settlers from the Transvaal. After appeals by the Batswana for assis-

tance, the British Government in 1885 put "Bechuanaland" under its protection. The northern territory remained under direct administration and is today's Botswana, while the southern territory became part of the Cape Colony and is now part of the northwest province of South Africa; the majority of Setswana-speaking people today live in South Africa.

Despite South African pressure, inhabitants of the Bechuanaland Protectorate, Basutoland (now Lesotho), and Swaziland in 1909 asked for and received British assurances that they would not be included in the proposed Union of South Africa. An expansion of British central authority and the evolution of tribal government resulted in the 1920 establishment of two advisory councils representing Africans and Europeans. Proclamations in 1934 regularized tribal rule and powers. A European-African advisory council was formed in 1951, and the 1961 constitution established a consultative legislative council.

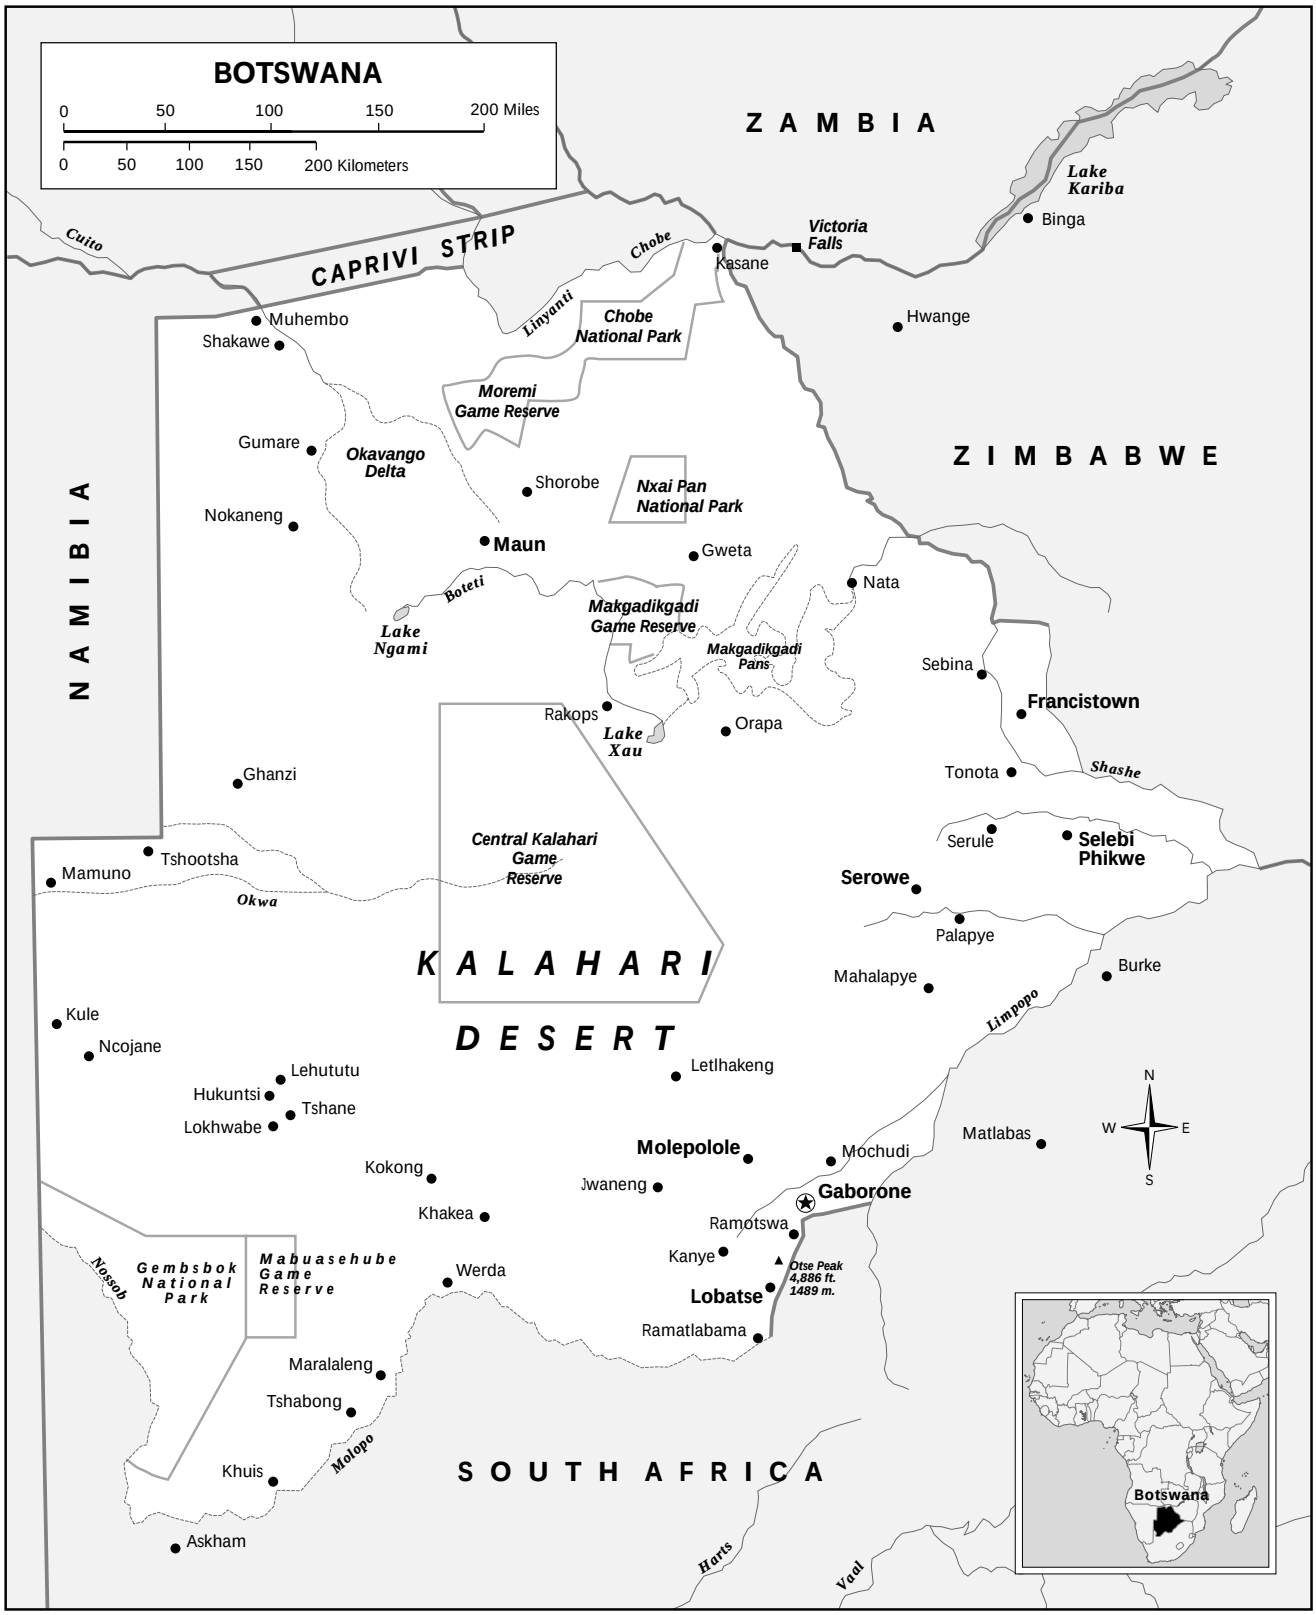
In June 1964, Britain accepted proposals for democratic self-government in Botswana. The seat of government was moved from Mafikeng, in South Africa, to newly-established Gaborone in 1965. The 1965 constitution led to the first general elections and to independence in September 1966. Seretse Khama, a leader in the independence movement and the legitimate claimant to traditional rule of the Bamangwato, was elected as the first president, re-elected twice, and died in office in 1980. The presidency passed to the sitting vice president, Ketumile Masire, who was elected in his own right in 1984 and re-elected in 1989 and 1994. Masire retired from office in 1998. The presidency passed to the sitting vice president, Festus Mogae, who was elected in his own right in 1999. Mogae won a second term in elections held October 30, 2004 and stepped down in accordance with national term limits on March 31, 2008. On April 1, 2008 former Vice President Ian Khama assumed the presidency. The next general election is expected in October 2009.

GOVERNMENT AND POLITICAL CONDITIONS

Botswana has a flourishing multiparty constitutional democracy. Each of the elections since independence has been freely and fairly contested and has been held on schedule. The country's minority groups participate freely in the political process. There are three main parties and a number of smaller parties. In national elections in 2004, the Botswana Democratic Party (BDP) won 44 of 57 contested National Assembly seats, the Botswana National Front (BNF) won 12, and the Botswana Congress Party (BCP) won 1 seat. Individuals elected by the National Assembly hold an additional 4 seats; the ruling BDP currently holds all 4. The opposition out-polled the ruling BDP in most urban areas. The openness of the country's political system has been a significant factor in Botswana's stability and economic growth. General elections are held every 5 years. The next general election will be held in October 2009.

The president has executive power and is chosen by the National Assembly following countrywide legislative elections. The cabinet is selected by the president from the National Assembly; it consists of a vice president and a flexible number of ministers and assistant ministers, currently 16 and 8, respectively. The National Assembly has 57 elected and 4 specially elected members; it is expanded following each census (every 10 years; the most recent was conducted in 2001).

The advisory House of Chiefs represents the eight principal subgroups of the Batswana tribes, five members specially elected by the president, and 22 members elected from designated regions. The elected members hold office for a period of only 5 years whereas the eight principal chiefs are members for life. A draft of any National Assembly bill of tribal concern must be referred to the House of Chiefs for advisory opinion. Chiefs and other leaders preside over customary traditional courts, though all persons have the right to request that their case be considered under the formal British-based legal system.



The roots of Botswana's democracy lie in Setswana traditions, exemplified by the Kgotla, or village council, in which the powers of traditional leaders are limited by custom and law. Botswana's High Court has general civil and criminal jurisdiction. Judges are appointed by the president and may be removed only for cause and after a hearing. The constitution has a code of fundamental human rights enforced by the courts, and Botswana has a good human rights record.

Local government is administered by nine district councils and five town councils. District commissioners have executive authority and are appointed by the central government and assisted by elected and nominated district councilors and district development committees. There has been ongoing debate about the political, social, and economic marginalization of the San (indigenous tribal population). The government's policies for the Basarwa (San) and other remote area dwellers continue to spark controversy.

Botswana maintains an embassy at 1531-1533 New Hampshire Avenue NW, Washington DC 20036 (tel. 202-244-4990; fax 202-244-4164). Its mission to the United Nations is at 103 E. 37th Street, New York NY 10017 (tel. 212-889-2277; fax 212-725-5061).

ECONOMY

Botswana has enjoyed one of the fastest growth rates in per capita income in the world since independence. Economic growth averaged 9% per year from 1967-2006. The government has maintained a sound fiscal policy, despite three consecutive budget deficits in 2002-2004, and a negligible level of foreign debt. Foreign exchange reserves were $10.2 billion at the end of November 2007, equivalent to 28 months' cover of 2007 imports of goods and services. Botswana's impressive economic record has been built on the foundation of wisely using revenue generated from diamond mining to fuel economic development through prudent fiscal policies and a cautious foreign policy. However, economic development spending was cut by 10% in 2004/2005 as a result of recurring budget deficits and rising expenditure on healthcare services. Development spending began to increase again in 2006/2007 and was budgeted to increase by 27% in the 2007/2008 fiscal year. Real GDP remained flat in 2005/2006, but the growth rate recovered to 6.2% in 2006/2007. The government recognizes that HIV/AIDS will continue to affect the economy and is providing leadership and programs to combat the epidemic, including free anti-retroviral treatment and a nationwide Prevention of Mother-to-Child Transmission program.

Mining

Debswana (formed by the government and South Africa's DeBeers in equal partnership) is the largest mining operation in Botswana. Several other mining operations exist in the country, including the Bamangwato Concessions, Ltd. (BCL, also with substantial government equity participation) and Tati Nickel.

Since the early 1980s, the country has been the world's largest producer of gem-quality diamonds. Four large diamond mines have opened since independence. DeBeers prospectors discovered diamonds in northern Botswana in the late 1960s. The first mine began production at Orapa in 1972, followed by the smaller mines of Lethlakane and Damtshaa. What has become the single-richest diamond mine in the world opened in Jwaneng in 1982. The Orapa 2000 Expansion of the existing Orapa mine was opened in 2000. In December 2004, Debswana negotiated 25-year lease renewals for all four of its mines with the Government of Botswana. For the 12-month period ending June 30, 2007, diamonds accounted for 67% of total exports (down from a high of 84% in 2003/2004) and 28% of GDP. Diamond mining, however, is capital intensive and only accounts for approximately 5% of employment. In 2007, Debswana produced 33.8 million carats, down slightly from 34.3 million carats in 2006, but 2007 revenue was 18 billion pula (approximately U.S. $3 billion), a 3.5% increase from 2006. Exploration for other kimberlite pipes continues. In addition, as part of Botswana's drive to diversify and increase local value added within the mining sector, De Beers opened the Diamond Trading Center in 2008 to shift sorting, cutting, polishing, aggregating, and marketing to Gaborone from London.

BCL, which operates a copper-nickel mine at Selebi-Phikwe, has had a troubled financial history but remains an important employer, although the life of the mine is expected to end in the next 5 to 10 years. Other copper-nickel mines include Tati Nickel near Francistown. Botash, the sole producer of soda ash in the region and supported by substantial government investment, produced 265,000 tons of soda ash in 2005.

Coal-bed methane gas has been discovered in the northeastern part of the country, estimated by the developers at a commercially viable quantity of 12 trillion cubic feet. Development of the gas fields has been slow, however.

Tourism

Tourism is an increasingly important industry in Botswana, accounting for approximately 10% of GDP in 2006. One of the world's unique ecosystems, the Okavango Delta, is located in Botswana. The country offers excellent game viewing and birding both in the Delta and in the Chobe Game Reserve—home to one of the largest herds of free-ranging elephants in the world. Botswana's Central Kalahari Game Reserve also offers good game viewing and some of the most remote and unspoiled wilderness in southern Africa.

Agriculture

More than one-half of the population lives in rural areas and is largely dependent on subsistence crop and livestock farming. Agriculture meets only a small portion of food needs and contributes a very small amount to GDP—primarily through beef exports—but it remains a social and cultural touchstone. Cattle raising in particular dominated Botswana's social and economic life before independence. The national herd is estimated between 2 and 3 million head, but the cattle industry is experiencing a protracted decline.

Private Sector Development and Foreign Investment

Botswana seeks to further diversify its economy away from minerals, which account for over 40% of GDP. Foreign investment and management are welcomed in Botswana. Botswana abolished foreign exchange controls in 1999, has a low corporate tax rate (15%), and no prohibitions on foreign ownership of companies. The country's inflation rate had remained stable and comparatively low over the 10 years preceding 2005. However, rising fuel and utility prices along with the government's 12.5% devaluation of the Pula in May 2005 resulted in a spike in inflation to 11.4% as of December 2005, which fell well outside the Bank of Botswana's target rate of between 4%-7%. Inflation as of November 2007 was 7.7%. The Government of Botswana was considering additional policies to enhance competitiveness, including a new Foreign Direct Investment Strategy and National Export Development Strategy. Botswana's parliament adopted both a Privatization Master Plan and a new Competition Policy that were aimed at fostering economic diversification.

With its proven record of good economic governance, Botswana was ranked as Africa's least corrupt country by Transparency International in 2008 (36th worldwide, ahead of many European and Asian countries). Botswana is consistently ranked by international organizations as among the freest economies in sub-Saharan Africa. In the 2008 Economic Freedom of the World report, Botswana was ranked 60th overall and third-highest in Africa, while the Heritage Foundation's 2008 Index of Economic Freedom ranked Botswana second in sub-Saharan Africa. In November 2005, Standard & Poor's once again assigned Botswana an "A" grade credit rating. This ranks Botswana as by far the best credit risk in Africa and puts it on par or above many countries in central Europe, East Asia, and Latin America.

U.S. investment in Botswana remains at relatively low levels. Major U.S. corporations, such as H.J. Heinz and AON Corporation, are present through direct investments, while others, such as Kentucky Fried Chicken and Remax, are present via franchise. The sovereign credit ratings by Moody's and Standard & Poor's clearly indicate that, despite continued challenges such as small market size, landlocked location, and cumbersome bureaucratic processes, Botswana remains one of the best investment opportunities in the developing world. Botswana has a 90-member American Business Council that accepts membership from American-affiliated companies.

Because of history and geography, Botswana has long had deep ties to the economy of South Africa. The Southern Africa Customs Union (SACU), comprised of Botswana, Namibia, Lesotho, Swaziland, and South Africa, dates from 1910, and is the world's oldest customs union. Under this arrangement, South Africa has collected levies from customs, sales, and excise duties for all five members, sharing out proceeds based on each country's portion of imports. The exact formula for sharing revenues and the decision-making authority over duties—held exclusively by the Government of South Africa—became increasingly controversial, and the members renegotiated the arrangement in 2001. A new structure was formally ratified and a SACU Secretariat was established in Windhoek, Namibia. Following South Africa's accession to the World Trade Organization (WTO, of which Botswana also is a member), many of the SACU duties are declining, making American products more competitive in Botswana. Botswana signed an Economic Partnership Agreement with the European Union in December 2007, and, as a member of SACU, it signed a preferential trade agreement in 2004 with Mercosur. In July 2008, SACU signed its first Trade, Investment and Development Cooperation Agreement (TIDCA) with the United States. SACU also has plans to negotiate free trade agreements with China, India, Kenya, and Nigeria.

Botswana's currency—the Pula—is fully convertible and is valued against a basket of currencies heavily weighted toward the South African Rand. Profits and direct investment can be repatriated without restriction from Botswana. The Botswana Government eliminated all exchange controls in 1999. The Central Bank devalued the Pula by 12.5% in May 2005 in a bid to maintain export competitiveness against the real appreciation of the Pula and restructured the exchange rate mechanism to a crawling peg system to ensure against future large-scale devaluations.

Botswana is a member of the 14-nation Southern African Development Community (SADC), and Gaborone hosts the SADC Secretariat's headquarters. SADC has a broad mandate to encourage growth, development, and economic integration in Southern Africa. SADC's Trade Protocol, which was launched on September 1, 2000, called for the elimination of all tariff and non-tariff barriers to trade by 2008 among the 11 signatory countries. The SADC free trade agreement based on the agreed tariff phasedown was launched at the August 2008 summit in South Africa. Zimbabwe's membership has limited SADC's opportunities for cooperation with the United States.

Transportation and Communications

A sparsely populated, semi-arid country about the size of Texas, Botswana has nonetheless managed to incorporate much of its interior into the national economy. An "inner circle" highway connecting all major towns and district capitals is completely paved, and the all-weather Trans-Kalahari Highway connects the country (and, through it, South Africa's commercially dominant Gauteng Province) to Walvis Bay in Namibia. A fiber-optic telecommunications network has been completed in Botswana connecting all major population centers.

In addition to the government-owned newspaper and national radio network, there is an active, independent press (one daily and seven weekly

newspapers). Two privately owned radio stations began operations in 1999, and a third began operations in 2008. In 2000, the government-owned Botswana Television (BTV) was launched, which was Botswana's first national television station. GBC is a commercially owned television station that broadcast programs to the Gaborone area only. Foreign publications are sold without restriction in Botswana, and there are 22 commercial Internet service providers. Three cellular phone providers cover most of the country.

DEFENSE

The president is commander in chief of the Botswana Defense Force (BDF). A defense council is appointed by the president. The BDF was formed in 1977 and has approximately 13,000 members.

The BDF is a capable and well-disciplined military force. Following positive political changes in South Africa and the region, the BDF's missions have increasingly focused on border control and anti-poaching activities. The BDF is considered an apolitical and professional institution.

FOREIGN RELATIONS

Botswana puts a premium on economic and political integration in Southern Africa. It seeks to make SADC a working vehicle for economic development, and promotes efforts to make the region self-policing in terms of preventative diplomacy, conflict resolution, and good governance. Botswana joins the African consensus on most major international matters and is a member of international organizations such as the United Nations and the African Union (AU). In 2008, Botswana has taken a leadership role within SADC advocating for a resolution of the crisis in Zimbabwe that fully reflects the will of the Zimbabwean people.

U.S.-BOTSWANA RELATIONS

The United States considers Botswana an advocate of and a model for stability in Africa and has been a major partner in Botswana's development since its independence. The U.S. Peace Corps returned to Botswana in August 2002 with a focus on HIV/AIDS-related programs after concluding 30 years of more broadly targeted assistance in 1997. Similarly, the U.S. Agency for International Development (USAID) phased out a longstanding bilateral partnership with Botswana in 1996, after successful programs emphasizing education, training, entrepreneurship, environmental management, and reproductive health. Botswana, however, continues to benefit along with its neighbors in the region from USAID's Initiative for Southern Africa, now based in Pretoria, and USAID's Southern Africa Global Competitiveness Hub, headquartered in Gaborone. The United States International Board of Broadcasters (IBB) operates a major Voice of America (VOA) relay station in Botswana serving most of the African continent.

In 1995, the Centers for Disease Control (CDC) started the BOTUSA Project in collaboration with the Botswana Ministry of Health in order to generate information to improve tuberculosis (TB) control efforts in Botswana and elsewhere in the face of the TB and HIV/AIDS co-epidemics. Under the 1999 U.S. Government's Leadership and Investment in Fighting an Epidemic (LIFE) Initiative, CDC through the BOTUSA Project has undertaken many projects and has assisted many organizations in the fight against the HIV/AIDS epidemic in Botswana. Botswana is one of the 15 focus countries for PEPFAR, the President's Emergency Plan for Aids Relief, and received more than $230 million since the program began in January 2004 through September 2007. PEPFAR assistance to Botswana, which totaled $76.2 million in FY 2007, is contributing to HIV/AIDS prevention, treatment, and care interventions. The International Law Enforcement Academy (ILEA), situated just outside of Gaborone, is another example of bilateral cooperation. The academy, jointly financed, managed, and staffed by the Governments of Botswana and the United States, provides training to police and government officials from across the Sub-Saharan region. The academy's permanent campus, in Otse outside of Gaborone, opened March 2003. Over 3,000 law enforcement professionals from Sub-Saharan Africa have received training from ILEA since it began offering classes in 2001.

TRAVEL

Consular Information Sheet

August 29, 2008

Country Description: Botswana is a country in southern Africa with a

stable democratic government and a growing economy. Facilities for tourism are widely available.

Entry Requirements: A passport with at least six months of validity remaining is required. U.S. citizens are permitted stays up to 90 days without a visa. For additional information on entry requirements, travelers may contact the Embassy of the Republic of Botswana, 1531-1533 New Hampshire Ave, NW, Washington, DC 20036, telephone (202) 244-4990/1, fax (202) 244-4164 or the Permanent Mission of the Republic of Botswana to the United Nations, 103 E. 37th St., New York, NY 10016, telephone (212) 889-2277, fax (212) 725-5061. There are also honorary consuls in Los Angeles, San Francisco and Houston.Visit the Embassy of Botswana's web site at http://www.botswanaembassy.org for the most current visa information. As a general precaution, all travelers are advised to carry a photocopy of the photo/bio information page of their passport and keep it in a location separate from the passport.

Visitors to Botswana who also intend to visit South Africa should be advised that the passports of all travelers to South Africa must contain at least two blank (unstamped) visa pages each time entry to South Africa is sought; these pages are in addition to the endorsement/amendment pages at the back of the passport. Otherwise, the traveler, even when in possession of a valid South African visa, may be refused entry into South Africa, fined, and returned to their point of origin at the traveler's expense.

Safety and Security: Civil unrest and disorder are rare. U.S. citizens should avoid crowds, political rallies, and street demonstrations and maintain security awareness at all times. For the latest security information, Americans traveling abroad should regularly monitor the Department's Internet web site at http://travel.state.gov, where the current Worldwide Caution Travel Alert, Travel Warnings and Travel Alerts can be found. Information can also be obtained from the American Citizen Services section of the U.S. Embassy's web site at http://botswana.usembassy.gov. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S. and Canada, or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: Crime is a serious concern in Botswana. Visitors must be vigilant and take common-sense security precautions. The criminal threat is very similar to that of any large urban area. Petty street crime and crimes of opportunity, primarily the theft of money and personal property, are not uncommon. Home invasions 'smash and grabs' from vehicles, and cell phone thefts, often at knife point, are routinely reported to the police. Visitors should use care when talking on a cell phone while walking. Urban areas are particularly dangerous at night; pedestrians are advised to avoid walking in Gaborone and other urban areas in Botswana at night. Except for visits to the Gaborone Yacht Club during daylight hours, U.S. Embassy personnel are prohibited from traveling to the area surrounding the Gaborone Dam and to the Kgale Hill area, a popular Gaborone hiking venue, because of multiple incidents of violent crime. American citizens are urged to avoid these areas.

Travelers arriving in Botswana via South Africa should be aware that there is a serious baggage pilferage problem at OR Tambo (Johannesburg) and Cape Town International Airports. Travelers are encouraged to use an airport plastic wrapping service and to avoid placing electronics, jewelry, cameras, designer athletic gear, or other valuables in checked luggage. Also, make an inventory of items in checked baggage to aid in claims processing if theft does occur.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

Botswana has three numbers equivalent to the "911" emergency line. For police assistance, dial "999." For an ambulance, dial "997." In the event of a fire, dial "998."

Medical Facilities and Health Information: Medical facilities in Gaborone are adequate, but available facilities in other areas are limited. Well-equipped emergency rooms and trained physicians are available in the capital but services are rudimentary elsewhere. Professional private emergency rescue services operate air and ground ambulances throughout the country, but care is rendered only after a patient's ability to pay is established. Response times are often slow in less populated areas. Outside of Gaborone, most airports are either not equipped or have frequently malfunctioning night lighting capability, so airborne medical evacuations can usually only be conducted during daylight hours. Malaria is prevalent only in the north of the country, particularly around the Chobe and Okavango National Parks. Malaria prophylaxis is not required in Gaborone but is suggested for travel to the north. For advanced care Americans often choose to travel to South Africa. Most prescription drugs are available in Gaborone.

Approximately one-quarter of the population of Botswana is infected with HIV, the virus that causes AIDS. Travelers are advised to exercise appropriate precautions if engaging in sexual activity, or if exposed to blood products through injuries or rendering assistance to accident victims. Tuberculosis is also endemic to Botswana. Two cases of extensively drug resistant tuberculosis (XDR-TB) have been identified in Botswana since January 2008 when Botswana

first obtained the ability to test for this form of TB. Individuals who plan to reside or stay in Botswana for extended periods are advised to obtain a tuberculosis skin test (PPD test) prior to arrival and again upon departure from Botswana.

There are occasional diarrhea outbreaks in areas affected by heavy rains. Travelers are encouraged to take necessary precautions when handling food and drinking water.

The Department of Immigration of Botswana does not impose any HIV/AIDS entry restrictions for visitors to or foreign residents of Botswana.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's Internet site at http://wwwn.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Botswana is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

Driving in Botswana is challenging and motorists must drive defensively. Traffic circulates on the left in Botswana, as elsewhere in the region. While the roads in major population centers in Botswana are generally good, travel by automobile outside of large towns may be dangerous. The combination of long, tedious stretches of two-lane highways without shoulders, high speed limits, and poor lighting make driving at night on rural highways particularly hazardous. Free-range domestic animals and large numbers of pedestrians and hitchhikers in the roadways make fatal accidents a frequent occurrence.

'Smash and grab' robberies from vehicles are not uncommon in Botswana, particularly in urban areas at traffic lights. Motorists should avoid carrying anything of value (hand bags, briefcases, purses, cell phones, etc.) in the passenger compartment that could attract potential assailants. Visit the web site of Botswana's national tourist office and national authority responsible for road safety at www.botswana-tourism.gov.bw.

Aviation Safety Oversight: As there is no direct commercial air service between the United States and Botswana, the U.S. Federal Aviation Administration (FAA) has not assessed Botswana's Civil Aviation Authority for compliance with International Civil Aviation Organization (ICAO) aviation safety standards. For more information, travelers may visit the FAA's Internet web site at http://www.faa.gov.

Special Circumstances: Since February 2008, rolling electric power outages have left many areas without power for several hours each week. This situation is likely to continue. Visitors are urged to carry flashlights. American citizens are also urged to be aware of how power outages might affect home security systems, garage doors and gates, and kitchen equipment, such as stoves and refrigerators. The power fluctuations could cause power surges that might harm computers, televisions, or other electrical appliances.

Botswana strictly enforces its laws controlling the trade in animal products. The hunting of lions is explicitly prohibited and leopards and elephants are covered under a strict quota regime. Botswana's Wildlife Conservation and National Parks Act makes it illegal to possess or remove from Botswana without a government permit any living or dead animal or animal trophy. A trophy is any horn, ivory, tooth, tusk, bone, claw, hoof, hide, skin, hair, feather, egg, or other durable portion of an animal, whether the item has been processed or not. Curio shops and vendors throughout the country sell items such as animal skins, plain and decorated ostrich eggs and eggshells, and carved bones or teeth of animals protected by this law. All of the souvenirs, although widely sold, are subject to this act. Travelers departing the country with a trophy must have a receipt from a store licensed to sell such items. Ivory and endangered rhinoceros horn products obtained in Botswana may not be removed from the country under any circumstances; elephant hair jewelry may be removed only with the appropriate license from the Department of Wildlife and National Parks. Trophies may not be taken from the wild without a permit. Violators are subject to arrest and may face a penalty of up to five years imprisonment and a substantial fine.

Wild animals may pose a danger to tourists. Tourists should bear in mind that, even in the most serene settings, the animals are wild and can pose a threat to life and safety. Tourists should use common sense when approaching wildlife, observe all local or park regulations, and heed all instructions given by tour guides. In addition, tourists are advised that potentially dangerous areas sometimes lack fences and warning signs. Exercise appropriate caution in all unfamiliar surroundings.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating Botswana's laws, even unknowingly, may be expelled, arrested or impris-

oned. Penalties for possession, use, or trafficking in illegal drugs in Botswana are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in Botswana are encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration web site so that they can obtain updated information on travel and security within Botswana. Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency. The U.S. Embassy is located in Gaborone on Embassy Drive in the Government Enclave. The mailing address is P.O. Box 90, Gaborone, telephone +267 395-3982; fax +267 318-0232; email consulargaboro@state.gov, and the after-hours emergency telephone is +267 395-7111.

Intercountry Adoption

June 2006

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is based on public sources and current understanding. Questions involving foreign and U.S. immigration laws and legal interpretation should be addressed respectively to qualified foreign or U.S. legal counsel.

Please Note: Local law and practice requires a lengthy period of residence in Botswana for both adoptive children and parents during the process. Parents must remain resident with the child in Botswana during a period of foster care and the adoptive child must remain resident in Botswana for one year following issuance of an adoption decree.

Patterns of Immigration: Recent U.S. immigrant visa statistics indicate that only one immigrant visa to an orphan from Botswana has been issued in the last five fiscal years.

Adoption Authority:
Ministry of Labour and Home Affairs
Private Bag 002
Gaborone, Botswana
Tel: +267 3611100
Fax: +267 3613584

Local magistrate's courts are delegated responsibility for overseeing the adoption process. Social workers submit their reports to the court for evaluation and the magistrate is designated the responsibility of executing the adoption order at the end of the process.

Eligibility Requirements for Adoptive Parents: Prospective adoptive parents must be 25 years old to adopt and if the child is over sixteen (16), the adopting parent(s) must be at least 25 years older than the child. The law permits single individuals to adopt children as well as married couples.

Note: U.S. immigration law requires an orphan be under the age of sixteen to qualify for an immigration visa.

Residency Requirements: While it is not a pre-requisite to be a resident of Botswana, the law requires prospective adoptive parents to reside with the child in Botswana for a period of foster care lasting several months at minimum, but often over a year. The exact period of foster care that must take place in Botswana is at the discretion of local magistrate's courts and is determined on a case-by-case basis. Following a final adoption order, the child must remain resident in Botswana for a period not less than one year. As a result, the parents must also be resident.

Adoptive parents need not be citizens of Botswana; however, they must have lawful resident status in the country during the process.

Time Frame: Adoptions in Botswana are not final until the adoptee has lived with the prospective parents in Botswana. It is common for magistrate's courts to require at least a one-year period of foster care, and thus residency in Botswana.

Prospective adoptive parents must be present in Botswana to petition the court for an adoption order. Accounting for other residency requirements, it would be unlikely for an adoption to be finalized and a United States visa issued to the adopted child in less than two (2) years from the time a child is identified.

Adoption Agencies and Attorneys: The law does not require the services of an adoption agency to locate a child or take part in the adoption process. Though not required, an attorney may be hired for representation before a local magistrates' court. A list of attorneys in Botswana may be found on the US Embassy, Gaborone web page at http://gaborone.usembassy.gov.

No attorneys on this list specialize in adoption. Prospective adoptive parents are advised to fully research any adoption agency or facilitator they plan to use for adoption services.

Adoption Fees: The fees involved in the adoption process vary too greatly to be quantified with accuracy. Most costs would be incurred as a result of court and administrative fees by national and local government and would be determined by the length of time the court requires "foster care" by prospective parents. Local courts have the discretion to evaluate each case uniquely.

Adoption Procedures:

- Adoptive family identifies a child to be adopted. This is most commonly accomplished by surveying orphanages. Botswana does not have a formal agency that is responsible for placing orphans or matching children with prospective parents. An adoptive child's family or guardian must give written consent for the child to be adopted.

- Adopting family applies to the local magistrates' court for the legal adoption proceedings to begin. Private individuals and foreign residents or citizens are all permitted to petition the court. Anyone applying to the court can also do so through legal representation.

- Magistrate's court decrees a period of "foster care" during which time the adoptee lives with the prospective adoptive family in Botswana. While the law does not prescribe a minimum or maximum, this period commonly lasts from a few months to two years and is at the discretion of the magistrate's court. During the "foster period," social workers from the local city council will make home visits to chart the progress of the relationship and standard of care provided to the child.

- At the completion of the foster care period, the social workers must submit their reports to the magistrate's court. The court then makes a final ruling on whether or not the child may be adopted by the prospective family. If the decision is favorable to the prospective parents, the court issues a final adoption decree.

- After the magistrate approves the adoption, the child must live in Botswana in the custody of the adopting family for one year. The child may leave on vacation during that time with the consent of the court and/or the Minister of Local Government. The child may also be issued a passport in his or her birth name unless the adoptive parents have petitioned the court for a change of surname and received a favorable ruling.

- At the end of the one-year residency period in Botswana, the child and adopting family may relocate permanently outside of Botswana.

Required Documents: There is no list of required documents established by the Government of Botswana. However, magistrate's courts may request certain documents at will. Those seeking to adopt in Botswana should be prepared with standard U.S. civil documents such as birth certificates, marriage certificates, and related court documents, and police records for places of residence. All U.S. documents would need to be certified by local officials in the U.S. or by a U.S. consular officer abroad. Botswana is not a party or signatory to the Hague Legalization Convention on adoptions.

Embassy of the Republic of Botswana

1531 New Hampshire Avenue, NW

Washington, DC 20008

U.S. Immigration Requirements: Prospective adopting parents are strongly encouraged to consult USCIS publication M-249, *The Immigration of Adopted and Prospective Adoptive Children,* as well as the Department of State publication, *Intercountry Adoptions*. Please see the *Intercountry Adoption* section of this book for more details and review current reports online at http://adoption.state.gov.

U.S. Embassy: Embassy Enclave, (off Khama Crescent); Email: consulargaboro@state.gov; Tel: +267 395-3982 x5324/532.

Additional Information: Specific questions about adoption in Botswana may be addressed to the Consular Section at the U.S. Embassy in Gabarone. Immigrant visa questions may be addressed to the U.S. Consulate General in Johannesburg, South Africa. General questions regarding intercountry adoption may be addressed to the Office of Children's Issues, U.S. Department of State, CA/OCS/CI, SA-29, 4th Floor, 2201 C Street, NW, Washington, D.C. 20520-4818, toll-free Tel: 1-888-407-4747.

BRAZIL

Compiled from the June 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Federative Republic of Brazil

PROFILE

Geography

Area: 8,511,965 sq. km. (3,290,000 sq. mi.); slightly smaller than the U.S.
Cities: Capital—Brasilia (pop. 2.5 million). Other cities—Sao Paulo (10.9 million), Rio de Janeiro (6.1 million), Belo Horizonte (2.4 million), Salvador (2.9 million), Fortaleza (2.4 million), Recife (1.5 million), Porto Alegre (1.4 million), Curitiba (1.8 million).
Terrain: Dense forests in northern regions including Amazon Basin; semiarid along northeast coast; mountains, hills, and rolling plains in the southwest, including Mato Grosso; and coastal lowland.
Climate: Mostly tropical or semitropical with temperate zone in the south.

People

Nationality: Brazilian.
Population: (2007 est.) 192 million.
Annual growth rate: 1.33%.
Ethnic groups: Portuguese, Italian, German, Spanish, Japanese, Arab, African, and indigenous people.
Religions: Roman Catholic (74%).
Languages: Portuguese.
Education: Literacy—86% of adult population.
Health: Infant mortality rate—26.7/1,000. Life expectancy—72.5 yrs.
Work force: 99.5 million.

Government

Type: Federative republic.
Independence: September 7, 1822.
Constitution: Promulgated October 5, 1988.
Government branches: Executive—president (chief of state and head of government popularly elected to no more than two 4-year terms). Legislative—Senate (81 members popularly elected to 8-year terms), Chamber of Deputies (513 members popularly elected to 4-year terms). Judicial—Supreme Federal Tribunal (11 lifetime positions appointed by the president).
Political parties: Workers' Party (PT), Brazilian Democratic Movement Party (PMDB), Brazilian Social Democratic Party (PSDB), Liberal Front Party (PFL), Social Democratic Party (PSD), Democratic Workers Party (PDT), Brazilian Labor Party (PTB), Liberal Party (PL), Brazilian Socialist Party (PSB), Communist Party of Brazil (PC do B), Brazilian Progressive Party (PP). Popular Socialist Party (PPS), Green Party (PV), the Social Liberal Party (PSL), the National Mobilization Party (PMN), National Workers Party (PTN), Humanistic Solidarity Party (PHS), and the Party of the Reedification of the National Order (PRONA).

Economy (2007)

GDP: $1.269 trillion (official exchange rate).
GDP: $1.838 trillion (purchasing power parity).
Annual real growth: 4.5%.
Per capita GDP: $9,700 (purchasing power parity).
Natural resources: Iron ore, manganese, bauxite, nickel, uranium, gemstones, oil, wood, and aluminum. Brazil has 14% of the world's renewable fresh water.
Agriculture: (5.1% of GDP) Products—coffee, soybeans, sugarcane, cocoa, rice, livestock, corn, oranges, cotton, wheat, and tobacco.
Industry: (30.8% of GDP) Types—steel, commercial aircraft, chemicals, petrochemicals, footwear, machinery, motors, vehicles, auto parts, consumer durables, cement, and lumber.
Services: (64% of GDP) Types—mail, telecommunications, banking, energy, commerce, and computing.
Trade: Trade balance 2007—$43.6 billion surplus. Exports—$159.2 billion. Major markets—United States 15.8%, Argentina 9.0%, and China 6.7%. Imports—$115.6 billion. Major suppliers— United States 15.7%, China 10.5%, and Argentina 8.6%.

PEOPLE AND HISTORY

With its estimated 192 million inhabitants, Brazil has the largest population in Latin America and ranks fifth in the world. The majority of people live in the south-central area, which includes the industrial cities of Sao Paulo, Rio de Janeiro, and Belo Horizonte. Urban growth has been rapid; by 2005, 81% of the total population was living in urban areas. This growth has aided economic development but also has created serious social, security, environmental, and political problems for major cities.

Six major groups make up the Brazilian population: the Portuguese, who colonized Brazil in the 16th century; Africans brought to Brazil as slaves; various other European, Middle Eastern, and Asian immigrant groups who have settled in Brazil since the mid-19th century; and indigenous peoples of Tupi and Guarani language stock. Intermarriage between the Portuguese and indigenous people or slaves was common. Although the major European ethnic stock of Brazil was originally Portuguese, subsequent waves of immigration have contributed to a diverse ethnic and cultural heritage.

From 1875 until 1960, about 5 million Europeans immigrated to Brazil, settling mainly in the four southern states of Sao Paulo, Parana, Santa Catarina, and Rio Grande do Sul. Immigrants have come mainly from Italy, Germany, Spain, Japan, Poland, and the Middle East. The largest Japanese community outside Japan is in Sao Paulo. Despite class distinctions, national identity is strong, and racial friction is a relatively new phenomenon. Indigenous full-blooded Indians, located mainly in the northern and western border regions and in the upper Amazon Basin, constitute less than 1% of the population. Their numbers are declining as contact with the outside world and commercial expansion into the interior increase. Brazilian Government programs to establish reservations and to provide other forms of assistance have existed for years but are controversial and often ineffective. Brazil is the only Portuguese-speaking nation in the Americas. About three quarters of all Brazilians belong to the Roman Catholic Church; most others are Protestant, members of a growing evangelical movement, or follow practices derived from African religions.

Pedro Alvares Cabral claimed Brazil for Portugal in 1500. The colony was ruled from Lisbon until 1808, when Dom Joao VI and the rest of the Portuguese royal family fled from Napoleon's army, and established its seat of government in Rio de Janeiro. Dom Joao VI returned to Portugal in 1821. His son declared Brazil's independence on September 7, 1822, and became emperor with the title of Dom Pedro I. His son, Dom Pedro II, ruled from 1831 to 1889, when a federal republic was established in a coup led by Deodoro da Fonseca, Marshal of the Army. Slavery had been abolished a year earlier by the Regent Princess Isabel while Dom Pedro II was in Europe.

From 1889 to 1930, the government was a constitutional republic, with the presidency alternating between the dominant states of Sao Paulo and Minas Gerais. This period ended with a military coup that placed Getulio Vargas, a civilian, in the presidency; Vargas remained as dictator until 1945. Between 1945 and 1961, Jose Linhares, Gaspar Dutra, Vargas himself, Café Filho, Carlos Luz, Nereu Ramos, Juscelino Kubitschek, and Janio Quadros were elected presidents. When Quadros resigned in 1961, Vice President Joao Goulart succeeded him.

Goulart's years in office were marked by high inflation, economic stagnation, and the increasing influence of radical political elements. The armed forces, alarmed by these developments, staged a coup on March 31, 1964. The coup leaders chose as president Humberto Castello Branco, followed by Arthur da Costa e Silva (1967-69), Emilio Garrastazu Medici (1969-74), and Ernesto Geisel (1974-79), all of whom were senior army officers. Geisel began a democratic opening that was continued by his successor, Gen. Joao Baptista de Oliveira Figueiredo (1979-85). Figueiredo not only permitted the return of politicians exiled or banned from political activity during the 1960s and 1970s, but also allowed them to run for state and federal offices in 1982.

At the same time, an electoral college consisting of all members of congress and six delegates chosen from each state continued to choose the president. In January 1985, the electoral college voted Tancredo Neves from the opposition Brazilian Democratic Movement Party (PMDB) into office as President. However, Neves became ill in March and died a month later. His Vice President, former Senator Jose Sarney, became President upon Neves' death. Brazil completed its transition to a popularly elected government in 1989, when Fernando Collor de Mello won 53% of the vote in the first direct presidential election in 29 years. In 1992, a major corruption scandal led to his impeachment and ultimate resignation. Vice President Itamar Franco took his place and governed for the remainder of Collor's term culminating in the October 3, 1994 presidential elections, when Fernando Henrique Cardoso was elected President with 54% of the vote. Cardoso took office January 1, 1995, and pursued a program of ambitious economic reform. He was re-elected in October 1998 for a second four-year term. Luiz Inacio da Silva, commonly known as Lula, was elected president in 2002, after his fourth campaign for the office. He was re-elected in 2006 for a second four-year term.

President Lula, a former union leader, is Brazil's first working-class president. Since taking office he has taken a prudent fiscal path, warning that social reforms would take years and that Brazil had no alternative but to maintain tight fiscal austerity policies.

GOVERNMENT AND POLITICAL CONDITIONS

Brazil is a federal republic with 26 states and a federal district. The 1988 constitution grants broad powers to the federal government, made up of executive, legislative, and judicial branches. The president holds office for four years, with the right to re-election for an additional four-year term, and appoints his own cabinet. There are 81 senators, three for each state and the Federal District, and 513 deputies. Senate terms are eight years, staggered so that two-thirds of the upper house is up for election at one time and one-third four years later. Chamber terms are four years, with elections based on a complex system of proportional representation by states. Each state is eligible for a minimum of eight seats; the largest state delegation (Sao Paulo's) is capped at 70 seats. This system is weighted in favor of geographically large but sparsely populated states.

Fifteen political parties are represented in Congress. Since it is common for politicians to switch parties, the proportion of congressional seats held by particular parties changes regularly. The major political parties are:

- Workers' Party (PT-center-left)
- Democrats (DEM-center-right)
- Brazilian Democratic Movement Party (PMDB-center)
- Brazilian Social Democratic Party (PSDB-center-left)
- Progressive Party (PP-right)
- Brazilian Labor Party (PTB-center-right)
- Party of the Republic (PR-center-right)
- Brazilian Socialist Party (PSB-left)
- Popular Socialist Party (PPS-left)
- Democratic Labor Party (PDT-left)
- Communist Party of Brazil (PCdoB-left)

President Lula was re-elected October 29, 2006 in a second round victory with over 60% of the vote, over Geraldo Alckmin of the PSDB. Lula's PT party failed to win a majority in either the lower or upper houses in concurrent legislative elections and will be obliged to form a coalition with the centrist PMDB party—which won the most seats in the lower house and may end up with the largest number in the Senate—and a collection of minor parties. However, party loyalty is weak in Brazil, and it is common for politicians to switch parties, changing the balance of power in Congress. The PT won five of twenty-seven governorships, but the opposition PSDB remains in control of the critical states of Sao Paulo and Minas Gerais. The PMDB, as in the legislative elections, won the most governorships of any one party, controlling seven states. Because of the mandatory revenue allocation to states and municipalities provided for in the 1988 constitution, Brazilian governors and mayors have exercised considerable power since 1989.

Lula's electoral victory came despite a series of corruption scandals that resulted in the resignation of senior PT officials and the electoral defeat of several congressmen from parties allied to the PT. At least four congressional investigations are ongoing, though Lula has yet to be personally linked to any of the scandals.

Principal Government Officials

Last Updated: 11/12/08

Pres.: **Luiz Inacio LULA DA SILVA**
Vice Pres.: **Jose ALENCAR**
Chief of the Civilian Household of the Presidency: **Dilma ROUSSEFF**
Min. of Agrarian Development: **Guilherme CASSEL**
Min. of Agriculture: **Reinhold STEPHANES**
Min. of Cities: **Marcio FORTES de Almeida**
Min. of Communications: **Helio COSTA**
Min. of Culture: **Juca FERREIRA**
Min. of Defense: **Nelson Azevedo JOBIM**
Min. of Development, Industry, & Trade: **Miguel JORGE**
Min. of Education: **Fernando HADDAD**
Min. of Environment: **Carlos MINC**
Min. of Finance: **Guido MANTEGA**
Min. of Foreign Relations: **Celso AMORIM**
Min. of Health: **Jose Gomes TEMPORAO**
Min. of Institutional Relations: **Jose MUCIO Monteiro**
Min. of Institutional Security: **Jorge Armando FELIX**
Min. of Justice: **Tarso GENRO**
Min. of Labor & Employment: **Carlos LUPI**
Min. of Mines & Energy: **Edison LOBAO**
Min. of National Integration: **Geddel VIEIRA Lima**
Min. of Planning & Budget: **Paulo BERNARDO**
Min. of Science & Technology: **Sergio Macado REZENDE**
Min. of Social Development & Hunger Alleviation: **Patrus ANANIAS**
Min. of Social Security: **Jose PIMENTEL**
Min. of Sports: **Orlando SILVA**
Min. of Tourism: **Luiz Eduardo Pereira BARRETTO FILHO**
Min. of Transportation: **Alfredo NASCIMENTO**
Pres., Central Bank: **Henrique MEIRELLES**
Ambassador to the US: **Antonio de Aguiar PATRIOTA**
Permanent Representative to the UN, New York: **Maria Luiza Ribeiro VIOTTI**

Brazil maintains an embassy in the United States at 3006 Massachusetts Avenue NW, Washington, DC 20008 (tel. 202-238-2700). Brazil has consulates general in New York, Chicago, and Los Angeles, and consulates in Miami, Houston, Boston, and San Francisco.

ECONOMY

President Lula and his economic team have implemented prudent fiscal and monetary policies and have pursued necessary microeconomic reforms. Brazil's economy, aided by a benign international environment, grew approximately 2.8% in 2006 and 4.5% in 2007. Brazil is now a net creditor nation, and sustained growth, coupled with booming exports, healthy external accounts, moderate inflation, decreasing unemployment, and reductions in the debt-to-GDP ratio led two major rating agencies to give Brazil an investment-grade sovereign debt rating in early 2008.

However, significant vulnerabilities remain. Despite registering year-on-year declines from 2004 to 2007, Brazil's local currency government debt remains high. Total tax burden is high, and income and land distribution remains skewed.

Sustaining high growth rates in the longer term depends on the impact of President Lula's structural reform program and efforts to build a more welcoming climate for investment, both domestic and foreign. In its first year, the Lula administration passed key tax and pension reforms to improve the government fiscal accounts. Judicial reform and an overhaul of the bankruptcy law were passed in late 2004, along with tax measures to create incentives for long-term savings and investments.

Legislation promoting public private partnerships, a key effort to attract private investment to infrastructure, also passed in 2004. Labor reform and proposals to increase autonomy for the Central Bank are pending. Despite this well-considered reform agenda, much remains to be done to improve the regulatory climate for investments, particularly in the energy sector; to simplify tax systems at the state and federal levels; and to further reform the pension system.

Trade Policy

President Lula has made economic growth and poverty alleviation top priorities. Export promotion is a main component in plans to generate growth and reduce what is seen as a vulnerability to international financial market gyrations. To increase exports, the government is seeking access to foreign markets through trade negotiations and increased export promotion as well as government financing for exports.

To increase its international profile (both economically and politically), the Lula administration is seeking expanded trade ties with developing countries, as well as a strengthening of the Mercosul (Mercosur in Spanish) customs union with Uruguay, Paraguay and Argentina. In 2004, Mercosul concluded free trade agreements with Colombia, Ecuador, Venezuela and Peru, adding to its existing agreements with Chile and Bolivia to establish a commercial base for the newly-launched South American Community of Nations. Mercosul is pursuing free trade negotiations with Mexico and Canada and has resumed trade negotiations with the EU. The trade bloc also plans to launch trilateral free trade negotiations with India and South Africa, building on partial trade liberalization agreements concluded with these countries in 2004. In July 2006, Venezuela was admitted to the trade bloc as a full member. China has increased its importance as an export market for Brazilian soy, iron ore and steel, becoming Brazil's fourth-largest trading partner and a potential source of investment.

Agriculture

Agriculture is a major sector of the Brazilian economy, and is key for economic growth and foreign exchange. Agriculture accounts for about 5% of GDP (25% when including agribusiness) and 36% of Brazilian exports. Brazil enjoyed a positive agricultural trade balance of $40 billion in 2007. Brazil is the world's largest producer of sugar cane, coffee, tropical fruits, frozen concentrated orange juice (FCOJ), and has the world's largest commercial cattle herd (50% larger than the U.S.) at 170 million head. Brazil is also an important producer of soybeans (second to the United States), corn, cotton, cocoa, tobacco, and forest products. The remainder of agricultural output is in the livestock sector, mainly the production of beef and poultry (second to the United States), pork, milk, and seafood.

Environment

About half of Brazil is covered in forests, and Brazil has the majority of the world's largest rain forest, the Amazon. In the last 30 years, migrations into the Amazon and the conversion of forest land, primarily for agricultural use, has reduced the Brazilian Amazon by almost 20%. In 2006, the government created the Brazilian Forest Service with the aim to manage in a sustainable manner the Amazon forest resources. Due to concerns over possible unauthorized taking and commercialization of genetic resources or traditional knowledge of indigenous communities (often referred to as "biopiracy"), Brazil has imposed substantial restrictions on foreign researchers collecting or studying biological materials.

Other Aspects

Brazil has one of the most advanced industrial sectors in Latin America. Accounting for one-third of GDP, Brazil's diverse industries range from automobiles and parts, other machinery and equipment, steel, textiles, shoes, cement, lumber, iron ore, tin, and petrochemicals, to computers, aircraft, and consumer durables. Most major automobile producers have established production facilities in Brazil. Brazil has a diverse and sophisticated services industry as well. Mail and telecommunications are the largest, followed by banking, energy, commerce, and computing. During the 1990s, Brazil's financial services industry underwent a major overhaul and is relatively sound. The financial sector provides local firms a wide range of financial products. The largest financial firms are Brazilian (and the two largest banks are government-owned), but U.S. and other foreign firms have an important share of the market.

Privatization triggered a flood of investors after 1996. The yearly investment average in the telecom sector the 4 years prior to the start of privatization was R$5.8 billion, and the annual average for the four years following privatization was R$16.3 billion, nearly tripling. Investment in the electrical power sector increased from R$5.3 billion annually in the pre-privatization era to R$7.2 billion. U.S. companies provided a great deal of this influx of cash. After 2000, many of these investors suffered huge losses in the face of adverse regulatory decisions and especially the sharp depreciation of the real. The energy sector was especially hard hit.

The Government of Brazil has undertaken an ambitious program to reduce dependence on imported oil. In the mid-1980s, imports accounted for more than 70% of Brazil's oil and derivatives needs; the net figure is nearing zero. Brazil announced in early 2008 the discovery of the Tupi and Carioca oil fields off the coast of Rio de Janeiro. The oil reserves in these fields could be upwards of 40 billion barrels. Output from the existing Campos Basin and the discovery of the new fields could make Brazil a significant oil exporter by 2015. Brazil is one of the world's leading producers of hydroelectric power. Of its total installed electricity-generation capacity of 90,000 megawatts, hydropower accounts for 66,000 megawatts (74%). Proven mineral resources are extensive. Large iron and manganese reserves are important sources of industrial raw materials and export earnings.

FOREIGN RELATIONS

Brazil has traditionally been a leader in the inter-American community and played an important role in collective security efforts, as well as in economic cooperation in the Western Hemisphere. Brazil supported the Allies in both World Wars. During World War II, its expeditionary force in Italy played a key role in the Allied victory at Monte Castello. It is a member of the Organization of American States (OAS) and a party to the Inter-American Treaty of Reciprocal Assistance (Rio Treaty). Recently, Brazil has given high priority to expanding relations with its South American neighbors and is a founding member of the Latin American Integration Association (ALADI), the Union of South American Nations (UNASUL) created in June 2004, and Mercosul, a customs union between Argentina, Uruguay, Paraguay, and Brazil, with Chile, Bolivia, Peru, Colombia, and Ecuador as associate members; Venezuela's full membership is pending.

Brazil is a charter member of the United Nations and participates in its specialized agencies. It has contributed troops to UN peacekeeping efforts in the Middle East, the former Belgian Congo, Cyprus, Mozambique, Angola, East Timor, and most recently Haiti. Brazil is currently leading the UN peacekeeping force in Haiti. Brazil served as a non-permanent member of the UN Security Council from 2004-2005. Prior to this, it had been a member of the UN Security Council eight times. Brazil is lobbying for a permanent position on the Council.

As Brazil's domestic economy has grown and diversified, the country has become increasingly involved in international economic and trade policy discussions. For example, Brazil has been a leader of the G-20 group of nations in the WTO Doha Round talks. The U.S., Western Europe, and Japan are primary markets for Brazilian exports and sources of foreign lending and investment. China is a growing market for Brazilian exports. Brazil also has bolstered its commitment to nonproliferation through ratification of the nuclear Non-Proliferation Treaty (NPT), signing a full-scale nuclear safeguard agreement with the International Atomic Energy Agency (IAEA), acceding to the Treaty of Tlatelolco, and joining the Missile Technology Control Regime (MTCR) and the Nuclear Suppliers Group.

U.S.-BRAZILIAN RELATIONS

The United States was the first country to recognize Brazil's independence in 1822. The two countries have traditionally enjoyed friendly, active relations encompassing a broad political and economic agenda. Deepening U.S.-Brazil engagement and cooperation are reflected in the continuing high-level contacts between the two governments, including reciprocal visits by Presidents Bush and Lula in March 2007.

Ongoing topics of discussion and cooperation include trade and finance; hemispheric economic integration; biofuels; regional security; nonproliferation and arms control; human rights and trafficking in persons; international crime, including financial support to terrorist groups; counter-narcotics; and environmental issues.

Existing bilateral agreements include an Education Partnership Agreement, which enhances and expands cooperative initiatives in such areas as standards-based education reform, use of technology, and professional development of teachers; a Mutual Legal Assistance treaty—ratified in 2001; and agreements on cooperation in energy, the environment, science and technology, and transportation. In March 2007, the United States and Brazil signed three separate memoranda of understanding to increase cooperation on biofuels, education and legislative capacity building in Guinea-Bissau.

Secretary of State Condoleezza Rice visited Brazil in March 2008 and signed a historic Joint Action Plan for Racial Equality. The plan calls for Brazil and the United States to work jointly in combating racial discrimination and sharing best practices in tackling discrimination in the areas of education, law enforcement, labor, health, and many other areas.

U.S. Embassy and Consulate Functions

The U.S. embassy and consulates in Brazil provide a wide range of services to U.S. citizens and business. Political, economic, and science officers deal directly with the Brazilian Government in advancing U.S. interests but also are available to brief U.S. citizens on general conditions in the country. Attachés from the U.S. Commercial Service and Foreign Agriculture Service work closely with hundreds of U.S. companies that maintain offices in Brazil. These officers provide information on Brazilian trade and industry regulations and administer several programs to aid U.S. companies starting or maintaining business ventures in Brazil. The number of trade events and U.S. companies traveling to Brazil to participate in U.S. Commercial Service and Foreign Agriculture Service programs has tripled over the last three years.

The consular section of the embassy provides vital services to the estimated 60,000 U.S. citizens residing in Brazil. Among other services, the consular section assists Americans who wish to participate in U.S. elections while abroad and provides U.S. tax information. Besides the U.S. residents living in Brazil, some 150,000 U.S. citizens visit annually. The consular section offers passport and emergency services to U.S. tourists as needed during their stay in Brazil.

TRAVEL

Consular Information Sheet

February 1, 2008

Country Description: Brazil, a nation the size of the lower 48 United States, has an advanced developing economy. Facilities for tourism are excellent in the major cities, but vary in quality in remote areas. The capital is Brasilia.

Entry Requirements: A passport and visa are required for U.S. citizens traveling to Brazil for any purpose. Brazilian visas must be obtained in advance from the Brazilian Embassy or consulate nearest to the traveler's place of residence. There are no "airport visas" and immigration authorities will refuse entry to Brazil to anyone not possessing a valid visa. All Brazilian visas, regardless of the length of validity, must initially be used within 90 days of the issuance date or will no longer be valid. Americans reentering Brazil must be able to show an entry stamp in their passport proving that the visa was issued within 90 days; otherwise they will not be allowed reentry. Immigration authorities will not allow entry into Brazil without a valid visa. The U.S. Government cannot assist travelers who arrive in Brazil without proper documentation.

Travelers are reminded that they are subject to local law. Showing contempt to a Brazilian government official at the port of entry, or elsewhere, is a serious offense. (Fines for such offenses are based on the offender's claimed income.)

Additionally, travelers who have recently visited certain countries, including most other Latin American countries (check Brazilian Embassy website linked below), may be required to present an inoculation card indicating they had a yellow fever inoculation or they may not be allowed to board the plane or enter the country. Minors (under 18) traveling alone, with one parent or with a

third party, must present written authorization by the absent parent(s) or legal guardian specifically granting permission to travel alone, with one parent, or with a third party. The authorization (in Portuguese) must be notarized and then authenticated by the Brazilian Embassy or Consulate.

For current entry and customs requirements for Brazil, travelers may contact the Brazilian Embassy at 3009 Whitehaven Street NW, Washington, DC 20008; telephone 1-202-238-2828, e-mail consular@brasilemb.org; web site at http://www.brasilemb.org. Travelers may also contact the Brazilian consulates in Boston, Houston, Miami, New York, Chicago, Los Angeles, or San Francisco. Addresses, phone numbers, web and e-mail addresses, and jurisdictions of these consulates may be found at the Brazilian Embassy web site.

