Internationally, Latvia has accomplished a great deal. It became a member of the United Nations (UN) on September 18, 1991, and is a signatory to a number of UN organizations and other international agreements, including the International Civil Aviation Organization (ICAO), the International Monetary Fund (IMF), and the World Bank. It is also a member of the Organization on Security and Cooperation in Europe (OSCE) and officially became a member of the North Atlantic Treaty Organization (NATO) on March 29, 2004. On May 1, 2004 Latvia joined the European Union (EU).

Since 2004, Latvia has emerged as a significant player in foreign affairs, standing out as a successful post-Soviet transition society. Strong memories of occupation and oppression motivate Latvia to reach out to countries struggling to move beyond authoritarian politics and state-controlled economies. It has worked closely with the U.S. and the EU to promote democracy in Ukraine, Belarus, Moldova, and Georgia. Latvia also supports pro-market, pro-free-trade policies in European and international organizations. It was the European Union's fastest-growing economy in 2004 through 2006.

Latvia has developed a policy of international security cooperation through participation in crisis management and peacekeeping operations. In 2006, Latvia deployed over 10% of its active duty military to support UN, NATO, and coalition military operations. That percentage is well above the European average in terms of per capita contributions. In 2008, Latvia increased its participation in the NATO International Security Assistance Force (ISAF) in Afghanistan to 155 soldiers and plans to maintain the number in 2009. Closer to home, Latvia has been active in the Balkans: it supports the NATO mission in Kosovo with peacekeepers, and the European Union Force (EUFOR) mission in Bosnia with liaison officers. Latvia also contributes to the OSCE mission to Georgia. In November 2006, Latvia hosted a NATO Summit in its capital, Riga.

GOVERNMENT AND POLITICAL CONDITIONS

The highest organ of state authority in Latvia is the Saeima, a unicameral legislative body of 100 members who are elected by direct popular vote to serve four-year terms. The Saeima initiates and approves legislation sponsored by the Prime Minister. The Prime Minister is the head of government and has full responsibility and control over the Cabinet. The President, who is elected by the Saeima every four years, holds a primarily ceremonial role as head of state, though the President must sign each law into force and has the power to return laws to the Saeima twice for review and revision. The President also has the power to call for a referendum on legislation that the Saeima refuses to change after twice being sent back. In the autumn of 1991 Latvia re-implemented significant portions of its 1922 constitution, and in the spring of 1993 the government took a census to determine eligibility for citizenship. Latvia finalized a citizenship and naturalization law in the summer of 1994, which was further liberalized in 1998. By law, those who

were Latvian citizens in 1940 and their descendants (regardless of ethnicity) could claim citizenship. Forty-one percent of Latvia's population is ethnically non-Latvian, yet almost three-fourths of all residents are citizens of Latvia. Requirements for naturalization include a conversational knowledge of Latvian, a loyalty oath, renunciation of former citizenship, 5 years of residency in Latvia, and a basic knowledge of Latvian history. Dual citizenship is allowed for those who were forced to leave Latvia during the Soviet occupation and adopted another citizenship. Convicted criminals, agents of Soviet intelligence services, and certain other groups are excluded from becoming citizens.

On March 19, 1991 the Supreme Council passed a law explicitly guaranteeing "equal rights to all nationalities and ethnic groups" and "to all permanent residents in the Republic regardless of their nationality, equal rights to work and wages." In addition, the law prohibits "any activity directed toward nationality discrimination or the promotion of national superiority or hatred."

In the June 5-6, 1993 elections, in which more than 90% of the electorate participated, eight of Latvia's 23 registered political parties passed the 5% threshold to enter parliament. The centrist party Latvia's Way received a 33% plurality of votes and joined the Farmer's Union to head a center-right-wing coalition government.

The September 30-October 1,1995 elections resulted in a deeply fragmented parliament with nine parties represented and the largest party commanding only 18 of 100 seats. Attempts to form right-of-center and leftist governments failed; seven weeks after the election, a broad but fractious coalition government of six of the nine parties was voted into office under Prime Minister Andris Skele, a popular, nonpartisan businessman.

In the 1998 elections, the Latvian party structure began to consolidate, with only six parties obtaining seats in the Saeima. Andris Skele's newly formed People's Party garnered a plurality with 24 seats. Though the election represented a victory for the center-right, personality conflicts and scandals within the two largest right-of-center parties—Latvia's Way and the People's Party—prevented stable coalitions from forming. Two shaky governments quickly collapsed in less than a year. In May 2000, a compromise candidate was found in the Latvia's Way mayor of Riga, Andris Berzins. His four-party coalition lasted until parliamentary elections in October 2002. Those elections left Latvia's Way, for the first time since 1993, with no seats in parliament. The New Era Party, which ran on an anti-corruption platform, gained the most seats and formed a four-party coalition government until the abrupt resignation of the Prime Minister in February 2004 over issues relating to personalities and management of the ruling coalition.

In 1999, the Saeima elected Vaira Vike-Freiberga, a compromise candidate with no party affiliation, to the presidency. Though born in Riga in 1937, she settled in Canada during the years of the Soviet occupation, becoming a well-respected academic on the subject of Latvian culture and psychology. Following her election, she became one of the most popular political figures in Latvia. She was overwhelmingly re-elected by parliament for another four-year term in June 2003. She was also credited with bringing Latvia to the world's stage and serving as an important check on the ruling coalitions.

With the tacit support of leftist parties, a minority government led by Greens and Farmers Union leader Indulis Emsis took office on March 9, 2004. The new government focused on smoothing Latvia's entry into NATO and the European Union, which took place in the first half of 2004. The government collapsed on October 28, 2004 after parliament voted against the 2005 budget. A new coalition government, led by Prime Minister Aigars Kalvitis, took office on December 2, 2004 and was re-elected on October 7, 2006. These last election results marked the first time that an incumbent administration has won re-election in the history of independent Latvia.

In July 2007, the Saeima elected Valdis Zatlers, another candidate with no political affiliation, to the presidency. An orthopedic surgeon by trade, Zatlers was the director of the Latvian Traumatology and Orthopedics Center until his election and has no prior political experience. His start was clouded by charges that he had accepted supplemental payments for medical services on which he did not pay taxes.Zatlers complied with investigations which in the end concluded he had committed no breaches of law.

In December 2007, Prime Minister Kalvitis resigned after his government came under intense criticism for attempting to dismiss the head of the anti-corruption bureau. President Zatlers nominated veteran politician Ivars Godmanis to form a new government. Godmanis' governing coalition consists of the same four center-right parties that made up the previous government.

Latvia's flag consists of two horizontal, maroon bands of equal width, divided by a white stripe one-half the width. The national holiday is November 18, Independence Day, which marks Latvia's 1918 independence.

ECONOMY

For centuries under Hanseatic and German influence and then during its inter-war independence, Latvia used its geographic location as an important East-West commercial and trading center. Industry served local markets, while timber, paper, and agricultural products supplied Latvia's main exports. The years of Soviet occupation tended to integrate Latvia's economy into the U.S.S.R. in order to serve that empire's large internal industrial needs. Since reestablishing its independence, Latvia has proceeded with market-oriented reforms. Its freely traded currency, the Lat, was introduced in 1993 and has held steady or appreciated against major world currencies. Before late 2007, Latvia's economic performance was among the best of the EU accession countries. Real per capita GDP had roughly doubled compared to its 1995 level, the economy was growing rapidly with GDP growth hitting 12.2% in 2006. Recently, however, internal economic instability combined with adverse external factors has decelerated economic growth considerably. Latvia's annualized second quarter real GDP growth rate dropped to 0.1% from 11% just a year ago. Increasing inflation is also causing concern. Latvia has registered the highest inflation rate in the EU, which reached 17.9%t at its highest level. The increase in inflation has delayed prospects of introducing the Euro currency in Latvia. At the same time, Latvia's current account deficit (ranging from 12% to 14% of GDP over the past 3 years) remains one of the key vulnerabilities of the Latvian economy.

Independence forced Latvia into a precarious position regarding its energy supply. With the exception of peat and timber, Latvia had no significant domestic energy resources and received 93% of its imported energy from Soviet republics. Latvia has sought ways to diversify its energy sources and to increase energy conservation. In August 2001, the Kegums hydroelectric power plant was reopened, contributing to Latvia's ability to supply 25% of its energy that year. Furthermore, in June 2002 the European Investment Bank loaned Latvenergo, a state-owned energy supply group, 80 million Euros to modernize its generation and distribution of electricity and thermal energy. Latvia is also looking to regional cooperation arrangements to diversify its energy supplies. With the other Baltic states, it plans to create an electricity network able to operate independently of its Russian counterpart. It is planning major infrastructure projects to provide energy supplies via Scandinavia, and it is working with Estonia, Lithuania and Poland to build a new nuclear power station in Ignalina, Lithuania.

Privatization in Latvia is effectively complete. All of the previously state-owned small and medium enterprises have been privatized, leaving in state hands the electric utility, the Latvian railway company, and the Latvian postal system, as well as state shares in several politically sensitive concerns. Despite the lack of transparency of the early stages of the privatization process and certain difficulties in privatization of some of the largest companies, Latvian privatization efforts have led to the development of a dynamic and prosperous private sector, which accounts for approximately 70% of the country's GDP.

In the last few years, Latvia has implemented many positive reforms in the business sphere (ranking 29th worldwide on the ease of doing business there, according to the World Bank Doing Business 2009 report). Most reforms deal with licensing, taxes, and business closures. In the 2005/2006 period, Latvia made it easier for businesses to comply with building requirements and reduced the number of licenses and permits required. In addition, Latvia launched an electronic tax filing system and improved the regulation of bankruptcy administrators in order to reduce corruption.

Foreign investment in Latvia remains high, as both Western and Eastern investors are trying to establish a foothold in the new EU member state as well as to take advantage of central location in the region and relatively cheap labor. Representing 5.8% of Latvia's total foreign direct investment (FDI), the U.S. FDI stock in Latvia stood at nearly $480 million at the end of 2008, according to the Bank of Latvia's most recent available figures. In 2007, U.S. goods and services accounted for 1.4% of Latvia's total imports, while exports to the United States accounted for 1.1% of Latvia's total exports. Latvia has been a member of the World Trade Organization since 1999. Latvia and the United States have signed treaties on investment, trade, intellectual property protection, and avoidance of double taxation.

In the long term, continued high economic growth in Latvia will depend on further improvements to the business environment, particularly the drive to reduce corruption and strengthen the rule of law, and on Latvia's ability to use the opportunities presented by EU membership.

DEFENSE

Latvia's defense concept is based upon four basic pillars: collective defense as a member of NATO, professionalization of the armed forces, support and coordination with civil society, and international military

cooperation. The armed forces consist of the regular forces, a home guard called "Zemessardze," and the Reserve. The regular forces are composed of the land forces, an air force focused on air surveillance and search and rescue, and naval forces focused on coastal surveillance, assertion of sovereignty, mine countermeasures, search and rescue, and environmental protection. Additionally, there are some other minor units adding to the total armed forces personnel of 5,000.Zemessardze is an autonomous 10,600-man-strong volunteer reserve organization which performs traditional national-guard duties such as crisis response and support for military operations. The Latvian National Armed Forces became fully professional in November 2006. Defense spending has risen in recent years, and the government has committed 2% of its GDP to defense spending through 2013.

FOREIGN RELATIONS

After regaining its independence, Latvia began to work at reintegrating into the West. In 1991, Latvia joined the Organization on Security and Cooperation in Europe (OSCE) and became a member of the United Nations (UN). It is party to a number of UN organizations as well as other international agreements including the International Civil Aviation Organization (ICAO), the International Monetary Fund (IMF), and the World Bank. Since 2004, Latvia has been an active member of the North Atlantic Treaty Organization (NATO) and the European Union (EU).

Latvia has emerged as a significant international player, courageously supporting peace and democracy world-wide. Per capita, it is one of the largest contributors to international military operations. It has deployed troops to Iraq, Afghanistan, and the Balkans. It also works closely with the U.S. and the EU to support and promote democracy in the former Soviet Union states of Ukraine, Belarus, Moldova, and Georgia. A testament to the close relationship between the U.S, and Latvia is the fact that President Bush has visited the country twice, the second time to attend the NATO Summit held in Riga on November 28-29, 2006.

Russia has expressed concern over how Latvia's language and naturalization laws affect Latvia's Russian-speaking population. Russians comprised 28% of the population in 2008. In turn, Latvia is interested in the welfare of ethnic Latvians still residing in Russia. Latvia and Russia signed a border treaty agreement in March 2007. It was ratified by both sides and went into effect at the end of 2007.

Latvia maintains embassies in the United States, Austria, Azerbaijan,Belarus, Belgium, Canada, the People's Republic of China, the Czech Republic, Denmark, Egypt, Estonia, Finland, France, Germany, Georgia, Greece, Hungary, Ireland, Israel, Italy, Japan, Kazakhstan, Lithuania, the Netherlands, Norway, Poland, Portugal, Russia, Slovenia, Spain, Sweden, Turkey, Ukraine, the United Kingdom, and Uzbekistan. It also operates missions to the United Nations in New York City and Geneva, the European Council, the European Union, the Chemical Weapons Nonproliferation Organization, NATO, the Organization for Security and Cooperation in Europe, the World Trade Organization, UNESCO,and the UN Council on Food and Agriculture.

Latvia has Consulates General in Russia and Germany; Consulates in Belarus and Russia; Honorary Consulates General in Brazil, Denmark, Italy,, Cyprus, Lebanon, Norway, Sri Lanka, Turkey, and Venezuela; and Honorary Consulates in USA, Argentina, Armenia, Australia, Austria,, Belgium, Bulgaria, Canada, Chile, Columbia, Croatia, Cyprus, Denmark, Dominican Republic, Egypt, Finland, France, Georgia, Germany, Greece, Hong Kong Iceland, India, Indonesia Ireland, Israel, Italy, Jamaica, Japan, Jordan, Kazakhstan, Kyrgyzstan,, Luxembourg, Malta, Morocco, Macedonia, Mexico, Moldova, the Netherlands, New Zealand, Norway, Pakistan, Panama, Peru, Philippines, Poland, Portugal, San Marino, South Africa, South Korea, Spain, Syria, Sweden, Switzerland, Thailand, Tunisia, Turkey, Ukraine, and the United Kingdom.

U.S.-LATVIAN RELATIONS

The United States established diplomatic relations with Latvia on July 28, 1922. The U.S. Legation in Riga was officially established on November 13, 1922 and served as the headquarters for U.S. representation in the Baltics during the interwar era. The Soviet invasion forced the closure of the legation on September 5, 1940, but Latvian representation in the United States has continued uninterrupted for 85 years. The United States never recognized the forcible incorporation of Latvia into the U.S.S.R. and views the present Government of Latvia as a legal continuation of the interwar republic. Latvia and the United States have signed treaties on investment, trade, intellectual property protection, extradition, mutual legal assistance, and avoidance of double taxation. Latvia has enjoyed most-favored-nation treatment with the United States since December 1991. In 2008, Latvia joined the visa waiver program.

TRAVEL

Consular Information Sheet

October 2, 2008

Country Description: Latvia is a stable democracy experiencing rapid economic growth. Most tourist facilities found in a western European city are available in the capital city of Riga. However, some of the goods and services taken for granted in other countries are not yet available in other parts of the country.

Entry Requirements: Latvia is a party to the Schengen agreement. As such, U.S. citizens may enter Latvia for up to 90 days for tourist or business purposes without a visa. The passport should be valid for at least three months beyond the period of stay. For further details about travel into and within Schengen countries, please see our fact sheet. Travelers remaining in Latvia for more than 90 days, including 180 day periods that cross over two half-calendar years, must apply for temporary residence. All travelers must have a valid insurance policy, covering medical expenses while in Latvia. Repatriation costs, including funeral and disposition of remains costs also have to be covered by the policy. In addition, upon entering or exiting the country, travelers must declare cash in excess of 10,000 euros to Latvian customs. For more information, travelers may contact the Latvian Embassy, at 2306 Massachusetts Avenue NW, Washington, DC 20008, tel. (202)328-2840, fax (202) 328-2860. For further information, visit http://www.latvia-usa.org. Within Latvia, contact the Ministry of Interiors Office of Citizenship and Migration Affairs at Ciekurkalna 1, linija 1,k,3,Riga, LV 1026. Tel. (371)67219645, (371)67219679, (371)80007657, fax (371)67219654, e-mail: pmlp@pmlp.gov.lv, web site http://www.ocma.gov. Any traveler to Russia, even in transit, is advised to obtain a visa prior to entry into Latvia. The process of obtaining a visa at the Russian Embassy in Riga can be lengthy, and involve surrender of the passport for an undetermined period of time. Visit the Embassy of Latvia web site at http://www.latvia-usa.org for the most current visa information.

Safety and Security: Civil unrest is not a problem in Riga. Nonetheless, in the past, Riga has seen large, peaceful demonstrations related to internal political issues. While demonstrations have been peaceful, American citizens are nevertheless cautioned to avoid any large public demonstrations. There have been no incidents of terrorism directed toward American interests. Incidents of anti-Americanism are rare. However, instances of racially motivated verbal harassment, and on occasion, physical assaults on non-Caucasian foreigners, have occurred in Riga. There have also been reports of non-Caucasian foreigners being subjected to extra scrutiny by security guards in shops and malls in Riga. Additionally, individuals displaying alternative lifestyles have experienced harassment.

For the latest security information, Americans traveling abroad should regularly monitor the Department's Internet web site at http://travel.state.gov, where the current Worldwide Caution Travel Alert, Travel Warnings and Travel Alerts can be found. Up-to-date information on security can also be obtained by calling 1-888-407-4747 toll free in the U.S., or, for callers outside the U.S. and Canada, a regular toll line at 1-202-501-4444.

Crime: Crime in Riga is generally non-violent. The majority of non-violent crime tends toward acts of pickpocketing, identity theft, and personal scams. However, there have been instances of serious violent assaults and robberies. Street crime is a serious problem, particularly for tourists. In addition to pickpockets in all public areas, there are numerous scam artists targeting foreigners in the tourist pubs and restaurants. There have been a number of reports recently of foreign tourists being charged xorbitant prices for drinks in bars. Some have then been assaulted or forced to withdraw money from an ATM to pay the bill. You can avoid situations like this by ensuring that you check the price of drinks before ordering, pay for one round at a time and seek recommendations for bars from trustworthy sources. There have also been a few cases of tourists and residents being drugged in bars and restaurants and then taken outside or to their residences and robbed. In any public area, one should always be alert, particularly to being surrounded by two or more people at once. It is not uncommon for groups of pickpockets to attempt to overwhelm their victim. Gangs of professional pickpockets are specifically targeting foreigners, particularly those carrying backpacks. In addition, Riga has one of the highest rates of car theft in the world.

Internet crime is a growing concern in Latvia. Common fraudulent schemes involve both Internet auction sites and Internet job search sites. In the first scam, criminals offer valuable items for sale at low prices on Internet auctions and request that payments be sent by wire transfer to a bank in Latvia or through a fraudulent escrow site that they have created themselves. In this scheme, the money passes through a bank in Latvia and is quickly withdrawn by ATM or transferred to a bank in another country. It is very difficult in these cases to discover the identities of the account holders or recover the funds. The second common scam involves identity theft through false job offers. In this scheme, a company claiming to be located in Latvia, but which has a non-existent address, offers the victim employment as a U.S.—based agent or freight forwarder. When the victim responds to the job offer, commonly posted on one of several popular Internet job sites, a Social Security Number and other identifying information needed for the identity theft is required under the guise of conducting a background check.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy or Consulate staff can, for example, assist you to find appropriate medical care, to contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

Medical Facilities and Health Information: Medical care in Latvia is steadily improving, but remains limited in several important respects. There are a few private clinics with medical supplies and services, including disposable needles and basic modern diagnostics, which are nearly equal to Western Europe or U.S. standards. However, because of the lack of equipment and resources, most major invasive procedures or surgeries in Latvia are not recommended. Hospital services have shown good progress but are still not equal to Western standards. Elderly travelers and those with existing health problems may be at risk due to inadequate medical facilities. Most, but not all, antibiotics and prescription medications are available but as they are generally produced in Europe or Latvia, they often have different names and instructions are usually not printed in English. Diphtheria, hepatitis and tick-borne encephalitis are present. According to the World Health Organization, tuberculosis is a significant problem in Latvia, with 9% of all cases being multi-drug resistant. For further information, please consult the CDC's Travel notice on TB at http://wwwn.cdc.gov/travel/yellowBookCh4-TB.aspx. State ambulance service for emergencies is available by dialing 112 anywhere in Latvia. However, response time is poor in rural areas. Air ambulance service is available for medical evacuations. In general, private air ambulance services are very expensive and require advance payment before the patient is transported.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's web site at http://wwwn.cdc.gov/travel. Further health information for travelers is available at www.who.int/ith.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Latvia is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

Foreign visitors to Latvia planning to operate a motor vehicle are required to obtain an International Driving Permit. These may be obtained through the American Automobile Association (AAA) or the American Automobile Touring Alliance for a small fee. A U.S. state driver's license is not sufficient. These requirements apply to those operating rental cars as well, whether or not the rental company chooses to enforce the requirement as a condition of rental. Individuals driving without an International Driving Permit may have their vehicle confiscated by the police. Americans resident in Latvia for more than six months are required to apply for a Latvian driver's license.

Upon receipt of a Latvian driver's license, American citizens are required to surrender their US driver's license to the Latvian authorities. The licenses are then returned to their respective states of issuance. For more information, visit the Latvian Road and Traffic Safety Department at http://www.csdd.lv.

Latvia has one of the highest rates of automobile accidents and fatalities in Europe. While recent reports show a decrease in the number of traffic accident fatalities, there are still a number of hazards to watch out for. Drivers should be alert for pedestrians and slow moving vehicles in traffic. Additionally, violation of traffic rules is common, and it is not unusual to be overtaken by other automobiles traveling at high speeds, even in crowed urban areas. Drivers do not always yield to pedestrians, even at marked intersections. During winter, most major roads are cleared of snow. However, drivers should be alert for fog, snow, and ice while driving. Driving while intoxicated is a very serous offense and carries heavy penalties. Local authorities use roadblocks and Breathalyzer tests as enforcement tools. Drivers and pedestrians should be alert to the possibility of drunk drivers and drunken pedestrians wandering on the road. Drivers must use their headlights at all times. Speed limits are usually 50 km/hr in the city and 90 km/hr on the highways. Public transportation is generally considered safe, but travelers are encouraged to select well-marked taxis. Emergency services are fair but improving; response time may be especially slow in traffic or in rural settings. Dial 112 for ambulance service.

Visit the web site of Latvia's national tourist office online at http://latviatourism.lv/info.php and the national authority responsible for road safety at http://www.csdd.lv.

Aviation Safety Oversight: As there is no direct commercial air service between the United States and Latvia, the U.S. Federal Aviation Administration (FAA) has not assessed Latvia's Civil Aviation Authority for compliance with International Civil Aviation Organization (ICAO) aviation safety standards. For more information, travelers may visit the FAA's Internet web site at http://www.faa.gov.

Special Circumstances: Banks and currency exchange counters may refuse to accept U.S. currency that is crumpled, torn, discolored or defaced (even small pen stokes, hand written numbers and letters are considered defacing). If such notes are accepted for exchange, an additional processing fee, based on the size of the transaction, may be charged. ATMs are widely available in Riga and in major towns. For security purposes, it is recommended that visitors use ATMs located inside major hotels or shopping malls, versus those located on the street, in high-volume tourist areas. Telephone connections with the United States are reliable. However, 1-800 numbers cannot be accessed from Latvia. Please check with your long distance carrier before departure to see if they offer service in Latvia. Local Internet cafés offer computer access, and fax machines are widely available.

Latvian customs authorities may enforce strict regulations concerning temporary importation into or export from Latvia of items such as firearms, religious materials, antiquities, medications, business equipment, drugs, etc. It is advisable to contact the Embassy of Latvia in Washington or one of the Latvian consulates in the United States for specific information regarding customs requirements at http://www.latvia-usa.org.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating Latvian laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Latvia are strict and convicted offenders can expect jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy and Consulate Locations: Americans living or traveling in Latvia are encouraged to register with the nearest U.S. Embassy of Consulate through the State Department's travel registration web site, http://travelregistration.state.gov, and to obtain updated information on travel and security within Latvia. Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency.

The U.S. Embassy is located at 7 Raina Blvd. Riga, LV-1510, and may be reached by dialing +371-703-6200. The fax number for the Consular American Citizen Services section is+371-781-4088. The U.S. Embassy web site is http://riga.usembassy.gov.

Intercountry Adoption

November 2008

The information in this section has been edited from a report available through the U.S. Department of State Office of Children's Issues. For more information detailed, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Latvia is party to The Hague Convention on Protection of Children and Cooperation in Respect of Intercountry Adoption (Hague Adoption Convention). Therefore all adoptions between Latvia and the United States must meet the requirements of the Convention and United States law implementing the Convention. For detailed information on these requirements for adoption, please review the *Intercountry Adoption* section of this publication and visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

Public opposition in Latvia to the adoption of Latvian children by foreigners has contributed to reluctance to reform intercountry adoption procedures, which currently require several extended trips by adoptive parents to Latvia to complete all the requirements. In addition, the Latvian Government recently announced that, as of March 1, 2008, it will approve applications for intercountry adoption only if the adoptive parents file to adopt a) a sibling group of three or more children, b) a child over age 9, c) a child with severe health problems, or d) a child released for intercountry adoption who has not been adopted by Latvians.

Who Can Adopt? Adoption between the United States and Latvia is governed by The Hague Adoption Convention. Therefore to adopt from Latvia, you must first be found eligible to adopt by the United States Government. In addition to the United States requirements for prospective adoptive parents, Latvia also has the following requirements for prospective adoptive parents.

Residency Requirements: Parent-child relationship requirement: Latvian adoption law requires that a parent-child relationship be established before the final court decision can be made at the town or city court having jurisdiction over the child. It leaves to each orphan court to decide on a case-by-case basis the period of time required to establish the parent-child relationship. The interpretation of the child-parent relationship among courts may differ. Adoptive parents are advised that orphan courts may require them to take care of the adoptive children and share a household in Latvia for some time period, not exceeding six months.

Age Requirements: Latvia does not have any age requirements for intercountry adoptions.

Marriage Requirements: Both single individuals and married couples are eligible to adopt.

Income Requirements: Latvia does not have any income requirements for intercountry adoptions.

Who Can Be Adopted? Because Latvia is party to The Hague Adoption Convention, children from Latvia must meet the requirements of the Convention in order to be eligible for adoption. In addition to Latvia's requirements, a child must meet the definition of a Convention adoptee for you to bring him or her back to the United States.

Latvia's Adoption Authority: Ministry for Children and Family Affairs

The Process: The first step in adopting a child from Latvia is to select an adoption service provider in the United States that has been accredited. Only these agencies and attorneys can provide adoption services between the United States and Latvia.

You must also select a United States adoption service provider that has been accredited by the Ministry for Family and Children Affairs of the Republic of Latvia. After you choose an accredited adoption service provider, you apply to be found eligible to adopt (Form I-800A) by the USCIS.

Once the United States Government determines that you are "eligible" and "suitable" to adopt, you or your agency will forward your information to the adoption authority in Latvia. Latvia's adoption authority will review your application to determine whether you are also eligible to adopt under Latvia's law. The Ministry for Children and Family Affairs reviews all applications and determines whether the applicant meets the requirements of the law to adopt. If the judgment is favorable, the Ministry provides the prospective parents with information on children who are available for adoption.

If both the United States and Latvia determine that you are eligible to adopt, and a child is available for intercountry adoption, the central adoption authority in Latvia may provide you with a referral for a child. After the prospective parents choose a child, the Ministry issues them permission to meet the child. The Ministry is informed after the adoptive family has cared for the child for the required time period and the orphan court has established that the adoption would (or would not) be in the child's interests.

After you accept a match with a child, you will apply to the USCIS for provisional approval to adopt that particular child (Form I-800). After this, your adoption service provider or you will submit a visa application for to a Consular officer at the United States Embassy. If the Consular office determines that the child appears eligible to immigrate to the United States, he/she will notify Latvia's adoption authority (Article 5 letter). For Convention country adoptions, prospective adoptive parent(s) may not proceed with the adoption or obtain custody for the purpose of adoption until this takes place.

Role of the Adoption Authority: The Ministry for Children and Family Affairs is responsible for administering intercountry adoptions. Orphan courts in Latvia carry out functions similar to those of social workers in the United States. The Ministry prepares an adoption approval (or rejection) statement for sub mission to the town or city court responsible for the final adoption decree. The Minister's adoption permission is valid for three months.

Role of the Court: Orphan courts decide: (a) whether the birth parents' rights can be terminated, (b) whether an orphan should be placed in an orphanage or whether someone else must be granted custody, (c) issues related to inheritance rights when a child's parents die. The main purpose of the orphan court session in the context of intercountry adoption is to establish that such an adoption will be in the child's interest and that the required parent-child relationship has been established. Current law provides for a twenty-day period for the final court decree to become effective.

Role of Adoption Agencies: Adoption agents are allowed to represent parents. They may do the required translations, and file adoption applications at the Ministry. However, under current law the adoptive parents are required to personally file applications at orphan courts and participate in the orphan court and final court sessions.

Time Frame: The time needed to complete an adoption in Latvia from beginning to end varies, but can take from under a year to four years.

Adoption Application: Prospective adoptive parents are required to file adoption applications with the Ministry for Children and Family Affairs.

Adoption Fees: There are no Latvian Government fees for adoption services in Latvia. However, prospective adoptive parents should be prepared to cover fees related to the translation and certification of documents and the processing of new civil and travel documents for the adopted child.

In the adoption services contract that you sign at the beginning of the adoption process, your agency will itemize the fees and estimated expenses related to your adoption process.

Documents Required: The following is a list of documents needed:

- Application including information about the reasons for adoption as well as information about the sex, age range, and religion of the child (children) they are interested in adopting;
- A copy of the parents' marriage certificate, if applicable, under apostille (Please see further information below about authentication of documents);
- A copy of any divorce decree (if applicable), under apostille;
- A statement about the housing for the family (i.e., size, location, type of residence);
- An autobiography (curriculum vitae);

- Medical statements regarding the health of the family (hereditary illnesses, if any, and any specific illnesses);

- A home study, under apostille, conducted by a United States state adoption agency or a private organization licensed to perform such studies. Home studies must be current in order to for the adoption application to considered. Continuations of home study approval should be forwarded to the Ministry for applications to remain valid; and

- A police clearance statement under apostille.

For updates on document requirements and information on how to authenticate documents, visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

Bringing Your Child Home: Once your adoption is complete (or you have obtained legal custody of the child), there are a few more steps to take before you can head home. Specifically, you need to apply for several documents for your child before he or she can travel to the United States, such as a birth certificate, a passport or travel document for your child from the country in which he or she was born, and a U.S. Immigration Visa.

For detailed and updated information on how to obtain these documents, review the *Intercountry Adoption* section on this publication and visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

Child Citizenship Act: For adoptions finalized abroad: The Child Citizenship Act of 2000 allows your new child to acquire American citizenship automatically when he or she enters the United States as lawful permanent residents. For adoptions finalized in the United States: The Child Citizenship Act of 2000 allows your new child to acquire American citizenship automatically when the court in the United States issues the final adoption decree. To learn more, review the *Intercountry Adoption* section on this publication and visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

After Adoption: If the adoptive parents and the child continue to reside in Latvia, the orphan court having jurisdiction over the child's place of residence will monitor the adopted child's well being for the first two years after the adoption's finalization.

If the adoptive parents and the child reside overseas, the Ministry requires post adoption reports on the adopted child for two years after the adoption (one a year). The reports should be conducted by appropriate child welfare officials in the state where the child resides.

LEBANON

Compiled from the October 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Lebanese Republic

PROFILE

Geography

Area: 10,400 sq. km. (4,015 sq. km.) about 0.7 times the size of Connecticut.

Cities: Capital—Beirut (pop. 1.5 million). Other cities—Tripoli/Trablus (210,000), Zahle (60,000), Sidon/Sayda (50,000), Tyre/Sur (20,000), Byblos/Jbail (10,000).

Terrain: Narrow coastal plain; El Beqaa (Bekaa Valley) separates Lebanon and Anti-Lebanon Mountains.

Climate: Mediterranean; mild to cool, wet winters with hot, dry summers; Lebanon mountains experience heavy winter snows.

People

Nationality: noun and adjective—Lebanese (singular and plural).

Population: (2006 est.) 3,874,050.

Growth rate: (2006 est.) 1.23%.

Ethnic groups: Arab 95%, Armenian 4%, other 1% (note: many Christian Lebanese do not identify themselves as Arab but rather as descendents of the ancient Canaanites and prefer to be called Phoenicians).

Religions: Muslim 60% (Shi'a, Sunni, Druze, Isma'ili, Alawite or Nusayri), Christian 39% (Maronite Catholic, Greek Orthodox, Melkite Catholic, Armenian Orthodox, Syrian Catholic, Armenian Catholic, Syrian Orthodox, Roman Catholic, Chaldean, Assyrian, Copt, Protestant), other 1%.

Languages: Arabic (official), English, French, Armenian.

Education: Years compulsory—8. Attendance—99%. Literacy (2005 est.)—87.4%; 93.1% male, 82.2% female.

Health: (2006 est.) Infant mortality rate—23.7/1,000. Life expectancy—70.41 male, 75.48 female.

Work force: (2001 est.) 2.6 million.

Government

Type: Republic.

Independence: November 22, 1943.

Constitution: May 23, 1926.

Government branches: Executive—president (chief of state), prime minister (head of government), deputy prime minister, cabinet. Legislative—unicameral national assembly. Judicial—four Courts of Cassation, Constitutional Council, Supreme Council.

Political subdivisions: 8 governorates.

Political parties: Amal Movement, Ba'ath Party, Democratic Left, Democratic Renewal Movement, Free Patriotic Movement, Future Movement, Hezbollah, Kataeb Party, Kataeb Reform Movement, Lebanese Forces, National Bloc, Marada Movement, Nasserite Popular Movement, National Liberal Party, Popular Bloc, Progressive Socialist Party, Qornet Shehwan Gathering, Syrian Social National Party, Tachnaq Party. A principal divide in current Lebanese politics is between pro-and anti-Syrian forces, often referred to, respectively, as March 8 and March 14, after major demonstrations they organized in 2005. "March 8" consists principally of the Shi'ite Amal and Hezbollah, now allied with the Free Patriotic Movement (Christian), while March 14 includes the Future Movement (Sunni), Progressive Socialist Party (Druze), and Lebanese Forces and Qornet Shehwan Gathering (both Christian).

Suffrage: 21; compulsory for all males; authorized for women at 21 with elementary education.

Economy

GDP: (2006 est.) $21.5 billion.

GDP growth rate: (2006 est.) (-5%).

Per capita GDP: (2006 est.) $5,500.

Natural resources: limestone, iron ore, salt.

Agriculture: Products—citrus, grapes, tomatoes, apples, vegetables, potatoes, olives, tobacco; sheep, goats. Arable land—18%.

Industry: Types—banking, tourism, food processing, jewelry, cement, textiles, mineral and chemical products, wood and furniture products, oil refining, metal fabricating.

Trade: Exports—$1.88 billion (2005 est., f.o.b.) authentic jewelry, inor-

ganic chemicals, miscellaneous consumer goods, fruit, tobacco, construction minerals, electric power machinery and switchgear, textile fibers, paper. Major markets—Syria, U.A.E., Switzerland, Turkey, Saudi Arabia. Imports—$9.34 billion (2005 est., f.o.b.) petroleum products, cars, medicinal products, clothing, meat and live animals, consumer goods, paper, textile fabrics, tobacco. Major suppliers—Italy, Syria, France, Germany, China, U.S., U.K., Saudi Arabia.

PEOPLE

The population of Lebanon comprises various Christian and Muslim sects as well as Druze. No official census has been taken since 1932, reflecting the political sensitivity in Lebanon over confessional (religious) balance. While there is no consensus over the confessional breakdown of the population for this reason, it is safe to say that the Muslim sects as a whole make up a majority, and that Shi'ites, Sunnis, and Maronites are the three largest groups.

About 400,000 Palestinian refugees, some in Lebanon since 1948, are registered with the United Nations Relief and Works Agency (UNRWA). They are not accorded the legal rights enjoyed by the rest of the population.

With no official figures available, it is estimated that 600,000-900,000 persons fled the country during the initial years of civil war (1975-76). Although some returned, continuing conflict through 1990 as well as after the 2006 war sparked further waves of emigration, casting even more doubt on population figures. As much as 7% of the population was killed during the civil war between 1975 and 1990. Approximately 17,000-20,000 people are still "missing" or unaccounted for from the civil war period.

Many Lebanese still derive their living from agriculture. The urban population, concentrated mainly in Beirut and Mount Lebanon, is noted for its commercial enterprise. A century and a half of migration and return have produced Lebanese commercial networks around the globe—from North and South America to Europe, the Gulf, and Africa. Lebanon has a high proportion of skilled labor compared with many other Arab countries.

HISTORY

Lebanon is the historic home of the Phoenicians, Semitic traders whose maritime culture flourished there for more than 2,000 years (c.2700-450 B.C.). In later centuries, Lebanon's mountains were a refuge for Christians, and Crusaders established several strongholds there. Following the collapse of the Ottoman Empire after World War I, the League of Nations mandated the five provinces that comprise present-day Lebanon to France. Modern Lebanon's constitution, drawn up in 1926, specified a balance of political power among the various religious groups. The country gained independence in 1943, and French troops withdrew in 1946. Lebanon participated in the 1948 Arab-Israeli War and signed an armistice with Israel on March 23, 1949.

Lebanon's history since independence has been marked by periods of political turmoil interspersed with prosperity built on Beirut's position as a regional center for finance and trade. In 1958, during the last months of President Camille Chamoun's term, an insurrection broke out, and U.S. forces were briefly dispatched to Lebanon in response to an appeal by the government. During the 1960s, Lebanon enjoyed a period of relative calm and Beirut-focused tourism and banking sector-driven prosperity. Other areas of the country, however, notably the South, North, and Bekaa Valley, remained poor in comparison.

In the early 1970's, difficulties arose over the presence of Palestinian refugees, many of whom arrived after the 1967 Arab-Israeli war, the secret 1969 Cairo Agreement permitting the establishment of Palestinian camps in Lebanon, and 1970 "Black September" hostilities in Jordan. Among the 1970 arrivals were Yasser Arafat and the Palestinian Liberation Organization (PLO). Coupled with the Palestinian problem, Muslim and Christian differences grew more intense.

Beginning of the Civil War—1975-81

Full-scale civil war broke out in April 1975. After shots were fired at a church, gunmen in Christian East Beirut ambushed a busload of Palestinians. Palestinian forces joined predominantly leftist-Muslim factions as the fighting persisted, eventually spreading to most parts of the country and precipitating the Lebanese President's call for support from Syrian troops in June 1976. In fall of 1976, Arab summits in Riyadh and Cairo set out a plan to end the war. The resulting Arab Deterrent Force, which included Syrian troops already present, moved in to help separate the combatants. As an uneasy quiet settled over Beirut, security conditions in the south began to deteriorate.

After a PLO attack on a bus in northern Israel and Israeli retaliation that caused heavy casualties, Israel invaded Lebanon in March 1978, occupying most of the area south of the Litani River. In response, the UN Security Council passed Resolution 425 calling for the immediate withdrawal of Israeli forces and creating the UN Interim Force in Lebanon (UNIFIL), charged with maintaining peace. Israeli forces withdrew later in 1978, turning over positions inside Lebanon along the border to their Lebanese ally, the South Lebanon Army (SLA) under the leadership of Maj. Sa'ad Haddad, thus informally setting up a 12-mile wide "security zone" to protect Israeli territory from cross border attack.

U.S. Intervention—1982-84

An interim cease-fire brokered by the U.S. in 1981 among Syria, the PLO, and Israel was respected for almost a year. Several incidents, including PLO rocket attacks on northern Israel, as well as an assassination

attempt on the Israeli Ambassador to the United Kingdom, led to the June 6, 1982 Israeli ground attack into Lebanon to remove PLO forces. Operation "Peace for Galilee" aimed at establishing a deeper security zone and pushing Syrian troops out of Lebanon, with a view toward paving the way for an Israeli-Lebanese peace agreement. With these aims in mind, Israeli forces drove 25 miles into Lebanon, moving into East Beirut with the support of Maronite Christian leaders and militia.

In August 1982, U.S. mediation resulted in the evacuation of Syrian troops and PLO fighters from Beirut. The agreement also provided for the deployment of a multinational force composed of U.S. Marines along with French and Italian units. A new President, Bashir Gemayel, was elected with acknowledged Israeli backing. On September 14, however, he was assassinated. The next day, Israeli troops crossed into West Beirut to secure Muslim militia strongholds and stood aside as Lebanese Christian militias massacred almost 800 Palestinian civilians in the Sabra and Shatila refugee camps. Israel's then-Minister of Defense Ariel Sharon was held indirectly responsible for the massacre by the Kahane Commission and later resigned. With U.S. backing, Amin Gemayel, chosen by the Lebanese parliament to succeed his brother as President, focused anew on securing the withdrawal of Israeli and Syrian forces. The multinational force returned.

On May 17, 1983, Lebanon, Israel, and the United States signed an agreement on Israeli withdrawal that was conditioned on the departure of Syrian troops. Syria opposed the agreement and declined to discuss the withdrawal of its troops, effectively stalemating further progress. In August 1983, Israel withdrew from the Shuf (southeast of Beirut), thus removing the buffer between the Druze and the Christian militias and triggering another round of brutal fighting. By September, the Druze had gained control over most of the Shuf, and Israeli forces had pulled out from all but the southern security zone, where they remained until May 2000. The virtual collapse of the Lebanese Army in February 1984, following the defection of many Muslim and Druze units to militias, was a major blow to the government. With the U.S. Marines looking ready to withdraw, Syria and Muslim groups stepped up pressure on Gemayal. On March 5, 1984 the Lebanese Government canceled the May 17 agreement; the Marines departed a few weeks later.

This period of chaos witnessed the beginning of terrorist attacks launched against U.S. and Western interests. These included the April 18, 1983 suicide attack at the U.S. Embassy in West Beirut (63 dead), the bombing of the headquarters of U.S. and French forces on October 23, 1983 (298 dead), the assassination of American University of Beirut President Malcolm Kerr on January 18, 1984, and the bombing of the U.S. Embassy annex in East Beirut on September 20, 1984 (9 dead).

It also saw the rise of radicalism among a small number of Lebanese Muslim factions who believed that the successive Israeli and U.S. interventions in Lebanon were serving primarily Christian interests. It was

from these factions that Hezbollah emerged from a loose coalition of Shi'a groups. Hezbollah employed terrorist tactics and was supported by Syria and Iran.

Worsening Conflict and Political Crisis—1985-89

Between 1985 and 1989, factional conflict worsened as various efforts at national reconciliation failed. Heavy fighting took place in the "War of the Camps" in 1985 and 1986 as the Shi'a Muslim Amal militia sought to rout the Palestinians from Lebanese strongholds. The Amal movement had been organized in mid-1975, at the beginning of the civil war, to confront what were seen as Israeli plans to displace the Lebanese population with Palestinians. (Its charismatic founder Imam Musa Sadr disappeared in Libya three years later. Its current leader, Nabih Berri, is the Speaker of the National Assembly.) The combat returned to Beirut in 1987, with Palestinians, leftists, and Druze fighters allied against Amal, eventually drawing further Syrian intervention. Violent confrontation flared up again in Beirut in 1988 between Amal and Hezbollah.

Meanwhile, on the political front, Prime Minister Rashid Karami, head of a government of national unity set up after the failed peace efforts of 1984, was assassinated on June 1, 1987. President Gemayel's term of office expired in September 1988. Before stepping down, he appointed another Maronite Christian, Lebanese Armed Forces Commanding General Michel Aoun, as acting Prime Minister, contravening Lebanon's unwritten "National Pact," which required the prime minister to be Sunni Muslim. Muslim groups rejected the move and pledged support to Salim al-Hoss, a Sunni who had succeeded Karami. Lebanon was thus divided between a Christian government in East Beirut and a Muslim government in West Beirut, with no president.

In February 1989 Aoun attacked the rival Lebanese Forces militia. By March he turned his attention to other militias, launching what he termed a "War of Liberation" against the Syrians and their Lebanese militia allies. In the months that followed, Aoun rejected both the agreement that ultimately ended the civil war and the election of another Christian leader as president. A Lebanese-Syrian military operation in October 1990 forced him to take refuge in the French Embassy in Beirut and later to go into a 15-year exile in Paris. After Syrian troop withdrawal, Aoun returned to Lebanon on May 7, 2005 and won a seat in the 2005 parliamentary elections. His Free Patriotic Movement became a principal element of the pro-Syrian opposition bloc.

End of the Civil War—1989-91

The Ta'if Agreement of 1989 marked the beginning of the end of the war. In January of that year, a committee appointed by the Arab League, chaired by Kuwait and including Saudi Arabia, Algeria, and Morocco, had begun to formulate solutions to the conflict, leading to a meeting of Lebanese parliamentarians in Ta'if, Saudi Arabia, where they agreed to the national reconciliation accord in October. Returning to Lebanon, they ratified the agreement on November 4 and elected Rene Moawad as President the following day. Moawad was assassinated in a car bombing in Beirut on November 22 as his motorcade returned from Lebanese Independence Day ceremonies. Elias Hrawi, who remained in office until 1998, succeeded him.

In August 1990, parliament and the new President agreed on constitutional amendments embodying some of the political reforms envisioned at Ta'if. The National Assembly expanded to 128 seats and was divided equally between Christians and Muslims (with Druze counted as Muslims). In March 1991, parliament passed an amnesty law that pardoned all political crimes prior to its enactment. The amnesty was not extended to crimes perpetrated against foreign diplomats or certain crimes referred by the cabinet to the Higher Judicial Council. In May 1991, the militias (with the important exception of Hezbollah and Palestinian militias) were dissolved, and the Lebanese Armed Forces began to slowly rebuild itself as Lebanon's only major nonsectarian institution.

In all, it is estimated that more than 100,000 were killed, and another 100,000 left handicapped, during Lebanon's 16-year civil war. Up to one-fifth of the pre-war resident population, or about 900,000 people, were displaced from their homes, of which perhaps a quarter of a million emigrated permanently. The last of the Western hostages taken during the mid-1980s were released in May 1992.

Postwar Reconstruction—1992 to 2005

Postwar social and political instability, fueled by economic uncertainty and the collapse of the Lebanese currency, led to the resignation of Prime Minister Omar Karami in May 1992, after less than 2 years in office. Former Prime Minister Rashid al Sulh, who was widely viewed as a caretaker to oversee Lebanon's first parliamentary elections in 20 years, replaced him.

By early November 1992, a new parliament had been elected, and Prime Minister Rafiq Hariri had formed a cabinet, retaining for himself the finance portfolio. The formation of a government headed by a successful billionaire businessman was widely seen as a sign that Lebanon would make a priority of rebuilding the country and reviving the economy. Solidere, a private real estate company set up to rebuild downtown Beirut, was a symbol of Hariri's strategy to link economic recovery to private sector investment. After the election of then-commander of the Lebanese Armed Forces Emile Lahoud in 1998, following Hrawi's extended term as President, Salim al-Hoss again served as Prime Minister. Hariri returned to office as Prime Minister in November 2000. Although problems with basic infrastructure and government services persist, and Lebanon is now highly

indebted, much of the civil war damage was repaired throughout the country, and many foreign investors and tourists returned.

In early April 1996, Israel conducted a military operation dubbed "Grapes of Wrath" in response to Hezbollah's continued launching of rockets at villages in northern Israel. The 16-day operation caused hundreds of thousands of civilians in south Lebanon to flee their homes. On April 18, Hezbollah fired mortars at an Israeli military unit from a position near the UN compound at Qana, and the Israeli Army responded with artillery fire. Several Israeli shells struck the compound, killing 102 civilians sheltered there. In the "April Understanding" concluded on April 26, Israel and Hezbollah committed themselves to avoid targeting civilians and using populated areas to launch attacks. The Israel-Lebanon Monitoring Group (ILMG), co-chaired by France and the United States, with Syria, Lebanon, and Israel all represented, was set up to implement the Understanding and assess reports of violations. ILMG ceased operations following the May 2000 Israeli withdrawal from south Lebanon.

On May 23, 2000, the Israeli military carried out a total withdrawal of Israeli troops from the south and the Bekaa Valley, effectively ending 22 years of occupation. The SLA collapsed and about 6,000 SLA members and their families fled the country, although more than 3,000 had returned by November 2003. The military court tried all of the SLA operatives who remained in the country and the average sentence handed down was 1-year imprisonment.

On June 16, 2000, the UN Security Council adopted the report of the Secretary General verifying Israeli compliance with UN Security Council Resolution 425 (1978) and the withdrawal of Israeli troops to their side of the demarcated Lebanese-Israeli line of separation (the "Blue Line") mapped out by UN cartographers. (The international border between Lebanon and Israel is still to be determined in the framework of a peace agreement.) In August 2000, the Government of Lebanon deployed over 1,000 police and soldiers to the former security zone, but Hezbollah also maintained observation posts and conducted patrols along the Blue Line. While Lebanon and Syria initially agreed to respect the Blue Line, both since have registered objections and continue to argue that Israel has not fully withdrawn from Lebanese soil. As regional tension escalated with the Palestinian intifada in September 2000, Hezbollah cited Blue Line discrepancies when it reengaged Israel on October 7, taking three Israeli soldiers captive in an area known as Sheba'a Farms. (In 2001, the Israeli Government declared the three soldiers were believed to be dead.) Sheba'a Farms, a largely unpopulated area just south of the Blue Line opposite the Lebanese town of Sheba'a, was captured by Israel when it occupied Syria's Golan Heights in 1967. The Lebanese Government has repeatedly laid claim to the area since shortly before Israel's general withdrawal. Meanwhile, the Syrian Government has verbally stated that the Sheba'a Farms tract is Lebanese, but, as with the rest of the Lebanon-Syria border, has been unwilling to commit to a formal border demarcation in the area. As a result of secret mediation by the German Government, Israel released a number of Lebanese prisoners held by Israel in early 2004 in exchange for Elhanan Tannenbaum, an Israeli reservist abducted by Hezbollah in late 2000.

In January 2000 the government took action against Sunni Muslim extremists in the north who had attacked its soldiers, and it continues to act against groups such as Asbat al-Ansar, which has been linked to Osama bin Laden's al-Qaida network, and other extremists. On January 24, 2002, Elie Hobeika, a former Lebanese Forces figure associated with the Sabra and Shatila massacres and who later served in three cabinets and the parliament, was assassinated in a car bombing in Beirut.

A September 2004 vote by the Chamber of Deputies to amend the constitution to extend President Lahoud's term in office by 3 years amplified the question of Lebanese sovereignty and the continuing Syrian presence. The vote was clearly taken under Syrian pressure, exercised in part through Syria's military intelligence service, whose chief in Lebanon had acted as a virtual proconsul for many years. Syria, which views Lebanon as part of its own territory, has not signed a boundary agreement with Lebanon and does not have normal diplomatic relations with Lebanon. The UN Security Council expressed its concern over the situation by passing Resolution 1559, also in September 2004, which called for withdrawal of all remaining foreign forces from Lebanon, disbanding and disarmament of all Lebanese and non-Lebanese militias, the deployment of the Lebanese Armed Forces throughout the country, and a free and fair electoral process in the presidential election.

Syrian Withdrawal—2005

Former Prime Minister Rafiq Hariri, who had resisted Syria's effort to secure Lahoud's extension, and 19 others were assassinated in Beirut by a car bomb on February 14, 2005. The assassination spurred massive protests in Beirut and international pressure that led to the withdrawal of the remaining Syrian military troops from Lebanon on April 26. In the months that followed Hariri's assassination, journalist Samir Qassir, Lebanese politician George Hawi, and journalist Gebran Tueni were murdered by car bombs, and Defense Minister Elias Murr and journalist May Chidiac narrowly avoided a similar fate when they were targeted with car bombs. The UN International Independent Investigative Commission (UNIIIC) headed by Detlev Mehlis began an investigation of Hariri's assassination and related crimes, beginning with the October 2004 attempt to assassinate Communications Minister Marwan Hamadeh. Serge Brammertz took over the investigation at the beginning of 2006. In December 2006, the Lebanese Cabinet approved an agreement with the UN Security Council to create a Special Tribunal of international character which will be responsible for trying those who may

be indicted as a result of the investigation. President Lahoud, Parliament Speaker Berri, and the Shia ministers who resigned from Lebanon's cabinet in November 2006 do not recognize the cabinet's decision on this matter, however.

Parliamentary elections were held May 29-June 19, 2005 and the anti-Syrian opposition led by Sa'ad Hariri, Rafiq Hariri's son, won a majority of 72 seats (out of 128). Hariri ally and former Finance Minister Fouad Siniora was named Prime Minister and Nabih Berri was reelected as Speaker of Parliament. Parliament approved the first "made-in-Lebanon" cabinet in almost 30 years on July 30. The ministerial statement of the new cabinet (which included two Hezbollah ministers), a summary of the new government's agenda and priorities, focused on political and economic reform, but also endorsed Hezbollah's right to possess military weapons to carry out a "national resistance" against the perceived Israeli occupation of Lebanese territory.

Hezbollah forces continued to launch sporadic military strikes on Israeli forces, drawing responses that produced casualties on both sides and, on two occasions in 2001, Israeli air strikes on Syrian radar sites in Lebanon. Israel continues to violate Lebanese sovereignty by conducting overflights of Lebanese territory north of the Blue Line. UNIFIL has recorded numerous violations of the Blue Line by both sides since the Israeli withdrawal. In general, however, the level of violence along the Israeli-Lebanon front decreased dramatically from May 2000 until mid-2006.

War with Israel—2006

On July 12, 2006, Hezbollah guerillas crossed into Israel, killed three Israeli soldiers, and kidnapped two others, precipitating a war with Israel. Israeli air strikes hit Hezbollah positions in the south and strategic targets throughout Lebanon, and Israeli ground forces ground forces moved against Hezbollah in southern Lebanon. Hezbollah resisted the ground attack and fired thousands of rockets at civilian targets in Israel. By the time the war ended, on Aug. 14, an estimated 1200 Lebanese civilians and hundreds of Hezbollah fighters had died, along with 119 Israeli military and 43 Israeli civilians. UN Security Council Resolution 1701, which ended the war, provided for a ceasefire, Israeli withdrawal and lifting of blockades, disarming of Hezbollah and other militias, and a ban on unauthorized weapons transfers into Lebanon. UNSCR 1701 also significantly strengthened UNIFIL's mandate and authorized its enlargement from about 2,000 initially up to a maximum of 15,000. Bolstered by UNIFIL, which by the beginning of 2007 had more than 11,000 personnel, the Lebanese Armed Forces deployed to southern Lebanon and the border with Israel for the first time in almost four decades. The war temporarily or permanently displaced roughly one-fourth of Lebanon's population, and caused enormous damage to homes, businesses, and infrastructure. The country, which was already seriously indebted, suffered roughly $5 billion in damages and financial losses. The international community provided massive humanitarian relief, plus substantial aid for economic reconstruction and reform, with $940 million in aid pledged at an August 31, 2006 donors conference in Stockholm and $7.6 billion in pledges announced at a Paris conference January 25, 2007. Aid pledged in Paris was to be coordinated with the Lebanese Government's program for fiscal and economic reform.

Although Syria withdrew its military forces from Lebanon, intelligence assets remained, and Syria continues to have a strong influence in Lebanese politics. In November 2006, as Siniora's cabinet neared approval of the Hariri tribunal, pro-Syrian ministers, including all the Shi'ite ministers, withdrew from the cabinet. Led by Hezbollah, pro-Syrian forces began months of massive demonstrations, sit-ins, and occasional violence with the aim of either paralyzing or bringing down the cabinet. Minister of Industry Pierre Gemayel, son of ex-president Amin Gemayel, was assassinated November 21.

GOVERNMENT

Lebanon is a parliamentary democracy in which the people constitutionally have the right to change their government. However, from the mid-1970s until the parliamentary elections in 1992, civil war precluded the effective exercise of political rights. According to the constitution, direct elections must be held for the parliament every 4 years. Parliament, in turn, is tasked to elect a new president every 6 years. A presidential election scheduled for the autumn of 2004 was pre-empted by a parliamentary vote to extend the sitting President's term in office by 3 years. The president and parliament choose the prime minister. Political parties may be formed. However, the political parties that do exist are weak and mostly based on sectarian interests.

Since the emergence of the post-1943 state, national policy has been determined largely by a relatively restricted group of traditional regional and sectarian leaders. The 1943 national pact, an unwritten agreement that established the political foundations of modern Lebanon, allocated political power on an essentially confessional system based on the 1932 census. Until 1990, seats in parliament were divided on a 6-to-5 ratio of Christians to Muslims (with Druze counted as Muslims). With the Ta'if Agreement, the ratio changed to half and half. Positions in the government bureaucracy are allocated on a similar basis. Indeed, gaining political office is virtually impossible without the firm backing of a particular religious or confessional group. The pact also allocated public offices along religious lines, with the top three positions in the ruling "troika" distributed as follows:

- The presidency is reserved for a Maronite Christian;
- The prime minister, a Sunni Muslim; and
- The speaker of parliament, a Shi'a Muslim.

Efforts to alter or abolish the confessional system of allocating power have been at the center of Lebanese politics for decades. Those religious groups most favored by the 1943 formula sought to preserve it, while those who saw themselves at a disadvantage sought either to revise it after updating key demographic data or to abolish it entirely. Nonetheless, many of the provisions of the national pact were codified in the 1989 Ta'if Agreement, perpetuating sectarianism as a key element of Lebanese political life.

Although moderated somewhat under Ta'if, constitutionally, the president has a strong and influential position. The president has the authority to promulgate laws passed by the Chamber of Deputies, to issue supplementary regulations to ensure the execution of laws, and to negotiate and ratify treaties. The Chamber of Deputies is elected by adult suffrage (majority age is 21) based on a system of proportional representation for the various confessional groups. Political blocs are usually based on confessional and local interests or on personal/family allegiance rather than on left/right policy orientations. The parliament traditionally has played a significant role in financial affairs, since it has the responsibility for levying taxes and passing the budget. It also exercises political control over the cabinet through formal questioning of ministers on policy issues and by requesting a confidence debate. Lebanon's judicial system is based on the Napoleonic Code. Juries are not used in trials. The Lebanese court system has three levels—courts of first instance, courts of appeal, and the court of cassation. There also is a system of religious courts having jurisdiction over personal status matters within particular religious communities, e.g., rules on such matters as marriage, divorce, and inheritance.

Last Updated: 11/12/08

Pres.: **Michel SULAYMAN**
Prime Min.: **Fuad SINIORA**
Dep. Prime Min.: **Issam ABU JAMRA**
Min. of Agriculture: **Elie SKAFF**
Min. of Culture: **Tammam SALAM**
Min. of Defense: **Elias MURR**
Min. of Displaced People: **Raymond AUDI**
Min. of Economy & Trade: **Muhammad SAFADI**
Min. of Education: **Bahia HARIRI**
Min. of Energy & Water: **Alain TABOURIAN**
Min. of Environment: **Antoine KARAM**
Min. of Finance: **Mohammed CHATTAH**
Min. of Foreign Affairs & Emigrants: **Fawzi SALLOUKH**
Min. of Health: **Muhammad Jawad KHALIFA**
Min. of Industry: **Ghazi ZOAYTER**
Min. of Information: **Tarek MITRI**
Min. of Interior: **Ziad BAROUD**
Min. of Justice: **Ibrahim NAJJAR**
Min. of Labor: **Muhammed FNEISH**
Min. of Social Affairs: **Mario AWN**
Min. of Telecommunications: **Gibran BASSIL**
Min. of Tourism: **Elie MAROUNI**
Min. of Transport & Public Works: **Ghazi ARIDI**
Min. of Youth & Sports: **Talal ARSLAN**
Min. of State for Administrative Reform: **Ibrahim SHAMSEDDINE**
Min. of State Without Portfolio: **Wael ABU FAOUR**
Min. of State Without Portfolio: **Nassib LAHOUD**
Min. of State Without Portfolio: **Jean OGASSAPIAN**
Min. of State Without Portfolio: **Khalid QABBANI**
Min. of State Without Portfolio: **Ali QANSO**
Min. of State Without Portfolio: **Youssef TAQLA**
Governor, Central Bank: **Riad SALAMEH**
Ambassador to the US: **Antoine CHEDID**
Permanent Representative to the UN, New York: **Nawaf SALAM**

Lebanon maintains an embassy in the United States at 2560 28th Street, NW, Washington, D.C. 20008, tel. (202) 939-6300. There also are three consulates general in the United States: 1959 East Jefferson, Suite 4A, Detroit, MI 48207, tel. (313) 567-0233/0234; 7060 Hollywood Blvd., Suite 510, Los Angeles, CA 90028, tel. (213) 467-1253/1254; and 9 East 76th Street, New York, N.Y. l0021, tel. (212) 744-7905/7906 and 744-7985.

POLITICAL CONDITIONS

Lebanese political institutions often play a secondary role to highly confessionalized personality-based politics. Powerful families also still play an independent role in mobilizing votes for both local and parliamentary elections. Nonetheless, a lively panoply of domestic political parties, some even predating independence, still exists. The largest are all confessional based. The Kataeb (Phalange), National Bloc, National Liberal Party, Lebanese Forces and Free Patriotic Movement (FPM) are overwhelmingly Christian parties. Amal and Hizballah are the main rivals for the organized Shi'a vote, and the PSP (Progressive Socialist Party) is the leading Druze party. In the 2005 parliamentary elections, an anti-Syrian opposition coalition ("March 14") emerged, led by Sa'ad Hariri's predominantly Sunni Future Movement and allied with Druze leader Jumblatt, the Qornet Shehwan coalition of center-right Christian politicians, Samir Geagea's mostly Maronite Lebanese Forces, and Elias Attallah's Democratic Left secular movement. In addition to domestic parties, there are branches of pan-Arab secular parties (Ba'ath, socialist and communist parties) that were active in the 1960s and throughout the period of civil war.

There are differences both between and among Muslim and Christian parties regarding the role of religion in state affairs. There is a very high degree of political activism among religious leaders across the sectarian spectrum. The interplay for position and power among the religious, political, and party leaders and groups produces a political tapestry of extraordinary complexity.

In the past, the system worked to produce a viable democracy. The civil war resulted in greater segregation across the confessional spectrum. Whether in political parties, places of residence, schools, media outlets, even workplaces, there is a lack of regular interaction across sectarian

lines to facilitate the exchange of views and promote understanding. Some Christians favor political and administrative decentralization of the government, with separate Muslim and Christian sectors operating within the framework of a confederation. Muslims, for the most part, prefer a unified, central government with an enhanced share of power commensurate with their larger share of the population. The trajectory of the Ta'if Agreement points towards a non-confessional system, but there has been no real movement in this direction in the decade and a half since Ta'if.

Palestinian refugees, predominantly Sunni Muslims, who numbered 405,525 in 2006 according to UNWRA, are not active on the domestic political scene. Nonetheless, they constitute an important minority whose naturalization/settlement in Lebanon is vigorously opposed by most Lebanese, who see them as a threat to Lebanon's delicate confessional balance. During 2002, parliament enacted legislation banning Palestinians from owning property in Lebanon. The Labor Ministry opened up professions previously closed to Palestinians in June 2005. The number of Iraqi refugees is approximately 50,000 and is believed to have stabilized as of 2008.

ECONOMY

Lebanon has a free-market economy and a strong laissez-faire commercial tradition. The Lebanese economy is service-oriented; main growth sectors include banking and tourism. According to the Lebanese Ministry of Economy and Trade, Lebanon posted 5% real growth in 2004, with inflation running at 3%. There are no restrictions on foreign exchange or capital movement, and bank secrecy is strictly enforced. Lebanon has adopted a law to combat money laundering. There are practically no restrictions on foreign investment; however, the investment climate suffers from red tape, corruption, arbitrary licensing decisions, high taxes, tariffs, and fees, archaic legislation, and a lack of adequate protection of intellectual property. There are no country-specific U.S. trade sanctions against Lebanon. Lebanon embarked on a massive reconstruction program in 1992 to rebuild the country's physical and social infrastructure devastated by both the long civil war (1975-90) and the Israeli occupation of the south (1978-2000). In addition, the delicate social balance and the near-dissolution of central government institutions during the civil war handicapped the state as it sought to capture revenues to fund the recovery effort. Monetary stabilization coupled with high interest rate policies aggravated the debt service burden, leading to a substantial rise in budget deficits. Thus, the government accumulated significant debt, which by 2005 had reached $36 billion, or 185% of GDP. Unemployment is estimated at 18% officially, but in the absence of reliable statistics, some estimate it could be as high as 20-25%.

The government also has maintained a firm commitment to the Lebanese pound, which has been pegged to the dollar since September 1999. The government passed an Investment Development Law as well as laws for the privatization of the telecom and the electricity sector, signed the Euro-Med Partnership Agreement with the European Union (EU) in March 2003, and is working toward accession to the World Trade Organization (WTO). In order to increase revenues, the government introduced a 10% value added tax (VAT) that became applicable in February 2002 and a 5% tax that became applicable in February 2003.

Plagued by mounting indebtedness, Lebanon submitted a comprehensive program on its financing needs at the Paris II donors conference in November 2002 and succeeded in attracting pledges totaling $4.4 billion, including $3.1 billion to support fiscal adjustment and $1.2 billion to support economic development projects. Despite the substantial aid it had received, the government made little progress on its reform program, and by 2006, even before the war, the debt problem had grown worse. After the war, $940 million in relief and early reconstruction aid was pledged to Lebanon August 31, 2006 at a donors conference in Stockholm, and an additional $7.6 billion in assistance for reconstruction and economic stabilization was pledged January 25, 2007 at the International Conference for Support to Lebanon, "Paris III". Unlike the Paris II aid, much of the Paris III aid was to be contingent on Lebanon's meeting agreed benchmarks in implementing its proposed five-year economic and social reform program. The International Monetary Fund (IMF) agreed to initiate a Post-Conflict Program and to assign a team to Lebanon to provide technical assistance, to monitor the progress of reforms, and to advise donors on the timing of aid delivery.

The U.S. enjoys a strong exporter position with Lebanon, generally ranking as Lebanon's fifth-largest source of imported goods. More than 160 offices representing U.S. businesses currently operate in Lebanon. Since the lifting of the passport restriction in 1997 (see below), a number of large U.S. companies have opened branch or regional offices, including Microsoft, American Airlines, Coca-Cola, FedEx, UPS, General Electric, Parsons Brinkerhoff, Cisco, Eli Lilly, and Pepsi Cola.

FOREIGN RELATIONS

The foreign policy of Lebanon reflects its geographic location, the composition of its population, and its reliance on commerce and trade. Lebanon's foreign policy has been heavily influenced by neighboring Syria, which has also long influenced Lebanon's internal policies as well. Reflecting lingering feelings in Syria that Lebanon was unjustly separated from Syria by European powers, Syria and Lebanon have never formally agreed on their mutual boundaries, and, rather than having normal diplomatic relations, the two countries are linked by a Higher Council for Bilateral Relations. Syria has no embassy or equivalent office in Beirut, while Lebanon has an "Interest Office" in Damascus. The framework for relations was first codified in May 1991,

when Lebanon and Syria signed a treaty of mutual cooperation. This treaty came out of the Ta'if Agreement, which stipulated "Lebanon is linked to Syria by distinctive ties deriving strength from kinship, history, and common interests." The Lebanese-Syria treaty calls for "coordination and cooperation between the two countries" that would serve the "interests of the two countries within the framework of sovereignty and independence of each." Numerous agreements on political, economic, security, and judicial affairs have followed over the years. Syria maintained troops in Lebanon from 1976 until 2005; however, even after the withdrawal of Syria's military troops, it is believed to have maintained intelligence assets in Lebanon. In any case, Syrian influence in Lebanese politics remains strong.

Lebanon, like most Arab states, does not recognize Israel, with which it has been technically at war since Israel's establishment. Lebanon participated in the 1948 Arab-Israeli War, and despite the 1948 Lebanon-Israel armistice, Lebanon's lack of control over the border region resulted in repeated border hostilities, initiated mainly by Palestinian exile groups from 1968 to 1982 and later by Hizballah. These attacks led to Israeli counterattacks, including a 1978 invasion, a 1982 invasion and occupation which ended in 2000, and the 2006 war. Lebanon did not participate in the 1967 or 1973 Arab-Israeli wars, nor in the 1991 Gulf War. The success of the latter created new opportunities for Middle East peacemaking. In October 1991, under the sponsorship of the United States and the then-Soviet Union, Middle East peace talks were held in Madrid, Spain, where Israel and a majority of its Arab neighbors conducted direct bilateral negotiations to seek a just, lasting, and comprehensive peace based on UN Security Council Resolutions 242 and 338 (and 425 on Lebanon) and the concept of "land for peace." Lebanon, Jordan, Syria, and representatives of the Palestinians continued negotiating until the Oslo interim peace accords were concluded between Israel and the Palestinians in September 1993 and Jordan and Israel signed an agreement in October 1994. In March 1996, Syria and Israel held another round of Madrid talks; the Lebanon track did not convene. Lebanon has repeatedly called for a solution of the Israeli-Palestinian problem as a prerequisite to peace with Israel.

Lebanon concluded negotiations on an association agreement with the European Union in late 2001, and both sides initialed the accord in January 2002. Lebanon also has bilateral trade agreements with several Arab states and is working toward accession to the World Trade Organization. Aside from Syria, Lebanon enjoys good relations with virtually all of the other Arab countries (despite historic tensions with Libya, the Palestinians, and Iraq), and hosted an Arab League Summit in March 2002 for the first time in more than 35 years. Lebanon also is a member of the Organization of Islamic Conference and maintains a close relationship with Iran, largely centered on Shi'a Muslim links. Lebanon is a member of the Francophone countries and hosted the Francophone Summit in October 2002.

U.S.-LEBANESE RELATIONS

The United States seeks to maintain its traditionally close ties with Lebanon, and to help preserve its independence, sovereignty, national unity, and territorial integrity. The United States, along with the international community, supports full implementation of UN Security Council Resolution 1559, including the disarming of all militias and the deployment of the Lebanese Armed Forces throughout Lebanon. The United States believes that a peaceful, prosperous, and stable Lebanon can make an important contribution to comprehensive peace in the Middle East.

One measure of U.S. concern and involvement has been a program of relief, rehabilitation, and recovery that from 1975 through 2005 totaled more than $400 million in aid to Lebanon. For relief, recovery, rebuilding, and security in the wake of the 2006 war, the U.S. Government substantially stepped up this program, pledging well over $1 billion in additional assistance for the 2006 and 2007 fiscal years. This support reflects not only humanitarian concerns and historical ties but also the importance the United States attaches to sustainable development and the restoration of an independent, sovereign, unified Lebanon. Some of current funding is used to support the activities of U.S. and Lebanese private voluntary organizations engaged in rural and municipal development programs nationwide, improve the economic climate for global trade and investment, and enhance security and resettlement in south Lebanon. The U.S. also supports humanitarian demining and victims' assistance programs.

Over the years, the United States also has assisted the American University of Beirut (AUB) and the Lebanese American University (LAU) with budget support and student scholarships. Assistance also has been provided to the Lebanese-American Community School (ACS) and the International College (IC).

1993, the U.S. resumed the International Military Education and Training program in Lebanon to help bolster the Lebanese Armed Forces (LAF)—the country's only nonsectarian national institution—and reinforce the importance of civilian control of the military. Sales of excess defense articles (EDA) resumed in 1991 and have allowed the LAF to enhance both its transportation and communications capabilities, which were severely degraded during the civil war. Security assistance to both the LAF and the Internal Security Forces (ISF) increased significantly after the 2006 war, in order to support the democratically elected Government of Lebanon as it carries out the requirements of UNSCR 1701 and asserts its sovereignty over the whole of Lebanese territory.

TRAVEL

Consular Information Sheet

December 27, 2007

Country Description: The Republic of Lebanon is a parliamentary republic. Political power is concentrated in the office of the President, Prime Minister and Speaker of Parliament, each representing one of Lebanon's three largest religious sects (Maronite Christians, Sunni and Shi'a Muslims). Since 1973, Lebanon has been in a state of war with Israel.

Entry Requirements: Passports and visas are required. American citizens coming to Lebanon for tourism can purchase a short-term visa at the border. Travelers holding passports that contain visas or entry/exit stamps for Israel will likely be refused entry into Lebanon. Travelers whose passports contain Israeli stamps or visas and who also hold an "Arab nationality" may be subject to arrest and imprisonment. Travelers who have overstayed their entry visa validity in Lebanon have to adjust their status with the Central Department of Surete General (Department of Passport and Immigration) prior to their departure.

Further information on entry/exit requirements can be obtained from the Embassy of Lebanon, 2560 28th Street NW, Washington, DC 20008, tel. (202) 939-6300. Travelers may also contact one of the following Lebanese Consulates General:

1959 E. Jefferson, Suite 4A
Detroit, MI 48207
(313) 567-0233

2400 Augusta, Suite 308
Houston, TX 77057
(713) 268-1640

7060 Hollywood Blvd., Suite 510
Los Angeles, CA 90028
(323) 467-1253

6600 S.W. 57th Avenue, Suite 200
Miami, FL 33143
(305) 665-3004

(Honorary Consul, for Florida residents only)
9 E. 76th Street
New York, NY 10021
(212) 744-7905

Safety and Security: A Department of State Travel Warning advises U.S. citizens against travel to Lebanon. Recent events underscore the need for caution and sound personal security precautions. U.S. citizens who are in Lebanon despite this Travel Warning should exercise particular caution when traveling in parts of the southern suburbs of Beirut, portions of the Bekaa Valley and areas south of the Litani River in South Lebanon. Hizballah maintains a strong presence in many of these areas, and there is the potential for action by other extremist groups. The situation remains tense and a resumption of sporadic violence remains a possibility. On May 7, 2008, Hizballah militants blocked the road to Rafiq Hariri International Airport. The action rendered the airport inaccessible and travelers were unable to enter or leave the country via commercial air carriers. Armed Hizballah and other opposition members proceeded to enter areas of Lebanon not traditionally under their control resulting in heavy fighting and a number of casualties. While there is now full access to the airport, widespread hostilities have subsided, and the government of Lebanon has successfully elected a president and formed a cabinet, the United States remains concerned about Hizballah's willingness to use violence to achieve political ends with little or no warning. Since the May hostilities there have been violent outbreaks in Tripoli that left over ten dead and dozens wounded.

Americans have been the targets of numerous terrorist attacks in Lebanon in the past. The perpetrators of many of these attacks are still present and retain the ability to act. On January 15, 2008, a U.S. Embassy vehicle was involved in a bomb attack that killed three Lebanese bystanders. American citizens should thus keep a low profile, varying times and routes for all required travel. Americans should also pay close attention to their personal security at locations where Westerners are generally known to congregate, and should avoid demonstrations and large gatherings. Unofficial travel to Lebanon by U.S. Government employees and their family members requires prior approval by the Department of State.

Palestinian groups hostile to both the Lebanese government and the U.S. operate largely autonomously inside refugee camps in different areas of the country. Intra-communal violence within the camps has resulted in violent incidents such as shootings and explosions.

Travel by U.S. citizens to Palestinian camps should be avoided. Asbat al-Ansar, a terrorist group with apparent links to Al-Qaida, has targeted Lebanese, U.S. and other foreign government interests. It has been out-

lawed by the Lebanese government but continues to maintain a presence in Ain al-Hilweh refugee camp.

Americans traveling to Lebanon should also be aware that personnel from the U.S. Embassy are not able to travel in all areas of Lebanon. In the case of an emergency involving a U.S. citizen in areas where it is unsafe for Embassy personnel to travel, the Embassy may not be able to render assistance.

In addition, dangers posed by landmines and unexploded ordnance throughout south Lebanon are significant and also exist in other areas where civil war fighting was intense.

For the latest security information, Americans traveling abroad should regularly monitor the Department's web site, where the current Worldwide Caution Travel Alert, Middle East and North Africa Travel Alert, Travel Warnings and other Travel Alerts can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S. and Canada or, for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: The crime rate in Lebanon is moderate, but both car theft and home break-ins occur. Violent crime and sexual assault are rare, although petty theft—such as pick pocketing and purse snatching—is common in crowded public areas. Police are responsive but often unable to effect a positive outcome.

There are no special concerns with regard to targeted victimization of Americans or to scams or confidence schemes. There have, however, been recent kidnappings of Lebanese-American women by their Lebanese relatives in an effort to force these women into marriage.

In many countries around the world, counterfeit and pirated goods are widely available. Transactions involving such products may be illegal under local law. In addition, bringing them back to the United States may result in forfeitures and/or fines. More information on this serious problem is available at http://www.cybercrime.gov/18usc2320.htm.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, to contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.The local equivalent to the "911" emergency line in Lebanon is 112.

Medical Facilities and Health Information: In Beirut and the surrounding areas, modern medical care and medicines are widely available. Such facilities are not always available in outlying areas, although no location in the country is more than three hours from the capital. Doctors and hospitals often expect immediate cash payment for services and without such payment, may deny service even in emergency cases. A list of doctors who speak English and a list of hospitals are available from the U.S. Embassy and at the Embassy's web site: http://lebanon.usembassy.gov.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747); fax 1-888-CDC-FAXX (1-888-232-3299), or via the CDC's Internet site at http://wwwn.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith.

The U.S. Department of State is unaware of any HIV/AIDS entry restrictions for visitors to or foreign residents of Lebanon.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Lebanon is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

Drivers in Lebanon often maneuver aggressively and pay little regard to traffic lights and stop signs. Lanes are generally unmarked and roads outside of the capital may be poorly lit. Pedestrians, especially, should exercise great caution. Inter-city directional signs are improving throughout the country, but side roads are often not signposted at all. Public transportation is generally safe.

Emergency services in Lebanon are adequate. In case of a road accident, emergency numbers are "140" for the Red Cross and "125" for the emergency civil police.

Visit the web site of Lebanon's national tourist office at http://www.Lebanon-tourism.gov.lb.

Aviation Safety Oversight: As there is no direct commercial air service to the United States by carriers registered in Lebanon, the U.S. Federal Aviation Administration (FAA) has not assessed Lebanon's Civil Aviation Authority for compliance with International Civil Aviation Organization (ICAO) aviation safety standards. For more information, travelers may visit the FAA's web site at http://www.faa.gov/safety/programs_initiatives/oversight/iasa.

Special Circumstances: In addition to being subject to general Lebanese law, U.S. citizens who also possess Lebanese nationality may be subject to other laws that impose special obligations on them as Lebanese citizens. Lebanese citizens who are discovered to have associated with or traveled through Israel, for example, are subject to arrest and detention.

Military Service: Mandatory military service in Lebanon was abolished on February 4, 2007. However, travelers with questions about prior military service, desertion, or failure to register in the past should contact the Military Office of the Embassy of Lebanon, 2560 28th Street NW, Washington, DC 20008, call (202) 265-2335 or fax (202) 667-0063 for details prior to traveling to Lebanon. Information about military service can also be found at the Lebanese government web site: www.lebarmy.gov.lb. Lebanese Customs authorities may enforce strict regulations concerning import and export of such items as firearms or antiquities. It is advisable to contact the Embassy of Lebanon in Washington, D.C., or one of Lebanon's consulates in the United States for specific information regarding customs requirements.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating Lebanese laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Lebanon are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in Lebanon are encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration web site, and to obtain updated information on travel and security within Lebanon. Americans without Internet access may register directly with the U.S. Embassy in Beirut. By registering, American citizens make it easier for the Embassy to contact them in case of emergency. The U.S. Embassy is located in Awkar, near Antelias, Beirut, Lebanon. Public access hours for American citizens are Monday, Tuesday, and Thursday, 8:00 a.m. to 11:00 am for regular consular services. Consular Report of Birth Abroad are handled Wednesdays only from 8:00 a.m. to 11:00 a.m. The telephone numbers are (961-4) 542-600, 543-600, and fax 544-209, and American citizens who require emergency services outside of these hours may contact the Embassy by telephone at any time. American citizens registering at the embassy can receive updated information and warden messages via e-mail by subscribing to join-wardenmessagebeirut@mh.databack.com. Information on consular services and registration can be found at http://lebanon.usembassy.gov or by phone at the above telephone numbers between 2:00 p.m. and 4:00 p.m. Monday through Friday local time.

Travel Warning

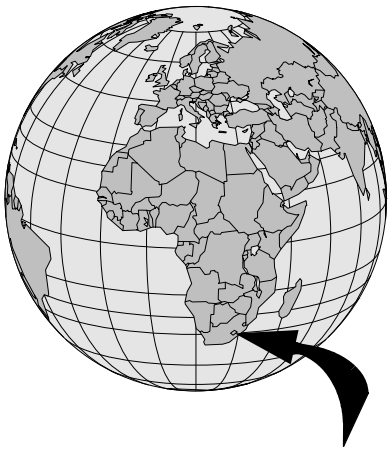
September 10, 2008

This Travel Warning updates information on security threats and ongoing political violence in Lebanon and informs U.S. citizens of current safety and security concerns. The Department of State continues to urge that Americans avoid all travel to Lebanon. Americans who live and work in Lebanon presently should understand that they are accepting risks in remaining and should carefully consider those risks, especially those in Tripoli. This supersedes the Travel Warning for Lebanon issued on May 30, 2008. Recent clashes in the northern city of Tripoli have resulted in more than twenty deaths and numerous injuries. Additionally, a bomb exploded next to a city bus in Tripoli on August 13, 2008 and killed fourteen people. The U.S. Embassy advises U.S. citizens against all travel to Lebanon, and recommends that U.S. citizens presently in Lebanon consider the risks of remaining, particularly in Tripoli in light of recent incidents there.

On May 7, 2008, Hizballah militants blocked the road to Rafiq Hariri International Airport. The action rendered the airport inaccessible and travelers were unable to enter or leave the country via commercial air carriers. Armed Hizballah and other opposition members proceeded to enter areas of Lebanon not traditionally under their control resulting in heavy fighting and a number of casualties. While there is now full access to the airport and widespread hostilities have subsided, the United States is concerned about Hizballah's willingness to use violence to achieve political ends with little or no warning.

The threat of anti-Western terrorist activity exists in Lebanon; groups such as Al-Qaeda and Jund al-Sham are present in the country and have issued statements calling for attacks against Western interests in the past.

U.S. citizens traveling to Lebanon or resident in Lebanon should be aware that the U.S. Embassy has limited ability to reach all areas of Lebanon. The Embassy cannot guarantee that Embassy employees can render assistance to U.S. citizens in all areas of the country. Furthermore, in the event that the security climate in the country worsens, American citizens should be aware that they will bear the responsibility of arranging their own travel out of Lebanon. American citizens with special medical or other needs should be aware of the risks of remaining given their condition and be prepared to be treated in Lebanon if they cannot arrange for travel out of the country.



U.S. Government-facilitated evacuations such as took place in 2006 occur only when no safe commercial alternatives exist. Evacuation would be provided on a cost-recovery basis, which means the traveler must reimburse the U.S. government for the cost of the travel. The lack of valid travel documents (U.S. passport or U.S. visa, as appropriate) will slow the U.S. Embassy's ability to provide assistance. Further information on the department's role during emergencies is provided at http://www.travel.state.gov/travel/tips/emergencies/emergencies_1212.html.

Landmines and unexploded ordnance continually pose significant dangers throughout southern Lebanon, particularly south of the Litani River, as well as in areas of the country where civil war fighting was intense. More than a dozen civilians have been killed and over 100 injured by unexploded ordnance following the armed conflict in July-August 2006. Travelers should watch for posted landmine warnings and strictly avoid all areas where landmines and unexploded ordnance may be present.

The Department of State considers the threat to U.S. government personnel in Beirut sufficiently serious to require them to live and work under strict security restrictions. These practices limit, and may occasionally prevent, access by U.S. Embassy officials to certain areas of the country. Unofficial travel to Lebanon by U.S. government employees and their family members requires prior approval by the Department of State.

The Embassy is located in Awkar, near Antelias, Beirut, Lebanon. Public access hours for American citizens are Monday through Thursday, 8:00 a.m. to 11:00 a.m.; however, American citizens who require emergency services outside of these hours may contact the embassy by telephone at any time. The telephone numbers are (961-4) 542-600, 543-600, and fax 544-209. American citizens may register with the embassy online by visiting https://travelregistration.state.gov/ibrs. Americans are strongly encouraged to update their registration information if it is no longer current. Information on consular services and registration can also be found at http://lebanon.usembassy.gov or by phone at the above telephone numbers between 2:00 p.m. and 4:00 p.m., Monday through Friday local time.

Updated information on travel and security in Lebanon may be obtained from the Department of State by calling 1-888-407-4747 within the United States and Canada or, from overseas, 1-202-501-4444. Additional details can be found in the Department of State's Country Specific Information for Lebanon, and the Worldwide Caution, which are available on the Department's Internet website at http://travel.state.gov.

LESOTHO

Compiled from the September 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Kingdom of Lesotho

PROFILE

Geography

Area: 30,355 sq. km. (11,718 sq. mi.), about the size of Maryland.

Cities: Capital—Maseru (173,700). Other cities—Teyateyaneng (22,800), Leribe (35,000), Mafeteng (32,900), Mohale's Hoek (18,400).

Terrain: High veld, plateau and mountains.

Climate: Temperate; summers hot, winters cool to cold; humidity generally low and evenings cool year round. Rainy season in summer, winters dry. Southern hemisphere seasons are reversed.

People

Nationality: Noun—Mosotho (sing.); Basotho (pl.). Adjective—Basotho.

Population: (2007 est.) 1.88 million.

Annual growth rate: (2004 est.) 1.4%. (Note: the population growth rate is depressed by an HIV/AIDS prevalence rate estimated to be at approximately 23.2%.)

Ethnic groups: Basotho 99.7%; Europeans, Asians, and other 0.3%.

Religions: 80% Christian, including Roman Catholic (majority), Lesotho Evangelical, Anglican, other denominations; other religions include Islam, Hindu, indigenous.

Languages: Official—Sesotho and English. Others—Zulu, Xhosa.

Education: Years compulsory—None. Literacy (2003 est.)—84.8%. Lesotho has free primary education (grades 1-7).

Health: Infant mortality rate (2004 est.)—85.22/1,000. Life expectancy (2004 est.)—36.81 years.

Work force: (2001 est.) 704,000.

Government

Type: Constitutional monarchy.

Constitution: April 2, 1993.

Independence: October 4, 1966.

Government branches: Executive—monarch is head of state; prime minister is head of government and cabinet. Legislative—Bicameral parliament consists of elected Assembly and non-elected Senate. Judicial—High Court, Court of Appeals, Magistrate's Court, traditional and customary courts.

Political subdivisions: 10 districts.

Political parties: Lesotho Congress for Democracy (LCD), All Basotho Congress (ABC), Basotho National Party (BNP), Lesotho Peoples Congress (LPC), National Independent Party (NIP), Basutoland African Congress (BAC), Basutoland Congress Party (BCP), Lesotho Workers Party (LWP), Popular Front for Democracy (PFD), Marematlou Freedom Party (MFP), Christian Democratic Party (CDP), Kopanang Basotho Party (KBP), National Progressive Party (NPP), New Lesotho's Freedom Party (NLFP), Sefate Democratic Union (SDU), Social Democratic Party (SDP), United Party (UP).

Suffrage: 18 years of age.

Budget: (FY 2003-2004 est.) Revenues—$560 million. Expenditures—$599 million.

Economy

GDP: (2003) $1.43 billion.

Annual growth rate: (2007) 7.2%.

Per capita GDP: (2007) $850.

Average inflation rate: (2008) 12%.

Natural resources: Water, agricultural and grazing land, some diamonds and other minerals. Lesotho is an exporter of excess labor.

Agriculture: (2007 est.) 17% of GDP. Products—corn, wheat, sorghum, barley, peas, beans, asparagus, wool, mohair, livestock. Arable land—11%.

Industry: (2007 est.) 47% of GDP. Types—apparel, food, beverages, handicrafts, construction, tourism.

Trade: (2007) Exports—Exports—$437 million; clothing, furniture, footwear and wool. Partners—South Africa, United States, Botswana, Swaziland, Namibia, EU. Imports—$661 million; corn, clothing, building materials, vehicles, machinery, medicines, petroleum products. Partners—South Africa, Asia, EU.

Fiscal year: 1 April–31 March.

Economic aid received: (2007) $350 million. Primary donors—U.S., World Bank, IMF, EU, UN, U.K., and Ireland.

PEOPLE

More than 99% of Lesotho's population is ethnically Basotho; other ethnic groups include Europeans and Asians. The country's population is 80% Christian, the majority of whom are Roman Catholic. Other religions are Islam, Hindu, and indigenous beliefs. Sesotho and English are official languages, and other languages spoken include Zulu and Xhosa.

HISTORY

Lesotho gained independence from Britain on October 4, 1966. In January 1970 the ruling Basotho National Party (BNP) appeared set to lose the first post-independence general elections when Prime Minister Leabua Jonathan annulled the election. He refused to cede power to the Basotho Congress Party (BCP) and imprisoned its leadership.

The BNP ruled by decree until January 1986 when a military coup forced them out of office. The Military Council that came into power granted executive powers to King Moshoeshoe II, who was until then a ceremonial monarch. In 1990, however, the King was forced into exile after a falling out with the army. His son was installed as King Letsie III.

The chairman of the military junta, Major General Metsing Lekhanya, was ousted in 1991 and then replaced by Major General Phisoane Ramaema, who handed over power to a democratically elected government of the BCP in 1993. Moshoeshoe II returned from exile in 1992 as an ordinary citizen. After the return to democratic government, King Letsie III tried unsuccessfully to persuade the BCP government to reinstate his father (Moshoeshoe II) as head of state. In August 1994, Letsie III staged a coup which was backed by the military and deposed the BCP government. The new government did not receive full international recognition. Member states of the Southern African Development Community (SADC) engaged in negotiations aimed at the reinstatement of the BCP government. One of the conditions put forward by the King for the return of the BCP government was that his father should be re-installed as head of state. After protracted negotiations, the BCP government was reinstated and the King abdicated in favor of his father in 1995, but Moshoeshoe II died in a car accident in 1996 and was again succeeded by his son, Letsie III. The ruling BCP split over leadership disputes in 1997.

Prime Minister Ntsu Mokhehle formed a new party, the Lesotho Congress for Democracy (LCD), and was followed by a majority of Members of Parliament, which enabled him to form a new government. The LCD won the general elections in 1998 under the leadership of Pakalitha Mosisili, who had succeeded Mokhehle as party leader. Despite the elections being pronounced free and fair by local and international observers and a subsequent special commission appointed by SADC, the opposition political parties rejected the results.

Opposition protests in the country intensified, culminating in a violent demonstration outside the royal palace in August 1998. When junior members of the armed services mutinied in September, the government requested a SADC task force to intervene to prevent a coup and restore stability. A military group of South African and Botswana troops entered the country in September, put down the mutiny, and withdrew in May 1999. Looting, casualties, and widespread destruction of property followed.

An Interim Political Authority (IPA), charged with reviewing the electoral structure in the country, was created in December 1998. The IPA devised a proportional electoral system to ensure that there would be opposition in the National Assembly. The new system retained the existing 80 elected Assembly seats, but added 40 seats to be filled on a proportional basis. Elections were held under this new system in May 2002, and the LCD won again. For the first time, due to the inclusion of proportional seats, opposition political parties won significant numbers of seats. Elections were held again in February 2007. Nine opposition parties hold all 40 of the proportional seats, with the National Independent Party (NIP) having the largest share (21). The LCD has 61 of the 80 constituency-based seats, and All Basotho Congress (ABC) holds 17.

GOVERNMENT AND POLITICAL CONDITIONS

The Lesotho Government is a constitutional monarchy. The Prime Minister, Pakalitha Mosisili, is head of government and has executive authority. The King serves a largely ceremonial function; he no longer possesses any executive authority and is proscribed from actively participating in political initiatives.

The Lesotho Congress for Democracy (LCD) controls a majority in the National Assembly (the lower house of parliament), with All Basotho Congress (ABC), the National Independent Party, and the Lesotho Workers Party among the 9 opposition parties represented. The upper house of parliament, called the Senate, is composed of 22 principal chiefs whose membership is hereditary, and 11 appointees of the King, acting on the advice of the prime minister.

The constitution provides for an independent judicial system. The judiciary is made up of the Court of Appeal, the High Court, Magistrate's Courts, and traditional courts that exist predominately in rural areas. All but one of the Justices on the Court of Appeal are South African jurists. There is no trial by jury; rather, judges make rulings alone, or, in the case of criminal trials, with two other judges as observers. The constitution also protects basic civil liberties, including freedom of speech,

association, and the press; freedom of peaceful assembly; and freedom of religion. For administrative purposes, Lesotho is divided into 10 districts, each headed by a district administrator. Lesotho held its first post-independence local government elections on April 30, 2005 using a quota system that reserved one-third of electoral divisions for women candidates. In these elections, 53% of the victorious candidates were women. Locally elected officials attended post-election training while regulations for local governance were drawn up by the National Assembly and infrastructure was created.

Principal Government Officials

Last Updated: 11/12/08

King: **LETSIE III**
Prime Min.: **Pakalitha Bethuel MOSISILI**
Dep. Prime Min.: **Archibald Lesao LEHOHLA**
Min. of Agriculture & Food Security: **Lesole MOKOMA**
Min. of Communications, Science, & Technology: **Mothetjoa METSING**
Min. of Defense & National Security: **Pakalitha Bethuel MOSISILI**
Min. of Education & Training: **Mamphono KHAKETLA**
Min. of Employment & Labor: **Refiloe MASEMENE**
Min. of Finance & Development Planning: **Timothy THAHANE**
Min. of Foreign Affairs: **Mohlabi Kenneth TSEKOA**
Min. of Forestry & Land Reclamation: **Lincoln Ralechate MOKOSE**
Min. of Gender, Youth, Sports, & Recreation: **Mathabiso LEPONO**
Min. of Health & Social Welfare: **Mphu RAMATLAPENG**
Min. of Home Affairs, Public Safety, & Parliamentary Affairs: **Archibald Lesao LEHOHLA**
Min. of Justice, Human Rights, Correctional Services, Law, & Constitutional Affairs: **Mpeo Mahase MOILOA**
Min. of Local Government & Chieftainship: **Pontso Matumelo SEKATLE**
Min. of Natural Resources: **Monyane MOLELKI**
Min. in the Prime Minister's Office: **Motloheloa PHOOKO**
Min. of Public Service: **Semano SEKATLE**

Min. of Public Works & Transport: **Tsele CHAKELA**
Min. of Tourism, Environment, & Culture: **Lebohang NTSINYI**
Min. of Trade & Industry, Cooperatives & Marketing: **Popane LEBESA**
Governor, Central Bank: **Moeketsi SENAOANA**
Ambassador to the US: **David Mohlomi RANTEKO**
Permanent Representative to the UN, New York: **Lebohang Fine MAEMA**

Lesotho maintains an embassy in the United States at 2511 Massachusetts Avenue NW, Washington, DC 20008 (tel: 202-797-5533). Lesotho's mission to the United Nations is located at 204 East 39th Street, New York, NY 10016 (tel: 212-661-1690).

ECONOMY

Lesotho's economy is based on water and electricity sold to South Africa, manufacturing, earnings from the Southern African Customs Union (SACU), agriculture, livestock, and to some extent earnings of laborers employed in South Africa. Lesotho also exports diamonds, wool, and mohair. Lesotho is geographically surrounded by South Africa and economically integrated with it as well. The majority of households subsist on farming or migrant labor, primarily miners in South Africa for 3 to 9 months. The western lowlands form the main agricultural zone. Almost

50% of the population earns some income through crop cultivation or animal husbandry, with over half the country's income coming from the agricultural sector.

Water is Lesotho's only significant natural resource. It is being exploited through the 30-year, multi-billion-dollar Lesotho Highlands Water Project (LHWP), which was initiated in 1986. The LHWP is designed to capture, store, and transfer water from the Orange River system and send it to South Africa's Free State and greater Johannesburg area, which features a large concentration of South African industry, population, and agriculture. Completion of the first phase of the project has made Lesotho almost completely self-sufficient in the production of electricity and generated approximately $24 million annually from the sale of electricity and water to South Africa. The World Bank, African Development Bank, European Investment Bank, and many other bilateral donors financed the project. Lesotho has taken advantage of the African Growth and Opportunity Act (AGOA) to become the largest exporter of garments to the U.S. from sub-Saharan Africa. Exports totaled $437 million in 2007. Employment reached 40,000. Asian investors own most factories.

Lesotho has received economic aid from a variety of sources, including the United States, the World Bank, Ireland, the United Kingdom, the European Union, Germany, and the People's Republic of China.

Lesotho has nearly 6,000 kilometers of unpaved and modern all-weather roads. There is a short rail line (freight) linking the capital city of Maseru with Bloemfontein, South Africa that is owned and operated by South Africa (the half-mile trunk inside Lesotho is operated by Lesotho Flour Mills, Ltd.). Lesotho is a member of the Southern African Customs Union (SACU) in which tariffs have been eliminated on the trade of goods with other member countries, which include Botswana, Namibia, South Africa, and Swaziland. With the exception of Botswana, these countries also form a common currency and exchange control area known as the Common Monetary Area (CMA). The South African rand can be used interchangeably with the loti, the Lesotho currency (plural: maloti). One hundred lisente equal one loti. The loti is at par with the rand.

HIV/AIDS

According to recent estimates, the HIV/AIDS prevalence rate in Lesotho is about 23.2%, one of the highest rates in the world. The United Nations estimates that this rate will rise to 36% within the next 15 years, resulting in a further drop in life expectancy. According to the Lesotho Bureau of Statistics, in 2001 life expectancy was estimated at 48 for men and 56 for women. Recent statistics estimate that life expectancy has fallen to an average of 36 years.

In 1999, the government finalized its Strategic Plan on HIV/AIDS, a diagram for addressing the education, prevention, counseling, and treatment needs of the populace. In 2000, Lesotho declared a national emergency as a result of the HIV/AIDS crisis. In 2003 the Government of Lesotho hosted a SADC Extraordinary Summit on HIV/AIDS. In 2005 legislation was passed to create the National AIDS Commission to coordinate society-wide anti-AIDS activities, which was following by the launching of a national "Know Your Status" campaign aimed at achieving 100% testing and counseling of all Basotho.

The donor community is collaborating with the Government of Lesotho in a massive effort to address the HIV epidemic. Key international stakeholders include components of the U.S. President's Emergency Plan for AIDS Relief (PEPFAR), UN agencies, Irish AID, other international donors, and dozens of non-governmental organizations.

DEFENSE

The security force is composed of the Lesotho Defense Force (LDF—estimated 5,000 personnel) and the Lesotho Mounted Police Service (LMPS—estimated 3,000-4,000 personnel). The LDF consists of an army and an air wing. The LDF reports to the Prime Minister (who is the Minister of Defense and National Security), while the Lesotho Mounted Police Service reports to the Minister of Home Affairs. There also is a National Security Service (NSS) for intelligence, which is directly accountable to the Prime Minister. Relations between the police and the army have occasionally been tense, and in 1997 the army was called upon to put down a serious police mutiny.

FOREIGN RELATIONS

Lesotho's geographic location makes it extremely vulnerable to political and economic developments in South Africa. It is a member of many regional economic organizations including the Southern African Development Community (SADC) and the Southern African Customs Union (SACU). Lesotho also is active in the United Nations, the African Union, the Nonaligned Movement, the Commonwealth, and many other international organizations. In addition to the United States, South Africa, China, Libya, Ireland (Consulate General), and the European Union all currently retain resident diplomatic missions in Lesotho. The United Nations is represented by a resident mission as well, including UNDP, UNICEF, WHO, FAO, WFP, and UNAIDS.

Lesotho has historically maintained generally close ties with the United States, European Union member states, and other Western countries. Although Lesotho decided in 1990 to break relations with the People's Republic of China (P.R.C.) and reestablish relations with Taiwan, in 1993 the nation restored ties with the P.R.C.

Lesotho also recognizes Palestine as a state, was a strong public supporter of the end of apartheid in South Africa, and granted a number of South African refugees political asylum during the apartheid era. Resi-

dent diplomatic missions include the United States, Ireland, the European Union, South Africa, China (P.R.C.), and Libya.

U.S.-LESOTHO RELATIONS

The United States was one of the first four countries to establish an embassy in Maseru after Lesotho gained its independence from Great Britain in 1966. Since this time, Lesotho and the United States have consistently maintained productive bilateral relations. In 1996, the United States closed its resident bilateral aid program in Lesotho. In 2007, however, the Government of Lesotho signed a compact with the Millennium Challenge Corporation to provide $362.5 million in support over the next five years to develop Lesotho's water, healthcare infrastructure, and private sector. An in-country program to support the President's Emergency Program for AIDS Relief was established in 2005 and also includes representatives of U.S. Agency for International Development (USAID) and the Centers for Disease Control. The Peace Corps has operated in Lesotho since 1966. About 90 Peace Corps volunteers concentrate in the sectors of health, agriculture, education, rural community development, and the environment. The Government of Lesotho encourages greater American participation in commercial life and welcomes interest from potential U.S. investors and suppliers.

TRAVEL

Consular Information Sheet

December 29, 2008

Country Description: Lesotho is a constitutional monarchy with a democratically elected lower house of parliament. The upper house, the Senate, is comprised of appointed hereditary chiefs and politicians. A Prime Minister is the head of the government. Geographically, Lesotho is an extremely mountainous developing nation completely surrounded by the country of South Africa. The capital, Maseru, is at 5,000 feet (1,500M) above sea level, and the mountains reach to 11,400 feet (3,500M). Facilities for tourism are limited. A limited number of restaurants are available in Maseru.

Entry Requirements: A passport is required, but no visa for U.S. citizens is needed for visits of 180 days or less. Vaccination for yellow fever is a common requirement and travelers should carry their international vaccination cards with them. For more information concerning entry requirements, travelers may contact the Embassy of the Kingdom of Lesotho, 2511 Massachusetts Avenue NW, Washington, DC 20008, telephone (202) 797-5533. Visit the Embassy of Lesotho's web site at http://www.lesothoemb-usa.gov.ls for the most current visa information.

Safety and Security: U.S. citizens should avoid political gatherings and street demonstrations and maintain security awareness at all times.

For the latest security information, Americans traveling abroad should regularly monitor the Department's web site, where the current Worldwide Caution Travel Alert, Travel Warnings and other Travel Alerts can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S. and Canada, or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: U.S. citizens should remain vigilant about their surroundings at all times. Lesotho has a high level of crime and foreigners are frequently targeted, robbed and sometimes killed. While reporting of incidents by American citizens has increased including both armed and unarmed confrontations, car jackings, and home invasions, there are no indications that U.S. citizens are targeted or that there is an increase in the overall crime rate. Police have reported the presence of a number of armed gangs and unauthorized police stops. Lesotho's high unemployment rate, aggravated by the return of large numbers of unemployed miners from South Africa, and the ongoing effects of social upheaval due to high HIV/AIDS rates of infection, continue to contribute to an increasing number of reported crimes. These types of crimes occur primarily in the capital city of Maseru, but can occur elsewhere in Lesotho. Crime scenes have included popular restaurants, pedestrian overpasses, poorly to unlit roads, and other locations foreigners are known to frequent. Victims have included foreign diplomats, volunteer workers, employees of non-governmental organizations, and nationals of Lesotho. U.S. citizens are advised to avoid large groups and demonstrations, walking and driving at nighttime if possible, and casual walking in the capital city of Maseru even during daylight. Personal crime is more likely to occur at night, but there have been numerous recent incidents in the middle of the day. Traveling alone or at night is particu-

larly dangerous. The Lesotho Mounted Police Service handles policing duties. Police resources are limited and response time can vary widely from none onsite to delayed. U.S. citizens should report crime to the police and to the Embassy consular section.

There is a serious baggage pilferage problem at Johannesburg International Airport, also known as Oliver Tambo International Airport, in South Africa. Persons traveling by air to Lesotho must travel via Johannesburg. The pilferage problem particularly affects travelers changing airlines and those flying on smaller airlines. Passengers flying on major international carriers may not be affected to the same degree. Travelers are encouraged to secure their luggage, use an airport plastic wrapping service, and avoid placing currency, electronics, jewelry, cameras or other valuables in checked luggage. Make an inventory of items in checked baggage to aid in claims processing if theft does occur. The claims processing procedure can be time-consuming.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed. Lesotho does not have a local equivalent to 911, in the event of an emergency call (266)5888-1010 to speak to the police 24/7.

Medical Facilities and Health Information: Medical facilities in Lesotho are limited. Good medical service is available in Bloemfontein, South Africa, 90 miles west of Maseru. There is no reliable ambulance service in Lesotho. The Embassy maintains a list of physicians and other health care professionals who may see U.S. citizen patients. The Embassy does not guarantee their services or provide recommendations.

Many medicines are unavailable at facilities in Lesotho; travelers should carry with them an adequate supply of needed medicines and/or prescription drugs, along with copies of prescriptions. Lesotho has a very high HIV/AIDS prevalence rate, currently estimated at over thirty percent of the adult population. Some HIV/AIDS entry restrictions exist for visitors to and foreign residents of Lesotho.

Lesotho border guards have the discretion to deny entry to visitors with HIV/AIDS. Please verify this information with the Embassy of Lesotho at http://www.lesothoemb-usa.gov.ls before you travel.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's web site at http://wwwn.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith/en.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Lesotho is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

Traffic moves on the left, with right-hand drive vehicles. Never assume right-of-way, as aggressive and undisciplined local driving habits result in frequent collisions. Lesotho has a high number of traffic-related deaths and injuries given its small size. The previous king died in a road accident in 1996. Driving after dark is dangerous due to the absence of street lighting, livestock on the roads, and the prevalence of crime, including occasional incidents of carjacking.

Travel is best done by private car. Rental cars are available, and cars rented in neighboring South Africa may be brought into Lesotho with written permission from the rental company. Although bus and public taxi services exist, chronic overloading combined with inadequate vehicle maintenance and lack of driver training make them unsafe. Some private taxi service exists in the capital, but roving mini-bus taxis should be avoided. There is no passenger train service in the country.

Although the number of paved roads is gradually increasing, the majority of Lesotho's 5,000 miles of roads are unpaved. A few main rural highways are comparable to U.S. two-lane rural roads, but lane markings, signs, shoulders and guardrails are not to U.S. standards, and unfenced livestock pose a particular danger. Lesotho's mountainous terrain makes driving on secondary roads hazardous. Unpaved roads in the interior, often narrow, twisty and steep, are poorly maintained. For travel in the interior, especially in wet or snowy weather, a high ground clearance or four-wheel-drive vehicle is recommended. Four-wheel-drive is required for entering Lesotho through the Sani Pass on the eastern border. The authority for road safety issues rests with the Lesotho Mounted Police. There are no auto clubs or reliable ambulance services. Drivers should contact the police in emergencies.

Visit the web site of the country's national tourist office and national authority responsible for road safety at http://www.lesotho.gov.ls/tourism.

Aviation Safety Oversight: As there is no direct commercial air service between the United States and Lesotho, the U.S. Federal Aviation Administration (FAA) has not assessed Lesotho's Civil Aviation Authority for compliance with International Civil Aviation Organization (ICAO) aviation safety standards. For more information, travelers may visit the FAA's web site at http://www.faa.gov.

The only scheduled air service is between Maseru and Johannesburg on a South African Airways subsidiary. There is no scheduled service among towns within Lesotho.

Special Circumstances: Tap water is not reliably potable. Visitors to the interior of Lesotho should bring clothing and equipment suitable for cold weather during the winter months (June - October). In the mountains, weather conditions can deteriorate rapidly. In winter, snow often closes mountain passes and temperatures often drop below freezing during the night, even in the lowlands.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating Lesotho laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Lesotho are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in Lesotho are encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration web site so that they can obtain updated information on travel and security within Lesotho.Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency. The U.S. Embassy is located at 254 Kingsway, Maseru West; the mailing address is PO Box 333, Maseru 100, Lesotho. The telephone number is 266-22-312-666. The Embassy's e-mail address is infomaseru@state.gov and the URL is http://maseru.usembassy.gov.

Intercountry Adoption

May 2006

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is based on public sources and current understanding. Questions involving foreign and U.S. immigration laws and legal interpretation should be addressed respectively to qualified foreign or U.S. legal counsel.

Please Note: In Lesotho, intercountry adoptions are governed under the Child Welfare and Protection Act, no. 60 of 1980 and the Adoption Proclamation of 1952. Under these laws, prospective adoptive parents are required to reside in Lesotho for two years before adoptions. Despite this, intercountry adoptions are processed and approved. A revised Child Welfare and Protection Bill, being debated in the National Assembly, would allow for intercountry adoptions. Adoptions in practice borrow from all three of these documents, the two laws and the new proposed bill. If and when the National Assembly passes the proposed revised bill, this will change how adoptions are processed, and this flyer will be amended accordingly.

Patterns of Immigration: Please review current reports online at http://adoption.state.gov.

Adoption Authority: The government office responsible for adoptions in Lesotho is the following:

Department of Social Welfare
Ministry of Health and Social Welfare
P/Bag A 222
Maseru, 100
Lesotho
Tel: +266 (22) 326-013
Fax: +266 (22) 317-206

Eligibility Requirements for Adoptive Parents: Prospective adoptive parent(s) are required to undergo a thorough home study by an approved social service or adoption agency and be found qualified. To locate an approved social service or adoption agency, persons interested in adopting in Lesotho should contact the Lesotho Department of Social Welfare in the Ministry of Health and Social Welfare. The adoptive parent(s) must be at least 25 years old and one prospective adoptive parent should be 21 years older than the child they aim to adopt. Gay/lesbian prospective adoptive parents are not permitted to adopt Lesotho children.

Residency Requirements: Officially, Lesotho adoption laws require that at least one of the prospective adoptive parent(s) be a resident of Lesotho for at least two years prior to the adoption. In practice, however, the courts have granted adoptions to non-residents if it is in the best interests of the child. The Child Welfare and Protection Bill presently under discussion in the National Assembly would explicitly allow for adoptions

by non-residents. The Department of Social Welfare in the Ministry of Health and Social Welfare strongly advises prospective parent(s) to spend a minimum of two weeks in Lesotho. The purpose of this stay is so that the prospective parent(s) will learn about Lesotho and be able later to tell their adopted children about their country of origin.

Time Frame: The time frame for adoption procedures differs widely and depends in large measure on how quickly the prospective adoptive parent(s) and their agents collect the necessary paperwork. From start to finish, most adoptions will be completed in six months. Once paperwork has been submitted, Adoption Orders and Removal Orders will take between one week and one month, depending on how quickly cases can be brought to court. A Lesotho Passport, which will be necessary for the U.S. immigrant visa application, can take from 6 to 12 months to procure.

Adoption Agencies and Attorneys: There are no adoption agencies or attorneys approved by the Lesotho government. Prospective adoptive parents apply directly to the Department of Social Welfare. At this time, there are no formal application forms. Prospective adoptive parents should let the Department of Social Welfare know the details of their request (age of child, boy/girl, health, etc.).

Adoption Fees: The Department of Social Welfare in the Ministry of Health and Social Welfare does not charge any fees for processing adoption submissions. The Magistrates courts do not charge fees for hearing adoption cases. The High Court requires revenue stamps to hear removal cases. These revenue stamps are in the amount of 83 maluti (approximately $13 at the exchange rate at the beginning of April 2006). One reputable law firm charges 4,500 maluti (approx. $722) to process an order for adoption and an additional 4,500 maluti for an order for removal (permission to take the child out of the country).

Adoption Procedures: Generally, adoption procedures are initiated when a prospective adoptive parent(s) submits a request to the Department of Social Welfare. The Department of Social Welfare in the Ministry of Health and Social Welfare will liaise with an approved social service or adoption agency identified by the adoptive parent(s). After a home study has been successfully completed, a child will be identified from one of the orphanages or abandoned children centers.

The Ministry of Health and Social Welfare will accept home-studies submitted in an I-600A application, which they will forward to the courts. Children have birth certificates confirming their orphan/abandoned status. In some cases, a child may have a letter from extended family, certified by the local authorities (usually the village chief) that the child is eligible for adoption.

The prospective adoptive parents should procure the services of a lawyer to refer the case to the Magistrates Court for an adoption hearing. The same lawyer can be retained to submit a case for removal of child from Lesotho. An order of adoption terminates all the rights and obligations existing between the child and any legally recognized parent or extended family. The adopted child is thereafter deemed by law to be the legitimate child of the adoptive parent(s).

Prospective adoptive parents can apply for a revised Lesotho birth certificate and a Lesotho passport based on the official order of adoption. The Ministry of Health and Social Welfare or a lawyer can help with both of these. The revised birth certificate is ordered from the District Administrator and requires proof of ID, a certified copy of the order of adoption and a revenue stamp for 26c(Stamps for 26c are available from the Lesotho Revenue Authority).

The passport with revised names is applied for from the Ministry of Home Affairs. Please provide a certified copy of the order of adoption and a fee of M/R100. An order for removal allows the child to leave Lesotho with the adoptive parent(s).

Useful Information About Lesotho Custody Law And The Rights Of Birth Parents: Laws pertaining to child custody are not applied evenly in Lesotho and are complicated by traditional practice. Children born out of wedlock are considered illegitimate.

A child born to unmarried parents becomes legitimate when the mother marries, if the husband decides to recognize the child and pays an agreed bridal price. Such a child would otherwise be the ward of the maternal grandparent(s).

Unmarried women are considered legal minors and, as mentioned above, their children would be legally in the custody of the mother's parent(s). According to custom, the expanded family has certain custodial rights to children. The Department of Social Welfare will ensure, prior to approving an adoption, that the concerned children are free from custody issues and all family have waived any rights to the child.

Unmarried fathers do not have legal access, custody or guardianship of a biological child unless they have reached an understanding with the maternal grandparent(s).

Customarily, the father will be involved at the invitation of the maternal grandparent(s). The Department of Social Welfare would, prior to accepting a child for adoption proceedings, ensure that any known father will have waived his rights to the child.

Required Documents:

Prospective adoptive parent(s) must submit the following documents:

- Request for adoption to the Department of Social Welfare;
- Home Study;
- Financial statement(s);
- Police record(s);
- Medical Certificate(s);

- Letter(s) from the family of the prospective adoptive parent(s) that these family members accept and acknowledge the adoption.

Lesotho adoption law is based on local cultural practices. By these standards adoption is an extended family issue not just the nuclear family. It is customary that the extended family writes a letter condoning the adoption. In Lesotho, these relations would be expected to care for the child in the case the parents are unable to do so. Centers for orphaned or abandoned children will supply identification for the child and certification the child is eligible for adoption. The Social Worker will submit a report to the prospective adoptive parents' legal counsel, who will prepare the necessary court cases.

Embassy Of The Kingdom Of Lesotho
2511 Massachusetts Avenue, N.W.,
Washington, D.C. 20008

Additional Information: Specific questions about adoption in Lesotho may be addressed to the U.S. Embassy in Maseru. Questions about the immigrant visa process in Johannesburg should be directed to the U.S. Consulate General in Johannesburg. Questions regarding intercountry adoption may be addressed to the Office of Children's Issues, U.S. Department of State, CA/OCS/CI, SA-29, 4th Floor, 2201 C Street, NW, Washington, D.C. 20520-4818, toll-free Tel: 1-888-407-4747.

LIBERIA

Compiled from the September 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Republic of Liberia

PROFILE

Geography

Area: 111,369 sq. km. (43,000 sq. mi.). Slightly larger than Ohio.
Cities: Capital—Monrovia (pop. 1,010,970). Principal towns—Ganta (pop. 41,000), Buchanan (pop. 34,000), Gbarnga (pop. 34,000), Kakata (pop. 33,000), Voinjama (pop. 26,000).
Terrain: Three areas—Mangrove swamps and beaches along the coast, wooded hills and semideciduous shrublands along the immediate interior, and dense tropical forests and plateaus in the interior. Liberia has 40% of West Africa's rain forest.

People

Nationality: Noun and adjective—Liberian(s).
Population: (2008) 3.49 million.
Annual growth rate: (2008) 2.1%.
Ethnic groups: Kpelle 20%, Bassa 16%, Gio 8%, Kru 7%, 49% spread over 12 other ethnic groups.
Religions: Christian 40%, Muslim 20%, animist 40%.
Languages: English is the official language. There are 16 indigenous languages.
Education: Literacy (2003)—20%.
Health: Life expectancy (2005)—42.5 years.
Work force: Agriculture—70%; industry—15%; services—2%. Employment in the formal sector is estimated at 15%.

Government

Type: Republic.
Independence: From American Colonization Society July 26, 1847.
Constitution: January 6, 1986.
Political parties: 30 registered political parties.

Economy

GDP: (IMF 2007 est.) $473.9 million.
Real GDP growth rate: (2008 projected) 9.6%.
Per capita GDP: (2006) $185.50.
Average annual inflation: (2008 projected) 9%.
Natural resources: Iron ore, rubber, timber, diamonds, gold, and tin. The Government of Liberia believes there may be sizable deposits of crude oil along its Atlantic Coast.
Agriculture: Products—coffee, cocoa, sugarcane, rice, cassava, palm oil, bananas, plantains, citrus, pineapple, sweet potatoes, corn, and vegetables.
Industry: Types—agriculture, iron ore, rubber, forestry, diamonds, gold, beverages, construction.
Trade: (2007) Exports—$184.1 million (of which rubber $170.9 million). Major markets—Germany, Poland, U.S., Greece. Imports—$498.7 million (petroleum $125 million; rice $65.3 million).

PEOPLE

There are 16 ethnic groups that make up Liberia's indigenous population. The Kpelle in central and western Liberia is the largest ethnic group. Americo-Liberians who are descendants of freed slaves that arrived in Liberia early in 1821 make up an estimated 5% of the population.

There also are sizable numbers of Lebanese, Indians, and other West African nationals who comprise part of Liberia's business community. The Liberian constitution restricts citizenship to only people of Negro descent, and land ownership is restricted to citizens.

Liberia was traditionally noted for its academic institutions, iron-mining, and rubber. Political upheavals beginning in the 1980s and a 14-year civil war (1989-2003) largely destroyed Liberia's economy and brought a steep decline in living standards.

HISTORY

Portuguese explorers established contacts with Liberia as early as 1461 and named the area Grain Coast because of the abundance of "grains of paradise" (Malegueta pepper seeds). In 1663 the British installed trading posts on the Grain Coast, but the Dutch destroyed these posts a year later. There were no further reports of European settlements along the Grain Coast until the arrival of freed slaves in the early 1800s.

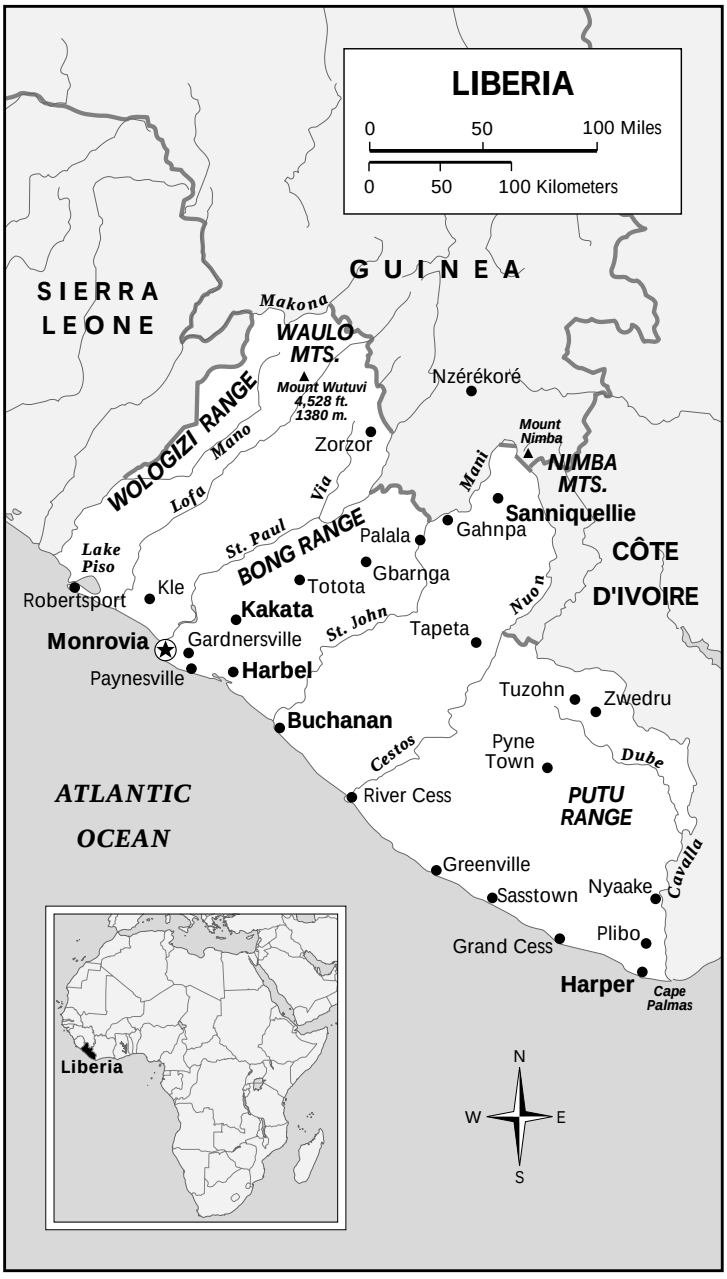
Liberia, "land of the free," was founded by free African-Americans and freed slaves from the United States in 1820. An initial group of 86 immigrants, who came to be called Americo-Liberians, established a settlement in Christopolis (now Monrovia, named after U.S. President James Monroe) on February 6, 1820.

Thousands of freed American slaves and free African-Americans arrived during the following years, leading to the formation of more settlements and culminating in a declaration of independence of the Republic of Liberia on July 26, 1847. The drive to resettle freed slaves in Africa was promoted by the American Colonization Society (ACS), an organization of white clergymen, abolitionists, and slave owners founded in 1816 by Robert Finley, a Presbyterian minister. Between 1821 and 1867 the ACS resettled some 10,000 African-Americans and several thousand Africans from interdicted slave ships; it governed the Commonwealth of Liberia until independence in 1847.

In Liberia's early years, the Americo-Liberian settlers periodically encountered stiff and sometimes violent opposition from indigenous Africans, who were excluded from citizenship in the new Republic until 1904. At the same time, British and French colonial expansionists encroached upon Liberia, taking over much of its territory. Politically, the country was a one-party state ruled by the True Whig Party (TWP). Joseph Jenkins Roberts, who was born and raised in America, was Liberia's first President. The style of government and constitution was fashioned on that of the United States, and the Americo-Liberian elite monopolized political power and restricted the voting rights of the indigenous population. The True Whig Party dominated all sectors of Liberia from independence in 1847 until April 12, 1980, when indigenous Liberian Master Sergeant Samuel K. Doe (from the Krahn ethnic group) seized power in a coup d'etat. Doe's forces executed President William R. Tolbert and several officials of his government, mostly of Americo-Liberian descent. One hundred and thirty-three years of Americo-Liberian political domination ended with the formation of the People's Redemption Council (PRC).

Over time, the Doe government began promoting members of Doe's Krahn ethnic group, who soon dominated political and military life in Liberia. This raised ethnic tension and caused frequent hostilities between the politically and militarily dominant Krahns and other ethnic groups in the country.

After the October 1985 elections, characterized by widespread fraud, Doe solidified his control. The period after the elections saw increased human rights abuses, corruption, and ethnic tensions. The standard of living further deteriorated. On November 12, 1985, former Army Commanding Gen. Thomas Quiwonkpa almost succeeded in toppling Doe's government. The Armed Forces of Liberia repelled Quiwonkpa's attack and executed him in Monrovia. Doe's Krahn-dominated forces carried out reprisals against Mano and Gio civilians suspected of supporting Quiwonkpa.



Despite Doe's poor human rights record and questionable democratic credentials, he retained close relations with Washington. A staunch U.S. ally, Doe met twice with President Ronald Reagan and enjoyed considerable U.S. financial support.

On December 24, 1989, a small band of rebels led by Doe's former procurement chief, Charles Taylor, invaded Liberia from Cote d'Ivoire. Taylor and his National Patriotic Front rebels rapidly gained the support of many Liberians and reached the outskirts of Monrovia within six months.

From 1989 to 1996 one of Africa's bloodiest civil wars ensued, claiming the lives of more than 200,000 Liberians and displacing a million others into refugee camps in neighboring countries. The Economic Community of West African States (ECOWAS) intervened in 1990 and succeeded in preventing Charles Taylor from capturing Monrovia. Prince Johnson—formerly a member of Taylor's National Patriotic Front of Liberia (NPFL)—formed the break-away Independent National Patriotic Front of Liberia (INPFL). Johnson's forces captured and killed Doe on September 9, 1990. Taking refuge in Sierra Leone and other neighboring countries, former AFL soldiers founded the new insurgent United Liberation Movement of Liberia for Democracy (ULIMO), fighting back Taylor's NPFL.

An Interim Government of National Unity (IGNU) was formed in Gambia under the auspices of ECOWAS in October 1990, headed by Dr. Amos C. Sawyer. Taylor (along with other Liberian factions) refused to work with the interim government and continued fighting. After more than a dozen peace accords and declining military power, Taylor finally agreed to the formation of a five-man transitional government. A hasty disarmament and demobilization of warring factions was followed by special elections on July 19, 1997. Charles Taylor and his National Patriotic Party emerged victorious. Taylor won the election by a large majority, primarily because Liberians feared a return to war had Taylor lost.

For the next six years, the Taylor government did not improve the lives of Liberians. Unemployment and illiteracy stood above 75%, and little investment was made in the country's infrastructure. Liberia is still recovering from the ravages of war; pipe-borne water and electricity are generally unavailable to most of the population, especially outside Monrovia, and schools, hospitals, roads, and

infrastructure remain derelict. Rather than work to improve the lives of Liberians, Taylor supported the Revolutionary United Front in Sierra Leone (see Sierra Leone Country Background Note). Taylor's misrule led to the resumption of armed rebellion from among Taylor's former adversaries. By 2003, armed groups called "Liberians United for Reconciliation and Democracy" (LURD) and "Movement for Democracy in Liberia" (MODEL), largely representing elements of the former ULIMO-K and ULIMO-J factions that fought Taylor during Liberia's previous civil war (1989-1996), were challenging Taylor and his increasingly fragmented supporters on the outskirts of Monrovia.

On June 4, 2003 in Accra, Ghana, ECOWAS facilitated peace talks among the Government of Liberia, civil society, and the LURD and MODEL rebel groups. On the same day, the Chief Prosecutor of the Special Court for Sierra Leone issued a press statement announcing the opening of a sealed March 7, 2003 indictment of Liberian President Charles Taylor for "bearing the greatest responsibility" for atrocities in Sierra Leone since November 1996. In July 2003 the Government of Liberia, LURD, and MODEL signed a cease-fire that all sides failed to respect; bitter fighting reached downtown Monrovia in July and August 2003, creating a massive humanitarian disaster.

On August 11, 2003, under intense U.S. and international pressure, President Taylor resigned office and departed into exile in Nigeria. This move paved the way for the deployment by ECOWAS of what became a 3,600-strong peacekeeping mission in Liberia (ECOMIL). On August 18, leaders from the Liberian Government, the rebels, political parties, and civil society signed a comprehensive peace agreement that laid the framework for constructing a 2-year National Transitional Government of Liberia (NTGL), headed by businessman Gyude Bryant. The UN took over security in Liberia in October 2003, subsuming ECOMIL into the United Nations Mission in Liberia (UNMIL), a force that grew to its present size of over 12,000 troops and 1,148 police officers.

The October 11, 2005 presidential and legislative elections and the subsequent November 8, 2005 presidential run-off were the most free, fair, and peaceful elections in Liberia's history. Ellen Johnson Sirleaf defeated international soccer star George Weah 59.4% to 40.6% to become Africa's first democratically elected female president. She was inaugurated in January 2006 and formed a government of technocrats drawn from among Liberia's ethnic groups and including members of the Liberian diaspora who had returned to the country to rebuild government institutions. The president's party, the Unity Party, does not control the legislature, in which 12 of the 30 registered political parties are represented.

The political situation has remained stable since the 2005 elections. The Government of Liberia has made pos-

itive strides aimed at political stability and economic recovery. President Sirleaf has taken a public stance against corruption and has dismissed several government officials. The President is supported by highly experienced and technically competent senior officials, and the public has more confidence in her administration than in any of its recent predecessors. President Sirleaf enjoys good relations with international organizations and donor governments, with whom she is working closely on Liberia's development. The national legislature has enacted several key reforms.

In order to maintain stability through the post-conflict period, Liberia's security sector reform efforts have led to the disarmament of more than 100,000 ex-combatants, the wholesale U.S.-led reconstruction of the Armed Forces of Liberia, and a UN-led effort to overhaul the Liberian National Police. The mandate of UNMIL has been extended to September 2008 and a gradual drawdown will commence in 2008, to last several years. During this period the Government of Liberia and its development partners will focus on creating jobs, attracting investment, and providing education and other essential services to Liberia's communities. The Government of Liberia won substantial donor support for its new Poverty Reduction Strategy at the June 2008 Liberia Poverty Reduction Forum in Berlin, Germany.

GOVERNMENT AND POLITICAL CONDITIONS

Liberia has a bicameral legislature consisting of 64 representatives and 30 senators. The 2005 election placed a spectrum of political personalities in the legislature, most for six-year terms. Senior senators were elected for nine-year terms. Party structures remain weak, and politics continues to be personality-driven. Historically, the executive branch heavily influenced the legislature and judicial system.

The judiciary is divided into four levels, including justices of the peace, courts of record (magistrate courts), courts of first instance (circuit and specialty courts), and the Supreme Court. Traditional courts and lay courts exist in rural areas of the country. Trial by ordeal, though officially outlawed, is practiced in various parts of Liberia. The formal judicial system remains hampered by severe shortages of qualified judges and other judicial officials. Locally, political power emanates from traditional chiefs (town, clan, or paramount chiefs), mayors, and district commissioners. Mayors are elected in principal cities in Liberia. Superintendents appointed by the president govern the counties. There are 15 counties in Liberia.

Principal Government Officials

Last Updated: 11/12/08

President: **Ellen JOHNSON SIRLEAF**
Vice President: **Joseph BOAKAI**
Min. of Agriculture: **J. Christopher TOE**
Min. of Commerce & Industry: **Frances JOHNSON MORRIS**
Min. of Education: **Joseph KORTO**
Min. of Finance: **Augustine NGAFUAN**
Min. of Foreign Affairs: **Olubanke KING-AKERELE**
Min. of Gender Development: **Varbah GAYFLOR**
Min. of Health & Social Welfare: **Walter GWENINGALE**
Min. of Information, Culture, & Tourism: **Lawrence BROPLEH**
Min. of Internal Affairs: **Ambulai JOHNSON**
Min. of Justice: **Philip A. Z. BANKS III**
Min. of Labor: **Samuel Kofi WOODS**
Min. of Land, Mines, & Energy: **Eugene SHANNON**
Min. of National Defense: **Brownie SAMUKAI**
Min. of Planning & Economic Affairs: **Toga G. MCINTOSH**
Min. of Posts & Telecommunications: **Jackson E. DOE**
Min. of Public Works (Acting): **Luseni DONZO**
Min. of Rural Development: **E. C. B. JONES**
Min. of Transport: **Jeremiah SULUNETH**
Min. of Youth & Sport: **Jamesetta HOWARD-WOLOKOLLIE**
Min. of State for Financial & Economic Affairs: **Morris SAYTUMAH**
Min. of State for Legislative Affairs & Legal Counsel: **David MENYONGAR**
Min. of State for Presidential Affairs (Acting): **Willis KNUCKLES**
Governor, National Bank: **John Mills JONES**
Ambassador to the US: **Charles MINOR**
Permanent Representative to the UN, New York: **Milton Nathaniel BARNES**

Liberia maintains an embassy in the United States at 5201 16th Street, NW, Washington DC, 202-723-0437.

ECONOMY

The Liberian economy relied heavily on the mining of iron ore and on the export of natural rubber prior to the civil war. Liberia was a major exporter of iron ore on the world market. In the 1970s and 1980s, iron mining accounted for more than half of Liberia's export earnings. Following the coup d'etat of 1980, the country's economic growth rate slowed down because of a decline in the demand for iron ore on the world market and political upheavals in Liberia.

The 1989-2003 civil war had a devastating effect on the country's economy. Most major businesses were destroyed or heavily damaged, and most foreign investors and businesses left the country. Iron ore production stopped completely, and the United Nations banned timber and diamond exports from Liberia. UN sanctions on Liberian timber were removed in 2006; activity in the timber sector is expected to resume on a large scale during the October 2008-May 2009 dry season. Diamond sanctions were terminated by the UN Security Council in April 2007, and Liberian diamond exports have resumed through the Kimberley Process Certification Scheme. Gold deposits, some of which are currently nearing production, should soon begin to contribute to government revenues and provide additional employment.

Currently, Liberia's revenues come primarily from rubber exports and revenues from its maritime registry program. Liberia has the second-largest maritime registry in the world;

there are 2,724 vessels totaling 83.3 million gross tons registered under its flag, earning some $16 million in maritime revenue in Liberian FY 2007/2008 (July 1-June 30). There is increasing interest in the possibility of commercially exploitable offshore crude oil deposits along Liberia's Atlantic Coast.

With a democratically elected government in place since January 2006, Liberia seeks to reconstruct its shattered economy. The Governance and Economic Management Assistance Program (GEMAP), which started under the 2003-2006 transitional government, is designed to help the Liberian Government raise and spend revenues in an efficient, transparent way. In addition, the Liberian Government is working to improve the business climate, has formed a commission to deal with land tenure issues, and is reviewing tax and tariff regimes to harmonize them with neighbors in the Economic Community of West African States (ECOWAS). The Liberian National Investment Commission reported $97 million in new investment in 2007 and has set a target of $100 million a year for future years. Investors are finding opportunities in mining, rubber, agro-forestry, light industry, and other sectors. Arcelor Mittal Steel has negotiated an agreement to invest over $1.5 billion in the mining sector, and the Liberian Government is engaged in negotiations with several other large foreign investors.

Years of conflict and mismanagement also left Liberia with a large debt burden of $3.4 billion, owed to multilateral development banks, bilateral creditors, and commercial creditors. On June 12, 2008, the United States became the first bilateral creditor to sign a bilateral agreement implementing the Paris Club's April 2008 debt treatment for Liberia. Several other bilateral creditors have pledged debt relief, and the International Monetary Fund (IMF), World Bank, and African Development Bank have approved a formal program to clear Liberia's $1.5 billion in arrears to international financial institutions. With this support, and with technical assistance provided by Liberia's international partners, the Liberian Government seeks to make key economic reforms to attract investment and qualify for eventual debt relief under the Heavily Indebted Poor Countries (HIPC) initiative.

FOREIGN RELATIONS

Liberia has maintained traditionally cordial relations with the West. Liberia currently also maintains diplomatic relations with Libya, Cuba, and China.

Liberia is a founding member of the United Nations and its specialized agencies and is a member of the African Union (AU), the Economic Community of West African States (ECOWAS), the African Development Bank (ADB), the Mano River Union (MRU), and the Non-Aligned Movement.

During the administration of Charles Taylor, relations between Liberia and its West African neighbors became seriously strained. West African countries backed by the African Union and the United Nations negotiated a peace agreement in Accra, Ghana that subsequently led to the exile of Charles Taylor to Nigeria in August 2003. With the election of Ellen Johnson Sirleaf, Liberia has seen significant improvements in relations with its West African neighbors and the wider world. Relations between Liberia and its immediate neighbors in the Mano River region are back on track, and efforts are underway to strengthen relations with other countries. Liberia currently holds the chairmanship of the reinvigorated Mano River Union. Liberia signed a non-aggression pact with Sierra Leone when newly elected President Ernest Bai Koroma visited in September 2007. Liberia is a major proponent of regional integration.

Liberia has taken steps to forge closer ties with Western countries, especially the United States. President Ellen Johnson Sirleaf has visited several Western countries, including the United Kingdom, Sweden, Norway, Spain, France, and Germany. President Sirleaf has also visited China and Libya, with whom Liberia maintains close ties.

U.S.-LIBERIA RELATIONS

Congress appropriated $100,000 in 1819 for the establishment of Liberia (and resettlement of freemen and freed slaves from North America) by the American Colonization Society, led by prominent Americans such as Francis Scott Key, George Washington's nephew Bushrod, Henry Clay, Daniel Webster, and Presidents Monroe, Adams, and Jackson. The first group of settlers arrived in Liberia from the United States in the 1820s. The United States, which officially recognized Liberia in 1862, shared particularly close relations with Liberia during the Cold War.

The outbreak of civil war in Liberia and the long dominance of Charles Taylor soured bilateral relations. However, Liberia now counts the United States as its strongest supporter in its democratization and reconstruction efforts. Since the end of Liberia's civil war in 2003, the United States has contributed over $750 million in bilateral assistance and more than $750 million in assessed contributions to the UN Mission in Liberia (UNMIL). In the current fiscal year, the U.S. will commit another $162 million bilaterally and $179 million through UNMIL. In February 2008, President Bush visited Liberia, where he held his fourth one-on-one meeting with President Sirleaf since Sirleaf's inauguration in January 2006. Peace Corps volunteers will return to Liberia in 2008 for the first time since 1990.

The U.S. Agency for International Development (USAID) implements the U.S. Government's development assistance program in Liberia, the second-largest USAID development program in Africa. USAID's post-conflict rebuilding strategy focuses on reintegration and is increasingly moving towards a longer-term devel-

opment focus. Rehabilitation efforts include national and community infrastructure projects, such as expanding access to electricity, building roads, refurbishing government buildings, training Liberians in vocational skills, promoting business development, and improving livelihoods while protecting Liberia's forests. USAID also funds basic education programs, improving education for children, focusing on girls, and training teachers. In the health area, USAID programs include primary health care clinics, HIV/AIDS prevention, and a large malaria program. USAID supports rule of law programs, establishing legal aid clinics and victim abuse centers, training judges and lawyers, community peace building and reconciliation efforts, and anti-corruption projects to promote transparency and accountability in public sector entities. USAID is also providing support to strengthen the legislature and other political processes. USAID is strengthening civil society's role in delivering services and advocating good governance. Total USAID funding in FY 2008 is $105 million.

TRAVEL

Consular Information Sheet

September 17, 2008

Country Description: Liberia is a country in West Africa that suffered from years of instability and conflict from 1990-2003, with attendant destruction of buildings, roads, infrastructure and public institutions. A comprehensive peace accord ended the conflict in August 2003 and a United Nations peacekeeping force (UNMIL) was deployed to facilitate disarmament and demobilization, help arrange democratic elections and provide for security of the country. In late 2005, Liberians went to the polls and elected Ellen Johnson Sirleaf as president. The new government was inaugurated in January 2006, and has made tremendous progress towards restoring security and stability to the country.

Despite nearly four years of peace and a renewal of economic growth, Liberia is still one of the poorest countries in the world and many basic services (public power, water and sewage, land line phones) are either limited or unavailable. Facilities for foreign visitors are adequate in the capital, Monrovia, but virtually non-existent in the rest of the country. The official language of Liberia is English.

Entry Requirements: A passport and a visa are required for entry, as is evidence of yellow fever vaccination. Immigration officials do not issue visas at the airport. Persons arriving without a visa may be deported immediately, without leaving the airport. Persons arriving from the United States must obtain a Liberian visa before traveling. There is a U.S. $25 airport tax on departing passengers, although this is usually collected as part of the ticket price. For the latest information on entry requirements, visa fees and airport tax for Liberia, contact the Embassy of the Republic of Liberia, 5201 16th Street NW, Washington, DC 20011, tel. (202) 723-0437, web site www.embassyofliberia.org. Overseas, inquiries should be made at the nearest Liberian embassy or consulate.

Safety and Security: The Department of State urges U.S. citizens to plan proposed travel to Liberia carefully and to exercise caution when traveling in Liberia. Neither public transport nor taxis are available at the international airport, which is located 40 miles outside of Monrovia; therefore, before traveling to Liberia, Americans are urged to make arrangements for transportation from the international airport into the city center. Americans traveling to Liberia are also urged to ensure that they have confirmed reservations at a reputable hotel, as rooms can be scarce and difficult to find without advance plans.

Americans who travel to or reside in Liberia should realize that Liberia's police force is in the process of being rebuilt. There is a United Nations (UN) Mission in Liberia (UNMIL), but its mandate is to ensure political stability in Liberia. Americans who travel around Liberia must realize that the role of UN Police (UNPOL) officers is to serve as advisors to the Liberia National Police. Accordingly, they do not have the authority to arrest or detain, and they are unarmed. The Liberia National Police, for its part, has a limited presence in Monrovia, and even less of a presence outside of Monrovia. In addition, police officers can be a source of problems for visitors as well as a source of aid or assistance. Although problems with corruption have improved, travelers may be detained by police officers who solicit bribes. Americans are encouraged to carry a photocopy of their passports with them at all times so that, if ques-

tioned by local officials, proof of identity and U.S. citizenship is readily available. If detained or arrested, U.S. citizens should always ask to be allowed to contact the U.S. Embassy.

U.S. citizens in Liberia should be aware of their surroundings at all times and use caution when moving around, especially at night. The U.S. Embassy recommends that American citizens observe a suggested curfew of 2:00 a.m.—6:00 a.m. Travel outside of Monrovia after dark is strongly discouraged as roads are in poor condition and thus dangerous to navigate at night. U.S. citizens should avoid crowds, political rallies, and street demonstrations and maintain security awareness at all times.

For the latest security information, Americans traveling abroad should regularly monitor the Department's Internet web site, where the current Worldwide Caution Travel Alert, Travel Warnings and Travel Alerts can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S., or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

For the latest security information, Americans traveling abroad should regularly monitor at http://travel.state.gov where the current Travel Warnings and Travel Alerts, including the Worldwide Caution Travel Alert, can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S. and Canada, or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: Crime in Liberia is rated high and is exacerbated by the high rate of unemployment. Theft, assault, sexual crimes, and murder are problems, and they occur more frequently after dark. Foreigners, including U.S. citizens, have been targets of street crime, robbery, and sexual assault. Women have been attacked on deserted beaches. Residential armed break-ins occur. The police are ill equipped and largely incapable of providing effective protection or investigation. Criminal activity is reported in both urban and rural areas.

Perpetrators of business fraud often target foreigners, including Americans. Formerly associated with Nigeria, these fraud schemes are now prevalent throughout western Africa, including Liberia, and pose a danger of both financial loss and physical harm. An increasing number of American citizens have been the targets of such scams. The best way to avoid becoming a victim of fraud is common sense–if it looks too good to be true, it probably is. Any unsolicited business proposal originating in Liberia should be carefully checked before committing any funds, providing any goods or services, or undertaking any travel, particularly involving the mining or sale of gold and diamonds. There is also an increase in Liberian/American Internet relationships, where there are eventual requests for financial assistance under fraudulent pretenses. For additional information, please see the Department of State's Bureau of Consular Affairs brochure on International Financial Scams.

Petty corruption is rampant; poorly paid government officials are not immune from the temptation to collect fees for doing their job. The result is that travelers may be asked for bribes and inconvenienced for not paying them.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

The local equivalent to the "911" emergency line in Liberia is: 911. In an emergency, dialing 911 or 355 from a cellular phone within Liberia will put you in contact with a cellular phone at Liberian National Police (LNP) Headquarters. Please note, there is no landline telephone service in Liberia and cellular phone communication is subject to occasional disruptions in service.

Medical Facilities and Health Information: Hospitals and medical facilities in Liberia are very poorly equipped and are incapable of providing many services. Emergency services comparable to those in the U.S. or Europe are non-existent, and the blood supply is unreliable and unsafe for transfusion. Americans with serious medical problems travel or are medically evacuated to the United States, Europe or South Africa. Medicines are scarce, often beyond expiration dates, and generally unavailable in most areas. As there is neither an effective garbage removal service nor a functioning sewer system, the level of sanitation throughout urban areas is very poor, which increases the potential for disease. Upper respiratory infections and diarrhea are common, as well as the more serious diseases, typhoid and malaria. All travelers to Liberia must be vaccinated against yellow fever and should carry a supply of all prescription medication, plus anti-malaria medication, adequate for their entire stay. A typhoid vaccination is also recommended.

The U.S. Department of State is unaware of any HIV/AIDS entry restrictions for visitors to or foreign residents of Liberia at this time.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's internet site at http://www.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web-

site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith/en.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation. For travel to Liberia, obtaining separate medical evacuation insurance before arriving in Liberia is strongly recommended.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Liberia is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

Road travel in Liberia can be hazardous. Potholes and poor road surfaces are common, making safe driving extremely challenging. Cars, trucks, and taxis are often overloaded with people and goods and make frequent stops without signaling. Drivers overtake on the right as well as the left. Many vehicles operate with threadbare tires, and blowouts are frequent.

Public taxis are poorly maintained and usually overloaded. Intersections must be approached with caution. The absence of public streetlights makes pedestrians walking in the city streets and those walking on country roads difficult to see at night. Drivers and pedestrians are cautioned that high-speed car convoys carrying government officials require all other vehicles to pull off the road until they have passed.

Travelers should expect delays at UNMIL security checkpoints, as well as time-consuming detours around the many bridges and roads damaged by war, neglect, or the heavy annual rains, which occur from May to November.

Travelers can expect strict enforcement of border controls by Liberian, Ivorian, Sierra Leonean, and Guinean authorities. At times border crossings to neighboring countries are closed.

Aviation Safety Oversight: As there is no direct commercial air service between the United States and Liberia, the U.S. Federal Aviation Administration (FAA) has not assessed Liberia's Civil Aviation Authority for compliance with International Civil Aviation Organization (ICAO) aviation safety standards. For more information, travelers may visit the FAA's internet website at http://www.faa.gov.

Special Circumstances: Lodging, fuel, transportation, and telephone services are unevenly available in Liberia, and are nonexistent or severely limited in rural areas. Neither water nor electricity is commercially available in Liberia, including the capital of Monrovia. Most hotels have utilities available, but not always on a 24-hour basis.

There is no working landline telephone system in Liberia. Several cell phone companies provide service in Monrovia and some areas outside the capital. US cellular phones do not always work in Liberia and it is advisable to rent or purchase a local cellular phone. The postal system is slow and unreliable. Commercial air courier service is available through UPS, Federal Express (FedEx), and other companies.