U.S. citizens also possessing Brazilian nationality cannot be issued Brazilian visas and must obtain a Brazilian passport (from the Brazilian Embassy or Consulate nearest to their place of residence) to enter and depart Brazil. In addition to being subject to all Brazilian laws affecting U.S. citizens, dual nationals may also be subject to other laws that impose special obligations on Brazilian citizens. Note that children adopted from Brazil are still considered Brazilian citizens and must be documented as such should they return to Brazil.

Safety and Security: Political and labor strikes and demonstrations occur sporadically in urban areas and may cause temporary disruption to public transportation. Naturally, protests anywhere in the world have the potential to become violent. In addition, criminal organizations, during 2006, staged several violent campaigns against public institutions in the Sao Paulo State leading to a large number of deaths. While it is unlikely that U.S. citizens would be targeted during such events, U.S. citizens traveling or residing in Brazil are advised to take common-sense precautions and avoid any large gatherings or any other event where crowds have congregated to demonstrate or protest. Individuals with ties to criminal entities operate along the tri-border area of Argentina, Brazil, and Paraguay. These organizations are involved in the trafficking of illicit goods; some individuals in the area are financially supporting designated foreign terrorist organizations. U.S. citizens crossing into Paraguay or Argentina may wish to consult the Country Specific Information for those countries.

Colombian terrorist groups have been known to operate in the border areas of neighboring countries. Although there have been reports of isolated small-scale armed incursions from Colombia into Brazil in the past, we know of no specific threat directed against U.S. citizens across the border in Brazil at this time. Colombian groups have perpetrated kidnappings of residents and tourists in border areas of Colombia's neighbors. Therefore, U.S. citizens traveling or residing in areas of Brazil near the Colombian border are urged to exercise caution. U.S. citizens are urged to take care when visiting remote parts of the Amazon basin and respect local laws and customs. U.S. visitors should ensure that their outfitter/guide is experienced in the Amazon.

For the latest security information, Americans traveling abroad should regularly monitor the Department of State, Bureau of Consular Affairs' web site at http://travel.state.gov, where the current Travel Warnings and Travel Alerts, as well as the Worldwide Caution, can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S. and Canada, or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: Crime throughout Brazil has reached very high levels. The Brazilian police and the Brazilian press report that the rate of crime continues to rise, especially in the major urban centers—though it is also spreading in rural areas. Brazil's murder rate is more than four times higher than that of the U.S. Rates for other crimes are similarly high. The majority of crimes are not solved. There were several reported rapes against American citizens in 2006. Street crime remains a problem for visitors and local residents alike, especially in the evenings and late at night. Foreign tourists are often targets of crime and Americans are not exempt. This targeting occurs in all tourist areas but is especially problematic in Rio de Janeiro, Salvador and Recife.

Caution is advised with regard to nighttime travel through more rural areas and satellite cities due to reported incidents of roadside robberies that randomly target passing vehicles. Robbery and "quicknapping" outside of banks and ATM machines are common. In a "quicknapping," criminals abduct victims for a short time in order to receive a quick payoff from the family, business or the victim's ATM card. Some victims have been beaten and/or raped.

The incidence of crime against tourists is greater in areas surrounding beaches, hotels, discotheques, bars, nightclubs, and other similar establishments that cater to visitors. This type of crime is especially prevalent during Carnaval (Brazilian Mardi Gras), but takes place throughout the year. While the risk is greater at dusk and during the evening hours, street crime can occur both day and night, and even safer areas of cities are not immune. Incidents of theft on city buses are frequent and visitors should avoid such transportation. Several Brazilian cities have established specialized tourist police units to patrol areas frequented by tourists. In Rio de Janeiro, crime continues to plague the major tourist areas.

At airports, hotel lobbies, bus stations and other public places, incidents of pick pocketing, theft of hand carried luggage, and laptop computers are common. Travelers should "dress down" when outside and avoid carrying valuables or wearing jewelry or expensive watches. "Good Samaritan" scams are common. If a tourist looks lost or seems to be having trouble communicating, a seemingly innocent bystander offering help may victimize them. Care should be taken at and around banks and internation-

ally connected automatic teller machines that take U.S. credit or debit cards. Very poor neighborhoods known as "favelas," such as those located on steep hillsides in Rio de Janeiro, are found throughout Brazil. These areas are sites of uncontrolled criminal activity and are often not patrolled by police.

U.S. citizens are advised to avoid these unsafe areas. Carjacking is on the increase in Sao Paulo, Recife and other cities.

Travelers using personal ATMs or credit cards sometimes receive billing statements with non-authorized charges after returning from a visit to Brazil. The Embassy and Consulates have received numerous reports from both official Americans and tourists who have had their cards cloned or duplicated without their knowledge. Those using such payment methods should carefully monitor their banking online for the duration of their visit.

While the ability of Brazilian police to help recover stolen property is limited, it is nevertheless strongly advised to obtain a "boletim de ocorrencia" (police report) at a "delegacia" (police station) whenever any possessions are lost or stolen. This will facilitate the traveler's exit from Brazil and insurance claims.

In many countries around the world, counterfeit and pirated goods are widely available. Transactions involving such products may be illegal under local law. In addition, bringing them back to the United States may result in forfeitures and/or fines. More information on this serious problem is available at http://www.cybercrime.gov/18usc2320.htm.

Brasilia: Once spared the crime rates of other Brazilian cities, Brasilia now has significant crime problems. Following the citywide trend of previous years, reports of residential burglaries continue to occur in the generally affluent residential sections of the city. Public transportation, hotel sectors and tourist areas are still the locations with the highest crime rates, though statistics show that incidents can happen anywhere and at anytime. The majority of kidnappings in Brasilia continue to be the "quicknappings."

Rio De Janeiro: The city continues to experience a high incidence of crime. Tourists are particularly vulnerable to street thefts and robberies on and in areas adjacent to major tourist attractions and the main beaches in the city. Walking on the beaches is very dangerous at night. During the day, travelers are advised not to take possessions of value to the beach. During 2006-07, the Consulate General assisted many Americans who had incapacitating drugs slipped into their drinks at bars or in their hotel rooms and then robbed. Tourists continue to suffer attacks along trails leading to the famous Corcovado Mountain, on the road linking the airport and the South Zone and on the beaches of Copacabana. Over the past year, attacks against motorists increased. In Rio de Janeiro City, motorists are allowed to treat stoplights as stop signs between the hours of 10 p.m. and 6 a.m. to protect against holdups at intersections. While most police officials are honest, in 2006, there were several cases of corrupt police officials extorting money from American tourists. All incidents should be reported to the tourist police, who can be reached at 3399-7170/71/72/73.

Sao Paulo: While similar incidents may occur elsewhere, all areas of Sao Paulo have a high rate of armed robbery of pedestrians at stoplights. There is a particularly high incidence of robberies and pick pocketing in the Praca da Se section of Sao Paulo and in the eastern part of the city. As is true of "red light districts" in other cities, the areas of Sao Paulo on Rua Augusta north of Avenida Paulista and the Estacao de Luz metro area are especially dangerous. There are regular reports of young women slipping knockout drops in men's drinks and robbing them of all their belongings while they are unconscious. Armed holdups of pedestrians and motorists by young men on motorcycles ("motoboys") are an increasingly common occurrence in Sao Paulo. Victims who resist run the risk of violent retaliation. The number one item of choice by robbers in Sao Paulo, especially with regards to business travelers, is laptop computers. Recent efforts of incarcerated drug lords to exert their power outside of their jail cells have resulted in sporadic disruptions in the city, violence directed at the authorities, bus burnings and vandalism at ATM machines. These occurrences have not resulted in any injuries to U.S. citizens. Visitors and residents should respect police roadblocks and be aware that some municipal services may be disrupted.

Recife: Deceptively tranquil, Recife now has one of the highest murder rates (per capita) in all Brazil. As in Rio de Janeiro, tourists in Recife should take special care while on the beaches, as robberies may occur in broad daylight. In the upscale Boa Viagem neighborhood, car-jackings can occur at any time of the day or night. Some of Brazil's most popular beaches lie in the Recife consular district: Fortaleza, Natal, and Maceio. Beachgoers should heed the signs posted on beaches alerting to the higher-than-average probability of shark attacks. Shark attacks are recorded in Recife every year.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

Medical Facilities and Health Information: Medical care is generally good, but it varies in quality, particularly in remote areas, and it may not meet U.S. standards outside the major cities. Expatriates in Brazil

regularly use the Albert Einstein Hospital in Sao Paulo. The hospital phone is (55-11) 3747-1301.

There have been recent fatalities, possibly from yellow fever, in Goias and Brazil's Federal District (including Brasilia). While test results are pending to determine if these deaths were actually caused by yellow fever, the Government of Brazil has begun a yellow fever vaccine campaign in the affected regions. CDC has long recommended yellow fever vaccinations for parts of Brazil: yellow fever vaccine is recommended for persons over 9 months of age for travel to all rural areas of all states, including Iguassu Falls tourist resorts, and for travel to Brasilia and Belo Horizonte. Cities in jungle areas are considered rural, not urban, in nature. yellow fever is not a risk for travel to major coastal cities from Fortaleza to the Uruguay border, including the major tourist/business destinations of Sao Paulo, Salvador, Rio, Recife, and Fortaleza.

Plastic and other elective/cosmetic surgery is a major medical industry in Brazil. While Brazil has many plastic surgery facilities that are on par with those found in the United States, two U.S. citizens died and one was left in vegetative state from complications following plastic surgery in 2005. U.S. citizens should make sure when arranging such surgery that emergency medical facilities are available, as some "boutique" plastic surgery operations offer luxurious facilities, but are not hospitals and are therefore unable to deal with unforeseen emergencies. Several U.S. citizens have also died while visiting non-traditional healers outside of urban areas. While this is not surprising given that this type of treatment often attracts the terminally ill, U.S. citizens are advised to ensure they have access to proper medical care when visiting the site. In the unfortunate event of a death, relatives or friends of any deceased U.S. citizen are advised to immediately contact the U.S. Embassy in Brasilia and not to contract with local mortuary services before seeking embassy assistance.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's web site at http://wwwn.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith/en.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Brazil is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

Travelers may consider obtaining an Inter-American Driving Permit, to carry along with their valid U.S. license if they plan to drive while in Brazil. Such permits can be obtained through AAA or other sources.

Road conditions in Brazil vary widely throughout the country. State roads (especially in the south) are often excellent, while federal, interstate roads (designated by 'BR') are often very poor due to lack of maintenance. There are occasional stretches of modern divided highway (especially in Sao Paulo State) that rival European or U.S. roads. In municipal areas, however, signs, shoulders, exits, and merge lanes tend to be haphazard. There are many potholes and surfaces are frequently uneven and bumpy. Some stretches of federal roads and rural state roads are so potholed that high-clearance vehicles are needed to traverse them.

Many cities and towns have erected speed bumps, which are sometimes severe and may be unpainted and unmarked. Pedestrians, bicyclists, and horse-drawn vehicles all pose hazards and can be encountered even on major routes. Travel after dark outside city centers is not recommended because of animals and disabled vehicles. Dirt roads are the rule in remote areas. These vary widely in quality and may quickly become more dangerous, even impassable, in rainy weather. Passenger car travel can be reasonably safe in most areas if one takes into account the prevailing conditions described above and exercises due prudence and caution. Passenger-bus hijacking, usually non-violent, occurs at random in some areas of the country.

Brazil's inter-city roads are widely recognized as among the most dangerous in the world. As is the case elsewhere in the region, poor driving skills, bad roads and a high density of trucks combine to make travel considerably more hazardous than in the United States. There are no laws requiring truckers to take mandatory rest stops and they often drive for excessive periods of time. All major inter-city routes are saturated with heavy truck traffic and for the most part have only two lanes. Road maintenance is inadequate and some long-distance roads through the Amazon forest are impassable much of the year.

There are few railroads and passenger train travel is almost nonexistent. Private cars and public buses are the main modes of inter-city road travel. Buses can range (depending on the route and the price) from luxurious and well maintained to basic and mechanically unsound.

The Brazilian Federal Government maintains a (Portuguese language) website with up-to-date information on road conditions throughout the country (http://www.dnit.gov.br); the site also has downloadable state roadmaps. A private Brazilian company, Quatro Rodas, publishes road maps that contain local phone numbers to ascertain the current conditions of roads on the map. They are

available at www.guia4rodas.com.br. Apart from toll roads, which generally have their own services, roadside assistance is available only very sporadically and informally through local private mechanics. There is a group called the "Angels of the Pavement" that provides roadside assistance on the main highway between Sao Paulo and Rio de Janeiro.

The fastest way to summon assistance in an emergency anywhere in the country is to dial 193, a universal number staffed by local fire departments. This service is in Portuguese only. Many motorists in major urban areas and more developed parts of the country carry cellular phones, and can be asked to assist in calling for help. Brazilian traffic laws impose severe penalties for a number of traffic offenses. Enforcement ranges from sporadic to non-existent, so motorists should not assume that others will necessarily follow even the most fundamental and widely accepted rules of the road. Some important local rules and customs include the following:

Seat Belts: All states have seat belt laws, but enforcement varies from state to state.

Child Car Seats: Some states require child car seats, but they are not universally available or affordable, and enforcement is also lax. As a result, most children are not secured in car seats.

Speed Limits: The maximum speed limit on major, divided highways is 120kmph (74 mph). Lower limits (usually 60kmph (40 mph)) are often posted in urban areas, depending on the road and the nature of the neighborhood. Speed limits are widely ignored and rarely enforced. Many towns and cities have marked electronic/photographic devices ("Fiscalisacao Electronica"), which verify speed and snap photos of violators' cars and license plates as a basis for issuing speeding tickets. Brazilian drivers tend to brake suddenly when encountering these devices.

Yielding the Right of Way: Drivers must yield the right of way to cars on their right. Compliance with stop signs is rarely enforced; so many motorists treat them as yield signs.

Driving Under the Influence: Drivers are in violation of the law if blood/alcohol level reaches 0.06 percent.

Turns on Red Lights: Not permitted, except for right turns where there is a sign with an arrow pointing right and the words "Livre a Direita."

Penalties for Drivers Involved in an Accident Resulting in Injury or Death: In addition to possible criminal charges and penalties, compensatory and punitive damages may also apply.

Local Driving Customs Regulations: Drivers often use flashes or wave a hand out of the window to signal other drivers to slow down. Drivers will often break suddenly to slow down for the electronic speed traps mentioned above. In addition, pedestrian "zebra" crossings are strictly observed in some places (especially in Brasilia) and ignored most everywhere else.

For specific information concerning Brazilian driving permits, vehicle inspection, road tax, and mandatory insurance, please contact the Brazilian National Tourist Organization offices in New York via the Internet at http://www.embratur.gov.br.

For additional information from other sources in Brazil about road safety and specific information about accident statistics, Brazilian driving permits, vehicle inspection, road tax, and mandatory insurance, please see the following web sites: http://www.dprf.gov.br (Brazilian Federal Highway Police, in Portuguese only), and http://www.transportes.gov.br (Ministry of Transportation, in Portuguese only).

Aviation Safety Oversight: The U.S. Federal Aviation Administration (FAA) has assessed the Government of Brazil's Civil Aviation Authority as being in compliance with International Civil Aviation Organization (ICAO) aviation safety standards for oversight of Brazil's air carrier operations. For more information, travelers may visit the FAA's web site at www.faa.gov.

Foreigners are required to carry their passports for internal flights. Brazil's air transportation system has been in disarray since accidents with fatalities occurred in September 2006 and July 2007. Causes of the accidents are still under investigation. Air traffic work stoppages and issues with equipment have caused widespread delays in air travel nationwide.

Both international and domestic flights are frequently delayed for several hours or cancelled. In some cases, travelers have been rerouted, causing disruptions to travel plans. American citizens living in or traveling to Brazil are advised to prepare for long delays at Brazilian airports and for the possibility of missing flight connections. Foreigners are required to carry their passports for internal flights.

Special Circumstances: Brazilian customs authorities may enforce strict regulations concerning temporary importation into or export from Brazil of items such as firearms, antiquities, tropical plants, medications, and business equipment. In the Amazon region, there is a special concern for the export of biological material, which could have genetic value. People propagating or exporting biological material without proper permits run the risk of being accused of "biopiracy," a serious offence in Brazil. It is advisable to contact the Embassy of Brazil in Washington or one of Brazil's consulates in the United States for specific information regarding customs requirements.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating Brazilian laws, even unknowingly, may be

expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Brazil are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in Brazil are encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration web site and to obtain updated information on travel and security within Brazil. Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate.

By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency. The U.S. Embassy is located in Brasilia at Avenida das Nacoes, Lote 3, telephone 011-55-61-3312-7000, after-hours telephone 011-55-61-3312-7400; web site at http://brasilia.usembassy.gov. Consular Section public hours are 2:00 p.m.–4:00 p.m., Monday through Friday except Brazilian and U.S. holidays. Non-emergency services are provided by appointment, available at 61-3312-7471 or 7063.

There are consulates in the following cities:

Recife: Rua Goncalves Maia 163, telephone 011-55-81-3416-3050, after-hours telephone 011-55-3416-3060; web site www.embaixada-americana.org.br. Consular Section public hours are 1:00 p.m.–4:00 p.m. Monday through Friday except Brazilian and U.S. holidays.

Rio de Janeiro: Avenida Presidente Wilson 147, telephone 011-55-21-3823-2022, after-hours 011-55-21-3823-2029; web site at http://www.embaixada-americana.org.br. Consular Section public hours are 8:30 a.m.–11:00 a.m. (passports and reports of birth by appointment) and 1:00 p.m.–3:00 p.m. (notary services), Monday, Wednesday, and Friday, except Brazilian and U.S. holidays. Non-emergency passports and reports of appointments should be done by appointment; please request at acsrio@state.gov.

Sao Paulo: Rua Henri Dunant, 500 Barrio Chacara Santo Antonio, telephone 011-55-11-5186-7000, after hours telephone 011-55-11-5181-8730; web site at http://saopaulo.usconsulate.gov. Consular Section public hours are 8:30 a.m.-11:30 a.m., Monday through Friday and 2:00 p.m.-3:30 p.m., Monday, Wednesday, and Friday except Brazilian and U.S. holidays. Non-emergency services are done by appointments, please request at ACSAPPTSPL@state.gov, by phone: 11-5186-7315 or by fax: 11-5186-7159.

There are Consular Agencies in:

Belem: Edificio Sintese 21, Av. Conselheiro Furtado 2865, Rooms 1104/1106; telephone 011-55-91-3259-4566.

Manaus: Rua Franco de Sa, 230 Sao Francisco, Edificio Atrium, Rm. 306; telephone 011-55-92-3611-3333.

Salvador da Bahia: Av. Tancredo Neves, 1632, Rm. 1401–Salvador Trade Center–Torre Sul, Caminho da Arvores; telephone 011-55-71-3113-2090/2091/2092.

Fortaleza: Av. Santos Dumont 2828 s.708–Aldeota; telephone 011-55-85-3486-1306.

Porto Alegre: The Instituto Cultural Brasil-Norteamericano, Rua Riachuelo, 1257, Centro; telephone 011-55-51-3226-3344.

Intercountry Adoption

November 2008

The information in this section has been edited from a report available through the U.S. Department of State Office of Children's Issues. For more information detailed, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Brazil is party to The Hague Convention on Protection of Children and Cooperation in Respect of Intercountry Adoption (Hague Adoption Convention). Therefore, all adoptions between Brazil and the United States must meet the requirements of the Convention and United States law implementing the Convention. For detailed and updated information on these requirements, please review the *Intercountry Adoption* section of this publication and visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

Brazilian law does not allow for a Brazilian child to travel to the United States to be adopted. Therefore, prospective adoptive parents must obtain a full and final adoption under Brazilian law before the child can immigrate to the United States.

Who Can Adopt? Adoption between the United States and Brazil is governed by The Hague Adoption Convention. Therefore to adopt from Brazil, you must first be found eligible to adopt by the United States Government.

Adoption in Brazil can be a complicated process, sometimes involving long waits. Brazilian adoption law gives preference to Brazilian citizens and citizens of countries that have implemented The Hague Adoption Convention. Please be aware that without Brazilian citizenship, it is unlikely that a United States citizen will be able to adopt a healthy, single child under the age of 5 years. The following types of children are most commonly available to United States citizens without Brazilian citizenship:

- Single, healthy children, age 5+
- Sibling groups of any number and of all ages
- Special needs children of all ages

In addition to the United States requirements for prospective adoptive parents, Brazil also has the following eligibility requirements for prospective adoptive parents.

Residency Requirements: Brazilian law requires prospective parents to live in Brazil with the child for a cohabitation period of at least 15 days for children under two years of age and at least 30 days for children two and over.

Age Requirements: Persons over the age of 21 may adopt, regardless of marital status. The adopting party must be at least 16 years older than the potential adoptee.

Marriage Requirements: There are no marriage requirements for adoption in Brazil.

Who Can Be Adopted? Because Brazil is party to The Hague Adoption Convention, children from Brazil must meet the requirements of the Convention in order to be eligible for adoption. In addition to Brazil's requirements, a child must meet the definition of a Convention adoptee for you to bring him or her back to the United States.

Brazil's Central Authority: The State Judiciary Commission of Adoption (CEJA)

The Process: The first step in adopting a child from Brazil is to select an accredited or approved adoption service provider in the United States. Each Brazilian state maintains a CEJA (State Judiciary Commission of Adoption) that acts as the Central Authority and is the sole organization authorized to approve foreign adopting parents. Some CEJAs are less apt to work with American petitioners; however, the CEJAs of Alagoas, Minas Gerais, Paraná, Pernambuco, Rio de Janeiro, Santa Catarina, and São Paulo are known to work with American citizens.

After you choose an accredited adoption service provider, you apply to be found eligible to adopt (Form I-800A) by the USCIS. Once the United States Government determines that you are "eligible" and "suitable" to adopt, you or your agency will forward your information to the Central Authority in Brazil. The CEJA will review your application to determine whether you are also eligible to adopt under Brazilian law. A lawyer is not required for this service. If prospective adoptive parents are approved by CEJA, it will provide the parent(s) with a "Habilitation Approval Certificate." If both the United States and Brazil determine that you are eligible to adopt, and a child is available for intercountry adoption, the CEJA may provide you with a referral for a child. Eventually identify the child(ren) eligible for adoption from a database of prospective adoptees and notify the prospective adoptive parent(s) of the match. After you accept a match with a child, you will apply to the USCIS for provisional approval to adopt that particular child (Form I-800). After this, your adoption service provider or you will submit a visa application for to a Consular officer at the United States Embassy. If the Consular office determines that the child appears eligible to immigrate to the United States, he or she will notify the CEJA (Article 5 letter). For Convention country adoptions, prospective adoptive parent(s) may not proceed with the adoption or obtain custody for the purpose of adoption until this takes place.

Role of the Central Authority: The State Judiciary Commission of Adoption (CEJA) is the division of government responsible for intercountry adoption in Brazil. Each Brazilian state maintains a CEJA that acts as the Central Authority and is the sole organization authorized to approve foreign adoption parents.

Role of the Court: In October 1990, Brazil promulgated a new Federal Statute for the protection of children and adolescents. In accordance with this law, priority in adoptions is given to Brazilian citizens. Other major terms of the law include:

- Adoption by proxy is prohibited
- A child will only be allowed to depart Brazilian territory when the adoption has been finalized

Role of Adoption Agencies: Prospective adoptive parents are required to use the services of an accredited or approved adoption service provider in the United States, and are advised to fully research any adoption agency or facilitator they plan to use for adoption services in Brazil. Because Brazil is a Convention country, adoption services must be provided by an approved service provider.

Time Frame: The average time to complete an intercountry adoption in Brazil varies from three months to one year.

Adoption Application: To begin the adoption process, prospective adoptive parents must apply for permission to adopt from the CEJA. CEJA will process the application; a lawyer is not required for this service. CEJA provides the prospective adoptive parents with a "Habilitation Approval Certificate" and eventually identifies the child(ren) eligible for adoption from a database of prospective children.

The United States Consulate in Rio de Janeiro provides a letter addressed to the CEJA stating that the United States will comply with The Hague Adoption Convention (i.e. that the adopted child will be a United States citizen and have all rights as any United States citizen). This letter is provided only after the USCIS has approved the I-800A application and a copy of the approval is received by the United States Consulate in Rio de Janeiro.

Once the adoptive parents satisfy Brazilian adoption requirements, a judge may grant a final adoption. The Brazilian government will then allow the child to leave Brazil.

Adoption Fees: There are no government fees to open a dossier with the CEJA. Unfortunately it is difficult to determine an average cost for attorneys in Brazil since prices vary from state to state, and on the qualifications of the attorney.

Documents Required: According to CEJA statutes, petitioners must provide at a minimum the following:

- A home study including a psychological evaluation and medical report(s) of prospective adoptive parent(s) stating they are in good health and capable to adopt;
- Certificate of Residence—proof of home ownership or an affidavit from landlord regarding the apartment lease;
- Photos of the prospective adoptive parents') residence (inside and outside);
- Pictures of prospective adoptive family and grandparents, if possible;
- Notice of Approval of I-800A petition;
- Copy of Petitioner's United States passport(s), photo and signature page;
- Police records, requested within one year;
- Last filed Federal Income Tax return;
- Marriage certificate (if applicable);
- Birth certificate(s) of prospective adoptive parent(s);
- Divorce Decree (if applicable);
- Copy of applicant's current state of residence law on adoptions, including statement that the law is still in effect (generally obtained at a state Court House, from a Senator's office, or lawyer);
- Handwritten signed statement from prospective adoptive parent(s) saying they are aware that adoption in Brazil is free and irrevocable; and
- Statement that prospective adoptive parent(s) is (are) aware that they must not establish any contact in Brazil with prospective child's birth parent(s) or guardian (if applicable) before the authorization from CEJA is issued.

All documents must be translated into Portuguese and authenticated by the Brazilian Embassy and/or Consulate in the United States. For updates on document requirements and information on how to authenticate documents, visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

Bringing Your Child Home: Once your adoption is complete (or you have obtained legal custody of the child), there are a few more steps to take before you can head home. Specifically, you need to apply for several documents for your child before he or she can travel to the United States, such as a birth certificate, a passport or travel document for your child from the country in which he or she was born, and a U.S. Immigration Visa.

For detailed and updated information on how to obtain these documents, review the *Intercountry Adoption* section on this publication and visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

Child Citizenship Act: For adoptions finalized abroad: The Child Citizenship Act of 2000 allows your new child to acquire American citizenship automatically when he or she enters the United States as lawful permanent residents. For adoptions finalized in the United States: The Child Citizenship Act of 2000 allows your new child to acquire American citizenship automatically when the court in the United States issues the final adoption decree. To learn more, review the *Intercountry Adoption* section on this publication and visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

After Adoption: According to Brazilian law, there are no post-adoption requirements of adoptive parents.

International Parental Child Abduction

November 2008

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *International Child Abduction* section of this book and review current reports online at www.travel.state.gov/childabduction.

Disclaimer: The information in this circular relating to the legal requirements of specific foreign countries is

provided for general information only. Questions involving interpretation of specific foreign laws should be addressed to foreign legal counsel.

General Information: Brazil is organized as a federal republic with a civil law system. The Federal Union and the states have their own court systems, which follow the same civil procedure. There is no civil jury system in Brazil. Local family courts handle divorce and custody cases in Brazil. Hague petitions submitted to the Central Authority are filed with a federal court.

In conflicts between a local court and a federal court, the federal court has precedence. Brazilian courts can uphold a U.S. custody order, however, the order must first be registered in Brazil, which is a lengthy process called homologation.

Child Custody Law: Under the Brazilian Civil Code, married parents have equal rights of custody to their minor children. Legal guardianship goes automatically to a mother when the child is born out of wedlock, unless the father files for custody with a family court. While parents share a presumption of equal rights of custody, the U.S. Embassy in Brasilia notes that bias based on gender or nationality does occur. Mothers are often given preference in custody cases involving small children or girls and a Brazilian parent is favored over a foreign parent.

Divorce and custody disputes are not uncommon in Brazil. The U.S. Embassy in Brasilia, however, feels that compared to other court processes, family court cases are resolved in a relatively short period of time. Parents seeking the recognition of U.S. custody orders can initiate a process called homologation, which consists of registering the U.S. decision in Brazil. The process is very lengthy and ultimately must be upheld by a Brazilian court.

Right of Visitation: Brazilian courts grant visitation rights to parents residing outside of the country. The specifics of visitation are determined by a divorce decree or custody order. Parents seeking to enforce visitation rights already granted by a foreign or Brazilian court order may do so directly with a Brazilian court or through the Hague Convention. Additionally, parents may initially seek visitation or access rights through the Hague Convention.

Criminal Aspects: Under Brazilian law, parental abduction is a crime when committed within Brazil and both parents are Brazilian. An international parental abduction, involving a Brazilian parent taking a child to Brazil in interference with a foreign parent's custodial rights, is not considered a crime. Additionally, the Brazilian Constitution prohibits the extradition of its own nationals, preventing a taking parent of Brazilian nationality from being extradited for parental kidnapping.

Citizenship/Passports: If one of the parents of a child is a Brazilian citizen, then the child is a Brazilian citizen, regardless of place of birth or any other citizenship that may be possessed by the child. Children born in the U.S. may travel to Brazil on a U.S. passport and be documented as Brazilian citizens upon arriving in Brazil. It is also possible for children born in the U.S. to be registered and documented as Brazilian citizens by a Brazilian Consulate in the U.S., allowing the child to travel out of the U.S. on a Brazilian passport. All children born in Brazil, except those born to people on the diplomatic blue list, are Brazilian citizens.

Under Brazilian law, neither parent can travel alone with a child without the written consent of the absent parent or a court order granting either sole custody to the traveling parent or permission to travel with the child. This applies to both domestic and international travel and includes married parents. Additionally, both parents' consent is necessary for the issuance of a Brazilian passport.

In order for a parent to request that a Brazilian passport not be issued to their child, he/she must petition a family court in Brazil and provide an explanation as to why the passport should not be issued to the child. If a passport has already been issued, the parent may request that a judge take possession of the passport and not release the passport to either parent. When a judge receives a petition for the return of a minor under the Hague Convention, the court seizes the travel documents of the child and the abducting parent and retains the documents until a final decision is issued.

Hague Convention on the Civil Aspects of International Parental Abduction: The Hague Convention on the Civil Aspects of International Parental Abduction (the "Hague Convention") came into force between the United States and Brazil on December 1, 2003.

Therefore, Hague Convention provisions for return or access would apply to children abducted or retained after December 1, 2003. Parents and legal guardians of children taken to Brazil prior to December 1, 2003, may still submit applications for return or access to the Brazilian Central Authority in some cases.

The Central Authority is located at Secretaria de Estado dos Direitos Humanos, Esplanada dos Ministerios, Edificio Sede, sala 212 70064-900 Brasilia. The international telephone number is 55-61-3-429-3481 and the fax number is 55-61-3-226-7980. For more information, please read the *International Parental Child Abduction* section of this book and review current reports online at http://travel.state.gov. For further information on international parental child abduction, contact the Office of Children's Issues, U.S. Department of State at 1-888-407-4747 or visit its web site on the Internet at http://travel.state.gov. You may also direct inquiries to: Office of Children's Issues, U.S. Department of State, Washington, DC 20520-4811; Phone: (202) 736-9090; Fax: (202) 312-9743.

BRUNEI

Compiled from the November 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Negara Brunei Darussalam

PROFILE

Geography

Area: 5,765 sq. km. (2,226 sq. mi.), slightly larger than Delaware.
Cities: Capital—Bandar Seri Begawan.
Terrain: East—flat coastal plain rises to mountains; west—hilly lowland with a few mountain ridges.
Climate: Equatorial; high temperatures, humidity, and rainfall.

People

Nationality: Noun and adjective—Bruneian(s).
Population: (2007 est.) 390,000.
Annual growth rate: (2007 est., Government of Brunei): 1.8%.
Ethnic groups: Malay, Chinese, other indigenous groups.
Religions: Islam.
Languages: Malay, English, Chinese; Iban and other indigenous dialects.
Education: Years compulsory—9. Literacy (2006)—94.7%.
Health: Life expectancy (years)—75.2 (men), 77.8 (women) yrs. Infant mortality rate (2007 est. Government of Brunei)—7.6/1,000.

Government

Type: Malay Islamic Monarchy.
Independence: January 1, 1984.
Constitution: 1959.
Government branches: Executive—Sultan is both head of state and Prime Minister, presiding over a fourteen-member cabinet. Legislative—a Legislative Council has been reactivated after a 20-year suspension to play an advisory role for the Sultan. Judicial (based on Indian penal code and English common law)—magistrate's courts, High Court, Court of Appeals, Judicial Committee of the Privy Council (sits in London).
Political subdivisions: Four districts—Brunei-Muara, Belait, Tutong, and Temburong.

Economy

GDP: (2007, Government of Brunei) U.S. $12.341 billion.
Growth rate: (2007, Government of Brunei) 0.6%.
Natural resources: Oil and natural gas.
Trade: Exports—oil, liquefied natural gas, petroleum products, garments. Major markets—Japan, Korea, ASEAN, U.S. Imports—machinery and transport equipment, manufactured goods. Major suppliers—ASEAN, Japan, U.S., EU.

PEOPLE

Many cultural and linguistic differences make Brunei Malays distinct from the larger Malay populations in nearby Malaysia and Indonesia, even though they are ethnically related and share the Muslim religion.

Brunei has hereditary nobility, carrying the title Pengiran. The Sultan can award to commoners the title Pehin, the equivalent of a life peerage awarded in the United Kingdom. The Sultan also can award his subjects the Dato, the equivalent of a knighthood in the United Kingdom, and Datin, the equivalent of damehood. Bruneians adhere to the practice of using complete full names with all titles, including the title Haji (for men) or Hajah (for women) for those who have made the Haj pilgrimage to Mecca. Many Brunei Malay women wear the tudong, a traditional head covering. Men wear the songkok, a traditional Malay cap. Men who have completed the Haj can wear a white songkok.

The requirements to attain Brunei citizenship include passing tests in Malay culture, customs, and language. Stateless permanent residents of Brunei are given International Certificates of Identity, which allow them to travel overseas. The majority of Brunei's Chinese are permanent

residents, and many are stateless. An amendment to the National Registration and Immigration Act of 2002 allowed female Bruneian citizens for the first time to transfer their nationality to their children.

Oil wealth allows the Brunei Government to provide the population with one of Asia's finest health care systems. Malaria has been eradicated, and cholera is virtually nonexistent. There are five general hospitals—in Bandar Seri Begawan, Tutong, Kuala Belait, Bangar, and Seria—and there are numerous health clinics throughout the country.

Education starts with preschool, followed by 6 years of primary education and up to 7 years of secondary education. Nine years of education are mandatory. Most of Brunei's college students attend universities and other institutions abroad, but approximately 3,674 (2005) study at the University of Brunei Darussalam. Opened in 1985, the university has a faculty of more than 300 instructors and is located on a sprawling campus overlooking the South China Sea.

The official language is Malay, but English is widely understood and used in business. Other languages spoken are several Chinese dialects, Iban, and a number of native dialects. Islam is the official religion, but religious freedom is guaranteed under the constitution.

HISTORY

Historians believe there was a forerunner to the present Brunei Sultanate, which the Chinese called Po-ni. Chinese and Arabic records indicate that this ancient trading kingdom existed at the mouth of the Brunei River as early as the seventh or eighth century A.D. This early kingdom was apparently conquered by the Sumatran Hindu Empire of Srivijaya in the early ninth century, which later controlled northern Borneo and the Philippines. It was subjugated briefly by the Java-based Majapahit Empire but soon regained its independence and once again rose to prominence. The Brunei Empire had its golden age from the 15th to the 17th centuries, when its control extended over the entire island of Borneo and north into the Philippines. Brunei was particularly powerful under the fifth sultan, Bolkiah (1473-1521), who was famed for his sea exploits and even briefly captured Manila; and under the ninth sultan, Hassan (1605-19), who fully developed an elaborate Royal Court structure, elements of which remain today.

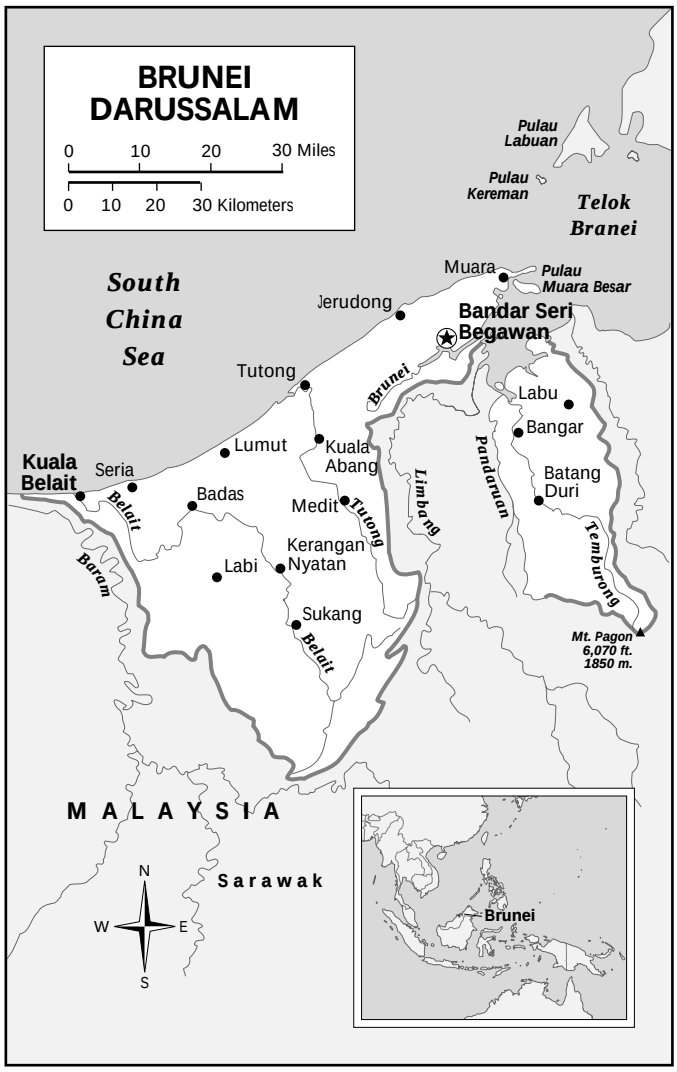
After Sultan Hassan, Brunei entered a period of decline due to internal battles over royal succession as well as the rising influences of European colonial powers in the region that, among other things, disrupted traditional trading patterns, destroying the economic base of Brunei and many other Southeast Asian sultanates. In 1839, the English adventurer James Brooke arrived in Borneo and helped the Sultan put down a rebellion. As a reward, he became governor and later "Rajah" of Sarawak in northwest Borneo and gradually expanded the territory under his control.

Meanwhile, the British North Borneo Company was expanding its control over territory in northeast Borneo. In 1888, Brunei became a protectorate of the British Government, retaining internal independence but with British control over external affairs. In 1906, Brunei accepted a further measure of British control when executive power was transferred to a British resident, who advised the ruler on all matters except those concerning local custom and religion.

In 1959, a new constitution was written declaring Brunei a self-governing state, while its foreign affairs, security, and defense remained the responsibility of the United Kingdom. An attempt in 1962 to introduce a partially elected legislative body with limited powers was abandoned after the opposition political party, Parti Rakyat Brunei, launched an armed uprising, which the government put down with the help of British forces. In the late 1950s and early 1960s, the government also resisted pressures to join neighboring Sabah and Sarawak in the newly formed Malaysia. The Sultan eventually decided that Brunei would remain an independent state. In 1967, Sultan Omar abdicated in favor of his eldest son, Hassanal Bolkiah, who became the 29th ruler. The former Sultan remained as Defense Minister and assumed the royal title Seri Begawan. In 1970, the national capital, Brunei Town, was renamed Bandar Seri Begawan in his honor. The Seri Begawan died in 1986.

On January 4, 1979, Brunei and the United Kingdom signed a new treaty of friendship and cooperation. On January 1, 1984, Brunei Darussalam became a fully independent state.

GOVERNMENT AND POLITICAL CONDITIONS



Under Brunei's 1959 constitution, the Sultan is the head of state with full executive authority, including emergency powers since 1962. The Sultan is assisted and advised by five councils, which he appoints. A Council of Ministers, or cabinet, which currently consists of 14 members (including the Sultan himself), assists in the administration of the government. The Sultan presides over the cabinet as Prime Minister and also holds the positions of Minister of Defense and Minister of Finance. His son, the Crown Prince, serves as Senior Minister. One of the Sultan's brothers, Prince Mohamed, serves as Minister of Foreign Affairs.

Brunei's legal system is based on English common law, with an independent judiciary, a body of written common law judgments and statutes, and legislation enacted by the Sultan. The local magistrates' courts try most cases. More serious cases go before the High Court, which sits for about 2 weeks every few months. Brunei has an arrangement with the United Kingdom whereby United Kingdom judges are appointed as the judges for Brunei's High Court and Court of Appeal. Final appeal can be made to the Judicial Committee of the Privy

Council in London in civil but not criminal cases. Brunei also has a separate system of Islamic courts that apply Sharia law in family and other matters involving Muslims.

The Government of Brunei assures continuing public support for the current form of government by providing economic benefits such as subsidized food, fuel, and housing; free education and medical care; and low-interest loans for government employees. The Sultan said in a 1989 interview that he intended to proceed, with prudence, to establish more liberal institutions in the country and that he would reintroduce elections and a legislature when he "[could] see evidence of a genuine interest in politics on the part of a responsible majority of Bruneians." In 2004 the Sultan issued amendments to the constitution and re-introduced an appointed Legislative Council with minimal powers. Currently, five of the 31 seats on the Council are indirectly elected by village leaders. Brunei's economy is almost totally supported by exports of crude oil and natural gas. The government uses its earnings in part to build up its foreign reserves.

The Brunei Investment Agency manages the bulk of the nation's foreign investments, which are reported to have reached more than $30 billion. The country's wealth, coupled with its membership in the United Nations, Association of Southeast Asian Nations (ASEAN), the Asia Pacific Economic Cooperation (APEC) forum, and the Organization of the Islamic Conference give it an influence in the world disproportionate to its size.

Principal Government Officials

Last Updated: 11/12/08

Sultan: **HASSANAL Bolkiah, Sir**
Prime Min.: **HASSANAL Bolkiah, Sir**
Min. of Communications: **Awang ABU BAKAR bin Apong**
Min. of Culture, Youth, & Sports: **MOHAMMAD bin Daud, Gen. (Ret.)**
Min. of Defense: **HASSANAL Bolkiah, Sir**
Min. of Development: **ABDULLAH bin Begawan**
Min. of Education: **Abdul RAHMAN bin Mohamed Taib**
Min. of Energy: **YAHYA bin Begawan**
Min. of Finance: **HASSANAL Bolkiah, Sir**
Min. of Finance II: **ABDUL RAHMAN bin Ibrahim**
Min. of Foreign Affairs & Trade: **MOHAMED Bolkiah, Prince**
Min. of Foreign Affairs & Trade II: **LIM Jock Seng**
Min. of Health: **SUYOI bin Osman**
Min. of Home Affairs: **ADANAN bin Begawan**
Min. of Industry & Primary Resources: **AHMAD bin Jumat, Dr.**
Min. of Religious Affairs: **MOHD ZAIN bin Serudin, Dr.**
Senior Min. in the Prime Min.'s Office: **Al Muhtadee BILLAH, Crown Prince**
Ambassador to the US:
Permanent Representative to the UN, New York: **EMRAN bin Bahar**

Brunei Darussalam maintains an embassy in the United States at 3520 International Court, NW, Washington, DC 20008; tel. 202-237-1838.

ECONOMY

Brunei's economy enjoyed moderate growth in the mid-2000s, primarily due to high world oil and gas prices. Recently, Brunei's growth has fallen sharply. In 2007, the government reported a growth rate of 0.6%. Brunei continues to have one of the lowest GDP growth rates of any ASEAN nation.

Brunei is the third-largest oil producer in Southeast Asia, averaging

about 193,832 barrels a day in 2007. It also is the ninth-largest exporter of liquefied natural gas in the world. Like many oil producing countries, Brunei's economy has followed the swings of the world oil market. Economic growth has averaged around 2.8% in the 2000s, heavily dependent on oil and gas production. Oil production has averaged around 200,000 barrels a day during the 2000s, while liquefied natural gas output has been slightly under or over 1,000 trillion btu/day over the same period. Oil production has dropped slightly in recent years, and growth rates have fallen more significantly. Brunei is estimated to have oil reserves expected to last 25 years, and enough natural gas reserves to last 40 years.

Brunei Shell Petroleum (BSP), a joint venture owned in equal shares by the Brunei Government and the Royal Dutch/Shell group of companies, is the chief oil and gas production company in Brunei. It also operates the country's only refinery. BSP and four sister companies—including the liquefied natural gas producing firm BLNG—constitute the largest employer in Brunei after the government. BSP's small refinery has a distillation capacity of 10,000 barrels per day. This satisfies domestic demand for most petroleum products.

The French oil company Total (then known as ELF Aquitaine) became active in petroleum exploration in Brunei in the 1980s. The joint venture Total E&P Borneo BV currently produces approximately 35,000 barrels per day and 13% of Brunei's natural gas.

In 2003, Malaysia disputed Brunei-awarded oil exploration concessions for offshore blocks J and K (Total and Shell respectively), which led to the Brunei licensees ceasing exploration activities. Negotiations between the two countries are continuing in order to resolve the conflict. Two on-shore blocks are being explored following awards to two consortia—one Canadian-led and the other an Australian-led operating consortium. Australia, Indonesia, and Korea were the largest customers for Brunei's oil exports, taking over 67% of Brunei's total crude exports. Traditional customers Japan, the U.S., and China each took around 5% of total crude exports.

Almost all of Brunei's natural gas is liquefied at Brunei Shell's Liquefied Natural Gas (LNG) plant, which opened in 1972 and is one of the largest LNG plants in the world. Some 90% of Brunei's LNG produced is sold to Japan under a long-term agreement renewed in 1993. The agreement calls for Brunei to provide over 5 million tons of LNG per year to three Japanese utilities, namely to TEPCo, Tokyo Electric Power Co. (J.TER or 5001), Tokyo Gas Co. (J.TYG or 9531) and Osaka Gas Co. (J.OSG or 9532). The Japanese company, Mitsubishi, is a joint venture partner with Shell and the Brunei Government in Brunei LNG, Brunei Coldgas, and Brunei Shell Tankers, which together produce the LNG and supply it to Japan. Since 1995, Brunei has supplied more than 700,000 tons of LNG to the Korea Gas Corporation (KOGAS) as well. In 2007, total natural gas production reached 1.021 billion cubic feet per day. A small amount of natural gas is used for domestic power generation. Since 2001, Japan remains the dominant export market for natural gas. Brunei is the fourth-largest exporter of LNG in the world (according to the Brunei Economic Development Board) behind Indonesia, Malaysia, and Australia.

The government sought in the past decade to diversify the economy with limited success. Oil and gas and government spending still account for most of Brunei's economic activity. Brunei's non-petroleum industries include agriculture, forestry, fishing, aquaculture, and banking. The garment-for-export industry has been shrinking since the U.S. eliminated its garment quota system at the end of 2004. The Brunei Economic Development Board (BEDB) announced plans in 2003 to use proven gas reserves to establish downstream industrial projects. In 2006, the Brunei Methanol Company, a joint venture between Petroleum Brunei, Mitsubishi, and Itochu, was established. Initial construction on a $400 million methanol plant, fed by natural gas, was started in 2007 and the plant is expected to come on line in 2010. The government has plans to build a power plant in the Sungai Liang region to power a proposed aluminum smelting plant that will depend on foreign investors. A second major project depending on foreign investment is in the planning stage: a giant container hub at the Muara Port facilities. BEDB appointed a port operator, International Container Terminal Services Inc. (ICTSI) from the Philippines.

The government regulates the immigration of foreign labor out of concern it might disrupt Brunei's society. Work permits for foreigners are issued only for short periods and must be continually renewed. Despite these restrictions, the estimated 100,000 foreign temporary residents of Brunei make up a significant portion of the work force. The government reported a total work force of 188,000 in 2007, with a derived unemployment rate of 3.4%.

Oil and natural gas account for almost all exports. Since only a few products other than petroleum are produced locally, a wide variety of items must be imported. Nonetheless, Brunei has had a significant trade surplus in the 2000s. Official statistics show Singapore, Malaysia, Japan, the U.S., and China as the leading importers in 2006. The United States was the third-largest supplier of imports to Brunei in 2007.

Brunei's substantial foreign reserves are managed by the Brunei Investment Agency (BIA), an arm of the Ministry of Finance. BIA's guiding principle is to increase the real value of Brunei's foreign reserves while pursuing a diverse investment strategy, with holdings in the United States, Japan, Western Europe, and the Association of Southeast Asian Nations (ASEAN) countries.

The Brunei Government encourages more foreign investment. New enterprises that meet certain criteria can receive pioneer status, exempting profits from income tax for up to 5 years, depending on the amount of capital invested. The normal corpo-

rate income tax rate is 30%. There is no personal income tax or capital gains tax.

One of the government's priorities is to encourage the development of Brunei Malays as leaders of industry and commerce. There are no specific restrictions of foreign equity ownership, but local participation, both shared capital and management, is encouraged. Such participation helps when tendering for contracts with the government or Brunei Shell Petroleum.

Companies in Brunei must either be incorporated locally or registered as a branch of a foreign company and must be registered with the Registrar of Companies. Public companies must have a minimum of seven shareholders. Private companies must have a minimum of two but not more than 50 shareholders. At least half of the directors in a company must be residents of Brunei.

The government owns a cattle farm in Australia through which the country's beef supplies are processed. At 2,262 square miles, this ranch is larger than Brunei itself. Eggs and chickens are largely produced locally, but most of Brunei's other food needs must be imported. Agriculture, aquaculture, and fisheries are among the industrial sectors that the government has selected for highest priority in its efforts to diversify the economy.

Since 2002, the government has worked to develop Brunei as an international offshore financial center as well as a center for Islamic banking. Brunei is keen on the development of small and medium enterprises and has established a technology incubator to encourage the development of an information technology industry. Brunei has also promoted ecotourism to take advantage of the over 70% of Brunei's territory that remains primal tropical rainforest. Brunei is a participant and seeks to take a leadership role in the trilateral Heart of Borneo conservation initiative.

DEFENSE

The Sultan is both Minister of Defense and Supreme Commander of the Armed Forces (RBAF). All infantry, navy, and air combat units are made up of volunteers. There are three infantry battalions equipped with armored reconnaissance vehicles and armored personnel carriers and supported by Rapier air defense missiles and a flotilla of coastal patrol vessels armed with surface-to-surface missiles. Brunei ordered three offshore patrol vessels from the U.K. but is reportedly seeking to sell these to a third country. Brunei has ordered an unconfirmed number of smaller patrol vessels to replace its aging fleet, but the sale has not been finalized.

Brunei has a defense agreement with the United Kingdom, under which a British Armed Forces Ghurka battalion (1,500 men) is permanently stationed in Seria, near the center of Brunei's oil industry. The RBAF has joint exercises, training programs, and other military cooperation with the United Kingdom and many other countries, including the United States. The U.S. and Brunei signed a memorandum of understanding (MOU) on defense cooperation in November 1994. The two countries conduct an annual military exercise called CARAT.

FOREIGN RELATIONS

Brunei joined ASEAN on January 7, 1984—one week after resuming full independence—and gives its ASEAN membership the highest priority in its foreign relations. Brunei joined the UN in September 1984. It also is a member of the Organization of the Islamic Conference (OIC) and of the Asia-Pacific Economic Cooperation (APEC) forum. Brunei hosted the APEC Economic Leaders' Meeting in November 2000 and the ASEAN Regional Forum (ARF) in July 2002.

U.S.-BRUNEI RELATIONS

Relations between the United States and Brunei date from the 1800s. On April 6, 1845, the U.S.S. Constitution visited Brunei. The two countries concluded a Treaty of Peace, Friendship, Commerce and Navigation in 1850, which remains in force today. The United States maintained a consulate in Brunei from 1865 to 1867.

The U.S. welcomed Brunei Darussalam's full independence from the United Kingdom on January 1, 1984, and opened an Embassy in Bandar Seri Begawan on that date. Brunei opened its embassy in Washington in March 1984. Brunei's armed forces engage in joint exercises, training programs, and other military cooperation with the U.S. A memorandum of understanding on defense cooperation was signed on November 29, 1994. The Sultan visited Washington in December 2002 and visited the Pacific Command in Hawaii with Ambassador William E. Todd in November 2008.

TRAVEL

Consular Information Sheet

October 9, 2008

Country Description: Brunei Darussalam is a small Islamic Sultanate on the northwest coast of the Island of Borneo. It is divided into four districts, namely Brunei/Muara, Tutong, Belait and Temburong. The capital, Bandar Seri Begawan, is its only major city. Brunei's official language is Malay but English is widely understood and used in business. Tourist facilities and services are generally available throughout the country. For more information concerning Brunei, please see the Government of Brunei website at http://www.brunei.gov.bn.

Entry Requirements: U.S. passport-holders must have at least six months' validity remaining on their passport before entering Brunei for business or pleasure and are required to obtain a visa prior to arrival in Brunei for visits of 90 days or longer. Diplomatic and official passport-holders are also required to apply for a visa to enter Brunei Darussalam. There is an airport departure tax. For further information about entry or exit requirements, travelers may consult the Consular Section of the Embassy of Brunei, 3520 International Court NW, Washington, DC 20008, tel. (202) 237-1838, or visit the Embassy of Brunei web site at http://www.bruneiembassy.org for the most current visa information.

As of June 12, 2004, immigration offenses are punishable by caning. Workers who overstay their visas can face jail sentences and three strokes of the cane. Those associated with violators, such as contractors or employers, are subject to the same penalties if the violator is found guilty.

Safety and Security: Following the October 2002, August 2003, September 2004 and October 2005 terrorist bombings in Indonesia, the Department of State continues to be concerned that terrorist groups such as Jemaah Islamiyah (JI) that have transnational capability to carry out terrorist attacks may do so in various Southeast Asian nations, including Brunei. JI is known to have cells operating in Southeast Asia and to have connections with Al-Qaeda and other regional terrorist groups. JI also has been tied to previous regional terrorist attacks. As security is increased at official U.S. facilities, terrorists will seek softer targets. These may include, but are not limited to, facilities where Americans and other Westerners are known to live, congregate, shop or visit, including, but not limited to, hotels, clubs, restaurants, shopping centers, housing compounds, transportation systems, places of worship, schools or outdoor recreation events. Americans in Brunei should continue to be vigilant with regard to their personal security, maintain a low profile, vary times and routes during their daily routines and report any suspicious activity to the local police or to the U.S. Embassy's Regional Security Officer, who can be reached at the phone number listed at the end of this information sheet.

For the latest security information, Americans traveling abroad should regularly monitor the Department's Internet web site where the current Worldwide Caution Travel Alert, Travel Warnings and Travel Alerts can be found. Up-to-date information on security can also be obtained by calling 1-888-407-4747 toll free in the United States and Canada, or, for callers outside the United States and Canada, a regular toll line at 1-202-501-4444. These numbers are available from 8:00 a.m. to 8:00 p.m. Eastern Standard Time, Monday through Friday (except U.S. federal holidays).

Crime: Though there is some crime, violent crime is rare. Burglaries and theft is on the rise. Americans are reminded to be prudent in their own personal security practices.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, contact family members or friends and explain how funds could be transferred.

Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

In Brunei, the local equivalents to the "911" emergency line are: 993 for Brunei Police, 955 for Fire & Rescue and 998 for Search & Rescue.

Medical Facilities and Health Information: There is adequate care for basic medical conditions in Brunei; however, due to unpredictable shortages of materials and uncertain support staff, elective surgery or complicated care is best obtained in Singapore or elsewhere.

Brunei has imposed HIV/AIDS travel restrictions as part of a ban on communicable diseases. In October 2003, Ministry of Health (MOH) of Brunei Darussalam required all travelers entering Brunei to fill out a Health Declaration Card and submit it to the Officer-In-Charge (MOH) upon disembarkation. Under Section 7, Infectious Diseases Order 2003 of MOH, travelers may be subjected to a medical examination upon arrival in Brunei Darussalam. Travelers also may be quarantined if infected or suspected to be infected with infectious disease or in if travelers have had contacted with such a person, under Section 15, Infectious Diseases Order 2003 of Ministry of Health Brunei. Please inquire directly with the Embassy of Brunei at http://www.bruneiembassy.org before you travel.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling

abroad to confirm whether their policy applies overseas and if it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning road and driving conditions in foreign countries is provided for general reference only, and it may not be totally accurate in a particular location or circumstance.

Brunei has an extensive network of roads of generally good though varying quality throughout the country that includes highways, link roads, flyovers and roundabouts. Holders of foreign driving license are permitted to drive in Brunei Darussalam for 90 days only. For longer stays a foreign driving license must be endorsed to a Brunei driving license at any Land Transport Department office. Drivers must obey traffic rules at all the times and should take extra caution when approaching traffic signals. In urban areas, some local drivers have run through red lights resulting in several deadly accidents in recent years.

Aviation Safety Oversight: The U.S. Federal Aviation Administration (FAA) has assessed Brunei's Department of Civil Aviation as being in compliance with International Civil Aviation Organization (ICAO) aviation safety standards for oversight of Brunei's air carrier operations. For more information, travelers may visit the FAA's Internet web site at http://www.faa.gov.

Immigration Violations: Americans in Brunei are subject to the laws of the country and may be arrested for violation of the new immigration regulations, or any other law. In such cases, the Embassy will provide consular services to American citizens arrested in Brunei, in accordance with international law and U.S. regulations. However, the Embassy may not intervene in local judicial matters. Americans should be aware that the new immigration law is more stringent and less flexible than the previous one, with harsher penalties.

The Embassy strongly recommends that U.S. citizens on contract in Brunei be fully aware of their immigration status and of crucial dates regarding contract extensions and renewals, and have their employment documents in order. It would be wise to apply the same approach to any personal and domestic staff they may have hired, to ensure that they, too, do not run afoul of Brunei immigration regulations.

Dual Nationality: Brunei does not recognize or permit dual nationality. Brunei nationals are expected to enter and exit on their Brunei passports. Should Brunei authorities learn that a person is a dual national, they may require renunciation of United States or Brunei citizenship immediately.

Customs Regulations: Brunei customs authorities may enforce strict regulations concerning temporary importation into or export of items such as firearms, religious materials, antiquities, medications, business equipment, currency restrictions, ivory and alcohol. For non-Muslims, limited amounts of alcohol for personal consumption are permitted. It is advisable to contact the Embassy of Brunei in Washington, D.C. for specific information regarding customs requirements. In many countries around the world, counterfeit and pirated goods are widely available. Transactions involving such products are illegal and bringing them back to the United States may result in forfeitures and/or fines.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating Brunei laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession or use of, or trafficking in illegal drugs in Brunei are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in Brunei are encouraged to register with the nearest U.S. embassy or consulate through the State Department's travel registration web site so that they can obtain updated information on travel and security within Brunei. Americans without Internet access may register directly with the nearest U.S. embassy or consulate. By registering, American citizens make it easier for the embassy or consulate to contact them in case of emergency. The U.S. Embassy is located on the 3rd floor, Teck Guan Plaza, at the corner of Jalan Sultan and Jalan McArthur, Bandar Seri Begawan BS 8811, Brunei Darussalam. Mail sent from the United States can be addressed to the Embassy's address: American Embassy, P.O. Box 2991, Bandar Seri Begawan BS8675, Negara Brunei Darussalam. The telephone number is 673-222-0384, fax number (673) (2) 225-293 and e-mail address amEmbassy_BSB@state.gov. The Consular section's e-mail address is: ConsularBrunei@state.gov. The Embassy's after-hours number for emergency calls is (673) (8) 730-691.

BULGARIA

Compiled from the July 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Republic of Bulgaria

PROFILE

Geography

Area: 110,910 sq. km. (slightly larger than Tennessee).
Cities: Capital—Sofia 1.2 million. Others: Plovdiv—368,568, Varna—349,482.
Terrain: Bulgaria is located in South Central Europe. The terrain is varied, containing large mountainous areas, fertile valleys, plains and a coastline along the Black Sea.
Climate: Continental—mild summers and cold, snowy winters.

People

Population: (2007) 7,640,238.
Growth rate: (2007) -0.50%.
Ethnic groups: (2001) Bulgarian 83.94%, Turkish 9.42%, Roma 4.68%, and other 2% (including Macedonian, Armenian, Tatar, Circassian).
Religions: (2001) Bulgarian Orthodox 82.6%, Muslim 12.2%, Roman Catholic 0.6%, Protestant 0.5%, others.
Languages: Bulgarian 84.5%, other 15.5%.
Health: Life expectancy (2006)—male 68.68 years; female 76.13 years. Infant mortality rate (2006)—19.85 deaths/1,000 live births.
Work force: (2007 est.) 4.817 million. Agriculture—11%; industry—32.7%; services—32% (3rd qtr. 2004 est.).

Government

Type: Parliamentary democracy.
Constitution: Adopted July 12, 1991.
Independence: 1908 (from the Ottoman Empire).
Government branches: Executive—president (chief of state), prime minister (head of government), Council of Ministers (cabinet). Legislative—unicameral National Assembly or Narodno Subranie—240 seats. Members are elected by popular vote of party/coalition lists of candidates for 4-year terms. As of January 2008, seat allocation is as follows: CfB—82, NMSS—36, MRF—34, UDF—16, DSB—16, BND—16, BPU—13, Ataka—11, and independents—16. Judicial—three-tiered system.
Political subdivisions: 28 provinces plus the capital region of Sofia.
Suffrage: Universal at 18 years of age.
Political parties: Coalition of Bulgaria or CfB (coalition of parties dominated by BSP); Bulgarian Socialist Party (BSP); National Movement Simeon II (NMSS); Movement for Rights and Freedoms (MRF); United Democratic Forces (UDF); Democrats for Strong Bulgaria (DSB); Bulgarian Peoples Union (BPU); Bulgarian New Democracy or BND (a parliamentary group formed by NMSS defectors); Attack Coalition (ATAKA); and Citizens for the European Development of Bulgaria (GERB). Results from the June 25, 2005 general election are as follows: CfB 31.1%, NMSS 19.9%, MRF 12.7%, ATAKA 8.2%, UDF 7.7%, DSB 6.5%, BPU 5.2%.

Economy

GDP: (2007 est.) $41 billion.
Real GDP growth: 6.2% (2007); 6.3% (2006); 5% (2005); 6% (2004); 5.6& (2003).
Per capita GDP: (PPP, 2007 est.) $11,300.
Inflation rate: 12.5% (2007), 6.5% (2006); 5% (2005); 6% (2004); 5.6% (2003).
Unemployment rate: 7.7% (2007 average), 6.62% (November 2007), 9.61% (2006 average); 11.5% (2005); 12.7% (2004 average); 14.25% (2003 average).
Natural resources: Bauxite, copper, lead, zinc, coal, and timber.
Exchange rate: Lev per $1 U.S.=1.42 (2007 average); 1.56 (2006 average); 1.57 (2005 average); 1.58 (2004 average); 1.73 (2003 average).

GEOGRAPHY AND PEOPLE

Bulgaria shares a border with Turkey and Greece to the south, Macedonia and Serbia to the west, Romania to the north, and the Black Sea to the east.

The capital, Sofia, lies in the western region of the country. Ethnic groups

include Bulgarian, Turkish, Roma, and others. The official language is Bulgarian.

HISTORICAL HIGHLIGHTS

Ancient Thrace was partially located on the territory of modern Bulgaria, and Thracian culture provides a wealth of archeological sites within Bulgaria. In the second century A.D., the Bulgars came to Europe from their old homeland, the Kingdom of Balhara situated in the Mount Imeon area (present Hindu Kush in northern Afghanistan).

The first Bulgarian state was established in 635 A.D., located along the north coast of the Black Sea. In 681 A.D. the first Bulgarian state on the territory of modern Bulgaria was founded. This state consisted of a mixture of Slav and Bulgar peoples. In 864, Bulgaria adopted Orthodox Christianity. The First Bulgarian Kingdom, considered to be Bulgaria's "Golden Age," emerged under Tsar Simeon I in 893-927. During this time, Bulgarian art and literature flourished. Followers of Saints Cyril and Methodius are believed to have developed the Cyrillic alphabet in Bulgaria in the early 10th century.

In 1018, the Byzantine Empire conquered Bulgaria. In 1185 the Bulgarians broke free of Byzantine rule and established the Second Bulgarian Kingdom. A number of Bulgaria's famous monasteries were founded during this period. Following the 1242 Mongol invasion, this kingdom began losing territory to its neighbors. Ottoman expansion into the Balkan Peninsula eventually reached Bulgaria, and in 1396 Bulgaria became part of the Ottoman Empire. During the five centuries of Ottoman rule, most of Bulgaria's indigenous cultural centers were destroyed. Several Bulgarian uprisings were brutally suppressed and a great many people fled abroad. The April uprising of 1876, the Russo-Turkish War (1877-78), and the Treaty of San Stefano (March 3, 1878, the date of Bulgaria's national holiday), began Bulgaria's liberation from the Ottoman Empire, but complete independence was not recognized until 1908.

During the first half of the 20th century, Bulgaria was marred by social and political unrest. Bulgaria participated in the First and Second Balkan Wars (1912 and 1913) and sided with the Central Powers, and later the Axis Powers, during the two World Wars. Although allied with Germany during World War II, Bulgaria never declared war on the Soviet Union and never sent troops abroad to fight under Nazi command. Near the end of World War II, Bulgaria changed sides to fight the German army all the way to Austria; 30,000 Bulgarian troops were killed.

Bulgaria had a mixed record during World War II, when it was allied with Nazi Germany under a March 1941 agreement. The Law for the Protection of the Nation, enacted in January 1941, divested Jews of property, livelihood, civil rights, and personal security. Despite a February 1943 agreement requiring Bulgaria to transfer Bulgaria's Jews to Nazi extermination camps in Poland, Bulgaria did not actually deport any Bulgarian Jews or Roma to Nazi concentration camps. Under that agreement, however, Bulgarian forces transferred approximately 11,000 Jews from Bulgarian-occupied territory (Thrace and Macedonia) to Nazi concentration camps. In June 1943 the government "re-settled" Sofia's 25,000 Jews to rural areas. Tsar Boris—supported by the parliament (especially its prominent Deputy Speaker, Dimitar Peshev), the Orthodox Church, and the general public—aided the Jewish community and helped its 50,000 members survive the war, despite harsh conditions. The Bulgarian Jews remained safe, and when they were permitted to emigrate to Israel after the war, most of them did.

King Simeon II assumed control of the throne in 1943 at the age of six following the death of his father Boris III. With the entry of Soviet troops into Bulgaria in September 1944 and the defeat of the Axis Powers in World War II, communism emerged as the dominant political force within Bulgaria. Simeon, who later returned and served as Prime Minister, was forced into exile in 1946 and resided primarily in Madrid, Spain. By 1946, Bulgaria had become a satellite of the Soviet Union, remaining so throughout the Cold War period. Todor Zhivkov, the head of the Bulgarian Communist Party, ruled the country for much of this period. During his 27 years as leader of Bulgaria, democratic opposition was crushed; agriculture was collectivized and industry was nationalized; and the Bulgarian Orthodox Church fell under the control of the state.

In 1989, Zhivkov was removed from power, and democratic change began. The first multi-party elections since World War II were held in 1990. The ruling communist party changed its name to the Bulgarian Socialist Party and won the June 1990 elections. Following a period of social unrest and passage of a new constitution, the first fully democratic parliamentary elections were held in 1991 in which the Union of Democratic Forces won. The first direct presidential elections were held the next year.

As Bulgaria emerged from the throes of communism, it experienced a period of social and economic turmoil that culminated in a severe economic and financial crisis in late 1996-early 1997. With the help of the international community, former Prime Minister Ivan Kostov initiated a series of reforms in 1997 that helped stabilize the country's economy and put Bulgaria on the Euro-Atlantic path. Elections in 2001 ushered in a new government and president. In July 2001, Bulgaria's ex-king Simeon Saxe-Coburg-Gotha became the first former monarch in post-communist Eastern Europe to become Prime Minister. His government continued to pursue Euro-Atlantic integration, democratic reform, and development of a market economy. Bulgaria became a member of the North Atlantic Treaty Organization on March 29, 2004, and a member of the European Union on January 1, 2007.

Following June 2005 general elections, Sergei Stanishev of the Bulgarian Socialist Party became the new Prime Minister of a coalition government on August 16, 2005. In October 2006, Georgi Parvanov, the former leader of the Bulgarian Socialist Party, became the first Bulgarian president to win re-election. Despite his limited constitutional powers, President Parvanov has played an important role in helping to ensure a consistent, pro-Western foreign policy. The Stanishev government has continued Bulgaria's integration with the Euro-Atlantic world and its close partnership with the U.S. Bulgaria is attracting large amounts of American and European investment, and is an active partner in coalition operations in Iraq and Afghanistan as well as in UN-led peacekeeping operations in the Balkans.

GOVERNMENT AND POLITICAL CONDITIONS

Bulgaria is a parliamentary republic. The unicameral National Assembly, or Narodno Subranie, consists of 240 deputies who are elected for 4-year terms through a system of proportional representation in 31 electoral regions. Party or coalition lists, rather than individual candidate names, appear on the ballots. A party or coalition must garner a minimum of 4% of the vote to enter parliament. Parliament selects and dismisses government ministers, including the prime minister, exercises control over the government, and sanctions deployment of troops abroad. It is responsible for enactment of laws, approval of the budget, scheduling of presidential elections, declaration of war, and ratification of international

treaties and agreements. A one-month official campaign period precedes general elections. The voting age is 18. Preliminary results are available within hours of poll closings. Seats in parliament are allocated both by vote and by voter turnout. The votes for parties who did not receive a minimum threshold of votes are redistributed to other parties proportionate to their own share of the vote. The lists of newly elected members of parliament are announced 7 days after the elections. The president must convene the new parliament within one month after the elections, and calls upon parties, coalitions, or political groups to nominate a prime minister and form a government. If the three largest parties, coalitions, or political groups fail to nominate a prime minister, the president can dissolve parliament and schedule new elections. In recent years, it has taken approximately a month for the new government to form.

A general election in Bulgaria was held June 25, 2005. Results are as follows: Coalition for Bulgaria (CfB) 31.1%, National Movement Simeon II (NMSS) 19.9%, Movement for Rights and Freedom (MRF) 12.7%, Ataka 8.2%, United Democratic Forces (UDF) 7.7%, Democrats for Strong Bulgaria (DSB) 6.5%, Bulgarian People's Union (BPU) 5.2%.

In May 2007, Bulgaria held its first elections for members of the European Parliament. The GERB (Citizens for European Development of Bulgaria) party, led by Sofia Mayor Boyko Borisov, won the vote by a narrow margin over the Socialists (BSP) and secured 5 out of 18 seats. The BSP won 5 seats, the MRF won 4 seats, Ataka won 3 seats, and Simeon Saxe-Coburg Gotha's NMSS won 1 seat. The president of Bulgaria is directly elected for a 5-year term with the right to one re-election. The president serves as the head of state and commander in chief of the armed forces. The president is the head of the Consultative Council for National Security and while unable to initiate legislation, the president can return a bill for further debate. Parliament can overturn the president's veto with a simple majority vote. Bulgarian Socialist Party candidate Georgi Parvanov won the November 2001 presidential election and was re-elected in October 2006 as an independent candidate in a run-off against Volen Siderov, the leader of extreme nationalist Ataka Party. The prime minister is head of the Council of Ministers, which is the primary component of the executive branch. In addition to the prime minister and deputy prime ministers, the Council is composed of ministers who head the various agencies within the government and usually come from the majority/ruling party or from a member party of the ruling coalition in parliament. The Council is responsible for carrying out state policy, managing the state budget and maintaining law and order. The Council must resign if the National Assembly passes a vote of no confidence in the Council or prime minister.

The Bulgarian judicial system became an independent branch of the government following passage of the 1991 constitution. Reform within this branch has been slow with political influence, widespread corruption, and long delays continuously plaguing the system. In 1994, the National Assembly passed the Judicial Powers Act to further delineate the role of the judiciary. In 2003, Bulgaria adopted amendments to the constitution, which aimed to improve the effectiveness of the judicial system by limiting magistrates' irremovability and immunity against criminal prosecution.

The trial, appellate, and cassation (highest appellate) courts comprise the three tiers of the judicial system. Military courts (at trial and appeal level) handle cases involving military and Ministry of Interior personnel. Administrative courts, effective since March 2007, specialize in reviewing appeals of government acts.

The Supreme Administrative Court and the Supreme Court of Cassation are the highest courts of appeal and determine the application of all laws.

The Supreme Judicial Council (SJC) is composed of 25 members serving 5-year terms. Those who serve on the council are experienced legal professionals and are either appointed by the National Assembly, selected by the judicial system, or serve on the SJC as a result of their position in government. The SJC manages the judiciary and is responsible for appointing judges. In 2007 parliament revised the Judicial Powers Act to make it compliant with the latest constitutional amendments, which provided for the establishment of the Inspectorate with the Supreme Judicial Council: a standing body with 11 members who investigate complaints of magistrates' misconduct, with no right to rule on the substance of judicial acts.

The Supreme Court of Administration and Supreme Court of Cassation are the highest courts of appeal and determine the application of all laws.

The Constitutional Court, which is separate from the rest of the judiciary, interprets the constitution and constitutionality of laws and treaties. Its 12 justices serve 9-year terms and are selected by the president, the National Assembly, and the Supreme Courts.

Bulgaria maintains an embassy in the United States at 1621 22nd Street, NW, Washington DC 20008 (tel. 202-387-0174; fax: 202-234-7973).

ECONOMY

Bulgaria's economy contracted dramatically after 1989 with the collapse of the COMECON system and the loss of the Soviet market, to which the Bulgarian economy had been closely tied. The standard of living fell by about 40%. In addition, UN sanctions against Yugoslavia and Iraq took a heavy toll on the Bulgarian economy. The first signs of recovery emerged when GDP grew in 1994 for the first time since 1988, by 1.4% and then by 2.5% in 1995. Inflation, which surged in 1994 to 122%, fell to 32.9% in 1995. During 1996, however, the economy collapsed due to short-sighted economic reforms and an unstable and de-capitalized banking system.

Under the leadership of former Prime Minister Ivan Kostov (UDF), who came to power in 1997, an ambitious set of reforms were launched, including introduction of a currency board regime, bringing growth and stability to the Bulgarian economy. The currency board contained inflationary pressures and the three-digit inflation in 1997 was cut to only 1% in 1998. Following declines in GDP in both 1996 and 1997, the Bulgarian Government has delivered strong, steady GDP growth in real terms in recent years. Prime Minister Simeon Saxe-Coburg's economic team of young, Western-educated financiers continued to implement measures that helped sustain stable economic growth and curb unemployment. Measures introduced by the government were targeted at reducing corporate and individual taxes, curtailing corruption, and attracting foreign investment. The government also restructured the country's foreign debt, revived the local stock market, and moved ahead with long-delayed privatization of some major state monopolies. As a result of this progress, in October 2002 the European Commission declared Bulgaria had a "Functioning Market Economy."

Bulgaria's current government has continued these reforms, and in 2007 the country joined the European Union. According to the World Bank, in 2006 Bulgaria attracted the highest levels of foreign direct investment, as a share of GDP, among Eastern European countries. A growing current-account deficit (21.5% of GDP at the end of 2007) and excessive reliance on foreign capital inflow render the economy vulnerable to external shocks. The international financial crisis led to a new flow of investment which could barely cover the current-account deficit in 2007—at 98.2%. In early 2007, to attract additional foreign investment, the Bulgarian Government lowered corporate tax rates to 10%, reportedly the lowest rate in Europe. A flat-tax rate of 10% for personal income, in place as of January 1, 2008, will further decrease domestic labor costs and help reduce the share of the "gray" economy. In response to local governments' demand for financial independence in 2006, parliament passed fiscal decentralization of municipalities, granting them authority over collection and administration of some taxes, thus further enhancing local economic stability. Despite Bulgaria's many marked successes, organized crime and corruption remain problems.

DEFENSE

Bulgaria became a member of NATO on March 29, 2004 after depositing its instruments of treaty ratification. Bulgaria's military is currently undergoing an ambitious restructuring program aimed to bring the army up to NATO standards and modernize equipment. In 2007, constitutional amendments annulled military conscription, thus allowing the Bulgarian army's transformation to an all-volunteer force.

Bulgaria has been an active participant in military operations outside its borders. It currently has company-sized units working with coalition forces in Afghanistan and Iraq and has maintained small contingents of troops deployed with international forces in Bosnia and Herzegovina and Kosovo. It deployed a frigate to Lebanon with UNIFIL in late 2006 and has several military observers serving in support of United Nations missions in Ethiopia, Liberia, and Kosovo. Bulgaria has also expressed its intent to send military observers to Chad in support of the European Union mission.

FOREIGN RELATIONS

Bulgaria became a member of the North Atlantic Treaty Organization on March 29, 2004, and a member of the European Union on January 1, 2007. Bulgaria is a member of the United Nations and in 2002-2003 served a 2-year term as a nonpermanent member on the UN Security Council. Bulgaria served as Chair-In-Office of the Organization for Security and Cooperation in Europe (OSCE) in 2004.

Bulgaria joined the World Trade Organization in 1996. In July 1998, Bulgaria became a full member of the Central European Free Trade Agreement (CEFTA), which called for the reduction of tariffs by 2002 on most industrial and agricultural goods traded between CEFTA countries. Bulgaria has initialed free trade agreements with Turkey, Macedonia, Croatia, Lithuania, Estonia, Israel,

Albania, and Latvia. Bulgaria's relationship with its neighbors has generally been good. Bulgaria has proven to be a constructive force in the region and has played an important role in promoting regional security. Pursuing its initiative as a partner in the South-East European regional cooperation, Bulgaria has taken over the chairmanship-in-office of the South-East European Cooperation Process (SEECP) for the period May 2007-May 2008.

U.S.-BULGARIAN RELATIONS

The year 2003 marked the 100th anniversary of diplomatic relations between the United States and Bulgaria. U.S.-Bulgarian relations were severed in 1950 but were restored a decade later. Bilateral relations between the two nations improved dramatically after the fall of communism. The United States moved quickly to encourage development of multi-party democracy and a market economy. The U.S. signed a Bilateral Investment Treaty in 1994 and gave Bulgaria most-favored-nation trade status in October 1996.

In 1989, the U.S. Congress passed the Support for East European Democracies Act (SEED), authorizing financial support to facilitate development of democratic institutions, political pluralism, and free market economies in the Balkan region. Since 1990, Bulgaria has received over $600 million in SEED assistance. In 2007, after its EU accession, Bulgaria graduated from the SEED program.

In May 2005 the United States and the Republic of Bulgaria signed a defense cooperation agreement, which gives the United States military access to and shared use of several Bulgarian military facilities. The United States military intends to use this access to facilitate joint training with the Bulgarian and Romanian militaries. In February 2007, Bulgaria and the United States signed a treaty on avoidance of double taxation that is expected to further promote U.S. investment in Bulgaria. In June 2008, Bulgaria and the United States signed a weapons of mass destruction agreement and a Second Line of Defense agreement, both of which facilitate greater cooperation in preventing the proliferation of weapons and trafficking of illicit material.

American citizens traveling on a U.S. passport for business or tourism purposes can enter and stay in Bulgaria for up to 90 days in a 6-month period without requiring issuance of a visa.

Bulgaria hosts the only fully American university in the region, the American University of Bulgaria in Blagoevgrad, established in 1991, drawing students from throughout southeast Europe and beyond. As of 2007, the American University of Bulgaria had over 1,000 students.

In June 2007, President Bush visited Sofia following the first visit of a U.S. President, Bill Clinton, in 1999.

TRAVEL

Consular Information Sheet

November 21, 2008

Country Description: Bulgaria is a quickly developing European nation undergoing significant economic changes. Tourist facilities are widely available, although conditions vary and some facilities may not be up to Western standards. Goods and services taken for granted in other European countries may not be available in many areas of Bulgaria.

Entry Requirements: A United States passport is required for U.S. citizens who are not also Bulgarian nationals. U.S. citizens who enter the country without a Bulgarian visa are authorized to stay for a total of 90 days within a six-month period. This law is strictly enforced. An application to extend one's stay beyond the original 90 days can be filed for urgent or humanitarian reasons, but must be submitted to regional police authorities no later than five days prior to the end of the original 90-day period. Travelers who have been in the country for 90 days, and then leave, will not be able to re-enter Bulgaria before the six-month period expires. Travelers using official or diplomatic passports must secure visas prior to arrival. Upon entering the country, Bulgarian immigration authorities request that all foreigners declare the purpose of their visit and provide their intended address.

For further information concerning entry requirements, travelers should contact the Embassy of the Republic of Bulgaria at 1621 22nd Street NW, Washington, DC 20008; http://www.bulgaria-embassy.org; tel. (202) 387-7969 (main switchboard (202)

387-0174), or the Bulgarian Consulate in New York City at 121 East 62nd Street, New York, NY 10021; http://www.consulbulgaria-ny.org; tel. (212) 935-4646.

U.S. citizens intending to live or work in Bulgaria for more than 90 days within six months (or more than six months within a year) must obtain a "D" visa prior to arrival. As of July 2008, U.S. citizens must apply for a "D" visa at a Bulgarian Embassy/ Consulate in the country where they are legally resident. U.S. citizens residing in the United States must therefore apply at the Bulgarian representative office (either the Embassy or a Consulate) nearest their home. If an American citizen residing in the U.S. is already present in Bulgaria—having entered as a tourist, for example—and wishes to obtain a "D" visa to remain for an extended period, he or she will have to return to the U.S. to do so. Additionally, an American citizen married to a Bulgarian national must present his/her marriage license when applying for "D" visa at a Bulgarian Embassy or Consulate.

The Bulgarian authorities do not consider presentation of a copy of the passport sufficient for identification purposes. Visitors should carry their original passports with them at all times. This is not a requirement for U.S. citizens who hold residence permits for Bulgaria.

Traveling with Bulgarian minors: Bulgarian authorities are particularly strict in matters involving the travel of Bulgarian children. Adults, other than a child's parents, departing Bulgaria with a Bulgarian national (including dual or multinational Bulgarian) child, must present to authorities a certified/ legalized declaration signed by the child's parents authorizing custody for travel purposes. This holds true even if the adult is otherwise related to the child. If the declaration is signed in Bulgaria, certification by a Bulgarian notary public is required. If signed in the U.S., the declaration must be certified by a notary public and the court in the jurisdiction where the notary is licensed. The declaration must then be legalized with an apostille issued by the individual state's Department of State or the Governor's office. Please note Bulgarian authorities do not require such documentation for minors who are not Bulgarian.

Safety and Security: While Bulgaria's accession to the European Union has enhanced the overall security environment for tourist and business travelers, violence related to criminal groups occurs sporadically in public locations.

In September 2008 the U.S. Embassy warned of the increasing incidence of violent criminal activity at "gentlemen's clubs" in Sofia and encouraged Americans to avoid such clubs. Recent incidents include two bombings and a shooting in August and September, one of which seriously injured several people. Local authorities reported these incidents likely resulted from turf wars between rival organized crime syndicates.

These syndicates are highly prevalent in Bulgaria's largely cash economy. Suspected organized crime members often travel in convoys of late-model SUVs and luxury sedans, accompanied by armed men, and frequent expensive restaurants, hotels, and nightclubs.

For the latest security information, Americans traveling abroad should regularly monitor the Department's Internet web site at http://travel.state.gov, where the current Worldwide Caution Travel Alert, Travel Warnings and Travel Alerts can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S. and Canada, or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: Pick-pocketing and purse snatching are frequent occurrences, especially in crowded markets, shopping streets, and the busiest tram and bus lines. Con artists operate on public transportation and in bus and train stations. Credit cards and ATMs should be used with caution. Be wary of people who approach you at an ATM and offer assistance. Do not give your PIN to anyone under any circumstances (See the Special Circumstances section below). Travelers should be suspicious of "instant friends" and should also require persons claiming to be government officials to show identification. There have been incidents in which tourists have been drugged or assaulted and robbed after accepting offers of coffee or alcoholic beverages from "friendly" individuals met by "chance" at hotels, the airport, or at bus or train stations. Travelers should be wary of unfamiliar individuals who encourage them to drink or eat products, as these may be tainted with strong tranquilizers (such as valium) that can lead rapidly to unconsciousness. Reporting a crime immediately to the police has helped recover money and valuables on more than one occasion and is recommended. To avoid becoming a victim of more serious crimes, one should use the same personal safety precautions that they would use in large urban areas of the United States.

Travelers should pay special attention to the drink prices at high-end bars and nightclubs. There have been instances of travelers being charged exorbitant prices, especially for champagne and hard alcohol. Bills have been as high as several thousand dollars for drinks, and in some establishments the management may use force to secure payment.

On occasion, taxi drivers overcharge unwary travelers, particularly at Sofia Airport and the Central Train Station. We recommend travelers use taxis with meters and clearly marked rates displayed on a sticker on the passenger side of the windshield. Travelers should be aware that there is no official commission that sets taxi cab rates. Taxi drivers are within their full rights to charge passengers any price they want, provided that it corresponds with the price shown on the windshield sticker. At the airport, there is a clearly marked booth within the arrivals terminal, which arranges for metered taxis at a fair rate. Finding reputable taxis at the Central Train Station is more difficult. It is recommended to inquire

about the fare first, to avoid excessive payment if a metered taxi cannot be found. Always ensure that you have and account for all luggage, packages and hand-carried items before you pay and release a taxi. The likelihood of retrieving articles left behind in a taxi is remote. Because pilferage of checked baggage may occur at Sofia Airport, travelers should not include items of value in checked luggage.

Automobile theft is a concern, with four-wheel-drive vehicles and late model European sedans being the most popular targets. Very few vehicles are recovered. Thieves smash vehicle windows to steal valuables left in sight. Break-ins at residential apartments occur as frequently as in major cities everywhere. Persons who plan to reside in Bulgaria on a long-term basis should take measures to protect their dwellings. Long-term residents should consider installation of window grilles, steel doors with well-functioning locks, and an alarm system that alerts an armed response team.

Travelers should also be cautious about making credit card charges over the Internet to unfamiliar web-sites. As recent experience has shown, offers for merchandise and services may be scam artists posing as legitimate businesses. A recent example involves Internet credit card payments to alleged tour operators via Bulgaria-based web sites. In several cases, the corresponding businesses did not actually exist.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed. The local equivalent to the "911" emergency line in Bulgaria is 112.

Medical Facilities and Health Information: While Bulgarian physicians are trained to a very high standard, most hospitals and clinics, especially in village areas, are generally not equipped and maintained to meet U.S. or Western European standards. Basic medical supplies and over-the-counter and prescription medications are widely available, but highly specialized treatment may not be obtainable. Pediatric facilities are in need of funding and lack equipment. Serious medical problems requiring hospitalization and/or medical evacuation to the United States may cost thousands of dollars. Doctors and hospitals often expect immediate cash payment for health services.

The U.S. Department of State is unaware of any HIV/AIDS entry restrictions for visitors to or foreign residents of Bulgaria.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's Internet site at http://wwwn.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith/en.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation. All foreign citizens traveling to Bulgaria should be prepared to present valid evidence of health insurance to the Bulgarian border authorities in order to be admitted into the country. The insurance should be valid for the duration of the traveler's stay in Bulgaria.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Bulgaria is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

The Bulgarian road system is largely underdeveloped. There are few sections of limited-access divided highway. Some roads are in poor repair and full of potholes. Rockslides and landslides may be encountered on roads in mountainous areas. Livestock and animal-drawn carts present road hazards throughout the country, especially during the agricultural season. Travel conditions deteriorate during the winter as roads become icy and potholes proliferate. The U.S. Embassy in Sofia advises against driving at night because road conditions are more dangerous in the dark. Some roads lack pavement markings and lights, and motorists often drive with dim or missing headlights.

Driving in Bulgaria is extremely dangerous. Aggressive driving habits, the lack of safe infrastructure, and a mixture of late model and old model cars on the country's highways contribute to a high fatality rate for road accidents. Motorists should avoid confrontations with aggressive drivers in Bulgaria. In particular, drivers of late-model sedans are known to speed and drive dangerously. Motorists should exercise caution and avoid altercations with the drivers of such vehicles, which may be driven by armed organized crime figures. In some cities traffic lights late at night blink yellow in all directions, leaving rights-of-way unclear and contributing to frequent accidents.

Heavy truck traffic along the two-lane routes from the Greek border at Kulata to Sofia and from the Turkish border at Kapitan Andre to Plovdiv creates numerous hazards. Motorists should expect long delays at border

crossings. A U.S. state driver's license is valid in Bulgaria only when used in conjunction with an International Driving Permit. For information on how to obtain a permit, please see our Road Safety Overseas information.

If pulled over by a police officer, motorists should be aware that, under a recently changed Bulgarian law, police officers may collect fines on the spot.

The use of seat belts is mandatory in Bulgaria for all passengers, except pregnant women. Children under 12 years of age may ride in the front seat only if seated in a child car seat. In practice, these rules are often not followed. Speed limits are 50 km/h in the cities/towns, 90 km/h out of town, and 130 km/h on the highways. For motorcycles, speed limits are 50 km/h in the cities/towns, 80 km/h out of town, and 100 km/h on the highways. Motorcyclists must drive with helmets and with lights on at all times. At crossings that are not regulated, the driver who is on the right has the right-of-way, but this rule is frequently ignored. Drivers may be charged with driving under the influence of alcohol with a blood level as low as 0.05 percent. Right turns on red lights are not permitted unless specifically authorized. The penalties for drivers involved in an accident resulting in injury or death range from a US $25 fine up to imprisonment for life. A new law requires the use of headlights day and night from November 1st through March 31st.

In case of emergency, drivers should contact the police at telephone number 166 and/or Roadside Assistance at telephone number 146. For an ambulance, please call 150. The fire department can be reached at 160.

For specific information concerning Bulgarian driving permits, vehicle inspection, road tax, and mandatory insurance, please visit the Bulgarian Embassy web site at http://www.webhousing.biz/~bulgaria.

Note: the latter web site is available in the Bulgarian language only.

Aviation Safety Oversight: The U.S. Federal Aviation Administration (FAA) has assessed the Government of Bulgaria's Civil Aviation Authority as not being in compliance with International Civil Aviation Organization (ICAO) aviation safety standards for the oversight of Bulgaria's air carrier operations. For more information, travelers may visit the FAA's Internet web site at http://www.faa.gov.

Special Circumstances: Bulgaria is still largely a cash economy. Due to the potential for fraud and other criminal activity, credit cards should be used sparingly and with extreme caution. There have been reports of false ATM fronts on bona fide machines that capture cards and PINs for later criminal use, including unauthorized charges or withdrawals. In connection with such scams, travelers should be extremely wary of friendly bystanders near ATMs who offer assistance. Any time a card is not returned the traveler should immediately report the card as lost/stolen to the card-issuing company.

Visitors may exchange cash at banks or Exchange Bureaus, but they should know that Exchange Bureaus sometimes post misleading rate quotations that confuse travelers. People on the street who offer high rates of exchange are usually con artists intent on swindling the unwary traveler. Damaged or very worn U.S dollar bank notes are often not accepted at banks or Exchange Bureaus. Major branches of the following Bulgarian banks will cash travelers' cheques on the spot for Leva, the Bulgarian currency, or another desired currency: Bulbank, Bulgarian Postbank, Biochim, First Investment Bank, and United Bulgarian Bank (UBB). UBB also serves as a Western Union agent and provides direct transfer of money to travelers in need. There are also many Western Union branches in major towns and cities. Most shops, hotels, and restaurants, with the exception of the major hotels, do not accept travelers' cheques or credit cards. Only some local banks can cash U.S. Treasury checks and the payee may need to wait up to a month to receive funds.

Corruption remains an important concern of the Government. The Commission for Coordinating of the Activity for Combating Corruption manages the efforts of each government agency's internal inspectorate in fighting public corruption and engages in public awareness campaigns. Complaints of public corruption can be made to it at the Ministry of Justice, 2A Knyaz Dondukov Blvd., 1055 Sofia, Bulgaria, email: acc@government.bg, 359-2-980-9213, 359-2-923-7595, 359-2-940-3630 or to the Ministry of Finance hotline: 0800180018.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating Bulgaria's laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Bulgaria are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in Bulgaria are encouraged to register with the U.S. Embassy through the State Department's travel registration web site, and to obtain updated information on travel and security within Bulgaria. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency. The U.S. Embassy is located at 16, Kozyak St., Sofia1407; tel.: (+359 2) 937-5100; fax (+359 2) 937-5209; web site:

http://sofia.usembassy.gov. Questions regarding consular services may be directed via email to: niv_sofia @state.gov (for non-immigrant visa matters); iv_sofia@ state.gov (for immigrant visa matters) and acs_sofia@state.gov (for American Citizen Services matters).

Intercountry Adoption

November 2008

The information in this section has been edited from a report available through the U.S. Department of State Office of Children's Issues. For more information detailed, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Bulgaria is party to The Hague Convention on Protection of Children and Co-operation in Respect of Intercountry Adoption (Hague Adoption Convention). Therefore all adoptions between Bulgaria and the United States must meet the requirements of the Convention and United States law implementing the Convention. For more detailed and updated information on these requirements, please review the *Intercountry Adoption* section of this publication and visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

Who Can Adopt? Adoption between the United States and Bulgaria is governed by The Hague Adoption Convention. Therefore to adopt from Bulgaria, you must first be found eligible to adopt by the United States Government. In addition to the United States requirements for prospective adoptive parents, Bulgaria also has the following requirements for prospective adoptive parents.

Residency Requirements: There are no residency requirements to complete an intercountry adoption in Bulgaria. However, prospective adoptive parents are expected to spend five days with their adoptive child before the orphanage director will release the child.

Age Requirements: Prospective adoptive parents must be at least 15 years older than their adoptive children, but no more than forty-five years older.

Marriage Requirements: Prospective adoptive parents may be married or single.

Who Can Be Adopted? Because Bulgaria is party to The Hague Adoption Convention, children from Bulgaria must meet the requirements of the Convention in order to be eligible for adoption. In addition to Bulgaria's requirements, a child must meet the definition of a Convention adoptee for you to bring him or her back to the United States.

Bulgarian Adoption Authority: Ministry of Justice

The Process: The first step in adopting a child from Bulgaria is to select an adoption service provider in the United States that has been accredited. Prospective adoptive parents also must use a Bulgarian-licensed United States adoption agency or a Bulgarian adoption agency accredited by the Bulgarian Ministry of Justice. The Ministry of Justice is currently reviewing license applications for several United States-based adoption agencies. For a complete list of adoption agencies visit the web site of the U.S. Embassy in Sofiaat http://bulgaria.usembassy.gov.

After you choose an accredited adoption service provider, you apply to be found eligible to adopt (Form I-800A) by the USCIS. Once the United States Government determines that you are "eligible" and "suitable" to adopt, you or your agency will forward your information to the adoption authority in Bulgaria. Bulgaria's adoption authority will review your application to determine whether you are also eligible to adopt under Bulgarian law.

After completing the United States pre-adoption requirements through USCIS, United States citizens specifically interested in pursuing an adoption from Bulgaria must also contact a Bulgarian or United States adoption agency which has been licensed by the Bulgarian Ministry of Justice. All required documents must be deposited at the Ministry of Justice by the accredited agency. If the prospective parent(s) application is accepted, their names are placed on a registry. Separately, the Bulgarian Ministry of Justice (MOJ) also maintains a registry of Bulgarian children eligible for intercountry adoption. Under Bulgarian law, a child may appear on this registry only if three Bulgarian families have declined to adopt him/her.

If both the United States and Bulgaria determine that you are eligible to adopt, and a child is available for intercountry adoption, the central adoption authority in Bulgaria may provide you with a referral for a child. The Bulgarian Government does not process prospective adoptive parents' applications in chronological order. Priority is given to persons willing to adopt a handicapped child. Furthermore, the Adoption Council abides very strictly by the principle that its goal is to find appropriate parents for a child in need, and not to find a child for prospective parents who want one.

The Adoption Council within the Ministry of Justice reviews the registries of prospective parents and available children, including all relevant documentation, and proposes a match. The MOJ provides the adoptive parents through their accredited agency photographs of the child and information about his/her medical condition. If the family declines to adopt a specific child, the Council should be informed within two months and a match with a different child will be offered. There is no limitation as to the number of times prospective adoptive parents may decline to adopt a Bulgarian orphan. The decision to decline is passed by prospective adoptive parents to the MOJ through the accredited adoption agency. It is important to note that if prospective adoptive parents decline to adopt a specific child, they must notify the MOJ within two months of the referral. Once the prospective adoptive parent(s) select a child and the Council approves the application, the case is forwarded to the Minister of Justice for final approval. When the Minister signs the parents' appli-

cation, the paperwork is transferred directly to Sofia City Court, which sets a date for a court hearing. The judges take into consideration the MOJ's referral and review the documentation related to the adoption process. If they require additional documents, the court sets a date for a new hearing. After all requirements have been met, the court grants custody of the child to the adoptive parents. The process for finalizing the adoption (or gaining legal custody) in Bulgaria generally includes the following.

Time Frame: If there is a child available for intercountry adoption, it normally takes several months to complete the adoption process in Bulgaria; however, there are very few children on the waiting list, which means that the adoptive parents may wait many months and even years until the Ministry of Justice offers them a Bulgarian orphan for adoption.

Adoption Fees: The United States Embassy in Sofia is aware of the following Bulgarian fees for adoption. These fees are subject to change. All fees are given in Euros as the Bulgarian currency is linked to the Euro.

- Application fee at the MOJ: 100.00 EUR
- Court fee: 750 EUR
- Transcript of the Court Decree: 25 EUR
- Passport fee for child under 14: 7.00 EUR
- Passport fee for child over 14: 14.00 EUR
- Birth Certificate fee: 3.00 EUR

In the adoption services contract that you sign at the beginning of the adoption process, your agency will itemize the fees and estimated expenses related to your adoption process.

Documents Required:

- Application, including personal data, family history, financial information. The application is a letter prepared by the accredited adoption agency.
- Document certifying that the adoptive parent(s) has/have not been deprived of custody rights. An FBI fingerprint clearance shows whether there were prior arrests or criminal convictions which would render them ineligible to adopt a child in Bulgaria.
- Home Study.
- Medical Certificate (signed by a general practitioner).
- Police Certificate.
- Marriage Certificate (if applicable).
- Approval by the USCIS (I-171H).

All documents should be submitted should be originals. They must be translated and apostilled. For updates on document requirements and information on how to authenticate documents, visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

Bringing Your Child Home: Once your adoption is complete (or you have obtained legal custody of the child), there are a few more steps to take before you can head home. Specifically, you need to apply for several documents for your child before he or she can travel to the United States, such as a birth certificate, a passport or travel document for your child from the country in which he or she was born, and a U.S. Immigration Visa. For detailed and updated information on how to obtain these documents, visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

Child Citizenship Act: For adoptions finalized abroad: The Child Citizenship Act of 2000 allows your new child to acquire American citizenship automatically when he or she enters the United States as lawful permanent residents. For adoptions finalized in the United States: The Child Citizenship Act of 2000 allows your new child to acquire American citizenship automatically when the court in the United States issues the final adoption decree. To learn more, review the *Intercountry Adoption* section on this publication and visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

After Adoption: Bulgaria requires adoptive parents to submit post adoption reports. We strongly urge you to comply with the wish of Bulgaria and complete all post-adoption requirements in a timely manner. Your adoption agency may be able to help you with this process. Your cooperation will contribute to Bulgaria's history of positive experiences with American parents.

BURKINA FASO

Compiled from the June 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Burkina Faso

PROFILE

Geography

Area: 274,200 sq. km. (106,000 sq. mi.); about the size of Colorado.

Cities: Capital—Ouagadougou (pop. 1 million). Other cities—Bobo-Dioulasso (410,000), Koudougou (83,000).

Terrain: Savanna; brushy plains and scattered hills.

Climate: Sahelian; pronounced wet and dry seasons.

People

Nationality: Noun and adjective—Burkinabe (accent on last e).

Population: (2006) 14.4 million.

Annual growth rate: (2005) 2.53%.

Ethnic groups: 63 ethnic groups among which are Mossi (almost half of the total population), Bobo, Mande, Lobi, Fulani, Gourounsi, and Senufo.

Religions: Traditional beliefs 20%, Muslim 55%, Christian 25%.

Languages: French (official), Moore, Dioula, others.

Education: Literacy (2003)—26.6%.

Health: Infant mortality rate (2005)—95.57/1,000. Life expectancy (2003)—48.45 years.

Work force: Agriculture—90%; industry—2.1%; commerce, services, and government—5.5%.

Government

Type: Republic.

Independence: August 5, 1960.

Constitution: June 11, 1991.

Government branches: Executive—president (head of state) prime minister (head of government). Legislative—one chamber. Judiciary—independent.

Political subdivisions: 13 regions, 45 provinces, 350 departments.

Political parties: Congress for Democracy and Progress (CDP), Alliance for Democracy Federation/ African Democratic Assembly (ADF/ RDA), Party for Democracy and Progress/Socialist Party (PDP/PS), National Union for Democracy and Development (UNDD), and numerous other small opposition parties.

Suffrage: Direct universal.

Budget: (2004) $540 million.

Defense: 5.5% of government budget.

Economy

GDP: (2006) $6.2 billion.

Annual growth rate: (2006) 6.4%.

Per capita income: (2006) $440.

Avg. inflation rate: (2006) 2.5%.

Natural resources: (limited quantities) Manganese, gold, limestone, marble, phosphate.

Agriculture: (37% of GDP) Products—cotton, millet, sorghum, rice, livestock, peanuts, shea nuts, maize.

Industry: (19% of GDP) Type—mining, agricultural processing plants, brewing and bottling, light industry.

Trade: (2004) Exports—$439 million: cotton, gold, livestock, peanuts, shea nut products. Major markets—Singapore, China, Thailand, European Union, Asia. Imports—$843 million.

Exchange rate: Fixed to the euro. Communaute Financiere Africaine (CFA) francs 656=1 euro (2003: approx. CFA francs 579=U.S.$1; 2005: CFA francs 534=U.S.$1).

GEOGRAPHY

Burkina Faso is a landlocked country located in the middle of West Africa's "hump." It is geographically in the Sahel—the agricultural region between the Sahara Desert and the coastal rain forests. Most of central Burkina Faso lies on a savanna plateau, 200 meters-300 meters (650 ft.-1,000 ft.) above sea level, with fields, brush, and scattered trees. The largest river is the Mouhoun (Black Volta), which is partially navigable by small craft. Burkina Faso has West Africa's largest elephant population. Game preserves also are home to lions, hippos, monkeys, warthogs, and antelope. Infrastructure and tourism are, however, not well developed. Annual average rainfall varies from about 100 centimeters (40 in.) in the

south to less than 25 centimeters (10 in.) in the north and northeast, where hot desert winds accentuate the dryness of the region. The cooler season, November to February, is pleasantly warm and dry (but dusty), with cool evenings. March-June can be very hot. In July-September, the rains bring a 3-month cooler and greener humid season.

PEOPLE

Burkina Faso's 14.4 million people belong to two major West African cultural groups—the Voltaic and the Mande (whose common language is Dioula). The Voltaic Mossi make up about one-half of the population. The Mossi claim descent from warriors who migrated to present-day Burkina Faso from Ghana and established an empire that lasted more than 800 years. Predominantly farmers, the Mossi kingdom is still led by the Mogho Naba, whose court is in Ouagadougou.

Burkina Faso is an ethnically integrated, secular state. Most of Burkina's people are concentrated in the south and center of the country, sometimes exceeding 48 per square kilometer (125/sq. mi.). This population density, high for Africa, causes migrations of hundreds of thousands of Burkinabe to Cote d'Ivoire and Ghana, many for seasonal agricultural work. These flows of workers are obviously affected by external events; the September 2002 coup attempt in Cote d'Ivoire and the ensuing fighting there have meant that hundreds of thousands of Burkinabe returned to Burkina Faso. A plurality of Burkinabe are Muslim, but most also adhere to traditional African religions. The introduction of Islam to Burkina Faso was initially resisted by the Mossi rulers. Christians, both Roman Catholics and Protestants, comprise about 25% of the population, with their largest concentration in urban areas.

Few Burkinabe have had formal education. Schooling is in theory free and compulsory until the age of 16, but only about 54% of Burkina's primary school-age children are enrolled in primary school due to actual costs of school supplies and school fees and to opportunity costs of sending a child who could earn money for the family to school. The University of Ouagadougou, founded in 1974, was the country's first institution of higher education. The Polytechnical University in Bobo-Dioulasso was opened in 1995. The University of Koudougou was founded in 2005 to substitute for the former teachers training school, Ecole Normale Superieure de Koudougou.

HISTORY

Until the end of the 19th century, the history of Burkina Faso was dominated by the empire-building Mossi. The French arrived and claimed the area in 1896, but Mossi resistance ended only with the capture of their capital Ouagadougou in 1901. The colony of Upper Volta was established in 1919, but it was dismembered and reconstituted several times until the present borders were recognized in 1947.

The French administered the area indirectly through Mossi authorities until independence was achieved on August 5, 1960. The first President, Maurice Yameogo, amended the constitution soon after taking office to ban opposition political parties. His government lasted until 1966, when the first of several military coups placed Lt. Col. Sangoule Lamizana at the head of a government of senior army officers. Lamizana remained in power throughout the 1970s, as President of military and then elected governments.

With the support of unions and civil groups, Col. Saye Zerbo overthrew President Lamizana in 1980. Colonel Zerbo also encountered resistance from trade unions and was overthrown 2 years later by Maj. Dr. Jean-Baptiste Ouedraogo and the Council of Popular Salvation (CSP). Factional infighting developed between moderates in the CSP and radicals led by Capt. Thomas Sankara, who was appointed Prime Minister in January 1983, but was subsequently arrested. Efforts to bring about his release, directed by Capt. Blaise Compaore, resulted in yet another military coup d'etat, led by Sankara and Compaore on August 4, 1983.

Sankara established the National Revolutionary Committee with himself as President and vowed to "mobilize the masses." But the committee's membership remained secret and was dominated by Marxist-Leninist military officers. In 1984, Upper Volta changed its name to Burkina Faso, meaning "the country of honorable people." But many of the strict security and austerity measures taken by Sankara provoked resistance. Despite his initial popularity and personal charisma, Sankara was assassinated in a coup which brought Capt. Blaise Compaore to power in October 1987.

Compaore pledged to pursue the goals of the revolution but to "rectify" Sankara's "deviations" from the original aims. In fact, Compaore reversed most of Sankara's policies and combined the leftist party he headed with more centrist parties after the 1989 arrest and execution of two colonels who had supported Compaore and governed with him up to that point.

GOVERNMENT AND POLITICAL CONDITIONS

With Compaore alone at the helm, a democratic constitution was approved by referendum in 1991. In December 1991, Compaore was elected President, running unopposed after the opposition boycotted the election. The opposition did participate in the following year's legislative elections, in which the ruling party won a majority of seats.

The government of the Fourth Republic includes a strong presidency, a prime minister, a Council of Ministers presided over by the president, a unicameral National Assembly, and the judiciary. The legislature and

judiciary are nominally independent but remain susceptible to executive influence.

Burkina held multiparty municipal elections in 1995, 2000, and 2006, as well as legislative elections in 1997, 2002, and 2007. Balloting was considered largely free and fair in all elections despite minor irregularities. However, the ruling party's dominance meant that the playing field was not entirely even.

The Congress for Democracy and Progress (CDP), the governing party, won overwhelming majorities in all the elections until the 2002 legislative election, where the CDP won with a small majority of the 111 seats. The opposition made large gains in the 2002 elections. Compaore won the November 1998 presidential election for a second 7-year term against two minor-party candidates. But within weeks of Compaore's victory the domestic opposition took to the streets to protest the December 13, 1998 murder of leading independent journalist Norbert Zongo, whose investigations of the death of the President's brother's chauffeur suggested involvement of the Compaore family.

The opposition Collective Against Impunity—led by human rights activist Halidou Ouedraogo and including opposition political parties of Prof. Joseph Ki-Zerbo and (for a while) Hermann Yameogo, son of the first President—challenged Compaore and his government to bring Zongo's murderers to justice and make political reforms. The Zongo killings still resonate in Burkina politics, though not as strongly as in the past. There has been no significant progress on the investigation of the case. Compaore was re-elected to the presidency for a 5-year term in November 2005. The current cabinet is dominated by Compaore and the CDP. Given the fragile roots of democratic institutions, constitutional checks and balances are seldom effective in practice. The constitution was amended in 2000 to limit the president to a 5-year term, renewable once, beginning with the November 2005 election. The amendment is controversial because it did not make any mention of retroactivity, meaning that President Compaore's eligibility to present himself for the 2005 presidential election is a matter of debate.

The Constitutional Court ruled in October 2005 that the amendment was not retroactive, and Compaore went on to win the November 2005 presidential election with over 80% of

the vote. Most international and national electoral observers believed that the election was fair.

ECONOMY

Burkina Faso is one of the poorest countries in the world, with a per capita gross domestic product (GDP) of $440. More than 80% of the population relies on subsistence agriculture, with only a small fraction directly involved in industry and services. Drought, poor soil, lack of adequate communications and other infrastructure, a low literacy rate, and an economy vulnerable to external shocks are all longstanding problems. The export economy also remains subject to fluctuations in world prices.

Burkina remains committed to the structural adjustment program it launched in 1991, and it has been one of the first beneficiaries of the World Bank/International Monetary Fund (IMF) debt-relief and poverty reduction programs for highly indebted poor countries. At least 20% of the government budget is financed from international aid, and the majority of infrastructure investments are externally financed. Growth rates had been more than 5% from the late 1990s through 2006, but slowed in 2007 in part due to depressed world prices for cotton, Burkina Faso's largest export. Many Burkinabe migrate to neighboring countries for work, and their remittances provide a contribution to the economy's balance of payments that is second only to cotton as a source of foreign exchange earnings. Political and economic problems in Cote d'Ivoire have had a direct impact on this source of revenue for millions of Burkina households. The military crisis in neighboring Cote d'Ivoire negatively affected trade between the two countries, due to the year-long closure of the border between Burkina Faso and Cote d'Ivoire from September 2002 to September 2003. Goods and services, as well as remittances, continue to flow from Burkinabe living in Cote d'Ivoire, but they have been rerouted through other countries in the region, such as Togo, Ghana, and Benin. Commercial and personal traffic across the border is slowly rebuilding steam.

Burkina is attempting to improve the economy by developing its mineral resources, improving its infrastructure, making its agricultural and livestock sectors more productive and competitive, and stabilizing the supplies and prices of food grains. Staple crops are millet, sorghum, maize, and rice. The cash crops are cotton, groundnuts, karite (shea nuts), and sesame. Livestock, once a major export, has declined.

Manufacturing is limited to cotton and food processing (mainly in Bobo-Dioulasso) and import substitution heavily protected by tariffs. Some factories are privately owned, and others are set to be privatized. Burkina Faso's newly-written investment code has helped to promote foreign investment. U.S. investors, particularly in the mining sector, have taken note of this development, and in 2007, the country's only commercial gold mine was opened. Three others are slated to follow in the next two years. A railway connects Burkina with the port of Abidjan, Cote d'Ivoire, 1,150 kilometers (712 mi.) away. Due to the closure of the border with Cote d'Ivoire, this railway was not operational between September 2002 and September 2003, but cargo and limited passenger service are now offered.

Primary roads between main towns in Burkina Faso are paved. Domestic air service and flights within Africa are limited. Phones and Internet service providers are relatively reliable, but the cost of utilities is very high.

FOREIGN RELATIONS

Burkina has excellent relations with European aid donors, as well as Libya, Taiwan, and other states which have offered financial aid. France and the European Union, in particular, provide significant aid. Other donors with large bilateral aid programs include Germany, Denmark, the Netherlands, Belgium, and Canada. President Compaore is active in subregional diplomacy in West Africa. He was elected in January 2007 to be Chairman of the Economic Community of West African States (ECOWAS) and has acted as a mediator in the political crises in neighboring Togo and Cote d'Ivoire. In January 2008, Burkina Faso became a non-permanent member of the UN Security Council; it will hold this position for two years.

U.S.-BURKINA RELATIONS

U.S. relations with Burkina Faso are excellent. In the past, bilateral relations were subject to strains because of the Compaore government's involvement in arms trading and other sanctions-breaking activity. In addition to regional peace and stability, U.S. interests in Burkina are to promote continued democratization and greater respect for human rights and to encourage sustainable economic development. Although the Agency for International Development (USAID) closed its office in Ouagadougou in 1995, about $18 million annually of USAID funding goes to Burkina's development through non-governmental and regional organizations. The largest is a Food for Peace school lunch program administered by Catholic Relief Services. Burkina has been the site of several development success stories. U.S. leadership in building food security in the Sahel after the 1968-74 drought has been successful in virtually eliminating famine, despite recurrent drought years. River blindness has been eliminated from the region. In both cases, the U.S. was the main donor to inter-African organizations headquartered in Ouagadougou which through sustained efforts have achieved and consolidated these gains. In 2005, Burkina Faso and the Millennium Challenge Corporation (MCC) signed a $12 million Threshold Country Program to build schools and increase girls' enrolment rates. In November 2005, the Millennium Challenge Corporation selected Burkina Faso as eligible to submit a proposal for Millennium Challenge Account assistance for fiscal year 2006, making it one of only two countries eligible for threshold as well as compact funding. In July 2008, the Government of Burkina Faso is expected to sign a five-year Compact that will focus on agriculture, land reform, road infrastructure, and education.

The Peace Corps entered Burkina Faso in 1966. The Peace Corps program was phased out in 1987, but was invited to return to Burkina Faso in 1995 as part of a newly established health project. One year later, the Peace Corps established a secondary education project and in 2003, Peace Corps introduced a small enterprise development project to complement the government's poverty reduction and private sector promotional programs. In 2005, the Government of Burkina Faso asked for assistance to increase the level of girls' access to education, which later became the focus of the Millennium Challenge Corporation's Threshold Compact with Burkina Faso. All Peace Corps Volunteers, regardless of sector, are trained in how to promote awareness on HIV/AIDS and gender and development.

U.S. trade with Burkina is still extremely limited—$18.1 million in U.S. exports and $1 million in Burkinabe exports to the U.S. in 2006—but investment possibilities exist, especially in the mining and communications sectors.

TRAVEL

Consular Information Sheet

May 7, 2008

Country Description: Burkina Faso, previously known as Upper Volta, is a landlocked, developing country in the Sahel region of West Africa. Its capital is Ouagadougou. Burkina Faso is a former French colony; the official language is French. It is one of the world's poorest countries, and tourism infrastructure is limited.

Entry Requirements: A valid passport, visa, evidence of yellow-fever vaccination are required for entry into the country. Visas valid for seven days are available at land borders and for 21 days at the airport; however, both can be converted into visas of up to five years validity at the Direction du Controle des Migrations, a government office in central Ouagadougou. U.S. travelers should obtain longer-validity visas from the

Embassy of Burkina Faso, 2340 Massachusetts Avenue NW, Washington, DC 20008, telephone (202) 332-5577. Overseas inquiries should be made at the nearest Burkinabe embassy or consulate.

Visit the Embassy of Burkina Faso web site www.burkinaembassy-usa.org for the most current visa information.

Safety and Security: Ouagadougou occasionally experiences demonstrations and civil unrest. U.S. citizens traveling to and residing in Burkina Faso are urged to exercise caution and maintain a high level of security awareness at all times. Although most demonstrations are generally peaceful, there have been several incidents of violence and destruction within recent years. U.S. citizens should avoid crowds, political gatherings, and street demonstrations, even if they appear to be peaceful. There have been no known terrorist incidents (bombings, hijackings or kidnappings) directed against foreigners in Burkina Faso.

Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S., or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: Street crime in Burkina Faso poses high risks for visitors. Most reported incidents involve purse-snatchers and street scam artists, who target wallets, jewelry, cell phones and other valuables. Thieves are especially active during international meetings or events, which draw large crowds to the capital. The areas near and around the U.N. Circle, Avenue Kwame N'Krumah, and the former Central Market in Ouagadougou experience the highest incidence of purse snatchings and muggings. Travelers should stay alert, remain in groups, and avoid poorly lit areas. Be especially cautious at night, when most reported incidents have taken place.

There continue to be frequent armed robberies and attacks on intercity roads throughout the country. Although these armed individuals and groups operate mostly at night, there have been daytime attacks. They have injured and/or killed individuals who refused their demands or attempted to drive through their roadblocks. Several attacks have been directed at intercity public buses. U.S. travelers should avoid all intercity travel at night. Check with the U.S. Embassy for the latest security information before setting out on your journey.

Perpetrators of business fraud often target foreigners. Recent scams that have victimized U.S. citizens have taken many forms, including fraudulent transactions for gold and antiquities. Typically these scams begin with an unsolicited communication (usually by e-mail) from an unknown person who describes a situation that promises quick financial gain, often involving the transfer of a large sum of money or valuables out of the country. A series of "advance fees" must be paid to conclude the transaction, such as fees to provide legal documents or to pay certain taxes. In fact, the final payoff does not exist; the purpose of the scam is simply to collect the advance fees. One common variation involves individuals claiming to be refugees or other victims of western African conflicts who contact U.S. citizens to request help in transferring large sums of money out of Burkina Faso. Another typical ploy involves persons claiming to be related to present or former political leaders who need assistance to transfer large sums of cash.

While such fraud schemes in the past have been associated with Nigeria, they are now prevalent throughout West Africa. The scams pose a danger of both financial loss and physical harm. You should carefully check and research any business proposal originating in Burkina Faso or elsewhere before you commit any funds, provide any goods or services, or undertake any travel. For additional information on scams, see the Department of State's publication, International Financial Scams.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

Medical Facilities and Health Information: Medical facilities and emergency hospital care are very limited, particularly in areas outside the capital, Ouagadougou. Some medicines are, however, available through local pharmacies. Travelers requiring medicines should bring an adequate supply for the duration of their stay in Burkina Faso.

Malaria is a serious risk to travelers in Burkina Faso. Travelers who become ill with a fever or flu-like illness while traveling in a malaria-risk area and up to one year after returning home should seek prompt medical attention and tell the physician their travel history and what anti-malarial drugs they have been taking. For additional information on malaria, including protective measures, see the CDC travelers' health web site at http://www.cdc.gov/malaria/faq.htm.

Meningitis is endemic in Burkina Faso, and cases are most frequent during the drier, dustier months of January through June. Travelers should confirm that their meningitis A, C, Y, W, 135 inoculations are up to date.

There have been several confirmed cases of avian influenza (H5N1) in Burkina Faso over the last year, although in each case the disease was confined to birds, and was contained. A new outbreak could occur at any time. Travelers should avoid poultry farms and markets, avoid contact with visibly sick or dead birds and

any raw poultry, and ensure poultry products are thoroughly cooked prior to consumption. For further information on avian influenza, consult the U.S. Department of State's Avian Influenza Fact Sheet, and the U.S. Centers for Disease Control and Prevention (CDC) web site at http://www.cdc.gov/flu/avian/index.htm. World Health Organization (WHO) guidance related to avian influenza is available at http://www.who.int/csr/disease/avian_influenza/en.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's website at http://wwwn.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith/en.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Burkina Faso is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

Public transportation is not safe. While urban road conditions are fair, rural roads are in poor condition and roadside assistance is not available. Travelers should exercise great caution when traveling by land in Burkina Faso. All but a few roads are unpaved, narrow, and full of potholes. Livestock and children often dart onto the road without warning. Road travel at night is especially dangerous and, if at all possible, should be avoided. At night, there is a high volume of truck traffic passing through the country and pedestrians, bicycles, and carts pose a major hazard on unlit, unmarked roads. Vehicles are often dangerously overloaded and poorly maintained. Drivers, including motorcyclists and bicyclists, are often careless. The police rarely enforce traffic laws and are virtually absent on non-urban roads. Emergency services are unreliable and overtaxed.

Aviation Safety Oversight: As there is no direct commercial air service between the United States and Burkina Faso, the U.S. Federal Aviation Administration (FAA) has not assessed Burkina Faso's Civil Aviation Authority for compliance with International Civil Aviation Organization (ICAO) aviation safety standards. For more information, travelers may visit the FAA's Internet web site at http://www.faa.gov.

Special Circumstances: Burkina Faso's customs authorities may enforce strict regulations concerning export from Burkina Faso of items such as masks, religious materials, and antiquities. The Director of the National Museum has stated that all exportation of objects of art (old or traditional artists' works, and all old material of the national cultural patrimony) is subject to the prior approval of the Ministry of Culture. Contact the Embassy of Burkina Faso in Washington (see contact information in the Entry Requirements section) for specific information regarding customs requirements.

Foreigners should always carry an identity document, such as a passport or U.S. driver's license.

Credit cards are accepted at only a few high-end establishments in Ouagadougou. Travelers' checks may be cashed at local banks, but euro-denominated traveler's checks are much more widely accepted than dollar-denominated ones. There are a few ATMs in Ouagadougou and Bobo-Dioulasso, but they do not always accept cards from foreign banks. ATMs generally accept Visa credit cards with a personal identification number.

Burkina Faso's laws concerning photography have recently changed. Photo permits from the Tourist Office are no longer required for tourists. Film crews still do require permits. Note that the Tourist Office publishes a list of buildings, installations, and areas that may not be photographed at all. Contact the U.S. Embassy in Ouagadougou for more details regarding taking photographs in Burkina Faso.