The U.S. dollar is readily accepted in Liberia, and there is no limit on the amount of foreign currency that can be transported into and out of the country, provided one follows the specific regulations on how such transfers must be done. Sums in excess of US $10,000 must be reported at the port of entry and no more than US $7,500 in foreign currency banknotes can be moved out of the country at one time. Larger sums must be transferred via bank drafts or other financial instruments; persons without a Liberian bank account are limited to two outgoing US $5,000 over-the-counter cash wire transfers per month. Wire transfers are not widely used and are subject to substantial fees. ATMs are unavailable and Traveler's checks and credit/debit cards are not accepted anywhere in Liberia.

Liberia has many excellent beaches along the Atlantic coastline that tourists and those who live in the country enjoy throughout the year; however, American citizens should be aware of the threat of dangerous rip currents, better known as rip tides. These strong currents can occur anywhere on the coast given the right surf conditions. The Liberia Weather Service does not provide information on where and when these tides form and no lifeguards are posted on beaches. American citizens who plan to swim in the Atlantic should read from various sources about the dangers of rip currents and how to navigate if you find yourself in such a situation; or better still, do not swim if you are unfamiliar with swimming in water where very strong rip currents occur.

Photographing military installations, air and seaports, and important government buildings is prohibited. Visitors should not take photographs of sites or activities that might be considered sensitive, or police are liable to confiscate the camera.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating Liberia's laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Liberia are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children, or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

The U.S. Embassy does not always receive timely notification of the arrest of U.S. citizens by Liberian authorities. If arrested, U.S. citizens

should ask to be allowed to contact the U.S. Embassy (see the Registration/Embassy Location section below). Americans should carry a photocopy of their U.S. passport with them at all times. The consular section of the U.S. Embassy cannot give legal assistance but can provide a list of Liberian attorneys if one is required.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in Liberia are encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration website so that they can obtain updated information on travel and security within Liberia. Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency. The U.S. Embassy is located at 111 United Nations Drive, Mamba Point, Monrovia; telephone 231-77-054-826; fax 231-77-010-370; web site http://Monrovia.usembassy.gov. U.S. citizens who wish to write to the U.S. Embassy in Monrovia may address letters to the Consular Section, 8800 Monrovia Place, U.S. Department of State, Washington, D.C. 20521-8800, or send emails to ConsularMonrovia@state.gov.

Intercountry Adoption

November 2008

The information in this section has been edited from a report available through the U.S. Department of State Office of Children's Issues. For more information detailed, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Liberia is not party to The Hague Convention on Protection of Children and Co-operation in Respect of Intercountry Adoption (Hague Adoption Convention). In July 2008, the Ministry of Justice and Ministry of Health and Social Welfare began carefully reviewing all adoption cases submitted to them for approval. This change occurred because the Government of Liberia noticed an increasing number of cases in which adoptive parents decided to terminate their parent/child relationship with Liberian adoptive children. The Liberian Parliament is considering a revised adoption law, which was proposed in November 2007. If enacted, the new law would provide additional safeguards to protect adoptive children, birth parents, and prospective adoptive parents.

Who Can Adopt? To bring an adopted child to United States from Liberia, you must be found eligible to adopt by the United States Government. In addition to the United States requirements for prospective adoptive parents, Liberia also has the following eligibility requirements for prospective adoptive parents.

Residency Requirements: There are no residency requirements for intercountry adoptions in Liberia.

Age Requirements: There are no age requirements for intercountry adoptions in Liberia.

Marriage Requirements: There are no marriage requirements for intercountry adoptions in Liberia.

Income Requirements: There are no income requirements for Liberian intercountry adoptions.

Who Can Be Adopted? Liberia has specific requirements that a child must meet in order to be eligible for adoption. The Consular Section of the United States Embassy thoroughly investigates each adoption case to verify that the child's orphan status is legitimate. Since these investigations can take a considerable amount of time, prospective adoptive parents should check with the Embassy to ensure that the investigation has been completed before making travel arrangements for the child to depart Liberia.

Relinquishment Requirements: In addition to a statement of relinquishment from the biological parents, the Liberian Government also requires an approved case summary from the Ministry of Health and Social Welfare (MHSW). The case summary is issued after a social worker has investigated the case thoroughly and concluded that adoption is in the best interest of the child and the Minister or one of his deputies has reviewed all the legal paperwork necessary to process an adoption in Liberia.

Abandonment Requirements: If the child was born in wedlock, the consent of both parents is required. If the child was born out of wedlock, only the mother must consent. Parental consent is not required if the parents have abandoned the child, if the parental rights have been legally terminated, if the parents are deceased, or if a legal guardian has been appointed by the court.

Age Requirements: If the child is 16 years or older, the child must consent to the adoption. Please note that a child who is 16 years or older is not considered a "child" but the Immigration and Nationality Act and therefore may be ineligible to immigrate to the United States.

Other Requirements: In addition to obtaining a statement of relinquishment from the biological parent or legal guarding of the child being adopted, no adoption decree can be issued without an approved case summary from the Ministry of Health and Social Welfare (MHSW).

A case summary from the MHSW is issued only after a social worker has investigated the case thoroughly and concluded that adoption is in the best interest of the child, and the Minister has reviewed all the legal paperwork necessary to process an adoption in Liberia.

This requirement has added time to the processing of adoptions, but it is in the best interest of all parties and is strongly endorsed by the Embassy.

Liberia's Adoption Authority: The Ministry of Justice

The Process: The first step in adopting a child from Liberia is usually to select a licensed agency in the United States that can help with your adoption. Adoption service providers must be licensed by the United States state in which they operate.

To bring an adopted child from Liberia to the United States, you must apply to be found eligible to adopt (Form I-600A) by the USCIS.

If you are eligible to adopt, and a child is available for intercountry adoption, the central adoption authority in Liberia will provide you with a referral to a child.

Role of the Adoption Authority: No adoption decree can be issued without an approved case summary from the Ministry of Health and Social Welfare (MHSW).

Role of the Court: A petition for adoption must be filed with the Probate Court. The petition must contain the name, age, residence and marital status of the petitioners.

The name, date and place of birth of the child, the date and manner in which the petitioners acquired custody of the child, facts (if any) that render consent of either parent unnecessary, the petitioners' desire to adopt the child and the child's change of name, should also be contained in the petition.

Upon receipt of a petition for adoption, the Court schedules a hearing and serves notice on all interested parties. The petitioners or their legal representative, the parent, parents, or guardian(s) of the child and the child are required to attend the hearing, though the court may waive the appearance of the child for good cause. This waiver must be stated in the order of adoption. All hearings are public, and held in open court. The court must be satisfied that the "moral and temporal interests" of the child will be satisfied by the adoption. Upon this showing, the adoption is ordered. The court must be satisfied that the "moral and temporal interests" of the child will be satisfied by the adoption. Upon this showing, the adoption is ordered.

Role of Adoption Agencies: Most adoptive parents normally work with an adoption agency in the United States, which in turn liaises with an orphanage or organization in Liberia prior to initiating the adoption process. The organization in Liberia must be registered with the Ministry of Health and Social Welfare.

Time Frame: There are no fixed time lines or constraints on the Court's processing of adoptions. The adoption process, including formal relinquishment by the parent(s) if necessary, generally takes 3 to 4 weeks.

Since November 2007, prospective adoptive parents have experienced long delays, sometimes as long as 3 months in processing adoptions due to pending revision of the Liberian adoption law.

Adoption Fees: official Government fees for adoptions in Liberia are minimal and consist mainly of court filing fees. These filing fees are normally less than $12,000 USD. The cost of employing local counsel varies but adoptive parents can expect to pay several hundred dollars at a minimum for an attorney.

Liberia has proposed legislation that will increase fees for processing paper through the Courts and the Ministry of Justice for $5 to $1500 USD. These funds will be used to hire additional social workers and court clerks as well as for the general operation of both Ministries.

Documents Required: The following documents are required for adoption in Liberia:

- Petition for Adoption
- Written consent of the biological parents
- Copy of adoptive parents' passports

Additional documents may be requested. If you are asked to provide proof that a document from the United States is authentic, we can help.

For updates on document requirements and information on how to authenticate documents, visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

Bringing Your Child Home: Once your adoption is complete (or you have obtained legal custody of the child), there are a few more steps to take before you can head home. Specifically, you need to apply for several documents for your child before he or she can travel to the United States, such as a birth certificate, a passport or travel document for your child from the country in which he or she was born, and a U.S. Immigration Visa.

For detailed and updated information on how to obtain these documents, review the *Intercountry Adoption* section on this publication and visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

Child Citizenship Act: For adoptions finalized abroad: The Child Citizenship Act of 2000 allows your new child to acquire American citizenship automatically when he or she enters the United States as lawful permanent residents. For adoptions finalized in the United States: The Child Citizenship Act of 2000 allows your new child to acquire American citizenship automatically when the court in the United States issues the final adoption decree. To learn more, review the *Intercountry Adoption* section on this publication and visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

After Adoption: Liberian law has no post-adoption requirements for adoptive parents. Parents should confirm any post-adoption requirements with their legal representatives.

LIBYA

Compiled from the October 2007 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Great Socialist People's Libyan Arab Jamahiriya

PROFILE

Geography

Location: North Africa, bordering the Mediterranean Sea, between Egypt, Tunisia, and Algeria, southern border with Chad, Niger, and Sudan.
Area: 1,759,540 million sq. km.
Cities: Tripoli (capital), Benghazi.
Terrain: Mostly barren, flat to undulating plains, plateaus, depressions.
Climate: Mediterranean along coast; dry, extreme desert interior.
Land use: Arable land—1.03%; permanent crops—0.19%; other—98.78%.

People

Nationality: Noun and adjective—Libyan(s).
Population: (July 2007 est.) 6,036,914 (includes non-nationals, of which an estimated 500,000 or more are sub-Saharan Africans living in Libya).
Annual growth rate: (2007 est.) 2.262%. Birth rate (2007 est.)—26.09 births/1,000 population. Death rate (2007 est.)—3.47 deaths/1,000 population.
Ethnic groups: Berber and Arab 97%; Greeks, Maltese, Italians, Egyptians, Pakistanis, Turks, Indians, and Tunisians.
Religions: Sunni Muslim 97%.
Languages: Arabic is the primary language. English, French, and Italian are understood in major cities.
Education: Years compulsory—9. Attendance—90%. Literacy (age 15 and over who can read and write)—total population 82.6%; female 72% (2003 est.).
Health: (2007 est.) Infant mortality rate—22.82 deaths/1,000 live births. Life expectancy—total population 76.88 yrs.; male 74.1 yrs.; female 78.58 yrs.
Work force: (2006 est.) 1.787 million, an estimated 500,000 of whom are sub-Saharan African foreign workers.

Government

Type: "Jamahiriya" is a term Col. Mu'ammar al-Qadhafi coined and which he defines as a "state of the masses" governed by the populace through local councils. In practice, Libya is an authoritarian state.
Independence: December 24, 1951. Revolution: September 1, 1969.
Constitution: December 11, 1969, amended March 2, 1977—established popular congresses and people's committees.
Political subdivisions: 31 municipalities (singular—"shabiya," plural—"shabiyat") Butnan, Darnah, Gubba, Al Jabal al-Akhdar, Marj, Green Belt, Benghazi, Ajdabiya, Wahat, Kufra, Surt, Al Jufrah, Misurata, Murgub, Bani-waleed, Tarhuna and Msallata, Tripoli, Jfara, Zawiya, Subrata & Surman, An Nuqat al Khams, Gharyan, Mezda, Nalut, Ghdames, Yefren and Jadu, Wadi Alhaya, Ghat, Sabha, Wadi Shati, Murzuq.
Political parties: Political parties are banned. According to the political theory of Col. Mu'ammar al-Qadhafi, multi-layered popular assemblies (people's congresses) with executive institutions (people's committees) are guided by political cadres (revolutionary committees).
Suffrage: 18 years of age; universal and compulsory.

Economy

Real GDP: (2000$, 2006) $46.451 billion.
GDP per capita: (PPP, 2006) $12,204.
Real GDP growth rate: (2006) 5.6%.
Natural resources: Petroleum, natural gas, gypsum.
Agriculture: Products—wheat, barley, olives, dates, citrus, vegetables, peanuts, soybeans; cattle; approximately 75% of Libya's food is imported.
Industry: Types—petroleum, food processing, textiles, handicrafts, cement.
Trade: Exports (2006 est.)—$37.02 billion f.o.b.: crude oil, refined petroleum products. Major markets (2005)—Italy (38%), Germany

(15.1%), Spain (9.3%), Turkey (6.2%), France (6.2%), U.S. (5.2%). Imports (2006 est.)—$14.47 billion f.o.b.: machinery, transport equipment, food, manufactured goods. Major suppliers (2003)—Italy (21.2%), Germany (10.2%), Tunisia (5.9%), Turkey (4.8%), U.K. (4.8%), France (4.7%), South Korea (4.6%), China (4.5%).

PEOPLE

Libya has a small population in a large land area. Population density is about 50 persons per sq. km. (80/sq. mi.) in the two northern regions of Tripolitania and Cyrenaica, but falls to less than one person per sq. km. (1.6/sq. mi.) elsewhere. Ninety percent of the people live in less than 10% of the area, primarily along the coast. More than half the population is urban, mostly concentrated in the two largest cities, Tripoli and Benghazi. Thirty-three percent of the population is estimated to be under age 15.

Native Libyans are primarily a mixture of Arabs and Berbers. Small Tebou and Touareg tribal groups in southern Libya are nomadic or seminomadic. Among foreign residents, the largest groups are citizens of other African nations, including North Africans (primarily Egyptians and Tunisians), West Africans and Sub-Saharan Africans.

HISTORY

For most of their history, the peoples of Libya have been subjected to varying degrees of foreign control. The Phoenicians, Carthaginians, Greeks, Romans, Vandals, and Byzantines ruled all or parts of Libya. Although the Greeks and Romans left impressive ruins at Cyrene, Leptis Magna, and Sabratha, little else remains today to testify to the presence of these ancient cultures.

The Arabs conquered Libya in the seventh century A.D. In the following centuries, most of the indigenous peoples adopted Islam and the Arabic language and culture. The Ottoman Turks conquered the country in the mid-16th century. Libya remained part of their empire—although at times virtually autonomous—until Italy invaded in 1911 and, in the face of years of resistance, made Libya a colony.

In 1934, Italy adopted the name "Libya" (used by the Greeks for all of North Africa, except Egypt) as the official name of the colony, which consisted of the Provinces of Cyrenaica, Tripolitania, and Fezzan. King Idris I, Emir of Cyrenaica, led Libyan resistance to Italian occupation between the two World Wars. From 1943 to 1951, Tripolitania and Cyrenaica were under British administration, while the French controlled Fezzan. In 1944, Idris returned from exile in Cairo but declined to resume permanent residence in Cyrenaica until the removal in 1947 of some aspects of foreign control. Under the terms of the 1947 peace treaty with the Allies, Italy relinquished all claims to Libya.

On November 21, 1949, the UN General Assembly passed a resolution stating that Libya should become independent before January 1, 1952. King Idris I represented Libya in the subsequent UN negotiations. When Libya declared its independence on December 24, 1951, it was the first country to achieve independence through the United Nations and one of the first former European possessions in Africa to gain independence. Libya was proclaimed a constitutional and a hereditary monarchy under King Idris.

The discovery of significant oil reserves in 1959 and the subsequent income from petroleum sales enabled what had been one of the world's poorest countries to become extremely wealthy, as measured by per capita GDP. Although oil drastically improved Libya's finances, popular resentment grew as wealth was increasingly concentrated in the hands of the elite. This discontent continued to mount with the rise throughout the Arab world of Nasserism and the idea of Arab unity.

On September 1, 1969, a small group of military officers led by then 28-year-old army officer Mu'ammar Abu Minyar al-Qadhafi staged a coup d'état against King Idris, who was exiled to Egypt. The new regime, headed by the Revolutionary Command Council (RCC), abolished the monarchy and proclaimed the new Libyan Arab Republic. Qadhafi emerged as leader of the RCC and eventually as de facto chief of state, a political role he still plays. The Libyan government asserts that Qadhafi currently holds no official position, although he is referred to in government statements and the official press as the "Brother Leader and Guide of the Revolution."

The new RCC's motto became "freedom, socialism, and unity." It pledged itself to remedy "backwardness," take an active role in the Palestinian Arab cause, promote Arab unity, and encourage domestic policies based on social justice, non-exploitation, and an equitable distribution of wealth.

An early objective of the new government was withdrawal of all foreign military installations from Libya. Following negotiations, British military installations at Tobruk and nearby El Adem were closed in March 1970, and U.S. facilities at Wheelus Air Force Base near Tripoli were closed in June 1970. That July, the Libyan Government ordered the expulsion of several thousand Italian residents. By 1971, libraries and cultural centers operated by foreign governments were ordered closed.

In the 1970s, Libya claimed leadership of Arab and African revolutionary forces and sought active roles in international organizations. Late in the 1970s, Libyan embassies were redesignated as "people's bureaus," as Qadhafi sought to portray Libyan foreign policy as an expression of the popular will. The people's bureaus, aided by Libyan religious, political, educational, and business institutions overseas, exported Qadhafi's revolutionary philosophy abroad. Qadhafi's confrontational foreign policies and use of terrorism, as well as Libya's growing friendship with the U.S.S.R., led to increased tensions

with the West in the 1980s. Following a terrorist bombing at a discotheque in West Berlin frequented by American military personnel, in 1986 the U.S. retaliated militarily against targets in Libya, and imposed broad unilateral economic sanctions.

After Libya was implicated in the 1988 bombing of Pan Am flight 103 over Lockerbie, Scotland, UN sanctions were imposed in 1992. UN Security Council resolutions (UNSCRs) passed in 1992 and 1993 obliged Libya to fulfill requirements related to the Pan Am 103 bombing before sanctions could be lifted. Qadhafi initially refused to comply with these requirements, leading to Libya's political and economic isolation for most of the 1990s. In 1999, Libya fulfilled one of the UNSCR requirements by surrendering two Libyans suspected in connection with the bombing for trial before a Scottish court in the Netherlands. One of these suspects, Abdel Basset al-Megrahi, was found guilty; the other was acquitted. Al-Megrahi's conviction was upheld on appeal in 2002. In

August 2003, Libya fulfilled the remaining UNSCR requirements, including acceptance of responsibility for the actions of its officials and payment of appropriate compensation to the victims' families. UN sanctions were lifted on September 12, 2003. U.S. International Emergency Economic Powers Act (IEEPA)-based sanctions were lifted September 20, 2004.

On December 19, 2003, Libya publicly announced its intention to rid itself of weapons of mass destruction (WMD) and Missile Technology Control Regime (MTCR)-class missile programs. Since that time, it has cooperated with the U.S., the U.K., the International Atomic Energy Agency, and the Organization for the Prohibition of Chemical Weapons toward these objectives. Libya has also signed the IAEA Additional Protocol and has become a State Party to the Chemical Weapons Convention. These were important steps toward full diplomatic relations between the U.S. and Libya.

GOVERNMENT AND POLITICAL CONDITIONS

Libya's political system is in theory based on the political philosophy in Qadhafi's Green Book, which combines socialist and Islamic theories and rejects parliamentary democracy and political parties. In reality, Qadhafi exercises near total control over major government decisions. For the first seven years following the revolution, Colonel Qadhafi and 12 fellow army officers, the Revolutionary Command Council, began a complete overhaul of Libya's political system, society and economy. In 1973, he announced the start of a "cultural revolution" in schools, businesses, industries, and public institutions to oversee administration of those organizations in the public interest. On March 2, 1977, Qadhafi convened a General People's Congress (GPC) to proclaim the establishment of "people's power," change the country's name to the Socialist People's Libyan Arab Jamahiriya, and to vest, theoretically, primary authority in the GPC.

The GPC is the legislative forum that interacts with the General People's Committee, whose members are secretaries of Libyan ministries. It serves as the intermediary between the masses and the leadership and is composed of the secretariats of some 600 local "basic popular congresses." The GPC secretariat and the cabinet secretaries are appointed by the GPC secretary general and confirmed by the annual GPC congress. These cabinet secretaries are responsible for the routine operation of their ministries, but Qadhafi exercises real authority directly or through manipulation of the peoples and revolutionary committees.

Qadhafi remained the de facto chief of state and secretary general of the GPC until 1980, when he gave up his office. Although he holds no formal office, Qadhafi exercises power with the assistance of a small group of trusted advisers, who include relatives from his home base in the Sirte region, which lies between the traditional commercial and political power centers in Benghazi and Tripoli.

In the 1980s, competition grew between the official Libyan Government and military hierarchies and the revolutionary committees. An abortive coup attempt in May 1984, apparently mounted by Libyan exiles with internal support, led to a short-lived reign of terror in which thousands were imprisoned and interrogated. An unknown number were executed. Qadhafi used the revolutionary committees to search out alleged internal opponents following the coup attempt, thereby accelerating the rise of more radical elements inside the Libyan power hierarchy.

In 1988, faced with rising public dissatisfaction with shortages in consumer goods and setbacks in Libya's war with Chad, Qadhafi began to curb the power of the revolutionary committees and to institute some domestic reforms. The regime released many political prisoners and eased restrictions on foreign travel by Libyans. Private businesses were again permitted to operate. In the late 1980s, Qadhafi began to pursue an anti-Islamic fundamentalist policy domestically, viewing fundamentalism as a potential rallying point for opponents of the regime. Qadhafi's security forces launched a pre-emptive strike at alleged coup plotters in the military and among the Warfallah tribe in October 1993. Widespread arrests and government reshufflings followed, accompanied by public "confessions" from regime opponents and allegations of torture and executions. The military, once Qadhafi's strongest supporters, became a potential threat in the 1990s. In 1993, following a failed coup attempt that implicated senior military officers, Qadhafi began to purge the military periodically, eliminating potential rivals and inserting his own loyal followers in their place.

The Libyan court system consists of three levels: the courts of first instance; the courts of appeals; and the Supreme Court, which is the final appellate level. The GPC appoints justices to the Supreme Court. Special "revolutionary courts" and military courts operate outside the court system to try political offenses and crimes against the state. "People's courts," another example of extrajudicial authority, were abolished in January 2005. Libya's justice system is nominally based on Sharia law.

Principal Government Officials

Last Updated: 11/12/08

Col. Muammar al-Qadhafi has no official title, but he runs Libya and is the de facto chief of state. The Secretary of the General People's Congress is chief of state in theory but is not treated as such. The Secretary of the General People's Committee plays the role of prime minister.

Leader: **Muammar Abu Minyar al-QADHAFI, Col.**

Sec. of the Gen. People's Congress: **Miftah Muhammad KUAYBA**

Sec. of the Gen. People's Committee (Prime Min.): **al-Baghdadi Ali al-MAHMUDI**

Asst. Sec. of the Gen. People's Committee: **Mubarak Abdullah al-SHAMIKH**

Sec. of the Gen. People's Committee for Agriculture & Animal Resources: **Abu Bakr Mabruk al-MANSURI**

Sec. of the Gen. People's Committee for Culture & Information: **Nuri Dhaw al-HUMAYDI**

Sec. of the Gen. People's Committee for Economy, Trade, & Investment: **Ali Abd al-Aziz al-ISSAWI**

Sec. of the Gen. People's Committee for Electricity, Water, & Gas: **Umran Ibrahim Abu-KRA'AA**

Sec. of the Gen. People's Committee for General Education: **Abd al-Qadir Muhammad al-BAGHDADI**

Sec. of the Gen. People's Committee for Finance: **Muhammad Ali al-HUWAYZ**

Sec. of the Gen. People's Committee for Foreign Liaison & Intl. Cooperation: **Abd al-Rahman Muhammad SHALGHAM**

Sec. of the Gen. People's Committee for Health & Environment: **Muhammad Abu Ujaylah RASHID**

Sec. of the Gen. People's Committee for Higher Education: **Aqil Husayn AQIL**

Sec. of the Gen. People's Committee for Industry & Mines: **Ali Yusuf ZIKRI**

Sec. of the Gen. People's Committee for Justice: **Mustafa Muhammad Abd-al-JALIL**

Sec. of the Gen. People's Committee for Planning: **Abd-al-Hafid Mahmud al-ZULAYTINI**

Sec. of the Gen. People's Committee for Public Security: **Abd al-Fatah Yunis al-UBAYDI**

Sec. of the Gen. People's Committee for Social Affairs: **Ibrahim al-ZARRUQ al-SHARIF**

Sec. of the Gen. People's Committee for Telecommunications & Transport: **Muhammad Abu-Ujayl al-MABRUK**

Sec. of the Gen. People's Committee for the Workforce, Training, & Employment: **Matuq Muhammad MATUQ**

Governor, Central Bank: **Farhat Omer Ben GDARA**

Charge d'Affaires, People's Bureau, Washington: **Ali Suleiman AUJALI**

Permanent Representative to the UN, New York: **Giadalla Azzoz Belgasem ETTALHI**

The Libyan Embassy is located at 2600 Virginia Avenue NW, Suite 705, Washington DC 20037 (tel. 202-944-9601, fax 202-944-9060).

ECONOMY

The government dominates Libya's socialist-oriented economy through complete control of the country's oil resources, which account for approximately 97% of export earnings, 75% of government receipts, and 54% of the gross domestic product. Oil revenues constitute the principal source of foreign exchange. Much of the country's income has been lost to waste, corruption, conventional armaments purchases, and attempts to develop weapons of mass destruction, as well as to large donations made to developing countries in attempts to increase Qadhafi's influence in Africa and elsewhere. Although oil revenues and a small population give Libya one of the highest per capita GDPs in Africa, the government's mismanagement of the economy has led to high inflation and increased import prices. These factors resulted in a decline in the standard of living from the late 1990s through 2003.

Despite efforts to diversify the economy and encourage private sector participation, extensive controls of prices, credit, trade, and foreign exchange constrain growth. Import restrictions and inefficient resource allocations have caused periodic shortages of basic goods and foodstuffs.

Although agriculture is the second-largest sector in the economy, Libya imports most foods. Climatic conditions and poor soils severely limit output, while higher incomes and a growing population have caused food consumption to rise. Domestic food production meets about 25% of demand.

On September 20, 2004, President George W. Bush signed an Executive Order ending economic sanctions imposed under the authority of the International Emergency Economic Powers Act (IEEPA). U.S. persons are no longer prohibited from working in Libya, and many American companies are actively seeking investment opportunities in Libya. The government has announced ambitious plans to increase foreign investment in the oil and gas sectors to significantly boost production capacity. The government is also pursuing a number of infrastructure projects such as highways, railways, telecommunications backbones, and irrigation.

FOREIGN RELATIONS

Since 1969, Qadhafi has determined Libya's foreign policy. His principal foreign policy goals have been Arab unity, elimination of Israel, advancement of Islam, support for Palestinians, elimination of outside—particularly Western—influence in the Middle East and Africa, and support for a range of "revolutionary" causes.

After the 1969 coup, Qadhafi closed American and British bases on Libyan territory and partially nationalized all foreign oil and commercial interests in Libya. He also played a key role in promoting the use of oil embargoes as a political weapon for challenging the West, hoping that an oil price rise and embargo in 1973 would persuade the West—especially the United States—to end support for Israel. Qadhafi rejected both Soviet communism and Western capitalism, and claimed he was charting a middle course. Libya's relationship with the former Soviet Union involved massive Libyan arms purchases from the Soviet bloc and the presence of thousands of east bloc advisers. Libya's use—and heavy loss—of Soviet-supplied weaponry in its war with Chad was a notable breach of an apparent Soviet-Libyan understanding not to use the weapons for activities inconsistent with Soviet objectives. As a result, Soviet-Libyan relations reached a nadir in mid-1987.

After the fall of the Warsaw Pact and the Soviet Union, Libya concentrated on expanding diplomatic ties with Third World countries and increasing its commercial links with Europe and East Asia. Following the imposition of UN sanctions in 1992, these ties significantly diminished. Following a 1998 Arab League meeting in which fellow Arab states decided not to chal-

lenge UN sanctions, Qadhafi announced that he was turning his back on pan-Arab ideas, which had been one of the fundamental tenets of his philosophy.

Instead, Libya pursued closer bilateral ties, particularly with North African neighbors Egypt, Tunisia, and Morocco. It has also sought to develop its relations with Sub-Saharan Africa, leading to Libyan involvement in several internal African disputes in the Democratic Republic of Congo, Sudan, Somalia, Central African Republic, Eritrea and Ethiopia. Libya has also sought to expand its influence in Africa through financial assistance, ranging from aid donations to impoverished neighbors such as Niger to oil subsidies to Zimbabwe, and through participation in the African Union. Qadhafi has proposed a borderless "United States of Africa" to transform the continent into a single nation-state ruled by a single government. This plan has been greeted with skepticism. Libya has played a helpful role in facilitating the provision of humanitarian assistance to Darfur refugees in Chad.

One of the longest-standing issues in Libya's relationship with the European Union and the international community was resolved in July 2007 with the release of five Bulgarian nurses and a Palestinian doctor who had been convicted in 1999 of deliberately infecting over 400 children in a Benghazi hospital with the HIV virus. The six medics were sentenced to death in 2004, a sentence that was upheld by the Libyan Supreme Court but commuted in July 2007 by the Higher Judicial Council to life in prison. Under a previous agreement with the Bulgarian Government on the repatriation of prisoners, the medics were allowed to return to Bulgaria to finish their sentence, where upon arrival the Bulgarian president pardoned all six. The Benghazi International Fund, established by the United States and its European allies, raised $460 million to distribute to the families of the children infected with HIV, each of whom received $1 million.

Terrorism

Libya has taken significant steps to mend its international image and formally renounced terrorism in a letter to the UN Security Council in August 2003. In 1999, the Libyan government surrendered two Libyans suspected of involvement in the Pan Am 103 bombing, leading to the suspension of UN sanctions. On January 31, 2001, a Scottish court seated in the Netherlands found one of the suspects, Abdel Basset al-Megrahi, guilty of murder in connection with the bombing, and acquitted the second suspect, Al-Amin Khalifa Fhima. Megrahi's conviction was upheld on March 14, 2002, but an appeals hearing was granted in June 2007 by the Scottish High Court.

UN sanctions were lifted on September 12, 2003 following Libyan compliance with its remaining UNSCR requirements on Pan Am 103, including acceptance of responsibility for the actions of its officials and payment of appropriate compensation. Libya paid compensation in 1999 for the death of British policewoman Yvonne Fletcher, a move that preceded the reopening of the British Embassy in Tripoli, and paid damages to the families of the victims in the bombing of UTA Flight 772. With the lifting of UN sanctions in September 2003, each of the families of the victims of Pan Am 103 received $4 million of a maximum $10 million in compensation. After the lifting of U.S. IEEPA-based sanctions on September 20, 2004, the families received a further $4 million.

On November 13, 2001, a German court found four persons, including a former employee of the Libyan embassy in East Berlin, guilty in connection with the 1986 La Belle disco bombing, in which two U.S. servicemen were killed. The court also established a connection to the Libyan government. The German Government demanded that Libya accept responsibility for the La Belle bombing and pay appropriate compensation. A compensation deal for non-U.S. victims was agreed to in August 2004. U.S. victims continue to pursue their claims in federal court.

By 2003, Libya appeared to have curtailed its support for international terrorism, although it may have retained residual contacts with some of its former terrorist clients. In August 2004, the Department of Justice entered into a plea agreement with Abdulrahman Alamoudi, in which he stated that he had been part of a 2003 plot to assassinate Saudi Crown Prince Abdallah (now King Abdallah) at the behest of Libyan government officials.

In 2005, the Saudi Government pardoned the individuals accused in the assassination plot. During the 2005 UN General Assembly session, Foreign Minister Shalgam issued a statement that reaffirmed Libya's commitment to the statements made in its letter addressed to the Security Council on August 15, 2003, renouncing terrorism in all its forms and pledging that Libya will not support acts of international terrorism or other acts of violence targeting civilians, whatever their political views or positions. Libya also expressed its commitment to continue cooperating in the international fight against terrorism. On June 30, 2006, the U.S. rescinded Libya's designation as a state sponsor of terrorism.

U.S.-LIBYAN RELATIONS

The United States supported the UN resolution providing for Libyan independence in 1951 and raised the status of its office at Tripoli from a consulate general to a legation. Libya opened a legation in Washington, DC, in 1954. Both countries subsequently raised their missions to embassy level.

After Qadhafi's 1969 coup, U.S.-Libyan relations became increasingly strained because of Libya's foreign policies supporting international terrorism and subversion against moderate Arab and African governments. In 1972, the United States withdrew its ambassador. Export controls on military equipment and civil aircraft were imposed during the 1970s, and

U.S. embassy staff members were withdrawn from Tripoli after a mob attacked and set fire to the embassy in December 1979. The U.S. Government designated Libya a "state sponsor of terrorism" on December 29, 1979.

In May 1981, the U.S. Government closed the Libyan "people's bureau" (embassy) in Washington, DC, and expelled the Libyan staff in response to a general pattern of conduct by the people's bureau contrary to internationally accepted standards of diplomatic behavior.

In August 1981, two Libyan jets fired on U.S. aircraft participating in a routine naval exercise over international waters of the Mediterranean claimed by Libya. The U.S. planes returned fire and shot down the attacking Libyan aircraft. In December 1981, the State Department invalidated U.S. passports for travel to Libya and, for purposes of safety, advised all U.S. citizens in Libya to leave. In March 1982, the U.S. Government prohibited imports of Libyan crude oil into the United States and expanded the controls on U.S.-origin goods intended for export to Libya. Licenses were required for all transactions, except food and medicine. In March 1984, U.S. export controls were expanded to prohibit future exports to the Ras Lanuf petrochemical complex. In April 1985, all Export-Import Bank financing was prohibited.

Due to Libya's continuing support for terrorism, the United States adopted additional economic sanctions against Libya in January 1986, including a total ban on direct import and export trade, commercial contracts, and travel-related activities. In addition, Libyan Government assets in the United States were frozen. When evidence of Libyan complicity was discovered in the Berlin discotheque terrorist bombing that killed two American servicemen, the United States responded by launching an aerial bombing attack against targets near Tripoli and Benghazi in April 1986. Subsequently, the United States maintained its trade and travel embargoes and brought diplomatic and economic pressure to bear against Libya. This pressure helped to bring about the Lockerbie settlement and Libya's renunciation of WMD and MTCR-class missiles.

In 1991, two Libyan intelligence agents were indicted by federal prosecutors in the U.S. and Scotland for their involvement in the December 1988 bombing of Pan Am flight 103. In January 1992, the UN Security Council approved Resolution 731 demanding that Libya surrender the suspects, cooperate with the Pan Am 103 and UTA 772 investigations, pay compensation to the victims' families, and cease all support for terrorism. Libya's refusal to comply led to the approval of UNSC Resolution 748 on March 31, 1992, imposing sanctions designed to bring about Libyan compliance. Continued Libyan defiance led to passage of UNSC Resolution 883—a limited assets freeze and an embargo on selected oil equipment—in November 1993. UN sanctions were lifted on September 12, 2003, after Libya fulfilled all remaining UNSCR requirements, including renunciation of terrorism, acceptance of responsibility for the actions of its officials, and payment of appropriate compensation to the victims' families.

On December 19, 2003, Libya announced its intention to rid itself of WMD and MTCR-class missile programs. Since that time, it has cooperated with the U.S., the U.K., the International Atomic Energy Agency, and the Organization for the Prohibition of Chemical Weapons toward these objectives. Libya has also signed the IAEA Additional Protocol and has become a State Party to the Chemical Weapons Convention.

In recognition of these actions, the U.S. began the process of normalizing relations with Libya. The U.S. terminated the applicability of the Iran-Libya Sanctions Act to Libya and the President signed an Executive Order on September 20, 2004 terminating the national emergency with respect to Libya and ending IEEPA-based economic sanctions. This action had the effect of unblocking assets blocked under the Executive Order sanctions. Restrictions on cargo aviation and third-party code-sharing have been lifted, as have restrictions on passenger aviation. Certain export controls remain in place. U.S. diplomatic personnel reopened the U.S. Interest Section in Tripoli on February 8, 2004. The mission was upgraded to a U.S. Liaison Office on June 28, 2004, and to a full embassy on May 31, 2006. The establishment in 2005 of an American School in Tripoli demonstrates the increased presence of Americans in Libya, and the continuing normalization of bilateral relations. Libya re-established its diplomatic presence in Washington with the opening of an Interest Section on July 8, 2004, which was subsequently upgraded to a Liaison Office in December 2004 and to a full embassy on May 31, 2006.

On May 15, 2006, the State Department announced its intention to rescind Libya's designation as a state sponsor of terrorism in recognition of the fact that Libya had met the statutory requirements for such a move: it had not provided any support for acts of international terrorism in the preceding six-month period, and had provided assurances that it would not do so in the future. On June 30, 2006, the U.S. rescinded Libya's designation as a state sponsor of terrorism. In July 2007, Mr. Gene Cretz was nominated by President Bush as ambassador to Libya.

TRAVEL

Consular Information Sheet

August 13, 2008

Country Description: Officially known as the Great Socialist People's Libyan Arab Jamahiriya, Libya has a developing economy. Islamic ideals and beliefs provide the conservative foundation of the country's customs, laws, and practices. Tourist facilities are not widely available.

Entry Requirements: Passports and visas are required. The restrictions on the use of U.S. passports for travel to, in, or through Libya were lifted in February 2004. Please see the section below on Special Circumstances.

Without prior notice, the Libyan government on November 11, 2007 "reinstated" a requirement that all foreign travelers must have an Arabic translation of their personal biographic data added to their passport in order to apply for a Libyan visa, or to enter Libya. This requirement includes foreigners who already received visas before the requirement was put into place, including those foreigners currently resident in Libya. Since that date, foreign travelers whose passports do not have Arabic translations have been denied entry into Libya or refused boarding by airlines on flights into Libya.

The U.S. passport is a U.S. travel document that meets all generally recognized international standards. While the Libyan government has the right to impose its own requirements for travelers in connection with obtaining a Libyan visa, it also has the responsibility to give travelers information on where and how to meet these requirements. Travelers should be aware that in some cases, Libyan officials may ask that U.S. citizens obtain translations from U.S. Government-approved translation services. However, U.S. consular officers have no authority to designate or certify private translations; nor do they have authority to place a consular authentication stamp over a privately-obtained translation. American citizens who hold Libyan visas or who intend to apply for a visa are advised to contact the nearest Libyan embassy or consulate for information on how to obtain an acceptable translation. Information from Libyan embassies and consulates may differ from country to country. American citizens may also contact the Consular Section at the U.S. embassy or consulate for additional information.

The Government of Libya does not allow persons with passports bearing an Israeli visa or entry/exit stamps to enter the country. At this time, neither Libya nor the U.S. provides visa services to the general public in each other's countries; U.S. visitors to Libya should therefore plan to obtain a visa via a third country. Libyan visas require an invitation or sponsor, can take up to several months to process, and should be obtained prior to travel. All visas are vetted and approved by immigration departments in Tripoli and only issued by the appropriate Libyan Embassy upon receipt of that approval. There may be another wait for actual visa issuance once approval has been received.

For tourists, the visa application procedure in most cases requires a letter of invitation from an accredited tour company in Libya; for business travelers, a letter of invitation is needed from the Libyan business entity. Americans who apply for Libyan visas are experiencing significant delays, often waiting several weeks or months if their applications are approved at all. Inconsistent Libyan visa practice is subject to change without notice and visa service to American citizens is often blocked without warning. With few exceptions, Libya has stopped issuing tourist visas to Americans. It is recommended that Americans always obtain individual Libyan visas prior to travel, rather than group visas. Americans who expected to enter on group tour visas or individual airport visas arranged by Libyan sponsors have routinely been denied entry at the air and sea ports and have been forced to turn back at the airport or remain onboard ship at the port while other nationals disembark. The U.S. Embassy in Tripoli cannot provide assistance to American citizens seeking Libyan visas.

Inquiries about obtaining a Libyan visa may be made through the Libyan Embassy in Washington, D.C. The Embassy is located at 2600 Virginia Avenue NW—Suite 705, Washington, DC 20037, phone number 202-944-9601, fax number 202-944-9606, website www.libyanbureau-dc.org. Neither the Libyan Mission to the UN in New York nor the Libyan Embassy in Washington, DC accepts visa applications from the general public.

The closest Libyan visa-issuing office to the continental United States is the Libyan People's Bureau in Ottawa, Canada; however, that office frequently declines to accept visa applications from American citizens. The land borders with Egypt and Tunisia are subject to periodic closures even to travelers with valid Libyan visas. Short-term closures of other land borders may occur with little notice. Within three days of arrival, visitors must register at the police station closest to where they are residing or they may encounter problems during their stay or upon departure.

Women and children in Libya are often subject to strict family controls. This can be a particular problem for young single women of marriageable age. Although a woman does not need her father's or husband's explicit consent every time she wishes to leave Libya, a Libyan husband may take legal action to prevent his wife from leaving the country, regardless of her nationality. While not illegal, it is unusual for women and children to travel alone. Children under 18 whose fathers are Libyan must have the father's permission to depart Libya, even if the mother has been granted full custody by a Libyan court.

The Libyan Government requires all its citizens, including dual nationals of Libyan descent, to enter and depart Libya on Libyan documents. In some cases American citizens of Libyan descent have entered Libya on old or expired Libyan identity document and then discovered that they cannot depart Libya without obtaining a valid Libyan passport, which can be a cumbersome process.

Safety and Security: As Libya has taken steps to cooperate in the global war on terrorism, the Libyan Government's designation as a state sponsor of terrorism was rescinded on June 30, 2006. Recent worldwide terrorist alerts have stated that extremist groups continue to plan terrorist attacks against U.S. interests in the region. Therefore, any American citizen who decides to travel to Libya should maintain a strong security posture by being aware of surroundings, avoiding crowds and demonstrations, keeping a low profile, and varying times and routes for all required travel.

Security personnel may at times place foreign visitors under observation. Hotel rooms, telephones, and fax machines may be monitored, and personal possessions in hotel rooms may be inspected. Taking photographs of anything that could be perceived as being of military or security interest may result in problems with the authorities.

For the latest security information, Americans traveling abroad should regularly monitor the Department of State, Bureau of Consular Affairs' web site at http://travel.state.gov, where the current Travel Warnings and Travel Alerts, as well as the Worldwide Caution, can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S. and Canada, or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: Crime against foreigners is a growing problem in Libya. The most common types of crime are property crimes of opportunity, to include vehicle burglaries. Pick-pocketing and residential burglaries are also on the increase. Women routinely face verbal harassment. While physical violence is not common, there have been instances of assault against women. These assaults can range from sexual groping or assault/battery, to attempted rape.

In many countries around the world, counterfeit and pirated goods are widely available. Transactions involving such products may be illegal under local law. In addition, bringing them back to the United States may result in forfeitures and/or fines. More information on this serious problem is available at http://www.cybercrime.gov/18usc2320.htm.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, contact family members or friends and explain how funds could be transferred.

Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

Medical Facilities and Health Information: While some health care providers have been trained in the United States or Europe, basic modern medical care and/or medicines may not be available in Libya. Most Libyan citizens prefer to be treated outside of Libya for ailments such as heart disease and diabetes. A representative list of healthcare providers is available at the U.S. Embassy Tripoli's web site at http://libya.usembassy.gov/medical_information.html.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's web site at http://wwwn.cdc.gov/travel.

For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith/en.

Some HIV/AIDS entry restrictions exist for visitors to and foreign residents of Libya. All positive HIV/AIDS tests made in country must be reported to the government.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Libya is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

Paved roads in rural areas are satisfactory; however, many rural roads are unpaved (i.e. dirt roads). Also, major highways along the seacoast and leading south merge into single-lane highways once they are outside the cities. These roads are heavily trafficked and precarious to navigate, especially at night and during the winter rainy season. The presence of sand deposits, and domestic and wild animals that frequently cross these highways and rural roads, makes them even more hazardous.

Availability of roadside assistance is extremely limited and offered only in Arabic. In urban areas and near the outskirts of major cities there is a greater possibility of assistance by

police and emergency ambulance services, although they are usually ill equipped to deal with serious injuries or accidents.

Driving in Libya may be hazardous, and there is a high accident rate. Police enforcement of traffic signs and laws is rare. As a result, it is often difficult to anticipate the actions of other drivers on Libyan streets and highways. Wind-blown sand can reduce visibility without warning. Road conditions are poor, and public transportation, which is limited to occasional bus service, is poor. Taxis are available, but many taxi drivers are reckless and untrained, and English-speaking drivers are extremely rare. The sidewalks in urban areas are often in bad condition and cluttered, but pedestrians are able to use them.

Aviation Safety Oversight: As there is no direct commercial air service between the United States and Libya, the U.S. Federal Aviation Administration (FAA) has not assessed Libya's Civil Aviation Authority for compliance with International Civil Aviation Organization (ICAO) aviation safety standards. For more information, travelers may visit the FAA's web site at http://www.faa.gov.

Special Circumstances: Libya's economy operates on a "cash-only" basis for most transactions, even though U.S. law now permits the use in Libya of credit cards and checks drawn on U.S. banks. Some hotels, restaurants, and major airlines are the only businesses known to accept credit cards (Visa more often than MasterCard). It is recommended that travelers consult their credit card entity prior to travel to ensure that transactions from Libya can be accepted by that entity. A very limited number of ATM machines are being put into service at a few large hotels, major office complexes, the airport, and one or two markets. Service is sporadic and sometimes unreliable.

Foreign visitors should be aware that the penalties for use of unauthorized currency dealers are severe. Foreign visitors should also be aware that their passports might be confiscated in business disputes and/or they may not be permitted to depart Libya until the dispute has been settled. The workweek is Sunday-Thursday. Most U.S. economic sanctions against Libya were terminated effective September 21, 2004. For further information, please contact the Office of Foreign Assets Control at http://www.treas.gov/offices/enforcement/ofac.

On June 30, 2006, the U.S. Department of State officially rescinded Libya's designation as a State Sponsor of Terrorism. On August 31, 2006, the U.S. Commerce Department's Bureau of Industry and Security (BIS) published an amendment to the Export Administration Regulations (EAR) in the Federal Register. This amendment updated BIS' license requirements for Libya under the EAR due to its removal from the State Sponsors' List. For further information specific to Libya, contact BIS' Office of Nonproliferation and Treaty Compliance/Foreign Policy Controls Division at (202) 482-4252. Libya-related information is also found on the BIS web site: http://www.bis.doc.gov.

Libyan customs authorities enforce strict regulations concerning the introduction into Libya or removal from Libya of firearms, religious materials, antiquities, medications, and currency. Importation of pornographic materials is illegal. The importation and consumption of alcohol and pork products are illegal in Libya. At times, passengers arriving in Libya have been required to bring varying amounts of convertible currency into Libya. This requirement is subject to a border check, and the passenger faces possible deportation if this requirement is not met. It is advisable to contact any Libyan Embassy abroad for specific information regarding customs requirements.

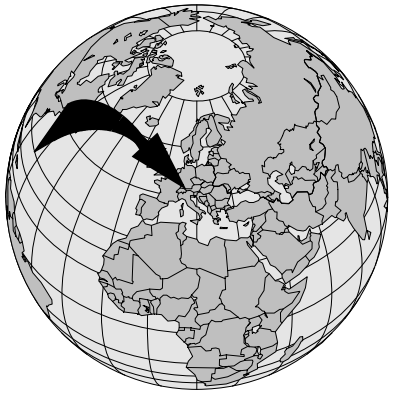
In addition to being subject to all Libyan laws, U.S. citizens of Libyan origin may also be subject to other laws that impose special obligations on Libyan citizens. The Government of Libya considers all children born to Libyan fathers to be Libyan citizens even if they were not issued a Libyan birth certificate or a passport. Dual Libyan-American nationals may not enter and leave Libya on their U.S. passports, and must obtain a Libyan travel document before traveling to Libya.

Persons with dual nationality who travel to Libya on their Libyan passports are normally treated as Libyan citizens by the local government. The ability to provide U.S. consular assistance to those traveling on Libyan passports is extremely limited.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses.

Persons violating Libyan laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Libya are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.



Registration and Embassy Locations: Americans living or traveling in Libya are encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration web site so that they can obtain updated information on travel and security within Libya.

Americans without Internet access may register directly with the near-

est U.S. Embassy or Consulate. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency.

Although diplomatic relations were upgraded to embassy status on May 31, 2006, the U.S. Embassy in Tripoli is operating with limited staff and in interim facilities. A consular officer is available to provide assistance to U.S. citizens.

Appointments for routine services can be made by telephone from 9am—4 pm Sundays through Thursdays (except U.S. and Libyan holidays) at (218) 21-335-1235 or via e-mail at TripoliConsular@state.gov. In the event of an emergency involving an American citizen, the after-hours telephone number is (218) 91-220-0125. General information, including forms, is available on the U.S. Embassy's web site at http://libya.usembassy.gov.

LIECHTENSTEIN

Compiled from the April 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Principality of Liechtenstein

PROFILE

Geography

Area: 61.7 sq. miles. (160 sq km.); about the size of Washington, DC.
Cities: Capital—Vaduz.
Terrain: 66% mountains, the remainder hills and plateau situated next to the Rhine.
Climate: Continental; cold, cloudy winters with frequent snow or rain; cool to moderately warm, cloudy, humid summers.

People

Nationality: Noun—Liechtensteiner(s), adjective—Liechtenstein.
Population: (2007) 35,168, of which 33.9% foreigners, mainly Swiss, Austrians, Germans, and Italians.
Annual population growth rate: 2.1%.
Ethnic groups: Liechtensteiners, Swiss, Austrians, and Germans.
Religions: Roman Catholic 80.4%, Protestant 7.1%, others 12.5%.
Languages: German (official), Alemannic dialect.

Government

Type: Hereditary constitutional monarchy.
Independence: January 23, 1719 Imperial Principality of Liechtenstein established; July 12, 1806 established independence from the Holy Roman Empire.
Constitution: October 5, 1921.
Government branches: Executive—chief of state: Prince Hans Adam II (assumed executive powers on August 26, 1984, acceded to the throne on November 13, 1989); Heir Apparent Prince Alois, son of the monarch, was born on June 11, 1968. Alois was appointed the permanent representative of the Prince on August 15, 2004. Head of government: Otmar Hasler (since April 5, 2001). Cabinet: Five cabinet members. The cabinet is elected by the Diet, and approved by the Prince. Legislative—Unicameral Diet or Landtag (25 seats; members are elected by direct popular vote under proportional representation to serve four-year terms). Judicial—District Court (low), Superior Court (medium), Supreme Court (high).
Political subdivisions: The country is subdivided into 11 districts.
Political parties: Fatherland Union (VU), Progressive Citizens' Party (FBP), and the Free List (FL).
Currency: Swiss Franc.
National holidays: Assumption Day, August 15.

Economy

GDP: (2004) U.S. $4.28 billion (SFr. 4.28 billion).
Annual growth rate: 2.6%.
Unemployment: (2006): 3.3%, or 584 individuals (based on new definition).
Avg. inflation rate: (2006) 1.1%.
Agriculture: (7% of GDP) Wheat, barley, corn, potatoes, livestock, dairy products.
Industry: (44% of GDP) Electronics, metal manufacturing, textiles, ceramics, pharmaceuticals, food products, precision instruments.
Services: (26% of GDP) Financial, tourism.
Trade: (2006) Exports—$3.6 billion (SFr 3.6 billion, +11.7% over 2005). Main products—small specialty machinery, dental products, stamps, hardware, pottery. Major markets—U.S., Germany, Switzerland, France, Italy, Taiwan, Japan, Austria, and United Kingdom. Imports—$2.16 billion (SFr 2.16 billion, +13.3% over 2005). Main products—machinery, metal goods, textiles, foodstuffs, motor vehicles. Major suppliers—EU countries, Switzerland.
Exchange rate: (April 2008) Swiss francs per U.S. dollar = 1.0.

HISTORY

The Liechtenstein Family of Austria acquired the fiefs of Vaduz and Schellenberg in 1699 and 1713 respectively, and gained the status of an independent principality of the Holy Roman Empire in 1719 under the

name Liechtenstein. The French, under Napoleon, occupied the country for a few years, but Liechtenstein regained its independence in 1815 within the new German Confederation. In 1868, after the Confederation dissolved, Liechtenstein disbanded its army of 80 men and declared its permanent neutrality, which was respected during both world wars.

In 1919, Liechtenstein entrusted its external relations to neutral Switzerland. After World War II, Liechtenstein became increasingly important as a financial center, and the country became more prosperous. In 1989, Prince Hans Adam II succeeded his father to the throne and in 1996 settled a long-running dispute with Russia over the Liechtenstein family's archives, which had been confiscated during the Soviet occupation of Vienna in 1945 and later moved to Moscow. In 1978, Liechtenstein became a member of the Council of Europe and then joined the UN in 1990, the European Free Trade Association (EFTA) in 1991, and both the European Economic Area (EEA) and World Trade Organization (WTO) in 1995.

GOVERNMENT

According to the Constitution, the government is a collegial body and consists of the head of government and four governmental councilors. The head of government and ministers are appointed by the Prince, following the proposals of the Parliament.

Amendments to the constitution and new laws have to be adopted by parliament, signed by both the Prince and the Head of Government, and published in the Principality's Law Gazette.

Prince Hans Adam II is the Head of State. He is entitled to exercise his right to state leadership in accordance with the provisions of the constitution and of other laws. On August 15, 2004 Prince Hans-Adam II entrusted Hereditary Prince Alois as his representative with the exercise of all sovereign rights pertaining to him, in accordance with the Liechtenstein Constitution.

He represents the state vis-à-vis foreign states. He signs international treaties either in person or delegates this function to a plenipotentiary. In accordance with international law, some treaties only become valid when they have been ratified by parliament.

The Prince's involvement in legislation includes the right to take initiatives in the form of government bills and the right to veto parliamentary proposals.

The Prince has the power to enact princely decrees. Emergency princely decrees are possible when the security and welfare of the country is at stake. A countersignature by the Head of Government is required.

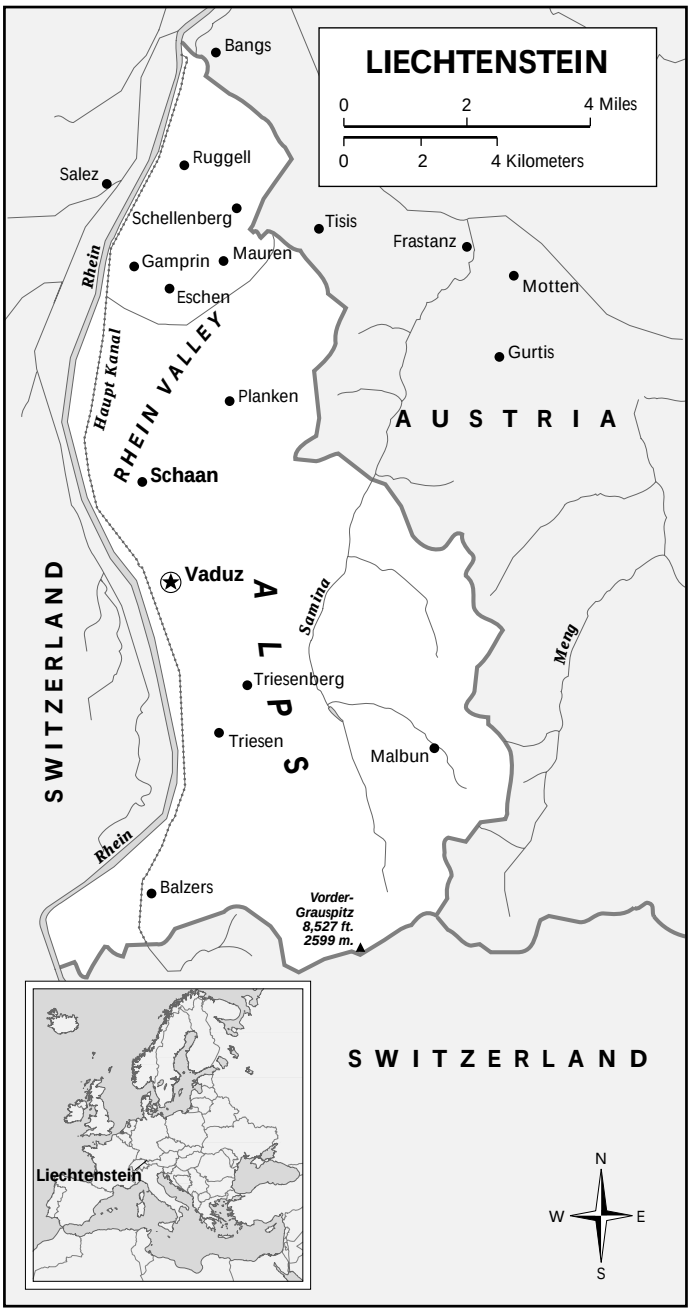
The Prince has the right to convene and adjourn parliament and, for serious reasons, to adjourn it for three months or to dissolve it.

The Prince nominates the government, district and high court judges, the judges of the Supreme Court, and the presidents and their deputies of the Constitutional Court and of the Administrative Court of Appeal on the basis of the names put forward by parliament.

The Prince's other authorities include mitigating and commuting punishments that have been imposed with legal force and the abolition—i.e. the dismissal—of investigations that have been initiated. All judgments are issued in the name of the Prince.

Citizens elect the parliament directly under a system of proportional representation. Until 1989, 15 members represented the population of the two constituencies (6 for the lowland area and 9 for the highland area). Since 1989 the lowland constituency has been entitled to have 10 members and the highland area 15 members.

The Parliament's main task is to discuss and adopt resolutions on constitutional proposals and draft government bills. It has the additional duties of giving its assent to important international treaties, of electing members of the government, judges and board members of the Principality's institutions, setting the annual budget and approving taxes and other public charges, and supervising the administration of the state.



The Parliament observes its rights and duties in the course of sessions of the whole parliament and through the parliamentary commissions that it elects. All members of parliament exercise their mandates in addition to their normal professions or occupations.

The President of parliament and his deputy are both elected at the opening meeting for the current year. The President convenes the individual meetings during the session, leads them and represents parliament externally.

During the parliamentary recess—normally from January to February/March—a "state committee" assumes parliament's duties, and such a committee must also be elected in the case of any adjournment or dissolution of parliament. A "state committee" consists of the President of parliament and four other members.

The duties and working procedures of parliament are laid down in the constitution and in parliament's standing orders.

The government of Liechtenstein is based on the principle of collegiality. The government consists of the Head of Government and four Councilors. The members of the government are proposed by the parliament and are appointed by the Prince. Only men or women born in Liechtenstein, and who are eligible to be elected to parliament, may be elected to the government committee. The two electoral areas of the country, the highlands and the lowlands, are entitled to at least two members of the government, and their respective deputies must come from the same area.

POLITICAL CONDITIONS

The political parties are the moving forces with regard to the composition of the government and in the parliament. For the 2005-2009 legislature period of office one Councilor and three deputies are women. From 1938 to 1997, Liechtenstein had a coalition government and there were only two parties in parliament, the Fatherland Union and the Progressive Citizen's Party. Liechtenstein's distinctive form of coalition government came to an end in April 1997. The Fatherland Union took sole responsibility for the government during the 1997 to 2001 parliament, with its members filling all the positions on the government committee. In 2001, the Progressive Citizen's Party held the majority, and provided all the members of the government. The minority parties, as opposition parties, acted as a check on the government in parliament and on parliamentary commissions.

In the March 2005 parliamentary election a new political party, the Free List, earned enough votes to gain three seats, preventing either of the two larger parties from gaining an absolute majority. A new Parliament was elected and a grand coalition was formed; the two strongest factions, the center-right Progressive Citizens' Party and the center-left Fatherland Union, holding 3 and 2 cabinet seats respectively. There are 25 seats in the Landtag, divided as follows: Progressive Citizen's Party 12, Fatherland Union 10, Free List 3. There are 6 women in the 25-seat Parliament and 1 in the 5-member Cabinet. Women first gained the right to vote in Liechtenstein and a growing number of women are active in politics. Women served on the executive committees of the major parties.

In March 2003, the Liechtenstein electorate endorsed with a decisive margin Prince Hans-Adam II's proposal for a revision of the Liechtenstein Constitution which granted him the power to dissolve Parliament and appoint an interim government, dismiss individual members of Government, and veto any parliamentary legislation by not signing the bill within six months. Without the approval of the reigning prince, no further constitutional amendments can be adopted, except in the case of a referendum abolishing the royal house. The Prince now also has final approval on the appointment of judges, and the State Court loses its key competence to mediate between the Government and the Prince on constitutional matters. In September 2005 an ad-hoc committee of the Parliamentary Assembly of the Council of Europe met with a delegation of the Liechtenstein Parliament in Vaduz for a first round of talks on this change to the constitutional order. The talks are part of a dialogue that the Parliamentary Assembly chose as an alternative to a standard monitor-

ing procedure to assess the constitutional order following the adoption in 2003 of a series of amendments to the Liechtenstein Constitution.

Principal Government Officials

Last Updated: 11/12/08

Head of State: **HANS ADAM II, Prince**
Head of Govt. (Prime Min.): **Otmar HASLER**
Dep. Head of Govt. (Dep. Prime Min.): **Klaus TSCHUETSCHER**

Chmn., Liechtenstein State Bank: **Josef FEHR**
Ambassador to the US: **Claudia FRITSCHE**
Permanent Representative to the UN, New York: **Christian WENAWESER**

Liechtenstein maintains an embassy in the United States at 888 17th Street, NW, Suite 1250, Washington, DC 20006. Telephone (202) 331-0590.

ECONOMY

Since the signing of the Customs Treaty in 1924, Liechtenstein and Switzerland have represented one mutual economic area with open borders between the two countries. Liechtenstein also uses the Swiss franc as its national currency, and Swiss customs officers secure the border with Austria.

Liechtenstein is a member of EFTA and joined the European Economic Area (EEA) in 1995 in order to benefit from the EU internal market. The liberal economy and tax-system make Liechtenstein a safe, trustworthy and success-oriented place for private and business purposes, especially with its highly modern, internationally laid-out infrastructure and nearby connections to the whole world. In 2007, Liechtenstein will have an obligation under the EEA treaty to harmonize its laws with EU directives 2005/36 and 1999/42 on the mutual recognition of EU and EEA university and professional diplomas. Liechtenstein is also part of the EU fund on research and technology and is entitled to participate to EU projects and subsidies.

The Principality of Liechtenstein has gone through economic and cultural development in the last 40 years like no other Western country. In this short period of time Liechtenstein developed from mainly an agricultural state to one of the most highly industrialized countries in the world.

Besides its efficient industry, Liechtenstein also has a strong services sector. Four out of ten employees work in the services sector, a relatively high proportion of whom are foreigners, including those who commute across the border from the neighboring states of Switzerland and Austria. Total exports increased from $3 billion (SFr. 3 billion) in 2000 to $3.6 billion (SFr. 3.6 billion) in 2006, while total imports increased from $1.5 billion (SFr. 1.5 billion) to $2.16 billion (SFr. 2.16 billion) during the same period. In 2005, about 14% of Liechtenstein's goods were exported to Switzerland, 44% to the EU, 18% to the U.S., 24% to the Asia/Pacific, and the remaining share to the rest of the world. Liechtenstein imports more than 90% of its energy requirements. The Liechtenstein industrial sector contributes 44% of the country's GDP, followed by services (26%) and agriculture (7%). Despite Liechtenstein's overall good competitive performance, there is a trend among businesses to outsource their production in low cost countries.

In 2005, the U.S. was the third most important trading partner for Liechtenstein, with approximately $521 million (SFr. 521 million) worth of exports and $72 million (SFr. 72 million) of imports. Germany was first with a total trade value of $2.1 billion (SFr. 2.1 billion) and Austria second with $1.4 billion (SFr. 1.4 billion). Although Switzerland is an important trading partner, trade statistics are unavailable because both countries are in a customs union. Approximately 5% of the country's revenue is invested in research and development, one of the driving forces of the success of Liechtenstein's economy. The Principality of Liechtenstein is also known as an important financial center, primarily because it specializes in financial services for foreign entities. The country's low tax rate, loose incorporation and corporate governance rules, and traditions of strict bank secrecy have contributed significantly to the ability of financial intermediaries in Liechtenstein to attract funds from outside the country's borders. The same factors made the country attractive and vulnerable to money launderers, although late 2000 legislation has strengthened regulatory oversight of illicit funds transfers.

Liechtenstein has chartered 17 banks, 3 non-bank financial companies, and 71 public investment companies, as well as insurance and reinsurance companies. Its 270 licensed fiduciary companies and 81 lawyers serve as nominees for, or manage, more than 75,000 entities (primarily corporations, institutions, or trusts), mostly for non-Liechtenstein residents. Approximately one-third of these entities hold the controlling interest in other entities, chartered in countries other than Liechtenstein. The Principality's laws permit the corporations it charters to issue bearer shares. Until recently, the Principality's banking laws permitted banks to issue numbered accounts, but new regulations require strict know-your-customer practices for all accounts.

DEFENSE AND FOREIGN RELATIONS

Defense is the responsibility of Switzerland. In 1978, Liechtenstein became a member of the Council of Europe and then joined the UN in 1990, the European Free Trade Association (EFTA) in 1991, and both the European Economic Area (EEA) and World Trade Organization (WTO) in 1995.

U.S.-LIECHTENSTEIN RELATIONS

The relations between the two countries are good. The two countries in 2002 signed a mutual legal assistance treaty focused largely on jointly combating money laundering and other illegal banking activities.

The U.S. does not have an embassy in Liechtenstein, but the U.S. Ambassador to Switzerland is also accredited to Liechtenstein.

TRAVEL

Consular Information Sheet—Switzerland

December 10, 2008

Country Description: Switzerland is a highly developed democracy. Liechtenstein is a democratically run constitutional monarchy.

Entry Requirements: Switzerland is a party to the Schengen agreement. As such, U.S. citizens may enter Switzerland for up to 90 days for tourist or business purposes without a visa. The passport should be valid for at least three months beyond the period of stay. For further details about travel into and within Schengen countries, please see our fact sheet.

Liechtenstein is not a party to the Schengen agreement. A visa is not required for stays up to 90 days.

For more information on entry requirements for both countries, travelers may contact the Embassy of Switzerland at 2900 Cathedral Avenue, N.W., Washington, D.C. 20008, telephone (202) 745-7900, or the nearest Swiss Consulate General in Atlanta, Chicago, Los Angeles, New York, or San Francisco. Visit the Embassy of Switzerland's web site at http://www.swissemb.org for the most current visa information.

Safety and Security: Switzerland remains largely free of terrorist incidents. However, like other countries in the Schengen area, Switzerland'sopen borders with its Western European neighbors allow the possibility of terrorist groups entering/exiting the country with anonymity. Americans are reminded to remain vigilant with regard to their personal security and to exercise caution. Although there have been no recent terrorist attacks in Switzerland, violence by anti-globalization, anti-Semitic, and anti-establishment (anarchist) groups does occur from time to time. This violence is typically in the form of property damage and clashes between these groups and the police. The potential for specific threats of violence involving American citizens in Switzerland is remote. Nevertheless, the Consular Agencies in Zurich and Geneva may close periodically to assess their security situation.

For the latest security information, Americans traveling abroad should regularly monitor the Department's Internet web site where the current Travel Warnings and Travel Alerts, including the Worldwide Caution Travel Alert, can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S., or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: Switzerland has a low rate of violent crime. However, pick-pocketing and purse snatching do occur in the vicinity of train and bus stations, airports, and some public parks, especially during peak tourist periods (such as Summer and Christmas) and when conferences, shows, or exhibits are scheduled in major cities. Liechtenstein has a low crime rate. Travel-

ers may wish to exercise caution on trains, especially on overnight trains to neighboring countries. Thieves, who steal from passengers while they sleep, can enter even locked sleeping compartments. Thieves have been known to work in pairs to target train passengers; while one member of the pair creates a diversion at a train window or on a platform, the other steals items left briefly unattended.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, contact family members or friends, and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

Switzerland, through its 26 cantons (states), has programs to assist victims of crime and their immediate relatives. Medical, psychological, social, financial, and legal assistance are available throughout the country. These programs also protect the rights of the victim during criminal proceedings. The victim may receive compensation for some damages, if requested during the criminal procedure. Information is available at the Swiss Department of Justice located on Bundesrain 20, 3003 Bern, telephone: 41-31-322-4750, as well as on the Internet at http://www.bj.admin.ch/bj/en/home.html.

The local equivalent to the "911" emergency line in Switzerland is fire 118; police 117; medical 144.

Medical Facilities and Health Information: Good medical care is widely available. Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's Internet site at http://wwwn.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith. The U.S. Department of State is unaware of any HIV/AIDS entry restrictions for visitors to or foreign residents of Switzerland.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Switzerland is provided for general reference only, and may not be totally accurate in a particular location or circumstance. Although many roads are mountainous and winding, road safety standards are high. In some mountain areas, vehicle snow chains are required in winter. Road travel can be more dangerous during summer, winter holidays, the Easter break, and Whitsunday weekend (late spring) because of increased traffic. Travel on expressways (indicated by green signs with a white expressway symbol) requires purchase of a sticker or "vignette," which must be affixed to the car's windshield. Vignettes can be purchased at most border crossings points, gas stations and at Swiss post offices. Drivers using the highway system without a vignette are subject to hefty fines levied on the spot. Public transportation in Switzerland and Liechtenstein is excellent.

Visit the website of Switzerland's national tourist office at http://www.myswitzerland.com.

Aviation Safety Oversight: The U.S. Federal Aviation Administration (FAA) has assessed the Government of Switzerland's Civil Aviation Authority as being in compliance with International Civil Aviation Organization (ICAO) aviation safety standards for oversight of Switzerland's air carrier operations. For more information, travelers may visit the FAA's web site at http://www.faa.gov.

Special Circumstances: Travelers who plan to participate in mountain activities (summer and winter) are strongly encouraged to buy mountain search and rescue insurance. Costs of search and rescue operations are the responsibility of the victim. Search and rescue insurance is available inexpensively in Switzerland and may be purchased at many Swiss post offices. Information can be obtained from the Swiss National Tourist Office, at http://www.myswitzerland.com, at most tourist information offices or with the Swiss Air Rescue Organization at http://www/rega.ch. Such insurance has proved useful as uninsured rescues can easily cost $25,000.

Switzerland's customs authorities encourage the use of an ATA (Admission Temporaire/Admission) Carnet for the temporary admission of professional equipment, commercial samples, and/or goods for exhibitions and fair purposes. ATA Carnet Headquarters located at the U.S. Council for International Business, 1212 Avenue of the Americas, New York, N.Y. 10036, and issues and guarantees the ATA Carnet in the United States. For additional information call (212) 354-4480, send an email to atacarnet@uscib.org, or visit http://www.uscib.org for details.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating Switzer-

land's laws, even unknowingly, may be expelled, arrested, or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Switzerland are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in Switzerland are encouraged to register with the U.S. Embassy in Bern, with the Consular Agencies in Geneva or Zurich, or through the State Department's travel registration web site, and to obtain updated information on travel and security within Switzerland and Liechtenstein. Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate. By registering, American citizens make it easier for the Embassy, Consulate, or Consular Agent to contact them in case of emergency. The U.S. Embassy is located at Jubilaeumstrasse 93, 3005 Bern; Tel. (41)(31) 357-7011, fax (41)(31) 357-7280. The Embassy's email address is bernacs@state.gov. The U.S. Embassy web site at http://bern.usembassy.gov answers many questions of interest to Americans visiting and residing in Switzerland.

The U.S. Consular Agency in Zurich is located at the American Center of Zurich, Dufourstrasse 101, 8008 Zurich; Tel: (41)(43) 499-2960, fax (41)(43) 499-2961. The U.S. Consular Agency in Geneva is located at rue Versonnex 7, CH-1207 Geneva, Tel: 022-840-51 60; fax 022-840-51 62. There is no U.S. Embassy or Consulate in Liechtenstein.

For assistance and information on travel and security in Liechtenstein, U.S. citizens may contact or register at the U.S. Embassy in Bern at the address above.

LITHUANIA

Compiled from the December 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Republic of Lithuania

PROFILE

Geography

Area: 65,200 sq. km. (26,080 sq. mi.); slightly larger than West Virginia.
Cities: (2008) Capital—Vilnius (pop. 542,809); other cities—Kaunas (358,107); Klaipeda (185,899); Siauliai (128,396).
Terrain: Lithuania's fertile, central lowland plains are separated by hilly uplands. A total of 758 rivers, many navigable, and 2,833 lakes cover the landscape. The coastline is 90 km. (56 mi.) long. Land use—44.2% arable land, 0.91% cultivated, 53.87% other.
Climate: With four distinct seasons, the climate is humid continental, with a moderating maritime influence from the Baltic Sea. January temperatures average -5ºC (23ºF); July, 17ºC (63ºF). The level of precipitation varies considerably from region to region: in the far west, average annual precipitation is 28-33 in., while in the central plain it is about 24 in.

People

Nationality: Noun and adjective—Lithuanian(s).
Population: (2008) 3,354,700.
Annual growth rate: (2007) -0.7%. Birth rate—9.6/1,000. Death rate—13.5/1,000.
Population density: (2007) 51.8 per sq. km.
Ethnic groups: (2007) Lithuanians 84.6%, Poles 6.3%, Russians 5.1%.
Religions: (2001 census) Roman Catholic (79%), Russian Orthodox (4.1%), Protestant (including Lutheran and Evangelical Christian Baptist) (1.9%).
Languages: (2008) Lithuanian (official language) (84.6%), Russian, and Polish
Education: Years compulsory—10 (until the age of 16). Literacy—99.6%.
Health: (2007) Infant mortality rate—6.9/1,000. Life expectancy—64.87 yrs. male, 77.20 yrs. female.
Work force: (2008) 1.59 million: services 61.3%; industry 30.3%; agriculture 8.4%.

Government

Type: Parliamentary democracy.
Constitution: On October 25, 1992, Lithuanians ratified a new constitution, which was officially signed on November 6 that year.
Government branches: Executive—President (chief of state), popularly elected every 5 years; Prime Minister (head of government); Legislative—Seimas (141-member Parliament). Judicial—Constitutional Court, Supreme Court, and Highest Administrative Court.
Political subdivisions: 10 counties and 60 municipalities.
Political parties: (December 2008) Four-party governing coalition has 82 members plus the Speaker. Conservatives—45 seats; National Revival Party faction—17 seats (including two independent members of parliament, or MPs) and the Speaker; Liberal Movement—11 seats; Liberal and Center Union faction—9 seats (including 1 independent MP). Opposition has 58 members: Social Democrat faction—25 seats (plus 1 independent MP); Order and Justice Party faction—18 seats (including 3 Polish Electoral Action Party MPs); Labor Party—10 seats; non-affiliated faction—4 seats (including 3 Peasants Party MPs and 1 Social Liberal MP).
Suffrage: universal adult (18 years of age).
Budget: (2008) $9.9 billion.

Economy

GDP: (2008 third quarter) $13.3 billion.
Annual growth rate: (2007) 8.9%.
Annual inflation rate: (November 2008) 10.9%.
Unemployment rate: (2008 third quarter) 5.9%.
Per capita income: (2007) $11,348.
Natural resources: Limestone, clay, sand, gravel, iron ore, and granite.
Major sectors of the economy: (2007) manufacturing 20%, wholesale and retail trade 17%, transport and communications 13%.

Trade: Exports—(January-September 2008)—$15.9 billion: mineral products 26.5%, machinery and mechanical appliances 10.4%, vehicles and transport equipment 10.5%, chemicals 10%. Major export partners—EU 61.1%, CIS 24.6%. Imports (January-September 2008)—$20.8 billion: machinery and equipment 14.1%, mineral products 30.5%, transportation equipment 12.5%. Major import partners—EU 56.5%, CIS 35.0%.

GEOGRAPHY

The largest and most populous of the Baltic states, Lithuania is situated on the eastern shore of the Baltic Sea, in northeastern Europe. It is bordered by Latvia to the north, Belarus to the southeast, Poland to the southwest, and Kaliningrad, a territory of Russia, to the west. It has 60 miles of sandy coastline, of which only 24 miles face the open Baltic Sea. Lithuania's major warm-water port of Klaipeda lies at the narrow mouth of Kursiu Gulf, a shallow lagoon extending south to Kaliningrad. The Nemunas River and some of its tributaries are used for internal shipping. Situated between the 54th and 56th latitudes and the 20th and 27th longitudes, Lithuania is glacially flat, except for the hills (of no more than 300 meters) in the western and eastern highlands. The terrain is marked by numerous small lakes and swamps, and a mixed forest zone covers 30% of the country. According to some geographers, Lithuania's capital, Vilnius, lies at the geographical center of Europe.

PEOPLE

In spite of several border changes, Soviet deportations, a massacre of its Jewish population, and German and Polish repatriations, the population of Lithuania has maintained a fairly stable percentage of ethnic Lithuanians (from 79.3% in 1959 to 84.6% in 2007). Lithuania's citizenship law and constitution meet international and Organization for Security and Cooperation in Europe (OSCE) standards, guaranteeing universal human and civil rights. The Lithuanian language still retains the original sound system and morphological peculiarities of the prototypal Indo-European tongue and, therefore, is fascinating for linguistic study. Between 400 and 600 AD, the Lithuanian and Latvian languages split from the Eastern Baltic (Prussian) language group, which subsequently became extinct. The first known written Lithuanian text dates from a hymnal translation in 1545. Written with the Latin alphabet, Lithuanian has been the official language of Lithuania since 1989. While Lithuania was a member of the U.S.S.R., Russian was the official language, so many Lithuanians speak Russian as a second language. The resident Slavic populace generally speaks Russian or Polish as a first language.

HISTORY

Between the 7th and 2nd centuries BC, Baltic tribes established themselves on what is presently known as Lithuanian territory. These tribes were made up of a distinct Indo-European ethnic group whose descendents are the present-day Lithuanian and Latvian nations. The name of Lithuania, however, did not appear in European records until 1009 AD, when it was mentioned in the German manuscript Annals of Quedlinburg. During the period of 1236-1263, Duke Mindaugas united the various Baltic tribes and established the state of Lithuania, which was better able to resist the eastward expansion of the Teutonic Knights. In 1253, Mindaugas embraced Christianity for political reasons and accepted the crown from the Pope of Rome, becoming the first and only king in Lithuanian history.

After the assassination of Mindaugas and the ensuing civil war, Grand Duke Gediminas took control of Lithuania. He reigned from 1316 to 1341, during which the long-term expansion of Lithuania into the lands of the eastern Slavs began. He founded the modern capital city of Vilnius and started the Gediminas dynasty, which ruled Lithuania until 1572. By the end of the 14th century, Lithuania was the largest country in Europe, stretching from the Baltic Sea to the Black Sea. In 1386, Grand Duke Jogaila of Lithuania was crowned the King of Poland, which intensified Lithuania's economic and cultural development and oriented it toward the West. It was at this time that the people of Lithuania embraced Christianity.

In 1401, the formal union between Poland and Lithuania was dissolved. While Jogaila remained the King of Poland, his cousin Grand Duke Vytautas became the ruler of Lithuania. In 1410, the armies of Poland and Lithuania together defeated the Teutonic Order in the Battle of Grunewald, the biggest battle of medieval Europe.

The 16th century witnessed a number of wars against the growing Russian state over the Slavic lands ruled by Lithuania. Needing an ally in those wars, Lithuania again united with Poland through The Union of Lublin in 1569. As a member of this Commonwealth, Lithuania retained its sovereignty and its institutions, including a separate army and currency. In 1795, the joint sate was dissolved by the third Partition of the Commonwealth, which forfeited its lands to Russia, Prussia, and Austria. Over 90% of Lithuania was incorporated into the Russian Empire and the remainder into Prussia. Attempts to restore independence in the uprisings of 1794, 1830-31, and 1863 were suppressed and followed by a tightened police regime and increasing Russification, including the 1864 ban on printing Lithuanian books in traditional Latin characters.

A market economy slowly developed with the abolition of serfdom in 1861. Lithuanian farmers grew stronger, and an increase in the number of intellectuals of peasant origin led to the growth of a Lithuanian national movement. In German-ruled East Prussia, also called Lithuania Minor, or Kaliningrad, Lithuanian publications were printed in large numbers and then smuggled into Russian-ruled Lithuania. The ban on the Lithuanian press was lifted in 1904.

During World War I, the German Army occupied Lithuania, and the occupation administration allowed a Lithuanian conference to convene in Vilnius in September 1917.

The conference adopted a resolution demanding the restoration of an independent Lithuanian state and elected the Lithuanian Council. On February 16, 1918, the council declared Lithuania's independence. The Seimas (Parliament) of Lithuania adopted a constitution on August 1, 1922 and declared Lithuania a parliamentary republic.

The interwar period of independence gave birth to the development of Lithuanian press, literature, music, arts, and theater as well as a comprehensive system of education with Lithuanian as the language of instruction. However, territorial disputes with Poland (over the Vilnius region and the Suvalkai region) and with Germany (over the Klaipëda region) preoccupied the foreign policy of the new state.

During the interwar period, the constitutional capital was Vilnius, although the city itself was annexed by Poland from 1920 to 1939. During this period the Lithuanian Government was relocated to Kaunas, which officially held the status of temporary capital. The German-Soviet Nonaggression Pact of 1939 first pulled Lithuania into the German sphere of influence and then brought it under Soviet domination. Soviet pressure and a complicated international situation forced Lithuania to sign an agreement with the U.S.S.R. on October 10, 1939. By means of this agreement, Lithuania was given back the city of Vilnius and the part of the Vilnius region seized by the Red Army during the Soviet-Polish war; in return, some 20,000 Soviet soldiers

were deployed in Lithuania. On August 3, 1940, Lithuania was proclaimed a Soviet Socialist Republic. Totalitarian rule was established, Sovietization of the economy and culture began, and Lithuanian state employees and public figures were arrested and exiled to Russia. During the mass deportation campaign of June 14-18, 1941, about 12,600 people were deported to Siberia without investigation or trial, 3,600 people were imprisoned, and more than 1,000 were killed.

Between 1940 and 1954, under the Nazi and then Soviet occupations, Lithuania lost over 780,000 residents. In World War II, German occupiers sent Lithuanians to forced labor camps in Germany. Almost 200,000, or 91%, of Lithuanian Jews were killed, one of the worst death rates of the Holocaust. After the retreat of the Wehrmacht in 1944, Lithuania was re-occupied by the Soviet Union, and an estimated 120,000 to 300,000 Lithuanians were either killed or deported to Siberia and other remote parts of the Soviet Union. Conversely, Soviet authorities encouraged the immigration to Lithuania of other Soviet workers, especially Russians, as a way of integrating Lithuania into the Soviet Union.

With the advent of perestroika and glasnost, Gorbachev's programs of social and political reforms in the late 1980s, communist rule eroded. Lithuania, led by Sàjûdis, an anti-communist and anti-Soviet independence movement, proclaimed its renewed independence on March 11, 1990 the first Soviet republic to do so. The Lithuanian Supreme Soviet formed a new Cabinet of Ministers and adopted the Provisional Fundamental Law of the State with a number of by-laws. In response, on the night of January 13, 1991, the Red Army attacked the Vilnius TV Tower, killing 14 civilians and injuring 700. Soviet forces, however, were unsuccessful in suppressing Lithuania's secession.

On February 4, 1991, Iceland became the first country to recognize Lithuanian independence. Sweden was the first to open an embassy in the country. The United States never recognized the Soviet claim to Lithuania and views the present Lithuanian Government as the legal continuation of the interwar republic. In July 2007, Lithuania celebrated the 85th anniversary of continuous diplomatic relations with the United States. Lithuania joined the United Nations on September 17, 1991.

Despite Lithuania's achievement of complete independence, sizable numbers of Russian forces remained on its territory. Withdrawal of those forces was one of Lithuania's top foreign policy priorities. On August 31, 1993, Lithuania and Russia signed an agreement whereby the last Red Army troops left the country. On May 31, 2001, Lithuania became the 141st member of the World Trade Organization. Desiring closer ties with the West, Lithuania became the first of the Baltic states to apply for membership in the North Atlantic Treaty Organization (NATO), and on March 29, 2004, it joined the Alliance. On May 1 of the same year, Lithuania also joined the European Union.

Lithuania has been a staunch U.S. ally in the Global War on Terror, contributing to military operations in Afghanistan and Iraq. In 2005, Lithuania assumed the challenge of leading a Provincial Reconstruction Team as part of NATO's mission in Afghanistan. It has also deployed troops to Iraq under Polish, then British, and Danish command. In addition, Lithuania has participated in the peacekeeping operations in Bosnia and Kosovo. Similarly, Lithuania is a strong supporter of U.S. objectives in the area of democracy promotion. Making this a high priority for its foreign policy, Lithuania has provided development assistance and advice to Ukraine, Moldova, Georgia, and the Caucasus. Lithuania also actively supports democratization efforts in Belarus and Kosovo.

The Lithuanian economy has shown strong growth in recent years, as Lithuania has actively pursued economic reforms. In 2007, Lithuania's GDP increased by 8.9%. Large growth rates driven by domestic consumption have made analysts talk about the potential for overheating of the economy. Growth for 2008 is predicted to be positive overall, between 3% and 5%, but Lithuania is likely to enter a recessionary period in 2009.

GOVERNMENT AND POLITICAL CONDITIONS

Lithuania is a multi-party, parliamentary democracy. The president, who is elected directly for 5 years, is head of state and commander in chief overseeing foreign and security policy. The president nominates the prime minister and his cabinet and a number of other top civil servants. The Seimas, a unicameral parliament, has 141 members that are elected for a 4-year term. About half of the members are elected in single constituencies (71), and the other half (70) are elected in a nationwide vote by party lists. A party must receive at least 5% of the national vote to be represented in the Seimas.

For the first nine years of its post-Soviet independence, voters in Lithuania shifted from right to left and back again, swinging between the Conservatives, led by Vytautas Landsbergis (now headed by Andrius Kubilius), and the Labor (former Communist) Party, led by former President Algirdas Brazauskas. This pattern was broken in the October 2000 elections, when the Liberal Union and New Union parties won the most votes and were able to form a centrist ruling coalition with minor partners. President Valdas Adamkus played a key role in bringing the new centrist parties together. The leader of the center-left New Union Party (also known as the Social Liberal Party), Arturas Paulauskas, became the Chairman of the Seimas, and the leader of the Liberal Union Party, Rolandas Paksas, became Prime Minister. The new coalition was fragile from the outset, as the Liberal Union was pro-business and right of center, while the New Union had a populist and leftist orientation. The government collapsed within 7 months and, in July 2001, the center-left New

Union Party forged an alliance with the left-wing Social Democratic Party and formed a new cabinet under former President Algirdas Brazauskas.

The new government tightened budgetary discipline, supported market reforms, and passed the legislation required to ensure entry into the European Union. Several years of solid economic growth helped to consolidate the government's popularity, despite discontent within two of its core constituencies—unskilled urban workers and farmers—who had expected more generous funding of social and agricultural programs. The government remained firmly in control, and by mid-2004 it was the longest serving administration since the recovery of independence.

In an unexpected political development in January 2003, Rolandas Paksas defeated the incumbent Valdas Adamkus in the second round of the presidential election to become Lithuania's third President since 1992. Paksas' tenure as president was short-lived. In December 2003, an ad hoc parliamentary commission found that President Paksas' vulnerability to influence constituted a threat to national security. On April 7, 2004, the Seimas removed President Paksas from office. Valdas Adamkus won the second round of presidential elections in June 2004 and was sworn in as president on July 12.

Brazauskas remained prime minister after the 2004 parliamentary elections, but the government collapsed in late May 2006 after the New Union and Labor parties withdrew from the coalition. A new minority coalition government headed by Prime Minister Gediminas Kirkilas, a Social Democrat, took office on July 18, 2006, and retained the support of the opposition Conservative party on the major issues until September 2007. On January 28, 2008 the Social Liberal party joined the coalition, giving it a bare majority.

In the October 2008 parliamentary elections, the Homeland Union-Lithuanian Christian Democrat Party, widely known as the Conservatives, won a plurality, winning almost twice as many seats (45) as the second-place Social Democrats (25). The National Revival Party, a new party with numerous show business and TV-journalism celebrities in its top ranks, finished third (16 seats).

The Conservatives put together a four-party coalition with the National Revival, Liberal Movement, and Liberal and Center Union parties, and Conservative leader Andrius Kubilius became prime minister—a post he previously held in 1999-2000. National Revival founder and leader Arturas Valinskas became Seimas Speaker.

Principal Government Officials

Last Updated: 11/12/08

Pres.: **Valdas ADAMKUS**
Prime Min.: **Gediminas KIRKILAS**
Min. of Agriculture & Forestry: **Kazimira PRUNSKIENE**

Min. of Transport & Communications: **Algirdas BUTKEVICIUS**
Governor, Bank of Lithuania: **Reinoldijus SARKINAS**
Ambassador to the US: **Audrius BRUZGA**
Permanent Representative to the UN, New York: **Dalius CEKUOLIS**

Lithuania maintains an embassy in the United States, temporarily located at 4590 MacArthur Blvd, Suite 200, Washington, DC, 20007, tel: (202) 234-5860.

ECONOMY

In the second half of the 20th century, the Lithuanian economy underwent fundamental transformations. The Soviet occupation of 1940 brought Lithuania intensive industrialization and economic integration into the U.S.S.R., although the level of technology and state concern for environmental, health, and labor issues lagged far behind Western standards. Urbanization increased from 39% in 1959 to 68% in 1989. From 1949 to 1952 the Soviets abolished private ownership in agriculture, establishing collective and state farms. Production declined and did not reach pre-war levels until the early 1960s. The intensification of agricultural production through intense chemical use and mechanization eventually doubled production but created additional ecological problems.

The disadvantages of a centrally planned economy became evident after the collapse of the USSR in 1991, when Lithuania began its transition to a market economy. Owing to the availability of inexpensive natural resources, the industrial sector had become excessively energy intensive, inefficient in its utilization of resources, and incapable of manufacturing internationally competitive products. More than 90% of Lithuania's trade was with the rest of the USSR, which supplied Lithuanian industry with raw materials for production and a market for its outputs. The need to sever these trading links and to reduce the inefficient industrial sector led to serious economic difficulties.

The process of privatization and the development of new companies slowly moved Lithuania from a command economy toward a free market. By 1998, the economy had survived the early years of uncertainty and several setbacks, including a banking crisis, and seemed poised for solid growth. However, the collapse of the Russian ruble in August 1998 shocked the economy into negative growth and forced the reorientation of trade from Russia toward the West. In 1997, exports to former Soviet

states were 45% of total Lithuanian exports. In 2006, exports to the East (the Commonwealth of Independent States—CIS) were only 21% of the total, while exports to the EU-25 (European Union 25) were 63%, and to the United States, 4.3%. At the end of the third quarter of 2008, Lithuania had accumulated foreign direct investments (FDI) of $12.8 billion, with U.S. investments amounting to $294 million, or 2.3% of FDI. The current account deficit in the second quarter of 2008 was 16.8% of GDP. However, preliminary figures show this dropping to 7.2% for the third quarter of 2008.

Lithuania has privatized nearly all formerly state-owned enterprises. More than 79% of the economy's output is generated by the private sector. The share of employees in the private sector exceeds 65%. The Government of Lithuania completed banking sector privatization in 2001, with 89% of this sector controlled by foreign—mainly Scandinavian—capital. The government has also completed privatization of the national gas and power companies with "Lithuanian Railways" and Lithuanian Post remaining state-owned.

The transportation infrastructure inherited from the Soviet period is adequate and has been generally well maintained since independence. Lithuania has one ice-free seaport with ferry services to German, Swedish, and Danish ports. There are operating commercial airports with scheduled international services at Vilnius, Kaunas, and Klaipeda. The road system is good. Telecommunications have improved greatly since independence as a result of heavy investment.

The last few years have been good for the Lithuanian economy. Gross domestic product rose by 7.6% in 2005 and 7.4% in 2006. In 2007, Lithuania's GDP grew by 8.9%. GDP is predicted to grow between 3% and 5% for 2008, with recession predicted for 2009. Economic growth was largely driven by private consumption. Lithuania's economy began to slow before worldwide financial turmoil developed in 2008, and the eventual effect of this turmoil upon the Lithuanian economy is not yet clear. The contribution of domestic market-oriented sectors has also increased. Growth in 2007 was strongest in construction, retail and wholesale trade, processing and light industries, and agriculture. In 2007, annual average inflation reached 5.8%, and the government's budget deficit stood at approximately 0.5% of GDP. The government budget deficit is predicted to be 2.35% of GDP for 2008. In 2008, inflation reached 11% in September, one of the highest levels in the EU. Construction activity decreased markedly in 2008, with this sector and real estate experiencing the brunt of the economic slowdown. Real estate prices dropped by approximately 20% compared to 2007. Greater development is needed in public policy and further progress in structural and agricultural reforms. However, the newly elected center-right coalition has a fiscal austerity plan that may implement some of these reforms. Lithuania pegged its national currency—the litas—to the euro on February 2, 2002 at the rate of LTL 3.4528 to EUR 1.

Lithuanian income levels lag behind those of older EU members. Lower wages and high income taxes may have been factors that contributed to the trend of emigration to the wealthiest EU countries after Lithuania joined the European Union in 2004. In 2008, the flat income tax rate was reduced to 24%. It may be reduced to 20% under the newly elected government's fiscal austerity plan. Moreover, in 2008, the minimum wage increased to $310 per month; the average wage now stands at $820 per month, a 17.9% increase from the previous year. Income tax reduction wage growth and global economic recession are starting to result in the return of some emigrants; in early 2006 emigration was 30% lower than in 2005, and in 2007 it dropped by approximately 4.7%.

The initial euro adoption target date of January 1, 2007 was postponed due to the high inflation rate of 2006. Achieving the Maastricht inflation criterion necessary to adopt the euro in 2010 will require significant fiscal tightening in Lithuania. Some commentators feel that euro adoption is unlikely before 2013. Temporary spikes from the necessary excise tax increases and longer-term convergence forces will probably keep inflation above the Maastricht reference value. Credit growth has slowed, but Lithuania has yet to exhibit any signs of financial instability.

DEFENSE

Lithuania, a member of the North Atlantic Treaty Organization (NATO) since 2004, fully endorses the concept of "collective defense." National policy recognizes the primacy of NATO as the guarantor of security in Europe. The goal of Lithuania's defense policy is to create a military that can contribute to international missions through the NATO alliance, the UN, and other groups, and to continue to integrate Lithuania into Western defense structures. The Defense Ministry is responsible for combat forces, search and rescue operations, and intelligence. The government has committed to but never reached the goal of dedicating 2% of GDP to defense spending.

Lithuania maintains approximately 10,000 active duty troops and 8,000 reserve troops. The core of the Lithuanian force structure is the Iron Wolf Motorized Infantry Brigade, which consists of five battalions and appropriate support elements. The Lithuanian Air Force operates 17 fixed wing aircraft and nine helicopters. The Home Guard is organized into five districts.

The Border Police, with 5,400 guards, fall under the jurisdiction of the Interior Ministry; they are responsible for border protection, passport and customs duties, and the interdiction of smuggling and trafficking activities.

Lithuania cooperates with Estonia and Latvia in the joint naval squadron BALTRON, and plans to contribute to a trilateral Baltic land forces element for future NATO Response Force rotations. Lithuania deployed troops to Iraq until 2008 and has sol-

diers serving with Polish and Ukrainian counterparts in Kosovo. Since the summer of 2005, Lithuania has also been part of the NATO International Security Assistance Force (ISAF) in Afghanistan, leading a 140-person Provincial Reconstruction Team in Ghor province. A small special forces element also serves in Afghanistan under NATO command.

FOREIGN RELATIONS

Lithuania became a member of the United Nations (UN) on September 18, 1991 and is a signatory to a number of UN organizations and other international agreements. It is also a member of the Organization for Security and Cooperation in Europe, the North Atlantic Coordinating Council, and the Council of Europe. Lithuania gained membership in the World Trade Organization on May 31, 2001. In November 2002, Lithuania was invited to join the North Atlantic Treaty Organization (NATO) and officially became a member on March 29, 2004. On May 1 of that same year, Lithuania joined the European Union.

Lithuania's foreign policy is based primarily on protecting itself and the Eastern European region from what it perceives as an expansionist Russia. Lithuania uses its membership in both NATO and the EU to promote security and democracy in Eastern Europe. It strongly advocates NATO membership for both Georgia and Ukraine and increased EU political and economic engagement to the region as a whole, including its neighbor Belarus. Lithuania maintains foreign relations with 98 countries through a network of 42 embassies and 35 honorary consuls. It has seven diplomatic missions to international organizations and one special mission to Afghanistan.

Lithuania's liberal "zero-option" citizenship law has substantially erased tensions with its neighbors. Its suspension of two strongly ethnic Polish district councils on charges of blocking reform or disloyalty during the August 1991 coup cooled relations with Poland, but bilateral cooperation markedly increased with the holding of elections in those districts and the signing of a bilateral friendship treaty in 1994. Relations with Poland are now among the closest enjoyed by Lithuania. Although a similar bilateral friendship agreement was signed with Belarus in 1995, Lithuania has joined the United States and other European nations in strongly urging the Government of Belarus to adopt much-needed democratic and economic reforms. President Adamkus was instrumental in brokering a peaceful resolution to the electoral challenges in Ukraine in 2004, and Lithuania plays an important leadership role in promoting democracy throughout the region.

U.S.-LITHUANIAN RELATIONS

The United States established diplomatic relations with Lithuania on July 28, 1922. The Soviet invasion forced the closure of the Legation to Lithuania on September 5, 1940, but Lithuanian representation in the United States continued uninterrupted. The United States never recognized the forcible incorporation of Lithuania into the U.S.S.R. and views the present Government of Lithuania as a legal continuation of the interwar republic. In 2007, the United States and Lithuania celebrated 85 years of continuous diplomatic relations. Lithuania has enjoyed most-favored-nation treatment with the United States since December 1991. Since 1992, the United States has committed more than $100 million in Lithuania to economic and political transformation and to humanitarian needs. The United States and Lithuania signed an agreement on bilateral trade and intellectual property protection in 1994 and a bilateral investment treaty in 1997. In 1998, the United States signed a "Charter of Partnership" with Lithuania and the other Baltic countries establishing bilateral working groups focused on improving regional security, defense, and economic issues. Since 2004, the United States deals with Lithuania on regional security and defense matters primarily through NATO fora. In November 2008 Lithuania joined the Visa Waiver Program, which allows Lithuanians short-term travel to the United States visa-free.

TRAVEL

Consular Information Sheet

December 18, 2008

Country Description: Lithuania is a stable democracy undergoing rapid economic growth. Tourist facilities in Vilnius, the capital, and to a lesser extent in Kaunas and Klaipeda, are similar to those available in other

European cities. In other parts of the country, however, some of the goods and services taken for granted in other countries may not be available.

Entry Requirements: Lithuania is a party to the Schengen Agreement. As such, U.S. citizens may enter Lithuania for up to 90- days for tourist or business purposes without a visa. The passport should be valid for at least three months beyond the period of stay. For further details about travel into and within Schengen countries, please see our fact sheet. Travelers remaining in Lithuania for more than 90 days within any six-month period must apply for temporary residency. Lithuanian authorities recommend applying or a residency permit through a Lithuanian embassy or consulate before initial entry into Lithuania, as processing times can run beyond 90 days. All foreigners of non-European Union countries seeking entry into Lithuania must carry proof of a medical insurance policy contracted for payment of all costs of hospitalization and medical treatment in Lithuania. Visitors unable to demonstrate sufficient proof of medical insurance must purchase short-term insurance at the border from a Lithuanian provider for roughly $1.00 per day. The number of days will be calculated from the day of entry until the date on the return ticket. Children residing in Lithuania must have written permission to travel outside the country from at least one parent if their parents are not accompanying them on their trip. This policy is not applicable to temporary visitors. Visit the Embassy of Lithuania web site at www.ltembassyus.org for the most current visa information.

Safety and Security: Civil unrest is not a problem in Lithuania, and there have been no incidents of terrorism directed toward American interests. Incidents of anti-Americanism are rare.

For the latest security information, Americans traveling abroad should regularly monitor the Department of State, Bureau of Consular Affairs' web site, where the current Travel Warnings and Travel Alerts including the Worldwide Caution Travel Alert, can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S., or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: Lithuania is a relatively safe country. Visitors should maintain the same personal security awareness that they would in any metropolitan U.S. city. Large amounts of cash and expensive jewelry should be secured in a hotel safe or left at home. Crimes against foreigners, while usually nonviolent, do occur. Pickpocketing and thefts are problems, so personal belongings should be well protected at all times. Theft from cars and car thefts occur regularly. Drivers should be wary of persons indicating they should pull over or that something is wrong with their car. Often, a second car or person is following, and when the driver of the targeted car gets out to see if there is a problem the person who has been following will either steal the driver's belongings from the vehicle or get in and drive off with the car. Drivers should never get out of the car to check for damage without first turning off the ignition and taking the keys. Valuables should not be left in plain sight in parked vehicles, as there have been increasing reports of car windows smashed and items stolen. If possible, American citizens should avoid walking alone at night. ATMs should be avoided after dark. In any public area, one should always be alert to being surrounded by two or more people at once. Additionally, criminals have a penchant for taking advantage of drunken pedestrians. Americans have reported being robbed and/or scammed while intoxicated.

Following a trend that has spread across Eastern and Central Europe, racially motivated verbal, and sometimes physical, harassment of foreigners of non-Caucasian ethnicity has been reported in major cities. Incidents of racially motivated attacks against American citizens have been reported in Klaipeda and Vilnius.

In many countries around the world, counterfeit and pirated goods are widely available. Transactions involving such products may be illegal under local law. In addition, bringing them back to the United States may result in forfeitures and/or fines. More information on these serious problems is available at www.cybercrime.gov.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed. For more information about assistance for victims of crime in Lithuania, please visit the Embassy's web site at http://vilnius.usembassy.gov/service/crime-victim-assistance.html.

The local equivalent to the 911 emergency number in Lithuania is 112.

Medical Facilities And Health Information: Medical care in Lithuania has improved in the last 15 years, but medical facilities do not always meet Western standards. There are a few private clinics with medical supplies and services that nearly equal Western European or U.S. standards. Most medical supplies are now widely available, including disposable needles, anesthetics, antibiotics and other pharmaceuticals. However, hospitals and clinics still suffer from a lack of equipment and resources. Lithuania has highly trained medical professionals, some of whom speak English, but their availability is decreasing as they leave for employment opportunities abroad. Depending on his or her condition, a patient may not receive

an appointment with a specialist for several weeks. Western-quality dental care can be obtained in major cities. Elderly travelers who require medical care may face difficulties. Most pharmaceuticals sold in Lithuania are from Europe; travelers will not necessarily find the same brands that they use in the United States. Serious medical problems requiring hospitalization and/or medical evacuation can cost thousands of dollars or more. Doctors and hospitals often expect immediate cash payment for health services, particularly if immigration status in Lithuania is unclear.

Tick-borne encephalitis and lyme disease are widespread throughout the country. Those intending to visit parks or forested areas in Lithuania are urged to speak with their health care practitioners about immunization. Rabies is also increasingly prevalent in rural areas.

The Lithuanian Government does not require HIV testing for U.S. citizens. However, sexually transmitted diseases are a growing public health problem.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747); or via the CDC's Internet site at http://wwwn.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation. All foreigners of non-European Union countries seeking entry into Lithuania must carry proof of a medical insurance policy contracted for payment of all costs of hospitalization and medical treatment in Lithuania (please see entry/exit requirements above).

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Lithuania is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

The Police allow Americans to drive in Lithuania with an American driver's license for up to 90 days. Americans who reside in Lithuania for 185 days or more in one calendar year and who wish to continue driving in Lithuania must acquire a Lithuanian driver's license. The foreign license must be given to the Lithuanian Road Police to be processed by the Consular Department of the Lithuanian Ministry of Foreign Affairs, which in turn sends it to the U.S. Embassy's Consular Section, where the owner is expected to claim it.

Roads in Lithuania range from well-maintained two- to four-lane highways connecting major cities to small dirt roads traversing the countryside. Violation of traffic rules is common. It is not unusual to be overtaken by other automobiles, traveling at high speed, even in crowded urban areas. Driving at night, especially in the countryside, can be particularly hazardous. In summer, older seasonal vehicles and inexperienced drivers are extra hazards. Driving with caution is urged at all times. Driving while intoxicated is a very serious offense and carries heavy penalties. The speed limit is 50 km/hr in town and 90 km/hr out of town unless otherwise indicated. The phone number for roadside assistance is 8-800-01414 from a regular phone and 1414 from a GSM mobile phone. Seatbelts are mandatory for the driver and all passengers except children under the age of 12. During the winter, most major roads are cleared of snow. Winter or all-season tires are required from November 10th through April 1st. Studded tires are not allowed from April 10th through October 31st. Drivers must have at least their low beam lights on at all times while driving. Public transportation is generally safe. Visit the website of the country's national tourist office and national authority responsible for road safety at www.tourism.lt and at www.lra.lt/index_en.html.

Aviation Safety Oversight: As there is no direct commercial air service to the United States by carriers registered in Lithuania, the U.S. Federal Aviation Administration (FAA) has not assessed Lithuania's Civil Aviation Authority for compliance with International Civil Aviation Organization (ICAO) aviation safety standards. For more information, travelers may visit the FAA's web site at www.faa.gov.

Special Circumstances: Lithuanian customs authorities may enforce strict regulations concerning the temporary importation into or export from Lithuania of items such as firearms and antiquities.

Telephone connections are generally good. American 1-800 numbers can be accessed from Lithuania but not on a toll-free basis; the international long distance rate per minute will be charged. Local Internet cafes offer computer access. ATMs are widely available. Most hotels and other businesses accept major credit cards.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating Lithuanian laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Lithuania are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime prosecut-

able in the United States. For more information about arrest procedures in Lithuania, please visit the Embassy's web site at http://vilnius.usembassy.gov/arrests.html.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in Lithuania are encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration web site, and to obtain updated information on travel and security within Lithuania. Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate.

By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency. The U.S. Embassy is located at Akmenu Gatve 6, tel. (370) (5) 266-5500 or 266-5600, fax (370) (5) 266-5590. Consular information can also be found at the Embassy Vilnius web site at http://vilnius.usembassy.gov.

Intercountry Adoption

November 2008

The information in this section has been edited from a report available through the U.S. Department of State Office of Children's Issues. For more information detailed, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Lithuania is party to The Hague Convention on Protection of Children and Co-operation in Respect of Intercountry Adoption (Hague Adoption Convention). Therefore all adoptions between Lithuania and the United States must meet the requirements of the Convention and United States law implementing the Convention. For detailed information on these requirements for adoption, please review the *Intercountry Adoption* section of this publication and visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

According to Lithuanian law, only children whose parents are deceased or whose parents have had their parental rights taken away are eligible for adoption. There are few such children and the Lithuanian families interested in adopting are given precedence. Two United States embassies play complementary roles in the immigrant visa process for Lithuanian citizens, including adopted orphans. The United States Embassy in Warsaw, Poland ultimately issues all immigrant visas for citizens and residents of Lithuania. The United States Embassy in Vilnius, Lithuania conducts the mandatory I-604 Orphan Investigation interview for all orphan cases.

Who Can Adopt? Adoption between the United States and Lithuania is governed by The Hague Adoption Convention. Therefore to adopt from Lithuania, you must first be found eligible to adopt by the United States Government. In addition to the United States requirements for prospective adoptive parents, Lithuania also has the following requirements for prospective adoptive parents.

Residency Requirements: There are no residency requirements for prospective adoptive parents in Lithuania.

Age Requirements:: Prospective adoptive parents generally cannot be over 50 years of age. There must be a minimum age difference of 18 years between the prospective adoptive parents and the child.

Marriage Requirements:: Intercountry adoptions are usually limited to married couples. A single parent may be considered in exceptional cases when 1) the individual has been the foster parent of the particular child to be adopted, 2) the child has extremely serious health problems and no married couple wishes to adopt the child, or 3) the child is eight years of age or older and unable to be placed with another family.

Other Requirements: Certain medical conditions can disqualify prospective adoptive parents. The Government of Lithuania publishes a list of medical conditions. The list is maintained on the State Child Rights Protection and Adoption Service website. Some of the conditions are dipsomania (alcoholism), drug addiction "absent steady remission," mental diseases (not specified), AIDS, HIV positive status, infectious tuberculosis, chronic kidney insufficiency when dialysis is obligatory, Alzheimer's disease, Huntington's chorea, amyotrophic lateral sclerosis (ALS or Lou Gehrig's disease), epilepsy with mental and personality changes, multisystem degeneration and third or fourth stage cancers.

Who Can Be Adopted? Because Lithuania is party to The Hague Adoption Convention, children from Lithuania must meet the requirements of the Convention in order to be eligible for adoption. In addition to Lithuania's requirements, a child must meet the definition of a Convention adoptee for you to bring him or her back to the United States.

Lithuania's Adoption Authority: The State Child Rights Protection and Adoption Service

The Process: The first step in adopting a child from Lithuania is to select an adoption service provider in the United States that has been accredited. Only these agencies and attorneys can provide adoption services between the United States and Lithuania. After you choose an accredited adoption service provider, you apply to be found eligible to adopt (Form I-800A) by the USCIS.

Once the United States Government determines that you are "eligible" and "suitable" to adopt, you or your agency will forward your information to the adoption authority in Lithuania. Lithuania's adoption authority will review your application to determine whether you are also eligible to adopt under Lithuania's law.

If both the United States and Lithuania determine that you are eligible to adopt, and a child is available for

intercountry adoption, the central adoption authority in Lithuania may provide you with a referral for a child.

After you accept a match with a child, you will apply to the USCIS for provisional approval to adopt that particular child (Form I-800). After this, your adoption service provider or you will submit a visa application for to a Consular officer at the United States Embassy. If the Consular office determines that the child appears eligible to immigrate to the United States, he/she will notify the Lithuania's adoption authority (Article 5 letter). For Convention country adoptions, prospective adoptive parent(s) may not proceed with the adoption or obtain custody for the purpose of adoption until this takes place.

Role of the Adoption Authority: The State Child Rights Protection and Adoption Service places approved prospective adoptive parents on a waiting list according to the date of submission of the complete set of documents. Once a child is matched, the State Child Rights Protection and Adoption Service issues special permission for the prospective adoptive parents to meet the child.

Role of the Court: After the Chairman of the Vilnius District Court verifies that all the documents are in order, he assigns the case to one of the Vilnius District Court judges for final review. The assigned judge will set a court date.

After the judge approves the adoption, there is a 40-day waiting period before the adoption is final. Adoptive parents should note that the adopted child remains in the custody of the institution where he/she resided prior to the hearing. Special permission may be granted in some cases for the child(ren) to reside with the adoptive parents in Lithuania.

Role of Adoption Agencies: The adoption agency forwards the prospective adoptive parents' letter of interest in adopting to the State Child Rights Protection and Adoption Service.

Time Frame: Once a family is approved to adopt, it can take several years for a child eligible for intercountry adoption to be matched with the prospective adoptive parents' preferences. After a referral has been made and accepted, an adoption petition can be filed with the court.

There is a 40-day waiting period from the time the court issues the final approval until it comes into force.

Adoption Application: The prospective adoptive parents submit their application (letter) to the State Child Rights Protection and Adoption Service. The letter should describe the gender and age of the child(ren) they are interested in adopting, prospective adoptive parents' ages and professions, and any family ties to Lithuania.

Adoption Fees: In the adoption services contract that you sign at the beginning of the adoption process, your agency will itemize the fees and estimated expenses related to your adoption process. Some of the fees specifically associated with adopting from Lithuania include a $42 USD filing fee with the court for the adoption hearing. Prospective adoptive parents can expect to pay adoption agencies for services rendered.

Documents Required: The following is a list of documents that must accompany the letter requesting adoption:

- Information letter introducing the prospective adoptive parents (issued by the Central Governmental authority or accredited adoption association)
- Home Study copy (the socio-psychological study)
- Permit for adoption issued by a competent authority of the receiving state
- Confirmation of a competent authority of the receiving state that the adopted child will be permitted to enter the country for permanent residence
- Copies of prospective adoptive parents' passports or other personal identification documents
- Copies of birth certificates
- Copy of marriage certificate, divorce certificate (if divorced), or death certificate of the spouse (if widowed)
- Health certificates
- Certificates of the family's financial standing (income received and assets owned)
- Criminal record certificates
- Health certificates and copies of birth certificates of children residing together with prospective adoptive parents

If the family applies through an accredited adoption agency, the following documents must also be submitted:

- Power of attorney issued by the family to the agency
- Document issued by a competent authority of the receiving state certifying the authority of the agency to engage in intercountry adoption

The following is a list of documents that must accompany the letter requesting a hearing:

- Full names and addresses of the prospective adoptive parents
- Names and addresses of the Lithuanian state representative in charge of the orphanage or institution where the child resides
- Statement regarding why they want to adopt a child
- Statement as to whether the child is to be their stepchild (in cases where a foreigner wishes to adopt a child of his/her spouse in Lithuania or adoptive child)

- New name to be given to the adoptive child
- Affidavit from the birth parent(s) surrendering all rights to the child, if there are surviving biological parents OR a
- Lithuanian court decision regarding termination of parental rights
- Statement from the institution responsible for the child agreeing to the adoption
- Financial statement of the adoptive parents indicating that they are financially able to provide for the child
- Copy of the home study (updated by the authority or accredited adoption association that prepared the original home study)
- Health certificates
- Certificates of the family's financial standing
- Criminal record certificates
- Original birth certificate of the child
- Filing fee receipt

For updates on document requirements and information on how to authenticate documents, visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

Bringing Your Child Home: Once your adoption is complete (or you have obtained legal custody of the child), there are a few more steps to take before you can head home. Specifically, you need to apply for several documents for your child before he or she can travel to the United States, such as a birth certificate, a passport or travel document for your child from the country in which he or she was born, and a U.S. Immigration Visa.

Child Citizenship Act: For adoptions finalized abroad: The Child Citizenship Act of 2000 allows your new child to acquire American citizenship automatically when he or she enters the United States as lawful permanent residents. For adoptions finalized in the United States: The Child Citizenship Act of 2000 allows your new child to acquire American citizenship automatically when the court in the United States issues the final adoption decree. To learn more, review the *Intercountry Adoption* section on this publication and visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

After Adoption: Lithuania does not have any post-adoption requirements.

LUXEMBOURG

Compiled from the September 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Grand Duchy of Luxembourg

PROFILE

Geography

Area: 2,586 sq. km. (999 sq. mi.; about the size of Rhode Island).

Cities: Capital—Luxembourg City (pop. 83,800). Other cities—Esch-sur-Alzette (pop. 29,100), Differdange (pop. 20,100), Dudelange (pop. 18,000). (2007 figures from STATEC.)

Terrain: Continuation of Belgian Ardennes in the north, heavily forested and slightly mountainous; extension of French Lorraine plateau in the south, with open, rolling countryside.

Climate: Modified continental, rainy, with mild summers and moderate snowfall in winter.

People

Nationality: Noun—Luxembourger(s). Adjective—Luxembourgian, Luxembourgish.

Population: (2007) 480,222.

Annual growth rate: (2007) 1.2%.

Ethnic groups: Celtic base with French and German blend; large communities of ethnic Portuguese, Italians, French, Belgians, and Germans.

Religions: Historically and predominantly Roman Catholic. However, Luxembourgian law forbids the collection of data on religious practices.

Languages: Luxembourgish, French, and German; English is widely spoken.

Education: Years compulsory—9. Attendance—100%. Literacy—99%.

Health: Life expectancy (2007)—Avg. 79.03 years; males 75.76 years; females 82.52 years. Infant mortality rate (2007)—4.68/1,000.

Work force: (2006) 318,600, of which 126,800 commute from neighboring countries. European Union institutions employ 8,300. Services: (non-financial)—53%, (financial)—11%; commerce—14%; industrial and manufacturing—11%; construction—10%; agriculture—1%.

Unemployment rate: (2006) 4.5%, up from 3.9% in 2004 (but down from 4.3% in 2005).

Government

Type: Constitutional monarchy.

Independence: 1839.

Constitution: 1868.

Government branches: Executive—Grand Duke (head of state, ceremonial), Prime Minister (head of government). Legislative—unicameral parliament (Chamber of Deputies with Council of State serving as a consultative body). Judicial—Superior Court.

Political parties: Christian Social Union (CSV), Socialist Workers' Party (LSAP), Democratic Party (DP), Green Party, Alternative Democratic Reform Party (ADR).

Suffrage: Universal over age of 18.

Budget: (2006) $19.07 billion.

Economy

GDP: (2007) $51.842 billion (official exchange rate).

Currency: euro (€). Exchange rate (September 8, 2008) €1 = $1.4346.

Annual growth rate: (2007) 4.5%.

Per capita income: (2007) $75,886 (PPP).

Inflation rate: (2006) 276%.

Natural resources: Iron ore, timber.

Agriculture: (2005: 0.4% of GDP) Dairy, wine, forestry, animal feed crops. Arable land—24%; forested land—21%.

Services: (2005: 83.3% of GDP) Banking and financial services predominate.

Industry: (2005: 16.3% of GDP) Steel, chemicals.

Trade: (2006) Exports—$24.22 billion: steel and other metallic products, chemicals, processed wood products, machinery and other manufactured equipment. Major markets—other European Union countries (esp. Germany, France, and Belgium). Imports—$24.22 billion: Machinery and other manufactured equipment, raw materials, chemicals, food products. Major suppliers—other European Union countries (esp. Belgium, Germany, and France).

HISTORY

After 400 years of domination by various European nations, Luxembourg was granted the status of Grand Duchy by the Congress of Vienna on June 9, 1815. Although Luxembourg considers 1835 (Treaty of London) to be its year of independence, it was not granted political autonomy until 1839 under King William I of the Netherlands, who also was the Grand Duke of Luxembourg. In 1867, Luxembourg was recognized as independent and guaranteed perpetual neutrality. After being occupied by Germany in both World Wars, Luxembourg abandoned neutrality and became a charter member of the North Atlantic Treaty Organization (NATO) in 1949. It is also one of the six original members of the European Union, formed in 1951 as the European Coal and Steel Community (ECSC).

The present sovereign, Grand Duke Henri, succeeded his father, Grand Duke Jean, on October 7, 2000. Grand Duke Jean announced his decision to abdicate in December 1999, after a 35-year reign.

The national language of Luxembourg is Luxembourgish, a blend of Dutch, old German, and Frankish elements. The official language of the civil service, law, and parliament is French, although criminal and legal debates are conducted partly in Luxembourgish and police case files are recorded in German. German is the primary language of the press. French and German are taught in the schools, with German spoken mainly at the primary level and French at the secondary level. In addition, English is taught in the local high schools. Most Luxembourgers, as a result, speak English with some level of fluency.

GOVERNMENT

Luxembourg has a parliamentary form of government with a constitutional monarchy by inheritance. Under the constitution of 1868, as amended, executive power is exercised by the Grand Duke and the Council of Government (cabinet), which includes the prime minister, who serves as head of government. The prime minister is the leader of the political party or coalition of parties having the most seats in parliament, known as the Chamber of Deputies.

Legislative power is vested in the Chamber of Deputies, the members of which are elected directly to 5-year terms. A second body, the "Conseil d'État" (Council of State), composed of 21 ordinary citizens appointed by the Grand Duke, advises the Chamber of Deputies in the drafting of legislation. The Council's opinions have no binding effect, and the responsibilities of its members are in addition to their normal professional duties.

Luxembourg law is a composite of local practice, legal tradition, and French, Belgian, and German systems. The apex of the judicial system is the Superior Court, whose judges are appointed by the Grand Duke.

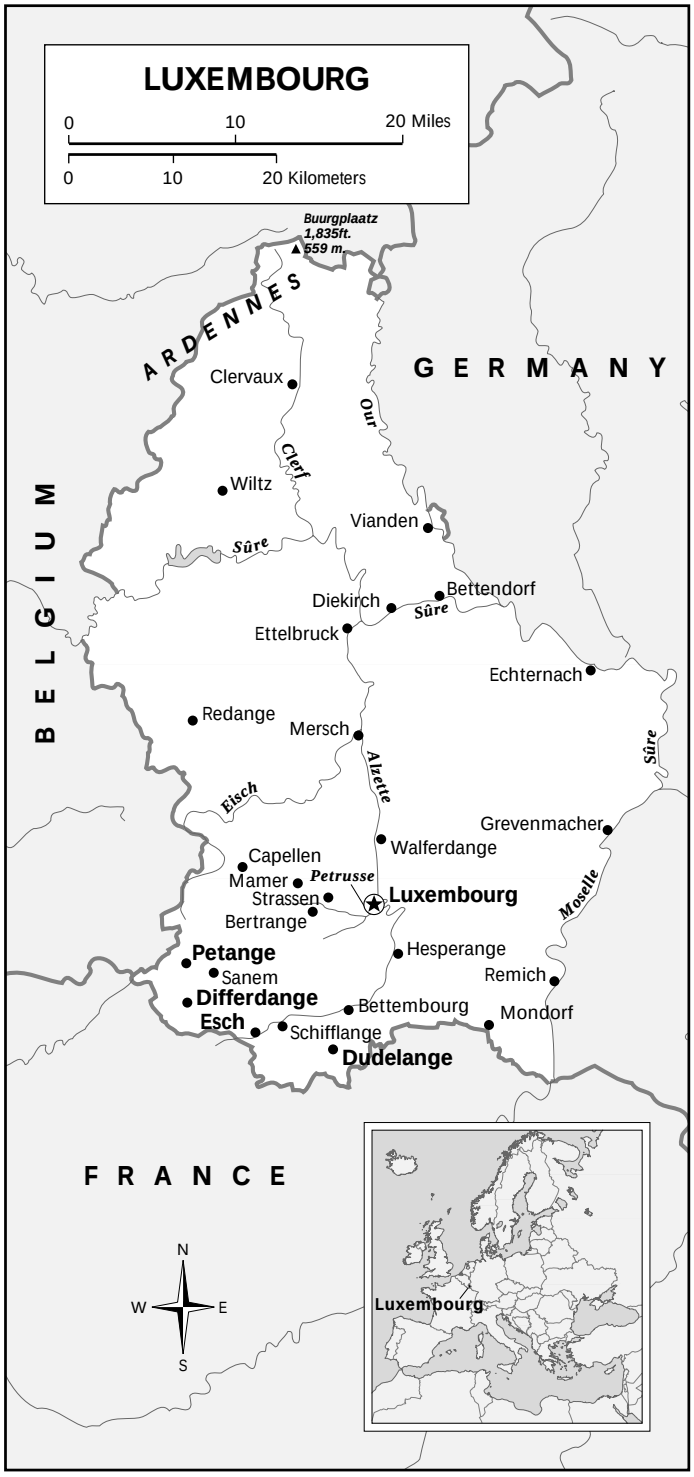
Principal Government Officials

Last Updated: 11/12/08

Grand Duke: **HENRI**
Prime Min.: **Jean-Claude JUNCKER**
Dep. Prime Min.: **Jean ASSELBORN**
Min. of Agriculture, Viticulture, & Rural Development: **Fernand BODEN**
Min. for Communications: **Jean-Louis SCHILTZ**
Min. of Culture, Higher Education, & Research: **Francois BILTGEN**
Min. of Defense: **Jean-Louis SCHILTZ**
Min. for Development Cooperation & Humanitarian Affairs: **Jean-Louis SCHILTZ**
Min. of Economy & Foreign Trade: **Jeannot KRECKE**
Min. of Environment: **Lucien LUX**
Min. of Equality of Opportunity: **Marie-Josee JACOBS**
Min. of Family & Integration: **Marie-Josee JACOBS**
Min. of Finance: **Jean-Claude JUNCKER**
Min. of Foreign Affairs & Immigration: **Jean ASSELBORN**
Min. of Health & of Social Security: **Mars DI BARTOLOMEO**
Min. of Interior & of Land Management: **Jean-Marie HALSDORF**
Min. of Justice: **Luc FRIEDEN**
Min. of Labor & Employment: **Francois BILTGEN**
Min. of the Middle Class, of Tourism, & of Housing: **Fernand BODEN**
Min. of National Education & Professional Training: **Mady DELVAUX-STEHRES**
Min. of Civil Service & of Admin. Reform: **Claude WISELER**
Min. of Public Works: **Claude WISELER**
Min. of Religious Sects: **Francois BILTGEN**
Min. of Sports: **Jeannot KRECKE**
Min. of State: **Jean-Claude JUNCKER**
Min. of Transportation: **Lucien LUX**
Min. of Treasury & the Budget: **Luc FRIEDEN**
Min.-Del. for Foreign Affairs & Immigration: **Nicolas SCHMIT**
Sec. of State for Agriculture, Viticulture, & Rural Development: **Octavie MODERT**
Sec. of State for Culture, Higher Education, & Research: **Octavie MODERT**
Sec. of State for Relations With Parliament: **Octavie MODERT**
Chmn., Luxembourg Central Bank: **Yves MERSCH**
Ambassador to the US: **Joseph WEYLAND**
Permanent Representative to the UN, New York: **Jean-Marc HOSCHEIT**

The Embassy of the Grand Duchy of Luxembourg in the United States is located at 2200 Massachusetts Avenue NW, Washington, DC 20008 (tel. 202-265-4171), www.luxembourg-usa.org.

Consulates of Luxembourg are located in Atlanta, Boston, Chicago, Cleveland, Dallas, Detroit, Fort Worth, Indianapolis, Kansas City, Los Angeles, Miami, New Orleans, New York, Portland, San Francisco, Seattle, and St. Paul.



POLITICAL CONDITIONS

Luxembourg's political system has a strong local focus. National politicians very often begin their careers and establish their base serving as mayors, and members of the Chamber of Deputies are elected from one of four regions. The political culture favors consensus, and the parties coexist within the context of broad agreement on key issues, including

the value of deep European integration. Since the end of World War II the Christian Social Union (CSV) has been part of the governing coalitions and usually the dominant party. The only exception was from 1974-1979 when the CSV was in opposition to a governing coalition led by the Democratic Party (DP). The CSV resembles Christian democratic parties in other west European countries and enjoys broad popular support. Its leader, Prime Minister Jean-Claude Juncker, in power since 1995, is the longest serving head of government in the European Union.

The Socialist Party (LSAP) is a center-left party similar to most social democratic parties in Europe. Initially founded by a worker's movement and a main defender of universal suffrage in 1919, the LSAP defends state intervention in the economy and the sustainability of the welfare system. Part of the government from 1984 to 1999, it lost its junior coalition status to the Democratic Party but regained it in the 2004 elections. While in the opposition, the LSAP voiced opposition to U.S. action in Iraq. The Democratic Party (DP) is a center-right party, drawing support from civil servants, the professions, and urban middle class. Like other west European liberal parties, it advocates both social legislation and minimum government involvement in the economy. It also is strongly pro-NATO. In the opposition from 1984 to 1999, the DP overcame the LSAP to claim the role of junior partner in the government from 1999-2004. It is currently again in the opposition. The Green Party has received growing support since it was officially formed in 1983. It opposes both nuclear weapons and nuclear power and supports environmental and ecological preservation measures. This party generally opposes Luxembourg's military policies, but it has shown some openness to peacekeeping missions.

National elections are held at least every five years and municipal elections every six years. In the June 2004 parliamentary elections the CSV won 24 seats, the LSAP 14, the DP 10, the Greens 7, and the ADR 5.

The ADR (Alternative Democratic Reform Party) when elected was known as the Action Committee for Democracy and Pension Rights. It now has only four members in the parliament after one member recently left the party and declared himself an independent.

ECONOMY

While Luxembourg is aptly described as the "Green Heart of Europe" in tourist literature, its pastoral land coexists with a highly industrialized and export-intensive economy. Lux-

embourg enjoys a degree of economic prosperity almost unique among industrialized democracies.

In 1876, English metallurgist Sidney Thomas invented a refining process that led to the development of the steel industry in Luxembourg and the founding of the Arbed company in 1911. In 2001, Arbed merged with Aceralia and Usinor to form Arcelor, which is headquartered in Luxembourg. Five years later, the company announced the acquisition of Canada's largest steel manufacturer, Dofasco. In June 2006, Arcelor merged with Mittal Steel to become Arcelor-Mittal, the largest steelmaker in the world. The company now produces 10% of the world's steel output. The iron and steel industry in Luxembourg comprises approximately 11% of the overall economy.

During the past few decades there has been a relative decline in the steel sector, offset by Luxembourg's emergence as a major financial services center. The overall services sector in 2005 comprised 83.3% of Luxembourg's GDP with it employing, in terms of percentage of workers, 78% of the labor force. The financial sector in 2005 continued to grow and made up 11% of Luxembourg's total labor force making it identical in size to the industrial labor force. In 2006 there were 156 banks in Luxembourg employing 24,752 people. Political stability, good communications, easy access to other European financial centers, skilled multilingual staff, and a tradition of banking secrecy have contributed to the growth of the financial sector. German banks represent the largest number, with Italian, French, Swiss, Belgian, American, and Japanese banks also heavily represented. Total banking assets in 2005 were $1 trillion. The funds industry is the second largest in the world after the U.S. with $2.158 trillion in domiciled funds.

Government policies promote the development of Luxembourg as an audiovisual and communications center. Radio-Television-Luxembourg is Europe's premier private radio and television broadcaster. The government-backed Luxembourg satellite company Société Européenne des Satellites (SES) was created in 1986 to install and operate a satellite telecommunications system for transmission of television programs throughout Europe. The first SES "ASTRA" satellite, a 16-channel RCA 4000, was launched by Ariane rocket in December 1988. SES presently operates 12 satellites. ASTRA 1H is an advanced satellite with a return channel capacity in the Ka band frequency range enabling two-way satellite communications directly to users' terminals.

Luxembourg offers a favorable climate to foreign investment. Successive governments have effectively attracted new investment in medium, light, and high-tech industry. Incentives cover taxes, construction, and plant equipment. The recent European Union (EU) directive on services supplied electronically has caused a number of companies to look to Luxembourg, with its relatively low value-added tax (VAT) rates, as a possible location for directing their European operations. U.S. firms are among the most prominent foreign investors, producing tires (Goodyear), chemicals (Dupont), glass (Guardian Industries), and a wide range of industrial equipment. The Department of Commerce's Bureau of Economic Analysis reports that total U.S. direct investment in Luxembourg (on a historical cost basis) was nearly $72 billion at the end of 2005. Foreign direct investment (FDI) data for Luxembourg must be interpreted cautiously, however, because of Luxembourg's role in financial intermediation, particularly involving Luxembourg-based holding companies. Labor relations have been peaceful since the 1930s. Most industrial workers are organized by unions linked to one of the major political parties. Representatives of business, unions, and government participate in the conduct of major labor negotiations. Unemployment in 2006 was 4.5%, up from 3.9% two years earlier. Luxembourg's small but productive agricultural sector employs 1% of the total labor force, a typical figure for a highly developed country. Most farms produce milk, meat, and foraging crops. Timber is another important sector. Luxembourg, being a part of the Moselle region, produces outstanding white wines.

Due to its powerful services sector, Luxembourg maintains a favorable current account balance, with a $4.63 billion surplus in 2006. Government finances have deteriorated over the past few years, with a 2006 budget deficit of $552 million.

FOREIGN RELATIONS

Luxembourg has long been a prominent supporter of European political and economic integration. In efforts foreshadowing European integration, Luxembourg and Belgium in 1921 formed the Belgium-Luxembourg Economic Union (BLEU) to create an inter-exchangeable currency and a common customs regime. Luxembourg is a member of the Benelux Economic Union and was one of the founding members of the European Economic Community (now the European Union). It also participates in the Schengen Group, whose goal is the free movement of citizens among member states. At the same time, Luxembourgers have consistently recognized that European unity makes sense only in the context of a dynamic, transatlantic relationship and have traditionally pursued a pro-NATO, pro-U.S. foreign policy.

Luxembourg is the site of the European Court of Justice, the European Court of Auditors, European Investment Bank, and other vital EU organs. The Secretariat of the European Parliament is located in Luxembourg, but the Parliament usually meets in nearby Strasbourg. Luxembourg held the EU Presidency in the first half of 2005. Luxembourg budgeted $291 million for official development assistance (ODA) in 2007, or about 0.84% of its GNI. This places Luxembourg among the top three donor nations in the world, if calculated by percentage of GNI; Luxembourg has stated that it has a goal of eventually reaching 1% of GNI for its ODA.

DEFENSE

The Luxembourg Army is under civilian control. The country has no navy or air force. A 1967 law made the army an all-volunteer force with current strength of approximately 430 professional soldiers, about 340 enlisted recruits, and 110 civilians. A 2002 law now allows EU citizens, under certain conditions, to join the Luxembourg Army.

In 2005 Luxembourg spent approximately $310 million on defense, or about 0.85% of GDP. Luxembourg has participated in the European Corps (EUROCORPS) since 1994 and has contributed troops to UNPROFOR, IFOR, SFOR, and KFOR missions in the former Yugoslavia. Presently Luxembourg has one officer serving in Bosnia-Herzegovina with the European Union's ALTHEA mission and, until May 2007, a 26-person reconnaissance platoon deployed in Kosovo as its contribution to KFOR. Luxembourg also has nine soldiers in Afghanistan integrated into the Belgian forces deployed there. Luxembourg continues to take part in EU and NATO sponsored missions in Africa. Luxembourg has committed to sending a team of de-mining experts to participate in UNIFIL in Lebanon. Luxembourg has participated in the European Corps (EUROCORPS) since 1994 and has contributed troops to the UNPROFOR, IFOR, and KFOR missions in the former Yugoslavia. It has also participated with a small contingent in the NATO SFOR mission in Bosnia and currently participates in the NATO ISAF mission in Afghanistan. Luxembourg financially supported international peacekeeping missions during the 1991 Gulf War and in Rwanda and Albania and has provided humanitarian aid to Iraq. The army also has participated in humanitarian relief missions such as setting up refugee camps for Kurds and providing emergency supplies to Albania.

U.S. RELATIONS

Luxembourgers are deeply appreciative of the sacrifices made by Americans, leading to the country's liberation in the two World Wars of the 20th century. More than 5,000 American soldiers, including Gen. George S. Patton, are buried at the American Military Cemetery near the capital, and there are monuments in many towns to American liberators. The strong U.S.-Luxembourg relationship is expressed both bilaterally and through common membership in NATO, the Organization for Economic Cooperation and Development (OECD), and the Organization for Security and Cooperation in Europe (OSCE).

TRAVEL

Consular Information Sheet

October 3, 2008

Country Description: Luxembourg is a highly developed, stable constitutional monarchy and parliamentary democracy. Tourist facilities are widely available.

Entry Requirements: A passport is required. Luxembourg is a party to the Schengen agreement. As such, U.S. citizens may enter Luxembourg for up to 90 days for tourist or business purposes without a visa. The passport should be valid for at least three months beyond the period of stay. Sufficient funds and a return airline ticket are required. For further details about travel into and within Schengen countries, please see our fact sheet. No immunization is necessary. For further information concerning entry requirements for Luxembourg, travelers may contact the Embassy of Luxembourg at 2200 Massachusetts Ave. NW, Washington, DC 20008, phone: (202) 265-4171 or 4172, or the Luxembourg Consulate General in New York, phone: (212) 888-6664 or in San Francisco, phone: (415) 788-0816. Visit the Embassy of Luxembourg web site at http://www.luxembourg-usa.org for the most current visa information.

Safety and Security: Terrorist incidents are rare in Luxembourg. However, like other countries in the Schengen area, Luxembourg's open borders with its Western European neighbors could allow the possibility of terrorist groups to enter/exit the country unnoticed.

Prior police approval is required for public demonstrations in Luxembourg, and police oversight is routinely provided to ensure adequate security for participants and passers-by. Nonetheless, situations may develop which could pose a threat to public safety. U.S. citizens are advised to avoid areas where public demonstrations are taking place.

For the latest security information, Americans traveling abroad should regularly monitor the Department of State, Bureau of Consular Affair's Internet site at http://travel.state.gov, where the current Travel Warnings and Travel Alerts, including the Worldwide Caution Travel Alert, can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S. and Canada, or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: The crime rate in Luxembourg is moderate when compared to other European countries. The predominant form of crime in Luxembourg is the non-violent theft of valuables through snatching of purses/bags or more sophisticated breaking and entering of unoccupied homes. Travelers should take common-sense precautions while in Luxembourg. In particular, travelers should be especially cautious while in public areas, the airport and train terminals, where pickpockets can be a problem. Luxembourg has many public parks that are safe during the daylight hours, though the volume of low-level drug vending has increased in some of the city parks. Tourists should avoid these parks after dark due to the higher risk at night. During the summer season, Americans should be particularly alert to purse snatchings and confidence scams against tourists. Incidents of petty crime spike during the annual "Schueberfouer," a traveling fun fair that visits the country every year for 3 weeks in the summer.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed. Luxembourg judicial authorities provide information, legal advice and psychological counseling at no charge to victims of crime (adults and children). Address: Service d'aide aux victimes, Parquet General, Galerie Kons, 24-26, place de la Gare, L-1616 Luxembourg. Phone: (352) 475821, extension 625, 627 or 628 Monday-Friday 8am-12pm and 2pm-6pm, in an emergency call (352) 621326595 Monday-Friday 8am-7pm. The local equivalent to the "911" emergency line in Luxembourg is: 113.

Medical Facilities and Health Information: Medical facilities are widely available. In an emergency, dial 112 for an ambulance or in case of fire; dial 113 for the police. Hospitals in Luxembourg operate on a 24-hour rotation system. The on-call emergency room can be determined by calling 112. Patients may self-refer to any clinic Monday-Friday between 8am-5pm. In Luxembourg City, three major hospitals offer comprehensive general medical and surgical treatment, as well as specialized care in orthopedics, cardiology and psychiatry. In addition, there are two pediatric clinics and two obstetric clinics in Luxembourg City. Hospitals also exist in the south of the country (Esch-sur-Alzette) and in the north (Wiltz). For more specialized care, including major burns, transfer to a regional burn center in Belgium or France is necessary.

Most drugstores are located in the city of Luxembourg but can also be found throughout the country in all major communes. Drugstores operate on a 24-hour rotation system for after-hours services, including emergency prescriptions. The on-call pharmacy is listed daily in the local newspaper or can be determined by calling 112. A doctor's prescription is sometimes necessary for drugs that are sold over the counter in the United States.

The U.S. Department of State is unaware of any HIV/AIDS entry restrictions for visitors to or foreign residents of Luxembourg.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's website at http://wwwn.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith/en.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Luxembourg is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

Luxembourg has a modern, well-maintained system of highways and secondary roads. Road signs and markings are clear and, as applicable, worded in French. Streets in the city, construction sites and crossroads are well illuminated at night. On highways, a digital alert system warns drivers of incidents or detours. Roads leading into and out of Luxembourg City are congested during the morning and evening rush hour. Visitors should drive defensively in high-volume commuter traffic. During the fall and winter, fog and ice can cause sudden slowdowns on highways and secondary roads.

In case of a car accident involving injury or dispute, it is advisable for a foreigner to call the police at 113. The police will make an official assessment of the accident's circumstances that can consequently be used if further legal action becomes necessary.

The daily mix of drivers from Luxembourg and its three neighboring countries results in a variety of driving practices and courtesies. While most drivers respect speed limits, traffic signals, and rules, others do not. Vehicle maintenance for cars registered in Luxembourg is controlled by the mandatory yearly car inspection; police can perform random road checks at any time. The possibility of

encountering an intoxicated driver increases on weekends, especially during the late evening hours. Driving while intoxicated may result in penalties including imprisonment from 8 days up to two years plus a fine of 251 to 5000 Euros (approximately US$300 to US$6,000).

Public transportation throughout the country, including bus services and taxis, is highly developed and is considered very safe. Emergency road services in Luxembourg are excellent. For breakdown and towing service call the ACL (Automobile Club Luxembourg) at 26000 or see the web site at www.acl. lu. In case of an accident, call 112 for a medical emergency and 113 for the police.

Visit the web site of the Luxembourg's national tourist office at www.ont.lu and the Luxembourg police at www.police.public.lu.

Aviation Safety Oversight: The U.S. Federal Aviation Administration (FAA) has assessed the Government of Luxembourg's Civil Aviation Authority as being in compliance with International Civil Aviation Organization (ICAO) aviation safety standards for oversight of Luxembourg's air carrier operations. For more information, travelers may visit the FAA's web site at http://www.faa.gov.

Special Circumstances: Luxembourg customs authorities may enforce strict regulations concerning temporary importation into or export from Luxembourg of items such as live animals, plants, endangered species, medication (except for personal use), firearms and ammunition, cultural artifacts, alcoholic beverages, and tobacco products. It is advisable to contact the Embassy of Luxembourg in Washington or one of Luxembourg's consulates in the United States for specific information regarding customs requirements. The amount of imported currency is not limited. The Euro is the official currency in Luxembourg, and at the same time the valid currency in several other European countries. Luxembourg does not yet allow dual nationality. When obtaining Luxembourg nationality either through option or naturalization, the former nationality must be renounced.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses.

Persons violating Luxembourg's laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Luxembourg are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in Luxembourg are encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration web site so that they can obtain updated information on travel and security within Luxembourg. Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency. The U.S. Embassy is located at 22, Blvd Emmanuel Servais, L-2535 Luxembourg City, phone: (352) 46 01 23 (available 24/7), fax: (352) 46 14 01. Consular Section phone: (352) 46 01 23 -22 13, Consular Section fax: (352) 46 19 39, email: LuxembourgConsular@state.gov. The U.S. Embassy's Internet home page is http://luxembourg.usembassy.gov.

Intercountry Adoption

July 2006

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is based on public sources and current understanding. Questions involving foreign and U.S. immigration laws and legal interpretation should be addressed respectively to qualified foreign or U.S. legal counsel.

Please Note: Few children are adopted from Luxembourg. This flyer contains information on how to adopt from third countries if residing in Luxembourg.

Patterns of Immigration: Please review current reports online at http://adoption.state.gov.

Adoption Authority:
The government authority which oversees intercountry adoption in Luxembourg is:

Ministry of Family and Integration
Department of Adoption and Foster Care
12-14 avenue Emile Reuter
L-2420 Luxembourg
Tel: +352 478 6566
Fax: +352 24 18 87
Email: Jacques.kuntziger@fm.etat.lu
(Head of Department)

Eligibility Requirements for Adoptive Parents: Only married couples can adopt. One parent must be at least 25 years of age and the other at least 21. The parents must be at least 15 years older than the child (except in the case of adoption of a stepchild by the spouse, only 10 years' difference is required) and the child must not be older than 16. Both parents need to provide a medical certificate stating that neither of them nor anyone in the household

suffers from a medical or mental condition that could negatively affect the child. A child of 16 or older can still be adopted, but it will only be a'simple' adoption as explained below. However, the child will not qualify for U.S. immigrant visa.

Residency Requirements: According to article 370 of the law on adoption from June 13, 1989 adoption is open to Luxembourg citizens and foreigners. Foreign prospective parents have to fulfill the requirements for adoption as prescribed by the laws of their country. The Luxembourgish court presiding over the adoption will in fact verify that the parents fulfill all requirements for adoption in their own country and that the laws in the country of the child are respected.

In order for a Luxembourg court to decide on an adoption case, either the child or the prospective adoptive parents must reside in Luxembourg. There is no minimum period for this residency requirement. If the parents are not Luxembourg citizens, they must fulfill the requirements of their native country and demonstrate that they are eligible to adopt. If the parents do not have the same nationality and neither of them has Luxembourg nationality but are resident in Luxembourg, Luxembourg law will be applied.

Time Frame: It usually takes about two years to complete an adoption, from the moment the parents start gathering the paperwork to be approved until they adopt a child.

Adoption Agencies and Attorneys: Adoption agencies must be licensed by the Luxembourg Government. Parents must use licensed agencies in order to get a residence permit for the child when he/she arrives from the country of origin. Please see the Hague Permanent Bureau web site for a list of accredited agencies for Luxembourg http://www.hcch.net.

Adoption Fees: The total fee for adoption covers is around 10,000 Euros; this covers the entire process, including medical expenses, adoption agency fees and notarials. The Luxembourg government subsidizes half of this total so prospective parents pay about 5.000 Euros.

Domestic adoption in Luxembourg: An adoption can only take place if it is considered to be in the best interest of the child. There are two types of adoption in Luxembourg, "plénière" (plenary) and "simple". In a plenary adoption, the adopted child loses all ties to his or her biological parents and receives the same hereditary rights as any children born to the adoptive parents. This form of adoption is irrevocable. In the case of'simple' adoption the child usually lives with the adopted family and takes the name of the adopted family. But the child keeps his/her hereditary rights and is still entitled to any child support or alimony paid to the biological family. The child sometimes keeps his/her original nationality. This form of adoption can be revoked if it is considered to be in the best interest of the child.

Intercountry Adoption to Luxembourg: Prospective adoptive parents first contact the adoption agency dealing with the country from which they wish to adopt a child. The agency then compiles a file on the aptitude and eligibility of the parents, and assembles all the required documentation.

For adoptions from countries not party to the Hague Adoption Convention, the case file is sent to the country of origin of the child. The Luxembourgish court deciding on the adoption will only make its decision once the parents have returned to Luxembourg with the child and after examining the child's original birth certificate, the adoption decree from the country of origin and the letter of consent/abandonment from the biological parents. There is no guarantee that the Luxembourg court will make a favorable decision on the adoption.

For an adoption from a country party to the Hague Adoption Convention, the adoption agency will compile a report, which the parents submit along with the rest of the file to the Luxembourg court deciding in the case. For adoptions from countries party to the Hague Adoption Convention, the Luxembourgish court only intervenes in the process of finding the parents eligible for adoption.

The Luxembourgish court accepts the judgment from the country of origin of the child and the adoption is recorded with the civil authorities. If the agency does not find the prospective adoptive parents eligible for adoption it can refuse to compile a report. If the court finds the parents eligible, the parents can contact the Ministry of Family for transmittal of the case file to the appropriate authorities of the country they wish to adopt from. All files concerning adoptions in countries party to the Hague Convention must go through the Ministry of Family.

Required Documents: The list of documents to be submitted varies from country to country. The following documents must be submitted if the parents wish to adopt a Luxembourgish child:

- Police record (Extrait de casier judiciaire). This is required even if the record is negative.
- Certificate of voter registration; or consular affidavit of nationality; or certified copy of passport or national ID card.
- Birth certificate of prospective adoptive parents.
- Medical certificate, less than three months old, certifying that neither of the parents nor anyone in their household suffers from a medical or mental condition that could harm the child.
- Marriage license.
- Medical certificate of the prospective adoptive child, less than three months old, certifying that there are no health-related reasons for which he/she should not be adopted.
- Proof of residence for the adoptive parents and proof of residency for the child.

Additional Information: Specific questions about adoption in Luxembourg may be addressed to the U.S. Embassy in Luxembourg.