Local telephone service is adequate but expensive. Cell phone networks are available in most urban areas. However, telephone coverage in rural areas is limited. International calls cannot always be made from hotels; it is often necessary to make international calls from a Post and Telecommunications Office, where only local currency is accepted. Collect calls are not possible. Cyber-cafes for Internet access are common in both Ouagadougou and Bobo-Dioulasso.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating Burkina Faso laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Burkina Faso are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in Burkina Faso are encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration web site so that they can obtain updated information on travel and security within Burkina Faso. Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency. The U.S. Embassy is located on Avenue Raoul Follereau. The Consular entrance is located on Avenue John F. Kennedy; consular telephone 50-30-67-23; consular fax: 50-30-77-75. The Embassy hours of operation are Monday to Thursday from 07:30 to 12:00 and 12:45 to 17:00; Friday 07:30 to 12:30. The Embassy's website address is: http://burkinafaso.usembassy.gov. The Embassy is closed on both U.S. and Burkinabe holidays.

Intercountry Adoption

August 2008

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is based on public sources and our current understanding. Questions involving foreign and U.S. immigration laws and legal interpretation should be addressed respectively to qualified foreign or U.S. legal counsel.

The Hague Convention on Intercountry Adoption: The Hague Convention on Intercountry Adoption to which the United States became a party on April 1, 2008, establishes legal and regulatory requirements for intercountry adoption. Burkina Faso is a party to The Hague Convention on Protection of Children and Cooperation in Respect of Intercountry Adoption (the Convention) and with which the Convention is in force for the United States.

Patterns of Immigration: Only four Burkinabe orphans have received U.S. immigrant visas in the past five fiscal years.

Adoption Authority: The office of Placements and Adoptions at the Ministry of Social Affairs and National Solidarity (La Direction de la Protection de l'Enfant et de L'Adolescent, Ministère de l'Action Sociale et de la Solidarité Nationale) receives and examines all adoption applications and identifies adoptable children.

Ministère de l'Action Sociale et
de la Solidarité Nationale

Telephone: (226) 50 30 68 80
(Switchboard)
Fax: (226) 50 31 67 37

Eligibility to Adopt: Married, cohabiting couples who have been married for at least five years may adopt a child. Single applicants are almost never permitted to adopt children in Burkina Faso. Married prospective adoptive parents without children of their own are given priority.

Each prospective adoptive parent must be at least 15 years older than the prospective adoptee, unless the prospective adoptee is the biological child of one of the spouses, in which case the age difference between the child and the other spouse must be at least 10 years. The authorities must be convinced that an adoption will not generate a material profit for anyone involved in the adoption (except service providers such as lawyers).

Eligibility Requirements for Adoptive Children: In Burkina Faso, children identified for adoption are mostly from one of the following categories: orphans whose parents are unknown or have died, children with mentally ill mothers, abandoned children, and children who were born of incestuous or adulterous relationships. Under local law, children can be adopted at any time up to age 18. If the adoptive child is aged 15 or above, however, he/she must give his/her personal consent before the adoption can take place.

Residency Requirements: With The Hague Convention now implemented, American citizens residing in the United States can apply to adopt a child from Burkina Faso.

Time Frame: It takes about twelve months from the time the prospective parents submit their initial application until the child is identified and custody is given to the adoptive family. It takes six months or more for the case to be finalized in court. Finalization includes the final adoption decree, the issuance of child's new birth certificate, the issuance of the "Certificat de Conformité" and the authorization for the child to leave the country.

Generally, the child is placed in the adoptive parents' care as soon as s/he is identified, and lives with them until the final court hearing. In the absence of those parents (for Americans who reside in the U.S. and are adopting in Burkina Faso) the child is placed in a host family or in an orphanage. The court hearing is usually just a formality, as the government Social Service Agency has already vetted the parents.

Adoption cases may take longer when not properly followed up with the court. The Placements and Adoptions Office suggests that adoptive parents hire a lawyer, especially when cases fall under the jurisdiction of the civil court in Ouagadougou. The Placements and Adoptions office maintains a list of local lawyers who can be consulted. In small cities, prospective adoptive parents might not need to hire a lawyer.

Adoption Agencies and Attorneys: Prospective adoptive parents are advised to fully research any

adoption agency or facilitator they plan to use for adoption services. Because Burkina Faso is a Convention country, adoption services must be provided by an accredited agency, temporarily accredited agency, approved person, supervised provider, or exempted provider. It is essential that prospective adoptive parent(s) seeking to adopt from a Convention country use an accredited adoption service provider. The U.S. Department of State maintains a current list of accredited adoption service providers. The list of accredited adoption service providers is also provided on the website of The Hague Permanent Bureau at www.hcch.net. The Ministry of Social Affairs, and specifically its Placements and Adoptions office, provides adoption services in Burkina Faso.

As stated above, adoptive parents may find it helpful to hire an attorney suggested by the aforementioned office to assist them with the adoption process. The U.S. Embassy also has a list of attorneys, which is available on our website at http://ouagadougou.usembassy.gov.

Adoption Fees: The U.S. Embassy in Burkina Faso discourages the payment of any fees that are not properly receipted, "donations," or "expediting" fees, that may be requested from prospective adoptive parents.

Such fees have the appearance of "buying" a baby and put all future adoptions in Burkina Faso at risk.

The following adoption fees are covered by the adoptive parents:

- Fees for home study conducted on the child: 20 000 F (about 50 USD).
- Medical exam (Tests that are compulsory include hepatitis A and B, HIV, blood and sickle cells detection): 40 000 (about 100 USD).
- Food allowance: 60 000 (about 120 USD) per month. This amount is payable from the time the adoptive family commits themselves to adopting the child.
- In the event of a serious illness, the adoptive parents may be asked to bear the cost of hospitalization and or the transportation of the child.

Adoptive parents must also cover the expenses of lawyers' and notary services.

Adoption Procedures: Burkinabe law does not permit prospective adoptive parents to choose or identify a specific child they would like to adopt. Social Service Agencies throughout Burkina Faso are authorized to conduct social and psychological studies on children to certify that they are eligible for adoption. Lists of these children are forwarded to the Placements and Adoptions Office.

Prospective adoptive parents should understand that there are two kinds of adoption available in Burkina Faso, and for U.S. immigration purposes, the "full" adoption option is the only one that can confer immigrant status to an adopted child. An "open" adoption—one which gives a biological parent the right to revoke the adoption at any time—does not meet the requirements established by U.S. immigration law for issuing visas to adopted orphans.

There are two ways to submit adoption applications in Burkina Faso: Through accredited Adoption Agencies who have a fully accredited representative in Burkina Faso to act on their behalf or Apply directly to the Ministry of Social Affairs, Infant and Adolescent Welfare office. Applications are evaluated with respect to the following factors:

- The family's ability to financially support the child;
- The family's way of life;
- The findings of a social and psychological report on the prospective adoptive parents;
- The family's motivations and their attitude towards adoption;
- The marital status, age and state of health of the adoptive parents;
- The point of view and welfare of children already members of the adoptive family; and
- The size of the family (applications from families with more than two children may not be given priority).

The following criteria are taken into account:

- The age of the prospective parents compared to the child's (making sure that the age difference is not excessive);
- Gender of the child as requested by the prospective parents;
- The order in which files were received (they operate on a first come First served basis); and
- The clauses of their proposal.

As soon as a family is identified, a letter proposing a child is sent to the prospective parents by the Director of the Office of Placements and adoptions. Prospective parents must wait for this official letter, which goes through the accredited Agencies. This is the article 16 Report.

After reading the report on the child's history and health condition, prospective parents must respond to the Ministry of Social Affairs on whether or not they want to proceed with the adoption.

When the prospective parents agree to adopt the child that is proposed to them, the Office of Placements and Adoptions then drafts an agreement to pursue the procedure together with the child's birth certificate and home study. If the child's biological parents are known, there must be a consent act, a family council report or a declaration of abandonment. The agreement to pursue the adoption procedure is given to the local representative of the accredited agency.

This exchange of agreement to pursue the procedure must be completed before the adoption court hearing. Unless this condition is respected, the adoption cannot be recognized by

the authorities of Burkina Faso. After committing themselves to adopt the child, the prospective parents hire a lawyer in Burkina Faso to follow the procedure in court. The Office of Placements and Adoptions forwards the completed adoption file to the tribunal where the child resides or to the main tribunal in Ouagadougou.When the file is received by the tribunal, they contact a notary to establish an act of adoption. This act of adoption is first sent to the institution that is responsible for the welfare of the child to initial and sign the act before it is forwarded to the Office of Placement and adoption for a final signature. There is a three month waiting period after the signature of the act before the court announces the final adoption.

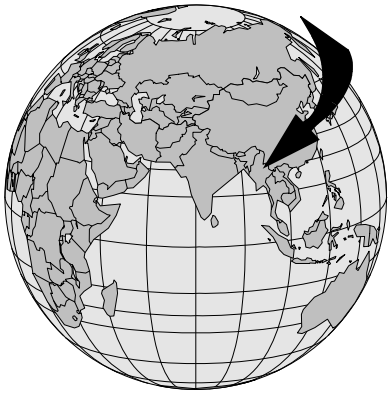
The lawyer then gets a copy of the judgment to request the issuance of a new birth certificate and a new passport for the child. In Burkina Faso, birth certificates are issued by the local mayor's office (the "Mairie"). Passports are issued by the Ministry of Security's "Division du Contrôle des Migrations" upon presentation of the child's birth certificate with name changes and the adoption decree. The passport costs about $65.

Copies of the judgment and the certificate of non appeal are sent to the Office of Placement and Adoptions for the issuance of the certificate of conformity and the authorization to leave the country.

The certificate of non appeal is delivered 1 month after the final court decision. Unless all the conditions are met, the office of placement and adoptions is unable to issue the certificate of conformity and the authorization to leave the country. These documents can only be given to the adoptive parents when they get to Burkina Faso.

At the end of the procedure, the adoptive family must travel to Burkina Faso to get the child. The adoptive parents must remain in the country for at least 10 to 15 business days to finalize the adoption process. When the adoption procedure is completed and the child joins the adoptive family, a periodic follow-up on the integration of the child in the family must be done by the competent social services of the child place of residence. The office of placements and adoptions at the Ministry of Social Affairs and National Solidarity must hear about the child twice a year during the first 2 years of the child's life with the adoptive family and once a year up to the child's 18th birthday.

Required Documents: Only certified copies of these documents are acceptable to Burkinabe authorities.



- Two motivation letters stamped with 200 fcfa revenue stamps (available at the local mayor's office), one addressed to the Chief Judge of the court in Ouagadougou and the other to the Ministry of Social Affairs, explaining in detail the motivation for adopting, and specifying the profile of the child they would like to adopt;
- A marriage certificate for the couple showing that they have been married for more than 5 years;
- A copy of the family book (official record of spouse, children) when/if available;
- Proof of residence;
- Proof of income;
- Birth certificate for each prospective parent;
- An authorization to adopt (agreement) issued by the Ministry of Social Affairs;
- Medical documents certifying that both prospective adoptive parents are physically and psychologically health;
- A home study report done by a Social Services agency of the adoptive parents habitual residence;
- A commitment to send a report twice a year during the two first years of adoption and then once a year until the child reaches the age of 18;
- Police certificates for both prospective parents; and
- A copy of the first two pages of both prospective parents' passports.

Additional Information: For information on intercountry adoption and international parental child abduction, and security information for U.S. citizens traveling abroad, call Toll Free 1-888-407-4747. This number is available from 8:00 a.m. to 8:00 p.m. EST/EDT, Monday through Friday (except U.S. federal holidays). Callers who are unable to use toll-free numbers, such as those calling from overseas, may obtain information and assistance during these hours by calling 1-202-501-4444.

BURMA

Compiled from the June 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Union of Burma

Editor's Note: The Burmese Government was dissolved on September 18, 1988 in a military coup and the nation was renamed Myanmar. The US does not presently recognize the current government of Myanmar and therefore continues to refer to the nation as Burma.

PROFILE

Geography

Area: 678,500 sq. km. (slightly smaller than Texas).

Cities: Administrative capital—Nay Pyi Taw, near the township of Pyinmana (pop. 200,000); Other cities—Rangoon (pop. 5.5 million), Mandalay (pop. 1.2 million).

Terrain: Central lowlands ringed by steep, rugged highlands.

Climate: Tropical monsoon; cloudy, rainy, hot, humid summers (southwest monsoon, June to September); less cloudy, scant rainfall, mild temperatures, lower humidity during winter (December to April).

People

Nationality: Noun and adjective—Burmese.

Population: 57.6 million (IMF estimate 2007); no official census has been taken since 1983.

Annual population growth rate: (UNDP 2005 estimate) 0.8%.

Ethnic groups: Burman 68%, Shan 9%, Karen 7%, Rakhine 4%, Chinese 3%, Mon 2%, Indian 2%, other 5%.

Religions: Buddhist 89%, Christian 4% (Baptist 3%, Roman Catholic 1%), Muslim 4%, animist 1%, other 2%.

Languages: Burmese, minority ethnic languages.

Education: Literacy—adult, 89.9%; male, 93.9%; female, 86.4% (UNDP 2005 estimate).

Health: Infant mortality rate—75 deaths/1,000 live births (UNDP 2005 estimate). Life expectancy—60.8 yrs.: male, 57.6 yrs.; female 64.2 (UNDP 2005 estimate).

Government

Type: Military junta.

Constitution: January 3, 1974; suspended since September 18, 1988, when the current junta (SPDC) took power. The Burmese regime claimed that a new draft constitution was approved in a May 2008 referendum; it is not clear when the new constitution will go into effect, since parliamentary elections are not scheduled until 2010.

Government branches: Executive—Chairman of the State Peace and Development Council (SPDC) Senior General Than Shwe is the head of state. Prime Minister Lt. Gen. Thein Sein is the head of government. Under the new constitution, the president and two vice-presidents will be selected by the parliament. Legislative—The newly approved constitution calls for a bicameral parliament. The lower house will have no more than 440 members and the upper house no more than 224. At least 25% of the legislature will be military, selected by the Chief of Defense Services. Judicial—The legal system is based on a British-era system, but with the constitution suspended, the military regime now rules by decree and there is no guarantee of a fair public trial; the judiciary is not independent. The new constitution provides for a supreme court, a constitutional tribunal, and lower courts.

Political parties: National League for Democracy (NLD) is the primary opposition party; National Unity Party (NUP) is the primary pro-regime party; the Union Solidarity and Development Association (USDA) is a pro-regime socio-political organization; there are also many smaller ethnic parties.

Political subdivisions: The country is divided into seven primarily Burman ethnic divisions (tain) of Ayeyarwady (Irrawaddy), Bago (Pegu), Magway, Mandalay, Yangon (Rangoon), Sagaing, and Tanintharyi (Tenassarim) and seven ethnic states (pyi nay) Chin State, Kachin State, Kayin (Karen) State, Kayah (Karenni) State, Mon State, Rakhine (Arakan) State, and Shan State.

Suffrage: Universal suffrage at 18 years of age.

Economy

GDP: $13.7 billion (IMF estimate 2007).

Annual growth rate: 5.5% (IMF estimate 2007); the regime claimed the 2005-2006 rate was 13.2%.
GDP per capita: $239 (IMF estimate 2007)
Inflation rate: 40% (2007 IMF estimate).
Natural resources: natural gas, timber, tin, antimony, zinc, copper, tungsten, lead, coal, limestone, precious stones, hydropower, and petroleum.
Agriculture: Products—rice, pulses, beans, sesame, peanuts, sugarcane, hardwood, fish, and fish products.
Industries: Types—agricultural processing, knit and woven apparel, wood and wood products, copper, tin, tungsten, iron, construction materials, pharmaceuticals, and fertilizer.
Recorded trade: (2007 Business Information Group (BIG) statistics) Exports—$5.9 billion. Types—natural gas 45.5%, agricultural products 17.4%, teak and forest products 9.6%, precious and semi-precious stones 9.5%, and garments 4.8%. Major markets—Thailand 47.2%, India 12.5%, Hong Kong 9.7%, China 8%, and Singapore 5.8%. Imports—$2.8 billion. Types—lubricant oil and diesel 16.9%, textiles and fabrics 10%, palm oil 9%, machinery parts 8.7%, cars 6.9%, and steel, iron, and bars 6.4%. Major suppliers—Singapore 29%, China 20%, Japan 8.5%, and Thailand 8.1%

PEOPLE

A majority of Burma's people are ethnic Burmans. Shans, Karens, Rohingya, Arakanese, Kachins, Chins, Mons, and many other smaller indigenous ethnic groups form about 30% of the population. Indians and Chinese are the largest non-indigenous groups. Although Burmese is the most widely spoken language (approx. 32 million speakers), other ethnic groups have retained their own identities and languages. Some of the most prominent are Shan; various Karen, Karenni and Chin languages; Arakanese; Jingpaw; Mon; Palaung; Parauk; Wa; and Yangbye. English is spoken in many areas frequented by tourists. The Indian and Chinese residents speak various languages and dialects of their homelands: Hindi, Urdu, Tamil, Bengali, Mandarin, Fujian, and Cantonese.

An estimated 89% of the population practices Buddhism. Other religions, Christian 4% (Baptist 3%, Roman Catholic 1%), Muslim 4%, and animist 1%, are less prevalent, although Christian and Muslim groups claim the regime significantly underestimates their number of adherents.

According to the UN Development Programme's 2007 Human Development Report, public health expenditure equaled only 0.3% of Burma's GDP. High infant mortality rates and short life expectancies further highlight poor health and living conditions. The HIV/AIDS epidemic poses a serious threat to the Burmese population, as do tuberculosis and malaria. In 2007, the UNDP's Human Development Index, which measures achievements in terms of life expectancy, educational attainment, and adjusted real income, ranked Burma 132 out of 177 countries.

There are numerous documented human rights violations, and internal displacement of ethnic minorities is prevalent. Over a million Burmese, many of them ethnic minorities, have fled for economic and political reasons to Bangladesh, India, China, Malaysia, and Thailand to seek work and asylum. More than 150,000 Burmese live in nine refugee camps in Thailand and roughly 30,000 live in two camps in Bangladesh. Roughly 30,000 Burmese (mostly Chin and Rohingya) have fled to Malaysia.

HISTORY

Burma was unified by Burman dynasties three times during the past millennium. The first such unification came with the rise of the Bagan (Pagan) Dynasty in 1044 AD, which is considered the "Golden Age" in Burmese history. During this period, Theravada Buddhism first made its appearance in Burma, and the Bagan kings built a massive city with thousands of pagodas and monasteries along the Irrawaddy River. The Bagan Dynasty lasted until 1287 when Mongol invaders destroyed the city. Ethnic Shan rulers, who established a political center at Ava (near Mandalay), filled the ensuing political vacuum for a short time.

In the 15th century, the Taungoo Dynasty succeeded again in unifying under Burman rule a large, multiethnic kingdom. This dynasty, which lasted from 1486 until 1752, left little cultural legacy, but expanded the kingdom through conquest of the Shans. Internal power struggles, and the cost of protracted warfare, led to the eventual decline of the Taungoo Dynasty.

The final Burman royal dynasty, the Konbaung, was established in 1752 under the rule of King Alaungpaya. Like the Taungoo Kings, the Konbaung rulers focused on warfare and conquest. Wars were fought with the ethnic Mons and Arakanese, and with the Siamese. The Burmese sacked the Siamese capital of Ayuthaya in 1767. This period also saw four invasions by the Chinese and three devastating wars with the British.

The British began their conquest of Burma in 1824, expanding their holdings after each of the three wars. At the end of the third war in 1885, the British gained complete control of Burma, annexing it to India. Under British control, which lasted until 1948, Burma underwent enormous change. The British established strong administrative institutions and reorganized the economy from subsistence farming to a large-scale export economy. By 1939, Burma had become the world's leading exporter of rice. Burmese nationalists, led by General Aung San and 29 other "Comrades," joined the Japanese forces in driving out the British at the outbreak of World War II. However, the Burmese Army switched sides in mid-1945 and aided U.S. and British forces in their drive to Rangoon. After the war, the Burmese, with General Aung San at the helm, demanded complete political and economic independence from Britain. The British Government acceded to these

demands. A constitution was completed in 1947 and independence granted in January 1948. General Aung San was assassinated with most of his cabinet before the constitution went into effect.

During the constitutional period from 1948 to 1962, Burma suffered widespread conflict and internal struggle. Constitutional disputes and persistent division among political and ethnic groups contributed to the democratic government's weak hold on power. In 1958, Prime Minister U Nu invited the military to rule temporarily to restore political order. The military stepped down after 18 months; however, in 1962 General Ne Win led a military coup, abolishing the constitution and establishing a xenophobic military government with socialist economic policies. These policies had devastating effects on the country's economy and business climate.

In March 1988, student-led disturbances broke out in Rangoon in response to the worsening economic situation and evolved into a call for regime change. Despite repeated violent crackdowns by the military and police, the demonstrations increased in size as many in the general public joined the students. During mass demonstrations on August 8, 1988, military forces killed more than 1,000 demonstrators. At a rally following this massacre Aung San Suu Kyi, the daughter of General Aung San, made her first political speech and assumed the role of opposition leader.

In September 1988, the military deposed Ne Win's Burmese Socialist Program Party (BSPP), suspended the constitution, and established a new ruling junta called the State Law and Order Restoration Council (SLORC). In an effort to "restore order," the SLORC sent the army into the streets to suppress the ongoing public demonstrations. An estimated additional 3,000 were killed, and more than 10,000 students fled into the hills and border areas.

The SLORC ruled by martial law until national parliamentary elections were held in May 1990. The results were an overwhelming victory for Aung San Suu Kyi's National League for Democracy (NLD) party, which won 392 of the 485 seats, even though she was under house arrest. However, the SLORC refused to honor the results and call the Parliament into session, and instead imprisoned many political activists.

The ruling junta changed its name to the State Peace and Development

Council (SPDC) in 1997, but did not change its policy of autocratic control and repression of the democratic opposition. It continued to subject Aung San Suu Kyi to varying forms of detention and other restrictions on her movement, which it periodically lifted only to reinstate later. In 2000, the SPDC began talks with the political opposition led by Aung San Suu Kyi. These talks were followed by the release of political prisoners and some increase in political freedoms for the NLD. In May 2002, Aung San Suu Kyi was allowed to leave her home, and subsequently traveled widely throughout the country. On May 30, 2003, Aung San Suu Kyi and a convoy of her supporters were attacked by a group of government-affiliated thugs. Many members of the convoy were killed or injured, and others disappeared. Aung San Suu Kyi and other members of her party were detained, and the military government forcibly closed the offices of the NLD. Today, only the NLD headquarters in Rangoon is open, all the party's other offices remain closed, and Aung San Suu Kyi and NLD Vice Chairman U Tin Oo remain under house arrest.

In October 2004, hard-line members of the senior leadership consolidated their power by ousting Prime Minister Khin Nyunt and removing him and his allies from control of the government and military intelligence apparatus. In late November 2004, the junta announced it would release approximately 9,000 prisoners it claimed had been improperly jailed by Khin Nyunt's National Intelligence Bureau. Approximately 86 of those released had been imprisoned for their political beliefs. Those released since November 2004 include Min Ko Naing and Ko Ko Gyi, both key figures in the 1988 demonstrations. On July 6, 2005, authorities released 323 additional political prisoners and on January 3, 2007, the authorities released over 2,800 prisoners, of whom over 40 were political prisoners. In August 2007 the regime re-arrested Min Ko Naing and Ko Ko Gyi, and subsequently arrested thousands of political activists and young people after demonstrations in September 2007. Over 2,100 political activists are held in prisons around the country. Following a sharp increase in fuel prices on August 15, 2007, pro-democracy groups began a series of peaceful marches and demonstrations to protest the deteriorating economic situation in Burma. The regime responded by arbitrarily detaining over 150 pro-democracy activists between August 15 and September 11. On August 28, as popular dissatisfaction spread, Buddhist monks began leading peaceful marches. On September 5, security forces violently broke up demonstrations by monks resulting in injuries and triggering calls for a nationwide response and a government apology. Beginning on September 18, monks resumed their peaceful protests in several cities throughout the country. These marches grew quickly to include ordinary citizens, culminating in a gathering of approximately 10,000 protestors in Rangoon on September 24. On September 25, the regime tried to stop the protests by imposing a curfew and banning public gatherings. On September 26 and 27, the regime renewed its violent crackdown, shooting, beating, and arbitrarily detaining thousands of monks, pro-democracy activists, and onlookers. Underestimating the number of deaths during the crackdown, the regime confirmed the deaths of only 10 protestors. Some non-governmental organizations (NGOs) estimated the number of casualties to be much higher, and in his December 7, 2007 report to the UN General Assembly, Special Rapporteur Paulo Sergio Pinheiro stated that there were over 30 fatalities in Rangoon associated with the September 2007 protests. In retribution for leading protest marches, monks were beaten and arrested, many monks were disrobed, and several monasteries were raided, ransacked, and closed. In addition to the more than 1,100 political prisoners whose arrests predate the September 2007 crackdown, another thousand or more were detained due to their participation in the recent protests. Additional people continued to be arrested through the end of May 2008.

In February 2008 the government announced that it had completed its draft of a new constitution and it would hold a referendum in May to be followed by multi-party elections in 2010. While the referendum law provided for a secret ballot, free debate was not permitted and activities considered "interfering with the referendum" carried a three-year prison sentence. Despite the major humanitarian disaster precipitated by Cyclone Nargis, which struck Burma May 2-3, the regime insisted on carrying out the referendum, and voting took place on May 10 in most of the country and on May 24 in areas affected by the cyclone. The referendum was rife with irregularities; voters arriving at polling stations were advised that their ballots had already been cast; officials distributed ballots that had previously been completed; vote counts in most areas were conducted in secret; and voters were intimidated by officials to vote in support of the constitution. On May 27, the government announced that 92.5% of voters approved the constitution, with a 98% voter turnout.

GOVERNMENT AND POLITICAL CONDITIONS

The Union of Burma is ruled by a military junta that currently calls itself the "State Peace and Development Council" (SPDC). Although the SPDC changed the name of the country to "Myanmar," the democratically elected but never convened parliament of 1990 does not recognize the name change, and the democratic opposition continues to use the name "Burma." Out of support for the democratically elected leaders, the U.S. Government likewise uses "Burma."

Burma consists of 14 states and divisions. Administrative control is exercised from the central government through a system of subordinate executive bodies and regional military commanders. Power is centered on the SPDC, which maintains strict authoritarian rule over the people of Burma. The Prime Minister is appointed directly by the SPDC. Control is maintained through intimida-

tion, the strict censoring of information, repression of individual rights, and suppression of ethnic minority groups.

The military regime has a contentious relationship with Burma's ethnic groups, many of which have fought for greater autonomy or secession for their regions since the country's independence. In 1948, only Rangoon itself was under the control of national government authorities. Subsequent military campaigns brought more and more of the nation under central government control. Since 1989, the regime has signed a series of cease-fire agreements with insurgent groups, leaving only a handful still in active opposition.

The SPDC continues its harsh rule and systematic human rights abuses, and insists that any future political transition be negotiated on its terms. Although the National League for Democracy (NLD) overwhelmingly won the last national elections held in 1990, the ruling junta has never recognized its victory. The junta proclaimed a seven-step road map to democracy and convened a national convention on January 9, 1993 to draft a new constitution. The national convention collapsed in 1996 after the NLD withdrew its participation. The junta reconvened the convention in May 2004 without the participation of the NLD and other pro-democracy ethnic groups. The national convention convened intermittently and in September 2007, the regime concluded the process of "drafting" principles for the new constitution. Delegates to the convention were not allowed to debate or openly discuss the principles. In October 2007, the SPDC appointed 54 persons to sit on the constitution drafting committee, but included no members from the NLD or the pro-democracy opposition. The government declared the completion of the constitution drafting committee's work on February 5, 2008 and announced that it would hold a national referendum on the constitution in May 2008, with multi-party elections planned for 2010. The government carried out the referendum on May 10 and May 24 in an atmosphere of fear and intimidation and in the midst of the humanitarian disaster caused by Cyclone Nargis, claiming a 92.5% approval rate and 98% voter turnout. The referendum process and outcome were not credible. Although the Burmese regime claimed that its draft constitution was approved in the referendum, it is not clear exactly when the new constitution will go into effect as parliamentary elections are not scheduled until 2010. Even under the new constitution, the regime will maintain strict control of the government, giving the military the power to step in and control the government whenever it deems necessary.

In November 2005, the ruling regime unexpectedly relocated the capital city from Rangoon to Nay Pyi Taw, further isolating the government from the public. Nay Pyi Taw is a sparsely populated district located approximately midway between Rangoon and Mandalay. Most government workers and ministries moved to Nay Pyi Taw over the following six months, but construction and development of the new administrative capital remains incomplete. Foreign diplomatic missions are still located in Rangoon.

Cyclone Nargis hit the Irrawaddy delta region and Rangoon on the evening of May 2 and morning of May 3, 2008. The storm devastated a huge swath of the country, wiping out entire villages and leaving an estimated 130,000 Burmese dead or missing. While the international community offered aid in the massive humanitarian relief effort, the regime was slow to permit outside assistance.

Burma maintains an embassy to the United States at 2300 S Street NW, Washington, DC 20008, tel.: (202) 332—-3344; fax: (202) 332-4351.

ECONOMY

Burma is a resource-rich country with a strong agricultural base. It also has vast timber, natural gas, and fishery reserves and is a leading source of gems and jade. Tourist potential remains undeveloped because of weak infrastructure and Burma's international image, which has been damaged by the junta's human rights abuses and oppression of the democratic opposition. Due to Burma's poor human rights record, the U.S. imposed a range of trade sanctions, including bans on the importation of Burmese products into the U.S. and the export of financial services from the U.S. to Burma. In response to the September 2007 crackdown, President Bush announced on September 25, 2007 that the United States would tighten existing economic sanctions on the regime leaders and their supporters. On October 19, 2007, President Bush expanded sanctions to include individuals responsible for human rights abuses and public corruption, as well as individuals and entities who provided material or financial support to designated individuals or the Burmese military government. Other names were added to the targeted sanctions list in November 2007 and February and March 2008. Australia, Canada, and the EU also have imposed additional economic sanctions on the Burmese regime in response to the crackdown.

Despite Burma's growing GDP due to increasing oil and gas revenues, the regime's mismanagement of the economy has created a downward economic spiral for the people of Burma. The state remains heavily involved in most parts of the economy, infrastructure has deteriorated, and no rule of law exists. The majority of Burmese citizens subsist on an average annual income of less than $200 per capita. Inflation, caused primarily by public sector deficit spending and the eroding value of the local currency (the kyat), has reduced living standards. The International Monetary Fund (IMF) estimated that inflation was running at 40% in March 2007, in contrast with official estimates of 10%.

The military's commercial arms play a major role in the economy. The limited moves to a market economy have been accompanied by a significant rise in crony capitalism. A handful of companies loyal to the regime has benefited from policies that promote monopoly and privilege. State-controlled activity predominates in energy, heavy industry, and the rice trade. Agriculture, light industry, trade, and transport dominate the private sector.

Burma remains a primarily agricultural economy with 50% of GDP derived from agriculture, livestock and fisheries, and forestry. Cyclone Nargis, which devastated Rangoon and Irrawaddy Divisions, severely damaged approximately 20% of Burma's rice producing lands. Manufacturing/industry constitutes only 15% of recorded economic activity, and state industries continue to play a large role in that sector. Trade and services constitute 35% of GDP.

Foreign investment has declined precipitously since 1999 due to the increasingly unfriendly business environment and political pressure from Western consumers and shareholders. The government conserves foreign exchange by limiting imports and promoting exports. Published estimates of Burma's foreign trade (particularly on the import side) are greatly understated because of the large volume of off-book, black-market, illicit, and unrecorded border trade.

In the near term, growth will continue to be constrained by government mismanagement and minimal investment. A number of other countries, including member states of the European Union, Canada, and Australia have joined the United States in applying some form of sanctions against the regime.

Government economic statistics are unavailable and unreliable. According to official figures, GDP growth has been over 10% annually since FY 1999-2000. However, the rate is likely much smaller; the IMF estimated that the growth rate in 2007 was 5.5% and predicted 2008 growth to be between 4%-5%. Burma's limited economic growth results largely from its natural gas exports, which account for over half of Burma's export receipts and foreign direct investment. Natural gas exports will increase significantly once production begins from the offshore Shwe and Shwephyu Fields, estimated to hold 5.7-10 trillion cubic feet of natural gas. In 2007-2008, the oil and gas sector accounted for $3.42 billion in foreign direct investment. Corporations based in China, India, South Korea, Thailand, and Malaysia have interests in the exploration and development of several offshore and onshore blocks.

Burma remains the world's second-largest producer of illicit opium—although it amounts to only 12% of the world's total. Annual production of opium is now estimated to be less than 15% of mid-1990 peak levels. Burma is also a primary source of amphetamine-type stimulants in Asia. Although the Burmese Government has expanded its counternarcotics measures in recent years, production and trafficking of narcotics and failure to adequately prosecute those involved remains a major problem in Burma.

FOREIGN RELATIONS

During the Cold War, Burmese foreign policy was based on principles of neutrality, often tending toward xenophobia. Since 1988, however, Burma has expanded its regional ties. It now is a member of the Association of Southeast Asian Nations (ASEAN), Bay of Bengal Initiative for Multi-sectoral Technical and Economic Cooperation (BIMSTEC), and several other regional organizations and initiatives. Burma's lack of progress on human rights and democracy has frayed some ties, and in July

2005, Burma passed up its scheduled 2006 ASEAN chairmanship. Although Burmese-Thai relations are generally cooperative, they have been tainted by a long history of border conflicts and sporadic hostilities over narcotics trafficking and insurgents operating along the Burmese-Thai border.

Nonetheless, official and unofficial economic ties remain strong. In addition to the sizeable population of Burmese refugees it hosts, the Thai Government issues temporary work permits to another one million Burmese who live outside the refugee camps in Thailand. Despite their often-contentious history, Burma and China have grown much closer in recent years. China quickly is becoming Burma's most important partner, offering debt relief, economic development grants, and soft loans used for the construction of infrastructure and light industry. China also is purportedly Burma's major supplier of arms and munitions. Burma's commercial and military ties with India are also growing steadily as well.

The UN has made several efforts to address international concerns over human rights in Burma. The UN Secretary General's Special Envoy to Burma, Tan Sri Razali Ismail, resigned his position in December 2005 due to the regime's lack of cooperation. Subsequently, Secretary General Ban Ki-Moon named former UN Undersecretary General for Political Affairs Ibrahim Gambari as his Special Advisor for Burma. Special Advisor Gambari has made three trips to Burma since the September 2007 crackdown. In January 2007, the United States and the U.K. sponsored a UN Security Council resolution calling on Burma to cooperate with the UN Secretary General's good offices mission, open dialogue with the political opposition, stop its military offensive in Karen State, and allow humanitarian organizations greater access to needy populations. The resolution received nine votes in favor, three abstentions, and three "no" votes, but was not approved because of vetoes from Russia and China. The UN Security Council adopted by consensus a Presidential Statement on October 11, 2007 deploring the September 2007 crackdown and calling for the creation of the necessary conditions for a genuine dialogue with Aung San Suu Kyi and all concerned parties and ethnic groups in order to achieve an inclusive national reconciliation. The UN Security Council issued a press statement on the crackdown on November 14, 2007. In November 2007, UN Commission on Human Rights Special Rapporteur Paulo Sergio Pinheiro was allowed to visit the country for the first time since 2003. His report detailing the Burmese authorities' September crackdown on demonstrations by monks and democracy activists and the severe reprisals that continued was released on December 11, 2007. Gambari visited Burma in March 2008. On May 2, the Security Council issued a second Presidential Statement calling for the Burmese regime to conduct the referendum on its draft constitution in a free and fair manner. In the wake of Cyclone Nargis, UN Secretary-General Ban Ki Moon visited Burma in May 2008 and called on the regime to grant greater access for international aid to cyclone-affected areas of the country.

Burma is involved in the Asian Development Bank's (ADB) Program of Economic Cooperation in the Greater Mekong Sub-region. As such, it participates in regional meetings and workshops supported by the ADB. Burma joined ASEAN in 1997, and has participated in that regional forum, even hosting a number of seminars, conferences, and ministerial meetings. As one of ASEAN's least developed members, Burma also has an extra five years (until 2008) to comply with most of ASEAN Free Trade Agreement's liberalization requirements. Burma also is a member of the World Trade Organization.

Most Western foreign aid diminished in the wake of the regime's suppression of the democracy movement in 1988. The UN Development Programme's 2007 Human Development Report indicates that official development assistance totaled $144.7 million in 2006, roughly $2 per capita (compared with $47 per person in Laos and $35 per person in Cambodia). Burma receives grants of technical assistance (mostly from Asia), limited humanitarian aid and debt relief from Japan and China, and concessional loans from China and India.

Burma became a member of the International Monetary Fund (IMF) and World Bank in 1952, the International Financial Corporation (IFC) in 1956, the International Development Association (IDA) in 1962, and the ADB in 1973. Since July 1987, the World Bank has not made any loans to Burma. Since 1998 Burma has been in non-accrual status with the Bank. The IMF performs its mandated annual Article IV consultations, but there are no IMF assistance programs. The ADB has not extended loans to Burma since 1986. Bilateral technical assistance ended in 1988. Burma has not serviced its ADB loans since January 1998. Burma's total foreign debt now stands at over $7 billion.

U.S.-BURMESE RELATIONS

The political relationship between the United States and Burma worsened after the 1988 military coup and violent suppression of pro-democracy demonstrations. Subsequent repression, including the brutal crackdown on peaceful protestors in September 2007, further strained the relationship.

The United States has imposed broad sanctions against Burma under several different legislative and policy vehicles. The Burma Freedom and Democracy Act (BFDA), passed by Congress and signed by the President in 2003, includes a ban on all imports from Burma, a ban on the export of financial services to Burma, a freeze on the assets of certain Burmese financial institutions, and extended visa restrictions on Burmese officials. Congress has renewed the BFDA annually, most recently in July 2007. Since September 27, 2007, the U.S. Department of Treasury designated 25 senior Burmese Government officials as subject to an asset block

under Executive Order 13310. On October 19, 2007, President Bush announced a new Executive Order (E.O. 13348) which expands the authority to block assets to individuals who are responsible for human rights abuses and public corruption, as well as those who provide material and financial support to the regime. Other names were added to the targeted sanctions list in November 2007 and February and March 2008. On April 30, the President issued Executive Order 13464, blocking all property and interests in property of designated individuals and entities determined to be owned or controlled by the Government of Burma or an official of the Government of Burma. In addition, since May 1997, the U.S. Government has prohibited new investment by U.S. persons or entities. A number of U.S. companies exited the Burma market even prior to the imposition of sanctions due to a worsening business climate and mounting criticism from human rights groups, consumers, and shareholders.

The United States has also imposed countermeasures on Burma due to its inadequate measures to eliminate money laundering. Due to its particularly severe violations of religious freedom, the United States has designated Burma a Country of Particular Concern (CPC) under the International Religious Freedom Act. Burma is also designated a Tier 3 Country in the Trafficking in Persons Report for its use of forced labor, and is subject to additional sanctions as a result.

The United States downgraded its level of representation in Burma from Ambassador to Chargé d'Affaires after the government's crackdown on the democratic opposition in 1988 and its failure to honor the results of the 1990 parliamentary election.

TRAVEL

Consular Information Sheet

October 9, 2008

Country Description: Burma (Myanmar) is an underdeveloped agrarian country ruled by an authoritarian military regime. The country's government suppresses all expression of opposition to its rule.

After a long period of isolation, Burma has started to encourage tourism. Foreigners can expect to pay several times more than locals do for accommodations, domestic airfares, and entry to tourist sites. Tourist facilities in Rangoon, Bagan, Ngapali Beach, Inle Lake, and Mandalay are superior to tourist facilities in other parts of the country, where they are limited. Please note that visitors should travel with sufficient cash to cover their expenses for the duration of their visit. Travelers' checks and credit cards are not accepted anywhere, and ATM machines are nonexistent in Burma.

Entry and Exit Requirements: The government of Burma strictly controls travel to, from, and within Burma. Since October 1, 2006, Burmese authorities have often prohibited entry or exit at most land border crossings, unless the traveler is part of a package tour group that has received prior permission from the Burmese authorities. A passport and visa are required for entry into Burma. Travelers are required to show their passports with a valid visa at all airports, train stations, and hotels. Security checkpoints are common outside of tourist areas.

Burmese authorities rarely issues visas to persons with occupations they deem "sensitive," including journalists. Many journalists and writers traveling to Burma on tourist visas have been denied entry. Journalists and tourists mistaken for journalists have been harassed. Some journalists have had film and notes confiscated upon leaving the country.

In an effort to prevent international child abduction, many governments have initiated procedures at entry/exit points. These often include requiring documentary evidence of relationship and permission for the child's travel from the absent parent(s) or legal guardian. Having such documentation on hand, even if not required, may facilitate entry/departure.

Information about entry requirements as well as other information may be obtained from the Burmese Embassy (Embassy of the Union of Myanmar) at http://www.embassy.org/embassies/mm.html 2300 S Street NW, Washington, DC 20008, telephone 202-332-4350 or the Permanent Burma Mission (Mission of Myanmar) to the U.N. 10 East 77th St., New York, NY 10021, (212-535-1311) 212-744-1271, fax 212-744-1290.

Safety and Security: U.S. citizens traveling in Burma should exercise caution, register with the U.S. Embassy and check in for an update on the current security situation. U.S. citizens are encouraged to carry their U.S. passports or photocopies of pass-

port data and visa pages at all times so that if questioned by Burmese officials, they will have proof of U.S. citizenship readily available. In September 2007, the Burmese Government brutally cracked down on peaceful demonstrators, using gunfire, rubber bullets, batons, and tear gas against them and those observing in the vicinity. The authorities killed at least 30 people during the crackdown and arrested more than 3,000. On September 27, 2007, security forces shot and killed a Japanese journalist in the Sule Pagoda downtown area during a demonstration. The Burmese Government has a standing law, which is sporadically enforced, that bans all gatherings of more than five people.

On May 7, 2005, three large bombs simultaneously exploded in Rangoon at two crowded shopping areas frequented by foreigners and at an international trade center, killing at least 20 people and wounding several hundred. On April 26, 2005, an explosive device detonated at a busy market in Mandalay, killing at least three people. Although other smaller-scale bombings have occurred in Burma in recent years, including in early 2007 and early 2008, the 2005 bombings were more sophisticated and specifically targeted more highly trafficked areas than those used in other bombings. However, there is no indication that these attacks targeted American citizens or U.S. interests. The perpetrators of these bombings have not been identified.

In light of these incidents and the possibility of recurring political unrest, Americans in Burma should exercise caution in public places and be alert to their surroundings. Furthermore, Americans in Burma should avoid crowded public places, such as large public gatherings, demonstrations, and any area cordoned off by security forces. The Embassy also advises U.S. citizens not to photograph or videotape the military or police, because doing so could be interpreted as provocative.

Burma experienced major political unrest in 1988 when the military regime jailed as well as killed thousands of Burmese democracy activists. In 1990, the military government refused to recognize the results of an election that the opposition won overwhelmingly. Major demonstrations by opposition activists occurred in 1996 and 1998. In May 2003, individuals affiliated with the Burmese regime attacked a convoy carrying opposition leader Aung San Suu Kyi in Sagaing Division; dozens were killed or injured.

Ethnic rebellions still smolder in regions along Burma's borders with Thailand, China, India, and Bangladesh, and anti-personnel landmines along border areas pose an additional danger. Occasional fighting between government forces and various rebel groups has occurred in Chin State and Sagaing Division near India and along the Thai-Burma border area in Burma's Shan, Mon, Kayah (Karenni), and Karen states. From time to time, the Governments of Burma and Thailand have closed the border between the two nations on short notice. In January 2005, regional governments announced a major regional law enforcement initiative aimed at dismantling the operations of Southeast Asia's largest narcotics trafficking organization, the United Wa State Army. At that time, the Burmese Government stated that it could not guarantee the safety of foreign officials or personnel from non-governmental organizations traveling or working in Wa Special Region 2 (northeastern Shan State).

U.S. citizens have been detained, arrested, tried, and deported for, among other activities, distributing pro-democracy literature and visiting the homes and offices of Burmese pro-democracy leaders. Taking photographs of anything that could be perceived as being of military or security interest may also result in problems with authorities. Burmese authorities have warned U.S. Embassy officials that those who engage in similar activities in the future will be jailed rather than deported.

For the latest security information, Americans traveling abroad should regularly monitor the Department of State, Bureau of Consular Affairs' web site at http://travel.state.gov, where the current Travel Warnings and Travel Alerts, as well as the Worldwide Caution, can be found. For the latest security information, Americans traveling abroad should regularly monitor the Department of State, Bureau of Consular Affair's Internet site at http://travel.state.gov, where the current Travel Warnings and Public Announcements, including the Worldwide Caution Public Announcement, can be found. Up–to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S. and Canada, or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444. These numbers are available from 8:00a.m.–8:00p.m. Eastern Time, Monday through Friday (except for U.S. federal holidays).

Crime: Crime rates in Burma, especially toward foreigners, are lower than those of many other countries in the region. Nevertheless, due in part to the poor economic situation in Burma, the crime rate has been increasing. Violent crime against foreigners is rare.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. embassy or consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. embassy or consulate for assistance. The embassy/consulate staff can, for example, assist you to find appropriate medical care, to contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

Medical Facilities and Health Information: Medical facilities in Burma are inadequate for even routine medical care. There are few trained medical personnel. Most foreign drugs on sale have been smuggled into the country, and many are

counterfeit or adulterated and thus unsafe to use. Travelers should bring adequate supplies of their medications for the duration of their stay in Burma. HIV/AIDS is widespread among high-risk populations, such as prostitutes and illegal drug users. Malaria, tuberculosis, hepatitis, and other infectious diseases are endemic in most parts of the country.

In early 2006 and throughout 2007, brief avian influenza outbreaks resulted in the death of domestic poultry and some wild birds. In December 2007, the World Health Organization and Burmese Ministry of Health confirmed Burma's first case of human infection with the H5N1 avian influenza virus. The young girl infected with the virus during a poultry outbreak in eastern Shan State in late November responded well to treatment and fully recovered. Travelers to Burma and other South Asian countries affected by avian influenza are cautioned to avoid poultry farms, contact with animals in live food markets, and any other surfaces that appear to be contaminated with feces from poultry or other animals.

Current information about avian influenza A (H5N1) and pandemic influenza can be found via the Centers for Disease Control and Prevention's (CDC) web site at http://www.cdc.gov/flu/avian/ or at AvianFlu.gov. For additional information on avian influenza as it affects American citizens residing abroad, see the U.S. Department of State's Avian Influenza Fact Sheet.

Tuberculosis is an increasingly serious health concern in Burma. For further information, please consult the CDC's Travel Notice on TB at http://wwwn.cdc.gov.

The U.S. Department of State is unaware of any HIV/AIDS entry restrictions for visitors to or foreign residents of Burma.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's (CDC) hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's web site at http://wwwn.cdc.gov/travel. Tuberculosis is an increasingly serious health concern in Burma. For further information, please consult the CDC's Travel Notice on TB at http://wwwn.cdc.gov/travel. For information about outbreaks of infectious diseases abroad and other health information, consult the World Health Organization's (WHO) web site at http://www.who.int/en.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Burma is provided for general reference only, and may not be accurate in a particular location or circumstance. Rangoon's main roads are generally in poor condition. Traffic in the capital is increasing rapidly, but heavy congestion is still uncommon. Some roads are in serious disrepair. Slow-moving vehicles, bicycles, animals, and heavy pedestrian traffic create numerous hazards for drivers on Rangoon's streets. Drivers must remain extremely alert to avoid hitting pedestrians.

Most roads outside of Rangoon consist of one to two lanes and are potholed, often unpaved, and unlit at night. Many of the truck drivers traversing from China to Rangoon are believed to drive under the influence of methamphetamines and other stimulants. Drunken and/or drugged drivers are also common on the roads during the four-day Buddhist water festival in mid-April. Driving at night is particularly dangerous. Few, if any, streets are adequately lit. Most Burmese drivers do not turn on their headlights until the sky is completely dark; many do not use headlights at all. Many bicyclists use no lights or reflectors. Vehicular traffic moves on the right side, as in the United States; however, a majority of vehicles have the steering wheel positioned on the right. The "right of way" concept is generally respected, but military convoys and motorcades always have precedence. Most vehicle accidents are settled between the parties on site, with the party at fault paying the damages. In the event of an accident with a pedestrian, the driver is always considered to be at fault and subject to fines or arrest, regardless of the circumstances. Accidents that require an investigation are concluded quickly and rarely result in criminal prosecution. There is no roadside assistance, and ambulances are not available. Vehicles generally do not have seat belts. Child car seats are also not available.

Aviation Safety Oversight: As there is no direct commercial air service between the United States and Burma, the U.S. Federal Aviation Administration (FAA) has not assessed Burma's Civil Aviation Authority (CAA) for compliance with International Civil Aviation Organization (ICAO) aviation safety standards. For more information, travelers may visit the FAA's web site at http://www.faa.gov.

The U.S. Embassy in Rangoon has advised its employees to avoid travel on state-owned Myanmar Airways whenever possible due to serious concerns regarding the airline's ability to maintain its airplanes.

Foreigner Travel within Burma: Burmese authorities require that hotels and guesthouses furnish information about the identities and activities of their foreign guests. Burmese who interact with foreigners may be compelled to report on those interactions to the Burmese authorities. Travelers must assume their actions are being closely monitored, particularly in hotel lobbies and rooms, when meeting Burmese citizens, and when using the telephone.

Travelers are not generally required to obtain advance permission to

travel to the main tourist areas of Mandalay and the surrounding area, Bagan, Inle Lake, Ngapali, and other beach resorts. However, some tourists traveling to places where permission is not expressly required have reported delays due to questioning by local security personnel. Additionally, the military regime restricts access to some areas of the country on an ad hoc basis, and in 2005 stated it could not guarantee the safety of foreigners traveling in eastern Shan State, specifically in Wa territory, also known as Special Region 2. Individuals planning to travel in Burma should check with Burmese tourism authorities to see whether travel to specific destinations is permitted. Even if the Burmese authorities allow travel to specific destinations in Burma, it may not be safe to travel in those areas.

Irrawaddy Delta Region: On May 2, 2008, Cyclone Nargis devastated Burma's Irrawaddy Delta region and surrounding areas, killing over 130,000 people. The Delta region is still without many basic necessities, and the risk of outbreaks of disease remains high. The United Nations, ASEAN, and others in the international community, including the United States, provided international relief assistance to meet both immediate and long-term needs. The Burmese Government has restricted access to this area for people other than relief workers it has authorized. American citizens should defer non-essential travel to the Irrawaddy Delta region.

The environment in Rangoon, Burma's most populous city, and other areas outside of the Irrawaddy Delta has gradually improved. Electrical power and water supply have been restored in most areas and markets are now operating normally.

Customs Regulations: Customs regulations in Burma are restrictive and strictly enforced. Customs authorities closely search travelers' luggage upon arrival and departure from Burma. It is illegal to enter or exit Burma with items such as firearms, religious materials, antiquities, medications, business equipment, currency, gems, and ivory. On several occasions in the past two decades, foreigners have been detained, searched, and imprisoned for attempting to take restricted items out of the country.

Customs officials also strictly limit what is brought into the country, including bans on pornography and political material or literature critical of the regime or supportive of the opposition. Travelers have also reported problems bringing in high-tech electronic devices and equipment, ranging from toys to computers. The military regime has never provided a complete listing of prohibited import items. For information on restricted items for import into Burma and specific customs' requirements, it is best to consult the nearest Burmese Embassy (Embassy of the Union of Myanmar) or in Washington DC located at 2300 S Street NW, Washington DC 20008, tel.: 202-332-4350. You may also contact Burma's Mission in New York located at 10 E. 77th Street, New York, NY 10021, tel. 202-535-1310, or 212-535-1311, fax 212-744-1290 In many countries around the world, counterfeit and pirated goods are widely available. Transactions involving such products are illegal and bringing them back to the United States may result in forfeitures and/or fines.

Computers, Internet, and E-Mail: The military regime carefully controls and monitors all internet use in Burma and restricts internet access through software-based censorship that limits the materials individuals can access on line. The government has allowed several cyber cafes to open, but access to the Internet is very expensive, and access to most "free" international e-mail services such as Hotmail and Yahoo is prohibited. Currently, gmail (Google mail) accounts can be accessed in Burma, and many locals and resident expatriates use it.

It is illegal to own an unregistered modem in Burma. Tourists may bring one laptop computer per person into Burma and must declare it upon arrival. Limited e-mail service is available at some large hotels. All e-mails are read by military intelligence. It is very expensive to send photographs via e-mail. One foreign visitor was presented a bill for $2,000.00 after transmitting one photograph via a major hotel's e-mail system. During September and October 2007, the military government disconnected all Internet access across the country for extended periods of time.

Consular Notification and Access: U.S. consular officers do not always receive timely notification of the detention, arrest, or deportation of U.S. citizens. In addition, Burmese authorities have on occasion refused to give Embassy consular officers access to arrested or detained U.S. citizens. U.S. citizens who are arrested or detained should request immediate contact with the U.S. Embassy. U.S. citizens are encouraged to carry their U.S. passports with them at all times, so that if questioned by local officials, they have proof of identity and U.S. citizenship readily available.

Currency: Executive Order 13310, signed by President Bush on July 28, 2003 imposed a ban on the exportation of financial services to Burma. Travelers' checks, credit cards, and ATM cards can rarely, if ever, be used. Although moneychangers sometimes approach travelers with an offer to change dollars into Burmese kyat at the market rate, it is illegal to exchange currency except at authorized locations such as the airport, banks and government stores. It is also illegal for Burmese to have possession of foreign currency without a permit. Foreigners are required to use U.S. dollars, other hard currency, or Foreign Exchange Certificates (FEC) for the payment of plane tickets, train tickets and most hotels. Burmese kyats are accepted for nearly all other transactions.

Photography: Photographing military installations or people in uniform is prohibited by Burmese authorities and could lead to arrest or the confiscation of cameras and film. It is advisable to avoid photographing anything that could be perceived by the Burmese authorities as being of

military or security interest—such as bridges, airfields, government buildings or government vehicles.

Telephone Services: Telephone services are poor in Rangoon and other major cities and non-existent in many areas. Calling the United States from Burma is difficult and extremely expensive.

U.S. Treasury Sanctions: As of August 27, 2003, U.S. Treasury sanctions ban the import of almost all goods from Burma into the United States. This ban includes Burmese-origin products such as gifts, souvenirs, and items for personal use, even if carried in personal luggage. These sanctions are part of a much larger U.S. sanctions regime for Burma, which includes a ban on new U.S. investment among other measures. For specific information, contact the U.S. Department of the Treasury, Office of Foreign Assets Control (OFAC) home page at http://www.treas.gov/offices/enforcement/ofac/, via OFAC's Info-by-Fax service at 202-622-0077 or by phone toll-free at 1-800-540-6322.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than those in the United States for similar offenses. Persons violating Burmese laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession of, use of, or trafficking in illegal drugs in Burma are strict, and convicted offenders can expect jail sentences and heavy fines.

Some foreigners have been denied even minimal rights in criminal proceedings in Burma, especially when suspected of engaging in political activity of any type. This includes, but is not limited to, denial of access to an attorney, denial of access to court records, and denial of family and consular visits. The criminal justice system is controlled by the military junta, which orders maximum sentences for most offenses. Engaging in sexual conduct with children, using or disseminating child pornography in a foreign country is a crime prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in Burma are encouraged to register with the Embassy through the State Department's travel registration web site and to obtain updated information on travel and security within Burma. Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency. The U.S. Embassy is located at 110 University Ave., Kamayut Township, Rangoon. The Consular Section telephone number is (95-1) 650-006; email consular-rangoo@state.gov. Travelers may visit the U.S. Embassy web site at http://burma.usembassy.gov. The after-hours emergency number is 09-512-4330. The Consular Section is open from 8:00 am to 4:30 p.m., with non-emergency American Citizen Services from 2:00 to 3:30 pm, Monday through Friday except on U.S. and Burmese holidays.

Intercountry Adoption

October 2006

The U.S. Embassy in Rangoon has been informed by Burmese authorities that Burmese law does not allow for the adoption of Burmese children by non-Burmese nationals. Only Burmese citizens are allowed to adopt Burmese children.

BURUNDI

Compiled from the February 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Republic of Burundi

PROFILE

Geography

Location: Central Africa. Bordering nations—Tanzania, the Democratic Republic of the Congo, Rwanda.

Area: 27,830 sq. km. (10,747 sq. mi.); about the size of Maryland.

Cities: Capital—Bujumbura (pop. 300,000). Other cities—Cibitoke, Muyinga, Ngozi, Bubanza, Gitega, Bururi.

Climate: Equatorial; high plateau with considerable altitude variation (772 m to 2,670 m above sea level); average annual temperature varies with altitude from 23 to 17 degrees centigrade but is generally moderate as the average altitude is about 1,700 m; average annual rainfall is about 150 cm; two wet seasons (February to May and September to November), and two dry seasons (June to August and December to January).

Terrain: Hilly, rising from 780 meters (2,600 ft.) at the Shore of Lake Tanganyika to mountains more than 2,700 meters (9,000 ft.) above sea level.

People

Nationality: Noun and adjective—Burundian(s).

Population: (July 2007 est.) 8,390,505.

Annual growth rate: (2007 est.) 3.593%.

Ethnic groups: (estimated) Hutu 85%; Tutsi 14%; Twa 1.0%.

Religions: (estimated) Christian 67% (Roman Catholic 62%, Protestant 5%), indigenous beliefs 23%, Muslim 10%.

Languages: Kirundi (official), French (official), Swahili (along Lake Tanganyika and in the Bujumbura area), English.

Education: Years compulsory—6. Attendance—84.05% male, 62.8% female. Literacy—51.6% of total adult population (2003 estimate).

Health: (2007 est.) Life expectancy—total population: 51.29 years; male: 50.48 years; female: 52.12 years. Infant mortality rate—61.93/1,000.

Government

Type: Republic. Democratically elected, post-transition government established August 26, 2005.

Independence: July 1, 1962 (from Belgium).

Constitution: A transitional constitution was adopted October 18, 2001. The parliament adopted a post-transition constitution on September 17, 2004, which was approved in a nation-wide referendum held February 28, 2005.

Government branches: Executive—President, First Vice President in charge of political and administrative affairs, Second Vice President in charge of social and economic affairs, 20-member Council of Ministers. Legislative—A 100-member directly elected National Assembly plus additional deputies appointed as necessary (currently 18 appointed) to ensure an ethnic and gender composition of 60% Hutu, 40% Tutsi, 30% female, and 3 Batwa members. A 54-member Senate (3 seats reserved for former presidents; 3 seats reserved for the ethnic Twa minority; 2 Senators, one Hutu and one Tutsi, from each of the 16 provinces plus the city of Bujumbura appointed by an electoral college comprised of members of locally elected communal and provincial councils; 14 Senators appointed by the president according to the president's own criteria. Women must comprise 30% of the Senate.) Judicial—constitutional and subsidiary courts.

Political subdivisions: 17 provinces including Bujumbura, 117 communes.

Political parties: Multi-party system consisting of 21 registered political parties, of which CNDD (the National Council for the Defense of Democracy, Hutu), FRODEBU (the Front for Democracy in Burundi, predominantly Hutu with some Tutsi membership), and UPRONA (the National Unity and Progress Party, predominantly Tutsi with some Hutu membership) are national, mainstream parties. Other Tutsi and Hutu opposition parties and groups include, among others, PARENA (the Party for National Redress, Tutsi), ABASA (the Burundi African Alliance for the Salvation, Tutsi), PRP

(the People's Reconciliation Party, Tutsi), PALIPEHUTU (the Party for the Liberation of the Hutu People, Hutu) and FROLINA/FAP (the Front for the National Liberation of Burundi/Popular Armed Forces, Hutu).

Suffrage: Universal adult.

Economy

GDP: (2006 est.) $776 million.

Real growth rate: (2007) 6%.

Per capita GDP: (2007) $119; ($700 using purchasing power parity, 2006 est.).

Inflation rate: (2006) 11%.

Budget: (2006 est.) Revenues—$239.9 million; expenditures—$297 million, including capital expenditures.

Natural resources: Nickel, uranium, rare earth oxides, peat, cobalt, copper, platinum, vanadium, arable land, hydropower, niobium, tantalum, gold, tin, tungsten, kaolin, limestone.

Agriculture: (2006 est., 44.9% of GDP) Coffee, cotton, tea, corn, sorghum, sweet potatoes, bananas, manioc (tapioca), beef, milk, hides. Arable land—35.57% (2005 est.).

Industry: (2006 est., 20.9% of GDP) Types—beverage production, coffee and tea processing, cigarette production, sugar refining, pharmaceuticals, light food processing, textiles, chemicals (insecticides), public works construction, consumer goods, assembly of imported components, light consumer goods such as blankets, shoes, soap.

Services: (2006 est.) 34.1% of GDP.

Mining: Commercial quantities of alluvial gold, nickel, phosphates, rare earth, vanadium, and other; peat mining.

Trade: (2006 est.) Exports—$55.68 million f.o.b.: coffee (50% of export earnings), tea, sugar, cotton fabrics, hides. Major markets—U.K., Germany, Benelux, Switzerland. Imports—$207.3 million f.o.b.: food, beverages, tobacco, chemicals, road vehicles, petroleum products. Major suppliers—Benelux, France, Germany, Saudi Arabia, Japan.

Total external debt: (2004 est.) $1.4 billion.

PEOPLE

At 206.1 persons per sq. km., Burundi has the second-largest population density in Sub-Saharan Africa. Most people live on farms near areas of fertile volcanic soil. The population is made up of three major ethnic groups—Hutu, Tutsi, and Twa. Kirundi is the most widely spoken language; French and Kiswahili also are widely spoken. Intermarriage takes place frequently between the Hutus and Tutsis. Although Hutus encompass the majority of the population, historically Tutsis have been politically and economically dominant.

HISTORY

In the 16th century, Burundi was a kingdom characterized by a hierarchical political authority and tributary economic exchange. A king (mwani) headed a princely aristocracy (ganwa) that owned most of the land and required a tribute, or tax, from local farmers and herders. In the mid-18th century, this Tutsi royalty consolidated authority over land, production, and distribution with the development of the ubugabire—a patron-client relationship in which the populace received royal protection in exchange for tribute and land tenure.

Although European explorers and missionaries made brief visits to the area as early as 1856, it was not until 1899 that Burundi came under German East African administration. In 1916 Belgian troops occupied the area. In 1923, the League of Nations mandated to Belgium the territory of Ruanda-Urundi, encompassing modern-day Rwanda and Burundi. The Belgians administered the territory through indirect rule, building on the Tutsi-dominated aristocratic hierarchy. Following World War II, Ruanda-Urundi became a United Nations Trust Territory under Belgian administrative authority. After 1948, Belgium permitted the emergence of competing political parties. Two political parties emerged: the Union for National Progress (UPRONA), a multi-ethnic party led by Tutsi Prince Louis Rwagasore and the Christian Democratic Party (PDC) supported by Belgium. In 1961, Prince Rwagasore was assassinated following an UPRONA victory in legislative elections.

Full independence was achieved on July 1, 1962. In the context of weak democratic institutions at independence, Tutsi King Mwambutsa IV established a constitutional monarchy comprising equal numbers of Hutus and Tutsis. The 1965 assassination of the Hutu prime minister set in motion a series of destabilizing Hutu revolts and subsequent governmental repression. In 1966, King Mwambutsa was deposed by his son, Prince Ntare IV, who himself was deposed the same year by a military coup lead by Capt. Michel Micombero. Micombero abolished the monarchy and declared a republic, although a de facto military regime emerged. In 1972, an aborted Hutu rebellion triggered the flight of hundreds of thousands of Burundians. Civil unrest continued throughout the late 1960s and early 1970s.

In 1976, Col. Jean-Baptiste Bagaza took power in a bloodless coup. Although Bagaza led a Tutsi-dominated military regime, he encouraged land reform, electoral reform, and national reconciliation. In 1981, a new constitution was promulgated. In 1984, Bagaza was elected head of state, as the sole candidate. After his election, Bagaza's human rights record deteriorated as he suppressed religious activities and detained political opposition members.

In 1987, Maj. Pierre Buyoya overthrew Colonel Bagaza. He dissolved opposition parties, suspended the 1981 constitution, and instituted his ruling Military Committee for National Salvation (CSMN). During 1988, increasing tensions between the ruling Tutsis and the majority Hutus resulted in violent confrontations between the army, the Hutu opposition, and Tutsi hardliners. During this period, an estimated 150,000 people were killed, with tens of thousands of refugees flowing to neighboring countries. Buyoya

formed a commission to investigate the causes of the 1988 unrest and to develop a charter for democratic reform.

In 1991, Buyoya approved a constitution that provided for a president, multi-ethnic government, and a parliament. Burundi's first Hutu president, Melchior Ndadaye, of the Hutu-dominated FRODEBU Party, was elected in 1993. He was assassinated by factions of the Tutsi-dominated armed forces in October 1993. The country was then plunged into civil war, which killed tens of thousands of people and displaced hundreds of thousands by the time the FRODEBU government regained control and elected Cyprien Ntaryamira president in January 1994. Nonetheless, the security situation continued to deteriorate. In April 1994, President Ntayamira and Rwandan President Juvenal Habyarimana died in a plane crash. This act marked the beginning of the Rwandan genocide, while in Burundi, the death of Ntaryamira exacerbated the violence and unrest. Sylvestre Ntibantunganya was installed as president for a 4-year term on April 8, but the security situation further deteriorated. The influx of hundreds of thousands of Rwandan refugees and the activities of armed Hutu and Tutsi groups further destabilized the regime.

GOVERNMENT AND POLITICAL CONDITIONS

In November 1995, the presidents of Burundi, Rwanda, Uganda, and Zaire (now Democratic Republic of the Congo) announced a regional initiative for a negotiated peace in Burundi facilitated by former Tanzanian President Julius Nyerere. In July 1996, former Burundian President Buyoya returned to power in a bloodless coup. He declared himself president of a transitional republic, even as he suspended the National Assembly, banned opposition groups, and imposed a nationwide curfew. Widespread condemnation of the coup ensued, and regional countries imposed economic sanctions pending a return to a constitutional government. Buyoya agreed in 1996 to liberalize political parties. Nonetheless, fighting between the army and Hutu militias continued. In June 1998, Buyoya promulgated a transitional constitution and announced a partnership between the government and the opposition-led National Assembly. After Facilitator Julius Nyerere's death in October 1999, the regional leaders appointed Nelson Mandela as Facilitator of the Arusha peace process. Under Mandela the faltering peace process was revived, leading to the signing of the Arusha Accords in August 2000 by representatives of the principal Hutu (G-7) and Tutsi

(G-10) political parties, the government, and the National Assembly. However, the FDD and FNL armed factions of the CNDD and Palipehutu G-7 parties refused to accept the Arusha Accords, and the armed rebellion continued.

In November 2001, a 3-year transitional government was established under the leadership of Pierre Buyoya (representing the G-10) as transitional president and Domitien Ndayizeye (representing the G-7) as transitional vice president for an initial period of 18 months. In May 2003, Mr. Ndayizeye assumed the presidency for 18 months with Alphonse Marie Kadege as vice president. In October and November 2003 the Burundian Government and the former rebel group the CNDD-FDD signed cease-fire and power-sharing agreements, and in March 2004 members of the CNDD-FDD took offices in the government and parliament. The World Bank and other bilateral donors have provided financing for Burundi's disarmament, demobilization, and reintegration program for former rebel combatants.

National and regional mediation efforts failed to reach a compromise on post-transition power-sharing arrangements between the predominantly Hutu and Tutsi political parties, and in September 2004 over two-thirds of the parliament—despite a boycott by the Tutsi parties—approved a post-transition constitution. The Arusha Peace Agreement called for local and national elections to be held before the conclusion of the transitional period on October 31, 2004.

On October 20, 2004, however, a joint session of the National Assembly and Senate adopted a previously approved draft constitution as an interim constitution that provides for an extension of transitional institutions until elections are held. On February 28, 2005, Burundians overwhelmingly approved a post-transitional constitution in a popular referendum, setting the stage for local and national elections. In April 2005, Burundi's transitional government was again extended and an electoral calendar was established at a regional summit held in Uganda.

In accordance with the new electoral calendar, the Burundian people voted in Commune Council direct elections on June 3, 2005 and National Assembly direct elections on July 4, 2005. An electoral college of commune and provincial councils indirectly elected Senate members on July 29, 2005. A joint session of the parliament elected Pierre Nkurunziza as President of Burundi on August 19, 2005 in a vote of 151 to 9 with one abstention, establishing the post-transition government. Finally, the Burundian people established Colline (hill) councils through direct elections on September 23, 2005.

Principal Government Officials

Last Updated: 11/12/08

Pres.: **Pierre NKURUNZIZA**
First Vice Pres.: **Yves SAHINGUVU, Dr.**
Second Vice Pres.: **Gabriel NTISEZERANA**
Min. of Agriculture & Livestock: **Ferdinand NDERAGAKURA**
Min. of Civil Service, Labor, & Social Security: **Clotilde NIRAGIRA**
Min. of Environment, Territorial Development, & Public Works: **Anatole KANYENKIKO**
Min. of External Relations & Cooperation: **Antoinette BATUMUBWIRA**
Min. of Finance, Economy, Cooperation, & Development: **Clotilde NIZIGAMA**
Min. of Health: **Emmanuel GIKORO, Dr.**
Min. of Information, Communication, & Relations With Parliament & Govt. Spokesman: **Hafsa MOSSI**
Min. of Interior & Communal Development: **Venant KAMANA**
Min. of Justice & Keeper of the Seals: **Jean-Bosco NDIKUMANA**
Min. of National Defense & War Veterans: **Germain NIYOYANKANA, Lt. Gen.**
Min. of National Education & Scientific Research: **Saidi KIBEYA**
Min. of National Solidarity, Repatriation, National Reconstruction, Human Rights, & Gender: **Immaculee NAHAYO**
Min. of Public Security: **Alain Guillaumme BUNYONI**
Min. of Regional Integration: **Venerand BAKEVYUMUSAYA**
Min. of Trade, Industry, & Tourism: **Euphrasie BIGIRIMANA**
Min. of Transport, Posts, & Telecommunications: **Philippe NJONI**
Min. of Water, Energy, & Mines: **Samuel NDAYIRAGIJE**
Min. of Youth, Sports & Culture: **Jean-Jacques NYENIMIGABO**
Min. in the Office of the Pres. in Charge of AIDS: **Bonhima BARNABE, Dr.**
Min. in the Office of the Pres. in Charge of Good Governance, Privatization, & General Inspection of the State & Local Admin.: **Martin NIVYABANDI**
Governor, Central Bank: **Gaspard SINDAYIGAYA**
Ambassador to the US: **Celestin NIYONGABO**
Permanent Representative to the UN, New York: **Augustin NSANZE**

Burundi maintains an embassy in the United States at Suite 212, 2233 Wisconsin Ave. NW, Washington, DC 20007 (tel. 202-342-2574).

ECONOMY

The mainstay of the Burundian economy is agriculture, accounting for 44.9% of GDP in 2006. Agriculture supports more than 90% of the labor force, the majority of whom are subsistence farmers. Although Burundi is potentially self-sufficient in food production, the civil war, overpopulation, and soil erosion have contributed to the contraction of the subsistence economy by 30% in recent years. Large numbers of internally displaced persons have been unable to produce their own food and are dependent on international humanitarian assistance. Burundi is a net food importer, with food accounting for 13% of imports in 2003.

The main cash crop is coffee, which accounted for some 80% of exports in 2004. This dependence on coffee has increased Burundi's vulnerability to fluctuations in seasonal yields and international coffee prices. Coffee processing is the largest state-owned enterprise in terms of income. Although the government has tried to attract private investment to this sector, plans for the privatization of this sector have stalled. Efforts to privatize other publicly held enterprises have likewise stalled. Other principal exports include tea, sugar, and raw

cotton. Coffee production, after a severe drop in 2003, returned to normal levels in 2004. Revenues from coffee production and exports are likewise estimated to return to pre-2003 levels.

Little industry exists except the processing of agricultural exports. Although potential wealth in petroleum, nickel, copper, and other natural resources is being explored, the uncertain security situation has prevented meaningful investor interest. Industrial development also is hampered by Burundi's distance from the sea and high transport costs. Lake Tanganyika remains an important trading point.

Burundi is heavily dependent on bilateral and multilateral aid, with external debt totaling $1.4 billion in 2004. International Monetary Fund (IMF) structural adjustment programs in Burundi were suspended following the outbreak of violence in 1993; the IMF re-engaged Burundi in 2002 and 2003 with post-conflict credits, and in 2004 approved a $104 million Poverty Reduction and Growth Facility loan. The World Bank is preparing a Transition Support Strategy, and has identified key areas for potential growth, including the productivity of traditional crops and the introduction of new exports, light manufactures, industrial mining, and services. Both the IMF and the World Bank assisted the Burundians in preparing a Poverty Reduction Strategy Paper, released in February 2007. More than 81% of Burundians live below the poverty line. Serious economic problems include the state's role in the economy, the question of governmental transparency, and debt reduction.

Based on Burundi's successful transition from war to peace and the establishment of a democratically-elected government in Burundi in September 2005, the United States Government lifted all sanctions on assistance to Burundi on October 18, 2005. Burundi also became eligible for trade benefits under the African Growth and Opportunity Act in December 2005.

FOREIGN RELATIONS

Burundi's relations with its neighbors have often been affected by security concerns. Hundreds of thousands of Burundian refugees have at various times crossed into Rwanda, Tanzania, and the Democratic Republic of the Congo. Hundreds of thousands of Burundians fled to neighboring countries during the civil war. Most of them, more than 750,000 since 1993, sought refuge in Tanzania. More than 430,000 remain in camps in Tanzania. Burundi maintains close relations with all neighbors in the Great Lakes region, including Rwanda, Uganda, and the Democratic Republic of the Congo.

Burundi is a member of various international and regional organizations, including the United Nations, the World Trade Organization, the African Union, the African Development Bank, COMESA, the free-tariff zone of eastern and southern Africa, and the East Africa Community (EAC).

U.S.-BURUNDI RELATIONS

U.S. Government goals in Burundi are to help the people of Burundi realize a just and lasting peace based upon democratic principles and sustainable economic development. The United States encourages political stability, ongoing democratic reforms, political openness, respect for human rights, and economic development in Burundi. In the long term, the United States seeks to strengthen the process of internal reconciliation and democratization within all the states of the region to promote a stable, democratic community of nations that will work toward mutual social, economic, and security interests on the continent.

The United States supported the Arusha peace process, providing financial support through our assessed contributions to a UN peacekeeping force established in 2004.

TRAVEL

Consular Information Sheet

April 21, 2008

Country Description: One of the poorest countries in the world, Burundi is a small, densely populated central African nation bordering Lake Tanganyika, Rwanda, Tanzania and the Democratic Republic of Congo. After more than 12 years of civil and ethnic strife, an electoral process deemed free and fair resulted in the installation of a democratic government in 2005. Years of fighting have devastated a historically fragile economy that depends largely on subsistence agriculture.

Poor public health and education, weather disasters such as drought and floods, crop diseases and lack of infrastructure exacerbate the effects

of conflict and delay recovery. Facilities for tourism, particularly outside the capital, are limited.

Entry Requirements: A passport, visa and evidence of immunization against yellow fever are required for entry. Travelers with an expired visa are not permitted to leave the country without acquiring an exit visa prior to departure. The latest information about visas may be obtained from the Embassy of the Republic of Burundi, Suite 212, 2233 Wisconsin Avenue NW, Washington, DC 20007, telephone (202) 342-2574, or from the Permanent Mission of Burundi to the United Nations in New York at telephone (212) 499-0001 thru 0006.

Safety and Security: The Department of State continues to caution U.S. citizens traveling to Burundi. Burundi was plagued by a civil war from 1993—2006 that often involved non-government, non-combatant targets. In April 2006, the Burundian government lifted the curfew within Bujumbura that had been in effect for decades. In September 2006, the government and the last remaining holdout rebel group from the peace process, the PALIPEHUTU—FNL, signed a cease-fire agreement. While many of the cease-fire provisions have not been implemented and the rebels still retain the capability to conduct indirect fire attacks on the capital, Bujumbura has remained free of attacks since July 2006. Rebels are still present throughout Bujumbura Rural, which surrounds the capital city. Crime, often committed by groups of armed bandits, poses the highest risk for foreign visitors to Bujumbura and Burundi in general. Common crimes include muggings, burglaries, and carjackings. Armed criminals often ambush vehicles, particularly on the roads leading out of Bujumbura. Due to insufficient resources, local authorities in any part of Burundi are often unable to provide timely assistance in case of need.

Crime: Crime poses a high risk for visitors throughout Bujumbura and Burundi in general. Street crimes include mugging, purse-snatching, pick pocketing, burglary, automobile break-ins and carjacking. Many criminal incidents involve armed attackers. U.S. Government personnel are restricted from walking on the streets during the hours of darkness and using local public transportation. Criminals in Bujumbura operate in pairs or in small groups involving six or more individuals. Foreigners, whether in vehicles or at home, are always a potential target of crime. Americans should exercise common sense judgment and take the same precautions as one would in any major city.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and provide a list of local attorneys if needed.

Medical Facilities and Health Information: Medical facilities in Burundi generally do not meet Western standards of care. Travelers should carry an ample supply of properly-labeled prescription drugs and other medications with them, as certain medications and prescription drugs are unavailable or in short supply. Sterility of equipment is questionable, and treatment is unreliable. Ambulance assistance is non-existent. Hospital care in Burundi should be considered in only the most serious cases and when no reasonable alternatives are available.

Malaria prophylaxis is recommended for travel to all parts of Burundi.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's web site at http://wwwn.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation. The embassy does not provide medical evacuation coverage to American citizens.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Burundi is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

While travel on most roads is generally safe during the day, travelers must maintain constant vigilance. There have been regular reports of violent attacks on vehicles traveling the roads throughout the country outside of Bujumbura. U.S. Government personnel are required to travel upcountry via two-vehicle convoys and have their trips pre-approved by the Regional Security Officer. The Embassy recommends that Americans not travel on the national highways from dusk to dawn. Drivers without valid permits, and the ease with which a driver's license can be acquired without training, make Burundian drivers less careful, predictable, or mindful of driving rules than Western drivers may expect.

There are no traffic signals in Bujumbura, and virtually nothing of the kind elsewhere in the country. Roadways are not marked, and the lack of streetlights or shoulders makes driving in the countryside at night especially dangerous. Additionally,

drivers may encounter cyclists, pedestrians, and livestock in the roadway, including in and around the capital. Mini-vans used as buses for 18 persons should be given a wide berth as they start and stop abruptly, often without pulling to the side of the road.

Large holes or damaged portions of roadway may be encountered anywhere in the country, including in Bujumbura; when driving in the countryside, it is recommended that travelers carry multiple spare tires. During the rainy season, many side roads are passable only with four-wheel drive vehicles. Burundi's supply of gasoline and diesel fuel are imported predominantly from Kenya and Tanzania, and are relatively expensive due to high transportation costs. Service stations are rare outside of the major cities.

Third-party insurance is required, and it will cover any damages (property, injury, or death). If you are found to have caused an accident, you automatically will be fined 10,000 Burundian francs (approximately $10 U.S.) and your driver's license will be confiscated until the police investigation is completed. Although the law provides for the arrest of drunk drivers, in practice, the police do not act on this law. In the city of Bujumbura, the number for police assistance is 22-22-37-77; there is no comparable number outside the capital. If you are involved in an accident causing death, it is advised that you leave the scene of the accident and proceed to the nearest police station.

Aviation Safety Oversight: As there is no direct commercial air service between the United States and Burundi, the U.S. Federal Aviation Administration (FAA) has not assessed Burundi's Civil Aviation Authority for compliance with International Civil Aviation Organization (ICAO) aviation safety standards. For more information, travelers may visit the FAA's Internet web site at http://www.faa.gov.

Special Circumstances: There are no ATMs located in the country and most Burundian hotels and businesses do not accept credit cards. Many hotels in Bujumbura accept payment in U.S. dollars or Euros only from non-Burundians. Travelers should be aware that Burundian banking practices prohibit acceptance of U. S. currency printed before the year 2003.

The Embassy recommends that visitors do not photograph airports, military installations, or other government buildings, and obtain permission from an individual before taking his/her photograph.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating Burundian laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Burundi are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans who travel to, or remain in, Burundi are urged to contact the U.S. Embassy in Bujumbura for information on the Embassy's current security policies, including areas that are off-limits to U.S. Government personnel for security reasons, and to register at the State Department's travel registration web site. By registering, American citizens make it easier for the Embassy to contact them in case of emergency. Americans without Internet access may register directly with the U.S. Embassy in Bujumbura at Avenue des Etats-Unis, telephone (257) 22-22-34-54, fax (257) 22-22-29-26. Updated information on travel and security in Burundi is available at 1-888-407-4747 toll free in the U.S. and Canada, and for callers from other countries, a regular toll line at 1-202-501-4444. For further information, consult the Country Specific Information for Burundi and the current Worldwide Caution Travel Alert, available on the Bureau of Consular Affairs Internet web site at http://travel.state.gov. The Embassy's Internet web site is http://bujumbura.usembassy.gov.

Intercountry Adoption

July 2008

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is based on public sources and our current understanding. Questions involving foreign and U.S. immigration laws and legal interpretation should be addressed respectively to qualified foreign or U.S. legal counsel.

The Hague Convention on Intercountry Adoption: The Hague Convention on Intercountry Adoption, to which the United States became a party on April 1, 2008, establishes legal and regulatory requirements for intercountry adoption.

Burundi is a party to The Hague Convention on Protection of Children and Co-operation in Respect of Intercountry Adoption (the Convention) and with which the Convention is in force for the United States.

Patterns of Immigration: Please review current reports online at http://adoption.state.gov.

Adoption Authority: All adoption cases are submitted to the Central Authority in the Ministry of Social Action. Once a case has been approved by the Ministry, it must then be approved by the County Court.

Eligibility to Adopt:

- If married, adopting parents must have been married and living together for at least the past five years;
- If married, consent of the spouse is required;
- An adopting parent should be at least thirty years of age. A waiver of this requirement can be requested from the County Court. (There is no age requirement if adopting the child of a spouse);
- An adopting parent must be a minimum of fifteen years older than the child to be adopted. However, a waiver can be obtained from the County Court;
- Adopting parents must have moral qualities and material resources necessary to support the child;
- Adopting parents must be found eligible to adopt through examination of a psycho–medical report and a home study; and
- Adoption by more than one person is not possible except when the couple is legally married.

Residency Requirements: There are no residency requirements for prospective adoptive parents of Burundian children.

Time Frame: The local adoption process can take between three and six months.

Adoption Agencies and Attorneys: Prospective adoptive parents are advised to fully research any adoption agency or facilitator they plan to use for adoption services.

Because Burundi is a Convention country, adoption services must be provided by an accredited agency, temporarily accredited agency, approved person, supervised provider, or exempted provider. It is essential that prospective adoptive parent(s) seeking to adopt from a Convention country use an accredited adoption service provider. The U.S. Department of State maintains a current list of accredited adoption service providers. The list of accredited adoption service providers is also provided on the website of The Hague Permanent Bureau at www.hcch.net.

There are no recognized adoption service organizations in Burundi, only associations who care for children. Adoption cases are prepared and processed by private lawyers. Cases are submitted to the Ministry of Social Action and the County Court for approval.

Adoption Fees: The U.S. Embassy in Burundi discourages the payment of any fees that are not properly receipted, "donations," or "expediting" fees, that may be requested from prospective adoptive parents. Such fees have the appearance of "buying" a baby and put all future adoptions in Burundi at risk. Fees can vary and it is advisable to contact an attorney to obtain accurate fee information.

Adoption Procedures:

- Select and contact a lawyer in Burundi who will process the case;
- Submit all required documentation for prospective parents;
- Submit all required documentation for adoptive child / children; and
- Lawyer will prepare case for adjudication by the Central Authority in the Ministry of Social Action.

The following elements will be reviewed:

- The home study report presented and performed by the adoption authority in the country of the adopting parents. Usually the home study completed when applying for the I-600A;
- The child/children's eligibility to be adopted: identification, status, social background, personal and family development, medical history, education and socio-cultural issued and any other special needs;
- The best interest of the child/children;
- The adoption consent must be given freely, and legally in a notarized attestation by persons authorized to agree to the adoption (e.g. biological parents, association caring for the child, family counsel) and with the understanding of the consequences of intercountry adoption; the biological mother must give consent to relinquish the child/children after birth, if applicable;
- With respect to age and maturity, the adoptive child/children must be fully informed of the consequences of intercountry adoption;
- The child's/children's views must be taken into consideration. If over 13 years of age, the consent of the adoptive child/children must be given freely, and legally in a notarized attestation;
- Evidence of the prospective adoptive parents' eligibility to adopt. See documents required for the prospective parents; and
- Once approval is received from Central Authority, the case will be passed to the County Court for ruling.

Required Documents: The following documents will be required and must be attached to an intercountry adoption request:

For the Child/Children:

- Attestations of the adoptive child/children's family situation and status;

- An attestation of acceptance from the prospective family guaranteeing their material support of the adoptive child/children; and
- Travel document (i.e. Burundian passport) for the adoptive child/children.

For the Prospective Adoptive Parents:

- Marriage, Birth and Judicial/Police Certificates;
- Attestations of good behavior and of family composition;
- Financial/income declaration; and
- Family psychological and medical report.

Civil documents, such as "attestations," can be obtained at the Mayor Office or through the civil offices.

Embassy of Burundi
2233 Wisconsin Ave., NW, Suite 212
Washington, DC 20007
Tel: 202-342-2574
202-749-0885
Fax: 202-342-2578

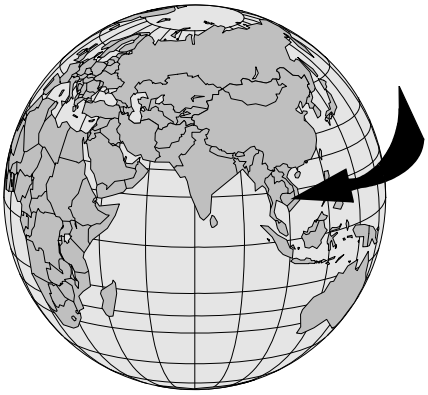
U.S. Immigration Requirements: As of April 1, 2008, U.S. citizens wishing to adopt in a Convention country must begin the process by filing with the U.S. Citizenship and Immigration Services (USCIS) a form I-800A *Application for Determination of Suitability to Adopt a Child from a Convention Country*. Prospective adoptive parents are strongly encouraged to consult the Department of Homeland Security, USCIS website (www.uscis.gov) to download forms and filing instructions.

Embassy of the United States of America
B.P. 1720
Avenue Des Etats-Unis
Bujumbura, Burundi
Tel: (257) 22-34-54
Tel (after hours): (257) 21-48-53
Fax: (257) 22-29-26
http://bujumbura.usembassy.gov

Additional Information: For information on intercountry adoption and international parental child abduction, and security information for U.S. citizens traveling abroad, call Toll Free 1-888-407-4747. This number is available from 8:00 a.m. to 8:00 p.m. EST/EDT, Monday through Friday (except U.S. federal holidays). Callers who are unable to use toll-free numbers, such as those calling from overseas, may obtain information and assistance during these hours by calling 1-202-501-4444.

Travel Warning
April 22, 2008

This Travel Warning updates American citizens on security conditions in Burundi. American citizens should exercise caution while traveling in the country. The U.S. Embassy restricts the travel of its personnel in Burundi, and certain areas of the capital, Bujumbura, are off-limits. This supersedes the Travel Warning for Burundi dated December 10, 2007.



The Department of State continues to caution U.S. citizens traveling to Burundi. Burundi was plagued by a civil war from 1993 to 2006 that often involved non-government, non-combatant targets. In September 2006, the government and the last remaining hold-out rebel group from the peace process, the PALIPEHUTU–FNL, signed a cease-fire agreement. Many of the cease-fire provisions have not been implemented and the rebels still retain the capability to conduct indirect fire attacks on the capital. In April 2008 rebel forces engaged Burundian military units just outside of Bujumbura city limits. Rebels are still present throughout Bujumbura Rural, which surrounds the capital city.

Crime, often committed by groups of armed bandits or street children, poses the highest risk for foreign visitors to Bujumbura and Burundi in general. Common crimes include muggings, burglaries, robberies, and carjackings. Visitors should be careful when stopped in heavy traffic due to the threat of robbery by roving bands of criminals. The U.S. Embassy has received reports of armed criminals ambushing vehicles, particularly on the roads leading out of Bujumbura. U.S. Government personnel are restricted from walking on the streets during hours of darkness, and prohibited from using local public transportation. Due to insufficient resources, local authorities in any part of Burundi are often unable to provide timely assistance in case of need.

The U.S. Embassy restricts the travel of Embassy personnel and certain areas of the capital, Bujumbura, are off-limits to Embassy personnel. In addition, the Embassy's Regional Security Officer must pre-approve all travel outside the capital by U.S. Embassy personnel, and employees must travel in two-vehicle convoys. The Embassy recommends that Americans not travel on national highways from dusk to dawn.

Americans who travel to, or remain in, Burundi despite this Travel Warning are urged to contact the U.S. Embassy in Bujumbura for information on the latest Embassy security guidelines, and to register at the State Department's travel registration website, https://travelregistration.state.gov. By registering, American citizens make it easier for the Embassy to contact them in case of emergency. Americans without Internet access may register directly with the U.S. Embassy in Bujumbura at Avenue des Etats-Unis, telephone (257) 22-22-34-54, fax (257) 22-22-29-26. Security information for American citizens in Burundi is posted at http://burundi.usembassy.gov/warden_information.html.

For further information, consult the Country Specific Information for Burundi and the current Worldwide Caution, available on the Bureau of Consular Affairs Internet website at http://travel.state.gov. Updated information on travel and security in Burundi is available at 1-888-407-4747 toll-free in the U.S. and Canada, and for callers in other countries, a regular toll line at 1-202-501-4444. These numbers are available from 8:00 a.m. to 8:00 p.m. Eastern Time, Monday through Friday (except U.S. federal holidays).

CAMBODIA

Compiled from the November 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Kingdom of Cambodia

PROFILE

Geography

Area: 181,040 sq. km. (69,900 sq. mi.); about the size of Missouri.

Cities: Capital—Phnom Penh (pop. 1.2 million), Battambang, Siem Reap, Kompong Cham, Kompong Speu, Kompong Thom.

Terrain: Central plain drained by the Tonle Sap (Great Lake) and Mekong and Bassac Rivers. Forests away from the rivers and the lake, mountains in the southwest (Cardamom Mountains) and north (Dangrek Mountains) along the border with Thailand.

Climate: Tropical monsoon with rainy season June-Oct. and dry season Nov.-May.

People

Nationality: Noun and adjective—Cambodian(s), Khmer.

Population: (2008 census) 13.4 million.

Avg. annual growth rate: (2008 census) 1.54%.

Health: Infant mortality rate—58/1,000. Life expectancy—59 years male; 63 years female.

Ethnic groups: Cambodian 90%; Vietnamese 5%; Chinese 1%; small numbers of hill tribes, Chams, and Laotian.

Religions: Theravada Buddhism 95%; Islam; animism; Christian.

Languages: Khmer (official) spoken by more than 95% of the population; some French still spoken in urban areas; English increasingly popular as a second language.

Education: Years compulsory—none. Enrollment—primary school, 91.9%; grades 7 to 9, 26.1%; grades 10 to 12, 9.3%; and post-secondary, 1.4%. Completion rates—primary school, 46.8%; lower secondary school, 20.57%; upper secondary school, 8.92%; university, 6%. Literacy (total population over 15 that can read and write, 2007)—74% (male 85%; female 64%).

Government

Type: Multiparty democracy under a constitutional monarchy.

Independence: November 9, 1953.

Constitution: September 24, 1993; amended March 6, 1999.

Government branches: Executive—King Sihamoni (head of state since October 29, 2004), appointed prime minister (Hun Sen since January 14, 1985), six deputy prime ministers, 14 senior ministers, 28 ministers, 135 secretaries of state, and 146 undersecretaries of state. Legislative—National Assembly, consisting of 123 elected members; Senate, consisting of 61 members. Judicial—Supreme Court and lower courts.

Political subdivisions: 20 provinces and 4 municipalities.

Political parties: Ruling parties—A coalition government of the Cambodian People's Party (CPP), led by Samdech Chea Sim; the National United Front for an Independent, Neutral, Peaceful, and Cooperative Cambodia (FUNCINPEC), led by Keo Puth Reasmey; and the Norodom Ranariddh Party (NRP), led by You Hockry. Opposition parties—The Sam Rainsy Party (SRP), led by Sam Rainsy; Human Rights Party, led by Khem Sokha.

Economy

GDP: (2007) $9.6 billion.

Per capita GDP: (2007) $606.

Annual growth rate: (2007) 10.2%.

Inflation: (2007) 10.8%.

Natural resources: Timber, gemstones, some iron ore, manganese and phosphate, hydroelectric potential from the Mekong River.

Agriculture: (29% of GDP, 2007) About 4,848,000 hectares (12 million acres) are unforested land; all are arable with irrigation, but 2.5 million hectares are cultivated. Products—rice, rubber, corn, meat, vegetables, dairy products, sugar, flour.

Industry: (27% of GDP, 2007) Types—garment and shoe manufacturing, rice milling, tobacco, fisheries and fishing, wood and wood products, textiles, cement, some rub-

ber production, paper and food processing.

Services: (39% of GDP, 2007) Tourism, telecommunications, transportation, and construction.

Budget: (2006) Revenues—$814 million; expenditures—$973 million; foreign financing—$213 million.

Trade: Exports ($4.1 billion, 2007 est,)—garments, shoes, cigarettes, natural rubber, rice, pepper, wood, fish. Major partners—United States, Germany, U.K., Singapore, Japan, Vietnam. Imports ($5.4 billion, 2007 est.)—fuels, cigarettes, vehicles, consumer goods, machinery. Major partners—Thailand, Singapore, China, Hong Kong, Vietnam, Taiwan, United States.

Economic aid received: Pledges of $698.2 million in grants and concessional loans for calendar year 2007. Major donors—Asian Development Bank (ADB), UN Development Program (UNDP), World Bank, International Monetary Fund, Australia, Canada, China, Denmark, the EU, France, Germany, Italy, Japan, Sweden, Thailand, the U.K., and the U.S., 100 percent of the $601 million pledged by donors for 2006 was actually disbursed, according to the Cambodia Aid Effectiveness Report 2007.

Principal foreign commercial investors: Korea, China, Russia, Thailand, the U.S., and Vietnam.

Exchange rate: (2007) 4,006 riel per U.S. $1.

GEOGRAPHY

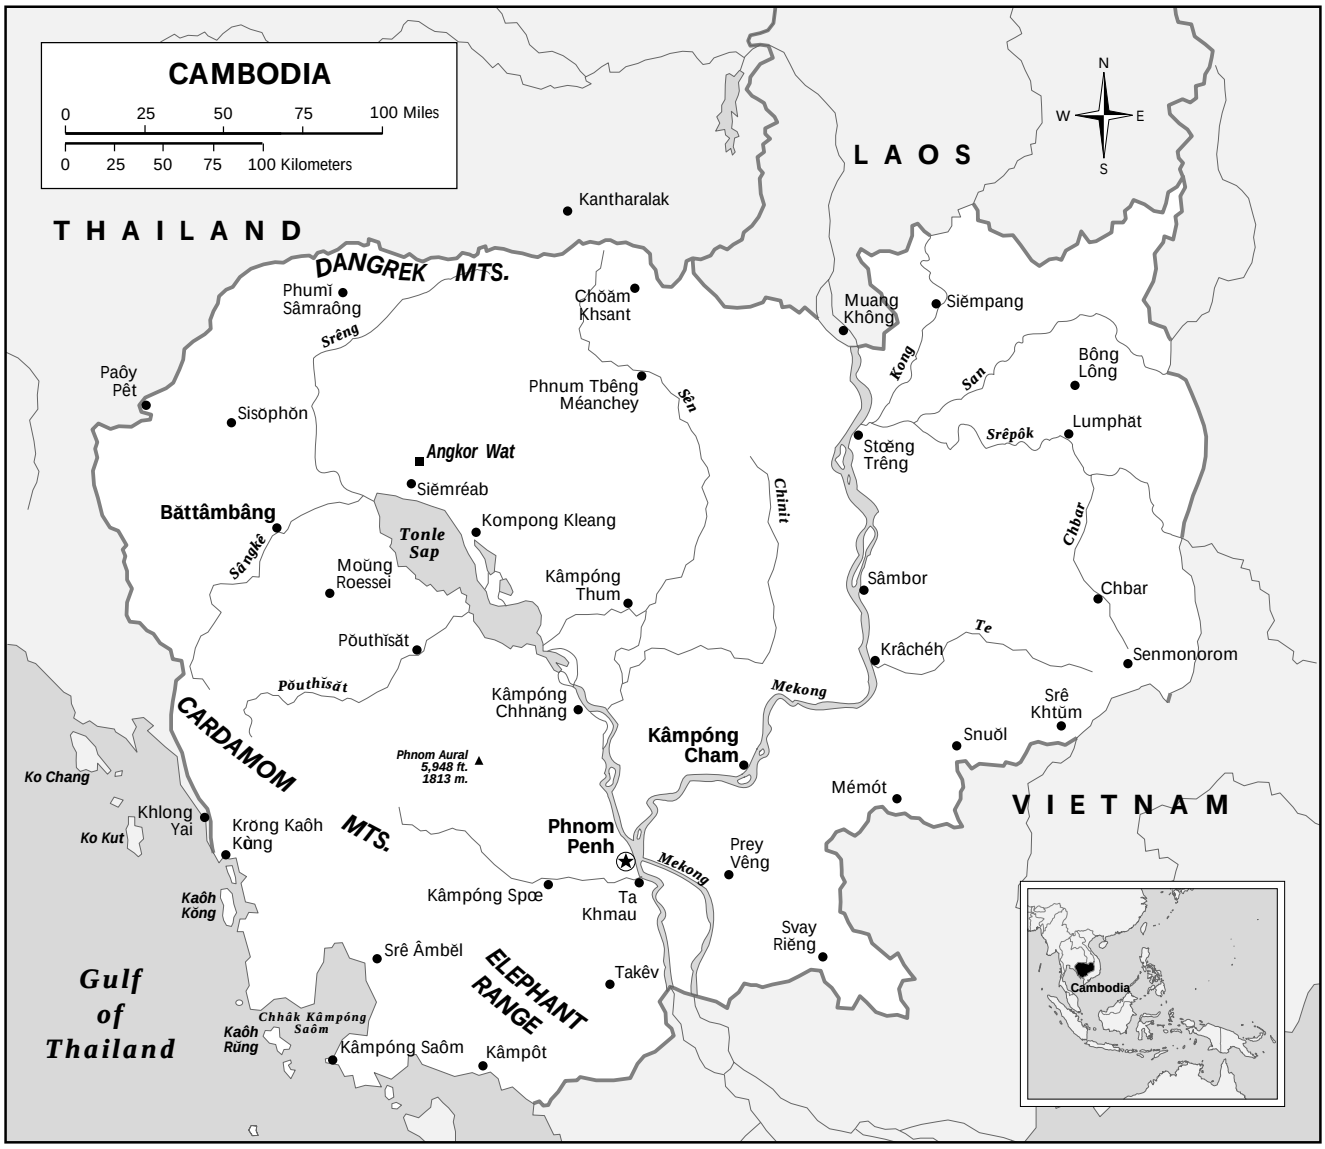
Cambodia is located on mainland Southeast Asia between Thailand to the west and north and Vietnam to the east. It shares a land border with Laos in the northeast. Cambodia has a sea coast on the Gulf of Thailand. The Dangrek Mountain range in the north and Cardamom Mountains in the southwest form natural boundaries. Principal physical features include the Tonle Sap lake and the Mekong and Bassac Rivers. Cambodia remains one of the most heavily forested countries in the region, although deforestation continues at an alarming rate.

PEOPLE AND CULTURE

Ninety percent of Cambodia's population is ethnically Cambodian. Other ethnic groups include Chinese, Vietnamese, hill tribes, Chams, and Laotian. Theravada Buddhism is the religion of 95% of the population; Islam, animism, and Christianity also are practiced. Khmer is the official language and is spoken by more than 95% of the population. Some French is still spoken in urban areas, and English is increasingly popular as a second language.

Angkor Wat

Over a period of 300 years, between 900 and 1200 AD, the Khmer Kingdom of Angkor produced some of the world's most magnificent architectural masterpieces on the northern shore of the Tonle Sap, near the present town of Siem Reap. The Angkor area stretches 15 miles east to west and 5 miles north to south. Some 72 major temples or other buildings dot the area. Suryavarman II built the principal temple, Angkor Wat, between 1112 and 1150. With walls nearly one-half mile on each side, Angkor Wat portrays the Hindu cosmology with the central towers representing Mount Meru, home of the gods; the outer walls, the mountains enclosing the world; and the moat, the oceans beyond. Angkor Thom, the capital city built after the Cham sack of 1177, is surrounded by a 300-foot wide moat. Construction of Angkor Thom coincided with a change from Hinduism to Buddhism. Temples were altered to display images of the Buddha, and Angkor Wat became a major Buddhist shrine.



During the 15th century, nearly all of Angkor was abandoned after Siamese attacks. The exception was Angkor Wat, which remained a shrine for Buddhist pilgrims. The great city and temples remained largely cloaked by the forest until the late 19th century when French archaeologists began a long restoration process. Concerned about further destruction and dilapidation of the Angkor complex and cultural heritage, the Cambodian Government in 1995 established the Authority for the Protection and Management of Angkor and the Region of Siem Reap (APSARA) to protect, maintain, conserve, and improve the value of the archaeological park. In December 1995 the World Heritage Committee confirmed Angkor's permanent inscription on the World Heritage List. Tourism is now the second-largest foreign currency earner in Cambodia's economy.

MODERN HISTORY

Although Cambodia had a rich and powerful past under the Hindu state of Funan and the Kingdom of Angkor, by the mid-19th century the country was on the verge of dissolution. After repeated requests for French assistance, a protectorate was established in 1863. By 1884, Cambodia was a virtual colony; soon after it was made part of the Indochina Union with Annam, Tonkin, Cochin-China, and Laos. France continued to control the country even after the start of World War II through its Vichy government. In 1945, the Japanese dissolved the colonial administration, and King Norodom Sihanouk declared an independent, anti-colonial government under Prime Minister Son Ngoc Thanh in March 1945. The Allies deposed this government in October. In January 1953, Sihanouk named his father as regent and went into self-imposed exile, refusing to return until Cambodia gained genuine independence.

Full Independence

Sihanouk's actions hastened the French Government's July 4, 1953 announcement of its readiness to grant independence, which came on November 9, 1953. The situation remained uncertain until a 1954 conference was held in Geneva to settle the French-Indochina war. All participants, except the United States and the State of Vietnam, associated themselves (by voice) with the final declaration. The Cambodian delegation agreed to the neutrality of the three Indochinese states but insisted

on a provision in the cease-fire agreement that left the Cambodian Government free to call for outside military assistance should the Viet Minh or others threaten its territory.

Neutral Cambodia

Neutrality was the central element of Cambodian foreign policy during the 1950s and 1960s. By the mid-1960s, parts of Cambodia's eastern provinces were serving as bases for North Vietnamese Army and Viet Cong (NVA/VC) forces operating against South Vietnam, and the port of Sihanoukville was being used to supply them. As NVA/VC activity grew, the United States and South Vietnam became concerned, and in 1969, the United States began a series of air raids against NVA/VC base areas inside Cambodia.Throughout the 1960s, domestic politics polarized. Opposition grew within the middle class and among leftists, including Paris-educated leaders such as Son Sen, Ieng Sary, and Saloth Sar (later known as Pol Pot), who led an insurgency under the clandestine Communist Party of Kampuchea (CPK).

The Khmer Republic and the War

In March 1970, Gen. Lon Nol deposed Prince Sihanouk and assumed power. On October 9, the Cambodian monarchy was abolished, and the country was renamed the Khmer Republic. Hanoi rejected the new republic's request for the withdrawal of NVA/VC troops and began to reinfiltrate some of the 2,000-4,000 Cambodians who had gone to North Vietnam in 1954. They became a cadre in the insurgency. The United States moved to provide material assistance to the new government's armed forces, which were engaged against both the Khmer Rouge insurgents and NVA/VC forces. In April 1970, U.S. and South Vietnamese forces entered Cambodia in a campaign aimed at destroying NVA/VC base areas. Although a considerable quantity of equipment was seized or destroyed, NVA/VC forces proved elusive and moved deeper into Cambodia. NVA/VC units overran many Cambodian Army positions while the Khmer Rouge expanded their small scale attacks on lines of communication.

The Khmer Republic's leadership was plagued by disunity among its members, the problems of transforming a 30,000-man army into a national combat force of more than 200,000 men, and spreading corruption. The insurgency continued to grow, with supplies and military support provided by North Vietnam. But inside Cambodia, Pol Pot and Ieng Sary asserted their dominance over the Vietnamese-trained communists, many of whom were purged. At the same time, the Khmer Rouge forces became stronger and more independent of their Vietnamese patrons. By 1974, Lon Nol's control was reduced to small enclaves around the cities and main transportation routes. More than 2 million refugees from the war lived in Phnom Penh and other cities.

On New Year's Day 1975, communist troops launched an offensive that, in 117 days of the hardest fighting of the war, destroyed the Khmer Republic. Simultaneous attacks around the perimeter of Phnom Penh pinned down Republican forces, while other Khmer Rouge units overran fire bases controlling the vital lower Mekong resupply route. A U.S.-funded airlift of ammunition and rice ended when Congress refused additional aid for Cambodia. Phnom Penh surrendered on April 17, 1975—5 days after the U.S. mission evacuated Cambodia.

Democratic Kampuchea

Many Cambodians welcomed the arrival of peace, but the Khmer Rouge soon turned Cambodia—which it called Democratic Kampuchea (DK)—into a land of horror. Immediately after its victory, the new regime ordered the evacuation of all cities and towns, sending the entire urban population out into the countryside to till the land. Thousands starved or died of disease during the evacuation. Many of those forced to evacuate the cities were resettled in new villages, which lacked food, agricultural implements, and medical care. Many starved before the first harvest, and hunger and malnutrition—bordering on starvation—were constant during those years. Those who resisted or who questioned orders were immediately executed, as were most military and civilian leaders of the former regime who failed to disguise their pasts.

Within the CPK, the Paris-educated leadership—Pol Pot, Ieng Sary, Nuon Chea, and Son Sen—was in control, and Pol Pot was made Prime Minister. Prince Sihanouk was put under virtual house arrest. The new government sought to restructure Cambodian society completely. Remnants of the old society were abolished, and Buddhism suppressed.

Agriculture was collectivized, and the surviving part of the industrial base was abandoned or placed under state control. Cambodia had neither a currency nor a banking system. The regime controlled every aspect of life and reduced everyone to the level of abject obedience through terror. Torture centers were established, and detailed records were kept of the thousands murdered there. Public executions of those considered unreliable or with links to the previous government were common. Few succeeded in escaping the military patrols and fleeing the country. Solid estimates of the numbers who died between 1975 and 1979 are not available, but it is likely that hundreds of thousands were brutally executed by the regime. Hundreds of thousands more died of starvation and disease—both under the Khmer Rouge and during the Vietnamese invasion in 1978. Estimates of the dead range from 1.7 million to 3 million, out of a 1975 population estimated at 7.3 million.

Democratic Kampuchea's relations with Vietnam and Thailand worsened rapidly as a result of border clashes and ideological differences. While communist, the CPK was fiercely anti-Vietnamese, and most of its members who had lived in Vietnam were purged. Democratic Kampuchea established close ties with China, and the Cambodian-Vietnamese conflict became part of the Sino-Soviet rivalry, with Moscow backing Vietnam. Border clashes worsened when Democratic Kampuchea's military attacked villages in Vietnam.

In mid-1978, Vietnamese forces invaded Cambodia, advancing about 30 miles before the arrival of the rainy season. In December 1978, Vietnam announced formation of the Kampuchean United Front for National Salvation (KUFNS) under Heng Samrin, a former DK division commander. It was composed of Khmer communists who had remained in Vietnam after 1975 and officials from the eastern sector—like Heng Samrin and Hun Sen—who had fled to Vietnam from Cambodia in 1978. In late December 1978, Vietnamese forces launched a full invasion of Cambodia, capturing Phnom Penh on January 7, 1979 and driving the remnants of Democratic Kampuchea's army westward toward Thailand.

The Vietnamese Occupation

On January 10, 1979, the Vietnamese installed Heng Samrin as head of state in the new People's Republic of Kampuchea (PRK). The Vietnamese Army continued its pursuit of Pol Pot's Khmer Rouge forces. An estimated 600,000 Cambodians were displaced during the Pol Pot era and the Vietnamese invasion streamed to the Thai border in search of refuge between 1979 and 1981.

The international community responded with a massive relief effort coordinated by the United States through the UN Children's Fund (UNICEF) and the World Food Program. More than $400 million was provided between 1979 and 1982, of which the United States contributed nearly $100 million.

Vietnam's occupation army of an estimated 180,000 troops was posted throughout the country from 1979 to September 1989. The Heng Samrin regime's 30,000 troops were plagued by poor morale and widespread desertion. Resistance to Vietnam's occupation was extensive. A remainder of the Khmer Rouge's military forces eluded Vietnamese troops and established themselves in remote regions. A non-communist resistance movement, consisting of groups that had been fighting the Khmer Rouge

after 1975—including Lon Nol-era soldiers—coalesced in 1979-80 to form the Khmer People's National Liberation Armed Forces (KPNLAF), which pledged loyalty to former Prime Minister Son Sann, and Moulinaka (Movement pour la Liberation Nationale de Kampuchea), loyal to Prince Sihanouk. In 1979, Son Sann formed the Khmer People's National Liberation Front (KPNLF) to lead the political struggle for Cambodia's independence. Prince Sihanouk formed his own organization, National United Front for an Independent, Neutral, Peaceful, and Cooperative Cambodia (FUNCINPEC), and its military arm, the Armee Nationale Sihanoukienne (ANS) in 1981.

Within Cambodia, Vietnam had only limited success in establishing its client Heng Samrin regime, which was dependent on Vietnamese advisers at all levels. Security in some rural areas was tenuous, and major transportation routes were subject to interdiction by resistance forces. The presence of Vietnamese throughout the country and their intrusion into nearly all aspects of Cambodian life alienated much of the populace. The settlement of Vietnamese nationals, both former residents and new immigrants, further exacerbated anti-Vietnamese sentiment. Reports of the numbers involved vary widely, with some estimates as high as 1 million. By the end of the decade, Khmer nationalism began to reassert itself against the traditional Vietnamese enemy. In 1986, Hanoi claimed to have begun withdrawing part of its occupation forces. At the same time, Vietnam continued efforts to strengthen its client regime, the PRK, and its military arm, the Kampuchean People's Revolutionary Armed Forces (KPRAF). These withdrawals continued over the next 2 years, and the last Vietnamese troops left Cambodia in September 1989.

Peace Efforts

From July 30 to August 30, 1989, representatives of 18 countries, the four Cambodian parties, and the UN Secretary General met in Paris in an effort to negotiate a comprehensive settlement. They hoped to achieve those objectives seen as crucial to the future of post-occupation Cambodia—a verified withdrawal of the remaining Vietnamese occupation troops, the prevention of the return to power of the Khmer Rouge, and genuine self-determination for the Cambodian people. A comprehensive settlement was agreed upon on August 28, 1990.

Cambodia's Renewal

On October 23, 1991, the Paris Conference reconvened to sign a comprehensive settlement giving the UN full authority to supervise a cease-fire, repatriate the displaced Khmer along the border with Thailand, disarm and demobilize the factional armies, and prepare the country for free and fair elections. Prince Sihanouk, President of the Supreme National Council of Cambodia (SNC), and other members of the SNC returned to Phnom Penh in November 1991, to begin the resettlement process in Cambodia. The UN Advance Mission for Cambodia (UNAMIC) was deployed at the same time to maintain liaison among the factions and begin demining operations to expedite the repatriation of approximately 370,000 Cambodians from Thailand.

On March 16, 1992, the UN Transitional Authority in Cambodia (UNTAC) arrived in Cambodia to begin implementation of the UN Settlement Plan. The UN High Commissioner for Refugees began full scale repatriation in March 1992. UNTAC grew into a 22,000-strong civilian and military peacekeeping force to conduct free and fair elections for a constituent assembly.

Over 4 million Cambodians (about 90% of eligible voters) participated in the May 1993 elections, although the Khmer Rouge or Party of Democratic Kampuchea (PDK), whose forces were never actually disarmed or demobilized, barred some people from participating. Prince Ranariddh's FUNCINPEC Party was the top vote recipient with a 45.5% vote, followed by Hun Sen's Cambodian People's Party and the Buddhist Liberal Democratic Party, respectively. FUNCINPEC then entered into a coalition with the other parties that had participated in the election. The parties represented in the 120-member assembly proceeded to draft and approve a new constitution, which was promulgated September 24, 1993. It established a multiparty liberal democracy in the framework of a constitutional monarchy, with the former Prince Sihanouk elevated to King. Prince Ranariddh and Hun Sen became First and Second Prime Ministers, respectively, in the Royal Cambodian Government (RGC). The constitution provides for a wide range of internationally recognized human rights.

In 1997, most of the remaining Khmer Rouge fighters accepted a government amnesty and laid down their arms, putting an end to nearly three decades of war. On October 4, 2004, the Cambodian National Assembly ratified an agreement with the United Nations on the establishment of a tribunal to try senior leaders responsible for the atrocities committed by the Khmer Rouge. Donor countries have provided over $40 million to date in support of the tribunal, and in September 2008, the United States pledged $1.8 million. The tribunal has detained five former Khmer Rouge leaders, and the first trial is scheduled to begin in early 2009.

GOVERNMENT AND POLITICAL CONDITIONS

Cambodia is a constitutional monarchy, and its constitution provides for a multiparty democracy. The Royal Government of Cambodia, formed on the basis of elections internationally recognized as free and fair, was established on September 24, 1993.

The executive branch comprises the king, who is head of state; an appointed prime minister; nine deputy prime ministers, 15 senior ministers, 26 ministers, 198 secretaries of state, and 205 undersecretaries of state. The bicameral legislature consists of a 123-member elected

National Assembly and a 61-member Senate. The judiciary includes a Supreme Court, lower courts, and an internationalized court with jurisdiction over the serious crimes of the Khmer Rouge era. Administrative subdivisions are 20 provinces and 4 municipalities.

Compared to its recent past, the 1993-2003 period was one of relative stability for Cambodia. However, political violence continued to be a problem. In 1997, factional fighting between supporters of Prince Norodom Ranariddh and Hun Sen broke out, resulting in more than 100 FUNCINPEC deaths and a few Cambodian People's Party (CPP) casualties. Some FUNCINPEC leaders were forced to flee the country, and Hun Sen took over as Prime Minister. FUNCINPEC leaders returned to Cambodia shortly before the 1998 National Assembly elections. In those elections, the CPP received 41% of the vote, FUNCINPEC 32%, and the Sam Rainsy Party (SRP) 13%. Due to political violence, intimidation, and lack of media access, many international observers judged the elections to have been seriously flawed. The CPP and FUNCINPEC formed another coalition government, with CPP the senior partner.

Cambodia's first commune elections were held in February 2002. These elections to select chiefs and members of 1,621 commune (municipality) councils also were marred by political violence and fell short of being free and fair by international standards. The election results were largely acceptable to the major parties, though procedures for the new local councils have not been fully implemented.

National Assembly elections in July 2003 failed to give any one party the two-thirds majority of seats required under the constitution to form a government. The CPP secured 73 seats, FUNCINPEC 26 seats, and the SRP 24 seats. As a result, the incumbent CPP-led administration continued in power in a caretaker role pending the formation of a coalition with the required number of National Assembly seats to form a government. On July 8, 2004, the National Assembly approved a controversial addendum to the constitution in order to require a vote on a new government and to end the nearly year-long political stalemate. The vote took place on July 15, and the National Assembly approved a new coalition government comprised of the CPP and FUNCINPEC, with Hun Sen as Prime Minister and Prince Norodom Ranariddh as President of the National Assembly. The SRP, with support from various non-governmental organizations (NGOs), asserted the addendum was unconstitutional and boycotted the vote.

On October 7, 2004, King Sihanouk abdicated the throne due to illness. On October 14, the Cambodian Throne Council selected Prince Norodom Sihamoni to succeed Sihanouk as King. King Norodom Sihamoni officially ascended the throne in a coronation ceremony on October 29, 2004.

In February 2005, the National Assembly voted to lift the parliamentary immunity of three opposition parliamentarians, including SRP leader Sam Rainsy, in connection with lawsuits filed against them by members of the ruling parties. One of the MPs, Cheam Channy, was arrested and later tried, while Sam Rainsy went into self-imposed exile. In October 2005, the government arrested critics of Cambodia's border treaties with Vietnam and later detained four human rights activists following International Human Rights Day in December. In January 2006, the political climate improved with the Prime Minister's decision to release all political detainees and permit Sam Rainsy's return to Cambodia.

Following public criticism by Hun Sen, Prince Ranariddh resigned as President of the National Assembly in March 2006. He later broke with FUNCINPEC and founded a new party, the Norodom Ranariddh Party (NRP). In 2007, Ranariddh was convicted of corruption by a Cambodian court and fled to Malaysia to avoid imprisonment. In October 2008, he received a royal pardon and returned to Cambodia. Shortly afterward, he announced that he was withdrawing from politics.

Cambodia's second commune elections were held in April 2007, followed by National Assembly elections in July 2008. In both cases, there was little of the pre-election violence that preceded the 2002 and 2003 elections. Both polls resulted in victories for the Cambodian People's Party, with the Sam Rainsy Party emerging as the main opposition party and the royalist parties showing weakening support. The new Assembly inaugurated in September 2008 is led by a coalition of the CPP (90 seats) and FUNCINPEC (2 seats). The NRP (2 seats) remains independent but does not identify itself with the opposition. The SRP (26 seats) and the Human Rights Party led by Kem Sokha (3 seats) are in opposition. The CPP-led coalition retained Hun Sen as Prime Minister, as well as most of the key leaders from the previous government, and all ministers are from the CPP. The constitution provides for a wide range of internationally recognized human rights, including freedom of the press. While limitations still exist on mass media, freedom of the press has improved markedly in Cambodia since the adoption of the 1993 constitution, which grants a certain degree of freedom to the media. Much of the written press, while considered largely free, has ties to individual political parties or factions and does not seek to provide objective reporting or analysis. Cambodia has an estimated 25 Khmer-language newspapers that are published regularly. Of these, eight are published daily. There are two major English-language newspapers, one of which is produced daily. Broadcast media, in contrast to print, is more closely controlled. It tends to be politically affiliated, and access for opposition parties is extremely limited.

Min. of Women's Affairs: **UNG KUNTHA PHAVY**
Governor, State Bank: **CHEA CHANTO**
Ambassador to the US: **EK SEREYWATH**
Permanent Representative to the UN, New York: **SEA KOSAL**

Cambodia's embassy in the United States is located at 4530 16th Street NW, Washington DC 20011; tel: (202) 726-7742; fax: (202) 726-8381.

ECONOMY

From 2004-2007, the Cambodian economy expanded by more than 10% per year, with the garment sector and the tourism industry driving the growth, and inflation remaining relatively low. Growth slowed somewhat in 2008, and rising food and fuel prices pushed inflation into double digits. The economy is heavily dollarized; the dollar and riel can be used interchangeably. Cambodia remains heavily reliant on foreign assistance—about half of the central government budget depends on donor assistance. Foreign direct investment (FDI) has increased 12-fold since 2004 as sound macroeconomic policies, political stability, regional economic growth, and government openness towards investment attract growing numbers of investors.

Manufacturing output is concentrated in the garment sector, which started to expand rapidly in the mid-1990s and now employs 350,000 workers. Garments dominate Cambodia's exports, especially to the U.S. Despite predictions that Cambodia's garment sector would contract following the expiration of the Multifiber Arrangement in 2005, Cambodia's garment sector expanded by nearly 20% to an estimated $2.6 billion in 2007. The other main foreign currency earner is tourism. The number of tourists coming to Cambodia is increasing by 20%-25% per year, with over two million visitors expected to visit Cambodia in 2008. The service sector is heavily concentrated in trading activities and catering-related services. Exploratory drilling for oil and natural gas began in 2005. It is not yet clear if commercial extraction is viable or how large Cambodia's reserves are. If viable, commercial extraction is likely to start early in the next decade.

In spite of recent progress, the Cambodian economy continues to suffer from the legacy of decades of war and internal strife. Per capita income and education levels are lower than in most neighboring countries. Infrastructure remains inadequate, although road networks are improving rapidly. Most rural households depend on agriculture and its related subsectors. Corruption and lack of legal protections for investors continue to hamper economic opportunity and competitiveness. The economy also has a poor track record in creating jobs in the formal sector, and the challenge will only become more daunting in the future since 50% of the population is under 20 years of age and large numbers of job seekers will begin to enter the work force each year over the next 10 years.