General questions regarding intercountry adoption may be addressed to the Office of Children's Issues, U.S. Department of State, CA/OCS/CI, SA-29, 4th Floor, 2201 C Street, NW, Washington, D.C. 20520-4818, toll-free Tel: 1-888-407-4747.

MACAU

Compiled from the September 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Macau Special Administrative Region

PROFILE

Geography

Area: 29.2 square kilometers total, with 9.3 sq. km. on a peninsula connected to China and the southern islands of Taipa (6.7 sq. km.), Coloane (7.6 sq. km.), and Co Tai (5.6 sq. km., reclaimed land between Taipa and Coloane) linked by bridge and causeway.

Terrain: Coastline is flat, inland is hilly and rocky.
Climate: Tropical monsoon; cool and humid in winter, hot and rainy from spring through summer.

People

Nationality: Noun—Macanese (sing. and pl.).
Population: (1st Quarter 2008) 543,000.
Population growth rate: (1st quarter 2008) 4.3%.
Ethnic groups: Chinese 94.3%, Portuguese 0.6%, Portuguese & Chinese or Portuguese & non-Chinese 1%.
Religions: Buddhist 17%, Roman Catholic 7%, Christian 2%.
Languages: In 1992, the government gave the Chinese (Cantonese) language official status and the same legal force as Portuguese, the official language.
Education: Literacy—91.3%.
Work force: Manufacturing—8.4%; construction—11.6%; wholesale and retail trade, hotels and restaurants—24.3%; financial intermediation, real estate, and related business activities—9.6%; public administration, other community, social and personal services, including gaming—31.5%; transport, storage and communications—4.6%.

Government

Type: Special Administrative Region (SAR) of the People's Republic of China since December 20, 1999 with its own mini-constitution (the Basic Law).
Government branches: Executive—President of the People's Republic of China (head of state), chief executive (head of government), Executive Council (cabinet). Legislative—Legislative Assembly. Judicial—Independent judicial system with a high court (the Court of Final Appeal).

Economy

GDP: (2007) $19.2 billion.
GDP real growth rate: (2007) 27.3%.
Per capita GDP: (2007) $36,300.
Agriculture: Products—rice and vegetables; most foodstuffs and water are imported.
Industry: Types—tourism, gambling, clothing, textiles, electronics, toys, footwear, construction, and real estate development.
Trade: (2007) Exports—$2.6 billion f.o.b.: textiles and clothing, manufactured goods (especially toys, footwear and machinery & mechanical appliances). Major markets—U.S. 40.6%, Hong Kong 13.1%, China 14.9%, EU 18.2%. Imports—$5.4 billion: consumer goods, foodstuffs, fuels, and raw materials. Major suppliers—China 42.6%, Hong Kong 10.1%, EU 15.7%, U.S. 5.6%, Taiwan 3.5%, Japan 9.0%.

PEOPLE

Macau's population is 94.3% Chinese, primarily Cantonese and some Hakka, both from nearby Guangdong Province. The remainder are of Portuguese or mixed Chinese-Portuguese ancestry. The official languages are Portuguese and Chinese (Cantonese). English is spoken in tourist areas. Macau has ten higher education institutions, including the University of Macau; 76.4% of the University of Macau's 5,838 students are local and 23.6% from overseas.

HISTORY

Chinese records of Macau date back to the establishment in 1152 of Xiangshan County under which

Macau was administered, though it remained unpopulated through most of the next century. Members of the South Sung (Song) Dynasty and some 50,000 followers were the first recorded inhabitants of the area, seeking refuge in Macau from invading Mongols in 1277. They were able to defend their settlements and establish themselves there.

The Hoklo Boat people were the first to show commercial interest in Macau as a trading center for the southern provinces. Macau did not develop as a major settlement until the Portuguese arrived in the 16th century. Portuguese traders used Macau as a staging port as early as 1516, making it the oldest European settlement in the Far East. In 1557, the Chinese agreed to a Portuguese settlement in Macau but did not recognize Portuguese sovereignty. Although a Portuguese municipal government was established, the sovereignty question remained unresolved.

Initially, the Portuguese developed Macau's port as a trading post for China-Japan trade and as a staging port on the long voyage from Lisbon to Nagasaki. When Chinese officials banned direct trade with Japan in 1547, Macau's Portuguese traders carried goods between the two countries. The first Portuguese governor was appointed to Macau in 1680, but the Chinese continued to assert their authority, collecting land and customs taxes. Portugal continued to pay rent to China until 1849, when the Portuguese abolished the Chinese customs house and declared Macau's "independence," a year which also saw Chinese retaliation and finally the assassination of Gov. Ferreira do Amaral.

On March 26, 1887, the Manchu government acknowledged the Portuguese right of "perpetual occupation." The Manchu-Portuguese agreement, known as the Protocol of Lisbon, was signed with the condition that Portugal would never surrender Macau to a third party without China's permission.

Macau enjoyed a brief period of economic prosperity during World War II as the only neutral port in South China, after the Japanese occupied Guangzhou (Canton) and Hong Kong. In 1943, Japan created a virtual protectorate over Macau. Japanese domination ended in August 1945.

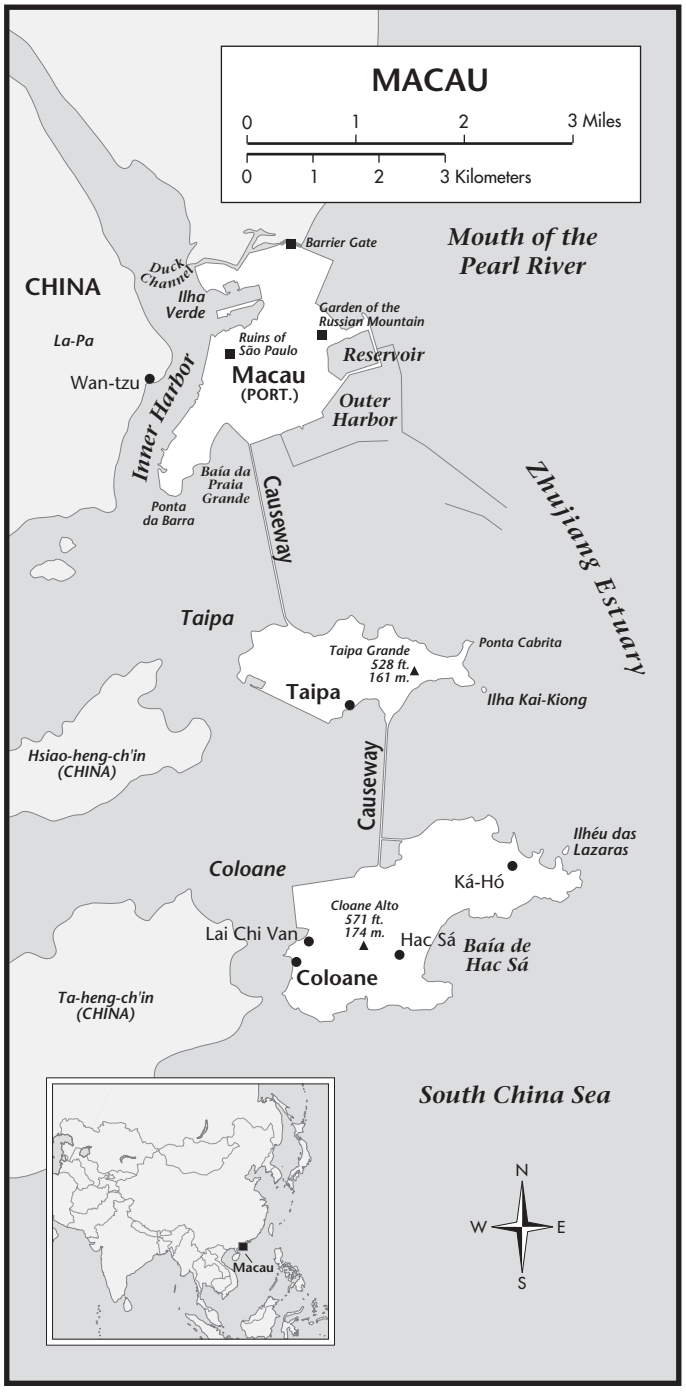
When the Chinese communists came to power in 1949, they declared the Protocol of Lisbon to be invalid as an "unequal treaty" imposed by foreigners on China. However, Beijing was not ready to settle the treaty question, requesting maintenance of "the status quo" until a more appropriate time. Beijing took a similar position on treaties relating to the Hong Kong territories.

Riots broke out in 1966 when pro-communist Chinese elements and the Macau police clashed. The Portuguese Government reached an agreement with China to end the flow of refugees from China and to prohibit all communist demonstrations. This move ended the conflict, and relations between the government and the leftist organizations have remained peaceful.

The Portuguese tried once in 1966 after the riots in Macau, and again in 1974, the year of a military revolution in Portugal, to return Macau to Chinese sovereignty. China refused to reclaim Macau however, hoping to settle the question of Hong Kong first.

Portugal and China established diplomatic relations in 1979. A year later, Gen. Melo Egidio became the first Governor of Macau to visit China. The visit underscored both parties' interest in finding a mutually agreeable solution to Macau's status; negotiations began in 1985, a year after the signing of the Sino-U.K. agreement returning Hong Kong to China in 1997. The result was a 1987 agreement returning Macau to Chinese sovereignty as a Special Administrative Region (SAR) of China on December 20, 1999.

GOVERNMENT



The chief executive is appointed by China's central government after selection by an election committee, whose members are nominated by corporate bodies. The chief executive appears before a cabinet, the Executive Council (Exco), of between 7 and 11 members. The latest Exco, appointed on December 15, 2004, has 10 members. The term of office of the chief executive is 5 years, and no individual may serve for more than two consecutive terms.

The chief executive has strong policy-making and executive powers similar to those of a president. These powers are, however, limited from above by the central government in Beijing, to whom the chief executive reports directly, and from below (to a more limited extent) by the legislature. Edmund Ho, a community leader and banker, is the first China-appointed chief executive of the Macau SAR, having replaced General de Rocha Viera on December 20, 1999. Ho was re-appointed to a second term on September 20, 2004.

The legislative organ of the territory is the Legislative Assembly, a 29-member body of 12 directly elected members, 10 indirectly elected members representing four interest groups: 1) employers; 2) labor; 3) professionals; and 4) charity, culture, education and sports. Seven members are appointed by the chief executive.

The Legislative Assembly is responsible for general lawmaking, including taxation, the passing of the budget, and socioeconomic legislation. In the last election, held in September 2005, pro-entertainment industry groups won five of the 12 directly elected seats, pro-democracy groups won two seats, and pro-China parties won four; a former civil servant took the remaining seat.

The next election will be held in 2009. The city of Macau and the islands of Taipa and Coloane each had a municipal council until January 1, 2002, when the Civic and Municipal

Bureau was formally established to replace the two municipal councils. The legal system is based largely on Portuguese law. The territory has its own independent judicial system, with a high court.

Judges are selected by a committee and appointed by the chief executive. Foreign judges may serve on the courts. In July 1999 the chief executive appointed a seven-person committee to select judges for the SAR. Twenty-four judges were recommended by the committee and were then appointed by Mr. Ho. Macau has three courts: the Court of the First Instance, the Court of the Second Instance, and the Court of Final Appeal, Macau's highest court. Sam Hou Fai is the President (Chief Justice) of the Court of Final Appeal.

Commissioner, Independent Commission Against Corruption: **CHEONG U**

ECONOMY

Macau's economy is based primarily on tourism, including gambling, and textile and garment manufacturing. Efforts to diversify have spawned other small industries, such as footwear, and machinery and mechanical appliances. The textile industry provided about 66% of export earnings in 2007, but total exports were only about 13% of Macau's total GDP. Gaming alone contributed almost 55% of GDP in 2007. The opening of the formerly monopolized gambling sector in 2002 has led to significant new investment in casinos, hotels, and related facilities. Almost 27 million tourists visited Macau in 2007, up 23% from 2006. The recent growth in gambling and tourism has been driven primarily by mainland Chinese and tourists from Hong Kong. Mainland Chinese tourists account for about 55% of all tourist arrivals to Macau. Macau depends on China for most of its food, fresh water, and energy imports. The European Union and Hong Kong are the main suppliers of raw materials and capital goods.

In the last few years much of Macau's manufacturing operations (mainly textiles and garments) have moved across the border to mainland China. Mainland competition, along with the 2005 end of Multi-Fiber Arrangement (MFA) quotas, which had provided a near guarantee of export markets, are slowly spelling the end of Macau's low-end mass production of textiles; the bulk of the SAR's merchandise export earnings. For future growth, Macau is betting heavily on becoming a regional center for gaming, tourism, conventions and corporate incentive travel; foreign and local investors have massively expanded the casino, hotel and restaurant sectors.

FOREIGN RELATIONS

Macau's foreign relations and defense are the responsibility of China. China has, however, granted Macau considerable autonomy in economic and commercial relations. The U.S. Government has no offices in Macau. U.S. interests are represented by the U.S. Consulate General in Hong Kong.

TRAVEL

Consular Information Sheet

October 16, 2008

Country Description: Macau, formerly a Chinese territory under Portuguese administration, became a Special Administrative Region (SAR) of the People's Republic of China (PRC) on December 20, 1999. The SAR maintains a high degree of autonomy, except in the areas of defense and foreign policy. Macau retains its own currency, laws, and border controls. Facilities for tourism are well developed. Gambling, tourism, and textile and apparel manufacturing are the largest sectors in Macau's economy. With a population of approximately 508,500, Macau covers a 28.2 square-kilometer area including the peninsula of Macau, connected to the PRC, and the two islands of Taipa and Coloane linked by a highway 2.2 km long.

Entry Requirements: Valid passports are required. Passports should be valid for 30 days beyond the intended period of stay in Macau. Because many neighboring areas require six months validity remaining on the passport, U.S. citizens planning travel beyond Macau should ensure that their passports are valid for at least six months from the date of their proposed entry into such areas. A visa is not required for tourist visits of up to 30 days.

Holders of a Hong Kong Permanent Identity Card or a Hong Kong Reentry Permit may use either document to enter Macau for a maximum stay of up to one (1) year. All visitors must present their passport or other valid travel document upon arrival. Visit the Macau Government Tourist Office web site at http://www.state.gov/r/pa/ei/bgn/7066.htm for the most current visa information.

U.S. citizens should obtain all required visas prior to departing the U.S. Specifically, U.S. citizens wishing to travel to the PRC from Macau require a PRC visa and should apply at the PRC Embassy or consulates in the United States Visas to the PRC can be obtained at the PRC Visa Office in Macau; however, they are often issued for a shorter length and fewer entries than those obtained in the U.S. Parents whose children hold U.S. passports should be aware that the PRC Visa Office may require original birth certificates or other U.S. documents for these children. Persons applying in Macau for PRC visas for U.S.-born children have been unable to obtain PRC visas without the certified U.S. birth certificate. Parents should consider bringing their children's birth certificates if applying for a PRC visa in Macau.

Safety and Security: Although there have been no terrorist incidents in Macau, the Department of State reminds Americans everywhere that U.S. citizens and interests are at a heightened risk of attack by terrorists. These individuals and groups have proven that they do not distinguish between official and civilian targets. Because security awareness has been elevated within the United States, terrorists may target U.S. interests overseas. Private Americans should be aware of the potential risks when making travel plans and should remain vigilant with regard to their personal security and exercise caution. The State Department will continue to develop information about potential threats. For the latest security information, Americans traveling abroad should regularly monitor the Department's Internet web site at where the current Travel Warnings and Travel Alerts, including the Worldwide Caution Travel Alert, can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S. and Canada, or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: Petty street crime, including pick-pocketing, occasionally occurs in tourist areas in Macau, including in and around casinos and at the airport. Travelers should take caution with their personal belongings and travel documents at all times.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, to contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

The local equivalent to the "911" emergency line in Macau is 999. In addition, tourists can dial 112 to report crimes directly related to travel, such as petty theft.

Medical Facilities and Health Information: Several major hospitals in Macau have adequate medical facilities, and Kiang Wu and Conde de Sao Januario hospitals are able to provide emergency medical care. The U.S. Consulate General Hong Kong web site maintains a list of medical providers in Macau at http://hongkong.usconsulate.gov. Highly developed medical facilities and trained personnel are available in Hong Kong, which is about an hour by jetfoil and ten minutes by helicopter from Macau.

The U.S. Department of State is unaware of any HIV/AIDS entry restrictions for visitors to or foreign residents of Macau.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's web site at http://wwwn.cdc.gov/travel/default.aspx. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith/en.

The H5N1 virus, a form of avian influenza, has been found in poultry and wild birds in Macau. While rare, human infection and deaths from H5N1 have been reported worldwide. Most reported cases of human infection with H5N1 viruses have occurred after contact with H5N1-infected poultry or birds.

Further information about avian influenza and about preparing for a possible influenza pandemic is available from our Avian Flu Fact Sheet, from www.pandemicflu.gov and from wwwn.cdc.gov/travel.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Macau is provided for general reference only, and may not be totally accurate in a particular location or circumstance. Traffic moves on the left in Macau and roads are narrow and winding. Traffic is generally congested throughout the day. Most visitors to Macau choose not to drive. Taxis are plentiful and inexpensive by the airport, ferry terminal, and gaming venues. Public buses are also inexpensive and frequent but may be difficult to find outside major tourist areas.

For specific information concerning Macau driving permits, vehicle inspection, road tax and mandatory insurance, contact the Public Security Police Force at telephone (853) 2837 4214; fax (853) 2852 3407; email info@fsm.gov.mo or the Macau Transport Department (Comissariado de Transito de Macau), Ave Sidonio Pais, Macau; telephone (853) 374-214; fax (853) 522-966; web site http://www.iacm.gov.mo. (Please note: The web site is available only in Chinese and Portuguese.)

Aviation Safety Oversight: As there is no direct commercial air service between the United States and Macau, the U.S. Federal Aviation Administration (FAA) has not assessed Macau's Civil Aviation Authority for compliance with ICAO international aviation safety standards. For more information, travelers may visit the FAA's Internet web site at http://www.faa.gov.

Currency: There are no currency restrictions for tourists in Macau. Although the pataca is the official currency in Macau, Hong Kong currency is commonly used in transactions, especially in tourist areas. Travelers visiting Macau from Hong Kong may wish to bring sufficient Hong Kong dollars to cover their expenses. Credit cards and ATM network debit cards are widely accepted in Macau. Banks and major hotels accept traveler's checks.

Customs Regulations: Macau customs authorities may enforce strict regulations concerning temporary importation into or export from Macau of items such as firearms, ivory, certain categories of medications, and other goods. Please see the Macau Customs Service web site at http://www.customs.gov.mo/en/index1.htm for further information.

Visitors to Macau should be aware that the importation into the United States of counterfeit, brand-name items, such as watches, compact discs, computer software, and clothing, is prohibited by U.S. law.

Dual Nationality: Under the nationality law of the PRC, persons of Chinese descent who were born in the PRC, including Macau, are PRC citizens. However, under an agreement between the United States and the People's Republic of China, all U.S. citizens entering Macau on their U.S. passports, including such persons as may be considered PRC nationals by the PRC authorities, are considered U.S. citizens by the Macau SAR

authorities for purposes of ensuring U.S. consular access and protection during their initial legal stay of up to 30 days in Macau.

Dual national residents or former residents of Macau who wish to ensure U.S. consular access and protection after the initial 30-day period of visa-free admission into Macau should declare their U.S. nationality to the Macau Immigration Department upon arrival. Dual-national residents of Macau who enter Macau on travel documents other than their U.S. passports and who desire U.S. consular protection should declare their U.S. nationality as soon as possible after entry. This "declaration of change of nationality" will ensure U.S. consular protection. It may also result in loss of one's PRC nationality (but not necessarily one's right of abode). Whereas failure to declare U.S. nationality may jeopardize U.S. consular protection, such failure will not jeopardize one's U.S. citizenship.

Dual nationals contemplating onward travel into mainland China should be attentive to use of their U.S. passports. Dual nationals who enter or depart mainland China using a U.S. passport and a valid PRC visa retain the right of U.S. consular access and protection under the U.S.-PRC Consular Convention. The ability of the U.S. Embassy or Consulates General to provide normal consular services would be extremely limited should a dual national enter mainland China on a Macau SAR or other non-U.S. passport.

In addition to being subject to all Macau SAR laws affecting U.S. citizens, dual nationals may be subject to laws of Macau that impose special obligations on Macau citizens. For further information on consular protection and dual nationality please refer to our information on dual nationality.

Language: The official languages in the Macau SAR are Chinese and Portuguese; however, English is spoken in tourist areas.

Typhoons: During the storm season (July through September), the Macau Observatory (Direccao dos Servicos Meteorologicos e Geofisicos) issues typhoon warnings on an average of six times a year. The Macau Observatory has a good notification and monitoring system in place. Please consult the Macau Observatory's web site at http://www.smg.gov.mo for further information. General information about natural disaster preparedness is available via the Internet from the U.S. Federal Emergency Management Agency (FEMA) at http://www.fema.gov.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating Macau's laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Macau are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in illicit sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in Macau are encouraged to register with the nearest U.S. embassy or consulate through the State Department's travel registration web site so that they can obtain updated information on travel and security within Macau.

There is no U.S. diplomatic or consular presence in Macau. Consular assistance for U.S. citizens is provided by the U.S. Consulate General in Hong Kong, 26 Garden Road, Central, Hong Kong; telephone (852) 2523-9011 or (852) 2841-2211; fax (852) 2845-4845; e-mail acshk@state.gov, web site at hongkong.usconsulate.gov. The mailing address (from the U.S.) of the Consulate General in Hong Kong is PSC 461, Box 5, FPO, AP 96521-0006. Please check the U.S. Consulate General Hong Kong web site for current office hours. U.S. citizens living in or visiting Macau are encouraged to register at the Consular Section of the U.S. Consulate General in Hong Kong and obtain updated information on travel and security within Macau.

Intercountry Adoption

February 2007

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is based on public sources and current understanding. Questions involving foreign and U.S. immigration laws and legal interpretation should be addressed respectively to qualified foreign or U.S. legal counsel.

Please Note: U.S. citizen prospective adoptive parents who are interested in adopting from Macau are strongly encouraged to contact U.S. consular officials in Hong Kong before formalizing an adoption agreement in Macau, to ensure that appropriate procedures have been followed that will make it possible for the child to obtain an. immigrant visa.

Patterns of Immigration: Very few intercountry adoptions occur in Macau. According to the Social Welfare Bureau in Macau, only one orphan has been adopted by a foreign family (Portuguese nationals) in the past five years.

Adoption Authority: The Social Welfare Bureau of the Macau Special

Administrative Region Government is the sole Adoption Authority in Macau. Contact information is as follows:

Social Welfare Bureau of the Macau Special Administrative Region Government
Estrada do Cemiterio, no. 6,
Macau, China;
Tel: (853) 3997716, 3997717, 3997736;
E-mail: srh@ias.gov.mo
Website: http://www.ias.gov.mo.

Eligibility Requirements for Adoptive Parents: To qualify to adopt a child in Macau, prospective parent(s) must meet one of the criteria listed below:

- Be a legally married couple (both over 25 years of age, married for at least three years and not de facto separated).
- Be a couple both over 25 years of age, who have been cohabitating for at least 5 years.
- Be a single person who is at least 28 years of age (unless the birth parent of the prospective adoptee has been living with the potential adopting parent under de facto marriage for over 3 years—in this case, the prospective adoptive parent must be at least 25 years old).

Prospective adoptive parents should be at least 18 years older than the child they hope to adopt. Likewise, there should not be more than a 50-year age gap between the age of either prospective adoptive parent and the prospective adoptee. Children born in Macau are Chinese nationals and ethnic-Chinese parents stand a better chance of getting matched with a child.

Residency Requirements: There are no residency requirements for intercountry adoption cases in Macau. Prospective adoptive parents should be aware that the Social Welfare Bureau will first try to find a family resident in Macau to adopt any available children.

Time Frame: The Social Welfare Bureau will review all adoption applications within 10 days and inform the facilitating Central Authority or adoption organization of the decision. The total time frame between the initial submission of the application and the final decision by the court can be more than one year. Should the adoption be approved, prospective adoptive parent(s) should be prepared to travel to Macau for approximately 2-3 weeks for legal proceedings and to escort the adoptee back to the United States.

Adoption Agencies and Attorneys: Prospective adoptive parents are advised to fully research any adoption agency or facilitator they plan to use for adoption services. For U.S.-based agencies, it is suggested that prospective adoptive parents contact the Better Business Bureau and/or the licensing office of the appropriate state government agency in the U.S. state where the agency is located or licensed.

Adoption Fees: The Social Welfare Bureau does not charge any fees for the assessment and matching process. Prospective adoptive parents are responsible for paying all fees and expenses related to court proceedings, applications for certified documents, transportation, etc. An estimate of the fees associated with the adoption process in Macau was not provided to the U.S. Consulate General in Hong Kong.

Adoption Procedures: Parents hoping to adopt a child in Macau should submit an application to the Social Welfare Bureau. Applications can be submitted either through the Central Authority in the country where the parent(s) habitually reside or via a licensed agency/organization engaging in intermediary adoption activities. Prospective adoptive parents living in Macau and possessing valid Macau identity cards may submit an application directly to the Social Welfare Bureau.

The Social Welfare Bureau will review the adoption application and notify the relevant agency/organization of its decision. Once an application has been accepted, the Social Welfare Bureau will start the process of matching the prospective adoptive parent(s) with a child.

Once a match has been made, the Social Welfare Bureau will compile a "feasibility study" of the adoption. If, based on the findings of the study, the application is approved, the Social Welfare Bureau will initiate judicial entrustment procedures before a civil court (Tribunal Judicial de Base). Once an authorization for judicial entrustment has been obtained, arrangements will be made for the child to live abroad with the adoptive parent(s) for a trial period. Such trial periods typically last for up to one year. During this period, the Social Welfare Bureau will work with the relevant authorities in Singapore to determine whether the adoption by the applicant(s) would be in the best interests of the child. For the adoption to be legally finalized in Macau, a final adoption judgment must be submitted to the Social Welfare Bureau either by the relevant Central Authority of the country of the adoptive parents' habitual residence or by a certified adoption agency.

Required Documents: Any application to adopt a child in Macau must provide the following documentation:

- Proof that the biological parents of the prospective adoptee have given permission for the adoption. If the child is 12 years old or older, he/she must also consent to the adoption. Certain exemptions do exist, and prospective adoptive parents should consult legal counsel with knowledge of the laws of Macau.
- Documentation that the prospective adoptive parents have been evaluated and declared suitable to adopt by an authorized entity in their country of residence. The Social Welfare Bureau will accept a Notice of Favorable Determination Concerning Application for Advance Processing of an Orphan Petition (Form I-171H) together with a full home study report to fulfill this requirement.

- Proof that the laws in the prospective adoptive parents' country of residence allow the child and adoptive parents to live together for a sufficient period of time to establish a parent-child relationship.

- Proof of identity (U.S. passport), marriage certificate(s) or evidence of termination of previous marriage(s), proof of income, copies of school credentials, evidence of prior adoptions (if any), medical examination reports for the adoptive parent(s), police certification to show any existing criminal records, and family photos. Please note that notarized or certified copies of documents are generally accepted by authorities in Macau.

Additional Information: Specific questions about adoption in Macau may be addressed to the U.S. Consulate General in Hong Kong. General questions regarding intercountry adoption may be addressed to the Office of Children's Issues, U.S. Department of State, CA/OCS/CI, SA-29, 4th Floor, 2201 C Street, NW, Washington, D.C. 20520-4818, toll-free Tel: 1-888-407-4747.

MACEDONIA

Compiled from the September 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Republic of Macedonia

PROFILE

Geography

Area: 25,713 square km. (slightly larger than Vermont).
Cities: (2001 est.) Capital—Skopje 600,000; Tetovo, Kumanovo, Gostivar and Bitola 100,000+.
Geography: Situated in the southern region of the Balkan Peninsula, Macedonia is landlocked and mountainous.
Climate: Three climatic types overlap—Mediterranean; moderately continental; and mountainous, producing hot, dry summers and cold, snowy winters.

People

Population: (2006 est.) 2,042,894.
Growth rate: (2006 est.) 0.2%.
Ethnic groups: (2002) Macedonian 64.18%, Albanian 25.17%, Turkish 3.85%, Roma 2.66%, Serb 1.78%.
Religions: Eastern Orthodox 65%, Muslim 29%, Catholic 4% and others 2%.
Languages: Macedonian 70%, Albanian 21%, Turkish 3%, Serbo-Croatian 3%, and others 3%.
Education: Years compulsory—8. Literacy—94.6%.
Health: (2006 est.) Infant mortality rate—11.1 deaths/per 1,000 live births. Life expectancy—males 71.79 years; females 76.43 years.
Labor force (2006) 903,576; employed 578,810: services—37.5%; industry and commerce—44.9%; agriculture—17.6%.

Government

Type: Parliamentary democracy.
Constitution: Adopted November 17, 1991; effective November 20, 1991. Amended January 6, 1992.
Independence: September 8, 1991 (from Yugoslavia).
Government branches: Executive—prime minister (head of government), council of ministers (cabinet), president (head of state). Legislative—unicameral parliament or Sobranie (120 members elected by popular vote to 4-year terms from party lists based on the percentage parties gain of the overall vote in each of six election units). Judicial—Supreme Court, State Judicial Council, Constitutional Court, Public Prosecutor's Office, Public Attorney. Legal system is based on civil law; judicial review of legislative acts.
Political subdivisions: 84 opstini (municipalities) plus the city of Skopje.
Suffrage: Universal at age 18.
Political parties: Internal Macedonian Revolutionary Organization-Democratic Party for Macedonian National Unity (VMRO-DPMNE); Social-Democratic Union of Macedonia (SDSM); Democratic Union for Integration (DUI); Democratic Party of Albanians (DPA); New Social Democratic Party (NSDP); Internal Macedonian Revolutionary Organization-People's Party (VMRO-NP); Party for Democratic Prosperity (PDP); Democratic Renewal of Macedonia (DOM); National Democratic Party (NDP); Liberal-Democratic Party (LDP); Socialist Party of Macedonia (SPM); Liberal Party (LP); Democratic Alternative (DA); Democratic Union (DU); Democratic Party of the Turks in Macedonia (DPTM); Democratic League of Bosniaks; Democratic Party of Serbs in Macedonia, United Party of Romas in Macedonia; Democratic Union of Vlachs from Macedonia; Labor-Agricultural Party of Macedonia, Socialist-Christian Party of Macedonia.

Economy

GDP: (2007 est.) $8.036 billion.

Per capita GDP: (2007 est.) $3,720.

Real GDP growth: (1st quarter 2008 est.) 5.2%.

Annualized inflation rate: (1st half 2008) 10.1%.

Unemployment rate: (2007) 34.9%.

Trade: Significant exports—steel, textile products, chromium, lead, zinc, nickel, tobacco, lamb, and wine.

Exchange rate: (2007 avg.) 44.7 Macedonian denars = U.S.$1; (2006 avg.) 48.8 Macedonian denars = U.S.$1.

GEOGRAPHY

Macedonia is located in the heart of south central Europe. It shares a border with Greece to the south, Bulgaria to the east, Serbia (and Kosovo) to the north, and Albania to the west. The country is 80% mountainous, rising to its highest point at Mt. Korab (peak 2,764 m).

PEOPLE

Since the end of the Second World War, Macedonia's population has grown steadily, with the greatest increases occurring in the ethnic Albanian community. From 1953 through the time of the latest official census in 2002 (initial official results were released December 2003), the percentage of ethnic Albanians living in Macedonia rose threefold. The western part of the country, where most ethnic Albanians live, is the most heavily populated, with approximately 40% of the total population. As in many countries, people have moved into the cities in search of employment. Macedonia has also experienced sustained high rates of permanent or seasonal emigration.

HISTORY

Throughout its history, the present-day territory of Macedonia has been a crossroads for both traders and conquerors moving between the European continent and Asia Minor. Each of these transiting powers left its mark upon the region, giving rise to a rich and varied cultural and historical tradition.

After the fall of the Western Roman Empire, the territory of Macedonia fell under the control of the Byzantine Empire in the 6th and 7th centuries. It was during this period that large groups of Slavic people migrated to the Balkan region. The Ottoman Turks conquered the territory in the 15th century; it remained under Ottoman Turkish rule until 1912.

After more than four centuries of rule, Ottoman power in the region began to wane, and by the middle of the 19th century, Greece, Bulgaria, and Serbia were competing for influence in the territory. During this time, a nationalist movement emerged and grew in Macedonia. The latter half of the 19th century, and continuing into the early part of the 20th century, was marked by sporadic nationalist uprisings, culminating in the Ilinden Uprising of August 2, 1903. Macedonian revolutionaries liberated the town of Krushevo and established the short-lived Republic of Krushevo, which was put down by Ottoman forces after 10 days. Following Ottoman Turkey's defeat by the allied Balkan countries—Bulgaria, Serbia, Montenegro, and Greece—during the First Balkan War in autumn 1912, the same allies fought the Second Balkan War over the division of Macedonia. The August 1913 Treaty of Bucharest ended this conflict by dividing the territory between Bulgaria, Greece, and Serbia. The 1919 Treaty of Versailles sanctioned partitioning Macedonia between The Kingdom of Serbs, Croats and Slovenes, Bulgaria, and Greece. In the wake of the First World War, Vardar Macedonia (the present day area of the Republic of Macedonia) was incorporated into the newly formed Kingdom of Serbs, Croats, and Slovenes.

Throughout much of the Second World War, Bulgaria and Italy occupied Macedonia. Many people joined partisan movements during this time and succeeded in liberating the region in late 1944. Following the war, Macedonia became one of the constituent republics of the new Socialist Federal Republic of Yugoslavia under Marshall Tito. During this period, Macedonian culture and language flourished.

As communism fell throughout Eastern Europe in the late 20th century, Macedonia followed its other federation partners and declared its independence from Yugoslavia in late 1991. Macedonia was the only republic of the former Yugoslavia whose secession in 1991 was not clouded by ethnic or other armed conflict, although the ethnic Albanian population declined to participate in the referendum on independence. The new Macedonian constitution took effect November 20, 1991 and called for a system of government based on a parliamentary democracy. The first democratically elected coalition government was led by Prime Minister Branko Crvenkovski of the Social Democratic Union of Macedonia (SDSM) and included the ethnic Albanian Party for Democratic Prosperity (PDP). Kiro Gligorov became the first President of an independent Macedonia.

President Gligorov was the first president of a former Yugoslav republic to relinquish office. In accordance with the terms of the Macedonian constitution, his presidency ended in November 1999 after 8 years in office, which included surviving a car bombing assassination attempt in 1995. He was succeeded by former Deputy Foreign Minister Boris Trajkovski (VMRO-DPMNE), who defeated Tito Petkovski (SDSM) in a second-round run-off election for the presidency on November 14, 1999. Trajkovski's election was confirmed by a December 5, 1999 partial re-vote in 230 polling stations, which the Macedonian Supreme Court mandated due to election irregularities.

In November 1998 parliamentary elections, the SDSM lost its majority. A new coalition government emerged under the leadership of Prime Minister Ljubco Georgievski of the Internal Macedonian Revolutionary Organization-Democratic Party for Macedonian National Unity (VMRO-DPMNE). The initial coalition included the ethnic Albanian Democratic Party of Albanians (DPA).

During the Yugoslav period, Macedonian ethnic identity was evident in that most of Macedonia's Slavic population identified themselves as Macedonians, while several minority groups, in particular ethnic Albanians, retained their own distinct political culture and language. Although interethnic tensions simmered under Yugoslav authority and during the first decade of its independence, the country avoided ethnically motivated conflict until several years

after independence. Ethnic minority grievances, which had erupted on occasion (1995 and 1997), rapidly began to gain political currency in late 2000, leading many in the ethnic Albanian community in Macedonia to question their minority protection under, and participation in, the government. Tensions erupted into open hostilities in Macedonia in February 2001, when a group of ethnic Albanians near the Kosovo border carried out armed provocations that soon escalated into an insurgency. Purporting to fight for greater civil rights for ethnic Albanians in Macedonia, the group seized territory and launched attacks against government forces. Many observers ascribed other motives to the so-called National Liberation Army (NLA), including support for criminality and the assertion of political control over affected areas. The insurgency spread through northern and western Macedonia during the first half of 2001. Under international mediation, a cease-fire was brokered in July 2001, and the government coalition was expanded in July 2001 to form a grand coalition which included the major opposition parties.

The expanded coalition of ruling ethnic Macedonian and ethnic Albanian political leaders, with facilitation by U.S. and European Union (EU) diplomats, negotiated and then signed the Ohrid Framework Agreement in August 2001, which brought an end to the fighting. The agreement called for implementation of constitutional and legislative changes, which lay the foundation for improved civil rights for minority groups. The Macedonian parliament adopted the constitutional changes outlined in the accord in November 2001. The grand coalition disbanded following the signing of the Ohrid Framework Agreement and the passage of new constitutional amendments. A coalition led by Prime Minister Georgievski, including DPA and several smaller parties, completed its parliamentary term.

In September 2002 elections, an SDSM-led pre-election coalition won half of the 120 seats in parliament. Branko Crvenkovski was elected Prime Minister in coalition with the ethnic Albanian Democratic Union for Integration (DUI) party and the Liberal-Democratic Party (LDP).

On February 26, 2004 President Trajkovski died in a plane crash in Bosnia. Presidential elections were held April 14 and 28, 2004. Then-Prime Minister Branko Crvenkovski won the second round and was inaugurated President on May 12, 2004. The parliament confirmed Hari Kostov, former Interior Minister, as Prime Minister June 2, 2004. Prime Minister Kostov resigned November 15, 2004. On December 17, 2004, former Defense Minister Vlado Buckovski was confirmed by parliament as Prime Minister, maintaining the coalition with the ethnic Albanian Democratic Union for Integration (DUI) and the Liberal-Democratic (LDP) parties. With international assistance, the SDSM-DUI-LDP governing coalition completed the legislative implementation of the Ohrid Framework Agreement, which is a precondition for Macedonia's integration into Euro-Atlantic institutions. A November 7, 2004 referendum opposing completion of this process failed, freeing the way for the government to complete Framework Agreement implementation.

Local elections were held in March-April 2005 under a new territorial reorganization plan that consolidated the overall number of Macedonia's municipalities and created a number of ethnically-mixed municipalities in which ethnic Albanian populations

were dominant. The process of decentralization began in the new municipalities in July 2005 and is continuing.

The July 2006 parliamentary elections resulted in a VMRO-DPMNE-led government assuming power, in coalition with DPA, NSDP, and several smaller parties. The new government, which was confirmed in office by a parliamentary vote on August 26, 2006, stated its commitment to completing Framework Agreement implementation and reaffirmed its commitment to pursuing NATO and EU membership.

At NATO's Bucharest Summit in April 2008, all 26 NATO Allies agreed Macedonia had met the criteria for membership. Consensus on extending a NATO membership invitation could not be reached, due to the unresolved dispute with Greece over Macedonia's name.

Following the Bucharest Summit, the opposition DUI party, in collaboration with the governing VMRO-DPMNE and DPA parties, called for the dissolution of parliament and for early parliamentary elections, which were held in June 2008. On July 26, Prime Minister Gruevski was reconfirmed in office with a new coalition along with the DUI party and one smaller party. Next regular parliamentary elections should be in 2012.

GOVERNMENT AND POLITICAL CONDITIONS

The unicameral assembly (Sobranie) consists of 120 seats. Members are elected by popular vote from party lists, based on the percentage parties gain of the overall vote in each of six election districts of 20 seats each. Members of parliament have a 4-year mandate.

The Prime Minister is the head of government and is selected by the party or coalition that gains a majority of seats in parliament. The Prime Minister and other ministers must not be members of parliament. The President represents Macedonia at home and abroad. He is the commander in chief of the armed forces of Macedonia and heads its Security Council. The President is elected by general, direct ballot and has a term of 5 years, with the right to one re-election.

Presidential elections were held April 14 and 28, 2004 to succeed President Trajkovski, who died in office in February 2004. Local elections on the basis of a new municipal division mandated by the Framework Agreement were held in March-April 2005.

The court system consists of a Supreme Court, Constitutional Court, and local and appeals courts. The State Judicial Council monitors the ethical conduct of judges and recommends to parliament the election of judges. The Supreme Court is the highest court in the country and is responsible for the equal administration of laws by all courts. Its judges are appointed by parliament without time limit. The Constitutional Court is responsible for the protection of constitutional and legal rights and for resolving conflicts of power between the three branches of government. Its 9 judges are appointed by parliament with a mandate of 9 years, without the possibility of re-election. An independent Public Prosecutor is appointed by parliament with a 6-year mandate.

Principal Government Officials

Last Updated: 11/12/08

Pres.: **Branko CRVENKOVSKI**

The country maintains an embassy in the United States at 2129 Wyoming Ave, NW, Washington, DC 20008 (tel: (202) 667-0501; fax: (202) 667-2131). It maintains a Consulate General in Detroit: 2000 Town Center, Suite 1130, Southfield, MI 48075 (tel: (248) 354-5537; fax: (248) 354-5538).

ECONOMY

Macedonia is a small economy with a gross domestic product (GDP) of about $8 billion, representing about 0.01% of the total world output. It is an open economy, highly integrated into international trade, with a total trade-to-GDP ratio of 106.8% at the end of 2007. Agriculture and industry have been the two most important sectors of the economy in the past, but the services sector has gained prominence in recent years. Economic problems persist, even as Macedonia undertakes structural reforms to finish the transition to a market-oriented economy. A largely obsolete industrial infrastructure has not seen much investment during the transition period. Labor force education and skills are competitive in some technical areas and industries but significantly lacking in others. Without adequate job opportunities,

many with the best skills seek employment abroad. A low standard of living, high unemployment rate, and relatively modest economic growth rate are the central economic problems.

Five years of continuous economic expansion in Macedonia was interrupted by the 2001 conflict, which led to a contraction of 4.5% in 2001. Growth started to pick up in 2003 (2.8%) and continued in 2004 (4.1%), 2005 (4.1%), 2006 (4.0%), and 2007 (5.0%). Living standards still lag behind those enjoyed before independence. Real growth is projected to reach a rather optimistic 6% annually in 2008, with inflation of up to 5%. The United States is supporting Macedonia's transition to a democratic, secure, market-oriented society with substantial amounts of assistance.

Background

After the breakup of Yugoslavia in 1991, Macedonia, the former Yugoslavia's poorest republic, faced formidable economic challenges posed by both the transition to a market economy and a difficult regional situation. The breakup deprived Macedonia of key protected markets and large transfer payments from the central Yugoslav government. The war in Bosnia, international sanctions on Serbia, and the 1999 crisis in neighboring Kosovo delivered successive shocks to Macedonia's trade-dependent economy. The government's painful but necessary structural reforms and macroeconomic stabilization program generated additional economic dislocation. Macedonia's economy was hurt especially by a trade embargo imposed by Greece in February 1994 in a dispute over the country's name, flag, and constitution, and by international trade sanctions against Serbia that were not suspended until a month after conclusion of the Dayton Accords. The impact of the 2001 ethnic Albanian insurgency in Macedonia, decreased international demand for Macedonian products, canceled contracts in the textile and iron and steel industry, and poor restructuring of the private sector affected Macedonia's growth and foreign trade prospects through 2004. Macedonia's political and security situation is stable. This has allowed the government to refocus energies on domestic reforms, boosting economic growth, and attracting increased levels of foreign investment. In 2004, the government passed a progressive Trade Companies Law aimed at easing impediments to foreign investment, providing tax and investment incentives, and guaranteeing shareholder rights. In 2006, the government began implementing a one-stop procedure for business registration that considerably shortened the time required to register a new business. The government's fiscal policy, aligned with International Monetary Fund (IMF) and World Bank policies, helped maintain a stable macroeconomic environment. Legislation that would further liberalize the telecommunications market, and completion of the first phase of privatization of the electricity sector, sent promising signals to investors. However, economic growth remained sub-par in 2005 and 2006, due in part to poor government results in combating corruption and a weak judiciary, as well as high domestic finance costs and continued bureaucratic obstacles to doing business. The new Government of Macedonia that took office in August 2006 put the fight against corruption and attracting foreign investors at the very top of its priority list. In 2007, it launched an expensive marketing campaign promoting the country as a good investment destination. It provided business incentives by cutting rates on profit tax and personal income tax, while implementing a "regulatory guillotine"—an activity which aims to significantly reduce procedures and legislative requirements for doing business.

Macroeconomy

Real GDP growth continued in 2008 at approximately the same tempo as in 2007. After growing by 4.1%, 4%, and 5% respectively in 2005, 2006, and 2007, it reached 5.2% in the first quarter of 2008. The growth was broad-based as value added increased in all sectors. Wholesale and retail trade sectors led the growth with a 10.2% annual increase, and construction followed with 9.7%. Agriculture turned from a 3% dip in 2007 to a 4.2% rise in the first quarter of 2008. Industrial output in the first five months of 2008 was 8.3% higher than in same period of 2007. Inflation unexpectedly surpassed projections, with the year-on-year consumer price index (CPI) rising by 6.1%. Growing food and energy prices pushed inflation up to 10.1% in the first half of 2008. The official unemployment rate came down a bit to 34.9% in 2007. Strong collection of revenues throughout 2007 resulted in a budget surplus of 0.3% of GDP, despite the projected deficit of 1% of GDP. Tax collection continued the upward trend in the first half of 2008, surpassing last year's first half performance by more than 20%. Expansionary monetary policy continued in 2008 as well, providing for total credit to the private sector at the end of May to grow by 43.4%. This alerted the Central Bank to raise interest rates on Central Bank bills, and put a ceiling on credit to households, but interest rates spreads continued to narrow. Import growth doubled while export-led growth remained stagnant, thus presenting a large trade deficit. At the end of May 2008, it amounted to 13.3% of GDP. As a result, the current account deficit widened to over 5% of GDP, already breaching the end-year target. Private transfers are stagnant compared to last year, and foreign direct investment (FDI), although higher than the same period of last year, is not enough to cover it. Foreign currency reserves dropped down to levels that barely cover three months of imports; further loss would seriously undermine the stability of the domestic currency. Public debt remained low at 29.3% of GDP at the end of April 2008, due to pre-paying debts to international financial institutions in 2007. In late 2005, Macedonian authorities concluded a three-year Stand-By Arrangement (SBA) with the IMF and a Programmatic Development Policy Loan (PDPL) with the World Bank. In 2007 both financial institutions positively assessed the enforcement of the programs, allowing the Government of

Macedonia to withdraw a tranche of the PDPL 2 agreement worth $30 million.

Since the first withdrawal of $15.4 million in 2006, the SBA has been only precautionary as balance-of-payment support was no longer needed. In April 2008, the IMF Board approved the third positive review of the SBA, and the fourth and final review will take place in September together with Article IV consultations. As of the end of August 2008, when the previous SBA expired, the Government of Macedonia had not initiated negotiations for a new arrangement with the IMF. In March 2007, the World Bank Board adopted a new four-year Country Partnership Strategy for Macedonia, which could potentially bring to the country total lending of up to $280 million.

Trade

Macedonia remains committed to pursuing membership in the European Union and global economic structures. It became a full World Trade Organization (WTO) member in April 2003. Following a 1997 cooperation agreement with the European Union (EU), Macedonia signed a Stabilization and Association Agreement with the EU in April 2001, giving Macedonia duty-free access to European markets. In December 2005, it moved a step forward, obtaining candidate country status for EU accession. Macedonia has had a foreign trade deficit since 1994, which reached a record high of $1.871 billion in 2007, or 23.3% of GDP. Total trade at the end of May 2008 (imports plus exports of goods and services) was $4.515 billion, and the trade deficit already amounted to $1.150 billion, or 13.3% of GDP. A significant 51.5% of Macedonia's total trade was with EU 27 countries. By separate countries, Macedonia's major trading partners are Serbia, Russia, Germany, and Greece. In the first five months of 2008, total trade between Macedonia and the United States was $37.6 million. U.S. exports accounted for 1.2% of Macedonia's total imports. U.S. meat, mainly poultry, and electrical machinery have been particularly attractive to Macedonian importers. Principal Macedonian exports to the United States are tobacco, apparel, footwear, and iron and steel.

Macedonia has Free Trade Agreements with Ukraine, Turkey, and the European Free Trade Association countries. Bilateral agreements with Albania, Bosnia and Herzegovina, Croatia, Serbia, Montenegro, UN Mission in Kosovo (UNMIK), and Moldova were replaced with the membership in the Central European Free Trade Agreement (CEFTA), which the other countries joined in December 2006.

DEFENSE

Macedonia established its armed forces following independence and the complete withdrawal of the Yugoslav National Army (JNA) in March 1992. The Macedonian Armed Forces consist of an army, navy, air and air defense force, and a police force (under the Ministry of Interior). Under its North Atlantic Treaty Organization (NATO) Membership Action Plan, Macedonia has launched a major effort to reform and reconstruct its armed forces with the goal of building and sustaining a modern, professional defense force of about 12,000 troops.

Successive Macedonian governments have viewed integration into Euro-Atlantic political, economic, and security institutions as the country's primary foreign policy goal. In pursuit of these goals, Macedonia is restructuring its military to be smaller, more affordable, defensively oriented, and interoperable with NATO. The Macedonian Government has welcomed close cooperation with the U.S. military and seeks to deepen this relationship as it restructures its forces.

Macedonia continues to play an indispensable role as the Kosovo Force's (KFOR) rear area, hosting the logistical supply line for KFOR troops in Kosovo. As part of these efforts, Macedonia hosts NATO troops, including U.S. troops, in support of NATO operations in Kosovo and to assist Macedonia's efforts to reform its military to meet NATO standards. Close U.S.-Macedonian bilateral defense cooperation continues. Macedonia also contributes troops to international coalition operations in Iraq and Afghanistan, and recently deployed troops and equipment to support the EU peace support operation in Bosnia and Herzegovina.

FOREIGN RELATIONS

In February 1994, Greece imposed a trade embargo on Macedonia due to disputes over the use of the name "Macedonia" and other issues. Greece and Macedonia signed an interim accord in October 1995 ending the embargo and opening the way to diplomatic recognition and increased trade. After signing the agreement with Greece, Macedonia joined the Council of Europe, the Organization for Security and Cooperation in Europe (OSCE), and NATO's Partnership for Peace (PfP). Athens and Skopje began talks on the name issue in New York under UN auspices in December 1995, opening liaison offices in respective capitals January 1996. These talks continue.

The stability of the young state was gravely tested during the 1999 Kosovo crisis, when Macedonia temporarily hosted about 360,000 refugees from the violence and ethnic cleansing in Kosovo. The refugee influx put significant stress on Macedonia's weak social infrastructure. With the help of NATO and the international community, Macedonia ultimately was able to accommodate the influx. Following the resolution of the conflict, the overwhelming majority of refugees returned to Kosovo. A small number of Roma refugees from Kosovo remains in Macedonia, most of them housed in the predominantly Roma municipality of Suto Orizari in the Skopje suburbs, and supported by the UNHCR. Macedonia enjoys good relations with its neighbors. It has strong trade and tourism ties with Greece, and has developed similarly robust political and trade ties with Albania and Bulgaria. Relations between Belgrade and Skopje are

good overall, although a dispute between the Macedonian Orthodox Church and the Serb Orthodox Church has strained ties over the past two years.

Relations with Kosovo are good, with Macedonia having signed an Interim Free Trade Agreement with UNMIK in 2005 and with regular bilateral political contacts occurring between Pristina and Skopje since 2005. Under the auspices of the International Civilian Office, which is supervising independent Kosovo's implementation of the Ahtisaari Plan, the Government of Macedonia and Government of Kosovo are in discussions with the aim to complete the demarcation of their common border by April 2009.

Macedonia has made important strides toward Euro-Atlantic integration. Macedonia is an active participant in NATO's Partnership for Peace and Membership Action Plan, the OSCE, and United Nations, and was accepted as a member of the World Trade Organization (WTO) in October 2002. In May 2003, Macedonia, Albania, Croatia, and the U.S. created the Adriatic Charter, modeled on the Baltic Charter, as a mechanism for promoting regional cooperation to advance each country's NATO candidacy. Since then, the Adriatic Charter countries have cooperated closely in regional military exercises, and have deployed a joint medical team to support international coalition operations in Afghanistan. At the NATO Bucharest Summit in April 2008, Albania and Croatia received invitations to join the Alliance. NATO Allies noted that Macedonia met NATO membership criteria, but could not reach consensus on issuing an invitation for membership, in the absence of a solution to Macedonia's dispute with NATO member Greece over Macedonia's name. The United States believes Macedonia has met the performance-based standards for membership. Allies agreed that Macedonia would be invited to join NATO as soon as the name issue is resolved.

In 1999, the EU agreed to pursue a Stabilization and Association Agreement (SAA) with Macedonia; negotiations with Macedonia were launched April 5, 2000. The SAA was signed April 2001 and came into force in April 2004. Its trade and trade-related provisions have been in force since June 2001. In December 2005, the European Council granted candidate country status to Macedonia, taking into account the "substantial progress made in completing the legislative framework related to the Ohrid Framework Agreement, as well as its track record in implementing the Stabilization and Association Agreement (including its trade-related provisions) since 2001." It recommended beginning formal accession negotiations after Macedonia had made further progress on a number of reform fronts, including combating corruption; enacting judicial, administrative, and economic reforms; and conducting free and fair parliamentary elections, in accordance with European standards, in 2006. The Council also noted the need to consider further steps toward membership in light of the debate on the enlargement strategy, and the need for Macedonia to continue strong progress toward meeting the Copenhagen political criteria, as well as Stabilization and Association Agreement requirements. In March 2008, the Council provided the Government of Macedonia a list of benchmarks to guide Macedonia's preparations to open formal accession negotiations.

U.S.-MACEDONIAN RELATIONS

The United States and Macedonia have enjoyed good bilateral relations since Macedonia gained its independence in 1991. The United States formally recognized Macedonia on February 8, 1994, and the two countries established full diplomatic relations on September 13, 1995. The U.S. Liaison Office was upgraded to an Embassy in February 1996, and the first U.S. Ambassador to Skopje arrived in July 1996. The development of political relations between the United States and Macedonia has ushered in a whole host of other contacts between the two states. The United States, together with its European allies, strongly condemned the initiators of the 2001 insurgency in Macedonia and closely supported the government and major parties' successful efforts to forge a peaceful, political solution to the crisis through the Ohrid Framework Agreement. In partnership with the EU and other international organizations active in Macedonia, the United States is facilitating the Macedonian Government's implementation of the Framework Agreement and fostering long-term peace and stability in the country. Macedonia continues to make an important contribution to regional stability by facilitating the logistical supply of NATO (including U.S.) peacekeepers in Kosovo.

The United States strongly supports Macedonia's aspirations for full integration into Euro-Atlantic institutions. Today, Macedonia and the United States enjoy a cooperative relationship across a broad range of political, economic, cultural, military, and social issues. The United States has supported Macedonia's progress in building a democratic, secure, and market-oriented multiethnic society with large amounts of foreign assistance for democracy and economic reforms, defense reforms, and projects to strengthen rule of law and improve education. Bilateral assistance budgeted to Macedonia under the Support for East European Democracy (SEED) Act totaled over $440 million from 1990 to 2008. Macedonia received approximately $28 million in SEED Act assistance in 2007 and is receiving approximately $22 million in 2008.

U.S. Agency for International Development (USAID) programs in Macedonia promote accelerated growth, support stronger democratic institutions, and help educate Macedonians for a modern economy. A focus of U.S. assistance has been to assist Macedonia in implementing the August 2001 Framework Agreement. Successful completion of the decentralization process is a remaining priority for framework implementation. USAID is targeting capacity building

for local government officials, who will have more authority and responsibility devolved from the central government, as well as providing grants to fund small-scale infrastructure projects.

A further priority of U.S. assistance is to facilitate Macedonia's transition to a market economy and increase employment and growth levels. USAID economic assistance is focused on two levels. At the macro-level, programs target improvements in the business-enabling environment by helping to bring legislative and regulatory frameworks in line with EU standards and improving the transparency and efficiency of government services through technology. At the micro-level, assistance is given to firms and agribusinesses to increase their competitiveness and productivity, coupled with initiatives to attract foreign investment and stimulate local investment. Training programs that provide career-enhancing education to prepare youth and adults for growth sectors are also supported. A resident U.S. Department of Treasury advisor, who will be phased out in 2008, is assisting the Ministry of Finance in improving strategy, planning and execution, and public expenditure management.

USAID is also focused on helping the Macedonian Government and civil society combat corruption, enhancing democratic political competition, supporting government decentralization and promoting the rule of law. USAID also supported the Government of Macedonia in developing a comprehensive State Program for the Prevention of Corruption with a detailed performance management system in 2007. A U.S. Department of Justice Resident Legal Advisor and a Senior Law Enforcement Advisor focus on strengthening the independence of the judiciary, efficacy of public prosecution, reform of criminal codes, increasing police capacity, and abating trafficking in persons and organized crime.

Complementing its assistance in Macedonia's political and economic transition, USAID programs improve education and human capacity in Macedonia through projects on the primary, secondary, and post-secondary levels. Targets include improving teaching techniques, modernizing vocational education, introducing information and communication technology (ICT) as a learning tool in the classroom, and providing broadband Internet service throughout the country using primary and secondary schools as a platform. Other programs address crosscutting issues, including interethnic cooperation, assistance to the Roma minority, performance improvement of key institutions, and corruption.

On May 7, 2008, Secretary of State Condoleezza Rice and Foreign Minister Antonio Milososki signed a joint Declaration of Strategic Partnership and Cooperation affirming the determination of our governments to further expand and deepen the partnership between our two countries based upon common goals, interests, and values.

TRAVEL

Consular Information Sheet

December 5, 2008

Country Description: Macedonia is a parliamentary democracy that is steadily transforming its economy. Tourist facilities are available in the capital, Skopje, and other major towns. In tourist centers, such as Skopje and Ohrid, European-standard hotels and other travel amenities are available, while the standard of facilities throughout the rest of the country varies considerably.

Entry and Exit Requirements: Short trip for business or tourism: A valid passport is required for travel to Macedonia. A visa is not required for U.S. passport holders for tourist and business trips up to 90 days during a six-month period. As of September 1, 2008, Macedonia began requiring that all foreign citizens entering the country provide proof of health insurance at the port of entry. Entry stamps are issued at airports or land border crossing points, which grant permission to remain 90 days. All foreign citizens must register with local police within 24 hours of arrival. Those staying in private accommodations or renting an apartment should register in person at the police station nearest his/her place of residence, and should be accompanied to the station by the owner or landlord of the apartment. Hotels are responsible for the registration of foreign guests. Travelers who change addresses in Macedonia should notify the police station where they initially registered and reregister with the police station closest to the new place of residence.

An unaccompanied minor U.S. citizen who enters Macedonia should be in

possession of a parental or guardian statement of consent to enter and stay in the country. The statement of consent must be certified by a competent authority of the country from which s/he arrives or by a diplomatic or consular mission of the Republic of Macedonia abroad.

NOTE: A U.S. citizen who possesses more than one passport is required to leave the country with the travel document used for entry into the country.

Temporary residence: Individuals intending to work, study, or remain longer then 90 days in Macedonia must obtain an entry visa prior to their arrival in Macedonia. The practice of switching from tourist status to long-term status when already in Macedonia is no longer allowed. Those wanting to do so must leave Macedonia and apply for a long-term visa at a Macedonian Embassy or Consulate.

American citizens resident in the United States may apply at the Macedonian Embassy in Washington D.C., located at 2129 Wyoming Avenue, NW, Washington, D.C. 20008, Tel: (202) 667-0501; Fax: (202) 667-2131; E-mail: washington@mfa.gov.mk; usoffice@macedonianembassy.org, Web site: http://www.macedonianembassy.org.

The passport should be valid for at least three months longer than the validity of the visa. For additional information about the conditions and procedures for visa issuance, the applicant may visit www.mfa.gov.mk for a list of Macedonian Embassies and Consulates. Travelers should be aware that all border areas apart from designated border crossings are restricted zones. Presence in these zones is forbidden without prior official permission.

Safety and Security: The security situation in Macedonia is stable, although occasional criminal violence does occur. Americans should avoid areas with demonstrations, strikes, or roadblocks where large crowds are gathered, particularly those involving political causes or striking workers.

For the latest security information, Americans traveling abroad should regularly monitor the Department's Internet web site at http://travel.state.gov where the current Travel Warnings and Travel Alerts, including the Worldwide Caution Travel Alert, can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S., or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: Crime in Macedonia is low by U.S. standards, and violent crime against Americans is rare. Pick-pocketing, theft, and other petty street crimes do occur, however, particularly in areas where tourists and foreigners congregate. American travelers are advised to take the same precautions against becoming crime victims as they would in any U.S. city.

Valuables, including cell phones and electronic items, should not be left in plain view in unattended vehicles. Windows and doors should be securely locked when residences are not occupied. Organized crime is present in Macedonia; organized criminal activity occasionally results in violent confrontations between members of rival organizations. ATM use is generally safe, however, travelers should take standard safety precautions.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are a victim of a crime while overseas, in addition to reporting to the local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, to contact family members or friends, and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and find an attorney if needed.

The local equivalent to the "911" emergency line in Macedonia is: 192 for police and 194 for ambulance; outside the city of Skopje, dial 02 first.

Medical Facilities and Health Information: Although many Macedonian physicians are trained to a high standard, and a number of well-equipped private clinics are available especially in Skopje, most public hospitals and clinics are not equipped and maintained at U.S. or Western European standards. Basic medical supplies are usually available, but specialized treatment may not be obtainable. Travelers with previously diagnosed medical conditions may wish to consult their physician before travel.

The U.S. Department of State is unaware of any HIV/AIDS entry restrictions for visitors to or foreign residents of Macedonia.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's web site at http://www.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Macedonia is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

Driving safely in Macedonia requires excellent defensive driving skills. Many drivers routinely ignore speed limits and other traffic regulations, such as stopping for red lights and stop signs. Drivers may make illegal left turns from the far right lane, or drive into oncoming lanes of traffic. The combination of speeding, unsafe driving practices, poor vehicle maintenance, the mixture of new and old vehicles on the roads, and poor lighting contributes to unsafe driving conditions. Pedestrians should exercise extreme caution when crossing the street even when using crosswalks, as local drivers rarely slow down or stop for pedestrians.

A valid U.S. driver's license in conjunction with an International Driving Permit is required for Americans driving in Macedonia. Driving is on the right side of the road. Speed limits are generally posted. Most major highways are in good repair, but many secondary urban and rural roads are poorly maintained and lit. Horse-drawn carts, livestock, dead animals, rocks, or other objects are sometimes found in the roadway. Some vehicles are old and lack standard front or rear lights. Secondary mountain roads can be narrow, poorly marked, lacking guardrails, and quickly become dangerous in inclement weather. Overall, public transportation in Macedonia is dilapidated. Roadside emergency services are limited.

In case of emergency, drivers may contact the police at telephone 192, the Ambulance Service at telephone 194, and Roadside Assistance at telephone 196.

Aviation Safety Oversight: As there is no direct commercial air service between the United States and Macedonia, the U.S. Federal Aviation Administration (FAA) has not assessed Macedonia's Civil Aviation Authority for compliance with International Civil Aviation Organization (ICAO) aviation safety standards. For more information, travelers may visit the FAA's web site at http://faa.gov/safety/programs_initiatives/oversight/iasa.

Special Circumstances: Macedonian customs authorities may enforce strict regulations concerning temporary importation to or exportation from Macedonia of certain items, including items deemed to be of historical value or significance. Taking photographs of anything that could be perceived as being of military or security interest may result in problems with authorities. Visitors should always observe "no photographing" signs. If in doubt, please ask permission before taking photographs.

The local currency is the denar. While credit cards are accepted in larger stores and restaurants, cash in local currency is advised for purchases in small establishments.

Upon entry into Macedonia, every foreigner must declare all cash amounts of foreign currency greater than EUR (euro) 2,000 at the Customs Control Office. Failure to report funds in excess of this amount may result in the confiscation of the entire amount by the customs service. After going through the court system, an individual is normally required to pay a fine and the National Bank will also keep a certain percentage of the undeclared amount before it is released.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating Macedonian laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Macedonia are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States. Prostitution is illegal in Macedonia.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in Macedonia are encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration web site and to obtain updated information on travel and security within Macedonia.

Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency. The U.S. Embassy in Skopje is located at Ilindenska bb, 1000 Skopje, tel. (389) (2) 311-6180, fax (389) (2) 321-3767, email: consularskopje@state.gov. Registration forms are available on the Embassy's web site, located at: http://skopje.usembassy.gov.

Intercountry Adoption

April 2006

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is based on public sources and current understanding. Questions involving foreign and U.S. immigration laws and legal interpretation should be addressed respectively to qualified foreign or U.S. legal counsel.

Patterns of Immigration: Please review current reports online at http://adoption.state.gov.

Adoption Authority: The office responsible for foreign adoptions in Macedonia is the Ministry of Labor and Social Policy, whose address is:

14 Dame Gruev St.
Skopje 1000
Tel: ++389-2-3106-247 or 3117-288
Fax: ++389-2-3106-252

Eligibility Requirements for Adoptive Parents: Prospective adoptive parents may be either married or single. However, preference is given to married couples. Adoptive parents must be at least 18 years older than their adoptive children, but no more than 45 years older. In exceptional circumstances, persons older than 45 may be permitted to adopt, but the age difference between the parent and child may not exceed 45 years. When it comes to the age difference, the age of the younger parent is taken into account. Note: Under U.S. law, at least one parent must be 25 years old.

Residency Requirements: There are no residency requirements to complete an intercountry adoption in Macedonia. However, there is a fostering period of 2 to 3 months prior to the final adoption of the child, where the prospective adoptive parents are required to live with the child in Macedonia, before the final approval for adoption is given to the parents.

Time Frame: The adoption process may take varying amounts of time, depending on availability of children and the number of requests for adoption. The number of children available for adoption is usually much lower than the number of requests for adoption. In Macedonia, domestic adoptions have priority over intercountry adoptions.

Adoption Agencies and Attorneys: There are no U.S. adoption agencies operating in Macedonia. However, the prospective parents may hire a Macedonian lawyer or an individual with a power of attorney authorizing him/her to find a suitable child and proceed with the adoption process. It is also possible for this entire process to be carried out by the prospective parents. The U.S. Embassy in Skopje maintains a list of attorneys, which can also be seen at http://skopje.usembassy.gov.

Adoption Fees: The Macedonian government does not charge a fee for its role in the adoption process.

Adoption Procedures: Persons who wish to apply to adopt a child from Macedonia can do so by submitting the complete paperwork, along with a letter requesting permission to adopt, to the Adoption Board at the Ministry of Labor and Social Policy. Parents and children are matched based on the needs of the child as well as the requirements of the prospective adoptive parents. If the match is successful, the Adoption Board gives an approval and forwards it to the Center for Social Welfare of the municipality in which the child originally resided.

The Center advises the family to come to Macedonia and proceed with the adoption process, which consists of releasing the child to the prospective parents for 2 to 3 months, and going through the fostering/adaptation period together. The parents are expected to rent an apartment or stay in a hotel for that period of time. After the adaptation period, the Center for Social Welfare submits a Proposal for Adoption to the Adoption Board, after which a date is set for the official adoption ceremony, which takes place at the Ministry of Labor and Social Policy.

At the ceremony, the prospective parents must provide a licensed court translator and be in possession of their passports. The presence of the child is necessary if the child is over the age of 12. At the time of the adoption, the adoptive parents choose a name for the child, and designate a place of birth within Macedonia. The Adoption Board issues an official adoption decree.

The Center is in charge of obtaining a birth certificate for the child on which the names of the adoptive parents are listed as his/her parents. Once the adoption is completed, the next step for the adoptive parents is to apply for a passport for their adopted child with the branch office of the Macedonian Ministry of Interior, in order to apply for an immigrant visa at the American Embassy in Skopje.

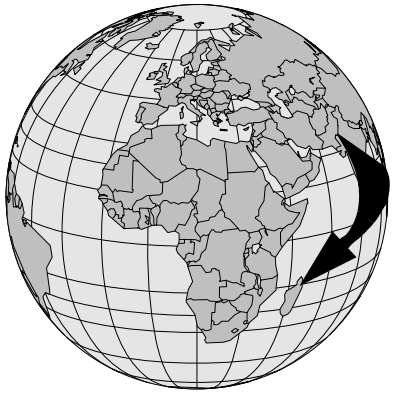
The passport fee is $30.00 USD (subject to change). Information on the Macedonian adoption law can be found at the official website of the Ministry of Labor and Social Policy at http://www.mtsp. gov.mk.

Required Documents: There is no specific application form. A request for adoption should be in the form of a letter, written by the prospective adoptive parents, detailing their circumstances and their desire for adoption, and bearing original signatures of both parents. It can be submitted by mail or through an authorized representative or attorney. The application must be accompanied by the following documents for each of the adoptive parents:

- Proof of Citizenship (certified copy of a Naturalization Certificate or passport);
- Home study conducted by a licensed U.S. adoption agency;
- Marriage Certificate (issued within the last 12 months);
- Birth Certificate for each parent (issued within the last 12 months);
- Medical certificate certifying good mental and physical condition of each parent;
- Police certificate issued by the local law enforcement authorities (stating that no criminal record exists);
- Certificate from the Office of Social Services from the parents' state of residence certifying that the adoptive parents were never deprived of their parental rights;
- A letter from the employer for each parent showing their current employment and their salary;

- Documents testifying to the prospective parents' income and property; i.e., proof of financial status sufficient to support a child;
- Notarized Certificate showing parents' educational background;
- Copy of a U.S. passport;
- Approved petition from DHS (Form I-171H).

All original documents and the application letter must be in English and each must be accompanied by a translation into Macedonian done by a licensed court translator. It is easier and less expensive to have the translations done in Macedonia.



Embassy of the Republic of Macedonia
2129 Wyoming Avenue, NW
Washington, DC 20008
Tel: 202-337-3063
E-mail:
usoffice@macedonianembassy.org

Macedonian Consulate General
2000 Town Center, Suite 1130
Southfield, MI 48075
Tel: 248-354-5537
E-mail: gkrmdetroit@sbcglobal.net

U.S. Immigration Requirements: Prospective adoptive parents are strongly encouraged to consult USCIS publication M-249, *The Immigration of Adopted and Prospective Adoptive Children*, as well as the Department of State publication, *Intercountry Adoptions*. Please see the *Intercountry Adoption* section of this book for more details and review current reports online at http://adoption.state.gov.

U.S. Embassy
Ilindenska, b.b.
1000 Skopje
Macedonia
Tel: ++389-2-3116-180
Fax: ++389-2-3213-767
Email: consularskopje@state.gov

Additional Information: Specific questions about adoption in Macedonia may be addressed to the U.S. Embassy in Skopje. General questions regarding intercountry adoption may be addressed to the Office of Children's Issues, U.S. Department of State, CA/OCS/CI, SA-29, 4th Floor, 2201 C Street, NW, Washington, D.C. 20520-4818, toll-free Tel: 1-888-407-4747.

MADAGASCAR

Compiled from the December 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Republic of Madagascar

PROFILE

Geography

Area: 592,800 sq. km. (228,880 sq. mi.).

Cities: Capital—Antananarivo (pop. about 1,300,000). Other cities—Antsirabe (about 500,000), Mahajanga (about 400,000), Toamasina (about 450,000).

Terrain: Mountainous central plateau, coastal plain.

Climate: Moderate interior, tropical coasts.

People

Nationality: Noun and adjective—Malagasy.

Population: (2008, estimate) 20,042,551.

Annual population growth rate: (2005, World Bank) 2.7%.

Ethnic groups: 18 Malagasy tribes; small groups of Comorans, French, Indians, and Chinese.

Religions: Traditional beliefs 52%, Christian 41%, Muslim 7%.

Languages: Malagasy (official), French (official), English (official).

Education: Years compulsory—5. Attendance—65%. Literacy—70.7%.

Health: Infant mortality rate—76/1,000. Life expectancy—55.6 yrs.

Work force: (2000) 8 million. Agriculture—80%; industry—7%.

Government

Type: Republic.

Independence: June 26, 1960.

Constitution: Entered into force in March 1998.

Government branches: Executive—president, prime minister, cabinet. Legislative—National Assembly and Senate. Judicial—Supreme Court, High Court of Justice, Constitutional High Court.

Political subdivisions: Six autonomous provinces (faritany).

Political parties: There are several political parties. In the September 2007 National Assembly elections, the I Love Madagascar (TIM) Party won a majority of seats.

Suffrage: Universal at 18.

National holidays: June 26.

Economy

GDP: (U.S.$, 2007 est. official exchange rate) $7.322 billion.

GDP per capita: (2007 est. PPP) $1,100.

Unemployment: no reliable data available.

Natural resources: Graphite, chrome, coal, bauxite, ilmenite, nickel, gold, tar sands, semiprecious stones, and hardwoods.

Agriculture: (26.8% of GDP, 2007 est.): Products—rice, livestock, seafood, coffee, vanilla, sugar, cloves, cotton, sisal, peanuts, and tobacco.

Industry: (15.8% of GDP, 2007 est.): Types—processed food, clothing, textiles, mining, paper, refined petroleum products, glassware, construction, soap, cement, tanning.

Trade: Exports (2007, f.o.b.) $989 million: apparel, shrimp, vanilla, coffee, cloves, graphite, essential oils, industrial minerals and gemstones. Major export markets—France, U.S., Germany, Italy, U.K. Imports (2007, f.o.b.) $1.933 billion: foodstuffs, fuel and energy, capital goods, vehicles, consumer goods and electronics. Major suppliers—France, China, Iran, Mauritius, Hong Kong.

PEOPLE AND HISTORY

Madagascar's population is predominantly of mixed Asian and African origin. Recent research suggests that the island was uninhabited until Indonesian seafarers arrived in roughly the first century A.D., probably by way of southern India and East Africa, where they acquired African wives and slaves. Subsequent migrations from both the Pacific and Africa further consolidated this original mixture, and 18 separate tribal groups emerged. Asian features are most predominant in the central highlands people, the Merina (3 million) and the Betsileo (2 million); the coastal people are of more clearly African origin.

The largest coastal groups are the Betsimisaraka (1.5 million) and the Tsimihety and Sakalava (700,000 each).

The Malagasy language is of Malayo-Polynesian origin and is generally spoken throughout the island. French is spoken among the educated population of this former French colony. English is becoming more widely spoken, and in 2003 the government began a pilot project of introducing the teaching of English into the primary grades of 44 schools, with hopes of taking the project nationwide. Most people practice traditional religions, which tend to emphasize links between the living and the dead. They believe that the dead join their ancestors in the ranks of divinity and that ancestors are intensely concerned with the fate of their living descendants. The Merina and Betsileo reburial practice of famadihana, or "turning over the dead" celebrate this spiritual communion. In this ritual, relatives' remains are removed from the family tomb, rewrapped in new silk shrouds, and returned to the tomb following festive ceremonies in their honor.

About 41% of the Malagasy are Christian, divided almost evenly between Roman Catholic and Protestant. Many incorporate the cult of the dead with their religious beliefs and bless their dead at church before proceeding with the traditional burial rites. They also may invite a pastor to attend a famadihana. While many Christians continue these practices, others consider them to be superstitions that should be abandoned. Many of the Christian churches are influential in politics. In the coastal regions of the provinces of Mahajanga and Antsiranana (Diego Suarez), Muslims constitute a significant minority. Muslims are divided between those of Malagasy ethnicity, Indo-Pakistanis, and Comorans.

The written history of Madagascar began in the seventh century A.D., when Arabs established trading posts along the northwest coast. European contact began in the 1500s, when Portuguese sea captain Diego Dias sighted the island after his ship became separated from a fleet bound for India. In the late 17th century, the French established trading posts along the east coast. From about 1774 to 1824, it was a favorite haunt for pirates, including Americans, one of whom brought Malagasy rice to South Carolina.

Beginning in the 1790s, Merina rulers succeeded in establishing hegemony over the major part of the island, including the coast. In 1817, the Merina ruler and the British governor of Mauritius concluded a treaty abolishing the slave trade, which had been important in Madagascar's economy. In return, the island received British military and financial assistance. British influence remained strong for several decades, during which the Merina court was converted to Presbyterianism, Congregationalism, and Anglicanism. The British accepted the imposition of a French protectorate over Madagascar in 1885 in return for eventual control over Zanzibar (now part of Tanzania) and as part of an overall definition of spheres of influence in the area. Absolute French control over Madagascar was established by military force in 1895-96, and the Merina monarchy was abolished.

Malagasy troops fought in France, Morocco, and Syria during World War I. After France fell to the Germans, the Vichy government administered Madagascar. British troops occupied the strategic island in 1942 to preclude its seizure by the Japanese. The Free French received the island from the United Kingdom in 1943.

In 1947, with French prestige at low ebb, a nationalist uprising was suppressed after several months of bitter fighting. The French subsequently established reformed institutions in 1956 under the Loi Cadre (Overseas Reform Act), and Madagascar moved peacefully toward independence. The Malagasy Republic was proclaimed on October 14, 1958, as an autonomous state within the French Community. A period of provisional government ended with the adoption of a constitution in 1959 and full independence on June 26, 1960.

GOVERNMENT

In March 1998, Malagasy voters approved a revised Constitution. The principal institutions of the Republic of Madagascar are a presidency, a parliament (National Assembly and Senate), a prime ministry and cabinet, and an independent judiciary. The president is elected by direct universal suffrage for a 5-year term, renewable twice. The last presidential election was held on December 3, 2006.

In Madagascar, the parliament has two chambers; the National Assembly and the Senate. The last National Assembly election was held on September 23, 2007, and marked a significant reform to the parliament. The National Assembly previously had 160 members, elected for a four-year term in single-member and two-member constituencies. However, in July 2007, just before the National Assembly elections, a council of ministers agreed to reduce the number of parliamentarians from 160 to 127. Consequently, few of the 116 districts elected more than one member. Antananarivos' six districts, however, each elected two deputies. The Senate has 90 members, with 60 members elected for a six-year term, 10 for each province by provincial electors, and 30 members appointed.

The prime minister and members of parliament initiate legislation, and the government executes it. The president can dissolve the National Assembly. For its part, the National Assembly can pass a motion of censure and require the prime minister and council of ministers to step down. The Constitutional Court approves the constitutionality of new laws.

In an effort to decentralize administration, the 1998 constitution called for the six provinces (faritany) to become autonomous. The six provinces are Antananarivo, Mahajanga, Antsiranana, Toamasina, Fianarantsoa, and Toliary.

The provinces will be dissolved as a result of the new regional subdivision and the constitutional referendum of

2007. There is a timeframe of 30 months (until October 2009) for the transition.

Principal Government Officials

Last Updated: 11/12/08

Pres.: **Marc RAVALOMANANA**
Prime Min.: **Charles RABEMANANJARA, Gen.**
Min. of Agriculture & Animal Husbandry: **Marius RATOLOJANAHARY**
Min. of Civil Service, Labor, & Social Laws: **Jacky Mahafaly TSIANDOPY**
Min. of Commerce & Consumer Affairs: **Alphonse RALISON**
Min. of Decentralization & Territorial Admin.: **Yvan ANDRIANASANDRATRINIONY**
Min. of Defense: **Cecile Marie Ange MANOROHANTA**
Min. of Economy, Commerce, Planning, & Private Sector: **Ivohasina RAZAFIMAHEFA**
Min. of Energy & Mining: **Elise RAZAKA**
Min. of Environment, Water, Forest, & Tourism: **Harison Edmond RANDRIARIMANANA**
Min. of Finance & Budget: **Haja Nirina RAZAFINJATOVO**
Min. of Foreign Affairs: **Marcel RANJEVA, Gen.**
Min. of Health & Family Planning: **Jean Louis ROBINSON, Dr.**
Min. of Higher Education: **Jean Theodore RANJIVASON**
Min. of Industry & Handicrafts: **Mejamirado RAZAFIMIHARY**
Min. of Interior: **Charles RABEMANANJARA, Gen.**
Min. of Justice: **Bakolalao Ramanandraibe RANAIVOHARIVONY**
Min. of Labor & Social Affairs: **Maharavo RODELYS**
Min. of National Education & Scientific Research: **Benjamin Radavidson ANDRIAMPARANY**
Min. of Population: **Jacob Felicien ANDRIAMPANJAVA**
Min. of Public Works & Meteorology: **Rolland RANDRIAMAMPIONONA**
Min. of Scientific Research: **Alidina EDOUARD**
Min. of Sports, Culture, & Hobbies: **Patrick RAMIARAMANA**
Min. of Technical & Professional Education: **Zoana BLAISE**
Min. of Telecommunications, Post, & Communications: **Bruno Ramaroson ANDRIATAVISON**
Min. of Transportation: **Julien Laporte RAVELONARIVO**
Min. of Urban & Regional Planning: **Julien REBOZA**
Sec. of State for Decentralization: **ENIAVOSOA**
Sec. of State for Fisheries & Ocean Resources: **Rarison Ramaroson HIPPOLYTE, RAdm.**
Sec. of State for Foreign Trade: **Henri RAKOTONIRAINY**
Sec. of State for Public Security & National Police: **Desire RASOLOFOMANANA**
Governor, Central Bank: **Gaston RAVELOJAONA**
Ambassador to the US: **Jocelyn Bertin RADIFERA**
Permanent Representative to the UN, New York: **Zina ANDRIANARIVELO Razafy**

Madagascar maintains an embassy in the United States at 2374 Massachusetts Avenue NW, Washington, DC 20008 (tel. 202-265-5525).

POLITICAL CONDITIONS

Madagascar's first President, Philibert Tsiranana, was elected when his Social Democratic Party gained power at independence in 1960 and was reelected without opposition in March 1972. However, he resigned only 2 months later in response to massive antigovernment demonstrations. The unrest continued, and Tsiranana's successor, Gen. Gabriel Ramanantsoa, resigned on February 5, 1975, handing over executive power to Lt. Col. Richard Ratsimandrava, who was assassinated 6 days later. A provisional military directorate then ruled until a new government was formed in June 1975, under Didier Ratsiraka.

During the 16 subsequent years of President Ratsiraka's rule, Madagascar continued under a government committed to revolutionary socialism based on the 1975 Constitution establishing a highly centralized state. National elections in 1982 and 1989 returned Ratsiraka for a second and third 7-year presidential term. For much of this period, only limited and restrained political opposition was tolerated, with no direct criticism of the president permitted in the press. With an easing of restrictions on political expression, beginning in the late 1980s, the Ratsiraka regime came under increasing pressure to make fundamental changes. In response to a deteriorating economy, Ratsiraka relaxed socialist economic policies and instituted some liberal, private-sector reforms. These, along with political reforms like the elimination of press censorship in 1989 and the formation of more political parties in 1990, were insufficient to placate a growing opposition movement known as Hery Velona or "Active Forces." A number of already existing political parties and their leaders, among them Albert Zafy and Rakotoniaina Manandafy, anchored this movement which was especially strong in Antananarivo and the surrounding high plateau. In response to largely peaceful mass demonstrations and crippling general strikes, Ratsiraka replaced his prime minister in August 1991 but suffered an irreparable setback soon thereafter when his troops fired on peaceful demonstrators marching on his suburban palace, killing more than 30.

In an increasingly weakened position, Ratsiraka acceded to negotiations on the formation of a transitional government. The resulting "Panorama Convention" of October 31, 1991, stripped Ratsiraka of nearly all of his powers, created interim institutions, and set an 18-month timetable for completing a transition to a new form of constitutional government. The High Constitutional Court was retained as the ultimate judicial arbiter of the process.

In March 1992, a widely representative National Forum organized by the Malagasy Christian Council of Churches (FFKM) drafted a new Constitution. Troops guarding the proceedings clashed with pro-Ratsiraka "federalists" who tried to disrupt the forum in protest of draft constitutional provisions preventing the incumbent president from running again.

The text of the new Constitution was put to a nationwide referendum in August 1992 and approved by a wide

margin, despite efforts by federalists to disrupt balloting in several coastal areas.

Presidential elections were held on November 25, 1992, after the High Constitutional Court had ruled, over active forces objections, that Ratsiraka could become a candidate. Runoff elections were held in February 1993, and the leader of the Hery Velona movement, Albert Zafy, defeated Ratsiraka. Zafy was sworn in as President on March 27, 1993. After President Zafy's impeachment by the National Assembly in 1996 and the short quasi-presidency of Norbert Ratsirahonana, the 1997 elections once again pitted Zafy and Ratsiraka, with Ratsiraka this time emerging victorious. A National Assembly dominated by members of President Ratsiraka'a political party AREMA subsequently passed the 1998 Constitution, which considerably strengthened the presidency.

In December 2001, a presidential election was held in which both major candidates claimed victory. The Ministry of the Interior declared incumbent Ratsiraka of the AREMA party victorious. Marc Ravalomanana contested the results and claimed victory. A political crisis followed in which Ratsiraka supporters cut major transport routes from the primary port city to the capital city, a stronghold of Ravalomanana support. Sporadic violence and considerable economic disruption continued until July 2002 when Ratsiraka and several of his prominent supporters fled to exile in France. In addition to political differences, ethnic differences played a role in the crisis and continue to play a role in politics. Ratsiraka is from the coastal Betsimisarka tribe and Ravalomanana comes from the highland Merina tribe.

After the end of the 2002 political crisis, President Ravalomanana began many reform projects, forcefully advocating "rapid and durable development" and the launching of a battle against corruption. December 2002 legislative elections gave his newly formed TIM (Tiako-i-Madagasikara—I Love Madagascar) Party a commanding majority in the National Assembly. November 2003 municipal elections were conducted freely, returning a majority of supporters of the president, but also significant numbers of independent and regional opposition figures. Following the crisis of 2002, the President replaced provincial governors with appointed PDSs (Presidents des Delegations Speciales). This effectively

put an end to the "autonomous provinces," although they nominally remain in place because they are included in the constitution. Subsequent legislation established a structure of 22 regions to decentralize administration. In September 2004, the government named 22 Regional Chiefs, reporting directly to the President, to implement its decentralization plans. Rumors about the dissolution of the autonomous provinces had been around for some time, and on April 4, 2007 a constitutional referendum was held, in which the majority of the voters backed a revised constitution without any provinces. The new regions will become the highest level of subdivision.

ECONOMY

Structural reforms began in the late 1980s, initially under pressure form international financial institutions. An initial privatization program (1988-1993) and the development of an export processing zone (EPZ) regime in the early 1990s were key milestones in this effort. A period of significant stagnation from 1991-96 was followed by 5 years of solid economic growth and accelerating foreign investment, driven by a second wave of privatizations and EPZ development. Although structural reforms advanced, governance remained weak and perceived corruption in Madagascar was extremely high. During the period of solid growth from 1997 through 2001, poverty levels remained stubbornly high, especially in rural areas. A six-month political crisis triggered by a dispute over the outcome of the presidential elections held in December 2001 virtually halted economic activity in much of the country in the first half of 2002. Real GDP dropped 12.7% for the year 2002, inflows of foreign investment dropped sharply, and the crisis tarnished Madagascar's budding reputation as an African Growth and Opportunity Act (AGOA) standout and a promising place to invest. Following resolution of the crisis, the economy rebounded with GDP growth of over 9% in 2003. Currency depreciation and rising inflation hampered economic performance in 2004-2005; by 2006 inflation had abated somewhat (to 11%) but growth remained sluggish (4.7% est.).

Following the 2002 political crisis, the government attempted to set a new course and build confidence, in coordination with international financial institutions and the donor community. Madagascar developed a recovery plan in collaboration with the private sector and donors and presented it at a "Friends of Madagascar" conference organized by the World Bank in Paris in July 2002. Donor countries demonstrated their confidence in the new government by pledging $1 billion in assistance over five years. The Malagasy Government identified road infrastructure as its principle priority and underlined its commitment to public-private partnership by establishing a joint public-private sector steering committee.

In 2000, Madagascar embarked on the preparation of a Poverty Reduction Strategy Paper (PRSP) under the Heavily Indebted Poor Countries (HIPC) Initiative. The boards of the International Monetary Fund (IMF) and World Bank agreed in December 2000 that the country had reached the decision point for debt relief under the HIPC Initiative and defined a set of conditions for Madagascar to reach the completion point. In October 2004, the boards of the IMF and the World Bank determined that Madagascar had reached the completion point under the enhanced HIPC Initiative.

The Madagascar-U.S. Business Council was formed in Madagascar in 2002. The U.S.-Madagascar Business Council was formed in the United States in May 2003, and the two organizations continue to explore ways to work for the benefit of both groups.

The government of President Ravalomanana is aggressively seeking foreign investment and is tackling many of the obstacles to such investment, including combating corruption, reforming land-ownership laws, encouraging study of American and European business techniques, and active pursuit of foreign investors. President Ravalomanana rose to prominence through his agro-foods TIKO company, and is known for attempting to apply many of the lessons learned in the world of business to running the government.

FOREIGN RELATIONS

Madagascar, which has historically been perceived as on the margin of mainstream African affairs, eagerly rejoined the African Union in July 2003 after a 14-month hiatus triggered by the 2002 political crisis, and joined the Southern African Development Community (SADC) in 2006. From 1978 until 1991, then-President Ratsiraka emphasized independence and nonalignment and followed an "all points" policy stressing ties with socialist and radical regimes, including North Korea, Cuba, Libya, and Iran. Taking office in 1993, President Albert Zafy expressed his desire for diplomatic relations with all countries. Early in his tenure, he established formal ties with South Korea and sent emissaries to Morocco.

Starting in 1997, globalization encouraged the government and President Ratsiraka to adhere to market-oriented policies and to engage world markets. External relations reflect this trend, although Madagascar's physical isolation and strong traditional insular orientation have limited its activity in regional economic organizations and relations with its East African neighbors. It enjoys closer and generally good relations with its Indian Ocean neighbors—Mauritius, Reunion, and the Comoros Islands. Active relationships with Europe, especially France, Germany, and Switzerland, as well as with Britain, Russia, Japan, India, and China have been strong since independence.

President Ravalomanana has stated that he welcomes relations with all countries interested in helping Madagascar to develop. He has consciously sought to strengthen relations with

Anglophone countries as a means of balancing traditionally strong French influence.

U.S.-MALAGASY RELATIONS

Relations with the United States date to the middle 1800s. The two countries concluded a commercial convention in 1867 and a treaty of peace, friendship, and commerce in 1881. Traditionally warm relations suffered considerably during the 1970s, when Madagascar expelled the U.S. ambassador, closed a NASA tracking station, and nationalized two U.S. oil companies. In 1980, relations at the ambassadorial level were restored.

Throughout the troubled period, commercial and cultural relations remained active. In 1990, Madagascar was designated as a priority aid recipient, and assistance increased from $15 million in 1989 to $40 million in 1993. Recent U.S. assistance has contributed to a population census and family planning programs; conservation of Madagascar's remarkable biodiversity, private sector development, agriculture, democracy and governance initiatives; and media training. Madagascar became the very first country with a Millennium Challenge Account compact when it signed an agreement worth $110 million in April 2006.The Ravalomanana government is especially positive about ties with the United States.

TRAVEL

Consular Information Sheet

November 6, 2008

Country Description: Madagascar is a developing island nation off the east coast of Africa. The primary languages are French and Malagasy. French is less spoken outside of major cities. Facilities for tourism are available, but vary in quality. Travelers seeking high-end accommodations should make reservations in advance.

Entry Requirements: A passport and visa are required. Visas are available at all airports servicing international flights, but travelers who opt to obtain a visa at an airport should expect delays upon arrival. Visas obtained at the airport cannot be extended. Most international flights arrive in Antananarivo, but there are some limited international flights to/from the nearby islands of Comoros, Mayotte and Reunion from airports in Mahajanga, Toamasina (Tamatave), Nosy Be, Tolagnaro (Ft. Dauphin) and Antsiranana (Diego Suarez). There are also direct flights between Italy and Nosy Be. Evidence of yellow fever immunization is required for all travelers who have been in an infected zone within 6 months of their arrival in Madagascar.

Travelers may obtain the latest information and details on entry requirements from the Embassy of the Republic of Madagascar, 2374 Massachusetts Avenue NW, Washington, DC 20008; telephone (202) 265-5525/6; or the Malagasy Consulate in New York City, (212) 986-9491. Honorary consuls of Madagascar are located in Philadelphia, and San Diego. Overseas, inquiries may be made at the nearest Malagasy embassy or consulate. Visit the Embassy of Madagascar's web site at http://www.embassy.org/madagascar for the most current visa information.

Safety and Security: There are random police vehicle checkpoints throughout Madagascar, so all visitors should carry photo identification (i.e., U.S. passport) in the event of police questioning. These check points are routine in nature, and should not result in vehicle and/or person searches as long as valid identification is shown.

Political demonstrations occur from time to time. There have been incidents of violence during demonstrations, but these have not been directed against Americans. Travelers should maintain security awareness at all times and should avoid political gatherings and street demonstrations. Certain large gatherings such as concerts or scenes of accidents also may pose a threat to foreigners.

For the latest security information, Americans traveling abroad should regularly monitor the Department's Internet web site where the current Travel Warnings and Travel Alerts, including the Worldwide Caution Travel Alert, can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the United States and Canada, or, for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: The concerns for visitors to Antananarivo are crimes of opportunity such as pick pocketing, purse snatching and residential and vehicular theft. Although these incidents are generally non-violent, incidents involving violence by assailants do occur and are on the rise, particularly when the victim resists, and especially when multiple persons confront the victim. The Embassy has received reports of physical attacks against foreigners, including Americans, particularly in coastal tourist areas. A number of these attacks resulted in serious injuries and in some cases, fatalities. Criminal elements in Antananarivo and throughout Madagascar are becoming bolder when selecting their victims, and are also committing more crimes in areas that are considered to be "safe"—those that are generally well lit and well traveled by pedestrians and vehicles.

To reduce the risk of being victimized, travel in groups and avoid wearing expensive jewelry or carrying high cost electronic items (iPods, digital cameras, or high end cell phones) with you in public. Valuable items should never be left in an unattended vehicle or at a hotel (unless locked in the hotel safe). Walking at night, whether alone or in a group is not considered safe in urban areas, including in the vicinity of Western-standard hotels, restaurants and night clubs. Visitors are strongly discouraged from traveling outside of Antananarivo after dark due to banditry, lack of lighting, and poor road conditions. In the last six months there have been several incidents involving nighttime criminal activity that targeted vehicles outside of town. These events have involved villages designing a "trap" of sand, a tree log or some other substance or condition that makes the only viable road impassible. Local villagers then "assist" the stranded vehicle and expect monetary compensation. Others have involved armed criminals who stage a "breakdown" that blocks the roadway, forcing the victimized driver to slow down, and hence become more vulnerable.

Criminal gangs comprised of felons, ex-military and police from the former regime are known to commit home invasions and kidnappings, sometimes targeting foreigners. Organized gangs of bandits are known to patrol areas where foreigners, who are perceived to be wealthy, tend to congregate. Crimes such as burglary and robbery do occur in areas outside the capital and the threat of confrontational and violent crime has increased in rural and isolated areas throughout the last year. Specifically, Amboasary, a town in the southeast, has experienced a surge in armed robberies targeting not-governmental organizations (NGOs). However, Americans visiting Madagascar should not expect to experience any hostility or aggression solely because of their citizenship.

In major cities, the National Police is charged with maintaining peace and security. Outside of major cities, the Gendarmerie is primarily responsible for these duties. Due to lack of resources available to both law enforcement agencies, police response to victims of a crime is often limited, slow and ineffective.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to local police and to the nearest U.S. embassy or consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, to contact family members or friends and explain how funds can be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

During an emergency, visitors to Antananarivo can contact local police at telephone numbers 117 and 22-357-09/10 or 22-227-35.

Medical Facilities and Health Information: Standards of healthcare throughout Madagascar are well below U.S. standards. However, there are foreign physicians in Antananarivo representing a broad range of specialties, but their training is variable and often not to U.S. standards. The hospitals in Antananarivo vary greatly in standards of care. Medical care outside of Antananarivo is generally well below the care available in the capital city. Caution and good judgment should be exercised when seeking hospital and medical services. The Embassy maintains a list of hospitals and specialists. A Seventh Day Adventist dental clinic offers emergency procedures and x-ray facilities.

Some medications, generally of French origin, are available in Antananarivo. If you need to refill a prescription from home, it is important to carry a prescription from your doctor listing the medicine's generic name. There is limited availability of both prescription and over the counter medications, and outside of Antananarivo, medications may not be available. Travelers should have a supply of any needed medication sufficient for the entire length of a visit before arriving in Madagascar. Americans who will be carrying medications with them to Madagascar may wish to contact the Malagasy Embassy in Washington, D.C. regarding any restrictions on imports.

Ambulance services are available in Antananarivo with Polyclinique Ilafy at 22-425-66/69 or 033 11 458 48 / 032 07 409 38; Espace Medical at 22-625-66, 22-219-72, or 032-02-088-16 (cellular); and CDU (Centre de Diagnostic Medical d'Urgences) at 22 329 56 or 032 07 822 28 or 033 11 822 28. However, due to traffic jams, response times are often dangerously slow.

Malaria is prevalent, particularly in the coastal regions. Using preventive measures and malaria prophylaxis is strongly recommended. Rabies is endemic and there are many street dogs. It is recommended travelers have the pre-exposure vaccination series prior to arrival in Madagascar. If bitten by an animal, the effected area should immediately be washed with soap and running water for ten minutes. Seek medical care immedi-

ately. Plague is also endemic to Madagascar. While the reported HIV prevalence rate is low, particularly by African standards, Madagascar suffers from a very high reported incidence of other sexually transmitted diseases. The East African Indian Ocean islands have seen a rise in the cases of Chikungunya. As with malaria, Chikungunya and dengue are transmitted by mosquitoes. Every effort should be made to use repellants, proper clothing and barriers that discourage/prevent mosquito bites. The CDC web site contains further information on Chikungunya and dengue.

Travelers should drink bottled water or carbonated beverages. Local water is not generally potable. Water purification tablets may be used as necessary. Bottled water is readily available in Antananarivo but is less so outside the city. Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's web site at http://wwwn.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith/en.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Madagascar is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

In Madagascar, one drives on the right side of the road, generally yielding the right of way to vehicles coming in from the left. Some major intersections and traffic circles have police directing traffic. If a policeman has his back to you at an intersection, you are required to stop. New laws make seatbelt use mandatory and prohibit cell phone use while driving, even with a hands-free attachment. Child safety seats and motorcycle helmets are not required in Madagascar. If you are caught driving under the influence of alcohol, your car will be impounded for a few days and you will have to pay a fine. If you are involved in an accident involving injuries and/or deaths, there is a mandatory court case. The losing party of the court case must then pay all costs. Except for Antananarivo's main streets and a few well-maintained routes to outlying cities, many roads are in various states of disrepair. Some may be impassable during the rainy season. Night travel by private or public transportation outside Antananarivo is strongly discouraged due to poor lighting and road conditions. Roads tend to be narrow and winding with many one-lane bridges and blind curves. Most vehicles tend to drive in the center of the road unless another vehicle is present. It is common to find livestock or human-drawn carts in the middle of the road, even at night. Local practice is to blow the horn before going around a curve, to let others know of one's presence. Few pedestrian crosswalks or working traffic signals exist.

Travel within Antananarivo can be difficult with poor road signage, streets congested with pedestrians, bicycles, animal carts, and vehicular traffic, and an abundance of one-way streets. Taxis are plentiful and are generally reasonably priced. Bargain for the fare prior to getting into a vehicle.

Most accidents are pedestrian-related, due to narrow roads and lack of sidewalks on many streets. When traveling between cities, travelers must have clear directions as there are rarely signs indicating where one must turn to reach a destination. Conditions of rural roads can degrade significantly and with little notice during the rainy season. Rental cars generally come with a driver who is responsible for maintaining the vehicle and sometimes acts as a tour guide. Public transportation is unreliable and vehicles are poorly maintained. Rail services are extremely limited and unreliable.

The Ministry of Public Works, telephone (20) 22-318-02, is Madagascar's authority responsible for road safety. During an emergency, visitors to Antananarivo can contact local police by dialing 117, 22-227-35, 22-357-09/10. American citizens can also call the U.S. Embassy at 22-212-57/58/59 if assistance is needed in communicating with law enforcement officials.

Aviation Safety Oversight: As there is no direct commercial air service between the United States and Madagascar, the U.S. Federal Aviation Administration (FAA) has not assessed Madagascar's Civil Aviation Authority for compliance with International Civil Aviation Organization (ICAO) aviation safety standards. For more information, travelers may visit the FAA's Internet web site at www.faa.gov.

Domestic and international air services operate regularly but are subject to delays and occasional breakdowns. Air Madagascar often changes in-country flight schedules based on demand; flights that are not full may be cancelled with little or no prior warning to passengers. Overbooking is also common. Reconfirmation of tickets prior to flight day is recommended, especially when flying from provincial airports.

Special Circumstances: It is advisable to contact the Embassy of Madagascar in Washington or one of Madagascar's consulates in the United States for specific information regarding customs requirements. In many countries around the world, counterfeit and pirated goods are widely available. Transactions involving such products are illegal and bringing them back to the United States may result in forfeitures and/or fines. Taking photographs of air-

ports or military installations is prohibited. Madagascar is renowned for its natural resources. These include a wide variety of gemstones. The Government of Madagascar recently imposed restrictions on the export of precious gems; before purchasing or transporting any gemstones it is advisable to seek clarification of the applicable laws.

Madagascar is primarily a cash-driven economy. Although some high-end establishments catering to tourists accept credit cards, normally only Visa-logo cards, most shops and restaurants are cash only. Although the government changed the local currency from the Malagasy Franc (FMG) to the Ariary several years ago, many Malagasy still think in terms of FMG. When talking about prices, it is important to quantify whether the price is in Ariary or FMG. (1 Ariary = 5 FMG). A few ATMs are available in large cities. Dollars are not widely accepted.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating Malagasy laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Malagasy are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States as well as in Madagascar.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in Madagascar are encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration web site and to obtain updated information on travel and security within Madagascar. Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency. The U.S. Embassy is located at 14-16 Rue Rainitovo, Antsahavola, Antananarivo. The mailing address is B.P. 620, Antsahavola, Antananarivo, Madagascar; telephone [261] (20) 22-212-57; fax [261] (20) 22-345-39. The Embassy's web site is located at www.usmission.mg.

Intercountry Adoption

April 4, 2007

Madagascar is a party to the Convention of 29 May 1993 on Protection of Children and Co-operation in Respect of Intercountry Adoption (i.e., the Hague adoption convention). Madagascar recently passed a new adoption law based on the requirements of the Convention.

Please continue to check this web site from time to time or send an email to ConsAntan@state.gov if you have specific questions about adopting from Madagascar. We regret any inconvenience.

MALAWI

Compiled from the November 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Republic of Malawi

PROFILE

Geography

Area: 118,484 sq. km. (45,747 sq. mi.); land the size of Pennsylvania, with a lake the size of Vermont.

Cities: Capital—Lilongwe. Other cities—Blantyre (the commercial capital), Zomba, Mzuzu.

Terrain: Plateaus, highlands, and valleys. Lake Malawi (formerly referred to as Lake Nyasa) comprises about 20% of total area.

Climate: Predominately subtropical.

People

Nationality: Noun and adjective—Malawian(s).

Population: (2008 est.) 13,066,320 (preliminary results from the 2008 Malawi population and housing census).

Annual growth rate: (2008) 2.8%.

Ethnic groups: Chewa, Nyanja, Tumbuka, Yao, Lomwe, Sena, Tonga, Ngoni, Ngonde, Asian, European.

Religions: Protestant 55%, Roman Catholic 20%, Muslim 20%, indigenous beliefs 3%, other 2%.

Languages: English (official), Chichewa (official), regional dialects, i.e., Chitumbuka, Chiyao, Chilomwe.

Education: Years compulsory—none. Enrollment (2006)—primary, 86%. Literacy (2004 est., age 15 and older)—69%.

Health: Infant mortality rate (2006)—72 deaths/1,000 live births. Life expectancy (at birth, 2005 est.)—40 yrs.

Government

Type: Multi-party democracy.

Independence: July 6, 1964.

Constitution: May 18, 1995.

Government branches: Executive—president (the president is both chief of state and head of government), first and second vice presidents, cabinet. Legislative—unicameral National Assembly (193 members). Although the Malawian constitution provides for a Senate, in practice the legislative branch's upper house does not exist. Judicial—High Court, Supreme Court of Appeal, subordinate Magistrate Courts.

Political subdivisions: 28 districts.

Political parties: Democratic Progressive Party (DPP, ruling party) United Democratic Front (UDF), Malawi Congress Party (MCP), Alliance for Democracy (AFORD), New Republican Party (NRP), National Democratic Alliance (NDA), People's Progressive Movement (PPM), People's Transformation Party (PETRA), and Congress for National Unity (CONU). MCP and UDF are the two main opposition parties in parliament.

Suffrage: Universal at 18 years of age.

Central government budget: 2007/2008 budget is $1.2418 billion (MK 176.34 billion).

Economy

GDP: (2008 est.) $3.8 billion.

Annual real GDP growth rate: (2007) 7.4%.

Per capita GNI: (2008 est.) Approx. $289.50.

Avg. inflation rate: (2007) 7%.

Natural resources: Limestone, uranium (potential), coal, bauxite, phosphates, graphite, granite, black granite, vermilite, aquamarine, tourmaline, rubies, sapphires, rare earths.

Agriculture: (approx. 34.7% of GDP) Products—tobacco, sugar, cotton, tea, corn, potatoes, cassava (tapioca), sorghum, coffee, rice, groundnuts. Arable land—34%, of which 86% is cultivated.

Industry: (19.4% of GDP) Types—tea, tobacco, sugar, sawmill products, cement, consumer goods.

Trade: (2005 est.) Exports—$578 million: tobacco, tea, sugar, coffee, peanuts, wood products. Partners—U.S., U.K., South Africa, Germany, Japan. Imports—$1.066 billion: food, petroleum products, semimanufactures, consumer goods, transportation equipment. Partners—South Africa, Zimbabwe, Japan, U.S., U.K., Germany.

Fiscal year: July 1-June 30.

GEOGRAPHY

Malawi is situated in southeastern Africa. The Great Rift Valley traverses the country from north to south. In this deep trough lies Lake Malawi, the third-largest lake in Africa, comprising about 20% of Malawi's area. The Shire River flows from the south end of the lake and joins the Zambezi River 400 kilometers (250 mi.) farther south in Mozambique. East and west of the Rift Valley, the land forms high plateaus, generally between 900 and 1,200 meters (3,000-4,000 ft.) above sea level. In the north, the Nyika Uplands rise as high as 2,600 meters (8,500 ft.); south of the lake lie the Shire Highlands, with an elevation of 600-1,600 meters (2,000-5,000 ft.), rising to Mts. Zomba and Mulanje, 2,130 and 3,048 meters (7,000 and 10,000 ft.). In the extreme south, the elevation is only 60-90 meters (200-300 ft.) above sea level.

Malawi is one of Sub-Saharan Africa's most densely populated countries. The population of Lilongwe—Malawi's capital since 1971—exceeds 1.8 million (preliminary results from the 2008 Malawi population and housing census). All government ministries and the parliament are located in Lilongwe. Blantyre remains Malawi's major commercial center with a population near 1 million. Malawi's President resides in Lilongwe. The Supreme Court is seated in Blantyre.

Malawi's climate is generally subtropical. A rainy season runs from November through April. There is little to no rainfall throughout most of the country from May to October. It is hot and humid from October to April along the lake and in the Lower Shire Valley. Lilongwe is also hot and humid during these months, albeit far less than in the south. The rest of the country is warm during those months. From June through August, the lake areas and far south are comfortably warm, but the rest of Malawi can be chilly at night, with temperatures ranging from 5º-14ºC (41º-57ºF).

PEOPLE

Malawi derives its name from the Maravi, a Bantu people who came from the southern Congo about 600 years ago. On reaching the area north of Lake Malawi, the Maravi divided. One branch, the ancestors of the present-day Chewas, moved south to the west bank of the lake. The other, the ancestors of the Nyanjas, moved down the east bank to the southern part of the country.

By AD 1500, the two divisions of the tribe had established a kingdom stretching from north of the present-day city of Nkhotakota to the Zambezi River in the south, and from Lake Malawi in the east, to the Luangwa River in Zambia in the west.

Migrations and tribal conflicts precluded the formation of a cohesive Malawian society until the turn of the 20th century. In more recent years, ethnic and tribal distinctions have diminished. Regional distinctions and rivalries, however, persist. Despite some clear differences, no significant friction currently exists between tribal groups, and the concept of a Malawian nationality has begun to take hold. Predominately a rural people, Malawians are generally conservative and traditionally nonviolent.

The Chewas constitute 90% of the population of the central region; the Nyanja tribe predominates in the south and the Tumbuka in the north. In addition, significant numbers of the Tongas live in the north; Ngonis—an offshoot of the Zulus who came from South Africa in the early 1800s—live in the lower northern and lower central regions; and the Yao, who are mostly Muslim, live along the southeastern border with Mozambique.

HISTORY

Hominid remains and stone implements have been identified in Malawi dating back more than 1 million years, and early humans inhabited the vicinity of Lake Malawi 50,000 to 60,000 years ago. Human remains at a site dated about 8000 BC show physical characteristics similar to peoples living today in the Horn of Africa. At another site, dated 1500 BC, the remains possess features resembling Negro and Bushman people. Although the Portuguese reached the area in the 16th century, the first significant Western contact was the arrival of David Livingstone along the shore of Lake Malawi in 1859. Subsequently, Scottish Presbyterian churches established missions in Malawi. One of their objectives was to end the slave trade to the Persian Gulf that continued to the end of the 19th century. In 1878, a number of traders, mostly from Glasgow, formed the African Lakes Company to supply goods and services to the missionaries. Other missionaries, traders, hunters, and planters soon followed.

In 1883, a consul of the British Government was accredited to the "Kings and Chiefs of Central Africa," and in 1891, the British established the Nyasaland Protectorate (Nyasa is the Yao word for "lake"). Although the British remained in control during the first half of the 1900s, this period was marked by a number of unsuccessful Malawian attempts to obtain independence. A growing European and U.S.-educated African elite became increasingly vocal and politically active—first through associations, and after 1944, through the Nyasaland African Congress (NAC).

During the 1950s, pressure for independence increased when Nyasaland was joined with Northern and Southern Rhodesia in 1953 to form the Federation of Rhodesia and Nyasaland. In July 1958, Dr. Hastings Kamuzu Banda returned to the country after a long absence in the United States (where he had obtained his medical degree at Meharry Medical College in Nashville, Tennessee in 1937), the United Kingdom (where he practiced medicine), and Ghana. He assumed leadership of the NAC, which later became the Malawi Congress Party (MCP). In 1959, Banda was sent to Gwelo Prison for his political activities but was released in 1960 to participate in a constitutional conference

in London. On April 15, 1961, the MCP won an overwhelming victory in elections for a new Legislative Council. It also gained an important role in the new Executive Council and ruled Nyasaland in all but name a year later. In a second constitutional conference in London in November 1962, the British Government agreed to give Nyasaland self-governing status the following year.

Dr. Banda became Prime Minister on February 1, 1963, although the British still controlled Malawi's financial, security, and judicial systems. A new constitution took effect in May 1963, providing for virtually complete internal self-government. The Federation of Rhodesia and Nyasaland was dissolved on December 31, 1963, and Malawi became a fully independent member of the Commonwealth (formerly the British Commonwealth) on July 6, 1964. Two years later, Malawi adopted a new constitution and became a one-party state with Dr. Banda as its first President.

In 1970 Dr. Banda was declared President for life of the MCP, and in 1971 Banda consolidated his power and was named President for life of Malawi itself. The paramilitary wing of the Malawi Congress Party, the Young Pioneers, helped keep Malawi under authoritarian control until the 1990s. Increasing domestic unrest and pressure from Malawian churches and from the international community led to a referendum in which the Malawian people were asked to vote for either a multi-party democracy or the continuation of a one-party state.

On June 14, 1993, the people of Malawi voted overwhelmingly in favor of multi-party democracy. Free and fair national elections were held on May 17, 1994.

Bakili Muluzi, leader of the United Democratic Front (UDF), was elected President in those elections. The UDF won 82 of the 177 seats in the National Assembly and formed a coalition government with the Alliance for Democracy (AFORD). That coalition disbanded in June 1996, but some of its members remained in the government. The President was referred to as Dr. Muluzi, having received an honorary degree at Lincoln University in Missouri in 1995. Malawi's newly written constitution (1995) eliminated special powers previously reserved for the Malawi Congress Party. Accelerated economic liberalization and structural reform accompanied the political transition. On June 15, 1999, Malawi held its second democratic elections. Dr. Bakili Muluzi was re-elected to serve a second 5-year term as President,

despite an MCP-AFORD alliance that ran a joint slate against the UDF.

Malawi saw its first transition between democratically elected presidents in May 2004, when the UDF's presidential candidate Bingu wa Mutharika defeated MCP candidate John Tembo and Gwanda Chakuamba, who was backed by a grouping of opposition parties. European Union and Commonwealth observers said although voting passed peacefully, they were concerned about "serious inadequacies" in the poll. The UDF also did not win a majority of seats in parliament, as it had done in 1994 and 1999 elections. Through the politicking of party chairperson and former President Bakili Muluzi, the party successfully secured a majority by forming a "government of national unity" with several opposition parties. President Bingu wa Mutharika left the UDF party on February 5, 2005, citing differences with the UDF, particularly over his anti-corruption campaign. He formed the Democratic Progressive Party (DPP) shortly thereafter, attracting a number of UDF and independent members of parliament (MPs) to his new party. The DPP, however, has also failed to acquire enough support for a majority in parliament, and continues to face stiff opposition from both the UDF and the MCP. Meanwhile, many politicians are already looking ahead to the next general elections in 2009, with Muluzi, Tembo, and Mutharika all expected to campaign for president. On September 14, 2007, after passing the budget, the President dismissed the National Assembly before the speaker of parliament could act on Section 65 of the constitution. Section 65, a major point of contention between the DPP and opposition parties, allows the speaker to declare vacant the seats of any MPs who change parties after being elected. After a protracted delay, on August 29, 2008 the National Assembly approved the national budget for 2008/2009, relieving some of the pressure on the government in the short term. The parties further agreed to implement Section 65 in the coming months.

GOVERNMENT AND POLITICAL CONDITIONS

The Government of Malawi has been a multi-party democracy since 1994. Under the 1995 constitution, the president, who is both chief of state and head of the government, is chosen through universal direct suffrage every 5 years. Malawi has a vice president who is elected with the president. The president has the option of appointing a second vice president, who must be from a different party. The members of the presidentially appointed cabinet can be drawn from either within or outside of the legislature. Malawi's National Assembly has 193 seats, all directly elected to serve 5-year terms.

The constitution also provides for a second house, a Senate of 80 seats, but to date no action has been taken to create the Senate. The Senate is intended to provide representation for traditional leaders and the different geographical districts, as well as various special interest groups, such as women, youth, and the disabled.

The constitution provides for an independent judiciary. Malawi's judicial system, based on the English model, is made up of magisterial lower courts, a high court, a Supreme Court of Appeal, and a constitutional court.

Local government is carried out in 28 districts within three regions administered by regional administrators and district commissioners who are appointed by the central government. Local elections, the first in the multiparty era, took place in on November 21, 2000. The UDF party won 70% of the

Principal Government Officials

Last Updated: 11/12/08

Pres.: **Bingu wa MUTHARIKA**
Vice Pres.: **Cassim CHILUMPHA**
Min. of Agriculture & Food Security: **Bingu wa MUTHARIKA**
Min. of Economic Planning & Development: **Ken LIPENGA**
Min. of Education & Human Resources: **Bingu wa MUTHARIKA**
Min. of Factories & Technology Development: **John KHUMBO CHIRWA**
Min. of Finance: **Goodall GONDWE**
Min. of Foreign Affairs & Intl. Cooperation: **Joyce BANDA**
Min. of Gender, Child Welfare, & Community Services: **Kate KAINJA-KALULUMA**
Min. of Health: **Khumbo KACHALI**
Min. of Home Affairs & Internal Security:

Min. of Transport & Public Works: **Henry CHIMUNTHU-BANDA**
Min. of Youth, Sports, & Culture: **Khumbo KACHALI**
Min. of State in the Office of the Pres.: **Richard MSOWOYA**
Attorney Gen.: **Jane ANSAH**
Governor, Reserve Bank: **Victor MBEWE**
Ambassador to the US: **Bernard SANDE**
Permanent Representative to the UN, New York: **Steve MATENJE**

Malawi maintains an embassy in the United States at 1156 15th Street, NW, Suite 320, Washington, DC 20005 (tel. 202-721-0270; fax 202-721-0288). Malawi's Permanent Mission to the United Nations is located at 866 UN Plaza, Suite 486, New York, NY 10017 (tel.: 212-317-8738/8718; fax: 212-317-8729; e-mail: Malawinewyork@aol.com or MalawiU@aol.com).

Malawi also maintains an Honorary Consulate in Los Angeles at 44970

Via Renaissance, Temecula, California 92590 (office number, 951-676-2476; fax number, 951-676-1568; and e-mail, malawiconsul@yahoo.com).

ECONOMY

Malawi is a landlocked, densely populated country. Its economy is heavily dependent on agriculture. Malawi has few exploitable mineral resources. Its two most important export crops are tobacco and tea. Traditionally Malawi has been self-sufficient in its staple food, maize, and during the 1980s exported substantial quantities to its drought-stricken neighbors. Agriculture represents 34.7% of the GDP, accounts for over 80% of the labor force, and represents about 80% of all exports. Nearly 90% of the population engages in subsistence farming. Smallholder farmers produce a variety of crops, including maize (corn), beans, rice, cassava, tobacco, and groundnuts (peanuts).The agricultural sector contributes about 63.7% of total income for the rural population, 65% of manufacturing sector's raw materials, and approximately 87% of total employment. Financial wealth is generally concentrated in the hands of a small elite. Malawi's manufacturing industries are situated around the city of Blantyre.

Malawi's economic reliance on the export of agricultural commodities renders it particularly vulnerable to external shocks such as declining terms of trade and drought. High transport costs, which can comprise over 30% of its total import bill, constitute a serious impediment to economic development and trade. Malawi must import all its fuel products. Paucity of skilled labor; difficulty in obtaining expatriate employment permits; bureaucratic red tape; corruption; and inadequate and deteriorating road, electricity, water, and telecommunications infrastructure further hinder economic development in Malawi. However, recent government initiatives targeting improvements in the road infrastructure, together with private sector participation in railroad and telecommunications, have begun to render the investment environment more attractive.

Malawi has undertaken economic structural adjustment programs supported by the World Bank, the International Monetary Fund (IMF), and other donors since 1981. Broad reform objectives include stimulation of private sector activity and participation through the elimination of price controls and industrial licensing, liberalization of trade and foreign exchange, rationalization of taxes, privatization of state-owned enterprises, and civil service reform.

In May 2004, the IMF program begun in 2000 was canceled and a Staff-Monitored Program (SMP) was implemented. In the wake of questions about fiscal creditability, the SMP's goal was to give Malawi's newly-elected government the chance to establish a track record of fiscal discipline. A Poverty Reduction and Growth Facility (PRGF) was approved on August 5, 2005 after a successful SMP. In August 2006 Malawi successfully reached the completion point under the Heavily Indebted Poor Countries (HIPC) Initiative, resulting in debt relief from multilateral and Paris Club creditors. Over $2 billion in debt has since been cancelled, enabling the government to increase expenditures for development. Real GDP increased by an estimated 7.4% in 2007, a modest decline from 7.9% in 2006. Inflation has been largely under control since 2003, averaging 10% in that year and 7% in 2007. Discount and commercial lending rates have also declined from 40%-45% in 2003 to 22.5% currently. The government has moved away from controlling the exchange rate, allowing the Kwacha to drift since down since March 2005. As of January 2008 the Kwacha had depreciated to 140 to the U.S. dollar. Nevertheless, imports still heavily outweigh exports, and the country continues to suffer from a severe shortage of foreign exchange. Malawi has bilateral trade agreements with its two major trading partners, South Africa and Zimbabwe, both of which allow duty-free entry of Malawian products into their countries.

FOREIGN RELATIONS

Malawi has continued the pro-Western foreign policy established by former President Banda. It maintains excellent diplomatic relations with principal Western countries. Malawi's close relations with South Africa throughout the apartheid era strained its relations with other African nations. Following the collapse of apartheid in 1994, Malawi developed, and currently maintains, strong diplomatic relations with all African countries.

Between 1985 and 1995, Malawi accommodated more than a million refugees from Mozambique. The refugee crisis placed a substantial strain on Malawi's economy but also drew significant inflows of international assistance. The accommodation and eventual repatriation of the Mozambicans is considered a major success by international organizations. In 1996, Malawi received a number of Rwandan and Congolese refugees seeking asylum. The government did not turn away refugees, but it did invoke the principle of "first country of asylum." Under this principle, refugees who requested asylum in another country first, or who had the opportunity to do so, would not subsequently be granted asylum in Malawi. There were no reports of the forcible repatriation of refugees.

Important bilateral donors, in addition to the U.S., include Canada, Libya, Germany, Iceland, Japan, the Netherlands, Norway, Sweden, Taiwan, and the United Kingdom. Multilateral donors include the World Bank, the IMF, the European Union, the African Development Bank, and the United Nations organizations.

Malawi is a member of the following international organizations: UN and some of its specialized and related agencies (i.e. UNCTAD, UNESCO, UNIDO), IMF, World Bank, Multilateral Investment Guarantee Agency (MIGA), World Intellectual Property Organization (WIPO), Berne Convention, Universal Copyright Convention, African Union, Lome Convention, African Development

Bank (AFDB), Southern African Development Community (SADC), the Common Market for East and Southern Africa (COMESA), Non-aligned Movement, G-77, and the World Health Organization (WHO).

U.S.-MALAWIAN RELATIONS

The transition from a one-party state to a multi-party democracy significantly strengthened the already cordial U.S. relationship with Malawi. Significant numbers of Malawians study in the United States. The United States has an active Peace Corps program, Centers for Disease Control and Prevention, Department of Health and Human Services, and an Agency for International Development (USAID) mission in Malawi.

U.S. and Malawian views on the necessity of economic and political stability in southern Africa generally coincide. Through a pragmatic assessment of its own national interests and foreign policy objectives, Malawi advocates peaceful solutions to the region's problems through negotiation. Malawi works to achieve these objectives in the United Nations, COMESA, and SADC. Malawi is the first southern African country to receive peacekeeping training under the U.S.-sponsored African Crisis Response Force Initiative (ACRI) and has joined the successor program, African Contingency Operations Training Assistance (ACOTA). It has an active slate of peacetime engagement military-to-military programs. The two countries maintain a continuing dialogue through diplomatic representatives and periodic visits by senior officials.

U.S. Agency for International Development (USAID)

The United States has a substantial foreign assistance program in Malawi. The U.S. Government has provided approximately $70 million annually in development assistance to Malawi under USAID's Country Strategic Plan (CSP). The primary goal of USAID assistance is poverty reduction and increased food security through broad-based, market-led economic growth, focusing on four areas: sustainable increases in rural incomes, increased civic involvement in the rule of law, improved access to and quality of health services, and improved access to quality basic education. The USAID program is implemented in partnership with the Government of Malawi, nongovernmental organizations (NGOs), other U.S. Government agencies, U.S. private voluntary organizations, contractors, and other partners, including the private sector through public-private partnerships.

USAID's program to increase rural incomes includes training and technical assistance to increase smallholder (crop, dairy, forest, and fishery) productivity; foster additional trade linkages among small farmer producer associations, larger commodity-specific industry clusters, and export markets (e.g. cassava, chilies, ground nuts, cotton, coffee, etc.); improve access to demand-driven financial services for micro, small and medium-size enterprises (MSMEs); increase rural households' revenues from sustainable natural resource management; and improve food security for vulnerable families in Malawi's rural areas. USAID is also encouraging smallholders to diversify into dairy production, a very lucrative business in Malawi and well-suited to Malawi's limited land area. USAID grantee Land O' Lakes (LOL), partnering with World Wide Sires, continues to promote the growth of the dairy industry in Malawi through 55 dairy associations with over 6,376 members (46% of which are women). USAID, through the Presidential Initiative to End Hunger in Africa, improved output markets for a total of 177,468 rural households. USAID-supported microfinance institutions provided financial services to 189,782 clients and disbursed 351,319 loans valued at $35,876,401. U.S. Government funding totaling $700,000 was leveraged to provide up to $13 million in agricultural financing through Malawi's first Development Credit Authority (DCA).

The Democracy and Governance portfolio continued to evolve in 2007, which proved to be an important transition year for the MCC Threshold Country Program (TCP). Activities under the TCP reaped positive results in fighting corruption, improving fiscal responsibility, and establishing a more transparent and effective judiciary. Partly as a result of successes gained under the TCP, the Government of Malawi was the only country in the world selected by MCC in December 2007 for Compact eligibility. Several other Democracy and Governance activities continued to fight corruption in the private sector, educate at-risk youth of their civic responsibilities, and nurture Christian/Muslim dialogue and relationships. The Democracy and Governance office also initiated a public-private partnership with the Financial Services Volunteer Corps to assist the Reserve Bank of Malawi and private banks to further develop risk-based banking supervision capacity. Chancellor College and a U.S.-based Historically Based College/University (HBCU) also entered into a partnership to strengthen the government's legal aid programs.

As was the case in previous years, USAID continued to support the Sector Wide Approach to Health (SWAP) in 2007 through discrete initiatives aimed at "increased use of improved health behaviors and services" for maternal, child, and reproductive health, including HIV/AIDS, tuberculosis, and malaria. These sustained efforts over the last 7 years have had substantial impact on health indicators in the country. In the area of HIV prevention, for example, the number of USAID-assisted counseling and testing centers increased from 3 in 2000 to 276 in 2007, while the number of clients assisted at these sites per year increased from about 22,000 in 2000 to more than 192,000 in 2007. In addition, according to a national Demographic and Health Survey (DHS) completed in 2005 with support from USAID, USAID's Presidential Emergency Plan for HIV/AIDS Relief activities reached 1,351,404 people through ABC messages (abstinence from sexual activity, being faithful to a single partner, and cor-

rect and consistent condom use) and provided care to 57,356 HIV/AIDS orphans and vulnerable children. Under-five mortality rates declined from a high of 189 per thousand live births in 2000 to 133 per thousand live births in 2004; the total fertility rate (TFR) declined to 6 children per woman; and the proportion of Malawian children sleeping under an insecticide-treated bednets (ITN) (26% in 2004) was more than three times the proportion (8%) sleeping under an ITN in 2000.

Key achievements in 2007 under the Presidential Malaria Initiative (PMI) included: distribution of 185,400 long-lasting insecticide-treated mosquito nets and 2,607,480 doses of a new life-saving drug delivered nationwide.

Improving the quality and efficiency of basic education remain the major development challenges in the Malawi education system. USAID continues to fund activities that target quality of and access to the primary education sub-sector level, which is having a positive effect at both the local and national levels. At the local level, USAID-funded activities are helping communities and parents make more informed decisions to improve the quality of primary schooling.

In 2007, USAID continued its efforts in the education sector through: (1) development of teachers' professional skills through long-term undergraduate and graduate training in Malawi and the U.S.; (2) reinforcement of innovative classroom practices through pre-service and in-service teacher training; (3) participation of communities and teacher training colleges in HIV/AIDS outreach activities; (4) support of Government of Malawi adoption of key policy reforms in teacher education and HIV/AIDS; and (5) improving the quality and quantity of data available for policymaking. In 2007, USAID, through the African Education Initiative (AEI) and congressionally-mandated School Fees Initiative (SFI), improved the quality of and access to primary education for 624,032 children and enhanced the pedagogical skills of 10,355 teachers. The United States is the largest contributor to the World Food Program (WFP) in Malawi, providing over $100 million in food and other emergency assistance

Centers for Disease Control and Prevention, Department of Health and Human Services

The Centers for Disease Control and Prevention (CDC), Department of Health and Human Services (DHHS) operates two programs within Malawi: Global AIDS Program (GAP) and Malawi Malaria Program (MMP).

The CDC GAP office started in November 2001 with an emphasis on establishing long-term working relationships with the Malawi Government, the National AIDS Commission (NAC) and the Ministry of Health (MOH). The major areas of focus during the initial phase included strengthening Voluntary Counseling and Testing (VCT), HIV surveillance, evaluation, infrastructure, and capacity-building activities.

GAP Malawi supports multiple HIV surveillance activities including sentinel surveillance and the Priorities for Local AIDS Control Efforts (PLACE) survey.

In partnership with NAC, CDC GAP continued to strengthen VCT, developing multiple national VCT building blocks such as VCT Guidelines and VCT Training materials. CDC GAP also improved the communications and data analysis capacity at NAC by helping to establish their computer system and establish the foundation for data analysis.

The CDC MMP is jointly funded by USAID and CDC has evolved to provide more support to the national prevention and control program. CDC MMP has supported the work of the National Malaria Control Programme in developing the country strategic plan for Roll Back Malaria (RBM), developing the national "Malaria Policy," developing guidelines for the management of ITNs Program, and participating in other national program activities.

Peace Corps

The first Peace Corps volunteers arrived in Malawi in 1963. Under the conservative Banda regime, the program was suspended for several years due to the "nonconformist" role of some volunteers but was restored in 1978. Since that time, the program has developed a close working relationship with the Government of Malawi. In total, over 2,200 Americans have served as Peace Corps volunteers in Malawi. Currently, there are about 100 volunteers working in health, education, and environment.

TRAVEL

Consular Information Sheet

July 21, 2008

Country Description: Malawi is a developing landlocked country in southern Africa. Tourist facilities in major cities and in resort areas are steadily improving, but remain limited. Aging infrastructure and lack of investment have rendered electricity, water supply, and telecommunications unreliable in rural areas.

Entry Requirements: A passport, return ticket, and adequate funds are required. U.S. citizens traveling to Malawi for tourism, transit or business for 30 days or less can obtain a visa at the airports or border points of entry at no cost.

Effective May 23, 2008, requests for visa extensions beyond 30 days are no longer free. There is an application fee of 5,000 Malawi kwacha (approximately $34 U.S.) for each 30-day extension, which is due once the application has been approved. American citizens are advised to apply prior to the expiration of visa. There is no guarantee your request will be granted. American citizens are reminded that they are subject to Malawi laws. Persons that overstay their visa expiration date even unknowingly have been fined, arrested and deported.

Americans wishing to volunteer, study, conduct research or business for more than 30 days in Malawi are responsible for requesting the correct type of visa from the Malawian Embassy or Consulate, prior to traveling to Malawi. There is no guarantee requests for changing one's immigration category (e.g., from tourist to Temporary Employment Permit) will be granted. Foreign citizens whose primary purpose of travel is to participate in religious activities (voluntary or paid) should obtain a Temporary Employment Visa (TEP) rather than a tourist visa through their sponsoring organization or business. Malawian immigration authorities and police have fined, arrested and deported American citizens who have entered Malawi with a tourist visa and conducted other business or volunteer services.

There is an airport departure tax, which is payable only in U.S. dollars, for all non-Malawians.

For the most current visa information, contact the Embassy of Malawi at 1029 Vermont Avenue, NW, Washington, DC 20005, tel.: (202) 721-0270.

Safety and Security: Spontaneous civil disturbances, primarily related to labor and student strikes, occur, but are uncommon. U.S. citizens should avoid crowds, political rallies and street demonstrations and maintain security awareness at all times.

For the latest security information, Americans traveling abroad should regularly monitor the Department of State, Bureau of Consular Affair's Internet site at http://travel.state.gov, where the current Travel Warnings and Travel Alerts, including the Worldwide Caution Travel Alert, can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S. and Canada, or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: Even though Malawi is known as "the warm heart of Africa," there is a criminal element present. Most crimes against Americans involve property. Carjacking and residential break-ins are prevalent throughout Malawi. Perpetrators of these crimes are usually well-armed and may resort to violence with little provocation. Petty street crime (robbery and pick-pocketing) is common, and break-ins have also occurred in hotels/lodges throughout the country.

American citizens are urged to avoid traveling on foot at night, especially in urban areas, as armed muggings and assaults have increased. Specifically, expatriates have been targeted in Lilongwe, and several Americans have been injured. Even when walking in a large group, city streets should be considered unsafe after dark. Pedestrians should be cautious even during daylight hours. Visitors in need of transportation should request that hotel or restaurant management call a taxi or car service.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy for assistance. The Embassy staff can, for example, assist you to find appropriate medical care, contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

The local equivalents to the "911" emergency line in Malawi are 997 for police, 999 for fire and 998 for ambulance service.

Medical Facilities and Health Information: Medical are rudimentary and most local medical providers do not speak English fluently. Medications are not consistently available; many American medications are not available at all. For any major medical problems travelers should consider obtaining medical treatment in South Africa where advanced medical care is available. Purchasing medical evacuation insurance before travel is strongly recommended.

Health care institutions and providers require payment (primarily cash) at the time of service, and may even require payment before service is given. Minimal specialized care is available in Lilongwe and Blantyre.

Food-borne illnesses such as travelers' diarrhea, giardiasis and hepatitis A occur commonly. Travelers are urged to avoid tap water, ice cubes and unsterilized raw fruits and vegetables. Bottled water is recommended

for drinking and food preparation. Schistosomiasis (also known as Bilharzia) and malaria are endemic in Malawi. Malaria prophylaxis is strongly advised, and initiating prophylaxis prior to traveling is recommended. Visitors should consult their physicians to learn about prophylaxis and the possible side effects of various available medications. In addition, other personal protective measures such as the use of insect repellents help to reduce malaria risk. Travelers who become ill with a fever or flu-like illness while traveling in a malaria-risk area and up to one year after returning home should seek prompt medical attention and tell the physician their travel history and what anti-malarial medications they have been taking. For additional information on malaria, protection from insect bites, and anti-malarial drugs, please visit the CDC travel health web site at http://www.cdc.gov/malaria.

Trypanosomiasis (African Sleeping Sickness) is transmitted by the bite of a tsetse fly common to game parks in Malawi. Due to the potential complications of treating the disease, confirmed cases are medically evacuated for treatment.

HIV infection is endemic in the population. Travelers are advised to take appropriate precautions to limit the risk of transmission through blood or sexual contact. The U.S. Department of State is unaware of any HIV/AIDS entry restrictions for visitors to or foreign residents of Malawi.

Tuberculosis is prevalent as well. Caution should be exercised if visiting crowded settings for prolonged periods of time, especially public hospitals and prisons.

Other health risks include typhoid, tetanus, and rabies. Vaccination for these diseases is advised. Additionally, cholera outbreaks have been reported in crowded villages with poor sanitation but are rare in cities.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's Internet site at http://www.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith/en.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Malawi is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

Malawi's principal highways are generally in good condition, although safety hazards include the lack of road shoulders, frequent potholes and bicyclists. Secondary roads are in poor repair and may be impassable to all but four-wheel drive vehicles during the rainy season (November-April). Public transportation, consisting primarily of minibuses, is unreliable and accidents are common. Given Malawi's high road accident rate, travelers should drive defensively and avoid road travel outside cities at night. Road support networks for stranded drivers do not exist. Police roadblocks are common and properly documented drivers usually pass quickly and without incident. Foreigners intending to remain in Malawi for an extended period of time are expected to obtain a locally-issued driver's license.

Motor vehicle accidents are of great concern due to atypical road hazards. There are no medical facilities that provide comprehensive emergency care comparable to U.S. standards. Travelers should always wear seatbelts, minimize driving at night, and never drive under the influence of alcohol or drugs.

For specific information concerning Malawi driver's permits, vehicle inspection, road tax and mandatory insurance, contact the Embassy of Malawi in Washington, D.C. on (202) 721-0270. For international driving permits contact AAA or the American Automobile Touring Alliance.

Aviation Safety Oversight: As there is no direct commercial air service between the United States and Malawi, the U.S. Federal Aviation Administration (FAA) has not assessed Malawi's Civil Aviation Authority for compliance with International Civil Aviation Organization (ICAO) aviation safety standards. For more information, travelers may visit the FAA's internet web site at http://www.faa.gov.

Special Circumstances: Wild animals may pose a danger. Travelers are advised that, even in the most serene settings, wild animals can pose a threat to life and safety. Travelers are cautioned to observe local or park regulations and heed all instructions given by tour guides.

Credit cards are not commonly accepted outside of major cities. There are a limited number of ATMs in Malawi that accept Visa, Mastercard and international ATM cards.

Dress codes against short skirts on women and long hair on men no longer exist, but travelers may wish to dress modestly, especially when visiting remote areas.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating Malawi's laws, even unknowingly, may be

expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Malawi are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in Malawi are encouraged to register with the nearest U.S. Embassy through the State Department's travel registration web site so that they can obtain updated information on travel and security within Malawi.Americans without Internet access may register directly with the nearest U.S. Embassy. By registering, American citizens make it easier for the Embassy to contact them in case of emergency. The U.S. Embassy is located in Area 40, City Center, Lilongwe; telephone numbers are (265) 1-773-166, 1-773-342 and 1-773-367 (if dialing within Malawi add "0" before the "1"); fax (265) 1-774-976 (if dialing within Malawi add "0" before the "1"). The Embassy's mailing address is PO Box 30016, Lilongwe 3, Malawi.

Intercountry Adoption

April 2006

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is based on public sources and current understanding. Questions involving foreign and U.S. immigration laws and legal interpretation should be addressed respectively to qualified foreign or U.S. legal counsel.

Please Note: Adoptive parents must foster a prospective adoptive child for 24 months in Malawi before an adoption may be finalized.

Patterns of Immigration: Please review current reports online at http://adoption.state.gov.

Adoption Authority: The government office responsible for adoptions in Malawi is the Ministry of Gender, Youth and Community Services. Persons interested in adopting from Malawi should contact:

Mary Khonje
Social Welfare Officer
Ministry of Gender, Child Welfare
and Community Services
P/Bag 330
Lilongwe 3, Malawi
Phone +265-(0)1-77-04-11 x.247

Eligibility Requirements for Adoptive Parents: Prospective adoptive parents must be at least 25 years old and at least 21 years older than the child. Both married and single persons may adopt. However, single men may not adopt female children unless the court is satisfied that there are special circumstances, justifying an exception.

Residency Requirements: Adoptive parents must be resident in Malawi to adopt.

Time Frame: Malawian law requires a lengthy pre-adoption foster care period (at least two years).

Adoption Agencies and Attorneys: There are no adoption agencies in Malawi. For information regarding home studies, interested parties should contact the Ministry of Gender, Youth and Community Services at Private Bag 330 Lilongwe 3 or telephone 01-770-411. The U.S. Embassy in Lilongwe maintains a list of English-speaking attorneys http://lilongwe.usembassy.gov/ainformation.html. The Embassy assumes no responsibility for the professional ability or integrity of the individuals or of the firms whose names and addresses appear in the list.

Adoption Fees: On average, depending on the complexity of the case, the fees for a lawyer range between $350 and $500. Court filing fees and Registrar fees for the new birth certificate are under five dollars. The Malawian passport fee is approximately $30.

Adoption Procedures: Prospective adoptive parents often identify a child for adoption through local churches, orphanages, hospitals or missions. They then need to retain a lawyer to handle the application. The lawyer files a petition with the Magistrate Court of the district in Malawi where the adoptive parents reside. Once that is done, the Court chooses a social worker to be the child's "Guardian ad Litem" who investigates the circumstances of the prospective adoptee(s) and submits a Court Social Report (a home-study) to the High Court.

The Guardian ad Litem monitors the adoptive family during the 24 months by making home visits. After the 24 month foster care period is completed, the Court will rule whether the adoption can be finalized. The 24-month period starts from the time the child is placed in the home of the adoptive parents.

Required Documents: Malawi adoptions are governed by the country's Adoption of Children Act. Proof of the identity and nationality of the adoptive parents, a competed home-study and proof that the child is eligible for adoption are required.

Adoption cannot take place without the consent of every person who is a parent or guardian of the child who has custody of the child or who is likely to contribute to the support to the child.

Embassy of the Republic of Malawi

2408 Massachusetts Avenue NW

Washington, DC 20008

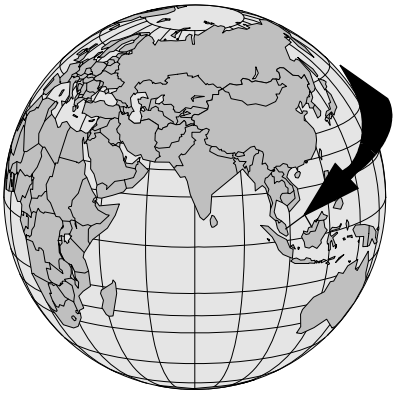
Tel: 202-797-1007

U.S. Immigration Requirements: Prospective adopting parents are strongly encouraged to consult USCIS publication M-249, *The Immigration of Adopted and Prospective Adoptive Children*, as well as the Department of State publication, *Intercountry Adoptions*. Please see the *Intercountry Adoption* section of this book for more details.

Embassy of the United States of America

P.O. Box 30016

16 Jomo Kenyatta Road



Lilongwe 3

Tel: 265-773-166

Fax: 265-774-976

http://lilongwe.usembassy.gov

Additional Information: Specific questions about adoption in Malawi may be addressed to the U.S. Embassy in Lilongwe. General questions regarding intercountry adoption may be addressed to the Office of Children's Issues, U.S. Department of State, CA/OCS/CI, SA-29, 4th Floor, 2201 C Street, NW, Washington, D.C. 20520-4818, toll-free Tel: 1-888-407-4747.

MALAYSIA

Compiled from the June 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Malaysia

PROFILE

Geography

Area: 329,749 sq. km. (127,316 sq. mi.); slightly larger than New Mexico.

Cities: Capital—Kuala Lumpur. Other cities—Penang, Ipoh, Malacca, Johor Baru, Shah Alam, Klang, Kuching, Kota Kinabalu

Terrain: Coastal plains and interior, jungle-covered mountains. The South China Sea separates peninsular Malaysia from East Malaysia on Borneo.

Climate: Tropical.

People

Nationality: Noun and adjective—Malaysian(s).

Population: (2008) 27.5 million.

Annual growth rate: 2.0%.

Ethnic groups: Malay 53.3%, Chinese 26.0%, indigenous 11.8%, Indian 7.7%, others 1.2%.

Religions: Islam (60.4%), Buddhism (19.2%), Christianity (9.1%), Hinduism (6.3%), Confucianism (2.6%), tribal/folk (0.8%), other (0.4%), none/unknown (1.2%).

Languages: Bahasa Melayu (official), Chinese (various dialects), English, Tamil, indigenous.

Education: Years compulsory—6. Attendance—90.1% (primary), 60.0% (secondary). Literacy—93.5%.

Health: Infant mortality rate (2007)—6.7/1,000. Life expectancy (2007)—female 76.4 yrs., male 71.9 yrs.

Work force: (10.89 million, 2007): Services—57%; industry—28% (manufacturing—19%, mining and construction—9%); agriculture—15%.

Government

Type: Federal parliamentary democracy with a constitutional monarch.

Independence: August 31, 1957. (Malaya, which is now peninsular Malaysia, became independent in 1957. In 1963 Malaya, Sabah, Sarawak, and Singapore formed Malaysia. Singapore became an independent country in 1965.)

Constitution: 1957.

Political subdivisions: 13 states and three federal territories (Kuala Lumpur, Labuan Island, Putrajaya federal administrative territory). Each state has an assembly and government headed by a chief minister. Nine of these states have hereditary rulers, generally titled "sultans," while the remaining four have appointed governors in counterpart positions.

Government branches: Executive—Yang di-Pertuan Agong (head of state and customarily referred to as the king; has ceremonial duties), prime minister (head of government), cabinet. Legislative—bicameral parliament, comprising 70-member Senate (26 elected by the 13 state assemblies, 44 appointed by the king on the prime minister's recommendation) and 219-member House of Representatives (elected from single-member districts). Judicial—Federal Court, Court of Appeals, high courts, session's courts, magistrate's courts, and juvenile courts. Sharia courts hear cases on certain matters involving Muslims only.

Political parties: Barisan Nasional (National Front)—a coalition comprising the United Malays National Organization (UMNO) and 13 other parties, most of which are ethnically based; Democratic Action Party (DAP); Parti Islam se Malaysia (PAS); Parti Keadilan Rakyat (PKR). There are more than 30 registered political parties, including the foregoing, not all of which are represented in the federal parliament.

Suffrage: Universal adult (voting age 21).

Economy (2007)

Nominal GDP: $154.3 billion.

Annual real GDP growth rate: 5.9% (2006); 6.3% (2007).

Per capita (GDP) income: $5,610.

Natural resources: petroleum, liquefied natural gas (LNG), tin, minerals.

Agriculture: palm oil, rubber, timber, cocoa, rice, tropical fruit, fish, coconut.

Industry: Types—electronics, electrical products, chemicals, food and beverages, metal and machine products, apparel.
Trade: Merchandise exports—$185.0 billion: electronic products, manufactured goods, petroleum, palm oil, liquid natural gas, apparel, timber, rubber. Major markets—U.S. 15.6%, Singapore 14.6%, Japan 9.1%, China 8.8%. Merchandise imports—$154.0 billion: electronic products, machinery, chemicals, manufactured goods, petroleum products. Major suppliers—Japan 13.0%, China 12.9%, Singapore 11.5%, U.S. 10.8%.

PEOPLE

Malaysia's multi-racial society contains many ethnic groups. Malays comprise a majority of just over 50%. By constitutional definition, all Malays are Muslim. About a quarter of the population is ethnic Chinese, a group which historically played an important role in trade and business. Malaysians of Indian descent comprise about 7% of the population and include Hindus, Muslims, Buddhists, and Christians. Non-Malay indigenous groups combine to make up approximately 11% of the population.

Population density is highest in peninsular Malaysia, home to some 20 million of the country's 27 million inhabitants. The remaining 7 million live on the Malaysian portion of the island of Borneo in the large but less densely-populated states of Sabah and Sarawak. More than half of Sarawak's residents and about two-thirds of Sabah's are from indigenous groups.