FOREIGN RELATIONS

Cambodia has established diplomatic relations with most countries, including the United States. The country is a member of most major international organizations, including the UN and its specialized agencies, and became a member of the Association of Southeast Asian Nations (ASEAN) in 1998.

Cambodia is a member of the World Bank, the International Monetary Fund, and the Asian Development Bank (ADB). On October 13, 2004, Cambodia became the 148th member of the World Trade Organization (WTO).

U.S.-CAMBODIAN RELATIONS

In the past three years, bilateral relations between the U.S. and Cambodia have deepened and broadened. With the lifting of a congressional ban to provide direct assistance to the Cambodian Government, more direct technical assistance has become feasible. U.S. assistance to Cambodia administered by the U.S. Agency for International Development (USAID) mission in 2008 totaled over $57 million for programs in health, education, governance, and economic growth.

The U.S. supports efforts in Cambodia to combat terrorism, reduce the prevalence of HIV/AIDS, build demo-

cratic institutions, promote human rights, foster economic development, eliminate corruption, achieve the fullest possible accounting for Americans missing from the Indochina conflict, and to bring to justice those most responsible for serious violations of international humanitarian law committed under the Khmer Rouge regime.

Between 1955 and 1963, the United States provided $409.6 million in economic grant aid and $83.7 million in military assistance. This aid was used primarily to repair damage caused by Cambodia's war of independence from France, to support internal security forces, and for the construction of an all-weather road to the seaport of Sihanoukville, which gave Cambodia its first direct access to the sea and access to the southwestern hinterlands. Relations deteriorated in the early 1960s. Diplomatic relations were broken by Cambodia in May 1965, but were reestablished on July 2, 1969. U.S. relations continued after the establishment of the Khmer Republic until the U.S. mission was evacuated on April 12, 1975. During the 1970-75 war, the United States provided $1.18 billion in military assistance and $503 million in economic assistance. The United States condemned the brutal character of the Khmer Rouge regime between 1975 and 1979. The United States opposed the subsequent military occupation of Cambodia by Vietnam, and supported ASEAN's efforts in the 1980s to achieve a comprehensive political settlement of the problem. This was accomplished on October 23, 1991, when the Paris Conference reconvened to sign a comprehensive settlement.

The U.S. Mission in Phnom Penh opened on November 11, 1991, headed by career diplomat Charles H. Twining, Jr., who was designated U.S. Special Representative to the SNC. On January 3, 1992, the U.S. lifted its embargo against Cambodia, thus normalizing economic relations with the country. The United States also ended blanket opposition to lending to Cambodia by international financial institutions. When the freely elected Royal Government of Cambodia was formed on September 24, 1993, the United States and the Kingdom of Cambodia immediately established full diplomatic relations. The U.S. Mission was upgraded to a U.S. Embassy, and in May 1994 Mr. Twining became the U.S. Ambassador. After the factional fighting in 1997 and Hun Sen's legal machinations to depose First Prime Minister Ranariddh, the United States suspended bilateral assistance to the Cambodian Government. At the same time, many U.S. citizens and other expatriates were evacuated from Cambodia and, in the subsequent weeks and months, more than 40,000 Cambodian refugees fled to Thailand. The 1997 events also left a long list of uninvestigated human rights abuses, including dozens of extra-judicial killings. From 1997 until the lifting of legislative restrictions on bilateral assistance in 2007, U.S. assistance to the Cambodian people was provided mainly through non-governmental organizations, which flourish in Cambodia.

TRAVEL

Consular Information Sheet

June 5, 2008

Country Description: Cambodia is a poor, developing country with a constitutional monarchy and an elected government. King Norodom Sihamoni is the constitutional monarch and head of state. Elections for Members of the National Assembly were last held in July 2003. Two parties, the CPP and FUNCINPEC, have formed a coalition government, which the CPP dominates. The country has a market economy, with approximately 80 percent of the population of 13.6 million engaged in subsistence farming. The government has good relations with its neighbors despite strains over residual border disputes and other historic antagonisms. The quality of tourist facilities varies widely in Cambodia with the highest standard found in Phnom Penh, Siem Reap, and Sihanoukville.

Entry Requirements: A valid passport and a Cambodian visa are required. Cambodia offers on-line visa processing at http://evisa.mfaic.gov.kh. Tourist and business visas are valid for one month beginning with the date of entry into Cambodia. You may also apply in person at the Cambodian Embassy located at 4530 16th Street NW, Washington, DC 20011 Tel 202-726-7742, Fax 202-726-8381. Tourists and business travelers may also obtain a Cambodian visa at the airports in Phnom Penh, Siem Reap, and at all major border crossings. Both methods of obtaining a Cambodian visa require a passport-sized photograph and a passport that is valid for a minimum of six months beyond the date of entry into Cambodia.

A departure tax is charged on all domestic and international flights. This tax must be paid in U.S. dollars. Overseas inquiries may be made at the nearest embassy or consulate of Cambodia. Travelers should note that Cambodia regularly imposes

fines of USD 5.00 per day on charges of overstay on an expired visas. Visit the Embassy of the Kingdom of Cambodia web site for the most current visa information.

Safety and Security: The State Department is concerned that individuals and groups may be planning terrorist actions against United States citizens and interests, as well as sites frequented by Westerners, in Southeast Asia, including in Cambodia. Extremist groups present in Southeast Asia have transnational capabilities to carry out attacks against locations where Westerners congregate. American citizens traveling to Cambodia should therefore exercise caution in clubs, discos, bars, restaurants, hotels, places of worship, schools, outdoor recreation venues, tourist areas, beach resorts, and other places frequented by foreigners. They should remain vigilant with regard to their personal security and avoid crowds and demonstrations. From time to time, the U.S. Embassy places local establishments off limits to Embassy personnel due to safety and security incidents. You can contact the Embassy for notification on the current restrictions in place for Embassy personnel.

Local commune elections in April 2007 were peaceful. National elections are scheduled for July 27, 2008. Political tensions have eased, and the current situation is relatively stable; however, Cambodian political activities have turned violent in the past, and the possibility for politically motivated violence remains.

In November 2006, police arrested six people for allegedly plotting to conduct bomb attacks in Phnom Penh during the November Water Festival. On July 29, 2007, three improvised explosive devices (IEDs) were planted at the Vietnam-Cambodia Friendship Monument in Phnom Penh. One of the IEDs partially exploded, but the others failed to detonate and were recovered by Cambodian authorities. No one was injured, primarily because the explosion occurred during the early morning hours. Police subsequently arrested several individuals suspected of constructing the devices and planning the bombings. While there is no indication this attack was directed at U.S. or other Western interests, the possibility remains that further attacks could be carried out, harming innocent bystanders.

The U.S. Embassy advises U.S. citizens to avoid large public gatherings and crowded public areas.

Land mines and unexploded ordnance are found in rural areas throughout Cambodia, and especially in Battambang, Banteay Meanchey, Pursat, Siem Reap, and Kampong Thom provinces. Travelers should never walk in forested areas or even in dry rice paddies without a local guide. Areas around small bridges on secondary roads are particularly dangerous. Travelers should not touch anything that resembles a mine or unexploded ordnance; they should notify the Cambodia Mine Action Center at 023-368-841/981-083 or 084.

For the latest security information, Americans traveling abroad should regularly monitor the Department of State, Bureau of Consular Affair's Internet site at http://travel.state.gov, where the current Travel Warnings and Travel Alerts, including the Worldwide Caution Travel Alert, can be found. Up-to-date information on safety and security can be obtained by calling 1-888-407-4747 toll free in the U.S and Canada, or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444. These numbers are available from 8:00 a.m. to 8:00 p.m. Eastern Time, Monday through Friday (except U.S. federal holidays).

Crime: Cambodia has a high crime rate, including street crime. Military weapons and explosives are readily available to criminals despite authorities' efforts to collect and destroy such weapons. Armed robberies occur frequently in Phnom Penh. Foreign residents and visitors are among the victims. Victims of armed robberies are reminded not to resist their attackers and to surrender their valuables, since any perceived resistance may be met with physical violence, including lethal force. Local police rarely investigate reports of crime against tourists, and travelers should not expect to recover stolen items.

The U.S. Embassy advises its personnel who travel to the provinces to exercise extreme caution outside the provincial towns at all times. Many rural parts of the country remain without effective policing. Individuals should avoid walking alone after dusk anywhere in Sihanoukville, especially along the waterfront. Some of the beaches are secluded, and post has received reports that women have been attacked along the Sihanoukville waterfront during the evening hours. Take security precautions when visiting the Siem Reap (Angkor Wat) area. Travelers should be particularly vigilant during annual festivals and at tourist sites in Phnom Penh, Siem Reap and Sihanoukville, where there have been marked increases in motorcycle "snatch and grab" thefts of bags and purses. A group of young men sexually assaulted a foreigner in Phnom Penh in November 2006 while she was taking a moto-taxi from a nightclub.

Pickpockets, including some who are beggars, are present in the markets and at the tourist sites. Persons visiting Cambodia should practice sound personal security awareness by varying their routes and routines, maintaining a low profile, not carrying or displaying large amounts of cash, not wearing flashy or expensive jewelry, and not walking the streets alone after dark. In addition, we recommend that Americans travel by automobile and not use local moto-taxis or cyclos for transportation. These vehicles are more vulnerable to armed robberies and offer no protection against injury when involved in traffic accidents.

To avoid the risk of theft or confiscation of original documents, the U.S. Embassy advises its personnel to carry photocopies of their U.S. passport, driver's license or other important documents.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. embassy or consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. embassy or consulate for assistance. The embassy/consulate staff can assist you to find appropriate medical care, to contact family members or friends and explain how funds can be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

Medical Facilities and Health Information: Medical facilities and services in Cambodia do not meet international standards. Both Phnom Penh and Siem Reap have a limited number of international-run clinics and hospitals that can provide basic medical care and stabilization. Medical care outside these two cities is almost non-existent. Local pharmacies provide a limited supply of prescription and over-the-counter medications, but because the quality of locally obtained medications can vary greatly, travelers should bring adequate supplies of their medications for the duration of their stay in Cambodia.

For information on avian influenza (bird flu), please refer to the Department of State's Avian Influenza Fact Sheet, available at http://travel.state.gov.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's (CDC) hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747), fax 1-888-CDC-FAXX (1-888-232-3299), or via the CDC's Internet site at http://wwwn.cdc.gov/travel. For information about outbreaks of infectious diseases abroad including avian influenza, consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith/en.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Cambodia is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

Driving at night in Cambodia is strongly discouraged. Road maintenance is sporadic in both urban and rural areas. Roads between major areas are adequate; however, roads leading to areas that are more rural are poor. During the rainy season, both urban and rural road conditions deteriorate considerably. Roadside assistance is non-existent. The safety of road travel outside urban areas varies greatly. Cambodian drivers routinely ignore traffic laws, and vehicles are poorly maintained. Intoxicated drivers are commonplace, particularly during the evening hours, and penalties for DWI offenses vary greatly. Banditry occurs even on heavily traveled roads, so all travel should be done in daylight between the hours of 7:00 a.m. and 5.00 p.m.

Serious flooding occurs in both Phnom Penh and the rest of Cambodia starting at the end of July, early August. Heavy flooding continues into November. The unimproved highways to Prey Veng, Battambang, Pailin, Stung Treng and Poipet become more difficult and dangerous during this time of the year, and travel on unpaved or dirt roads is virtually impossible. The National Route highways are the only roads that can be traveled, with caution, this time of the year.

The U.S. Embassy advises Embassy personnel not to travel by train because of low safety standards and the high risk of banditry. Travel by boat should be avoided because boats are often overcrowded and lack adequate safety equipment. Boat owners accept no liability for accidents. Travelers also should exercise caution when using intercity buses, including those to popular tourist destinations such as Siem Reap and Sihanoukville. Moto-taxis and cyclos are widely available; however, the Embassy does not recommend using them due to safety concerns and because personal belongings can be easily stolen. Organized emergency services for victims of traffic accidents are non-existent outside of major urban areas, and those available in major urban areas are inadequate.

Aviation Safety Oversight: As there is no direct commercial air service between the United States and Cambodia, the U.S. Federal Aviation Administration (FAA) has not assessed Cambodia's Civil Aviation Authority (CAA) for compliance with International Civil Aviation Organization (ICAO) aviation safety standards. For more information, travelers may visit the FAA's Internet web site, http://www.faa.gov.

The U.S. Embassy strongly discourages its employees from using domestic air carriers due to safety incidents that have occurred in recent years. A PMT Air flight from Siem Reap to Sihanoukville crashed in bad weather in a coastal mountain range on June 25, 2007. There were no survivors. Incidents at the Ratanakiri airport since 2005 have included collapsed landing gear and hard landings. Embassy employees are permitted to use international carriers Siem Reap Airways and Bangkok Airways between Phnom Penh and Siem Reap.

Special Circumstances: Cambodian customs authorities may enforce strict regulations concerning temporary importation into or export from Cambodia of items such as drugs, firearms, antiquities, or ivory. It is advisable to contact the Embassy of

Cambodia in Washington for specific information regarding customs requirements.

Dual Nationality: Dual nationality is not prohibited under Cambodia's 1996 nationality law. In addition to being subject to all Cambodian laws affecting U.S. citizens, individuals who possess Cambodian nationality may also be subject to laws that impose special obligations on Cambodian citizens.

Business Transactions: Some U.S. citizens have reported threats of personal injury, extortion, detention or kidnapping related to personal business disputes, in particular those involving real estate. The Embassy urges any American citizen planning to engage in real estate deals or other significant financial transactions to proceed with caution. U.S. citizens who do not have confidence in the ability of the local police to protect them may wish to depart the country expeditiously.

Financial Transactions: The U.S. dollar is widely used, especially for larger transactions, and most prices are quoted in dollars. The Cambodian riel can also be used, but is less favored and is mostly given to tourists as change for dollar purchases. Ripped or torn U.S. bills are not accepted. Except in major hotels, credit cards are not widely accepted within Cambodia, although a number of banks in Phnom Penh accept Visa cards for cash advances. Credit cards are often subject to a service charge. Banks and major hotels accept travelers' checks, but usually charge a service fee.

Several international banks operate ATM machines that allow travelers to obtain U.S. dollar currency in Phnom Penh, Siem Reap and at the international airports. Personal checks are not generally accepted. Several banks serve as Western Union agents in Phnom Penh, Siem Reap, Sihanoukville and other provincial cities to which funds can be wired. Information on Western Union can be found at http://www.westernunion.com.

Photography: Taking photographs of anything that could be perceived as being of military or security interest—including government buildings, military installations, airfields, bridges- -may result in problems with the authorities and confiscation of the camera.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than those in the United States for similar offences. Persons violating Cambodian laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession of, use of, or trafficking in illegal drugs in Cambodia are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children, using, or disseminating child pornography in a foreign country is a crime, prosecutable in the United States. The police actively investigate, arrest and prosecute persons for pedophilia and debauchery. Six Americans were arrested in 2006.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in Cambodia are encouraged to register with the nearest U.S. embassy or consulate through the State Department's travel registration web site and to obtain updated information on travel and security within Cambodia. Americans without Internet access may register directly with the nearest U.S. embassy or consulate. By registering, American citizens make it easier for the embassy or consulate to contact them in case of emergency. The U.S. Embassy is located at No. 1, Street 96 (near Wat Phnom), Phnom Penh, Cambodia. The telephone number is (855-23) 728-000; fax (855-23) 728-600. Additional information about American Services can be found at the U. S. Embassy in Phnom Penh online at http://phnompenh.usembassy.gov.

Intercountry Adoption

November 2008

The information in this section has been edited from a report available through the U.S. Department of State Office of Children's Issues. For more information detailed, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Cambodia is not party to The Hague Convention on Protection of Children and Co-operation in Respect of Intercountry Adoption (Hague Adoption Convention). Intercountry adoption is not possible from Cambodia at this time.

On December 21, 2001, United States Immigration and Naturalization Service (INS) announced an immediate suspension of the processing of adoption petitions for Cambodia. This decision was based on numerous concerns related to fraud in Cambodia, as well as the lack of a sufficient local legal framework and other safeguards to protect the children's best interests.

On January 25, 2002, the Cambodian Ministry of Foreign Affairs verbally notified the United States State Department that it would suspend the issuance of adoption documentation to American families in acknowledgement of trafficking concerns and other problems in the adoption process.

No further Cambodian orphans, including siblings of previously adopted orphans, can be processed for immigrant visas to the United States until the Department of Homeland Security lifts the suspension of orphan petitions. At this time, it is not known whether or when the moratorium might be lifted.

The functions of the former INS are now carried out by the United States Citizenship and Immigration

Services (USCIS), a division of the Department of Homeland Security. INS ceased to exist in March 2003.

CAMEROON

Compiled from the November 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Republic of Cameroon

PROFILE

Geography

Area: 475,000 sq. km. (184,000) sq. mi.), about the size of California.

Cities: (2003 Census Bureau estimates) Capital—Yaounde (pop. 1,111,641). Other major cities—Douala (1.3 million), Garoua (424,312), Maroua (409,546), Bafoussam (319,457), Bamenda (321,490), Nkongsamba (166,262), and Ngaoundere (216,300).

Terrain: Northern plains, central and western highlands, southern and coastal tropical forests. Mt. Cameroon (13,353 ft.) in the southwest is the highest peak in West Africa and the sixth in Africa.

Climate: Northern plains, the Sahel region—semiarid and hot (7-month dry season); central and western highlands where Yaounde is located—cooler, shorter dry season; southern tropical forest—warm, 4-month dry season; coastal tropical forest, where Douala is located—warm, humid year-round.

People

Nationality: English noun and adjective—Cameroonian(s); French noun and adjective—Camerounais(e).

Population: (2008 est.) 18,467,692.

Annual growth rate: (2008 est.) 2.218%.

Ethnic groups: About 250.

Religions: Christian 40%, Muslim 20%, indigenous African 40%.

Languages: French and English (both official) and about 270 African languages and dialects, including pidgin, Fulfulde, and Ewondo.

Education: Compulsory between ages 6 and 14. Attendance—65%. Literacy—75%.

Health: Infant mortality rate (2008)—6.46/1,000 live births. Life expectancy (2007)—53.3 yrs.

Work force: Agriculture—70%. Industry and commerce—13%.

Government

Type: Republic; strong central government dominated by president.

Independence: January 1, 1960 (for areas formerly ruled by France) and October 1, 1961 (for territory formerly ruled by Britain).

Constitution: June 2, 1972, last amended in January 1996.

Government branches: Executive—president (chief of state), 7-yr. term, renewable once; appointed prime minister (head of government). Legislative—unicameral National Assembly (180 members, 5-yr. terms; meets briefly three times a year—March, June, November); a new Senate is called for under constitutional changes made in early 1996. Judicial—falls under the executive's Ministry of Justice.

Political subdivisions: 10 provinces, 58 departments or divisions, 349 subprefectures or subdivisions.

Political parties: Cameroon People's Democratic Movement (CPDM) or its predecessor parties have ruled since independence. Major opposition parties: the Social Democratic Front (SDF), the National Union for Democracy and Progress (NUDP), and the Cameroon Democratic Union (CDU).

Suffrage: Universal at 20.

Economy

GDP: (2007 est.) $20.646 billion.

Annual real GDP growth rate: (2007) 3.3%.

GDP per capita: (2007 est.) $1,095.

Inflation: (2007 est.): 0.9%.

Natural resources: Oil, timber, hydroelectric power, natural gas, cobalt, nickel.

Agriculture: (2007): 44.3% of GDP. Products—timber, coffee, tea, bananas, cocoa, rubber, palm oil, pineapples, cotton. Arable land (2005 est.)—12.54%.

Industry: (2007) 15.9% of GDP.

Services: (2007) 39.8% of GDP.

Trade: (2007) Exports—$3.7 billion: crude oil, timber and finished wood products, cotton, cocoa, aluminum and aluminum products, coffee, rubber, bananas. Major markets—European Union, CEMAC, China, U.S.,

Nigeria (informal). Imports—$3.6 billion: crude oil, vehicles, pharmaceuticals, aluminum oxide, rubber, foodstuffs and grains, agricultural inputs, lubricants, used clothing. Major suppliers—France, Nigeria, Italy, U.S., Germany, Belgium, Japan.

PEOPLE

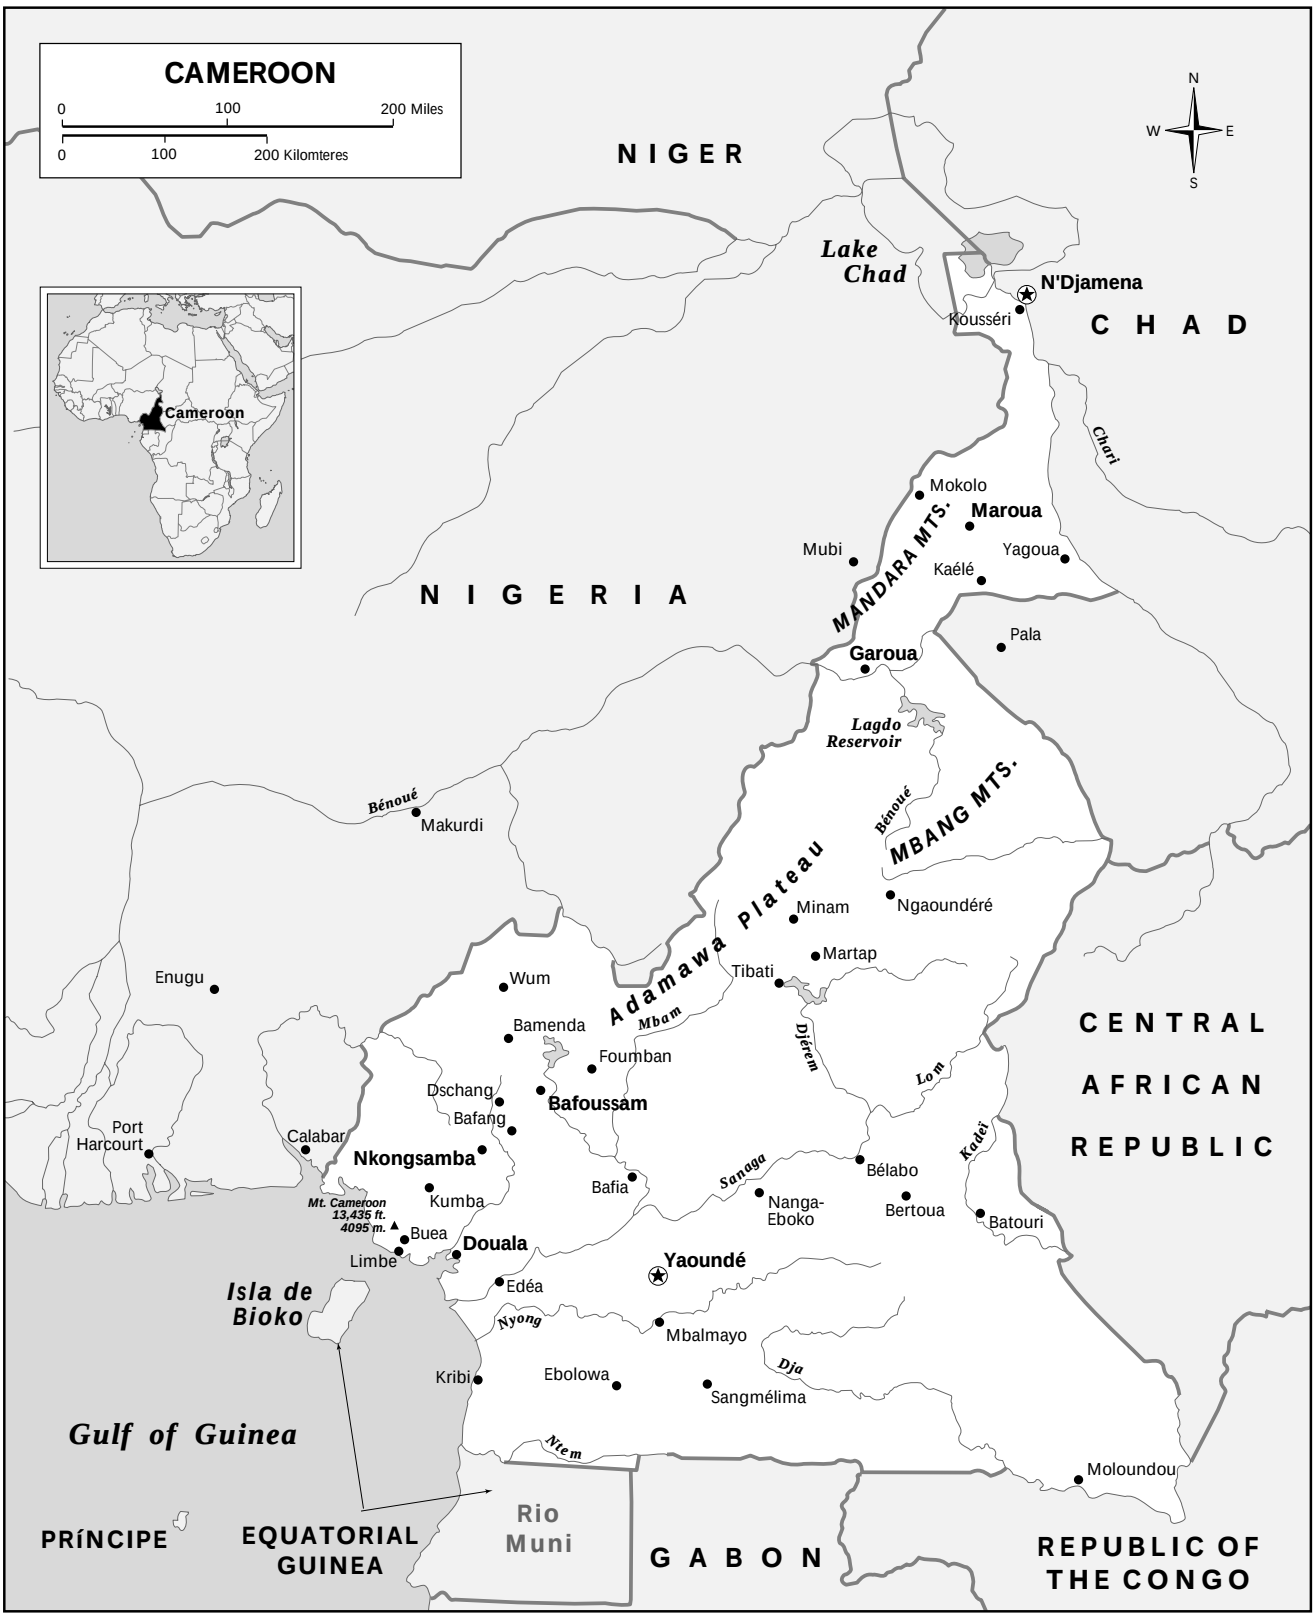
Cameroon's estimated 250 ethnic groups form five large regional-cultural groups: western highlanders (or grassfielders), including the Bamileke, Bamoun, and many smaller entities in the northwest (est. 38% of population); coastal tropical forest peoples, including the Bassa, Douala, and many smaller entities in the Southwest (12%); southern tropical forest peoples, including the Ewondo, Bulu, and Fang (all Beti subgroups), Maka and Pygmies (officially called Bakas) (18%); predominantly Islamic peoples of the northern semi-arid regions (the Sahel) and central highlands, including the Fulani, also known as Peuhl in French (14%); and the "Kirdi," non-Islamic or recently Islamic peoples of the northern desert and central highlands (18%).

The people concentrated in the southwest and northwest provinces—around Buea and Bamenda—use standard English and "pidgin," as well as their local languages. In the three northern provinces—Adamaoua, North, and Far North—French and Fulfulde, the language of the Fulani, are widely spoken. Elsewhere, French is the principal language, although pidgin and some local languages such as Ewondo, the dialect of a Beti clan from the Yaounde area, also are widely spoken. Although Yaounde is Cameroon's capital, Douala is the largest city, main seaport, and main industrial and commercial center.

The western highlands are the most fertile in Cameroon and have a relatively healthy environment in higher altitudes. This region is densely populated and has intensive agriculture, commerce, cohesive communities, and historical emigration pressures. From here, Bantu migrations into eastern, southern, and central Africa are believed to have originated about 2,000 years ago. Bamileke people from this area have in recent years migrated to towns elsewhere in Cameroon, such as the coastal provinces, where they form much of the business community. About 20,000 non-Africans, including more than 6,000 French and 2,400 U. S. citizens, reside in Cameroon.

HISTORY

The earliest inhabitants of Cameroon were probably the Bakas (Pygmies). They still inhabit the forests of the south and east provinces. Bantu speakers originating in the Cameroonian highlands were among the first groups to move out before other invaders. During the late 1770s and early 1800s, the Fulani, a pastoral Islamic people of the western Sahel, conquered most of what is now northern Cameroon, subjugating or displacing its largely non-Muslim inhabitants.



Although the Portuguese arrived on Cameroon's coast in the 1500s, malaria prevented significant European settlement and conquest of the interior until the late 1870s, when large supplies of the malaria suppressant, quinine, became available. The early European presence in Cameroon was primarily devoted to coastal trade and the acquisition of slaves. The northern part of Cameroon was an important part of the Muslim slave trade network. The slave trade was largely suppressed by the mid-19th century. Christian missions established a presence in the late 19th century and continue to play a role in Cameroonian life.

Beginning in 1884, all of present-day Cameroon and parts of several of its neighbors became the German colony of Kamerun, with a capital first at Buea and later at Yaounde. After World War I, this colony was partitioned between Britain and France under a June 28, 1919 League of Nations mandate. France gained the larger geographical share, transferred outlying regions to neighboring French colonies, and ruled the rest from Yaounde. Britain's territory—a strip bordering Nigeria from the sea to Lake Chad, with an equal population—was ruled from Lagos.

In 1955, the outlawed Union of the Peoples of Cameroon (UPC), based largely among the Bamileke and Bassa ethnic groups, began an armed struggle for independence in French Cameroon. This rebellion continued, with diminishing intensity, even after independence. Estimates of death from this conflict vary from tens of thousands to hundreds of thousands.

French Cameroon achieved independence in 1960 as the Republic of Cameroon. The following year the largely Muslim northern two-thirds of British Cameroon voted to join Nigeria; the largely Christian southern third voted to join with the Republic of Cameroon to form the Federal Republic of Cameroon. The formerly French and British regions each maintained substantial autonomy. Ahmadou Ahidjo, a French-educated Fulani, was chosen President of the federation in 1961. Ahidjo, relying on a pervasive internal security apparatus, outlawed all political parties but his own in 1966. He successfully suppressed the UPC rebellion, capturing the last important rebel leader in 1970. In 1972, a new constitution replaced the federation with a unitary state.

Ahidjo resigned as President in 1982 and was constitutionally succeeded by his Prime Minister, Paul Biya, a career official from the Bulu-Beti ethnic group. Ahidjo later regretted his choice of successors, but his supporters failed to overthrow Biya in a 1984 coup. Biya won single-candidate elections in 1984 and 1988 and flawed multiparty elections in 1992, 1997, and 2004. His Cameroon People's Democratic Movement (CPDM) party holds a sizeable majority in the legislature following 2007 elections—153 deputies out of a total of 180.

GOVERNMENT AND POLITICAL CONDITIONS

The 1972 constitution (amended in 1996 and 2008) provides for a strong central government dominated by the executive. The president is empowered to name and dismiss cabinet members, judges, generals, provincial governors, prefects, sub-prefects, and heads of Cameroon's parastatal (about 100 state-controlled) firms, obligate or disburse expenditures, approve or veto regulations, declare states of emergency, and appropriate and spend profits of parastatal firms. The president is not required to consult the National Assembly.

The judiciary is subordinate to the executive branch's Ministry of Justice. The Supreme Court may review the constitutionality of a law only at the president's request.

The 180-member National Assembly meets in ordinary session three times a year (March-April, June-July, and November-December), and seldom makes major changes in legislation proposed by the executive. Laws are adopted by majority vote of members present or, if the president demands a second reading, of total membership.

Following government pledges to reform the strongly centralized 1972 constitution, the National Assembly adopted a number of amendments in December 1995, which were promulgated in a new constitution in January 1996. The amendments called for the establishment of a 100-member Senate as part of a bicameral legislature, the creation of regional councils, and the fixing of the presidential term to 7 years, renewable once. One-third of senators would be appointed by the president, and the remaining two-thirds would be chosen by indirect elections. As of June 2008, neither the Senate nor the regional council had been created. In April 2008, the National Assembly acceded to constitutional changes proposed by the presidency that, inter alia, removed presidential term limits and provided the President with immunity from prosecution for acts committed while in office. All local government officials are employees of the central government's Ministry of Territorial Administration, from which local governments also get most of their budgets.

While the President, the Minister of Justice, and the president's judicial advisers (the Supreme Court) top the judicial hierarchy, traditional rulers, courts, and councils also exercise functions of government. Traditional courts still play a major role in domestic, property, and probate law. Tribal laws and customs are honored in the formal court system when not in conflict with national law. Traditional rulers receive stipends from the national government.

The government adopted legislation in 1990 to authorize the formation of multiple political parties and ease restrictions on forming civil associations and private newspapers. Cameroon's first multiparty legislative and presidential elections were held in 1992. Because the government refused to consider opposition demands for an independent election commission, the three major opposition parties boycotted the October 1997 presidential election, which Biya easily won. Each of Cameroon's national elections has been marred by severe irregularities. In December 2000, the National Assembly passed legislation creating the National Elections Observatory (NEO), an election watchdog body. NEO played an active role in supervising the conduct of local and legislative elections in June 2002 and July 2007, which demonstrated some progress but were still hampered by irregularities. The NEO also supervised the conduct of the presidential election in October 2004, as did many diplomatic missions, including the U.S. Embassy. NEO reported that it was satisfied with the conduct of the election but noted some irregularities and problems with voter registration. The U.S. Embassy also noted these issues with the election, as well as reports of non-indelible ink, but concluded that the irregularities were not severe enough to impact the final result. The incumbent, Paul Biya, was re-elected with 70.92% of the vote. In December 2006, the President decreed the creation of Elections Cameroon (ELECAM), an independent body responsible for the organization, management and supervision of all election operations and referendums. The decree stipulated its creation by the end of June 2008. The U.S. Embassy provided monitors for the July 2007 parliamentary and municipal elections and concurred with the analysis of other observers and diplomatic missions, who noted some improvements but persistent flaws, especially in the registration of voters and the prevention of voter fraud (indelible ink).

Cameroon has a number of private newspapers, radio stations, and four private television stations. Officially censorship was abolished in 1996, but the government sometimes seizes or suspends newspapers. Mutations, a prominent private French-daily newspaper in Cameroon, was seized on April 14, 2003 after the paper published articles on "Life after Biya."

Since November 2007, the Ministry of Communication has stepped up harassment and arresting of journalists. In February 2008, the government closed Magic FM radio, a Voice of America (VOA) affiliate, and confiscated their equipment, which included VOA transmission equipment, and the same fate awaited Equinoxe Radio and Television after carrying controversial reports and critical commentaries about the regime. Journalists have been fired from their jobs for openly discussing the change of the constitution and the U.S. Ambassador's remarks requesting the government to reopen closed stations and to return U.S. Government equipment. The government also banned a popular song on the radio about constitutional change.

Radio and television continue to be a virtual monopoly of the state-owned broadcaster, the Cameroon Radio-Television Corporation (CRTV). However, there are two independent television stations and many more regional private radio stations, although many are owned by or financed by parliamentarians, may-

ors, or party officials. Since the issuance of the decree authorizing the creation of private radio and television on April 3, 2000, only two stations have received a license from the government. On April 9, 2008 the Minister of Communication gave two television stations and one radio station until July 2008 to pay the remainder of their license fee or be shut down. Most media houses have applied and are currently operating while their applications are pending. The private radio stations broadcasting in Yaounde, Douala, Bafoussam, Bamenda, and Limbe continue to broadcast, and their existence is tolerated by the government. There are a dozen community radio stations supported by the UN Educational, Scientific, and Cultural Organization (UNESCO) which are exempted from licenses and have no political content. Radio coverage extends to about 80% of the country, while television covers 60% of the territory.

The Cameroon Government's human rights record has generally improved, although it remains deeply flawed, including significant problems over the past year. There continue to be reported abuses, including beatings of detainees, arbitrary arrests, and illegal searches. Journalists continue to be intimidated, threatened and arrested when discussing subjects considered sensitive by the Cameroonian Government. The judiciary is frequently corrupt, inefficient, and subject to political influence. Corruption is a major problem, although the government has recently arrested several prominent officials for corruption.

Principal Government Officials

Cameroon maintains an embassy in the United States at 2349 Massachusetts Avenue NW, Washington, DC 20008 (tel.: 202-265-8790).

ECONOMY

Cameroon is blessed with an abundance of natural resources, including in the agriculture, mining, forestry, and oil and gas sectors. Cameroon is the commercial and economic leader in the sub-region, though regional trade, especially with Nigeria, remains under-realized.

Cameroon's economy is highly dependent on commodity exports, and swings in world prices strongly affect its growth. Cameroon's economic development has been retarded by economic mismanagement, pervasive corruption, and a challenging business environment (for local and foreign investors). Cameroon remains one of the lowest-ranked economies on the World Bank's annual Doing Business and similar surveys and regularly ranks among the most corrupt countries in the world. Over the last three years, GDP growth has averaged 3%, which is far below the population's expectations and insufficient to meet the Millennium Challenge goals. Despite boasting a higher GDP per capita than either Senegal or Ghana, Cameroon lags behind these two countries in important socio-economic indicators, including in health and education. The government has professed a determination to foster urgent economic growth and job creation, and there is a decided up-tick in interest in the mining sector, but it is not yet clear how well these promises will translate into improved performance.

For a quarter-century following independence, Cameroon was one of the most prosperous countries in Africa. The drop in commodity prices for its principal exports—oil, cocoa, coffee, and cotton—in the mid-1980s, com-

bined with an overvalued currency and economic mismanagement, led to a decade-long recession. Real per capita gross domestic product (GDP) fell by more than 60% from 1986 to 1994. The current account and fiscal deficits widened, and foreign debt grew.

The government embarked upon a series of economic reform programs supported by the World Bank and International Monetary Fund (IMF) beginning in the late 1980s. Many of these measures have been painful; the government slashed civil service salaries by 65% in 1993. The CFA franc—the common currency of Cameroon and 13 other African states—was devalued by 50% in January 1994. The government failed to meet the conditions of the first four IMF programs. A three-year Poverty Reduction and Growth Facility (PRGF) approved by the IMF in October 2005 will end by the end of 2008. It is not clear whether the Fund will continue with lending after this date.

Official statistics indicate that inflation is under control (projected by the World Bank at 2.9% in 2008), but anecdotal evidence suggests Cameroonians are frustrated and perceive their spending power is weakening. Public frustration over rising prices was partly to blame for an outbreak of social unrest and violence in many Cameroonian cities in February 2008. In March 2008, the government announced a reduction in food import tariffs and other measures designed to reduce the cost of basic commodities.

The government has made halting progress on its privatization program. The National Water Utility Corporation (SNEC) was split into two entities. CAMWATER—to handle infrastructure—remains in government hands, and a reformed SNEC is now owned by a consortium led by the Moroccan Water Utility. Plans to privatize national air company CAMAIR and national telecom CAMTEL, however, have repeatedly faltered because of political sensitivities and concerns about corruption. CAMAIR was declared officially defunct and ceased to operate in May 2008. CAMTEL remains under the control of the Ministry of Posts and Telecommunications. The European Union remains Cameroon's main trading bloc, accounting for 36.6% of total imports and 66.1% of exports. France is Cameroon's main trading partner, but the United States is the leading investor in Cameroon (largely through the Chad-Cameroon pipeline and energy provider AES Sonel). According to press reports, China recently became the number one importer of Cameroonian exports, especially unprocessed timber.

For further information on Cameroon's economic trends, trade, or investment climate, contact the International Trade Administration, U.S. Department of Commerce, Washington, DC 20230 and/or the Commerce Department district office in any local federal building.

DEFENSE

The Cameroonian military generally has been an apolitical force dominated by civilian control. Traditional dependence on the French defense capability, although reduced, continues. French military advisers remain closely involved at senior levels of all the armed forces and the gendarmes. The armed forces number approximately 28,000 personnel in ground, air, and naval forces, with the majority being in the army and gendarmes.

Cameroon's goal is to develop a military with the capacity to contribute to peacekeeping efforts. While equipment needs pose a significant challenge, Cameroonian officers are already receiving training both in Africa and abroad, and Cameroon has recently become an African Contingency Operations Training and Assistance (ACOTA) partner.

FOREIGN RELATIONS

Cameroon's noncontentious, low-profile approach to foreign relations puts it squarely in the middle of other African and developing country states on major issues. It supports the principles of noninterference in the affairs of third countries and increased assistance to underdeveloped countries. Cameroon is an active participant in the United Nations, where its voting record demonstrates its commitment to causes that include international peacekeeping, the rule of law, environmental protection, and Third World economic development. In the UN and other human rights fora, Cameroon's nonconfrontational approach has generally led it to avoid criticizing other countries.

Cameroon enjoys good relations with the United States and other developed countries. It has particularly close ties with France, with whom it has numerous military, economic, and cultural agreements. China has a number of health and infrastructure projects underway in Cameroon, and provides some military assistance. Cameroon enjoys generally good relations with its African neighbors. Cameroon has successfully resolved its border dispute with Nigeria in the oil-rich Bakassi Peninsula through peaceful legal means after having submitted the case to the International Court of Justice (ICJ). With the support of the UN, both countries are working closely together to peacefully implement the ICJ ruling, and a genuine, peaceful turnover of the peninsula by Nigeria has begun. Roughly 5,000 Nigerians have moved back into Nigeria thus far. Cameroon is a member of CEMAC (Economic and Monetary Community of Central Africa) and supports UN peacekeeping activities in Central Africa.

U.S.-CAMEROONIAN RELATIONS

U.S.-Cameroonian relations are close, although from time to time they have been affected by concerns over human rights abuses and the pace of political and economic liberalization. The bilateral U.S. Agency for International Development (USAID) program in Cameroon closed for budgetary reasons in 1994.

However, approximately 140 Peace Corps volunteers continue to work successfully in agroforestry, community development, education, and health. The Public Affairs section of the U.S. Embassy in Yaounde organizes and funds diverse cultural, educational, and information exchanges. It maintains a library and helps foster the development of Cameroon's independent press by providing information in a number of areas, including U.S. human rights and democratization policies. The Embassy's Self-help and Democracy and Human Rights Funds are some of the largest in Africa.

Through several State Department and USAID regional funds, the Embassy also provides funds for: biodiversity protection, refugees, HIV/AIDS, democratization, and girl's scholarships. The U.S. Department of Agriculture (USDA) provided a commodity grant valued at $6 million in 2003 to fund agricultural development projects in the North and Far North provinces. Similar programs were approved in 2004, 2005, and 2006. The $4 million 2004 program was to fund an agricultural development and nutrition enhancement project in the East and Adamawa provinces. The $4 million 2005 program was to integrate tree crops and agri-business to enhance household livelihood security in vulnerable communities of the Center and South West provinces. The 2006 project was to focus on an agroforestry program to be carried out in the North West and West provinces.

The United States and Cameroon work together in the United Nations and a number of other multilateral organizations. While in the UN Security Council in 2002, Cameroon worked closely with the United States on a number of initiatives. The U.S. Government continues to provide substantial funding for international financial institutions, such as the World Bank, IMF, and African Development Bank, which provide financial and other assistance to Cameroon.

TRAVEL

Consular Information Sheet

April 2, 2008

Country Description: Cameroon is a developing country in central Africa. Although there are many natural and cultural attractions in Cameroon, facilities catering to Western-style tourism are quite limited. The capital is Yaoundé, though Douala, the country's largest city, is its main port and commercial center. Official languages are French and English, though French predominates in most of the country. English may be used in Cameroon's two Anglophone provinces of Southwest and Northwest, and the larger cities. The staff of major hotels in Cameroon's large cities is usually bilingual. In February 2008, social and political unrest led to civil unrest, although the immediate threat of violence has now receded.

Entry Requirements: A valid passport, visa, evidence of yellow-fever vaccination, and current immunization records are required, and travelers may be denied entry if they lack the proper documentation. Travelers should obtain the latest information and details from the Embassy of the Republic of Cameroon, 2349 Massachusetts Avenue, NW, Washington D.C. 20008, tel: (202) 265-8790, fax: (202) 387-3826. Visit the Embassy of Cameroon's web site at http://www.ambacam-usa.org for the most current visa information.

Safety and Security: During the week of February 25, 2008, Cameroon experienced significant civil unrest in half of its ten provinces, most notably in the port city of Douala. Demonstrators clashed violently with police and then military personnel, resulting in the reported deaths of forty persons and arrest of over 1,600 individuals. The unrest was marked by widespread road blockages, attacks on public and private vehicles, looting, burning of government and other buildings, and roaming crowds of malcontents. This disturbance created shortages of fuel, food and other supplies throughout the country, and was ended through the deployment of military units and the use of significant force.

Following the restoration of order, some efforts have been made to address fuel and food prices that were among the key grievances of the demonstrators. However, economic conditions, notably the high unemployment rate, remain difficult without the prospect for rapid improvement. Political tensions also remain, particularly over a possible amendment to the Constitution that would allow President Biya to serve again. Although a rapid resumption of violence is considered unlikely, Americans living in or visiting Cameroon are encouraged to stay abreast of local political and social developments that could signal additional difficulties for the country.

Embassy employees have been instructed to refrain from travel outside of city limits after dusk, and to monitor their movements in centrally

located areas within cities and towns. Private American citizens are urged to follow the same guidelines and are strongly advised against nighttime travel. Armed highway bandits (most notably in border areas); poorly lit roads; hazardous, poorly maintained vehicles; and unskilled, aggressive and/or intoxicated drivers pose a threat to motorists. Attacks and accidents are most common outside major towns, especially in the provinces bordering Chad and the Central African Republic but occur in all areas of the country.

The U.S. Department of State continues to warn U.S. citizens against travel to neighboring Central African Republic (CAR). On occasion, conflict between insurgents and government security forces in CAR has spilled across the border into Cameroon, affecting outposts in both Adamawa and East Provinces. Humanitarian and religious workers in eastern Cameroon are strongly encouraged to coordinate their efforts with the Embassy and the Office of the United Nations High Commission for Refugees (UNHCR) in Yaoundé.

In February 2008, an attack by rebel insurgents on Ndjamena, the capital of Chad, forced the evacuation of the Embassy in Chad and sent up to 50,000 refugees across the border into the town of Kousseri in Cameroon. Although the attack was ultimately repelled, the possibility of further military action by the rebel forces remains.

In late 2006, inter-ethnic clashes were reported in the town of Kye-Ossi near the Cameroonian border with Gabon. These confrontations were a result of a discord between moto-taxi drivers and the security forces, which resulted in demonstrations and roadblocks. According to security authorities, tensions in the area are still high, despite the deployment of a large security force to the region.

Following a ruling from the International Court of Justice defining a section of the Cameroon-Nigeria border, Cameroon assumed administrative control of most of the Bakassi Peninsula, in August 2006, with Nigerian military forces withdrawing across the border. Although the transition has generally gone smoothly, there was an attack on Cameroonian military forces in November 2007, reportedly by criminal elements from the Niger Delta not connected to the Nigerian government. It is very difficult to reach Bakassi, but travelers thinking of going near there should exercise extreme caution as there is the potential for violence if tensions rise.

For the latest security information, Americans traveling abroad should regularly monitor the Department's Internet website, where the current Travel Warnings and Travel Alerts, including Worldwide Caution Travel Alert can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S. and Canada, or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: Crime is a serious and growing problem throughout Cameroon and U.S. citizens should exercise caution when traveling in Cameroon. Internet-based crime is escalating rapidly, and Americans should be extremely skeptical of financial transactions—e.g. adoptions, hiring a service worker, such as a nanny, to come to the U.S., or purchasing a pet—that involve sending money for goods or services not yet delivered (see below). In February 2008, two European nationals were kidnapped by criminals posing as businessmen seeking to establish a palm oil export business. Although several perpetrators were arrested and the individuals were not harmed, the incident highlights a dangerous new confluence of internet-based and violent crime. If you have concerns about the legitimacy of a transaction, such as adoption, in Cameroon contact the U.S. Embassy in Cameroon—see Registration/Embassy Location section below.

All foreigners are potential targets for theft with possible attendant violence. Petty crimes, crimes against persons, thefts from vehicles, and of vehicles are the most common criminal activities. Armed banditry is a growing problem throughout all ten provinces in Cameroon. Specifically, incidents of armed highway-robbery have been reported in the North West, West, South West and East provinces. Armed bandits have erected road barricades on major routes that link rural towns to provincial headquarters, and have taken as many as 100 cars in a single attack. To curb banditry, security personnel may request persons to show their passport, residence card, driver's license, and/or vehicle registration at random checkpoints. Certified copies of these important documents should be kept in a secure location separate from the originals. Security personnel have been known to ask for bribes and may hurt citizens who refuse to pay. The U.S. Government does not condone bribery or corruption of any kind.

Due to the frequency of criminal incidents involving public transportation, American citizens are advised that use of public taxis can be dangerous. In April 2007, two American women were assaulted and robbed in a taxi. Public taxis in Cameroon function more like the U.S. bus system with drivers stopping to pick up additional passengers as long as there is space left in the vehicle. There have been numerous reports of assaults and robberies committed by "passengers" in shared taxis since crimes—rape and robbery being among the most common—are often a collaborative effort between the driver and "passengers." If a traveler must use a taxi, the use of a private taxi—or a taxi hired for exclusive use by the individual for that particular trip—where the driver is known to the passenger is a better alternative to the use of shared taxis. Taxi passengers should be particularly vigilant at night.

The risk of street and residential crime is high, and incidents of violent crime are on the rise throughout the country. During the last year, the number of carjacking and armed burglary incidents in residences and restaurants, particularly in Yaoundé and Douala, continued to increase. Carjacking and robbery has also been

reported on rural highways, especially in the Northern provinces and regions near Cameroon's border with the Central African Republic.

On March 27, 2006, 11 armed men attacked a group of four U.S. citizens in a private residence (adjacent to a hotel frequented by expatriates) in Kribi, located in the Southern province. A group of five armed bandits held up and robbed staff and guests of a hotel in Ngaoundere (Adamawa Province) on December 20, 2006. Similar incidents occurred in the middle of the night at hotels in Bertoua (East Province) on April 22, 2007, and in Yaoundé (Central Province) on May 15, 2007 when assailants broke into hotel rooms and robbed the residents. Americans were among the victims. Crimes against property, such as carjacking and burglaries, have often been accompanied by violent acts and have resulted in fatalities. There were four incidents of armed robberies in the month of April 2007, involving American citizens in or near restaurants in Yaoundé and Bertoua.

In January 2007, a French expatriate was fatally shot in the upscale Bastos neighborhood of Yaoundé. The woman was dropping off a friend to her residence and interrupted an attempted home invasion. Upon realizing what was happening, the friend returned to the vehicle and both women attempted to flee the scene. As they were leaving, an armed bandit shot and fatally wounded the driver of the vehicle.

In September 2007, several expatriates suffered armed attacks. In one incident, an Israeli citizen giving a ride to a friend was attacked in Bastos by two men with knives. In the ensuing scuffle, the Israeli was critically wounded. A Moroccan diplomat was fatally injured while walking near his residence. Found unconscious by security guards, he was taken to a local hospital where he died the following day. A Chinese business woman was also robbed and killed outside her home in a neighborhood near Bastos. All incidents occurred late at night.

In December 2007, a police officer was arrested and jailed in Yaoundé after he and his accomplices surprised a couple returning from Europe and stole a briefcase and jewelry.

In January 2008, three bandits posing as passengers on a bus to Douala—and carrying locally made guns—were intercepted at Bafoussam and apprehended. In Douala, armed bandits robbed a soap company at gun point, surprising the employees. They attempted to loot the company's computers, but were intercepted by a SWAT team and ran off.

Also in January, an Embassy employee using public transportation in the Northwest Province was the victim of highway robbers, who robbed the passengers (including a local mayor) and roughed-up those who did not have enough money.

In February 2008, Cameroon experienced a brief period of civil unrest during a taxi strike that involved road blockages, attacks on public and private vehicles, looting, burning of government and other buildings, and roaming crowds of malcontents. This period was attended by a sharp increase in reported crimes, including the stabbing death of a night watchman at a residence in Yaoundé, an attack at the Brussels Airline travel agency in the Bonapriso district of Douala, an attack by a group of armed bandits on a motorbike rider who suffered a gunshot wound to the head, and numerous reports of rape and armed attacks with firearms and machetes in Douala.

Recently, many American citizens have become victims of Cameroonian advance-fee fraud and other scams offering antiques, exotic and domesticated animals, and even adoption services through the Internet. Americans should be very cautious about sending money or traveling to Cameroon to meet someone contacted via the Internet. Commercial scams targeting foreigners, including many U.S. citizens, continue to be a problem. The scams generally involve phony offers of lucrative sales and repeated requests for additional funds to pay for unforeseen airport and/or customs fees. No one should provide personal financial or account information to unknown parties. The ability of U.S. Embassy officers to extricate U.S. citizens from unlawful business deals and the consequences is limited. For more information on international financial scams, including those involving Internet dating, a promise of an inheritance windfall, a promise of a work contract overseas, overpayment for goods purchased online, or money-laundering, see the Department of State's publication International Financial Scams.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

Medical Facilities and Health Information: Medical facilities in Cameroon are extremely limited. Even in large cities, emergency care and hospitalization for major illnesses and surgery are hampered by the lack of trained specialists, outdated diagnostic equipment, and poor sanitation. Medical services in outlying areas may be completely nonexistent. Doctors and hospitals often require immediate payment for health services in cash. Pharmacies in larger towns are well stocked, but in other areas many medicines are unavailable. Travelers are advised to carry their own supply of needed prescription and anticipated over-the-counter medicines with them.

Malaria is a serious and sometimes fatal disease. Plasmodium falci-

parum malaria, the type that predominates in Cameroon, is resistant to the antimalarial drug chloroquine. Because travelers to Cameroon are at high risk for contracting malaria, the Centers for Disease Control and Prevention (CDC) advises that travelers should take one of the following antimalarial drugs: mefloquine (Lariam–TM), doxycycline, or atovaquone/proguanil (Malarone -TM). Travelers who become ill with a fever or flu-like illness while traveling in a malaria-risk area and up to one year after returning home should seek prompt medical attention and tell the physician their travel history and what antimalarials they have been taking. For additional information on malaria, including protective measures, see the CDC Travelers' Health web site at http://wwwn.cdc.gov/travel. There are periodic outbreaks of cholera in Cameroon. Yellow fever can cause serious medical problems, but the vaccine, required for entry, is very effective in preventing the disease.

In March 2006 avian influenza (H5N1) was confirmed in wild ducks in northern Cameroon. There have been no reports of avian influenza among humans in Cameroon. Avian influenza has been reported in both birds and humans in neighboring Nigeria. For additional information on avian influenza as it affects American citizens residing abroad, please visit the U.S. Department of State's Avian Influenza Fact Sheet.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's internet site at http://www.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) website at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith/en.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Cameroon is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

Cameroon's road networks, both paved and unpaved, are poorly maintained and unsafe at all times of the year. Vehicles are poorly maintained and there is no mechanism or requirement to inspect for roadworthiness. During the rainy season, many roads are barely passable with four-wheel-drive vehicles. Livestock and pedestrians create constant road hazards (especially at night) and road safety rules are frequently ignored. There are few road and traffic signs; speed limits are neither posted nor enforced. Buses and logging trucks travel at excessive speed and are a constant threat to other road traffic.

Travelers on roads near the borders with CAR and Chad should ensure that their vehicles are fully fueled, and that they have adequate cooking fuel, food, and water for several days as well as a reliable means of communication, such as a satellite or cell phone, or radio.

Visitors who are not in possession of a valid passport and a visa may experience difficulties at police roadblocks or other security checkpoints. It is not uncommon for a uniformed member of the security forces to stop motorists on the pretext of a minor or non-existent violation of local motor vehicle regulations in order to extort small bribes. Visitors are advised not to pay bribes and to request that the officer provide a citation to be paid at the local court.

Local law states that vehicles involved in an accident should not be moved until the police arrive and a police report can be made. If an accident results in injury, drivers should be aware of the possibility that a "village justice" mentality may develop. If an angry crowd forms, drive directly to the U.S. Embassy or another location where you can receive assistance. Contact the local police once you are safely away from danger. Cameroon has no real equivalent to 911-type service or roadside emergency telephone numbers, but you can dial 112 in major cities to contact ambulance services. American citizens should contact the U.S. Embassy (237) 220-1500 if emergency assistance is needed.

Aviation Safety Oversight: As there is no direct commercial air service between the United States and Cameroon, the U.S. Federal Aviation Administration (FAA) has not assessed Cameroon's Civil Aviation Authority for compliance with International Civil Aviation Organization (ICAO) aviation safety standards. For more information, travelers may visit the FAA's internet website at http://www.faa.gov.

Special Circumstances: While visiting game parks and reserves, tourists should bear in mind that they are ultimately responsible for maintaining their own safety. Tourists should use common sense when approaching wildlife, maintain a safe distance from animals, and heed all instructions given by guides or trackers. Even in the most serene settings, the animals in Cameroon's game parks are wild and can pose a threat to life and safety.

Cameroonian customs authorities may enforce strict regulations concerning temporary importation into or export from Cameroon of items such as large quantities of medicine or wood products. Customs regulations also restrict the importation of ivory.

Cash in local currency, the Central African franc (CFA), is the only form of payment accepted throughout the country. Larger hotels in Yaoundé

and Douala will change U.S. dollars and cash traveler's checks, though at a disadvantageous rate. Credit card cash advances are not available, and most banks do not cash personal or traveler's checks for non-clients. While credit cards are accepted at some larger hotels and shops in Yaoundé and Douala, caution is urged, as identity theft is endemic in the region. Some larger banks in Yaoundé and Douala have ATM facilities, and several banks in Cameroon have wire transfer services through Western Union. The U.S. Embassy does not provide currency exchange, check cashing or other financial services. Tourists and business travelers should also note that there is an increasing circulation of counterfeit U.S. and Cameroonian currency in the country. In recent years, business travelers have experienced difficulty in obtaining adequate services from Cameroon's banking sector. Business travelers are also advised that using the services of a local agent is strongly recommended in establishing a presence in the Cameroonian market.

While photography is not officially forbidden, security officials are sensitive about photographs taken of government buildings, military installations, and other public facilities, many of which are unmarked. Photography of these subjects may result in seizure of photographic equipment by Cameroonian authorities. Due to the threat of harassment and the lack of signs designating sites prohibited for photography, photography should be limited to private homes and among friends. U.S. citizens are advised to seek proper permission before taking a photograph of a specific subject or location.

Please note that homosexuality is a crime in Cameroon that has recently begun to be enforced. Charges of homosexuality and/or of corruption are also made and enforced indiscriminately in the course of business or personal disputes.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Cameroonian law does not afford many of the protections to which Americans are accustomed, and legal proceedings tend to be complex, lengthy, and subject to inappropriate influence. Penalties for breaking the law can be more severe than in the United States for similar offenses. Additionally, the condition of detention centers, while improving, is poor. Persons violating Cameroonian laws, even unknowingly, may be expelled, arrested or imprisoned. During the February 2008 civil unrest, there were reports that people were arrested arbitrarily by law enforcement officials quelling the civil disorder that ensued. Although no expatriates were known to have been arrested, the Department of State cautions Americans against venturing out during such periods of unrest.

Penalties for possession, use, or trafficking in illegal drugs in Cameroon are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in Cameroon are encouraged to register with the U.S. Embassy through the State Department's travel registration website so that they can obtain updated information on travel and security within Cameroon. Americans without Internet access may register directly with the U.S. Embassy. By registering, American citizens make it easier for the Embassy to contact them in case of emergency. The U.S. Embassy in Yaoundé is located on Avenue Rosa Parks in the Mbankolo Quartier, adjacent to the Mount Febe Golf Club; mailing address P.O. Box 817; embassy tel. (237) 2220-1500, fax: (237) 2220-1572. The Embassy Branch Office in Douala is located on the corner of Rue Ivy and Rue French in the Ecobank Building in Bonanjo, tel: (237) 3342-5331, fax: (237) 3342-7790. Further information, including the U.S. Embassy's business hours, is available at the U.S. Embassy's web site: http://yaounde.usembassy.gov.

Intercountry Adoption

November 2008

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is based on public sources and our current understanding. Questions involving foreign and U.S. immigration laws and legal interpretation should be addressed respectively to qualified foreign or U.S. legal counsel.

Fraud Warning: Recently, many Americans have become victims of Cameroonian scam artists offering adoption services through the Internet. Americans should be very cautious about sending money or traveling to Cameroon to adopt a child from an orphanage they have only heard about through e-mails. Prospective adoptive parents MUST come to Cameroon for an extended period and participate in person in the elaborate legal procedures that govern Cameroonian adoptions. The competent authorities for intercountry adoption are the Ministry of Social Affairs and the High Court (Tribunal de Grande Instance) that has jurisdiction over the place of residence of the child to be adopted. Cameroon does not have adoption agencies. In general, any orphanage may release an orphan for adoption. However, in order to help protect themselves and the children from the

possibility of fraud or other serious problems, prospective adoptive parents are advised to consider first the list of accredited orphanages available at the Ministry of Social Affairs. Should prospective adoptive parents wish to hire a Cameroonian attorney to assist with the adoption, they can obtain a list of attorneys from the U.S. Embassy in Yaoundé. Due to repeated scams involving the impersonation of legitimate lawyers or law offices the Embassy has removed this information from its website. This information can be obtained by e-mailing the American Citizen Services Unit at YaoundeACS@state.gov.

Patterns of Immigration: Please review current reports online at http://adoption.state.gov.

Adoption Authority: The competent authorities for intercountry adoption are the Ministry of Social Affairs and the High Court (Tribunal de Grande Instance) that has jurisdiction over the place of residence of the child to be adopted.

Eligibility to Adopt: At least one adoptive parent in the couple must be older than 40 years old. If however, both parents are young, at least one has to be at least 35 years old and they had to have been married for 10 years to be eligible. The prospective adoptive parents must be at least 15 years older than the child to be adopted; however, if the adoptive parent married the biological parent of the child, the age difference must only be 10 years. Couples that do not meet these requirements can submit a medical certificate confirming the couple's infertility in order to have the age requirement waived. They may bring a medical certificate from a U.S. or local doctor to do this.

Both parties in a couple must be in agreement over the adoption. One side of a couple cannot adopt without the other's permission. He or she must be medically fit, proven by a medical certificate from either a US or local doctor. Evidence of financial capacity; this is usually proven with a report of a home-study from the US along with bank statements, evidence of assets, pay slips etc. Evidence of the consent of the birth parent(s) (if they are alive). The consent must be witnessed either in court, by a diplomatic consulate or by a public notary. Evidence of the consent of the adoptee if the adoptee is 16 or older. The consent must be witnessed either in court, by a diplomatic consulate or by a public notary.

Eligibility Requirements for Prospective Adoptees: Adopted individuals cannot have children of their own at the time of the adoption, nor have any legal descendants. They may not marry their adoptive parents or siblings.

Residency Requirements: Prospective adoptive parents must have the child in their care and custody for at least three consecutive months before the High Court will consider issuing an adoption decree.

Time Frame: Prospective adoptive parents should expect that a minimum of three months will pass between the date they submit their adoption application to the Ministry of Social Affairs and the date the High Court's Public Prosecutor completes his/her review of the file. Only when the review is completed will a first hearing date be scheduled. In addition, a Cameroonian adoption is likely to be affected by administrative and judicial delays, insufficient or misplaced paperwork, and other factors. Most parents have found that hiring a local attorney to monitor the case and keep pressure on the High Court has been crucial in expediting its processing. Care also needs to be taken in selecting a credible legal representative, as many unscrupulous persons attempt to either impersonate lawyers or deliberately extend or complicate proceedings for personal gain. Once all of the Cameroonian procedures have been completed and an adoption decree has been issued, the U.S. Embassy requires a minimum of two weeks to complete the immigrant visa process and may need longer depending on the specific circumstances. This includes the mandatory I-604 orphan investigation to verify a child qualifies as an orphan.

Adoption Agencies and Attorneys: Cameroon does not have adoption agencies. In general, any orphanage may release an orphan for adoption. However, in order to help protect themselves and the children from the possibility of fraud or other serious problems, prospective adoptive parents are advised to consider first the list of accredited orphanages available at the Ministry of Social Affairs. Prospective adoptive parents wishing to hire a Cameroonian attorney to assist with the adoption can obtain a list of attorneys from the U.S. Embassy in Yaoundé. Due to repeated scams involving the impersonation of legitimate lawyers or law offices the Embassy has removed this information from its website. This information can be obtained by e-mailing the American Citizen Services Unit at YaoundeACS@state.gov.

Adoption Fees: The U.S. Embassy in Yaounde discourages the payment of any fees that are not properly receipted, "donations," or "expediting" fees, that may be requested from prospective adoptive parents. Such fees have the appearance of "buying" a child and put all future adoptions in Cameroon at risk.

Adoption Procedures: A social worker will be assigned to follow up the case and assist the prospective adoptive parents with identifying a child for adoption and monitoring the family during the foster care period. The local lawyer, if hired by the prospective adoptive parents, must be also involved in the process. The social worker's final report determines whether prospective adoptive parents can proceed with the case to the High Court.

The adoptive parent(s) may choose either to be present or to be represented by a lawyer during the hearing at the High Court. Under Cameroonian law, the High Court must determine that the following four criteria have been met before it can issue an adoption decree:

- That every person whose consent is necessary has consented to and understands the nature and effect of the adoption. Such consent is

irrevocable and permanently severs all legal ties between the biological parent(s) and the child.

- That the child's welfare will be improved by the adoption. Parents must provide proof of what they can provide for the child in a way that other cannot.
- That no payment or reward has been the reason for the adoption.
- That the prospective adoptive parent is healthy.

Once the High Court has consented to the adoption and issued a final decree, the American parents must obtain a new Cameroonian birth certificate and Cameroonian passport for the child, both reflecting any name change. Post-adoption birth certificates are issued by the Civil Status Registry Center. The Cameroonian passport is issued by the immigration office in the district where the child lives.

Each province has an immigration office that issues passports. The requirements for passports are several passport size photographs, certified copies of the birth certificates, parents' consent, fee, and certified application form. The entire process can cost approximately 100,000 CFA (about USD 200).

Required Documents:

- An application bearing a 1000 FCFA (approximately $2) fiscal stamp is addressed to the President of the High Court;
- A certified copy of the child's Cameroonian birth certificate;
- Biographical information of the biological parents of the child to be adopted;
- Biographical information of the adoptive parent(s);
- If applicable, a notarized deed of agreement from surviving biological parents, or the orphanage director having custody over the child and prospective adoptive parents. This deed expressly states that the child is released irrevocably for adoption;
- Report of the home study (U.S. home studies are acceptable);
- Evidence of finances/income (bank statements, pay slips, etc.);
- Legalized authorization from the biological parents, if applicable;
- Notarized affidavit of support of the child from the adoptive parents;
- A deposit of 3,000 CFA francs (approximately $6. Please note that this amount is subject to change) is made at the court registry;
- A separate non-refundable deposit of 78,000 CFA francs (approximately $160. Please note that this amount is subject to change) is made at the court registry;
- A written application;
- A certified copy of the child's birth certificate;
- A certified copy of the adoptive parents' ID card;
- A prison/court record clearance;
- The adoptive parents' proof of residency; For married adoptive parents who do not meet the age requirements, they must bring a medical certificate attesting their infertility;
- A medical certificate for the adoptive parents attesting that they are medically fit; and
- Report of the social home study.

Embassy of the Republic of Cameroon

Additional Information: For information on intercountry adoption and international parental child abduction, and security information for U.S. citizens traveling abroad, call Toll Free 1-888-407-4747. This number is available from 8:00 a.m. to 8:00 p.m. EST/EDT, Monday through Friday (except U.S. federal holidays). Callers who are unable to use toll-free numbers, such as those calling from overseas, may obtain information and assistance during these hours by calling 1-202-501-4444.

CANADA

Compiled from the November 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Canada

PROFILE

Geography

Area: 9.9 million sq. km. (3.8 million sq. mi.); second-largest country in the world.

Cities: Capital—Ottawa (pop. 1.1 million). Other major cities—Toronto (5.1 million), Montreal (3.6 million), Vancouver (2.1 million), Calgary (1.1 million), Edmonton (1.0 million), Quebec City (0.7 million), Winnipeg (0.7 million), Hamilton (0.7 million).

Terrain: Mostly plains with mountains in the west and lowlands in the southeast.

Climate: Temperate to arctic.

People

Nationality: Noun and adjective—Canadian(s).

Population: (2008 est.) 33.1 million.

Ethnic groups: British/Irish 28%, French 23%, other European 15%, Asian/Arab/African 6%, indigenous Amerindian 2%, mixed background 26%.

Religions: Roman Catholic 43.6%, Protestant 29.2%, other Christian 4.3%, Muslim 2.0%, Jewish 1.1%, Buddhist 1.0%, Hindu 1.0% other 1.3%, none 16.5%.

Languages: English (official) 57.8%, French (official) 22.1%, other 20.1% (including Chinese and aboriginal languages).

Education: Literacy—99% of population aged 15 and over has at least a ninth-grade education.

Health: Infant mortality rate—5.4/1,000. Life expectancy—77.7 yrs. male, 82.5 yrs. female.

Work force: (2008, 18.2 million): Goods-producing sector—25%, of which: manufacturing 15%; construction 6%; agriculture 2%; natural resources 2%; utilities 1%. Service-producing sector—75%, of which: trade 16%; health care and social assistance 11%; educational services 7%, accommodation and food services 7%; professional, scientific, and technical services 7%; finance 6%; public administration 5%; transportation and warehousing 5%; information, culture, and recreation 5%; other services 4%.

Government

Type: Federation, parliamentary democracy, and constitutional monarchy.

Confederation: July 1, 1867.

Constitution: The amended British North America Act of 1867 patriated to Canada on April 17, 1982, Charter of Rights and Freedoms, and unwritten custom.

Government branches: Executive—Queen Elizabeth II (head of state represented by a governor general), prime minister (head of government), cabinet. Legislative—bicameral parliament (308-member House of Commons; 105-seat Senate). Judicial—Supreme Court.

Federal-level political parties: Liberal Party, Conservative Party of Canada, Bloc Quebecois, New Democratic Party.

Political subdivisions: 10 provinces, 3 territories.

Economy

GDP: (2007) $1.266 trillion.

Real GDP growth rate: (2007) 2.7%.

Per capita GDP: (2007) $38,435.

Natural resources: Petroleum and natural gas, hydroelectric power, metals and minerals, fish, forests, wildlife, abundant fresh water.

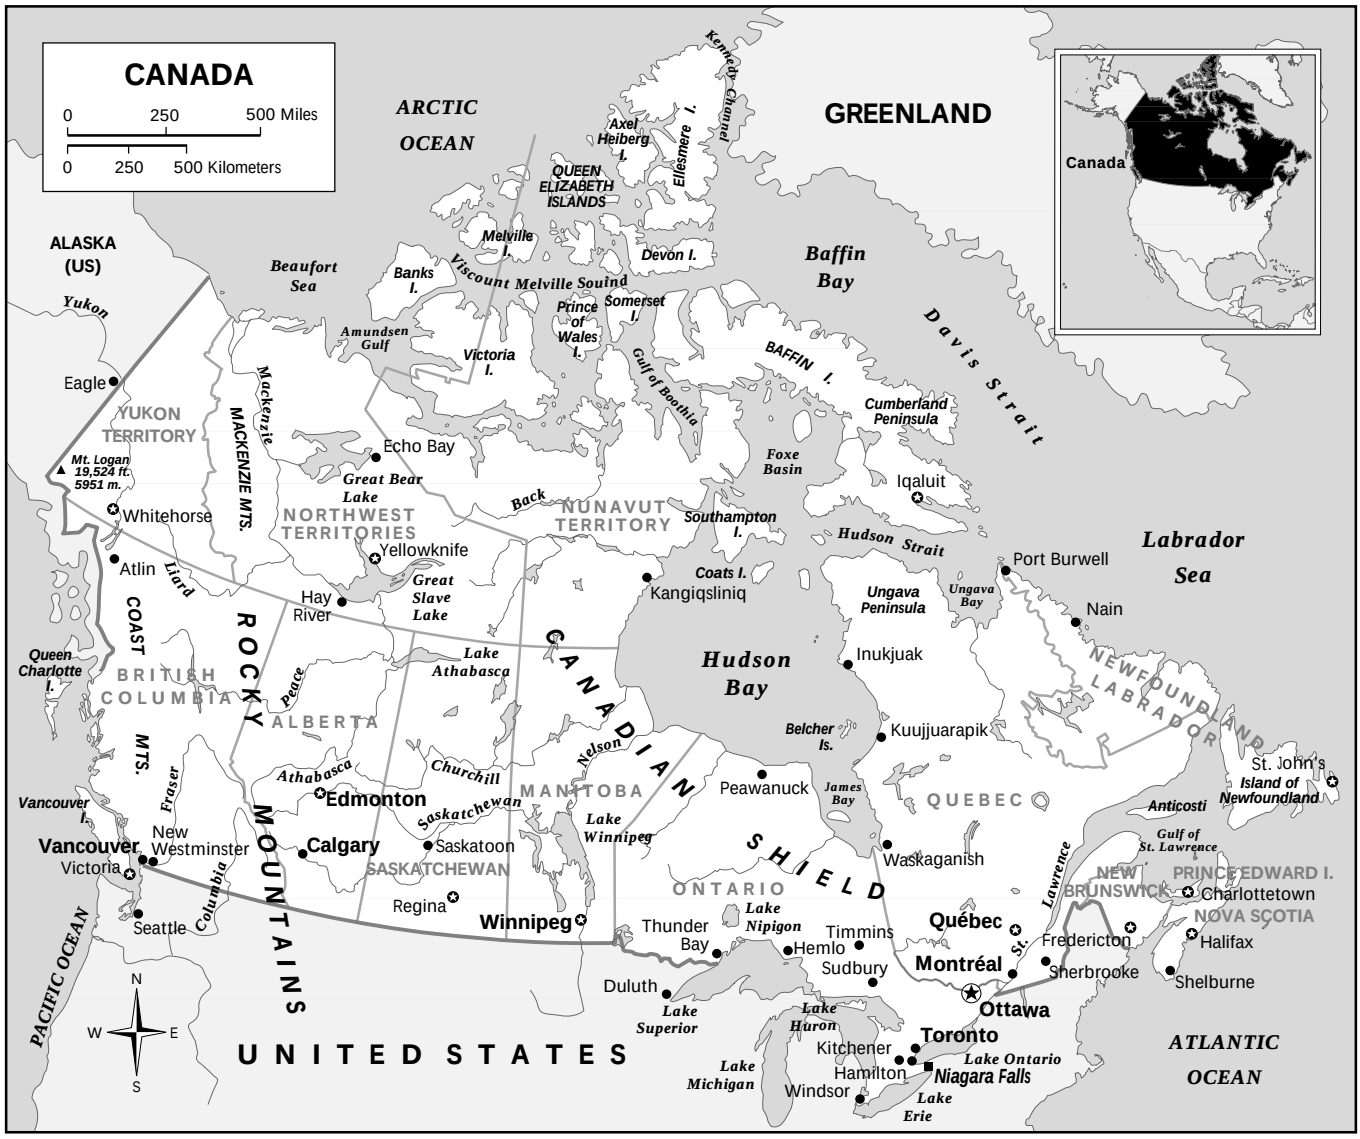
Agriculture: Products—wheat, livestock and meat, feed grains, oil seeds, dairy products, tobacco, fruits, vegetables.

Industry: Types—motor vehicles and parts, machinery and equipment, aircraft and components, other diversified manufacturing, fish and forest products, processed and unprocessed minerals.

Trade: U.S. merchandise exports to Canada (2007)—$248.9 billion: motor vehicles and spare parts, industrial and electrical machinery, plastics, computers, chemicals, petroleum products and natural gas, and agricultural products. In 2007, 65% of Canada's imports came from the

United States. U.S. merchandise imports from Canada (2007)—$313.1 billion: motor vehicles and spare parts, crude petroleum and natural gas, forest products, agricultural products, metals, industrial machinery, and aircraft. In 2007, 76% of Canada's exports went to the U.S.

U.S.-CANADA RELATIONS



The relationship between the United States and Canada is the closest and most extensive in the world. It is reflected in the staggering volume of bilateral trade—the equivalent of $1.5 billion a day in goods—as well as in people-to-people contact. About 300,000 people cross the shared border every day.

A 2004 law is phasing in new rules for travel between Canada and the United States. Since January 2007 U.S. citizens traveling by air to and from Canada have needed a valid passport to enter or re-enter the United States. Beginning January 31, 2008, U.S. and Canadian citizens aged 19 and older traveling into the U.S. from Canada by land or sea (including ferries) have had to present documents denoting citizenship and identity. This change primarily affects American and Canadian citizens who have previously been permitted entry into the U.S. by oral declaration alone, and marks the transition toward standard and consistent documents for all travelers entering the U.S. Acceptable documentation includes a valid passport or government-issued photo identification such as a driver's license and proof of citizenship such as a birth certificate. Children aged 18 and under need only to present a birth certificate. A list of acceptable documents is found at http://canada.usembassy.gov. Travelers who do not present acceptable documents may be delayed as U.S. Customs and Border Protection officers at the port of entry attempt to verify identity and citizenship. Beginning in June 2009, all travelers, including U.S. citizens, will have to present a passport or other secure document that denotes identity and citizenship when entering the U.S. from Canada.

In fields ranging from law enforcement to environmental protection to free trade, the two countries work closely on multiple levels from federal to local. In addition to their close bilateral ties, Canada and the U.S. cooperate in multilateral fora. Canada—a charter signatory to the United Nations and the North Atlantic Treaty Organization (NATO) and a member of the G8—takes an active role in the United Nations, including peacekeeping operations, and participates in the Organization for Security and Cooperation in Europe (OSCE). Canada joined the Organization of American States (OAS) in 1990 and hosted the OAS General Assembly in Windsor in June 2000, and the third Summit of the Americas in Quebec City in April 2001. Canada seeks to expand its ties to Pacific Rim economies through membership in the Asia-Pacific Economic Cooperation forum (APEC), and will host the Winter Olympic Games in Vancouver-Whistler, British Columbia in 2010.

Canada views good relations with the U.S. as crucial to a wide range of interests, and often looks to the U.S. as a common cause partner promoting democracy, transparency, and good governance around the world. Nonetheless, it sometimes pursues policies at odds with our own. Canada decided in 2003 not to contribute troops to the U.S.-led military coalition in Iraq (although it later contributed financially to Iraq's reconstruction and provided electoral advice). Other recent examples are: Canada's leadership in the creation of the UN-created International Criminal Court (ICC) for war crimes; its decision in early 2005 not to participate directly in the U.S. missile defense program; and its strong support for the Ottawa Convention to ban anti-personnel mines. The U.S., while the world's leading supporter of demining initiatives, declined to sign the treaty due to unmet concerns regarding the protection of its forces and allies, particularly those serving on the Korean Peninsula, as well as the lack of exemptions for mixed munitions. U.S. defense arrangements with Canada are more extensive than with any other country. The Permanent Joint Board on Defense, established in 1940, provides policy-level consultation on bilateral defense matters and the U.S. and Canada share NATO mutual security commitments. In addition, U.S. and Canadian military forces have cooperated since 1958 on continental air defense within the framework of the North American Aerospace Defense Command (NORAD). The military response to the terrorist attacks of September 11, 2001 both tested and strengthened military cooperation between the U.S. and Canada. The new NORAD Agreement that entered into force on May 12, 2006 added a maritime domain awareness component and is of "indefinite duration," albeit subject to periodic review. Since 2002, Canada has participated in diplomatic, foreign assistance, and joint military actions in Afghanistan. Approximately 2,500 Canadian Forces personnel are deployed at any given time in southern Afghanistan under a battle group based at Kandahar and as members of the Canadian-led Provincial Reconstruction Team (PRT) at Camp Nathan Smith in Kandahar. The Canadian Parliament has approved the extension of this mission in Kandahar until 2011. Canada has also contributed to stabilization efforts in Haiti, initially with troops and later with civilian police and electoral assistance, and humanitarian and developmental aid.

The U.S. and Canada also work closely to resolve trans-boundary environmental issues, an area of increasing importance in the bilateral relationship. A principal instrument of this cooperation is the International Joint Commission (IJC), established as part of the Boundary Waters Treaty of 1909 to resolve differences and promote international cooperation on boundary waters. The Great Lakes Water Quality Agreement of 1978 (as amended in 1987) is another historic example of joint cooperation in controlling trans-boundary water pollution. The two governments also consult regularly on trans-boundary

air pollution. Under the Air Quality Agreement of 1991, both countries have made substantial progress in coordinating and implementing their acid rain control programs and signed an annex on ground level ozone in 2000. In late 2007, Canada and the U.S. began discussions aimed at negotiating a new annex to the Air Quality Agreement which will increase cooperation in combating cross-border air pollution in the form of particulate matter.

Canada ratified the Kyoto Accord in 2002, despite concern among business groups and others that compliance would place Canada's economy at a lasting competitive disadvantage vis-a-vis the U.S. However, Prime Minister Stephen Harper's government announced in 2006 that Canada would not be able to meet its original Kyoto Protocol commitments. In April 2007, the Canadian Government announced a new regulatory framework for air emissions that, when implemented, should lead to significant decreases in emissions of greenhouse gases and air pollutants as early as 2010. Canada participates in the U.S.-led International Carbon Sequestration Leadership Forum, which researches effective ways to capture and store carbon dioxide. Canada is also a founding member of the International Partnership for the Hydrogen Economy and the Global Earth Observation System of Systems, both of which are designed to address climate change and are supported by the U.S. In early 2005, Canada joined the U.S.-led Methane to Markets initiative, which focuses on transferring technology to developing countries for the capture and use of methane from pipelines, landfills, and other sources. In October 2007 Canada gained membership in the Asia Pacific Partnership on Clean Development and Climate, which joins it with the U.S., Japan, Australia, South Korea, China, and India in a broad effort to accelerate the development and deployment of clean energy technologies in major industrial sectors.

While bilateral law enforcement cooperation and coordination were

excellent prior to the September 11, 2001 terrorist attacks in the United States, they have since become even closer through such mechanisms as the Cross Border Crime Forum. Canada, like the U.S., has strengthened its laws and realigned resources to fight terrorism. U.S.-Canada security cooperation to create a safe and secure border is exemplary. Canadian and U.S. federal and local law enforcement personnel fight cross-border crime through cooperation on joint Integrated Border Enforcement Teams (IBETs). Companies on both sides of the border have joined governments in highly successful partnerships and made massive investments to secure their own facilities and internal supply chains. Over 70% of Canada-U.S. trade is transported by truck. Some commercial drivers crossing the border have volunteered to undergo background security checks under the bilateral Free and Secure Trade (FAST) program and many companies participate in the Customs-Trade Partnership Against Terrorism (C-TPAT). These initiatives have helped secure trade while speeding border processing.

Canada is a significant source of marijuana and synthetic drugs (methamphetamines, ecstasy) reaching the U.S., as well as precursor chemicals and over-the-counter drugs used to produce illicit synthetic drugs. Implementation and strengthening of regulations in Canada and increased U.S.-Canadian law enforcement cooperation have had a substantial impact in reducing trafficking in precursor chemicals and synthetic drugs, but cannabis cultivation, because of its profitability and relatively low risk of penalty, remains a thriving industry. Canada increased maximum penalties for methamphetamine offenses in August 2005 and implemented new controls over various precursors in November 2005. Canada is active in international efforts to combat terrorist financing and money laundering.

Canada is a large foreign aid donor and targets its annual assistance of C$4.4 billion toward priority sectors such as good governance; health (including HIV/AIDS); basic education; private-sector development; and environmental sustainability. Canada is a major aid donor to Iraq, Haiti, and Afghanistan.

Prime Minister Harper, who entered office stating he intended to bring a new, more positive tone to bilateral relations while still defending Canadian interests, held his first meeting with President Bush at the March 30-31, 2006 Security and Prosperity Partnership of North America (SPP) meeting in Cancun, Mexico and his most recent at the APEC summit in Lima, Peru on November 22, 2008. Prime Minister Harper and President Bush have held North America leaders' meetings with Mexican President Calderon in Cancun, Mexico in March 2006, Montebello, Quebec, in August 2007, and in New Orleans in April 2008.

Trade and Investment

The U.S. and Canada enjoy an economic partnership unique in the world. The two nations share the world's largest and most comprehensive trading relationship, which supports millions of jobs in each country. In 2007, total trade between the two countries exceeded $560 billion. The two-way trade that crosses the Ambassador Bridge between Detroit, Michigan and Windsor, Ontario equals all U.S. exports to Japan. Canada's importance to the U.S. is not just a border-state phenomenon: Canada is the leading export market for 36 of the 50 U.S. States, and ranked in the top three for another 10 States. In fact, Canada is a larger market for U.S. goods than all 27 countries of the European Community combined, whose population is more than 15 times that of Canada. The comprehensive U.S.-Canada Free Trade Agreement (FTA), which went into effect in 1989, was superseded by the North American Free Trade Agreement among the United States, Canada and Mexico (NAFTA) in 1994. NAFTA, which embraces more than 450 million people of the three North American countries, expanded upon FTA commitments to move toward reducing trade barriers and establishing agreed upon trade rules. It has also resolved long-standing bilateral irritants and liberalized rules in several areas, including agriculture, services, energy, financial services, investment, and government procurement. Since the implementation of NAFTA in 1994, total two-way merchandise trade between the U.S. and Canada has grown by 265%, creating many new challenges for the bilateral relationship. The Security and Prosperity Partnership of North America, launched by the three NAFTA countries in March 2005, represents an effort to address these challenges and others on a continental basis.

Canada is an urban services-dependent economy with a large manufacturing base. Since Canada is the largest export market for most states, the U.S.-Canada border is extremely important to the well-being and livelihood of millions of Americans.

The U.S. is Canada's leading agricultural market, taking 55% of its agrofood exports in 2007. However, U.S. imports of Canadian livestock products, particularly ruminants, fell drastically after the discovery of bovine spongiform encephalopathy (BSE, mad cow disease) in early 2003. Shipments of most Canadian beef to the U.S. were resumed in late 2003, and trade in live cattle under 30 months resumed in July 2005. All remaining U.S. restrictions affecting bilateral beef trade were lifted in November 2007. Canada is the largest U.S. agricultural market, primarily importing fresh fruits and vegetables and livestock products.

The U.S. and Canada enjoy the largest energy trade relationship in the world. Canada is the single largest foreign supplier of energy to the U.S.—providing 17% of U.S. oil imports and 18% of U.S. natural gas demand. Recognition of the commercial viability of Canada's oil sands in Alberta has raised Canada's proven petroleum reserves to 179 billion barrels, making it the world's second-largest holder of reserves after Saudi Arabia. Canada is planning Arctic pipelines and liquefied natural gas terminals to provide more natural gas to the North American market. Canada and the U.S. operate an inte-

grated electricity grid which meets jointly developed reliability standards and provide almost all of each other's electricity imports. Canada is a major supplier of electricity (mostly clean and renewable hydroelectric power) to New England, New York, the Upper Midwest, the Pacific Northwest, and California. Canadian uranium helps fuel U.S. nuclear power plants.

While 98% of U.S.-Canada trade flows smoothly, there are occasional trade disputes affecting the remaining 2%. Usually these issues are managed amicably through bilateral consultative forums or referral to World Trade Organization (WTO) or NAFTA dispute resolution procedures. For example, in response to WTO challenges by the U.S., the two governments negotiated an agreement on magazines providing increased access for the U.S. publishing industry to the Canadian market, and Canada amended its patent laws to extend patent protection to 20 years. Canada has challenged U.S. trade remedy law in NAFTA and WTO dispute settlement mechanisms. Some of these cases involved actions taken by the U.S. Government on softwood lumber imports from Canada. However, the two countries implemented a comprehensive settlement on softwood lumber in late 2006 and these cases were dropped. The U.S. is pressing Canada to strengthen its intellectual property laws and enforcement. The U.S. and Canada resolved a WTO dispute over dairy products in 2003. The U.S. and Canada also have resolved several major issues involving fisheries. By common agreement, the two countries submitted a Gulf of Maine boundary dispute to the International Court of Justice in 1981; both accepted the Court's October 12, 1984 ruling that delineated much of the boundary between the two countries' Exclusive Economic Zones (EEZs).

The U.S. and Canada signed a Pacific Salmon Agreement in June 1999 that settled differences over implementation of the 1985 Pacific Salmon Treaty. In 2001, the two countries reached agreement on Yukon River salmon, implementing a new abundance-based resource management regime and effectively realizing coordinated management over all West Coast salmon fisheries. The U.S. and Canada recently reached agreement on sharing another trans-boundary marine resource, Pacific hake. The two countries also have a treaty on the joint management of albacore tuna in the Pacific, and closely cooperate on a range of bilateral fisheries issues and international high seas governance initiatives. U.S. immigration and customs inspectors provide preclearance services at eight airports in Canada, allowing air travelers direct connections in the U.S. During the 12 months ending in June 2007, nearly 21.9 million passengers flew between the U.S. and Canada on scheduled flights. Toronto's Pearson International Airport is the third-largest international passenger gateway to the U.S. after London (Heathrow) and Tokyo (Narita) airports.

A bilateral Open Skies agreement signed in March 2007 removed all economic restrictions on civil aviation services between Canada and the U.S. The two countries also share in operating the St. Lawrence Seaway, connecting the Great Lakes to the Atlantic Ocean.

Canada and the U.S. have one of the world's largest investment relationships. The U.S. is Canada's largest foreign investor. Statistics Canada reports that at the end of 2007, the stock of U.S. foreign direct investment in Canada was $289 billion, or about 59% of total foreign direct investment in Canada. U.S. investment is primarily in Canada's mining and smelting industries, petroleum, chemicals, the manufacture of machinery and transportation equipment, and finance.

Canada is the fifth largest foreign investor in the U.S. At the end of 2006, the U.S. Commerce Department estimates that Canadian investment in the United States was $159 billion at historical cost basis. Canadian investment in the U.S. is concentrated in finance and insurance, manufacturing, banking, information and retail trade and other services.

GOVERNMENT

Canada is a constitutional monarchy with a federal system, a parliamentary government, and strong democratic traditions. The 1982 Charter of Rights and Freedoms guarantees basic rights in many areas. Queen Elizabeth II, as Queen of Canada, serves as a symbol of the nation's unity. She appoints a governor general, who serves as her representative in Canada, on the advice of the prime minister of Canada, usually for a 5-year term. The prime minister is the leader of the political party in power and is the head of the cabinet. The cabinet remains in office as long as it retains majority support in the House of Commons on major issues.

Canada's parliament consists of an elected House of Commons and an appointed Senate. Legislative power rests with the 308-member Commons. Legislation to provide for federal elections to be held on fixed dates, every four calendar years, was passed in the spring of 2007. The first fixed election date is scheduled for 2009, but the prime minister may ask the governor general to dissolve parliament and call new elections at any time should the governing party lose the confidence of the House of Commons.

Vacancies in the 105-member Senate, whose members serve until the age of 75, are filled by the governor general on the advice of the prime minister. Recent constitutional initiatives have sought unsuccessfully to strengthen the Senate by making it elective and assigning it a greater regional representational role. In an effort to bring about incremental Senate reform without a constitutional amendment, bills to place term limits upon Senators and to create a process of public consultation in the appointment of Senators have been introduced in parliament. However, the bills face substantial opposition, both from within parliament and from certain provinces, which question the constitutionality of the proposed legislation, putting the success of the legislation in doubt.

Criminal law, based largely on British law, is uniform throughout the nation and is under federal jurisdiction. Civil law is also based on the common law of England, except in Quebec, which has retained its own civil code patterned after that of France. Justice is administered by federal, provincial, and municipal courts.

Each province is governed by a premier and a single, elected legislative chamber. A lieutenant-governor

appointed by the governor general represents the Crown in each province.

Principal Government Officials

Last Updated: 11/12/08

Governor Gen.: **Michaelle JEAN**
Prime Min.: **Stephen HARPER**
Min. of Agriculture & Agri-Food: **Gerry RITZ**
Min. of the Atlantic Canada Opportunities Agency: **Peter MACKAY**
Min. of Canadian Heritage & Status of Women: **Josee VERNER**
Min. of the Canadian Wheat Board: **Gerry RITZ**
Min. of Citizenship & Immigration: **Diane FINLEY**
Min. of Democratic Reform: **Peter VAN LOAN**
Min. of the Economic Development Agency of Canada for the Regions of Quebec: **Jean-Pierre BLACKBURN**
Min. of the Environment: **John BAIRD**
Min. of the Federal Economic Development Initiative for Northern Ontario: **Tony CLEMENT**
Min. of Finance: **Jim FLAHERTY**
Min. of Fisheries & Oceans: **Loyola HEARN**
Min. of Foreign Affairs: **David EMERSON**
Min. of Health: **Tony CLEMENT**
Min. of Human Resources & Social Development: **Monte SOLBERG**
Min. of Indian Affairs & Northern Development & Federal Interlocutor for Metis & Nonstatus Canadians: **Chuck STRAHL**
Min. of Industry: **Jim PRENTICE**
Min. of Intergovernmental Affairs: **Rona AMBROSE**
Min. of International Cooperation: **Bev ODA**
Min. of International Trade: **Michael FORTIER**
Min. of Justice & Attorney Gen.: **Rob NICHOLSON**
Min. of La Francophonie & Official Languages: **Josee VERNER**
Min. of Labor: **Jean-Pierre BLACKBURN**
Min. of National Defense: **Peter MACKAY**
Min. of National Revenue: **Gordon O'CONNOR**
Min. of Natural Resources: **Gary LUNN**
Min. of the Pacific Gateway & the Vancouver-Whistler Olympics: **David EMERSON**
Min. of Public Safety & Emergency Preparedness: **Stockwell DAY**
Min. of Public Works & Govt. Services: **Christian PARADIS**
Min. of Transport, Infrastructure, & Communities: **Lawrence CANNON**
Min. of Veterans Affairs: **Greg THOMPSON**
Min. of Western Economic Diversification: **Rona AMBROSE**
Pres., Queen's Privy Council: **Rona AMBROSE**
Pres., Treasury Board: **Vic TOEWS**
Leader of the Govt. in the House: **Peter VAN LOAN**
Leader of the Govt. in the Senate: **Marjory LEBRETON**
Governor, Bank of Canada: **Mark CARNEY**
Ambassador to the US: **Michael WILSON**
Permanent Representative to the UN, New York: **John MCNEE**

Canada maintains an embassy in the United States at 501 Pennsylvania Avenue, NW, Washington, DC 20001 (tel. 202-682-1740).

POLITICAL CONDITIONS

On February 6, 2006, Stephen Harper was sworn in as Canada's twenty-second Prime Minister, succeeding Liberal Party leader Paul Martin. An admitted "policy specialist," Harper rose from the ranks of conservative political party staffers. Prior to becoming Prime Minister, he sat as a Member of Parliament, including as Leader of the Opposition since 2002 when he became head of the western-based Canadian Alliance. He was elected the first leader of the Conservative Party of Canada when it was created in 2003 through the merger of Canadian Alliance and Peter MacKay's Progressive Conservative Party. The January 23, 2006 election victory by the Conservative Party ended 12 years of Liberal Party rule that, in the end, was tainted by corruption and ethics concerns, despite the economic progress Canada achieved while the Liberals were in power. In a subsequent federal election on October 14, 2008, the Conservatives won 38% of the vote and formed a second minority government with 143 seats in the House of Commons. The Liberals won 26% of the vote and 77 seats in the House of Commons. As the party with the second-largest number of seats, the Liberals form the "official opposition."

The Conservatives made unexpected gains in Quebec by winning ten seats in the January 2006 election, but failed to increase their number of seats in the province in the 2008 election. The separatist Bloc Quebecois (BQ) has a majority (49) of Quebec's 75 seats (the BQ offers candidates only in Quebec). The left-leaning New Democratic Party (NDP) now has 37 seats, and two independents also sit in Parliament.

Policy priorities of the Conservatives under Prime Minister Harper have remained fairly consistent since 2006: improving accountability and ethics in government; lower taxes; fighting crime and urban violence; reinvesting in defense; bolstering Canada's Arctic sovereignty; promoting national unity; and raising the profile of Canada's role abroad, through its combat mission in Afghanistan, contributions to stabilization in Haiti, and renewed partnership with the Americas.

In Canada's political system, a key challenge for any federal government is balancing the conflicting interests of Canada's 10 provinces and 3 territories. Recognizing the advantages of a coordinated approach in dealing with the federal government, the provinces and territories created a Council of the Federation in 2003, with their leaders (Canada's first ministers) meeting regularly in that forum to develop common positions. Prime Minister Harper met with the provincial premiers and territorial leaders formally on January 11, 2008 and on November 10, 2008.

Quebec, which represents 23% of the national population (and has a similar proportion of seats in the House of Commons), seeks to preserve its distinctive francophone nature, and is perceived by the less-populous western provinces as wielding undue influence on the Federal Government. At least until January 2006's election of Albertan Stephen Harper as Prime Minister, the western provinces had sometimes expressed con-

cern that Ottawa did not fully attend to their interests. Ontario, believes that it pays out significantly more to the Federal Government than it gets back in revenues, while the Atlantic Provinces seek to assert greater control over fishing and mineral rights off their shores. The Federal Government ceded some power in a few areas of provincial jurisdiction, while seeking to strengthen the federal role in many other areas such as interprovincial trade and the regulation of securities.

National Unity

Popular support for sovereignty appears to be on the wane in Quebec, although pride in that province's unique cultural and linguistic identity remains very strong. Most Quebec voters seem to appreciate the economic benefits of remaining in the Canadian confederation and aim to advance their separate francophone identity within the confederation. In the March 2007 provincial election, the ruling provincial Liberals garnered only 33% of the vote, and Premier Jean Charest heads a minority government. Action Democratique du Quebec (ADQ), led by Mario Dumont, finished second, while the pro-sovereignty Parti Quebecois (PQ) finished a close third.

TRAVEL

Consular Information Sheet

December 11, 2008

Country Description: Canada is a highly developed, stable democracy. Tourist facilities are widely available except in northern and wilderness areas, where they are less developed and can be vast distances apart.

Entry Requirements: All Americans traveling by air outside the United States are required to present a passport or other valid travel document to enter or re-enter the United States. This requirement will be extended to sea travel (except closed loop cruises), including ferry service, by the summer of 2009. Until then, U.S. citizens traveling by sea must have government-issued photo identification and a document showing their U.S. citizenship (for example, a birth certificate or certificate of nationalization), or other WHTI compliant document such as a passport card for entry or re-entry to the U.S. Sea travelers should also check with their cruise line and countries of destination for any foreign entry requirements. Applications for the new U.S. Passport Card are now being accepted. Based on current projections, we expect the passport card to be in full production beginning in July 2008. The card may not be used to travel by air and is available only to U.S. citizens. Further information on the U.S. Passport Card is available at http://travel.state.gov/passport/ppt_card/ppt_card_3926.html and upcoming changes to U.S. passport policy can be found on the Bureau of Consular Affairs web site at http://travel.state.gov/travel/cbpmc/cbpmc_2223.html. We strongly encourage all American citizen travelers to apply for a U.S. passport well in advance of anticipated travel. American citizens can visit travel.state.gov or call 1-877-4USA-PPT (1-877-487-2778) for information on how to apply for their passports.

Both the U.S. and Canadian governments urge frequent travelers to join the NEXUS trusted traveler program. NEXUS members receive a special travel card that allows expedited border crossings for both private and commercial travelers through both U.S. and Canadian border controls very quickly. For information about the NEXUS program see http://cbsa-asfc.gc.ca/prog/nexus/menu-eng.html.

Entry into Canada is solely determined by Canadian Border Services Agency (CBSA) officials in accordance with Canadian law, see http://www.cbsa.gc.ca for details. Canadian law requires that all persons entering Canada must carry both proof of citizenship and identity. A valid U.S. passport or NEXUS card satisfies these requirements for U.S. citizens. If U.S. citizen travelers to Canada do not have a passport or approved alternate document such as a NEXUS card, they must show a government-issued photo ID (e.g. Driver's License) and proof of U.S. citizenship such as a U.S. birth certificate, naturalization certificate, or expired U.S. passport. Children under sixteen need only present proof of U.S. citizenship.

U.S. citizens entering Canada from a third country must have a valid U.S. passport. A visa is not required for U.S. citizens to visit Canada for up to 180 days. Anyone seeking to enter Canada for any purpose besides a visit (e.g. to work, study or immigrate) must qualify for the appropriate entry status, and should contact the Canadian Embassy or nearest consulate and see the Canadian immigration web site at http://www.cic.gc.ca/english/index.asp. Anyone with a criminal record (including even misdemeanors or Driving While Impaired (DWI)) charges may be barred from entering Canada and must qualify for a special waiver well in advance of any planned travel for further processing, which may take some time.

For further information on entry requirements, travelers may contact the Canadian Embassy at 501 Pennsylvania Avenue NW, Washington DC 20001, tel. (202) 682-1740, or the Canadian consulates in Atlanta, Boston, Buffalo, Chicago, Dallas, Detroit, Los Angeles, Miami, Minneapolis, New York, San Juan or Seattle. The Canadian Embassy's web site is http://www.canadianembassy.org.

Importation of Firearms: Firearms are much more strictly controlled in Canada than in the United States. As of January 1, 2001, visitors bringing any firearms into Canada, or planning to borrow and use firearms while in Canada, must declare the firearms in writing using a Non-Resident Firearm Declaration form. Multiple firearms can be declared at the same time. At the border, three copies of the completed, unsigned Non-Resident Firearms Declaration must be presented to a CBSA officer. Upon acceptance, this declaration will serve as a temporary license and

registration certificate for up to 60 days. The Non-Resident Firearm Declaration costs $50 (Canadian). Visitors planning to borrow a firearm in Canada must obtain in advance a Temporary Firearms Borrowing License, which costs $30 (Canadian), payable at the border. These forms must be signed before a CBSA officer at the border and no photocopies are available at the border. Full details and downloadable forms are available at the Canadian Firearms Centre web site, http://www.cfc-cafc.gc.ca under the heading "Visitors to Canada."

Canada has three classes of firearms: non-restricted, restricted, and prohibited. Non-restricted firearms include most ordinary hunting rifles and shotguns. These may be brought temporarily into Canada for sporting or hunting use during hunting season, use in competitions, in-transit movement through Canada, or personal protection against wildlife in remote areas of Canada. Anyone wishing to bring hunting rifles into Canada must be at least 18 years old, and the firearm must be properly stored for transport. Restricted firearms are primarily handguns; however, pepper spray and mace are also included in this category. A restricted firearm may be brought into Canada, but an Authorization to Transport permit must be obtained in advance from a Provincial or Territorial Chief Firearms Officer. Prohibited firearms include fully automatic, converted automatics, and assault-type weapons. Prohibited firearms are not allowed into Canada.

In advance of any travel, please contact a Canadian embassy or consulate, or the Canadian Firearms Centre, http://www.cfc-cafc.gc.ca/, for detailed information and instructions on temporarily importing firearms. In all cases, travelers must declare to Canadian authorities any firearms and weapons in their possession when entering Canada. If a traveler is denied permission to bring in the firearm, there are often facilities near border crossings where firearms may be stored, pending the traveler's return to the United States. Canadian law requires that officials confiscate firearms and weapons from those crossing the border that deny having them in their possession. Confiscated firearms and weapons are never returned. Possession of an undeclared firearm may result in a one-year prison sentence.

Pornography and Controlled Substances: Canada Canada has strict laws concerning child pornography and in recent years there has been an increase of random checks of electronic media of travelers entering Canada. Computers are subject to search without a warrant at the border, and illegal content can result in the seizure of the computer as well as detention, arrest and prosecution of the bearer.

Canadian law prohibits the unlawful importation or trafficking of controlled substances and narcotics. Recently, a number of travelers, including Americans, have been arrested for attempting to smuggle khat, a narcotic from East Africa, into Canada. Smugglers risk substantial fines, a permanent bar from Canada and imprisonment. Please see http://www.rcmp-grc.gc.ca/drugs/drugs_2005_e.htm#khat for details.

Safety and Security: For the latest security information, Americans traveling abroad should regularly monitor the Department's web site, where the current Worldwide Caution Travel Alert, Middle East and North Africa Travel Alert, Travel Warnings and other Travel Alerts can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S. and Canada, or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: Although Although criminal activity in Canada is more common in urban areas, violent crimes such as murder, armed robbery and rape can occur throughout the country. Visitors to large cities should be aware that parked cars are regularly targeted for opportunistic smash-and-grab thefts, and they are cautioned to avoid leaving any possessions unattended in a vehicle, even in the trunk. Due to the high incidence of such crimes, motorists in Montreal, Vancouver and some other jurisdictions can be fined for leaving their car doors unlocked or for leaving valuables in view. Auto theft in Montreal and Vancouver, including theft of motor homes and recreational vehicles, may occur in patrolled and overtly secure parking lots and decks. SUVs appear to be the particular targets of organized theft.

While Canadian gun control laws are much more strict than those of the U.S., such laws have not prevented gun-related violence in certain areas of Toronto.

In many countries around the world, counterfeit and pirated goods are widely available. Transactions involving such products may be illegal under local law. In addition, bringing them back to the United States may result in forfeitures and/or fines. More information on this serious problem is available at http://www.cybercrime.gov/18usc2320.htm.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed. Each of Canada's provinces has a Crime Victim Compensation Board to which American victims of crime in Canada may seek redress.

Medical Facilities and Health Information: Canada's medical care is of a high standard but is government controlled and rationed. The level of public health and sanitation in Canada is high. Quick and easy access to ongoing medical care is diffi-

cult for temporary visitors who are not members of each province's government run health care plans. Many physicians will not take new patients. Access to a specialist is by referral from a general practitioner only and even with a referral it may take months to obtain an appointment with a specialist. Emergency room waits are very long. No Canadian health care provider accepts U.S. domestic health insurance. Visitors who seek any medical attention in Canada should be prepared to pay in cash in full at the time the service is rendered. Traveler's medical insurance is highly recommended even for visits to Canada. Some health care professionals in the province of Quebec might only speak French.

For information on avian influenza (bird flu), please refer to the Department of State's Avian Influenza Fact Sheet, available at http://travel.state.gov.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's web site at http://wwwn.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith/en.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation. Canadian health care providers do not accept U.S. domestic health insurance or Medicare. Americans who seek any medical attention in Canada should be prepared to pay in cash in full at the time the service is rendered.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Canada is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

Transport Canada is the Canadian federal government agency responsible for road safety, although each province or territory has the authority to establish its own traffic and safety laws and issue driving licenses. For detailed information on road conditions throughout Canada, as well as links to provincial government web sites, please see the Transport Canada web site at http://www.tc.gc.ca or the Canadian Automobile Association web site at http://www.caa.ca. There are typically 3,000 vehicle-related fatalities in Canada each year. The CAA honors American Automobile Association membership. Some automobile warranties of vehicles purchased in the U.S. may be invalid in Canada; please check the warranty of your vehicle.

Driving in Canada is similar to driving in parts of the United States. Distances and speeds, however, are posted in kilometers per hour, and some signs, particularly in Quebec, may only be in French. U.S. driver's licenses are valid in Canada. Proof of auto insurance is required. U.S. auto insurance is accepted as long as an individual is a tourist in Canada. U.S. insurance firms will issue a Canadian insurance card, which should be obtained and carried prior to driving into Canada. Unless otherwise posted, the maximum speed limit in Canada is 50km/hr in cities and 80km/hr on highways. On rural highways, the posted speed limit may be 100km/hr (approximately 60 miles/hr).

Seat belt use is mandatory for all passengers, and child car seats must be used by children under 40 pounds. Some provinces require drivers to keep their headlights on during the day. Motorcycles cannot share a lane, and safety helmets for drivers and passengers are mandatory. Many highways do not have merge lanes for entering traffic. Illegal, rapid lane-changes without signaling and tailgating are common. Emergency vehicles frequently enter the oncoming traffic lane to avoid congestion. At intersections, directional signs will indicate only which turn is allowed; any other turn is prohibited. In Montreal and Quebec City, it is prohibited to turn right on red. As in the United States, all emergency assistance in Canada can be reached by dialing 911.

Driving while impaired (DWI) is a serious offense in Canada. Penalties are heavy, and any prior conviction (no matter how long ago or how minor the infraction) is grounds for exclusion from Canada. Americans with a DWI record must seek a waiver of exclusion from Canadian authorities before traveling to Canada, see http://www.cbsa.gc.ca, which requires several weeks or months to process. It is illegal to take automobile radar detectors into Quebec, Ontario, Manitoba, the Yukon or the Northwest Territories, regardless of whether they are used or not. Police there may confiscate radar detectors, operational or not, and impose substantial fines.

Winter travel can be dangerous due to heavy snowfalls and hazardous icy conditions. Some roads and bridges are subject to periodic winter closures. Snow tires are required in some Provinces. The Canadian Automobile Association (http://www.caa.ca) has tips for winter driving in Canada. Drivers should be aware that motorists running red lights is a serious concern throughout Canada, and motorists are advised to pause before proceeding when a light turns green. Travelers should also be cautious of deer, elk and moose while driving at night in rural areas. Holiday periods can be dangerous because of increased traffic.

Highway 401, from Detroit to Montreal, is one of the busiest highways in North America. It has been the scene of recurrent, deadly traffic accidents due to sudden, severe and unpredictable weather changes, high rates of speed, and heavy truck traffic.

There have been numerous incidents involving road racing and dangerous truck driving, which have caused injuries to Americans. Drivers tend to be aggressive, often exceeding speed limits and passing on both sides, and police enforcement is spotty. In addition, approaches to border crossings into the United States may experience unexpected traffic backups. Drivers should be alert, as lane restrictions at border approaches exist for drivers in NEXUS and FAST expedited inspection programs. For specific information concerning Canadian driving permits, mandatory insurance and entry regulations, please contact the Canadian National Tourist Organization at http://www.travelcanada.ca.

Visit the web site of the country's national authority responsible for road safety at http://www.tc.gc.ca.

Aviation Safety Oversight: The U.S. Federal Aviation Administration (FAA) has assessed the Government of Canada's Civil Aviation Authority as being in compliance with International Civil Aviation Organization (ICAO) aviation safety standards for oversight of Canada's air carrier operations. For more information, travelers may visit the FAA's web site at http://www.faa.gov.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offences. Persons violating Canadian laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Canada are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in Canada are encouraged to register with the U.S. Embassy or nearest U.S. Consulate through the State Department's travel registration web site at https://travelregistration.state.gov, and to obtain updated information on travel and security within Canada. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency.

The U.S. Embassy is in Ottawa, Ontario, at 490 Sussex Drive, K1N 1G8, telephone (613) 238-5335, fax (613) 688-3082. The Embassy web site is http://canada.usembassy.gov.

The Embassy's consular district includes Ottawa, Easter Ontario (Kingston, Lanark, Leeds, Prescott, Refrew, Russell, and Stormont); and those parts of the Quebec Regions of Outaouais and Abitibi-Temiscamingues near Ottawa. U.S. Consulates General are located at:

Calgary, Alberta, at Suite 1050, 615 Macleod Trail SE, telephone (403) 266-8962; emergency-after hours-to report the death or arrest of an American (403) 2 66 -8962 then press '0'; fax (403) 264-6630. The consular district includes Alberta, Manitoba, Saskatchewan, and the Northwest Territories, excluding Nunavut.

Halifax, Nova Scotia, at 1969 Upper Water Street, Suite 904, Purdy's Wharf Tower II, telephone (902) 429-2480; emergency-after hours-to report the death or arrest of an American (902) 429-2485; fax (902) 423-6861. The consular district includes New Brunswick, Newfoundland, Nova Scotia, Prince Edward Island and the French islands of Saint Pierre and Miquelon.

Montreal, Quebec, at 1155 St. Alexander Street, telephone (514) 398-9695; emergency-after hours-to report the death or arrest of an American (514) 981-5059; fax (514) 398-0702. The consular district includes Greater Montreal and the regions of Southern Quebec Province (Laurentides, Lanaudiere, Laval, Montreal, Montregie, Estrie, and the southern parts of Centre-du-Quebec); including Joliete, Drummondville and Sherbrooke.

Quebec City, Quebec, at 2 rue de la Terrasse Dufferin, telephone (418) 692-2095; emergency-after hours-to report the death or arrest of an American (418) 692-2096; fax (418) 692-4640. The consular district includes Quebec City and those regions of Quebec Province to the North and East of the Montreal and Ottawa Districts (indicated above), plus the Territory of Nunavut.

Toronto, Ontario, at 360 University Avenue, telephone (416) 595-1700; emergency-after hours-to report the death or arrest of an American (416) 201-4100; fax (416) 595-5466, http://toronto.usconsulate.gov. The consular district includes the province of Ontario except the six counties served by the U.S. Embassy in Ottawa.

Vancouver, British Columbia, at 1095 West Pender Street, telephone (604) 685-4311; fax (604) 685-7175. The consular district includes British Columbia and the Yukon Territory.

All visa applicants are seen by appointment only. Information on visa appointments is available at www.nvars.com. For information on visa services for foreigners and consular/passport services for Americans who live in Canada please see our contracted web site, www.amcits.com. No visa or consular/passport information is available by calling the embassy or consulate switchboards.

Intercountry Adoption

April 2008

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information,

please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is based on public sources and our current understanding. Questions involving foreign and U.S. immigration laws and legal interpretation should be addressed respectively to qualified foreign or U.S. legal counsel.

The Hague Convention on Intercountry Adoption: The Hague Convention on Intercountry Adoption, to which the United States became a party on April 1, 2008, establishes legal and regulatory requirements for intercountry adoption. Canada is a party to The Hague Convention on Protection of Children and Co-operation in Respect of Intercountry Adoption (the Convention) and with which the Convention is in force for the United States.

Patterns of Immigration: The U.S. Embassy in Montreal has issued approximately 13 immigrant visas to Canadian orphans during the past five fiscal years.

Adoption Authority: In Canada, the various provinces are responsible for setting and administering adoption policies and procedures. The following Canadian Government office and website provide contact information for federal and provincial adoption authorities, who can provide specific information on adoption in Canada:

Government of Canada
Human Resources and Social Development Canada
Intercountry Adoption Services
Income Security and
Social Development
Tel: (613) 954-0880
Fax: (613) 948-7537
http: www.cic.gc.ca/english/immigrate/adoption/authorities.asp.

Eligibility And Residency Requirements For Adoptive Parents: Eligibility and residence requirements vary by province. In general, non-residents of Canada cannot adopt children for emigration from Canada. There are some very limited exceptions, usually involving relatives of the children. Most recent cases have been initiated by provincial child welfare agencies.

Time Frame: Varies greatly by case and province.

Adoption Agencies and Attorneys: Because Canada is a Convention country, adoption services must be provided by an accredited agency, temporarily accredited agency, approved person, supervised provider, or exempted provider. It is essential that prospective adoptive parent(s) seeking to adopt from a Convention country use an accredited adoption service provider. The U.S. Department of State maintains a current list of accredited adoption service providers. The list of accredited adoption service providers is also provided on the website of The Hague Permanent Bureau at www.hcch.net.The Canadian Bar Association, and the Provincial Bars can be contacted at http://www.cba.org.

Adoption Fees: The U.S. Embassy in Canada discourages the payment of any fees that are not properly receipted, "donations," or "expediting" fees, that may be requested from prospective adoptive parents. Such fees have the appearance of "buying" a baby and put all future adoptions in Canada at risk. Adoption procedures, and any associated fees, are determined by the individual Canadian provinces. Prospective adoptive parents should contact the relevant provincial authority for information on local adoption procedures and fees.

Adoption Procedures: Adoption procedures are determined by the individual Canadian provinces. Prospective adoptive parents should contact the relevant provincial authority for information on local adoption procedures.

Required Documents: There is no standard list of required documents. Private intercountry adoptions are rare. Other cases for adoption and emigration to the United States are generally coordinated by provincial child welfare authorities. Prospective adoptive parents should follow the guidelines the provincial child welfare authorities set for each case.

Canadian Embassy
501 Pennsylvania Ave., NW
Washington, DC 20001
202-682-1740; Fax: 202-682-7701

Canada also has consulates in: Atlanta, Boston, Buffalo, Chicago, Dallas, Denver, Detroit, Houston, Los Angeles, Miami, Minneapolis, New York, Raleigh, San Diego, San Francisco, and Seattle.

U.S. Immigration Requirements: As of April 1, 2008, U.S. citizens wishing to adopt in a Convention country must begin the process by filing with the U.S. Citizenship and Immigration Services (USCIS) a form I-800A *Application for Determination of Suitability to Adopt a Child from a Convention Country*.

Prospective adoptive parents are strongly encouraged to consult the Department of Homeland Security, USCIS website (www.uscis.gov) to download forms and filing instructions.

Additional Information: For information on intercountry adoption and international parental child abduction, and security information for U.S. citizens traveling abroad, call Toll Free 1-888-407-4747. This number is available from 8:00 a.m. to 8:00 p.m. EST/EDT, Monday through Friday (except U.S. federal holidays). Callers who are unable to use toll-free numbers, such as those calling from overseas, may obtain information and assistance during these hours by calling 1-202-501-4444.

International Parental Child Abduction

November 2008

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *International Child*

Abduction section of this book and review current reports online at www.travel.state.gov/childabduction.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is provided for general information only. Questions involving interpretation of specific foreign laws should be addressed to foreign legal counsel.

General Information: Canada is a federal state comprising ten provinces and three territories. With the exception of Quebec, all provinces or territories are based on a Common Law jurisdiction. Quebec is a civil law province or territory and its laws are codified. Each province or territory administers its own court system. U.S. citizens are not required to have a passport to enter Canada.

The Hague Convention: The United States is a party to the Hague Convention on the Civil Aspects of International Child Abduction (the "Hague Convention"). The Convention is an international treaty. Its purpose is to discourage international parental child abduction and to ensure that children who are abducted or wrongfully retained, are returned to their country of habitual residence. The Convention does not address child custody, but determines the jurisdiction in which custody should be adjudicated.

The Hague Convention came into force between the United States and Canada on July 1, 1988. Therefore, Hague Convention provisions for return would apply to children abducted or retained on or after July 1, 1988. Parents and legal guardians of children taken to Canada prior to July 1, 1988 may still submit applications for access to the child under the Hague Convention. For more information on The Hague Convention, see the *International Parental Child Abduction* section of this publication and review current reports from the U.S. Department of State at www.travel.state.gov/childabduction.

Each province and territory in Canada has its own Central Authority. If the whereabouts of the child is known or there is reason to believe the child is located in a specific province or territory, applications under the Hague Convention are forwarded to the Provincial Central Authority. If the child's whereabouts are not known, the applications are forwarded to the Federal Central Authority in Ottawa, Ontario. For a list of contact names and addresses for Central Authorities, review current reports online at www.travel.state.gov/childabduction.

Criminal Remedies: For information on possible criminal remedies, please contact your local law enforcement authorities or the nearest office of the Federal Bureau of Investigation. Information is also available on the Internet at the web site of the U.S. Department of Justice, Office of Juvenile Justice and Delinquency Prevention, at http://www.ojjdp.ncjrs.org.

PLEASE NOTE THAT CRIMINAL CHARGES MAY COMPLICATE A HAGUE CONVENTION CASE IN CANADA.

Passports for Minors and the Children's Passport Issuance Alert Program: For more information on these topics, see the *International Parental Child Abduction* section of this publication and review current reports from the U.S. Department of State at www.travel.state.gov/childabduction.

More Information: For further information and/or assistance in either preventing or responding to an international parental child abduction, contact the Office of Children's Issues, U.S. Department of State at (202) 736-9090 or visit its web site at www.travel.state.gov/childabduction.

CAPE VERDE

Compiled from the December 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Republic of Cape Verde

PROFILE

Geography

Area: 4,033 sq. km. (1,557 sq. mi.), slightly larger than Rhode Island.
Cities: Capital—Praia (pop. 106,052). Other city—Mindelo (pop. 67,844).
Terrain: Rugged volcanic islands.
Climate: dry, temperate

People

Nationality: Noun and adjective—Cape Verdean(s).
Population: (2008) 499,796.
Annual growth rate: (2008) 1.41%.
Ethnic groups: Creole (mixed African and Portuguese), African, European.
Religions: Roman Catholic, Protestant.
Languages: Portuguese (official); Crioulo (national).
Education: Literacy (2008)—77%.
Health: Infant mortality rate (2008)—24.8/1,000. Life expectancy (2008)—72.5 yrs.