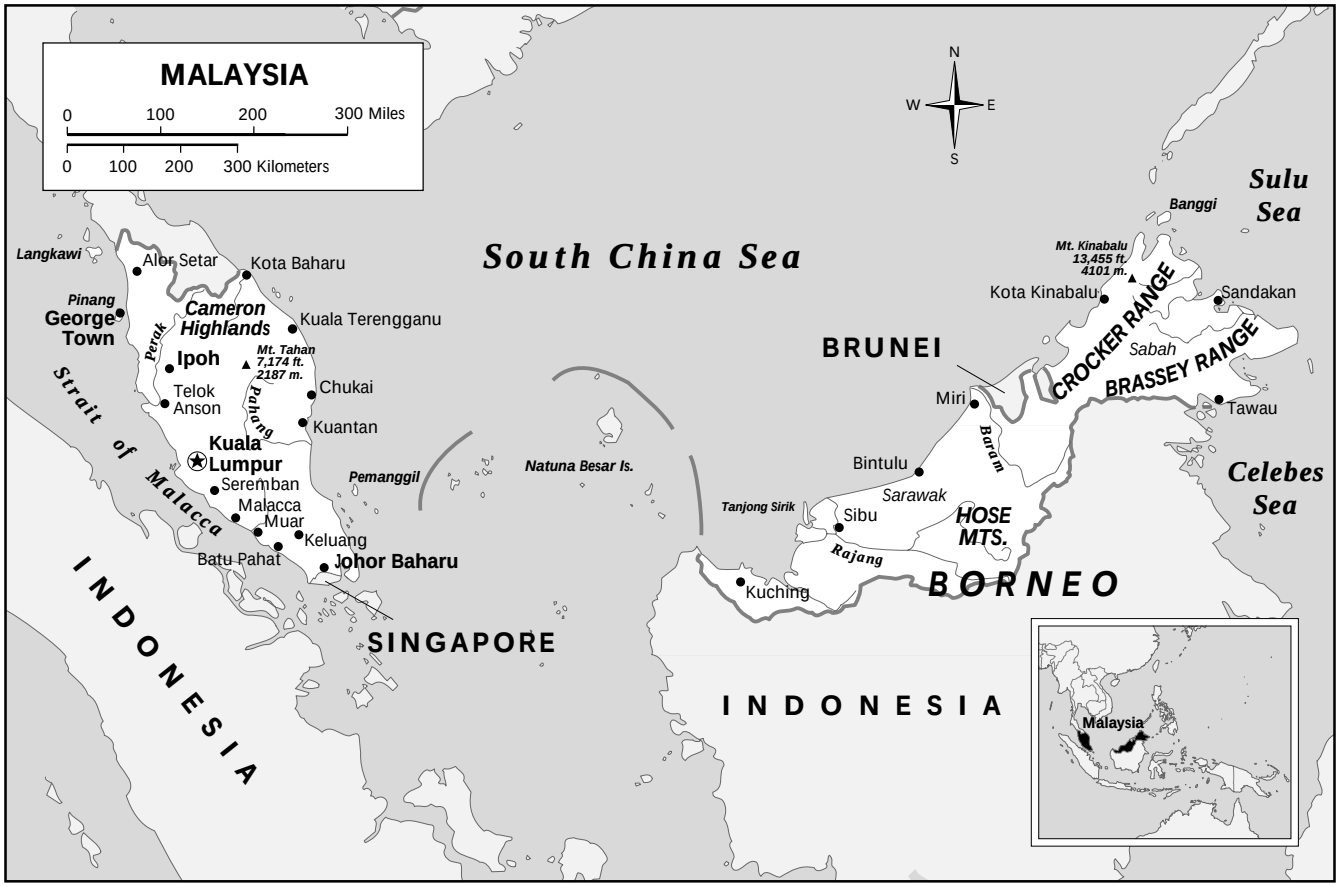
HISTORY

The early Buddhist Malay kingdom of Srivijaya, based at what is now Palembang, Sumatra, dominated much of the Malay peninsula from the 9th to the 13th centuries AD. The powerful Hindu kingdom of Majapahit, based on Java, gained control of the Malay peninsula in the 14th century. Conversion of the Malays to Islam, beginning in the early 14th century, accelerated with the rise of the state of Malacca under the rule of a Muslim prince in the 15th century. Malacca was a major regional commercial center, where Chinese, Arab, Malay, and Indian merchants traded precious goods.

Drawn by this rich trade, a Portuguese fleet conquered Malacca in 1511, marking the beginning of European expansion in Southeast Asia. The Dutch ousted the Portuguese from Malacca in 1641. The British obtained the island of Penang in 1786 and temporarily controlled Malacca with Dutch acquiescence from 1795 to 1818 to prevent it from falling to the French during the Napoleonic war. The British gained lasting possession of Malacca from the Dutch in 1824, through the Anglo-Dutch treaty, in exchange for territory on the island of Sumatra in what is today Indonesia.

In 1826, the British settlements of Malacca, Penang, and Singapore were combined to form the Colony of the Straits Settlements. From these strongholds, in the 19th and early 20th centuries the British established protectorates over the Malay sultanates on the peninsula. During their rule the British developed large-scale rubber and tin production and established a system of public administration. British control was interrupted by World War II and the Japanese occupation from 1941 to 1945.

Popular sentiment for independence swelled during and after the war. The territories of peninsular Malaysia joined together to form the Federation of Malaya in 1948 and eventually negotiated independence from the British in 1957. Tunku Abdul Rahman became the first prime minister. In 1963 the British colonies of Singapore, Sarawak, and Sabah joined the Federation, which was renamed Malaysia. Singapore's membership was short-lived, however; it left in 1965 and became an independent republic.



Neighboring Indonesia objected to the formation of Malaysia and began a program of economic, political, diplomatic, and military "confrontation" against the new country in 1963, which ended only after the fall of Indonesia's President Sukarno in 1966. Internally, local communists, nearly all Chinese, carried out a long, bitter insurgency both before and after independence, prompting the imposition of a state of emergency from 1948 to 1960. Small bands of guerrillas remained in bases along the rugged border with southern Thailand, occasionally entering northern Malaysia. These guerrillas finally signed a peace accord with the Malaysian Government in December 1989. A separate, small-scale communist insurgency that began in the mid-1960s in Sarawak also ended with the signing of a peace accord in October 1990.

GOVERNMENT

Malaysia is a constitutional monarchy, nominally headed by the Yang di-Pertuan Agong, customarily referred to as the king. Kings are elected for 5-year terms from among the nine sultans of the peninsular Malaysian states. The king also is the leader of the Islamic faith in Malaysia.

Executive power is vested in the cabinet led by the prime minister; the Malaysian constitution stipulates that the prime minister must be a member of the lower house of parliament who, in the opinion of the Yang di-Pertuan Agong, commands a majority in parliament. The cabinet is chosen from among members of both houses of parliament and is responsible to that body.

The bicameral parliament consists of the Senate (Dewan Negara) and the House of Representatives (Dewan Rakyat). All 70 Senate members sit for 3-year terms, which are normally extended for an additional 3 years; 26 are elected by the 13 state assemblies, and 44 are appointed by the king. Representatives of the House are elected from single-member districts by universal adult suffrage. The 219 members of the House of Representatives are elected to

parliamentary terms lasting up to 5 years. Legislative power is divided between federal and state legislatures.

The Malaysian legal system is based on English common law. The Federal Court reviews decisions referred from the Court of Appeal; it has original jurisdiction in constitutional matters and in disputes between states or between the federal government and a state. Peninsular Malaysia and the East Malaysian states of Sabah and Sarawak each have a high court.

The federal government has authority over external affairs, defense, internal security, justice (except civil law cases among Malays or other Muslims and other indigenous peoples, adjudicated under Islamic and traditional law), federal citizenship, finance, commerce, industry, communications, transportation, and other matters.

Principal Government Officials

Last Updated: 11/12/08

Malaysia maintains an embassy in the U.S. at 3516 International Court NW, Washington, DC 20008, tel. (202) 572-9700; a Consulate General at 550 South Hope Street, Suite 400, Los Angeles, CA 90071, tel. (213) 892-1238; and a Consulate General at 313 East 43rd Street, New York City, NY 10017, tel. (212) 490-2722/23.

POLITICAL CONDITIONS

Malaysia's predominant political party, the United Malays National Organization (UMNO), has held power in coalition with other parties since independence in 1957. The UMNO coalition's share of the vote declined in national elections held in May 1969, after which riots broke out in Kuala Lumpur and elsewhere, mainly between Malays and ethnic Chinese. Several hundred people were killed or injured. The government declared a state of emergency and suspended all parliamentary activities.

In the years that followed, Malaysia undertook several initiatives that became integral parts of its socioeconomic model. The New Economic Policy (NEP), launched in 1971, contained a series of affirmative action policies designed to benefit Malays and certain indigenous groups (together known as bumiputera or "sons of the soil"). The Constitution was amended to limit dissent against the specially-protected and sensitive portions of the Constitution pertaining to the social contract. The government identified intercommunal harmony as one of its official goals. The previous alliance of communally based parties was replaced with a broader coalition—the Barisan Nasional (BN) or National Front. The BN won large majorities in the 1974 federal and state elections.

Dr. Mahathir Mohamad was Prime Minister between 1981 and 2003, leading UMNO and BN to successive election victories. Mahathir emphasized economic development during his tenure, in particular the export sector, as well as large scale infrastructure projects. Mahathir attributed the success of the Asian tiger economies to the "Asian values" of its people, which he believed were superior to those of the West. Mahathir sharply criticized the International Monetary Fund (IMF), international financiers such as George Soros, and Western governments during the sharp economic and financial crisis that affected Asia in 1997-8, and denied that the downturn was due to the failures of corruption and "crony capitalism."

The end of Mahathir's tenure was marred by a falling out with his deputy and presumed successor, Anwar Ibrahim. In September 1998, Mahathir dismissed Anwar and accused him of immoral and corrupt conduct. Although Anwar was convicted on both charges in 1999 and 2000, the trials were viewed as seriously flawed. Malaysia's Federal Court eventually freed Anwar after overturning his immoral conduct conviction in September 2004.

Mahathir stepped down as prime minister in October 2003 after 22 years in power, and his successor, Deputy Prime Minister Abdullah Ahmad Badawi, was sworn into office. Abdullah called elections and won an overwhelming victory in March 2004. Since taking office, Abdullah, an Islamic scholar, has promoted the concept of "Islam Hadhari" or "civilizational Islam," emphasizing the importance of education, social harmony, and economic progress. His relationship with Mahathir eventually soured, and the former prime minister now expresses regret at supporting Abdullah to be his successor. Malaysia held national elections in March 2008. UMNO and its coalition allies, together known as the Barisan Nasional or National Front, won a simple majority of the seats in the national parliament but for only the second time in history failed to gain the two-thirds majority necessary to amend the constitution. A loose coalition of opposition parties, called the Pakatan Rakyat or Peoples Alliance, led by Anwar Ibrahim, won 82 of 222 seats in parliament and took control of the state-level assemblies in five of Malaysia's thirteen states.

ECONOMY

Since it became independent, Malaysia's economic record has been one of Asia's best. Real gross domestic product (GDP) grew by an average of 6.5% per year from 1957 to 2005. Performance peaked in the early 1980s through the mid-1990s, as the economy experienced sustained rapid growth averaging almost 8% annually. High levels of foreign and domestic investment played a significant role as the economy diversified and modernized. Once heavily dependent on primary products such as rubber and tin, Malaysia today is a middle-income country with a multi-sector economy based on services and manufacturing. Malaysia is one of the world's largest exporters of semiconductor devices, electrical goods, and information and communication technology (ICT) products.

The government has taken an active role in guiding the nation's economic development. Malaysia's New Economic Policy (NEP), first established in 1971, sought to eradicate poverty and to enhance the economic standing of ethnic Malays and other indigenous peoples (collectively known as "bumiputeras"). One NEP goal was to expand the share of corporate equity owned by ethnic Malays. In June 1991, after the NEP expired, the government unveiled its National Devel-

opment Policy, which contained many of the NEP's goals. In April 2001, the government released a new plan, the "National Vision Policy," to guide development over the period 2001-2010. The National Vision Policy targets education for budget increases and seeks to refocus the economy toward higher-technology production. The stated goal is for Malaysia to be a fully developed economy by 2020.

The Malaysian economy went into sharp recession in 1997-1998 during the Asian financial crisis, which affected countries throughout the region, including South Korea, Indonesia, and Thailand. Malaysia's GDP contracted by more than 7% in 1998. Malaysia narrowly avoided a return to recession in 2001 when its economy was negatively impacted by the bursting of the dot-com bubble (which hurt the ICT sector) and slow growth or recession in many of its important export markets.

In July 2005, the government removed the 7-year old peg linking the ringgit's value to the U.S. dollar at an exchange rate of RM 3.8/U.S.$1.0. The dollar peg was replaced by a managed float against an undisclosed basket of currencies. The new exchange rate policy was designed to keep the ringgit more broadly stable and to avoid uncertain currency swings which could harm exports.

FOREIGN RELATIONS

Regional cooperation is a cornerstone of Malaysia's foreign policy. It was a founding member of the Association of Southeast Asian Nations (ASEAN) and served as the group's chair most recently in 2005-2006. It hosted the ASEAN Summit and East Asia Summit in December 2005, as well as the ASEAN Ministerial and the ASEAN Regional Forum in July 2006.

Malaysia is an active member of the Asia Pacific Economic Cooperation (APEC) forum, the Organization of the Islamic Conference (OIC), the Non-Aligned Movement (NAM), and the United Nations. It was chair of the OIC until March 2008 and has also chaired the NAM. Malaysia is a frequent contributor to UN and other peacekeeping and stabilization missions, including recent deployments to Lebanon, Timor-Leste, Philippines, Indonesia, Pakistan, Sierra Leone, and Kosovo.

U.S.-MALAYSIAN RELATIONS

The United States and Malaysia share a diverse and expanding partnership. Economic ties are robust. The United States is Malaysia's largest trading partner and Malaysia is the sixteenth-largest trading partner of the U.S. Annual two-way trade amounts to $44 billion. The United States and Malaysia launched negotiations for a bilateral free trade agreement (FTA) in June 2006.

The United States is the largest foreign investor in Malaysia on a cumulative basis. American companies are particularly active in the energy, electronics, and manufacturing sectors. The U.S. direct investment position in Malaysia for 2006 was $12.45 billion.

The United States and Malaysia cooperate closely on security matters, including counter-terrorism, maritime domain awareness, and regional stability. The relationship between the U.S. and Malaysian militaries is also strong with numerous exchanges, training, joint exercises, and visits. The U.S. and Malaysia signed a Mutual Legal Assistance Treaty (MLAT) in July 2006 during the visit to Kuala Lumpur by Secretary of State Condoleezza Rice.

TRAVEL

Consular Information Sheet

November 24, 2008

Country Description: Malaysia is a constitutional monarchy with an elected federal parliamentary government. The country is comprised of 13 states, 11 on the Malay Peninsula and two, Sabah and Sarawak, on the island of Borneo. There is also a federal district, which contains the capital city of Kuala Lumpur, the administrative center of Putrajaya, and the island of Labuan (located off the southwest coast of Sabah). Malaysia is a multi-ethnic country of 27 million people. Malays form the predominant ethnic group. The two other large ethnic groups in Malaysia are Chinese and Indians. Islam is the national religion. Bahasa Malaysia is the official language, although English is widely spoken. Travelers to Malaysia may access information on areas of interest through the Malaysian government's website at http://www.kln.gov.my/ and Tourism Malaysia's website at http://www.tourismmalaysia.gov.my.

Entry Requirements: American citizens are required to have a passport valid for at least six months to enter Malaysia, but Americans do not need to obtain a visa in advance for a pleasure or business trip if their stay in Malaysia is 90 days or less. Immigration officials will then place an entry stamp in their passport. While in Malaysia, Americans should carry their passports with them at all times.

Travelers are required to carry their passports for travel from peninsular Malaysia to eastern Malaysia (on the island of Borneo) and between the provinces of Sabah and Sarawak, both of which are on Borneo. Social visit passes (visas) issued at immigration points such as KLIA airport, Johor Bahru, and Kota Kinabalu (Sabah) for entry into peninsular Malaysia are not valid for entry into the state of Sarawak and usually have three months' validity. New social visit passes must be obtained upon arrival at Kuching or Miri airports in Sarawak. In most cases, social visit passes issued by Sarawak immigration officials are valid for any part of Malaysia and usually have one month's validity.

The Malaysian Passport is not valid for travel to the State of Israel. However, travelers with Israeli entry or exit stamps in their American passports do not encounter difficulty at Malaysian Immigration.

For more information on the latest entry procedures and requirements, contact the Embassy of Malaysia, 3516 International Court NW, Washington, DC 20008, telephone: (202) 572-9700, email: malwashdc@kln.gov.by; the Malaysian consulates located in New York, telephone: (212) 490-2722, email: malnyc@yahoo.com; or Los Angeles, telephone: (213) 892-1238, e-mail: mwla@pacbell.net; or visit the Malaysian government's web site, which has information on Malaysian embassies and consulates abroad at www.kln.gov.my.

Visa Overstays: Malaysian immigration authorities routinely have detained foreigners who overstay their social visit passes (visas). In light of the arrests of several American citizens in connection with immigration sweeps conducted by Malaysian police and immigration authorities, American citizens should carry their passports (containing the Malaysian entry stamp) with them at all times. Depending upon the nature of the violation, detentions may last from a few hours to several weeks, pending a formal hearing. American citizens are urged to check their visa status periodically while in Malaysia and strictly follow immigration laws and regulations.

Safety and Security: The Department of State remains concerned about the possibility of terrorist attacks against U.S. citizens in Southeast Asia. Extremist groups in the region have demonstrated the capability to carry out attacks in locations where Westerners congregate, and these groups do not distinguish between civilian and official targets. The United States Government has designated two such groups, Jemaah Islamiyah (JI) and the Abu Sayyaf Group (ASG) as Foreign Terrorist Organizations. JI is linked to al-Qaeda and other regional terrorist groups, such as the ASG, and has cells operating throughout Southeast Asia.

There are indications that both criminal and terrorist groups continue to plan acts of violence against foreigners. The most recent incident involving American citizens occurred in 2000. The most recent incident involving other foreigners occurred in 2003. The ASG, based in the southern Philippines, has kidnapped foreigners in Malaysia. Criminal elements are also responsible for kidnapping and piracy committed against foreigners. These acts of violence have occurred in the eastern islands and coastal areas of the state of Sabah, closest to the maritime border with the Philippines.

For these reasons, the Department of State urges American citizens to evaluate carefully the risks of travel to the eastern islands and coastal areas of the state of Sabah. Americans who wish to visit these areas should exercise caution, remain alert to their surroundings, and use good personal security measures. Also, Americans who travel overland from Malaysia to Thailand should be aware of the Department of State's safety and security information for Thailand, and in particular for the several Thai provinces bordering Malaysia. Americans planning to travel to Malaysia are encouraged to register and update their contact information at http://www.travelregistration.state.gov.

For the latest security information, Americans traveling abroad should regularly monitor the Department's website where the current Travel Warnings and Travel Alerts, including the Worldwide Caution Travel Alert, can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S., or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: Violent crime involving tourists and expatriates in Malaysia is relatively uncommon. Petty theft, particularly purse snatching and pick-pocketing, and residential burglaries are the most common criminal activity directed against foreigners. Other types of non-violent criminal activity include credit card fraud and automobile theft. Malaysia's national emergency number is 999 (equivalent to the U.S. 911). An alternate number is the Royal Malaysia Police Operations Center in Kuala Lumpur, 2115-9999. In tourist areas such as Bukit Bintang, Petaling Street (Chinatown) and Bangsar, Kuala Lumpur, and the main square in Malacca, the police have established small "Tourist Police" stations.

Purse-Snatching: In most incidents, two men on a motorcycle speed up from behind a victim and the passenger on the back snatches a purse, handbag, or cellular phone. Thieves have also conducted snatch-thefts while leaning out of the passenger side of moving vehicles. These thefts occur at all hours and often in front of large groups of witnesses, even in upscale neighborhoods frequented by expatriates. Women walking by themselves or with small children are

the most common targets. Victims have been injured and even killed after falling and being dragged by thieves in cars or on motorcycles.

To avoid becoming the victim of a purse snatching, be alert and aware of your surroundings. Pedestrians should walk facing traffic and keep a close eye on all vehicular traffic, particularly motorcycles. If possible, try to walk on the sidewalk away from the curb. Avoid poorly lit streets, shortcuts, and narrow alleys. Purses or shoulder bags should be closed and tucked under the arm. Do not wrap the strap around your arm or shoulder. People have been injured or killed by being pulled to the ground by their purse straps as the thieves speed off. If your purse or bag is snatched, report the incident as soon as possible to the police.

Smash and Grab Robberies: The targets in these crimes, which are on the rise, are motorists who are stuck in traffic or stopped at a light. The usual scenario is that a pair of men on a motorcycle identifies a car with a lone passenger (male or female) and with valuables (purse, bag) visible. The men use a hammer or crowbar to smash the window of the car, grab the bag and speed off. When the motorist's windows are already open, the motorcyclists simply reach in and take bags off the seat of the car. These crimes can be prevented by keeping valuables out of sight.

Scams: An increasing number of Americans have been victims of scams originating in Malaysia. Confidence artists contact Americans through the internet, including dating web sites. These confidence artists almost always pose as American citizens who have unexpectedly experienced a medical, legal, financial or other type of "emergency" in Malaysia that requires the immediate financial assistance of the American citizen in the United States. Co-conspirators pose as Malaysian "lawyers" or medical professionals to verify the story and the supposed urgent need for cash. We strongly urge the American citizen in the United States to be very cautious about sending money to people who claim to be Americans in trouble in Malaysia. For additional information on these types of scams, see the Department of State's publication, International Financial Scams.

Credit Card Fraud: Travelers in Malaysia should avoid using credit cards, except at reputable establishments, and credit card numbers should be closely safeguarded at all times. Credit card fraud continues to be a serious problem in Malaysia, although enhanced technology has somewhat reduced reported instances of fraud. Unauthorized charges may not show on a credit card account for several months, but can unexpectedly appear in amounts of $5,000 or more. One of the more common methods is for retailers to swipe the credit card under the counter where account information is received into a machine containing a mobile phone SIM card and is transmitted to a criminal organization for reproduction. Travelers should watch retailers closely and any "under the table" transactions should be reported to the local police. In some cases sophisticated criminal organizations have tapped into data lines emanating from retail establishments. Credit card information is then stolen while it is being transmitted to financial institutions. If you must use a credit card in Malaysia, you are advised to check your account information frequently for fraudulent charges. ATM cards are safer as long as the machines where they are used are associated with reputable Malaysian banks.

In many countries around the world, counterfeit and pirated goods are widely available. Transactions involving such products may be illegal under local law. In addition, bringing them back to the United States may result in forfeitures and/or fines. More information on this serious problem is available at http://www.cybercrime.gov.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, to contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

The local equivalent to the "911" emergency line in Malaysia is "999."

Medical Facilities and Health Information: Medical facilities and services are adequate in the larger cities, where Western-trained doctors can be found. The U.S. Embassy can provide a list of English-speaking doctors and hospitals upon request. Psychological and psychiatric medical and counseling services are limited. Serious medical problems requiring hospitalization and/or medical evacuation to the United States can cost thousands of dollars or more. Doctors and hospitals often expect immediate cash payment for health services although major credit cards are acceptable.

Malaysian ambulance attendants lack training equivalent to U.S. standards. Callers to Malaysia's "999" emergency number (equivalent to the U.S. 911) are connected to the Red Crescent, and patients are directed to whichever hospital the dispatcher chooses. Americans staying in Malaysia for extended periods, especially those who have known health problems, are advised to investigate private ambulance services in their area and to provide family and close contacts with the direct telephone number(s) of the service they prefer.

Air quality in Malaysia is acceptable most of the time. However, when burning of vegetation occurs in Malaysia and nearby countries, especially from March through June and during September and October, air quality can range from "unhealthy for sensitive groups" to "unhealthy."

For information on avian influenza (bird flu), please refer to the Department of State's Avian Influenza Fact Sheet.

The U.S. Department of State is unaware of any HIV/AIDS entry restrictions for visitors to or foreign residents of Malaysia.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's web site at http://wwwn.cdc.gov/travel/default.aspx. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith/en.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policies remain in force overseas and whether they cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, American citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Malaysia is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

Traffic in Malaysia moves on the left side of the road, and most vehicles use right-hand drive. Seat belts are mandatory. Cell phones cannot be used while driving. Laws against drinking and driving are strictly enforced with stiff penalties. Motorcyclists attempt to circumvent traffic blockage by weaving in and out of traffic, temporarily using vacant oncoming traffic lanes, and running through red lights. This poses a hazard for both drivers and pedestrians unfamiliar with such traffic patterns. Drivers should use their turn signals well in advance of turning to alert motorcycles of their intent to turn. There has been a recent rise in the reported number of incidents involving late-night road rage. The majority of these violent incidents occur after midnight. Drivers are advised to avoid confrontational behavior if involved in an accident, especially with a motorcyclist. If threatened, drivers should leave the scene and file a report with the local police within 24 hours. Traffic is heavy during the morning and afternoon rush hours and slows down considerably when it rains; monsoon rains can quickly flood roads located in low lying areas. Bottlenecks are common in major cities. Development of the infrastructure has not kept pace with the proliferation of motorized vehicles. Multi-lane highways often merge into narrow two-lane roads in the center of town and cause added congestion. Many streets are narrow and winding. Taxis are metered, but some drivers charge a rate much higher than the metered rate during peak hours, when it is raining, or when the passenger's destination is to or through a heavily congested area.

Sobriety checkpoints: Police operate sobriety checkpoints in many entertainment districts frequented by expatriates. At these checkpoints, all drivers are required to submit to alcohol breath tests. A failure of the breath test results in an arrest. Laws against drinking and driving are strictly enforced with serious penalties.

Aviation Safety Oversight: The U.S. Federal Aviation Administration (FAA) has assessed the Government of Malaysia's Department of Civil Aviation as being in compliance with International Civil Aviation Organization (ICAO) aviation safety standards for oversight of Malaysia's air carrier operations. For more information, travelers may visit the FAA's internet website at http://www.faa.gov.

Currency: Currency exchange is readily available; international bank-to-bank transfers may take several days and require adequate identification. Credit cards are accepted throughout the country, but travelers should be aware of the risk of fraud by criminal syndicates. ATMs can be a safer means of obtaining Malaysian Ringgit. Western Union money transfers are available through various Malaysian banks. To find a Western Union location in Malaysia, complete with address, you may access it through Western Union's web-site.

Customs Regulations: Malaysia's customs authorities enforce strict regulations concerning temporary importation into or export from Malaysia of items such as firearms, narcotics, medication, business equipment, currency and books or other printed material, video, and audio recordings which might be considered obscene or in any way harmful to public interest and cultural property. It is advisable to contact the Malaysian Embassy in Washington, D.C., or one of Malaysia's consulates in the United States for specific information regarding customs' requirements.

Dual Nationality: Malaysia does not recognize or permit dual nationality. If Malaysian authorities learn that an American citizen is also a citizen of Malaysia, they may require that the dual national either renounce United States citizenship immediately or forfeit Malaysian citizenship. Dual American/Malaysian citizens should consider this issue seriously before traveling to Malaysia.

Criminal Penalties: While in a foreign country, U.S. citizens are subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and do not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating the law, even unknowingly, may be fined, expelled, arrested or imprisoned. Penalties for possession, use, or traf-

ficking in illegal drugs in Malaysia are severe, and convicted offenders can expect long jail sentences and heavy fines. Malaysia strictly enforces its drug laws. Malaysian legislation provides for a mandatory death penalty for convicted drug traffickers. Individuals arrested in possession of 15 grams (1/2 ounce) of heroin or 200 grams (seven ounces) of marijuana are presumed by law to be trafficking in drugs.

The Malaysian criminal code includes a provision for a sentence of caning for certain white-collar crimes, including criminal misappropriation, criminal breach of trust and cheating. Unauthorized collection and/or removal of local flora and fauna may be prosecuted as a crime and can result in heavy fines, expulsion, and/or imprisonment. Distribution of religious leaflets or books of another faith to Malaysian Muslims is illegal and may result in arrest and imprisonment.

Although access to prisoners is permitted, the U.S. Embassy may not learn of the arrest of U.S. citizens in smaller, more remote areas until several days after the incident. Prison conditions are harsh. American citizens are encouraged to carry a copy of their U.S. passports and of their current social visit pass (visa) with them at all times, so that, if questioned by local officials, proof of identity, U.S. citizenship and legal status in Malaysia is readily available.

Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: American citizens living in or visiting Malaysia are encouraged to register their stay in Malaysia on line through the State Department's Travel Registration website or in person by visiting the U.S. Embassy's American Citizen Services (ACS) section. The U.S. Embassy is located at 376 Jalan Tun Razak 50400, Kuala Lumpur. The local mailing address is P.O. Box No. 10035, 50700 Kuala Lumpur.

The U.S. Embassy's telephone (60-3) 2168-5000 is available 24 hours a day for emergencies such as arrests, serious illness/injury, or death of Americans, (after business hours, please press 1 at the recording). The ACS Unit's telephone number is (60-3) 2168-4997/4979, and the Consular section's fax number is (60-3) 2148-5801. The U.S. Embassy's general fax number is (60-3) 2142-2207 and Web site is http://malaysia.usembassy.gov. The Consular section's e-mail is klconsular@state.gov.

Intercountry Adoption

February 2008

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is based on public sources and current understanding. Questions involving foreign and U.S. immigration laws and legal interpretation should be addressed respectively to qualified foreign or U.S. legal counsel.

Please Note: Adoptions are not common in Malaysia. Adoptions of non-relatives are generally difficult and time-consuming procedures. Prospective parents may be required to remain in Malaysia for two or more years during the process. Prospective adoptive parent(s) who are non-Muslims may NOT adopt Muslim children. Prospective American guardians may also want to review our Shari'a Adoption Flyer on Guardianship in Muslim Countries.

Availability of Children for Adoption: Over the past ten years, five Malaysian children have received U.S. immigrant visas based on their adoption by U.S. parents.

Adoption Authority: The government office responsible for adoptions in Malaysia is the Family and Children's Division, Social Welfare Department, Ministry of National Unity and Social Development. You can reach them at:

14 th Floor Wisma Shen
50100 Kuala Lumpur, Malaysia.
Telephone: (6) (03) 269-25011
E-mail: pprljkm@kempadu.gov.my

Non-Muslim Adoptions: The adoption of a non-Muslim child is governed by the Adoption Act of 1952 (Act 257). The identification of a prospective child may occur privately through friends or relatives in Malaysia or through the Malaysian Social Welfare Department. Once the child has been identified, the prospective adoptive parent(s) must obtain a statutory declaration (notarized affidavit) from the biological parent(s) relinquishing all parental rights towards the child. The prospective adoptive parent notifies the Social Welfare Department of the Malaysian State in which he/she is resident of his/her intention to apply for an adoption order of the child. If the Social Welfare Department identified the child, an "offer" letter will be issued to the adoptive parents. This notification must be in writing. No matter how the child was identified, the adoptive parent(s) must reside with and care for the child not less than three (3) consecutive months before petitioning the Sessions Court or the High Court for the adoption order.

When an application for an adoption order is made, the Court appoints a guardian ad litem for the child. In most cases, the court will appoint a Social Welfare office employee. To safeguard the interests of the child before the Court, the guardian ad litem investigates the background and circumstances of the child and the adoptive parent(s), including all matters relevant to the proposed

adoption. The completed guardian ad litem report is submitted to the Court on the day of the hearing. The Court may issue an adoption order or an interim order awarding custody of the child to the adoptive parent(s) for a probationary period of not less than six months and not exceeding two years, subject to provisions for the maintenance, education and supervision of the welfare of the child.

The Registrar of the Court sends a certified copy of the adoption decree to the Registrar-General at the National Registration Department and to the adoptive parent(s) within seven days. The Registrar-General enters the adoption order in the Adopted Children Register. The Register entry serves as the child's official record instead of the original birth certificate. The adoptive parent may apply for a copy through the Registrar-General.

Muslim Adoptions: Only prospective adoptive parents who are Muslims may adopt Muslim children. The Registration of Adoptions Act of 1952 and relevant Shariah laws govern the adoption of a Muslim child in Malaysia. A prospective child may be identified privately or through the Social Welfare Department. A court petition is not required. The Muslim prospective adoptive parent applies to the National Registration Department to document the child as his/her adopted child. To qualify, the adoptive parent must have resided with and had continuous custody of the child for a period of not less than two years. The application should include evidence relating to the care, maintenance, and education of the child during the two years from the date of the biological parents statutory declaration (notarized affidavit) relinquishing all parental rights of the child.

If the National Registration Department is satisfied with the evidence submitted, an entry will be made in the Register and a certified copy of the entry delivered to the adoptive parents. If the Registration Department is not satisfied with the evidence, an officer from the Social Welfare Department will conduct an investigation on the well being of the child. Children adopted under the Registration of Adoptions Act cannot assume the name or inherit property of the adoptive parents.

Age and Civil Status Requirements: The adoptive parent must be an "ordinary resident" in Malaysia, who has been is working and living in Malaysia for at least two years prior to the application. One of the prospective parents in non-Muslim adoptions must be at least 25 years old and at least 21 years older. If the prospective adoptive parent is a relative of the child, he/she must be at least 21 years of age.

One of the prospective parents in Muslim adoptions must have attained the age of 25 and be at least 18 years older than the child. If the prospective adoptive parent is a brother, sister, uncle or aunt of the child, he/she must be at least have attained the age of 21.

Adoption Agencies and Attorneys: There are no agencies in Malaysia. All adoption inquiries should be directed to the Social Welfare Department, Ministry of National Unity and Social Development.

Doctors: The U.S. Embassy in Kuala Lumpur maintains current lists of doctors and sources for medical examinations that may be required.

Documentary Requirements: The prospective adoptive parent must present the following documents to the Malaysian Social Welfare Department under the Ministry of National Unity and Social Development:

- His/her valid passport
- The original birth certificate of the adoptive child
- Notarized letters of consent from the biological parents

U.S. Immigration Requirements: A Malaysian child, even if adopted by an American citizen, must obtain an immigrant visa before he or she can enter the U.S. as a lawful permanent resident. Prospective adopting parents are strongly encouraged to consult USCIS publication M-249, *The Immigration of Adopted and Prospective Adoptive Children*, as well as the Department of State publication, *Intercountry Adoptions*. Please see the *Intercountry Adoption* section of this book for more details and review current reports online at http://adoption.state.gov.

Malaysian Embassy in the United States

2401 Massachusetts Avenue, NW
Washington, D.C. 20008
Tel: 328-2700
E-mail: mwwashdc@erols.com
Malaysia also has Consulates in New York City and Los Angeles.

U.S. Embassy

376 Jalan Tun Razak
50400 Kuala Lumpur
Tel: (6)(03) 2168-5000
Fax: (6)(03) 248-5801
E-mail: klconsular@state.gov

Questions: Specific questions regarding adoption in Malaysia may be addressed to the Consular Section of the U.S. Embassy in Kuala Lumpur. You may also contact the Office of Children's Issues, SA-29, 2201 C Street, NW, U.S. Department of State, Washington, DC 20520-2818, telephone 1-888-407-4747 with specific questions.

Intercountry Adoption

Important Notice Regarding Adoptions from Sarawak
July 30, 2002

U.S. citizens contemplating adoption in Sarawak are advised to exercise extreme caution and should expect delays with no guarantee of approval for a U.S. immigrant visa for the adopted child. Sarawak's adoption law is separate and distinct from that of the rest of Malaysia and may not meet the requirements of U.S. immigration law. Moreover, local adoption facilitators" knowledge of and compliance with U.S. immigration law is unknown at this time.

International Parental Child Abduction

November 2008

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *International Child Abduction* section of this book and review current reports online at www.travel.state.gov/childabduction.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is provided for general information only. Questions involving interpretation of specific foreign laws should be addressed to foreign legal counsel.

General Information: Malaysia is not a party to the Hague Convention on the Civil Aspects of International Child Abduction, nor are there any international or bilateral treaties in force between Malaysia and the United States dealing with international parental child abduction. Therefore, there is no treaty remedy by which the left behind parent would be able to pursue recovery of the children should they be abducted to or wrongfully retained in Malaysia. Once in Malaysia, the child or children would be completely subject to Malaysian law for all matters including custody.

The United States is not a party to any treaty or convention on the enforcement of court orders. A custody decree issued by a court in the U.S. has no binding legal force abroad, although it may have a persuasive force in some countries. Furthermore, a U.S. custody decree may be considered by foreign courts and authorities as evidence and, in some cases, foreign courts may voluntarily recognize and enforce it on the basis of comity (the voluntary recognition by courts of one jurisdiction of the laws and judicial decisions of another).

Custody Disputes: Parental child abduction is not a crime under Malaysian law. Custody disputes are considered civil legal matters that must be resolved between the concerned parties or through the courts in Malaysia. Although there is no treaty in force between the United States and Malaysia on enforcement of judgments, the Malaysian courts will also take into consideration child custody decrees issued by foreign courts in deciding disputes regarding children residing in Malaysia. The Malaysian legal system is based on English common law.

The Federal courts have original jurisdiction in constitutional matters and in disputes between states and reviews decisions referred from the Court of Appeals. In addition to high courts, the Peninsular Malaysian states and the East Malaysian States of Sabah and Sarawak have magistrate courts, session courts, and juvenile courts. These courts would have jurisdiction on civil law cases, including child custody disputes among Malays or other Muslims/indigenous peoples. By Constitutional definition, all Malays are Muslim, and the "paramount ruler," customarily referred to as the "King" is also the leader of the Islamic faith in Malaysia. Malaysia's official religion is Islam and Islamic (Sharia) law applies in family and religious matter for all Muslims. Although civil law cases are adjudicated under Islamic and traditional law, certain cases involving Muslims only are heard in Sharia courts and Sharia law applies in family and religious matters. Questions on specific Islamic laws as they pertain to custody rights should be addressed to a lawyer licensed to practice in Malaysia.

In order to bring a custody issue before the local court, the left-behind parent will require the assistance of an attorney licensed to practice in Malaysia. Ideally, these orders and proceedings ensure due process under the local laws as well as providing protection for the child or children. A parent holding a custody decree issued in U.S. courts must retain local Malaysian counsel to apply to the Malaysian courts for recognition and enforcement of the U.S. decree, or to petition for custody of minors.

Although visitation rights for non-custodial parents are not expressly stipulated in Malaysian Civil Code, court judgments often provide visitation rights for non-custodial parents. Since compliance with the local court rulings is essentially voluntary, Malaysian police or local law enforcement are reluctant to get involved in custody disputes and could not be counted on to enforce custody decrees issued by the Malaysian courts. For more information, please read the *International Parental Child Abduction* section of this book and review current reports online at www.travel.state.gov/childabduction.

Deportation: While there is an extradition treaty between the United States and Malaysia, parental child abduction is not an extraditable offense.

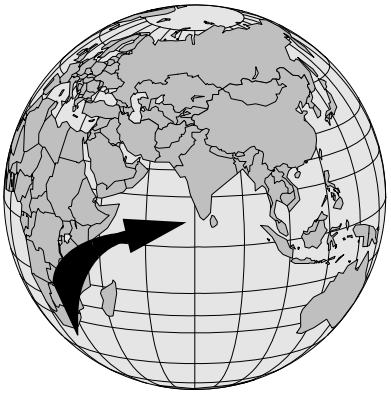
However, if the taking parent is a U.S. citizen whose U.S. passport has been revoked due to an outstanding federal Unlawful Flight to avoid Prosecution (UFAP) warrant or indictment on charges of International Parental Kidnapping (IPKCA) in violation of 18 USC Section 1204, Malaysian authorities may consider deportation based on lack of a valid travel document.

Dual Nationality: A child with a parent who was born outside of the U.S. or who has acquired a second nationality through naturalization in another country may have a claim to citizenship in that country. There is no requirement that a U.S. citizen parent consent to the acquisition by his/her child of another nationality and in many cases a parent is unaware that his/her child may have dual citizenship. The Embassy of Malaysia in Washington D.C. will be able to provide more detailed information on whether your child has a claim.

Initiating Foreign Enforcement Proceedings Under Local Law: If a country is not a signatory to the Hague Convention on the Civil Aspects of International Child Abduction, it may be necessary for you to initiate a child custody action in the courts in the foreign country.

For additional information, see judicial assistance for Malaysia on the Internet at http://caweb/cainternet/malaysia_legal.html.

Retaining a Foreign Attorney: A list of English speaking attorneys is available from the U.S. State Department Office of American Citizens Services.



Legal Aid: Some countries provide legal aid services in child custody cases. The legal attache or consular section of the foreign embassy in Washington, D.C. may have specific guidance.

The ISS headquarters are in Geneva, Switzerland, but information or assistance may be available through its New York branch at 10 W. 40th Street, New York, N.Y. 10018, Tel. No.: 212-532-6350. The National Center for Missing and Exploited Children (NCMEC) maintains a list of attorneys interested in Hague Convention and International Child Custody cases.

NCMEC handles all Hague Convention applications for return when children from other countries are abducted and believed to be in the U.S. You may obtain additional information about the attorney program at the National Center by calling 1-800-843-5678 or 703-274-3900. The Internet home page for the National Center can be reached directly at http://www.missingkids.org.

Criminal Remedies: Foreign countries may not recognize parental abduction as a crime. Please note that the extradition process applies only to the abducting adult/fugitive and not the child. The proper channel for the return of the child is through civil mechanisms or voluntary return arrangements. Additional information is also available on the Internet at the web site of the U.S. Department of Justice, Office of Juvenile Justice and Delinquency Prevention (OJJDP) at http://www.ojjdp.ncjrs.org.

For further information on international parental child abduction, contact the Office of Children's Issues, U.S. Department of State at 1-888-407-4747 or visit its web site on the Internet at http://travel.state.gov. You may also direct inquiries to: Office of Children's Issues, U.S. Department of State, Washington, DC 20520-4811; Phone: (202) 736-9090; Fax: (202) 312-9743.

MALDIVES

Compiled from the December 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Republic of Maldives

PROFILE

Geography

Area: 298 sq. km. (115 sq. mi.), over 1,100 islands; twice the size of Washington, DC.
Cities: Capital—Male' (pop. 100,000).
Terrain: Flat islands.
Climate: Hot and humid.

People

Nationality: Noun and adjective—Maldivian(s).
Population: 300,000 (plus 67,000 expatriate workers who are not counted in the census).
Population growth rate: 1.66%. Population growth rate has dropped dramatically in recent years.
Ethnic groups: South Indians, Sinhalese, Arabs.
Religions: Sunni Islam.
Languages: Dhivehi (official); many government officials speak English.
Education: Years compulsory—7. Enrollment—primary (grades 1-7) 97%; secondary (grades 8-10) 67%. Literacy—98%.
Health: Infant mortality rate—33/1,000. Life expectancy—68 years.
Resident work force: Community, social and personal services—21%; manufacturing—13%; fishing—11%; tourism—11%; transport, storage, and communication—9%; other—35%.

Government

Type: Republic.
Independence: July 26, 1965 (formerly a British protectorate).
Constitution: August 7, 2008.
Government branches: Executive—president, cabinet. Legislative—unicameral Majlis (parliament). Judicial—High Court, Civil Court, Criminal Court, Family and Juvenile Court, and 204 general courts.
Political subdivisions: 19 atolls and capital city.
Political parties: Adhaalath Party, Dhivehi Raiyyethunge Party, Islamic Democratic Party, Maldivian Democratic Party, Social Liberal Party, Maldives National Congress, Maldives Social Democratic Party, Republican Party, others in formation.
Suffrage: Universal at age 18.

Economy

GDP: (2007 est.) $1.1 billion.
GDP growth rate: (2007) 6.6%.
Per capita GDP: (2007 est.) $3,460.
Inflation: year over year (2007) 10.34%.
Percentages of GDP: (2007) Tourism—28%; transport and communications—20%; government—16%; manufacturing—7%; real estate—6%; fishing—5%; construction—6%; agriculture—2.5%; other—9%.
Trade: (2007) Exports—$232 million: fish products. Major markets—U.S., Thailand, EU, Sri Lanka, Japan (source: Maldives Customs Service). Imports—$936 million: oil, construction material, prepared foodstuffs, vegetables, animal products, electrical appliances, wood products, computers, transport equipment. Major suppliers—Singapore, U.A.E., India, EU, Sri Lanka, Malaysia.

PEOPLE, HISTORY, AND CULTURE

Maldives comprises 1,191 islands in the Indian Ocean. The earliest settlers were probably from southern India. Indo-European speakers followed them from Sri Lanka in the fourth and fifth centuries BC. In the 12th century AD, sailors from East Africa and Arab countries came to the islands. Today, the Maldivian ethnic identity is a blend of these cultures, reinforced by religion and language.

Originally Buddhists, Maldivians were converted to Sunni Islam in the mid-12th century. Islam is the official religion of the entire population. Strict adherence to Islamic precepts and close community relationships have historically helped keep crime low and under control. However, a growing heroin addiction problem and the emergence of youth gangs, especially in Male, have increased the crime rate and the incidence of street violence.

The official and common language is Dhivehi, an Indo-European language related to Sinhala, a language of Sri Lanka. The writing system is from right to left. English is used widely in commerce and increasingly as the medium of instruction in government schools.

Some social stratification exists on the islands. It is not rigid, since rank is based on varied factors, including occupation, wealth, perceived Islamic virtue, and family ties. Members of the social elite are concentrated in Male'.

The early history of the Maldives is obscure. According to Maldivian legend, a Sinhalese prince named KoiMale was stranded with his bride—daughter of the king of Sri Lanka—in a Maldivian lagoon and stayed on to rule as the first sultan.

Over the centuries, the islands have been visited and their development influenced by sailors from countries on the Arabian Sea and the Indian Ocean littorals. Mopla pirates from the Malabar Coast—present-day Kerala state in India—harassed the islands. In the 16th century, the Portuguese subjugated and ruled the islands for 15 years (1558-73) before being driven away by the warrior-patriot Muhammad Thakurufar Al-Azam.

Although governed as an independent Islamic sultanate for most of its history from 1153 to 1968, the Maldives was a British protectorate from 1887 until July 25, 1965. In 1953, there was a brief, abortive attempt at a republican form of government, after which the sultanate was re-imposed. Following independence from Britain in 1965, the sultanate continued to operate for another 3 years. On November 11, 1968, it was abolished and replaced by a republic, and the country assumed its present name.

Environmental Concerns

There is growing concern about coral reef and marine life damage because of coral mining (used for building and jewelry making), sand dredging, and solid waste pollution. Mining of sand and coral have removed the natural coral reef that protected several important islands, making them highly susceptible to the erosive effects of the sea.

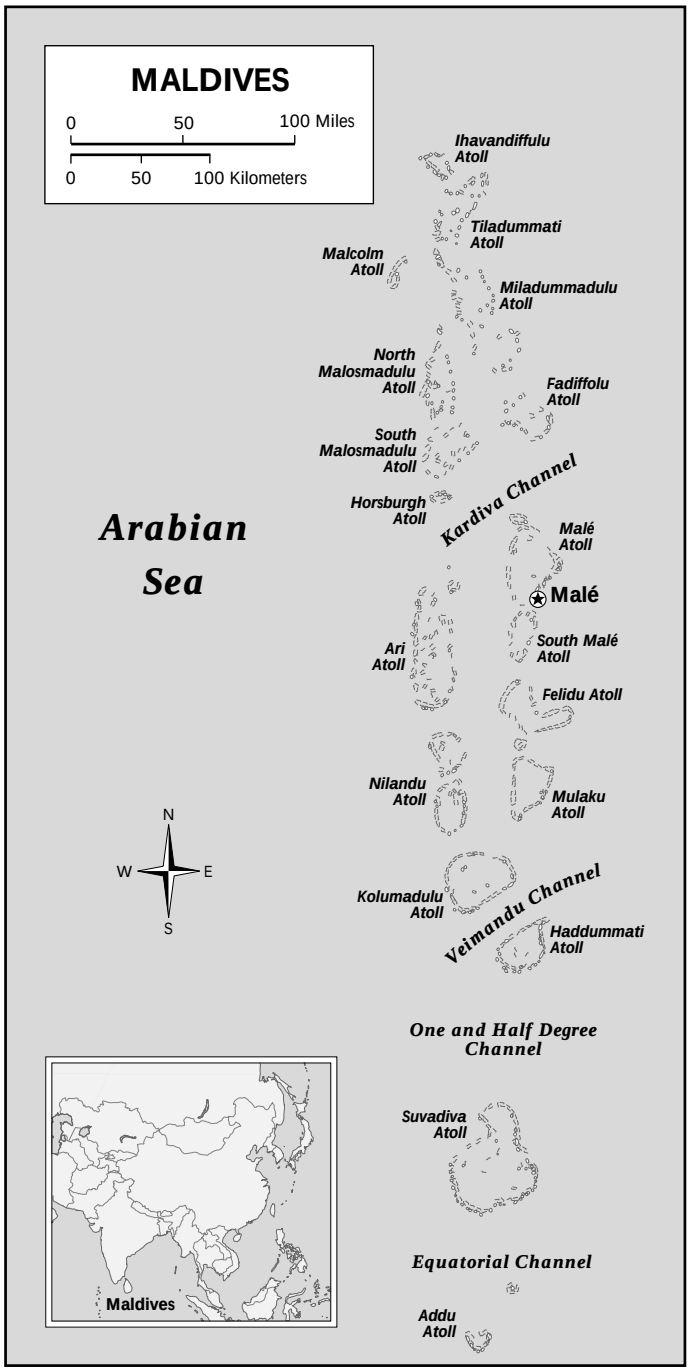
The practices have recently been banned. In April 1987, high tides swept over the Maldives, inundating much of Male' and nearby islands. That event prompted high-level Maldivian interest in global climatic changes, as its highest point is about 8 feet above sea level.

Investment in Education

The government expenditure for education was 8% of GDP in 2006. Literacy in Maldives is high at 98%. Maldives has made great strides in primary and lower secondary education, with 100% enrollment in the primary level (grade 1 to 7) since 2002. Secondary school enrollment has also improved significantly, with about 80% progressing to secondary level. Lower secondary schools (grades 8 through 10) are located on 138 islands. The government intends to make 10 years of education available to all before 2010. Only a small proportion of children leave school with a qualification, and "Ordinary level" pass rates (at the completion of grade 10) are low for those who opt to take the examination. Access to higher secondary schools (grades 11 and 12) is limited as schools are located only on 14 islands (as of mid-2007). Access to tertiary education is more limited. Whereas for primary and lower secondary schools there is no gender bias, for upper secondary and tertiary education there is a bias in favor of boys.

The World Bank provided about $19 million for education development from 2000-2007. It plans to commit a further $5 million for education development in 2009. The World Bank has identified teacher training as a critical need as the country still relies heavily on expatriate teachers, as well as upgrading the curriculum and materials. Over 2000-2006, the Asian Development Bank (ADB) committed $7 million to support post-secondary education development in Maldives. ADB has committed $6.5 million for employment skills training over 2004-2009.

GOVERNMENT



A 1968 referendum approved the constitution, making Maldives a republic with executive, legislative, and judicial branches of government. The constitution was amended in 1970, 1972, 1975, and again in 2008.

Ibrahim Nasir, Prime Minister under the pre-1968 sultanate, became President and held office from 1968 to 1978. He was succeeded by Maumoon Abdul Gayoom, who was elected President in 1978 and reelected in 1983, 1988, 1993, 1998, and again in October 2003.

After 30 years of rule, in October 2008 Gayoom was defeated by Maldivian Democratic Party candidate Mohamed Nasheed in the first multiparty presidential elections held in 30 years. President Nasheed was inaugurated on November 11, 2008 as head of the executive branch. Nasheed reduced the number of government ministries from 21 to 14, appointed a 14-member cabinet, and replaced the eight Majlis members appointed by his predecessor.

The current unicameral Majlis, elected in 2005, is composed of 50 members serving 5-year terms. Two members from each atoll and Male' are elected directly by universal suffrage. Eight are appointed by the president. According to the 2008 constitution, the next Majlis will be convened after elections due by February 2009. It will be larger, will have no appointed members, and will be elected under a system that will more closely reflect the population differences between the atolls.

The Maldivian legal system—a mixture of traditional Islamic and common-law principles—is administered by secular officials, a chief justice, and lesser judges on each of the 19 atolls, who are currently appointed by the president. In the future, judi-

cial appointments are to be overseen by the independent Judicial Services Commission. A new Supreme Court appointed by the previous President, Gayoom, took office in September 2008. There is also an attorney general. Each inhabited island within an atoll has a chief who is responsible for law and order. Every atoll chief, appointed by the president, functions as a district officer in the British South Asian tradition.

POLITICAL CONDITIONS

On November 8, 1988, Sri Lankan Tamil mercenaries tried to overthrow the Maldivian Government. At President Gayoom's request, the Indian military suppressed the coup attempt within 24 hours. In September 2003, following the death of an inmate, a brief prison riot broke out on an island near the capital Male'. Three other inmates were killed during the incident. In response to the killings of the inmates, brief rioting took place on the streets of Male'.

Under Gayoom, the government often prevented opposition rallies from taking place. President Gayoom's commitment to introduce political reforms in June 2004 was widely welcomed. A human rights commission was established, and a special Majlis, or parliament, was convened to consider changes in the constitution, including the legalization of political parties. In August 2004, however, a demonstration in the capital turned violent and the government declared an emergency and arrested a large number said to be connected to the protest. Some of those arrested were prominent in the reform movement, including several members of the special Majlis. Most were released a few months later.

The Maldives were badly hit by the Asian tsunami of December 26, 2004, which killed 82 and caused substantial damage to Maldives tourism, housing, and fishing infrastructure. The U.S. provided $1.6 million in immediate relief assistance. Despite the disaster, the Government of the Maldives held parliamentary elections, originally scheduled for December 31, on January 22, 2005. Reform candidates performed strongly. Following the poll, President Gayoom announced plans to establish multiparty democracy within a year.

In June 2005, the members of the People's Majlis unanimously voted to legally recognize political parties. In order of registration the first parties were the opposition Maldivian Democratic Party, the government's Dhivehi Raiyyethunge Party, the Adhaalath (Justice) Party, and the Islamic Democratic Party. More recently, a number of other parties formed, including the Social Liberal Party, the Maldivian National Congress, the Maldives Social Democratic Party, and the Republican Party. Some of these appear to have minimal public backing. Another political formation is the New

Maldives group, but it has not registered as a party. Throughout 2006, the opposition faced restrictions on freedom of assembly, and the government continued to arrest opposition activists. In March 2006, the government introduced a "Roadmap for Reform" and subsequently introduced several bills in parliament. In August 2007, voters decided via referendum that the Maldives' new constitution should provide for a presidential system of government (vice parliamentary). The special Majlis completed its work and the new constitution took effect in August 2008.

In accordance with the new constitution ratified by President Gayoom on August 7, 2008, the first round of presidential elections was held on October 10, 2008. As no candidate received 50% of the vote, a second round was held on October 29 between President Gayoom and Mohamed Nasheed. Nasheed won with 54% of the vote. Members of parliament declared their political affiliations long before the October 2008 multiparty elections. Five opposition leaders were allowed to contest the presidential elections, and the principal opposition candidate was elected. President Nasheed is among the founders of the Maldivian Democratic Party.

President Nasheed, a former Amnesty International "prisoner of conscience," has promised to further strengthen democracy and increase media freedom. During his campaign, Nasheed pledged that if elected, he would hold early presidential elections in the middle of his term. The government keeps a tight rein on expressions of Islamic extremism. It is investigating links between religious extremists and a September 2007 bombing in a Male' park that injured several tourists.

Principal Government Officials

Last Updated: 11/12/08

Pres.: **Maumoon Abdul GAYOOM**
Min. of Atolls Development: **Thasmeen ALI**
Min. of Construction & Public Infrastructure: **Mohamed Mauroof JAMEEL**
Min. of Defense & National Security: **Ismail SHAFEEU**

Min. of Tourism & Civil Aviation: **Abdullah MAUSOOM**
Min. of Transportation & Communication: **Mohamed SAEED**
Min. of Youth & Sports:
Attorney Gen.:
Governor, Maldives Monetary Authority: **Mohamed JALEEL**
Ambassador to the US: **Mohamed Hussain MANIKU**
Permanent Representative to the UN, New York: **Ahmed KHALEEL**

ECONOMY

The Maldivian economy is based on tourism and fishing. Of the Maldives' 1,191 islands, only 200 are inhabited. The population is scattered throughout the country, with the greatest concentration on the capital island, Male'. Limitations on potable water and arable land constrain expansion.

Development has been centered upon the tourism industry and its complementary service sectors, transport, distribution, real estate, construction, and government. Taxes on the tourist industry have been plowed into infrastructure and used to improve technology in the agricultural sector.

GDP in 2007 totaled $1.1 billion, or about $3,460 per capita. The Maldivian economy has made a remarkable recovery from the tsunami, which inflicted damages of about $375 million, excluding $100 million in damages to resorts, the bulk of which was covered by private insurance. A rebound in tourism, post-tsunami reconstruction, and new resort construction helped increase GDP by about 19% in 2006 and 6.6% in 2007 from a contraction of 4.5% in 2005. Inflation accelerated to about 10% in 2007 and to about 15% by May 2008. Due to rising imports and higher oil prices, the trade deficit ballooned to $700 million in 2007. However, due to a tourism boom and increase government borrowing, the balance of payments recorded a surplus of about $45 million in 2006 and 2007. Fiscal control has deteriorated due to tsunami reconstruction and in particular due to an increase in non-tsunami-related government expenditure. Government expenditure expanded to over 60% of GDP in 2005-2007, compared to 36% of GDP in 2004 before the tsunami. Government expenditure is projected to expand further to 73% of GDP in 2008. Consequently the budget deficit is projected at 10% of GDP in 2008. In July 2008 the government acknowledged that its economy is in a recession. While tsunami reconstruction is ongoing, the recovery process remains underfunded.

The Maldives had a merchandise trade deficit of under $300 million until 2003. Since then the trade deficit reached an unprecedented $700 million, largely the result of increased oil prices and increased imports of food and construction material.

International shipping to and from the Maldives is mainly operated by the private sector with only a small fraction of the tonnage carried on vessels operated by the national carrier, Maldives Shipping Management Ltd. Over the years, the Maldives has received economic assistance from multilateral development organizations, including the UN Development Program (UNDP), Asian Development Bank, and the World Bank.

Individual donors—including Japan, India, Australia, and European and Arab countries (including Islamic Development Bank and the Kuwaiti Fund)—also have contributed.

A 1956 bilateral agreement gave the United Kingdom the use of Gan—in Addu Atoll in the far south—for 20 years as an air facility in return for British aid. The agreement ended in 1976, shortly after the British closed the Gan air station.

Economic Sectors

Tourism. In recent years, Maldives has successfully marketed its natural assets for tourism—beautiful, unpolluted beaches on small coral islands, diving in blue waters abundant with tropical fish, and glorious sunsets. Tourism now brings in about $450 million a year. Tourism and related services contributed 28% of GDP in 2007.

Since the first resort was established in 1972, more than 90 islands have been developed, with a total capacity of some 17,500 beds. Maldives has embarked on a rapid tourism expansion plan. The government has awarded tenders for the development of about 40 new resorts. Over 650,000 tourists (mainly from Europe) visited Maldives in 2007. The average occupancy rate is over 80%, and reaches over 95% in the peak winter tourist season. Average tourist stay is 8 days.

Fishing. This sector employs about 11% of the labor force. The fisheries industry, including fish processing, traditionally contributes about 7% of GDP. Due to a drastic drop in the fish catch, the industry's contribution to GDP was only about 5% in 2007. Fish export earnings were estimated at $100 million in 2007. The use of nets is illegal; all fishing is done by line. Production was about 65,000 metric tons in 2007, most of which was skipjack tuna. More than 60% is exported, largely to Sri Lanka, Japan, Hong Kong, Thailand, and the European Union. Fresh, chilled, frozen, dried, salted, and canned tuna exports account for about 90% of all marine product exports.

Agriculture. Poor soil and scarce arable land have historically limited agriculture to a few subsistence crops, such as coconut, banana, breadfruit, papayas, mangoes, taro, betel, chilies, sweet potatoes, and onions. Almost all food, including staples, has to be imported. The December 2004 tsunami inundated several agricultural islands, which could take a significant amount of time to recover. Agriculture provides about 2.5% of GDP.

Manufacturing. The manufacturing sector provides less than 7% of GDP. Traditional industry consists of boat building and handicrafts, while modern industry is limited to a few tuna canneries, a bottling plant, and a few enterprises in the capital producing PVC pipe, soap, furniture, and food products. Five garment factories that had exported principally to the United States closed in 2005, following the expiration of the Multi-Fiber Arrangement (MFA) that had set quotas on developing country garment exports to developed countries. The loss of these factories has not proven an insurmountable hurdle, however, as most of the profits were repatriated and most of the labor was expatriate.

Other. The construction sector contributes approximately 6% of GDP due to tsunami reconstruction and new resort construction.

FOREIGN RELATIONS

Maldives follows a nonaligned policy and is committed to maintaining friendly relations with all countries. According to the Foreign Ministry, the country has a UN Mission in New York, embassies in the United States (Washington, DC), Sri Lanka, China, the United Kingdom, Bangladesh, India, Japan, Singapore, and Malaysia, as well as diplomatic missions in Geneva and Brussels. India, Pakistan, Bangladesh, and Sri Lanka maintain resident embassies in Male'. Denmark, Norway, the U.K., Germany, Turkey, and Sweden have consular agencies in Male' under the supervision of their embassies in Sri Lanka and India. The UNDP has a representative resident in Male', as do the UN Children's Fund (UNICEF) and the World Health Organization (WHO). Like the United States, many countries have nonresident ambassadors accredited to the Maldives, most of them based in Sri Lanka or India. The Maldives is a member of the Organization of the Islamic Conference (OIC) and the Non-Aligned Movement (NAM). In 2009, Maldives will host the 16th annual South Asian Association for Regional Cooperation (SAARC) summit.

U.S. MALDIVIAN RELATIONS

The United States has friendly relations with the Republic of Maldives. The U.S. Ambassador and some Embassy staff in Sri Lanka are accredited to the Maldives and make periodic visits. The United States supports Maldivian independence and territorial integrity and publicly endorsed India's timely intervention on behalf of the Maldivian Government during the November 1988 coup attempt. U.S. Naval vessels have regularly called at Male' in recent years. The Maldives extended strong support to U.S. efforts to combat terrorism and terrorist financing in 2001-2002.

U.S. contributions to economic development in the Maldives have been made principally through international organization programs. Following the December 2004 tsunami, the U.S. and Maldives signed a bilateral assistance agreement for $8.6 million in reconstruction assistance. This assistance will help in the rebuilding of harbors, sewerage systems, and electrical generation facilities and in the development of aid absorption capacity in the Ministry of Finance.

The United States has directly funded training in airport management and narcotics interdiction and provided desktop computers for Maldivian customs, immigration, and drug-control efforts in recent years.

The United States also trains a small number of Maldivian military personnel annually. About 10 U.S. citizens are resident in the Maldives; some 5,000 Americans visit the Maldives annually.

The Maldives welcomes foreign investment, although the ambiguity of codified law acts as somewhat of a damper. Areas of opportunity for U.S. businesses include tourism, construction, and simple export-oriented manufacturing, such as garments and electrical appliance assembly. There is a shortage of local skilled labor, and most industrial labor has to be imported from Sri Lanka or elsewhere.

TRAVEL

Consular Information Sheet

August 18, 2008

Country Description: The Republic of the Maldives consists of 1,190 islands (fewer than 200 are inhabited) in the Indian Ocean, southwest of Sri Lanka. The Maldives has a population of 379,174, of whom about 104,000 reside in Male, the capital city. Beautiful atolls, inhabited by over 1,100 species of fish and other sea life, attract thousands of visitors each year. Tourism facilities are well developed on the resort islands. The tsunami of December 26, 2004 damaged several hotels and facilities on some of the islands, but all damaged tourism infrastructure has been rebuilt.

Entry Requirements: A valid passport, along with an onward/return ticket and sufficient funds, is required for entry. A no-cost visitor visa valid for thirty days is issued upon arrival. The Department of Immigration and Emigration routinely approves requests for extension of stays up to ninety days for travelers who present evidence of sufficient funds and who stay in a resort or hotel or present a letter from a local sponsor. Anyone staying over sixty days without proper authorization faces heavy fines and deportation. All visitors departing the Republic of the Maldives (except diplomats and certain exempted travelers) must pay an airport departure tax, which is usually included in the price of an airline ticket. Travelers need a yellow fever immunization if they are arriving from an infected area.

Arrival by private boat: Travelers arriving by private yacht or boat are granted no-cost visas, usually valid until the expected date of departure. Vessels anchoring in atolls other than Male must have prior clearance through agents in Male. Maldivian customs, police and/or representatives of Maldivian immigration will meet all vessels, regardless of where they anchor. Vessels arriving with a dog on board will be permitted anchorage, but the dog will not be allowed off the vessel. Any firearms or ammunition on board will be held for bond until the vessel's departure.

Specific inquiries should be addressed to the Maldives High Commission in Colombo, Sri Lanka at No. 24, Melbourne Avenue, Colombo 4, telephone (94) (11) 2580076/2586762/2500943, or the Maldives Mission to the U.N. in New York, telephone (212) 599-6194.

Visit the web site of the Maldives Permanent Mission to the United Nations at www.maldivesmission-ny.com/eng/ for the most current visa information.

Safety and Security: An explosion in Male's Sultan Park on September 29, 2007 wounded 12 tourists - two British, two Japanese and eight Chinese. There were no American injuries or fatalities in the incident. Maldivian police said the explosion, the first ever bomb blast in the Maldives, was caused by an improvised explosive device triggered by a mobile phone. The government quickly arrested several suspects, and is currently investigating links between the bombing and religious extremists.

Americans are cautioned against engaging in political activity in the Maldives. While demonstrations have become unruly on occasion, especially in Male, political violence in the Maldives is relatively rare.

For the latest security information, Americans traveling abroad should regularly monitor the Department's Internet web site at http://travel.state.gov, where the current Worldwide Caution Travel Alert, Travel Warnings and Travel Alerts can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S. and Canada, or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: The Maldives has a low crime rate, but theft of valuables left unattended on beaches or in hotels does occur. Drug use is on the rise and the penalty for drugs is severe.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the U.S. Embassy in Colombo, Sri Lanka. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

There is no 911 equivalent for medical emergencies in the Maldives. 119 is for the police only. A patient would have to call an individual hospital for ambulance services. Quality of medical care in such instances may be uncertain, as most ambulances are ill equipped.

Medical Facilities and Health Information: The Maldives has limited medical facilities. There are two hospitals in Male: the government-owned Indira Gandhi Memorial Hospital (IGM) and the privately-owned Abduarahman Don Kaleyfan Hospital (ADK). ADK accepts some insurance plans, but IGM does not. The hospitals perform general, orthopedic and neurosurgery, but the Maldives has no trauma units, and spinal surgery is not available. Persons needing treatments not offered in the Maldives require evacuation to the nearest adequate medical facility, such as in Singapore.

Two recompression chambers are available in the Maldives. One is on Bandos Island (fifteen minutes by speedboat from Male) and the other is in Kuramathi (one hour by speed boat and about twenty minutes by air taxi from Male.) The U.S. Department of State is unaware of any HIV/AIDS entry restrictions for visitors to or foreign residents of the Maldives.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747); fax 1-888-CDC-FAXX (1-888-232-3299), or via the CDC's web site at http://wwwn.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning the Maldives is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

Only a few of the islands are large enough to support automobiles. Most transportation in the Maldives is by boat or seaplane (air taxi). The Maldives has good safety standards for land, sea, and air travel. Roads in Male and on the airport island are brick and generally well maintained. Dirt roads on resort islands are well kept by the resorts. Transportation on the small island on which the capital, Male, is situated, is either by foot or by readily-available taxis. Transportation between the airport and Male, as well as to nearby resort islands, is by motorized water taxi and speedboat. Several local companies provide seaplane and helicopter service to outlying islands. Air taxis stop flying one hour before sunset, and several resorts do not transport passengers by boat between the airport and the resort island later than one hour before sunset. Visitors to distant resorts arriving in the country at night can expect to stay overnight at a hotel in Male or at the airport hotel and should confirm transfer arrangements in advance.

Visit the web site of the Maldives national tourist office and national authority responsible for road safety at http://www.visitmaldives.com.

Aviation Safety Oversight: As there is no direct commercial air service between the United States and the Maldives, the U.S. Federal Aviation Administration (FAA) has not assessed the Maldives' Civil Aviation Authority for compliance with International Civil Aviation Organization (ICAO) aviation safety standards. For more information, travelers may visit the FAA's Internet web site at http://www.faa.gov.

Religious Laws: Public observance of any religion other than Islam is prohibited. Religious gatherings such as Bible study groups are prohibited; however, a family unit may practice its religion, including Bible readings, within its residence. It is against the law to invite or encourage Maldivian citizens to attend these gatherings. Offenders may face jail sentences, expulsion and/or fines. In the past, several non-Maldivian families resident in the Maldives, including some Americans, were expelled for allegedly engaging in religious proselytizing. Although Maldivian law prohibits importing "idols for religious worship," tourists traveling to the resort islands are generally allowed to bring in items and texts used for personal religious observances.

Currency: Credit cards are increasingly accepted outside large hotels and resorts; cash payment in dollars is accepted at most retail shops and restaurants and by taxi drivers.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject

to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating Maldivian laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in the Maldives are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: There is no U.S. Embassy or Consulate in the Maldives. The U.S. Embassy in Colombo, Sri Lanka provides consular support for the Maldives. Americans living or traveling in the Maldives are encouraged to register with the U.S. Embassy in Colombo through the State Department's travel registration web site and to obtain updated information on travel and security within the Maldives. Americans without Internet access may register directly with the U.S. Embassy in Colombo. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency. As a trip from Colombo to the Maldives takes about 3 hours, consular support may be limited in an emergency. The U.S. Embassy in Colombo is located at 210 Galle Road, Colombo 3, Sri Lanka. The Embassy's telephone number during normal business hours Monday through Friday is (94) (11) 249-8500. The after-hours and emergency telephone number is (94) (11) 249-8888. The Consular Section fax number is (94) (11) 249-8590. The Embassy's Internet address is http://colombo.usembassy.gov. The email address for the consular section is colomboacs@state.gov or consularcolombo@state.gov.

MALI

Compiled from the October 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Republic of Mali

PROFILE

Geography

Area: 1,240,278 sq. km. (474,764 sq. mi.); about the size of Texas and California combined.

Cities: Capital—Bamako (pop. 1 million). Other cities—Segou (200,000), Sikasso (120,000), Mopti (90,000), Gao (65,000), Kayes (65,000), Timbuktu (38,000).

Terrain: Savannah and desert.

Climate: Semitropical in the south; arid in the north.

People

Nationality: Noun and adjective—Malian(s).

Population: (2008 est.) 12.5 million.

Annual growth rate: 2.4%.

Ethnic groups: Manding (Bambara or Bamana, Malinke) 52%, Fulani 11%, Saracolé 7%, Mianka 4%, Songhai 7%, Tuareg and Maur 5%, other 14%.

Religions: Islam 90%, indigenous 6%, Christian 4%.

Languages: French (official) and Bambara (spoken by about 80% of the population).

Education: Attendance—64.3% (primary). Literacy—31%.

Health: Infant mortality rate—121/1,000. Life expectancy—47 yrs.

Work force: (4 million) Agriculture—70%; services—15%; industry and commerce—15%.

Government

Type: Republic.

Independence: September 22, 1960.

Constitution: Approved by referendum January 12, 1992.

Government branches: Executive—president (chief of state and commander in chief of the armed forces), prime minister (head of government). Legislative—National Assembly is the sole legislative arm of the government; currently consisting of 147 members. Judicial—Supreme Court with both judicial and administrative powers.

Political parties: Mali is a multiparty democracy. Fifteen political parties are represented in the National Assembly; others are active in local government.

Suffrage: Universal at 18.

Political subdivisions: Eight regions and capital district.

Budget: (2007) Revenues—$1,770 million; expenditures—$1,947 million; $177 million deficit.

Economy

GDP: (2006 est.) $5.847 billion.

Avg. annual growth rate: (2006 est.) 5.1%.

Per capita income: (2006 est.) $470.

Annual skilled worker's salary: $1,560.

Avg. inflation rate: (2005) -1.1%.

Natural resources: Gold, phosphate, kaolin, salt, and limestone currently mined; deposits of oil, bauxite, iron ore, manganese, lithium, and uranium are known or suspected.

Agriculture, livestock, and fishery: (36% of GDP) Products—millet, sorghum, corn, rice, livestock, sugar, cotton, groundnuts (peanuts), and tobacco.

Industry: (24% of GDP) Types—food processing, textiles, cigarettes, fish processing, metalworking, light manufacturing, plastics, and beverage bottling.

Services: (40% of GDP) Telecommunications, construction.

Trade: (2004) Exports—$1,078 million: cotton and cotton products, animals, fish, tannery products, groundnuts, diamonds, and gold. Major markets—France, Switzerland, Italy, Thailand, Cote d'Ivoire, and Algeria. Imports—$1,084 million: food, machinery and spare parts, vehicles, petroleum products, chemicals and pharmaceuticals, textiles. Major suppliers—France, Cote d'Ivoire, Belgium, Luxembourg, U.S. ($43 million), Germany, and Japan.

PEOPLE

Mali's population consists of diverse Sub-Saharan ethnic groups, sharing similar historic, cultural, and religious traditions. Exceptions are the Tuaregs and Maurs, desert nomads, related to the North African Berbers. The Tuaregs traditionally have opposed the central government. Starting in June 1990, armed attacks in the north by Tuaregs seeking greater autonomy led to clashes with the military. In April 1992, the government and most opposing factions signed a pact to end the fighting and restore stability in the north. Its major aims are to allow greater autonomy to the north and increase government resource allocation to what has been a traditionally impoverished region. The peace agreement was celebrated in 1996 in Timbuktu during an official and highly publicized ceremony called Flamme de la Paix—peace flame.

Historically, good inter-ethnic relations throughout the rest of the country were facilitated by easy mobility on the Niger River and across the country's vast savannahs. Each ethnic group was traditionally tied to a specific occupation, all working within close proximity. The Bambara, Malinke, and Dogon are farmers; the Fulani, Maur, and Tuareg are herders; the Soninkés or Saracolés are traders; while the Bozo are fishers. In recent years, this linkage has shifted as ethnic groups seek diverse, nontraditional sources of income.

Although each ethnic group speaks a separate language, nearly 80% of Malians communicate in Bambara, the common language of the marketplace. Malians enjoy a relative harmony rare in African states.

HISTORY

Malians express great pride in their ancestry. Mali is the cultural heir to the succession of ancient African empires—Ghana, Malinké, and Songhai—that occupied the West African savannah. These empires controlled Saharan trade and were in touch with Mediterranean and Middle Eastern centers of civilization. The Ghana Empire, dominated by the Soninke or Saracolé people and centered in the area along the Malian-Mauritanian frontier, was a powerful trading state from about A.D. 700 to 1075. The Malinke Kingdom of Mali had its origins on the upper Niger River in the 11th century. Expanding rapidly in the 13th century under the leadership of Soundiata Keita, it reached its height about 1325, when it conquered Timbuktu and Gao. Thereafter, the kingdom began to decline, and by the 15th century, it controlled only a small fraction of its former domain.

The Songhai Empire expanded its power from its center in Gao during the period 1465-1530. At its peak under Askia Mohammad I, it encompassed the Hausa states as far as Kano (in present-day Nigeria) and much of the territory that had belonged to the Mali Empire in the west. It was destroyed by a Moroccan invasion in 1591. Timbuktu was a center of commerce and of the Islamic faith throughout this period, and priceless manuscripts from this epoch are still preserved in Timbuktu. The United States and other donors are making efforts to help preserve these priceless manuscripts as part of Mali's cultural heritage.

French military penetration of the Soudan (the French name for the area) began around 1880. Ten years later, the French made a concerted effort to occupy the interior. The timing and resident military governors determined methods of their advances. A French civilian governor of Soudan was appointed in 1893, but resistance to French control did not end until 1898, when the Malinké warrior Samory Touré was defeated after 7 years of war. The French attempted to rule indirectly, but in many areas they disregarded traditional authorities and governed through appointed chiefs. As the colony of French Soudan, Mali was administered with other French colonial territories as the Federation of French West Africa.

In 1956, with the passing of France's Fundamental Law (Loi Cadre), the Territorial Assembly obtained extensive powers over internal affairs and was permitted to form a cabinet with executive authority over matters within the Assembly's competence. After the 1958 French constitutional referendum, the Republique Soudanaise became a member of the French Community and enjoyed complete internal autonomy.

In January 1959, Soudan joined Senegal to form the Mali Federation, which became fully independent within the French Community on June 20, 1960. The federation collapsed on August 20, 1960, when Senegal seceded. On September 22, Soudan proclaimed itself the Republic of Mali and withdrew from the French Community.

President Modibo Keita—whose party Union Soudanaise du Rassemblement Democratique Africain (US/RDA) had dominated preindependence politics—moved quickly to declare a single-party state and to pursue a socialist policy based on extensive nationalization. A continuously deteriorating economy led to a decision to rejoin the Franc Zone in 1967 and modify some of the economic excesses.

On November 19, 1968, a group of young officers staged a bloodless coup and set up a 14-member Military Committee for National Liberation (CMLN), with Lt. Moussa Traore as President. The military leaders attempted to pursue economic reforms but for several years faced debilitating internal political struggles and the disastrous Sahelian drought.

A new constitution, approved in 1974, created a one-party state and was designed to move Mali toward civilian rule. However, the military leaders remained in power. In September 1976, a new political party was established, the Democratic Union of the Malian People (UDPM), based on the concept of democratic centralism. Single-party presidential and legislative elections were held in June 1979, and Gen. Moussa Traore received

99% of the votes. His efforts at consolidating the single-party government were challenged in 1980 by student-led, anti-government demonstrations, which were brutally put down, and by three coup attempts.

The political situation stabilized during 1981 and 1982 and remained generally calm throughout the 1980s. The UDPM spread its structure to cercles and arrondissements (administrative subdivisions) across the land. Shifting its attention to Mali's economic difficulties, the government approved plans for cereal marketing liberalization, reform in the state enterprise system, and new incentives to private enterprise, and worked out a new structural adjustment agreement with the International Monetary Fund (IMF). However, by 1990, there was growing dissatisfaction with the demands for austerity imposed by the IMF's economic reform programs and the perception that the President and his close associates were not themselves adhering to those demands.

As in other African countries, demands for multiparty democracy increased. The Traore government allowed some opening of the system, including the establishment of an independent press and independent political associations, but insisted that Mali was not ready for democracy. In early 1991, student-led, anti-government rioting broke out again, but this time government workers and others supported it. On March 26, 1991, after 4 days of intense anti-government rioting, a group of 17 military officers arrested President Traore and suspended the constitution. Within days, these officers joined with the Coordinating Committee of Democratic Associations to form a predominantly civilian, 25-member ruling body, the Transitional

Committee for the Salvation of the People (CTSP). The CTSP then appointed a civilian-led government. A national conference held in August 1991 produced a draft constitution (approved in a referendum January 12, 1992), a charter for political parties, and an electoral code. Political parties were allowed to form freely. Between January and April 1992, a president, National Assembly, and municipal councils were elected. On June 8, 1992, Alpha Oumar Konare, the candidate of the Alliance for Democracy in Mali (ADEMA), was inaugurated as the President of Mali's Third Republic.

In 1997, attempts to renew national institutions through democratic elections ran into administrative difficulties, resulting in a court-ordered annulment of the legislative elections held in April 1997. The exercise, nonetheless, demonstrated the overwhelming strength of President Konare's ADEMA Party, causing some other historic parties to boycott subsequent elections. President Konare won the presidential election against scant opposition on May 11. In the two-round legislative elections conducted on July 21 and August 3, 1997, ADEMA secured more than 80% of the National Assembly seats.

General elections were organized in June and July 2002. President Konare did not seek reelection since he was serving his second and last term as required by the constitution. All political parties participated in the elections. In preparation for the elections, the government completed a new voter's list after a general census was administered a few months earlier with the support of all political parties. Retired General Amadou Toumani Toure, former head of state during Mali's transition (1991-1992) became the country's second democratically elected President as an independent candidate in 2002, and was reelected to a second 5-year term in 2007.

GOVERNMENT AND POLITICAL CONDITIONS

Under Mali's 1992 constitution, the president is chief of state and commander in chief of the armed forces. The president is elected to a 5-year term, with a limit of two terms. The president appoints the prime minister as head of government. The president chairs the Council of Ministers (the prime minister and currently 28 other ministers, including 5 women), which adopts proposals for laws submitted to the National Assembly for approval.

The National Assembly is the sole legislative arm of the government. It currently consists of 147 members. Representation is apportioned according to the population of administrative districts. Election is direct and by party or independent list. The term of office is 5 years. The Assembly meets for two regular sessions each year. It debates and votes on legislation proposed either by one of its members or by the government and has the right to question government ministers about government actions and policies. Sixteen political parties, aggregated into five parliamentary groups, are represented in the Assembly. In legislative elections held in July 2007, the ADEMA Party regained the majority it lost in 2002, winning 51 seats, ahead of another party aligned with President Toure, the Union for Republic and Democracy (URD), which won 36. The former majority party at the National Assembly, the Rassemblement Pour le Mali (RPM) of former Prime Minister Ibrahim B. Keita, won 11 seats. Other than the RPM, President Toure has the support of most of the political parties represented in the National Assembly.

Mali's constitution provides for a multiparty democracy, with the only restriction being a prohibition against parties based on ethnic, religious, regional, or gender lines. In addition to those political parties represented in the National Assembly, others are active in municipal councils. Administratively, Mali is divided into eight regions and the capital district of Bamako, each under the authority of an appointed governor. Each region consists of five to nine districts (or cercles), administered by prefets (commandants). Cercles are divided into communes, which, in turn, are divided into villages or quarters. The decentralization process has started with the establishment of 702 elected municipal councils, headed by elected mayors. Election of local officials took place; greater local control over finances and the reduction of administrative control by the central government are being implemented.

Mali's legal system is based on codes inherited at independence from France. New laws have been enacted to make the system conform to Malian life, but French colonial laws not abrogated still have the force of law. The constitution provides for the independence of the judiciary. However, the Ministry of Justice appoints judges and supervises both law enforcement and judicial functions. The Supreme Court has both judicial and administrative powers. Under the constitution, there is a separate constitutional court and a high court of justice with the power to try senior government officials in cases of treason.

Principal Government Officials

Last Updated: 11/12/08

President: **Amadou Toumani TOURE**
Prime Minister: **Modibo SIDIBE**
Min. of Agriculture: **Tiemoko SANGARE**
Min. of Communications & Technology: **Diarra Mariam Flantie DIALLO**
Min. of Culture: **Mohamed El MOCTAR**
Min. of Defense & Veterans: **Natie PLEA**
Min. of Economy & Finance: **Ahmadou Abdoulaye DIALLO**
Min. of Employment & Vocational Training: **Ibrahima N'DIAYE**
Min. of Environment & Sanitation: **Agatheane Ag A LASSANE**
Min. of Equipment & Transportation: **Ahmed Diane SEMEGA**
Min. of Foreign Affairs: **Moctar OUANE**
Min. of Health: **Oumar Ibrahima TOURE**

Min. of Housing & Urbanism: **Gakou Salimata FOFONA**
Min. of Industry & Commerce: **Choguel MAIGA**
Min. of Internal Security & Civil Protection: **Sadio GASSAMA, Col.**
Min. of Justice & Keeper of the Seals: **Maharafa TRAORE**
Min. of Labor, State Reforms, & Relations With the Institutions: **Abdoul Wahab BERTHE**
Min. of Livestock & Fisheries: **Diallo Madeleine BA**
Min. of Malians Abroad & African Integration: **Badra Alou MACALOU**
Min. of Minerals, Energy, & Water Resources: **Ahmed SOW**
Min. of Planning & National Development: **Marimantia DIARRA**
Min. of Primary Education, Literacy, & National Languages: **Sidibe Aminata DIALLO**
Min. of Promotion of Investments & Medium & Small Enterprises: **Ousmane THIAM**
Min. of Promotion of Women, Child & Family Affairs: **Maiga Sina DAMBA**
Min. of Secondary & Higher Education & Scientific Research: **Amadou TOURE**
Min. of Social Development, Solidarity, & the Aged: **Sekou DIAKITE**
Min. of Territorial Administration & Local Communitites: **Kafougouna KONE, Gen.**
Min. of Tourism, Arts, & Crafts: **D'Diaye BA**
Min. of Youth & Sports: **Hamane NIANG**
Ambassador to the US: **Abdoulaye DIOP**
Permanent Representative to the UN, New York: **Oumar DAOU**

Mali maintains an embassy in the United States at 2130 R Street NW, Washington, DC 20008 (tel. 202-332-2249), and a permanent mission to the United Nations at 111 E. 69th Street, New York, NY 10020 (212-734-4150).

ECONOMY

Mali's per capita gross domestic product (GDP) of $470 (2006 est.) places it among the world's 10 poorest nations. Its potential wealth lies in mining and the production of agricultural commodities, livestock, and fish. Agricultural activities occupy 70% of Mali's labor force and provide 36% of the GDP. Cotton, gold, and livestock made up 80%-90% of total export earnings in Mali in 2006. Small-scale traditional farming dominates the agricultural sector, with subsistence farming—of cereals, primarily sorghum, millet, and maize—on about 90% of the 1.4 million hectares (3.4 million acres) under cultivation. The high cost of petroleum products, the fall in the world market price for cotton and gold, and corresponding loss of customs revenues put pressure on the economy and led the government to be very tight on cash disbursements in recent years. In addition, the 2002-2003 closure of the main import/export route to the port of Abidjan increased the pressure on the fragile Malian economy. Nonetheless, a focus on quality cotton production and double-digit increases in cereal and gold production boosted real GDP growth from 2.2% in 2004 to 5.1% in 2005.

The most productive agricultural area lies along the banks of the Niger River between Bamako and Mopti and extends south to the borders of Guinea, Cote d'Ivoire, and Burkina Faso. Average rainfall varies in this region from 50 centimeters per year (20 in.) around Mopti to 140 centimeters (55 in.) in the south near Sikasso. This area is most important for the production of cotton, rice, millet, corn, vegetables, tobacco, and tree crops.

Rice is grown extensively along the banks of the Niger between Ségou and Mopti, with the most important rice-producing area at the Office du Niger, located north of Ségou toward the Mauritanian border. Using water diverted from the Niger, the Office du Niger irrigates about 80,000 hectares of land for rice and sugarcane production. About one-third of Mali's paddy rice is produced at the Office du Niger.

The Niger River also is an important source of fish, providing food for riverside communities; the surplus—smoked, salted, and dried—is exported. Due to drought and diversion of river water for agriculture, fish production has steadily declined since the early 1980s. The government has started plans to develop fish breeding, mainly in the Niger delta, in order to boost fish production.

Sorghum is planted extensively in the drier parts of the country and along the banks of the Niger in eastern Mali, as well as in the lakebeds in the Niger delta region. During the dry season, farmers near the town of Diré have cultivated wheat on irrigated fields for hundreds of years. Peanuts are grown throughout the country but are concentrated in the area around Kita, west of Bamako.

Mali's resource in livestock consists of millions of cattle, sheep, and goats. Approximately 40% of Mali's herds were lost during the great drought in 1972-74. The level was gradually restored, but the herds were again decimated in the 1983-85 drought. The overall size of Mali's herds is not expected to reach pre-drought levels in the north of the country, where encroachment of the desert has forced many nomadic herders to abandon pastoral activities and turn instead to farming. The largest concentrations of cattle are in the areas north of Bamako and Ségou extending into the Niger delta, but herding activity is gradually shifting southward, due to the effects of previous droughts.

With the technical support of U.S. Agency for International Development (USAID)-funded projects, private cooperatives developed a regional border market in the southern city of Sikasso. Livestock professionals contributed to a steady increase in cattle exports. Sheep, goats, and camels are raised to the exclusion of cattle in the dry areas north and east of Timbuktu.

Until the mid-1960s, Mali was self-sufficient in grains—millet, sorghum, rice, and corn. Diminished harvests during bad years, a growing population, changing dietary habits, and, most importantly, policy constraints on agricultural production resulted in grain deficits almost every year from 1965 to 1986. Production has rebounded since 1987, however, thanks to agricultural policy reforms undertaken by the government and supported by the Western donor nations. Liberalization of producer prices and an open cereals market have created incentives to production. These reforms, combined with

adequate rainfall, successful integrated rural agriculture programs in the south, and improved management of the Office du Niger, have led to surplus cereal production over the past 5 years. Except for 2002 and 2004, annual rainfall, critical for Mali's agriculture, has been at or above average since 1993. Cereal production, including rice, grew annually until 2002, when the country experienced a food production deficit, alleviated by donors' massive contributions to food security stocks. Locust infestation during the 2004 agricultural campaign prompted the government to seek assistance from the donor community in order to fill the gap in the regions that had a significant production deficit. The government anticipates a record harvest of 3.4 million tons in 2006/2007 due to abundant rainfall, 16% more than the average production of the past 5 years. Mali's cotton production grew from 500,000 tons in 1997 to a record 620,000 tons in 2003-2004, making Mali the largest cotton producer on the African continent. In 2004-2005 and 2005-2006, cotton production retreated respectively to 590,000 and 500,000 tons as the parastatal cotton company CMDT focused on quality of harvested cotton rather than quantity.

Mining is still a growing industry in Mali, with gold accounting for some 80% of mining activity. There are considerable proven reserves of other minerals not currently exploited. In 2002, gold briefly became Mali's number one export, before cotton and livestock. There are two large private investments in gold mining: Anglo-American ($250 million) and Randgold ($140 million), both multinational South African companies located respectively in the western and southern part of the country.

During the colonial period, private capital investment was virtually nonexistent, and public investment was devoted largely to the Office du Niger irrigation scheme and to administrative expenses. Following independence, Mali built some light industries with the help of various donors. Manufacturing, consisting principally of processed agricultural products, accounted for about 24% of the GDP in 2005. Tourism remains a small part of Mali's economy; it is a sector with significant potential. Mali's national parks, its ancient cities and archeological sites, Niger River cruises, cultural festivals, and magnificent desert landscapes are major attractions. Mali also is home to a rare herd of elephants that continues its unique annual migration to the edges of the Sahara Desert in the northern part of the country.

Economic Reforms

With the encouragement of the major donors and international financial institutions, the Government of Mali initiated a series of adjustment and stabilization programs beginning in 1982. Measures were introduced to reduce budgetary deficits, public enterprise operating losses, and public sector arrears.

Under the economic reform program signed with the World Bank and the IMF in 1988, the government has taken a number of steps to liberalize the regulatory environment and thereby attract private investment. For example, applications for the establishment of business enterprises now enjoy "one window"—guichet unique—processing through a single ministry, allowing a business to be established in a matter of days. In addition, price controls on consumer goods have been progressively eliminated; the last price control, on petroleum products, was removed on July 1, 1992. Import quotas were eliminated in 1988, and export taxes were dropped in 1991. The Commerce Code was revised in 1991 to remove impediments to commercial activity. The investment and the mining codes also were revised in the early 1990s in order to present a good investment climate. Also in 1991, a system of commercial and administrative courts was established to handle private trade complaints and claims against the government. During the period 1988-96, the government implemented a large reform program of the public enterprise sector, including the privatization of 16 enterprises, the partial privatization of 12, and the liquidation of 20; others were restructured. Among the 20 enterprises left, eight were privatized, including the largest—the electricity and water company (Energie du Mali, or EDM), and the textile company (Industry Textile du Mali, or ITEMA). The privatization of EDM was initially considered as a success, but the company returned to the government portfolio in mid-2005 when the French concessionaire SAUR and the Government of Mali agreed to end the 20-year concession. The government completed the concession of the railroad company to the Salt Lake City-based Savage Corporation in 2005. The privatization process for the cotton seed oil factory (Huilerie Cotonniere du Mali, or Huicoma), was completed in June 2005. The privatization completion date for two major companies—Societé de Telecommunications du Mali (SOTELMA) and the Cotton Ginning Company (CMDT)—is still uncertain, although target dates are set for 2008.

In 1999, the executive board of the IMF approved a 3-year loan for Mali under the enhanced structural adjustment facility (ESAF) to support the government's economic reform program, for a total of $63 million. For the third ESAF covering the period April 1999-March 2002, the IMF board of directors urged the Malian authorities to persevere with their policy of fiscal consolidation, including the modernizing of the tax system, and to deepen and accelerate structural reforms and rehabilitate the judicial system. Mali was selected in 1999 as an eligible country to the Highly Indebted Poor Countries (HIPC) program and has been benefiting from the program since FY 2000 as a budgetary support. In April 2003, Mali reached the HIPC completion point with the result that former debt payments will now be used to fund poverty alleviation programs. Total debt relief under the original and the enhanced HIPC initiative will amount to about $539 million, representing a 37% reduction. As one of 14 African nations that have reached the HIPC completion point, Mali will benefit from multilateral debt forgiveness under the G8 Gleneagles debt forgiveness agreement.

Foreign Aid

Mali is a major recipient of foreign aid from many sources, including multilateral organizations (most significantly the World Bank, the African Development Bank, and Arab Funds), and bilateral programs funded by the European Union, France, United States, Canada, Netherlands, and Germany. Before 1991, the former Soviet Union had been a major source of economic and military aid, including construction of a cement plant and the Kalana gold mine. Currently, aid from Russia is restricted mainly to training and provision of spare parts. Chinese aid remains high, and Chinese-Malian joint venture companies became more numerous during the period 1999-2002, leading to the opening of a Chinese investment center. The Chinese are major participants in the textile and the sugar refinery industries and in large-scale construction projects, including irrigation infrastructures in the Niger Valley Authority (Office du Niger), a bridge across the Niger, a conference center, an expressway in Bamako, a new national stadium in Bamako, four regional stadiums completed for the Africa Cup competition in 2002, and three regional stadiums to be completed by June 2007.

In 2003, U.S. assistance reached $44.2 million: This included $40.7 million in sector support made available through U.S. Agency for International Development (USAID) programs; a Peace Corps program budget of $2.8 million for 190 volunteers serving in Mali; Self-Help and the Democracy Funds of $153,000; and State Department Public Diplomacy Funds of $300,000 for educational opportunities and local projects. Military assistance includes $100,000 for the International Military Education Training (IMET) program, and $200,000 for the Regional Defense Counter Terrorism Fellowship (RDCTF) program. The Department of State dedicated $1.05 million to train militaries of the Pan Sahel countries, including Mali. Mali was granted eligibility for funding from the Millennium Challenge Account (MCA) in 2004 and 2005. The Millennium Challenge Corporation (MCC) and the Government of Mali signed a compact in October 2006 for a U.S. $460 million grant to support Mali's proposal for an agro-business development, airport modernization and extension, and an industrial zone development. Mali was also granted eligibility for funding from the President's Malaria Initiative for about U.S. $75 million.

DEFENSE

Mali's armed forces number some 7,000 and are under the control of the Minister of Defense and Veterans, as is the National Guard. The Gendarmerie and local police forces are under the Ministry of Security and Civil Protection. The police and gendarmes share responsibility for internal security; the police are in charge of urban areas only. In the 1960s and 1970s, Mali's Army and Air Force relied primarily on the Soviet Union for materiel and training. A few Malians receive military training in the United States, France, and Germany. Under the Pan Sahel Initiative, more troops got training and equipment in 2003-2004 and in subsequent years. Military expenditures total about 13% of the national budget.

FOREIGN RELATIONS

Since independence in 1960, Malian governments have shifted from an ideological commitment to socialism and a policy alignment with communist states to pragmatism that judges issues and their merits, welcomes assistance from all sources, and encourages private investment. The present government, which assumed office in 2002, is committed to democracy, economic reform, free market policies, regional integration, and international cooperation on peacekeeping and counter-terrorism activities. Mali is a member of the UN and many of its specialized agencies, including the International Monetary Fund (IMF) and the World Bank; the International Labor Organization (ILO); the International Telecommunications Union (ITU); and the Universal Postal Union (UPU). It also belongs to the African Union (AU); the Organization of the Islamic Conference (OIC); the Non-Aligned Movement (NAM); and the African Development Bank (ADB). Mali also is an associate member of the European Union (EU).

Mali is active in regional organizations. It participates in the Economic Community of West African States (ECOWAS) and the West African Economic Monetary Union (UEMOA) for regional economic integration; Liptako-Gourma Authority, which seeks to develop the contiguous areas of Mali, Niger, and Burkina Faso; the Niger River Commission; the Permanent Interstate Committee for Drought Control in the Sahel (CILSS); and the Senegal River Valley Development Organization (OMVS).

U.S.-MALIAN RELATIONS

U.S.-Malian relations are excellent and expanding. They are based on shared goals of averting suffering and strengthening democracy. The bilateral agenda is dominated by efforts to increase broad-based growth, improve health and educational facilities, promote the sustainable use of natural resources, reduce the population growth rate, counter the spread of highly infectious diseases, encourage regional stability, build peacekeeping capabilities, institutionalize respect for human rights, and strengthen democratic institutions in offering good governance. Mali currently is a small market for U.S. trade and investment, but there is potential for considerable growth as its economy expands.

Mali is a leading regional partner in the Global War on Terrorism. Mali also serves as an important laboratory for testing new anti-malaria medicines for use by American citizen travelers and for research that will have an Africa-wide impact. USAID, Peace Corps, and other U.S. Government programs play a significant role in fostering sustainable economic and social development. USAID programs

also strengthen efforts to consolidate the peace process in northern Mali and the region's socioeconomic and political integration. Defense Department security assistance programs and training support help permit Mali to achieve its potential in international peacekeeping and counterterrorism efforts.

TRAVEL

Consular Information Sheet

December 19, 2008

Country Description: Mali is a developing country in western Africa with a stable and democratic government. The official language is French. The capital is Bamako. Facilities for tourism are limited.

Entry Requirements: A passport and visa are required. All travelers must have international vaccination cards with a current yellow fever immunization. Travelers should obtain the latest visa information and entry requirements from the Republic of Mali Embassy at 2130 R Street NW, Washington, DC 20008, telephone (202) 332-2249. Inquiries can be made at the nearest Malian embassy or consulate. Visit the Embassy of Mali web site at http://www.maliembassy.us/ for the most current visa information.

Safety and Security: The U.S. Embassy in Bamako strongly advises American citizens to avoid traveling to the northern regions of Mali. U.S. Government employees serving in Mali, including those on temporary duty, are required to have approval from the Chief of Mission prior to traveling to areas north of the Niger River, including Timbuktu and areas or north of Timbuktu. Travelers should exercise caution when traveling in any isolated areas.

In August 2007, Tuareg dissidents attacked and kidnapped civilian and military convoys near the Mali-Niger border. On January 3, 2008, four Italians were robbed at gunpoint near Araouane, 150 miles north of Timbuktu, by assailants whose affiliation remains unknown. Tuareg rebels in the Kidal region attacked Malian military units in Tinzawaten and Boughessa in March 2008, in Abeibara in May 2008, and in Tessalit in July 2008. On October 16, 2008, bandits in the Kidal region of Mali carjacked two vehicles belonging to the International Committee for the Red Cross.

Al-Qaeda in the Land of the Islamic Maghreb (AQIM) has a presence in northern Mali. AQIM began as a terrorist group seeking the overthrow of the Algerian government, and has been designated as a terrorist organization by both the United States and the European Union. On October 31, 2008, in northern Mali, AQIM freed two Austrian tourists kidnapped in Tunisia eight months earlier. The group has declared its intention to attack Algerian and Western targets.

This recent activity and the porous nature of Mali's northern borders with Mauritania and Algeria, as well as its eastern border with Niger, reinforce long-standing concerns about security for travel in northern Mali. The Department of State strongly urges citizens to reconsider traveling to northern Mali, including Timbuktu and Essakane.

Northern Mali hosts several annual music festivals in the desert, including one north of Timbuktu at Essakane, one north of Kidal at Essouk, and another near Menaka. These are official events sanctioned by the Government of Mali. Americans planning to attend these festivals or otherwise travel to the northern regions of Mali, despite this caution, are urged to notify the U.S. Embassy about their plans by e-mail at consularbamako@state.gov.

For the latest security information, Americans traveling abroad should regularly monitor the Department of State, Bureau of Consular Affair's Internet site at http://travel.state.gov, where the current Travel Warnings and Travel Alerts, including the Worldwide Caution Travel Alert, can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S., or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: Violent crime in Mali is infrequent, but petty crimes, such as pick pocketing and simple theft, are common in urban areas. Passports and wallets should be closely guarded when in crowded outdoor areas and open-air markets. Individuals traveling on the Bamako-Dakar railroad are advised to be vigilant for pickpockets, especially at night. Criminals will not hesitate to use violence if they encounter resistance from their victims. There are sporadic reports of nighttime robberies occurring on the roads outside of the capital; tourists should not drive outside of Bamako at night. Travelers should stay alert, remain in groups, and avoid poorly lit areas after dark.

Sporadic banditry and random carjacking have historically plagued Mali's vast desert region and its borders with Mauritania and Niger.

While banditry is not seen as targeting U.S. citizens specifically, such acts of violence cannot be predicted.

On July 1, 2008, six people working as USAID contractors were robbed of their vehicle and all belongings, at gunpoint, by three bandits between the villages of Temera and Bourem, approximately 120 km (75 miles) northeast of Gao along the Niger River.

From May 2008 until July 2008, there were a series of attacks at various Malian government installations. While most of these have been in eastern Mali, on May 6, bandits attacked a military outpost in Diabali, 175 km (110 miles) north of Segou. While these actions appear directed exclusively at government security facilities, including military, gendarmerie and national guard bases, bandits have been known to stop cars at gunpoint while making their escape. Those traveling or living in Mali are strongly encouraged to register with the Embassy to allow e-mail notification should further attacks occur. Please see the Registration/Embassy Location information at the end of this article.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

The local equivalent to the "911" emergency line in Mali is: 1212.

Medical Facilities and Health Information: Medical facilities in Mali are limited, especially outside of the capital, Bamako. Psychiatric care is non-existent. The U.S. Embassy in Bamako maintains a list of physicians and other healthcare professionals who may see U.S. citizen patients. The Embassy cannot guarantee these services or specifically recommend any physicians.

The U.S. Department of State is unaware of any HIV/AIDS entry restrictions for visitors to, or foreign residents of, Mali.

Many American medicines are unavailable; French medications are more easily found. Available medications can be obtained at pharmacies throughout Bamako, and are usually less expensive than those in the U.S. Travelers should carry with them an adequate supply of needed medication and prescription drugs, along with copies of the prescriptions, including the generic names for the drugs. Caution should be taken to avoid purchasing potentially dangerous counterfeit medications when buying on the local market in Mali.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's Internet site at http://wwwn.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith/en.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Mali is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

U.S. citizens traveling by road in Mali should exercise caution. Mali has paved roads leading from Bamako to Segou, Mopti and Sikasso. During the rainy season from mid-June to mid-September, some unpaved roads may be impassable. On many roads outside of the capital, deep sand and ditches are common. Four-wheel drive vehicles with spare tires and emergency equipment are recommended. Nighttime driving is particularly hazardous and not recommended.

Drivers drive on the right hand side of the road in Mali. Speed limits range from 40-60 KM per hour (25-40 miles per hour) within towns to 100 KM per hour (60 miles per hour) between cities. Road conditions often require lower speeds. Due to safety concerns, we recommend against the use of motorbikes, van taxis, and public transportation. Excessive speeds, poorly maintained vehicles, lack of street lighting and livestock pose serious road hazards. Many vehicles are not maintained well and headlights are either extremely dim or not used. Driving conditions in the capital of Bamako can be particularly dangerous due to limited street lighting, the absence of sidewalks for pedestrians, and the number of motorcycles, mopeds and bicycles.

The Malian authority for road safety is the Compagnie Nationale de Circulation Routiere in Bamako at telephone (223) 22-38-83.

Aviation Safety Oversight: As there is no direct commercial air service between the United States and Mali, the U.S. Federal Aviation Administration (FAA) has not assessed Mali's Civil Aviation Authority for compliance with International Civil Aviation Organization (ICAO) aviation safety standards. For more information, travelers may visit the FAA's Internet web site at http://www.faa.gov.

Special Circumstances: Mali is signatory to the Treaty on Cultural Property, which restricts exportation of Malian archeological objects, in particular those from the Niger River Valley. Visitors seeking to export any such property are required by Malian law to obtain an export authorization from the National Museum in Bamako. It is advisable to contact the Embassy of Mali in Washington or the nearest Malian consulate for specific information regarding customs requirements. U.S. Customs and Border Protection may impose corresponding import restrictions in accordance with the Convention on Cultural Property Implementation Act.

Currency exchange facilities are slow and often involve out-of-date rates. The U.S. Embassy cannot provide exchange facilities for private Americans. There are a few ATMs in Bamako that accept American credit cards and debit cards with a Visa logo only. Maximum withdrawals are generally limited to $400, and local banks charge up to $20 per transaction for use of their ATMs. There are no ATMs outside of Bamako. Credit cards are accepted only at major hotels, a few travel agencies, and select restaurants. Cash advances on credit cards are available from only one bank in Mali, the BMCD Bank in Bamako, and the only card they accept for this is Visa.

The U.S. Embassy does not always receive timely notification by Malian authorities of the arrest of Americans. U.S. citizens are encouraged to carry a copy of their passport with them at all times, so that proof of identity and citizenship are readily available in the event of questioning by local authorities. If arrested, U.S. citizens should always politely insist they be allowed to contact the U.S. Embassy (see section on Registration/ Embassy Location below).

Photographing military subjects is restricted. One should also obtain explicit permission from the Malian government before photographing transportation facilities and government buildings. Taking a photograph without permission in any public area may provoke a response from security personnel or offend the people being photographed. Taking photos of the U.S. Embassy is also prohibited.

International telephone calls are expensive, and collect calls cannot be made from outside of Bamako.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offences. Persons violating Mali's laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Mali are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in Mali are encouraged to register with the U.S. Embassy or through the State Department's travel registration web site so that they can obtain updated information on travel and security within Mali. Americans without Internet access may register directly with the U.S. Embassy. By registering, American citizens make it easier for the Embassy to contact them in case of emergency. The U.S. Embassy is located in ACI 2000 at Rue 243, Porte 297. The Embassy's mailing address is B.P. 34, Bamako, Mali. The telephone number is (223) 270-2300. The consular fax number is (223) 270-2340. The Embassy webpage is at http://mali.usembassy.gov.

MALTA

Compiled from the June 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Malta

PROFILE

Geography

Area: 316 sq. km. (122 sq. mi.); about twice the size of the District of Columbia.
Cities: Valletta (capital), Sliema, Birkirkara.
Terrain: Low hills.
Climate: Mediterranean with hot, dry summers and cool, wet winters.

People

Nationality: Noun and adjective—Maltese.
Population: (2007) 401,880.
Ethnic groups: Caucasian Maltese.
Religions: (2003) Roman Catholic, 98%.
Languages: Maltese, English.
Education: (2003) Years compulsory—until age 16. Attendance—96%. Literacy—93%.
Health: (2007) Infant mortality rate (per 1,000 live births)—3.82. Life expectancy at birth—males 76.95, females 81.47 (2007 est.)
Work force: 149,008; public sector 29%, services 47%, manufacturing 16%, construction and quarrying 8%.

Government

Type: Republic.
Independence: September 1964.
Constitution: 1964; revised 1974; revised 1987.
Government branches: Executive—president (chief of state), prime minister (head of government), cabinet. Legislative—unicameral House of Representatives. Judicial—Constitutional Court.
Political subdivisions: 13 electoral districts
Political parties: Nationalist Party, Malta Labor Party, Alternattiva Demokratika (Green Party), Azzjoni Nazzjonali (National Action).
Suffrage: Universal at 18.

Economy

GDP: (2006) $6.39 billion.
Annual growth rate: 5.5% (at 2006 market prices), 2.9% (2006 real terms).
Per capita income: $15,165.
National resources: Limestone, salt.
Services: (75% of GDP).
Industry: (22.5% of GDP) Types—, semiconductors, electronics, information and communications technology, shipbuilding and repair, rubber and plastic products, toys, jewelry, food, beverages.
Agriculture: (2.5% GDP) Products—fodder crops, potatoes, onions, Mediterranean fruits and vegetables.
Trade: (2006) Exports—$3.05 billion: Types—machinery and transport equipment, miscellaneous manufactured articles, chemicals, semi-manufactured goods, food, mineral fuels, lubricants, and related materials, beverages and tobacco, crude materials. Major markets—Eurozone area, U.S., Singapore. Imports—$4.73 billion: Types—Machinery and transport equipment, miscellaneous manufactured articles, semi-manufactured goods, food, mineral fuels, lubricants and related materials, chemicals, beverages and tobacco, crude materials, miscellaneous transactions and commodities. Major suppliers—Eurozone area, U.K., Singapore, U.S.
Trade balance (2007) $1.68 billion.
Budget: (2008 revised estimates) Revenues $3.28 billion; expenditures $2.6 billion; capital expenditures of $449 million.
Exchange rate: (2007) $1=Euro 0.7306 (rate fluctuates).

PEOPLE

Malta is one of the most densely populated countries in the world, with about 3,000 inhabitants per square mile (1,160 per square kilometer). This compares with about 55 per square mile (21 per square kilometer) for the United States. Inhabited since prehistoric times, Malta was first colonized by the Phoenicians. Subsequently, Romans, Arabs, Normans, the Knights Hospitallers of St. John of Jerusalem, and the British have

influenced Maltese life and culture to varying degrees. Most of the foreign community in Malta, predominantly active or retired British nationals and their dependents, centers around Sliema and surrounding suburbs. There is also a growing North African community of about 4,000 (2007).

The Constitution establishes Roman Catholicism as the religion of Malta; however, it also guarantees full liberty of conscience and freedom of worship and a number of faiths have places of worship on the island. Malta has two official languages—Maltese (a Semitic language with much vocabulary borrowed from Sicilian Italian) and English. The literacy rate has reached 93%, compared to 63% in 1946. Schooling is compulsory until age 16.

HISTORY

Malta was an important cultic center for earth-mother worship in the 4th millennium B.C. Archeological work shows a developed religious center there, including the world's oldest free-standing architecture, predating that of Sumer and Egypt. Malta's written history began well before the Christian era. The Phoenicians, and later the Carthaginians, established ports and trading settlements on the island. During the second Punic War (218 B.C.), Malta became part of the Roman Empire. During Roman rule, in A.D. 60, Saint Paul was shipwrecked on Malta. In 533 A.D. Malta became part of the Byzantine Empire and in 870 came under Arab control. Arab occupation and rule left a strong imprint on Maltese life, customs, and language. The Arabs were driven out in 1090 by a band of Norman adventurers under Count Roger of Normandy, who had established a kingdom in southern Italy and Sicily. Malta thus became an appendage of Sicily for 440 years. During this period, Malta was sold and resold to various feudal lords and barons and was dominated successively by the rulers of Swabia (now part of Germany), Aquitaine (now part of France), Aragon (now part of Spain), Castile (now part of Spain), and Spain. In 1522, Suleiman II drove the Knights of St. John out of Rhodes. They dispersed to their commanderies in Europe and after repeated requests for territory to Charles V, in 1530 the Knights were given sovereignty of Malta under the suzerainty of the Kings of Sicily. In 1523, a key date in Maltese history, the islands were ceded by Charles V of Spain to the Order of the Knights of St. John of Jerusalem. For the next 275 years, these famous "Knights of Malta" made the island their domain.

They built towns, palaces, churches, gardens, and fortifications and embellished the island with numerous works of art and enhanced cultural heritage. In 1565, Suleiman the Magnificent laid siege to Malta. After several months the Knights and the Maltese population prevailed and the Turks withdrew. Over the years, the power of the Knights declined, however, and their rule of Malta ended with their peaceful surrender to Napoleon in 1798.

The people of Malta rose against French rule, which lasted two years, and with the help of the British evicted them in 1800. In 1814, Malta voluntarily became part of the British Empire. Under the United Kingdom, the island became a military and naval fortress, the headquarters of the British Mediterranean fleet. During World War II, Malta survived relentless raids from German and Italian military forces (1940-43). A crucial moment in Maltese history was August 15, 1942, when five out of 14 vessels that formed part of "Operation Pedestal," and that included the American tanker SS Ohio, broke through the Nazi blockade of Malta to deliver fuel and food to the starving population. The arrival of the vessels was the turning point in the Maltese islands' fate and became known as the Santa Marija Convoy, for the August 15 Feast of the Assumption locally known as Santa Marija. In recognition, King George VI in 1942 awarded the George Cross "to the island fortress of Malta—its people and defenders." President Franklin Roosevelt, describing the wartime period, called Malta "one tiny bright flame in the darkness—a beacon of hope for the clearer days which have come." In September 1943, the Italian fleet's surrender in Malta was signed by U.S. General Dwight Eisenhower and Italian Marshal Pietro Badoglio. Victory Day, celebrated on September 8, commemorates victory in the 1565 Great Siege, and the end of the WWII attacks in Malta. Malta obtained independence on September 21, 1964, became a Republic on December 13, 1974, and a member of the European Union on May 1, 2004. The last British forces left in March 1979.

GOVERNMENT

Under its 1964 constitution, Malta became a parliamentary democracy within the Commonwealth. Queen Elizabeth II was Malta's sovereign, and a governor general exercised executive authority on her behalf, while the actual direction and control of the government and the nation's affairs were in the hands of the cabinet under the leadership of a Maltese prime minister.

On December 13, 1974, the constitution was revised, and Malta became a republic within the Commonwealth, with executive authority vested in a Maltese president. The president is appointed by parliament. In turn, he appoints as prime minister the leader of the party that wins a majority of seats in a general election for the unicameral House of Representatives.

The president also nominally appoints, upon recommendation of the prime minister, the individual ministers to head each of the government departments. The cabinet is selected from among the members of the House of Representatives, the number of which may vary between 65 and 69 members elected on the basis of proportional representation. The Constitution provides for general elections to be held at least every five years. Candidates are elected by the Single Transferable Vote system, where the surplus votes of an elected candidate are transferred to the candidate receiving the second preference votes. The process of vote transfers continues until all five can-

didates for a district are elected. Malta's judiciary is independent. The chief justice and 18 judges, one of whom is currently serving in an international court, are appointed by the president on the advice of the prime minister after consultation with the leader of the opposition. Their mandatory retirement age is 65. The highest court, the Constitutional Court, hears appeals in cases involving violations of human rights, interpretation of the constitution, and invalidity of laws. It also has jurisdiction in cases concerning disputed parliamentary elections and electoral corrupt practices. There is a civil court, a family court, and a criminal court. In the latter, the presiding judge sits with a jury of nine. The court of appeal hears appeals from decisions of the civil court and of various boards and tribunals, including the Industrial, Small Claims, and Consumers' Tribunal. The court of criminal appeal hears appeals from judgments of conviction by the criminal court. There are also inferior courts presided over by a magistrate. The Local Councils Act, 1993 divided Malta into 68 localities, 14 of them in the smaller island of Gozo. Councilors are elected every three years by inhabitants who are registered as voters in the Electoral Register.

Elections are held by means of the system of proportional representation using the single transferable vote. The Mayor is the head of the Local Council and the representative of the Council for all effects under the Act. The Executive Secretary, who is appointed by the Council, is the executive, administrative, and financial head of the Council. All decisions are taken collectively with the other members of the Council. Local Councils are responsible for the general upkeep and embellishment of the locality, local wardens, and refuse collection; they carry out general administrative duties for the Central Government, such as collection of Government rents and funds and answering Government-related public inquiries. The Act also provides for Councils to make, amend and revoke by-laws as necessary for the better execution of the Councils' functions and to improve the localities' environment.

POLITICAL CONDITIONS

Two parties dominate Malta's polarized and evenly divided politics—the Nationalist Party, led by Prime Minister Lawrence Gonzi, and the Malta Labor Party. Elections invariably generate a widespread voter turnout; in March 2008 the turnout was 93%.

The margin between the two parties is so narrow that a 52% share of the votes is considered a "landslide" for the winning party. In the March 2008 elections, the Nationalist Party won reelection with 49.3% of the vote, earning it 35 seats, while the Labor Party received 48.8% of the vote (and 34 seats). While the two main parties dominate, two other parties were on the ballot in 2008, Alternative Demokratika (Green Party) and Azzjoni Nazzjonali (National Action); neither managed to secure a seat in parliament.

The first elections of European Parliament MPs were held on June 12, 2004 and resulted in the election of two candidates from the governing Nationalist Party and three from the opposition Malta Labor Party.

ECONOMY

During the first eight months of 2007, economic growth increased by 3.6%. Possessing few indigenous raw materials and a very small domestic market, Malta has based its economic development on the promotion of tourism, accounting for roughly 30% of GDP, and exports of manufactured goods, mainly semi-conductors, which account for some 75% of total Maltese exports. Since the beginning of the 1990s, expansion in these activities has been the principal engine for strong growth in the Maltese economy.

Tourist arrivals and foreign exchange earnings derived from tourism have steadily increased since the late 1970s. The introduction of low-cost flights in 2007 was the main contributor to the 7.6% increase in tourist arrivals since January 2007. Many cruise lines have also added Malta as a destination in 2007, and the sector has seen a 26.6% increase since January 2007. The relatively flexible labor markets kept unemployment fairly steady at 3.9% between January-June 2007. With its highly educated, English-speaking population, Malta has seen growth in high value-added manufacturing and in the services sector, away from the traditional low-cost manufacturing in textiles. The banking system remains highly concentrated with two of the four local commercial banks accounting for about 90% of total loans and deposits.

The Maltese Government has pursued a policy of gradual economic liberalization, taking some steps to shift the emphasis in trade and financial policies from reliance on direct government intervention and control to policy regimes that allow a greater role for market mechanisms. Malta's accession into the EU marked the total dismantling of protective import levies on industrial products, increasing the outward orientation of the economy. Malta joined the Exchange Rate Mechanism II (ERM-II) in 2005 to put itself on the path to enter the Eurozone, and in January 2008 it formally adopted the Euro as its official currency. Consolidation of public finances has improved over recent years. The budget deficit was brought down from 10.7% of GDP in 1998 to 2.5% of GDP in 2006, a figure that was below the 3% required by the Maastricht criteria. For this reason the European Commission abrogated the excessive deficit procedure for Malta earlier in 2007. The budget deficit for 2007 was estimated to be 1.6% of GDP.

FOREIGN RELATIONS

Malta's diplomatic and consular representation includes accreditation to 152 foreign countries and international organizations. Malta is host to 20 resident diplomatic missions, and 112 countries have non-resident diplomatic representation. With its central location in the Mediterranean, Malta has long viewed itself as a bridge between Europe and North Africa, particularly Libya, with whom it has enjoyed positive diplomatic and commercial ties. Malta is one of the southernmost points of the European Union. Malta continues to be an active participant in the United Nations, the Commonwealth, the Council of Europe, OSCE, and various other international organizations. In these fora, Malta has frequently expressed its concern for the peace and economic development of the Mediterranean region. The Nationalist Party government is continuing a policy of neutrality and nonalignment but in a Western context. The government desires close relations with the United States, with an emphasis on increased trade and private investment. U.S. Navy ships resumed liberty calls in 1992 and currently visit on a regular basis.

U.S.-MALTESE RELATIONS

Malta and the United States established full diplomatic relations upon Malta's independence in 1964; overall relations are currently active and cordial. The United States has been sympathetic to Malta's campaign to attract private investment, and some firms operating in Malta have U.S. ownership or investment. These include major hotels, manufacturing and repair facilities, and some offices servicing local and regional operations.

TRAVEL

Consular Information Sheet

November 26, 2008

Country Description: Malta is a small, developed, democratic Mediterranean island nation, positioned as a cultural stepping-stone between Europe and North Africa. Malta became a member of the European Union with nine other new member states on May 1, 2004, and became a full member of the Schengen area in March 2008. Tourist facilities of all categories are widely available.

Entry Requirements: Malta is a party to the Schengen agreement. As such, U.S. citizens may enter Malta for up to 90 days for tourist or business purposes without a visa. The passport should be valid for at least three months beyond the period of stay. For further details about travel into and within Schengen countries, please see our fact sheet. For further information concerning entry requirements for Malta, travelers should contact the Embassy of Malta at 2017 Connecticut Avenue, NW, Washington DC 20008, tel.: (202) 462-3611, website: http://www.foreign.gov.mt, or the Maltese Consulate in New York City, tel.: (212) 725-2345.

Safety and Security: Malta remains largely free of terrorist incidents. No indigenous terrorist or extremist groups are known to be active in Malta, and no foreign terrorist organization has carried out an attack against U.S. interests in Malta in recent years. Americans are reminded to remain vigilant with regard to their personal security and to exercise caution.

For the latest security information, Americans traveling abroad should regularly monitor the Department's Internet web site at http://travel.state.gov where the current Travel Warnings and Travel Alerts, including the Worldwide Caution Travel Alert, can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S., or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: Malta has a low rate of violent crime. Theft of unattended personal property and car stereos from vehicles is a common problem. Visitors are strongly encouraged to secure their valuables, and be aware of pickpockets and purse snatchers. Such criminals focus on areas and establishments frequented by tourists. Caution is particularly urged in the Paceville nightclub area, where excessive drinking and poor crowd control have led to instances of violent behavior. Poverty, homelessness, and panhandling are almost nonexistent in Malta. All visitors to Malta should practice the same good, common sense personal security precautions that are part of everyday life in urban areas within the U.S., particularly when spending time in areas frequented by tourists.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed. The crime victim's assistance agency is 'APPOGG'-Support Line, tel: 179; web site: www.appogg.gov.mt.

The local equivalents to the "911" emergency line in Malta are: Police 191; Ambulance 196; Fire 199.

Medical Facilities and Health Information: Medical care is available through public and private hospitals. The quality of medical care in Malta is excellent. Private hospitals generally offer a higher standard of service than the public hospitals, and the majority of the best doctors practice in private medical facilities.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's internet site at http://www.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) website at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Malta is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

Traffic in Malta flows on the left, requiring attentiveness and caution from visitors from right-hand drive countries such as the United States. In addition, drivers may be erratic or undisciplined. Roads flood easily, and are often narrow, winding, and congested, with poor visibility around curves. Traffic arteries are prone to bottlenecks and accidents.

Buses are the primary means of public transportation. Though the bus fleet is being modernized, most buses are old, cramped, and not air-conditioned. Taxis are safe but expensive and are not metered; it is a good practice to agree with the driver in

advance on the charge. There is a Malta Tourist Information Office located at Freedom Square Valletta, Tel. No. 21-237-747, web site: www.mta.co.mt. Road safety information can be obtain through the Ministry for Urban Development & Roads web site at www.mudr.gov.mt.

Aviation Safety Oversight: The U.S. Federal Aviation Administration (FAA) has assessed the Government of Malta's Civil Aviation Authority as being in compliance with International Civil Aviation Organization (ICAO) aviation safety standards for oversight of Malta's air carrier operations. For more information, travelers may visit the FAA's internet web site at http://www.faa.gov.

Special Circumstances: Malta customs authorities may enforce strict regulations concerning currency restrictions and temporary importation into or export from Malta of items such as firearms, antiquities, and any item that might be deemed to have resalable value. It is advisable to contact the Embassy of Malta in Washington or the Consulate of Malta in New York City for specific information regarding customs requirements. Malta's customs authorities encourage the use of an ATA (Admission Temporaire/Temporary Admission) Carnet for the temporary admission of professional equipment, commercial samples, and/or goods for exhibitions and fair purposes. ATA Carnet Headquarters located at U.S. Council for International Business, 1212 Avenue of the Americas, New York, N.Y. 10036, issues and guarantees the ATA Carnet in the United States. For additional information call (212) 354-4480, send an e-mail to atacarnet@uscib.org or visit http://uscib.org for details.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating Malta's laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Malta are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in illicit sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in Malta are encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration website and to obtain updated information on travel and security within Malta. Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency. The U.S. Embassy is on the third floor of the Development House, St. Anne Street, Floriana, Valletta, telephone (356) 2561-4000. The Consular Section's telephone number is (356) 2156-4115, fax: (356) 2124-3229, web site: http://malta.usembassy.gov.

Intercountry Adoption

August 2006

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is based on public sources and current understanding. Questions involving foreign and U.S. immigration laws and legal interpretation should be addressed respectively to qualified foreign or U.S. legal counsel.

Adoption Authority: The adoption authority in Malta is:

Department for Social Welfare Standard
Adoption Unit, Ministry for Families and Social Solidarity,
469, St. Joseph High Road
Santa Venera, Malta
Contact Person: Ms. Laura Aguis
email: laura.agius@gov.mt
Telephone:
(356) 21441311; 21470877
Fax: (356) 21- 447611

Eligibility Requirements for Adoptive Parents: Adoptions in Malta are regulated by the Civil Code dating from 1962. The laws take into account developments in child welfare and suitability of pre-placement and placement. The following persons are eligible to apply to adopt a child:

- Single persons who have reached the age of thirty and have not attained the age of sixty.
- A couple who has been married and living together for at least five years. One of the spouses attained the age of thirty but has not reached the age of sixty.

Residency Requirements: Prospective adoptive parents must be residents of Malta.

Adoption Agencies and Attorneys: Those interested in adoption in Malta should refer directly to the Ministry for the Family and Social Solidarity. For attorneys with relevant experience and expertise please consult the attorneys list on the American Embassy Website: http://valletta.usembassy.gov.

Adoption Fees: No processing fees are incurred in making use of the service of the Department of Family Welfare, Adoption Unit.

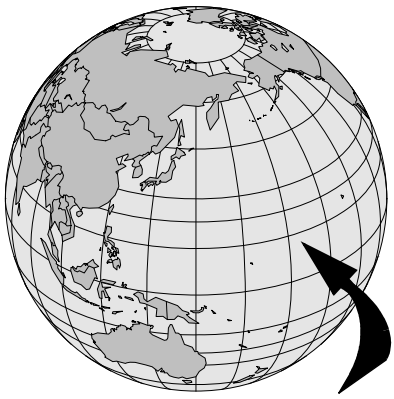
Adoption Procedures: Persons interested in adopting a child should

seek the advice of the Department for Social Welfare on the proper procedures to be adopted. All prospective adoptive parents will be required to attend preparation group sessions and a subsequent assessment. The preparatory group sessions and assessment normally takes seven to ten weeks to complete.

A declaration of eligibility and suitability is issued in favor of applicants who are deemed eligible as stipulated by the Civil Code and by a social worker following submission of the home study report.

Required Documents:

- Government issued certified copy of birth certificate/s from the Government of Malta Public Registry;
- Government issued certified copy of marriage certificate from the Government of Malta Public Registry;
- Certificate/s of conduct from the police;
- Blood test for HIV and hepatitis;
- Medical report/s by a family doctor on a form obtainable from the Adoption Unit;
- Photos of the applicants: sized 40mm x 30mm, colored with a white background;
- Statement of family income from the Government of Malta Inland Revenue Service for the previous tax year.



Embassy of Malta
2017 Connecticut Avenue, N.W.
Washington, D.C. 20008

Fax: (356) 21 243229
E-mail: usembmalta@state.gov

Consulate General of the United States
Piazza della Repubblica
80122 Napoli, Italy
Tel. (+39) 081.5838.111
Fax (+39) 081.7611.869

Additional Information: Specific questions about adoption in Malta may be addressed to the U.S. Embassy in Malta. General questions regarding intercountry adoption may be addressed to the Office of Children's Issues, U.S. Department of State, CA/OCS/CI, SA-29, 4th Floor, 2201 C Street, NW, Washington, D.C. 20520-4818, toll-free Tel: 1-888-407-4747.

MARSHALL ISLANDS

Compiled from the July 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Republic of the Marshall Islands

PROFILE

Geography

Area: 181 sq. km. (about 70 sq. mi.) of land area scattered over 750,000 sq. mi. of the Western Pacific.

Cities: Capital—Majuro (pop. 25,000 in 2005). Other towns—Ebeye (12,000 in 2005), Jaluit (1,700 est. 2005).

Terrain: 29 low-lying coral atolls and five single islands.

Climate: Tropical with a wet season from May to November.

People

Nationality: Noun and adjective—Marshallese.

Population: (2006 est.) 52,338. (Figures do not include Marshallese in the U.S., where colonies of unknown sizes exist.)

Annual growth rate: (2006) 0.7% (due to high annual emigration).

Ethnic groups: 90% Marshallese, 10% estimated U.S., Filipino, Chinese, New Zealander, Australian, other Micronesian (FSM), Kiribati, Korean, and Fijian.

Religions: Christian, mostly Protestant.

Languages: Two major Marshallese dialects from Malayo-Polynesian family; English;

Education: Literacy (2002)—98% (officially based on question, "Do you read the bible?").

Health: Infant mortality rate—(2006) 3.0% Majuro and Ebeye, 9.4% on outer atolls. Life expectancy—men 65.7 yrs.; women 69.4 yrs.

Work force: (2006) 25,706 of working age: 39% employed, 61% unemployed or inactive. National and local government and government enterprises—45.9%; private enterprise and non-profits—41%; USAKA and foreign embassies—13%.

Government

Type: Parliamentary democracy in free association with the U.S. A Compact of Free Association entered into force in 1986 and an Amended Compact entered into force May 1, 2004.

Independence: October 21, 1986 from the U.S.-administered UN trusteeship.

Constitution: May 1, 1979.

Government branches: Executive—president (chief of state), cabinet. Legislative—unicameral parliament (Nitijela) and consultative Council of Iroij (traditional leaders). Judicial—Supreme Court, high court, district and community courts, traditional rights court.

Political parties: United Democratic Party and United People's Party.

Suffrage: Universal at age 18.

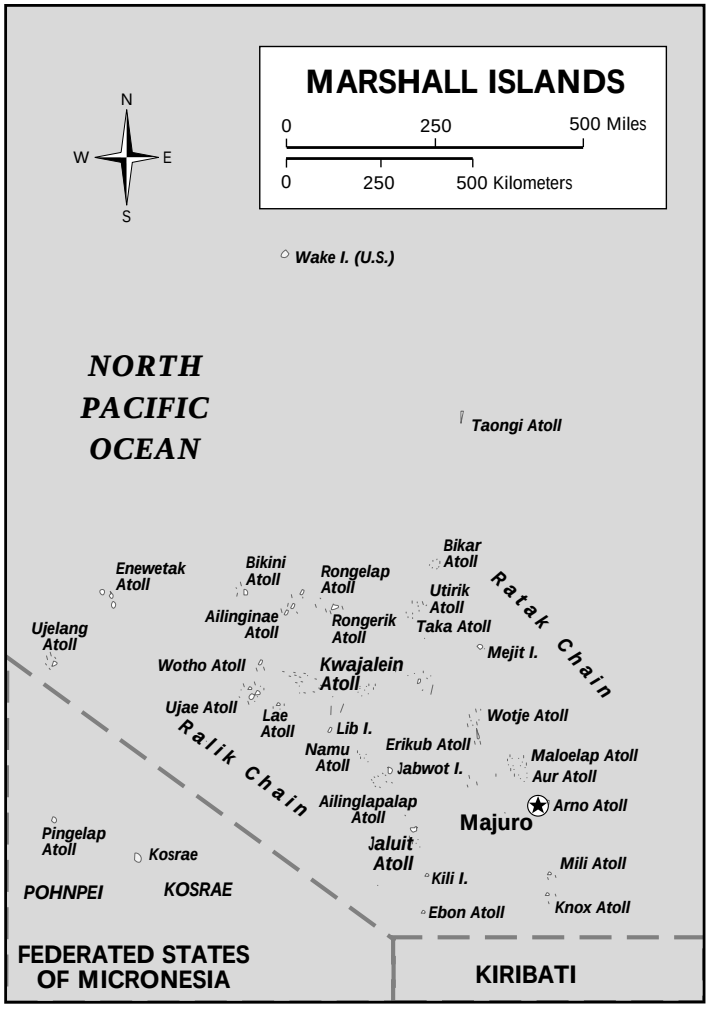
Political subdivisions: 24 local governments.

Economy

GDP: (current market prices, 2007) $149.5 million est.

Natural resources: Marine resources, including mariculture and possible deep seabed minerals.

Agriculture: Products—Copra (dried coconut meat); taro and breadfruit are subsistence crops.



Industry: Types—Copra processing, fish processing, tourism, pearl farming, handicrafts.

Trade: Major trading partners—U.S., Japan, Australia, China, Hong Kong, New Zealand, Taiwan.

Currency: U.S. dollar.

GEOGRAPHY AND PEOPLE

The Marshall Islands is comprised of 29 atolls and five single islands, which form two parallel groups—the "Ratak" (sunrise) chain and the "Ralik" (sunset) chain. Two-thirds of the nation's population lives in Majuro and Ebeye. The outer islands are sparsely populated due to lack of employment opportunities and economic development. The Marshallese are of Micronesian origin, which is traced to a combination of peoples who emigrated from Southeast Asia

in the remote past. The matrilineal Marshallese culture revolves around a complex system of clans and lineages tied to land ownership.

Virtually all Marshallese are Christian, most of them Protestant. Other Christian denominations include Roman Catholic, Seventh-day Adventist, Mormon, Salvation Army, and Jehovah's Witness. A small Bahai community also exists.

Marshallese is the official language. English is spoken to some extent by most of the adult urban population. However, both the Nitijela (parliament) and national radio use Marshallese. The public school system provides education through grade 12, although admission to secondary school is selective. The elementary program employs a bilingual/bicultural curriculum. English is introduced in the fourth grade. Many Marshallese and American observers have lamented the poor state of the public education system as a major stumbling block to economic development.

The Marshall Islands' largest secondary institution—the 2-year College of the Marshall Islands—has experienced U.S. accreditation problems since 2003. However, thanks to an increase in funding, it has shown steady improvement since and is heading toward full accreditation. The University of the South Pacific offers courses at a small campus on Majuro.

HISTORY

Little is clearly understood about the prehistory of the Marshall Islands. Researchers agree on little more than that successive waves of migratory peoples from Southeast Asia spread across the Western Pacific about 3,000 years ago and that some of them landed on and remained on these islands. The Spanish explorer de Saavedra landed there in 1529. They were named for English explorer John Marshall, who visited them in 1799. The Marshall Islands were claimed by Spain in 1874. Germany established a protectorate in 1885 and set up trading stations on the islands of Jaluit and Ebon to carry out the flourishing copra (dried coconut meat) trade. Marshallese Iroij (high chiefs) continued to rule under indirect colonial German administration.

At the beginning of World War I, Japan assumed control of the Marshall Islands. Their headquarters remained at the German center of administration, Jaluit. U.S. Marines and Army troops took control from the Japanese in early 1944, following intense fighting on Kwajalein and Enewetak atolls. In 1947, the United States, as the occupying power, entered into an agreement with the UN Security Council to administer Micronesia, including the Marshall Islands, as the Trust Territory of the Pacific Islands. On May 1, 1979, in recognition of the evolving political status of the Marshall Islands, the United States recognized the constitution of the Marshall Islands and the establishment of the Government of the Republic of the Marshall Islands. The constitution incorporates both American and British constitutional concepts.

GOVERNMENT

The legislative branch of the government consists of the Nitijela (parliament) with an advisory council of high chiefs. The Nitijela has 33 members from 24 districts elected for concurrent 4-year terms. Members are called senators. The president is

elected by the Nitijela from among its members. Presidents pick cabinet members from the Nitijela. Amata Kabua was elected as the first president of the republic in 1979. Subsequently, he was re-elected to 4-year terms in 1983, 1987, 1991, and 1996. After Amata Kabua's death in office, his first cousin, Imata Kabua, won a special election in 1997. The third president, Kessai Note, served two 4-year terms from 2000 to 2008. The current president was elected in January 2008. The Republic of the Marshall Islands has four court systems: Supreme Court, high court, district and community courts, and the traditional rights court. Trial is by jury or judge. Jurisdiction of the traditional rights court is limited to cases involving titles or land rights or other disputes arising from customary law and traditional practice.

The Republic of the Marshall Islands maintains an embassy at 2433 Massachusetts Avenue NW, Washington, DC 20008 (tel. 202-234-5414). It has a consulate at 1888 Lusitana St., Suite 301, Honolulu, HI 96813 (tel. 808-545-7767), and small embassies in Tokyo, Suva, and Taipei. The Marshall Islands' mission to the United Nations is located at the News Building, 220 E. 42nd St., 31st Floor, New York, NY 10017 (tel. 212-983-3040).

POLITICAL CONDITIONS

Citizens of the Marshall Islands live with a relatively new democratic political system combined with a hierarchical traditional culture. The first two presidents were chiefs. Former President Kessai Note is a commoner. The current president, Litokwa Tomeing, is a traditional chief. There have been a number of local and national elections since the Republic of the Marshall Islands was founded, and in general, democracy has functioned well. The United Democratic Party, running on a reform platform, won the 1999 parliamentary election, taking control of the presidency and cabinet. Elections on November 19, 2007 elected a new Nitijela that took office in January 2008, giving control of the government to the opposition.

ECONOMY

The government is the largest employer, employing 46% of the salaried work force. GDP is derived mainly from payments made by the United States under the terms of the Compact of Free Association. Direct U.S. aid accounted for 60.2% of the Marshall Islands' $124.6 million budget for FY 2007.

The economy combines a small subsistence sector and a modern urban sector. In short, fishing and breadfruit, banana, taro, and pandanus cultivation constitute the subsistence sector. On the outer islands, production of copra and handicrafts provides some cash income. The modern service-oriented economy is located in Majuro and Ebeye. It is sustained by government expenditures and the U.S. Army installation at Kwajalein Atoll. The airfield there also serves as a second national hub for international flights.

The modern sector consists of wholesale and retail trade; restaurants; banking and insurance; construction, repair, and professional services; and copra processing. Copra cake and oil are by far the nation's largest exports. A tuna loining plant that will employ 500 workers—starting at $1.50 per hour—reopened in early 2008. Copra production, the most important single commercial activity for the past 100 years, now depends on government subsidies. The subsidies, more a social policy than an economic strategy, are intended to help reduce migration from outer atolls to densely populated Majuro and Ebeye. Migration from the outer islands is estimated at 8% annually.

Marine resources, including fishing, aquaculture, tourism development, and agriculture, are top government development priorities. The Marshall Islands sells fishing rights to other nations as a source of income. Since 1990, the Marshall Islands has offered ship registrations under the Marshall Islands flag. It now registers about 1,400 vessels, the fourth-largest fleet in the world, and receives an income of approximately a million dollars annually. As a small nation, the Marshall Islands must import a wide variety of goods, including foodstuffs, consumer goods, machinery, and petroleum products.

FOREIGN RELATIONS

While the Government of the Marshall Islands is free to conduct its own foreign relations, it does so under the terms of the Compact of Free Association. Since independence, the Republic of the Marshall Islands has established relations with 67 nations, including most other Pacific Island nations. Regional cooperation, through membership in various regional and international organizations, is a key element in its foreign policy.

The Marshall Islands became a member of the United Nations in September 1991. The Marshall Islands maintains embassies in the U.S., Fiji, Japan, and Taiwan.

U.S.-MARSHALLESE RELATIONS

The Republic of the Marshall Islands is a sovereign nation in "free association" with the United States. After more than a decade of negotiation, the Marshall Islands and the United States signed the Compact of Free Association on June 25, 1983. The people of the Marshall Islands approved the Compact in a UN-observed plebiscite on September 7, 1983. The U.S. Congress subsequently approved the Compact, adding several amendments which were accepted by the Government of the Marshall Islands, and the Compact entered into force on October 21, 1986. From 1999-2003, the two nations negotiated an Amended Compact that entered into force on May 1, 2004. Under the Amended Compact, the U.S. will provide the Marshall Islands at least $57 million every year until 2023, including contributions to a jointly managed Trust Fund. Marshallese will continue to have access to many U.S. programs and services. A Joint Economic Management and Financial Accountability Committee (JEMFAC) comprised of representatives of both governments will ensure that Compact assistance funds are spent effectively.

Under the Compact, the United States has full authority and responsibility for security and defense of the Marshall Islands, and the Government of the Marshall Islands is obligated to refrain from taking actions that would be incompatible with these security and defense responsibilities.

The Department of Defense, under a subsidiary government-to-government agreement of the original Compact, has use of the lagoon and several islands on Kwajalein Atoll. The atoll consists of approximately 90 islets around the largest lagoon in the world. The original agreement allowed the United States continued use of the U.S. Army Kwajalein Atoll (USAKA) missile test range until 2016. An amendment to that agreement, extending U.S. rights until 2066 with an option until 2086, was negotiated in conjunction with the Amended Compact. Another major subsidiary agreement of the original Compact provides for settlement of all claims arising from the U.S. nuclear tests conducted at Bikini and Enewetak Atolls from 1946 to 1958. Under the terms of free association, more than 40 U.S. Government agencies such as the Federal Aviation Administration, U.S. Postal Service, the Small Business Administration, and the Federal Emergency Management Agency operate programs or render assistance to the Marshall Islands.

The United States and the Marshall Islands have full diplomatic relations. The Marshall Islands has expressed an interest in attracting U.S. investment.

TRAVEL

Consular Information Sheet

August 13, 2008

Country Description: The Republic of the Marshall Islands totals 70.5 square miles and is composed of two coral atoll chains in the Central Pacific. The Marshall Islands is a parliamentary democracy, and has signed a Compact of Free Association with the United States. It has a developing agrarian and service-oriented economy. Tourist facilities are not widely available, but those that exist are adequate. The capital, Majuro, has three major hotels. Several other atolls have limited guest quarters.

Entry Requirements: Visas are not required for U.S. citizens; U.S. citizens have liberal travel rights under the Compact of Free Association. There is a departure fee; diplomats are exempt. A health certificate is required if you are arriving from an area that is currently experiencing an epidemic. For visits over 30 days, an AIDS test may be required.

For further information on entry requirements for the Marshall Islands, please contact the Embassy of the Republic of the Marshall Islands, at 2433 Massachusetts Avenue NW, Washington, DC 20008. The telephone number is (202) 234-5414.

Safety and Security: Travel around the Marshall Islands is safe. Travelers should be aware that flights to outer islands are often cancelled, sometimes leaving visitors stranded. The Marshall Islands' reliance primarily on radio for communication among the remote outer islands causes some communication problems.

For the latest security information, Americans traveling abroad should regularly monitor the Department of State, Bureau of Consular Affairs' web site at http://travel.state.gov, where the current Travel Warnings and Travel Alerts, as well as the Worldwide Caution, can be found. Up-to-date information on security can also be obtained by calling 1-888-407-4747 toll free in the U.S. and Canada, or, for callers outside the U.S. and Canada, a regular toll line at 1-202-501-4444.

Crime: The Marshall Islands has a relatively low crime rate. The most common crimes are break-ins and

thefts from homes, hotel rooms, and vehicles, as well as occasional random acts of vandalism. There have been a few recent but isolated incidents in which U.S. citizens and other foreigners were assaulted. Travelers are advised to keep their hotel rooms or residences locked at all times. Occasionally fights and assaults do occur at nightclubs and bars. Visitors to those establishments, especially late in the evening, should be extra vigilant to ensure their personal security.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, to contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney, if needed.

The local equivalent to the "911" emergency line for Police, Fire or Medical in the Marshall Islands is: 911 or 1911.

Medical Facilities and Health Information: Health facilities in the Marshall Islands are adequate for routine medical problems, but they are available only on Majuro and Ebeye. Majuro has a private clinic and a new public hospital. Ebeye has a public hospital. Most outer islands have medical dispensaries. Serious medical problems requiring hospitalization and/or medical evacuation to the United States can cost thousands of dollars. Doctors and hospitals often expect immediate cash payment for health services.

Some HIV/AIDS entry restrictions exist for visitors to and foreign residents of the Republic of the Marshall Islands. However, medical restrictions generally do not apply to U.S. citizens entering the Marshall Islands under Free Association status. Please verify this information with the Embassy of the Republic of the Marshall Islands at www.rmiembassyus.org before you travel.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning the Marshall Islands is provided for general reference only, and it may not be totally accurate in a particular location or circumstance.

Majuro atoll has a paved road, but there are few traffic signs and no traffic lights. Drivers should be alert for animals roaming the streets and children darting onto the roads. Drinking and driving is common, especially on the weekends, so drivers should use caution. Walking beside the street can be dangerous due to poor lighting, absence of sidewalks and drivers who may have been drinking and driving.

Vehicle traffic proceeds slowly, rarely over 25 miles per hour. Some roads experience temporary flooding after heavy rains. Since there are few streetlights, visibility is poor, and night driving requires special caution. For specific information concerning drivers' permits, vehicle inspection, road tax and mandatory insurance, please contact the Republic of the Marshall Islands' Embassy in Washington, D.C.

Aviation Safety Oversight: The U.S. Federal Aviation Administration (FAA) has assessed the Government of the Marshall Islands' Civil Aviation Authority as being in compliance with International Civil Aviation Organization (ICAO) aviation safety standards for oversight of the Marshall Islands' air carrier operations. For further information, travelers may visit the FAA's web site at http://www.faa.gov.

Special Circumstances: The Republic of the Marshall Islands uses U.S. currency. Most hotels and a few restaurants accept VISA, MasterCard and American Express credit cards. Local telephone service as well as international long distance to anywhere worldwide is available on Majuro and Ebeye. Internet service is also available but can be expensive and it is usually dial up.

Customs authorities of the Marshall Islands strictly prohibit the importation of firearms, ammunition, explosives and indecent publications. Certification from the Quarantine Division is required to import animals, plants and fruits. It is advisable to contact the Embassy of the Republic of the Marshall Islands in Washington, D.C., or one of the Marshall Islands' Consulates in the United States for specific information regarding customs requirements,especially when dealing with the importation of animals into the Marshall Islands.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under the U.S. law. Penalties for breaking the law can be more severe than those in the United States for similar offenses. Persons violating Marshall Islands' laws, even unknowingly, may be expelled, arrested, or imprisoned. Penalties for possession of, use of, or trafficking in illegal drugs in the Marshall Islands are strict and convicted offenders can expect jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children

and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living in or visiting the Marshall Islands are encouraged to register with the U.S. Embassy in Majuro through the State Department's travel registration web site so that they can obtain updated information on travel and security within Marshall Islands. Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate.

By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency. The U.S. Embassy does not have a street address in Majuro. The Embassy is located on the ocean-side of the island's road, approximately 2 miles east of the airport. The U.S. Embassy's mailing address is PO Box 1379, Majuro, MH 96960-1379. The telephone number is (692) 247-4011. The fax number is (692) 247-4012. The U.S. Embassy web site is http://majuro.usembassy.gov.

MAURITANIA

Compiled from the December 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Islamic Republic of Mauritania

PROFILE

Geography

Area: 1,030,070 sq. km. (419,212 sq. mi.); slightly larger than Texas and New Mexico combined.
Cities: (2004) Capital—Nouakchott (pop. 708,000). Other cities—Nouadhibou (72,000), Rosso (50,000), Kaedi (34,000), Zouerate (34,000), Kiffa (33,000), Atar (24,000).
Terrain: Northern four-fifths barren desert; southern 20% mainly Sahelian with small-scale irrigated and rain-fed agriculture in the Senegal River basin.
Climate: Predominantly hot and dry.

People

Nationality: Noun and adjective—Mauritanian(s).
Population: (2007) 2,961,000.
Annual growth rate: 2.5%.
Ethnic groups: Arab-Berber (White Moor), Arab-Berber-Negroid (Black Moor), Haalpulaar, Soninke, Wolof (Black African Mauritanians).
Religions: Islam.
Languages: Arabic (official), Hassaniya (Arabic dialect), French, Pulaar, Wolof, and Soninke.
Education: Years compulsory—six. Attendance (student population enrolled in primary school)—82%. Adult literacy (% of population age 15+)—59%.
Health: Infant mortality rate—67/1,000. Life expectancy—64 yrs.
Work force: Agriculture and fisheries—50%. Services and commerce—20%. Government—20%. Industry and transportation—10%.

Government

Type: Republic.
Independence: November 28, 1960.
Constitution: Approved 1991. Original constitution promulgated 1961.
Government branches: Executive—president (head of state). Legislative—bicameral national assembly, directly elected lower house (81 members), and upper house (56 members) chosen indirectly by municipal councilors. Judicial—a supreme court and lower courts are nominally independent but subject to control of executive branch; judicial decisions are rendered mainly on the basis of Shari'a (Islamic law) for social/family matters and a western style legal code, applied in commercial and some criminal cases.
Political parties: 21.
Suffrage: Universal at 18.
National day: November 28, Independence Day.

Economy

GDP: (2007) $2.8 billion.
Annual growth rate: (2007) 1.9%.
Per capita income: (2006) $952.
Natural resources: petroleum, fish, iron ore, gypsum, copper, gum Arabic, phosphates, salt and gold.
Agriculture: (13% of GDP 2007) Products—livestock, traditional fisheries, millet, maize, wheat, dates, rice.
Industry: (47% of GDP 2007) Types—mining, commercial fishing.
Services: (41% of GDP 2007).
Trade: Exports (f.o.b.)—(2006, f.o.b.)—$1.4 billion: iron ore, fish and fish products, gold, copper, petroleum. Export partners (2007)—China 30.5%, France 9.5%, Italy 8.6%, Spain 8.5%, Japan 5.5%, Netherlands 5.3%, Belgium 5%, Cote d'Ivoire 4.7%. Imports (2006)—$1.5 billion: machinery and equipment, petroleum products, capital goods, foodstuffs, consumer goods. Import partners (2007)—France 16.7%, China 8.2%, Spain 6.8%, U.S. 6.2%, Belgium 5.8%, Brazil 5.5%.
Currency: Ouguiya (UM).
USAID: Total FY 2008 USAID development and security assistance to Mauritania—$21,106,735.

HISTORY

From the 3rd to 7th centuries, the migration of Berber tribes from North Africa displaced the Bafours, the original inhabitants of present-day Mauritania and the ancestors of the Soninke. Continued Arab-Berber

migration drove indigenous black Africans south to the Senegal River or enslaved them. By 1076, Islamic warrior monks (Almoravid or Al Murabitun) completed the conquest of southern Mauritania, defeating the ancient Ghana empire. Over the next 500 years, Arabs overcame fierce Berber resistance to dominate Mauritania. The Mauritanian Thirty-Year War (1644-74) was the unsuccessful final Berber effort to repel the Maqil Arab invaders led by the Beni Hassan tribe. The descendants of Beni Hassan warriors became the upper stratum of Moorish society. Berbers retained influence by producing the majority of the region's Marabouts—those who preserve and teach Islamic tradition. Hassaniya, a mainly oral, Berber-influenced Arabic dialect that derives its name from the Beni Hassan tribe, became the dominant language among the largely nomadic population. Within Moorish society, aristocratic and servant classes developed, yielding "white" (aristocracy) and "black" Moors (the enslaved indigenous class).

French colonization at the beginning of the 20th century brought legal prohibitions against slavery and an end to interclan warfare. During the colonial period, the population remained nomadic, but sedentary black Africans, whose ancestors had been expelled centuries earlier by the Moors, began to trickle back into southern Mauritania. As the country gained independence in 1960, the capital city of Nouakchott was founded at the site of a small colonial village. Ninety percent of the population was still nomadic. With independence, larger numbers of ethnic Sub-Saharan Africans (Haalpulaar, Soninke, and Wolof) entered Mauritania, moving into the area north of the Senegal River. Educated in French, many of these recent arrivals became clerks, soldiers, and administrators in the new state.

Moors reacted to this change by trying to Arabicize much of Mauritanian life, such as law and language. A schism developed between those who considered Mauritania to be an Arab country (mainly Moors) and those who sought a dominant role for the Sub-Saharan peoples. The discord between these two conflicting visions of Mauritanian society was evident during intercommunal violence that broke out in April 1989 (the "1989 Events").

The country's first president, Moktar Ould Daddah, served from independence until ousted in a bloodless coup on July 10, 1978. Mauritania was under military rule from 1978 to 1992, when the country's first multiparty elections were held following the July 1991 approval by referendum of a constitution.

The Democratic and Social Republican Party (PRDS), led by President Maaouiya Ould Sid'Ahmed Taya, dominated Mauritanian politics from April 1992 until he was overthrown in August 2005. President Taya, who won elections in 1992 and 1997, first became chief of state through a December 12, 1984 bloodless coup which made him chairman of the committee of military officers that governed Mauritania from July 1978 to April 1992. A group of current and former Army officers launched a bloody but unsuccessful coup attempt on June 8, 2003.

On November 7, 2003, Mauritania's third presidential election since adopting the democratic process in 1992 took place. Incumbent President Taya was reelected. Several opposition groups alleged that the government had used fraudulent means to win the elections, but did not elect to pursue their grievances via available legal channels. The elections incorporated safeguards first adopted in 2001 municipal elections—published voter lists and hard-to-falsify voter identification cards.

On August 3, 2005, President Taya was deposed in a bloodless coup. Military commanders, led by Colonel Ely Ould Mohammed Fal (alternative spelling: Vall) seized power while President Taya was attending the funeral of Saudi Arabia's King Fahd. Colonel Fal established the ruling Military Council for Justice and Democracy to run the country. The council dissolved the Parliament and appointed a transitional government. The Transitional Government quickly established a timetable for the establishment of democratic rule within two years' time that led to successful parliamentary elections in November 2006 and presidential elections in March 2007. A new democratically elected government under President Sidi Mohamed Ould Cheikh Abdallahi was inaugurated on April 19, 2007.

On August 6, 2008, President Abdallahi was overthrown in a bloodless coup. General Mohamed Ould Abdel Aziz seized power after President Abdallahi issued a decree dismissing General Aziz and three other senior military officers. The country is currently run by a 12-member "High State Council" composed entirely of military officers. As of mid-December 2008, President Abdallahi remained under house arrest in his native village of Lemden.

GOVERNMENT AND POLITICAL CONDITIONS

Mauritania held a series of elections that began in November 2006 with a parliamentary vote and culminated March 25, 2007 with the second round of the presidential election. Sidi Ould Cheikh Abdellahi was elected President and took office on April 19, 2007. After almost 16 months of civilian rule, President Abdallahi was deposed on August 6, 2008 by a military-led coup, throwing the future of Mauritania's new-found democracy into doubt.

The government bureaucracy is composed of ministries, special agencies, and parastatal companies. The Ministry of Interior controls a system of regional governors and prefects modeled on the French system of local administration.

Under this system, Mauritania is divided into 13 regions (wilaya), including the capital district, Nouakchott. Control is tightly concentrated in the executive branch of the central government, but a series

of national and municipal elections since 1992 have produced some decentralization.

Politics in Mauritania have always been heavily influenced by personalities, with any leader's ability to exercise political power dependent upon control over resources; perceived ability or integrity; and tribal, ethnic, family, and personal considerations. Conflict among White Moor, Black Moor, and Black African Mauritanian groups, centering on language, land tenure, and other issues, continues to be a major challenge to national unity. Political parties, illegal during the military period, were legalized again in 1991.

Principal Government Officials

Mauritania maintains an embassy in the United States at 2129 Leroy Place NW, Washington, DC 20008 (tel. 202-232-5700, fax 202-232-5701) and a Permanent Mission to the United Nations at 211 East 43rd Street, Suite 2000, New York, NY 10017 (tel. 212-986-7963, fax 212-986-8419).

U.S.-MAURITANIAN RELATIONS

The United States strongly condemns the military coup that overthrew the legitimate and democratically-elected president in 2008. Furthermore, the United States considers the "High State Council" and its cabinet to be illegitimate and undemocratic. As a result, non-humanitarian U.S. Government aid to Mauritania has been suspended, and travel restrictions have been placed on military and civilian individuals who are obstructing the return to democratic government. The United States continues to call for the unconditional release of President Abdallahi, and for an immediate return to constitutional order.

The U.S. Government fully supported Mauritania's transition to democracy, and congratulated Mauritania on the successful series of 2006-2007 parliamentary and presidential elections. The U.S. condemned the August 2005 coup and the unconstitutional assumption of power by the Military Council for Justice and Democracy, and called for a return to a constitutional government through free and fair elections as soon as possible. The United States provided election-related assistance for voter education, political party training, and democracy building.

Before the 2005 coup, U.S.-Mauritania relations were excellent, but underwent several transformations since Mauritania gained independence. From 1960 to 1967, the United States maintained cordial relations with Mauritania and provided a small amount of economic assistance. During the June 1967 Middle East war, Mauritania broke diplomatic and consular relations with the United States but restored ties 2 years later and maintained relatively friendly relations until the late 1980s, despite disagreement over the Arab-Israeli issue.

The 1989 rupture between Mauritania and Senegal (the "1989 Events") that resulted in Mauritania's deportation of tens of thousands of its own citizens to Senegal, negatively affected U.S.-Mauritanian relations. (The Mauritanian Government, assisted by the United Nations High Commissioner for Refugees (UNHCR), began repatriating refugees in early 2008.) Moreover, Mauritania's perceived support of Iraq prior to and during the 1991 Gulf war further weakened the strained ties.

Relations between the U.S. and Mauritania reached a low in the spring of 1991, as details of the Mauritanian military's role in widespread human rights abuses surfaced. The U.S. responded by formally halting USAID operations and all military assistance to Mauritania. Relations also suffered in the 1990s as a result of repeated reports that slavery continued in some parts of Mauritania despite legal proscriptions. By the late 1990s, the Mauritanian Government: adopted policies facilitating the

return of those expelled or who fled during the 1989 Events; turned away from Iraq and toward the West; and initiated a poverty reduction strategy while securing debt relief under the Heavily Indebted Poor Countries (HIPC) initiative. (See also Fact Sheet.) Improved relations with the United States, including the return of military cooperation and training programs, accompanied these changes. Mauritania formally opened diplomatic relations with Israel in 2000 and remains one of only three Arab League member-nations to have done so.

TRAVEL

Consular Information Sheet

September 23, 2008

Country Description: Mauritania is a developing country in northwestern Africa. Arabic is the official language, but French is widely used and several local languages are also spoken. Tourist facilities in the capital, Nouakchott, are adequate, but limited or non-existent elsewhere.

Entry Requirements: A passport and a visa are required, as is evidence of a yellow fever vaccination. For the most current visa information, contact the Embassy of the Islamic Republic of Mauritania, 2129 Leroy Place NW, Washington, DC 20008, tel. (202) 232-5700, or the Mauritanian Permanent Mission to the UN, 211 East 43rd Street, Suite 2000, New York, NY 10017, telephone (212) 986-7963 or 8189, or e-mail Mauritania@ un.int. Overseas, inquiries should be made at the nearest Mauritanian embassy or consulate.

Safety and Security: There is increasing activity by the terrorist group Al Qaeda in the Islamic Maghreb (AQIM) in Mauritania. On December 24, 2007, terrorists shot and killed four French tourists and wounded a fifth near the town of Aleg, in southeastern Mauritania. On December 26, 2007, terrorists killed four soldiers near the town of El Ghallaouiya in northern Mauritania. These two attacks were followed by an attack on the Israeli Embassy and an adjoining nightclub frequented by westerners early in the morning of February 1, 2008. The perpetrators of these attacks are believed to be linked to AQIM. These are the first attacks that have occurred in Mauritania since June 2005, when members of the terrorist group GSPC (now known as AQIM) attacked a military outpost based at Lemgheity, near the Algerian and Malian borders. In the attack, they killed or wounded about 35 soldiers. Travelers should avoid all non-essential travel to the Hodh El Charghi region of southeastern Mauritania due to increased AQIM activities in the border area. Official Americans continue to travel to the town of Atar, although AQIM has also talked about targeting Westerners there. Travelers should check http://mauritania.usembassy.gov for current Consular Warden messages concerning Mauritania.

Travelers should exercise prudence and caution when traveling in Mauritania. They should not venture outside of urban areas unless in a convoy and accompanied by an experienced guide, and even then only if equipped with sturdy vehicles and ample provisions. The U.S. Embassy in Nouakchott has received reports of banditry and smuggling in the more remote parts of Mauritania. Landmines also remain a danger along the border with the Western Sahara and travelers should cross only at designated border posts. The U.S. Embassy recommends that travelers avoid travel in regions north and east of Zouerate, Ouadane, and Tichit unless with a government escort. Travelers planning overland trips from Mauritania to Morocco, Algeria, Senegal or Mali should check with the U.S. Embassy in Nouakchott before setting out. For more information about travel in Mauritania, please see the section "Traffic Safety and Road Conditions" below.

The Mauritanian military led a bloodless coup on August 6, 2008. There has been increased political unrest following the coup, but no violence. There have also been increased political gatherings and street demonstrations. The police have been using tear gas to break up some anti-coup demonstrations. An increased police presence and additional vehicle controls may also be expected. U.S. citizens should avoid large crowds and maintain security awareness at all times.

In Nouakchott and other major cities in Mauritania, there is an increased security presence and additional checkpoints. Police routinely conduct road blocks at which they may ask for proof of identity and drivers' licenses. These checkpoints should be respected. Americans visiting Mauritania should be prepared for such inquiries and carry their identification cards at all times. It is best to drive cautiously and be prepared to stop at short notice.

American citizens should be aware of their surroundings at all times and maintain good personal security practices, including always locking

their homes and cars. They should avoid established patterns and take care not to draw attention to themselves. When going out, they should avoid being part of large, highly visible groups of Westerners and when in restaurants or cafes, avoid sitting in areas that are easily visible from the street.

Although U.S. citizens are generally welcomed in Mauritania, there were reports of anti-American incidents such as threats and stoning of vehicles, following the 1998 U.S.- and British-led intervention in Iraq, and demonstrations outside the Embassy during the 2003 U.S. intervention in Iraq. Some Muslim extremists have occasionally perceived Christian nongovernmental organizations as a threat. However, local authorities closely monitor political violence and religious extremist groups.

For the latest security information, Americans traveling abroad should regularly monitor the Department of State, Bureau of Consular Affair's Internet site at http://travel.state.gov, where the current Travel Warnings and Travel Alerts, including the Worldwide Caution Travel Alert, can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S. and Canada or, for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: Crime in Mauritania is moderate but steadily increasing. Most incidents occur in the cities and larger towns, and are petty crimes such as pick pocketing and the theft of improperly secured and openly visible valuables left in vehicles. Most criminal activity occurs at night and walking alone at night is not advisable. Residential burglaries and robberies, particularly at the beaches in Nouakchott, are not uncommon. In Nouakchott, travelers should avoid the beach at night. During the day, beach-goers should travel in large groups or stay in popular areas because of the increase in the number of thefts and robberies, some involving injury to victims, reported there in the past several years. Violent crimes and crimes involving the use of weapons are rare, but increasing. Rapes and assaults have occurred and, in some instances, involved the American community. Foreign tourists, including Americans, might be targeted for kidnapping in Mauritania.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you in finding appropriate medical care, contact family members or friends, and explain how funds can be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

Medical Facilities and Health Information: Medical facilities in Mauritania are limited. There are few modern clinics or hospitals beyond the capital and a few major towns. At local pharmacies, some medicines are difficult to obtain; travelers are advised to bring their own supplies.

Malaria is a serious and sometimes fatal disease. Chloroquine-resistant P. falciparum malaria is a severe form of the disease that is found in many parts of western Africa, including Mauritania. Because travelers to Mauritania are at high risk for contracting malaria they should take one of the following anti-malarial drugs: mefloquine (Lariam), doxycycline, or atovaquone/proguanil (Malarone). The Centers for Disease Control and Prevention have determined that a traveler who is on an appropriate anti-malarial drug has a greatly reduced chance of contracting the disease. In addition, other personal protective measures, such as the use of insect repellents, may help to reduce malaria risk. Travelers who become ill with a fever or flu-like illness while traveling in a malaria-risk area and up to one year after returning home should seek prompt medical attention and tell the physician their travel history and what anti-malarial drugs they have been taking. For additional information on malaria, protection from insect bites, and antimalarial drugs, please visit the CDC travelers' health web site at http://wwwn.cdc.gov/travel.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's Internet site at http://wwwn.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Mauritania is provided for general reference only and may not be totally accurate in a particular location or circumstance.

Public transportation is not safe and road conditions in Mauritania are generally poor, particularly in the interior. Overland travel is difficult and roadside assistance is almost nonexistent. The country's size and harsh climate make road maintenance and repair especially problematic. Mauritania has only about 2,070 km (1,286 miles) of surfaced roads, 710 km (441 miles) of unsurfaced roads, and 5,140 km (3,194 miles) of unimproved tracks. Drivers should not offer rides to hitchhikers, nor

should visitors to Mauritania accept rides offered by strangers. The traditional route to Nouadhibou, prior to the completion of a paved road, was along the beach during low tide. Some travelers continue to use this route, as do visitors to coastal fishing villages and other points of interest, and smugglers and others who try to avoid the security checkpoints that are often established along the asphalt roads. Pedestrian visitors to the beach should exercise caution because of the beach's use as a route for motorized vehicles.

U.S. citizens traveling overland for long distances in Mauritania should travel in convoys and be sure to have suitable four-wheel drive vehicles, a local guide, an adequate supply of water and food, and a second fuel reservoir. Multiple vehicles are recommended in case of breakdown. A Global Position Satellite (GPS) receiver and satellite phone are essential when traveling in remote areas. Visitors are urged not to travel alone into the desert.

Driving in Mauritania is treacherous, and we encourage travelers to hire a trained local driver. Traffic patterns differ considerably from American-style "rules of the road," and many Mauritanians drive without regard to traffic signs or rules. Roadway obstructions and hazards caused by drifting sand, animals, and poor roads often plague motorists; when combined with the number of untrained drivers and poorly maintained vehicles, heightened caution is imperative at all times. Drivers should be alert to conditions and always wear their seat belts. Motorcycle and bicycle riders should wear helmets and protective clothing. Nighttime driving is discouraged.

The telecommunications infrastructure is limited and cellular telephone coverage is not wide spread. For those traveling outside the major urban areas, it is recommended to have a satellite telephone readily available.

Aviation Safety Oversight: As there is no direct commercial air service between the United States and Mauritania, the U.S. Federal Aviation Administration (FAA) has not assessed Mauritania's Civil Aviation Authority for compliance with International Civil Aviation Organization (ICAO) aviation safety standards. For more information, travelers may visit the FAA's internet website at http://www.faa.gov.

Special Circumstances: Mauritanian customs authorities may enforce strict regulations concerning the temporary import or export of items such as firearms, narcotics, alcoholic drinks and pork products. Contact the Embassy of Mauritania in Washington, DC for specific information regarding customs regulations.

The local currency is the ouguiya, and it may not be imported or exported. Credit cards can be used only at a few hotels in the capital, Nouakchott, and the northwestern city of Nouadhibou. ATM machines are available only in Nouakchott. Major foreign currencies are changeable in banks and numerous currency exchanges; however, this service is not always available without advanced notice or prior arrangement. There is a risk of getting fraudulent bank notes even from banks which often do not have the security means to detect fake bank notes. Furthermore, credit card fraud is a problem, so it is strongly advisable to pay hotel bills in cash.

Islamic ideals and beliefs in the country encourage conservative dress. Sleeved garments and below-the-knee skirts are recommended, and people should avoid wearing shorts.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating Mauritania's laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Mauritania are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in Mauritania are encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration web site so that they can obtain updated information on travel and security within Mauritania. Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency. The U.S. Embassy is located between the Presidency building and the Spanish Embassy on Rue Abdallaye. The postal address is B.P. 222, Nouakchott, telephone (222) 525-2660/2663, 525-1141/45, or 525-3038 (ext. 5441), and fax (222) 525-1592. You may contact the Consular Section by e-mail at ConsularNKC@state.gov.

Intercountry Adoption

July 2007

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is based on public sources and current understanding. Questions involving foreign and U.S. immigration laws and legal interpretation should be addressed respectively to qualified foreign or U.S. legal counsel.

Please Note: As a Muslim country that adheres to a strict interpretation of Islamic law, Mauritania does not allow full adoptions as these are understood in the West. It is sometimes possible for Mauritanian courts to grant guardianship (establishing a level of relationship short of adoption). Persons seeking guardianship of Mauritanian children must be relatives of the children and also either Muslim or living in a Muslim environment. Guardianship arrangements involving prospective U.S. guardians are further complicated by the fact that Mauritanian law prohibits non-family members from removing children from Mauritania. Prospective American Guardians may want to review our Shari'a Adoption flyer on Guardianship in Muslim Countries.

Patterns of Immigration: No Mauritanian orphans have received U.S. immigrant visas within the past five years.

Guardianship Authority In Mauritania: Ministry of Justice (MOJ).

This Ministry has no specialized office for Family or Children Issues. The office of the Minister or his Chargé de Mission can be contacted for such matters at (222) 525-8204 or (222) 525-7002.

Eligibility Requirements For Prospective Guardians: To qualify as a guardian one must be a blood-relative who is either Muslim or lives in a Muslim environment.

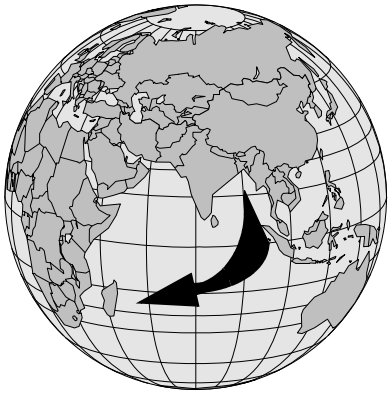
Residency Requirements: Since MOJ officials made it clear that no foreigner would be permitted to remove a child from the country, there is no information on guardianship-related residency requirements.

Time Frame: As there are no provisions for child emigration from Mauritania through guardianship, there is no information on how long it takes to complete guardianship requirements.

Adoption Agencies and Attorneys: Because adoption as it is understood in the U.S. does not exist in Mauritania, there is no local role for adoption agencies. If U.S. citizens considering pursuing guardianship of a Mauritanian child want to engage the services of a U.S.-based agency to guide them through the overall process, including the U.S. immigration procedures, that is still possible. In such cases, prospective guardians should fully research any adoption agency or facilitator they plan to use for adoption services.

Adoption Fees: No fees are involved in obtaining a guardianship.

Adoption Procedures: Mauritanian law does not allow adoption. Mauritanian courts may, however, appoint a legal guardian for the child. The Mauritanian judicial system and adoption laws are found in the Family Code and use Sharia law as a basis. The Family Code states in the event of the inability of a parent to care for his/her, the Family Code gives a strict sequence of eligible blood relatives for guardianship. However, in Mauritania, it is up to the discretion of a judge to determine who is most eligible for the guardianship of a child. In 2002 the Mauritanian Ministry of Justice published a booklet, The Family Code, which includes sections on guardianship and custody. The Family Code does not cover scenarios in which a parent or legal guardian can pass guardianship to a foreigner. The law prohibits non-family members from removing children from Mauritanian soil.



Documents Required For Guardianship: Individual judges hearing petitions for guardianship may require different types of documentation including the proof of blood relationship to the child. There are no established guidelines, and prospective guardians should be prepared to present whatever documents the judge requests.

Embassy of the Republic of Mauritania
2129 Leroy Place N.W.
Washington, D.C. 20008
Tel. (202) 232-5700
Fax: (202) 319-2623

U.S. Immigration Requirements: Prospective adopting parents are strongly encouraged to consult USCIS publication M-249, *The Immigration of Adopted and Prospective Adoptive Children,* as well as the Department of State publication, *Intercountry Adoptions.* Please see the *Intercountry Adoption* section of this book for more details and review current reports online at http://adoption.state.gov.

U.S. Embassy
288. rue 42-100 (rue Abdallaye),
Nouakchott Mauritania. (Between the Presidency and Spanish Embassy)
Phone: (222) 525-2660
or 2663, ext. 4551
Fax: (222) 525-3945
Email: consularNKC@state.gov

Additional Information: Specific questions about intercountry adoption in Mauritania may be addressed to the U.S. Embassy in Nouakchott. For more information about the immigration process please e-mail the U.S. Embassy in Dakar at consulardakar@state.gov. General questions regarding intercountry adoption may be addressed to the Office of Children's Issues, U.S. Department of State, CA/OCS/CI, SA-29, 4th Floor, 2201 C Street, NW, Washington, D.C. 20520-4818, toll-free Tel: 1-888-407-4747.

MAURITIUS

Compiled from the September 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Republic of Mauritius

PROFILE

Geography

Area: 1,865 sq. km. (720 sq. mi.), about the size of Rhode Island; 500 miles east of Madagascar, in the Indian Ocean.

Dependencies: Rodrigues Island, the Agalega Islands and Cargados Carajos Shoals; Mauritius also claims sovereignty over the Chagos Archipelago, part of the British Indian Ocean Territory, where U.S. Naval Support Facility at Diego Garcia is located.

Cities: Capital—Port Louis (pop. 146,319). Other cities—Beau Bassin and Rose Hill (105,377), Vacoas-Phoenix (101,789), Curepipe (82,756), Quatre Bornes (77,145).

Terrain: Volcanic island surrounded by coral reefs. A central plateau is rimmed by mountains.

Climate: Tropical; cyclone season mid-December-April.

People

Nationality: Noun and adjective—Mauritian(s).

Population: (2008) 1,274,189, including Rodrigues, Agalega, and St. Brandon. Density—612/sq. km.

Avg. annual population growth: (2008) 0.8%.

Ethnic groups: Indo-Mauritians 68%, Creoles 27%, Sino-Mauritians 3%, Franco-Mauritians 2%.

Religions: Hindu 48%, Roman Catholic 23.6%, Muslim 16.6%, other Christian 8.6%, other 2.5%.

Languages: Creole (common), French, English (official), Hindi, Urdu, Hakka, Bhojpuri.

Education: Years compulsory—11 (primary school). Attendance (primary school)—virtually universal. Literacy—adult population 85%; school population 90%.

Health: (2008) Infant mortality rate—12.56/1000. Life expectancy—male 70.28 yrs., female 77.4 yrs.

Work force: (2005, 543,900) Manufacturing—19.8%; construction—9.7%; trade and tourism—22.3%; government services—16.6%; agriculture and fishing—9.6%; other—31.7%.

Government

Type: Republic.

Independence: March 12, 1968 (became a republic in 1992).

Constitution: March 12, 1968.

Government branches: Executive—president (head of state), prime minister (head of government), Council of Ministers. Legislative—unicameral National Assembly. Judicial—Supreme Court.

Political subdivisions: 10.

Political parties: MSM (Militant Socialist Movement), MMM (Mauritian Militant Movement) and the Social Alliance (made up of several parties, including the Mauritian Labor Party).

Suffrage: Universal over 18.

Defense: (2006) 1.7% of GDP.

Economy

GDP: (2007, official exchange rate) $6.959 billion.

Real growth rate: (2007) 4.6%.

Per capita income: (2007 PPP) $11,200.

Avg. inflation rate: (2007) 8.8%.

Natural resources: None.

Agriculture: (4.8% of GDP): Products—sugar, sugar derivatives, tea, tobacco, vegetables, fruits, flowers and fishing.

Manufacturing: including export processing zone (20% of GDP) Types—labor-intensive goods for export, including textiles and clothing, watches and clocks, jewelry, optical goods, toys and games, and cut flowers.

Tourism: (8.5% of GDP) Main countries of origin—France, including nearby French island Reunion, South Africa, and west European countries.

Financial services: 10.3% of GDP.

Trade: (2007) Exports—$2.218 billion: textiles and clothing, sugar, canned tuna, watches and clocks, jewelry, optical goods, toys and games, and flowers. Major markets—Europe and the U.S. Imports—$3.628 billion: meat, dairy products, fish,

wheat, rice, wheat flour, vegetable oil, petroleum products, iron and steel, cement, fertilizers, machinery and transport equipment, and textile industry raw materials. Major suppliers—South Africa, France, China, India, Bahrain, Finland, U.K., Japan, Australia, and Germany.
Fiscal year: July 1-June 30.

HISTORY

While Arab and Malay sailors knew of Mauritius as early as the 10th century AD and Portuguese sailors first visited in the 16th century, the island was first colonized in 1638 by the Dutch. Mauritius was populated over the next few centuries by waves of traders, planters and their slaves, indentured laborers, merchants, and artisans. The island was named in honor of Prince Maurice of Nassau by the Dutch, who abandoned the colony in 1710.

The French claimed Mauritius in 1715 and renamed it Ile de France. It became a prosperous colony under the French East India Company. The French Government took control in 1767, and the island served as a naval and privateer base during the Napoleonic wars. In 1810, Mauritius was captured by the British, whose possession of the island was confirmed 4 years later by the Treaty of Paris. French institutions, including the Napoleonic code of law, were maintained. The French language is still used more widely than English.

Mauritian Creoles trace their origins to the plantation owners and slaves who were brought to work the sugar fields. Indo-Mauritians are descended from Indian immigrants who arrived in the 19th century to work as indentured laborers after slavery was abolished in 1835. Included in the Indo-Mauritian community are Muslims (about 17% of the population) from the Indian subcontinent.

Franco-Mauritians control nearly all of the large sugar estates and are active in business and banking. As the Indian population became numerically dominant and the voting franchise was extended, political power shifted from the Franco-Mauritians and their Creole allies to the Hindus.

Elections in 1947 for the newly created Legislative Assembly marked Mauritius' first steps toward self-rule. An independence campaign gained momentum after 1961, when the British agreed to permit additional self-government and eventual independence. A coalition composed of the Mauritian Labor Party (MLP), the Muslim Committee of Action (CAM), and the Independent Forward Bloc (IFB)—a traditionalist Hindu party—won a majority in the 1967 Legislative Assembly election, despite opposition from Franco-Mauritian and Creole supporters of Gaetan Duval's Mauritian Social Democratic Party (PMSD). The contest was interpreted locally as a referendum on independence. Sir Seewoosagur Ramgoolam, MLP leader and chief minister in the colonial government, became the first prime minister at independence, on March 12, 1968. This event was preceded by a period of communal strife, brought under control with assistance from British troops.

GOVERNMENT AND POLITICAL CONDITIONS

Mauritian politics are vibrant and characterized by coalition and alliance building. All parties are centrist and reflect a national consensus that supports democratic politics and a relatively open economy with a strong private sector. Parliamentary elections were held July 3, 2005.

Alone or in coalition, the Mauritian Labor Party (MLP) ruled from 1947 through 1982 and returned to power in 1995. The Mauritian Militant Movement/Mauritian Socialist Party (MMM/PSM) alliance won the 1982 election. In 1983, defectors from the MMM joined with the PSM to form the Militant Socialist Movement (MSM) and won a working majority. In July 1990, the MSM realigned with the MMM, and in September 1991, national elections won 59 of the 62 directly elected seats in parliament. In December 1995, the MLP returned to power, this time in coalition with the MMM. Labor's Navinchandra Ramgoolam, son of the country's first prime minister, became prime minister himself. Ramgoolam dismissed his MMM coalition partners in mid-1997, leaving Labor in power except for several small parties allied with it. Elections in September 2000 saw the re-emergence of the MSM-MMM as a winning alliance, as the coalition garnered 51.7% of the vote, and Sir Anerood Jugnauth once again became the prime minister with the caveat that midterm, the leader of the MMM party would take over as prime minister. In September 2003, in keeping with the campaign promise which forged the coalition, Jugnauth stepped down from office and deputy prime minister Paul Raymond Berenger became prime minister. One month later, Sir Anerood Jugnauth was sworn in as President of the Republic. Berenger became the first Catholic, Franco-Mauritian to head the government. The move created an historic precedent of having a non-Hindu, non-majority member head the national government. The 2005 parliamentary elections returned Navinchandra Ramgoolam to office as prime minister.

Mauritius became a republic on March 12, 1992. The most immediate result was that a Mauritian-born president became head of state, replacing Queen Elizabeth II. Under the amended constitution, political power remained with parliament. The Council of Ministers (cabinet), responsible for the direction and control of the government, consists of the prime minister (head of government), the leader of the majority party in the legislature, and about 20 ministries.

The unicameral National Assembly has up to 70 deputies. Sixty-two are elected by universal suffrage, and as many as eight "best losers" are chosen from the runners-up by the Electoral Supervisory Commission using a formula designed to give at least minimal representation to all ethnic communities and under-represented

parties. Elections are scheduled at least every 5 years. Mauritian law is an amalgam of French and British legal traditions. The Supreme Court—a chief justice and five other judges—is the highest judicial authority. There is an additional right of appeal to the Queen's Privy Council. Local government has nine administrative divisions, with municipal and town councils in urban areas and district and village councils in rural areas. The island of Rodrigues forms the country's 10th administrative division.

Principal Government Officials

Last Updated: 11/12/08

Pres.: **Anerood JUGNAUTH, Sir**
Prime Min.: **Navinchandra RAMGOOLAM, Dr.**
Dep. Prime Min.: **Ahmed Rashid BEEBEEJAUN**
Dep. Prime Min.: **Charles Gaetan Xavier Luc DUVAL**
Dep. Prime Min.: **Ramakrishna SITHANEN**
Min. of Agro Industry & Fisheries: **Arvin BOOLELL**

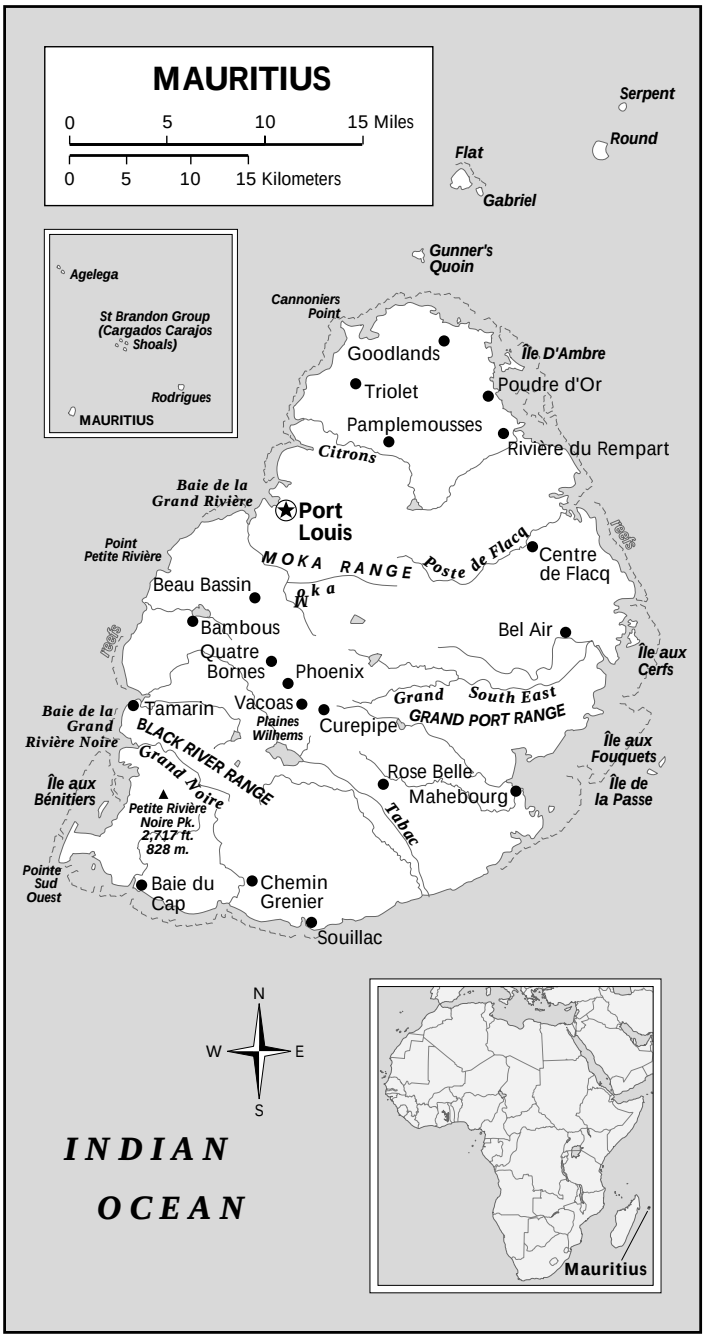
Min. of Housing & Lands: **Mohammed Asraf Ally DULULL**
Min. of Industry, Small & Medium Enterprises, Commerce, & Cooperatives: **Rajeshwar JEETAH**
Min. of Information Technology & Telecommunications: **Marie Joseph Noel-Etienne Ghislain SINATAMBOU**
Min. of Justice & Human Rights: **Jayarama VALAYDEN**
Min. of Labor, Industrial Relations, & Employment: **Vasant Kumar BUNWAREE**
Min. of Local Govt.: **James Burty DAVID**
Min. of Public Infrastructure, Land Transport, & Shipping: **Ahmed Rashid BEEBEEJAUN**
Min. of Public Utilities: **Abu Twalib KASENALLY**
Min. of Rodrigues & Outer Islands: **Navinchandra RAMGOOLAM, Dr.**
Min. of Social Security, National Solidarity, & Senior Citizen Welfare &: Reform Institutions: **Sheilabai BAPPOO**
Min. of Tourism, Leisure, & External Communications: **Charles Gaetan Xavier Luc DUVAL**
Min. of Women's Rights, Child Development, Family Welfare, & Consumer Protection: **Indranee SEEBUN**
Min. of Youth & Sports: **Sylvio Hock Sheen TANG WAH HING**
Attorney Gen.: **Jayarama VALAYDEN**
Governor, Central Bank: **Rameswurlall Basant ROI**
Ambassador to the US: **Usha JEETAH**
Permanent Representative to the UN, New York: **Somduth SOBORUN**

Mauritius maintains an embassy at 4301 Connecticut Avenue NW, Washington, DC 20008, (tel. 202-244-1491).

ECONOMY

Mauritius has one of the most successful and competitive economies in Africa; 2007 GDP at market prices was estimated at $6.959 billion (official exchange rate) and per capita income at $11,200 (purchasing power parity), one of the highest in Africa.

The economy is based on tourism, textiles, sugar, and financial services. In recent years, information and communication technology (ICT) and seafood have emerged as important sectors of the economy, growing by an average of 40% last year.



Over the past two decades, real output growth averaged just below 6% per year, leading to a more than doubling of per capita income and a marked improvement in social indicators. However, since 2002, the economy started to face some serious challenges as a result of globalization, involving the erosion of trade preferences for both textiles and sugar, two pillars of the economy. Economic growth declined to 3-4% while unemployment, government budget deficit, and public debt increased steadily. The government that took office in July 2005 embarked on a bold economic reform program aimed at moving Mauritius from reliance on trade preferences to global competitiveness.

The reform strategy, outlined in the FY 2006-2007 government budget, was designed not only to remedy fiscal weaknesses but also to open up the economy, facilitate business, improve the investment climate, and mobilize foreign direct investment and expertise. The reforms and the opening up of the economy have already started to positively impact the economy.

In addition to encouraging the restructuring and modernization of the textile and sugar sectors, the government is putting much emphasis on the development of the ICT sector and the promotion of Mauritius as a seafood hub in the region, using existing logistics and distribution facilities at the Freeport (free trade zone at the port and airport).

To further diversify the economic base and generate sustainable growth, the government is actively encouraging the following economic activities: (i) the land-based oceanic industry, (ii) hospitality and property development, (iii) healthcare and biomedical industry, (iv) agro-processing and biotechnology, and (v) the knowledge industry.

The business climate is friendly yet extremely competitive. The World Bank 2007 Doing Business Survey ranks Mauritius 32nd in the world and second in Africa for ease of doing business. Mauritius has a long tradition of private entrepreneurship, which has led to a strong and dynamic private sector. Firms entering the market will find a well-developed legal and commercial infrastructure. With regard to telecommunications, Mauritius has a well-developed digital infrastructure and offers state-of-the-art telecommunications facilities including international leased lines and high speed

Internet access. Telecommunications services were liberalized in January 2003. The government policy is to act as a facilitator to business, leaving production to the private sector. However, it still controls key utility services directly or through parastatals, including electricity, water, waste water, postal services, and broadcasting. The State Trading Corporation controls imports of rice, flour, petroleum products, and cement.

FOREIGN RELATIONS

Mauritius has strong and friendly relations with the West as well as with India and the countries of southern and eastern Africa. It is a member of the African Union (AU), World Trade Organization (WTO), the Commonwealth, La Francophonie, the Southern Africa Development Community (SADC), the Indian Ocean Commission, Community of Eastern and South African States (COMESA), and the recently formed Indian Ocean Rim Association. In 2004, then-Prime Minister Berenger became chairman of SADC for a one-year term. Trade, commitment to democracy, colonial and cultural ties, and the country's small size are driving forces behind Mauritian foreign policy. The country's political heritage and dependence on Western markets have led to close ties with the European Union and its member states, particularly the United Kingdom and France, which exercises sovereignty over neighboring Reunion. Considered part of Africa geographically, Mauritius has friendly relations with other African states in the region, particularly South Africa, by far its largest continental trading partner. Mauritian investors are gradually entering African markets, notably Madagascar and Mozambique. Mauritius coordinates much of its foreign policy with the Southern Africa Development Community and the African Union.

Relations with India are strong for both historical and commercial reasons. Foreign embassies in Mauritius include Australia, the United Kingdom, China, Egypt, France, India, Madagascar, Pakistan, Russia, South Africa, and the United States.

DEFENSE

Mauritius does not have a standing army. All military, police, and security functions are carried out by 10,000 active-duty personnel under the command of the Commissioner of Police. The 8,000-member National Police is responsible for domestic law enforcement. The 1,400-member Special Mobile Force (SMF) and the 688-member National Coast Guard are the only two paramilitary units in Mauritius. Both units are composed of police officers on lengthy rotations to those services.

The SMF is organized as a ground infantry unit and engages extensively in civic works projects. The Coast Guard has four patrol craft for

search-and-rescue missions and surveillance of territorial waters. A 100-member police helicopter squadron assists in search-and-rescue operations. There also is a special supporting unit of 270 members trained in riot control. Military advisers from the United Kingdom and India work with the SMF, the Coast Guard, and the Police Helicopter Unit, and Mauritian police officers are trained in the United Kingdom, India, and France. The United States provides training to Mauritian security officers in such fields as counter-terrorism methods, seamanship, and maritime law enforcement.

U.S.-MAURITIAN RELATIONS

Official U.S. representation in Mauritius dates from the end of the 18th century. An American consulate established in 1794 closed in 1911. It was reopened in 1967 and elevated to embassy status upon the country's independence in 1968. Since 1970, the mission has been directed by a resident U.S. ambassador.

Relations between the United States and Mauritius are cordial and largely revolve around trade. The United States is Mauritius' third-largest market but ranks 12th in terms of exports to Mauritius. Principal imports from the U.S. include aircraft parts (for Air Mauritius), automatic data processing machines, diamonds, jewelry, radio/TV transmission apparatus, telecommunications equipment, agricultural/construction/industrial machinery and equipment, casino slot machines, outboard motors, books and encyclopedias, and industrial chemicals.

Mauritian exports to the U.S. include apparel, sugar, non-industrial diamonds, jewelry articles, live animals, sunglasses, rum, and cut flowers. Mauritian products that meet the rules of origin are eligible for duty- and quota-free entry in the U.S. market under the African Growth and Opportunity Act. In September 2006, the Governments of Mauritius and the United States signed a Trade and Investment Framework Agreement to remove impediments and further enhance trade and investment relations between the two countries.

More than 200 U.S. companies are represented in Mauritius. About 30 have offices in Mauritius, serving the domestic and/or the regional market, mainly in the information technology (IT), textile, fast food, express courier, and financial services sectors. The largest U.S. subsidiaries are Caltex Oil Mauritius and Esso Mauritius. U.S. brands are sold widely. Several U.S. franchises, notably Kentucky Fried Chicken, Pizza Hut, and McDonald's have been operating for a number of years in Mauritius. The United States funds a small military assistance program. The embassy also manages special self-help funds for community groups and nongovernmental organizations and a democracy and human rights fund.

TRAVEL

Consular Information Sheet

May 21, 2008

Country Description: The Republic of Mauritius is a small island nation of four inhabited and several other islands located in the southwestern Indian Ocean. Mauritius has a stable government and a diverse economy. Its per capita GDP of $6,300 is the second highest in Africa. Facilities for tourism are well developed. English is the official language of Mauritius, however Creole and French are also widely spoken. English may not be understood outside of main towns and tourist areas. The capital city is Port Louis.

Entry Requirements: A valid passport, onward/return ticket, and proof of sufficient funds are required. Immigration authorities require the validity of the entrant's passport to be greater than six months upon both arrival and departure. Travelers must also provide a local address where they will be staying in Mauritius. Visas are issued at the point of entry. A tourist entry fee and the airport departure tax are included in the price of a plane ticket. Travelers coming from yellow fever-infected areas may be asked to present a yellow fever vaccination certificate. Travelers should obtain the latest information and details from the Embassy of Mauritius, 4301 Connecticut Avenue NW, Suite 441, Washington, DC 20008; telephone (202) 244-1491/2, or the Honorary Consulate in Los Angeles, telephone (310) 557-2009. Overseas, inquiries may be made at the nearest Mauritian embassy or consulate. Visit the web site of the Embassy of Mauritius for the most current visa information at http://www.maurinet.com/embasydc.html.

Safety and Security: Thefts in tourist areas are a concern, and visitors should keep track of their belongings at all times. Women are advised against walking alone, particularly on public beaches and at night. There

has been an increase in reports of sexual assault and harassment of foreign travelers. Americans should avoid crowds and street demonstrations, and maintain a low profile. For the latest security information, Americans traveling abroad should regularly monitor the Department's web site, where the current Worldwide Caution Travel Alert, Middle East and North Africa Travel Alert, Travel Warnings and other Travel Alerts can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S. and Canada, or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444. These numbers are available from 8:00 a.m. to 8:00 p.m. Eastern Time, Monday through Friday (except U.S. federal holidays).

Crime: Although violent crimes are uncommon, petty crime is a problem. There is potential for pick pocketing and purse snatching, especially in crowded areas. Residential break-ins are reported frequently on the island. Most break-ins are surreptitious and do not involve violence, however some burglars have brandished weapons, such as knives or machetes. Although uncommon, there have been reports of armed robbery and assault. It is unwise to walk alone at night outside the immediate grounds of hotels. All individuals should exercise caution on beaches and poorly lit or deserted areas at night.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

Medical Facilities and Health Information: Medical facilities are available, but more limited than in the United States. Emergency assistance is limited. While public hospitals and clinics provide free care, many visitors may choose to be treated by private doctors and hospitals. Service Aide Medicale Urgence (SAMU) is a government organization that provides ambulance and emergency assistance in response to calls to 114 (Address: Volcy Pougnet Street, Port Louis). MegaCare is a private organization that provides assistance to subscribers only (Address: 99 Draper Avenue, Quatre Bornes; phone: 116; 464-6116).

Outbreaks of the mosquito borne virus Chikungunya have occurred in recent years; however, very few cases have been reported in 2007. For more information, please see the CDC's fact sheet on Chikungunya.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's web site at http://wwwn.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at www.who.int/ith/en.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Mauritius is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

Driving is on the left side of the road. Roads are sometimes narrow and uneven with inadequate lighting, which makes night driving hazardous. Speed limits are posted in kilometers per hour, but all road and traffic signs are posted in English. Drivers and all passengers are required to wear seat belts. Drivers and passengers on motorcycles are required to wear helmets. Babies and toddlers should be placed in child safety seats. Many accidents occur due to excessive speed and violations of road regulations.

Drivers involved in an accident are required by law to remain at the scene until the police arrive. However, if an angry crowd gathers and those involved in the accident feel threatened, police and judicial authorities have in the past not taken action against drivers who leave the scene if they have proceeded directly to a police station. While there are organizations that provide emergency or roadside assistance, their resources and capabilities are limited and they are on occasion unable to respond in non-life threatening incidents. Public transportation by bus is available between the main towns until 11:00 p.m. and in remote areas until 6 p.m. Taxis are also available.

Aviation Safety Oversight: As there is no direct commercial air service between the United States and Mauritius, the U.S. Federal Aviation Administration (FAA) has not assessed Mauritius' Civil Aviation Authority for compliance with International Civil Aviation Organization (ICAO) aviation safety standards. For more information, travelers may visit the FAA's web site at http://www.faa.gov.

Special Circumstances: Spear fishing equipment may not be imported into Mauritius. Animals may be required to undergo a quarantine period of up to six months, depending on country of origin and residence history. Please contact the Mauritian Society for the Prevention of Cruelty to Animals at (230) 464-5084 for specific information related to your pet.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating Mauritius' laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Mauritius are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in Mauritius are encouraged to register with the U.S. Embassy through the State Department's travel registration web site, and to obtain updated information on travel and security within Mauritius. Americans without Internet access may register directly at the U.S. Embassy. By registering, American citizens make it easier for the Embassy to contact them in case of emergency. The U.S. Embassy is located on the fourth floor of the Rogers House on John F. Kennedy Street in Port Louis, telephone (230) 202-4400; fax (230) 208-9534. The general Embassy email address is usembass@intent.mu. The Consular Section's email is PTLconsular@state.gov, and the web site is http://mauritius.usembassy.gov.

Intercountry Adoption

August 2007

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is based on public sources and current understanding. Questions involving foreign and U.S. immigration laws and legal interpretation should be addressed respectively to qualified foreign or U.S. legal counsel.

Please Note: Immigrant visas for adopted Mauritian children are issued at the U.S. Embassy in Nairobi, Kenya. For more information on scheduling a visa appointment, please see the immigrant visa page on the web site of the U.S. Embassy in Kenya at http://nairobi.usembassy.gov/wwwhins1.html.

Patterns of Immigration: In the last five fiscal years no immigrant visas have been issued to Mauritian orphans.

Adoption Authority:
National Adoption Council (NAC)
3rd Floor Government Centre
Port Louis, Mauritius
Tel: (230) 201 3549; fax: 210 8151
Contact: Mrs. Baccha or Mrs. Purryag

Eligibility Requirements for Adoptive Parents: Adoptive parents must be at least 15 years older than the child. Adoptive parents may be single or married.

Residency Requirements: There are no residency requirements to complete an intercountry adoption in Mauritius.

Time Frame: The approval of the application takes approximately of 60 days, during which time the NAC verifies information regarding the biological child, including his actual home situation and information provided in the home study. There is an additional 15 days needed to complete court procedures for an adoption. If prospective parents are residing outside Mauritius, they may request a phone interview, but the Mauritian authorities view this as the exception rather than the rule. Adoptive parents will need to come to Mauritius at the time the adoption is brought before the judge for a decision.

Adoption Agencies and Attorneys: A lawyer may be needed to expedite matters. The U.S. Embassy in Port Louis has a list of attorneys who have indicated a willingness to work with U.S. citizens that can be made available upon request.

Neither the U.S. Embassy nor the Department of State assumes any responsibility for the quality of services provided by these attorneys or their employees. Please see the Embassy's web page for a list of attorneys practicing in Mauritius. http://mauritius usembassy.gov/attorneys.html.

Adoption Fees: A non-refundable 5,000 Mauritian Rupees (MRs) application fee together with a guarantee fee of MRs 20,000, refundable upon completion of the adoption, must be sent with the application and supporting documents to the NAC.

Adoption Procedures: The Mauritian National Adoption Council does not match adoptable orphans with prospective adoptive parents. Adoptable children are located through personal contacts with families who are unable to care for their child and are willing to give up their child for adoption. Prospective adoptive parents are advised to verify ahead of time that their Mauritian prospective adoptive child meets the definition of "legal orphan" as defined by the Immigration and Nationality Act Section 101(b)(1)(F). The application for adoption is filed with the NAC. Once it is approved, the case is brought before a judge.

The judge must approve the adoption. Adoptive parents are advised to consider retaining the services of an attorney to handle the judicial proceedings. Prospective adoptive parents must attend the adoption hearing in Mauritius.

Required Documents:

An application form for adoption must be filed at the National Adoption Council (NAC), along with the following documents:

- 4 photos of the child duly endorsed by a lawyer (the lawyer confirms the photo is a true photo of the child being adopted);
- Birth certificate of the child;
- 2 comprehensive medical certificates for the child from two different child specialists;
- Birth and marriage certificate(s) of the biological parents(if applicable);
- Divorce decree of the biological parents, if applicable;
- Medical certificate(s) of biological parents, if applicable;
- 2 recent passport size photos of the biological parents;
- Birth certificate(s) of prospective adoptive parents;
- Marriage certificate of prospective adoptive parents, if applicable;
- A home study from an adoption services provider in the US;
- Documentation of financial means of prospective adoptive parents;
- If applicable, documents of ownership of a house/estate;
- Report of any criminal record from the U.S. (U.S. state level will suffice);
- If either of the prospective adoptive parents is unable to have a child, medical certificate documenting this fact must be submitted;
- Guarantee that in case of an accident, a specified third party will take care of child;
- Progress report of a Mauritian child adopted by applicants, if applicable.

Embassy of the Republic of Mauritius
4301 Connecticut Avenue, N.W., Suite 441
Washington, DC 20008
Tel.: (202) 244-1491/1492
E-mail:
Mauritius.Embassy@prodigy.net

U.S. Immigration Requirements: Prospective adoptive parents are strongly encouraged to consult USCIS publication M-249, *The Immigration of Adopted and Prospective Adoptive Children*, as well as the Department of State publication, *Intercountry Adoptions*. Please see the *Intercountry Adoption* section of this book for more details and review current reports online at http://adoption.state.gov.

U.S. Embassy
4th floor, Rogers House
John Kennedy Avenue
Port Louis, Mauritius
Email: usembass@intnet.mu
Tel:(230)202-4400
Fax:(230)208-9534

Additional Information: Specific questions about adoption in Mauritius may be addressed to the U.S. Embassy in Port Louis. Questions about U.S. immigration procedures for adopted Mauritian children should be addressed to the U.S. Embassy in Nairobi, Kenya. General questions regarding intercountry adoption may be addressed to the Office of Children's Issues, U.S. Department of State, CA/OCS/CI, 2201 C Street, NW, Washington, D.C. 20520-4818, toll-free Tel: 1-888-407-4747.

MEXICO

Compiled from the November 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
United Mexican States

PROFILE

Geography

Area: 1,972,500 sq. km. (761,600 sq. mi.); about three times the size of Texas.

Cities: Capital—Mexico City (19.2 million, 2006 estimate for metro area). Other major cities—Guadalajara, Monterrey, Puebla, Ciudad Juarez, Tijuana, Acapulco, Merida, Leon, Veracruz.

Terrain: Coastal lowlands, central high plateaus, and mountains up to 5,400 m. (18,000 ft.).

Climate: Tropical to desert.

People

Nationality: Noun and adjective—Mexican(s).

Population: (July 2008 est.) 109,955,400.

Annual growth rate: (2008 estimate) 2%.

Ethnic groups: Indian-Spanish (mestizo) 60%, Indian 30%, Caucasian 9%, other 1%.

Religions: Roman Catholic 89%, Protestant 6%, other 5%.

Languages: Spanish.

Education: Years compulsory—11 (note: preschool education was made mandatory in Dec. 2001). Literacy—91.4%.

Health: (2007) Infant mortality rate—19.01/1000. Life expectancy—male 73.05 years; female 78.78 years.

Work force: (2006 est., 38.09 million) Agriculture, forestry, hunting, fishing—21.0%; services—32.2%; commerce—16.9%; manufacturing—18.7%; construction—5.6%; transportation and communication—4.5%; mining and quarrying—1.0%.

Government

Type: Federal republic.

Independence: First proclaimed September 16, 1810; republic established 1824.

Constitution: February 5, 1917.

Government branches: Executive—president (chief of state and head of government). Legislative—bicameral. Judicial—Supreme Court, local and federal systems.

Political subdivisions: 31 states and a federal district.

Political parties: Institutional Revolutionary Party (PRI), National Action Party (PAN), Party of the Democratic Revolution (PRD), Green Ecological Party (PVEM), Labor Party (PT), and several small parties.

Suffrage: Universal at 18.

Economy

GDP: (market exchange rate, 2007 est.) $893 billion.

GDP: (PPP method, 2007) $1.353 trillion.

Per capita GDP: (PPP method, 2007 est.): $12,400.

Annual real GDP growth: (2007) 3.3%; (2006) 4.8%; (2005) 3.0%; (2004) 4.4%; (2003) 1.4%; (2002) 0.8%; (2001) -0.2%; (2000) 6.6%.

Inflation rate: (2007) 3.8%; (2006) 3.4%; (2005) 3.3%; (2004) 5.2%; (2003) 4.0%; (2002) 5.7%; (2001) 4.4%; (2000) 9.0%.

Natural resources: Petroleum, silver, copper, gold, lead, zinc, natural gas, timber.

Agriculture: (3.5% of GDP) Products—corn, wheat, soybeans, rice, beans, cotton, coffee, fruit, tomatoes, beef, poultry, dairy products, wood products.

Industry: (26.6% of GDP) Types—food and beverages, tobacco, chemicals, iron and steel, petroleum, mining, textiles, clothing, motor vehicles, consumer durables.

Services: (69.5% of GDP): Types—commerce and tourism, financial services, transportation and communications.

Trade: (Goods) Exports (2007)—$272 billion f.o.b. Imports (2007)—$282 billion f.o.b. Exports to U.S. (2007)—$223 billion (82% of total). Imports from U.S. (2007)—$141 billion (50% of total). Major markets—U.S., EU, Canada.

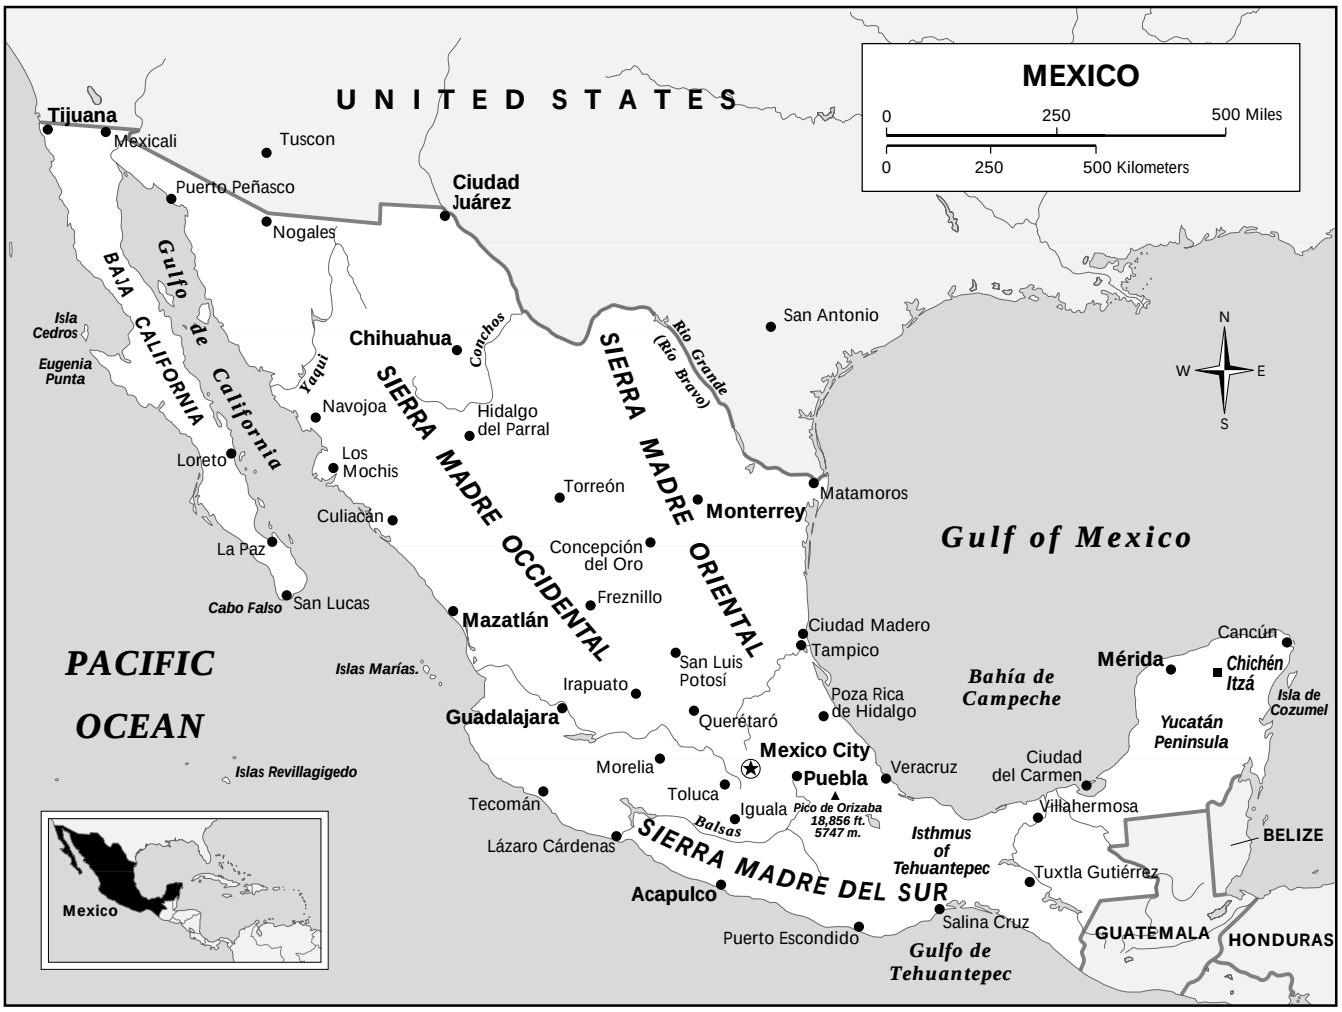
PEOPLE

Mexico is the most populous Spanish-speaking country in the world and the second most-populous country in Latin America after Portuguese-speaking Brazil. About 70% of the people live in urban areas. Many Mexicans emigrate from rural areas that lack job opportunities—such as the underdeveloped southern states and the crowded central plateau—to the industrialized urban centers and the developing areas along the U.S.-Mexico border. According to some estimates, the population of the area around Mexico City is about 18 million, which would make it the largest concentration of population in the Western Hemisphere. Cities bordering on the United States—such as Tijuana and Ciudad Juarez—and cities in the interior—such as Guadalajara, Monterrey, and Puebla—have undergone sharp rises in population in recent years.

Mexico has made great strides in improving access to education and literacy rates over the past few decades. According to a 2006 World Bank report, enrollment at the primary level is nearly universal, and more children are completing primary education. The average number of years of schooling for the population 15 years old and over was around eight years during the 2004-05 school year, a marked improvement on a decade earlier—when it was 6.8 years—but low compared with other Organization for Economic Cooperation and Development (OECD) countries.

HISTORY

Highly developed cultures, including those of the Olmecs, Mayas, Toltecs, and Aztecs, existed long before the Spanish conquest. Hernando Cortes conquered Mexico during the period 1519-21 and founded a Spanish colony that lasted nearly 300 years.



Independence from Spain was proclaimed by Father Miguel Hidalgo on September 16, 1810. Father Hidalgo's declaration of national independence, known in Mexico as the "Grito de Dolores," launched a decade long struggle for independence from Spain. Prominent figures in Mexico's war for independence were Father Jose Maria Morelos; Gen. Augustin de Iturbide, who defeated the Spaniards and ruled as Mexican emperor from 1822-23; and Gen. Antonio Lopez de Santa Ana, who went on to dominate Mexican politics from 1833 to 1855. An 1821 treaty recognized Mexican independence from Spain and called for a constitutional monarchy. The planned monarchy failed; a republic was proclaimed in December 1822 and established in 1824.

Throughout the rest of the 19th century, Mexico's government and economy were shaped by contentious debates among liberals and conservatives, republicans and monarchists, federalists and those who favored centralized government. During the two presidential terms of Benito Juarez (1858-71), Mexico experimented with modern democratic and economic reforms. President Juarez' terms of office, and Mexico's early experience with democracy, were interrupted by the Habsburg monarchy's rule of Mexico (1864-67), and was followed by the authoritarian government of Gen. Porfirio Diaz, who was president during most of the period between 1877 and 1911.

Mexico's severe social and economic problems erupted in a revolution that lasted from 1910-20 and gave rise to the 1917 constitution. Prominent leaders in this period—some of whom were rivals for power—were Francisco Madero, Venustiano Carranza, Pancho Villa, Alvaro Obregon, Victoriano Huerta, and Emiliano Zapata. The Institutional Revolutionary Party (PRI), formed in 1929 under a different name, emerged from the chaos of revolution as a vehicle for keeping political competition among a coalition of interests in peaceful channels. For 71 years, Mexico's national government was controlled by the PRI, which won every presidential race and most gubernatorial races until the July 2000 presidential election of Vicente Fox Quesada of the National Action Party (PAN), in what were widely considered at the time the freest and fairest elections in Mexico's history. President Fox completed his term on December 1, 2006, when Felipe Calderon assumed the presidency.

GOVERNMENT

The 1917 constitution provides for a federal republic with powers separated into independent executive, legislative, and judicial branches. Historically, the executive has been the dominant branch, with power vested in the president, who promulgates and executes the laws of the Congress. The Congress has played an increasingly important role since 1997, when opposition parties first made major gains. The president also legislates by executive decree in certain economic and financial fields, using powers delegated from the Congress. The president is elected by universal adult suffrage for a 6-year term and may not hold office a second time. There is no vice president; in the event of the removal or death of the president, a provisional president is elected by the Congress. The Congress is composed of a Senate and a Chamber of Deputies. Consecutive re-election is prohibited. Senators are elected to 6-year terms, and deputies serve 3-year terms. The Senate's 128 seats are filled by a mixture of direct-election and proportional representation. In the lower chamber, 300 deputies are directly elected to represent single-member districts, and 200 are selected by a modified form of proportional representation from five electoral regions. The 200 proportional representation seats were created to help smaller parties gain access to the Chamber. The judiciary is divided into federal and state court systems, with federal courts having jurisdiction over most civil cases and those involving major felonies. Under the constitution, trial and sentencing must be completed within 12 months of arrest for crimes that would carry at least a 2-year sentence. In practice, the judicial system often does not meet this requirement. Trial is by judge, not jury, in most criminal cases. Defendants have a right to counsel, and public defenders are available. Other rights include

defense against self-incrimination, the right to confront one's accusers, and the right to a public trial. Supreme Court justices are appointed by the president and approved by the Senate.

Ambassador to the US: **Arturo SARUKHAN Casamitjana**
Permanent Representative to the UN, New York: **Claude HELLER Roussant**

Mexico maintains an embassy in the United States at 1911 Pennsylvania Ave. NW, Washington, DC 20006 (tel. 202-728-1600). Consular offices are located at 2827–16th St. NW, 20009 (tel. 202-736-1012), and the trade office is co-located at the embassy (tel. 202-728-1686).

Besides its embassy, Mexico maintains over 50 diplomatic offices in the U.S. Consulates general are located in Chicago, Dallas, Denver, El Paso, Houston, Los Angeles, Miami, New Orleans, New York, San Antonio, San

Diego, and San Francisco; consulates are (partial listing) in Atlanta, Boston, Detroit, Philadelphia, Seattle, St. Louis, and Tucson.

POLITICAL CONDITIONS

President Felipe Calderon of the PAN was elected in 2006 in an extremely tight race, with a margin of less than one percent separating his vote total from that of Andres Manuel Lopez Obrador ("AMLO") of the left-of-center Democratic Revolution Party (PRD). AMLO contested the results of the election, alleging that it was marred by widespread fraud. Mexico's Federal Electoral Tribunal, while acknowledging the presence of randomly-distributed irregularities, rejected AMLO's accusation of widespread fraud and upheld Calderon's victory on September 5, 2006.

In the 2006 elections, the PAN emerged as the largest party in both the Senate and the Chamber of Deputies, with just over 40% of the seats in each house of Congress. It does not enjoy a legislative majority. Although the PRI no longer controls the presidency and has fewer congressional seats than either the PAN or PRD, it remains a significant force in Mexican politics, holding 18 governorships and often playing a pivotal role in forming coalitions in the national Congress. The next congressional elections will take place in July 2009.

Reforms

One of President Fox's most important reforms was the passage and implementation of freedom of information (FOIA) laws. President Fox also highlighted the need for modernization of Mexico's criminal justice system, including the introduction of oral trials. Judicial reforms stalled at the federal level during the Fox years, but President Calderon succeeded in passing legislation to reform the federal judicial system. As of November 2008, approval for the reform had been granted by both houses of the Mexican Congress, and the required majority of the states. The reform legislation set a timetable of eight years for full implementation.

In addition to judicial reform, President Calderon has also succeeded in getting passed through Congress important fiscal, electoral, energy, and pension reforms. The administration is grappling with many economic challenges, including the need to upgrade infrastructure, modernize labor laws, and make the energy sector more competitive. President Calderon introduced a limited energy reform proposal, designed to strengthen the state oil company, Pemex, in April 2008. A compromise measure was passed on October 28, after more than five months of public debate. Calderon has stated that his top economic priorities remain reducing poverty and creating jobs.

ECONOMY

Mexico is highly dependent on exports to the U.S., which represent more than a quarter of the country's GDP. The result is that the Mexican economy is strongly linked to the U.S. business cycle, and has suffered from the economic slowdown in the United States. Real GDP grew by 4.8% in 2006 and by 3.3% in 2007, but is expected to grow only by about 2% in 2008 and from 0.5% to 1.5% in 2009.

Mexico's trade regime is among the most open in the world, with free trade agreements with the U.S., Canada, the EU, and many other countries (44 total). Since the 1994 devaluation of the peso, successive Mexican governments have improved the country's macroeconomic fundamentals. Inflation and public sector deficits are under control, while the current account balance and public debt profile have improved. As of October 2008, Moody's, Standard & Poor's, and Fitch Ratings had all issued investment-grade ratings for Mexico's sovereign debt.

Trade

Mexico is among the world's most open economies, but it is dependent on trade with the U.S., which bought about 82% of its exports in 2007. Top U.S. exports to Mexico include electronic equipment, motor vehicle parts, and chemicals. Top Mexican exports to the U.S. include petroleum, cars, and electronic equipment. There is considerable intra-company trade.

Mexico is an active and constructive member of the World Trade Organization (WTO). It hosted the September 2003 WTO Ministerial Meeting in Cancun. The Mexican Government and many businesses support a Free Trade Area of the Americas.

Trade disputes between the United States and Mexico are generally settled through direct negotiations between the two countries or via WTO or North American Free Trade Agreement (NAFTA) panels. The most significant areas of friction involve agricultural products such as livestock and sweeteners. To address the issues that affect these industries in a manner consistent with the principles of free trade, the United States and Mexico have established technical working groups.

Mexico's land transportation network is one of the most extensive in Latin America with 357,000 kilometers (km.) of paved roads, including more than 11,000 kilometers of four-lane paved roads. The 26,622 kilometers (16,268 mi.) of government-owned railroads in Mexico have been privatized through the sale of 50-year operating concessions.

Mexico's ports have experienced a boom in investment and traffic following a 1993 law that privatized the port system. Mexico's ports moved nearly 1.7 million containers in 2006. A number of international airlines serve Mexico, with direct or connecting flights from most major cities in the United States, Canada, Europe, Japan, and Latin America. Most Mexican regional capitals and resorts have direct air services to Mexico City or the United States. In 2005, the Government of Mexico agreed to sell Mexicana, one of the two main national airlines, to a private investor, and did the same with Aeromexico in 2007. Airports are semi-

privatized with the government still the majority shareholder, but with each regional airport group maintaining operational autonomy.

The telecommunications sector is dominated by Telmex, the former state-owned monopoly. Several international companies compete in the sector with limited success. The teledensity rate in Mexico (around 19%) is below average in Latin America. Wireless penetration is much higher, with over 65 million wireless subscribers in the first quarter of 2008, although 31 million of these customers use prepaid cards, and many use their phones to receive calls only. Mexico's satellite service sector was opened to competition, including limited foreign direct investment, in 2001.

Agriculture

Only 13% of Mexico's land area is arable, of which less than 3% is irrigated. Top revenue-producing crops include corn, tomatoes, sugar cane, dry beans, and avocados. Mexico also generates significant revenue from the production of beef, poultry, pork, and dairy products. In total, agriculture accounted for 3.5% of GDP in 2007, yet agricultural employment accounted for over 14% of total employment. Most of the population is employed in the services sector (60% of total employment).

Implementation of NAFTA has opened Mexico's agricultural sector to the forces of globalization and competition, and some farmers have greatly benefited from greater market access. In particular, fruit and vegetable exports from Mexico have increased dramatically in recent years, exceeding $4 billion to the United States alone in 2007. However, structural inefficiencies that have existed for decades continue to limit improvements in productivity and living standards for many in the agricultural sector. These inefficiencies include a prevalence of small-scale producers, a lack of infrastructure, inadequate supplies of credit, a communal land structure for many producers, and a large subsistence rural population that is not part of the formal economy. It is estimated that half of Mexico's producers are subsistence farmers and over 60% produce corn or beans, with the majority of these farmers cultivating five hectares or less, although the number of Mexican farmers is steadily decreasing as they seek greater economic opportunities from off-farm employment.

Mexico subsidizes agricultural production through various support programs, the most notable being the PROCAMPO initiative.

Manufacturing and Foreign Investment

The manufacturing sector, which accounts for about 18% of GDP, grew by 1.5% in real terms in 2007. Construction grew by 2.6% in real terms in 2007.

Foreign direct investment (FDI) in Mexico for 2007 was $ 25 billion, up 22% over the previous year. The U.S. was once again the largest foreign investor in Mexico, accounting for 40% ($9.9 billion FDI from the U.S.) of reported FDI. The economic slowdown in the U.S. in 2008 has caused a significant decline in this figure.

Oil and Gas

In 2007 Mexico was the world's eighth-largest crude exporter, and the third-largest supplier of oil to the U.S. Oil and gas revenues provided more than one-third of all Mexican Government revenues.

Mexico's state-owned oil company, Pemex, holds a constitutionally established monopoly for the exploration, production, transportation, and marketing of the nation's oil. With its primary known oil reserves already in serious decline, Mexico will have to determine in the near future how it wants to harvest its harder-to-exploit probable reserves in order to avoid very difficult economic choices. The Mexican Congress passed energy reform legislation in October 2008 that gives Pemex more budgetary autonomy and transparency. However, the reforms do not open the petroleum sector to investment and will do little to address declining production. While private investment in natural gas transportation, distribution, and storage has been permitted, Pemex remains in sole control of natural gas exploration and production. Despite substantial reserves, Mexico is a net natural gas importer.

Transportation and Communications

Mexico's land transportation network is one of the most extensive in Latin America with 357,000 kilometers (km.) of paved roads, including more than 11,000 kilometers of four-lane paved roads. The 26,622 kilometers (16,268 mi.) of government-owned railroads in Mexico have been privatized through the sale of 50-year operating concessions.

Mexico's ports have experienced a boom in investment and traffic following a 1993 law that privatized the port system. Mexico's ports moved nearly 1.7 million containers in 2006. A number of international airlines serve Mexico, with direct or connecting flights from most major cities in the United States, Canada, Europe, Japan, and Latin America. Most Mexican regional capitals and resorts have direct air services to Mexico City or the United States. In 2005, the Government of Mexico agreed to sell Mexicana, one of the two main national airlines, to a private investor, and did the same with Aeromexico in 2007. Airports are semi-privatized with the government still the majority shareholder, but with each regional airport group maintaining operational autonomy. The telecommunications sector is dominated by Telmex, the former state-owned monopoly. Several international companies compete in the sector with limited success. The teledensity rate in Mexico (around 19%) is below average in Latin America. Wireless penetration is much higher, with over 65 million wireless subscribers in the first quarter of 2008, although 31 million of these customers use prepaid cards, and many use their phones to receive calls only. Mexico's satellite service sector was opened to competition, including limited foreign direct investment, in 2001.

NATIONAL SECURITY

Mexico's armed forces number about 225,000. The army makes up about three-fourths of that total. The navy is a completely autonomous cabinet agency and as such there is no joint chief of staff position. Principal military roles include national defense, narcotics control, and civic action assignments such as search and rescue and disaster relief. Mexican military and naval forces provided disaster assistance to the U.S. in the aftermath of Hurricane Katrina, which struck Louisiana and Mississippi in August 2005.

President Calderon has made public security a focus of his presidency and, in addition to passing judicial reform legislation, has launched aggressive operations against organized crime and drug traffickers in several states, raised pay for the military, and replaced numerous corrupt federal police officers. He has also, when necessary, been willing to deploy the Mexican Army in the states where the criminal cartels are dominant.

FOREIGN RELATIONS

Traditionally, Mexico has sought to maintain its interests abroad and project its influence largely through moral persuasion and has championed the principles of nonintervention and self-determination. In its efforts to revitalize its economy and open up to international competition, Mexico has sought closer relations with the U.S., Western Europe, and the Pacific Basin. Presidents Fox and Calderon have more actively promoted international human rights and democracy and sought to increase Mexico's participation in international affairs.

Mexico actively participates in several international organizations; it has been elected to a seat on the UN Security Council for the period 2009-2010, having most recently held a seat during 2002-03. Mexico is a strong supporter of the United Nations and Organization of American States systems and also pursues its interests through a number of ad hoc international bodies. Mexico has been selective in its membership in other international organizations. It declined, for example, to become a member of Organization of Petroleum Exporting Countries. Nevertheless, Mexico does seek to diversify its diplomatic and economic relations, as demonstrated by its accession to the General Agreement on Tariffs and Trade (GATT) in 1986; its joining the Asia-Pacific Economic Cooperation forum (APEC) in 1993; its becoming, in April 1994, the first Latin American member of the Organization for Economic Cooperation and Development (OECD); and its entering the World Trade Organization as a founding member in 1996. Mexico attended the 1994 Summit of the Americas, held in Miami; managed coordination of the agenda item on education for the 1998 Summit of the Americas in Santiago, Chile; and hosted a Special Summit of the Americas in early 2004. Mexico hosted the September 2003 WTO Ministerial in Cancun and a Hemispheric Security Conference in October of the same year. It was elected to the International Atomic Energy Agency Board of Governors in 2003. In 2002 it hosted the APEC Leaders' Meeting in Cabo San Lucas.

U.S.-MEXICAN RELATIONS

U.S. relations with Mexico are as important and complex as with any country in the world. A stable, democratic, and economically prosperous Mexico is fundamental to U.S. interests. U.S. relations with Mexico have a direct impact on the lives and livelihoods of millions of Americans—whether the issue is trade and economic reform, homeland security, drug control, migration, or the promotion of democracy. The U.S. and Mexico are partners in NAFTA, and enjoy a broad and expanding trade relationship. In March 2005, the U.S., Mexico, and Canada formed the Security and Prosperity Partnership (SPP), which contemplates trilateral and bilateral initiatives to develop new avenues of cooperation that will enhance North America's security, competitiveness, and economic resilience. The scope of U.S.-Mexican relations goes far beyond diplomatic and official contacts; it entails extensive commercial, cultural, and educational ties, as demonstrated by the annual figure of about a million legal border crossings a day. In addition, between a half-million and a million American citizens live in Mexico. More than 18,000 companies with U.S. investment have operations there, and the U.S. accounts for 47% of all foreign direct investment in Mexico. Along the 2,000-mile shared border, state and local governments interact closely.

There has been frequent contact at the highest levels. Presidents' meetings have included the Asia-Pacific Economic Cooperation Leaders' Meeting in Bangkok in October 2003 and President Bush's visits to Monterrey in January 2004 (Summit of the Americas) and March 2002. Presidents Bush and Fox met in Crawford in March 2005 where, along with then Canadian Prime Minister Martin, they launched the Security and Prosperity Partnership. They held a follow-on SPP meeting with Canadian Prime Minister Harper in Cancun in March 2006. President Calderon joined President Bush and Prime Minister Harper in Montebello, Canada in August 2007, and in New Orleans for the third SPP leaders' meeting in April 2008.

A strong partnership with Mexico is critical to combating terrorism and controlling the flow of illicit drugs into the United States. In recent years, cooperation on counter-narcotics and Mexico's own initiatives in fighting drug trafficking have been unprecedented. At the August 2007 SPP leaders' meeting in Montebello, Canada, Presidents Bush and Calderon announced the Merida Initiative to work together and with the countries of Central America to combat drug trafficking and organized crime in the region. In June 2008, President Bush signed the congressional appropriations bill that allocated $400 million in assistance to Mexico under the Merida Initiative.

Border and Environmental Affairs

Cooperation between the United States and Mexico along the 2,000-mile common border includes state and local problem-solving mechanisms; transportation planning; and institutions to address resource, environment, and health issues. In 1993, the Border Liaison Mechanism (BLM) was established. Chaired by U.S. and Mexican consuls, the BLMs operate in "sister city" pairs and have proven to be effective means of dealing with a variety of local issues ranging from accidental violation of sovereignty by law enforcement officials and charges of mistreatment of foreign nationals to coordination of port security and cooperation in public health matters such as tuberculosis.

As the number of people and the volume of cargo crossing the U.S.-Mexico border grow, so, too, does the need for coordinated infrastructure development. The multi-agency U.S.-Mexico Binational Group on Bridges and Border Crossings meets twice yearly to improve the efficiency of existing crossings and coordinate planning for new ones. The 10 U.S. and Mexican border states have become active participants in these meetings.

The United States and Mexico have a history of cooperation on environmental and natural resource issues, particularly in the border area, where there are serious environmental problems caused by rapid population growth, urbanization, and industrialization. Cooperative activities between the U.S. and Mexico take place under a number of agreements such as:

- An 1889 convention establishing the International Boundary Commission, reconstituted by the Water Treaty of 1944 as the International Boundary and Water Commission, United States and Mexico (IBWC). The IBWC has settled many difficult U.S.-Mexico boundary and water problems, including the regularization of the Rio Grande near El Paso through the 1967 Chamizal settlement. The IBWC determines and accounts for national ownership of international waters, builds and operates water conservation and flood control projects, and constructs and maintains boundary markers on the land boundary and on international bridges. In recent years, the IBWC has worked to resolve long-standing border sanitation problems, to monitor the quantity and quality of border waters, and to address water delivery and sedimentation problems of the Colorado River.

- The 1983 La Paz Agreement to protect and improve the border environment and Border 2012, a 10-year, binational, results-oriented environmental program for the U.S.-Mexico border region. The Border 2012 Program is the latest multi-year, binational planning effort to be implemented under the La Paz Agreement and succeeds Border XXI, a five-year program that ended in 2000.

- A November 1993 agreement between the U.S. and Mexico, establishing the North American Development Bank (NADBank) and the Border Environment Cooperation Commission (BECC) under the auspices of NAFTA, in order to address border environmental problems. The NADBank uses capital and grant funds contributed by Mexico and the U.S. to help finance border environmental infrastructure projects certified by the BECC. The BECC works with local communities to develop and certify environmental infrastructure projects, such as wastewater treatment plants, drinking water systems, and solid waste disposal facilities. Prior to 2005, both institutions had separate Boards of Directors. In an effort to improve efficiency, the separate Boards were merged into a single entity, which held its first meeting in June 2006.

- The 1993 North American Agreement on Environmental Cooperation (NAAEC), creating the North American Commission on Environmental Cooperation under NAFTA by the U.S., Mexico, and Canada, to improve enforcement of environmental laws and to address common environmental concerns.

- A series of agreements on border health (since 1942), wildlife and migratory birds (since 1936), national parks, forests, marine and atmospheric resources. In July 2000, the U.S. and Mexico signed an agreement to establish a binational Border Health Commission. The Border Health Commission meets annually and is made up of the federal secretaries of health, the 10 border states' chief health officers, and prominent community health professionals from both countries. A representative from the U.S. Department of Health and Human Services manages the U.S. Section in El Paso, Texas.

TRAVEL

Consular Information Sheet

August 13, 2008

Country Description: Mexico is a Spanish-speaking country about three times the size of Texas, consisting of 31 states and one federal district. The capital is Mexico City. Mexico has a rapidly developing economy, ranked by the World Bank as the twelfth largest in the world.

The climate ranges from tropical to desert, and the terrain consists of coastal lowlands, central high plateaus, and mountains of up to 18,000 feet.

Many cities throughout Mexico are popular tourist destinations for U.S. citizens. Travelers should note that location-specific information contained below is not confined solely to those cities, but can reflect conditions throughout Mexico. Although the majority of visitors to Mexico thoroughly enjoy their stay, a small number experience difficulties and serious inconveniences.

Entry Requirements: For the latest entry requirements, contact the Embassy of Mexico web site at http://portal.sre.gob.mx/usa/ or contact the Embassy of Mexico at 1911 Pennsylvania Avenue NW, Washington, DC 20006, telephone (202) 736-1000 or any Mexican consulate in the United States for the most current information.

Land or sea travelers must have a valid U.S. passport (or U.S. citizenship documents such as a certified copy (not a simple photocopy or facsimile) of a U.S. birth certificate, a Naturalization Certificate, a Consular Report of Birth Abroad, or a Certificate of Citizenship are acceptable along with photo identification, such as a state or military issued ID). U.S. legal permanent residents in possession of their I-551 Permanent Resident card may board flights to the U.S. from Mexico.

Minors: Mexican law requires that any non-Mexican citizen under the age of 18 departing Mexico must carry notarized written permission from any parent or guardian not traveling with the child to or from Mexico. This permission must include the name of the parent, the name of the child, the name of anyone traveling with the child, and the notarized signature(s) of the absent parent(s). The State Department recommends that the permission should include travel dates, destinations, airlines and a brief summary of the circumstances surrounding the travel. The child must be carrying the original letter—not a facsimile or scanned copy—as well as proof of the parent/child relationship (usually a birth certificate or court document)—and an original custody decree, if applicable. Travelers should contact the Mexican Embassy or closest Mexican Consulate for current information.

Tourist Travel: U.S. citizens do not require a visa or a tourist card for tourist stays of 72 hours or less within "the border zone," defined as an area between 20 to 30 kilometers of the border with the U.S., depending on the location. U.S. citizens traveling as tourists beyond the border zone or entering Mexico by air must pay a fee to obtain a tourist card, also known as an FM-T, available from Mexican consulates, Mexican border crossing points, Mexican tourism offices, airports within the border zone and most airlines serving Mexico. The fee for the tourist card is generally included in the price of a plane ticket for travelers arriving by air.

Business Travel: Upon arrival in Mexico, business travelers must complete and submit a form (Form FM-N) authorizing the conduct of business, but not employment, for a 30-day period. Travelers entering Mexico for purposes other than tourism or business or for stays of longer than 180 days require a visa and must carry a valid U.S. passport. U.S. citizens planning to work or live in Mexico should apply for the appropriate Mexican visa at the Mexican Embassy in Washington, D.C., or nearest Mexican consulate in the United States.

Vehicle Permits: Tourists wishing to travel beyond the border zone with their vehicle must obtain a temporary import permit or risk having their vehicle confiscated by Mexican customs officials. At present the only exceptions to the requirement are travel in the Baja Peninsula and in the state of Sonora only for vehicles entering through the Nogales port of entry. Travelers are advised that the "Sonora Only" exception through the Nogales port of entry will expire at the end of 2007. To acquire a permit, one must submit evidence of citizenship, title for the vehicle, a vehicle registration certificate, a driver's license, and a processing fee to either a Banjercito (Mexican Army Bank) branch located at a Mexican Customs (Aduanas) office at the port of entry, or at one of the Mexican Consulates located in the U.S. Mexican law also requires the posting of a bond at a Banjercito office to guarantee the export of the car from Mexico within a time period determined at the time of the application. For this purpose, American Express, Visa or MasterCard credit card holders will be asked

to provide credit card information; others will need to make a cash deposit of between $200 and $400, depending on the make/model/year of the vehicle. In order to recover this bond or avoid credit card charges, travelers must go to any Mexican Customs office immediately prior to departing Mexico. Despite any advice, official or unofficial, to the contrary, vehicle permits cannot be obtained at checkpoints in the interior of Mexico.

Travelers should avoid individuals outside vehicle permit offices offering to obtain the permits without waiting in line, even if they appear to be government officials. There have been reports of fraudulent or counterfeit permits being issued adjacent to the vehicle import permit office in Nuevo Laredo and other border areas. If the proper permit is not obtained before entering Mexico and cannot be obtained at the Banjercito branch at the port of entry, do not proceed to the interior. Travelers without the proper permit may be incarcerated, fined and/or have their vehicle seized at immigration/customs checkpoints. For further information, contact Mexican Customs about appropriate vehicle permits.

Dual Nationality: Mexican law recognizes dual nationality for Mexicans by birth, meaning those born in Mexico or born abroad to Mexican parents. U.S. citizens who are also Mexican nationals are considered to be Mexican by local authorities. Dual-nationality status could hamper U.S. Government efforts to provide consular protection. Dual nationals are not subject to compulsory military service in Mexico. Travelers possessing both U.S. and Mexican nationalities must carry with them proof of their citizenship of both countries. Under Mexican law, dual nationals entering or departing Mexico must identify themselves as Mexican.

Safety and Security: Violence by criminal elements affects many parts of the country, urban and rural. Visitors to the U.S.-Mexico border region, including cities such as Tijuana, Ciudad Juarez, Nuevo Laredo, Nogales, Matamoros, and Monterrey should remain alert and be aware of their surroundings at all times. In its efforts to combat violence, the Government of Mexico has deployed military troops in various parts of the country. Military checkpoints increased in border areas in early 2008. U.S. citizens are advised to cooperate with official checkpoints when traveling on Mexican highways. Sporadic outbursts of politically motivated violence occur from time to time in certain areas of the country, particularly in the southern states of Chiapas, Guerrero and Oaxaca.

Demonstrations: The Mexican Constitution prohibits political activities by foreigners, and such actions may result in detention and/or deportation. Travelers should avoid political demonstrations and other activities that might be deemed political by the Mexican authorities. Even demonstrations intended to be peaceful can turn confrontational and escalate into violence. U.S. citizens are urged to avoid the areas of demonstrations, and to exercise caution if in the vicinity of any protests.

Chiapas: The Department of State recommends U.S. citizens traveling to the southern state of Chiapas remain cautious at all times. Armed rebels and armed civilian groups are present in some areas of the state, and there is often no effective law enforcement or police protection. Violent criminal gang activity along the state's southern border—mostly aimed at illegal migrants—continues to be a concern. U.S. citizens traveling to Chiapas are encouraged to contact the U.S. Embassy for further security information prior to traveling to the region.

General Safety: Standards of security, safety, and supervision may not reach those expected in the United States. This has contributed to deaths of U.S. citizens in automobile accidents, after falls from balconies or into open ditches, by drowning in the ocean as well as in hotel pools, and in water-sports mishaps, among others.

The Department of State urges American citizens to take responsibility for their own personal security while traveling overseas. For the latest security information, Americans traveling abroad should regularly monitor the Department's travel web site where the current Worldwide Caution, Travel Warnings, and Travel Alerts can be found. Please visit the Safety Issues section for additional safety information.

Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the United States, or, for callers outside the United States and Canada, a regular toll line at 1-202-501-4444. These numbers are available from 8:00 a.m. to 8:00 p.m. Eastern Time, Monday through Friday (except U.S. federal holidays).

Crime: Crime in Mexico continues at high levels, and it is often violent, especially in Mexico City, Tijuana, Ciudad Juarez, Nuevo Laredo, Monterrey, Acapulco, and the state of Sinaloa. Other metropolitan areas have lower, but still serious, levels of crime. Low apprehension and conviction rates of criminals contribute to Mexico's high crime rate. U.S. citizen victims of crime in Mexico are encouraged to report the incident to the nearest police headquarters and to the nearest U.S. consular office.

In many countries around the world, counterfeit and pirated goods are widely available. Transactions involving such products may be illegal under local law. In addition, bringing them back to the United States may result in forfeitures and/or fines. More information on this serious problem is available at http://www.cybercrime.gov/18usc2320.htm.

Personal Property: Travelers should always leave valuables and irreplaceable items in a safe place, or not bring them at all. All visitors are encouraged to make use of hotel safes when available, avoid wearing obviously expensive jewelry or designer clothing, and carry only the cash or credit cards that will be needed on each outing. There are a significant number of pickpocket, purse snatching, and hotel-room theft incidents. Public transportation is a particularly popular place for pickpockets.

When renting a vehicle, ensure that advertisements or labels for the rental agency are not prominently displayed on the vehicle. Avoid leaving valuables such as identification, passport and irreplaceable property in rental vehicles, even when locked.

A number of Americans have been arrested for passing on counterfeit currency they had earlier received in change. If you receive what you believe to be a counterfeit bank note, bring it to the attention of Mexican law enforcement.

Personal Safety: Visitors should be aware of their surroundings at all times, even when in areas generally considered safe. Women traveling alone are especially vulnerable and should exercise caution, particularly at night. Victims, who are almost always unaccompanied, have been raped, robbed of personal property, or abducted and then held while their credit cards were used at various businesses and Automatic Teller Machines (ATMs). U.S. citizens should be very cautious in general when using ATMs in Mexico. If an ATM must be used, it should be accessed only during the business day at large protected facilities (preferably inside commercial establishments, rather than at glass-enclosed, highly visible ATMs on streets). U.S. and Mexican citizens are sometimes accosted on the street and forced to withdraw money from their accounts using their ATM cards.

Kidnapping, including the kidnapping of non-Mexicans, continues at alarming rates. So-called express kidnappings, an attempt to get quick cash in exchange for the release of an individual, have occurred in almost all the large cities in Mexico and appear to target not only the wealthy, but also the middle class. U.S. businesses with offices in Mexico or concerned U.S. citizens may contact the U.S. Embassy or any U.S. consulate to discuss precautions they should take.

Kidnapping in Mexico has become a lucrative business, whether it be an actual kidnapping or a virtual kidnapping. A common scam throughout Mexico is telephone kidnapping with a similar methodology. The virtual kidnapping calls typically include a distraught voice immediately after the phone is answered that serves as a ploy to elicit information about a potential victim. The caller then uses this knowledge to demand ransom for the release of the supposed victim. In the event of such a call stay calm since the vast majority of the calls are hoaxes; do not reveal any personal information; try to speak with the victim to corroborate identity; and contact the local police as well as the Embassy or nearest Consulate.

Criminal assaults occur on highways throughout Mexico; travelers should exercise extreme caution at all times, avoid traveling at night, and may wish to use toll ("cuota") roads rather than the less secure "free" ("libre") roads whenever possible. Always keep your car doors locked and your windows up while driving, whether on the highway or in town. When in heavy traffic or when stopped in traffic, leave enough room between vehicles to maneuver and escape, if necessary. In addition, U.S. citizens should not hitchhike with, accept rides from or offer rides to, strangers anywhere in Mexico. Tourists should not hike alone in backcountry areas, nor walk alone on lightly-frequented beaches, ruins or trails.

Street Crime: Armed street crime is a serious problem in all of the major cities. Some bars and nightclubs, especially in resort cities such as Cancun, Cabo San Lucas, Mazatlan, Acapulco, and Tijuana, can be havens for drug dealers and petty criminals. Some establishments may contaminate or drug drinks to gain control over the patron.

All bus travel should be during daylight hours and on first-class conveyances. Although there have been several reports of bus hijackings and robberies on toll roads, buses on toll roads have a markedly lower rate of incidents than buses (second- and third-class) that travel the less secure "free" highways. The Embassy advises caution when traveling by bus from Acapulco toward Ixtapa or Huatulco. Although the police have made some progress in bringing this problem under control, armed robberies of entire busloads of passengers still occur.

Harassment/Extortion: In some instances, Americans have become victims of harassment, mistreatment and extortion by Mexican law enforcement and other officials. Mexican authorities have cooperated in investigating such cases, but one must have the officer's name, badge number, and patrol car number to pursue a complaint effectively. Please note this information if you ever have a problem with police or other officials. In addition, tourists should be wary of persons representing themselves as police officers or other officials. When in doubt, ask for identification. Be aware that offering a bribe to a public official to avoid a ticket or other penalty is a crime in Mexico.

It is increasingly common for extortionists to call prospective victims on the telephone, often posing as law enforcement or other officials, and demand payments in return for the release of an arrested family member, or to forestall a kidnapping. Prison inmates using smuggled cellular phones often place these calls. Persons receiving such calls should be extremely skeptical since most such demands or threats are baseless, and should contact the U.S. Embassy or closest U.S. consulate, or the Department of State for assistance.

U.S. citizens may refer to A Safe Trip Abroad for ways to promote a trouble-free journey.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are a victim of a crime while overseas, you should report it immediately to the nearest U.S. consular office and make a report to Mexican authorities. Do not rely on hotel/restaurant/tour company management to make the report for you. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, contact family members or friends and explain how funds can be transferred.

Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed. Under the best of circumstances, prosecution is very difficult (a fact some assailants appear to exploit knowingly), but no criminal investigation is possible without a formal complaint to Mexican authorities.

Victims of crime may also report the crime to the Mexican embassy or nearest Mexican consulate after arriving in the United States. Before doing so, please contact the U.S. Embassy or consulate in Mexico for assistance in coordinating with Mexican consular officials to obtain an official appointment for the victim or witness with the Mexican Embassy or consulate. Travelers are encouraged to report crimes as soon as possible. Delays in reporting the crime may hinder or even prevent prosecution in some cases.

Crime in Mexico City: In Mexico City, the most frequently reported crimes involving tourists are taxi robbery (see below), armed robbery, pick pocketing, and purse-snatching. In several cases, tourists have reported that men in uniforms perpetrated the crime, stopping vehicles and seeking money, or assaulting and robbing tourists walking late at night. As in any large city, individuals should exercise caution and be aware of their surroundings, especially when walking anywhere in the city.

Business travelers should be aware that theft occurs even in what appears to be secure locations. Theft of such items as briefcases and laptops occur frequently at the Benito Juarez International Airport and at business-class hotels. Arriving travelers who need to obtain pesos at the airport should use the exchange counters or ATMs in the arrival/departure gate area, where access is restricted, rather than changing money after passing through Customs, where they can be observed by criminals.

Exercise caution when utilizing credit or debit cards in ATM machines or dubious locales. There have been reports of instances in which U.S. citizens in Mexico have had their card numbers "skimmed" and the money in their debit accounts stolen or their credit cards fraudulently charged. ("Skimming" is the theft of credit card information by an employee of a legitimate merchant or bank, manually copying down numbers or using a magnetic stripe reader.) In addition to skimming, the risk of physical theft of credit or debit cards also exists. To prevent such theft, the Embassy recommends that travelers keep close track of their personal belongings when out and about and that they only carry that which is needed. If travelers choose to use credit cards, they should regularly check their account status to ensure its integrity.

Metro (subway) robberies are frequent in Mexico City. If riding the Metro or the city bus system, U.S. citizens should take extreme care with valuables and belongings. Avoid using Metro during busy commuting hours in the morning or afternoon. Tourists and residents alike should avoid driving alone at night anywhere in Mexico City.

Robbery and assault on passengers in taxis are frequent and violent in Mexico City, with passengers subjected to beating, shooting, and sexual assault. U.S. citizens visiting Mexico City should avoid taking any taxi not summoned by telephone or contacted in advance. When in need of a taxi, telephone a radio taxi or "sitio" (regulated taxi stand—pronounced "C-T-O"), and ask the dispatcher for the driver's name and the cab's license plate number. Ask the hotel concierge or other responsible individual to write down the license plate number of the cab that you entered. Avoid "libre" taxis and the Volkswagen beetle taxis altogether. Although "libre" taxis are more convenient and less expensive, these are less regulated, may be unregistered, and are potentially more dangerous.

Passengers arriving at Mexico City's Benito Juarez International Airport should take only airport taxis (which are white with a yellow stripe and a black airplane symbol) after pre-paying the fare at one of the special booths inside the airport.

Crime in Cancun, Acapulco, and Other Resort Areas: There have been a significant number of rapes reported in Cancun and other resort areas. Many of these have occurred at night or in the early morning. Attacks have also occurred on deserted beaches and in hotel rooms. Acquaintance rape is a serious problem. In other cases, hotel workers, taxi drivers, and security personnel have been implicated. Please refer to our information for Victims of Crime.

Drug-related violence, including shooting and kidnapping, has increased in Acapulco. Although this violence is not targeted at foreign residents or tourists, U.S. citizens in these areas should be vigilant in their personal safety.

See the information at http://travel.state.gov regarding Spring Break in Mexico if you are considering visiting Mexican resort areas during February through March when thousands of US college students traditionally arrive in those areas. Additional information designed specifically for traveling students is available at studentsabroad.state.gov.

Crime in Border Cities: Visitors to the U.S.–Mexico border region, including cities such as Tijuana, Ciudad Juarez, Nuevo Laredo, Nogales, Reynosa, Matamoros, and Monterrey, should remain alert and be aware of their surroundings at all times.

Some border cities have seen an increase in violence over the past year, some of which has been directed against U.S. citizens. Local police forces have been ineffective in maintaining security in some regions along the border. Drug-related violence has increased dramatically in recent months, and shows no sign of abating. While U.S. citizens not involved in criminal activities are generally not targeted, innocent

bystanders are at risk from the increase in violence in the streets of border cities.

In Ciudad Juarez, Monterrey, Nuevo Laredo, and Tijuana, shootings have taken place at busy intersections and at popular restaurants during daylight hours. The wave of violence has been aimed primarily at members of drug-trafficking organizations, criminal justice officials, and journalists. However, foreign visitors and residents, including U.S. citizens, have been among the victims of homicide and kidnapping in the border region. U.S. citizens are urged to be especially aware of safety and security concerns when visiting the border region and exercise commonsense precautions such as visiting only legitimate business and tourist areas of border towns during daylight hours. U.S. citizens who frequently make routine visits to border cities should vary their routes and times and are urged to park in well-lighted, paid, and guarded parking lots. Exercise caution when entering or exiting your vehicle and instruct all fellow travelers to enter and exit the vehicle safely and quickly.

Mexican authorities have failed to prosecute numerous crimes committed against U.S. citizens, including murder and kidnapping. Local police forces suffer from a lack of funds and training, and the judicial system is weak, overworked, and inefficient. Criminals, armed with an impressive array of weapons, know there is little chance they will be caught and punished. In some cases, assailants have been wearing full or partial police uniforms and have used vehicles that resemble police vehicles, indicating some elements of the police might be involved.

Visitors are very vulnerable when visiting the local "red-light districts," particularly if they are departing alone in the early hours of the morning. In Ciudad Juarez and Tijuana, there has also been a rise in automobile accidents in which municipal police extort money from U.S. citizen victims.

Criminal Penalties And Treatment of Prisoners: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. The trial process in Mexico is different from the trial process in the United States, and procedures may vary from state to state. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating Mexican laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use or trafficking in illegal drugs in Mexico are severe, and convicted offenders can expect long jail sentences and heavy fines.

Sexual Offenses: Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States. Soliciting the services of a minor for sexual purposes is illegal in Mexico, and is punishable by imprisonment. The Mexican government has announced an aggressive program to discourage sexual tourism. Police authorities in the state of Baja California recently began enforcement of anti-pedophile legislation.

Arrests & Notifications: The Mexican government is required by international law to notify the U.S. Embassy or the nearest U.S. consulate promptly when a U.S. citizen is arrested, if the arrestee so requests. In practice, however, this notification can be delayed by months or may never occur at all, limiting the assistance the U.S. Government can provide. U.S. citizens should promptly identify themselves as such to the arresting officers, and should request that the Embassy or nearest consulate be notified immediately.

Prison Facilities: Prison conditions in Mexico can be extremely poor. In many facilities food is insufficient in both quantity and quality, and prisoners must pay for adequate nutrition from their own funds. Most Mexican prisons provide poor medical care, and even prisoners with urgent medical conditions receive only a minimum of attention. U.S. citizens who are incarcerated in Mexico are sometimes forced to pay hundreds and even thousands of dollars in "protection money" to fellow prisoners.

Prisoner Treatment/Interrogations: Mexican police regularly obtain information through torture and prosecutors use this evidence in courts. The Mexican Constitution and the law prohibit torture, and Mexico is party to several international anti-torture conventions, but courts continue to admit as evidence confessions extracted under torture. Authorities rarely punish officials for torture, which continues to occur in large part because confessions are the primary evidence in many criminal convictions. U.S. citizens have been brutalized, beaten, and even raped while in police custody. Since the beginning of 2002, 21 U.S. citizens have died in Mexican prisons, including five apparent homicides.

Drug Penalties and Prescription Medications: Penalties for drug offenses are strict, and convicted offenders can expect large fines and jail sentences up to 25 years. The purchase of controlled medication requires a prescription from a licensed Mexican physician; some Mexican doctors have been arrested for writing prescriptions without due cause. In those instances, U.S. citizens who bought the medications have been held in jail for months waiting for the Mexican judicial system to decide their fate. The Mexican list of controlled medication differs from that of the United States, and Mexican public health laws concerning controlled medication are unclear and often enforced selectively. To determine whether a particular medication is controlled in Mexico, and requires a prescription from a Mexican doctor for purchase, please consult the website of the Mexican Federal Commission for Protection Against Health Risks (Comisión Federal para la Protección contra Riesgos Sanitarios—COFEPRIS) at Listado de Medicamentos Controlados, http://www.cofepris.gob.mx/pyp/estpsic/es.htm. This site is in Spanish only.

Buying Prescription Drugs: The U.S. Embassy recommends that U.S. citizens not travel to Mexico for the sole purpose of buying prescription drugs. U.S. citizens have been arrested and their medicines confiscated by the Mexican authorities when their prescriptions were written by a licensed American physician and filled by a licensed Mexican pharmacist. There have been cases of U.S. citizens buying prescription drugs in border cities only to be arrested soon after or have money extorted by criminals impersonating police officers. Those arrested are often held for the full 48 hours allowed by Mexican law without charges being filed, then released. During this interval, the detainees are often asked for bribes or are solicited by attorneys who demand large fees to secure their release, which will normally occur without any intercession as there are insufficient grounds to bring criminal charges against the individuals. In addition, U.S. law enforcement officials believe that as much as 25 percent of medications available in Mexico are counterfeit and substandard. Such counterfeit medications may be difficult to distinguish from the real medications and could pose serious health risks to consumers. The importation of prescription drugs into the United States can be illegal in certain circumstances. U.S. law generally permits persons to enter the United States with only an immediate (about one-month) supply of a prescription medication.

Criminal Penalties for Possession: The U.S. Embassy cautions that possession of any amount of prescription medication brought from the United States, including medications to treat HIV, and psychotropic drugs such as Valium, can result in arrest if Mexican authorities suspect abuse or if the quantity of the prescription medication exceeds the amount required for several days' use. Individuals should consider carrying a copy of the prescription and a Mexican doctor's letter explaining that the quantity of medication is appropriate for their personal medical use.

Importing Medicine to Mexico: To import prescription medication into Mexico for personal use, a foreigner must obtain a permit from the Mexican Health Department prior to importing the medicine into Mexico. Additional information in Spanish is available at http://www.cofepris.gob.mx.

For a fee, a customs broker can process the permit before the Mexican authorities on behalf of an individual. If using the services of a customs broker, it is advisable to agree upon the fees before telling the broker to proceed. Current information on local customs brokers (agencias aduanales) is available at the Mexico City yellow pages at http://www.seccionamarilla.com.mx.

Pirated Merchandise: Counterfeit and pirated goods are widely available in Mexico. Their sale is largely controlled by organized crime. Purchase for personal use is not criminalized in Mexico; however, bringing these goods back to the United States may result in forfeitures and/or fines. For more information on this serious problem visit the Special 301 Report at http://www.ustr.gov.

Firearms Penalties: The Department of State warns U.S. citizens against taking any type of firearm or ammunition into Mexico without prior written authorization from the Mexican authorities. Entering Mexico with a firearm, some kinds of knives or even a single round of ammunition is illegal, even if the weapon or ammunition is taken into Mexico unintentionally. The Mexican government strictly enforces its laws restricting the entry of firearms and ammunition along all land borders and at airports and seaports. Violations have resulted in arrests, convictions, and long prison sentences for U.S. citizens.

Vessels entering Mexican waters with firearms or ammunition on board must have a permit previously issued by the Mexican Embassy or a Mexican consulate. Mariners do not avoid prosecution by declaring their weapons at the port of entry. Before traveling, mariners who have obtained a Mexican firearm permit should contact Mexican port officials to receive guidance on the specific procedures used to report and secure weapons and ammunition.

Customs Regulations: U.S. citizens bringing gifts to friends and relatives in Mexico should be prepared to demonstrate to Mexican customs officials the origin and the value of the gifts. U.S. citizens entering Mexico by the land border can bring in gifts with a value of up to $50.00 duty-free, except for alcohol and tobacco products. U.S. citizens entering Mexico by air or sea can bring in gifts with a value of up to $300.00 duty-free.

Personal Effects: Tourists are allowed to bring in their personal effects duty-free. According to customs regulations, in addition to clothing, personal effects may include one camera, one video cassette player, one personal computer, one CD player, 5 DVDs, 20 music CDs or audiocassettes, 12 rolls of unused film, and one cellular phone. Any tourist carrying such items, even if duty-free, should enter the "Merchandise to Declare" lane at the first customs checkpoint. The tourist should be prepared to pay any assessed duty. Failure to declare personal effects routinely results in the seizure of the goods as contraband, plus the seizure of the vehicle in which the goods are traveling for attempted smuggling. The recovery of the seized vehicle involves the payment of substantial fines and attorney's fees.

Temporary Imports/Exports: Mexican customs authorities enforce strict regulations concerning temporary importation into or export from Mexico of items such as trucks and autos, trailers, antiquities, medications, medical equipment, business equipment, etc. Prior to traveling, contact the Mexican Embassy or one of the Mexican consulates in the United States for specific information regarding customs requirements.

Property Donations: U.S. citizens traveling to Mexico with goods intended for donation within Mexico, or traveling through Mexico with goods intended for donation in another country, should be aware of Mexican Customs regulations prohib-

iting importation of used clothing, textiles, and other used goods into Mexico. These regulations apply even to charitable donations. Individuals or groups wishing to make such donations should check with Mexican Customs for the list of prohibited items, and should hire an experienced customs broker in the U.S. to ensure compliance with Mexican law. The charitable individual or group, not the customs broker, will be held responsible for large fines or confiscation of goods if the documentation is incorrect. The website for Mexican Customs (Aduanas) is in Spanish only at Acerca de Aduana Mexico ("About Mexican Customs") at http://www.aduanas.sat.gob.mx/aduana_mexico/2007/A_body.htm. Mexican authorities require that all international transit through Mexico of persons and merchandise destined for Central or South America be handled only at the Los Indios Bridge located south of Harlingen, Texas on Route 509. The U.S. Consulate in Matamoros is the closest consulate to Los Indios Bridge and may be contacted for up-to-date information by calling 011-52-868-812-4402, ext. 273 or 280, or by checking their web site, http://matamoros.usconsulate.gov which lists in English the most common items prohibited from entry into Mexico.

Medical Facilities and Health Information: Adequate medical care can be found in major cities. Excellent health facilities are available in Mexico City, but training and availability of emergency responders may be below U.S. standards. Care in more remote areas is limited. Standards of medical training, patient care and business practices vary greatly among medical facilities in beach resorts throughout Mexico. In recent years, some U.S. citizens have complained that certain health-care facilities in beach resorts have taken advantage of them by overcharging or providing unnecessary medical care. Elective medical procedures may be less expensive than in the United States. However, visitors are cautioned that facilities may lack access to sufficient emergency support. The U.S. Embassy encourages visitors to obtain as much information about the facility and the medical personnel as possible when considering surgical or other procedures. The U.S. Embassy, U.S. consulates, and consular agencies maintain lists of reputable doctors and medical facilities that are available to assist U.S. citizens in need of medical care.

Water Quality: In many areas in Mexico, tap water is unsafe and should be avoided. Bottled water and beverages are safe although visitors should be aware that many restaurants and hotels serve tap water unless bottled water is specifically requested. Ice may also come from tap water and should be used with caution. Visitors should exercise caution when buying food or beverages from street vendors.

The quality of water along some beaches in or near Acapulco or other large coastal communities may be unsafe for swimming because of contamination. Swimming in contaminated water may cause diarrhea and/or other illnesses. Mexican government agencies monitor water quality in public beach areas but their standards and sampling techniques may differ from those in the United States.

Altitude: In high-altitude areas such as Mexico City (elevation 7,600 feet or about 1/2 mile higher than Denver, Colorado), most people need a short adjustment period. Reaction signs to high altitude include a lack of energy, shortness of breath, occasional dizziness, headache, and insomnia. Those with heart problems should consult their doctor before traveling. Air pollution in Mexico City and Guadalajara is severe, especially from December to May, and combined with high altitude could affect travelers with underlying respiratory problems.

Other Health Issues: Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's web site at http://wwwn.cdc.gov/travel/default.aspx. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith/en.

Medical Insurance: The Department of State strongly urges U.S. citizens to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation. To ensure proper reimbursement of medical expenses by insurance carriers, the U.S. Embassy recommends that patients ensure they have sufficient documentation of their care and treatment before leaving the health care facility.

The Social Security Medicare Program does not provide coverage for hospital or medical costs outside the United States. Please see additional information on medical insurance abroad.

The U.S. Department of State is unaware of any HIV/AIDS entry restrictions for visitors to or foreign residents of Mexico.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Mexico is provided for general reference only, and may not be totally accurate in a particular location or circumstance. Public transportation vehicles, specifically taxis and city buses, often do not comply with traffic regulations, including observing speed limits and stopping at red lights.

Driving and Vehicle Regulations: U.S. driver's licenses are valid in Mexico. The Government of Mexico strictly regulates the entry of vehicles into Mexico.

Mexican law requires that only owners drive their vehicles, or that the

owner be inside the vehicle. If not, the vehicle may be seized by Mexican customs and will not be returned under any circumstances.

Insurance: Mexican insurance is required for all vehicles, including rental vehicles. Mexican auto insurance is sold in most cities and towns on both sides of the border. U.S. automobile liability insurance is not valid in Mexico, nor is most collision and comprehensive coverage issued by U.S. companies. Motor vehicle insurance is considered invalid in Mexico if the driver is found to be under the influence of alcohol or drugs.

Road Emergencies and Automobile Accidents: If you have an emergency while driving, the equivalent of "911" in Mexico is "060," but this number is not always answered. If you are driving on a toll highway (or "cuota") or any other major highway, you may contact the Green Angels (Angeles Verdes), a fleet of trucks with bilingual crews. The Green Angels may be reached directly at (01) (55) 5250-8221. If you are unable to call them, pull off the road and lift the hood of your car, chances are they will find you.

If you are involved in an automobile accident, you will be taken into police custody until it can be determined who is liable and whether you have the ability to pay any penalty. If you do not have Mexican liability insurance, you may be prevented from departing the country even if you require life-saving medical care, and you are almost certain to spend some time in jail until all parties are satisfied that responsibility has been assigned and adequate financial satisfaction received. Drivers may face criminal charges if injuries or damages are serious.

Road Safety: Avoid driving on Mexican highways at night. Even multilane expressways in Mexico often have narrow lanes and steep shoulders. Single-vehicle rollover accidents involving U.S. citizens are very common, often resulting in the death or serious injury to vehicle occupants. Use extreme caution when approaching towns, on curves, and when passing large trucks. All vehicle occupants should use seatbelts at all times. Vehicular traffic in Mexico City is restricted in order to reduce air pollution. The restriction is based on the last digit of the vehicle license plate. This applies equally to permanent, temporary, and foreign (U.S.) plates. For additional information refer to http://www.hoynocircula.com.mx/ (Spanish only).

For additional information in English concerning Mexican driver's permits, vehicle inspection, road tax, mandatory insurance, etc., please contact the Mexican Secretariat of Tourism (SECTUR) at telephone 1-800-44-MEXICO (639-426). Travelers can also consult http://www.mexonline.com/drivemex.htm. For detailed information in Spanish only, visit Mexican Customs' web site Importación Temporal de Vehículos ("Temporary Importation of Vehicles") at http://www.aduanas.sat.gob.mx. Travelers are advised to consult with the Mexican Embassy or the nearest Mexican consulate in the United States for additional, detailed information prior to entering Mexico. For travel information for the Baja California peninsula, you can also consult independent web sites Travel to Baja at http://www.traveltobaja.net/ or Discover Baja California at http://www.discoverbajacalifornia.com/home.htm.

Aviation Safety Oversight: The U.S. Federal Aviation Administration (FAA) has assessed the Government of Mexico's Civil Aviation Authority as being in compliance with International Civil Aviation Organization (ICAO) aviation safety standards for oversight of Mexico's air carrier operations. For more information, travelers may visit the FAA's Internet web site at http://www.faa.gov.

Special Circumstances: Weather conditions may vary as they do in various parts of the United States. From June to November, the country may experience strong winds and rains as a result of hurricanes in the Gulf or along the Pacific Coast. Some areas may experience earth tremors. It is prudent to leave a detailed itinerary, including local contact information and expected time-date of return with a friend or family member.

Water Sports: Visitors to Mexico, including to local resort areas, should carefully assess the potential risk of recreational activities. Recreational facilities such as pools may not meet U.S. safety or sanitation standards. Do not swim in pools or at beaches without lifeguards. Several U.S. citizens have died in hotel pools in recent years. Swimming pool drain systems may not comply with U.S. safety standards and swimmers should exercise caution. Parents should watch minor children closely when they are in or around water. U.S. citizens have drowned or disappeared at both remote and popular beaches along the southwest coast of Mexico.

Warning flags on beaches should be taken seriously. If black flags are up, do not enter the water. In Cancun, there is often a very strong undertow along the beach from the Hyatt Regency all the way south to Club Med. Several drowning and near-drowning incidents have been reported on the east coast of Cozumel, particularly in the Playa San Martin-Chen Rio area. In Acapulco, avoid swimming outside the bay area. Several U.S. citizens have died while swimming in rough surf at the Revolcadero Beach near Acapulco. Despite U.S.-trained lifeguards, several U.S. citizens have drowned in the area of Zipolite Beach in Puerto Angel, Oaxaca, because of sudden waves and strong currents. Beaches on the Pacific side of the Baja California peninsula at Cabo San Lucas are dangerous due to rip tides and rogue waves; hazardous beaches in this area are clearly marked in English and Spanish. Do not swim alone in isolated beach areas. Beaches may not be well-marked, and strong currents could lead to dangerous conditions for even the most experienced swimmers. Do not dive into unknown bodies of water, because hidden rocks or shallow depths can cause serious injury or death.

Sports and aquatic equipment that you rent may not meet U.S. safety standards or be covered by any acci-

dent insurance. Scuba diving equipment may be substandard or defective due to frequent use. Inexperienced scuba divers in particular should beware of dive shops that promise to "certify" you after a few hours' instruction. Parasailing has killed U.S. citizen tourists who were dragged through palm trees or were slammed into hotel walls. Jet-ski accidents have killed U.S. citizen tourists, especially in group-outings when inexperienced guides allowed their clients to follow each other too closely.

Cancun and Other Resort Areas: Over 3 million U.S. citizens travel to Cancun and other Mexican beach resorts each year, including as many as 120,000 during "spring break" season, which normally begins in mid-February and runs about two months. Excessive alcohol consumption, especially by U.S. citizens under the legal U.S. drinking age, is a significant problem. The legal drinking age in Mexico is 18, but it is not uniformly enforced. Alcohol is implicated in the majority of arrests, violent crimes, accidents and deaths suffered by U.S. citizen tourists.

In recent years, moped rentals have become very widespread in Cancun and Cozumel, and the number of serious moped accidents has risen accordingly. Most operators carry no insurance and do not conduct safety checks. The U.S. Embassy recommends avoiding operators who do not provide a helmet with the rental. Some operators have been known to demand fees many times in excess of damages caused to the vehicles, even if renters have purchased insurance in advance. Vacationers at other beach resorts have encountered similar problems after accidents involving rented jet-skis. There have been cases of mobs gathering to prevent tourists from departing the scene and to intimidate them into paying exorbitant damage claims.

Motor Accidents: Motor vehicle accidents are the leading cause of death of U.S. citizens in Mexico. Motorists should exercise special caution on the heavily-traveled expressway south of Cancun, particularly between Playa del Carmen and Tulum, where the road narrows from 4 divided lanes to two-way traffic on a narrow and poorly-maintained road.

Mountain Climbing and Hiking: Travelers who wish to climb Pico de Orizaba in Veracruz should be aware that summer droughts in recent years have removed much of the snow coating and turned the Jamapa Glacier into a high-speed ice chute, increasing the risk of death or serious injury. At least 17 climbers have died on the mountain and 39 have been injured in recent years, including U.S. citizens. Rescue teams operate without the benefit of sophisticated equipment. Any medical treatment provided in local hospitals or clinics must be paid in cash. While regulation of the ascent is minimal and guides are not required, the U.S. Embassy recommends hiring an experienced guide. The Colima Volcano, located approximately 20 miles north-northeast of Colima city in the state of Colima on the southwestern coast, is active and erupted several times in 2005. Travelers should not enter the prohibited area within a 4.5-mile radius of the volcano.

When departing on an outing to backcountry areas to hike or climb, it is prudent to leave a detailed itinerary, including route information and expected time and date of return with your hotel clerk or a friend or family member. Similarly, mariners preparing to depart from a Mexican harbor should visit the harbormaster and leave a detailed trip plan, including intended destination and crew and passenger information.

Marriage Requirements In Mexico: In general, to marry a Mexican national in Mexico, a U.S. citizen must be physically present in Mexico and present documents required by the jurisdiction where the marriage will take place. U.S. citizens who marry U.S. citizens or other non-Mexicans are not subject to a residence requirement, but are required to present their tourist cards. For additional information on marriages in Mexico, contact the U.S. Embassy or the nearest U.S. consulate.

Divorce requirements may vary according to jurisdiction. The U.S. Embassy recommends U.S. citizens consult a local attorney and/or the Mexican Embassy or nearest Mexican Consulate for information on divorces in Mexico.

Real Estate And Time-Shares: U.S. citizens should be aware of the risks inherent in purchasing real estate in Mexico, and should exercise extreme caution before entering into any form of commitment to invest in property there. Investors should hire competent Mexican legal counsel when contemplating any real estate investment. Mexican laws and practices regarding real estate differ substantially from those in the United States. Foreigners who purchase property in Mexico may find that property disputes with Mexican citizens may not be treated evenhandedly by Mexican criminal justice authorities and in the courts. Timeshare companies cannot be sued in U.S. courts unless they have an office or other business presence in the U.S. Consumers should contact a Mexican attorney, the Mexican consumer protection agency PROFECO at http://www.profeco.gob.mx or other consumer information agency for information on companies that operate outside of the U.S.

Ownership Restrictions: The Mexican Constitution prohibits direct ownership by foreigners of real estate within 100 kilometers (about 62 miles) of any border, and within 50 kilometers (about 31 miles) of any coastline. In order to permit foreign investment in these areas, the Mexican government has created a trust mechanism in which a bank has title to the property but a trust beneficiary enjoys the benefits of ownership. However, U.S. citizens are vulnerable to title challenges that may result in years of litigation and possible eviction. Although title insurance is available in the Baja Peninsula and in other parts of Mexico, it is virtually unknown and remains untested in most of the country.

In addition, Mexican law recognizes squatters' rights, and homeowners can spend thousands of dollars in

legal fees and years of frustration in trying to remove squatters who occupy their property.

Labor Laws: U.S. citizen property owners should consult legal counsel or local authorities before hiring employees to serve in their homes or on their vessels moored in Mexico. Several U.S. citizen property owners have faced lengthy lawsuits for failure to comply with Mexican labor laws regarding severance pay and Mexican social security benefits.

Time-share Investments: U.S. citizens should exercise caution when considering time-share investments and be aware of the aggressive tactics used by some time-share sales representatives. Buyers should be fully informed and take sufficient time to consider their decisions before signing time-share contracts, ideally after consulting an independent attorney. Mexican law allows time-share purchasers five days to cancel the contract for unconditional and full reimbursement.

U.S. citizens should never sign a contract that includes clauses penalizing the buyer who cancels within five days. The Department of State and the U.S. Mission in Mexico frequently receive complaints from U.S. citizens about extremely aggressive sales tactics, exaggerated claims of return on investment, lack of customer service and questionable business practices by time-share companies, resulting in substantial financial losses for time-share investors.

A formal complaint against any merchant should be filed with PROFECO, Mexico's federal consumer protection agency. PROFECO has the power to mediate disputes, investigate consumer complaints, order hearings, levy fines and sanctions for not appearing at hearings, and do price-check inspections of merchants. All complaints by U.S. citizens are handled by PROFECO's English-speaking office in Mexico City at 011-52-55-5211-1723 (phone), 011-52-55-5211-2052 (fax), or via email at extranjeros@profeco.gob.mx.

For more information, please see the PROFECO "Attention to Foreigners" web page at Profeco (Procuraduría Federal del Consumidor).

Alien Smuggling: Mexican authorities may prosecute anyone arrested for transporting aliens into or out of Mexico for alien smuggling in addition to any charges they may face in the other country involved, including the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov. Mexico is the destination country of the greatest number of children abducted from the United States by a parent. A party to the Hague Convention on the Civil Aspects of International Child Abduction since 1991, Mexico is not in full compliance with the Convention.

Behavior Modification Facilities: A number of facilities have opened in Mexico that offer behavior modification therapy for teenagers and others suffering from drug addiction and other behavioral or psychological problems. Standards applied by the Government of Mexico and local governments, where they exist, may not meet standards for similar facilities in the United States.

Parents planning to enroll their children in these facilities should investigate the facility first. Since 2004, Mexican officials have closed six adolescent behavior modification facilities in Baja California and another in the state of Jalisco due to health code and other violations. This was done on very short notice and caused serious inconvenience for the U.S. citizen students and their families. Another behavior modification facility in Sonora suddenly declared bankruptcy and closed its doors in March 2005, with a similarly disruptive impact on students.

Registration And Embassy And Consulate Locations: U.S. citizens living or traveling in Mexico for more than one day are encouraged to register with the U.S. Embassy or nearest U.S. consulate through the State Department's travel registration web site, and to obtain updated information on travel and security within Mexico. U.S. citizens without Internet access may register directly with the U.S. Embassy or nearest U.S. Consulate. By registering, U.S. citizens make it easier for the Embassy or consulate to contact them in case of emergency. The U.S. Embassy is located in Mexico City at Paseo de la Reforma 305, Colonia Cuauhtemoc; telephone from the United States: 011-52-55-5080-2000; telephone within Mexico City: 5080-2000; telephone long distance within Mexico 01-55-5080-2000. You may also contact the Embassy by e-mail at: ccs@usembassy.net.mx. The Embassy's web page is http://mexico.usembassy.gov. In addition to the Embassy, there are several United States Consulates and Consular Agencies located throughout Mexico:

Consulates:

- Ciudad Juarez: Avenida Lopez Mateos 924-N; telephone (52)(656) 611-3000.
- Guadalajara: Progreso 175, Col. Americana; telephone (52)(333) 268-2100.
- Hermosillo: Calle Monterrey 141 Poniente, Col. Esqueda; telephone (52)(662) 289-3500.
- Matamoros: Avenida Primera 2002 y Azaleas; telephone (52)(868) 812-4402.
- Merida: Calle 60 No. 338 K x 29 y 31, Col. Alcala Martin; telephone (52)(999) 942-5700.
- Monterrey: Avenida Constitucion 411 Poniente; telephone (52)(818) 345-2120.
- Nogales: Calle San Jose, Fraccionamiento "Los Alamos"; telephone (52)(631) 311-8150.
- Nuevo Laredo: Calle Allende 3330, Col. Jardin; telephone (52)(867) 714-0512.

- Tijuana: Avenida Tapachula 96, Col. Hipodromo; telephone (52)(664) 622-7400.

Consular agencies:

- Acapulco: Hotel Continental Emporio, Costera Miguel Aleman 121—Local 14; telephone (52)(744) 484-0300 or (52)(744) 469-0556.
- Cabo San Lucas: Blvd. Marina Local C-4, Plaza Nautica, Col. Centro; telephone (52)(624) 143-3566.
- Cancun: Plaza Caracol Two, Second Level, No. 320-323, Boulevard Kukulkan, Km. 8.5, Zona Hotelera; telephone (52)(998) 883-0272.
- Ciudad Acuna: Alfonso Gonzalez Ocampo # 305, Col. Centro; telephone (52)(877) 772-8179.
- Cozumel: Plaza Villa Mar en El Centro, Plaza Principal, (Parque Juárez between Melgar and 5th Ave.) 2nd floor, Locales #8 and 9; telephone (52)(987) 872-4574.
- Ixtapa/Zihuatanejo: Hotel Fontan, Blvd. Ixtapa; telephone (52)(755) 553-2100.
- Mazatlan: Hotel Playa Mazatlán, Playa Gaviotas #202, Zona Dorada; telephone (52)(669) 916-5889.
- Oaxaca: Macedonio Alcala No. 407, Interior 20; telephone (52)(951) 514-3054 (52)
- Piedras Negras: Abasolo 211, Local #3, Col. Centro; telephone (52)(878) 782-5586 or (878) 782-8664.
- Playa del Carmen: The Palapa, Calle 1 Sur, between Avenida 15 and Avenida 20.; telephone (52)(984) 807-8355.
- Puerto Vallarta: Paradise Village Plaza, Paseo de los Cocoteros #1, Local #4, Interior #17, Nuevo Vallarta; telephone (52)(322) 222-0069.
- Reynosa: Calle Monterrey #390, Esq. Sinaloa, Col. Rodríguez; telephone: (52)(899) 923-9331
- San Luis Potosi: Edificio "Las Terrazas," Avenida Venustiano Carranza 2076-41, Col. Polanco; telephone (52)(444) 811-7802 or (444) 811-7803.
- San Miguel de Allende: Dr. Hernandez Macias #72; telephone (52)(415) 152-2357.

Intercountry Adoption

November 2008

The information in this section has been edited from a report available through the U.S. Department of State Office of Children's Issues. For more information detailed, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Mexico is party to The Hague Convention on Protection of Children and Co-operation in Respect of Intercountry Adoption (Hague Adoption Convention). Therefore, all adoptions between Mexico and the United States must meet the requirements of the Convention and United States law and regulations implementing the Convention. For detailed and updated information on these requirements, please review the *Intercountry Adoption* section of this publication and visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

Mexico has a complex system for adoptions, involving a Central Authority based in Mexico City and 31 adoption authorities (one in each Mexican state). The civil code in each state may vary, so prospective adoptive parents need to be aware of the state from which they plan to adopt and its applicable adoption laws.

Who Can Adopt? The process for legally adopting a child in the Republic of Mexico is long and sometimes difficult. Unscrupulous agents who obtain children outside the legal network sometimes approach couples. Adoptive children who enter the United States without an immigrant visa may later encounter problems with United States citizenship, schools, Social Security, etc., and risk being deported back to the Republic of Mexico even if they have legal United States-citizen parents under Mexican law.

In addition to the United States requirements for prospective adoptive parents, Mexico also has the following eligibility requirements for prospective adoptive parents.

Residency Requirements: Mexican adoption procedures include a one to three week pre-adoption trial period, during which the child lives with the prospective adoptive parent(s) in Mexico. Because of the large amount of paperwork in both the Mexican and American processes, the State System for the Full Development of the Family (Desarrollo Integral de la Familia, or DIF) suggests adoptive parents be prepared to spend at least three months in Mexico including the pre-adoption trial period.

Age Requirements: Prospective adoptive parents must be over 25 years of age and at least 17 years older than the child. If married, only one parent must meet the age requirement.

Marriage Requirements: Prospective adoptive parents may be married or single, male or female.

Income Requirements: Prospective adoptive parents must demonstrate the means to support the physical and educational needs of the child.

While similar, each Mexican state does have its own civil code governing adoptions. Therefore, it is important to check with each state, as the laws among states will vary.

Who Can Be Adopted? Because Mexico is party to The Hague Adoption Convention, children from Mexico must meet the requirements of the Convention in order to be eligible for adoption. For example, the Convention requires that Mexico attempt to place a child with a family in-coun-

try before determining that a child is eligible for intercountry adoption. In addition to Mexico's requirements, a child must meet the definition of a Convention adoptee for you to bring him or her back to the United States.

Mexican Central Authority: State System for the Full Development of the Family, Desarrollo Integral de la Familia (DIF)

The Process: The first step in adopting a child from Mexico is to select an accredited or approved adoption service provider in the United States. Only these agencies and attorneys can provide adoption services between the United States and Mexico.

Prospective adoptive parents should contact DIF in the state where the adoption will take place because procedures can vary by state.

After you choose an accredited adoption service provider, you apply to be found eligible to adopt (Form I-800A) by the Department of Homeland Security, United States Citizenship and Immigration Services (USCIS).

Once the United States Government determines that you are "eligible" and "suitable" to adopt, you or your adoption service provider will forward your information to the Central Authority in Mexico. The DIF's Technical Councils on Adoptions will convene to review your application and determine whether you are also eligible to adopt under Mexican law. Once approved, your name(s) will be added to a waiting list maintained by DIF as the legal representative for abandoned children and provider of foster care for abused or orphaned minors.

If both the United States and Mexico determine that you are eligible to adopt, and a child is available for intercountry adoption, DIF may provide you with a referral for a child. When you receive a referral from DIF, it will arrive in the form of a letter directly to you or to your adoption service provider, informing you that the application for adoption has been approved. All available information on the child will be provided to the prospective adoptive parent(s) at this time. If you agree to adopt the child, send a letter to DIF instructing them to continue with the adoption process. At this point, DIF will coordinate a meeting to introduce the child to the prospective adoptive parent(s).

After you accept a match with a child, you will apply to the USCIS for provisional approval to adopt that particular child (Form I-800). USCIS will determine whether the child is eligible under United States immigration law to be adopted and enter the United States. Form I-800, like Form I-800A, must be submitted in the United States. However, USCIS regional offices in Mexico handle cases in particular states: USCIS Tijuana handles the Mexican states of Baja California, Sinaloa and Sonora. USCIS Ciudad Juarez handles Chihuahua and Durango. USCIS Monterrey handles Coahuila, Nuevo León, Tamaulipas, San Luis Potosí, Zacatecas and Aguascalientes. The rest of Mexico is handled by USCIS Mexico City.

After this, your adoption service provider or you will submit a visa application for to a Consular officer at the United States Embassy. If the Consular officer determines that the child appears eligible to immigrate to the United States, he or she will notify the DIF (Article 5 letter). For Convention country adoptions, prospective adoptive parent(s) may not proceed with the adoption or obtain custody for the purpose of adoption until this takes place.

Prior to the adoption proceeding any further, the prospective adoptive parent(s) will be required to reside in Mexico with the child for a one to three week period of time.

Role of the Central Authority: The DIF is a government institution with branches in each Mexican state to handle family matters. The DIF acts as the legal representative for abandoned children and provides foster care for abused or orphaned minors. Children who are abandoned or orphaned can be given up for adoption by the DIF. The DIF and the Mexican Foreign Relations are assigned responsibility to study each child's eligibility for intercountry adoption and arrange adoptions. The DIF determines whether a family would be suitable for a particular child by ensuring that a home study has been done. The DIF makes every effort to place children with relatives or Mexican citizens living in Mexico before placing children for inter-country adoption.

Role of the Court: Judicial proceedings occur in Mexico depending on the laws of the state.

Role of the Adoption Agencies: Because Mexico is a Convention country, adoption services must be provided by an accredited agency, temporarily accredited agency, approved person, supervised provider, or exempted provider.

Time Frame: The general time frame for adoptions in Mexico ranges from three to eight months, but varies from state to state. Again, prospective adoptive parents should check with the state where the adoption will take place.

Adoption Application: The application should be filed by the prospective adoptive parent(s) or the adoption service provider with DIF.

Adoption Fees: DIF charges approximately $250 USD for adoption services but costs vary state-by-state. Generally, the fees include all applicable taxes. The DIF office also has its own lawyers and their services are also included in the fee. Using an attorney or adoption service provider for DIF adoptions is optional for the prospective adoptive parent(s). These expenses should have been itemized in the fees and estimated expenses section of your adoption services contract.

Documents Required: The following documents are required for adoption in Mexico:

- Certified copy of prospective adoptive parent's birth certificate or a United States passport as proof of United States citizenship;

- Certified copy of marriage certificate, if applicable;
- A statement from the employer of the prospective parent who is the primary supporter of the family. This statement must indicate the position, years of service with the employer, and salary;
- Copy of the most recent bank statement or other evidence of financial holdings as proof of financial solvency;
- Two letters of recommendation from people who can attest to the character of the adoptive parents. A married couple should obtain letters from persons who have known them as a married couple. Each letter should include the address and telephone number of the person writing the letter;
- Certificate from the state police from the prospective adoptive parent's state of residence in the United States verifying that the adoptive parents have no police record. The FBI fingerprint check for the I-800A fulfills this requirement;
- A copy of a social, economic, and psychological study of the parent's home situation conducted by an agency of the state of the child's proposed residence, or an adoption service provider authorized by that state to conduct such a study, and or by an appropriate public or private adoption service provider accredited or approved in the United States. The home study conducted for the I-800A fulfills this requirement;
- One 3x3-inch color photograph of each prospective adoptive parent; and
- Two 3x5-inch photographs of the prospective adoptive parent(s) in the home or on a family outing.

All documentation listed above must be apostilled by the Secretary of State of the United States state of origin of the document, translated into Spanish by an official translator of the Mexican Consulate nearest to the prospective adoptive parent's(s') place of residence in the United States. When all the documents have been assembled, they should be sent to the person or organization in Mexico acting as the adoption agent/representative for presentation to the Mexican court. For updates on document requirements and information on how to authenticate documents, visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

Bringing Your Child Home: Once your adoption is complete (or you have obtained legal custody of the child), there are a few more steps to take before you can head home. Specifically, you need to apply for several documents for your child before he or she can travel to the United States, such as a birth certificate, a passport or travel document for your child from the country in which he or she was born, and a U.S. Immigration Visa.

For detailed and updated information on how to obtain these documents, review the *Intercountry Adoption* section on this publication and visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

Child Citizenship Act: For adoptions finalized abroad: The Child Citizenship Act of 2000 allows your new child to acquire American citizenship automatically when he or she enters the United States as lawful permanent residents. For adoptions finalized in the United States: The Child Citizenship Act of 2000 allows your new child to acquire American citizenship automatically when the court in the United States issues the final adoption decree. To learn more, review the *Intercountry Adoption* section on this publication and visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

International Parental Child Abduction

November 2008

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *International Child Abduction* section of this book and review current reports online at www.travel.state.gov/childabduction.

Disclaimer: The information in this flyer relating to the legal require-

ments of specific foreign countries is provided for general information only. Questions involving interpretation of specific foreign laws should be addressed to foreign legal counsel.

General Information: The Hague Convention on the Civil Aspects of International Child Abduction (the "Hague Convention") came into force between the United States and Mexico on October 1, 1991. Therefore, Hague Convention provisions for return would apply to children abducted or retained after October 1, 1991. Parents and legal guardians of children taken to Mexico prior to October 1, 1991, may still submit applications for access to the child under the Hague Convention in some cases.

Mexico has established a Central Authority charged with applying the procedures of the Hague Convention by working with state authorities. The Mexican Central Authority is part of the Secretaria de Relaciones Exteriores, or foreign ministry, and is responsible for cases of children taken from and taken to Mexico. For more information, please read the *International Parental Child Abduction* section of this book and review current reports online at www.travel.state.gov/childabduction.

Non-Hague Civil Remedies: You may also seek recognition of an U.S. custody order in the Mexican courts. This process takes several months and you will need the services of a Mexican attorney. Please note the Mexican courts are not required to recognize a foreign court order. You may also seek custody through the Mexican court system. You will need the services of a Mexican attorney.

The non-Hague civil remedies noted above may be pursued in conjunction with your Hague application. The filing of a Hague application for return of a child, however, should result in a stay of any custody proceedings pending the outcome of the Hague hearing.

Criminal Remedies: For information on possible criminal remedies, please contact your local law enforcement authorities or the nearest office of the Federal Bureau of Investigation. Information is also available on the Internet at the web site of the U.S. Department of Justice, Office of Juvenile Justice and Delinquency Prevention at http://www.ojjdp.ncjrs.org. Please note that criminal charges may complicate a Hague Convention case. Contact the Mexico officer in the Office of Children's Issues for specific information.

For further information on international parental child abduction, contact the Office of Children's Issues, U.S. Department of State at 1-888-407-4747 or visit its web site on the Internet at http://travel.state.gov/family. You may also direct inquiries to: Office of Children's Issues, U.S. Department of State, Washington, DC 20520-4811; Phone: (202) 736-9090; Fax: (202) 312-9743.

Travel Alert
October 14, 2008

This Travel Alert updates security information for U.S. citizens traveling and living in Mexico. It replaces the Travel Alert for Mexico dated April 14, 2008, and expires on April 14, 2009.

While millions of U.S. Citizens safely visit Mexico each year, including thousands who cross the land border every day for study, tourism or business, increased levels of violence make it imperative that travelers understand the risks of travel to Mexico, how best to avoid dangerous situations, and whom to contact if one is a victim of crime. Common-sense precautions, such as visiting only legitimate business and tourist areas, avoiding areas where prostitution and drug dealing might occur, and exercising prudence in where one visits during the evening hours and at night, can help ensure that travel to Mexico is safe and enjoyable.

Mexican drug cartels are engaged in an increasingly violent fight for control of narcotics trafficking routes along the U.S. - Mexico border in an apparent response to the Government of Mexico's initiatives to crack down on narco-trafficking organizations. In order to combat violence, the government of Mexico has deployed military troops in various parts of the country. U.S. citizens should cooperate fully with official checkpoints when traveling on Mexican highways.

Some recent Mexican army and police confrontations with drug cartels have taken on the characteristics of small-unit combat, with cartels employing automatic weapons and, on occasion, grenades. Firefights have taken place in many towns and cities across Mexico but particularly in northern Mexico, including Tijuana, Chihuahua City and Ciudad Juarez. The situation in northern Mexico remains fluid; the location and timing of future armed engagements cannot be predicted.

A number of areas along the border are experiencing rapid growth in the rates of many types of crime. More than 1,600 cars were reportedly stolen in Ciudad Juarez in the month of July 2008, and bank robberies there are up dramatically. Rates for robberies, homicides, petty thefts, and carjackings have all increased over the last year across Mexico generally, with notable spikes in Tijuana and northern Baja California. Cuidad Juarez, Tijuana, and Nogales are among the cities which have recently experienced public shootouts during daylight hours in shopping centers and other public venues. Criminals have followed and harassed U.S. citizens traveling in their vehicles in border areas including Nuevo Laredo, Matamoros, Tijuana, and along Route 15 between Nogales and Hermosillo.

The situation in Ciudad Juarez is of special concern. Mexican authorities report that more than 1,000 people

have been killed there this year. U.S. citizens should pay close attention to their surroundings while traveling in Ciudad Juarez, avoid isolated locations during late night and early morning hours, and remain alert to news reports. A recent series of muggings near the U.S. Consulate General in Ciudad Juarez has targeted applicants for U.S. visas. Visa and other service seekers visiting the Consulate are encouraged to make provisions to pay for those services with something other than cash.

U.S. citizens are urged to be alert to safety and security concerns when visiting the border region. Criminals are armed with a wide array of sophisticated weapons. In some cases, assailants have worn full or partial police or military uniforms and have used vehicles that resemble police vehicles. While most of the crime victims are Mexican citizens, the uncertain security situation poses risks for U.S. citizens as well.U.S. citizen victims of crime in Mexico are urged to contact the consular section of the nearest U.S. consulate or Embassy for advice and assistance. Contact information is provided at the end of this message.

While the largest increase in violence has occurred near the U.S. border, U.S. citizens traveling elsewhere in Mexico should also exercise caution in unfamiliar areas and be aware of their surroundings at all times. Mexican and foreign bystanders have been injured or killed in some violent attacks, demonstrating the heightened risk in public places. In recent years, dozens of U.S. citizens have been kidnapped across Mexico and many cases remain unresolved. U.S. citizens who believe they are being targeted for kidnapping or other crimes should notify Mexican officials and the nearest American consulate or the Embassy as soon as possible. U.S. citizens should make every attempt to travel on main roads during daylight hours, particularly the toll ("cuota") roads, which are generally more secure. U.S. citizens are encouraged to stay in well-known tourist destinations and tourist areas of the cities with more adequate security, and provide an itinerary to a friend or family member not traveling with them. U.S. citizens should avoid traveling alone, and should carry a GSM-enabled cell phone that functions internationally. Refrain from displaying expensive-looking jewelry, large amounts of money, or other valuable items.

Demonstrations occur frequently throughout Mexico and usually are peaceful. However, even demonstrations intended to be peaceful can turn confrontational and escalate to violence unexpectedly. People have died during violent demonstrations, including an American citizen who was killed in Oaxaca in 2006. During demonstrations or law enforcement operations, U.S. citizens are advised to remain in their homes or hotels, avoid large crowds, and avoid the downtown and surrounding areas. Since the timing and routes of scheduled marches and demonstrations are always subject to change, U.S. citizens should monitor local media sources for new developments and exercise extreme caution while within the vicinity of protests. The Mexican Constitution prohibits political activities by foreigners, and such actions may result in detention and/or deportation. Therefore, U.S. citizens are advised to avoid participating in demonstrations or other activities that might be deemed political by Mexican authorities. In a recent incident, a Mexican Independence Day celebration was the target of a violent attack. As is always the case in any large gathering, U.S. citizens should remain alert to their surroundings. For more detailed information on staying safe in Mexico, please see the Mexico Country Specific Information at: http://travel.state.gov. Information on security and travel to popular tourist destinations is also provided in the publication: "Spring Break in Mexico-Know Before You Go!!" at http://travel.state.gov. For the latest security information, U.S. citizens traveling abroad should regularly monitor the Department's internet web site at http://travel.state.gov where the current Worldwide Caution, Travel Warnings, and Travel Alerts can be found. Up-to-date information on security can also be obtained by calling 1-888-407-4747 toll free in the United States, or, for callers from Mexico, a regular toll line at 001-202-501-4444. These numbers are available from 8:00 a.m. to 8:00 p.m. Eastern Time, Monday through Friday (except U.S. federal holidays). American citizens traveling or residing overseas are encouraged to register with the appropriate U.S. Embassy or Consulate on the State Department's travel registration website at https://travelregistration.state.gov/. For any emergencies involving U.S. citizens in Mexico, please contact the closest U.S. Embassy or Consulate. The U.S. Embassy is located in Mexico City at Paseo de la Reforma 305, Colonia Cuauhtemoc, telephone from the United States: 011-52-55-5080-2000; telephone within Mexico City: 5080-2000; telephone long distance within Mexico 01-55-5080-2000. You may also contact the Embassy by e-mail at: ccs@usembassy.net.mx. The Embassy's internet address is http://www.usembassy-mexico.gov/.