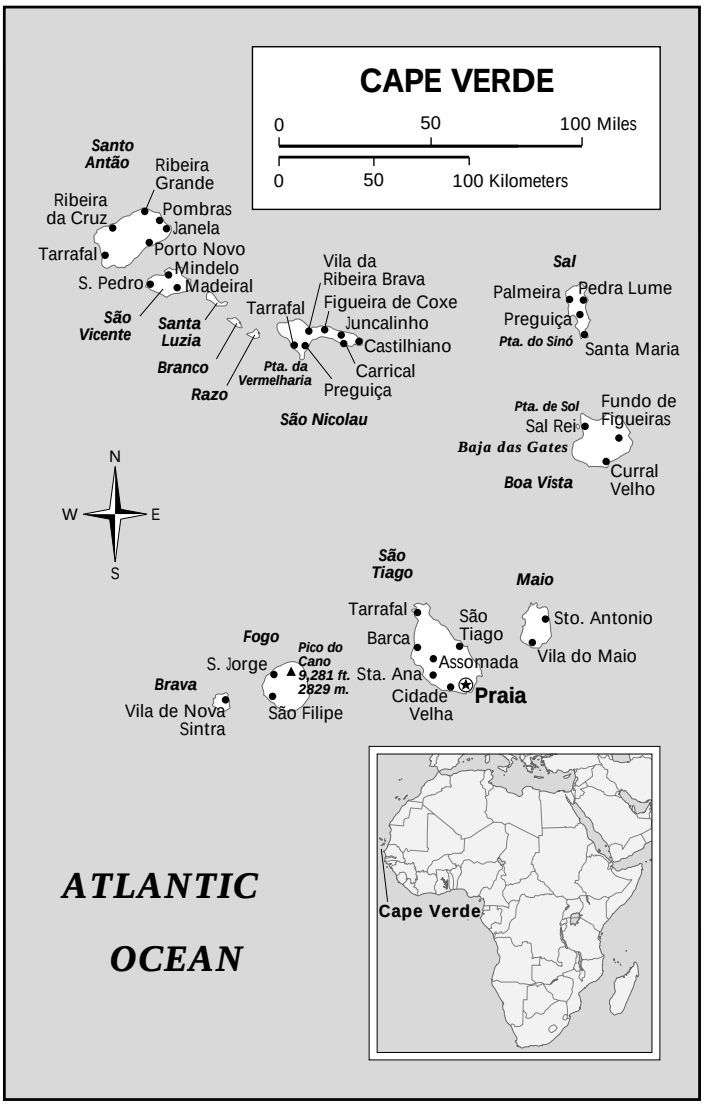
Government

Type: Republic.
Independence: July 5, 1975.
Constitution: 1982; revised 1992, 1995, and 1999.
Government branches: Executive—president (head of state), prime minister (head of government), Council of Ministers. Legislative—National Assembly. Judicial—Supreme Court, lower courts.
Political subdivisions: 17 administrative districts.
Political parties: African Party for Independence of Cape Verde or PAICV [Jose Maria Pereira NEVES, chairman]; Democratic Alliance for Change or ADM [Eurico MONTEIRO] (a coalition of PCD, PTS, and UCID); Democratic Christian Party or PDC [Manuel RODRIGUES]; Democratic Renovation Party or PRD [Victor FIDALGO]; Democratic and Independent Cape Verdean Union or UCID [Antonio MONTEIRO]; Movement for Democracy or MPD [Agostinho LOPES]; Party for Democratic Convergence or PCD [Eurico MONTEIRO]; Party of Work and Solidarity or PTS [Isaias RODRIGUES]; Social Democratic Party or PSD [Joao ALEM].
Suffrage: Universal over 18.

Economy

GDP: (nominal, 2007) $1.603 billion.
GDP per capita: (2007) $3,200.
Real GDP growth rate: (2008) 6.5%.
Inflation: (2007) 3.29%.
Natural resources: Salt, pozzolana, limestone.
Agriculture: Products—bananas, corn, beans, sugarcane, coffee, fruits, vegetables, livestock products.
Industry: Types—fish and fish products, clothing, shoes, beverages, salt, construction, building materials, ship repair, furniture, metal products, tourism.
Trade: (2007) Exports—$80.36 million: fuel, clothing, shoes and shoe parts, fish and crustaceans. Imports—$768 million: consumer goods, intermediary goods, capital goods, petroleum. Major trading partners, exports—Spain 44.2%, Portugal 21.7%, Netherlands 12.6%, Morocco 4.6%. Major trading partners, imports—Portugal 41.1%, Netherlands 10.6%, Spain 6.5%, Italy 5.4%, Cote d'Ivoire 5.2%, Brazil 4.8%.
Fiscal year: Calendar year.
Currency: Escudo (CVEsc 73 = $1 as of December 2007), which is pegged to the Euro.
Economic aid received: $161 million (2005). Largest donors: Portugal ($43 million); European Community ($22 million); World Bank-IDA ($21 million); Luxembourg ($15 million); Netherlands ($10 million); the United States ($9 million).

GEOGRAPHY



The Cape Verde Islands are located in the mid-Atlantic Ocean some 450 kilometers (about 300 mi.) off the west coast of Africa. The archipelago includes 10 islands and 5 islets, divided into the windward

(Barlavento) and leeward (Sotavento) groups. The main islands in the Barlavento group are Santo Antão, São Vicente, Santa Luzia, São Nicolau, Sal, and Boa Vista; those of the Sotavento group include Maio, Santiago, Fogo, and Brava. All larger islands but Santa Luzia are inhabited.

Three islands—Sal, Boa Vista, and Maio—generally are level and very dry. Mountains higher than 1,280 meters (4,200 ft.) are found on Santiago, Fogo, Santo Antão, and São Nicolau.

Sand carried by high winds has created spectacular rock formations on all islands, especially the windward ones. Sheer, jagged cliffs rise from the sea on several of the mountainous islands. Natural vegetation is sparse in the uplands and coast, but interior valleys support denser growth.

Rainfall is irregular, and the archipelago suffers periodic droughts and consequent food shortages. The average precipitation per year in Praia is 24 centimeters (9.5 in.). During the winter, storms blowing from the Sahara sometimes cloud the sky, but sunny days are the norm year round.

PEOPLE

The Cape Verde archipelago was uninhabited until the Portuguese discovered the islands in 1456. African slaves were brought to the islands to work on Portuguese plantations. As a result, Cape Verdeans are of mixed African and European origin. The influence of African culture is most pronounced on the island of Santiago, where half the population resides. Sparse rain and few natural resources historically have induced Cape Verdeans to emigrate. It is believed that of the more than 1 million individuals of Cape Verdean ancestry, fewer than half actually live on the islands. Some 500,000 people of Cape Verdean ancestry live in the United States, mainly in New England. Portugal, Netherlands, Italy, France, and Senegal also have large communities.

The official language is Portuguese, but most Cape Verdeans also speak a Creole dialect—Crioulo—which is based on archaic Portuguese but influenced by African and European languages. Cape Verde has a rich tradition of Crioulo literature and music.

HISTORY

In 1462, Portuguese settlers arrived at Santiago and founded Ribeira Grande (now Cidade Velha)—the first permanent European settlement city in the tropics. In the 16th century, the archipelago prospered from the transatlantic slave trade. Pirates occasionally attacked the Portuguese settlements. Sir Francis Drake sacked Ribeira Grande in 1585. After a French attack in 1712, the city declined in importance relative to Praia, which became the capital in 1770. With the decline in the slave trade, Cape Verde's early prosperity slowly vanished. However, the islands' position astride mid-Atlantic shipping lanes made Cape Verde an ideal location for re-supplying ships. Because of its excellent harbor, Mindelo (on the island of São Vicente) became an important commercial center during the 19th century.

Portugal changed Cape Verde's status from a colony to an overseas province in 1951 in an attempt to blunt growing nationalism. Nevertheless, in 1956, Amilcar Cabral, a Cape Verdean, and a group of Cape Verdeans

and Guinea-Bissauans organized (in Guinea-Bissau) the clandestine African Party for the Independence of Guinea-Bissau and Cape Verde (PAIGC), which demanded improvement in economic, social, and political conditions in Cape Verde and Portuguese Guinea and formed the basis of the two nations' independence movement. Moving its headquarters to Conakry, Guinea in 1960, the PAIGC began an armed rebellion against Portugal in 1961. Acts of sabotage eventually grew into a war in Portuguese Guinea that pitted 10,000 Soviet bloc-supported PAIGC soldiers against 35,000 Portuguese and African troops.

By 1972, the PAIGC controlled much of Portuguese Guinea despite the presence of the Portuguese troops, but the organization did not attempt to disrupt Portuguese control in Cape Verde. Portuguese Guinea declared independence in 1973 and was granted de jure independence in 1974. Following the April 1974 revolution in Portugal, the PAIGC became an active political movement in Cape Verde. In December 1974, the PAIGC and Portugal signed an agreement providing for a transitional government composed of Portuguese and Cape Verdeans. On June 30, 1975, Cape Verdeans elected a National Assembly, which received the instruments of independence from Portugal on July 5, 1975.

Immediately following the November 1980 coup in Guinea-Bissau, relations between Cape Verde and Guinea-Bissau became strained. Cape Verde abandoned its hope for unity with Guinea-Bissau and formed the African Party for the Independence of Cape Verde (PAICV). Problems have since been resolved, and relations between the countries are good. The PAICV and its predecessor established a one-party system and ruled Cape Verde from independence until 1990.

Responding to growing pressure for pluralistic democracy, the PAICV called an emergency congress in February 1990 to discuss proposed constitutional changes to end one-party rule. Opposition groups came together to form the Movement for Democracy (MpD) in Praia in April 1990. Together, they campaigned for the right to contest the presidential election scheduled for December 1990. The one-party state was abolished September 28, 1990, and the first multi-party elections were held in January 1991. The MpD won a majority of the seats in the National Assembly, and the MpD presidential candidate Mascarenhas Monteiro defeated the PAICV's candidate with 73.5% of the votes. Legislative elections in December 1995 increased the MpD majority in the National Assembly. The party won 50 of the National Assembly's 72 seats. A February 1996 presidential election returned President Mascarenhas Monteiro to office. Legislative elections in January 2001 returned power to the PAICV, with the PAICV holding 40 of the National Assembly seats, MpD 30, and Party for Democratic Convergence (PCD) and Party for Labor and Solidarity (PTS) 1 each. In February 2001, the PAICV-supported presidential candidate Pedro Pires defeated former MpD leader Carlos Veiga by only 13 votes.

GOVERNMENT AND POLITICAL CONDITIONS

The Cape Verde constitution—adopted in 1980 and revised in 1992, 1995, and 1999—forms the basis of government. The president is head of state and is elected by popular vote for a 5-year term. The prime minister is head of government and proposes other ministers and secretaries of state. The prime minister is nominated by the National Assembly and appointed by the president. Members of the National Assembly are elected by popular vote for 5-year terms.

Cape Verde enjoys a stable democratic system. The Movement for Democracy (MpD) captured a governing majority in the National Assembly in the country's first multi-party general elections in 1991. The MpD was returned to power with a larger majority in the general elections held in December 1995. In 2001, the PAICV regained power, with four parties holding seats in the National Assembly—PAICV 40, MPD 30, PCD 1, and PTS 1. Nationwide municipal elections were held March 21, 2004.

In January 2006, Cape Verde held a successful round of parliamentary elections, followed by successful presidential elections on February 12, 2006. The National Electoral Commission (NEC) judged both elections free and fair. The leading parliamentary opposition party filed a court case in an attempt to overrule the NEC on the grounds of alleged fraud; this action ultimately failed. Three parties now hold seats in the National Assembly—PAICV 40, MPD 30, and Cape Verdean Independent Democratic Union (UCID) 2. Municipal elections were held in May 2008, with the Movement for Democracy party taking many of the seats within the municipalities.

The judicial system is comprised of a Supreme Court of Justice—whose members are appointed by the president, the National Assembly, and the Board of the Judiciary—and regional courts. Separate courts hear civil, constitutional, and criminal cases. Appeal is to the Supreme Court.

The judicial system is comprised of a Supreme Court of Justice—whose members are appointed by the president, the National Assembly, and the Board of the Judiciary—and regional courts. Separate courts hear civil, constitutional and criminal cases. Appeal is to the Supreme Court.

Governor, Central Bank: **Carlos BURGO**
Ambassador to the US: **Fatima Lima VEIGA**
Permanent Representative to the UN, New York: **Antonio Pedro Lima MONTEIRO**

Cape Verde maintains an embassy in the United States at 3415 Massachusetts Avenue, NW, Washington DC 20007 (tel. 202-965-6820) and one consulate at 535 Boylston Street, Boston MA 02116 (tel. 617-353-0014).

ECONOMY

Cape Verde has few natural resources and suffers from poor rainfall and limited fresh water. Only 4 of the 10 main islands (Santiago, Santo Antão, Fogo, and Brava) normally support significant agricultural production, and over 90% of all food consumed in Cape Verde is imported. Mineral resources include salt, pozzolana (a volcanic rock used in cement production), and limestone.

The economy of Cape Verde is service-oriented, with commerce, transport, and public services accounting for more than 70% of GDP. Although nearly 70% of the population lives in rural areas, agriculture and fishing contribute only about 9% of GDP. Light manufacturing accounts for most of the remainder. An amount estimated at about 20% of GDP is contributed to the domestic economy through remittances from expatriate Cape Verdeans. Since 1991, the government has pursued market-oriented economic policies, including an open welcome to foreign investors and a far-reaching privatization program. It established as top development priorities the promotion of market economy and of the private sector; the development of tourism, light manufacturing industries, and fisheries; and the development of transport, communications, and energy facilities. From 1994 to 2000 there was a total of about $407 million in foreign investments made or planned, of which 58% were in tourism, 17% in industry, 4% in infrastructure, and 21% in fisheries and services.

Fish and shellfish are plentiful, and small quantities are exported. Cape Verde has cold storage and freezing facilities and fish processing plants in Mindelo, Praia, and on Sal.

Cape Verde's strategic location at the crossroads of mid-Atlantic air and sea lanes has been enhanced by significant improvements at Mindelo's harbor (Porto Grande) and at Sal's and Praia's international airports. A new international airport was opened in Boa Vista in December 2007. Ship repair facilities at Mindelo were opened in 1983. The major ports are Mindelo and Praia, but all other islands have smaller port facilities. In addition to the international airport on Sal, airports have been built on all of the inhabited islands. All but the airport on Brava enjoy scheduled air service. The archipelago has 3,050 kilometers (1,830 mi.) of roads, of which 1,010 kilometers (606 mi.) are paved, most using cobblestone.

Future prospects depend heavily on the maintenance of aid flows, the encouragement of tourism, remittances, outsourcing labor to neighboring African countries, and the momentum of the government's development program.

FOREIGN RELATIONS

Cape Verde pursues a nonaligned foreign policy and seeks cooperative relations with all states. Angola, Brazil, China, Cuba, France, Portugal, Russia, Senegal, Spain, and the United States maintain embassies in Praia. Several others, mostly European countries, maintain honorary consulates. In addition, Cape Verde maintains multilateral relations with other Lusophone nations and holds membership in many international organizations. On July 23, 2008, Cape Verde became the 153rd member of the World Trade Organization (WTO), in hopes of opening its markets for imported goods and services.

U.S.-CAPE VERDEAN RELATIONS

The cordial relations between the United States and Cape Verde have strong historical roots. In the early 18th century, U.S. whaling ships appear to have begun recruiting crews from Brava and Fogo to hunt whales that were abundant in the waters surrounding Cape Verde. Ties between the American colonies and Cape Verde are documented as early as the 1740s, when American ships routinely anchored in Cape Verdean ports to trade for salt or buy slaves. The tradition of emigration to the United States began at that time and continues today.

The first U.S. consulate in sub-Saharan Africa was established in Cape Verde in 1818. U.S. consular representation continued throughout the 19th century. The United States recognized Cape Verde on its independence day and supported its admission to the United Nations. Cape Verde assigned one of its first ambassadors to the United States, and a resident U.S. ambassador was posted to Cape Verde in 1983. Prime Minister Jose Neves visited Cape Verdean communities in New England during an official trip to the United States in 2002, and President Pires visited the United States in April 2005. Prime Minister Neves

also visited the U.S. in September 2007. The United States provided emergency humanitarian aid and economic assistance to Cape Verde in the period immediately following Cape Verde's independence, as well as after natural disasters, including a hurricane that struck the island of Brava in 1982, and after a severe volcanic eruption on Fogo in 1995.

Cape Verde also is eligible for trade benefits under the African Growth and Opportunity Act (AGOA), and has signed an Open Skies agreement to facilitate air travel safety and expansion. On July 4, 2005, Cape Verde became the third country to sign a compact with the U.S. Government-funded Millennium Challenge Corporation (MCC); the five-year assistance package is worth over $110 million in addressing rural economic expansion, infrastructure development, and development of tourism and a community college system.

TRAVEL

Consular Information Sheet

May 5, 2008

Country Description: The Republic of Cape Verde consists of nine inhabited and several uninhabited volcanic islands off the western coast of Africa. Most are rugged and mountainous; three (Sal, Maio, and Boa Vista) are flat, desert islands with sand beaches. Praia, the capital, is on the island of Santiago, and Cape Verde's major shipping port is Mindelo on the island of Sao Vicente. Portuguese is the official language. Praia's new international airport opened on October 6, 2005, from which Cape Verdean Airlines (TACV) now offers direct flights between Praia and Boston once or twice a week, depending on the season. Cape Verde has another international airport (Amilcar Cabral Airport) located on Sal Island, more than 100 miles northeast of the capital. While the tourist industry brings ever-growing numbers of visitors, facilities on many islands remain limited. Sal has the most developed tourist industry. See the section "Special Circumstances" below regarding issues that impact inter-island transport.

Cape Verde enjoys a stable, democratic government with an elected president as head of state, a prime minister nominated by the National Assembly (the national legislative body) as head of government, and elected members of the unicameral National Assembly. The judicial system is comprised of numerous courts, culminating in a Supreme Court.

Entry Requirements: A passport and visa are required. Visa approval can take several days and Cape Verde issues two types of tourist visas: a single-entry visa valid for up to 90 days or a multiple entry visa valid for one year. You may contact the Embassy of the Republic of Cape Verde, 3415 Massachusetts Avenue NW, Washington DC 20007, tel. (202) 965-6820; or the Consulate General of Cape Verde in Boston (tel. 617-353-0014). Overseas, inquiries should be made to the nearest Cape Verde embassy or consulate. Visit the Embassy of Cape Verdeweb site at http://virtualcapeverde.net/news2/index.php for the most current visa information.

Safety and Security: Visitors traveling to Cape Verde who wish to participate in water sports, swimming, boating and fishing should exercise extreme caution since the tides and currents around Cape Verde are very strong. Several small fishing boats were lost at sea in recent years.

Cape Verde, similar to Hawaii, is an archipelago of volcanic islands. Although most islands now appear inactive, the island of Fogo is still active. Fogo erupted several times in the twentieth century, the last time in 1995. U.S. citizens should be aware of the possibility of future eruptions as well as tremors associated with these volcanoes on any of the islands, especially on Fogo, Brava and Santo Antão.

General information about natural disaster preparedness is available via the Internet from the U.S. Federal Emergency Management Agency (FEMA) at http://www.fema.gov.

Campaign rallies and demonstrations are generally peaceful; however, U.S. citizens should avoid crowds, political gatherings, and street demonstrations.

For the latest security information, Americans traveling abroad should regularly monitor the Department of State, Bureau of Consular Affair's Internet site at http://travel.state.gov, where the current Travel Warnings and Travel Alerts, including the Worldwide Caution Travel Alert, can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S. and Canada, or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: Petty thievery and burglary are common in Cape Verde, especially in crowds, such as market places, fes-

tivals, and celebrations. Criminals do not necessarily target Americans, but rather affluent foreigners of any nationality. Local police statistics reflect an increase in crime in Cape Verde, particularly in the cities of Praia and Mindelo. Often the perpetrators of these crimes are gangs of street children, so visitors should avoid groups of children who appear to have no adult supervision.

Muggings occur more often than previously, particularly at night and in more isolated areas, and occasionally violence is associated with them. Crime associated with drugs and drug-use is also on the rise. Due to lack of lighting in many public areas and periodic blackouts, people are encouraged to carry small flashlights, travel with others, keep vehicle doors and windows locked, avoid dark and isolated places, and be especially vigilant in the evenings.

Violent crime is also increasing in Cape Verde. There have been several murders and attempted murders in the past year, mostly reported in the urban centers of Praia and Mindelo, although Sal and other islands have not been immune. Murders and violent assaults have not targeted American citizens specifically. As reported in the Department of State's Country Reports on Human Rights Practices, which can be accessed at http://www.state.gov/g/drl/rls/hrrpt/2007/100471.htm, domestic abuse against women, is wide-spread. Domestic and child abusers do not specifically target American women or children, however. For information related to crime statistics in Cape Verde, see the Public Order Police's web site at: http://www.pop.cv.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

Medical Facilities and Health Information: Medical facilities in Cape Verde are limited, and some medicines are in short supply or unavailable. There are hospitals in Praia and Mindelo, with smaller medical facilities in other places. The islands of Brava and Santo Antão no longer have functioning airports so air evacuation in the event of a medical emergency is nearly impossible from these two islands. Brava also has limited inter-island ferry service.

Malaria exists in Cape Verde, although not to the extent found in mainland Africa. The risk of contracting malaria is mainly limited to the island of Santiago, with a higher risk from July to December. It is recommended that travelers take preventative measures while visiting Cape Verde.

Further information on prescription drugs is found in the section below on Customs Regulations. A list of medical providers and hospitals is available at the U.S. Embassy in Praia and on their web site.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's website at http://wwwn.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith/en.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Cape Verde is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

Cape Verde has an extensive road system. Paved roads on most islands are narrow, winding, mostly cobblestone, and are sometimes in poor repair. Asphalt roads are relatively uncommon except for airport connector roads (on the islands of Sao Vicente and Sal), a few roads within Praia and Mindelo, and the north-south road on the island of Santiago. There are projects underway to convert cobblestone roads to asphalt. The newer asphalt roads make driving more comfortable, but can be more dangerous since these roads are smoother and lack speed bumps, which results in a tendency for drivers to speed. During the rainy season, you should be very cautious on slippery cobblestone roads and careful on roads that cut through mountains, as mudslides and large falling rocks are common.

Houses are often located adjacent to the road, so drivers must be careful of people (especially children) and livestock in the road. Roads and streets are often unlit, so driving at night is hazardous. Most accidents result from aggressive driving, excessive speed, and passing in blind curves. Driving while under the influence of alcohol is a problem. The peak time for drunk drivers is on Sundays, but one can encounter them at any time. Recently there was a serious accident on the island of Santiago involving American citizens in a rented vehicle who were hit by an intoxicated taxi driver traveling around a turn in the wrong lane.

Also, you should be extremely cautious after celebrations, festivals and open-air concerts as well as during holiday periods, such as the Christ-

mas, New Year's and Carnival. Service stations are available and quite modern. Taxis and buses offer reasonably dependable service. Bus service in Praia is reliable and inexpensive and buses are fairly new. Intra-island service usually consists of minivans (typically Toyota Hi-Ace) or converted pickup trucks that have benches along the edges of the pickup bed. Intra-island service can be dangerous because some drivers overload their vehicles and exceed the speed limit, and some drivers drink and drive. Before entering any transport, riders should pay close attention to the behavior of the driver. Intoxicated drivers caused some of the accidents, while others were due to dangerously high speeds.

In Cape Verde, traffic moves on the right side of the road. At intersections, the vehicle on the right has the right-of-way, but at roundabouts (traffic circles), cars in the circle have the right-of-way. Under Cape Verdean law, seat belts must be worn at all times by the driver and the person seated in the front passenger seat. Children under 12 must sit in the back seat. Motorcyclists must wear crash helmets and use headlights at all times.

In the event of an accident, for emergency assistance on the island of Santiago, call 130 for medical assistance; 131 for fire; and 132 for police. Each of the other islands has its own emergency numbers. Some form of ambulance service is available on all islands, although there are few ambulances and emergency care is limited. There is no organized system of roadside assistance.

Third-party insurance is required and will cover damages if you are involved in an accident resulting in injuries and you are found not to be at fault. An insurance decal must be displayed on a vehicle's windshield; the police will stop and ticket vehicles that are not insured. A person who causes an accident may be charged a fine, and a driver involved in an accident that results in death may be incarcerated.

For specific information concerning Cape Verdean driving permits, vehicle inspection, road tax, and mandatory insurance, contact the Cape Verdean Office of Tourism, at Achada Santo Antonio, Caixa Postal 89, Praia, Cape Verde, tel. 238-622-621.

Aviation Safety Oversight: The U.S. Federal Aviation Administration (FAA) has assessed the Government of Cape Verde's Civil Aviation Authority as being in compliance with International Civil Aviation Organization (ICAO) aviation safety standards for oversight of Cape Verde's air carrier operations. For more information, travelers may visit the FAA's web site at http://www.faa.gov.

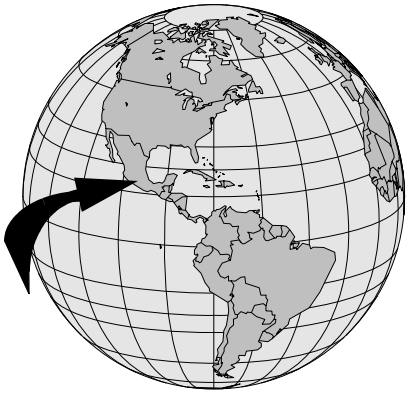
Special Circumstances: The U.S. Embassy in Praia urges travelers to apply for a visa prior to traveling to Cape Verde. Although Americans have been allowed to travel to Cape Verde without a visa, they must apply for and purchase an entry visa upon arrival at the airport. Such "airport" visas cost more and have a 7-day validity; to extend one's stay beyond seven days, the visitor needs to purchase a regular single or multi-entry visa at the office of immigration police.

During peak travel season, travelers who connect to other islands via the inter-island plane service may experience delays in receiving their luggage at their final destination because of the limited carrying capacity of inter-island planes. You should have a change of clothing and all vital materials in your carry-on luggage to avoid frustration in the first 24-48 hours in country. Inter-island travel is generally via 45-seat propeller planes or ferries.

Not all flights between islands are direct. With the opening of the new Praia International Airport, TACV (Cape Verdean Airlines) is promising improved inter-island plane service. During the dusty season (late December to late March), inter-island plane service may be cancelled due to poor visibility and related safety concerns. The islands of Brava and Santo Antão are not accessible via plane. The airport on the island of Maio was closed in August of 2007 for repairs, which were estimated to last several months. The airport is not yet open as of April 2008.

There is regular daily inter-island ferry service between Porto Novo, Santo Antão and Mindelo, São Vicente. In September 2005, the island of Brava started benefiting from ferry service. The port of Furna, Brava is now linked (via ferry) to the port of Praia, Santiago and the port of Sao Felipe, Fogo. These ferry links do not offer daily runs, however, and the service schedule frequently changes. The Moura Company launched a new catamaran service in the summer of 2007. The catamaran service operates between the islands of Maio, Santiago, Fogo, Brava and São Vicente with a schedule that changes on a weekly basis.

Cabo Verde Telecom is currently the only provider for fixed-line voice, mobile voice, data service, and Internet service (dial-up, ISDN and ADSL). Only major cities and towns have Internet cafes; mobile phone service is on the GSM standard. International services in Cape Verde are dependent on transatlantic fiber-optic cables, so in 2004 when the main cable servicing Cape Verde was severed, most international voice and data traffic were cut for approximately three weeks and satellite backup could not handle the load. Visitors who need reliable communication to other countries may consider bringing satellite-based voice and/or data equipment. The international country code for Cape Verde is 238. Fixed-line numbers have seven digits and mobile phone numbers begin with nine. Telephone connections are good, but calls outside the archipelago are very expensive.



Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar

offenses. Persons violating Cape Verdean laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Cape Verde are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in Cape Verde are encouraged to register with the U.S. Embassy through the State Department's travel registration web site so that they can obtain updated information on travel and security within Cape Verde. Americans without Internet access may register directly with the U.S. Embassy. By registering, American citizens make it easier for the Embassy to contact them in case of emergency.

The U.S. Embassy is located at Rua Abilio Macedo 6, Praia, on the island of Santiago. The telephone is (238) 260-8900; the fax number is (238) 261-1355; and the web site http://praia.usembassy.gov.

CAYMAN ISLANDS

Compiled from the February 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Cayman Islands

PROFILE

Geography

Area: 259 sq. km. (100 sq. mi.) on three islands: Grand Cayman (76 sq. mi.), Cayman Brac (14 sq. mi.), and Little Cayman (10 sq. mi.).

Capital: George Town (pop. 20,626. (1999 Census)

Terrain: Low-lying limestone base surrounded by coral reefs.

Climate: Tropical.

People

Nationality: Noun and adjective—Caymanian(s).

Population: (2007 est.) 46,600.

Annual growth rate: (2007 est.) 2.496%.

Ethnic groups: Afro-European 40%, African 20%, European 20%, other 20%.

Religious affiliations: United Church, Anglican, other Protestant, Roman Catholic.

Languages: English.

Education: Years compulsory—to age 16. Literacy (age 15 and over)—98%.

Health: Infant mortality rate (2006)—8.7/1,000. Life expectancy—males 75 years; females 79 years.

Work force: 23,450.

Government

Type: British Overseas Territory.
Constitution: 1972; called the Cayman Islands Order.
Government branches: Executive—Governor and Governor-in-Cabinet (representing British monarch), Cabinet. Legislative—unicameral Legislative Assembly (15 elected, three appointed members). Judicial—Summary Court, Grand Court, Cayman Islands Court of Appeal, Her Majesty's Privy Council.
Political subdivisions: Eight districts.
Political parties: People's Progressive Movement, United Democratic Party.
Suffrage: Universal at 18.

Economy

GDP per capita: (2006 estimate) U.S. $46,500.
GDP: (2004 est., purchasing power parity) $1.939 billion.
Growth rate: 6.5%.
Natural resources: Scenic beaches and underwater attractions, favorable climate.
Agriculture: Products—Minor production of vegetables and livestock, turtle farming, aquaculture.
Industry: Types—tourism, banking, insurance, mutual funds, finance, and construction.
Trade: Exports (2004)—$1.2 million: turtle products, manufactured consumer goods. Major market—United States. Imports (2004)—$722.4 million: machinery, manufactures, food, fuels, chemicals. Major suppliers—U.S., Jamaica, U.K., Netherlands Antilles, Japan.
Exchange rate: (fixed) CI $0.80=U.S. $1.

HISTORICAL HIGHLIGHTS

The Cayman Islands remained largely uninhabited until the 17th century. A variety of people settled on the islands, including pirates, refugees from the Spanish Inquisition, shipwrecked sailors, deserters from Oliver Cromwell's army in Jamaica, and slaves. The majority of Caymanians are of African and British descent, with considerable interracial mixing.

Great Britain took formal control of the Cayman Islands, along with Jamaica, under the Treaty of Madrid in 1670. Following several unsuccessful attempts, permanent settlement of the islands began in the 1730s. The Cayman Islands historically have been popular as a tax-exempt destination. Legend has it that Caymanians in 1788 rescued the crews of a Jamaican merchant ship convoy which had struck a reef at Gun Bay and that the Caymanians were rewarded with King George III's

promise to never again impose any tax. The Cayman Islands, initially administered as a dependency of Jamaica, became an independent colony in 1959; they now are a self-governing British Overseas Territory.

ECONOMY

Although Caymanians enjoy one of the highest standards of living in the world, about 90% of the islands' food and consumer goods must be imported.

From the earliest settlement of the Cayman Islands, economic activity was hindered by isolation and a limited natural resource base. The harvesting of sea turtles to resupply passing sailing ships was the first major economic activity on the islands, but local stocks were depleted by the 1790s. Agriculture, while sufficient to support the small early settler population, has always been limited by the scarcity of available land.

The advent of modern transportation and telecommunications in the 1950s led to the emergence of what are now considered the Cayman Islands' "twin pillars" of economic development: international finance and tourism. In 2004, there were more than 70,000 companies registered in the Cayman Islands, including 446 banks and trust companies. Forty of the world's largest banks are present in the Cayman Islands.

It is estimated that financial services represent 40% and tourism between 30-40% of gross domestic product. Unspoiled beaches, duty-free shopping, scuba diving, and deep-sea fishing draw almost a million visitors to the islands each year.

Education is compulsory to the age of 16 and is free to all Caymanian children. Schools follow the British educational system. The Government operates 10 primary, one special education, and two high schools. In addition, there is a university and a law school.

GOVERNMENT AND POLITICAL CONDITIONS

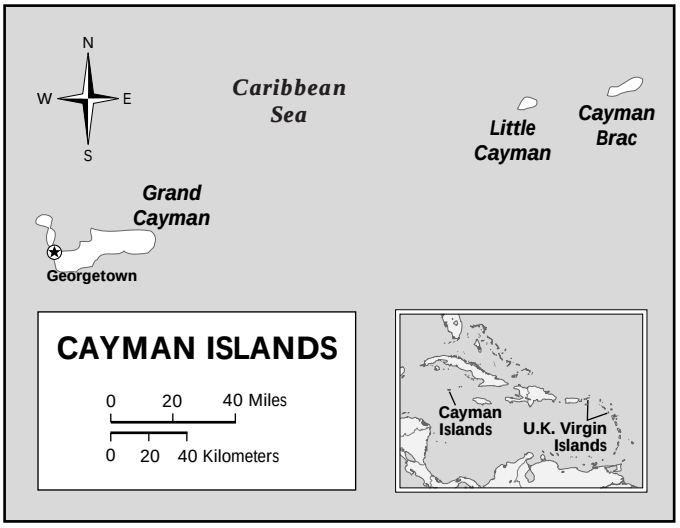
The Cayman Islands' physical isolation under early British colonial rule allowed the development of an indigenous set of administrative and legal traditions which were codified into a Constitution in 1959. Although still a British Overseas Territory, the islands today are self-governed in nearly all respects. The Constitution, or Cayman Islands Order, that now governs the islands came into effect in 1972 and was amended in 1994. The Cayman Islands' political system is very stable, bolstered by a tradition of restrained civil governance, sustained economic prosperity, and its relative isolation from foreign policy concerns by virtue of its colonial relationship with the United Kingdom. Public discussion revolves around public sector expenditure and social services, the pace of additional economic development, and the status of the large foreign national community on the islands.

Government Structure

The Cayman Islands form a British Overseas Territory with a large measure of self-government. The present constitution, which came into effect in 1972, provides for a system of government headed by a Governor, a Legislative Assembly, and a Cabinet, which administers the islands. The Governor is recruited from the U.K. Government Service, serves as the British government administrator, and retains responsibility for the civil service, defense, external affairs, and internal security. The Governor also chairs the Cabinet and appoints to the Cabinet the Chief Secretary, the Attorney General, and the Financial Secretary, while the Legislative Assembly elects the Cabinet's other five members. Unlike other Caribbean Overseas Territories there is no Chief Minister but a Leader of Government Business. The Leader of Government Business is also the Minister for District Administration, Planning, Agriculture and Housing. Responsibility for defense and external affairs resides with the United Kingdom; however, the Chief Secretary has responsibility for the Portfolio of Internal and External affairs, and the Cayman Government may negotiate certain bilateral matters directly with foreign governments. The elected members of the Cabinet divide the remaining administrative portfolios. The 18-seat unicameral Legislative Assembly is presided over by an independent speaker. Elections are held at the discretion of the Governor at least every 4 years. Members of the Assembly may introduce bills, which, if passed, are then approved, returned, or disallowed by the Governor. The U.K. Government also reserves the right to disallow bills approved by the Governor. The four-tiered judicial system is based on English common law and colonial and local statutes. The Cayman Islands Court of Appeal is the highest court on the islands, but Her Majesty's Privy Council sitting in London may hear a final appeal.

POLITICAL COALITIONS

Since 2000, there have been two official political parties: The United Democratic Party (UDP) and the People's Progressive Movement (PPM). While there has been a shift to political parties, many contending for an office still run as independents. In May 2005 elections, the People's Progressive Movement won, receiving nine of the 15 seats. The next elections are due in 2009.



Principal Government Officials

Last Updated: 2/1/2008

Head of State: **Queen Elizabeth II**

Governor: **Stuart Jack,** since November 2005

Leader of Government Business: **The Honorable Kurt Tibbetts**, since May 2005

The Cayman Islands are represented in the United States by the United Kingdom Embassy at 3100 Massachusetts Avenue, Washington DC 20008; tel: 202-462-1340; fax: 202-898-4255.

U.S.-CAYMANIAN RELATIONS

Although the United Kingdom is responsible for the Cayman Islands' defense and external affairs, important bilateral issues are often resolved by negotiations between the Cayman Government and foreign governments, including the United States. Despite close historic and political links to the U.K. and Jamaica, geography and the rise of tourism and international finance in the Cayman Islands' economy has made the United States its most important foreign economic partner.

Following a dip in tourists from the United States after September 11, 2001, over 200,000 U.S. citizens traveled by air to the Cayman Islands in 2004; some 4,761 Americans were resident there as of 2005.

For U.S. and other foreign investors and businesses, the Cayman Islands ' main appeal as a financial center is the absence of all major direct taxes, free capital movement, a minimum of government regulations, and a well-developed financial infrastructure. With the rise in international narcotics trafficking, the Cayman Government entered into the Narcotics Agreement of 1984 and the Mutual Legal Assistance Treaty of 1986 with the United States in order to reduce the use of its facilities for money laundering operations.

In June 2000, The Cayman Islands was listed by multilateral organizations as a tax haven and a non-cooperative territory in fighting money laundering. The country's swift response in enacting laws limiting banking secrecy, introducing requirements for customer identification and record keeping, and for banks to cooperate with foreign investigators led to its removal from the list of non-cooperative territories in June 2001.

U.S. Representation

The United States does not maintain diplomatic offices in the Cayman Islands. Diplomatic relations are conducted through the U.S. Embassy in London and the British Embassy in Washington, DC. The Cayman Islands are, however, part of the consular district administered by the U.S. Embassy in Kingston, Jamaica. Inquiries regarding visas to the U.S. or other consular matters should be directed to the consular section of the U.S. Embassy, 142 Old Hope Road, Kingston 6, Jamaica; tel: (876) 702-6000; fax: (876) 702-6001. There also is a U.S. consular agent in the Cayman Islands to assist in providing services for American citizens. Address: Unit 222, Mirco Center, North Sound Road, Georgetown, Grand Cayman; tel: (345) 945-8173; fax: (345) 945-8192. For after-hours emergencies call the U.S. Embassy in Kingston, Jamaica, tel: (876) 702-6000. The Consular Agency in Georgetown is open to the public: M-W-F 0730 to 1100 and T-Th 1200 to 1530. The office is closed on U.S. and Caymanian public holidays.

TRAVEL

Consular Information Sheet

October 2, 2008

Country Description: The Cayman Islands are a British dependent territory consisting of three main islands with a total area of approximately 100 square miles and located about 500 miles west of Jamaica. There is an international airport located in Grand Cayman, and facilities for tourists are widely available. The U.S. Embassy in Kingston, Jamaica has consular responsibility for the Cayman Islands.

Entry Requirements: All Americans traveling by air outside of the United States are required to present a passport or other valid travel document to enter or re-enter the United States. This requirement will be extended to sea travel (except closed-loop cruises), including ferry service, by the summer of 2009. Until then, U.S. citizens traveling by sea must have government-issued photo identification and a document showing their U.S. citizenship (for example, a birth certificate or certificate of nationalization), or other Western Hemisphere Travel Initiative (WHTI) compliant document such as a passport card for entry or re-entry to the U.S. Sea travelers should also check with their cruise line and countries of destination for any foreign entry requirements.

Applications for the new U.S. Passport Card are now being accepted and have been in full production since July 2008.The card may not be used to travel by air and is available only to U.S. citizens. Further information on passport cards is available at http://travel.state.gov/passport/ppt_card/ppt_card_3926.html and upcoming changes to U.S. passport policy can be found on the Bureau of Consular Affairs web site at http://travel.state.gov/travel/cbpmc/cbpmc_2223.html. We strongly encourage all American citizen travelers to apply for a U.S. passport well in advance of anticipated travel. American citizens can visit travel.state.gov or call 1-877-4USA-PPT (1-877-487-2778) for information on how to apply for their passports.

Visas are not required for U.S. citizens traveling to the Cayman Islands for short-term visits. U.S. citizens traveling to the Cayman Islands for work must obtain a temporary work permit from the Department of Immigration of the Cayman Islands, telephone (345) 949-8344. There is a departure tax for travelers age 12 and older, which is regularly included in airfare.

For further information travelers may contact Cayman Islands Department of Tourism offices in Miami at (305) 599-9033, New York (212) 889-9009, Houston (713) 461-1317 and Chicago (630) 705-0650; or via the Internet at http://www.caymanislands.ky.

Safety and Security: The Cayman Islands are considered politically stable and enjoy a high standard of living. There have been no reported incidences of terrorism or threats made against Americans or American interests in the Cayman Islands.

For the latest security information, Americans traveling abroad should regularly monitor the Department of State, Bureau of Consular Affair's Internet site at http://travel.state.gov, where the current Travel Warnings and Travel Alerts, including the Worldwide Caution Travel Alert, can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S. and Canada, or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: The The Cayman Islands are considered politically stable and enjoy a high standard of living. There have been no reported incidences of terrorism or threats made against Americans or American interests in the Cayman Islands. For the latest security information, Americans traveling abroad should regularly monitor the Department of State, Bureau of Consular Affairs' web site at http://travel.state.gov, where the current Travel Warnings and Public Announcements, including the Worldwide Caution, can be found.

Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll-free in the U.S. and Canada, or for other callers, a regular toll line at 1-202-501-4444. These numbers are available from 8:00 a.m. to 8:00 p.m. Eastern Time, Monday through Friday (except U.S. federal holidays). The Department of State urges American citizens to take responsibility for their own personal security while traveling overseas.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

The local equivalent to the "911" emergency line in the Cayman Islands is "911."

Medical Facilities and Health Information: The quality of medical care in the Cayman Islands is generally comparable to that available in the United States; however, some procedures and cases requiring critical care may require medical evacuation to the United States. Several American citizens each year drown or suffer cardiac arrest while snorkeling or scuba diving in the Cayman Islands. These deaths may be attributed in part to tourists attempting to do more than they are trained to do or to poor physical conditioning or pre-existing medical conditions that are exacerbated when snorkeling or diving. A hyperbaric chamber is avail-

able for treatment of decompression illness. Doctors and hospitals often expect immediate payment for health services. Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's web site at http://wwwn.cdc.gov/travel/default.aspx. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith/en.

Although there are no express HIV/AIDS entry restrictions exist for visitors to the Cayman Islands, persons suffering from HIV/AIDS can be denied permission to land if a Health Officer certifies that their entry to the Islands would be dangerous to the community pursuant to Section 82 (c) of the Cayman Immigration Law (2007 Revision), which states:

"The following persons, not being Caymanian or permanent residents, are prohibited immigrants—a person certified by a Health Officer to be suffering from a communicable disease that makes his entry into the Islands dangerous to the community."

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning the Cayman Islands is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

Due to their size, the Caymans have little highway infrastructure to maintain. Local driving standards, the risk of accidents, the availability of emergency roadside service, quality and frequency of signage, and enforcement of traffic laws, generally meet the standards of the United States. Visitors must obtain a temporary driver's license, easily granted upon presentation of a valid state driver's license and payment of a small fee, at a car rental agency or a police station. Laws against driving while intoxicated are strictly enforced, with a legal maximum blood alcohol level set at 100 milligrams per 100 milliliters of blood. Seatbelt laws are also enforced and require the driver and all passengers to be fastened in while in motion. Drivers and pedestrians should remember that driving in The Cayman Islands is on the left-hand side of the road.

Visit the web site of the country's national tourist office at www.caymanislands.ky.

Aviation Safety Oversight: The U.S. Federal Aviation Administration (FAA) has assessed the Government of the Cayman Islands' Civil Aviation Authority as being in compliance with International Civil Aviation Organization (ICAO) aviation safety standards for oversight of the Cayman Islands' air carrier operations. For more information, travelers may visit the FAA's web site at http://www.faa.gov.

Special Circumstances: Cayman Islands customs authorities may enforce strict regulations concerning temporary importation into or export from Cayman Islands of items such as firearms of any kind, spear guns (or pole spears or Hawaiian slings), live plants and plant cuttings. Raw fruits and vegetables are also restricted. Visitors from the United States should be aware that products made from farmed green sea turtles at the Cayman Turtle Farm Ltd. are offered for local consumption. The importation of genuine sea turtle products is strictly prohibited by the United States, as well as other countries that have signed the Convention on International Trade in Endangered Species. In addition, U.S. Customs prohibits the transshipment of turtle products through the United States and any products discovered will be confiscated. It is advisable to contact the Collector of Customs (345) 949-2473 for specific information regarding customs requirements.

The Cayman Islands, like all Caribbean countries, can be affected by hurricanes. Hurricane season runs from June 1 to November 30 each year. The Office of Disaster Preparedness and Emergency Management (ODPEM) has put measures in place in the event of an emergency or disaster. General information is available on the subject via the Internet from the U.S. Federal Emergency Management Agency (FEMA) at http://www.fema.gov.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating the Cayman Islands laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in the Cayman Islands are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in the Cayman Islands are encouraged to register with the U.S. Embassy in Kingston, Jamaica through the State Department's travel registration web site, and to

obtain updated information on travel and security within the Cayman Islands. Americans without Internet access may register directly with the U.S. Consular Agency in George Town, Grand Cayman or the U.S. Embassy in Kingston, Jamaica. By registering, American citizens make it easier for the Embassy or Consular Agency to contact them in case of emergency.

The U.S. Consular Agency in the Cayman Islands is located at 222 Mirco Center, North Sound Road, Georgetown, Grand Cayman. Its phone number is (345) 945-8173. Office hours are Monday, Wednesday, and Friday from 08:00 a.m. to 2:00 p.m. American citizens requiring assistance in Cayman may also contact the American Citizen Services Unit of the U.S. Embassy in Kingston, Jamaica at (876) 702-6000. The Consular Section of the U.S. Embassy is located at 142 Old Hope Road, Kingston 6. Office hours are Monday through Friday (except Jamaican and U.S. holidays), 7:15 a.m. to 4:00 p.m., with window services 8:30 to 11:30 a.m. Both the Consular Agency and Embassy may provide updated information on travel and security within the Cayman Islands. The Embassy web site is http://kingston.usembassy.gov.

Intercountry Adoption

February 2007

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is based on public sources and current understanding. Questions involving foreign and U.S. immigration laws and legal interpretation should be addressed respectively to qualified foreign or U.S. legal counsel.

Patterns of Immigration: The U.S. Embassy in Kingston, Jamaica has issued only one immigrant visa to Caymanian orphans during the past five fiscal years.

Adoption Authority:

Department of Children and Family Services
Ground Floor, Brit Cay Building
George Town
P.O. Box 10653
Grand Cayman KY1-1006
Cayman Islands
Tel. 345-949-0290
Fax. 345-949-4167

Eligibility Requirements for Adoptive Parents: Prospective adoptive parents may be married or single, childless or already parenting other children. The requirements outlined in the Cayman Adoption Law state a person must be 25 years of age but not over 65. If married, the prospective adoptive parents must have been married and living together for no less than three years. If a person is married but separated, he or she will need the written consent of his or her spouse in order to make an application. The Cayman Islands Adoption Law allows non-Caymanians who are domiciled in the Cayman Islands to file applications to adopt.

Residency Requirements: Prospective adoptive parents must be resident of the Cayman Islands or be Caymanian nationals.

Time Frame: The Cayman Islands adoption procedures generally take between fourteen months and two years to complete.

Adoption Agencies and Attorneys: Prospective adoptive parents are advised to fully research any adoption agency or facilitator they plan to use for adoption services. For U.S.-based agencies, it is suggested that prospective adoptive parents contact the Better Business Bureau and/or the licensing office of the appropriate state government agency in the U.S. state where the agency is located or licensed.

Adoption Fees: There is a fee of CI$75 for processing an application for adoption within the Cayman Islands.

Adoption Procedures: Prospective adoptive parents should contact the Adoption Coordinator, who works within the Department of Children and Family Services, to arrange for an initial interview. The adoption process will be explained and if everything is in order, prospective adoptive parents will be given the application packet to take away and complete. When all of the required documents are completed, prospective adoptive parents should contact the Adoption Coordinator and arrange for a second interview. If everything is in place, the Coordinator files the application with the Adoption Board. The Adoption Board will arrange for a home study (assessment) to be carried out by a qualified social worker in the Cayman Islands. During this process, prospective adoptive parents will work with the social worker to consider all aspects of adoptive parenthood and identify the type of child the prospective adoptive family would like to adopt. When the assessment is completed, the social worker will produce a report for the Adoption Board; this report enables the Board to determine whether or not a person should be approved as a prospective adopter.

As soon as the Board gives its approval, the focus is then placed on identifying a child who best fits the profile for placement with the prospective adoptive family. After the child is placed with the prospective adoptive parents, there is a statutory period of three months during which time the family will be visited by a social worker. The social worker will visit several times to ensure that the child is well cared for and that bonding is taking place. At the end of the supervision period, the social worker will write a report for the Grand Court to support the application for the Adoption Order. When the Grand Court supervision report is completed, the application for an Adoption Order will be prepared and the case filed with the Court. The Clerk of the Court will issue a date for the

hearing and summonses will be served to the prospective adoptive parents and all other interested parties to attend Court on that date. Apart from the prospective adoptive parents and the child to be adopted, the child's birth parents (if known) or previous guardian, are required to attend. The Adoption Coordinator and the Chairman of the Adoption Board also attend the hearing. When the Adoption Order is granted, the adoption is complete. Please see the *Intercountry Adoption* section of this book for more details and review current reports online at http://adoption.state.gov.

Required Documents:

- Medical report of the adoptive parent(s)
- Police reports for the adoptive parents
- A letter from employer
- Marriage certificate (if applicable)
- Divorce decree (if applicable)

The Cayman Islands are represented in the United States by the Embassy of the United Kingdom:

United Kingdom Embassy
3100 Massachusetts Avenue
Washington DC 20008
Telephone: 202-462-1340
Fax: 202-898-4255.

Additional Information: Specific questions about adoption in the Cayman Islands may be addressed to the U.S. Embassy in Kingston, Jamaica. General questions regarding intercountry adoption may be addressed to the Office of Children's Issues, U.S. Department of State, CA/OCS/CI, SA-29, 4th Floor, 2201 C Street, NW, Washington, D.C. 20520-4818, toll-free Tel: 1-888-407-4747.

CENTRAL AFRICAN REPUBLIC

Compiled from the June 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Central African Republic

PROFILE

Geography

Area: 622,984 sq. km. (242,000 sq. mi.); slightly smaller than Texas.

Cities: Capital—Bangui (pop. 690,000). Other cities—Berberati (56,867), Bouar (39,676), Bambari (32,603), Bangassou (24,450), Bossangoa (31,723), Mbaiki (16,901), and Carnot (31,324).

Terrain: Rolling plain 600 meters-700 meters (1,980 ft.-2,310 ft.) above sea level; scattered hills in northeast and southwest.

Climate: Tropical, ranging from humid equatorial in the south to Sahelo-Sudanese in the north; hot, dry winters with mild to hot, wet summers.

People

Nationality: Noun and adjective—Central African(s).

Population: (July 2007 est.) 4,369,038.

Annual growth rate: (2007 est.) 1.505%.

Ethnic groups: More than 80; Baya 33%, Banda 27%, Sara 10%, Mandja 13%, Mboum 7%, M'baka 4%, Yakoma 4%, other 2%.

Religions: Protestant 25%, Roman Catholic 25%, Muslim 15%, indigenous beliefs 35%.

Languages: Sangho (official), Sangho (national).

Education: Years compulsory—6. Enrollment—primary school 75%. Literacy—50%.

Health: Infant mortality rate—115 deaths/1,000. Life expectancy—avg. 43 yrs.

Work force: (approx. 53% of pop.) Agriculture—75%; industry—6%; commerce and services—4%; government—15%.

Government

Type: Republic.

Independence: August 13, 1960.

Constitution: Passed by referendum December 29, 1994; adopted January 1995. Suspended by decree in March 2003. New constitution passed by referendum December 5, 2004.

Government branches: Executive—president, prime minister, and Council of Ministers. Legislative—unicameral National Assembly. Judicial—Constitutional Court, inferior courts, criminal courts, Court of Appeals.

Political subdivisions: 16 prefectures, commune of Bangui.

Political parties: Alliance for Democracy and Progress (ADP), Central African Democratic Assembly (RDC), Civic Forum (FC), Democratic Forum (FODEM), Liberal Democratic Party (PLD), Movement for Democracy and Development (MDD), Movement for the Liberation of the Central African People (MLPC), Patriotic Front for Progress (FPP), People's Union for the Republic (UPR), National Unity Party (PUN), and Social Democratic Party (PSD).

Suffrage: Universal over 21.

Economy

GDP: (2007, nominal) $1.647 billion.

Annual real GDP growth rate: -7.2% (2003); 0.5% (2004 est.); 3% (2006 est.), 3.045% (2007 est.).

Per capita income: (2007, PPP) $700.

Avg. inflation rate: (2007) 0.9%.

Natural resources: Diamonds, uranium, timber, gold, oil.

Agriculture: (2006, 56% of GDP) Products—Timber, cotton, coffee, tobacco, food crops, livestock. Arable land—3.1%.

Industry: (2006, 15% of GDP) Types—Diamond mining, sawmills, breweries, textiles, footwear, assembly of bicycles and motorcycles, and soap.

Services: (2006) 29% of GDP.

Trade: (2007) Exports—$146.7 million f.o.b.; diamonds, coffee, cotton, timber, tobacco. Major markets—Belgium, Italy, France, Luxembourg, Germany, Egypt, Spain, and Cote d'Ivoire. Imports—$237.3 million f.o.b.; food, textiles, petroleum products, machinery, electrical equipment, motor vehicles, chemicals, pharmaceuticals, consumer goods,

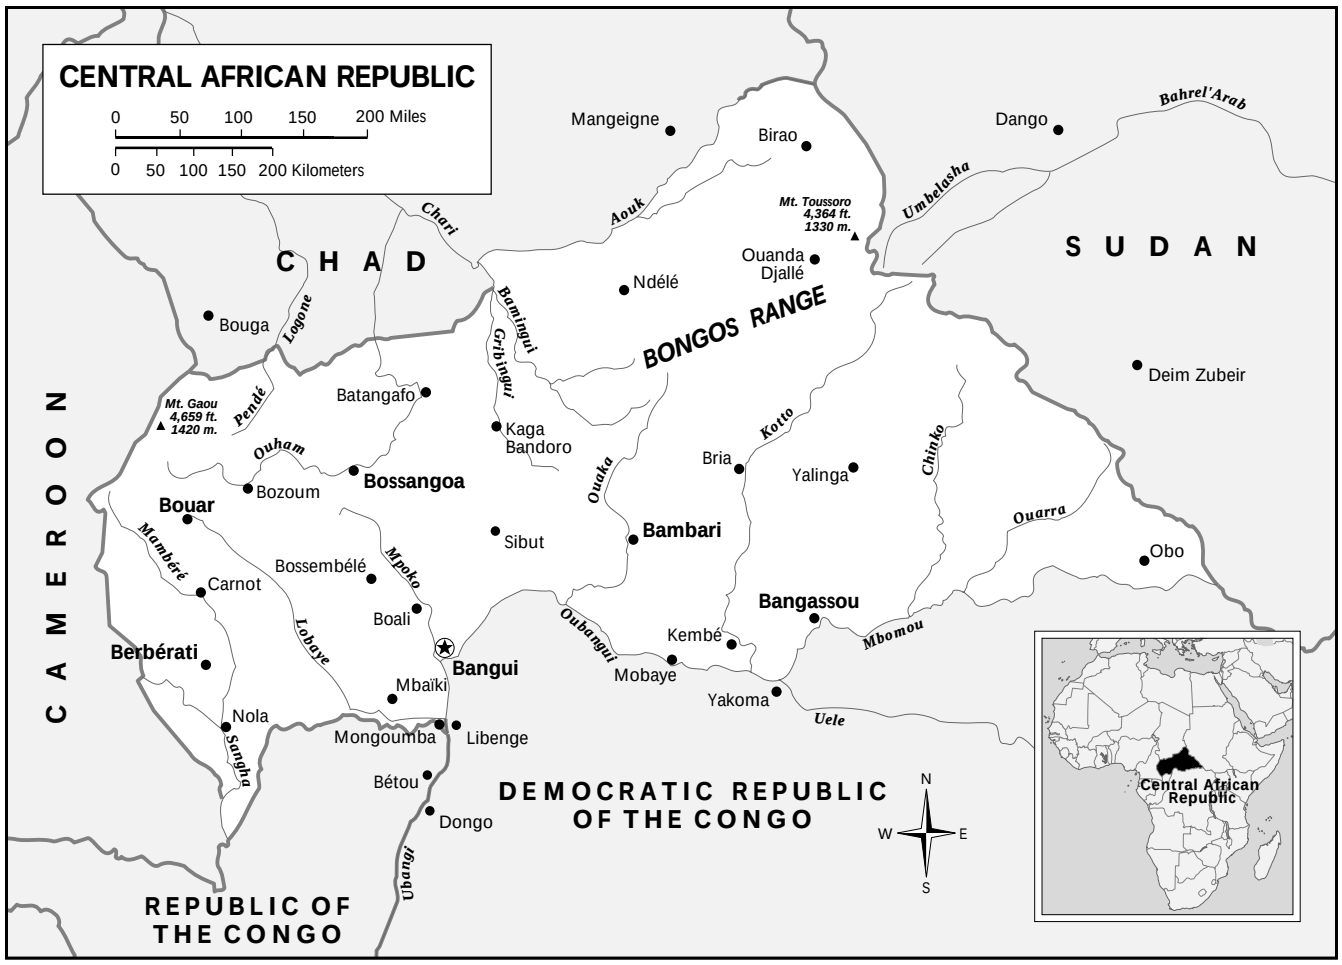
industrial products. Major suppliers—France, United States, Cote d'Ivoire, Cameroon, Germany, Japan.
Budget: (2007) $250 million.
Defense: (2006) 1.1% of GDP.
Fiscal year: Calendar year.

PEOPLE

There are more than 80 ethnic groups in the Central African Republic (C.A.R.), each with its own language. About 75% are Baya-Mandjia and Banda (40% largely located in the northern and central parts of the country), and 4% are M'Baka (southwestern corner of the C.A.R.). Sangho, the language of a small group along the Oubangui River, is the national language spoken by the majority of Central Africans. Only a small part of the population has more than an elementary knowledge of French, the official language.

More than 55% of the population of the C.A.R. lives in rural areas. The chief agricultural areas are around the Bossangoa and Bambari. Bangui, Berberati, Bangassou, and Bossangoa are the most densely populated urban centers.

HISTORY



The C.A.R. appears to have been settled from at least the 7th century on by overlapping empires, including the Kanem-Bornou, Ouaddai, Baguirmi, and Dafour groups based in Lake Chad and the Upper Nile. Later, various sultanates claimed present-day C.A.R, using the entire Oubangui region as a slave reservoir, from which slaves were traded north across the Sahara and to West Africa for export by European traders. Population migration in the 18th and 19th centuries brought new migrants into the area, including the Zande, Banda, and Baya-Mandjia.

In 1875 the Egyptian sultan Rabah governed Upper-Oubangui, which included present-day C.A.R. Europeans, primarily the French, German, and Belgians, arrived in the area in 1885. The French consolidated their legal claim to the area through an 1887 convention with Congo Free State, which granted France possession of the right bank of the Oubangui River. Two years later, the French established an outpost at Bangui, and in 1894, Oubangui-Chari became a French territory. However, the French did not consolidate their control over the area until 1903 after having defeated the forces of the Egyptian sultan Rabah and established colonial administration throughout the territory. In 1906, the Oubangui-Chari territory was united with the Chad colony; in 1910, it became one of the four territories of the Federation of French Equatorial Africa (A.E.F.), along with Chad, Congo (Brazzaville), and Gabon. The next 30 years were marked by small-scale revolts against French rule and the development of a plantation-style economy.

In August 1940, the territory responded, with the rest of the A.E.F., to the call from Gen. Charles de Gaulle to fight for Free France. After World War II, the French Constitution of 1946 inaugurated the first of a series of reforms that led eventually to complete independence for all French territories in western and equatorial Africa. In 1946, all A.E.F. inhabitants were granted French citizenship and allowed to establish local assemblies. The assembly in C.A.R. was led by Barthelemy Boganda, a Catholic priest who also was known for his forthright statements in the French Assembly on the need for African emancipation. In 1956 French legislation eliminated certain voting inequalities and provided for the creation of some organs of self-government in each territory. The French constitutional referendum of September 1958 dissolved the A.E.F., and on December 1 of the same year the Assembly declared the birth of the Central African Republic with Boganda as head of government. Boganda ruled until his death in a March 1959 plane crash. His cousin, David Dacko, replaced him, governing the country until 1965 and overseeing the country's declaration of independence on August 13, 1960.

On January 1, 1966, following a swift and almost bloodless coup, Col. Jean-Bedel Bokassa assumed power as President of the Republic. Bokassa abolished the constitution of 1959, dissolved the National Assembly, and issued a decree that placed all legislative and executive powers in the hands of the president. On December 4, 1976, the republic became a monarchy with the promulgation of the imperial constitution and the proclamation of the president as Emperor Bokassa I. His regime was characterized by numerous human rights atrocities.