MICRONESIA

Compiled from the June 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Federated States of Micronesia (FSM)

PROFILE

Geography

Area: 702 sq. km (about 270 sq. mi.) in four major island groups (Pohnpei, Chuuk, Yap and Kosrae).
Cities: Capital—Palikir. Other cities—Kolonia, Weno, Colonia, Lelu.
Terrain: 607 mountainous islands and low-lying coral atolls.
Climate: Tropical.

People

Nationality: Noun and adjective—Micronesian.
Population: 108,000.
Growth rate: 0.26%.
Ethnic groups: Nine ethnic Micronesian and Polynesian groups.
Religions: Roman Catholic 53%, Protestant 42.4%, others 4.6%.
Languages: English, and nine ethnic languages.
Education: Literacy—91%.
Health: Life expectancy—male 65.6 yrs.; female 66.9 yrs. Infant mortality rate—40.4/1,000.
Work force: More than 50% of workers are government employees.

Government

Type: Constitutional confederation in free association with the U.S. The first Compact of Free Association entered into force in 1986, and an Amended Compact entered into force June 30, 2004.
Independence: (from U.S.-administered UN trusteeship) November 3, 1986.
Constitution: May 10, 1979.
Government branches: Executive—President (chief of state and head of government), cabinet. Legislative—unicameral Congress with 14 seats. Judicial—Supreme Court.
Political parties: No formal parties.

Economy (FY 2006 figures)

GDP: $204 million.
GDP per capita: (nominal) $2,191.
National income: (GDP + foreign assistance) $361 million.
National income per capita: $3,374.
GDP composition by sector: services 77%, agriculture 19%, industry 4%.
Industry: Types—fishing, agriculture, tourism.
Trade: Exports ($14 million)—fish, kava, betel nut. Export market—Japan (21%), US (25%), others (53%), U.S. Imports ($133 million)—food, manufactured goods, fuel. Import sources—U.S. (50%), Japan (11%), others (39%).
External debt: $ 60.81 million.
Currency: U.S. dollar.

GEOGRAPHY AND PEOPLE

The Federated States of Micronesia (FSM) consists of 607 islands extending 1,800 miles across the archipelago of the Caroline Islands east of the Philippines. The four states are the island groups of Pohnpei, Chuuk, Yap, and Kosrae. The federal capital is Palikir, on Pohnpei.

The indigenous population consists of various ethno-linguistic groups. English has become the common language. The birth rate remains high at more than 3%, but the population of the four states remains almost constant due to emigration.

HISTORY

Ancestors of the Micronesians settled the Caroline Islands over 4,000 years ago. A decentralized chieftain-based system eventually evolved into a more centralized economic and religious empire based principally in Yap and Pohnpei. European explorers—first the Portuguese in search of the Spice Islands and then the Spanish—reached the Carolines in the 16th century, with the Spanish establishing sovereignty. The current FSM passed to German control in 1899, and then through the Treaty of Ver-

sailles to the Japanese in 1919. Following World War II, these islands became part of the United Nations Trust Territory of the Pacific Islands, administered by the United States.

On May 10, 1979, four of the Trust Territory districts ratified a new constitution to become the Federated States of Micronesia. The neighboring trust districts of Palau, the Marshall Islands, and the Northern Mariana Islands chose not to participate. The FSM signed a Compact of Free Association with the U.S. in 1986. An Amended Compact entered into force in June 2004.

GOVERNMENT AND POLITICAL CONDITIONS

The FSM is governed under a 1979 constitution, which guarantees fundamental human rights and establishes a separation of governmental powers. The unicameral Congress has 14 members elected by popular vote. Four senators at large—one from each state—serve 4-year terms; the remaining 10 senators represent single-member districts based on population and serve 2-year terms. The President and Vice President are elected by Congress from among the four senators at large who serve in 4-year seats. Once elected, the President and Vice President serve for four years. Their congressional seats are then filled by special elections. An appointed cabinet supports the president and vice president. There are no formal political parties.

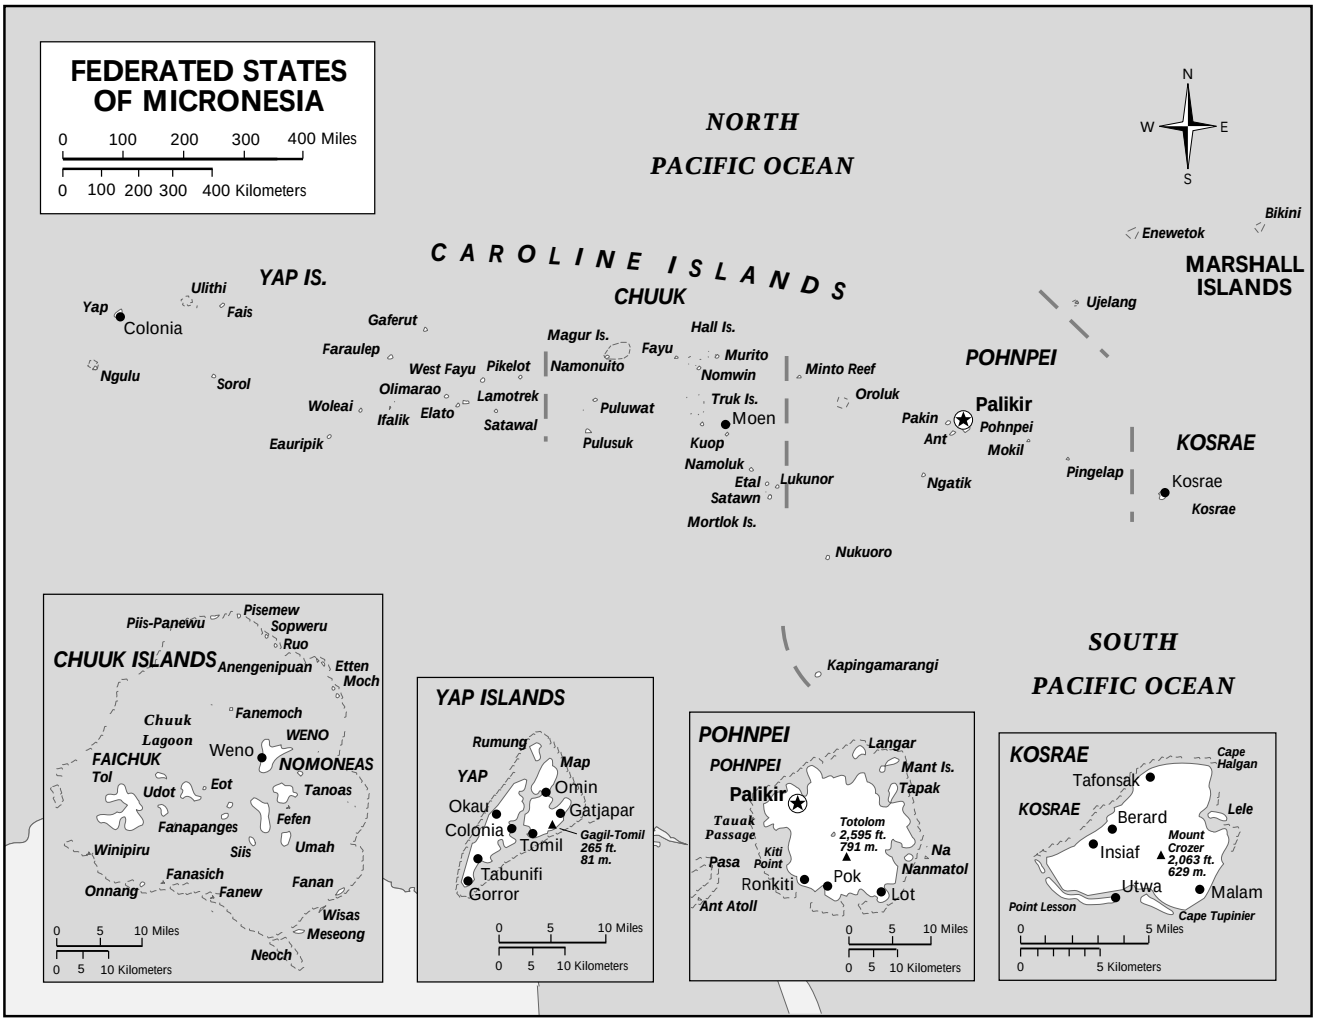
The FSM is a confederation with a weak central government. Each of FSM's four states has its own constitution and its own elected legislature and governor. The state governments maintain considerable power, particularly regarding the implementation of budgetary policies.

The FSM's highest court is the Supreme Court, which is divided into trial and appellate divisions. The President appoints judges with the advice and consent of the Congress.

Principal Government Officials

Last Updated: 11/12/08

President: **Emanuel MORI**
Vice President: **Alik ALIK**
Sec. of Education: **Casiano SHONIBER**
Sec. of Finance & Administration: **Finley PERMAN**
Sec. of Foreign Affairs: **Lorin ROBERT**
Sec. of Health & Social Affairs: **Vita Akapito SKILLING, Dr.**
Sec. of Justice: **Maketo ROBERT**
Sec. of Resource & Development: **Peter CHRISTIAN**
Sec. of Transportation, Communication, & Infrastructure: **Francis ITIMAI**
Speaker of the Congress: **Isaac FIGIR**
Ambassador to the US: **Yosiwo GEORGE**
Permanent Representative to the UN, New York: **Masao NAKAYAMA**



The FSM maintains an Embassy at 1725 N Street NW, Washington, DC 20036. Telephone: 202-223-4383. Fax: 202-223-4391. Email: firstsecretary@fsmembassydc.org. Internet website: www.fsmembassydc.org. The FSM also maintains consulates in Honolulu and Guam.

ECONOMY

Under the terms of the Compact of Free Association, the U.S. provided the FSM with about $2 billion in grants and services between 1986 and 2001. The Compact's financial terms were renegotiated for the 20-year period 2004 through 2023, with the aim of encouraging sustainable development. The U.S. will provide almost $100 million in direct assistance every year until 2023, which includes the systematic reallocation of a portion of the direct aid to a jointly managed Trust Fund. Additional federal grants to the FSM total approximately $35 million annually. Assistance under the Amended Compact is distributed by grants in response to a transparent FSM budget process, focusing on the following six sectors: education, health, infrastructure, public sector capacity building, private sector development, and the environment. The U.S. Department of the Interior is responsible for monitoring and implementing the Amended Compact. The FSM government sector plays a central role in the economy as recipients and domestic administrators of Compact funds. The national and state-level governments employ over half of the country's workers, with government services accounting for more than 40% of GDP. Real wages nationwide have been flat for the past decade, as has the number of jobs in the economy (about 15,500.) Private sector jobs pay about half as much as public sector jobs.

The fishing industry is highly important. Foreign commercial fishing fleets pay over $14 million annually for the right to operate in FSM territorial waters. These licensing fees account for 28% of the national government revenues. Exports of marine products, mainly to Japan, account for nearly 85% of export revenues.

Visitor attractions include scuba diving, World War II battle sites, ecotourism, and the ancient ruined city of Nan Madol on Pohnpei. Some 18,000 tourists visit the islands each year. However, the tourist industry has been hampered by a lack of infrastructure and limited commercial air connections. The Asian Development Bank has identified tourism as one of FSM's highest potential growth industries. Agriculture is mainly subsistence farming. The principal crops are breadfruit, coconuts, bananas, betel nuts, cassava, taro, and kava. Less than 10% of the formal labor force and less than 7% of export revenue come from the agricultural sector. The large inflow of official assistance to FSM allows it to run a substantial trade deficit—imports outstrip exports by a seven-to-one ratio—and to have a much lighter tax burden than other states in the region (11% of GDP in FSM compared to 18%-25% elsewhere). The government borrowed against future Compact disbursements in the early 1990s, yielding a significant external debt, close to $60 million. In 2005, the FSM Government and Congress took positive steps toward establishing a nationwide tax system to improve collections and more fairly distribute the tax burden.

FOREIGN RELATIONS

The Government of the Federated States of Micronesia conducts its own foreign relations. Since independence, the FSM has established diplomatic relations with a number of nations, including most of its Pacific neighbors, Japan, Australia, and the People's Republic of China. Regional cooperation through various multilateral organizations is a key element of its foreign policy. The FSM became a member of the United Nations in 1991.

U.S.-MICRONESIAN RELATIONS

The Governments of the FSM and the U.S. maintain deep ties and a cooperative relationship. Reflecting a strong legacy of Trusteeship cooperation, over 25 U.S. federal agencies continue to maintain programs in the FSM. Under the Amended Compact, the U.S. has full authority and responsibility for the defense of the FSM.

This security relationship can be changed or terminated by mutual agreement. Also under the Compact, Micronesians can live, work, and study in the United States without a visa. Micronesians volunteer to serve in the U.S. Armed Forces at approximately double the per capita rate as Americans. Americans can live and work freely in the FSM without the need for a visa.

The U.S. will provide about $100 million annually in assistance to the FSM over the next 20 years. A Joint Economic Management Committee (JEMCO) consisting of representatives of both nations is responsible for ensuring that assistance funds are spent effectively, with the aim of fostering good governance and economic self-reliance. The basic relationship of free association continues indefinitely.

The United States is the FSM's largest trade partner.

TRAVEL

Consular Information Sheet

September 22, 2008

Country Description: The Federated States of Micronesia (FSM) is composed of four states spanning dozens of atolls scattered over a million square miles of the north central Pacific. The four states are: Pohnpei (formerly Ponape), Kosrae (formerly Kusaie), Chuuk (formerly Truk) and Yap. The federal capital is located at Palikir, on the island of Pohnpei, close to Pohnpei's largest town, Kolonia. The FSM is a constitutional democracy and is party to a Compact of Free Association with the United States.

Entry Requirements: U.S. citizens require a U.S. passport, a completed FSM Immigration Arrival and Departure Record (FSM Form 5004) and a completed FSM Customs Form to enter the FSM. The passport must be valid for at least 120 days beyond the date of entry into the FSM. Air carriers distribute the FSM Immigration Arrival and Departure Record and Customs Form prior to passengers' arrival at the point of entry. There is no limit to the length of time U.S. citizens and nationals may remain in the FSM. All states except Yap levy a departure fee. A health certificate may be required if the traveler is arriving from an area experiencing an epidemic. Visit the Embassy of the Federated States of Micronesia web site at www.fsmembassydc.org for the most current visa information. For more information about FSM entry requirements, travelers may consult the Embassy of the Federated States of Micronesia at 1725 N Street NW, Washington, DC 20038, tel: (202) 223-4383 or the Embassy's web site at http://www.visit-fsm.org/visitors/entry.html. The FSM also has Consulates in Honolulu and Guam.

Safety and Security: U.S. citizens in the FSM should review their own personal security practices, be alert to any unusual activity around their homes or businesses, and report any significant incidents to local police authorities.

In the state of Yap, divers and travelers should be aware that there are approximately a dozen World War II era aerial bombs in shallow depths located in the adjacent channels of Yap harbor. While these devices have been in place for many decades, they nonetheless are considered live and dangerous and could possibly be detonated if a diver or other object were to collide with them. Other unexploded ordnance remains from the heavy fighting and bombardment that occurred in and around the atolls and islands of Micronesia during World War II. American citizens are advised to exercise caution when traveling or diving in the region, particularly in the waters surrounding Yap harbor and the adjacent channels.

For the latest security information, Americans traveling abroad should regularly monitor the Department of State, Bureau of Consular Affairs' web site at http://travel. state.gov, where the current Travel Warnings and Travel Alerts, as well as the Worldwide Caution, can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S. and Canada, or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: On occasion, foreigners have been subject to, and possibly singled out for, theft and verbal and physical abuse. Modern Western swimwear may be considered immodest by local standards, and persons wearing such clothing outside of hotels that cater to tourists could be subject to harassment.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

The local equivalents to the "911" emergency line in the FSM are: In Chuuk, Kosrae or Yap it is 911; in Pohnpei it is 320-221 (Police or Fire Department).

Medical Facilities and Health Information: Health care facilities in the FSM consist of hospitals on each of the four major islands and a few scattered clinics. These facilities sometimes lack basic supplies and medicines, and the quality of health care varies. Doctors and hospitals may expect immediate cash payment for health services. U.S. medical insurance is not always valid outside the United States. Supplemental medical insurance with specific coverage for overseas treatment and medical evacuation may prove useful. Medical evacuation for non-ambulatory patients may not be immediately available and can be very expensive. Scuba divers are advised that there are only two decompression chambers in the FSM (in Yap and Chuuk); their availability and staff experience in treating dive injuries varies.

Information on vaccinations and other health precautions, such as safe

food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's web site at http://wwwn.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith/en.

The U.S. Department of State is unaware of any HIV/AIDS entry restrictions for visitors to or foreign residents of the Federated States of Micronesia.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Micronesia is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

In the FSM, driving is on the right-hand side of the road, as in the United States. However, unlike most cars in the United States, the majority of vehicles in FSM have the driver's seat situated on the right side. Traffic, particularly in the state capitals, is increasing. Congestion may be a problem at the beginning and end of the workday. Most roads are narrow and without sidewalks, creating a hazard for both drivers and pedestrians. Many roads are in poor condition, with potholes and little or no shoulder. Road conditions can worsen after heavy rains; coral surfaces are particularly likely to be slippery. Driving skills vary; drivers often make turns or stop to pick up pedestrians without warning. Roads outside the towns are often unpaved, and are used by pedestrians, children playing, animals, and drivers alike. Streetlights are rare. Taxis are available in state capitals, but visitors are advised to be careful, since some taxi drivers are reckless. There is no formal training in road safety, so many drivers are unaware of road safety rules.

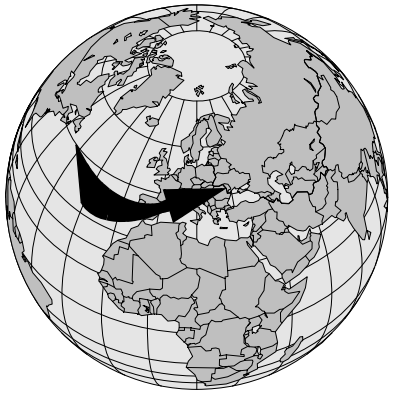
Drunk drivers pose serious hazards, in particular on weekend evenings and holidays. Drivers are required by law to report immediately to local police authorities all accidents involving property damage or personal injury. Visit the web site of the FSM's national tourist office and national authority responsible for road safety at www.visit-fsm.org.

Aviation Safety Oversight: As there is no direct commercial air service to the United States by carriers registered in the FSM, the U.S. Federal Aviation Administration (FAA) has not assessed Micronesia's Civil Aviation Authority for compliance with International Civil Aviation Organization (ICAO) aviation safety standards. For more information, travelers may visit the FAA's web site at http://www.faa.gov.

Continental Airlines is the only commercial carrier serving the FSM. Flight schedules and routes are limited and subject to change. There may be few alternatives if flights are canceled or missed. Flights are usually 100% booked, and aircraft weight is an issue due to short runways and the type of aircraft used. Because of these limitations and the numerous transit stops made (the typical routing to get to Kolonia would be via Honolulu with intermediate stops in Majuro, Kwajalein and Kosrae, or via Guam with a stop in Chuuk), with exiting and arriving passengers at each location, baggage sometimes may not be loaded at the departure point or may be off-loaded by mistake and left behind at an intermediate stop. Americans are advised to keep these logistical challenges in mind when traveling in this region. Missing baggage should be reported immediately to Continental Airlines ground personnel before onward flight departure.

Special Circumstances: Micronesian customs authorities assess import taxes on cigarettes, tobacco, alcoholic beverages, gasoline, and other personal items that exceed specified amounts. All imports are subject to physical inspection by customs officials. There are strict quarantine regulations restricting entry of plant and animal products. It is advisable to contact the Embassy of Micronesia in Washington or one of Micronesia's consulates in Honolulu or Guam for specific information regarding customs requirements.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses.



Persons violating Micronesian laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession of, use of, or trafficking in illegal drugs in Micronesia are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in the Federated States of Micronesia are encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration web site so that they can obtain updated information on travel and security within Micronesia.Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate. By registering, American citizens

make it easier for the Embassy or Consulate to contact them in case of emergency. The U.S. Embassy in Kolonia does not issue U.S. passports; it accepts passport applications from persons living or traveling in the FSM and forwards them to the Honolulu Passport Agency in Hawaii for processing. The U.S. Passport Office in Guam does not issue U.S. passports, but it does accept passport applications and forwards them to Hawaii for processing.

The U.S. Embassy is located on Kaselehlie Street (the main downtown street) across from the Pohnpei Botanical Gardens. The mailing address is PO Box 1286, Pohnpei, Federated States of Micronesia 96941. The telephone number is (691) 320-2187. The Duty Officer phone number is (691) 920-2369. The fax number is (691) 320-2186. The U.S. Embassy's web site can be accessed at http://kolonia.usembassy.gov.

MOLDOVA

Compiled from the June 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Republic of Moldova

PROFILE

Geography

Area: 33,843 sq. km. (13,000 sq. mi.); slightly larger than Maryland.
Cities: Capital—Chisinau.
Terrain: Rolling steppe, gradual slope south to Black Sea.
Climate: Moderate winters, warm summers.
Time Zone: GMT+2

People

Nationality: Noun—Moldovan(s). Adjective—Moldovan.
Population: (January 2008) 4.2 million, excluding the estimated Transnistrian population of 533,000. An estimated 750,000 work outside the country.
Population growth rate: (2007) 0.3%.
Ethnic groups: (2004 census) Moldovan (83.7%), Ukrainian (6.6%), Russian (1.7%), Gagauz (4.5%), Bulgarian (1.7%), Romanian (1.4%), other (0.4%).
Religions: Christian Orthodox (93.3%), Baptist (1%), Adventist, Roman Catholic, Jewish.
Languages: Romanian (officially known as Moldovan), Russian, Ukrainian, Gagauz.
Education: Literacy—96%.
Health: Infant mortality rate—11/1,000. Life expectancy-68.4 years.
Work force: (1.3 million) Agriculture—41%; industry—12%; other—47%.

Government

Type: Republic.
Constitution: Adopted July 28, 1994.
Independence: August 27, 1991 (from Soviet Union).
Government branches: Executive—President (head of state), Prime Minister (head of Government), Government (cabinet). Legislative—unicameral Parliament. Judicial—Supreme Court.
Political subdivisions: 32 counties (raions), 4 municipalities, and one autonomous territorial unit.
Political parties: Communist Party, Christian Democratic People's Party, Our Moldova Alliance, Democratic Party, Social Liberal Party, Social-Democratic Party and the Party for Social Democracy.
Suffrage: Universal at 18.

Economy

GDP: (2007 preliminary) $4.5 billion ($3.4 billion in 2006; $2.9 billion in 2005; $2.6 billion in 2004).
GDP real growth rate: (2007) 3.0% (4.8% in 2006; 8.6% in 2005; 6.5% in 2004).
Per capita GDP: (2007) $1,259 ($950 in 2006; $890 in 2005; $766 in 2004; $540 in 2003).
Natural resources: Lignite, phosphates, gypsum, arable land, and limestone.
Agriculture: Products—vegetables, fruits, wine and spirits, grain, sugar beets, sunflower seeds, meat, milk, eggs, tobacco, walnuts.
Industry: Types—processed foods and beverages, including wine and refined sugar; processed fruit and vegetable products, including vegetable oil; dairy and meat products; tobacco items; metal processing and production of machinery; textiles and clothing, shoes; furniture.
Trade: (2007) Exports—1.342 billion (of which 50% went to the EU countries and some 40% to the former Soviet Union): textiles, clothing, foodstuffs, wine, and machinery. Major markets—Russia, Romania, Ukraine, Italy, Germany, and Belarus. Imports—$3.690 billion (of which 45% came from the EU countries and 36% from the former Soviet Union): gas, oil, coal, steel, machinery and equipment, chemical products, textiles, foodstuffs, automobiles, and other consumer durables. Major suppliers—Ukraine, Russia, Romania, Germany, Italy, and China.
Exchange rate: Leu/US$ (2007) average 12.13; 11.32 (end of year 2007); 13.13 (average in 2006); 12.60 (average in 2005); 12.33 (average in 2004); 13.94 (average in 2003).

PEOPLE AND HISTORY

Ethnic groups represented in Moldova include Moldovan/Romanian, Ukrainian, Russian, Gagauz, and Bulgarian. Romanian (officially known as Moldovan) is the official language; Russian, Ukrainian, and Gagauz also are spoken. The great majority of Moldova's population is Christian Orthodox—90% of the population nominally belongs to one of the two main Orthodox denominations. The Moldovan Orthodox Church, an autonomous diocese of the Russian Orthodox Church and loyal to the Patriarch of Moscow, has 1,281 component parts, including churches, monasteries, and other buildings; the Bessarabian Orthodox Church, affiliated with the Romanian Orthodox Patriarchate in Bucharest, has 309 component parts. In addition, followers of the Old Rite Russian Orthodox Church (Old Believers) have 15. The government does not seek out or record the number of adherents of religious organizations.

The Republic of Moldova occupies most of what has been known as Bessarabia. Moldova's location has made it a historic passageway between Asia and southern Europe, as well as the victim of frequent warfare. Greeks, Romans, Huns, and Bulgars invaded the area, which in the 13th century became part of the Mongol empire. An independent Moldovan state emerged briefly in the 14th century under celebrated leader Stefan the Great but subsequently fell under Ottoman Turkish rule in the 16th century.

After the Russo-Turkish War of 1806-12, the eastern half of Moldova (Bessarabia) between the Prut and the Dniester Rivers was ceded to Russia, while Romanian Moldavia (west of the Prut) remained with the Turks. Romania, which gained independence in 1878, took control of Russian-ruled Bessarabia in 1918. The Soviet Union never recognized the action and created an autonomous Moldavian republic on the east side of the Dniester River in 1924.

In 1940, Romania was forced to cede Bessarabia to the Union of Soviet Socialist Republics (U.S.S.R.), which established the Moldavian Soviet Socialist Republic by merging the autonomous republic east of the Dniester and the annexed Bessarabian portion. Stalin also stripped the three southern counties along the Black Sea coast from Moldova and incorporated them in the Ukrainian Soviet Socialist Republic. Romania sought to regain Bessarabia by joining with Germany in the 1941 attack on the Soviet Union. On June 22, 1941, German and Romanian troops crossed the border and deportations of the Jews from Bessarabia began immediately. By September 1941, most of the Jews of Bessarabia and Bukovina had been transported in convoys and force marched to concentration camps in Transnistria. About 185,000 Jews were in the Transnistria area in concentration camps by 1942 in abysmal conditions. Very few were left alive in these camps when the Soviets reoccupied Bessarabia in 1944.

In September 1990, the Supreme Soviet elected Mircea Snegur as President of the Soviet Socialist Republic of Moldova. A former Communist Party official, he endorsed independence from the Soviet Union and actively sought Western recognition. On May 23, 1991, the Supreme Soviet renamed itself the Parliament of the Republic of Moldova, which subsequently declared its independence from the U.S.S.R.

In August 1991, Moldova's transition to democracy initially had been impeded by an ineffective Parliament, the lack of a new constitution, a separatist movement led by the Gagauz (Christian Turkic) minority in the south, and unrest in the Transnistria region on the left bank of the Nistru/Dniester River, where a separatist movement declared a "Transdniester Moldovan Republic" in September 1990. The Russian 14th Army intervened to stem widespread violence and support the Transnistrian regime which is led by supporters of the 1991 coup attempt in Moscow. In 1992, the government negotiated a cease-fire arrangement with Russian and Transnistrian officials, although tensions continue, and negotiations are ongoing. In February 1994, new legislative elections were held, and the ineffective Parliament that had been elected in 1990 to a 5-year term was replaced. A new constitution was adopted in July 1994. The conflict with the Gagauz minority was defused by the granting of local autonomy in 1994.

GOVERNMENT AND POLITICAL CONDITIONS

In 2000, Parliament passed a decree making Moldova a parliamentary republic, with the president elected by Parliament instead of by popular vote. Widespread popular dissatisfaction with previous governments and economic hardship led to a surprise at the polls in February 2001. In elections certified by international observers as free and fair, slightly over half of Moldova's voters cast their ballots for the Communist Party. Under the rules of Moldova's proportional representation system, the Communist faction, which in the previous Parliament consisted of 40 of Parliament's 101 seats, jumped to 71—a clear majority. The Parliament then elected the leader of the Communist faction, Vladimir Voronin, to be President.

President Voronin's first term was marked by up and down relations with the International Monetary Fund (IMF) and the World Bank. Politically, the government was committed to the reduction of poverty by allocating more resources to social safety net items such as health, education, and increasing pensions and salaries. Voronin proceeded with former President Lucinschi's plans to privatize several important state-owned industries and even on occasion broke with his own party over important issues.

Under President Voronin, relations with the United States have remained strong. From January to April 2002, large demonstrations took place in opposition to several

controversial government proposals, including expanded use of the Russian language in schools and its designation as an official language. While the demonstrations were sometimes tense, the government did not use force and ultimately agreed to Council of Europe (CoE) mediation.

In March 2005 parliamentary elections, the Communist Party received 46.1% of the vote, or 56 seats in the 101-member Parliament—more than enough for the 51-vote minimum required to form a government, but short of the 61 votes necessary to elect a president. However, President Voronin was re-elected with support from the Christian Democratic People's Party and from the Democratic and Social Liberal party factions, after Voronin promised to deliver on needed reforms and Euro-Atlantic integration for the country. These defections broke apart the opposition unity of the pre-election Moldovan Democratic Bloc, led by Our Moldova Alliance (AMN) faction leader and former Chisinau Mayor Serafim Urechean.

Nationwide local elections in June 2007 showed improvement over nationwide parliamentary elections in 2005, with better access to the media for opposition candidates, and greater evidence of impartiality by the Central Election Commission. While the voting itself generally met international standards, the government's behavior in the campaign period—including bias in state media and misuse of administrative resources—remained a concern. The Communist Party suffered a significant setback, losing the high-profile Chisinau mayoral election and control of numerous local councils to opposition party coalitions. Elections in the semi-autonomous region of Gagauzia were held in December 2006, while elections for the region's legislature were conducted in March 2008. Mikhail Formuzal, a longtime opponent of President Voronin, was elected "Bashkan" (Governor) in December 2006. Results of the legislative elections were inconclusive: as of May 2008, the 35 members of the People's Assembly had not been able to elect a speaker, and the loyalties of the 21 independent members were not yet clear. Nationwide parliamentary elections are scheduled for March 2009, and the new Parliament will elect the next President of Moldova. In addition to state-sponsored media, there are several independent newspapers, radio and television stations, and news services. The independent media organizations, along with some that are affiliated with political parties, often criticize government policies. In August 2004, Teleradio Moldova (TRM) was officially transformed from a state-owned company into a public broadcaster. However, journalists and civil

society representatives, who claimed the process was nontransparent and meant to stack the new TRM staff with those favorable to the government, met this move with large protests. In February 2007, a controversial privatization process shut down the popular, pro-opposition Chisinau radio station Antena C, and installed new, pro-government management. The U.S. Ambassador, the Organization for Security and Cooperation in Europe (OSCE), and western diplomatic missions condemned the developments, which seemed to run counter to the Moldovan Broadcasting Code and risked silencing political opposition. Peaceful assembly is allowed, though permits for demonstrations must be obtained; private organizations, including political parties, are required to register with the government. Moldova enacted a new law on religion in July 2007. The new law, while noting the special status of the Moldovan Orthodox Church in Moldovan history and culture, in theory simplifies registration procedures and allows religious groups more access to public places. Although four religious groups have applied for registration under the new procedures, all four have been refused on what they claim are arbitrary grounds.

In February 2005, Brussels and Chisinau agreed on a European Union (EU)-Moldova Action Plan, a "roadmap" of reforms to strengthen the democratic and economic situation of the country and facilitate its Euro-Atlantic integration. Although Moldova has made some progress toward laying the structural and legislative foundation for reform, the EU has emphasized that more implementation is needed.

Transnistria

The population of the Moldovan region of Transnistria is approximately 40% Romanian/Moldovan, 28% Ukrainian, and 23% Russian. Separatist forces maintain control of the Transnistrian region, which lies along the Ukrainian border. Moldova has tried to meet the Russian minority's demands by offering the region rather broad cultural and political autonomy. The dispute has strained Moldova's relations with Russia. The July 1992 cease-fire agreement established a tripartite peacekeeping force comprised of Moldovan, Russian, and Transnistrian units.

Negotiations to resolve the conflict continue, and the cease-fire is still in effect. The Organization for Security and Cooperation in Europe (OSCE) is trying to facilitate a negotiated settlement and has had an observer mission in place for several years. In July 2002, OSCE, Russian, and Ukrainian mediators approved a document setting forth a blueprint for reuniting Moldova under a federal system. Over the next year and a half, the settlement talks alternated between periods of forward momentum and periods of no progress. In February 2003, the U.S. and EU imposed visa restrictions against the Transnistrian leadership. In April 2003, the Moldovan Government and the Transnistrian authorities agreed to establish a joint commission to draft a constitution for a reintegrated state. However, fundamental disagreements over the division of powers remained, and a settlement proved elusive.

President Voronin decided not to sign a Russian-brokered settlement with Transnistria in November 2003; the proposal—seen by many as pro-Transnistrian—sparked opposition protests. During the summer of 2004, the Transnistrian separatists forcibly closed several Romanian language Latin-script schools in the region, for which the regime was subject to international condemnation. In 2005, Tiraspol prevented several farmers on the right bank of the Nistru River from working their fields on the left bank, within Transnistria's "borders." The OSCE Mission to Moldova eventually mediated solutions to these crises.

After a 15-month pause, the sides met for a renewed round of settlement negotiations in October 2005. Mediators from Ukraine, Russia and the OSCE joined the Moldovan and Transnistrian representatives at the talks. In addition, the U.S. and EU joined the talks as observers. However, subsequent "5+2" negotiations have made little progress on a settlement or on withdrawal of Russian forces from Moldova: Russia still has weapons and munitions of the Operational Group of Russian Forces (formerly the Russian 14th Army) stationed in Transnistria, although it pledged to remove them under a timetable established at the 1999 OSCE Ministerial—the so-called "Istanbul Accords." However, there has been no progress on Russian withdrawals since early 2004.

In response to Moldova's call for international monitoring of the border, in December 2005 the EU dispatched a Border Assistance Mission (EUBAM) to help stem the flow of illegal trade between Ukraine and Moldova. In March 2006, Ukraine and Moldova began implementing a 2003 customs agreement, under which Transnistrian companies seeking to engage in cross-border trade must register in Chisinau. Despite the protests of Transnistrian leader Igor Smirnov, all major Transnistrian businesses have subsequently registered. In what is seen as a response to the new customs procedures, the Smirnov regime boycotted the 5+2 talks in March 2006. Although formal 5+2 talks remain stalled, President Vladimir Voronin and Transnistrian leader Igor Smirnov met in Bender on April 11, 2008, and agreed to initiate dialogue on confidence-building measures. Informal 5+2 discussions were held in Odessa, Ukraine, in April 2008 and focused on creating favorable conditions for resumption of formal talks. In September 2006, the Transnistrian regime held an "independence referendum." Despite the fact that the Smirnov regime claimed that the referendum demonstrated overwhelming support for independence, the vote was not monitored by any western organizations, and no country recognized the referendum or the independence of Transnistria.

Permanent Representative to the UN, New York:

More information about Moldova can be found at the official (Romanian and Russian language) Government of Moldova website at www.moldova.md. The Moldova.org site is maintained by the Moldova Foundation, a non-governmental organization and has some useful links.

ECONOMY

Moldova remains the poorest country in Europe. It is landlocked, bounded by Ukraine on the east and Romania to the west. It is the second smallest of the former Soviet republics and the most densely populated. Industry accounts for less than 15% of its labor force, while agriculture's share is more than 40%. Moldova's proximity to the Black Sea gives it a mild and sunny climate. This makes the area ideal for agriculture and food processing, which accounts for one third of the country's GDP. The fertile soil supports wheat, corn, barley, tobacco, sugar beets, and soybeans. Beef and dairy cattle are raised, and beekeeping is widespread. Moldova's best-known product comes from its extensive and well-developed vineyards concentrated in the central and southern regions. In addition to world-class wine, Moldova produces liqueurs and champagne. It is also known for its sunflower seeds, walnuts, apples, and other fruits.

Like many other former Soviet republics, Moldova has experienced economic difficulties. Since its economy was highly dependent on the rest of the former Soviet Union for energy and raw materials, the breakdown in trade following the breakup of the Soviet Union had a serious effect, exacerbated at times by drought and civil conflict. The Russian ruble devaluation of 1998 had a deleterious effect on Moldova's economy, but economic growth was steady from 2000 to 2005, averaging 7% after years of recession since independence. Economic growth slowed in 2006 (4.8%) and 2007 (3%), brought on by strained relations with Russia and a series of consecutive shocks—a two-fold increase in gas prices and a politically-motivated Russian ban on Moldovan wine imports in 2006 and a severe drought in 2007.

Moldova has made progress in economic reform since independence. The government has liberalized most prices and has phased out subsidies on most basic consumer goods. A program begun in March 1993 has privatized 80% of all housing units and nearly 2,000 small, medium, and large enterprises. Other successes include the privatization of nearly all of Moldova's agricultural land from state to private ownership, as a result of an American assistance program, "Pamint" ("land"), completed in 2000. A stock market opened in June 1995.

Following the economic difficulties caused by the Russian currency crisis of 1998, inflation dropped to 4.4% in 2002, the lowest level since Moldova's independence. However, inflation spiked again to 15.7% in 2003 and never fell below 10% over the following years, rising as high as 14.1% in 2006 and 13.1% in 2007, one of the highest in the region. While relatively stable in recent years, the local currency has been appreciating because of a weakening U.S. dollar and pressure from record remittances from Moldovans working abroad. Reforms to the National Bank of Moldova in 2006 changed the central bank's policy priority from currency stability to price stability (fighting inflation). The National Bank of Moldova has the difficult task of sterilizing the money supply to contain stubbornly high inflation.

Moldova continues to make progress toward developing a viable free-market economy. Tight fiscal policy resulted in a slight deficit of 0.3% of GDP in 2007. The Moldovan economy continues to depend greatly on remittances sent from Moldovans working abroad. These inflows have increased to over $1.2 billion a year.

Privatization results in recent years were not significant. With mass privatization over, the government has been mostly selling state-owned residual shares in companies and focusing on efficient management of state assets. Total proceeds in 2007 amounted to $16.7 million. State-owned residual shares in 33 companies and one land plot in Chisinau were privatized in 2007. The government postponed indefinitely privatizations in the power, banking, telecommunications, and agribusiness sectors. In 2007, Parliament passed a new law, introducing new approaches to privatizing and managing state-owned assets. As the European Union expanded to Moldova's border, 2007 saw record high inflows of foreign direct investment (FDI). However, cumulative FDI since independence is only $1.81 billion, far below the country's needs. Sporadic and ineffective enforcement of the law, corruption, economic and political uncertainty, and government interference discourage greater FDI inflows.

Spurred by soaring consumption and higher energy prices, imports have been growing more rapidly than exports. The country lacks diversification in terms of sector development and export markets. In 2007, the country's trade deficit was $2.3 billion (compared with $1.6 billion in 2006).

In 2005, Russia enacted a ban on Moldovan agricultural products and in 2006, it banned imports of Moldovan wines. Although Russian President Putin announced an end to the wine ban in November 2006, actual resumption of wine exports came a year later. The November 2007 resumption of wine exports to Russia was a positive development, but full recovery of trade volumes will take time. The wine ban was particularly painful because, prior to the ban, Moldovan wines accounted for one-third of the country's exports and 80% of wine exports went to Russia. The Russian wine ban further widened the country's trade deficit. Moldova's exports to Russia declined by 47.6% in 2006 and total exports dropped 3.6%, resulting in a trade deficit of 47% of GDP. Some Moldovan wineries were successful in finding new, alternative markets for their products in 2007. The current Central European Free Trade Agreement (CEFTA) and EU autonomous trade preferences are incentives for further market diversification.

In January 2006, Russian energy giant Gazprom temporarily cut off natural gas deliveries to Ukraine and Moldova—which is almost completely dependent on its neighbors for energy—and subsequently doubled the price of gas to Moldova. The prices of Russian gas increased to U.S. $170 per one thousand cubic meters in 2007, U.S. $192 in the first quarter of 2008, and U.S. $212 in the second quarter of 2008. The prices will increase until 2011, reaching parity with the average EU price.

The International Monetary Fund (IMF) and World Bank resumed lending to Moldova in July 2002, and then suspended lending again in July 2003. In early 2006, Moldova reached agreement with the Paris Club on rescheduling Moldova's foreign debt. In addition, in the spring of 2006, the IMF reached an agreement with the Moldovan Government for a Poverty Reduction and Growth Facility designed to bolster foreign reserves against external shocks with a 3-year, $180 million program that includes a new IMF loan to the National Bank of Moldova.

Moldova suffered from a severe drought during much of 2007 which caused hundreds of millions of dollars in agriculture sector losses and prompted concerns about food availability. In response to a request for assistance from the Government of Moldova, the United States provided $350,000 worth of seed to drought ravaged farmers in time for fall planting.

DEFENSE AND MILITARY ISSUES

Moldova has accepted all relevant arms control obligations of the former Soviet Union. On October 30, 1992, Moldova ratified the Conventional Armed Forces in Europe Treaty, which establishes comprehensive limits on key categories of conventional military equipment and provides for the destruction of weapons in excess of those limits. It acceded to the provisions of the nuclear Non-Proliferation Treaty in October 1994 and to the Biological Weapons Convention in December 2004. It does not have nuclear, biological, or chemical weapons. Moldova joined the North Atlantic Treaty Organization's Partnership for Peace on March 16, 1994. Due to Moldova's constitutional neutrality, it is not a participant in the Commonwealth of Independent States (CIS—a group of 12 former Soviet republics) Collective Security Agreement.

FOREIGN RELATIONS

Moldova's Parliament approved the country's membership in the Commonwealth of Independent States and a CIS charter on economic union in April 1994. In 1995, the country became the first former Soviet republic admitted to the Council of Europe. In addition to its membership in NATO's Partnership for Peace, Moldova also belongs to the United Nations, the OSCE, the North Atlantic Cooperation Council, the International Monetary Fund, the World Bank, and the European Bank for Reconstruction and Development. Moldova is a member of the World Trade Organization (WTO).

In 1998, Moldova contributed to the founding of GUAM, a regional cooperative agreement made up of Georgia, Ukraine, and Azerbaijan, in addition to Moldova. Although the agreement initially included a declaration of mutual defense, Moldova has since declared its disinterest in participating in any GUAM-based mutual defense initiative. Moldova has been involved in information exchange, trade and transportation, border control, and energy projects issues within this regional agreement. In 2006, the organization's members voted to change the name to the Organization for Democracy and Economic Development—GUAM.

The past two years have seen significant developments in Moldova's relations with the West. In 2005, the European Union appointed a Special Representative for Moldova and the negotiations to resolve the Transnistrian conflict and the Delegation of the European Commission opened an office in Chisinau, In December 2005, Moldova welcomed an EU Border Assistance Mission (EUBAM) along its Ukrainian border to crack down on smuggling, strengthen customs procedures and facilitate cross-border cooperation. In accordance with a 2005 Action Plan with the EU, Moldova has begun to harmonize Moldova's laws with those of the EU. As part of this, in late 2005, Moldova enacted its "Guillotine" laws, which slashed unnecessary business regulations, established a framework for relations between the private sector and government and created a mechanism to review the suitability of draft legislation.

In the atmosphere of heightened international sensitivity to terrorism following the events of September 11, 2001, Moldova has been a supporter of American efforts to increase international cooperation in combating terrorism. Moldova has sent demining units and peacekeepers to participate in post-conflict humanitarian assistance in Iraq.

U.S.-MOLDOVAN RELATIONS

The dissolution of the Soviet Union in December 1991 brought an end to the Cold War and created the opportunity to build bilateral relations with the 15 new states that had made up the former U.S.S.R., as they began political and economic transformation.

The United States recognized the independence of Moldova on December 25, 1991 and opened an Embassy in its capital, Chisinau, in March 1992. The U.S. Ambassador to Moldova, Michael Kirby, arrived at post on September 1, 2006.

A trade agreement providing reciprocal most-favored-nation tariff treatment became effective in July 1992. An Overseas Private Investment Corporation agreement, which encourages U.S. private investment by providing direct loans and loan guarantees, was signed in June 1992. A bilateral investment treaty was signed in April 1993. Generalized system of preferences status was granted in August 1995, and some Eximbank coverage became available in November 1995.

In 2006, the U.S. Millennium Challenge Corporation approved Moldova's $24.7 million Threshold Country Plan to combat corruption. The MCC also ruled that Moldova is eligible to apply for full compact assistance, and the Moldovan Government submitted its compact proposal in 2008.

TRAVEL

Consular Information Sheet

October 10, 2008

Country Description: Moldova is a republic with a freely elected government. It has been an independent nation since 1991. Its capital, Chisinau, offers adequate hotels and restaurants, but tourist facilities in other parts of the country are not highly developed, and many of the goods and services taken for granted in other countries are not yet available.

Entry Requirements: Since January 1, 2007, citizens of the United States, EU member states, Canada, Switzerland, and Japan do not require visas to enter Moldova. For more information on entry requirements, please contact the Moldovan Embassy, 2101 S Street N.W., Washington, D.C. 20008, telephone: (202) 667-1130, (202) 667-1131, or (202) 667-1137, fax: (202) 667-1204, e-mail: moldova@dgs.dgsys.com. Travelers may also wish to consult the Embassy of Moldova's web site at http://embassyrm.org/en/cons-serv/visas.html for general information on Moldovan visas and for application forms.

Safety and Security: The U.S. Government has no information related to the targeting of U.S. citizens, interests or facilities by terrorist organizations in Moldova, and no Americans have been killed or injured as a result of terrorist activity in Moldova. However, the U.S. government remains deeply concerned about the heightened threat of terrorist attacks against U.S. citizens and interests abroad. Americans are reminded to remain vigilant with regard to their personal security and to exercise caution. Because Moldovan Government authorities often ask to see identification on the street, Americans should carry a copy of their passport with them at all times.

There is a separatist regime in control of the Transnistria region that is not recognized by the United States. Consular assistance to American citizens in that region cannot be ensured. Travelers should exercise caution when visiting or transiting Transnistria. Travelers should be aware that there are numerous road checkpoints along roads leading into and out from Transnistria. Taking photographs of military facilities, public buildings, and security forces, including checkpoints along roads leading into and out from Transnistria, is strictly prohibited.

Racially motivated incidents against foreigners and persons of color have occurred in Moldova. Persons of African, Asian, or Arab heritage may be subject to various types of harassment, such as verbal abuse, and denied entrance into some clubs and restaurants. These Americans are also at risk for harassment by police authorities.

In some instances, Americans have become victims of harassment, mistreatment and extortion by Moldovan law enforcement and other officials. Low-level bribery attempts are commonplace in Moldova. These encounters should always be reported to the U.S. Embassy. Moldovan authorities have cooperated in investigating such cases, but those investigations enjoy the greatest chance of success when the officer is identified by name, physical description, or other identifying characteristics. Please note this information if you ever have a problem with police or other officials. Americans who have refused to pay bribes in Moldova generally report no consequences beyond being delayed or inconvenienced.

For the latest security information, Americans traveling abroad should regularly monitor the Department of State, Bureau of Consular Affairs' web site at http://travel.state.gov, where the current Travel Warnings and Travel Alerts, as well as the Worldwide Caution, can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S. and Canada, or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444. These numbers are available from 8:00 a.m. to 8:00 p.m. Eastern Time, Monday through Friday (except U.S. federal holidays).

Crime: Moldova's economic difficulties, as well as organized criminal activity and more frequent travel by foreigners to Moldova, contribute to the risk visitors face from street crime, some potentially violent. While this risk is no greater than in most cities in the United States, many Americans have reported theft of money and small valuables from hotel rooms and local apartments. Cases of breaking and entering into homes and offices have occurred. Travelers are wise to exercise the same precautions with regard to personal safety and protection of valuables in Chisinau that they would in any major U.S. city.

Precautions should also be taken when using ATMs in Moldova. Some Americans have reported unauthorized withdrawals from their accounts after using ATMs. Instances have been reported of PIN theft from use of ATMs in Moldova, either by "skimming" devices, which record the ATM card information while in use, or by surreptitious observation.

Train and bus services are below Western European standards and some U.S. citizens have been victims of crimes involving thefts while traveling on international trains to and from Moldova.

Americans who use the Moldovan postal service report frequent losses from international letter and package mail.

Internet Fraud Warning: The Embassy is aware of various confidence schemes that have taken advantage of American citizens, frequently via the Internet. In some cases these involve the purchase or sale of items on the Internet in which the payment or shipment of goods was not completed by a Moldovan counterpart. In the spring of 2006, Moldovan police recovered over $250,000 in jewelry that was sent to "buyers" in Moldova from the U.S. via fake online escrow companies. Substantial criminal enterprises specializing in this type of crime (Internet auction fraud) are emerging in Moldova. In other cases, American citizens, particularly males, have met potential Moldovan fiancé(e)s on the Internet who have convinced them to send hundreds or even thousands of dollars, but have no intention of a serious relationship. Once the American citizen starts to question the reason for sending the money, the Moldovan fiancé(e)s suddenly ends his/her contact. On occasion, American citizens who come to Moldova to visit someone they have first met over the Internet have reported becoming subject to crimes such as extortion and involuntary detention. American citizens should be aware that any such activity committed by individuals in Moldova is subject to the Moldovan legal system and could prove difficult to prosecute. In the vast majority of cases, there is little that the U.S. Embassy can do to assist American citizens who are defrauded by Moldovans via the Internet.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

Medical Facilities and Health Information: Medical care in Moldova is substandard throughout the country, including Chisinau. In the event of serious medical conditions every effort should be made to go to Western Europe. In the event of emergency, travelers should attempt first to contact the local ambulance service, which is trained to determine which medical facility is most appropriate for treatment and will transport the injured or sick person to that location. Hospital accommodations are inadequate throughout the country and advanced technology is lacking. Shortages of routine medications and supplies may be encountered. Elderly travelers and those with existing health problems may be at particular risk due to inadequate medical facilities. The U.S. Embassy maintains lists of medical facilities and English-speaking doctors, but cannot guarantee or endorse competence. Visitors to Moldova are advised to bring their own supply of both prescription and common over-the-counter medications. Pharmacies are not stocked to Western standards and products are not labeled in English. Poor quality and/or fraudulent medications have been reported.

Some HIV/AIDS entry restrictions exist for visitors to or foreign resi-

dents of Moldova. Short term visitors (periods of less than 90 days) do not require HIV testing. Applicants for residence permits, however, are required to submit to a HIV test and demonstrate that they are HIV negative. Please verify this information with the Embassy of Moldova at www.embassyrm.org before you travel.

Medical Information: Tuberculosis is an increasingly serious health concern in Moldova; the World Health Organization (WHO) has placed it in its "highest risk" category. Travelers planning to stay in Moldova for more than 3 months should have a predeparture PPD skin test status documented. Given the way TB is transmitted, travelers should consider limiting their exposure to TB by avoiding crowded public places and public transportation whenever possible. Domestic help should be screened for TB. For further information, please consult the CDC's Travel Notice on TB at http://wwwn.cdc.gov/travel.

Other major health concerns include Hepatitis A (food-borne), Hepatitis B, and Hepatitis C (blood- and body fluids-borne). The incidence of sexually transmitted diseases is as high as it is in most developing countries.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's web site at http://wwwn.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the WHO's web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith/en.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and if it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Moldova is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

Moldova's highway infrastructure consists mainly of two-lane roads that often lack markings or signage, are unevenly maintained, and seldom have lighting. Caution should be taken to prevent collisions with agricultural vehicles and/or livestock. Urban roads in Moldova are infrequently maintained and often lack clear signs or lane markings.

Travel outside of urban areas before dawn and after dusk should be avoided if at all possible. Drivers and pedestrians should exercise extreme caution to avoid accidents, which are commonplace. Many Moldovan drivers would be considered aggressive or erratic by American standards. Many accidents involve drunk drivers. The quality and safety of public transportation vary widely. Trains, trolleybuses, and buses are often old and may frequently break down. Taxis are available in most urban areas, and vary from old Soviet-era vehicles to newer, Western European or American model vehicles.

Visit the website of the Moldova's national tourist office at http://www.turism.md.

Aviation Safety Oversight: As there is no direct commercial air service between the United States and Moldova, the U.S. Federal Aviation Administration (FAA) has not assessed Moldova's Civil Aviation Authority for compliance with International Civil Aviation Organization (ICAO) aviation safety standards. For more information, travelers may visit the FAA's web site at http://www.faa.gov.

Special Circumstances: Travelers are advised to register any foreign currency brought into Moldova with customs authorities upon entering the country. It is advisable to contact the Embassy of Moldova in Washington for specific information regarding customs requirements.

Visas and residency: Current Moldovan Government (GOM) border registration procedures will remain unchanged under the new immigration law. As of January 1, 2007, U.S. and most other foreign nationals arriving in Moldova do not require a visa and are permitted stays of up to 90 days in any given six-month period. At the point of entry (i.e., airport or border), the Border Guard Service enters the traveler's personal data into a computer program and transfers the data to the GOM's Population Register. Visitors are not given a paper "registration receipt." U.S. citizens are able to enter Moldova through Transnistria. However, because they will not have been registered at the border, they will still have to register with the nearest office of the Ministry of Information Development (MID) within three days of arrival in right-bank (western) Moldova.

For stays exceeding 90 days, foreign nationals are required to obtain "immigration certificates" and residence permits from the National Bureau for Migration. Foreign nationals planning to work in Moldova must also obtain a work permit. Immigration, residence and work permits usually need to be extended annually, but may be issued for up to five years.

For more information on registering with Moldovan authorities, U.S. citizens are encouraged to call the Consular section of the U.S. Embassy in Chisinau at (373) (22) 40-83-00.

Requirement to Carry Documentation: As noted above, Moldovan police have the right to request identity documents from any person. Individuals who fail to produce appropriate ID upon request may be subject to detention and fines. Therefore, Americans are advised to carry their U.S. passports (or a copy of their passport's biographic information page) with registration card, if applicable, or a Moldovan-issued identification document when in public.

Consular Access: Moldovan law enforcement authorities, particularly in the Transnistria region, have an uneven record of reporting the arrest or detention of American citizens to the U.S. Embassy, as required under international agreements. American citizens are therefore advised that if they are detained or arrested by Moldovan authorities, they should immediately request that the U.S. Embassy be contacted. Moldovan authorities have generally respected such requests in a prompt manner.

Photography: Americans who choose to travel in Transnistria should be aware that foreigners have reported being detained or harassed by authorities for taking photographs of military facilities or public buildings. Photography of checkpoints along roads leading into and out from the Transnistria region, or the personnel working there, is prohibited.

Dual Nationality: Moldovan legislation allowing dual citizenship went into effect on October 18, 2003. There is no requirement that dual nationals enter Moldova on their Moldovan passports. For further questions, please contact the Moldovan Embassy in Washington, D.C.

Telephone and Postal Services: Outside of Chisinau, travelers may have difficulty finding public telephones and receiving or making international and local calls. Losses have been reported from international letter and package mail, both of which are subject to a customs inspection before delivery. "Express" mail services such as DHL and Federal Express are available in Chisinau, although in most instances prices are high, and shipments arrive from (or reach) the United States in no less than five (5) business days.

Disabled Access: Persons with disabilities should be aware that public facilities and transportation in Moldova are rarely designed or built in a way that allows for wheelchair access. Wheelchair entrances, ramps, lifts or similar accommodations are rare; those that do exist are often below Western standards and/or poorly maintained. Most streets, sidewalks and other public paths are not well maintained and can be hazardous, particularly in poor weather conditions.

Commercial Transactions: Although still generally a cash-only economy, traveler's checks and credit cards are becoming increasingly accepted in Chisinau, although locations that will accept them outside the capital are still rare. Some vendors require the customer dial in a PIN to authorize a sale by credit card. Caution is advised, however, as some travelers have reported incidents of unauthorized expenditures made on credit cards during or following their use in Moldova, and there have also been reported incidents of fraud and account theft using bank machines.

Business in Transnistria: As noted in the Safety and Security section above, a separatist regime controls a narrow strip of land in eastern Moldova known as Transnistria ("Pridnestrovie" in Russian). Individuals considering doing business in Transnistria should exercise extreme caution. The Embassy may not be able to offer consular or commercial services to Americans in Transnistria. Moldovan law requires firms (including those located in Transnistria) to register with the Moldovan Government and to use Moldovan customs seals on their exports. Under a December 2005 agreement between Moldova and Ukraine, Ukrainian customs and border officials require Moldovan customs seals on goods exported from Moldova, including Transnistria, and are enforcing this requirement with EU assistance. Transnistrian firms not legally registered with Moldovan authorities operate in contravention of Moldovan law, which may complicate or prevent the import or export of goods. The Government of Moldova has indicated that it will not recognize the validity of contracts for the privatization of firms in Transnistria that are concluded without the approval of the appropriate Moldovan authorities. A number of Internet fraud schemes have originated in Transnistria.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating Moldovan laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Moldova are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in illicit sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: U.S. Citizens who adopt a Moldovan child must ensure that the child has a visa valid for travel to Romania in the child's Moldovan passport. This visa is necessary to allow the child to travel to Bucharest, where the parents must apply at the U.S. Embassy for the child's immigrant visa to the United States. Without a Romanian visa, the child will be turned back at the airport or border crossing.

Registration and Embassy Locations: Americans living or traveling in Moldova are encouraged to register with the U.S. Embassy through the State Department's travel registration web site, and to obtain updated information on travel and security within Moldova. Americans without Internet access may register directly with the U.S. Embassy. By registering, American citizens make it easier for the Embassy to contact them in case of emergency. The U.S. Embassy is located in Chisinau, Moldova, Strada Alexei Mateevici 103; telephone: (373) (22) 23-37-72, after-hours telephone: (373) (22) 23-73-45; Consular Section Fax: (373) (22) 22-63-61. The Embassy's web site is http://moldova.usembassy.gov.

Intercountry Adoption

November 2008

The information in this section has been edited from a report available

through the U.S. Department of State Office of Children's Issues. For more information detailed, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Moldova is party to The Hague Convention on Protection of Children and Co-operation in Respect of Intercountry Adoption (Hague Adoption Convention). Therefore all adoptions between Moldova and the United States must meet the requirements of the Convention and United States law implementing the Convention. For detailed information on these requirements for adoption, please review the *Intercountry Adoption* section of this publication and visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

Who Can Adopt? Adoption between the United States and Moldova is governed by The Hague Adoption Convention. Therefore to adopt from Moldova, you must first be found eligible to adopt by the United States Government.

Adoption in Moldova can be a complicated process, sometimes involving long waits. Moldovan adoption law gives preference to Moldovan citizens and citizens of countries that have implemented the 1993 Hague Convention on Intercountry Adoption.

In addition to the United States requirements for prospective adoptive parents, Moldova also has the following eligibility requirements for prospective adoptive parents.

Residency Requirements: There are no residency requirements for foreign adoptive parents.

Age Requirements: The minimum age requirement for adoptive parents is 25. The maximum age is 50, unless one of the couple is under the age of 50.

Marriage Requirements: Married couples and single people may adopt. Unmarried couples may not adopt from Moldova.

Income Requirements: Prospective adoptive parents must show financial stability.

Other Requirements: The presence of the following conditions disqualify prospective adoptive parents from adopting in Moldova: HIV/AIDS, psychological and behavioral disorders, drug addiction, chronic alcoholism, chronic somatic diseases (disability of the 1st and 2nd degree), various forms of cancer, Hepatitis B, C or D. The following conditions may temporarily disqualify a person from adopting: sexually transmitted diseases, tuberculosis and severe virulent diseases.

Who Can Be Adopted? Because Moldova is a member of The Hague Adoption Convention, children from Moldova must meet the requirements of the Convention in order to be eligible for adoption. For example, the Convention requires that Moldova attempt to place a child with a family in Moldova before determining that a child is eligible for intercountry adoption.

In addition to Moldova's requirements, a child must meet the definition of a Convention adoptee for you to bring him or her back to the United States.

Intercountry adoptions are permitted in exceptional cases, when no relatives or other Moldovan families are able to adopt orphans or become their guardians. Children who have health or developmental problems that Moldovan families cannot afford to treat are also considered exceptional cases.

Waiting Period: Information about children eligible for adoption is published in the Monitorul official, the Moldovan Government's official register. For the first six months after this information is published, an adoptable child is eligible only for domestic adoption by Moldovan citizens. After six months, an adoptable child is eligible for intercountry adoption. Prospective adoptive parents may indicate the sex and age range of the child they prefer.

Moldovan Adoption Authority: The Ministry of Social Protection, Family and Child Adoption Department

The Process: The first step in adopting a child from Moldova is to select an adoption service provider in the United States that has been accredited. Only these agencies and attorneys can provide adoption services between the United States and Moldova.

When adopting in Moldova, prospective adoptive parents are required to use an adoption agency that is also accredited in Moldova. Please find the list of accredited adoption providers in the Contacts section. A registered adoption agency, through its Moldovan representative, forwards the foreign prospective adoptive parents' file to the Adoption Department (See the list of required documents below.) The Adoption Department in turn forwards the file to the Education Directorate in the district where a prospective adoptable child resides.

After you choose an accredited adoption agency, you apply to be found eligible to adopt by the USCIS. Once the United States Government determines you "eligible" and "suitable" to be an adoptive parent, your information will be forwarded to the adoption authority in Moldova. Moldova's adoption authority will review your application to determine whether you are also eligible to adopt under Moldovan law.

If both the United States and Moldova determine that you are eligible to adopt, and a child is available for intercountry adoption, the central adoption authority will provide you with a referral for a child. You cannot identify a specific child that you would like to adopt prior to the adoption authority providing this referral.

The local Inspector for the Protection of Children's Rights in the district, together with a physician and the director of the orphanage, examines the file and matches the family with an eligible child.

The prospective adoptive parents are then provided with complete, official information about the child, including health and family background. The Moldovan representative sends the prospective adoptive parents this information including photographs or a video of the child. The representative will also send answers from the Moldovan authorities to all additional questions the prospective adoptive parents may have about the child. The prospective adoptive parents have the option to refuse a prospective adoptive child. If they do so, they must inform the Moldovan authorities in writing of their decision.

If the prospective adoptive parents agree to accept the child, they send a letter to the Adoption Department through their agency's representative, acknowledging that they are aware of any specific health or other problems, and accept the child. The orphanage receives a copy of the letter from the Adoption Department.

After you accept a match with a child, you will apply to the USCIS for provisional approval to adopt that particular child (Form I-800).

After this, your adoption service provider or you will submit a visa application to a Consular Officer at the United States Embassy. If the Consular Office determines that the child appears eligible to immigrate to the United States, he/she will notify Moldova's adoption authority (Article 5 letter). For Convention country adoptions, prospective adoptive parent(s) may not proceed with the adoption or obtain custody for the purpose of adoption until this takes place.

If approved, the Directorate of Education will forward a Notice of Approval of Adoption to the Adoption Department. The Adoption Department will then decide whether to approve the adoption. Although prospective adoptive parents do not need to travel to Moldova to meet the prospective adoptive child at the time of the acceptance of the match, both parents must appear in court in Moldova to finalize the adoption.

Role of the Adoption Authority: To begin the adoption process, a registered adoption agency, through its Moldovan representative, forwards the foreign prospective adoptive parents' file to the Adoption Department.

The Department in turn forwards the file to the Education Directorate in the district where a prospective adoptable child resides. Once a child has been selected the prospective adoptive parents send a letter to the Adoption Department through their agency's representative, acknowledging that they are aware of any specific health or other problems, and accept the child. The orphanage receives a copy of the letter the Department.

The district's Directorate of Education must then approve the prospective adoption and provide full information on the adoptive parents and the adoptive child to the Adoption Department. If approved, the Directorate of Education will forward a Notice of Approval of Adoption to the Department.

The Adoption Department will then decide whether to approve the adoption. Although prospective adoptive parents do not need to travel to Moldova to meet the prospective adoptive child at the time of the acceptance of the match, both parents must appear in court in Moldova to finalize the adoption.

Role of the Court: The approved adoption file proceeds to the court system through the district's Inspector for the Protection of Children's Rights. Once prospective adoptive parents satisfy the Moldovan adoption requirements, a judge must grant a final adoption.

Time Frame: An adoption can take six to nine months to complete from the time a child is matched with prospective adoptive parents until the completion of the adoption.

Adoption Fees: There is a Government fee of 1,500 EUR for each adopted child and cost of airfare for adoption-related travel. Separate attorneys' fees can vary greatly.

In the adoption services contract that you sign at the beginning of the adoption process, your agency will itemize the fees and estimated expenses related to your adoption process.

Documents Required: The adoption application should contain:

- Name, year, month, and day of birth of prospective adoptive parent(s). Address and state of residence of the parent(s) is also required;
- Name, year, month, and day of birth of child to be adopted. Residence of the child to be adopted;
- Information regarding the biological parents and siblings of the prospective adoptive child;
- Request to change name and place of birth, and register the adoptive parents as the birth parents on the child's new birth certificate;
- Copy of prospective adoptive parent(s) birth certificate;
- Doctor's Certificate of Eligibility to Adopt;
- Employment certificate, including occupation, years of service, and income;
- Authenticated copy of Deed of Sale for a home, or lease agreement for residence; and
- Approval by the prospective adoptive parents' Government and permission for the adopted child to reside in the United States.

For updates on document requirements and information on how to authenticate documents, visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

Bringing Your Child Home: Once your adoption is complete (or you have obtained legal custody of the child), there are a few more steps to take before you can head home. Specifically, you need to apply for several documents for your child before he or

she can travel to the United States, such as a birth certificate, a passport or travel document for your child from the country in which he or she was born, and a U.S. Immigration Visa. For detailed and updated information on how to obtain these documents, review the *Intercountry Adoption* section on this publication and visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

Child Citizenship Act: For adoptions finalized abroad: The Child Citizenship Act of 2000 allows your new child to acquire American citizenship automatically when he or she enters the United States as lawful permanent residents.

For adoptions finalized in the United States: The Child Citizenship Act of 2000 allows your new child to acquire American citizenship automatically when the court in the United States issues the final adoption decree. To learn more, review the *Intercountry Adoption* section on this publication and visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

MONACO

Compiled from the April 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Principality of Monaco

PROFILE

Geography

Area: 1.95 sq. km. (0.8 sq. mi); about the size of New York City's Central Park.
Cities: Capital—Monaco, pop. 32,409 (July 2005 est.).
Terrain: Hilly.
Climate: Mediterranean with mild, wet winters and hot, dry summers.

People

Nationality: Noun and adjective—Monegasque.
Population: (July 2006 est.) 32,543.
Annual growth rate: (2007 est.) 0.386%.
Ethnic groups: (2007) French 47%, Italian 16%, Monegasque 16%, other 21%.
Religions: Roman Catholic 90%, other 10%.
Languages: French (official), English, Italian, and Monegasque.
Education: Years compulsory—10, ages 6-16. Attendance—99%. Literacy—99%.
Health: (2007 est.) Infant mortality—5.27 deaths/1,000 live births. Life expectancy—75.99 yrs. male; 83.85 yrs. female. Birth rate (2007 est.)—9.12 births/1,000 population. Death rate (2006 est.)—12.92 deaths/1,000 population.

Government

Type: Constitutional monarchy.
Constitution: December 17, 1962 (amended in April 2002).
Government branches: Executive—Prince Albert II (chief of state), Minister of State Jean-Paul Proust (head of government), Council of Government (cabinet under authority of the monarch). Legislative—unicameral National Council (24 members). Judicial—Court of First Instance, Court of Appeal, High Court of Appeal, Criminal Court, Supreme Court.
Political subdivisions: Four quarters (quartiers)—Monaco-Ville, La Condamine, Monte-Carlo, Fontvieille.
Political parties: Union pour Monaco (UPM), National and Democratic Union (UND), Parti Monégasque (PM).
Suffrage: Universal adult at age 18.

Economy

GDP: Monaco does not publish economic figures such as gross domestic product, though estimates placed purchasing power parity GDP at $976.3 million in 2006.
Avg. annual growth rate: (2003 est.) 1.89%.
Per capita purchasing power parity GDP: (2006 est.) $30,000.
Work force: (2003, 41,708) Private sector—37,949. Public sector—3,759. Services—83.5%. Banking—23.43%. Tourism and hotel—11.64%. Retail—4.92%. Construction and public works—32.02%. Industry—6.98%.
Agriculture: None.
Industry: Types—tourism, construction, chemicals, food products, plastics, precision instruments, cosmetics, ceramics.
Trade: Imports (2005)—$916.1 million. Exports (2005)—$716.3 million. Note: full customs integration with France, which collects and rebates Monegasque trade duties; also participates in EU market system through customs union with France.
Currency: Monaco, along with France and the other 11 members of the European Monetary Union (EMU), adopted the euro ( ) as its official currency on January 1, 2002. As in other EMU states, euros minted in Monaco have special Monegasque features on one side of the coin.

GEOGRAPHY

The Principality of Monaco is the second-smallest independent state in the world, after the Holy See (Vatican City). It is located on the Mediterranean coast, 18 kilometers (11 mi.) east of Nice, France, and is surrounded on three sides by France. Monaco is divided into four sections: Monaco-Ville, the old city on a rocky

promontory extending into the Mediterranean; La Condamine, the section along the port; Monte-Carlo, the principal residential and resort area; and Fontvieille, a newly constructed area reclaimed from the sea.

The principality is noted for its beautiful natural scenery and mild, sunny climate. The average minimum temperature in January and February is 8ºC (47ºF); in July and August the average maximum temperature is 26ºC (78ºF).

PEOPLE

In July 2006, Monaco's population was estimated at 32,543, with an estimated average growth rate for 2007 of 0.386%.

French is the official language; English, Italian, and Monegasque (a blend of French and Italian) also are spoken. The literacy rate is 99%. Roman Catholicism is the official religion, with freedom of other religions guaranteed by the constitution.

HISTORY

Founded in 1215 as a colony of Genoa, Monaco has been ruled by the House of Grimaldi since 1297, except when under French control from 1789 to 1814. Designated as a protectorate of Sardinia from 1815 until 1860 by the Treaty of Vienna, Monaco's sovereignty was recognized by the Franco-Monegasque Treaty of 1861. The Prince of Monaco was an absolute ruler until a constitution was promulgated in 1911.

In July 1918, a treaty was signed providing for limited French protection over Monaco. The treaty, formally noted in the Treaty of Versailles, established that Monegasque policy would be aligned with French political, military, and economic interests.

A new constitution, proclaimed in 1962, abolished capital punishment, provided for female suffrage, and established a Supreme Court to guarantee fundamental liberties.

In 1993, Monaco became an official member of the United Nations with full voting rights. It joined the Council of Europe in 2004.

Three months after the death of his father, Prince Rainier III, on April 6, Prince Albert II formally acceded to the throne on July 12, 2005.

GOVERNMENT AND POLITICAL CONDITIONS

Monaco has been governed as a constitutional monarchy since 1911, with the Prince as chief of state. The executive branch consists of a Minister of State (head of government), who presides over a five-member Council of Government (cabinet). The Minister of State is responsible for foreign relations. As the Prince's representative, the Minister of State also directs the executive services, commands the police, and presides (with voting powers) over the Council of Government. The five members of the Council are respectively responsible for internal affairs, external affairs, the environment, finance and economy, and social affairs and health.

Under the 1962 constitution, the Prince shares his power with the unicameral National Council. Sixteen of the 24 members of this legislative body are elected by list majority system, and 8 by proportional representation to serve 5-year terms. The elections were last held on February 9, 2003, and will be held next in February 2008. If the Prince dissolves the National Council, new elections must be held within 3 months. Usually meeting twice annually, the Council votes on the budget and endorses laws proposed by the Prince.

Ordinances passed by the National Council are debated in the Council of Government, as are the ministerial decrees signed by the Minister of State. Once approved, the ordinances must be submitted to the Prince within 80 days for his signature, which makes them legally enforceable. If he does not express opposition within 10 days of submission, they become valid. Judicial power is invested in the Prince, who delegates judicial procedures to the various courts, which dispense justice in his name. The independence of the judges is guaranteed by the constitution. The Supreme Court is composed of five chief members and two assistant judges named by the Prince on the basis of nominations by the National Council and other government bodies. The Supreme Court is the highest court for judicial appeals and also interprets the constitution when necessary. Monaco's legal system, closely related to that of France, is patterned after the Napoleonic Code.

The principality's local affairs (the administration of the four quarters of Monaco-Ville, La Condamine, Monte Carlo, and Fontvieille) are directed by the Communal Council, which consists of 15 elected members and is presided over by the Mayor.

Principal Government Officials

Last Updated: 11/12/08

Chief of State: **ALBERT II, Prince**
Min. of State: **Jean-Paul PROUST**
Min. of Economy & Finance: **Franck BIANCHERI**
Min. of Environmental Affairs & Town Planning: **Gilles TONELLI**
Min. of External Relations: **Rainier IMPERTI**
Min. of Social Affairs & Health: **Denis RAVERA**
Ambassador to the US: **Gilles NOGHES**
Permanent Representative to the UN, New York: **Gilles NOGHES**

ECONOMY

Monaco, located on the Mediterranean coast, has an economy primarily geared toward finance, commerce, and tourism. Low taxes have drawn many foreign companies to Monaco; the companies' production accounts for around 50% of the 593 million annual government income (2002). The enterprises pay a 33.33% tax only if more than 25% of their revenue is generated abroad. Ever since

Monaco's famed casino opened in 1856, the tourism industry has been booming. It currently accounts for close to 25% of the annual revenue.

Customs, postal services, telecommunications, and banking in Monaco are governed by an economic and customs union with France. The official currency is the euro.

Though official economic statistics are not published, 2006 estimates placed the gross domestic product at $976.3 million and the per capita income at $30,000. Monaco does not publish the figures for unemployment, but in 2005 the rate was estimated to be at 0%.

Monaco is noted for its activity in the field of marine sciences. Its Oceanographic Museum, formerly directed by Jacques Cousteau, is one of the most renowned institutions of its kind in the world. Monaco imports and exports products and services from all over the world. There is no commercial agriculture in Monaco.

FOREIGN RELATIONS

Monaco actively participates in the United Nations, which it joined in 1993. Monaco joined the Council of Europe on October 4, 2004. Monaco also is a member of many international and intergovernmental organizations, including Interpol, the UN Educational, Scientific, and Cultural Organization (UNESCO), and the World Health Organization (WHO). The International Hydrographic Bureau (IHB) is headquartered in Monaco.

The Principality of Monaco is a sovereign and independent state, linked closely to France by the Treaty of July 1918, which was formally noted in Article 436 of the Treaty of Versailles of 1919.

The foreign policy of Monaco is one illustration of this accord: France has agreed to defend the independence and sovereignty of Monaco, while the Monegasque Government has agreed to exercise its sovereign rights in conformity with French interests. Since then, the relations between the sovereign states of France and Monaco have been further defined in the Treaty of 1945 and the Agreement of 1963. In 2002, Monaco renegotiated its 1918 treaty with France. In 2005, it was ratified by both parties and entered into force. The terms of the treaty:

- Upgrade France's representation in Monaco from Consulate General to that of an embassy;
- Permit, for the first time, other countries to accredit ambassadors to Monaco; and
- Formally recognize the succession scheme set out in the 1962 Constitution, which extends eligibility to the Prince's daughters and other family members.

Although not a member of the European Union (EU), Monaco is closely associated with the economic apparatus of the EU through its customs union with France and its reliance upon the euro as its official currency.

Monaco has 10 diplomatic missions in Western Europe and permanent representation at the United Nations and the Council of Europe. It maintains honorary consulates in 106

cities in 45 countries. Seventy-six countries have consulates general, consulates, or honorary consulates in or accredited to Monaco.

U.S.-MONACO RELATIONS

The United States and Monaco enjoy excellent relations, which both countries seek to maintain and strengthen. From 1956 until her death in 1982, the American-born Grace Kelly was married to Prince Rainier III, Prince Albert's father. The United States does not yet have a diplomatic mission located in Monaco.

In December 2006, the United States and Monaco upgraded from consular to full diplomatic relations. Shortly after, Ambassador Craig Stapleton (France) was accredited to Monaco, and Ambassador Gilles Noghes became the first Monegasque ambassador to the United States.

TRAVEL

Consular Information Sheet—France

December 22, 2008

Country Description: France is a developed and stable democracy with a modern economy. Monaco is a developed constitutional monarchy. Tourist facilities are widely available.

Entry Requirements: France is party to the Schengen agreement. As such, U.S. citizens may enter France for up to 90 days for tourist or business purposes without a visa. A passport is required and should be valid for at least three months beyond the period of stay. Anyone intending to stay more than 90 days must obtain the appropriate visa issued by one of the French Consulates in the U.S., prior to departure for France. This also applies to anyone considering marriage in France.

A passport is required to enter Monaco. A visa is not required for tourist/business stays up to 90 days in Monaco.

For further information concerning entry requirements for France, travelers may contact the Embassy of France at 4101 Reservoir Road NW, Washington, DC 20007, tel. (202) 944-6000, email: info@ambafrance-us.org, or the French Consulates General in Atlanta, Boston, Chicago, Houston, Los Angeles, Miami, New Orleans, New York, or San Francisco. For further information on entry requirements to Monaco, travelers may contact the Embassy of the Principality of Monaco. 2314 Wyoming Avenue, NW Washington, DC 20008, Tel: 202-234-1530, email: embassy@monaco-usa.org, or the Consulate General of Monaco, 565 Fifth Avenue –23rd floor, New York, NY 10017, tel.: 212-286-0500, email: info@monaco-consulate.com. For more information, visit the Embassy of France web site at www.consulfrance-washington.org or the Embassy of the Principality of Monaco web site at http://www.monaco-usa.org for the most current visa information.

Safety and Security: The Government of France maintains a threat rating system, known locally as "Vigipirate," similar to the U.S. Department of Homeland Security Advisory System. Under this plan, in times of heightened security concerns, the government augments police with armed forces and increases visibility at airports, train and metro stations, and other high-profile locations such as schools, major tourist attractions, and government installations. Over the last few years, there have been numerous arrests of suspected Islamic militants involved in various terrorist plots. As with other countries in the Schengen area, France maintains open borders with its European neighbors, allowing the possibility of terrorist operatives entering/exiting the country with anonymity.

Political assassinations and bombings have occurred in France. The National Front for the Liberation of Corsica (FLNC), as part of its decades-long bombing campaign on the island of Corsica, continues to conduct limited operations in the south of France and on Corsica. In the 1990s there was a wave of bombings and attacks in Paris carried out by Algerian terrorists. Today, numerous radical Islamic groups claim sympathizers within France's large immigrant community, as evidenced by arrests over the last few years. Although Americans have not been specifically targeted in terrorist attacks in France within the past few

years, travelers should maintain vigilance. Immediately report unattended packages observed in public places or any other suspicious activities. French law enforcement authorities are proactive and will respond immediately. If there is a security incident or suspicious package, do not linger in the area to observe.

Although violent civil disorder is rare in France, in the past, student demonstrations, labor protests, and other types of demonstrations have developed into violent confrontations between demonstrators and police. This was the case in March/April 2006, when a series of large demonstrations took place in central Paris. Several weeks of unrest occurred in the suburbs of Paris, as well as in other French cities and towns, in November 2005. Neither of these periods of disorder exhibited any anti-U.S. sentiment, but it is important to remember that even a passerby can be harmed should demonstrations devolve into violence. Americans are advised to avoid street demonstrations, particularly if riot police are on the scene.

For the latest security information, Americans traveling abroad should regularly monitor the Department of State, Bureau of Consular Affair's Internet site at http://travel.state.gov, where the current Travel Warnings and Travel Alerts, including the Worldwide Caution Travel Alert, can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S., or, for callers outside the U.S. and Canada, a regular toll line at 1-202-501-4444.

Crime: While both France and Monaco have relatively low rates of violent crime, a limited number of neighborhoods in the larger French cities merit extra caution. Additionally, although the overall crime rate has fallen slightly in recent years, the violent crime rate has increased. Thieves commonly target vehicles with non-local license plates, and work in or near tourist attractions such as museums, monuments, restaurants, hotels, beaches, trains, train stations, airports, and subways. Americans in France and Monaco should be particularly alert to pickpockets in train stations and subways. Travelers should keep photocopies of travel documents and credit cards separate from the originals, along with key telephone numbers to contact banks for credit card replacement.

Although thieves may operate anywhere, the U.S. Embassy in Paris receives frequent reports of theft from several areas in particular.

Paris: The Paris Police Prefecture published a pamphlet entitled "Paris in Complete Safety," which provides practical advice and useful telephone numbers for visitors and can be accessed at http://www.prefecture-police-paris.interieur.gouv.fr. Thieves operate on the rail link (RER) from Charles de Gaulle Airport to downtown Paris, where they prey on jet-lagged, luggage-burdened tourists. In one common ruse, a thief distracts a tourist with a question about directions while an accomplice steals a momentarily unguarded backpack, briefcase, or purse. Thieves also time their thefts to coincide with train stops so they may quickly exit the car just before the automatic doors close. Travelers should consider taking an airport shuttle bus or taxi from the airport into the city.

Reports of stolen purses, briefcases, and carry-on bags at Charles de Gaulle Airport are not uncommon. Travelers should monitor their bags at all times and never leave them unattended. As thieves commonly target laptop bags, travelers should avoid carrying passports and other valuables in computer bags. Another common method involves picking up a traveler's shoulder bag that has been placed on the floor while the traveler is busy at the ticket counter. Also be aware that unattended bags are subject to destruction by airport security.

There are reports of robberies in which thieves on motorcycles reach into a moving car by opening the car door or accessing an open window or even breaking the window to steal purses and other bags visible inside. The same technique is used against pedestrians walking with purses/bags/cameras slung over their street-side shoulder. Those traveling by car should remember to keep the windows up and the doors locked and items that may be attractive to thieves out of sight. Pedestrians are encouraged to remain aware of their surroundings at all times, and to keep bags slung across the body, with the bag hanging away from the street.

Many thefts occur on the Number One Subway Line, which runs through the center of Paris by many major tourist attractions (including the Grand Arch at La Défense, the Arc de Triomphe, the Champs Elysées, Place de la Concorde, the Louvre, and the Bastille). Pickpockets are especially active on this metro line during the summer months and use a number of techniques. The most common, and unfortunately the most successful, is the simple "bump and snatch," where an individual bumps into the tourist while at the same time reaching into the pockets/purse/bag. Visitors should be particularly careful when metro doors are closing, as this is a favored moment for the less-sophisticated pickpockets to simply grab valuables and jump through the closing doors, leaving the victim helplessly watching as the thief flees. Visitors are encouraged NOT to confront thieves aggressively; they often operate in groups and may become violent if cornered. Simply drawing attention to an attempted theft will most likely stop the operation, and result in a tactical withdrawal by the thief.

Gare du Nord train station, where the express trains from the airport arrive in Paris, is also a high-risk area for pocket-picking and theft. Travelers should also beware of thefts that occur on both overnight and day trains, especially on trains originating in Spain, Italy, and Belgium. These involve the theft of valuables while passengers are sleeping, or when the bags are left unattended.

In hotels, thieves target lobbies and breakfast rooms, and take advantage of a minute of inattention to snatch

jackets, purses, and backpacks. While many hotels do have safety latches that allow guests to secure their rooms from inside, this feature is not as universal as it is in the United States. If no chain or latch is present, a chair placed up against the door and wedged under the handle is usually an effective obstacle to surreptitious entry during the night. There are, however, reports of thieves breaking into hotel rooms on lower floors through open windows while the occupants are sleeping. To guard against this, hotel room windows should be kept locked at all times. Whenever possible, valuables should be kept in the hotel safe.

Many Americans report thefts occurring in restaurants and nightclubs/bars, where purses are stolen from the back of a chair or from under the table. Again, keep valuables on your person and do not leave them unattended or out of sight. Thefts also occur at the major department stores such as Galeries Lafayette and Printemps where tourists often place wallets, passports, and credit cards on cashier counters during transactions.

Automated Teller Machines (ATMs) are very common in France and provide ready access to cash, allowing travelers to carry as much money as they need for each day. The rates are competitive with local exchange bureaus, and an ATM transaction is easier than cashing a traveler's check. However, crime involving ATMs is increasing. Travelers should not use ATMs in isolated, unlit areas or where loiterers are present. Travelers should be especially aware of persons standing close enough to see the Personal Identification Number (PIN) being entered into the machine. Thieves often conduct successful scams by simply observing the PIN as it is entered and then stealing the card from the user in some other location. If the card becomes stuck, travelers should immediately report it to the bank where the machine is located.

Large criminal operations in Paris involving the use of ATMs that "eat" the user's ATM card have been reported. This most often happens during a weekend or at night when the bank is closed. The frustrated traveler often walks away after unsuccessfully trying to retrieve the card, with plans to return the first day the bank is open. In such cases, a criminal gang has modified the machine using an add-on device equipped with a microchip that records the user's PIN when it is typed in, and also prevents the card from being ejected. The criminal retrieves the card from the device once the visitor departs, downloads the recorded PIN and then goes to other ATMs and withdraws as much cash as possible. ATM users are strongly encouraged to carry a 24-hour emergency number for their ATM card and bank account that will enable the immediate prevention of withdrawals from the account if difficulties occur.

Pigalle is the "adult entertainment district" of Paris. Many entertainment establishments in this area engage in aggressive marketing and charge well beyond the normal rate for drinks. Reports of threats of violence to coerce patrons into paying exorbitant beverage tabs are not uncommon. There have also been several violent confrontations between rival gangs in the district, including one in August 2007 one block from the famous Moulin Rouge cabaret. Visitors are encouraged to avoid this area unless touring with a well-organized and reputable tour company.

Normandy: There has been an increase in break-ins and thefts from vehicles in the parking lots at the Normandy beaches and American cemeteries common. Valuables should not be left unattended in a car, and locking valuables in the trunk should not be considered a safeguard. Thieves often pry open car trunks to steal bags inside.

Southern France: Thefts from cars with unlocked doors or open windows stopped at red lights or caught in slow traffic are very common, particularly along the Riviera of the Nice-Antibes-Cannes area, and in Marseille. Car doors should be kept locked and windows raised at all times to prevent incidents of "snatch-and-grab" thefts. In this type of scenario, the thief is usually a passenger on a motorcycle. Break-ins of parked cars are also fairly common. Valuables should not be left in the car, not even in the trunk, when the vehicle is unattended.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, to contact family members or friends, and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed. Under French law, compensation is available to victims of crime committed on French soil under certain circumstances.

The local equivalents to the "911" emergency line in France are as follows: 17 (police emergency), 18 (fire department) and 15 (emergency medical/paramedic team/ambulance). In Monaco, the numbers are 17 (police emergency), 18 (fire department) and 9375-2525 (medical/paramedic team/ambulance).

Medical Facilities and Health Information: Medical care comparable to that found in the United States is widely available. In France, the phone number for emergency medical services is 15. In Monaco, the phone number for emergency medical services is 9375-2525.

The U.S. State Department is unaware of any HIV/AIDS related entry restrictions for visitors to or foreign residents of France.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Dis-

ease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's web site at http://wwwn.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who. int/ith/en.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning France and Monaco is provided for general reference only, and it may not be totally accurate in a particular location or circumstance. Roads in France are generally comparable to those in the United States, but traffic engineering and driving habits pose special dangers. Usually, lane markings and sign placements are not as clear as in the United States. Drivers should be prepared to make last-minute maneuvers, as most French drivers do. The French typically drive more aggressively and faster than Americans, and tend to exceed posted speed limits. Right-of-way rules in France may differ from those in the United States. Drivers entering intersections from the right have priority over those on the left (unless specifically indicated otherwise), even when entering relatively large boulevards from small side streets. Many intersections in France are being replaced by traffic circles, where the right-of-way belongs to drivers in the circle.

On major highways, service stations are situated at least every 25 miles. Service stations are not as plentiful on secondary roads in France as they are in the United States. Paris, the capital and largest city in France, has an extensive and efficient public transportation system. The interconnecting system of buses, subways, and commuter rails serves more than 4 million people a day with a safety record comparable to or better than the systems of major American cities. Similar transportation systems are found in all major French cities. Between cities, France is served by an equally extensive rail service, which is reliable. High-speed rail links connect the major cities in France. Many cities are also served by frequent air service.

Visit the web site of the French and Monegasque National Tourist Office at http://franceguide.com. The website contains specific information concerning French and Monegasque driver's permits, vehicle inspection, road tax, and mandatory insurance.

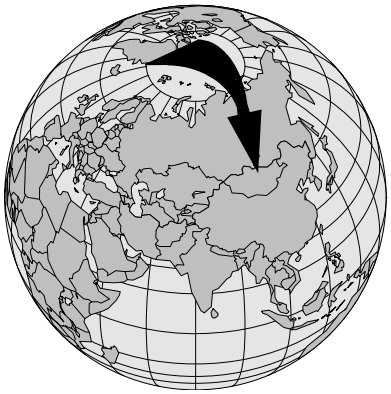
Aviation Safety Oversight: The U.S. Federal Aviation Administration (FAA) has assessed the Government of France's Civil Aviation Authority as being in compliance with International Civil Aviation Organization (ICAO) aviation safety standards for oversight of France's air carrier operations. For more information, travelers may visit the FAA's web site at http://www.faa.gov.

Special Circumstances: French and Monegasque customs authorities enforce strict regulations concerning temporary importation into or export from France of items such as firearms, antiquities, medications, business equipment, sales samples, and other items. It is advisable to contact the Embassy of France in Washington, DC, one of France's consulates in the United States, or the Consulate General of Monaco in New York for specific information regarding customs requirements.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating French or Monegasque laws, even unknowingly, may be expelled, arrested, or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in France or Monaco are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy and Consulate Locations: Americans living or traveling in France or Monaco are encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration web site, and to obtain updated information on travel and security within France and Monaco. Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate. By registering, American citizens make it easier for the Embassy or Consulate to contact them in cases of emergency. The Consular Section of the U.S. Embassy in Paris is located at 4 avenue Gabriel, 75008 Paris (Place de La Concorde, Metro Stop Concorde), tel. 011-33-1-43-12-22-22 or (in France) 01-43-12-22-22; fax: 011-33-1-42-96-28-39 for Passport Services, or fax 011-33-1-42-61-61-40 for Special Consular Services (emergencies). Further information can be obtained at the U.S. Embassy's web site at http://france.usembassy.gov.



The Consulate General in Marseille is located at Place Varian Fry, 13006 Marseille, tel. 011-33-4-91-54-92-00, or (in France) 04-91-54-92-00; fax 011-33-4-91-55-55-56-95 or 011-33-4-91-55-09-47. Web site: http://france.usembassy.gov/marseille/default.htm. The Consulate General in Strasbourg is located at 15 Avenue d'Alsace, 67082 Strasbourg, tel. 011-33-3-88-35-31-04 or (in France) 03-88-35-31-04; fax 011-33-3-88-24-06-

95. The Consulate General in Strasbourg does not produce passports on the premises. American citizens in this area whose passports are lost or stolen and have urgent travel needs should contact the U.S. Embassy in Paris. Web site: www.amb-usa.fr/strasbourg.

The Consular Agency in Nice is located at 7, Avenue Gustave V, 3rd floor, 06000 Nice, tel. 011-33-4-93-88-89-55 or (in France) 04-93-88-89-55; fax 011-33-4-93-87-07-38. Web site: http://france.usembassy.gov. The U.S. Government also has consular representation in Bordeaux, Lille, Lyon, Rennes, and Toulouse that provide some services to Americans, by appointment only. The post in Bordeaux is located at 10 place de la Bourse, 33076 Bordeaux (entry on rue Fernand Philippart); tel. 011-33-5-56-48-63-85 or 05-56-48-63-85 in France; fax: 011-33-5-56-51-61-97. Web site: http://france.usembassy.gov/bordeaux/default.htm.

The post in Lille is located at 107, rue Royale, 59000 Lille; tel. 011-33-3-28-04-25-00 or 03-28-04-25-00 in France; fax: 011-33-3-20-74-88-23. Website: http://france.usembassy.gov/lille/default.htm. The post in Lyon is located at 1, quai Jules Courmont, 69002 Lyon; tel. 011-33-4-78-38- 33-03 or 04-78-38- 33-03 in France; fax: 011-33-4-72-41-71-81. Website: http://france. usembassy.gov. The post in Rennes is located at 30, quai Duguay Trouin, 35000 Rennes; tel. 011-33-2-23-44-09-60 or 02-23-44-09-60 in France; fax: 011-33-2-99-35-00-92. Website: http://france.usembassy.gov/rennes/default.htm.

The post in Toulouse is located at 25, Allée Jean Jaures, 31000 Toulouse; tel. 011-33-5-34-41-36-50 or 05-34-41-36-50 in France; fax: 011-33-5-34-41-16-19. Website: http://france.usembassy.gov/toulouse/default.htm.

MONGOLIA

Compiled from the August 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Mongolia

PROFILE

Geography

Area: 1,566,500 sq. km. (604,103 sq. mi.); slightly larger than Alaska (land boundaries 8,114 km.).
Terrain: Almost 90% of land area is pasture or desert, of varying usefulness; 1% arable; 9% forested.
Climate: Continental, with little precipitation and sharp seasonal fluctuations.

People

Nationality: Noun and adjective—Mongolian(s).
Population: (2008 est.) 2.9 million.
Annual growth rate: (2007) 1.5%.
Health: (2007) Infant mortality rate—41/1,000. Life expectancy—67 yrs.
Ethnic groups: (2004) 85% Mongol (predominantly Khalkha), 7% Turkic (largest group, Kazakh) 4.6% Tungusic, and 3.4% others, including Chinese and Russian.
Languages: Mongolian, Kazakh, Russian, and English.
Religions: Tibetan Buddhist Lamaism 90%, Muslim 6% (primarily in the southwest), and Shamanism.
Education: Years compulsory—9 (provided free by the government). Literacy—more than 90%.

Government

Type: Multiparty parliamentary form of government.

Independence: gained in 1921; in 1990, democratic reform begun and shift from dependence on the former Soviet Union declared.

Constitution: 1960 and February 12, 1992.

Government branches: Executive—power is divided between a president (elected by a popular election in May 2005) and prime minister (current cabinet nominated by the prime minister was approved in December 2007 by the State Great Hural elected in June 2004). Legislative—State Great Hural (76 deputies). Judicial—Constitutional Court is empowered to supervise the implementation of the constitution, makes judgment on the violation of its provisions, and solves disputes. Legal code based on Continental and Russian law. Legal education at Mongolian State University and private universities. Mongolia accepts International Court of Justice jurisdiction.

Political parties: 18 registered political parties.

Suffrage: Universal at 18.

Political subdivisions: 21 aimags (provinces) and one city (Ulaanbaatar).

Economy

GDP in PPP: (2006 est.) $5.8 billion.
GDP growth: (2007) 9.9%.
Per capita GDP in PPP: (2006 est.) $2,402.
Natural resources: Coal, copper, molybdenum, iron, phosphates, tin, nickel, zinc, wolfram, fluorspar, gold, uranium, and petroleum.
Agriculture: (20.6% of 2007 GDP, livelihood for about 40% of population) Products—livestock and byproducts, hay fodder, vegetables.
Industry: (36% of 2007 GDP, includes mining 27.4%, manufacturing 6.1%, and utilities (electricity, gas, and water) 2.5%) Types—Minerals (primarily copper and gold), animal-derived products, building materials, food/beverage.
Trade: Total turnover of foreign trade for 2007 was $4.119 billion. Exports—$1.949 billion: minerals, livestock, animal products, and textiles. Markets—Asian countries (approx. 75%), European countries (approx. 10%), and countries of American continent (approx. 15%). Imports—$2.17 billion: machinery and equipment, fuels, food products, industrial consumer goods, chemicals, building equipment, vehicles, textiles. Suppliers—91 countries account for 93.2% of total imports, of which European countries (47%) and Asian countries (49%).

Aid received: From 1990-2006, official development assistance to Mongolia from bilateral and multilateral donors totaled over $3.457 billion. Received $175.58 million in official development assistance in 2007.

Fiscal year: Calendar year.

PEOPLE

Life in sparsely populated Mongolia has recently become more urbanized. Nearly half of the people live in urban centers, including the capital, Ulaanbaatar. Semi-nomadic life still predominates in the countryside, but settled agricultural communities are becoming more common.

Mongolia's birth rate is estimated at 21.2 births/1000 people (2007 est.). About two-thirds of the total population is under age 30, 28.5% of whom are under 14. Ethnic Mongols account for about 85% of Mongolia's population and consist of Khalkha and other groups, all distinguished primarily by dialects of the Mongol language. Mongol is an Altaic language—from the Altaic Mountains of Central Asia, a language family comprising the Turkic, Tungusic, and Mongolic subfamilies—and is related to Turkic (Uzbek, Turkish, and Kazakh), Korean, and, possibly, Japanese. Among ethnic Mongols, the Khalkha comprise 90% and the remaining 10% include Durbet Mongols in the north and Dariganga Mongols in the east. Turkic speakers (Kazakhs, Turvins, and Khotans) constitute 7% of Mongolia's population, and the rest are Tungusic-speakers, Chinese, and Russians. Most Russians left the country following the withdrawal of economic aid and collapse of the Soviet Union in 1991.

Traditionally, Tibetan Buddhist Lamaism was the predominant religion. However, it was suppressed under the communist regime until 1990, with only one showcase monastery allowed to remain. Since 1990, as liberalization began, Buddhism has enjoyed a resurgence. About 4 million ethnic Mongols live outside Mongolia; about 3.4 million live in China, mainly in the Inner Mongolia Autonomous Region, and some 500,000 live in Russia, primarily in Buryatia and Kalmykia.

HISTORY

In 1206 AD, a single Mongolian state was formed based on nomadic tribal groupings under the leadership of Chinggis ("Genghis") Khan. He and his immediate successors conquered nearly all of Asia and European Russia and sent armies as far as central Europe and Southeast Asia. Chinggis Khan's grandson Kublai Khan, who conquered China and established the Yuan dynasty (1279-1368 AD), gained fame in Europe through the writings of Marco Polo. Although Mongol-led confederations sometimes exercised wide political power over their conquered territories, their strength declined rapidly after the Mongol dynasty in China was overthrown in 1368. The Manchus, a tribal group which conquered China in 1644 and formed the Qing dynasty, were able to bring Mongolia under Manchu control in 1691 as Outer Mongolia when the Khalkha Mongol nobles swore an oath of allegiance to the Manchu emperor. The Mongol rulers of Outer Mongolia enjoyed considerable autonomy under the Manchus, and all Chinese claims to Outer Mongolia following the establishment of the republic have rested on this oath. In 1727, Russia and Manchu China concluded the Treaty of Khiakta, delimiting the border between China and Mongolia that exists in large part today.

Outer Mongolia was a Chinese province (1691-1911), an autonomous state under Russian protection (1912-19), and again a Chinese province (1919-21). As Manchu authority in China waned, and as Russia and Japan confronted each other, Russia gave arms and diplomatic support to nationalists among the Mongol religious leaders and nobles. The Mongols accepted Russian aid and proclaimed their independence of Chinese rule in 1911, shortly after a successful Chinese revolt against the Manchus. By agreements signed in 1913 and 1915, the Russian Government forced the new Chinese Republican Government to accept Mongolian autonomy under continued Chinese control, presumably to discourage other foreign powers from approaching a newly independent Mongolian state that might seek support from as many foreign sources as possible. The Russian revolution and civil war afforded Chinese warlords an opportunity to re-establish their rule in Outer Mongolia, and Chinese troops were dispatched there in 1919. Following Soviet military victories over White Russian forces in the early 1920s and the occupation of the Mongolian capital Urga in July 1921, Moscow again became the major outside influence on Mongolia. The Mongolian People's Republic was proclaimed on November 25, 1924.

Between 1925 and 1928, power under the communist regime was consolidated by the Mongolian Peoples Revolutionary Party (MPRP). The MPRP left gradually undermined rightist elements, seizing control of the party and the government. Several factors characterized the country during this period: The society was basically nomadic and illiterate; there was no industrial proletariat; the aristocracy and the religious establishment shared the country's wealth; there was widespread popular obedience to traditional authorities; the party lacked grassroots support; and the government had little organization or experience. In an effort at swift socioeconomic reform, the leftist government applied extreme measures that attacked the two most dominant institutions in the country—the aristocracy and the religious establishment. Between 1932 and 1945, their excess zeal, intolerance, and inexperience led to anti-communist uprisings. In the late 1930s, purges directed at the religious institution resulted in the desecration of hundreds of Buddhist institutions and imprisonment of more than 10,000 people.

During World War II, because of a growing Japanese threat over the Mongolian-Manchurian border, the Soviet Union reversed the course of Mongolian socialism in favor of a new policy of economic gradualism and

buildup of the national defense. The Soviet-Mongolian army defeated Japanese forces that had invaded eastern Mongolia in the summer of 1939, and a truce was signed setting up a commission to define the Mongolian-Manchurian border in the autumn of that year.

Following the war, the Soviet Union reasserted its influence in Mongolia. Secure in its relations with Moscow, the Mongolian Government shifted to postwar development, focusing on civilian enterprise. International ties were expanded, and Mongolia established relations with North Korea and the new communist governments in Eastern Europe. It also increased its participation in communist-sponsored conferences and international organizations. Mongolia became a member of the United Nations in 1961. In the early 1960s, Mongolia attempted to maintain a neutral position amidst increasingly contentious Sino-Soviet polemics; this orientation changed in the middle of the decade. Mongolia and the Soviet Union signed an agreement in 1966 that introduced large-scale Soviet ground forces as part of Moscow's general buildup along the Sino-Soviet frontier.

During the period of Sino-Soviet tensions, relations between Mongolia and China deteriorated. In 1983, Mongolia systematically began expelling some of the 7,000 ethnic Chinese in Mongolia to China. Many of them had lived in Mongolia since the 1950s, when they were sent there to assist in construction projects.

Chronology of Mongolian History—921-Present

March 13, 1921: Provisional People's Government declares independence of Mongolia.

May 31, 1924: U.S.S.R. signs agreement with Peking government, referring to Outer Mongolia as an "integral part of the Republic of China," whose "sovereignty" therein the Soviet Union promises to respect.

May-September 16, 1939: Large scale fighting takes place between Japanese and Soviet-Mongolian forces along Khalkhyn Gol on Mongolia-Manchuria border, ending in defeat of the Japanese expeditionary force. Truce negotiated between U.S.S.R. and Japan.

October 6, 1949: Newly established People's Republic of China accepts recognition accorded Mongolia and agrees to establish diplomatic relations.

October 1961: Mongolia becomes a member of the United Nations.

January 27, 1987: Diplomatic relations established with the United States.

December 1989: First popular reform demonstrations. Mongolian Democratic Association organized.

January 1990: Large-scale demonstrations demanding democracy held in sub-zero weather.

March 2, 1990: Soviets and Mongolians announce that all Soviet troops will be withdrawn from Mongolia by 1992.

May 1990: Constitution amended to provide for multi-party system and new elections.

July 29, 1990: First democratic elections held.

September 3, 1990: First democratically elected People's Great Hural takes office.

February 12, 1992: New constitution goes into effect.

April 8, 1992: New election law passed.

June 28, 1992: Election for the first unicameral legislature (State Great Hural).

June 6, 1993: First direct presidential election.

June 30, 1996: Election resulted in peaceful transition of power from former communist party to coalition of democratic parties. From 1998-2000, four prime ministers and a series of cabinet changes. In early 2000, Democratic Coalition dissolved.

July 2, 2000: Election resulted in victory for the former communist Mongolian Peoples Revolutionary Party (MPRP); first-past-the-post electoral system enabled MPRP, with 52% of the popular vote, to win 95% of the parliamentary seats; formation of new government by Prime Minister N. Enkhbayar.

June 27, 2004: Motherland-Democracy Coalition formed in early 2004 to contest the parliamentary election. Election resulted in roughly 50/50 split of parliamentary seats between former communist party and democratic opposition and formation of new government by Prime Minister T. Elbegdorj (Democratic Party).

January 2006: MPRP ministers resigned from the government, and the government dissolved. A new coalition government was formed, led by the MPRP with the participation of four smaller parties.

October 2007: MPRP ousted its leader, Prime Minister Enkhbold, who resigned as Prime Minister. The new leader of the MPRP, Sanjaa Bayar, became Prime Minister. Prime Minister Bayar formed a new cabinet.

December 2007: Bayar's cabinet was approved.

July 1, 2008: Two days after parliamentary elections, and one day after the ruling MPRP claims a landslide victory, a sizeable protest outside the MPRP headquarters turned violent. The MPRP headquarters was burned beyond repair and clashes between civilians and security forces left at least five people dead, 13 missing, hundreds injured and hundreds in police detention. President Enkhbayar declared a four-day state of emergency, imposing a curfew, a ban on public gatherings, and a broadcast-news blackout (apart from the state broadcaster).

July and August 2008: Newly elected members of parliament from the opposition Democratic Party refused to take the oath of office, demanding, among other things, that the nine-member General Election Commission resign for alleged electoral shortcomings.

GOVERNMENT AND POLITICAL CONDITIONS

Until 1990, the Mongolian Government was modeled on the Soviet system; only the communist party—the MPRP—officially was permitted to function. After some instability during the first two decades of communist rule in Mongolia, there was no significant popular unrest until December 1989. Collectivization of animal husbandry, introduction of agriculture, and the extension of fixed abodes were all carried out without perceptible popular opposition.

The birth of perestroika in the former Soviet Union and the democracy movement in Eastern Europe were mirrored in Mongolia. The dramatic shift toward reform started in early 1990 when the first organized opposition group, the Mongolian Democratic Union, appeared. In the face of extended street protests in subzero weather and popular demands for faster reform, the politburo of the MPRP resigned in March 1990. In May, the constitution was amended, deleting reference to the MPRP's role as the guiding force in the country, legalizing opposition parties, creating a standing legislative body, and establishing the office of president.

Mongolia's first multi-party elections for a People's Great Hural were held on July 29, 1990. The MPRP won 85% of the seats. The People's Great Hural first met on September 3 and elected a president (MPRP), vice president (SDP—Social Democrats), prime minister (MPRP), and 50 members to the Baga Hural (small Hural). The vice president also was chairman of the Baga Hural. In November 1991, the People's Great Hural began discussion on a new constitution, which entered into force February 12. In addition to establishing Mongolia as an independent, sovereign republic and guaranteeing a number of rights and freedoms, the new constitution restructured the legislative branch of government, creating a unicameral legislature, the State Great Hural

(SGH). The 1992 constitution provided that the president would be elected by popular vote rather than by the legislature as before. In June 1993, incumbent Punsalmaagiyn Ochirbat won the first popular presidential election running as the candidate of the democratic opposition.

As the supreme government organ, the SGH is empowered to enact and amend laws, determine domestic and foreign policy, ratify international agreements, and declare a state of emergency. The SGH meets semiannually for 3-4 month sessions. SGH members elect a chairman and vice chairman who serve 4-year terms. SGH members are popularly elected by district for 4-year terms.

The president is the head of state, commander in chief of the armed forces, and head of the National Security Council. He is popularly elected by a national majority for a 4-year term and limited to two terms. The constitution empowers the president to propose a prime minister, call for the government's dissolution in consultation with the SGH chairman, initiate legislation, veto all or parts of legislation (the SGH can override the veto with a two-thirds majority), and issue decrees, which become effective with the prime minister's signature. In the absence, incapacity, or resignation of the president, the SGH chairman exercises presidential power until inauguration of a newly elected president.

The government, headed by the prime minister, has a 4-year term. The prime minister is nominated by the president and confirmed by the SGH. Under constitutional changes made in 2001, the president is required to nominate the prime ministerial candidate proposed by a party or coalition with a majority of members of the SGH. The prime minister chooses a cabinet, subject to SGH approval. Dissolution of the government occurs upon the prime minister's resignation, simultaneous resignation of half the cabinet, or after an SGH vote for dissolution.

Local hurals are elected by the 21 aimags (provinces) plus the capital, Ulaanbaatar. On the next lower administrative level, they are elected by provincial subdivisions and urban subdistricts in Ulaanbaatar and all aimags.

Political Parties

- Mongolian People's Revolutionary Party
- Democratic Party
- Motherland–Mongolian Democratic New Socialist Party
- National New Party
- Civil Will Party
- Mongolian People's Party
- Mongolian Green Party
- Mongolian Traditional United Party
- Mongolian National Solidarity Party
- Mongolian Liberal Democratic Party
- Mongolian Republican Party
- Mongolian Women's National United Party
- Mongolian Liberal Party
- Mongolian Social Democratic Party
- Freedom Implementing Party
- The Civil Movement Party
- The Development Program Party
- Mongolian Democratic Development Party

Legal System

The 1992 constitution empowered a General Council of Courts (GCC) to select all judges and protect their rights. The Supreme Court is the highest judicial body. Justices are nominated by the GCC and confirmed by the SGH and president. The court is constitutionally empowered to examine all lower court decisions—excluding specialized court rulings—upon appeal and provide official interpretations on all laws except the constitution.

Specialized civil, criminal, and administrative courts exist at all levels and are not subject to Supreme Court supervision. Local authorities—district and city governors—ensure that these courts abide by presidential decrees and SGH decisions. At the apex of the judicial system is the Constitutional Court, which consists of nine members, including a chairman, appointed for 6-year terms, whose jurisdiction extends solely over the interpretation of the constitution.

Principal Government Officials

Last Updated: 11/12/08

Pres.: **Nambaryn ENKHBAYAR**
Speaker, State Great Hural: **Danzan LUNDEEJANTSAN**
Prime Min.: **Sanjaa BAYAR**
Dep. Prime Min.: **Miyegombo ENKHBOLD**
Min. of Construction & Urban Development: **Tserendash TSOLMON**
Min. of Defense: **Jamyandorj BATKHUYAG**
Min. of Education, Culture, & Science: **Nordov BOLORMAA**
Min. of Environment: **Gankhuyag SHIILEGDAMBA**
Min. of Finance: **Chultem ULAAN**
Min. of Food & Agriculture: **Tserendorj GANKHUYAG**
Min. of Foreign Affairs: **Sanjaasuren OYUN**
Min. of Fuel & Energy: **Chimed KHURELBAATAR**
Min. of Health: **Byambaa BASEREEDENE**
Min. of Industry & Trade: **Khalzkhuu NARANKHUU**
Min. of Justice & Home Affairs: **Tsend MUNHK-ORGIL**
Min. of Roads, Transportation, & Tourism: **Radnaabazar RASH**
Min. of Social Welfare & Labor: **Damdin DEMBEREL**
Chief, Cabinet Secretariat: **Nymaa ENKHBOLD**
Sec., National Security Council: **Manibadrakhyn GANBOLD**

Chief, Gen. Staff, Mongolian Armed Forces: **Tseveguren TOGOO, Lt. Gen.**
Governor, Bank of Mongolia: **Alag BATSUKH**
Ambassador to the US: **Khasbazaryn BEKHBAT**
Permanent Representative to the UN, New York: **Enkhtsetseg OCHIR**

Mongolia maintains an embassy in the United States at 2833 M Street, NW, Washington, DC, 20007; tel. (202) 333-7117, fax (202) 298-9227, website: www.mongolianembassy.us.

ECONOMY

Economic activity in Mongolia has traditionally been based on herding and agriculture. Mongolia has extensive mineral deposits; copper, coal, molybdenum, tin, tungsten, and gold account for a large part of industrial production. Soviet assistance, at its height one-third of GDP, disappeared almost overnight in 1990-91 at the time of the dismantlement of the U.S.S.R., leading to a very deep recession. Economic growth returned due to reform embracing free-market economics and extensive privatization of the formerly state-run economy. Severe winters and summer droughts in 2000-2001 and 2001-2002 resulted in massive livestock die-off and anemic GDP growth of 1.1% in 2000 and 1% in 2001. This was compounded by falling prices for Mongolia's primary-sector exports and widespread opposition to privatization. Growth improved to 4% in 2002, 5% in 2003, 10.6% in 2004, 6.2% in 2005, 7.5% in 2006, and 9.9% in 2007. Much of the growth was due to high copper prices and new gold production. Besides agriculture (20.6% of GDP), dominant industries in the composition of GDP are mining (27.4%), trade and service (24.8%) and transportation, storage, and communication (12.2%). Mongolia's economy continues to be heavily influenced by its neighbors. For example, Mongolia purchases 80% of its petroleum products from Russia. China is Mongolia's chief export partner and a main source of the "shadow," or "gray," economy. The gray—largely cash—economy is estimated to be at least one-third the size of the official economy, but actual size is difficult to quantify since the money does not pass through the hands of tax authorities or the banking sector. Remittances from Mongolians working abroad, both legally and illegally, constitute a sizeable portion. Money laundering is growing as an accompanying concern. Mongolia settled its large debt to Russia at the end of 2003 on favorable terms. Mongolia, which joined the World Trade Organization in 1997, is the only member of that organization to not be a participant in a regional trade organization. Mongolia seeks to expand its participation and integration into Asian regional economic and trade regimes.

Because of Mongolia's remoteness and natural beauty, the tourism sector has recently shown signs of rapid growth. With spiking international commodity prices, there has been a surge of international interest in investing in Mongolia's minerals sector despite the absence of a policy environment firmly conducive to private investment. How effectively Mongolia mobilizes private international investment around its comparative advantages (mineral wealth, small population, and proximity to China and its burgeoning markets) will ultimately determine its success in sustaining rapid economic growth. Parliament passed a windfall profits tax on copper and gold that took effect in mid-2006, and tax reforms enacted on January 1, 2007 helped government revenues jump 33% in 2007. Meanwhile, major amendments to the minerals law allowed the government to take an equity stake in major new mines. However, in late 2007 and early 2008, Mongolia's parliament proved unable to approve other key amendments to Mongolia's minerals law; observers called such amendments crucial for the development of Mongolia's extractive industries. This failure frustrated many foreign and domestic investors and others who hoped to see Mongolia's promising mining sector grow rapidly.

Environment

As a result of rapid urbanization and industrial growth policies under the communist regime, Mongolia's deteriorating environment has become a major concern. The burning of soft coal by individual home or "ger" (yurt in Russian) owners, power plants, and factories in Ulaanbaatar has resulted in severely polluted air. Deforestation, overgrazed pastures, and efforts to increase grain and hay production by plowing up more virgin land have increased soil erosion from wind and rain. With the rapid growth of newly privatized herds, overgrazing in selected areas also is a concern. Recent rapid and relatively unregulated growth in the mining sector for minerals (gold, coal, etc.) has become the focus of public debate. A great deal of public attention is being paid to non-transparency of the government process of awarding licenses, the equitable sharing of economic rents between foreign investors and the Government of Mongolia, and the potential impact on the environment. However, the real environmental concern is the sharp boom in the number of informal gold miners, who frequently illegally use mercury, which may lead to an epidemic of mercury poisoning.

FOREIGN RELATIONS

In the wake of the international socialist economic system's collapse and the disintegration of the former Soviet Union, Mongolians began to pursue an independent and nonaligned foreign policy. Mongolia is landlocked between Russia and China, and seeks cordial relations with both nations. At the same time, Mongolia has sought to advance its regional and global relations. Ties with Japan and South Korea are particularly strong. Japan is the largest bilateral aid donor to Mongolia, a position it has held since 1991. Mongolia has also made efforts to steadily boost ties with European countries.

As part of its aim to establish a more balanced nonaligned foreign policy, Mongolia has sought to take a more active role in the United Nations and other international organizations, and has pursued a more active role in Asian and northeast Asian affairs.

Mongolia became a full participant in the ASEAN Regional Forum (ARF) in July 1998 and a full member of the Pacific Economic Cooperation Council in April 2000. Mongolia is currently seeking to join the Asia-Pacific Economic Cooperation forum (APEC). Mongolia is an observer in the Shanghai Cooperation Organization, but has stated it does not intend to seek membership. Mongolia, which has diplomatic relations with both North and South Korea, has also sought to play a role in the Six-Party talks. In late 2007, Mongolia hosted a closed meeting between two Six-Party members, North Korea and Japan. Mongolia is also a founding member of the Asia-Pacific Democracy Partnership (APDP) and hosted the group's planning meeting in Ulaanbaatar on July 1, 2008.

Mongolian relations with China began to improve in the mid-1980s when consular agreements were reached and cross-border trade contacts expanded. In May 1990, a Mongolian head of state visited China for the first time in 28 years. The cornerstone of the Mongolian-Chinese relationship is a 1994 Treaty of Friendship and Cooperation, which codifies mutual respect for the independence and territorial integrity of both sides. China has objected strongly to visits since 1990 of the Dalai Lama; during the 2002 visit, China briefly disrupted railroad links for "technical" reasons. There are regular high-level visits and expanding trade ties. President Hu Jintao visited Mongolia in 2003 (his first international visit as China's President). President Bagabandi visited China in 2004, and President Enkhbayar visited in 2008.

After the disintegration of the former Soviet Union, Mongolia developed relations with the new independent states. Links with Russia and other republics were essential to contribute to stabilization of the Mongolian economy. In 1991, Mongolia and Russia concluded both a Joint Declaration of Cooperation and a bilateral trade agreement. This was followed by a 1993 Treaty of Friendship and Cooperation establishing a new basis of equality in the relationship. Mongolian President Bagabandi visited Moscow in 1999, and Russian President Vladimir Putin visited Mongolia in 2000 in order to sign the 25-point Ulaanbaatar Declaration, reaffirming Mongol-Russian friendship and cooperation on numerous economic and political issues. In December 2003, Mongolia finally settled the Soviet-era debt it owed to Russia with a negotiated payment of $250 million. In July 2006, Prime Minister Fradkov visited Mongolia with a large business delegation. The Mongolian and Russian Governments continue to jointly own the railroad and the large Erdenet copper mine. Prime Minister Bayar visited Moscow in April 2008, and the following month President Enkhbayar met in Moscow with President Medvedev.

U.S.-MONGOLIAN RELATIONS

The U.S. Government recognized Mongolia in January 1987 and established its first embassy in Ulaanbaatar in June 1988. It formally opened in September 1988. The first U.S. ambassador to Mongolia, Richard L. Williams, was not a resident there. Joseph E. Lake, the first resident ambassador, arrived in July 1990. Secretary of State James A. Baker, III visited Mongolia in August 1990, and again in July 1991. Mongolia accredited its first ambassador to the United States in March 1989. Secretary of State Madeline Albright visited Mongolia in May 1998, and Prime Minister Enkhbayar visited Washington in November 2001. Deputy Secretary of State Richard L. Armitage visited Mongolia in January 2004, and President Bagabandi came to Washington for a meeting with President Bush in July 2004. President Bush, Mrs. Bush, and Secretary of State Condoleezza Rice visited Mongolia in November 2005. Defense Secretary Rumsfeld visited in October 2005 and Speaker of the House of Representatives Dennis Hastert visited Mongolia in August 2005. Agriculture Secretary Johanns led a presidential delegation in July 2006 in conjunction with Mongolia's celebration of its 800th anniversary. President Enkhbayar visited the White House in October 2007 and the two Presidents signed the Millennium Challenge Compact for Mongolia.

The United States has sought to assist Mongolia's movement toward democracy and market-oriented reform and to expand relations with Mongolia primarily in the cultural and economic fields. In 1989 and 1990, a cultural accord, Peace Corps accord, consular convention, and Overseas Private Investment Corporation (OPIC) agreement were signed. A trade agreement was signed in January 1991 and a bilateral investment treaty in 1994. Mongolia was granted permanent normal trade relations (NTR) status and generalized system of preferences (GSP) eligibility in June 1999. In July 2004, the U.S. signed a Trade and Investment Framework Agreement with Mongolia to promote economic reform and more foreign investment. In July 2007, six members of the U.S. House of Representatives visited Mongolia to inaugurate an exchange program between lawmakers of the two countries. The return visit came in August 2007, with five members of the Mongolian parliament traveling to the U.S. In September 2007, the White House announced the proposed creation of an Asia-Pacific Democracy Partnership, in which Mongolia was invited to take part. The initiative is aimed at providing a venue in which free nations can work together to support democratic values, strengthen democratic institutions, and assist those who are working to build and sustain free societies.

The U.S. Agency for International Development (USAID) plays a lead role in providing bilateral development assistance to Mongolia. The program emphasizes one major theme: sustainable, private sector-led economic growth and more effective and accountable governance. Total USAID assistance to Mongolia from 1991 through 2008 was about $174.5 million, all in grant form. USAID Mongolia's FY 2007 budget of $6.625 million a year promotes: a) economic growth by focusing on activities that

support macroeconomic policy reform, energy sector restructuring, financial sector reform, and micro and small enterprise development; and b) governing justly and democratically by focusing on activities supporting judicial sector reform, electoral reform, parliamentary reform, and anti-corruption.

In most years since 1993, the United States Department of Agriculture has provided food aid to Mongolia under the Food for Progress and 416(b) programs. The monetized proceeds of the food aid ($4.2 million in 2006) are used to support programs bolstering entrepreneurship, herder livelihood diversification, and better veterinary services.

The United States has also supported defense reform and an increased capacity by Mongolia's armed forces to participate in international peacekeeping operations. Mongolia has contributed small numbers of troops to coalition operations in Iraq and Afghanistan since 2003, gaining experience that enabled it to deploy armed peacekeepers to both UN and NATO peacekeeping missions in 2005. With U.S. Department of Defense assistance and cooperation, Mongolia and the U.S. jointly hosted "Khan Quest 06," the Asian region's premier peace-keeping exercise, in the summer of 2006 and "Khan Quest 07" a year later.

The Peace Corps has approximately 100 volunteers in Mongolia. They are engaged primarily in English teaching and teacher training activities. At the request of the Government of Mongolia, the Peace Corps has developed programs in the areas of public health, small business development, and youth development. In 2005 and 2006 Mongolian Government officials, including President Enkhbayar and Prime Minister Elbegdorj, requested significant increases in the number of volunteers serving in country. The Peace Corps has responded with a commitment to make modest annual increases until 2010.

Mongolia was one of the first countries eligible for the new Millennium Challenge Account initiative that began in 2004, administered by the Millennium Challenge Corporation (MCC). MCC's program focuses on providing grant support to countries that perform above the median in their income peer group on key indicators in three broad policy categories: ruling justly, investing in people, and encouraging economic freedom. MCC-eligible countries propose projects that will significantly reduce poverty in their countries through stimulating economic growth.

On October 22, 2007, at a White House signing ceremony, President Bush and President Enkhbayar signed a Millennium Challenge Compact for Mongolia that calls for $285 million to be spent on four projects over a five-year period beginning in September 2008. The Compact will support efforts to broaden and deepen economic development in Mongolia by focusing on four key areas, including rail modernization, property rights, vocational education, and health. Implementing the program will enable key institutions and infrastructure to better support the country's burgeoning urbanized, market-based economy and help Mongolians to increase their incomes by becoming healthier and better trained, by using their land assets more productively, and by increasing their capacity to trade with the world.

Consular Information Sheet

November 21, 2008

Country Description: Mongolia is the size of Alaska and is a vast country of mountains, lakes, deserts and grasslands. It peacefully abandoned its communist system in 1990 and is successfully making the transition to a parliamentary democracy. Economic reforms continue. The country's development will depend on considerable infrastructure investment, particularly in the mining, energy, transportation, and communication sectors. Travelers to Mongolia should be aware that shortcomings in these areas might have an impact on travel plans.

Entry Requirements: A valid passport is required for American visitors. No visa is required for Americans visiting for fewer than 90 days; however, visitors planning to stay in Mongolia for more than 30 days are required to register with the Office of Immigration, Naturalization and Foreign Citizens in Ulaanbaatar within the first seven days of arrival. American visi-

tors who fail to register and who stay longer than 30 days, even for reasons beyond their control, will be stopped at departure, temporarily denied exit, and fined. It is recommended that visitors who will be in Mongolia beyond 30 days register with the Office of Immigration, Naturalization and Foreign Citizens within the first seven days of their arrival.

Americans planning to work or study in Mongolia should apply for a visa at a Mongolian embassy or consulate outside of Mongolia. Failure to do so may result in authorities denying registration, levying a fine, and requiring that the visitor leave the country. Travelers arriving or departing Mongolia through China or Russia should be aware of Chinese and Russian visa regulations (transiting twice will require a double- or multiple-entry visa) and note that some land-entry points have varying days and hours of operation. Many small land border posts do not operate on a fixed schedule. Travelers need to check with immigration authorities to make certain the post they intend to use will be open when they want to enter. Travelers planning travel to Russia should get visas prior to arriving in Mongolia, because they are difficult to obtain at the Russian Embassy in Mongolia. For more information on these requirements, see the Country Specific Information for Russia and China.

Travelers without Mongolian visas are subject to an exit tax payable either in U.S. dollars or Mongolian Tugrugs upon departure. American citizen visitors to Mongolia do not require a visa if they stay less than 30 days and no fee is payable if they depart within the 30 day period. If they stay longer without having registered with immigration, a penalty fee will be assessed at time of departure. Travelers should inquire whether the exit tax is included with the price of the airline ticket at the time of purchase. In an effort to prevent international child abduction, many governments have initiated procedures at entry/exit points. These often include requiring documentary evidence of relationship and permission for the child's travel from the parent(s) or legal guardian if not present. Having such documentation on hand, even if not required, may facilitate entry/departure.

Visit the Embassy of Mongolia web site at http://www.mongolianembassy.us for the most current visa information. Travelers can also contact the Embassy of Mongolia at 2833 M Street NW, Washington, DC 20007, telephone (202) 333-7117 for the most current visa information.

Safety and Security: There have been no significant acts of terrorism or extremism in Mongolia. There are no regions of instability in the country. U.S. citizens are advised to avoid all protests, including political protests, and street demonstrations that occur occasionally in Ulaanbaatar, as the demonstrations may become violent.

For the latest security information, Americans traveling abroad should regularly monitor the Department's Internet web site, where the current Worldwide Caution Travel Alert, Travel Warnings and Travel Alerts can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S. and Canada, or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: Over the past few years there has been a significant rise in street crime in Mongolia, particularly in Ulaanbaatar, the capital. Violent crime, particularly aggravated assault, is increasing, and it is not advisable to walk alone through the city after dark. The most common crimes against foreigners are pick pocketing and bag snatching. There are reports of organized groups operating in open areas, usually after dark, who surround, grab, and choke an individual in order to search the victim's pockets. Thieves have also sliced victims' clothing in attempts to reach wallets, cell phones and other valuables. U.S. citizens who detect pick pocket attempts should not confront the thieves, as they may become violent. Caution is advised when using public transportation and in crowded public areas, such as open-air markets, the Central Post Office and the Gandan Monastery. Crime rises sharply before, during and after the Naadam Summer Festival in July and throughout the summer tourist season, as well as during and after Tsagaan Sar, the Winter Festival, in January or February.

Travelers should be extremely cautious at these specific locations:

- Chinggis Khan International Airport in Ulaanbaatar: tourists arriving and departing from this airport are frequently targeted for robbery and pick pocketing by organized groups.
- The State Department Store: tourists are targeted by organized pick pocket gangs at the entries/exits/elevators and the area surrounding the store.
- Naran Tuul Covered Market: Organized criminal groups look for and target foreigners for robbery and pick pocketing.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed. American victims of crime in Mongolia should be prepared to hire their own translators and lawyers if they intend to pursue a criminal complaint against a Mongolian.

The local equivalent to the "911" emergency line in Mongolia are 102 to contact the police department and 103 for a medical emergency.

Medical Facilities and Health Information: Medical facilities in Mongolia are very limited and do not meet most Western standards, especially for emergency health care requirements. Many brand-name Western medicines are unavailable. Ulaanbaatar, the capital, has the majority of medical facilities inside the country; outside of Ulaanbaatar, medical facilities and treatment are extremely limited or non-existent. Specialized emergency care for infants and the elderly is not available. Infectious diseases, such as plague, meningococcal meningitis, and tuberculosis, are present at various times of the year. Sanitation in some restaurants is inadequate, particularly outside of Ulaanbaatar. Stomach illnesses are frequent. Bottled water and other routine precautions are advisable.

Serious medical problems requiring hospitalization and/or medical evacuation to the United States can cost tens of thousands of dollars. A June 2005 medical evacuation from Ulaanbaatar to Seoul, Korea, cost the patient $87,000. Doctors and hospitals usually expect immediate payment in cash for health services. Medical evacuation companies will not initiate an evacuation without a fee guarantee beforehand and in full. Please see Medical Information for Americans traveling abroad.

Local hospitals generally do not contact the Embassy about ill or injured Americans in their care; hospitalized American citizens who need Consular assistance from the Embassy should ask the doctor or hospital to contact the U.S. Embassy in Ulaanbaatar. For more information, please contact the U.S. Embassy in Ulaanbaatar, which has a list of medical facilities available to foreigners (also available on the U.S. Embassy web site at http://mongolia.usembassy.gov/) or the Centers for Disease Control and Prevention's international traveler's hotline (see below).

The U.S. Department of State is unaware of any HIV/AIDS entry restrictions for visitors to or foreign residents of Mongolia.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Mongolia is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

Driving in Ulaanbaatar can be extremely difficult due to poorly maintained streets, malfunctioning traffic lights, inadequate street lighting, undisciplined pedestrians, and a shortage of traffic signs. There has been a dramatic increase in the number of vehicles on the roads in recent years, but the knowledge and skills of the driving population have not kept pace with the growth of automobiles. There are many metered taxis in Ulaanbaatar. There are a few car rental companies operating in Ulaanbaatar, but safety and maintenance standards are uncertain and rental vehicles should be utilized with caution. Another alternative is to hire a car and driver from local tourist companies. Public transportation within the capital is extensive, cheap, and generally reliable, but it is also extremely crowded with the result that pickpockets often victimize foreigners. There are few paved roads outside of the capital, and driving can be hazardous, particularly after dark. For specific information concerning Mongolian drivers permits, vehicle inspection, road tax, and mandatory insurance, contact the Embassy of Mongolia at: 2833 M Street, N.W., Washington, D.C. 20007, telephone (202) 333-7117.

Visit the web site of the country's national tourist office and national authority responsible for road safety at http://www.mongolianembassy.us/default.php.

Aviation Safety Oversight: As there is no direct commercial air service between the United States and Mongolia, the U.S. Federal Aviation Administration (FAA) has not assessed Mongolia's Civil Aviation Authority for compliance with International Civil Aviation Organization (ICAO) aviation safety standards. For more information, travelers may visit the FAA's Internet web site at: http://www.faa.gov.

The U.S. Embassy prohibits U.S. government personnel from using the domestic services of Mongolian International Air Transport (MIAT) for official travel because of uncertainties regarding service and maintenance schedules, aircraft certification and insurance status. This prohibition does not extend to MIAT's international flights.

Special Circumstances: Traveler's checks in U.S. dollars are accepted at some hotels and may be converted to dollars or Tugrugs at several banks. Credit cards can be used at a variety of hotels, restaurants, and shops in Ulaanbaatar. Outside of the capital, travelers should have cash. Cash advances against credit cards are available at some commercial banks such as Trade and Development Bank, Golomt Bank, Khan Bank, and Xac Bank. International bank wire transfers are also possible. There are a handful of VISA and Maestro/Cirrus ATM machines in Ulaanbaatar, but they do not always function and are not reliable. ATM machines do not exist outside the capital.

U.S. consular offiers may not always receive timely notification of the detention or arrest of a U.S. citizen, particularly outside of Ulaanbaatar. American citizens are encouraged to carry a copy of their passport with them at all times, so that, if questioned by local officials, evidence of identity and citizenship are readily available. Severe fuel shortages and problems with central heating and electrical systems may cause seriously reduced heating levels and power outages in Ulaanbaatar and other cities during the winter. Smaller towns in the countryside may have no heat or electricity at all.

The Embassy advises all American residents in Mongolia to be prepared to depart if there is a complete energy failure. General information about natural disaster preparedness is available via the Internet from the U.S. Federal Emergency Management Agency (FEMA) at http://www.fema.gov.

Mongolian customs authorities enforce strict regulations concerning import and export of items such as firearms, ammunition, and antiquities. Import of firearms or ammunition requires prior approval from the Government of Mongolia. Export of antiquities requires a special customs clearance certificate issued by authorized antique shops at the time of purchase. For additional information contact the Embassy of Mongolia at: 2833 M Street NW, Washington, DC 20007, telephone: (202) 333-7117.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Police officials will often require a visitor to remain in Mongolia for an indefinite period of time pending resolution of a filed complaint.

Persons violating Mongolian laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Mongolia are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in Mongolia are encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration website so that they can obtain updated information on travel and security within Mongolia. Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency. The U.S. Embassy is located at: at Micro Region 11, Big Ring Road, Ulaanbaatar. The telephone number is (976) 11-329-095, the Consular Section fax number is (976) 11-353-788, and the Embassy's web site is http://ulaanbaatar.usembassy.gov. The Consular Section can be emailed directly at cons@usembassy.mn. The Consular Section is open for American Citizens Services Monday and Thursday from 1-3 p.m., except on U.S. and Mongolian holidays.

Intercountry Adoption

March 2007

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is based on public sources and current understanding. Questions involving foreign and U.S. immigration laws and legal interpretation should be addressed respectively to qualified foreign or U.S. legal counsel.

Please Note: The U.S. Embassy in Ulaanbaatar does not process immigrant visas at this time. After the adoption is completed, adoptive parents must take their child to the U.S. Embassy in Seoul, South Korea for immigrant visa processing and the orphan visa interview.

Patterns of Immigration: Please review current reports online at http://adoption.state.gov.

Adoption Authority: The government offices responsible for adoptions in Mongolia are the Ministry of Social Welfare and Labor of Mongolia (MSWL) and the Office of Immigration, Naturalization and Foreign Citizens.

The Mongolian and U.S. authorities involved in the adoption and immigration process review each case individually to ensure that the child and the prospective adoptive family have met both countries' legal requirements.

Eligibility Requirements for Adoptive Parents: The Mongolian embassy in Washington, D.C., has a web page devoted to the eligibility requirements for adopting Mongolian children. American citizens considering adopting from Mongolia should visit the Mongolian embassy's adoption page online at http://www.mongolianembassy.us.

Residency Requirements: There are no residency requirements for prospective adoptive parents who apply through agencies authorized by the Mongolian Government. However, Mongolian Family Law does require persons adopting privately (i.e., not through an agency) to reside in Mongolia for at least six months.

Time Frame: It is hard to predict with certainty how much time is required to complete an adoption in Mongolia. The time frames provided in this flyer are intended as guidelines only, and the specific circumstances of each case can significantly impact the length of the process. As of March 2007, adoption procedure takes approximately twelve to eighteen months from the time the U.S. adoption agency or private U.S. citizens submitted the paperwork to MSWL to the time the MSWL gives it for final approval to the Office of Immigration, Naturalization and Foreign Citizens.

Adoption Agencies and Attorneys: Although the Government of Mongolia currently permits private adoptions, there has been some discussion of prohibiting these in the near future. Adoptive parents using an agency must use one of the Mongolian Government-approved adoption agencies. The U.S. Department of State does not assume any responsibility for the quality of services provided by these private adoption agencies or their employees.

Adoption Fees: There are no Mongolian government fees for adoption. Prospective adoptive parents can expect to pay notary fees and/or fees for translation of documents.

Private adoptions: Foreign citizens who have resided in Mongolia for more than six months shall apply directly to the Ministry of Social Welfare and Labor (MSWL) about his/her request to adopt a Mongolian child. The MSWL is the Central Authority in Mongolia. The Department of Population Development, Social Welfare Policy and Coordination within the MSWL accepts all necessary documentation for adoption including a residency permit and/or work permit. This process generally takes between three and six months, although it has sometimes taken longer depending on the MSWL's workload. While Mongolian law does not currently require a home study, in practice the MSWL has recently been requiring home studies.

The U.S. Embassy in Mongolia believes that the home study requirement will be formalized in the future. The MSWL checks all documents and proposes a child for adoption. Once the prospective parents agree to the adoption, the case goes to the Office of Immigration, Naturalization and Foreign Citizens for final decision, which takes approximately one month.

Licensed Adoption Agency: The first step for a family residing in the United States is to apply to one of the Mongolian Government-approved U.S. adoption agencies (listed above) for a home study. Adoption agencies gather documents from prospective parents and present them to the MSWL.

Based on the home study, the MSWL will propose a child with whom to match the prospective parents. The adoption agency then presents the documentation to the Office of Immigration, Naturalization and Foreign Citizens for final approval. This process normally takes approximately one month.

Both Processes: Parents who have adopted a child (either independently or through an adoption agency) must register their adoption to the State and Civil Registration and Information Center (SCRIC), which then issues a birth certificate and adoption decree. The parent must be present at the registration.

Required Documents: For a list of document required by the government of Mongolia please see Article 58.3 of Mongolian family law available at www.mongolianembassy.us.

Additional Information: Specific questions about adoption in Mongolia may be addressed to the U.S. Embassy in Ulaanbaatar. Questions about the immigrant visa process for Mongolian children should be directed to the U.S. Embassy in Seoul.

General questions regarding intercountry adoption may be addressed to the Office of Children's Issues, U.S. Department of State, CA/OCS/CI, SA-29, 4th Floor, 2201 C Street, NW, Washington, D.C. 20520-4818, Toll-free Tel: 1-888-407-4747.

MONTENEGRO

Compiled from the June 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Republic of Montenegro

PROFILE

Geography

Area: Montenegro (13,938 sq. km.) is slightly smaller than Connecticut.

Cities: Capital—Podgorica. Other cities—Bar, Berane, Bijelo Polje, Budva, Cetinje, Herceg Novi, Kotor, Niksic, Pljevlja, Tivat, Ulcinj.

Terrain: Varied; mountainous regions with thick forests; central plains; southwestern Adriatic coast with high shoreline with very few islands off the coast.

Climate: Generally continental; Mediterranean along the coast.

People

Nationality: Noun—Montenegrin(s); adjective—Montenegrin.

Population: 630,548 (2004 Republic census).

Population growth rate: (2004) 3.5%.

Ethnic groups: (2004 census) Montenegrin 43%, Serbian 31%, Bosniak 8%, Albanian 5%, Muslim 5%, Croatian 1%, Roma 0.5%.

Religions: (2004 census) Orthodox 74%, Muslim 18%, Roman Catholic 4%.

Languages: Serbo-Croatian 95%, Albanian 5%.

Health: Infant mortality rate—14.2 deaths/1,000. Life expectancy—male 72.8 yrs., female 76.7 yrs.

Government

Type: Republic.

Constitution: Adopted October 19, 2007 and proclaimed October 22, 2007.

Independence: June 3, 2006 (declared by parliament after referendum in favor of independence from state union of Serbia and Montenegro).

Government branches: Executive—president (chief of state); prime minister (head of government). Legislative—Montenegrin parliament. Judicial—Constitutional Court and Supreme Court.

Political parties: Albanian Alternative (AA), Bosniak Party (BS), Croatian Civic Initiative (HGI), Democratic League in Montenegro (DSCG), Democratic Party of Socialists (DPS), Democratic Serbian Party (DSS), Democratic Union of Albanians (DUA), Liberal Party (LP), Movement for Change (PZP), Party of Serbian Radicals (SSR), Party of Serbian Unity (SSJ), People's Party of Montenegro (NS), People's Socialist Party (NSS), Serbian People's Party (SNS), Social Democratic Party (SDP), and Socialist People's Party (SNP).

Suffrage: Universal at 18.

Economy

GDP: (2007) $3.417 billion (€2.278 billion).

Real GDP growth rate: (2007/2008) 7%.

Per capita income: (2007) $5,511 (3,647 euros).

Inflation rate: (2007) 6.5%.

Natural resources: Bauxite.

Tourism: 20% of GDP.

Industry: 13.8% of GDP.

Services: 58% of GDP.

Trade: (2006) Exports—$820.5 million (€599 million). Major markets—Serbia ($232.2 million; €169.5 million), Italy ($224.9 million; €164.2 million), Greece ($100.8 million; €73.6 million) Hungary ($90.6 million; €66.2 million), Bosnia and Herzegovina ($41.3 million; €30.2 million). Imports—$2.923 billion (€2.134 billion). Major suppliers—Serbia ($874.1 million; €638.1 million), Germany ($292.1 million; €213.3 million), Italy ($285.2 million; €208.2 million), Croatia ($114.2 million, €83.4 million) Greece ($102.5 million; €74.8 million).

PEOPLE AND HISTORY

Montenegro resisted the rule of the Ottoman Turks, maintaining its independence and playing off its powerful

neighbors against each other. Montenegro was recognized as an independent and sovereign principality by the Great Powers of Europe assembled at the Congress of Berlin on July 13, 1878.

During World War I, Montenegro fought on the side of the Allies but was defeated and occupied by Austria. Upon Austrian occupation, the Montenegrin king, King Nikola I, and his government went into exile. In late 1918, an Assembly met in Podgorica, and under the eyes of the Serbian army, deposed King Nikola and declared unification with Serbia. The government of Montenegro in exile denounced the Assembly's action, to no avail. From 1919 to 1941, Montenegro was part of what became known as the Kingdom of Yugoslavia, despite armed resistance in the early 1920s to rule from Belgrade.

When Yugoslavia was invaded and partitioned by the Axis powers in April 1941, Montenegro was appropriated by the Italians under a nominally autonomous administration. While some Montenegrins sided with Italy, motivated by antipathy against past rule from Belgrade, the Partisan Revolt in Montenegro began early, on July 13, 1941, and initially scored impressive successes against the Italian occupiers. Throughout World War II, Montenegro served as an effective base and refuge for Tito's Partisans. After the war, Montenegro was granted the status of a republic within Yugoslavia.

The breakup of the Yugoslav federation after 1989 left Montenegro in a precarious position. Between 1991 and 1992, Slovenia, Croatia, Bosnia and Herzegovina, and Macedonia all seceded from Yugoslavia. On April 27, 1992 in Belgrade, Serbia and Montenegro joined in passing the Constitution of the Federal Republic of Yugoslavia. Though Montenegro reaffirmed its political attachment to Serbia, a sense of a distinct Montenegrin identity continued to thrive. The government of Montenegro was critical of Yugoslav President Slobodan Milosevic's 1998-99 campaign in Kosovo, and the ruling coalition parties boycotted the September 2000 federal elections, which led to the eventual removal of Milosevic's regime. In March 2002, the Belgrade Agreement was signed by the heads of the federal and republican governments, setting forth the parameters for a redefinition of Montenegro's relationship with Serbia within a joint state. On February 4, 2003, the F.R.Y. parliament ratified the Constitutional Charter, establishing a new state union and changing the name of the country from Yugoslavia to Serbia and Montenegro. On May 21, 2006, the Republic of Montenegro held a successful referendum on independence and declared independence on June 3.

GOVERNMENT AND POLITICAL CONDITIONS

Following Montenegro's declaration of independence, the first parliamentary elections were held on September 10, 2006. Both domestic and international observers assessed the elections as being generally in line with international standards. Zeljko Sturanovic of the leading Democratic Party of Socialists (DPS) was appointed as Prime Minister. The newly elected Montenegrin parliament began work on the country's first post-independence constitution, which was adopted on October 19, 2007. The constitution, among other things, changed the country's official name to "Montenegro." European and Euro-Atlantic integration has been one of the driving forces behind the reform process that led to the signing of a Stabilization and Association Agreement with the European Union (EU) on October 15, 2007. Following the resignation of Prime Minister Sturanovic due to health reasons in February 2008, President Vujanovic nominated (and parliament approved) the leader of the ruling DPS, former Montenegrin President and Prime Minister Milo Djukanovic, as head of the government. Presidential elections were held on April 6, 2008, and incumbent President Vujanovic was elected for a second five-year term with 52% of the vote. Domestic and international observers assessed this election as being generally in line with international standards. The Government of Montenegro is continuing to promote reforms that will bring the country closer to Euro-Atlantic institutions. Despite considerable progress since independence and success in maintaining inter-ethnic harmony, some ethnic tensions remain. The country must also cope with rule of law issues and uneven regional economic development.

Legislature

The parliament is Montenegro's lawmaking body. Parliament has 81 members elected in general elections. According to the results of the 2006 parliamentary elections, the governing DPS/SDP coalition has 41 members of parliament, followed by the Serbian List alliance (12 seats), the SNP-NS-DSS coalition (11), the Movement for Change (11), the coalition of the Liberal and Bosniak parties (three), the DUA (one), Albanian Alternative (one), and the coalition of the Democratic Union in Montenegro —Party of Democratic Prosperity (one).

Ambassador to the US: **Miodrag VLAHOVIC**
Permanent Representative to the UN, New York: **Nebojsa KALUDJEROVIC**

DEFENSE

The Montenegrin Government has established a military and a Ministry of Defense. Further reform and transformation of both institutions is underway. The Montenegrin military operates under the joint authority of the Security and Defense Council, which consists of the president, prime minister, and the speaker of parliament. Parliament also maintains oversight through its Security and Defense Committee. Montenegro officially entered NATO's Partnership for Peace in November 2006 and in April 2008 was invited to join an Intensified Political Dialogue with the Alliance.

ECONOMY

Montenegro has natural resources, primarily bauxite, adequate water supplies, and a climate conducive to agriculture and tourism. The establishment of the bauxite-alumina-aluminum industry after World War II provided Montenegro with a core strategic industry, which has suffered from high production costs since the first energy crisis in 1973. In the 1960s, tourism began its initial growth, largely attracting visitors from Eastern Europe. War and sanctions in the early 1990s hit Montenegro hard, and recovery only really began after the end of the Kosovo crisis in 1999 and the adoption of the deutschmark (DM) in November 1999, which largely disconnected Montenegro's economy from Serbia and the Serbian dinar.

During the last few years, Montenegro has created a business-friendly investment climate. The Euro replaced the DM on March 31, 2002. The country established the lowest

corporate tax rate in the region (9%) and Standard & Poors has given Montenegro a credit rating of BB+. In 2007, the inflation rate was 6.5%. More than 85% of capital value in Montenegrin companies had been privatized by December 2007. The banking sector, telecommunications, and oil import and distribution in Montenegro are 100% privately owned. Capital structure analysis shows that the state still has shares in 65 companies, and in 53.8% of those the state has more than 50% ownership. The biggest improvement Montenegro has made has been in the area of tax policy. Montenegro introduced value added tax (VAT) in April 2003, and introduced tax rates of 17% and 7% (for tourism) as of January 2006. The lower VAT rate for tourism is to encourage growth in this strategic industry. Montenegro also decreased the personal income tax (PIT), and a 15% flat rate was implemented in January 2007; a 12% rate will be implemented in January 2009.

Net foreign direct investment (FDI) in 2007 reached $1.379 billion, which was ten times higher than in 2004, and investment per capita is $2,223—one of the highest in Europe. In the first quarter of 2008, there was a 6.8% increase in direct foreign investments in Montenegro compared with the same period in 2007. According to preliminary data from the Montenegrin central bank, the amount of foreign investment from January to March 2008 was $294.8 million.

Tourism and tourism investments, particularly along the Adriatic coast, are booming. The independent World Travel and Tourism Council repeatedly has ranked Montenegro as the top-growing tourism destination in the world, with growth estimated at 10% annually through 2016.

FOREIGN RELATIONS

Since the June 3, 2006 declaration of independence, the European Union, Serbia, and all permanent members of the UN Security Council have recognized Montenegro. The UN General Assembly voted on June 28, 2006 to admit Montenegro as a new member state. Montenegro joined the Organization for Security and Cooperation in Europe (OSCE) on June 22, 2006, and the Council of Europe on May 11, 2007.

Montenegro signed a Stabilization and Association Agreement with the EU in October 2007, concluded a World Trade Organization (WTO) agreement with the EU in April 2008, and was invited to join an Intensified Political Dialogue with NATO at the April 2008 Summit in Bucharest.

U.S.-MONTENEGRO RELATIONS

The United States recognized Montenegro on June 12, 2006 and formally established diplomatic relations on August 15 of that year. The U.S. maintains an Embassy in Podgorica. There are currently a variety of U.S. assistance programs in place in Montenegro to help improve the economic climate and strengthen democracy. These include initiatives to promote local economic growth and business development and strengthen rule of law and democratic institutions. President Vujanovic met U.S. Secretary of State Rice on May 1, 2007 during his visit to Washington, DC. Speaker of the Parliament Ranko Krivokapic visited Washington in November 2007 and met with Nancy Pelosi, Speaker of the U.S. House of Representatives. The Montenegrin military also established a partnership with the Maine Army National Guard, and efforts are underway to broaden this relationship to include cooperation in the civilian sector.

TRAVEL

Consular Information Sheet

November 26, 2008

Country Description: Montenegro declared its independence from the State Union of Serbia and Montenegro on June 3, 2006, following a peaceful referendum process. Montenegro is a small Balkan country currently undergoing significant political and economic change. Tourist facilities are widely available but vary in quality and some may not be up to Western standards.

Entry Requirements: U.S. citizens with tourist, official, or diplomatic passports do not require a visa for entry and stay in Montenegro for up to 90 days. If U.S. citizens decide to stay longer than 90 days they must apply for a temporary residence permit one week before the 90-day period expires. This applies to bearers of all types of U.S. passports—tourist, official, and diplomatic. The Government of Montenegro has established its Embassy in Washington, DC and a Consulate General in New York. The Embassy of Montenegro currently has no web site but can be reached at its Embassy in Washington, DC at (202) 234-6108 for the most current visa information.

Travelers are required to declare currency in excess of 3,000 Euros upon entry and must obtain from customs officials a declaration form that must be presented at departure. Failure to comply may result in confiscation of funds and criminal proceedings.

Visitors staying in private accommodations other than hotels must register with the police station responsible for the area in which they are staying within 24 hours of arrival. Failure to comply may result in a fine, incarceration, and/or expulsion. Persons who fail to register may face difficulties in departing the country. Visitors staying in hotels or tourist facilities are automatically registered with the police by the hotel.

Safety and Security: Threats to American interests are rare. Demonstrations, usually related to political activities, labor conditions or sporting events, have been peaceful or exhibited only low levels of violence.

Montenegrin nightclubs and tourist centers are popular with foreign tourists. Patrons should be aware that these establishments can be crowded and may not comply with western standards for occupancy control and fire safety.

Travelers in the region may wish to consider the safety of public transportation, including trains and buses, in view of aging and poorly maintained equipment.

For the latest security information, Americans traveling abroad should regularly monitor the Department's Internet web site where the current Travel Warnings and Travel Alerts, including the Worldwide Caution, can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S., or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: Street crime in Podgorica is at a level to be expected for a small European city of 170,000 people. Residential break-ins present the greatest security concern for expatriates in Montenegro; however, the number is still relatively small. Violent crime is limited. Police have a limited ability to provide services in English.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

The local equivalent to the "911" emergency lines in Montenegro are 92 (land line) and 112 (mobile).

Medical Facilities and Health Information: Although many physicians in Montenegro are highly trained, hospitals and clinics are generally not equipped or maintained to Western standards. Medicines and basic medical supplies are largely obtainable in privately owned pharmacies. Hospitals and private clinics usually require payment in cash for all services. Montenegro has a small number of ambulances and consequently, emergency services are generally responsive in only the most severe cases. Otherwise, people are expected to provide their own transportation to hospitals and clinics.

The U.S. Department of State is unaware of any HIV/AIDS entry restrictions for visitors to or foreign residents of Montenegro.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's Internet site at http://www.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) website at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith/en.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Montenegro is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

Roads in Montenegro are often poorly maintained, especially in rural areas. Dangerous areas for road travel include a road called "Moraca Canyon," north of Podgorica. This is a twisting, two-lane road that is especially overcrowded in the summer. In the winter, the "Moraca Canyon" and northern parts of Montenegro are covered with snow, which may slow down traffic. Roads that lead to the Montenegro coastal areas are in better condition, but are overcrowded during summer season. Drivers should exercise extreme caution, as it is common for Montenegrin drivers to attempt to pass on winding roads and hills. Local drivers can be reckless and aggressive, and accidents are frequent.

The use of seat belts is mandatory and cell phone usage while driving is prohibited. Traffic law requires that vehicle lights must be switched on at all times while driving. A driver with a blood alcohol level higher than 0.5 g/kg (US equivalent of 0.05) is considered intoxicated. Roadside assistance is available by dialing 9807, +382 (0)20 234 467 or +382 (0)20 234 999. Other emergency numbers are police: 92, fire department: 93, and ambulance: 94.

Metered taxi service is safe and reasonably priced, although foreigners are sometimes charged higher rates. It is advisable to negotiate a price in advance of travel by taxi between cities.

Visit the website of Montenegro's national tourist office and national authority responsible for road safety at www.visit-montenegro.org.

Aviation Safety Oversight: Since Montenegro's recent independence, the U.S. Federal Aviation Administration (FAA) has not separately assessed the Government of Montenegro's Civil Aviation Authority for compliance with International Civil Aviation Organization (ICAO) aviation safety standards. However, the FAA earlier assessed the Government of Serbia and Montenegro's Civil Aviation Authority as not being in compliance with ICAO standards for oversight of Serbia and Montenegro's air carrier operations. For more information, travelers may visit the FAA's website at http://www.faa.gov.

Special Circumstances: Dual U.S./Montenegrin nationals may be subject to laws that impose special obligations on Montenegrin citizens. According to Montenegro's Constitution adopted on October 19, 2007, all citizens may retain dual citizenship for one year while the Montenegrin government signs bilateral memorandums with individual countries. Adoption of a new citizenship law has been indefinitely postponed. Currently, Montenegro has no finalized bilateral citizenship agreements with any country. As of August 30, 2006, Montenegrin men are no longer required by Montenegrin law to perform military service. There are occasional water and electricity outages during peak summer season due to high demand.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating Montenegrin law, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Montenegro are strict and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in Montenegro are encouraged to register with the U.S. Embassy through the State Department's travel registration website, and to obtain updated information on travel and security within Montenegro. Americans without Internet access may register directly with the U.S. Embassy. By registering, American citizens make it easier for the embassy to contact them in case of emergency. The U.S. Embassy in Podgorica is located at Ljubljanska bb, tel: +382-81-225-417, fax: +382-81-241-358. For after hour emergencies, please call +382 (0)67 283 584. You may also visit the embassy's website at http://podgorica.usembassy.gov.

Intercountry Adoption

August 2006

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is based on public sources and current understanding. Questions involving foreign and U.S. immigration laws and legal interpretation should be addressed respectively to qualified foreign or U.S. legal counsel.

Please Note: The United States recognized Montenegro as an independent state on June 12, 2006, following the June 3 declaration of independence by the Montenegrin Parliament. This flyer is based primarily on current Serbian law for intercountry adoption and will be updated if Montenegro changes its laws or procedures on intercountry adoption.

The United States has an Embassy in Belgrade, Serbia and a presence in Podgorica, Montenegro. Podgorica provides only limited consular services to American citizens. The U.S. Embassy in Belgrade provides all visa services, including immigrant visa services, to Montenegrin citizens at this time.

Patterns of Immigration: Please review current reports online at http://adoption.state.gov.

Adoption Authority:
Ministry of Social Affairs
Attn: Svjetlana Sovilj
Rimski trg BB
81000 Podgorica
Phone: +381 81 482-451
Fax: +381 81 234-256
www.minrada.vlada.cg.yu

Eligibility Requirements for Adoptive Parents: Montenegrin adoption law requires at least one of the prospective adoptive parents to be between 30 and 60 years of age. Prospective parents must have been married for at least three years when beginning the adoption process. Unmarried persons and same-sex couples are not permitted to adopt. Prospective adoptive parents will be disqualified from adopting they have been diagnosed with are mental disorders infectious diseases. Adoptive parents with other serious health conditions must demonstrate to the Ministry of Social Affairs their ability to raise the child.

Residency Requirements: There are no residency requirements for adoption. However, current law gives priority to prospective parents who are of Montenegrin origin.

Time Frame: The length of the adoption process varies greatly. If prospec-

tive adoptive parents have located a child prior to their arrival to Montenegro, the whole process may be finished within four weeks.

Adoption Agencies and Attorneys: There are no adoption agencies in Montenegro. Adoptive parents must work directly with the Ministry of Social Affairs. However, U.S. citizens considering adopting from Serbia may still choose to work with an adoption agency to assist them with the U.S. portions of the process.

Adoption Fees: There are no government fees for adoption. The only fee to be paid is for the issuance of the passport for the adopted child. Currently, both Serbia and Montenegro still use passports issued by the Federal Republic of Yugoslavia. The passport fee is around $15 depending on the exchange rate.

Adoption Procedures: Adoptive parents must first contact Ministry of Social Affairs of Montenegro. They must then submit the required documentation listed below. If determined eligible by the Ministry of Social Affairs, prospective adoptive parents will be instructed to contact the appropriate local authority.

Each municipality in Montenegro has its own authority called Center for Social Work (Centar za socijalni rad) which is part of the Ministry of Social Affairs. The Ministry will guide prospective parents to a local authority depending on the number of children awaiting adoption in that area.

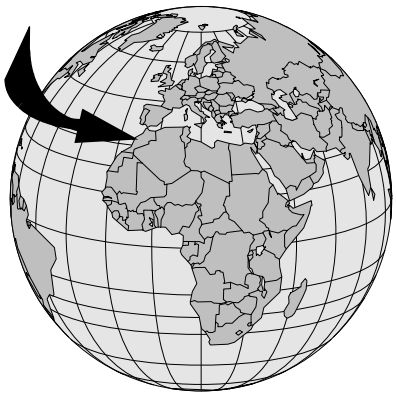
Local authorities will attempt to match prospective parents with a child. When a match is made and the parents inform the local authorities to that affect, local authorities will schedule "Solemn Ceremony of Adoption (usually within few days).

Local authorities will then erase the names of the biological parents from the registry books and make a new entry with the names of the adopting parents.

This is also the time when the child's name can be formally changed, including the child's first name. Authorities will also issues an Adoption Decree (Resenje o usvojenju) which includes child's history and details on the adoption process, Birth certificate and passport.

Required Documents:

- Written request signed by both prospective adoptive parents;
- Parents' Birth Certificates;
- Marriage Certificate;
- Proof of Citizenship (passport);
- Passport copies;
- Evidence of employment and income;
- Evidence of assets;
- Medical certificate including a psychiatrist's report on the parents' suitability for the adoption process;
- Criminal records/Police certificates.



Montenegro has not yet established an embassy or consulate in the United States. The Serbian Embassy is located at:

2134 Kalorama Rd, NW
Washington, DC 20008
Tel: (202) 332-0333
Fax: (202) 332-3933
Fax (Consular): (202) 332-5974
http://www.yuembusa.org
Serbia also has a Consulate General in Chicago.

U.S. Immigration Requirements: Prospective adoptive parents are strongly encouraged to consult USCIS publication M-249, *The Immigration of Adopted and Prospective Adoptive Children*, as well as the Department of State publication, *Intercountry Adoptions*. Please see the *Intercountry Adoption* section of this book for more details and review current reports online at http://adoption.state.gov.

U.S. Consulate
Ljubljanska bb
81000 Podgorica
Montenegro

Additional Information: Specific questions about adoption in Montenegro may be addressed to the U.S. Government Office in Podgorica. General questions regarding intercountry adoption may be addressed to the Office of Children's Issues, U.S. Department of State, CA/OCS/CI, SA-29, 4th Floor, 2201 C Street, NW, Washington, D.C. 20520-4818, toll-free Tel: 1-888-407-4747.

MOROCCO

Compiled from the October 2007 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Kingdom of Morocco

PROFILE

Geography

Location: North Africa, bordering the Atlantic Ocean and the Mediterranean Sea, southern border with Western Sahara, eastern border with Algeria.
Area: 446,550 sq. km. (172,413 sq. mi.) slightly larger than California. (The disputed territory of Western Sahara comprises another 267,028 sq. km or 102,703 sq. mi.)
Cities: Rabat (capital), Casablanca, Marrakech, Fes, Meknes, Tangier.
Terrain: Coastal plains, mountains, desert.
Climate: Mediterranean to more extreme in the interior and south.
Land use: Arable land 19%; permanent crops 2%; other 79%.

People

Nationality: Noun and adjective—Moroccan(s).
Population: (2007) 33,757,175. (The population of disputed territory Western Sahara is 350,000.)
Annual growth rate: (2007) 1.528%. Birth rate (2007 est.)—21.64 births/1,000 population; death rate (2007 est.)—5.54 deaths/1,000 population.
Ethnic groups: Arab-Berber 99%.
Religions: Muslim 99.99%, Jewish population estimated at 4,000 people, Christian population estimated at less than 1,000.
Languages: Arabic (official), several Berber dialects; French functions as the language of business, government, and diplomacy.
Education: Years compulsory—9. Literacy (age 15 and over can read and write)—total population 51.7%; female 39.4% (2003 est.).
Health: Infant mortality rate (2007 est.)—38.85/1,000. Life expectancy at birth (2007 est.)—total population 71.22 yrs., male 68.88 yrs., female 73.67 yrs.
Work force: (2006) 11.25 million.
Unemployment rate: (2006 est.) 7.7%.

Government

Type: Constitutional monarchy.
Constitution: March 1972, revised September 1992 and September 1996 (creating a bicameral legislature).
Independence: March 2, 1956.
Government branches: Executive—King (head of state), Prime Minister (head of government). Legislative—Bicameral Parliament. Judicial—Supreme Court.
Political parties: Socialist Union of Popular Forces (USFP), Istiqlal (Independence) Party (PI), Party of Justice and Development (PJD), National Rally of Independents (RNI), Popular Movement (MP), National Popular Movement (MNP), Constitutional Union Party (UC), Democratic Forces Front, (FFD), National Democratic Party (PND), Party of Progress and Socialism (PPS), Democratic Union (UD), Democratic and Social Movement (MDS), Social Democratic Party (PSD), The Pact (AHD), Liberty Alliance (ADL), United Socialist Leftists (GSU), Moroccan Liberal Party (PML), Party of Reform and Development (PRD), Citizen Forces (FC), National Itihadi (Unity) Congress (CNI), Party of Action (PA), Social Center Party (PCS), Party of Environment and Development (PED), Citizens Initiative for Development (ICD), Party of Renewal and Equity (PRE), Consultation and Independence Party (PCI), Advancing Democratic and Social Party (PAGDS).
Suffrage: Universal starting at 18 years of age.

Economy

GDP: (2006) $56.72 billion.
GDP growth rate: (2006 est.) 6.7%
Per capita GDP: (PPP, 2006) $4,400.
Natural resources: Phosphates, fish, manganese, lead, silver, and copper.
Agriculture: Products—barley, citrus fruits, vegetables, olives, livestock, and fishing.
Industry: Types—phosphate mining, manufacturing and handicrafts, construction and public works, energy. Sector Information as %

GDP: (2006) Agriculture 13.3%, industry 31.2%, services 55.5%.
Currency: Moroccan dirham.
Trade: Exports—$11.72 billion (2006). Major partners—EU 71.5%, India 4.1%, U.S. 2.6%, and Brazil 2.4%. Imports— $21.22 billion (2006). Major partners—EU 52.1%, Saudi Arabia 4.8%, Russia 6.7%, China 5.2%, U.S. 3.4%.
Budget: Revenues, $15.85 billion; expenditures, $20.39 billion, including capital expenditures of $2.19 billion. (2006 est.). **External debt:** $17.9 billion (2006 est.).

PEOPLE

Moroccans are predominantly Sunni Muslims of Arab, Berber, or mixed Arab-Berber ancestry. The Arabs brought Islam, along with Arabic language and culture, to the region from the Arabian Peninsula during the Muslim conquests of the 7th century. Today, there remains a Jewish community of approximately 5,000, and a largely expatriate Christian population of 5,000, who enjoy religious freedom and full civil rights. Morocco is also home to a 300-500-person Baha'i community which, in recent years, has been able to worship free from government interference.

Arabic is Morocco's official language, but French is widely taught and serves as the primary language of commerce and government. Moroccan colloquial Arabic is composed of a unique combination of Arabic, Berber and French dialects. Along with Arabic, about 10 million Moroccans, predominantly in rural areas, also speak one of the three Moroccan Berber dialects (Tarifit, Tashelhit, and Tamazight). Spanish is also used in the northern part of the country. English is rapidly becoming the foreign language of choice among educated youth and is offered in all public schools from the fourth year on.

Most people live west of the Atlas Mountains, a range that insulates the country from the Sahara Desert. Casablanca is the center of commerce and industry and the leading port; Rabat is the seat of government; Tangier is the gateway to Spain and also a major port; "Arab" Fes is the cultural and religious center; and "Berber" Marrakech is a major tourist center.

Education in Morocco is free and compulsory through primary school (age 15). Nevertheless, many children—particularly girls in rural areas—do not attend school. The country's literacy rate reveals sharp gaps in education, both in terms of gender and location; while country-wide literacy rates are estimated at 39% among women and 64% among men, the female literacy rate in rural areas is only 10%.

Morocco is home to 14 public universities. Mohammed V University in Rabat is one of the country's most famous schools, with faculties of law, sciences, liberal arts, and medicine. Karaouine University, in Fes, is a longstanding center for Islamic studies and is the oldest university in the Maghreb. Morocco has one private, English language university, Al-Akhawayn, in Ifrane, founded in 1993 by King Hassan II and King Fahd of Saudi Arabia. The curriculum is based on an American model.

HISTORY

Morocco's strategic location has shaped its history. Beginning with the Phoenicians, many foreigners were drawn to this area. Romans, Visigoths, Vandals and Byzantine Greeks ruled successively. Arab forces began occupying Morocco in the seventh century A.D., bringing their civilization and Islam. The Alaouite dynasty, which has ruled Morocco since 1649, claims descent from the Prophet Muhammad.

Morocco's location and resources led to early competition among European powers in Africa, beginning with successful Portuguese efforts to control the Atlantic coast in the 15th century. France showed a strong interest in Morocco as early as 1830. Following recognition by the United Kingdom in 1904 of France's "sphere of influence" in Morocco, the Algeciras Conference (1906) formalized France's "special position" and entrusted policing of Morocco to France and Spain jointly. The Treaty of Fes (1912) made Morocco a protectorate of France. By the same treaty, Spain assumed the role of protecting power over the northern and southern (Saharan) zones.

Nationalist political parties, which took shape under the French protectorate, began a strong campaign for independence after World War II. Declarations such as the Atlantic Charter (a joint U.S.-British statement set forth, among other things, the right of all people to choose the form of government under which they live), served as a base for the independence movement. A manifesto of the Istiqlal (Independence) Party in 1944 was one of the earliest public demands for independence. That party subsequently provided most of the leadership for the nationalist movement and remains a dominant political force.

In 1953, France exiled the highly respected Sultan Mohammed V and replaced him with the unpopular Mohammed Ben Aarafa. Ben Aarafa's reign was widely perceived as illegitimate, and sparked active opposition to French rule. France allowed Mohammed V to return in 1955, and by 1956, Morocco had regained its independence. In the year 2006, Moroccans celebrated their 50th year of independence from France. After gaining independence on March 2, 1956, Morocco regained control over certain Spanish-ruled areas through agreements with Spain in 1956 and 1958. The internationalized city of Tangier was reintegrated with the signing of the Tangier Protocol on October 29, 1956. The Spanish enclave of Ifni in the south became part of Morocco in 1969. Spain, however, retains control over the small coastal enclaves of Ceuta and Melilla in the north. During the 1990s, King Hassan made great strides toward economic and political liberalization. King Hassan died on July 23, 1999, and was succeeded by his son, Mohammed VI, who pledged to continue these reforms. Under

Mohammed VI, the Moroccan Government has undertaken a number of economic, political, and social reforms, including the 2003 Moudawana, a reform of the family status code, and the 2006 Equity and Reconciliation Commission, which investigated allegations of human rights abuse from 1956 to 1999.

GOVERNMENT AND POLITICAL CONDITIONS

Morocco is divided into 16 administrative regions (further broken into provinces and prefectures); the regions are administered by Walis (governors) appointed by the King. The Moroccan Constitution provides for a monarchy with a Parliament and an independent judiciary. Ultimate authority rests with the King. The King presides over the Council of Ministers; appoints the prime minister following legislative elections; appoints all members of the govern-

ment taking into account the prime minister's recommendations; and may, at his discretion, terminate the tenure of any minister, dissolve the Parliament, call for new elections, or rule by decree. The King is the Commander in Chief of the military and holds the title of Amir al-Mou'minin, the country's religious leader.

Since the constitutional reform of 1996, the bicameral legislature consists of a lower chamber called the Chamber of Representatives, which is directly elected, and an upper chamber, the Chamber of Counselors, whose members are indirectly elected through various regional, local, and professional councils. The councils' members themselves are directly elected. Parliament's powers, though limited, were expanded under the 1992 and 1996 constitutional revisions to include budgetary matters, approval authority, and establishment of commissions of inquiry to investigate the government's actions. The lower chamber of Parliament may dissolve the government through a vote of no confidence.

Parliamentary elections were held in November 2002 and were considered largely free, fair, and transparent. At that time, King Mohammed VI formed a government appointing then-Interior Minister Driss Jettou as Prime Minister. Cabinet level positions were drawn from most major parties in the coalition.

Following the 2002 elections, King Mohammed VI highlighted several goals toward which the new government should work: expanded employment opportunities, economic development, meaningful education, and increased housing availability. To meet the King's objectives, the Jettou government embarked on a series of initiatives and reforms, which Jettou laid out in his early days as Prime Minister.

Jettou emphasized that modernization and revitalization of the country's infrastructure (roads, trains, communications, water, etc.) and national economy (support for Moroccan businesses, preparations for competition, modernization of modes of production, etc.), were necessary to further development progress in Morocco.

In order to create employment opportunities, the government is promoting investment in the tourism, industrial, fishing, and service industries, and is ameliorating, restructuring, and modernizing the education system.

Parliamentary elections were held in September 2007. Abbas El Fassi was designated to form a new government.

Principal Government Officials

Last Updated: 11/12/08

King: **MOHAMED VI**
Prime Min.: **Abbas EL FASSI**
Min. of Agriculture, Rural Development, & Sea Fisheries: **Aziz AKHENOUCH**

Permanent Representative to the UN, New York: **Mustapha SAHEL**

Morocco maintains an embassy in the United States at 1601–21st Street NW, Washington, DC 20009 (tel. 202-462-7979).

ECONOMY

Macroeconomic stability, coupled with low inflation and relatively slow economic growth, has characterized the Moroccan economy over the past several years. The government continues to pursue reform, liberalization, and modernization aimed at stimulating growth and creating jobs. Employment, however, remains overly dependent on the agriculture sector, which is extremely vulnerable to inconsistent rainfall. Morocco's primary economic challenge is to accelerate growth in order to reduce high levels of unemployment and underemployment. While overall unemployment stands at 7.7%, this figure masks significantly higher urban

unemployment, as high as 33% among urban youths. Through a foreign exchange rate anchor and well-managed monetary policy, Morocco has held inflation rates to industrial country levels over the past decade; inflation between 1999 and 2004 remained at 1.5% and fell to 1% in 2005. Despite criticism among exporters that the dirham has become badly overvalued, the country maintains a current account surplus. Foreign exchange reserves are strong, with over $16 billion in reserves, the equivalent of 11 months of imports at the end of 2005. The combination of strong foreign exchange reserves and active external debt management gives Morocco ample capacity to service its debt. Current external debt stands at about $17.9 billion.

Economic growth has been hampered by an over-reliance on the agriculture sector. Agriculture production is extremely susceptible to rainfall levels and ranges from 15% to 20% of GDP. Given that almost 40% of Morocco's population depends directly on agriculture, droughts have a severe negative effect on the economy.

The current government is continuing a series of structural reforms begun in recent years. The most promising reforms have been in the labor market and financial sectors, and privatization has accelerated the sale of Global System for Mobile Communications (GSM) licenses in recent years. Morocco also has liberalized rules for oil and gas exploration and has granted concessions for many public services in major cities. The tender process in Morocco is becoming increasingly transparent. Many believe, however, that the process of economic reform must be accelerated in order to reduce urban unemployment.

In January 2006, the bilateral Free Trade Agreement (FTA) between the United States and Morocco went into effect. The FTA represents an important step towards President Bush's vision of a Middle East Free Trade Area and is the first in Africa. The U.S.-Morocco FTA eliminated tariffs on 95% of bilateral trade in consumer and industrial products with all remaining tariffs to be eliminated within nine years. The negotiations produced a comprehensive agreement covering not only market access but also intellectual property rights protection, transparency in government procurement, investments, services, and e-commerce. The FTA provides new trade and investment opportunities for both countries and will encourage economic reforms and liberalization already underway.

FOREIGN RELATIONS

Morocco is a moderate Arab state which maintains close relations with Europe and the United States. It is a member of the UN and belongs to the Arab League, Arab Maghreb Union (UMA), Organization of the Islamic Conference (OIC), and the Non-Aligned Movement. King Mohammed VI is the chairman of the OIC's Al-Quds Jerusalem Committee. Although not a member of the African Union (formerly the Organization of African Unity—OAU), Morocco remains involved in African diplomacy. It contributes consistently to UN peacekeeping efforts on the continent.

Morocco is active in Maghreb, Arab, and African affairs. It supports the search for peace and moderation in the Middle East. In 1986, then-King Hassan II took the daring step of inviting then-Israeli Prime Minister Peres for talks, becoming only the second Arab leader to host an Israeli leader. Following the September 1993 signing of the Israeli-Palestinian Declaration of Principles, Morocco accelerated its economic ties and political contacts with Israel. In September 1994, Morocco and Israel announced the opening of bilateral liaison offices. These offices were closed in 2000 following sustained Israeli-Palestinian violence, but Moroccan-Israeli diplomatic contacts continue.

Morocco was the first Arab state to condemn Iraq's invasion of Kuwait in 1990, and sent troops to help defend Saudi Arabia. Morocco maintains close relations with Saudi Arabia and the Persian Gulf states, which have provided Morocco with substantial amounts of financial assistance. Morocco has supported efforts to stabilize Iraq following the downfall of Saddam Hussein.

Morocco was among the first Arab and Islamic states to denounce the September 11, 2001 terrorist attacks in the United States and declare solidarity with the American people in the war against terror. Morocco has seen its own terrorism at home as well. On May 16, 2003, Moroccan suicide bombers simultaneously attacked five sites in Casablanca, killing more than 40 people and wounding over 100. More than a million people subsequently demonstrated to condemn the attacks. In April 2007, a series of suicide bomb attacks occurred in central Casablanca, one taking place near the U.S. consulate general and one near the American Language Center. The bombings demonstrated Morocco's vulnerability to extremists who capitalize on widespread poverty and social exclusion.

The major issue in Morocco's foreign relations is its claim to Western Sahara. As a result of Algeria's continued support for the Polisario Front in the dispute over Western Sahara, relations between Morocco and Algeria have remained strained over the past several decades, although they have full diplomatic relations and there is periodic high-level contact between the two countries.

Western Sahara

For more than 30 years, Morocco and the independence-seeking Popular Front of the Liberation of Saguia al Hamra and Rio de Oro (Polisario Front) have vied for control of the Western Sahara, a former Spanish territory. Morocco's claim to sovereignty over the Western Sahara is based largely on a historical argument of traditional loyalty of the Sahrawi tribal leaders to the Moroccan sultan as spiritual leader and ruler. The Polisario claims to represent the aspirations of the Western Saharan inhabitants for indepen-

dence. Algeria claims none of the territory for itself but maintains that Sahrawis should determine the territory's future status.

From 1904 until 1975, Spain occupied the entire territory, which is divided into a northern portion, the Saguia el Hamra, and a southern two-thirds, known as Rio de Oro. In 1969, the Polisario Front was formed to combat the occupation of the territory. In November 1975, King Hassan mobilized 350,000 unarmed Moroccan citizens in what came to be known as the "Green March" into Western Sahara. The march was designed to both demonstrate and strengthen Moroccan claims to the territory. On November 14, Spain, Morocco, and Mauritania announced a tripartite agreement for an interim administration under which Spain agreed to share administrative authority with Morocco and Mauritania, leaving aside the question of sovereignty. With the establishment of a Moroccan and Mauritanian presence throughout the territory, however, Spain's role in the administration of the Western Sahara ceased.

After a period of hostilities, Mauritania withdrew from the territory in 1979 and signed a peace treaty with the Polisario, relinquishing all claims to the territory. Moroccan troops occupied the region vacated by Mauritania and later proclaimed the territory reintegrated into Morocco. Morocco subsequently built a fortified berm around three-fourths of Western Sahara and has de facto administrative control over 80% of the territory.

At the OAU (now African Union) summit in June 1981, King Hassan announced his willingness to hold a referendum in the Western Sahara. Subsequent meetings of an OAU Implementation Committee proposed a cease-fire, a UN peacekeeping force, and an interim administration to assist with an OAU-UN-supervised referendum on the issue of independence or annexation. In 1984, the OAU seated a delegation of the Sahara Democratic Arab Republic (SDAR), the shadow government of the Polisario. Morocco subsequently withdrew from the OAU. In 1988, Moroccan and Polisario representatives agreed on a joint UN/OAU settlement proposal for a referendum, but due to disagreements it never took place. In 1991, the UN brokered a cease-fire and settlement plan, and established the United Nations Mission for Referendum in Western Sahara (known by its French acronym, MINURSO), which deployed a roughly 200-person monitoring force to the territory.

The UN continues to explore with the parties ways of arriving at a mutually agreed political settlement and to promote confidence-building measures between the parties in the interim. In 2003, former Secretary of State James Baker, working as UN Secretary General Kofi Annan's Personal Envoy, put forward a peace plan calling for a referendum on issues of autonomy or integration with Morocco. While the Polisario Front and the Algerian Government accepted the plan, Morocco rejected it. After a seven-year effort to assist the parties in coming to an agreement, James Baker resigned as Personal Envoy in June 2004. In August of the same year, Kofi Annan appointed Alvaro de Soto Special Representative for the Western Sahara, to continue Baker's work. Special Representative de Soto left MINURSO in May 2005, and was replaced in July 2005 by Peter van Walsum of the Netherlands.

The Western Sahara dispute remains the primary impediment to regional integration and development goals. The parties were able to set aside some of their differences when, in August 2004, U.S. Senator Richard Lugar led a mission to the region that resulted in the release of 404 Moroccan prisoners of war who had long been held by the Polisario. Today, approximately 90,000 Sahrawi refugees live in camps around Tindouf, Algeria. The exact number of refugees living in these camps is not known since there has never been a reliable census of the population. Several thousand Sahrawis also live in the Moroccan-controlled area of Western Sahara among a large number of Moroccan settlers. Morocco considers the Western Sahara part of its national territory, while Polisario insists on the right of the people of the Western Sahara to self-determination. Algeria supports self-determination of the Sahrawis. The issue remains a major stumbling block to Moroccan-Algerian relations and regional integration.

The United States has consistently encouraged the parties to work with the United Nations, and with each other, in a spirit of flexibility and compromise, to find a mutually acceptable settlement. In this regard, the U.S. has welcomed Morocco's recent introduction of an autonomy initiative, is encouraged that it has spurred discussion, and believes that it has created an opportunity for Morocco and the Polisario to come to an agreement on this long-simmering problem. The United Nations Security Council resolution, which provides MINURSO its mandate, has been renewed for six-month intervals since its inception and is expected to be approved for a subsequent extension in October 2007.

The U.S. has raised with the UN our support for direct negotiations without preconditions, as called for in the resolution, and in June and August 2007 the Moroccans and the Polisario, with Algeria and Mauritania participating as interested neighbor states, met for two rounds of talks in Manhasset, New York, mediated by Peter van Walsum.

U.S.-MOROCCAN RELATIONS

Morocco was the first country to seek diplomatic relations with the Government of the United States in 1777, and remains one of our oldest and closest allies in the region. Formal U.S. relations with Morocco date from 1787, when the two nations negotiated a Treaty of Peace and Friendship. Renegotiated in 1836, the treaty is still in force, constituting the longest unbroken treaty relationship in U.S. history. As testament to the special nature of the U.S.-Moroccan rela-

tionship, Tangier is home to the oldest U.S. diplomatic property in the world, and the only building on foreign soil that is listed in the U.S. National Register of Historic Places, the American Legation in Tangier (now a museum).

U.S.-Moroccan relations, characterized by mutual respect and friendship, have remained strong through cooperation and sustained high-level dialogue. King Hassan II visited the United States several times during his reign as King, meeting with Presidents Kennedy, Johnson, Carter, Reagan, Bush, and Clinton. King Mohammed VI has continued his father's tradition; he made his first trip to the U.S. as King on June 20, 2000. Prime Minister Jettou visited Washington in January 2004, and King Mohammed came to the United States in July 2004. Then-Secretary of State Colin Powell traveled to Morocco in December 2004 to co-chair with Foreign Minister Benaissa the first meeting of the G8-BMENA "Forum for the Future." In August 2007, Under Secretary for Public Diplomacy and Public Affairs Karen Hughes visited Morocco to meet with Moroccan officials, Moroccan nongovernmental organizations, and students.

As a stable, democratizing, and liberalizing Arab Muslim nation, Morocco is important for U.S. interests in the Middle East. Accordingly, U.S. policy toward Morocco seeks sustained and strong engagement, and identifies priorities for reform, conflict resolution, counterterrorism cooperation, and public outreach.

The U.S. Agency for International Development (USAID) and its predecessor agencies have managed an active and effective assistance program in Morocco since 1953, for a cumulative amount exceeding $2 billion. The amount of USAID assistance to Morocco in FY 2006 was $19.2 million, with an estimated $18.9 million allotted for FY 2007. USAID's current multi-sectoral strategy (2004-2008) consists of three strategic objectives in creating more opportunities for trade and investment, basic education and workforce training, and government responsiveness to citizen needs. The Peace Corps has been active in Morocco for more than 40 years, with the first group of 53 volunteers arriving in the country in 1963. Since that time, nearly 4,000 volunteers have served in Morocco, and have served in a variety of capacities including lab technology, urban development, commercial development, education, rural water supply, small business development, beekeeping, and English training. In 2007, 197 volunteers served in Morocco, working in four sectors: health, youth development, small business, and the environment.

TRAVEL

Consular Information Sheet

August 20, 2008

Country Description: Morocco is a constitutional monarchy with a bicameral Parliament and independent judiciary; however, ultimate authority rests with the king. The population is estimated to be 33 million. While Morocco has a developing economy, modern tourist facilities and means of transportation are widely available, though the quality may vary depending on price and location.

Entry Requirements: Travelers to Morocco must have a valid passport. Visas are not required for American tourists traveling to Morocco for fewer than 90 days. For visits of more than 90 days, Americans must apply at their local police station to extend their visas and provide a valid reason for the extension. Travelers who plan to reside in Morocco must obtain a residency permit. A residency permit may be requested and obtained from immigration authorities (Service Etranger) at the central police station of the district of residence. U.S. citizens are encouraged to carry a copy of their U.S. passports with them at all times, so that, if questioned by local officials, proof of identity and U.S. citizenship is readily available. No vaccinations are required to enter Morocco.

Children born to a Moroccan father may experience difficulty in leaving Morocco without the father's permission. Under Moroccan law, these children are considered Moroccan citizens. Even if the children bear U.S. passports, immigration officials may require proof that the father has approved their departure before the children will be allowed to leave Morocco. Although women, regardless of their nationality, are normally granted custody of their children in divorces, the father must approve the children's departure from Morocco. Women married to Moroccans do not need their spouse's permission to leave Morocco.

For further information on entry/exit requirements for Morocco, please contact the Embassy of Morocco at 1601 21st Street NW, Washington, DC 20009, telephone (202) 462-7979 to 82, fax 202-462-7643, or the Moroccan Consulate General in New York at 10 E. 40th Street, New York, NY 10016, telephone (212) 758-2625, fax: 212-779-7441. Visit the Embassy of Morocco web site at http://moroccoembassy.com for the most current visa information.

Safety and Security: In March and April 2007, a series of terrorist bombings occurred in Casablanca, two of which simultaneously occurred outside the U.S. Consulate General and the private American Language Center. In 2003, a series of similar attacks in Casablanca targeted hotels and restaurants. The potential for terrorist violence against American interests and citizens remains high in Morocco. Moroccan authorities continue to disrupt groups seeking to attack U.S. or Western-affiliated and Moroccan government targets, arresting numerous individuals associated with international terrorist groups. With indications that such groups still seek to carry out attacks in Morocco, it is important for American citizens to be keenly aware of their surroundings and adhere to prudent security practices such as avoiding predictable travel patterns and maintaining a low profile. Establishments that are readily identifiable with the United States are potential targets for attacks. These may include facilities where U.S. citizens and other foreigners congregate, including clubs, restaurants, places of worship, schools, hotels, movie theaters and other public areas. Such targets may also include establishments where activities occur that may offend religious sensitivities, such as casinos or places where alcoholic beverages are sold or consumed. All U.S. citizens are urged to remain alert to local security developments and be vigilant regarding their personal security and report any suspicious incidents or problems immediately to Moroccan authorities and the U.S. Embassy or Consulate.

Demonstrations occur frequently in Morocco and usually center on local domestic issues. During periods of heightened regional tension, large demonstrations may take place in the major cities. All demonstrations require a government permit, but on occasion spontaneous unauthorized demonstrations occur, which have greater potential for violence. In addition, various unions or political groups may organize strikes to protest an emerging issue or government policy. Travelers should be cognizant of the current levels of tension in Morocco and stay informed of regional issues that could resonate in Morocco and create an anti-American response. Avoid demonstrations if at all possible. If caught in a demonstration, remain calm and move away immediately when provided the opportunity.

For many years, the Western Sahara experienced armed conflict between government forces and the POLISARIO Front, which continues to seek independence for the territory. However, a U.N.-administered cease-fire has been in place since 1991. The conflict left thousands of unexploded mines in the Western Sahara and in areas of Mauritania adjacent to the Western Saharan border. Exploding mines are occasionally reported, and have caused death and injury. Travel to the Western Sahara remains restricted by the Moroccan government; persons planning to travel to the region should obtain information on clearance requirements from the Moroccan Embassy.

For the latest security information, Americans traveling abroad should regularly monitor the Department's web site, where the current Worldwide Caution Travel Alert, Middle East and North Africa Travel Alert, Travel Warnings and other Travel Alerts can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S. and Canada, or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444. These numbers are available from 8:00 a.m. to 8:00 p.m. Eastern Time, Monday through Friday (except U.S. federal holidays).

Crime: Crime in Morocco is a serious concern, particularly in the major cities and tourist areas. Aggressive panhandling, pick-pocketing, purse-snatching, theft from occupied vehicles stopped in traffic and harassment of women are the most frequently reported crimes. Criminals have used weapons, primarily knives, during some street robberies and burglaries. These have occurred at any time of day and night, not only in isolated places or areas less frequented by visitors, but in crowded areas as well. It is always best to have a travel companion and utilize taxis from point to point, particularly at night and when moving about unfamiliar areas. Residential break-ins also occur and have on occasion turned violent, but most criminals look for opportunities based on stealth rather than confrontation.

Women walking alone in certain areas of cities and rural areas are particularly vulnerable to harassment from men. Women are advised to travel with a companion or in a group when possible and to ignore any harassment. Responding to verbal harassment can escalate the situation. The best course of action is generally not to respond or make eye contact with the harasser.

Joggers should be mindful of traffic and remain in more heavily populated areas. It is always best to have a jogging companion and avoid isolated areas or jogging at night.

Taxis in Morocco are generally crime-free, although city buses are not considered safe. Trains are generally safe, but theft, regardless of the time of day, sometimes occurs. Avoid carrying large sums of cash and be particularly alert when using ATM machines. In the event you are victimized by crime or an attempted crime, or experience any security-related incident during your stay in Morocco, please report the incident to the local police and the U.S. Consulate General in Casablanca as soon as possible.

Fraud in Morocco may involve a wide range of situations from financial fraud to relationship fraud for the purpose of obtaining a visa. If you believe you are the victim of a fraudulent scheme, you may wish to consult with an attorney to best determine what your options are under Moroccan law. Since fraud can involve a wide range of circumstances, it is difficult to provide general guidelines on how to pursue criminal charges in these issues.

There have been instances in which an American has met a Moroccan online and come to live with or visit him or her in Morocco and found themselves in financial or otherwise difficult situations while in country. If you are concerned about a family member or friend who is visiting someone he or she met online, you can contact the American Citizens Services Unit at 212-22-26-71-51 or email acscasablanca@state.gov.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police to obtain a "certificat de perte" (statement of loss/theft) and to the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, to contact family members or friends and explain how funds may be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

The local equivalent to the "911" emergency line in Morocco is 190.

Medical Facilities and Health Information: Adequate medical care is available in Morocco's largest cities, particularly in Rabat and Casablanca, although not all facilities meet high-quality standards. Specialized care or treatment may not be available. Medical facilities are adequate for non-emergency matters, particularly in the urban areas, but most medical staff will have limited or no English skills. Most ordinary prescription and over-the-counter medicines are widely available. However, specialized prescriptions may be difficult to fill and availability of all medicines in rural areas is unreliable. Emergency and specialized care outside the major cities is far below U.S. standards, and in many instances may not be available at all. Travelers planning to drive in the mountains and other remote areas may wish to carry a medical kit and a Moroccan phone card for emergencies.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's web site at http://wwwn.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith/en.

The U.S. Department of State is unaware of any HIV/AIDS entry restrictions for visitors to or foreign residents of Morocco.

In the event of vehicle accidents involving injuries, immediate ambulance service usually is not available. The police emergency services telephone number is 190 (See Traffic Safety and Road Conditions section below).

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Morocco is provided for general reference only, and may not be totally accurate in a particular location or circumstance. Traffic accidents are a significant hazard in Morocco. Driving practices are very poor, and have resulted in serious injuries to and fatalities of U.S. citizens. This is particularly true at dusk during the Islamic holy month of Ramadan, when adherence to traffic regulations is lax, and from July to September when Moroccans resident abroad return from Europe by car in large numbers. Congested streets are characteristic of urban driving. Drivers should also exercise extreme caution when driving at night due to poor lighting systems along roads. Traffic signals do not always function, and are sometimes difficult to see. Modern freeways link the cities of Tangier, Rabat, Fez, Casablanca, and Marrakesh. Two-lane highways link other major cities.

Secondary routes in rural areas are often narrow and poorly paved. Roads through the Rif and Atlas mountains are steep, narrow, windy, and dangerous. Maximum caution should be exercised when driving in the mountains. Pedestrians, scooters, and animal-drawn conveyances are common on all roadways, including the freeways, and driving at night should be avoided, if possible. During the rainy season (November—March) flash flooding is frequent and sometimes severe, washing away roads and vehicles in rural areas. Often Moroccan police officers pull over drivers for inspection within the city and on

highways. Confiscation of a driver's license is possible if a violator is unable or unwilling to settle a fine at the time of a traffic stop. In the event of a traffic accident, including accidents involving injuries, the parties are required to remain at the scene and not move their vehicles until the police have arrived and documented all necessary information. The police emergency services telephone number is 190.

While public buses and taxis are inexpensive, drivers typically exhibit poor driving habits, and buses are frequently overcrowded. The train system has a good safety record. Trains, while sometimes crowded, are comfortable and generally on time.

Visit the website of the Moroccan National Tourist Office and the Moroccan Ministry of Transportation's road safety web site at http://www.mtpnet.gov.ma/MET_New.

Aviation Safety Oversight: The U.S. Federal Aviation Administration (FAA) has assessed the Government of Morocco's Civil Aviation Authority as being in compliance with International Civil Aviation Organization (ICAO) aviation safety standards for oversight of Morocco's air carrier operations. For more information, travelers may visit the FAA's web site at http://www.faa.gov.

Special Circumstances: The government of Morocco considers all persons born to Moroccan fathers to be Moroccan citizens. In addition to being subject to all American laws, U.S. citizens who also possess the nationality of Morocco may be subject to other laws that impose special obligations on citizens of Morocco. Recently, Morocco has begun allowing Moroccan mothers of children born outside of Morocco to petition for their children's citizenship. For further information on that process, please contact the Moroccan Consulate General in New York or the Embassy of Morocco in Washington DC.

Current Moroccan customs procedures do not provide for accurate or reliable registration of large quantities of U.S. dollars brought into the country by tourists or other visitors. As a result, travelers encounter difficulties when they attempt to depart with the money. In particular, American citizens with dual Moroccan nationality have been asked to provide proof of the source of the funds and have incurred heavy fines. The export of Moroccan currency (dirhams) is prohibited; however, Moroccan currency can be converted back into U.S. dollars prior to departure only if the traveler has a bank or money transfer receipt indicating he or she exchanged dollars for dirhams while in Morocco.

Also, Moroccan customs authorities may enforce strict regulations concerning temporary importation into or export from Morocco of items such as firearms, religious materials, antiquities, business equipment, and large quantities of currency. It is advisable to contact the Embassy of Morocco in Washington, DC or the Moroccan Consulate General in New York for specific information concerning customs requirements.

Islam is the official religion in Morocco. However, the constitution provides for the freedom to practice one's religion. The Moroccan government does not interfere with public worship by the country's Jewish minority or by expatriate Christians. Proselytizing is, however, prohibited. In the past, American citizens have been arrested, detained and/or expelled for discussing or trying to engage Moroccans in debate about Christianity.

Although rare, security personnel in Morocco may at times place foreign visitors under surveillance. Taking photographs of anything that could be perceived as being of military or security interest may result in problems with the authorities. As a general rule, travelers should not photograph diplomatic missions, government buildings or other sensitive facilities and, when in doubt, they should ask for permission from the appropriate Moroccan authorities.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating Moroccan laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Morocco are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States. Possession of pornography is also a crime subject to prosecution in Morocco.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in Morocco are encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration web site, and to obtain updated information on travel and security within Morocco. Americans without Internet access may register in person at the U.S. Consulate General located at 8 Boulevard Moulay Youssef, Casablanca. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency. All consular matters for Americans in Morocco are handled at the U.S. Consulate General in Casablanca. The U.S. Embassy is located at 2 Avenue Mohammed Al Fassi (formerly Avenue de Marrakech) in the capital city of Rabat, telephone (212)(37) 76-22-65. The workweek is Monday to Friday; however, the Consulate is closed to the public on Fridays for all consular services with the exception of emergency services for American citizens. The consular section's American Citizens Services hotline is (212)(22)-26-71-51 and the fax number is (212) (22)-29-77-01. For

emergency services after-hours, please call the Duty Officer cell phone at (212)(61)17-23-67 for Casablanca and (212)(61)-13-19-39 for Rabat. Please note that for calls originating in Morocco, callers should dial 0 instead of 212.

Please visit http://www.usembassy.ma for information on services offered by the U.S. Embassy in Rabat and http://casablanca.usconsulate.gov for information on all consular services and other assistance offered at the U.S. Consulate General in Casablanca

International Parental Child Abduction

November 2008

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *International Child Abduction* section of this book and review current reports online at www.travel.state.gov/childabduction.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is provided for general information only. Questions involving interpretation of specific foreign laws should be addressed to foreign legal counsel.

Dual Nationality: The government of Morocco does not recognize "dual nationality." When the father is a citizen of Morocco, children automatically acquire Moroccan citizenship at birth, regardless of the country of birth, and must enter the country on Moroccan passports.

Enforcement of Foreign Court Orders: A parent can request that a foreign custody order be recognized in Morocco, but enforcement will result only if the order conforms to Moroccan law. Therefore, as a practical matter, foreign custody orders are not generally recognized in Morocco, and the parent must seek legal representation in Morocco and file for custody there.

Custody Disputes: When child custody disputes arise between parents, one of whom is a citizen of Morocco, custody decisions are based on Islamic law. Child custody cases are complex. Moroccan courts consider the parents' religion, place of permanent residence, income, and the mother's subsequent marital status.

Right of Custody and Travel Restrictions: Although women are normally granted custody of their children in divorces, regardless of nationality, the right of the father to control his children's travel outside of Morocco is inviolable. Therefore, even if the children bear U.S. passports, the father must approve the children's departure from Morocco. Immigration officials may require proof that the father approves the departure. Women must also obtain permission to move the children more than 100 kilometers from their last residence prior to the divorce. American women married to Moroccans do not have to have permission of their husband to leave Morocco alone. Specific questions regarding child custody in Morocco may be addressed to:

Passports for Minors and the Children's Passport Issuance Alert Program: For more information on these topics, see the *International Parental Child Abduction* section of this publication and review current reports from the U.S. Department of State at www.travel.state.gov/childabduction.

More Information: For more information on either preventing or responding to an international parental child abduction, contact the Office of Children's Issues, U.S. Department of State at (202) 736-9090 or visit its web site at www.travel.state.gov/childabduction.

MOZAMBIQUE

Compiled from the September 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Republic of Mozambique

PROFILE

Geography

Area: 801,590 sq. km.; slightly less than twice the size of California.

Cities: Capital—Maputo (pop. 1.2 million—2005 est.); Beira, Matola, Nampula, Quelimane, Tete, Nacala.

Terrain: Varies from lowlands to high plateau.

Climate: Tropical to subtropical.

People

Nationality: Noun and adjective—Mozambican(s).

Population: (2006 est.) 19.7 million; 48.2% male and 51.8% female.

Population annual growth rate: (2006) 1.3%.

Ethnic groups: Makua, Tsonga, Makonde, Shangaan, Shona, Sena, Ndau, and other indigenous groups, and approximately 10,000 Europeans, 35,000 Euro-Africans, and 15,000 South Asians.

Religions: Christian 40%, Muslim 20%, indigenous African and other beliefs 40% (1997 census—recent estimates give a higher Muslim percentage).

Languages: Portuguese (official), various indigenous languages.

Education: Mean years of schooling (adults over 25) men 2.1, women 1.2. Primary net enrolment rate (2003)—61%. Adult illiteracy rate (2003)—53.6%.

Health: Infant mortality rate (2006)—129/1,000. Life expectancy (2006)—40 years.

Work force: (9.4 million est. 2006) Agriculture—81%; industry—6%; services—13% (1997 estimate).

Government

Type: Multi-party democracy.

Independence: June 25, 1975.

Constitution: November 1990.

Government branches: Executive—President, Council of Ministers. Legislative—National Assembly, municipal assemblies. Judicial—Supreme Court, provincial, district, and municipal courts.

Political subdivisions: 10 provinces, 224 districts, and 33 municipalities, of which Maputo City is the largest.

Political parties: Front for the Liberation of Mozambique (FRELIMO); Mozambican National Resistance (RENAMO); numerous small parties.

Suffrage: Universal adult, 18 years and older.

Economy

GDP: (2006) $6.4 billion.

Annual economic (GDP) growth rate: (2006) 7.9%.

Per capita GDP: (2006) $320.

Natural resources: Hydroelectric power, coal, natural gas, titanium ore, tantalite, graphite, iron ore, semi-precious stones, and arable land.

Agriculture: (21% of GDP; annual growth 7.9%) Exports—cotton, cashew nuts, sugarcane, tea, cassava (tapioca), corn, coconuts, sisal, citrus and tropical fruits, potatoes, sunflowers, beef and poultry. Domestically consumed food crops—corn, pigeon peas, cassava, rice, beef, pork, chicken, and goat.

Industry: (31% of GDP; annual growth 10%) Types—food, beverages, chemicals (fertilizer, soap, paints), aluminum, petroleum products, textiles, cement, glass, asbestos, and tobacco.

Services: (39.7% of GDP; annual growth 4.7%).

Trade: Imports (2006)—$2.82 billion. Import commodities—machinery and equipment, vehicles, fuel, chemicals, metal products, foodstuffs and textiles. Main suppliers—South Africa, Netherlands, Portugal. Exports (2006)—$2.43 billion. Export commodities—aluminum, cashews, prawns, cotton, sugar, citrus, timber, bulk electricity, natural gas. Main markets—Belgium, South Africa, Zimbabwe.

PEOPLE

Mozambique's major ethnic groups encompass numerous subgroups with

diverse languages, dialects, cultures, and histories. Many are linked to similar ethnic groups living in neighboring countries. The north-central provinces of Zambezia and Nampula are the most populous, with about 45% of the population. The estimated 4 million Makua are the dominant group in the northern part of the country—the Sena and Ndau are prominent in the Zambezi valley, and the Tsonga and Shangaan dominate in southern Mozambique.

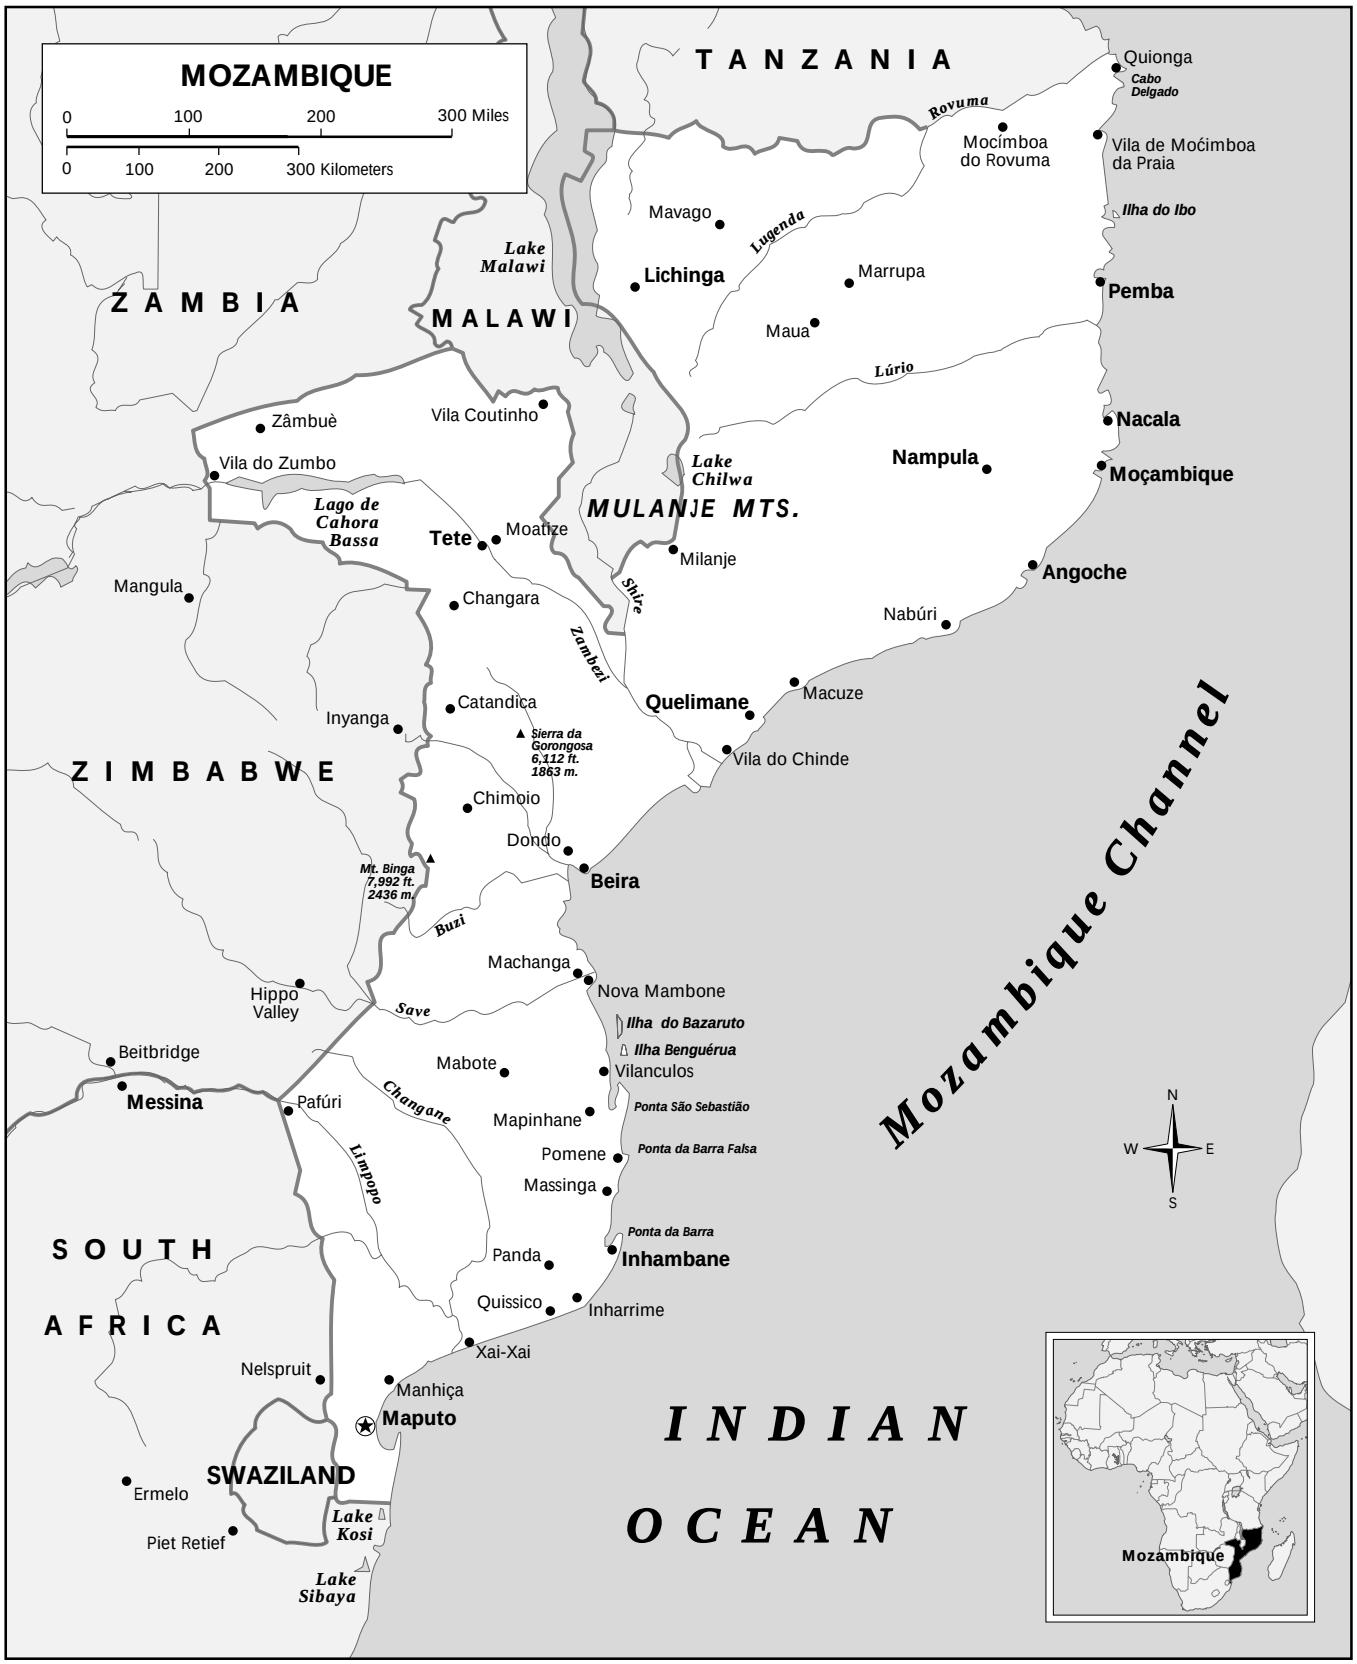
Despite the influence of Islamic coastal traders and European colonizers, the people of Mozambique have largely retained an indigenous culture based on small-scale agriculture. Mozambique's most highly developed art forms are wood sculpture, for which the Makonde in northern Mozambique are particularly renowned, and dance. The middle and upper classes continue to be heavily influenced by the Portuguese colonial and linguistic heritage.

During the colonial era, Christian missionaries were active in Mozambique, and many foreign clergy remain in the country. According to the national census, about 40% of the population is Christian, at least 20% is Muslim, and the remainder adheres to traditional beliefs.

Under the colonial regime, educational opportunities for black Mozambicans were limited, and 93% of that population was illiterate. In fact, most of today's political leaders were educated in missionary schools. After independence, the government placed a high priority on expanding education, which reduced the illiteracy rate to about two-thirds as primary school enrollment increased. Unfortunately, in recent years school construction and teacher training enrollments have not kept up with population increases. With post-war enrollments reaching all-time highs, the quality of education has suffered.

HISTORY

Mozambique's first inhabitants were San hunter and gatherers, ancestors of the Khoisani peoples. Between the first and fourth centuries AD, waves of Bantu-speaking peoples migrated from the north through the Zambezi River valley and then gradually into the plateau and coastal areas. The Bantu were farmers and ironworkers.



When Portuguese explorers reached Mozambique in 1498, Arab trading settlements had existed along the coast and outlying islands for several centuries. From about 1500, Portuguese trading posts and forts became regular ports of call on the new route to the east. Later, traders and prospectors penetrated the interior regions seeking gold and slaves. Although Portuguese influence gradually expanded, its power was limited and exercised through individual settlers who were granted extensive autonomy. As a result, investment lagged while Lisbon devoted itself to the more lucrative trade with India and the Far East and to the colonization of Brazil.

By the early 20th century the Portuguese had shifted the administration of much of the country to large private companies, controlled and financed mostly by the British, which established railroad lines to neighboring countries and supplied cheap—often forced—African labor to the mines and plantations of the nearby British colonies and South Africa. Because policies were designed to benefit white settlers and the Portuguese homeland, little attention was paid to Mozambique's national integration, its economic infrastructure, or the skills of its population.

After World War II, while many European nations were granting independence to their colonies, Portugal clung to the concept that Mozambique and other Portuguese possessions were overseas provinces of the mother country, and emigration to the colonies soared. Mozambique's Portuguese population at the time of independence was about 250,000. The drive for Mozambican independence developed apace, and in 1962 several anti-colonial political groups formed the Front for the Liberation of Mozambique (FRELIMO), which initiated an armed campaign against Portuguese colonial rule in September 1964. After 10 years of sporadic warfare and major political changes in Portugal, Mozambique became independent on June 25, 1975.

The last 30 years of Mozambique's history have reflected political developments elsewhere in the 20th century. Following the April 1974 coup in Lisbon, Portuguese colonialism collapsed. In Mozambique, the military decision to withdraw occurred within the context of a decade of armed anti-colonial struggle, initially led by American-educated Eduardo Mondlane, who was assassinated in 1969. When independence was achieved in 1975, the leaders of FRELIMO's military campaign rapidly established a one-party state allied to the Soviet bloc and outlawed rival political activity. FRELIMO eliminated political pluralism, religious educational institutions, and the role of traditional authorities.

The new government gave shelter and support to South African (ANC) and Zimbabwean (ZANU) liberation movements while the governments of first Rhodesia and later apartheid South Africa fostered and financed an armed rebel movement in central Mozambique called the Mozambican National Resistance (RENAMO). Civil war, sabotage from neighboring states, and economic collapse characterized the first decade of Mozambican independence. Also marking this period were the mass exodus of Portuguese nationals, weak infrastructure, nationalization, and economic mismanagement. During most of the civil war, the government was unable to exercise effective control outside of urban areas, many of which were cut off from the capital. An estimated 1 million Mozambicans perished during the civil war, 1.7 million took refuge in neighboring states, and several million more were internally displaced. In the third FRELIMO party congress in 1983, President Samora Machel conceded the failure of socialism and the need for major political and economic reforms. He died, along with several advisers, in a suspicious 1986 plane crash.

Mozambique

His successor, Joaquim Chissano, continued the reforms and began peace talks with RENAMO. The new constitution enacted in 1990 provided for a multi-party political system, market-based economy, and free elections. The civil war ended in October 1992 with the Rome General Peace Accords. Under supervision of the ONUMOZ peacekeeping force of the United Nations, peace returned to Mozambique.

By mid-1995 the more than 1.7 million Mozambican refugees who had sought asylum in neighboring Malawi, Zimbabwe, Swaziland, Zambia, Tanzania, and South Africa as a result of war and drought had returned, as part of the largest repatriation witnessed in Sub-Saharan Africa. Additionally, a further estimated 4 million internally displaced people returned to their areas of origin.

GOVERNMENT AND POLITICAL CONDITIONS

Mozambique is a multi-party democracy under the 1990 constitution. The executive branch comprises a president, prime minister, and Council of Ministers. There is a National Assembly and municipal assemblies. The judiciary comprises a Supreme Court and provincial, district, and municipal courts. Suffrage is universal at 18.

In 1994 the country held its first democratic elections. Joaquim Chissano was elected President with 53% of the vote, and a 250-member National Assembly was voted in with 129 FRELIMO deputies, 112 RENAMO deputies, and 9 representatives of three smaller parties that formed the Democratic Union (UD). Since its formation in 1994, the National Assembly has made some progress in becoming a body increasingly more independent of the executive. By 1999, more than one-half (53%) of the legislation passed originated in the Assembly.

After some delays, in 1998 the country held its first local elections to provide for local representation and some budgetary authority at the municipal level. The principal opposition party, RENAMO, boycotted the local elections, citing flaws in the registration process. Independent slates contested the elections and won seats in municipal assemblies. Turnout was very low.

In the aftermath of the 1998 local elections, the government resolved to make more accommodations to the opposition's procedural concerns for the second round of multiparty national elections in 1999. Working through the National Assembly, the electoral law was rewritten and passed by consensus in December 1998. Financed largely by international donors, a very successful voter registration was conducted from July to September 1999, providing voter registration cards to 85% of the potential electorate (more than 7 million voters).

The second general elections were held December 3-5, 1999, with high voter turnout. International and domestic observers agreed that the voting process was well organized and went smoothly. Both the opposition and observers subsequently cited flaws in the tabulation process that, had they not occurred, might have changed the outcome. In the end, however, international and domestic observers concluded that the close result of the vote reflected the will of the people.

President Chissano won the presidency with a margin of 4% points over the RENAMO-Electoral Union coalition candidate, Afonso Dhlakama, and began his 5-year term in January 2000. FRELIMO increased its majority in the National Assembly with 133 out of 250 seats. RENAMO-UE coalition won 116 seats, one went independent, and no third parties are represented.

The opposition coalition did not accept the National Election Commission's results of the presidential vote and filed a formal complaint to the Supreme Court. One month after the voting, the court dismissed the opposition's challenge and validated the election results. The opposition did not file a complaint about the results of the legislative vote.

The second local elections, involving 33 municipalities with some 2.4 million registered voters, took place in November 2003. This was the first time that FRELIMO, RENAMO-UE, and independent parties competed without significant boycotts. The 24% turnout was well above the 15% turnout in the first municipal elections. FRELIMO won 28 mayoral positions and the majority in 29 municipal assemblies, while RENAMO won 5 mayoral positions and the majority in 4 municipal assemblies. The voting was conducted in an orderly fashion without violent incidents. However, the period immediately after the elections was marked by objections about voter and candidate registration and vote tabulation, as well as calls for greater transparency.

In May 2004, the government approved a new general elections law that contained innovations based on the experience of the 2003 municipal elections.

The third general elections occurred on December 1-2, 2004. FRELIMO candidate Armando Guebuza won with 64% of the popular vote. His opponent, Afonso Dhlakama of RENAMO, received 32% of the popular vote. The estimated 44% turnout was well below the almost 70% turnout in the 1999 general elections. FRELIMO won 160 seats in Parliament. A coalition of RENAMO and several small parties won the 90 remaining seats. Armando Guebuza was inaugurated as the President of Mozambique on February 2, 2005. The government has scheduled provincial and municipal elections in 2008, and presidential and parliamentary elections in 2009.

ECONOMY

Macroeconomic Review

Alleviating poverty. At the end of the civil war in 1992, Mozambique ranked among the poorest countries in the world. It still ranks among the least developed nations with very low socioeconomic indicators. In the last decade, however, Mozambique has experienced a notable economic recovery. Per capita GDP in 2006 was estimated at U.S. $320, a significant increase over the mid-1980s level of U.S. $120. With high foreign debt and a good track record on economic reform, Mozambique was the first African nation and sixth country worldwide to qualify for debt relief under the World Bank and International Monetary Fund (IMF) initial HIPC (Heavily Indebted Poor Countries) Initiative. In April 2000, Mozambique qualified for the Enhanced HIPC program and reached its completion point in September 2001. This led to the Paris Club members agreeing in November 2001 to substantially reduce the remaining bilateral debt, resulting in the complete forgiveness of a considerable volume of bilateral debt. The United States already finished the process and has forgiven Mozambique's debt.

During their summit in Scotland in July 2005, the G8 nations agreed to significant multilateral debt relief for the world's least developed nations. On December 21, 2005, the IMF formalized the complete cancellation of all Mozambican IMF debt contracted prior to January 1, 2005, worth U.S. $153 million.

Rebounding growth. The resettlement of civil war refugees, political stability and continuing economic reforms have led to a high economic growth rate. Between 1994 and 2006, average annual GDP growth was approximately 8%. Mozambique achieved this growth rate even though the devastating floods of 2000 slowed GDP growth to 2.1%. The World Bank is predicting average growth of 7% through 2008. Future strong expansion requires continued economic reforms, major foreign direct investment, and the resurrection of the agriculture, transportation and tourism sectors. Focusing on economic growth in the agricultural sector is a major challenge for the government. Although more than 80% of the population engages in small-scale agriculture, the sector suffers from inadequate infrastructure, commercial networks and investment. However a majority of Mozambique's arable land is still uncultivated, leaving room for considerable growth.

Low inflation. The government's tight control of spending and the money supply, combined with financial sector reform, successfully reduced inflation from 70% in 1994 to less than 5% in 1998-1999. Economic disruptions resulting from the devastating floods of 2000 caused inflation to jump to 12.7% that year. The government is still working to bring inflation down to those lower numbers. In 2004 inflation was 9.1%; in 2005 it climbed to 11.2%; in 2006 it dropped back down to 9.4%. As of March 2007, the floating exchange rate was approximately 26 meticais per dollar. (Note: In July 2006 the government revised its currency, dropping three zeros. Thus a coin formerly worth 1,000 meticais was from then on worth only one metical. And thus, where a dollar previously had been worth, for example, 26,000 meticais, it was from July onward worth 26.)

Extensive economic reform. Economic reform has been extensive. More than 1,200 state-owned enterprises (mostly small) have been privatized. Preparations for privatization and/or sector liberalization are underway for the remaining parastatals, including telecommunications, electricity, ports, and the railroads. The government frequently selects a strategic foreign investor when privatizing a parastatal. Additionally, customs duties have been reduced, and customs management has been streamlined and reformed. The government introduced a value-added tax in 1999 as part of its efforts to increase domestic revenues.

Improving trade imbalance. In 2006 Mozambique exported U.S. $2.43 billion worth of goods and imported U.S. $2.82 billion worth of goods. Support programs provided by foreign donors and private financing of foreign direct investment megaprojects and their associated raw materials have largely compensated for balance-of-payment shortfalls.

The medium-term outlook for exports is encouraging, as a number of recent foreign investment projects have improved the trade balance. This export growth is expected to continue. MOZAL I, a large aluminum smelter that commenced production in mid-2000, greatly expanded Mozambique's trade volume. In April 2001, the International Finance Corporation (IFC) approved financing assistance for MOZAL II, which doubled overall production capacity. Phase two went online in April 2003, five months ahead of schedule, using primarily Mozambican workers during construction. Traditional Mozambican exports include cashews, shrimp, fish, copra, sugar, cotton, tea and citrus and exotic fruits. Most of these industries are being rehabilitated. In addition, Mozambique is less dependent upon imports for basic food and manufactured goods as the result of steady increases in local production.

SADC trade protocol. In December 1999, the Mozambican Council of Ministers approved the Southern African Development Community (SADC) Trade Protocol. The Protocol will create a free trade zone among more than 200 million consumers in the SADC region. Implementation of the Protocol began in 2002 and has an overall zero-tariff target set for 2008; however, Mozambique's country-specific zero-tariff goal is currently 2015. Mozambique joined the World Trade Organization (WTO) on August 26, 1995.

FOREIGN RELATIONS

While allegiances dating back to the liberation struggle remain relevant, Mozambique's foreign policy has become increasingly pragmatic. The twin pillars of Mozambique's foreign policy are maintenance of good relations with its neighbors and maintenance and expansion of ties to development partners.

During the 1970s and early 1980s, Mozambique's foreign policy was inextricably linked to the struggles for majority rule in Rhodesia and South Africa, as well as superpower competition and the Cold War. Mozambique's decision to enforce UN sanctions against Rhodesia and deny that country access to the sea led Ian Smith's regime to undertake overt and covert actions to destabilize the country, including sponsoring the rebel group RENAMO. After the change of government in Zimbabwe in 1980, the apartheid regime in South Africa continued to finance the destabilization of Mozambique.

The 1984 Nkomati Accord, while failing in its goal of ending South African support to RENAMO, opened initial diplomatic contacts between the Mozambican and South African Governments. This process gained momentum with South Africa's elimination of apartheid, which culminated in the establishment of full diplomatic relations in October 1993. While relations with neighboring Zimbabwe, Malawi, Zambia, and Tanzania show occasional strains, Mozambique's ties to these countries remain strong.

In the years immediately following its independence, Mozambique benefited from considerable assistance from some western countries, notably the Scandinavians. Moscow and its allies, however, became Mozambique's primary economic, military, and political supporters and its foreign policy reflected this linkage. This began to change in 1983; in 1984 Mozambique joined the World Bank and International Monetary Fund. Western aid quickly replaced Soviet support, with the Scandinavians, the United States, the Netherlands, and the European Union becoming increasingly important sources of development assistance. Italy also maintains a profile in Mozambique as a result of its key role during the peace process. Relations with Portugal, the former colonial power, are complex and of some importance as Portuguese investors play a visible role in Mozambique's economy.

Mozambique is a member of the Non-Aligned Movement and ranks among the moderate members of the African Bloc in the United Nations and other international organizations. Mozambique also belongs to the Organization of African Unity/African Union and the Southern African Development Community. In 1994, the government became a full member of the Organization of the Islamic Conference, in part to broaden its base of international support but also to please the country's sizeable Muslim population. Similarly, in early 1996 Mozambique joined its Anglophone neighbors in the Commonwealth. In the same year, Mozambique became a founding member and the first President of the Community of Portuguese Language Countries (CPLP), and maintains close ties with other Lusophone states.

U.S.-MOZAMBICAN RELATIONS

Relations between the United States and Mozambique are good and steadily improving. By 1993, U.S. aid to Mozambique was prominent, due in part to significant emergency food assistance in the wake of the 1991-93 southern African drought, but more importantly in support of the peace and reconciliation process. During the process leading up to elections in October 1994, the United States served as a significant financier and member of the most important commissions established to monitor implementation of the Rome General Peace Accords. The United States is the largest bilateral donor to the country and plays a leading role in donor efforts to assist Mozambique.

The U.S. Embassy opened in Maputo on November 8, 1975, and the first American ambassador arrived in March 1976. In that same year, the United States extended a $10 million grant to the Government of Mozambique to help compensate for the economic costs of enforcing sanctions against Rhodesia. In 1977, however, largely motivated by a concern with human rights violations, the U.S. Congress prohibited the provision of development aid to Mozambique without a presidential certification that such aid would be in the foreign policy interests of the United States. Relations hit a nadir in March 1981,

when the Government of Mozambique expelled four members of the U.S. Embassy staff. In response, the United States suspended plans to provide development aid and to name a new ambassador to Mozambique. Relations between the two countries languished in a climate of stagnation and mutual suspicion.

Contacts between the two countries continued in the early 1980s as part of the U.S. administration's conflict resolution efforts in the region. In late 1983, a new U.S. ambassador arrived in Maputo, and the first Mozambican envoy to the United States arrived in Washington, signaling a thaw in the bilateral relationship. The United States subsequently responded to Mozambique's economic reform and drift away from Moscow's embrace by initiating an aid program in 1984. President Samora Machel paid a symbolically important official working visit to the United States in 1985, where he met President Reagan. After that meeting, a full U.S. Agency for International Development (USAID) mission was established, and significant assistance for economic reform efforts began. President Chissano met with President Bush in September 2003; previously, he had met with Presidents Reagan (October 1987), Bush (March 1990), and Clinton (November 1998), and also with Secretaries of State Powell (February 2002) and Baker (July 1992). Since taking office in February 2005, President Guebuza has visited the United States on five occasions. In June 2005, President Guebuza visited Washington, DC to take part in President Bush's mini-summit on Africa, along with the leaders of Ghana, Namibia, Botswana, and Niger. Later that month, he attended the Corporate Council on Africa (CCA) Business Summit in Baltimore. President Guebuza returned in September 2005 for the UN General Assembly in New York and in December 2005 attended the Fourth Development Cooperation Forum at the Carter Center in Atlanta. In 2006 he visited New York for the UN General Assembly, and in 2007 he visited Washington, DC for the signing of Mozambique's Millennium Challenge Corporation compact.

Security Information

The security situation in Mozambique requires caution. Street crime and carjackings in urban areas occur frequently. Road travel can be hazardous and should not be undertaken after daylight hours. The abundance of weapons remaining from the country's civil war and police who are poorly trained, equipped, and motivated contribute to a serious crime situation.

Additionally, several hundred thousand mines were planted throughout Mozambique during the last three decades of conflict. Although mine clearing operations are underway, surface travel off main highways should be approached with caution.

TRAVEL

Consular Information Sheet

July 15, 2008

Country Description: Mozambique is a developing country in southern Africa which has steadily rebuilt its economy and civic institutions since ending a 16-year civil war in 1992. The country stabilized following Mozambique's first multi-party elections in October 1994, and a new president was elected in December 2004. Despite high economic growth rates in recent years, Mozambique remains among the world's poorest countries. Facilities for tourism in Maputo, the capital city, are steadily improving but remain limited in other areas as many of the goods and services taken for granted in other countries are not yet available. The official language is Portuguese, although English is spoken in many tourist areas, and in some rural areas only local languages are widely spoken.

Entry Requirements: A visa is required for entry into Mozambique. It is recommended that travelers acquire the appropriate visa prior to departing for Mozambique, although a one-entry visa can be obtained at country points of entry, including airports. Foreigners in Mozambique without a valid visa can expect to pay a substantial fine for each day they are in Mozambique illegally. The fine can be assessed upon departure or if caught while in Mozambique by authorities. The passports of all travelers who wish to enter Mozambique must be valid for six months upon arrival and must contain at least three clean (unstamped) visa pages each time entry is sought. The Mozambican Embassy and Consulates in South Africa charge up to five times the amount charged in the U.S. or at border crossing points for a tourist visa to Mozambique.

In September 2007 the Mozambican Interior and Health Ministries decreed that all travelers entering

Mozambique, having previously visited a country where yellow fever is present, must present a valid certification of vaccination against yellow fever. We recommend all travelers be vaccinated to avoid complications at the border. Any passenger who cannot present such a certificate at the port of entry will be vaccinated at a cost of $50 US dollars or the equivalent in metical. Additionally, all travelers entering Mozambique must carry their yellow vaccination book.

For further information on entry requirements, contact the Embassy of Mozambique located at 1525 New Hampshire Avenue NW, Washington, DC 20036, telephone: (202) 293-7146, email: embamoc@aol.com, fax: (202) 835 0245, or the nearest Mozambican embassy or consulate. Visit the Embassy of Mozambique web site at http://www.embamoc-usa.org for the most current visa information.

Safety and Security: Overland travel after dark is extremely dangerous due to poor road conditions, lack of emergency services, and the increased potential for vehicle hijacking. Visitors should be particularly vigilant when driving on the main thoroughfares connecting Mozambique and South Africa as incidents of vehicle theft, including assault and robbery, have been reported. Official Americans serving in Mozambique are prohibited from overland travel outside Maputo city limits after dark and are encouraged to travel in convoys of two or more vehicles when outside of the city during daylight hours. Accidents involving pedestrians are increasingly common, and some reports suggest pedestrians purposely throw themselves in front of vehicles driven by foreigners in order to extort reparation payment. Due to residual landmines, overland travelers are advised to remain on well-traveled roads or seek local information before going off-road outside of Maputo and other provincial capitals.

Drivers should obey police signals to stop at checkpoints, which are common throughout Mozambique. Foreigners in Mozambique for more than 90 days are required to have an International Driver's License or to obtain a Mozambican driver's license. Although demonstrations do occur in Mozambique, they are infrequent and there have been no recent demonstrations against U.S. interests. If any demonstrations do occur, they should be avoided.

For the latest security information, Americans traveling abroad should regularly monitor the Department of State, Bureau of Consular Affairs' web site at http://travel.state.gov, where the current Travel Warnings and Travel Alerts, as well as the Worldwide Caution, can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S. and Canada, or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: Although the vast majority of visitors complete their travels in Mozambique without incident, the most serious threat facing U.S. citizens visiting Mozambique is crime. Street crimes, including mugging, purse snatching and pick-pocketing are common, both in Maputo and in secondary cities. Carjacking is increasingly common in Maputo. Visitors must be vigilant when out in public areas and should not display jewelry or other expensive items. Isolated areas should be avoided. Joggers and pedestrians have frequently been mugged, even during daylight hours. Visitors should take caution when walking at night, even in well-known tourist areas.

Mozambican police are not at the standard U.S. citizens are accustomed to in the United States and visitors should not expect the same level of police service.

Many airline trips from Mozambique to the U.S., Europe, or African destinations transit Johannesburg, South Africa. Baggage pilferage is an ongoing problem at Johannesburg's Oliver Tambo International Airport. Travelers are encouraged to secure their luggage, use an airport plastic wrapping service, and avoid placing currency, electronics, jewelry, cameras, cosmetics, running shoes, or other valuables in checked luggage. Having a complete inventory of items placed in checked baggage can aid in processing a claim if theft does occur.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

There is no local equivalent to the "911" emergency line in Mozambique.

Medical Facilities and Health Information: Medical facilities are rudimentary, and most medical providers do not speak fluent English. Medicines are not always consistently available. There are both public and private medical facilities in the city of Maputo and most provincial capitals. All health care institutions and providers require payment at the time of service, and may even require payment before service is given. While some private clinics accept credit cards, many medical facilities do not. Doctors and hospitals outside Maputo generally expect immediate cash payment for health services. Outside of Maputo, available medical care ranges from very basic to non-existent.

The U.S. Department of State is unaware of any HIV/AIDS entry restrictions for visitors to or foreign residents of Mozambique.

Tuberculosis is an increasingly serious health concern in Mozambique. For further information, please consult the CDC's Travel Notice on TB http://wwwn.cdc.gov/travel.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's web site at http://wwwn.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith/en.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Mozambique is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

The main north-south thoroughfare is passable until the city of Caia (Sofala province), where vehicle passengers must disembark and cross the Zambezi River by ferryboat. On the north side of the river, the road continues to the Northern provinces. The road network connecting provincial capitals is in fair condition, but can be riddled with potholes and other obstacles.

The EN4 toll road between Maputo and South Africa is well-maintained. Official Americans are prohibited from traveling outside cities after dark because of the increased risk of banditry, poor road conditions in some areas, poor maintenance of many vehicles in the country (e.g., no headlights or rear lights), as well as the threat imposed by livestock that graze on roadsides. Travel outside Maputo often requires a four-wheel drive vehicle, which creates an additional security risk since these vehicles are high-theft items. Public transportation is limited and often has poor safety standards. Visit the web site of the country's national tourist office at http://www.turismo mocambique.co.mz.

Aviation Safety Oversight: As there is no direct commercial air service between the United States and Mozambique, the U.S. Federal Aviation Administration (FAA) has not assessed Mozambique's Civil Aviation Authority for compliance with International Civil Aviation Organization (ICAO) aviation safety standards. For more information, travelers may visit the FAA's web site at http://www.faa.gov.

Special Circumstances: Mozambican law requires that all persons carry an identity document, such as a passport, when out in public, and produce it if requested by police. Notarized copies of both the biographic page of a passport and a valid Mozambican visa are acceptable forms of identification, although police will occasionally demand original documents. There are certain areas in Mozambique where pedestrian traffic is prohibited and the ban is strictly enforced. These areas include the front of the presidential offices located north of the Hotel Polana on the seaside of Avenida Julius Nyerere and the Praça dos Herois on Avenida Acordos de Lusaka near the airport, both in Maputo.

It is against the law to destroy Mozambican currency; offenders can expect a jail sentence or fine. The limit for an undeclared amount of U.S. dollars one can take out of the country is $5,000. The limit on local currency is 500 metical, which is approximately 20 U.S. dollars. Some American travelers have reported having difficulties cashing traveler's checks and have relied instead on ATMs and credit cards for money withdrawals in Mozambique. Outside of the major hotels and restaurants, credit cards are not widely accepted in Mozambique. The South African rand and U.S. dollar are sometimes accepted as legal tender, although this is more common in the southern part of the country or in tourist areas; all transactions must have a local currency (metical) payment option.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating Mozambique laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Mozambique are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in Mozambique are encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration web site so that they can obtain updated information on travel and security within Mozambique. Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency. The U.S. Embassy is located in Maputo at 193 Avenida Kenneth Kaunda, telephone (258) 21 49 2797. The after-hours telephone number for use in emergencies is (258) 21 49 0723. The Consular Section's fax number is (258) 21 49 0448. The Consular Section's e-mail address is consular maputo@state.gov. The Embassy's web site is http://mozambique.usembassy.gov.

Intercountry Adoption

January 2007

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is based on public sources and current understanding. Questions involving foreign and U.S. immigration laws and legal interpretation should be addressed respectively to qualified foreign or U.S. legal counsel.

Please Note: Prospective adoptive parents (prospective adoptive parents) must be legal residents of Mozambique and be present in the country for the duration of the adoption process. Married prospective adoptive parents must have been married for ten years prior to the initiation of the adoption process.

The Government of Mozambique requires a six month integration period after a prospective child is placed in the home and before the adoption can be finalized by the court. The government officially requires post-adoption monitoring until the child reaches 21 years. This requirement may be waived. However, if it is believed that the child will be adopted and immediately taken out of Mozambique, the courts may block an intercountry adoption.

Patterns of Immigration: Recent U.S. immigrant visa statistics show that only 8 orphan visas have been issued to Mozambican orphans in the past five years.

Adoption Authority: The adoption authority for Mozambique is the Social Services National Directorate (Direcção Nacional da Acçao Social), which falls under the Ministry of Women and Social Action. Adoption information may be requested from this office by postal mail, international courier or phone using the following contact information: Rua de Tchamba nr. 86, Direcção Nacional de Acção Social, Departamento da Crianca (Social Services National Directorate, Children's Department, tel: +258 21 49 7901/3. Ms. Francisca Sales is the director of the Social Services National Directorate at the federal level. Municipal authorities oversee adoptions within their respective geographic areas of jurisdiction. American citizens wishing to adopt in Maputo should contact Ana Conwana, the head of the Maputo City's Social Service National Directorate office at (258) 21 306 846. Numbers for offices in other provinces can be obtained by contacting the national directorate at +258 21 49 7901/3.

Eligibility Requirements for Adoptive Parents: Prospective adoptive parents must have legal residency in Mozambique and must have been married for ten years prior to the initiation of the adoption process. Single people are eligible to adopt. In addition, prospective adoptive parents must undergo a home study evaluation by Mozambican social and health workers, and must be certified "approvable for adoption." Gay and lesbian couples cannot officially be approved for adoption.

Residency Requirements: Mozambican law requires that prospective adoptive parents have legal residency in the country in order to be eligible to adopt. As such, the adoptive couple must be physically present in Mozambique for the duration of the adoption process.

Time Frame: The adoption process in Mozambique takes approximately 6 to 9 months. U.S. immigrant visa petitions for adopted minors are forwarded to the U.S. Consulate in Johannesburg for adjudication.

Adoption Agencies and Attorneys: As American citizens interested in adopting must be legal residents of Mozambique, agencies in the United States do not usually play a role in the adoption process. The U.S. Embassy maintains a list of attorneys. However, generally speaking, the services of a private attorney in Mozambique are not required for the adoption process. http://mozambique.usembassy.gov/legal_information.html.

Adoption Fees: There is a court fee of approximately $50, in addition to minor fees for forms and documents. Adoptive parents will also be responsible for acquiring official translations of both English- and Portuguese-language documents. http://mozambique.usembassy.gov.

Adoption Procedures: The first step in the adoption process is submission of a formal adoption request to the Social Services Directorate in the appropriate governing municipality. Together with the initial application, prospective parents should submit a certified true copy of their marriage certificate (translated into Portuguese), and photocopies of passports and Mozambican residency permits (known as a "DIRE"). Other supporting documents and required forms may be obtained from the Social Services office and the City Health Directorate.

The Social Services Directorate will then begin a lengthy investigation of the prospective parents' lifestyle, economic means, mental and physical health, and other details associated with a home study evaluation. During this time, the process of identifying a child for adoption—through an orphanage, for example—is also initiated.

As a final step, the Social Services Directorate will pass on the parents' petition for adoption to the Juvenile Court (Tribunal de Menores). If the court grants the order of adoption, a certificate of approval will be issued officially endorsing the adoption. The adoptive parent may then begin the process of registration, name change, application for new identity and nationality documents, etc.

Required Documents: Prospective adoptive parents should be prepared to submit certified copies of their marriage certificate, Mozambican residency cards, passports (all with official translations, if required),

along with bank statements and health certificates. Please see the *Intercountry Adoption* section of this book for more details and review current reports online at http://adoption.state.gov.

Background Notes on Countries of the World

Namibia—Zimbabwe

NAMIBIA

Compiled from the November 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Republic of Namibia

PROFILE

Geography

Area: 823,145 sq. km. (320,827 sq. mi.); the size of Texas and Louisiana combined.

Cities: Capital—Windhoek (2001 census) pop. 233,529. Other cities—Grootfontein, Katima Mulilo, Keetmanshoop, Luderitz, Ondangwa, Oranjemund, Oshakati, Otjiwarongo, Swakopmund, Tsumeb, Walvis Bay.

Terrain: Varies from coastal desert to semiarid mountains and plateau.

Climate: Semidesert and high plateau.

People

Nationality: Noun and adjective—Namibian(s).

Population: (2008 projected) 2.1 million.

Annual growth rate: (2001 est.) 2.6%. The population growth rate is depressed by an HIV/AIDS prevalence rate estimated to be 15.3%.

Ethnic groups: About 50% of the population belong to Ovambo ethnic group, and 9% to the Kavango ethnic group. Other ethnic groups are: Herero 7%, Damara 7%, Nama 5%, Caprivian 4%, San 3%, Baster 2%, and Tswana 0.5%.

Religions: Predominantly Christian; also indigenous beliefs.

Languages: English (official); Afrikaans, German, Oshivambo, Herero, Nama/Damara, other indigenous languages.

Education: Years compulsory—to age 16. Attendance (2001)—82%. Literacy (adults, 2005)—85%.

Work force: (2004) 493,448.

Government

Type: Republic.

Independence: March 21, 1990.

Government branches: Executive—president (elected for 5-year term), prime minister. Legislative—bicameral Parliament: National Assembly and National Council. Judicial—Supreme Court, the High Court, and lower courts.

Political subdivisions: 13 administrative regions.

Political parties: South West Africa People's Organization (SWAPO), Democratic Turnhalle Alliance (DTA), United Democratic Front of Namibia (UDF), Congress of Democrats (COD), Republican Party (RP), National Unity Democratic Organization (NUDO), Monitor Action Group (MAG).

Suffrage: Universal adult.

Economy

GDP: (2007) $6.749 billion.

Annual growth rate: (2007) 5.9%.

Per capita GNI: (2007) $3,360.

Inflation rate: (2008) 8.4%.

Natural resources: Diamonds, uranium, zinc, gold, copper, lead, tin, fluorspar, salt, fisheries, and wildlife.

Agriculture: (10.6% of GDP, 2007): Products—livestock and meat products, fish and fish products, grapes.

Mining: (12.4% of GDP, 2007): Gem-quality diamonds, uranium, zinc, copper, other.

Trade: Exports (2007)—$4.36 billion: diamonds, uranium, zinc, copper, lead, beef, cattle, fish, karakul pelts, grapes. Imports (2007)—$4.56 billion: foodstuffs, construction material, manufactured goods. Major partners—South Africa, Angola, Botswana, Germany, U.K., U.S.

Sources: Namibia Central Bureau of Statistics (CBS); Namibia Labor Force Survey; Namibia Population and Housing Census; Bank of Namibia; World Bank; UN Human Development Report.

PEOPLE

Namibians are of diverse ethnic origins. The principal groups are the Ovambo, Kavango, Herero/Himba, Damara, mixed race ("colored" and Rehoboth Baster), white (Afrikaner, German, and Portuguese), Nama, Caprivian, San, and Tswana.

The Ovambo make up about half of Namibia's people. The Ovambo, Kavango, and East Caprivian peoples, who occupy the relatively well-watered and wooded northern part of the country, are settled farmers and herders. Historically, these groups had little contact with the Nama, Damara, and Herero, who roamed the central part of the country vying for control of sparse pastureland. German colonial rule destroyed the war-making ability of the tribes but did not erase their identities or traditional organization. People from the more populous north have settled throughout the country in recent decades as a result of urbanization, industrialization, and the demand for labor.

Missionary work during the 1800s drew many Namibians to Christianity. While most Namibian Christians are Lutheran, there also are Roman Catholic, Methodist, Anglican, Jewish, African Methodist Episcopal, and Dutch Reformed Christians represented.

Education and services have been extended in varying degrees to most rural areas in recent years. The estimated adult literacy rate of Namibians was relatively high at 81% as of 2003. However, although the national literacy rate is estimated to be 81%, it is important to note that the number of Namibians who are functionally literate and have the skills that the labor market needs is significantly fewer.

HISTORY

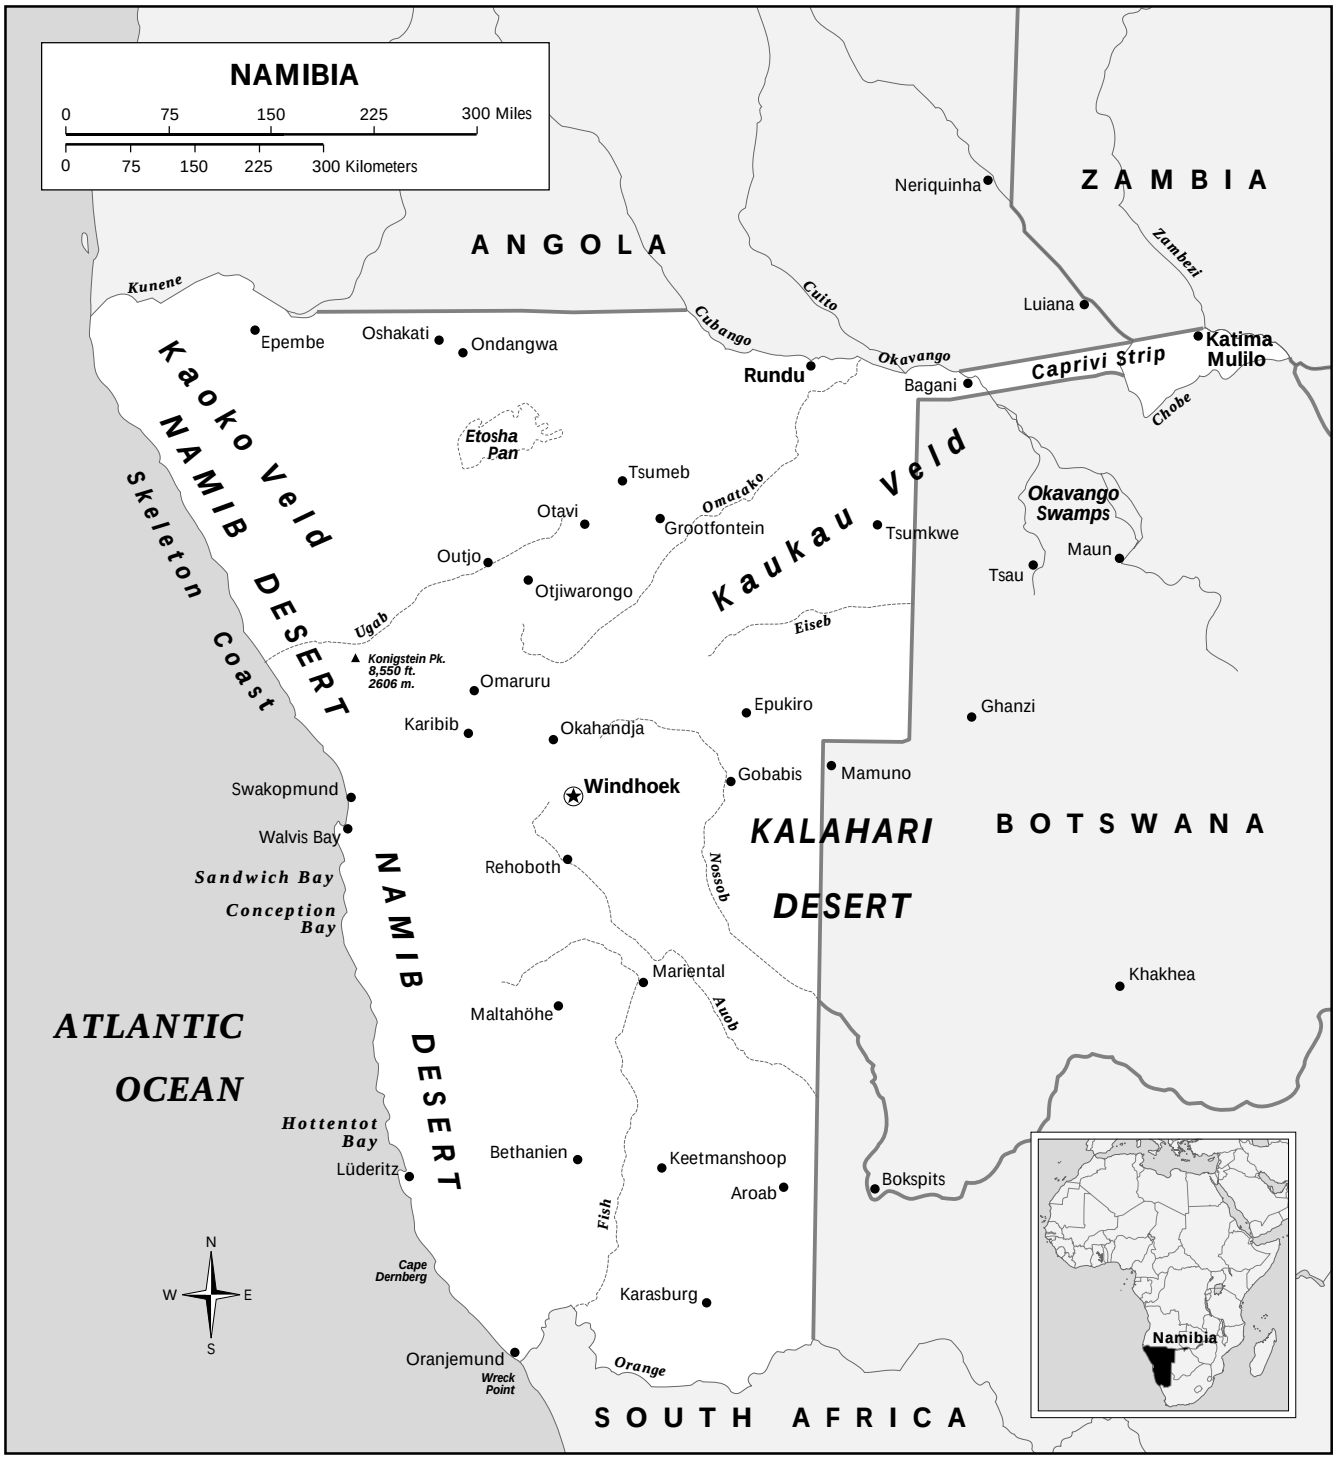
The San are generally assumed to have been the earliest inhabitants of the region. Later inhabitants include the Nama and the Damara or Berg Dama. The Bantu-speaking Ovambo and Herero migrated from the north in about the 14th century A.D.

The inhospitable Namib Desert constituted a formidable barrier to European exploration until the late 18th century, when successions of travelers, traders, hunters, and missionaries explored the area. In 1878, the United Kingdom annexed Walvis Bay on behalf of Cape Colony, and the area was incorporated into the Cape of Good Hope in 1884. In 1883, a German trader, Adolf Luderitz, claimed the rest of the coastal region after negotiations with a local chief. Negotiations between the United Kingdom and Germany resulted in Germany's annexation of the coastal region, excluding Walvis Bay. The following year, the United Kingdom recognized the hinterland up to 20 degrees east longitude as a German sphere of influence. A region later known as the Caprivi Strip became a part of South West Africa after an agreement on July 1, 1890, between the United Kingdom and Germany. The British recognized that the strip would fall under German administration to provide access to the Zambezi River and German colonies in East Africa. In exchange, the British received the islands of Zanzibar and Heligoland.

German colonial power was consolidated, and prime grazing land passed to white control as a result of the Herero and Nama wars of 1904-08. German administration ended during World War I following South African occupation in 1915.

On December 17, 1920, South Africa undertook administration of South West Africa under the terms of Article 22 of the Covenant of the League of Nations and a mandate agreement by the League Council. The mandate agreement gave South Africa full power of administration and legislation over the territory. It required that South Africa promote the material and moral well-being and social progress of the people.

When the League of Nations was dissolved in 1946, the newly formed United Nations inherited its supervisory authority for the territory. South Africa refused UN requests to place the territory under a trusteeship agreement. During the 1960s, as the European powers granted independence to their colonies and trust territories in Africa, pressure mounted on South Africa to do so in Namibia, which was then known as South West Africa. In 1966, the UN General Assembly revoked South Africa's mandate. Also in 1966, the South West Africa People's Organization (SWAPO) began its armed struggle to liberate Namibia, in part from bases abroad. After Angola became independent in 1975, SWAPO established bases in the southern part of that country. Hostilities intensified over the years, particularly in the north.



In a 1971 advisory opinion, the International Court of Justice upheld UN authority over Namibia, determining that the South African presence in Namibia was illegal and that South Africa therefore was obligated to withdraw its administration from Namibia immediately. The Court also advised UN member states to refrain from implying legal recognition or assistance to the South African presence.

International Pressure for Independence

In 1977, Western members of the UN Security Council, including Canada, France, the Federal Republic of Germany, the United Kingdom, and the United States (known as the Western Contact Group), launched a joint diplomatic effort to bring an internationally acceptable transition to independence for Namibia. Their efforts led to the presentation in April 1978 of Security Council Resolution 435 for settling the Namibian problem.

The proposal, known as the UN Plan, was worked out after lengthy consultations with South Africa, the front-line states (Angola, Botswana, Mozambique, Tanzania, Zambia, and Zimbabwe), SWAPO, UN officials, and the Western Contact Group. It called for the holding of elections in Namibia under UN supervision and control, the cessation of all hostile acts by all parties, and restrictions on the activities of South African and Namibian military, paramilitary, and police.

South Africa agreed to cooperate in achieving the implementation of Resolution 435. Nonetheless, in December 1978, in defiance of the UN proposal, it unilaterally held elec-

tions in Namibia that were boycotted by SWAPO and a few other political parties. South Africa continued to administer Namibia through its installed multiracial coalitions. Negotiations after 1978 focused on issues such as supervision of elections connected with the implementation of the UN Plan.

Negotiations and Transition

Intense discussions between the concerned parties continued during the 1978-88 period, with the UN Secretary General's Special Representative, Martti Ahtisaari, playing a key role. The 1982 Constitutional Principles, agreed upon by the front-line states, SWAPO, and the Western Contact Group created the framework for Namibia's democratic constitution.

In May 1988, a U.S. mediation team, headed by Assistant Secretary of State for African Affairs Chester A. Crocker, brought negotiators from Angola, Cuba, and South Africa, and

observers from the Soviet Union together in London. Intense diplomatic maneuvering characterized the next 7 months, as the parties worked out agreements to bring peace to the region and make implementation of UN Security Council Resolution 435 possible. On December 13, Cuba, South Africa, and the People's Republic of Angola agreed to a total Cuban troop withdrawal from Angola. The protocol also established a Joint Commission, consisting of the parties with the United States and the Soviet Union as observers, to oversee implementation of the accords. A bilateral agreement between Cuba and the People's Republic of Angola was signed in New York on December 22, 1988. On the same day a tripartite agreement, in which the parties recommended initiation of the UN Plan on April 1 and the Republic of South Africa agreed to withdraw its troops, was signed. Implementation of Resolution 435 officially began on April 1, 1989, when South African-appointed Administrator Gen. Louis Pienaar officially began administrating the territory's transition to independence. Special Representative Martti Ahtisaari arrived in Windhoek to begin performing his duties as head of the UN Transition Assistance Group (UNTAG).

The transition got off to a shaky start on April 1 because, in contravention to SWAPO President Sam Nujoma's written assurances to the UN Secretary General to abide by a cease-fire and repatriate only unarmed insurgents, about 2,000 armed members of the People's Liberation Army of Namibia (PLAN), SWAPO's military wing, crossed the border from Angola in an apparent attempt to establish a military presence in northern Namibia. The Special Representative authorized a limited contingent of South African troops to aid the South West African police in restoring order. A period of intense fighting followed, during which 375 PLAN fighters were killed. At Mt. Etjo, a game park outside Windhoek, in a special meeting of the Joint Commission on April 9, a plan was put in place to confine the South African forces to base and return PLAN elements to Angola. While the problem was solved, minor disturbances in the north continued throughout the transition period. In October, under order of the UN Security Council, Pretoria demobilized members of the disbanded counterinsurgency unit, Koevoet (Afrikaans for "crowbar"), who had been incorporated into the South West African police.

The 11-month transition period went relatively smoothly. Political prisoners were granted amnesty, discriminatory legislation was repealed, South Africa withdrew all its forces from Namibia, and some 42,000 refugees returned safely and voluntarily under the auspices of the Office of the UN High Commissioner for Refugees (UNHCR). Almost 98% of registered voters turned out to elect members of the Constituent Assembly. The elections were held in November 1989 and were certified as free and fair by the Special Representative, with SWAPO taking 57% of the vote, just short of the two-thirds necessary to have a free hand in drafting the constitution. The Democratic Turnhalle Alliance, the opposition party, received 29% of the vote. The Constituent Assembly held its first meeting on November 21 and its first act unanimously resolved to use the 1982 Constitutional Principles as the framework for Namibia's new constitution.

By February 9, 1990, the Constituent Assembly had drafted and adopted a constitution. March 21, independence day, was attended by Secretary of State James A. Baker III, who represented President George H.W. Bush. On that same day, he inaugurated the U.S. Embassy in Windhoek in recognition of the establishment of diplomatic relations.

On March 1, 1994, the coastal enclave of Walvis Bay and 12 offshore islands were transferred to Namibia by South Africa. This followed 3 years of bilateral negotiations between the two governments and the establishment of a transitional Joint Administrative Authority (JAA) in November 1992 to administer the 300-square mile territory. The peaceful resolution of this territorial dispute, which dated back to 1878, was praised by the United States and the international community, as it fulfilled the provisions of UN Security Council 432 (1978) which declared Walvis Bay to be an integral part of Namibia.

GOVERNMENT AND POLITICAL CONDITIONS

Namibia is a multiparty, multiracial democracy, with a president who is elected for 5-year term. The constitution establishes a bicameral Parliament and provides for general elections every 5 years and regional elections every 6 years. Members of the 72-seat National Assembly are elected on a party list system on a proportional basis. Members of the 26-seat National Council are elected from within popularly elected Regional Councils. The three branches of government are subject to checks and balances, and provision is made for judicial review. The judicial structure in Namibia largely parallels that of South Africa and comprises a Supreme Court, the High Court, and lower courts. Roman-Dutch law has been the common law of the territory since 1919. Namibia's unitary government is currently in the process of decentralization.

The constitution provides for the private ownership of property and for human rights protections, and states that Namibia should have a mixed economy and encourage foreign investment.

Sam Nujoma, leader of the South West Africa People's Organization (SWAPO), was President from Namibia's independence in 1990 until 2005. In November 2004, citizens elected Minister of Lands, Resettlement and Rehabilitation Hifikepunye Pohamba to be the next President. Pohamba was inaugurated in March 2005 in conjunction with celebrations marking the country's fifteenth anniversary. International and domestic observers agreed the 2004 elections were generally free and well administered despite some irregularities. Pohamba was elected President with

76.4% of the vote. SWAPO won 55 of the 72 elected seats in the National Assembly. Six opposition parties won a total of 17 seats, including the Congress of Democrats party, which won the largest number of opposition votes; the Democratic Turnhalle Alliance; the National Unity Democratic Organization; the United Democratic Front; the Republican Party; and the Monitor Action Group. The Rally for Democracy and Progress (RDP) was established in late 2007, and a number of high-profile individuals left SWAPO to join the RDP in late 2007-early 2008. The next presidential election is expected in late 2009.

Principal Government Officials

Last Updated: 11/12/08

President: **Hifikepunye POHAMBA**
Prime Minister: **Nahas ANGULA**
Dep. Prime Min.: **Libertina AMATHILA, Dr.**
Min. of Agriculture, Water, & Forestry: **Nickey IYAMBO**
Min. of Defense: **Charles NAMOLOH, Maj. Gen.**
Min. of Education: **Nangolo MBUMBA**
Min. of Environment & Tourism: **Willem KONJORE**
Min. of Finance: **Saara KUUGONGELWA-AMADHILA**
Min. of Fisheries & Marine Resources: **Abraham IYAMBO**
Min. of Foreign Affairs: **Marco HAUSIKU**
Min. of Gender Equality & Child Welfare: **Marlene MUNGUNDA**
Min. of Health & Social Service: **Richard KAMWI**
Min. of Home Affairs & Immigration: **Rosalia NGHINDINWA**
Min. of Information & Broadcasting: **Netumbo NANDI-NDAITWAH**
Min. of Justice: **Pendukeni IIVULA-ITHANA**
Min. of Labor & Social Welfare: **Alpheus NARUSEB**
Min. of Lands & Resettlement: **Jerry EKANDJO**
Min. of Mines & Energy: **Erkki NGHIMTINA**
Min. of Presidential Affairs: **Albert KAWANA**
Min. of Regional & Local Government, & Housing & Rural Development: **John PANDENI**
Min. of Safety & Security: **Peter TSHEEHAMA**
Min. of Trade & Industry: **Immanuel NGATJIZEKO**
Min. of Veterans' Affairs: **Ngarikutuke TJIRIANGE**
Min. of Works, Transport, & Communication: **Joel KAAPANDA**
Min. of Youth & National Service: **John MUTORWA**
Dir. Gen., National Planning Commission: **Helmut ANGULA**
Attorney General: **Pendukeni IIVULA-ITHANA**
Governor, Central Bank: **Tom ALWEENDO**
Ambassador to the US: **Leonard IIPUMBU**
Permanent Representative to the UN, New York: **Kaire Munionganda MBUENDE**

Namibia maintains an embassy in the United States at 1605 New Hampshire Ave., NW, Washington DC 20009 (tel: (202) 986-0540; fax: (202) 986-0443).

ECONOMY

The Namibian economy has a modern market sector, which produces most of the country's wealth, and a traditional subsistence sector. Namibia's gross domestic product (GDP) per capita is relatively high among developing countries but obscures one of the most unequal income distributions on the African continent. Although the majority of the population depends on subsistence agriculture and herding, Namibia has more than 200,000 skilled workers, as well as a small, well-trained professional and managerial class.

The country's sophisticated formal economy is based on capital-intensive industry and farming. However, Namibia's economy is heavily dependent on the earnings generated from primary commodity exports in a few vital sectors, including minerals, livestock, and fish. Furthermore, the Namibian economy remains integrated with the economy of South Africa, as the bulk of Namibia's imports originate there.

Since independence, the Namibian Government has pursued free-market economic principles designed to promote commercial development and job creation to bring disadvantaged Namibians into the economic mainstream. To facilitate this goal, the government has actively courted donor assistance and foreign investment. The liberal Foreign Investment Act of 1990 provides for freedom from nationalization, freedom to remit capital and profits, currency convertibility, and a process for settling disputes equitably. Namibia is part of the Common Monetary Area (CMA) comprising Lesotho, Swaziland, and South Africa. Both the South African rand and the Namibian dollar are legal tender in Namibia, but the Namibian dollar is not accepted in South Africa. As a result of the CMA agreement, the scope for independent monetary policy in Namibia is limited. The Bank of Namibia regularly follows actions taken by the South African central bank.

Given its small domestic market but favorable location and a superb transport and communications base, Namibia is a leading advocate of regional economic integration. In addition to its membership in the Southern African Development Community (SADC), Namibia presently belongs to the Southern African Customs Union (SACU) with South Africa, Botswana, Lesotho, and Swaziland. Within SACU, no tariffs exist on goods produced in and moving among the member states. In July 2008, SACU signed a Trade, Investment and Development Cooperation Agreement (TIDCA) with the United States. SACU also has plans to negotiate free trade agreements with China, India, Kenya, and Nigeria. The SACU Secretariat is located in Windhoek.

Over 80% of Namibia's imports originate in South Africa, and many Namibian exports are destined for the South African market or transit that country. Outside of South Africa, the EU (primarily the U.K.) is the chief market for Namibian exports. Namibia's exports consist mainly of diamonds and other minerals, fish products, beef and meat products, grapes and light manufactures.

Namibia is seeking to diversify its trading relationships away from its

heavy dependence on South African goods and services. Europe has become a leading market for Namibian fish and meat, while mining concerns in Namibia have purchased heavy equipment and machinery from Germany, Italy, the United Kingdom, the United States, and Canada. Namibia is an eligible country under the African Growth and Opportunity Act (AGOA), but has had limited success with exports under this program.

In 1993, Namibia became a General Agreement on Tariffs and Trade (GATT) signatory, and the Minister of Trade and Industry represented Namibia at the Marrakech signing of the Uruguay Round Agreement in April 1994. Namibia has been a member of the World Trade Organization since its creation in 1995 and is a strong proponent of the Doha Development Agenda announced at the Fourth Ministerial Conference in Doha, Qatar, in November 2001. Namibia also is a member of the International Monetary Fund and the World Bank. In December 2007 Namibia signed an interim Economic Partnership Agreement (EPA) with the European Union, which provides duty- and limited quota-free access to European markets for Namibian exports, thereby continuing many of the expiring trade benefits from the Cotonou Agreement. Negotiations continue over the new EPA, which must be finalized by the end of 2008.

Mining and Energy

Mining contributed approximately 12.4% of GDP in 2007. Diamond mining activities alone represented about 6%. Namibia's diamond production of about 2 million carats generates the bulk of its export earnings. Other important mineral resources are uranium, zinc, copper, lead, gold, fluorspar, and salt. Recent investments include the opening of Anglo American's $454 million Skorpion zinc mine in 2003 and the opening of Australia's Paladin Resources' Langer Heinrich Uranium mine in 2006. About three more uranium investment projects are in the pipeline. The country also is a source of natural stones such as granite and marble. Semiprecious stones are mined on a smaller scale. During the pre-independence period, large areas of Namibia, including offshore, were leased for oil prospecting. Natural gas was discovered in 1974 in the Kudu Field off the mouth of the Orange River. The field is thought to contain reserves of over 1.3 trillion cubic feet. The Kudu gas field development is led by Tullow Oil Plc. Tullow Oil owns 70% of the Kudu gas fields, Japanese firm Itochu Corporation owns 20%, and the Namibian Government through state petroleum firm, NAMCOR, owns the remaining 10%.

Plans are also underway to build the country's first combined cycle power station near Oranjemund. With power shortages facing the Southern African region, the government has stated its commitment to develop the Kudu gas field. However, supply of electricity in the short to medium term remains a challenge. Namibia has a well-developed legislative framework governing the upstream and downstream oil business. Currently there are eight companies exploring for oil and gas.

Agriculture

Although Namibian agriculture—excluding fishing—contributed about 6% of Namibia's GDP for the past five years, about 70% of the Namibian population depends on agricultural activities for livelihood, mostly in the subsistence sector. Animal products, live animals, and crop exports constitute roughly 5% of total Namibian exports. The government encourages local sourcing of agriculture products. Retailers of fruits, vegetables, and other crop products must purchase 27.5% of their stock from local farmers.

In the largely white-dominated commercial sector, agriculture consists primarily of livestock ranching. Cattle raising is predominant in the central and northern regions, while karakul sheep and goat farming are concentrated in the more arid southern regions. Subsistence farming is confined to the "communal lands" of the country's populous north, where roaming cattle herds are prevalent and the main crops are millet, sorghum, corn, and peanuts. Table grapes, grown mostly along the Orange River in the country's arid south, are becoming an increasingly important commercial crop and a significant employer of seasonal labor.

The government's land reform policy is shaped by two key pieces of legislation: the Agricultural (Commercial) Land Reform Act 6 of 1995 and the Communal Land Reform Act 5 of 2002. The government remains committed to a "willing seller, willing buyer" approach to land reform and to providing just compensation as directed by the Namibian constitution. As the government addresses the vital land and range management questions, water use issues and availability are considered.

Fishing

The clean, cold South Atlantic waters off the coast of Namibia are home to some of the richest fishing grounds in the world, with the potential for sustainable yields of up to 1.5 million metric tons per year. Commercial fishing and fish processing is one of the significant sectors of the Namibian economy in terms of employment, export earnings, and contribution to GDP.

The main species found in abundance off Namibia are pilchards (sardines), anchovy, hake, and horse mackerel. There also are smaller but significant quantities of sole, squid, deep-sea crab, rock lobster, and tuna. However, at the time of independence, fish stocks had fallen to dangerously low levels due to the lack of protection and conservation of the fisheries and the overexploitation of these resources. This trend appears to have been halted and reversed since independence, as the Namibian Government is now pursuing a conservative resource management policy along with an aggressive fisheries enforcement campaign. Namibia is a signatory to the Convention on Conservation and Management of Fisheries Resources in the South-East Atlantic (Seafo Convention). The country is also part of the Benguela Current Large Marine Ecosys-

tem (BCLME) program, which is designed to help the Governments of Namibia, Angola, and South Africa manage their shared marine resources in an integrated and sustainable way.

Manufacturing and Infrastructure

In 2007, Namibia's manufacturing sector contributed about 14.3% of GDP. Namibian manufacturing has historically been inhibited by a small domestic market, dependence on imported goods, limited supply of local capital, widely dispersed population, small skilled labor force and high relative wage rates, and subsidized competition from South Africa.

Walvis Bay has a well-developed, deepwater port, considered by many one of the best in Western Africa, and Namibia's fishing infrastructure is most heavily concentrated there. The Namibian Government expects Walvis Bay to become an important commercial gateway to the Southern African region. Namibia also boasts modern civil aviation facilities and an extensive, well-maintained land transportation network. Construction continues to expand two major arteries—the Trans-Caprivi and Trans-Kalahari Highways—which will further open up the region's access to Walvis Bay.

Tourism

Tourism is a rapidly growing sector of the Namibian economy and a significant generator of employment. It is the third-largest source of foreign exchange after mining and fisheries. Although the majority of Namibia's international visitors originate in the region, other international travelers are increasingly attracted by the country's unique mix of political stability, cultural diversity, and geographic beauty. Tourism in Namibia has had a positive impact on resource conservation and rural development. Some 29 communal conservancies have been established across the country, resulting in enhanced land management while providing tens of thousands of rural Namibians with much needed income.

Labor

While most Namibians are economically active in one form or another, the bulk of this activity is in the informal sector, primarily subsistence agriculture. In the formal economy, official estimates of unemployment range from 30% to 40% of the work force.

A large number of Namibians seeking jobs in the formal sector are held back due to a lack of necessary skills or training. The government is aggressively pursuing education reform to address this problem.

There are two main trade union federations in Namibia representing workers: the National Union of Namibian Workers (NUNW), which is affiliated with the ruling SWAPO party, and the Trade Union Congress of Namibia (TUCNA), which is not affiliated with any ruling party. Both unions have eight affiliated unions.

In 2007, Namibia passed a new labor act, which updates the 1992 law but also contains controversial new provisions, such as leave time and the banning of labor hire companies (temporary agencies). The new law is expected to be implemented in phases starting November 2008.

NATIONAL SECURITY

The constitution defines the role of the military as "defending the territory and national interests." Following independence, Namibia formed the National Defense Force (NDF), comprised of former enemies in a 23-year bush war, the PLAN and South West African territorial force. The NDF consists of five battalions and a small headquarters element. The NDF has a modest air wing and a maritime wing. Namibia contributed 900 troops to UN peacekeeping efforts in Liberia and has offered to volunteer troops to support peacekeeping operations in Darfur.

Namibia has had defense cooperation at various levels with several countries, including the United States. It also participates in regional peacekeeping efforts. The U.S. does not have an Article 98 agreement with Namibia.

FOREIGN RELATIONS

Namibia follows a largely independent foreign policy, with lingering affiliations with states that aided the independence struggle, including Libya, the People's Republic of China, and Cuba.

Namibia is developing trade and strengthening economic and political ties within the Southern African region. A dynamic member of the Southern African Development Community and the Southern African Customs Union, Namibia is a vocal advocate for greater regional integration.

Namibia became the 160th member of the United Nations on April 23, 1990, and the 50th member of the British Commonwealth upon independence.

U.S.-NAMIBIAN RELATIONS

U.S.-Namibian relations are good and continue to improve. Characterized by shared democratic values, commitment to rule of law, and respect for human rights, the bilateral relationship has been strengthened through trade ties and U.S. assistance programs. Namibia has been included in President Bush's International Mother and Child HIV Initiative and the Emergency Plan for AIDS Relief. The U.S. Agency for International Development's (USAID) bilateral presence in Namibia has been extended until 2010. In addition to the Embassy, the Centers for Disease Control, Peace Corps, and the Defense Department have offices in Windhoek. The Millennium Challenge Corporation has also established a permanent presence in Windhoek following the July 28, 2008 signing of a Compact agreement valued at approximately $304.5 million.

TRAVEL

Consular Information Sheet

August 16, 2007

Country Description: Namibia is a southern African country with a moderately developed economy. Facilities for tourism are good and generally increasing in quality. The capital is Windhoek.

Entry Requirements: A passport and visa are normally required. Bearers of U.S. passports who plan to visit Namibia for tourism for less than 90 days can obtain visas at the port of entry and do not need visas prior to entering the country. Travelers coming for work or study, whether paid or voluntary, must obtain a work or study permit prior to entering Namibia. All travelers traveling to or from Namibia via South Africa are strongly encouraged to have several unstamped visa pages left in their passports. South Africa requires two unstamped visa pages, and Namibia usually also requires an unstamped page to stamp a visa upon arrival. Visitors who do not have enough free visa pages in their passport risk being denied entry and returned to the U.S. at their own expense.

Travelers should obtain the latest information from the Embassy of Namibia located at 1605 New Hampshire Avenue, NW, Washington, D.C. 20009, telephone (202) 986-0540 or from the Permanent Mission of Namibia to the U.N. at 135 E. 36th St., New York, NY 10016, telephone (212) 685-2003, fax (212) 685-1561. Overseas, inquiries should be made to the nearest Namibian embassy. Visit the Embassy of Namibia's website at http://www.namibianembassyusa.org for the most current visa information.

Safety and Security: American citizens wishing to cross into Angola from Namibia should do so only at official border crossing areas and should consult the State Department's Country Specific Information for Angola.

American citizens should avoid street demonstrations. However, such events are rare in Namibia. American citizens traveling in Namibia are urged to contact the consular section of the U.S. Embassy in Windhoek for the latest safety and security information.

For the latest security information, Americans traveling abroad should regularly monitor the Department's Internet web site, where the current Worldwide Caution Travel Alert, Travel Warnings and Travel Alerts can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S., or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: Crime is a serious concern in Namibia, but visitors who employ common-sense preventive measures normally enjoy an incident-free stay. Incidents of violent crime directed specifically against Americans or other foreigners are rare, but the number of overall incidents continues to increase. The most common crimes are property-motivated crimes of opportunity, including pick pocketing, purse snatching, vehicle theft, and vehicle break-ins. Taxi drivers have robbed several American passengers; if taxis must be used, radio taxis that display the NABTA logo (Namibia Bus and Taxi Association) are the most reliable. Violent crimes are less frequent than non-violent incidents. Common sense measures such as being alert to one's surroundings, avoiding isolated areas of town, not leaving valuables in parked cars, keeping car doors locked and windows up while driving, safeguarding purses, wallets and especially cellular phones are the best deterrents against becoming a victim. Drivers should exercise caution at rest stops outside of towns or away from gasoline stations.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, to contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

Medical Facilities and Health Information: Windhoek has a small number of private medical hospitals and clinics capable of providing emergency care and performing many routine procedures. Doctors, both general practitioners and specialists, as well as dentists, generally have

training and facilities that are comparable with U.S. standards. Facilities outside the capital vary widely. Several large towns have well-equipped facilities similar to those available in Windhoek, while smaller towns generally do not. Malaria is prevalent only in the north of the country. Malaria prophylaxis is not required in Windhoek but is suggested for travel to the north.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747); fax 1-888-CDC-FAXX (1-888-232-3299), or via the CDC's Internet site at http://www.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) website at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Namibia is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

In Namibia, driving is done on the left-hand side of the road. Many of Namibia's rural roads are gravel. Although these roads are generally well maintained, controlling a vehicle on gravel is significantly more difficult than on pavement. Drivers should not drive in excess of 80km per hour (45 mph) on gravel roads, should reduce speed significantly for curves or turns, and should heed all warning signs. Hitting a sand patch or driving around a curve too fast can easily result in a rollover or spinout. Many accidents on gravel roads occur when tourists exceed safe speeds on corners or in areas recently damaged by rains. Visitors are reminded that motor vehicle accidents are one of the primary causes of injury and death in Namibia, and drivers are therefore strongly urged to drive with caution.

For those driving outside of the capital, distances between cities can be considerable, and often gasoline is only available at a few service stations along a route. Fuel availability can be impacted by power outages as well. All travelers are encouraged to plan their route to ensure a sufficient supply of fuel, and are recommended to bring five liters of water per person when traveling on dirt roads to guard against dehydration if an accident should occur.

Turning on a red traffic light is not permitted in Namibia. Seat belts are required for all vehicle occupants. Motorcyclists are required by law to wear protective helmets. While child car seats are not required, they are recommended.

To drive legally while in Namibia, visitors staying more than a few weeks need an international driving permit. International driving permits must be obtained prior to leaving the U.S. and are available from either the American Automobile Association or the American Automobile Touring Alliance. Short-term visitors do not need an international driving permit; a valid U.S. driver's license is sufficient.

Roads in Namibia are generally well maintained. However, few have shoulders or "pull-off" lanes for broken vehicles. Wildlife wandering on roads is a special driving hazard in Namibia, especially at night. An encounter at high speeds with antelope or cattle can be fatal. The salt-surfaced roads at the coast can also be deceptively dangerous, especially when they have been made slick by morning or evening mist. Robbery has occurred at roadside "rest stops" and motorists are advised to take rest breaks in towns and/or at gasoline stations. Most major roads are undivided with one lane in each direction. Drivers should remain alert for passing vehicles and exercise caution when passing slow moving vehicles. Accidents involving drunk drivers are an increasing problem on major roads where there are high speed limits. Driving under the influence is illegal in Namibia. A charge of culpable homicide can be made against a driver involved in an accident resulting in death.

Roadside assistance and emergency medical services outside of Windhoek may be unreliable or non-existent. Assistance on main roads that link Namibia's larger towns, however, is generally good due to quality cell phone networks. Emergency services contact numbers vary from town to town. The Namibian telephone directory has a list of emergency contact numbers at the beginning of each town listing. It is recommended that Americans maintain a list of contact numbers for the area in which they plan to drive. Telephone numbers may change, and 24-hour availability of these numbers is not guaranteed.

Public transportation is not widely available outside of the capital. Taxis and municipal buses are the only forms of public transportation in Windhoek. Schedules and routes are limited. Car rentals or radio taxis are generally the best means of transport but may be relatively expensive. The Embassy has received reports of foreign citizens being robbed by drivers of taxis hailed on the streets of Windhoek. The Embassy has not received any such reports regarding radio taxis.

Flashing of high beams and similar signals could mean anything from a friendly greeting to a warning. When encountering a motorcade, motorists are encouraged to make way immediately and follow promptly any instructions given by the officials present.

Because of the possibility of intoxicated and/or reckless drivers, the poor mechanical condition of some motor vehicles, and the high incidence of single-vehicle rollover acci-

dents, Americans are urged to avoid hitchhiking in Namibia. Visit the website of the country's national tourist office and national authority responsible for road safety: http://www.met.gov.na/default.htm.

Aviation Safety Oversight: As there is no direct commercial air service between the United States and Namibia, the U.S. Federal Aviation Administration (FAA) has not assessed Namibia's Civil Aviation Authority for compliance with International Civil Aviation Organization (ICAO) aviation safety standards. For more information, travelers may visit the FAA's Internet web site at www.faa.gov.

Special Circumstances: Wild animals may pose some danger. Travelers are advised that, even in the most serene settings, animals are wild and can pose a threat to life and safety. Travelers are cautioned to observe all local or park regulations and heed all instructions given by tour guides. In addition, tourists are advised that potentially dangerous areas sometimes lack fences and warning signs. Appropriate caution should be used in all unfamiliar surroundings. Namibia does not recognize dual citizenship for adults over the age of 18. Therefore, despite the fact that these individuals possess U.S. citizenship, they must enter and exit Namibia bearing a Namibian passport. Namibia recognizes dual citizenship up until the age of 18; however, such children must enter Namibia on their Namibian passport and may face questioning by an immigration officer before being permitted entry.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offences. Persons violating Namibian laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Namibia are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States. Americans should avoid purchasing diamonds and other protected resources outside of licensed retail establishments. The penalty for illegal dealing in diamonds in Namibia is stiff—up to U.S. $20,000 in fines or five years in prison—and the courts generally impose the maximum sentence. The purchase and exportation of other protected resources, such as elephant ivory, may also be prohibited by Namibian, international, and/or U.S. law.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in Namibia are encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration website and to obtain updated information on travel and security within Namibia. Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency. The U.S. Embassy is located 14 Lossen Street, Ausspannplatz, Windhoek, telephone (264-61) 295-8500, fax (264-61) 295-8603. You can reach the Consular Section at extension 8551; i.e., (264-61) 295-8551 or via e-mail consularwindho@state.gov. The mailing address for the Embassy is Private Bag 12029, Windhoek, Namibia. The U.S. Embassy Windhoek website is http://windhoek.usembassy.gov.

Intercountry Adoption

March 2007

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is based on public sources and current understanding. Questions involving foreign and U.S. immigration laws and legal interpretation should be addressed respectively to qualified foreign or U.S. legal counsel.

Please Note: A recent Namibian High Court ruling makes intercountry adoption possible. However, there is not yet a new law governing this procedure. Foreign adoption is currently covered by an interim policy agreement between the Ministry of Health and Social Services and the Ministry of Gender Equality and Child Welfare in terms of The Children's Act of 1960. This policy makes it very difficult for non-resident foreigners to adopt. In general, only foreigners who are resident in Namibia have been allowed to adopt Namibian children. Further, the list of prospective adoptive parents in Namibia is longer than the list of children eligible for adoption, making adoption by non-resident foreigners even more difficult and lengthy.

Patterns of Immigration: Within the past five fiscal years, only one Namibian child has received a U.S. immigrant visa to go to the United States as the adopted child of a U.S. citizen.

Adoption Authortiy: The Ministry of Health and Social Services and the Ministry of Gender Equality & Child Welfare are the government agencies directly involved with adoption of Namibian children. The Ministry of general Equality and Child Welfare registers all adoptions, while the Ministry of Health and Social Services is the correspondent agency for International Social Services and handles international requests for information.

Ministry of Health and
Social Services
Tel: +264-61-203-2615
Ministerial Building, Harvey St.
P.O. Box 13198
Windhoek, Namibia
Ministry of Gender Equality and
Child Welfare

Tel: +264-61-283- 3164
P.O. Box 13359
Windhoek, Namibia

Eligibility Requirements for Adoptive Parents: Married couples may adopt jointly, or one spouse may adopt the other spouse's child. Single people, including those who are widowed, separated or divorced, may also adopt. In all cases, the prospective adoptive parent(s) must be at least 25 years of age and at least 15 years older than the child to be adopted.

Elibilility Requirements For Namibian Children: The Namibian government has set the following requirements for adoption to a foreigner:

- Proof that the biological parents are in no position to care for the child and have consented to the adoption, or are deceased;
- Proof that no family member or relative is able and willing to adopt the child; and
- Proof that no Namibian is interested and in a position to adopt the child.

A committee consisting of representatives of the Ministries of Health and Social Services, Gender Equality and Child Welfare, Home Affairs and Immigration, and Justice reviews all such applications. This group meets a few times a year and on an as-needed basis.

Residency Requirements: While there is no requirement for residency, no non-resident Americans have successfully adopted Namibian children.

Time Frame: Once a child has been identified for adoption, it takes from two to four months to obtain an Order of Adoption and the subsequent Registration of the Adoption with the Ministry of Gender Equality and Child Welfare.

Adoption Agencies and Attorneys: Prospective adoptive parents are advised to fully research any adoption agency or facilitator they plan to use for adoption services. The Church Benevolence Board in Windhoek [telephone: +264-61-23-7296] is an accredited welfare organization and the primary adoption agency. The Church Benevolence Board maintains a register of individuals interested in adoption. The Embassy maintains a list of lawyers who practice in Namibia and who could assist in adoption cases, available at www.windhoek.usembassy.gov/lawyer_list. html.

Adoption Fees: The Namibian government does not charge any fees for its adoption procedures. Fees are charged by private social workers to complete a Home Study and by welfare organizations such as the Church Benevolence Board.

Adoption Procedures: The first step for adoption is identification of a prospective child to adopt. For those resident in Namibia, this can be done personally. In most instances, the adoption procedure is initiated by the prospective adoptive parent(s) contacting the Church Benevolence Board, which maintains a list of prospective adoptive parents and is tasked with identifying an orphan child eligible for adoption.

After such a child is identified, prospective adoptive parents have to file an Application for an Order of Adoption with the Magistrate's Court in the district in which the child normally resides. The Magistrate's Court then requests an adoption report, which is separate from a U.S. home study and is completed by a social worker from the Ministry of Health and Social Services, the Ministry of Gender Equality and Child Welfare, or privately contracted.

If an adoption is initiated from overseas, the Ministry of Health and Social Services will first request a home study through International Social Services. After this report is received, the social worker will compile the report based on the home study, interviews with the prospective parent(s), and an assessment of the child's situation.

The court will grant the Order of Adoption after all criteria have been met, after which the adoption has to be registered with the Ministry of Health and Social Services. There are no fostering requirements before an Order of Adoption is granted.

There are various conditions for granting the Order of Adoption:

- The child's birth parents, if alive and still in possession of parental rights, have given their consent freely and with full understanding;
- The child has given his/her consent, if 10 years of age or older;
- The prospective parent(s) are twenty-five years old and at least fifteen years older than the child, and are married if adopting jointly;
- The prospective parents are willing and able to care for the child as shown by the report of the social worker;
- The proposed adoption will be in the best interests of the child, as shown by the report of the social worker.

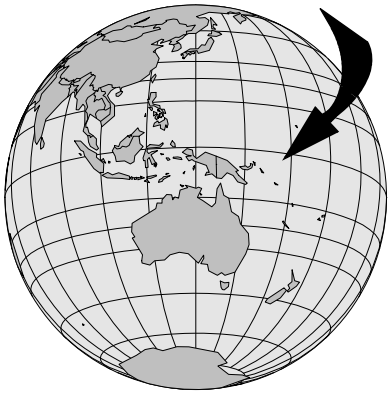
After an Order of Adoption is approved, the adoption must be registered with the MGECW.

The MGECW enumerates several documents required to register the adoption. Once the adoption is registered, the adoptive child is considered to be the child of the adopted parents under Namibian law.

Required Documents:

- Application for order of adoption with the Namibian court;
- Consent by birth parent(s) to order of adoption (both parents

when child was born inside the marriage, only of the mother when the child was born out of wedlock) or death certificate of parent(s);



- Consent by child to order of adoption, if child is ten years of age or older;
- Order of adoption approved by the court;
- Adoption report by Social Worker;
- Birth certificate of adoptive child;
- Passports of adoptive parent(s);
- Marriage certificate of adoptive parents, if applicable;
- Court minutes from the session where the court granted the Order of adoption.

For further information on intercountry adoption, contact the Office of Children's Issues, U.S. Department of State at 1-888-407-4747 or visit its web site on the Internet at http://travel.state.gov. You may also direct inquiries to: Office of Children's Issues, U.S. Department of State, Washington, DC 20520-4811; Phone: (202) 736-9090; Fax: (202) 312-9743.

NAURU

Compiled from the October 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Republic of Nauru

PROFILE

Geography

Area: 21 sq. km.
Cities: Capital—no official capital; government offices in Yaren District.
Terrain: Rough beach rises to a fertile but narrow ring around a raised, prehistoric coral reef plateau, studded with coral pinnacles exposed by phosphate mining.
Climate: Equatorial; monsoonal; rainy season (November to February); unreliable rainfall and prone to El Nino-linked droughts.

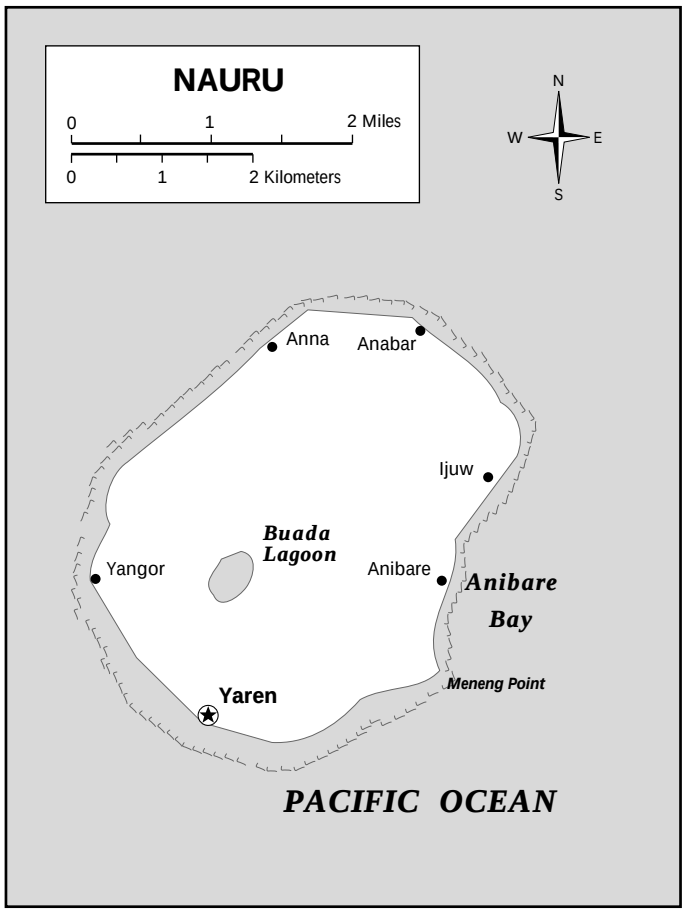
People

Nationality: Noun and adjective—Nauruan(s).
Population: (2006) 10,700.
Age structure: (2006 est.): 38.7% below 15; 1.56% over 65.
Annual growth rate: (2006-2010 est.): 0.3%.
Ethnic groups: Nauruan 93%, Chinese 5%, other Pacific Islander 1%, European 1%.
Religions: Christian (two-thirds Protestant, one-third Roman Catholic).
Languages: Nauruan, English.
Education: (2004) Literacy—97%.
Health: (2002) Life expectancy (2004 est.) women 56.9 yrs.; men 49.0 yrs.; Infant mortality rate—10.14/1,000.
Work force: (2004 est.) 4,300.
Unemployment: (2004 est.) 50%.

Government

Type: Republic.
Constitution: 1968.
Independence: January 31, 1968.
Government branches: Executive—president and cabinet. Legislative—unicameral Parliament. Judicial—Supreme Court, Appellate Court, District Court, and Family Court.
Political subdivisions: 14 districts.
Political parties: Naoero Amo (Nauru First) Party.
Budget: (2007 est.) $14.96 million.
Suffrage: Universal at age 20.

Economy



GDP: (2007 est.) $22.5 million.
Per capita GDP: (2007 est.) $2,564.
Avg. inflation rate: (2005 est.) 3%.
Industry: Types—phosphate mining.
Trade: Exports (2054 est.)—$4.4 million; phosphates. Major export markets—Japan, Republic of Korea, India. Imports (2005 est.)—$29.9 million; food, fuel, manufactures. Major import sources—Australia, Republic of Korea, United States.
Currency: Australian dollar (A$).

GEOGRAPHY

Nauru is a small oval-shaped island in the western Pacific Ocean, located just 42 kilometers (26 mi.) south of the Equator. It is one of three great phosphate rock islands in the Pacific Ocean—the others are Banaba (Ocean Island) in Kiribati and Makatea in French Polynesia. Until recently Nauru's phosphate reserves were thought to be nearly depleted, but there are some indications that the potential for continued productive mining might exist. Phosphate mining in the central plateau has left a barren terrain of jagged, prehistoric coral pinnacles, up to 15 meters (49 ft.) high. A century of mining has stripped and devastated four-fifths of the total land area. Efforts to rehabilitate the mined-out areas have been unsuccessful.

The island is surrounded by a coral reef, exposed at low tide and dotted with pinnacles. The reef is bounded seaward by deep water, inside by a narrow sandy beach. A 150-300-meter (492-984 ft.) wide fertile coastal strip lies landward from the coast, ending in forested coral cliffs that rise to the now mined-out central plateau.

The highest point of the plateau is 65 meters (213 ft.) above sea level. The island's only fertile areas are within the narrow coastal belt, where there are coconut palms, pandanus trees, and indigenous hardwoods, and the land surrounding the inland Buada lagoon on the central plateau, where

bananas, pineapples, and some vegetables are grown. Some secondary vegetation has begun to cover the scarred central plateau and its coral pinnacles.

PEOPLE

Nauruans descended from Polynesian and Micronesian seafarers. Grouped in clans or tribes, early Nauruans traced their descent on the female side. They believed in a female deity, Eijebong, and a spirit land, also an island, called Buitani. Two of the 12 original tribal groups became extinct during the 20th century. Because of poor diet, alcohol abuse, and a sedentary lifestyle, Nauru has one of the world's highest levels of diabetes, renal failure and heart disease, exceeding 40% of the population.

HISTORY

Nauru had little contact with Europeans until whaling ships and other traders began to visit in the 1830s. The introduction of firearms and alcohol destroyed the peaceful coexistence of the 12 tribes living on the island. A 10-year internal war began in 1878 and resulted in a reduction of the population from 1,400 (1843) to around 900 (1888).

The island was allocated to Germany under the 1886 Anglo-German Convention. Phosphate was discovered a decade later and the Pacific Phosphate Company started to exploit the reserves in 1906, by agreement with Germany. Following the outbreak of World War I, Australian forces captured the island in 1914. After the war, the League of Nations assigned a joint trustee mandate over the island to Britain, Australia, and New Zealand. The three governments established the British Phosphate Commissioners, who exercised the rights to phosphate mining.

During World War II Japan occupied Nauru in August 1942 and deported 1,200 Nauruans to work as laborers in the Caroline Islands, where 463 died. The survivors returned to Nauru in January 1946.

After the war the island became a UN Trust Territory under Australia, in line with the previous League of Nations mandate, and it remained one until it became an independent republic in 1968. A plan by the partner governments to resettle the Nauruans (due to dwindling phosphate reserves and damage to the island from extensive mining) on Curtis Island off the north coast of Queensland, Australia, was abandoned in 1964 when the islanders decided not to move. In 1967, the Nauruans purchased the assets of the British Phosphate Commissioners, and in June 1970 control passed to the Nauru Phosphate Corporation.

In 1989 Nauru filed suit against Australia in the International Court of Justice in The Hague for damages caused by mining while the island was under Australian jurisdiction. Australia settled the case out of court in 1993, agreeing to pay a lump sum settlement of A$107 million (U.S.$85.6 million) and an annual stipend of the equivalent of A$2.5 million in 1993 dollars toward environmental rehabilitation.

GOVERNMENT

The country is governed by a unicameral Parliament consisting of 18 members elected at least triennially from 8 constituencies. Parliament elects the president, who is both chief of state and head of government, from among its members. The president appoints a cabinet from among members of Parliament. For its size, Nauru has a complex legal system. The Supreme Court, headed by the Chief Justice of Nauru, is paramount

on constitutional issues, but other cases can be appealed to the two-judge Appellate Court. Parliament cannot overturn court decisions, but Appellate Court rulings can be appealed to Australia's High Court; in practice, however, this rarely happens. Lower courts consist of the District Court and the Family Court, both of which are headed by a Resident Magistrate, who also is the Registrar of the Supreme Court. Finally, there also are two quasi-courts—the Public Service Appeal Board and the Police Service Board—both of which are presided over by the Chief Justice. There is a small police force of 109 members under civilian control. There are no armed forces.

Permanent Representative to the UN, New York: **Marlene Inemwin MOSES**

Nauru does not currently have an embassy in the United States but does have a UN Mission at 800 2nd Ave, Suite 400D, New York, New York 10017 (tel: 212-937-0074, fax: 212-937-0079).

POLITICAL CONDITIONS

In recent decades, as turmoil grew over Nauru's uncertain future and economic failures, no-confidence votes that spurred changes of government became commonplace. In 1997 Nauru had four different presidents in as many months. Following the election of Ludwig Scotty in October 2004 and the naming of a reform-minded government, Nauru enjoyed a period of political stability. The Scotty team was re-elected to Parliament in August 2007. However, in December 2007 that team split and a no-confidence vote removed Scotty from power. Marcus Stephen assumed the presidency, and Nauru experienced several months of political volatility before snap elections held in April 2008 returned Stephen's government to power with a larger majority.

ECONOMY

Having once boasted the second-highest per capita GDP in the world thanks to its fabled phosphate mines, Nauru is today destitute. With the seeming depletion of readily accessible phosphate reserves in 2000, mining on a large-scale commercial basis ended. The decline of mining saw a dramatic economic contraction, compounded by past government corruption and disastrous mismanagement of trust funds that had been expected to provide post-mining revenue streams for Nauru's citizens. Since 2000, Nauru has relied largely on payments for fishing rights within its exclusive economic zone, earnings from hosting two Australian refugee processing camps, and massive injections of grants and development funding, principally from Australia, New Zealand, Japan, China and more recently Taiwan. The government-owned mining company, the Republic of Nauru Phosphate Company or RONPhos has resumed mining and exporting phosphate and has reportedly made a small profit.

Although Nauru had a nominal per capita GDP in excess of $2,700, its economy is in deep crisis, and the resumption of mining promises only a limited respite as the country seeks to find a sustainable economic future. The private sector is very small and employs less than 300. Nauru imports well over 90% of its foodstuffs and other basic goods, but sea and air transport has become problematic. In December 2005, the national airline's remaining airplane was repossessed for non-payment, leaving Nauru dependent on chartered flights. In September 2006, with financing help from Taiwan, a replacement aircraft re-established scheduled commercial flights to Nauru and around the region under the new name of Our Airline. The provision of electricity and water, both dependent on expensive imported fuel, is limited and sporadic. With the help of the Pacific Islands Forum and numerous development partner nations, Nauru has embarked on a major, multi-year strategic national development program to achieve a sustainable economic framework for the country.

FOREIGN RELATIONS

Following independence in 1968, Nauru joined the Commonwealth as a Special Member. Special Members take part in all Commonwealth activities except heads of government meetings. They are not assessed but make voluntary contributions toward the running of the Secretariat. They are eligible for all forms of technical assistance.

Nauru was admitted to the United Nations in 1999. It is a member of the Pacific Islands Forum, the South Pacific Regional Environmental Program, the South Pacific Commission, and the South Pacific Applied Geoscience Commission.

In 2001 at Australia's request, Nauru became host to approximately 1,200 asylum seekers, mostly Afghan, who were intercepted while attempting to enter Australia illegally. By mid-2006, only a single Iraqi refugee remained on the island. In September

2006, Australia effectively re-opened the center by transferring seven Burmese asylum seekers there for assessment. In March 2007, Australia transferred 82 Sri Lankan refugees to Nauru. In exchange for housing the refugees, Australia provided Nauru with extensive grants and aid. However, in February 2008, the Australian Government closed the detention center in Nauru and the remaining 21 Sri Lankan asylum seekers were transferred to Australia.

During 2002 Nauru severed diplomatic recognition with Taiwan and signed an agreement to establish diplomatic relations with the People's Republic of China. This move followed China's promise to provide more than U.S. $130 million in aid. In May 2005, Nauru re-established diplomatic ties with Taiwan, ending its relationship with China. Taiwan and Australia have the only diplomatic missions on Nauru. In March 2007, Nauru established an embassy in Taipei.

U.S.-NAURU RELATIONS

Relations between the United States and Nauru are cordial. The U.S. has no consular or diplomatic offices in Nauru. Officers of the American Embassy in Suva, Fiji, are concurrently accredited to Nauru and make periodic visits.

Trade between the United States and Nauru is limited by the latter's small size and economic problems. The value of two-way trade in 2007 was $8.726 million.

TRAVEL

Consular Information Sheet

August 20, 2008

Country Description: Nauru, a small single-island nation in the South Pacific, is located about 25 miles south of the equator. It is a constitutional republic with a parliamentary system of government. Tourist facilities are available on a limited basis. Yaren, the capital, has an international airport.

Entry Requirements: A visa, onward/return ticket, and proof of hotel bookings (or sponsorship from a resident of Nauru) are required for tourists. Tourist visas are issued for a maximum of thirty days. Travelers transiting with a valid ticket for an onward destination do not require a visa, provided that the first connecting flight departs within three days of arrival in Nauru. Business visitors must have a visa and a local sponsor. Nauru collects a departure tax that must be paid in cash and in Australian dollars.

For more information on entry/exit requirements, travelers may wish to contact Republic of Nauru Permanent Mission to the United Nations in New York at 212-937-0074, or by fax at 212-937-0079. The address is: 800 Second Avenue, Suite 400A New York, NY 10017. E-mail addresses are: nauru@onecommonwealth.org and/or Nauru@un.int.

Safety and Security: For the latest security information, Americans traveling abroad should regularly monitor the Department of State, Bureau of Consular Affair's Internet site at http://travel.state.gov, where the current Travel Warnings and Travel Alerts, including the Worldwide Caution Travel Alert, can be found. Up-to-date information on security can also be obtained by calling 1-888-407-4747 toll free in the U.S., or, for callers outside the U.S. and Canada, a regular toll line at 1-202-501-4444.

Crime: Nauru has a low crime rate. However, visitors should not be complacent regarding personal safety or the protection of valuables.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, to contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney, if needed.

Medical Facilities and Health Information: Health care facilities in the Republic of Nauru are adequate for routine medical problems, but very limited in availability. Serious medical conditions requiring hospitalization and/or medical evacuation to the United States can cost thousands of dollars. Doctors and hospitals often expect immediate cash payment for health services.

Information on vaccinations and other health precautions, such as safe food and water precautions and

insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747); or via the CDC's Internet site at http://wwwn.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith.

The U.S. Department of State is unaware of any HIV/AIDS entry restrictions for visitors to or foreign residents of Nauru. However, the Ministry of Health of Nauru is currently considering whether to put restrictions in place. Please inquire directly with Republic of Nauru Permanent Mission to the United Nations. Please see the Entry/Exit Requirements section for contact information.

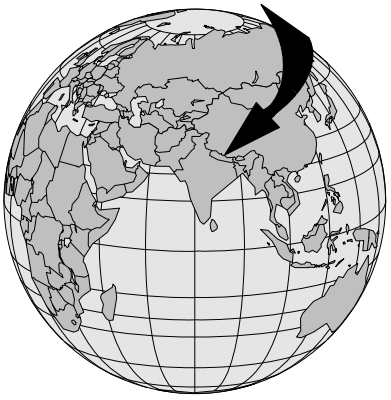
Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and if it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Nauru is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

Traffic moves on the left in Nauru. The main road circling the island is paved, but the remaining roads are unpaved. There is no organized roadside assistance, although there are a number of mechanics and car repair facilities on the island. Animals and pedestrians walking in the road make night driving hazardous. For specific information concerning Nauru driving permits, vehicle inspection, road tax and mandatory insurance, contact the Nauru Consulate General in Melbourne, Australia at telephone (613) 9653-5709, fax (613) 9654-4738.

Aviation Safety Oversight: The U.S. Federal Aviation Administration (FAA) has assessed the Government of Nauru as not being in compliance with International Civil Aviation Organization (ICAO) aviation safety standards. For more information, travelers may visit the FAA's internet web site at http://www.faa.gov.

Special Circumstances: In Nauru, the Australian dollar is the legal currency. Travelers' checks and all major currencies are accepted by banks and may also be exchanged for local currency at some local hotels.



Nauru's customs authorities may enforce strict regulations concerning temporary importation into or export from Nauru of items such as foodstuffs, animals, and pornographic materials. It is advisable to contact the Nauru Consulate General in Melbourne, Australia, for specific information regarding customs requirements.

U.S. citizens are encouraged to carry a copy of their U.S. passports with them at all times, so that, if questioned by local officials, proof of identity and U.S. citizenship are readily available. If detained, U.S. citizens are encouraged to request that a consular officer at the U.S. Embassy in Suva, Fiji be notified.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than those in the United States for similar offenses. Persons violating Nauru law, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs are strict, and convicted offenders can expect jail sentences and fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: There is no U.S. Embassy or diplomatic post in Nauru. The U.S. Embassy in Suva, Fiji, provides assistance for U.S. citizens in Nauru. Americans living or traveling in Nauru are encouraged to register with the U.S. Embassy in Suva through the State Department's travel registration web site at https://travelregistration.state.gov, and to obtain updated information on travel and security in Nauru. Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate. The U.S. Embassy in Fiji is located at 31 Loftus Street in Fiji's capital city of Suva. The telephone number is (679) 331-4-466; the fax number is (679) 330-2-267. Information may also be obtained by visiting the Embassy's home page at http://suva.usembassy.gov. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency.

NEPAL

Compiled from the June 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Kingdom of Nepal

PROFILE

Geography

Area: 147,181 sq. km. (56,136 sq. mi.), about the size and shape of Tennessee, bordering China and India.

Cities: Capital—Kathmandu (3 districts) (pop. 2.2 million est.). Other cities—Biratnagar, Patan, Pokhara, Birgunj, Dharan, Nepalgunj.

Terrain: Flat and fertile in the southern Terai region; terraced cultivation and swiftly flowing mountain rivers in the central hills; and the high Himalayas in the north. Eight of the world's ten highest peaks are in Nepal, including Mount Everest. Kathmandu, the capital, is in a broad valley at 1,310 meters (4,300 ft.) elevation.

Climate: Subtropical in the south to cool summers and severe winters in the northern mountains. The monsoon season is from June through September, during which showers occur almost every day, bringing 75 to 150 centimeters (30-60 in.) of rain.

Time zone: Nepal is 10 hours and 45 minutes ahead of Eastern Standard Time and does not observe daylight saving time.

People

Nationality: Noun—Nepali (sing.) or Nepalese (plural). Adjective—Nepalese or Nepali.

Population: (2007 estimate) 29 million.

Annual growth rate: (2007 estimate) 2.132%.

Population breakdown/distribution: Rural (86%); female (50%); in the southern Terai region (49%); in the hills (44%); in the mountains (7%).

Ethnic groups: (caste and ethnicity are often used interchangeably) Brahman, Chetri, Newar, Gurung, Magar, Tamang, Rai, Limbu, Sherpa, Tharu, and others.

Religions: Hinduism (81%), Buddhism (11%), Islam (4%), and others (4%).

Languages: Nepali and more than 12 others.

Education: Years compulsory—0. Attendance—primary 80.4%, secondary 20%. Literacy—49% (63% male, 35% female).

Health: Infant mortality rate (2007 estimate)—63.7 deaths/1,000 live births. Life expectancy (2007 estimate)—61.9 years for males and 65.5 years for females.

Work force: Agriculture—71%; industry—3%; services—11%; other—1%.

Government

Type: Representative democracy.

Constitution: Interim constitution promulgated on January 15, 2007. Constituent Assembly convened May 2008 to draft a new constitution.

Government branches: Executive—President (head of state), Prime Minister (head of government), interim Council of Ministers formed on April 1, 2007. Legislative—The Constituent Assembly is a unicameral Parliament, consisting of 601 members; 240 members were elected through a direct electoral process representing single-member constituencies across the country; 335 members were nominated from party lists through a proportional representation system; and 26 are to be nominated by the cabinet as representatives of ethnic and indigenous communities. Judicial—Supreme Court, 16 appellate courts, 75 district courts.

Political subdivisions: 5 development regions, 14 zones, and 75 districts. 75 district development committees, 58 municipalities, 3,913 village development committees, and 36,023 ward committees.

Political parties: Communist Party of Nepal-Maoist (on the U.S. terrorist exclusion list), Nepali Congress, Communist Party of Nepal-United Marxist Leninist, Madhesi People's Rights Forum, Tarai Madhes Democratic Party, Sadhbavana Party, Rastriya Prajatantra Party, and 18 others.

Elections: Constituent Assembly election held on April 10, 2008.

Suffrage: Universal over 18.

Defense/police: (FY 2007/2008) $314 million.

National Day: Republic Day, Jestha 15 (May 28); Democracy Day, Falgun 7 (mid-February). (Note: Jestha and Falgun are months of the Nepalese calendar.)

Economy

GDP: (2006/2007) $10.23 billion.
Annual growth rate of real GDP: (FY 2006/2007) 2.5%.
Per capita income: (gross national product, FY 2006/2007) $387.
Avg. inflation rate: (Consumer Price Index, April 2008 est.) 896%.
Natural resources: Water, hydropower, scenic beauty, limited but fertile agricultural land, timber.
Agriculture: (36.1% of GDP) Products—rice, wheat, maize, sugarcane, oilseed, jute, millet, potatoes. Cultivated land—25%.
Industry: (7.8% of GDP) Types—carpets, pashmina, garments, cement, cigarettes, bricks, sugar, soap, matches, jute, manufactured goods, hydroelectric power.
Trade: (2006/2007) Exports—892 million: carpets, pashmina, garments. Major markets—Germany and the U.S. Imports—$2.79 billion: manufactured goods. Major supplier—India.
Budget: (FY 2007/2008) $2.59 billion; military allocation $167 million.
Exchange rate: (as of June 23, 2008) 68.45 Nepalese rupees=U.S. $1.00.
Fiscal year: July 16-July 15.

PEOPLE

Perched on the southern slopes of the Himalayan Mountains, Nepal is as ethnically diverse as its terrain of fertile plains, broad valleys, and the highest mountain peaks in the world. The Nepalese are descendants of three major migrations from India, Tibet, and central Asia.

Among the earliest inhabitants were the Newars of the Kathmandu Valley and aboriginal Tharus in the southern Terai region. The ancestors of the Brahman and Chetri caste groups came from India, while other ethnic groups trace their origins to central Asia and Tibet, including the Gurungs and Magars in the west, Rais and Limbus in the east, and Sherpas and Bhotias in the north.

The Terai, a part of the Ganges Basin with 20% of Nepal's land, is the country's breadbasket. Much of the population is physically and culturally similar to the Indo-Aryan people of northern India. People of Indo-Aryan and Mongoloid origin live in the hill regions. The mountainous highlands are sparsely populated. The Kathmandu Valley, in the middle hill region, constitutes a small fraction of the nation's area but is the most densely populated, with over 7% of the population.

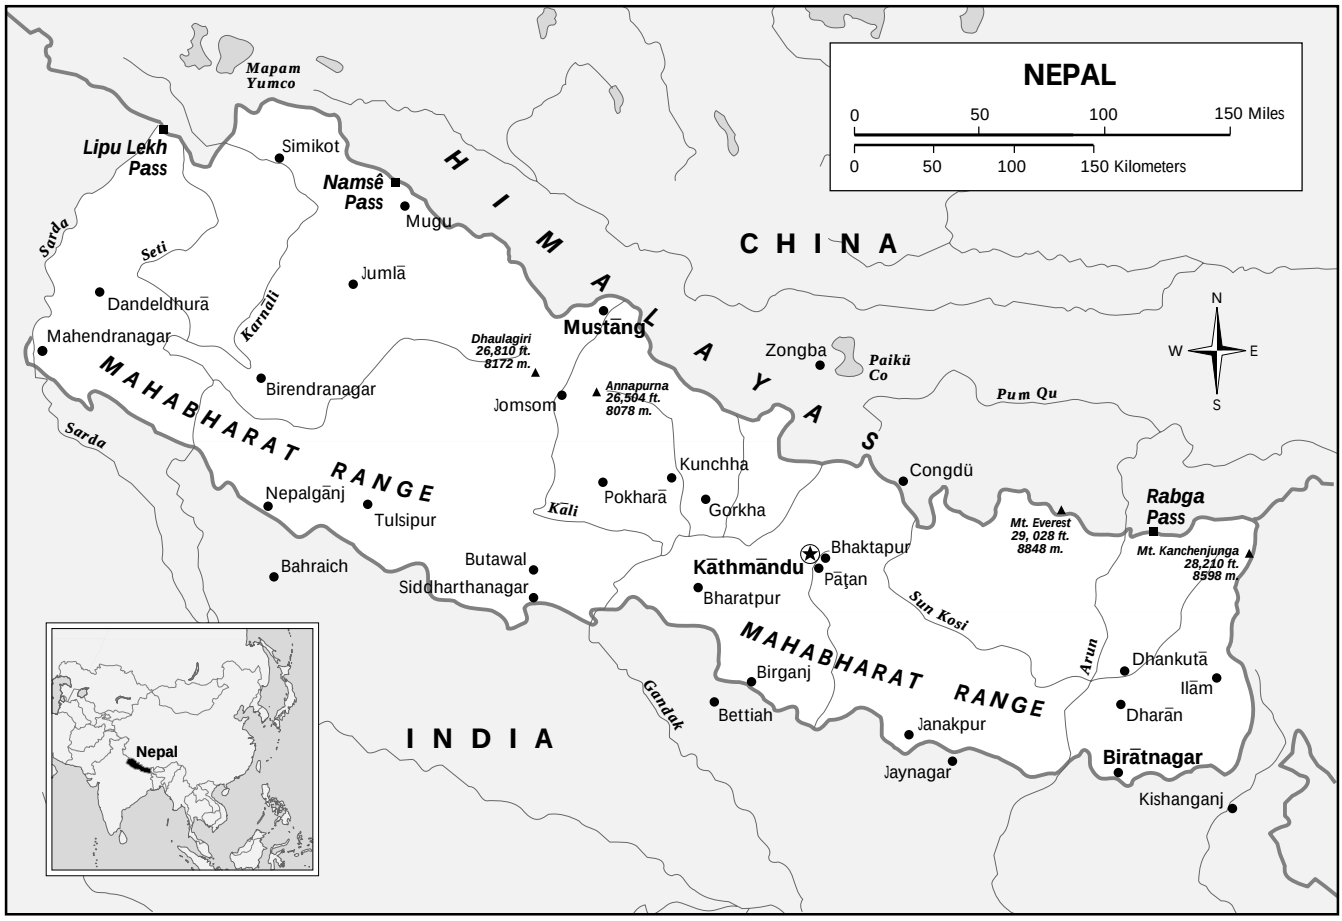
Religion is important in Nepal; the Kathmandu Valley alone has more than 2,700 religious shrines. According to the 2001 census, Nepal is about 81% Hindu. Buddhists account for about 11% of the population. The interim constitution promulgated on January 15, 2007 declared the country a "secular state." Buddhist and Hindu shrines and festivals are respected and celebrated by many. The government celebrates most Hindu and some Buddhist holidays. Nepal also has small Muslim and Christian minorities. Certain animistic practices of old indigenous religions also survive.

Nepali is the official language, although over 100 regional and indigenous languages are spoken throughout the country. Derived from Sanskrit, Nepali is similar to Hindi and is spoken by about 90% of the population (although often as a second or third language). Many Nepalese in government and business also speak Hindi and English.

HISTORY

Early History

Modern Nepal was created in the latter half of the 18th century when Prithvi Narayan Shah, the ruler of the small principality of Gorkha, formed a unified country from a number of independent hill states. The country was frequently called the Gorkha Kingdom, the source of the term "Gurkha" used for Nepali soldiers.



After 1800, the heirs of Prithvi Narayan Shah proved unable to maintain firm political control over Nepal. A period of internal turmoil followed, heightened by Nepal's defeat by the British in a war from 1814 to 1816. Stability was restored after 1846 when the Rana family gained power, entrenched itself through hereditary prime ministers, and reduced the monarch to a figurehead. The Rana regime, a highly centralized autocracy, pursued a policy of isolating Nepal from external influences. This policy helped Nepal maintain its national independence during the colonial era, but also impeded the country's economic development.

In 1950, King Tribhuvan, a direct descendant of Prithvi Narayan Shah, fled his "palace prison" to newly independent India, touching off an armed revolt against the Rana administration. This allowed the return of the Shah family to power and, eventually, the appointment of a non-Rana prime minister. A period of quasi-constitutional rule followed, during which the monarch, assisted by the leaders of fledgling political parties, governed the country. During the 1950s, efforts were made to frame a constitution for Nepal that would establish a representative form of government, based on the British model.

Democracy Develops

In early 1959, King Mahendra, who had succeeded his father Tribhuvan in 1955, issued a new constitution and the first democratic elections for a national assembly were held. The Nepali Congress Party, a moderate socialist group, gained a substantial victory in the election. Its leader, B.P. Koirala, formed a government and served as Prime Minister.

Declaring parliamentary democracy a failure eighteen months later, King Mahendra dismissed the Koirala government and promulgated a new constitution on December 16, 1962. The new constitution established a "par-

tyless" system of panchayats (councils), which King Mahendra claimed was a democratic form of government closer to Nepalese traditions. As a hierarchical structure progressing from village assemblies to a Rastriya Panchayat (National Parliament), the Panchayat system enshrined the absolute power of the monarchy and kept the King as head of state with sole authority over all governmental institutions, including the Cabinet (Council of Ministers) and the Parliament.

King Mahendra was succeeded by his 27-year-old son, King Birendra, in 1972. Amid student demonstrations and anti-regime activities in 1979, King Birendra called for a national referendum to decide the nature of Nepal's government—either the continuation of the Panchayat system with democratic reforms or the establishment of a multiparty system. The referendum was held in May 1980, and the Panchayat system won a narrow victory. The King carried out the promised reforms, including selection of the prime minister by the Rastriya Panchayat.

Movement to Restore Democracy

In 1990, the political parties again pressed the King and the government for change. Leftist parties united under a common banner of the United Left Front and joined forces with the Nepali Congress Party to launch strikes and demonstrations in the major cities of Nepal. This "Movement to Restore Democracy" was initially dealt with severely, with more than 50 persons killed by police gunfire and hundreds arrested. In April, the King capitulated. Consequently, he dissolved the Panchayat system, lifted the ban on political parties, and released all political prisoners. An interim government was sworn in on April 19, 1990, headed by Krishna Prasad Bhattarai as Prime Minister presiding over a cabinet made up of members of the Nepali Congress Party, the communist parties of Nepal, royal appointees, and independents. The new government drafted and promulgated a new constitution in November 1990, which enshrined fundamental human rights and established Nepal as a parliamentary democracy under a constitutional monarch. International observers characterized the May 1991 elections as free and fair, in which the Nepali Congress Party won 110 out of 205 seats to form the government.

In mid-1994, the Parliament was dissolved due to dissension within the Nepali Congress Party. The subsequent general election held Novem-

ber 15, 1994, gave no party a majority. The 1994 elections resulted in a Nepali Congress Party defeat and a hung Parliament, with a minority government led by the Communist Party of Nepal-United Marxist Leninist Party (CPN-UML); this made Nepal the world's first communist monarchy, with Man Mohan Adhikary as Prime Minister. The next five years saw five successive unstable coalition governments and the beginning of a Maoist insurgency.

Following the May 1999 general elections, the Nepali Congress Party once again headed a majority government after winning 113 out of 205 seats. But the pattern of short-lived governments persisted. There were three Nepali Congress Party Prime Ministers after the 1999 elections: K.P. Bhattarai (5/31/99-3/17/00); G. P. Koirala (3/20/00-7/19/01); and Sher Bahadur Deuba (7/23/01-10/04/02).

On June 1, 2001, Crown Prince Dipendra reportedly shot and killed his father King Birendra, his mother Queen Aishwarya, his brother, his sister, his father's younger brother Prince Dhirendra, and several aunts before turning the gun on himself. After his death two days later, the late King's surviving brother Gyanendra was proclaimed King.

Maoist Insurgency

In February 1996, the leaders of the Maoist United People's Front began a violent insurgency, waged through killings, torture, bombings, kidnappings, extortion, and intimidation against civilians, police, and public officials in more than 50 of the country's 75 districts. Over 13,000 police, civilians, and insurgents were killed in the conflict. The government and Maoists held peace talks in August, September, and November of 2001, but they were unsuccessful, and the Maoists resumed their violent insurgency. Shortly after the 2001 peace talks failed, King Gyanendra declared a state of emergency, which the Parliament approved by a two-thirds vote. On the recommendation of Prime Minister Sher Bahadur Deuba, the King dissolved the House on May 22, 2002.

Struggle for Democracy Continues

In a sudden turn of events on October 4, 2002, King Gyanendra removed Prime Minister Deuba and assumed executive power. The entire Council of Ministers was also dissolved, and the November 13, 2002 elections to the dissolved House of Representatives were called off. After a week-long consultation with the leaders of various political parties, on October 11, 2002, the King appointed Lokendra Bahadur Chand as Prime Minister with a five-point directive that included creating an environment of peace and security as well as holding elections to the local bodies and the House of Representatives.

Under Chand's premiership, the government and Maoists declared a cease-fire on January 29, 2003. This marked the second cease-fire with the Maoists; the first, in 2001, had been broken by the Maoists. The 2003 cease-fire included an agreement to undertake initiatives to resolve the Maoist problem through dialogue and bring the Communist Party of Nepal (Maoist) back into mainstream politics. After the announcement of the 2003 cease-fire, the Chand government held two rounds of peace talks with the Maoists, in April and May. But in its effort to end political instability, it failed to secure the support of the leading political parties. In the face of growing pressure from political parties and their mass movement, Chand resigned from his post on May 30, 2003, after only seven months in power. The King appointed Surya Bahadur Thapa as the new Prime Minister on June 4, 2003, amidst opposition from the major political parties. Another round of peace talks was held in mid-August 2003, but on August 27, 2003 the Maoists broke the second cease-fire. Thapa resigned in May 2004 as a result of political pressure. In June 2004, the King reinstated formerly dismissed Sher Bahadur Deuba as Prime Minister.

King's Direct Rule

Citing a steady deterioration of conditions in the country, King Gyanendra dismissed the Cabinet and constituted a Council of Ministers under his own chairmanship on February 1, 2005. He stated that the Council of Ministers (i.e., Cabinet) would try to reactivate multi-party democracy within three years.

The King subsequently declared a state of emergency and suspended almost all fundamental rights for nearly three months. His new government was sworn in on February 2, 2005. The Council of Ministers under the King's chairmanship was reshuffled twice during the King's 15 months of direct rule.

People's Movement

In April 2006, the major political parties, in cooperation with the Maoists, organized massive countrywide demonstrations for the restoration of democracy, forcing the King to relinquish power. On April 24, 2006, King Gyanendra reinstated the 1999 Parliament. Former Prime Minister Girija Prasad Koirala of the Nepali Congress Party was selected by the Seven-Party Alliance (SPA) of political parties to again lead the government. The Maoists declared a unilateral cease-fire on April 26, and the new Koirala government announced its own unilateral cease-fire and plans for peace talks with the Maoist insurgents on May 3, 2006.

The SPA and the Maoists have since signed a number of agreements, including, in November 2006, a comprehensive peace agreement to end the decade-long insurgency. Both sides also agreed to an arms management process and elections for a Constituent Assembly. On January 15, 2007 a 329-member interim Parliament, including 83 Maoist representatives and other party representatives, was constituted. The first sitting of the Parliament unanimously endorsed an interim constitution, which replaced the constitution of 1990. On April 1, 2007, the ruling eight-party government formed an interim Council of Ministers through political consensus, including five Maoist ministers.

GOVERNMENT AND POLITICAL CONDITIONS

A 10-year Maoist insurgency—punctuated by cease-fires in 2001, 2003, 2005, and 2006—began in 1996. After King Gyanendra announced the reinstatement of Parliament on April 24, 2006, the Maoists declared a three-month unilateral ceasefire on April 26, 2006 which the new Koirala government reciprocated on May 3, 2006. The Seven-Party Alliance (SPA) and the Maoists signed five agreements, culminating in the comprehensive peace agreement of November 21, 2006, effectively ending the insurgency. However, Maoist violence and intimidation continued in spite of the agreement.

The main agenda of the SPA and the Maoists was to hold a Constituent Assembly (CA) election, with the primary responsibility of drafting and promulgating a new constitution defining the future political system in Nepal. The interim constitution, adopted on January 15, 2007, expressed full commitment to democratic ideals and norms, including competitive multi-party democracy, civil liberties, fundamental human rights, adult enfranchisement, periodic elections, press freedom, an independent judiciary, and the rule of law. The interim constitution also guaranteed the basic rights of Nepali citizens to formulate a constitution for themselves and to participate in the Constituent Assembly in an environment free from fear. The interim constitution transferred all powers of the King as head of state to the prime minister and stripped the King of any ceremonial constitutional role. Under the interim constitution, the fate of the monarchy was to be decided by the first meeting of the Constituent Assembly. The interim Parliament was a unicameral house.

After promulgation of the interim constitution, many socially marginalized ethnic communities, including the Madhesis of the lowland Terai, began widespread protests against the proposed proportional representation system incorporated in the new constitution. After a Maoist shot and killed one of the demonstrators, violent protests erupted with clashes between police and demonstrators and attacks on government facilities in at least 10 districts, resulting in the death of over 30 people. Prime Minister Koirala, in an address to the nation on February 7, 2007 promised to amend the constitution to meet the demands of the Terai people. However, the situation remained tense, with continuing protests and violence.

Twice deferred, Nepal's historic Constituent Assembly (CA) election was finally held on April 10, 2008. None of the parties succeeded in getting a simple majority in the CA. The Communist Party of Nepal (Maoist) won 220 out of 575 elected seats, followed by the Nepali Congress with 110 seats, the Communist Party of Nepal (Unified Marxist-Leninist) with 103 seats, and the Terai-based Madhesi People's Rights Forum with 52 seats. These numbers are only preliminary, as five seats still need to be determined through by-elections and the outcome of several races has been contested in the special election court.

The final list of members elected under the proportional representation system was released on May 8, 2008. The members of the Constituent Assembly were sworn in on May 27, 2008, and the first session of the CA was convened on May 28, 2008. In this session, the CA voted to declare Nepal a federal democratic republic by abolishing the monarchy. Out of 564 members of the CA who voted, 560 voted in favor and 4 against the motion.

While the CA has the prime responsibility of drafting a new constitution for Nepal, it also functions as a regular Parliament. Through the fourth amendment to the interim constitution of Nepal on May 28, 2008, the CA also established, for the first time, a largely ceremonial President as the constitutional head of state, as well as a Vice President. The Prime Minister continues to be the head of the government.

Nepal's judiciary is legally separated from the executive and legislative branches and, in practice, has increasingly shown the will to be independent of political influence. However, by asserting executive control over the judiciary, the interim constitution called into question this independence. Under the interim constitution, the Prime Minister appoints the Chief Justice on the recommendation of the Constitutional Council, and the Chief Justice appoints other judges on the recommendation of the Judicial Council. All lower court decisions, including acquittals, are subject to appeal. The Supreme Court is the court of last appeal.

Human Rights

Since political reform began in 1990, some progress has been achieved in the transition to a more open society with greater respect for human rights; however, substantial problems remain. Poorly trained police sometimes use excessive force in quelling violent demonstrations. In addition, there have been reports of torture during detention and widespread reports of custodial abuse. In 2000, the government established the National Human Rights Commission, a government-appointed commission with a mandate to investigate human rights violations. However, the government is sometimes slow to follow the commission's recommendations or to enforce accountability for recent and past abuses. The King's February 2005 dismissal of the government, subsequent imposition of emergency rule and suspension of many civil rights—including freedom of expression, assembly, and privacy—was a setback for human rights in Nepal. During this three-month period, censors were deployed to major newspapers, and many political leaders were kept under house arrest. The King's government restricted the media from publishing interviews, articles, or news items against the spirit of the royal proclamation of February 1, 2005 or in support of terrorist or destructive activities. The reinstated government, led by Prime Minister Koirala, reversed these decisions in May 2006. The interim constitution

promulgated on January 15, 2007 ensured unrestricted freedom of expression.

Both the Maoists and security personnel have committed numerous human rights violations. The Maoists have used tactics such as kidnapping, torture, bombings, intimidation, killings, and conscription of children. Within the Nepalese security forces, violations ranged from disappearances to executions. After the royal takeover on February 1, 2005 and subsequent imposition of the state of emergency, the security forces arrested many political leaders, student leaders, journalists, and human rights activists under the Public Security Act of 1989, although all were released by June 2005 when the King ended the state of emergency.

After the April 2006 cease-fire announced by the government and the Maoists, incidents of human rights violations by the government declined substantially while incidents of human rights violations by the Maoists remained relatively unabated. Even after signing a comprehensive peace agreement with the government in November 2006, Maoists' extortion, abduction, and intimidation largely remained uncontrolled. Although activities by other political parties have increased significantly in the rural parts of Nepal, political party representatives, police, non-governmental organization (NGO) workers, and journalists reported continuous threats and intimidation by Maoist cadres. During the January-February 2007 uprising in the Terai, reports of government security forces using excessive force to quell demonstrations were common.

There are three major daily English-language newspapers, "The Kathmandu Post," "The Himalayan Times" and "The Rising Nepal." The last and its vernacular sister publication are owned by a government corporation. There are hundreds of smaller daily and weekly periodicals that are privately owned and of varying journalistic quality. Views expressed since the 1990 move to democracy are varied and vigorous. Currently, more than 75 radio and four television stations are privately owned and operated, following liberalization of licensing regulations. Radio Nepal and Nepal Television are government-owned and operated. There are nearly 200 cable television operators nationwide, and satellite dishes to receive television broadcasts abound. However, despite its prominence, the Nepali press is still frequently subject to violence and intimidation by political groups.

Trafficking in women and child labor remain serious problems. While Nepal is primarily a source country for destinations like India and the Middle East, internal trafficking is also a prominent issue. According to the State Department's 2008 Trafficking in Persons Report, 5,000 to 7,000 girls have been trafficked from rural parts of the country to Kathmandu, and there are over 20,000 child indentured domestic workers in Nepal. Lack of prosecution and police complicity in trafficking cases remain major problems. Discrimination against women and lower castes is prevalent.

Principal Government Officials

Last Updated: 11/12/08

Pres.: **Ram Baran YADAV, Dr.**
Vice Pres.: **Paramananda JHA**
Prime Min.: **Pushpa Kamal DAHAL**
Dep. Prime Min.: **Bamdev GAUTAM**
Min. of Agriculture & Cooperatives: **Jaya Prakash GUPTA**
Min. of Commerce & Supplies: **Rajendra MAHATO**
Min. of Culture & State Restructuring: **Gopal KIRANTI**
Min. of Defense: **Ram Bahadur THAPA**
Min. of Education: **Renu YADAV**
Min. of Environment, Science, & Technology: **Ganesh SHAH**
Min. of Finance: **Baburam BHATTARAI**
Min. of Foreign Affairs: **Upendra YADAV**
Min. of Forest & Soil Conservation: **Kiran GURUNG**
Min. of Gen. Admin.: **Pampha BHUSAL**
Min. of Health & Population: **Giriraj Mani POKHREL**
Min. of Home: **Bamdev GAUTAM**
Min. of Industry: **Asta Laxmi SHAKYA**
Min. of Information & Communications: **Krishna Bahadur MAHARA**
Min. of Labor & Transport Management: **Lekh Raj BHATTA**
Min. of Land Reform & Management: **Matrika YADAV**
Min. of Law, Justice, & Constituent Assembly: **Dev GURUNG**
Min. of Local Development: **Ram Chandra JHA**
Min. of Peace & Rehabilitation: **Janardan Sharma PRABHAKAR**
Min. of Physical Planning & Public Works: **Vijaya Kumar GACHHEDAR**

Min. of Youth & Sports: **Gopal SHAKYA**
Governor, Central Bank:
Ambassador to the US: **Suresh Chandra CHALISE**
Permanent Representative to the UN, New York: **Madhu Raman ACHARYA**

Nepal maintains an Embassy in the United States at 2131 Leroy Place, NW, Washington, DC 20008 (Tel: 202-667-4550; fax: 202-667- 5534). The Nepalese Mission to the United Nations is at 300 E. 46th Street, New York, NY 10017 (Tel: 212-370-3988/ 3989).

ECONOMY

Nepal ranks among the world's poorest countries, with a per capita income of around $386 in 2007. Based on national calorie/GNP criteria, an estimated 31% of the population is below the poverty line. An isolated, agrarian society until the mid-20th century, Nepal entered the modern era in 1951 without schools, hospitals, roads, telecommunications, electric power, industry, or a civil service. The country has, however, made progress toward sustainable economic growth since the 1950s and is committed to a program of economic liberalization.

Nepal launched its 10th five-year economic development plan in 2002; its currency has been made convertible; and fourteen state enterprises have been privatized, seven liquidated, and two dissolved. Foreign aid accounts for more than half the development budget. The Government of

Nepal has shown an increasing commitment to fiscal transparency, good governance, and accountability. Also in 2002, the government began to prioritize development projects and eliminate wasteful spending. In consultation with civil society and donors, the government cut 160 development projects that were driven by political patronage.

Agriculture remains Nepal's principal economic activity, employing over 71% of the population and providing 36.1% of GDP. Only about 25% of the total area is cultivable; another 33% is forested; most of the rest is mountainous. Rice and wheat are the main food crops. The lowland Terai region produces an agricultural surplus, part of which supplies the food-deficient hill areas. Because of Nepal's dependence on agriculture, the magnitude of the annual monsoon rain strongly influences economic growth.

In FY 2006/2007 Nepal's exports increased by 4.2%, compared to an increase of 2.8% in FY 2005/2006. Imports grew by 11.3% in FY 2006/2007 as compared to 9.8% in FY 2005/2006. Exports were constrained by political turmoil and a poor investment climate. The trade deficit for FY 2005/2006 was $1.4 billion, which widened to $1.8 billion in FY 2006/2007. Real GDP growth during 1996-2002 averaged less than 5%. Real growth experienced a one-time jump in 1999, rising to 6%, before slipping back below 5%. In 2002, GDP recorded a negative growth rate of 0.33%, largely because of the Maoist insurgency. GDP grew 3.1% in FY 2002/2003 and 3.6% in FY 2003/2004, and again slipped to 2.4% in 2004/2005 and to 2.4% in FY 2005/2006, according to the Central Bureau of Statistics.

Despite its growing trade deficit, Nepal traditionally has a balance of payments (BOP) surplus due to remittances from Nepalese working abroad. In FY 2006/2007, Nepal recorded a balance of payments surplus of $83.4 million (0.9% of GDP), as compared to $356.1 million in FY 2005/2006 (3.9% of GDP).The lower BOP surplus in FY 2006/2007 was mainly attributable to slower exports and remittances. While the current account decreased in FY 2006/2007, the capital account registered significant growth. Nepal receives substantial amounts of external assistance from India, the United Kingdom, the United States, Japan, Germany, and the Scandinavian countries. Several multilateral organizations—including the World Bank, the Asian Development Bank, and the UN Development Program—also provide significant assistance. On April 23, 2004, Nepal became the 147th member of the World Trade Organization (WTO).

With eight of the world's ten highest mountain peaks—including Mt. Everest at 8,848 m (29,000 ft)—Nepal is a tourist destination for hikers and mountain climbers. However, the decade-long insurgency and a global economic slowdown threatened the tourism industry. But 2007 witnessed a renewed wave of tourism. Figures from the Department of Immigration showed a 37.2% increase in arrivals in 2007, which surpassed the numbers of tourist arrivals during 1999, the peak tourism year prior to 2006. Since the political parties and Maoists brokered a comprehensive peace agreement in November 2006, renewed tourist arrivals have given relief to the tourism-based hotel, trekking, mountaineering, and aviation industries.

Swift rivers flowing south through the Himalayas have massive hydroelectric potential to service domestic power needs and growing demand from India. Only about 1% of Nepal's hydroelectric potential is currently tapped. Several hydroelectric projects, at Kulekhani and Marsyangdi, were completed in the early to late 1980s. In the early 1990s, one large public-sector project, the Kali Gandaki A (144 megawatts—MW), and a number of private projects were planned; some have been completed. Kali Gandaki A started commercial operation in August 2002. The most significant privately financed hydroelectric projects currently in operation are the Khimti Khola (60 MW) and Bhote Koshi (36 MW) projects.

The environmental impact of Nepal's hydroelectric projects has been limited by the fact that most are "run-of-river," with only one storage project undertaken to date. The planned private-sector West Seti (750 MW) storage project is dedicated to electricity exports. An Australian company signed a power purchase agreement with the Indian Power Trading Corporation in September 2002 and has the lead on the project. Negotiations with India for a power purchase agreement have been underway for several years, but agreement on pricing and capital financing remains a problem. The Government of Nepal has taken up the issue of project financing for the West Seti project with the EXIM Bank of China. Starting in December 2006, the Department of Electricity Development obtained proposals from 14 foreign companies for survey licenses of three projects—600 MW Budhi Gandaki, 402 MW Arun III, and 300 MW Upper Karnali. The Ministry of Water Resources, after delaying the evaluation process for more than a year, finally awarded the 300 MW Upper Karnali to Indian private sector developer GMR Energy Ltd. In March 2008, the 402 MW Arun III was awarded to India's state-owned Sutlej Jal Vidyut Nigam (SJVN). The Department of Electricity Development had invited fresh global tenders for the 600 MW Budhi Gandi project in December 2007, but it failed to attract investors. Currently, domestic demand for electricity is increasing at 8%-10% a year.

Population pressure on natural resources is increasing. Overpopulation is already straining the "carrying capacity" of the middle hill areas, particularly the Kathmandu Valley, resulting in the depletion of forest cover for crops, fuel and fodder, and contributing to erosion and flooding. Additionally, water supplies within the Kathmandu Valley are not considered safe for consumption, and disease outbreaks are not uncommon. Although steep mountain terrain makes exploitation difficult, mineral surveys have found small deposits of limestone, magnesite, zinc, copper, iron, mica, lead, and cobalt.

Progress has been achieved in education, health, and infrastructure. A countrywide primary education system is under development, and Tribhuvan University has several campuses. Although eradication efforts continue, malaria has been controlled in the fertile but previously uninhabitable Terai region in the south. Kathmandu is linked to India and nearby hill regions by an expanding highway network.

DEFENSE

Nepal's military consists of the nearly 95,000-strong Nepalese Army (NA), which is organized into six divisions (Far-Western, Mid-Western, Western, Central, Eastern, and Valley Divisions) with separate Aviation, Parachute, and Security Brigades as well as brigade-sized directorates encompassing air defense, artillery, engineers, logistics, and signals which provide general support to the NA. According to recent amendments to the interim constitution, the President—when he or she is chosen—will be the Supreme Commander of the NA. The Prime Minister is currently Minister of Defense. General Rookmangud Katawal is Chief of the Army Staff (COAS), and also the senior commissioned officer of the NA. Talks are currently underway to negotiate the integration of the Maoist People's Liberation Army into the NA.

Since 1958, the NA has contributed over 50,000 peacekeepers to 28 peacekeeping missions such as the UN Interim Force in Lebanon (UNIFIL), the UN Protection Force (UNPROFOR) in the former Yugoslavia, the UN Operational Mission in Somalia II (UNOSOMII), the UN Mission in Haiti (UNMIH), and the UN Mission of Support in East Timor (UNTAET). NA units are presently serving in the UN Mission in Sierra Leone (UNAMSIL), the UN Mission in the Democratic Republic of the Congo (MONUC), and the UN Mission in Haiti (MINUSTOH), among others. Approximately 3,400 of the world-famous Nepalese Gurkha forces serve in the British Army, and 40,000 serve in the Indian Army.

The U.S. Pacific Command (USPACOM) coordinates U.S. military engagement and security assistance with Nepal through the Office of Defense Cooperation. Cumulative U.S. military assistance to the NA has consisted of $21.95 million in grant assistance: Foreign Military Financing (FMF) since 2002, annual professional and technical training provided under the International Military Education and Training Program (IMET grant for $752,000 in FY 2008), additional training provided under the Counter Terrorism (CT) Fellowship (approximately $200,000 annually), and approximately $0.5 million for Global Peace Operations Initiative funding to increase the pool of international peacekeepers and promote interoperability. Many NA officers attend U.S. military schools, conferences and seminars such as those provided by the National Defense University (NDU), Marshall Center, and the Asia Pacific Center for Strategic Studies (APCSS).

FOREIGN RELATIONS

As a small, landlocked country wedged between two much larger and far stronger powers, Nepal seeks good relations with both India and China. Nepal formally established relations with China in 1956 and, since then, their bilateral relations have generally been good. Because of strong cultural, religious, linguistic, and economic ties, Nepal's association with India traditionally has been close. India and Nepal restored trade relations in 1990 after a break caused by India's security concerns over Nepal's relations with China. A bilateral trade treaty signed with India in 1991 is renewed every five years. The most recent renewal was on March 6, 2007, which expires on March 5, 2012. A transit treaty with India, which allows Nepal to trade with other countries through the Calcutta/Haldia ports, was extended on March 30, 2006 for seven years.

Nepal played an active role in the formation of the economic development-oriented South Asian Association for Regional Cooperation (SAARC) and is the site of its secretariat. Nepal is also a signatory of the agreement on South Asian Free Trade Area (SAFTA), which came into force on January 1, 2006. A SAFTA tariff liberalization program (TLP) was scheduled to be implemented July 1, 2006. All member countries, except for Nepal, whose TLP started on August 1, 2006, reduced tariffs for each other. However, on July 1, 2006, Pakistan officially toughened its stance of not trading with India under the SAFTA arrangements and did not announce TLP for India. Due to the stalemate between India and Pakistan, the Bay of Bengal Initiative for Multi-Sectoral Technical and Economic Cooperation Free Trade Agreement (BIMSTEC-FTA), which was initially scheduled to come into force on July 1, 2006, was deferred indefinitely. The BIMSTEC Summit scheduled for February 8, 2007, in India was also deferred due to political instability in member states, including Nepal. It has now been rescheduled for November 2008. On international issues, Nepal follows a non-aligned policy and often votes with the Non-Aligned Movement in the United Nations. Nepal participates in a number of UN specialized agencies and is a member of the World Trade Organization, World Bank, International Monetary Fund, Colombo Plan, and Asian Development Bank.

U.S.-NEPAL RELATIONS

The United States established official relations with Nepal in 1947 and opened its Kathmandu Embassy in 1959. Relations between the two countries have always been friendly. U.S. policy objectives toward Nepal center on helping Nepal build a peaceful, prosperous, and democratic society.

Since 1951, the United States has provided more than $1 billion in bilateral development assistance to Nepal. In recent years, annual bilateral U.S. assistance through the U.S. Agency for International Development (USAID) and the Department of

State has averaged $55 million. U.S. foreign assistance programs support Nepal's peace process and transition to democracy, and promote long-term development through agriculture, health, family planning, environmental protection, and vocational education programs in Nepal. The United States also contributes to international institutions and private voluntary organizations working in Nepal. The Peace Corps temporarily suspended its operations in Nepal in 2004 due to increasing security concerns, and officially terminated its Nepal program in 2006.

TRAVEL

Consular Information Sheet

September 29, 2008

Country Description: Nepal is a developing country with extensive tourist facilities, which vary widely in quality and price. The capital is Kathmandu. Nepal has suffered from political instability for almost 11 years. The Government signed a Comprehensive Peace Agreement on November 21, 2006, formally ending the Maoist insurgency, which began in 1996. The Maoist insurgents and other political groups have yet to fully end the violence.

Entry Requirements: A passport and visa are required. Travelers may obtain visas prior to travel or purchase two-month, single-entry visas or two-month, multiple-entry visas upon arrival at Tribhuvan International Airport in Kathmandu and at the following land border points of entry: Kakarvitta, Jhapa District (Eastern Nepal); Birgunj, Parsa District (Central Nepal); Kodari, Sindhupalchowk District (Northern Border); Belahia, Bhairahawa (Rupandehi District, Western Nepal); Jamunaha, Nepalgunj (Banke District, Mid-Western Nepal); Mohana, Dhangadhi (Kailali District, Far Western Nepal); and Gadda Chauki, Mahendranagar (Kanchanpur District, Far Western Nepal). Visas and information on entry/exit requirements can be obtained from the Embassy of Nepal at 2131 Leroy Place NW, Washington, DC 20008, telephone (202) 667-4550 or the Consulate General in New York at (212) 370-3988.

Upon departure from Tribhuvan International Airport, all foreigners must pay an airport exit tax (currently approximately $27), regardless of the length of their stay. Tourists may stay in Nepal no longer than 150 days in any given calendar year.

Active duty U.S. military and Department of Defense contractors must obtain a country clearance from their parent units to be forwarded to the Defense Attaché's Office at the U.S. Embassy in Kathmandu for both official and unofficial travel to Nepal.

Travelers occasionally report immigration difficulties with Chinese authorities when crossing the Nepal-China border over land in either direction. Chinese authorities often require American and other foreign tourists to organize "group" tours through established travel agencies as a pre-requisite for obtaining visas and entry permits into Tibet. U.S. citizens planning to travel to Tibet from Nepal may contact the U.S. Embassy in Kathmandu for current information on the status of the border-crossing points. Travelers may also wish to check with the Embassy of the People's Republic of China in Nepal for current regulations on entry into Tibet.

Visit the Embassy of Nepal web site at http://www.nepalembassyusa.org for the most current visa information.

Safety and Security: A Travel Warning remains in effect because the Department of State continues to be concerned about the security situation in Nepal. Despite the signing of the November 21, 2006 Comprehensive Peace Agreement, Maoists and other political movements continue extortion, abduction and killing. Since April 2006, numerous groups using violent methods to advance various political goals have formed in Nepal. Business people (both Nepalese and foreign) and tourists who resist Maoist extortion demands have been threatened, sometimes assaulted, and risk being detained. Maoist demonstrators have stopped and in some cases attacked vehicles, including those of the U.S. Embassy. Since early 2007, the Maoist Young Communist League (YCL) has harassed and attacked established tourist facilities and infrastructure, and has threatened Kathmandu-based personnel of a U.S. non-governmental organization.

In May 2007, YCL cadre attacked with stones a UN High Commission for Refugees (UNHCR) vehicle carrying the UNHCR Resident Representative and the U.S. Ambassador in Jhapa District in the Terai.

The U.S. Embassy strongly recommends against non-essential travel to the Terai, the southern region bordering India. Maoist splinter groups in the Terai as well as other violent Terai-based groups continue to kidnap and murder Nepalese citizens. Additionally, ongoing political agitation and civil unrest in the Terai, including violent clashes between

various political groups and Maoist splinter groups, as well as inter-communal violence and criminality, have increased. The random, indiscriminate, and unpredictable nature of these attacks creates the risk of U.S. citizens in Nepal being caught in the wrong place at the wrong time.

Since the ceasefire in April 2006, hotels and businesses frequented by American citizens have been the target of extortion demands and, in some cases, have become the focus of demonstrations. In November 2006, resident Americans reported that they were told that they would have to house and feed Maoists intending to participate in rallies in Kathmandu. In a few cases, local Nepali staff of the American residents were threatened or beaten when they attempted to resist this demand. The discrepancy between the Maoists' publicly stated intentions and their behavior, combined with their consistent anti-American rhetoric, remains a serious concern.

Americans traveling to Nepal should be aware of the potential for large or violent demonstrations. Frequently, demonstrators burn vehicles, throw rocks at passing motorists, and burn tires to block traffic. Given the frequency, nature, intensity and unpredictability of disturbances, American citizens are urged to exercise particular caution when demonstrations are announced or reported, avoid areas where demonstrations are occurring or crowds are forming, avoid road travel during these periods and maintain a low profile. Demonstrations can occur with little or no advance notice. American citizens are urged to consult media sources and the Embassy's web site (http://nepal.usembassy.gov) for current security information.

In a November 2002 press release, the Maoists claimed responsibility for targeting and murdering two locally-hired U.S. Embassy security guards. In 2003, the Department of State designated the Communist Party of Nepal (Maoist) as a Terrorist Organization under the "Terrorist Exclusion List" of the Immigration and Nationality Act and under Executive Order 13224. These two designations make Maoists excludable from entry into the United States and bar U.S. citizens from transactions such as contribution of funds, goods, or services to, or for the benefit of, the Maoists.

The U.S. Embassy in Kathmandu requires pre-clearance of all travel outside the Kathmandu Valley by U.S. Government employees. U.S. citizens who decide to travel outside the Valley are strongly urged to contact the U.S. Embassy in Kathmandu to discuss and register their planned itinerary and to receive the most recent security information before traveling. Nighttime road travel should be strictly avoided outside the Kathmandu Valley and minimized within Kathmandu.

Visitors in areas on or near the rim of the Kathmandu Valley, such as Shivapuri National Park, should be particularly cautious when traversing military camps or checkpoints and carefully follow the commands of security personnel. Military installations and checkpoints are often protected with explosive devices. Movement in such areas at or after dusk should not be undertaken. For the latest security information, Americans traveling abroad should regularly monitor the Department of State, Bureau of Consular Affairs' web site at http://travel.state.gov, where the current Travel Warnings and Travel Alerts, including the Travel Warning for Nepal as well as the Worldwide Caution, can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S. and Canada or, for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Bandhs (General Strikes): A "bandh" (forced closure of businesses, schools and halting of vehicular traffic) is a frequently used and long-standing form of political expression in Nepal. Many bandhs are enforced through intimidation and violence. During a recent bandh, an American citizen was injured when demonstrators threw a rock and broke the window of the vehicle in which he was traveling to the airport. Bandhs tend to be unpredictable and may take place without any prior notice. Bandhs typically draw thousands of demonstrators into the streets who sometimes incite or initiate violence. Bandhs tend to focus on the central areas of Kathmandu, but they also can be nationwide, and bandh-related violent disturbances occur throughout Nepal.

Bandhs in the Terai region of Nepal also occur and have been known to last for several weeks, causing acute shortages of daily food supplies and bringing vehicular traffic to a complete halt. Individuals have been reported kidnapped or killed for not complying with the bandhs in the region.

During bandhs, U.S. citizens are urged to avoid all unnecessary travel. If travel by vehicle is necessary, U.S. citizens should pay attention to the volume of traffic on the roads, waiting until a pattern of traffic is well established before undertaking travel, and maintaining a low profile throughout bandh periods. Buses, taxis, and other forms of public transportation may not operate during a bandh. Observance of bandhs, particularly in the transportation sector, may be higher outside the Valley, where a number of private buses and trucks have been stopped, torched, and their drivers beaten. U.S. citizens are strongly urged to avoid road travel outside the Kathmandu Valley, especially during scheduled bandhs. If you are planning air travel to or from Nepal during scheduled bandhs, be aware that transportation to and from airports throughout Nepal could be affected. Consult the U.S. Embassy web site at http://nepal.usembassy.gov for up-to-date information on upcoming bandhs as well as the latest security information.

Crime: Although the rate of violent crime is low in Kathmandu relative to that in comparably-sized American cities, crime in Kathmandu and in adjacent areas has risen dramatically since April 2006. Robbery and home-invasion robbery by armed gangs has increased, and in some cases American citizens have been victimized. The U.S. Embassy has received sev-

eral reports of individuals harassing American women in Kathmandu, and in one case an American woman was assaulted. In another case, when police detained two employees of a hotel where this occurred, the American-citizen victim was threatened by Maoists. The citizen was told that unless the two employees were released, the citizen would not be allowed to leave Nepal. Criminal activity and extortion of tourists occurs frequently along popular hiking trails. Trekkers and other individuals who resist extortion demands are threatened, sometimes assaulted, and risk being detained. In December 2007, Maoist cadres in the popular Annapurna circuit trekking area beat up a Swiss national who declined to pay the "donation" demanded by them. He sustained serious head injuries, requiring stitches.

In late 2005, two European women were murdered in Nargarjun Forest, a popular tourist destination near Kathmandu. The two murders occurred within weeks of each other and both involved women hiking alone. The body and valuables of one woman were recovered and theft did not appear to be the motivation behind the crime. Both crimes remain unsolved and no culprits have been identified.

Visitors should avoid walking alone after dark and carrying large sums of cash or wearing expensive jewelry. Women travelers are advised not to wear revealing clothing in public places as this can be culturally offensive to Nepalese. In addition, visitors should consider exchanging money only at banks and hotels and limiting shopping to daylight hours. There have been several reported incidents in which tourists have had their belongings stolen from their rooms while they were asleep. Valuables should be stored in the hotel safety deposit box and should never be left unattended in hotel rooms. Travelers should be especially alert at or near major tourist sites, where most pickpocketing occurs. Passports and cash should be carried in a protected neck pouch or money belt—not in a backpack or handbag. Nepali police forces have limited resources and lack sufficient manpower to effectively enforce law and order. Their services are not up to Western standards. Many cases reported to the police remain unresolved.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

The local equivalent to the "911" emergency line in Nepal is: 100, which is manned 24/7 by the local police. While most Nepalese police officials understand and speak English, when calling the emergency number, you might wish to speak slowly so that the message that you wanted to pass gets across to the official clearly and without difficulty.

Medical Facilities and Health Information: Medical care in Nepal is extremely limited and is generally not up to Western standards. Typical travelers' complaints can be addressed by the clinics in Kathmandu, and some surgeries can also be performed in the capital. However, serious illnesses often require evacuation to the nearest adequate medical facility (in Singapore, Bangkok or New Delhi). Illnesses and injuries suffered while hiking in remote areas often require evacuation by helicopter to Kathmandu. Those trekking in remote areas of Nepal should factor the high costs of a potential helicopter rescue into their financial considerations. Travelers are urged to consider purchasing medical evacuation insurance if they plan to visit remote areas. There is minimal mental health care available in Nepal. Americans with mental health problems are generally stabilized and transported to the U.S. for care. The Consular Section in Kathmandu can provide a list of available medical facilities to Americans upon request. Medical facilities are often overwhelmed due to insufficient resources and the emergency services available fall far short of those expected in the U.S.

The U.S. Department of State is unaware of any HIV/AIDS entry restrictions for visitors to or foreign residents of Nepal.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's web site at http://wwwn.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith/en.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Nepal is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

Travel via road in areas outside of the Kathmandu Valley remains dangerous and should be avoided. In general, roads in Nepal are in poor condition and lack basic safety features, resulting in significant numbers of accidents and fatalities. Moreover, Americans should consider

avoiding riding motorcycles in Nepal. In 2006, three foreigners were killed after they were hit by trucks while riding motorcycles on the highway. Visitors throughout Nepal, including in Kathmandu, should use metered taxis and avoid public buses and microbuses.

Various Nepalese political groups frequently announce road closures (blockades) in certain districts of Nepal and forcibly block major roads throughout the country, including roads to Tibet, India, Chitwan, Pokhara, and Jiri. Most recently, in May 2007, a number of Americans were stranded at the border crossing to India in southeastern Nepal for several days when the border was closed due to political demonstrations. In addition, during the monsoon season, heavy rains cause flooding and can wash out roads or make road travel difficult. U.S. citizens should travel into and within Nepal by air whenever possible.

In the Kathmandu Valley, traffic jams are common on major streets, particularly from 9:00 a.m. to 6:00 p.m. Motor vehicles, bicycles, pedestrians and animals, all traveling at different speeds, congest narrow roads. Traffic is poorly regulated, and the volume of vehicles on the roads has increased by approximately 15 percent per year. Many drivers are neither properly licensed nor trained. Many vehicles are poorly maintained, and public vehicles are generally overloaded. Sidewalks and pedestrian crossings are nonexistent in most areas, and drivers do not yield the right-of-way to pedestrians. Pedestrians account for over 40% of all traffic fatalities in Nepal.

Visit the web site of Nepal's national tourist office at www.welcomenepal.com.

Aviation Safety Oversight: As there is no direct commercial air service between the United States and Nepal, the U.S. Federal Aviation Administration (FAA) has not assessed Nepal's Civil Aviation Authority for compliance with International Civil Aviation Organization (ICAO) aviation safety standards. For more information, travelers may visit the FAA's web site at http://www.faa.gov.

Special Circumstances: The Government of Nepal has authorized the Trekking Agency Association of Nepal (TAAN) and the Nepal Tourism Board (NTB) to implement a new system for foreign hikers called the Trekkers' Information Management System (TIMS). Beginning January 1, 2008, foreign visitors on hiking trips in Nepal, including those not with organized hiking groups, need to have a valid TIMS card issued by TAAN, its member agencies, or NTB. In the case of an emergency, the new system will help authorities ascertain the whereabouts of trekkers. TIMS cards are available free of charge through authorized trekking companies, the TAAN office in Kathmandu or Pokhara, and the NTB office.

Robberies, extortion and intimidation continue as in previous years throughout the Kathmandu Valley and the trekking areas in Nepal. Risks of encounters with Maoist groups, or groups posing as Maoists, are very high in nearly all trekking routes of Nepal, and injuries to foreigners for arguing or failing to pay extortion demands continue to occur. Checkpoints established by Maoist-affiliated groups where armed individuals demand payment for "trekking permits" still occur and pose a risk to travelers. Groups posing as Maoists have used violent tactics to intimidate tourists who initially refused to pay or were seen as argumentative. Americans are urged to refrain from arguing with such individuals or "talking back" to them, as such a response may increase the risk of violence.

U.S. citizens should never hike alone or become separated from larger traveling parties while on a trail. Solo trekking has contributed to injuries and deaths, and makes one more vulnerable to criminals. The safest option for all trekkers is to join an organized group and/or use a reputable firm that provides an experienced guide and porters who communicate in both Nepali and English. Destruction of telephone services to many trekking areas by the Maoist insurgents often complicates efforts to locate U.S. citizens and make arrangements for medical evacuations. U.S. citizens are strongly encouraged to contact the Embassy in Kathmandu for the latest security information and to register their itinerary before undertaking treks outside the Kathmandu Valley. Trekkers are also advised to leave their itinerary with family or friends in the U.S. and to check in at police checkpoints where trekking permits are logged.

Trekking in Nepal involves walking over rugged, steep terrain, where one is exposed to the elements, often at high altitudes. Many popular trekking routes in Nepal cross passes as high as 18,000 feet. The U.S. Embassy in Kathmandu strongly recommends that U.S. citizens exercise extreme caution when trekking at high altitudes. Only experienced mountain travelers should tackle the Himalayas. Trekkers of all ages, experience, and fitness levels can experience Acute Mountain Sickness (AMS), which can be deadly.

Trekkers should also be alert to the possibility of avalanches and landslides, even when trails are clear. Avalanches at the narrow gorge above Deurali on the route to the Annapurna Base Camp regularly result in the deaths of trekkers and climbers. Avalanches and landslides caused by severe storms have killed many foreign trekkers and their Nepalese guides, and have stranded hundreds of others. Trekking in Upper Mustang in certain National Park areas may require a special permit from the Government of Nepal and a fee. Americans are encouraged to check on the fees and permits prior to their travels.

A number of tourists have drowned while swimming in Phewa Lake and other adjoining lakes in Pokhara due to flash floods triggered by monsoon rains or after becoming entangled in submerged tree branches or roots.

Before leaving Kathmandu, trekkers can check with the Himalayan Rescue Association (phone: (977) (1) 4440-292/4440-293) or the U.S.

Embassy for reliable information about trail conditions and possible hazards in the high country.

Many Nepal-based volunteer organizations have recently formed and maintain websites. However, the Embassy has received reports from a number of American volunteers complaining that such organizations have swindled them after arriving in Nepal to work as volunteers. Americans are cautioned to be aware of this practice and encouraged to research the legitimacy of such organizations. The Social Service Council of the Government of Nepal maintains a list of legitimate volunteer organizations and information can be verified by emailing inquiries to swc@info.com.np.

Nepal has a controlled, or fixed, currency exchange rate with the Indian Rupee. To manage this rate of exchange, the Government of Nepal requires travelers to declare either the import or export of currency. As of this writing, travelers must declare any cash currency carried that exceeds $2,000 in value by filling out a custom's declaration form. The Nepalese Department of Immigration has reported an increasing number of foreigners being arrested for currency violations. Travelers should ensure that they keep a copy of the declaration form after customs officials have put the endorsement on the form to prevent any problems upon departure. Please note that this requirement is subject to change and travelers should contact the Embassy of Nepal in Washington to obtain the latest information. Consequences for violating this requirement could include seizure of all cash carried, fines, and imprisonment. It is illegal to possess 500 or 1,000 Indian Rupee notes in Nepal.

Nepalese customs authorities may enforce strict regulations concerning importation (even temporary) into or export from Nepal of items such as valuable metals, articles of archeological and religious importance, wildlife and related articles, drugs, arms and ammunition, and communications equipment. It is advisable to contact the Embassy of Nepal in Washington or Nepal's Consulate General in New York for specific information regarding customs requirements.

Nepal is prone to earthquakes, landslides, and flooding. The Government of Nepal's ability to respond is limited. General information about natural disaster preparedness is available via the Internet from the U.S. Federal Emergency Management Agency (FEMA) at http://www.fema.gov.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating Nepalese laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Nepal are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in Nepal are encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration web site so that they can obtain updated information on travel and security within Nepal. Americans without Internet access may register directly with the U.S. Embassy. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency.

The U.S. Embassy is located in Maharajgunj in Kathmandu, telephone (977) (1) 400-7200. The Consular Section can be reached through the Embassy switchboard at (977) (1) 400-7200, directly by fax at (977) (1) 400-7281 or email at consktm@state.gov. The U.S. Embassy's web site is http://nepal.usembassy. gov

Intercountry Adoption

November 2008

The information in this section has been edited from a report available through the U.S. Department of State Office of Children's Issues. For more information detailed, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Nepal is not party to The Hague Convention on Protection of Children and Co-operation in Respect of Intercountry Adoption (Hague Adoption Convention).

Who Can Adopt? To bring an adopted child to United States from Nepal, you must be found eligible to adopt by the United States Government. For detailed information on these requirements for adoption, please review the *Intercountry Adoption* section of this publication and visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

United States citizens wishing to adopt a child in Nepal must meet both United States requirements and the requirements set by the Nepalese Government. Procedures for foreign adoptions in Nepal are unpredictable and the Nepalese Government requirements are not enforced uniformly. The Nepalese Government frequently changes requirements with little notice.

Residency Requirements: There are no residency requirements for adopting in Nepal.

Age Requirements: The age difference between prospective parents and the adoptive child must be at least 30 years.

Marriage Requirements: The couple must have been married for at

least four years prior to filing an adoption application and be "infertile." Single women between the age of 35 and 55 may also adopt. Single men may not adopt.

Who Can Be Adopted? Nepal has specific requirements that a child must meet in order to be eligible for adoption. You cannot adopt a child in Nepal unless he or she meets the requirements outlined below.

In addition to these requirements, a child must meet the definition of an orphan under United States law for you to bring him or her home back to the United States.

Under Nepalese law, single mothers or married mothers who have been left by their husbands must meet stringent requirements regarding the relinquishment of their children for adoption. Fathers have twelve years from the child's birth to claim the child and assert custody rights. Unless a mother identifies the father and he agrees, in writing, to the child's adoption, the child will not be eligible for adoption. This can result in uncertainties as to a whether a child is actually eligible for adoption and may result in further investigations and delays.

Sibling Requirements: If the prospective parents already have a child or children of their own, Nepalese Government regulations state they only adopt a Nepalese child of the opposite sex of their biological child or children. Siblings of the opposite sex can be adopted together if other qualifications are met.

Nepalese Adoption Authority: The Ministry of Women, Children and Social Welfare (WCS) is the Nepalese Government office responsible for adoptions in Nepal. officially, the Ministry has recognized the Nepal Children's Organization (NCO), also known as Bal Mandir, to process adoptions, although adoptions through other orphanages are possible.

The Process: The first step in adopting a child from Nepal is usually to select a licensed agency in the United States that can help with your adoption. Adoption service providers must be licensed by the United States state in which they operate.

Most adoptive families work with an adoption agency in the United States to adopt from an orphanage in Nepal. Some orphanages have established relationships with specific adoption agencies in the United States and work only with those agencies. The United States Embassy in Kathmandu encourages all parents to work through a United States agency, as the adoption process in Nepal is quite complex; furthermore, experienced agencies are able to provide support and counseling services before, during, and after the adoption. The Nepalese Government does not require adoptive parents to work with specific agencies in the United States or Nepal. Only designated orphanages in Nepal are approved to process intercountry adoption cases. The United States Embassy in Kathmandu does not maintain a list of United States agencies or Nepalese orphanages processing intercountry adoption cases in Nepal as these may change frequently.

To bring an adopted child from Nepal to the United States, you must apply to be found eligible to adopt (Form I-600A) by the USCIS.

Adoptive parents in Nepal sign many documents in the process of completing an adoption. Many of these documents are in Nepalese, and English translations are not routinely provided. Parents are encouraged to have documents translated before they are signed. Shree Law Book Management Board is the official Governmental translation office. The office is located in Babar Mahal, Kathmandu. The United States Embassy requires both the original and the official translation of all case documents at the time of the immigrant visa interview. Please see the list of required documents. Nepal Children's Organization reviews applications and makes determinations if parents are eligible to adopt. The United States Embassy has no authority to challenge or change a decision by NCO to deny an application. Denial by NCO does not mean a definitive end to the process; parents may still able to proceed with a private agency.

If you are eligible to adopt, and a child is available for intercountry adoption, the central adoption authority in Nepal will provide you with a referral to a child.

Nepal Children's Organization reviews applications and makes determinations if parents are eligible to adopt. The United States Embassy has no authority to challenge or change a decision by NCO to deny an application. Denial by NCO does not mean a definitive end to the process; parents may still able to proceed with a private agency.

The Nepalese Government requires that all adoptive parents complete and sign a "Guarantee Letter." This letter, which is made part of the dossier that is submitted to the WCS serves to assure the Nepalese Government that the adoptive parents have been approved by the United States Government to be adoptive parents and that, if legally qualified, the child will be eligible to immigrate to the United States. This letter is completed after the child is assigned to the parents by the Nepalese orphanage or authority. The Guarantee Letter is a requirement of the Nepalese Government, not of the United States Government. The Nepalese Government requires that all adoptive parents complete and sign a "Guarantee Letter." This letter, which is made part of the dossier that is submitted to the WCS serves to assure the Nepalese Government that the adoptive parents have been approved by the United States Government to be adoptive parents and that, if legally qualified, the child will be eligible to immigrate to the United States. This letter is completed after the child is assigned to the parents by the Nepalese orphanage or authority. The Guarantee Letter is a requirement of the Nepalese Government, not of the United States Government.

Role of the Adoption Authority: The Ministry of Women, Children and Social Welfare (WCS) is the

Nepalese Government office responsible for adoptions in Nepal. officially, the Ministry has recognized the Nepal Children's Organization (NCO), also known as Bal Mandir, to process adoptions, although adoptions through other orphanages are possible.

Role of Adoption Agencies: Most adoptive families work with an adoption agency in the United States to adopt from an orphanage in Nepal. Some orphanages have established relationships with specific adoption agencies in the United States and work only with those agencies.

Time Frame: The process from the approval of the I-600A and the issuance of the Guarantee Letter to the approval of the adoption by the Nepalese Government varies in length from six months to two years. The process for adopting children over the age of three years sometimes is completed in a shorter time period. The timing is often uneven and inconsistent; changes in the security situation or the Government may lead to additional delays. Recent changes in adoption regulations may significantly impact adoption processing in Nepal.

Some adoptions in Nepal may be completed with one trip to Nepal; however, many adoptive parents travel to Nepal twice or more. On the first visit, they meet the child and complete initial paperwork required by the Nepalese Government. They then return to Nepal when the adoption is approved by the Nepalese Government to file for the immigrant visa.

Adoption Fees: The Ministry of Women, Children and Social Welfare charges a fee of $300 for the adoption of an orphan from Nepal. Orphanages and local facilitators in Nepal often charge additional fees to process the adoption and to care for the child once the child has been assigned to adoptive parents but prior to the Nepalese Government approval of the adoption by the Nepalese Government. These fees vary widely. Adoptive parents have reported a wide variance in fees (between $3,000–$17,000 USD) charged by Nepalese orphanages, which are largely unregulated by the Nepalese Government. Many parents have reported that orphanages have charged them new and unexpected fees once the parents arrive in Nepal. Prospective parents are advised to obtain detailed receipts for all fees and donations paid to orphanages, either by the parents directly or through their United States adoption agencies. The United States Embassy requires a copy of receipts and information on fees paid in the United States and in Nepal at the time of the immigrant visa interview.

Documents Required: The Nepalese Government requires that all adoptive parents complete and sign a "Guarantee Letter." This letter, which is made part of the dossier that is submitted to the WCS serves to assure the Nepalese Government that the adoptive parents have been approved by the United States Government to be adoptive parents and that, if legally qualified, the child will be eligible to immigrate to the United States.

The processing of the Guarantee Letter also requires photographs of the child and parents and a letter from the Government of Nepal informing the United States Embassy of the details of the match between the child and the adoptive parents, including the child's name and date of birth. The child's photo must be affixed to the letter from the Nepalese orphanage to the United States Embassy.

The following are also necessary:

- Fingerprint report for the prospective adoptive parents;
- A favorable recommendation from the District Administrative officer (Chief District officer) where the child resides; and
- A death certificate and/or an affidavit of consent and irrevocable release of the child of biological parents for purposes of emigration and adoption.

For updates on document requirements and information on how to authenticate documents, visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

Bringing Your Child Home: Once your adoption is complete (or you have obtained legal custody of the child), there are a few more steps to take before you can head home. Specifically, you need to apply for several documents for your child before he or she can travel to the United States, such as a birth certificate, a passport or travel document for your child from the country in which he or she was born, and a U.S. Immigration Visa. For detailed and updated information on how to obtain these documents, review the *Intercountry Adoption* section on this publication and visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

Child Citizenship Act: For adoptions finalized abroad: The Child Citizenship Act of 2000 allows your new child to acquire American citizenship automatically when he or she enters the United States as lawful permanent residents. For adoptions finalized in the United States: The Child Citizenship Act of 2000 allows your new child to acquire American citizenship automatically when the court in the United States issues the final adoption decree. To learn more, review the *Intercountry Adoption* section on this publication and visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

After Adoption: Nepal does not have any post-adoption requirements.

Travel Warning

November 21, 2008

The Department of State warns U.S. citizens of the risks of traveling to Nepal and urges caution when traveling in country. The Department of State remains concerned about the security situation in Nepal and urges American citizens to obtain updated security information before they travel and to be prepared to change their plans on short notice. This replaces the Travel Warning for Nepal dated May 7, 2008 and updates safety and security information following the formation of the coalition government in August, 2008.

Despite the recent smooth transition of government, some unrest remains. The Young Communist League (YCL), a Maoist Party subgroup, continues to engage in extortion, abuse, and threats of violence, particularly in rural areas. Youth groups from the other two main political parties, the Nepali Congress (NC) and the United Marxist-Leninist Party (UML), have also formed and clashes continue among these political rivals. Violent actions by multiple armed splinter groups in the Terai region along the southern border with India remain a significant concern. While protests and pre-election localized bombing incidents have decreased, demonstrations and disruptions still occur. During demonstrations, protestors have used violence, including damaging vehicles, throwing rocks, and burning tires to block traffic. Given the nature, intensity, and unpredictability of disturbances, American citizens are urged to exercise special caution during times when demonstrations are announced, avoid areas where demonstrations are occurring or crowds are forming, avoid road travel, and maintain a low profile. Curfews can be announced with little or no advance notice. American citizens are urged to consult media sources and to register with the Embassy (see instructions below) for current security information. Crime in the Kathmandu Valley, including violent crime and harassment of women, continues to rise. Police resources to combat such crime are limited. Police have reported a number of robberies by armed gangs, sometimes resulting in injury to the victims.

The U.S. Embassy reports an increase in crime in some popular tourist areas such as Pokhara and the Thamel area of Kathmandu. Visitors to Nepal should practice good personal security when moving about, especially at night, and avoid walking alone after dark, carrying large sums of cash, or wearing expensive jewelry. In several reported incidents tourists have had their belongings stolen from their rooms while they were asleep. Solo trekkers have been robbed by small groups of young men, even on some popular trails. Some Young Communist League members extort money from foreign tourists along some popular trekking routes, and have threatened physical violence to Nepalis and non-Nepalis alike for violating localized strikes.

Travel via road in areas outside of the Kathmandu Valley is hazardous due to erratic drivers and frequent road accidents. Public transportation, such as microbuses and tuk tuks, should be avoided because they are often overfilled, driven unsafely, and mechanically unsound. American citizens should use taxis with meters or negotiate a price with the taxi driver before starting a trip. Most U.S. official travel outside the Kathmandu Valley, including by air, requires specific clearance by the U.S. Embassy's Regional Security Officer. As a result, The U.S. Embassy's ability to provide emergency assistance to U.S. citizens may be limited. Active duty U.S. military and Department of Defense contractors must obtain a country clearance for official and personal travel to Nepal. The U.S. Government's designation of the Communist Party of Nepal (Maoist) as a "Specially Designated Global Terrorist" organization under Executive Order 13224 and its inclusion on the "Terrorist Exclusion List" pursuant to the Immigration and Nationality Act remain in effect. These two designations make Maoists excludable from entry into the United States without a waiver and bar U.S. citizens from transactions such as contribution of funds, goods, or services to, or for the benefit of, the Maoists. For additional information, please refer to "A Safe Trip Abroad" found at http://travel.state.gov. Americans living or traveling in Nepal are encouraged to register with the U.S. Embassy through the State Department's travel registration website (https://travelregistration.state.gov/ibrs/home.asp). The Consular Section of the U.S. Embassy in Kathmandu is located at Maharajgunj. The telephone number is 977-1-4007200, 4007201. The number for after-hours emergencies is 977-1-4007266, 4007269. The fax number is 977-1-4007281. The Consulate's e-mail address is consktm@state.gov and its Internet web page is http://nepal.usembassy.gov. U.S. citizens should also consult the Department of State's latest Country Specific Information for Nepal and the Worldwide Caution, available at http://travel.state.gov. Up-to-date information on security can also be obtained by calling 1-888-407-4747 toll free in the United States and Canada or, for callers outside the United States and Canada, a regular toll line at 1-202-501-4444. These numbers are available from 8:00 a.m. to 8:00 p.m. Eastern time, Monday through Friday (except U.S. federal holidays).

NETHERLANDS

Compiled from the October 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Kingdom of the Netherlands

PROFILE

Geography

Area: 41,526 sq. km. (16,485 sq. mi.).
Cities: Capital—Amsterdam (pop. 742,884). Other cities—The Hague, seat of government (473,941); Rotterdam (584,058); Utrecht (288,401).
Terrain: Coastal lowland.
Climate: Northern maritime.

People

Population: 16.5 million.
Nationality: Noun—Dutchmen and Dutchwomen. Adjective—Dutch.
Ethnic groups: Predominantly Dutch; largest minority communities are Moroccans, Turks, Surinamese.
Religions: Roman Catholic, Protestant, Muslim, other.
Languages: Dutch.
Education: Years compulsory—13. Attendance—nearly 100%. Literacy—99%.
Health: Infant mortality rate—4.1/1,000. Life expectancy—80.15 yrs.
Work force: (civilians, 2007, 8.4 million): industry—19.6%; manufacturing—13.2%; services—77.3%; agriculture—3.1%.

Government

Type: Parliamentary democracy under a constitutional monarch.
Constitution: 1814 and 1848.
Government branches: Executive—monarch (chief of state), prime minister (head of government), cabinet. Legislative—bicameral parliament (First and Second Chambers). Judicial—Supreme Court.
Political subdivisions: 12 provinces.
Political parties: Christian Democratic Appeal (CDA), Labor Party (PvdA), Socialist Party (SP), Liberal Party (VVD), other minor parties.
Suffrage: Universal at 18.

Economy

GDP: (2007 est.) $792 billion.
GDP real growth rate: (2007) 3.5%.
GDP per capita: (2007 est.) $45,600.
Natural resources: Natural gas, petroleum, fertile soil.
Agriculture: (2% of GDP) Products—dairy, poultry, meat, flower bulbs, cut flowers, vegetables and fruits, sugar beets, potatoes, wheat, barley.
Industry: (24% of GDP): Types—agro-industries, steel and aluminum, metal and engineering products, electric machinery and equipment, bulk chemicals, natural gas, petroleum products, transport equipment, microelectronics.
Services: (74% of GDP): Types—trade, hotels, restaurants, transport, storage and communication, financial (banking and insurance) and business services, care and other.
Trade: (2007) Exports—$489.9 billion (f.o.b.): mineral fuels, chemicals, machinery and transport equipment, processed food and tobacco, agricultural products. Imports—$433.1 billion (f.o.b.): mineral fuels and crude petroleum, machinery, transportation equipment, consumer goods, foodstuffs. Major trading partners in 2007 (exports/imports)—EU (66%/47%), Germany (20%/17%), Belgium (9%/9%), China (1%/8%), United Kingdom (6%/8%), and U.S. (5%/8%).

HISTORY

The Dutch are primarily of Germanic stock with some Gallo-Celtic mixture. Their small homeland frequently has been threatened with destruction by the North Sea and has often been invaded by the great European powers.

Julius Caesar found the region which is now the Netherlands inhabited by Germanic tribes in the first century B.C. The western portion was inhabited by the Batavians and became part of a Roman province; the eastern portion was inhabited by the Frisians. Between the fourth and eighth centuries A.D., most of both portions were conquered by the Franks. The area later passed into the hands of

the House of Burgundy and the Austrian Habsburgs. Falling under harsh Spanish rule in the 16th century, the Dutch revolted in 1558 under the leadership of Willem of Orange. By virtue of the Union of Utrecht in 1579, the seven northern Dutch provinces became the Republic of the United Netherlands.

During the 17th century, considered its "golden era," the Netherlands became a great sea and colonial power. Among other achievements, this period saw the emergence of some of painting's "Old Masters," including Rembrandt and Hals, whose works—along with those of later artists such as Mondriaan and Van Gogh—are today on display in museums throughout the Netherlands and the world.

The country's importance declined, however, with the gradual loss of Dutch technological superiority and after wars with Spain, France, and England in the 17th and 18th century. The Dutch United Provinces supported the Americans in the Revolutionary War. In 1795, French troops ousted Willem V of Orange, the Stadhouder under the Dutch Republic and head of the House of Orange.

Following Napoleon's defeat in 1815, the Netherlands and Belgium became the "Kingdom of the United Netherlands" under King Willem I, son of Willem V of Orange. The Belgians withdrew from the union in 1830 to form their own kingdom. King Willem II was largely responsible for the liberalizing revision of the constitution in 1848.

The Netherlands prospered during the long reign of Willem III (1849-90). At the time of his death, his daughter Wilhelmina was 10 years old. Her mother, Queen Emma, reigned as regent until 1898, when Wilhelmina reached the age of 18 and became the monarch.

The Netherlands proclaimed neutrality at the start of both world wars. Although it escaped occupation in World War I, German troops overran the country in May 1940. Queen Wilhelmina fled to London and established a government-in-exile. During the war, the Nazis rounded up the Jewish population before deporting them to camps in the East. Over 75% of the Netherlands' 140,000 Jews died at the hands of the Nazis. Shortly after the Netherlands was liberated in May 1945, the Queen returned. Crown Princess Juliana acceded to the throne in 1948 upon her mother's abdication. In April 1980, Queen Juliana abdicated in favor of her daughter, now Queen Beatrix. Crown Prince Willem Alexander was born in 1967.

Elements of the Netherlands' once far-flung empire were granted either full independence or nearly complete autonomy after World War II. Indonesia formally gained its independence in 1949, and Suriname became independent in 1975. The five islands of the Netherlands Antilles (Curacao, Bonaire, Saba, St. Eustatius, and a part of St. Maarten) and Aruba are integral parts of the Netherlands realm but enjoy a large degree of autonomy.

GOVERNMENT AND POLITICAL CONDITIONS

The present constitution—which dates from 1848 and has been amended several times, most recently in 1983—protects individual and political freedoms, including freedom of religion. Although church and state are separate, a few historical ties remain; the royal family belongs to the Dutch Reformed Church (Protestant). Freedom of speech also is protected.

Government Structure

The country's government is based on the principles of ministerial responsibility and parliamentary government. The national government comprises three main institutions: the Monarch, the Council of Ministers, and the States General. There also are local governments.

The Monarch. The monarch is the titular head of state. The Queen's function is largely ceremonial, but she does have some influence deriving from the traditional veneration of the House of Orange, from which Dutch monarchs for more than three centuries have descended. Her influence also derives from her personal qualities as Queen and her power to appoint the "formateur," who forms the Council of Ministers following elections.

The Council of Ministers plans and implements government policy. The Monarch and the Council of Ministers together are called the Crown. Most ministers also head government ministries, although ministers-without-portfolio exist. The ministers, collectively and individually, are responsible to the States General (parliament). Unlike the British system, Dutch ministers cannot simultaneously be members of parliament.

The Council of State is a constitutionally established advisory body to the government that consists of members of the royal family and Crown-appointed members generally having political, commercial, diplomatic, or military experience. The Council of State must be consulted by the cabinet on proposed legislation before a law is submitted to the parliament. The Council of State also serves as a channel of appeal for citizens against executive branch decisions.

States General (parliament). The Dutch parliament consists of two houses, the First Chamber and the Second Chamber. Historically, Dutch governments have been based on the support of a majority in both houses of parliament. The Second Chamber is by far the more important of the two houses. It alone has the right to initiate legislation and amend bills submitted by the Council of Ministers. It shares with the First Chamber the right to question ministers and state secretaries.

The Second Chamber consists of 150 members, elected directly for a 4-year term—unless the government falls prematurely—on the basis of a

nationwide system of proportional representation. This system means that members represent the whole country—rather than individual districts as in the United States—and are normally elected on a party slate, not on a personal basis. There is no threshold for small-party representation. Campaigns are relatively short, lasting usually about a month, and the election budgets of each party tend to be less than $1 million. The electoral system makes a coalition government almost inevitable. The last election of the Second Chamber was in November 2006.

The First Chamber is composed of 75 members elected for 4-year terms by the 12 provincial legislatures. It cannot initiate or amend legislation, but its approval of bills passed by the Second Chamber is required before bills become law. The First Chamber generally meets only once a week, and its

members usually have other full-time jobs. The current First Chamber was elected following provincial elections in May 2007.

Courts. The judiciary comprises 62 cantonal courts, 19 district courts, five courts of appeal, and a Supreme Court that has 24 justices. All judicial appointments are made by the Crown. Judges nominally are appointed for life but actually are retired at age 70.

Local Government. The first-level administrative divisions are the 12 provinces, each governed by a locally elected provincial council and a provincial executive appointed by members of the provincial council. The province is formally headed by a queen's commissioner appointed by the Crown.

Current Government. General elections were held in November 2006. On February 22, 2007, a new center-left coalition government was sworn in, composed of the center-right Christian Democrats (CDA), Social Democrats (PvdA), and left-of-center orthodox Protestant Christian Union (CU) under CDA Prime Minister Jan Peter Balkenende. Given the consensus-based nature of Dutch politics, a change of government does not usually result in any drastic change in foreign or domestic policy. Descriptions of the four main parties follow.

The Christian Democratic Appeal (CDA) was formed from the merger of the Catholic People's Party and two Protestant parties, the Anti-Revolutionary Party and the Christian-Historical Union. The merger process, begun in the early 1970s to try to stem the tide of losses suffered by religiously based parties, was completed in 1980. The CDA supports free enterprise and holds to the principle that government activity should supplement but not supplant communal action by citizens. On the political spectrum, the CDA sees its philosophy as standing between the "individualism" of the Liberals and the "statism" of the Labor Party. CDA has 41 seats in the current Second Chamber, more than any other party.

The Labor Party (PvdA), a classic European Social Democratic party, is left of center. It currently has 33 seats in the Second Chamber. Labor's program is based on greater social, political, and economic equality for all citizens, although in recent years the party has begun to debate the role of central government in that process. Although called the Labor Party, it has no formal links to the trade unions.

The Liberal (VVD) Party is "liberal" in the European, rather than American, sense of the word. It thus attaches great importance to private enterprise and the freedom of the individual in political, social, and economic affairs. The VVD is generally seen as the most conservative of the major parties. It currently has 22 seats in the Second Chamber.

The Socialist Party (SP) was founded as a grass root Marxist-Leninist movement in 1972. From the start Jan Maijnissen has been the driving force behind the party. Started at the local level, Marijnissen transformed the party into a working-class leftist alternative to the Labor Party and succeeded at being elected to parliament in 1994. At every subsequent election the party grew, and in November 2006 it obtained 25 seats, which made it the third largest party. The party is fundamentally nationalistic and opposes globalization, the European Union and Dutch participation in international peacekeeping. It also favors cutting defense spending by 40%.

Domestic Drug Policy

Despite intensified efforts by the Dutch Government to combat production of and trafficking in narcotic drugs, the Netherlands continues to be a significant transit point for drugs entering Europe (especially cocaine), an important producer and exporter of synthetic drugs, notably MDMA (Ecstasy), although MDMA production seems to be declining substantially. According to the National Police, the number of ecstasy tablets seized in the U.S. that could be linked to the Netherlands dropped significantly from 0.85 million in 2005 to only 5,390 tablets in 2006. The successful five-year strategy (2002-2006) against production, trade, and consumption of synthetic drugs was positively assessed at the end of 2006, and a new long-term plan was endorsed by parliament in June 2007.

The Dutch Opium Act punishes possession, commercial distribution, production, import, and export of all illicit drugs. Drug use, however, is not an offense. The act distinguishes between "hard" drugs that have "unacceptable" risks (e.g., heroin, cocaine, ecstasy) and "soft" drugs (cannabis products). One of the main aims of this policy is to separate the markets for soft and hard drugs so that soft drug users are less likely to come into contact with hard drugs. The sale of a small quantity (under five grams) of soft drugs in "coffeeshops" is tolerated, albeit under strict conditions and controls. The United States continues to disagree with this aspect of Dutch drug policy. Overall, the Health Ministry coordinates drug policy, while the Ministry of Justice is responsible for law enforcement. Matters relating to local government and the police are the responsibility of the Ministry of Interior. At the municipal level, policy is coordinated in tripartite consultations among the mayor, the chief public prosecutor, and the police.

The Netherlands has a wide variety of demand-reduction and "harm"-reduction programs reaching about 80% of the country's 24,000-46,000 opiate addicts. The number of opiate addicts has stabilized over the past few years, with the average age rising to 40, and the number of overdose deaths related to opiates stabilizing at between 30 and 50 per year.

Counterterrorism/ Homeland Security

The Netherlands supports the global coalition against terrorism with leadership, personnel and material, including the deployment of troops to Afghanistan. The Prime Minister stated the U.S. and his country stand "shoulder to shoulder" in the struggle for global security. The Netherlands is a party to all 12 UN counterterror-

ism conventions. In August 2004, the Act on Terrorist Crimes, implementing the 2002 European Union (EU) framework decision on combating terrorism, became effective. The Act makes recruitment for the Jihad and conspiracy with the aim of committing a serious terrorist crime separate criminal offenses. In 2008, parliament adopted the Act on Administrative National Security Measures, which allows the Interior Minister to issue restraining orders to prohibit a terrorist suspect's physical proximity to specific locations or persons. A bill making participation in a terrorist training camp a serious punishable offense is currently awaiting parliamentary action. In 2008, the public prosecutor's office filed appeals against two court verdicts acquitting some members of both the so-called "Hofstad" and "Piranha" terror groups of participating in a criminal and terrorist organization. The appeals are still pending. In September 2008, the National Counterterrorism Coordinator's Office (NCTb) maintained the terror threat level at "substantial" (the Netherlands has four threat levels: minimum, limited, substantial and critical). According to the NCTb, the Netherlands and its foreign interests may be among the priority targets of international jihad networks. The main reason for this is the short film "Fitna," produced by member of parliament Geert Wilders, which was released in March 2008. The film was highly critical of Islam, and was offensive to many Muslims. The Dutch have taken a leading role, particularly in the European Union, to establish financial protocols to combat terrorism. They have also donated to the International Monetary Fund (IMF) to provide assistance to countries that lack the wherewithal to implement some of these measures immediately. They have taken steps to freeze the assets of individuals and groups included on the UN Security Council Resolution (UNSCR) 1267 Sanctions Committee's consolidated list. In March 2006, the Dutch hosted a major international terrorist financing conference.

The Netherlands is an active participant in the Container Security Initiative at Rotterdam, one of Europe's busiest ports. In 2004, the Dutch, in partnership with the U.S. Department of Energy's Megaport/Second Line of Defense initiative, installed four portal monitors at the Port of Rotterdam. Since then, the Dutch have purchased 40 portal monitors that allows for almost complete coverage of the Port of Rotterdam. The Dutch Government also permitted U.S. CBP Immigration Liaison Officers to return to Schiphol Airport to assist with U.S.-bound passenger screening (the program is now known as the Immigration Advisory Program). In January 2005, the U.S. and Netherlands agreed to develop an International Registered Travelers program to facilitate travel that includes CBP's Trusted Traveler Program participants utilizing certain U.S. airports, and Dutch participants in Schiphol Airport's "Privium" program.

Principal Government Officials

Last Updated: 11/12/08

Queen: **BEATRIX**
Prime Min.: **Jan Peter BALKENENDE**
Dep. Prime Min.: **Wouter BOS**
Dep. Prime Min.: **Andre ROUVOET**
Min. of Agriculture, Nature, & Food Quality: **Gerda VERBURG**
Min. of Defense: **Eimert VAN MIDDELKOOP**
Min. of Development Cooperation: **Albert KOENDERS**
Min. of Economic Affairs: **Maria VAN DER HOEVEN**
Min. of Education, Culture, & Science: **Ronald PLASTERK**
Min. of the Environment & Spatial Planning: **Jacqueline CRAMER**
Min. of European Affairs: **Frans TIMMERMANS**
Min. of Finance: **Wouter BOS**
Min. of Foreign Affairs: **Maxime VERHAGEN**
Min. of Gen. Affairs: **Jan Peter BALKENENDE**
Min. of Health, Welfare, & Sport: **Abraham "Ab" KLINK**
Min. of Housing, Communities, & Integration: **Ella VOGELAAR**
Min. of Interior & Kingdom Relations: **Guusje TER HORST**
Min. of Justice: **Ernst HIRSCH BALLIN**
Min. of Social Affairs & Employment: **Jan Piet Hein DONNER**
Min. of Transport, Public Works, & Water Management: **Camiel EURLINGS**
Min. of Youth & Family Affairs: **Andre ROUVOET**
State Sec. for Defense: **Jack DE VRIES**
State Sec. for Education, Culture, & Science: **Sharon DIJKSMA**
State Sec. for Education, Culture, & Science: **Marja VAN BIJSTERVELDT-VLIEGENTHART**
State Sec. for European Affairs: **Frans TIMMERMANS**
State Sec. for Finance: **Jan Kees DE JAGER**
State Sec. for Foreign Trade: **Frans HEEMSKERK**
State Sec. for Health, Welfare, & Sport: **Jet BUSSEMAKER**
State Sec. for Interior & Kingdom Relations: **Ank BIJLEVELD-SCHOUTEN**
State Sec. for Justice: **Nebahat ALBAYRAK**
State Sec. for Social Affairs & Employment: **Ahmed ABOUTALEB**
State Sec. for Transport, Public Works, & Water Management: **Tineke HUIZINGA-HERINGA**
Pres., The Netherlands Central Bank: **Nout WELLINK**
Ambassador to the US: **Christiaan Mark Johan KROENER**
Permanent Representative to the UN, New York: **Franciscus MAJOOR**

The Netherlands' embassy in the U.S. is at 4200 Linnean Avenue, NW, Washington, DC 20008; tel: 202-244-5300; fax: 202-362-3430.

ECONOMY

After a strong performance in the 1990s, which brought unemployment to below 3%, the Dutch economy struggled through 2002 and 2003, plagued by relatively high costs and weak domestic demand. Real GDP growth recovered to 2.0% in 2004, but fell back slightly in 2005 to 1.5% largely due to lagging corporate investment and decreased government consumption. The economy grew by 2.9% in 2006. The 2007 growth rate of 3.5% was the highest since 2000. In 2007, the volume of imports increased 6% and exports 8%. In 2006 both grew by 10%.

Private consumption decreased by 1.2% in 2006—primarily due to reforms in the health care system which shifted health care spending

from private to public consumption—but grew by 2.1% in 2007. The unemployment rate dropped further from 5.5% in 2006 to 4.5% in 2007, but has stabilized in 2008. After a drop in the early 2000s, investment staged a recovery in 2005-2006. This upward trend in investment continued with an increase of 10% in 2007. Investment growth is expected to slow to 7.25% in 2008 and then decrease in 2009.

In recent years, many firms in the Netherlands cited a loss of competitiveness as a major impediment to growth as unit labor costs outpaced those of their major competitors, including within the euro area. Low wage rises enabled firms to regain some lost ground as collective wage agreements were signed before growth accelerated in 2006. However, the increasing labor shortage was reflected in higher wage demands in the second half of 2007. Inflation ranged from 1.1% to 1.7% between 2004 and 2007. The inflation rate increased quickly in 2008 to 3.2% in August, and it is feared that this trend will continue. However, the Dutch inflation rate is still among the lowest in the eurozone.

The Netherlands was one of the first EU member states to qualify for the Economic and Monetary Union (EMU). Its fiscal policy has sought to strike a balance between further reductions in public spending and lower taxes and social security contributions. After an unexpected sharp economic downturn in 2003 caused the nominal deficit to breach the 3% GDP limit set by the EMU's Growth and Stability Pact, the center-right coalition government agreed to a package of spending cuts, which helped to lower the budget deficit in 2004 and 2005. The government achieved a budget surplus of 0.6% in 2006 and 0.7% in 2007.

Government Role

Although the private sector is the cornerstone of the economy, the Netherlands has an important and vibrant public sector. The government plays a significant role through permit requirements and regulations pertaining to almost every aspect of economic activity. The government combines a rigorous and stable microeconomic policy with wide-ranging structural and regulatory reforms. The government has gradually reduced its role in the economy since the 1980s. Unabated privatization came to a halt in December 2007 when the government approved a policy that "the State will not pursue selling its interest in approximately 30 companies of 'vital interest' in which it is a shareholder including energy companies, financial services, and Schiphol airport."

Trade and Investment

The Netherlands, which derives more than two-thirds of GDP from merchandise and services trade, had a record trade surplus totaling 41 billion euros in 2007 (about $56 billion). Since there are no significant trade or investment barriers, the Netherlands remains a receptive market for U.S. exports and an important investment partner. The Netherlands is the eighth-largest destination for U.S. exports, as well as the fourth-largest direct investor in the United States. Dutch accumulated direct investment in the United States in 2006 was $189 billion. The United States is the third-largest investor in the Netherlands with direct investment of $216 billion as of 2006. There are more than 1,600 U.S. companies with subsidiaries or offices in the Netherlands. The Dutch are strong proponents of free trade and staunch allies of the U.S. in international fora such as the World Trade Organization (WTO) and the Organization for Economic Cooperation and Development (OECD).

Sectors of the Economy

Services account for almost three-quarters of the national income and are primarily in transportation, distribution, logistics, and financial areas, such as banking and insurance. Industrial activity generates about a fourth of the national product and is dominated by the metalworking, oil refining, chemical, and food processing industries. The agriculture and fisheries sector and traditional Dutch activities account for some 2% of GDP. Although Dutch crude oil production is small, the Netherlands is a relatively large producer and distributor of natural gas. The Slochteren gas fields in Groningen Province in the north are among the world's larger producing natural gas fields. Total proven reserves of natural gas situated on the mainland currently amount to about 2 trillion cubic meters. Roughly 80% is accounted for by reserves on the mainland, the remaining 20% accounted for by relatively small deposits on the North Sea continental shelf. Current gas production is running at an annual average of around 75 billion cubic meters, roughly half of which is exported to EU member countries.

Environmental Policy

The Netherlands is a small and densely populated country. Its economy depends on industry, particularly chemicals and metal processing, intensive agriculture and horticulture, and on its infrastructure, which takes advantage of the country's geographical position at the heart of Europe's transportation network. These factors have led to major pressure on the environment.

The National Environmental Policy Plan (NMP) sets out Dutch environmental policy. Under NMP-4, published in 2001, the government seeks to cut back on all forms of pollution by 80%-90% within one generation, meaning that by 2030, the present generation should be able to pass on a clean environment to the next one.

Although the environmental quality in the Netherlands has improved significantly, some important targets, particularly with respect to nitrogen oxide and ammonia emissions, climate change, and noise reduction, will be difficult to reach.

The Dutch Government works closely with industry and nongovernmental organizations to reach environmental targets. In order to meet the Kyoto target of reducing greenhouse gas emissions by 6% in the 2008-2012 period from 1990 levels, the govern-

ment reached an agreement with industry and the energy sector on emission rights trading. The current government's policy is to achieve a 30% reduction in greenhouse gas emissions by 2020 from 1990 levels.

FOREIGN RELATIONS

The Netherlands abandoned a long-standing policy of neutrality after World War II. The Dutch are engaged participants in international affairs. Dutch foreign policy is geared to promoting a wide variety of goals: the rule of law, human rights, and democracy. Priority is given to enhancing European integration, ensuring European security and stability (mainly through the mechanism of NATO and by emphasizing the important role the United States plays in the security of Europe), and participating in conflict management and peacekeeping missions.

The Netherlands generally pursues its foreign policy interests within the framework of multilateral organizations. The Netherlands is an active and responsible participant in the United Nations as well as other multilateral organizations such as NATO, the EU, the Organization for Security and Cooperation in Europe (OSCE), the Council of Europe (CoE), the OECD, the WTO, and the International Monetary Fund. A centuries-old tradition of legal scholarship has made the Netherlands the home of the International Court of Justice; the Yugoslavia and Rwanda War Crimes Tribunals; the European judicial and police organizations Eurojust and Europol; the Organization for the Prohibition of Chemical Weapons; and International Criminal Court. Dutch security policy is based primarily on membership in NATO, which the Netherlands joined as a charter member in 1949.

The Dutch have traditionally been strong advocates of European integration, and most aspects of their foreign, economic, and trade policies are coordinated through the European Union. However, Dutch voters rejected the EU constitutional treaty in June 2005. Along with other EU members, the Netherlands is debating the future role of the EU.

The Netherlands' post-war Customs Union with Belgium and Luxembourg (the Benelux group) paved the way for the formation of the European Community (precursor to the EU). Likewise, the Benelux abolition of internal border controls was a model for the wider Schengen accord, which today has 15 European signatories, including the Netherlands, pledged to common visa policies and free movement of people and goods across common borders. The Dutch were key proponents of the 1992 Maastricht Treaty and were the architects of the 1998 Treaty of Amsterdam. They have embraced the introduction of new member states and the common currency (euro). In recent years, however, the Dutch have become increasingly skeptical of the way the EU is run and of any further enlargements.

Foreign Aid

The Netherlands is among the world's leading aid donors, giving about 0.7% of its gross domestic product to development assistance and an additional 0.1% to environmental problems in developing countries, totaling about $6.3 billion in 2007. This ratio of aid to GDP is maintained as a firm policy target. The Dutch rank as the sixth-largest donor nation in dollar terms and the fifth most generous relative to GDP. Roughly half of Dutch aid is earmarked for Africa. The country consistently contributes large amounts of aid through multilateral channels, especially the UN Development Program, the international financial institutions, and EU programs. A portion of Dutch aid funds also are channeled through private ("cofinancing") organizations that have almost total autonomy in choice of projects. Minister for Development Cooperation Bert Koenders oversees the aid portfolio.

Dutch development strategy is anchored in the Millennium Development Goals. In October 2007, the Netherlands published its new policy, shifting priorities towards women's rights, fragile and conflict areas, climate change and economic growth. The new policy will reduce the number of "partner countries" receiving Dutch aid from 36 to 29.

The Dutch are the top donor of unearmarked assistance to UN humanitarian programs. For Afghanistan, the Netherlands spent $60 million on reconstruction in 2007, of which $35 million went to the Afghan Reconstruction Trust Fund (ARTF), $14 million to Law and Order Trust Fund (LOFTA) to pay Afghan National Police salaries, and $3 million to the legal sector. For Iraq, the Dutch have pledged $36 million in humanitarian and reconstruction assistance since March of 2003. In January 2006, the Netherlands signed a bilateral agreement with the Government of Iraq, canceling over $300 million in Iraqi debt, as part of Paris Club efforts to provide debt relief to Iraq.

Despite their commitment to official development assistance, the Dutch also champion the role of trade and private enterprise for their contributions to development. In recent years, the government has devised new programs to support private sector development in developing countries.

In November 2007, the Center for Global Development, in conjunction with Foreign Policy magazine and the Carnegie Endowment for International Peace, ranked the Netherlands number one in its 2007 Commitment to Development Index.

International Drug-Trafficking Control

The Dutch work closely with the United States and other countries on international programs against drug trafficking and organized crime. In July 2005, the two nations signed an agreement to expand information sharing and cooperative research on demand reduction. There is close Dutch-U.S. cooperation on joint counter-narcotics operations in the Caribbean. The Netherlands actively participates in the Drug Enforcement Administration's (DEA) El Paso Intelligence Center (EPIC). The 10-

year Forward Operation Locations agreement between the U.S. and the Kingdom for the establishment of forward operating locations on Aruba and Curacao became effective in October 2001. The Netherlands is a signatory to international counternarcotics agreements, a member of the UN Office on Drugs and Crime (UNODC), the UN Commission on Narcotic Drugs, the 1990 Strasbourg Convention on Money Laundering and Confiscation, and is a major contributor to international counternarcotics projects.

U.S. RELATIONS

The U.S. partnership with the Netherlands is one of its oldest continuous relationships and dates back to the American Revolution. The excellent bilateral relations are based on close historical and cultural ties as well as a common dedication to individual freedom and human rights. The Netherlands shares with the United States a liberal economic outlook and is firmly committed to free trade. The United States attaches great value to its strong economic and commercial ties with the Dutch. The Netherlands is the third-largest direct foreign investor in the United States, and the United States is the third-largest direct foreign investor in the Netherlands. The United States and the Netherlands often have similar positions on issues and work together both bilaterally and multilaterally in such institutions as the United Nations and NATO. The Dutch have worked with the United States at the WTO, in the OECD, as well as within the EU to advance the shared U.S. goal of a more open, honest, and market-led global economy. The Dutch, like the United States, supported the accession of 10 new members to the EU in 2004, and accession negotiations for Turkey in 2005.

The United States and the Netherlands joined NATO as charter members in 1949. The Dutch fought alongside the United States in the Korean War and the first Gulf War and have been active in global peacekeeping efforts in the former Yugoslavia, Afghanistan, and Iraq. The Netherlands played a leading role in the 1999 Kosovo air campaign. They currently are contributing to EU peacekeeping forces in Bosnia. In the initial phase of the recent Iraq conflict, the Dutch deployed Patriot missiles to protect NATO ally Turkey, and sent a battalion of troops to Iraq to participate in stabilization operations.

The Dutch also support and participate in NATO and EU training efforts in Iraq. They are active participants in the International Security Assistance Force in Afghanistan.

TRAVEL

Consular Information Sheet

June 10, 2008

Country Description: The Netherlands is a highly developed, stable democracy. Tourist facilities are available throughout the Kingdom.

Entry Requirements: The Netherlands is a party to the Schengen agreement. As such, U.S. citizens may enter the Netherlands for up to 90 days for tourist or business purposes without a visa. The passport should be valid for at least three months beyond the period of stay. For further details about travel into and within Schengen countries, please see our fact sheet. To be admitted into the Netherlands, travelers must have a return airline ticket, and enough money to finance the planned stay. For further information on entry requirements, contact the Embassy of the Netherlands at 4200 Linnean Avenue NW, Washington, DC 20008, telephone (202) 244-5300, or one of the Dutch consulates in Chicago, Los Angeles, New York or Miami, in addition to various honorary Dutch consulates throughout the United States. Additional information is available on the Netherlands' Board of Tourism and Conventions web site at http://us.holland.com. Visit the Embassy of the Netherlands web site at http://www.netherlands-embassy.org for the most current visa information. Information on work, residency and immigration requirements in the Netherlands can be found on the web site of the Dutch immigration authorities at http://www.ind.nl/nl/index.asp.

Safety and Security: Since 2004, heightened Dutch government security measures have been in place in response to concerns about terrorist activity in the Netherlands by inter-

national and domestic extremist groups. The Dutch government has determined the current terrorist threat level to be "substantial." This level, the second highest of four levels, is defined by the Dutch government as a "realistic possibility that an attack will occur" in the Netherlands.

U.S. citizens in the Netherlands are encouraged to monitor media reports, and are reminded to maintain a high level of vigilance and to take appropriate steps to increase their security awareness. As with other countries in the Schengen area, the Netherlands' open borders with its European neighbors allow the possibility of terrorist groups entering/exiting the country with anonymity.

Demonstrations are commonplace in the Netherlands and may range in number from a few people to several thousand. Prior police notice is required for public demonstrations, and police oversight is routinely provided. Nonetheless, situations may develop which could pose a threat to public safety. U.S. citizens are advised to avoid areas in which public demonstrations are taking place.

For the latest security information, Americans traveling abroad should regularly monitor the Department's Internet web site, where the current Worldwide Caution Travel Alert, Travel Warnings and other Travel Alerts and additional resources can be found.

Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S. and Canada, or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: While the rate of violent crime in the Netherlands is low, tourists are often targets of thieves. Visitors frequently fall prey to pickpockets, bag snatchers, and other petty burglars, who may target automobiles and hotel rooms. Room or hotel safes should be used, and baggage locked or secured when away from hotel rooms.

While thieves may operate anywhere, the U.S. Consulate General in Amsterdam receives frequent reports of thefts from specific areas. Within Amsterdam, thieves are very active in and around train and tram stations, the city center and public transport. More specifically, trains to and from Amsterdam's Schiphol Airport are considered to be high risk, and theft of hand luggage and laptop computers is common. Likewise, travelers on city trams to and from the Central Train Station are often targets for thieves and pickpockets. Thieves often work in pairs; one distracts the victim, often by asking for directions, while the accomplice moves in on the victim's momentarily unguarded property. The timing of these thefts usually coincides with train stops, enabling the thieves to escape. In addition, many Americans have reported that their purses and briefcases have been stolen while eating in downtown restaurants, including hotel breakfast rooms. Never leave your personal items or baggage unattended when going to the restroom, buffet table, etc.

Several American visitors have reported experiencing excessive drowsiness, confusion, dizziness, and nausea after drinking alcohol in public areas such as hotel bars and night clubs in several cities throughout the Netherlands. These effects may be the result of unknowingly ingesting drugs, such as flunitrazepam (Rohypnol), hydroxybutyrate (GHB), triazolam (Halcion), scopolamine, burundaga, ketamine and more recently MDMA (Ecstacy), surreptitiously placed in drinks. These drugs do not have a distinctive color, smell, or flavor and come in powder, liquid and pill forms. Never leave your drink unattended and do not accept drinks from strangers. If you believe you have been drugged, seek assistance immediately. Try to keep the container your drink was served in, and any amount that may be left, in order to assist the police with their investigation.

Confidence artists have victimized a number of Americans. Typically, a U.S. citizen is notified via email of a winning lottery ticket, an inheritance, or other offer, which requires his/her assistance and cooperation to conclude. The American is asked to forward advance payments for alleged "official expenses," "taxes," etc. and, often, to come to Amsterdam to conclude the operation. Several Americans have lost tens of thousands of dollars in such scams. Funds transferred in response to such offers can rarely be recovered. Information on fraud schemes can be found on the U.S. Consulate's web page at http://amsterdam.usconsulate.gov/advance_fee_fraude.html. For additional information, please contact the nearest office of the U.S. Secret Service or visit that agency's web site at www.secretservice.gov. Additional information is also provided in the Department of State's pamphlet, International Financial Scams. The Dutch authorities would like to hear from you if you have been in touch with these criminals using a Dutch address and/or telephone number. They can be contacted at:

KLPD, Financial Crimes Unit
PO Box 3016
2700 KX Zoetermeer
The Netherlands
Attention : Project Apollo
email at WACN@klpd.politie. nl

The Dutch Embassy in Washington DC has a pre-prepared letter that can be used to inform the Dutch Police. The Embassy can be contacted via http://www.netherlands-embassy.org/homepage.asp.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find

an attorney if needed. The Criminal Injuries Compensation Fund (CICF) of the Netherlands provides financial compensation, under specific circumstances, for victims of crime and for those who have suffered injuries and consequent loss caused by such incidents. The fund also provides for dependents or immediate family members of homicide victims. For more information, contact the Dutch Ministry of Justice at (31) (70) 414-2000. The local equivalent to the "911" emergency line in the Netherlands is: 1-1-2.

Medical Facilities and Health Information: Good medical facilities are widely available. Emergency medical response can be accessed by calling 1-1-2. Pharmacies ("Apotheek") are widely available and can assist with emergency prescription needs. Some common medications are not available in the Netherlands without a prescription, and some prescription drugs cannot be sent to the country. Travelers are therefore urged to carry an adequate supply of prescription drugs in their original container, in their hand luggage. Some U.S. over-the-counter medications are not available in the Netherlands and travelers should carry an adequate supply of these as well. Those traveling with any preexisting medical problems should bring a letter from the attending physician, describing the medical condition and any prescription medications, including the generic name of prescribed drugs.

Vaccinations are not required for travel to the Netherlands. Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's web site at http://wwwn.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith/en.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning the Netherlands is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

Travel in, around, and between cities is possible via a highly developed national train, light rail, tram, and bus network, by use of an extensive system of bike paths, and by automobile and motorcycle on the modern highway system. Rail is often a convenient alternative to driving, particularly in the areas around Amsterdam, The Hague, and Rotterdam, where road congestion is frequent. Rail network information is available at http://www.ns.nl.

Intercity travel by road is relatively safe in comparison to some other European countries. Nonetheless, more than 1,000 people die and another 10,000 are injured in traffic accidents in the Netherlands each year. More than two thirds of the fatal accidents occur outside urban areas. A valid driver's license issued by a Department of Motor Vehicles in the U.S. is valid for use in the Netherlands for up to 180 days while in tourist or visitor status. Seat belt and child seat use is compulsory. Driving is on the right side of the road. The maximum speed limit on highways is 120 km/h, with a highway speed limit of 100 km/h posted in most urban areas. Secondary roads and some urban area highways have a speed limit of 80 km/h. The speed limit in towns and cities is 50 km/h, with 30 km/h posted in residential areas. The Dutch government has reduced speed limits on certain roads near cities in an effort to reduce air pollution. During traffic jams, authorities also reduce speed limits; drivers should be sure to check for revised limits posted on electronic billboards above the highways. Speed limits are strictly enforced and authorities use multiple cameras to determine infringements, which can result in substantial fines. Please note that drivers must yield the right-of-way to drivers and bikers coming from the right at intersections or traffic circles, unless otherwise posted. The maximum allowable blood alcohol level in the Netherlands is 0.05%. The use of cellular telephones while driving is illegal without the use of a "hands-free" device, and is punishable by severe fines.

Lanes in the center of many urban two-way streets are reserved for buses, trams and taxis. In cities, pedestrians should be mindful of trams, which often cross or share bicycle and pedestrian paths. Motorists must be especially mindful of the priority rights of bicyclists. Pedestrians should not walk along bicycle paths, which are often on the sidewalk and usually designated by red pavement. Travelers should also be watchful for one-way roads.

Taxi service in the Netherlands is safe but expensive. Trams and buses are both convenient and economical, but often frequented by pickpockets.

Visit the web sites of the Netherlands' national tourist office at http://us.holland.com and the national authority responsible for road safety at http://www.rws.nl.

Aviation Safety Oversight: The U.S. Federal Aviation Administration (FAA) has assessed the Government ofThe Netherlands' Civil Aviation Authority as being in compliance with International Civil Aviation Organization (ICAO) aviation safety standards for oversight of the Netherlands' air carrier operations. For more information, travelers may visit the FAA's web site athttp://www.faa.gov.

Special Circumstances: Dutch customs authorities stringently enforce regulations concerning importation into the Netherlands of items such as firearms and other controlled materi-

als. Contact the Embassy of the Netherlands in Washington, DC or one of the Dutch consulates in Chicago, Houston, Los Angeles or New York for specific information regarding customs requirements.

Everyone age 14 and above is required to carry identification at all times. Accepted forms of identification for U.S. citizens are either a Dutch residence card, issued by the Ministry of Foreign Affairs, or a U.S. passport.

U.S. citizens who obtain Dutch nationality may be required by the Dutch authorities to relinquish their U.S. citizenship.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating Dutch laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in The Netherlands are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in the Netherlands are encouraged to register with the U.S. Consulate General in Amsterdam through the State Department's travel registration web site so that they can obtain updated information on travel and security within The Netherlands. Americans without Internet access may register directly with the U.S. Consulate General. By registering, American citizens make it easier for the Consulate to contact them in case of emergency. The U.S. Embassy is located in The Hague, at Lange Voorhout 102; tel. (31) (70) 310-2209. However, all requests for consular assistance should be directed to the Consulate General in Amsterdam at Museumplein 19, tel. (31) (20) 575-5309. The after-hours emergency telephone number is (31) (70) 310-2209.

The U.S. Embassy web site at http://netherlands.usembassy.gov and the U.S. Consulate General's web site at http://amsterdam.usconsulate.gov answer many questions of interest to Americans visiting or residing in the Netherlands.

Intercountry Adoption

November 2006

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is based on public sources and current understanding. Questions involving foreign and U.S. immigration laws and legal interpretation should be addressed respectively to qualified foreign or U.S. legal counsel.

Patterns of Immigration: In recent years about 50 Dutch-born children have been given up for adoption per year, all of whom were adopted in the Netherlands. The U.S. Consulate General in Amsterdam has not processed any cases involving native Dutch children for adoption in the United States in many years. Each year there are between 2,000 and 2,500 requests by residents of the Netherlands to register for the adoption of a child from overseas. The adoption procedure is essentially the same as for adoption of a child born in the Netherlands. U.S. citizens resident in the Netherlands who wish to adopt a child may consider carrying out the adoption procedure in the United States, then bringing the child to the Netherlands. Adoptions legally finalized in countries that have ratified the Hague Convention on Protection of Children and Cooperation in Respect to Intercountry Adoption are automatically recognized in the Netherlands. As the United States has not yet ratified the Convention, an adoption legally finalized in the U.S. must be recognized by a Dutch judge for it to be valid in the Netherlands.

This requires hiring a Dutch attorney. In most cases this process is straightforward. The Dutch Adoption Conflict Act determines what is required for recognition. Upon ratification of the Hague Convention by the United States an adoption finalized in the U.S. before the child enters the Netherlands will be immediately recognized in the Netherlands.

Adoption Authority: The Ministry of Justice is responsible for adoptions:

Ministry of Justice
Directie Justitiele Jeugdbescherming
Centrale Autoriteit Internationale Adoptie
PO Box 20301, 2500 EH
Den Haag, The Netherlands

All contact with the Ministry should be made through the Foundation for Adoption Services (Stichting Adoptievoorzieningen) listed hereafter. The Ministry is not, however, directly involved in the initial adoption procedures. To request an application for a "permit in principle" (Beginseltoestemming) to begin the adoption process, prospective adoptive parents should contact:

Stichting Adoptievoorzieningen
(Foundation for Adoption Services)
Postbus 290,
3500 AG Utrecht
The Netherlands
Tel: +31 30 233 0340
Fax: +31 30 232 1777
Email: (messages via website below)
Website: www.adoptie.nl

Eligibility Requirements for Adoptive Parents: Individuals, persons living together, and married couples may start an adoption procedure. Adopting a child jointly is only possible for married couples; it is not possible for persons living together and persons in registered partnerships. Those cases are considered, by law, to be single-parent adoption cases. Although the Netherlands is a jurisdiction that recognizes same-sex marriages, married same-sex couples only have the possibility of adopting a child born in the Netherlands.

The applicant(s) should be 41 years old or younger upon registration, although certain exceptions may be allowed up to age 44. Applicants must undergo health assessments, give permission for review of their judicial/police records, agree to obtain all required medical care and vaccinations for the child, and provide a surety for all costs related to the child and the adoption.

Residency Requirements: Prospective adoptive parents in the Netherlands must have Dutch residence permits if they are not Dutch nationals, and must live in the Netherlands.

Time Frame: The entire adoption procedure in the Netherlands takes from three to five years.

Adoption Agencies and Attorneys: Prospective adoptive parents may visit: www. adoptie.nl for a list of licensed adoption agencies in the Netherlands. The U.S. Embassy and Consulate General in the Netherlands maintain a list of attorneys. This list is accessible at: http://netherlands.usembassy.gov.

Adoption Fees: Compulsory preparation and information sessions cost $900 per applicant. The Foundation for Adoption Services estimates that total costs for adoption procedures in the child's country of origin, depending on the country and the intermediary organization involved, amount to between $7,500 and $20,000. Additional costs in the Netherlands include $1,000 to have a contact screened by one of the mediating organizations in cases of self-established contacts; $285 for the child's permit to stay in the Netherlands; $600 for the Dutch adoption declaration. Note: As of the date of this flyer, the exchange rate is one Euro to $1.28 U.S. dollars.

Adoption Procedures And Required Documents: Detailed and up-to-date information should be obtained from the Stichting Adoptievoorzieningen (Foundation for Adoption Services.

The Dutch adoption procedure is based on the Hague Intercountry Adoption Convention. Prospective adoptive parents register with the Foundation for Adoption Services. After a waiting period (currently 18-20 months), prospective adoptive parents complete six information sessions over three months.

After the prospective parents complete these sessions, their file is transferred to Dutch Child Protective Services, which evaluates the applicants' physical and mental health and suitability and arranges for a home study involving various meetings with social workers over the course of two to three months.

On the basis of the home study report, the Ministry of Justice determines whether a "permit in principle," valid for three years, will be issued, giving the prospective adoptive parents the authorization to begin the mediation process used to identify a well-suited parent-child match. Specific rules apply.

The child should be under six years old and the age difference between the future parent and the child should be no more than 40 years (certain exceptions apply to both conditions).

International Parental Child Abduction

November 2008

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *International Child Abduction* section of this book and review current reports online at www.travel.state.gov/childabduction.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is provided for general information only. Questions involving interpretation of specific foreign laws should be addressed to foreign legal counsel.

General Information: The Hague Convention on the Civil Aspects of International Child Abduction (the "Hague Convention") came into force between the United States and The Netherlands on September 1, 1990. Therefore, Hague Convention provisions for return would apply only to children abducted or retained after September 1, 1990.

The Hague Convention does not apply to Aruba or the Netherlands Antilles.

Dutch Central Authority:
Directie
Justitiele Jeugd Beleid
Ministerie van Justitie
Postbus 20301
2500 EH DEN HAAG
The Netherlands

Legal Counsel: The Dutch Central Authority represents left-behind parents in court hearings on Hague applications for return and access. Central Authority officials speak and write English fluently. Parents may, if they desire, retain private Dutch legal counsel and have their Hague application handled directly by this attorney. In these cases, the Central Authority would play no role.

Judicial Procedure: Under Dutch law, the Dutch Central Authority must first send a letter by registered mail to the taking parent requesting him or her to voluntarily return the child. If the parent is not ready to do so, but there are indications that an amicable resolution might be reached, the Central Authority may act as an intermediary between the parents in attempts to arrive at a negotiated agreement. If no compromise between the parents can be attained, the Central Authority will file a petition in local court requesting a hearing under the Hague Convention. Petitions for return under the Hague Convention have priority in The Netherlands over routine family cases. Hearings for return are normally scheduled within one month and a decision is normally issued within two weeks. Hearings for access may take longer to schedule since they are considered less urgent. The left-behind parent is encouraged, but not required, to attend the hearing. The Central Authority can request that the left-behind parent be permitted to visit his or her child while in The Netherlands for the hearing. However, the taking parent can refuse this request. Once a court in The Netherlands orders the return of a child, these orders are immediately enforceable even if an appeal is lodged.

Rights Of Access: The Dutch Central Authority handles requests for access in the same manner as returns. The taking parent is asked by registered mail to advise whether he or she is willing to cooperate. If not, the Central Authority files a petition with the District Court. In most cases, the judge will request the Child Care and Protection Board to conduct an examination into the best interests of the child. Such an examination may include contacts between the left-behind parent and the child in the office of the Child Care and Protection Board and under supervision of the Board social worker. If necessary, the Board will seek assistance from child psychologists or psychiatrists.

The Board will submit a report to the judge after the parents have had the opportunity to make submissions. The report is then discussed in a hearing at which each parent can present his or her objections and arguments before a judge. If the parents agree, the case can be tried through a mediator. The Central Authority can provide the names of licensed mediators. The parents must bear the cost of the mediator.

Criminal Remedies: For information on possible criminal remedies, please contact your local law enforcement authorities or the nearest office of the Federal Bureau of Investigation. Information is also available on the Internet at the web site of the U.S. Department of Justice, Office of Juvenile Justice and Delinquency Prevention, at http://www.ojjdp.ncjrs.org.

PLEASE NOTE THAT CRIMINAL CHARGES MAY COMPLICATE A HAGUE CONVENTION CASE IN THE NETHERLANDS.

For further information on international parental child abduction, contact the Office of Children's Issues, U.S. Department of State at 1-888-407-4747 or visit its web site on the Internet at http://travel.state.gov. You may also direct inquiries to: Office of Children's Issues, U.S. Department of State, Washington, DC 20520-4811; Phone: (202) 736-9090; Fax: (202) 312-9743.

NETHERLANDS ANTILLES

Compiled from the November 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Netherlands Antilles

PROFILE

Geography

Area: 960 sq. km. (597 sq. mi.); more than five times the size of Washington, DC; five islands divided geographically into the Windward Islands (northern) group (Saba, Sint Eustatius, and Sint Maarten) and the Leeward Islands (southern) group (Bonaire and Curaçao).
Cities: Capital—Willemstad (metropolitan).
Islands: Curaçao (pop. 137,094) Sint Maarten (38,959), Bonaire (11,537), Sint Eustatius (2,699), Saba (1,491).
Terrain: Generally hilly, volcanic interiors.
Climate: Tropical; ameliorated by northeast trade winds.

People

Nationality: Noun and adjective—Dutch Antillean(s).
Population: (2007) 191,780.
Annual growth rate: (2007) 2.4%.
Ethnic groups: Mixed black 85%, mixed Latin American, white, East Asian.
Religions: Roman Catholic, Protestant, Jewish, Seventh-day Adventist, Islam, and Hindu.
Languages: Dutch (official), Papiamento (a Spanish-Portuguese-Dutch-English dialect) predominates, English is widely spoken, Spanish.
Education: Literacy—96.4% Curaçao; 96.3% Netherlands Antilles (2001).
Health: (2006 est.) Infant mortality rate (2006 est.)—7.0 deaths/1,000 live births; 59.7 live births per 1,000 women 15 to 44 years old. Life expectancy (2002)—female, 78.7 yrs. male, 72.1 yrs.
Work force: (77,516; 2005): Agriculture—1%; industry—8%; services—91%.

Government

Type: Parliamentary.
Independence: Part of the Kingdom of the Netherlands.
Constitution: December 1954, Statute of the Realm of the Netherlands, as amended.
Government branches: Executive—monarch represented by a governor-general (chief of state), prime minister (head of government), Cabinet. Legislative—unicameral parliament. Judicial—Joint High Court of Justice appointed by the monarch.
Political subdivisions: Saba, Sint Eustatius, Sint Maarten, Bonaire, Curaçao.
Suffrage: Universal at 18.
Political parties: Curaçao—Partido Antia Restruktura (PAR); Frente Obrero Liberashon 30 di Mei (FOL); MAN; Partido Nashonal di Pueblo (PNP); Forsa Korsou; Niun Paso Atras (NPA); Partido Laboral Krusado Popular (PLKP); Pueblo Soberano; Partido Democraat (DP); Un Pueblo Nobo; Moviemenu Social Laboral (MSL); Curacao Nobo Nobo (CNN); Partido Adelanto Korsou (PAK); Vota Kontra; Geen Stap Terug (GST); Movementu Patriotiko Korsou (MPK); Socialistise Party Antilliaanse Nederlanders (SPAN); Ban-Vota; PAPPS; E Mayoria; ModPOR; Akshon Pro Independensha; Partido Trafiko Sigur (PTS); Lista Patriotiko Korsou (LPK); P-100. St. Maarten—St. Maarten Democratic Party (DP—St. Maarten); National Democratic Party (NDP); National Alliance (NA) (note: the National Alliance is a joint effort by the St. Maarten Patriotic Alliance and National Progressive Party); St. Maarten People's Party (SMPP); People's Progressive Alliance (PPA); United People's Labor Party (UPLP). Bonaire—Bonaire Democratic Party (DP—Bonaire); Patriotic Union of Bonaire (UPB); Bonaire Social Party (PABOSO); New Labor Party of Bonaire (POB). St. Eustatius—St. Eustatius Democratic Party (DP—St. Eustatius); St. Eustatius Alliance (SEA); People's Labor Party (PLP). Saba—Saba Labor Party (SLP); Windward Islands People's Movement (WIPM).

Economy (2005)

GDP: $3.3 billion.
Real growth rate: 1.2%.
GDP per capita: $17,800.

Natural resources: Beaches and offshore diving sites.
Tourism/services: (84% of GDP) Curaçao, Sint Maarten, Bonaire.
Industry: (15% of GDP) Types—petroleum refining (Curaçao), petroleum transshipment facilities (Curaçao and Bonaire), light manufacturing (Curaçao).
Agriculture: (1% of GDP) Products—aloes, sorghum, peanuts, vegetables, tropical fruit.
Trade: Exports ($3.4 billion)—petroleum products. Major markets—U.S. 24%, Venezuela 15%, Guatemala 10%, Singapore 6%. Imports ($3.5 billion)—machinery and electrical equipment, crude oil (for refining and re-export), chemicals, foodstuffs. Major suppliers—Venezuela 59.8%, U.S. 12.55%.
Exchange rate: (2005) U.S.$1=1.78 ANG (fixed).

PEOPLE AND HISTORY

Curaçao

The Arawaks are recognized as the first human civilization to inhabit the Netherlands Antilles. A Spanish expedition led by Alonso de Ojeda claimed the island of Curaçao for Spain in 1499 and it remained under Spanish rule until the Dutch took control in 1634. Curaçao was a strategically important point for Dutch military advances against the Spanish and as the center of the Caribbean slave trade. Curaçao became the seat of the Netherlands Antilles Government in 1954.

Bonaire

With origins similar to Curaçao, Bonaire was captured by the Dutch in 1634, and was a granary for the Dutch East Indian Company until 1791, when the government reclaimed control.

Sint Eustatius

The first settlement in Sint Eustatius was established in 1636 and changed hands between the Dutch, French, and Spanish 22 times in its history. In the 18th century the island became a duty-free port for overburdened colonizers shipping back to the homeland, which propelled it into a major port with rapid population growth that lost momentum after the American-British peace treaty in 1783.

Saba

Columbus was the first to sight Saba, but it was the Dutch who colonized the island in 1640 with a party from Sint Eustatius. Because of its difficult terrain, the island's growth progressed slowly, and it remains the least populated island in the Dutch Kingdom.

Sint Maarten

The Dutch were the first to colonize Sint Maarten in 1631, but within 2 years the Spanish invaded and evacuated the settlers. The Dutch failed in an attempt to regain the island in 1644, but 4 years later the Spanish abandoned the island of their own accord. In 1648 the island was divided between the Dutch and the French; however, complete control of the island was seized numerous times in a series of conflicts. The British became involved as well, taking power for 6-year and 10-year stints. Finally, in 1817, the current partition line between Dutch and French was established. The island flourished under a slave-based plantation economy and the exportation of salt until abolition of slavery in 1863.

Unification

In 1845 the Dutch Windward islands united with Curaçao, Bonaire, and Aruba in a political unit. The abolition of slavery hurt the islands' economy until the 20th century, when oil was discovered off the shores of Venezuela and a refinery was established on Curaçao. In addition, during the same period, an offshore financial sector was created to serve Dutch business interests. Since 1945, the federation of the Netherlands Antilles—Curacao, Bonaire, Saba, Sint Eustatius, and Sint Maarten—have been autonomous in internal affairs. Aruba was part of this federation until January 1, 1986, when it gained status apart within the Kingdom of the Netherlands.

About 85% of Curacao's population is of African derivation. The remaining 15% is made up of various races and nationalities, including Dutch, Portuguese, North Americans, natives from other Caribbean islands, Latin Americans, Sephardic Jews, Lebanese, and Asians. Roman Catholicism predominates, but several other religions are represented, which include Anglican, Jewish, Muslim, Protestant, Mormon, Baptist, Islam, and Hindu. The Jewish community is the oldest in the Western Hemisphere, dating back to 1634. While faltering economic conditions caused the Netherlands Antilles to experience high rates of migration by citizens to the Netherlands from 1998-2002, this trend has largely been reversed in recent years.

GOVERNMENT

Current political relations between the Netherlands, the Netherlands Antilles and Aruba stem from 1954 and are based on the Charter for the Kingdom of the Netherlands, a voluntary arrangement between the Netherlands, Suriname and the Netherlands Antilles. At the time, the Charter represented an end to colonial relations and the acceptance of a new legal system in which each nation would look after their own interests independently, look after their common interests on the basis of equality and provide each other with mutual assistance. In 1975, Suriname left the Kingdom's political alliance. Since 1986, Aruba has had separate status within the Kingdom and is no longer part of the Netherlands Antilles. The Netherlands Antilles enjoys self-determination on all internal matters and defers to the Netherlands in matters of defense, foreign policy, and some judicial functions.

The Antilles is governed by a popularly elected unicameral "Staten" (parliament) of 22 members. It

chooses a prime minister (called minister president) and a Council of Ministers, consisting of six to eight other ministers. A governor, who serves a 6-year term, represents the monarch of the Netherlands. Local government is assigned authority independently on each island. Under the direction of a kingdom-appointed island governor, these local governments have a "Bestuurscollege" (administrative body) made up of commissioners who head the separate governmental departments.

Min. of Telecommunications & Transportation: **Omayra LEEFLANG**
Min. Plenipotentiary to The Hague:
Dir., Bank of the Nertherlands Antilles: **Emsley TROMP**

POLITICAL CONDITIONS

In the parliamentary elections of January 27, 2006, the Antillean Restructuring Party (PAR) gained 5 of the 14 seats available in Curaçao, an increase of one seat from the 2002 elections. The PAR had emphasized unity in its electoral campaign with its popular new leader Emily de Jongh-Elhage. Former Prime Minister Etienne Ys had earlier stepped down as party leader. The Workers' Liberation Front (FOL) emerged with only 2 seats (5 seats in 2002), while the Labor Party People's Crusade (PLKP) did not get sufficient votes for a single seat (2 seats in 2002). During a previous government, FOL leader Anthony Godett had been convicted of corruption by local courts, which was later affirmed by the Supreme Court in the Netherlands. A coalition government was formed by the PAR, together with the National People's Party (PNP), St. Maarten's Democratic Party (DP—St. Maarten) and National Alliance (NA), and Bonaire's

Patriotic Union of Bonaire (UPB). Voters in the Netherlands Antilles have opted to dismantle the Netherlands Antilles and create new structures between the various islands and the Kingdom. St. Maarten and Curacao have opted for an autonomous country status within the Kingdom similar to Aruba's status. Saba, Sint Eustatius, and Bonaire have opted for closer ties to the Netherlands. The target date for implementing these changes is 2010-2011, but it is unclear if the target will be met.

Drug smuggling by means of swallowing narcotics packets and boarding flights was a major issue for the Netherlands Antilles, but has been significantly reduced through intensive cooperation among Dutch and Antillean law enforcement authorities.

ECONOMY

Tourism and the financial services sector have been the mainstays of the Netherlands Antilles' economy since the 1970s. The Central Bank reported that the economy of the Netherlands Antilles became somewhat stronger during 2006, backed by positive developments in the private and public sectors, led by the construction, wholesale and retail, and financial services sectors. The higher economic activities did translate into more jobs, as the unemployment rate fell to 14.7% in 2006. Inflationary pressures were up in 2006 as the annualized inflation rate soared to 3.4%, largely fueled by higher world oil prices. The islands' public finances are characterized by structurally high deficits and a high and rising debt ratio and as a result, interest payments absorb an increasing part of revenues. Overall, the islands enjoy a high per-capita income and a well-developed infrastructure compared with other countries in the region.

FOREIGN RELATIONS

The Netherlands Antilles conducts foreign affairs primarily through the Dutch Government. However, the Netherlands Antilles recently has strengthened its relations with other Caribbean governments. It has been granted observer status at the Caribbean Community (CARICOM), and in December 1998, signed an agreement with the Association of Caribbean States (ACS) that made the Netherlands Antilles an associate member.

U.S.-NETHERLANDS ANTILLES RELATIONS

The United States maintains positive relations with the Netherlands Antilles and works cooperatively to combat narco-trafficking.

TRAVEL

Consular Information Sheet

May 12, 2008

Country Description: The five islands of Bonaire, Curaçao, Saba, St. Eustatius (or "Statia") and St. Maarten (Dutch side) comprise the Netherlands Antilles, an autonomous part of the Kingdom of the Netherlands. Tourist facilities are widely available.

Entry Requirements: All Americans traveling by air outside the United States are required to present a passport or other valid travel document to enter or re-enter the United States. This requirement will be extended to sea travel (except closed loop cruises), including ferry service, by the summer of 2009. Until then, U.S. citizens traveling by sea must have government-issued photo identification and a document showing their U.S. citizenship (for example, a birth certificate or certificate of nationalization), or other document compliant with the Western Hemisphere Travel Initiative, such as a passport card for entry or re-entry to the U.S. Sea travelers should also check with their cruise line and countries of destination for any foreign entry requirements.

Applications for the new U.S. Passport Card are now being accepted. Based on current projections, we expect the passport card to be in full production beginning in July 2008. The card may not be used to travel by air and is available only to U.S. citizens. Further information on the Passport Card is available at http://travel.state.gov/passport/ppt_card/ppt_card_3926.html and upcoming changes to U.S. passport policy can be found on the Bureau of Consular Affairs web site at http://travel.state.gov/travel/cbpmc/cbpmc_2223.html. We strongly encourage all American citizen travelers to apply for a U.S. passport well in advance of anticipated travel. American citizens can visit

travel.state.gov or call 1-877-4USA-PPT (1-877-487-2778) for information on how to apply for their passports.

The U.S. Consulate recommends traveling in the Netherlands Antilles with a valid U.S. passport to avoid delays or misunderstandings. A lost or stolen passport is also easier to replace when outside the United States than other evidence of citizenship. Visitors to the Netherlands Antilles may be asked to show onward/return tickets or proof of sufficient funds for their stay. Length of stay is granted for two weeks and may be extended for 90 days by the head office of immigration. For further information, travelers may contact the Royal Netherlands Embassy, 4200 Linnean Avenue, N.W., Washington, D.C. 20008, telephone (202) 244-5300, or the Dutch Consulate in Los Angeles, Chicago, New York, Houston or Miami. Visit the web site for the Embassy of the Netherlands at http://www.netherlands-embassy.org/homepage.asp for the most current visa information.

Safety and Security: Drug-related organized crime exists within the Netherlands Antilles, but has not directly affected tourists in the past. For the latest security information, Americans traveling abroad should regularly monitor the Department's Internet web site, where the current Worldwide Caution Travel Alert, Travel Warnings and Travel Alerts can be found.

Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S., or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: In recent years, street crime has increased, especially in St. Maarten. Valuables, including passports, left unattended on beaches, in cars and hotel lobbies are easy targets for theft, and visitors should leave valuables and personal papers secured in their hotel. Burglary and break-ins are increasingly common at resorts, beach houses and hotels. Armed robbery occasionally occurs. The American boating community has reported a handful of incidents in the past, and visitors are urged to exercise reasonable caution in securing boats and belongings. Car theft, especially of rental vehicles for joy riding and stripping, can occur. Incidents of break-ins to rental cars to steal personal items have been reported by American tourists. Vehicle leases or rentals may not be fully covered by local insurance when a vehicle is stolen. Be sure you are sufficiently insured when renting vehicles and jet skis.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance.

The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, to contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

Medical Facilities and Health Information: Medical care is generally good in Curaçao and St. Maarten, but may be limited on the other three islands. Hospitals have three classes of services i.e.: First Class: one patient to a room, air conditioning etc.; Second Class: two to six patients to a room, no air conditioning; Third Class: 15 to 30 people in one hall. Patients are accommodated according to their level of insurance.

Bonaire: The San Francisco hospital is a medical center (35 beds) with decompression facilities. The hospital has an air ambulance service to Curaçao and Aruba.

Curaçao: St. Elizabeth hospital is a public hospital that may be compared to midrange facilities in the United States. St. Elizabeth's hospital has a decompression chamber and qualified staff to assist scuba divers suffering from decompression sickness. Several private clinics provide good to excellent medical service.

St. Maarten: St. Maarten Medical Center (79 beds) is a relatively small hospital where general surgery is performed. Complex cases are sent to Curaçao.

Statia: Queen Beatrix Medical Center (20 beds). A medical facility well equipped for first aid. Surgery cases are sent to St. Maarten.

Saba: Saba Clinic (14 beds) is a well-equipped first aid facility. Surgery cases are sent to St. Maarten. The Saba Marine Park has a decompression chamber and qualified staff to assist scuba divers suffering from decompression sickness.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's internet site at http://www.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) website at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning the Netherlands Antilles is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

Driving in the Netherlands Antilles is on the right hand side. Right turns on red are prohibited, and traffic conditions require somewhat defensive driving. Local laws require drivers and passengers to wear seat belts and motorcyclists to wear helmets. Children under 4 years of age should be in child safety seats; children under 12 should ride in the back seat.

Nonexistent or hidden and poorly maintained street signs are the major road hazard in the Netherlands Antilles. Therefore, drivers should proceed through intersections with caution. Roads in the Netherlands Antilles are extremely slippery during rainfall. Night driving is reasonably safe in the Netherlands Antilles as long as drivers are familiar with the route and road conditions. Most streets are poorly lit or not lit at all. In Curacao, drivers should be aware of herds of goats that may cross the street unexpectedly. In Bonaire, wild donkeys may also cross the road.

Taxis are the easiest, yet most expensive form of transportation on the islands. As there are no meters, passengers should verify the price before entering the taxi. Fares quoted in U.S. dollars may be significantly higher than those quoted in the local currency. Vans are inexpensive and run non-stop during daytime with no fixed schedule. Each van has a specific route displayed in the front of the windshield. Buses, which run on the hour, have limited routes. The road conditions on the main thoroughfares are good to fair.

See road safety information at the following sites:

http://www.curacao.com
http://www.statiatourism.com
http://www.sabatourism.com
http://www.infobonaire.com
http://www.st-maarten.com

Aviation Safety Oversight: The U.S. Federal Aviation Administration (FAA) has assessed the Government of the Netherlands Antilles' Civil Aviation Authority as being in compliance with International Civil Aviation Organization (ICAO) aviation safety standards for oversight of the Netherlands Antilles air carrier operations. For more information, travelers may visit the FAA's Internet web site at http://www.faa.gov.

Special Circumstances: Dutch law in principle does not permit dual nationality. However, there are several exceptions to the rule. For example, American citizens who are married to Dutch citizens are exempt from the requirement to abandon their American nationality when they apply to become a Dutch citizen by naturalization. For detailed and specific information on this subject, contact the Embassy of the Netherlands in Washington or one of the Dutch consulates in the U.S. In addition to being subject to all Dutch laws affecting U.S. citizens, dual nationals may also be subject to other laws that impose special obligations on Dutch citizens.

Time-share buyers are cautioned about contracts that do not have a "non-disturbance or perpetuity protective clause" incorporated into the purchase agreement. Such a clause gives the time-share owner perpetuity of ownership should the facility be sold. Americans sometimes complain that the timeshare units are not adequately maintained, despite generally high annual maintenance fees. Because of the large number of complaints about misuse of maintenance fees, particularly in St. Maarten, prospective timeshare owners are advised to review the profit and loss statement for maintenance fees. Investors should note that a reputable accounting firm should audit profit and loss statements.

Potential investors should be aware that failed land development schemes involving time-share investments could result in financial losses. Interested investors may wish to seek professional advice regarding investments involving land development projects. Real estate investment problems that reach local courts are rarely settled in favor of foreign investors.

An unusually competitive fee to rent vehicles or equipment could indicate that the dealer is unlicensed or uninsured. The renter is often fully responsible for replacements costs and fees associated with any damages that occur during the rental period. Visitors may be required to pay these fees in full before leaving the Netherlands Antilles and may be subject to civil or criminal penalties if they cannot or will not make payment.

Netherlands Antilles customs authorities may enforce strict regulations concerning temporary importation into or export from the Netherlands Antilles. For example, it is strictly prohibited to export pieces of coral and/or seashells.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law.

Penalties for breaking the law can be more severe than in the United States for similar offences. Persons violating the laws of the Netherlands Antilles, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in the Netherlands Antilles are severe, and convicted offenders can expect long jail sentences and heavy fines.

The Netherlands Antilles has strict gun control laws; even a stray bullet in a suitcase can trigger a fine or time in jail. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: American citizens residing or

traveling in the Netherlands Antilles are encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration web site, and to obtain updated information on travel and security within the Netherlands Antilles. Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency. The U.S. Consulate General is located at J.B. Gorsiraweg #1, Willemstad, Curaçao, telephone (599-9) 461-3066; fax (599-9) 461-6489; e-mail address: acscuracao@state.gov.

NEW ZEALAND

Compiled from the December 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
New Zealand

PROFILE

Geography

Area: 270,500 sq. km.; about the size of Colorado.

Cities: (December 2006) Capital—Wellington (450,600). Other cities—Auckland (1,237,239), Christchurch (338,748), Hamilton (130,000).

Terrain: Highly varied, from snow-capped mountains to lowland plains.

Climate: Temperate to subtropical.

People

Nationality: Noun—New Zealander(s). Adjective—New Zealand.

Population: 4,280,000.

Annual growth rate: (since September 2007) 0.9%.

Ethnic groups: European 67.6%; Maori 14.6%; Asian 9.2%; other Polynesian Pacific peoples 6.9%; Middle Eastern, Latin American, and African 0.9%; other 10.7%. (Note: People can choose to identify with more than one ethnic group.)

Religions: Christian 50%, no religion 32.3%, not stated 7.3%, Hindu 1.6%, Buddhist 1.3%, Islam/Muslim 0.9%, Jewish 0.2%, Spiritualism/New Age 0.5%, other 0.6%.

Languages: English, Maori, New Zealand Sign Language.

Education: Years compulsory—ages 6-16. Attendance—100%. Literacy—99%.

Health: Infant mortality rate (December 2006)—5.1/1,000. Life expectancy (December 2006)—males 77.9 yrs., females 81.9 yrs.

Work force: 75.2% of 15-64 year olds or 2.057 million. Services and government—59%; manufacturing and construction—32%; agriculture, forestry, fisheries, and mining—8.9%.

Government

Type: Parliamentary.

Constitution: No formal, written constitution.

Independence: Declared a dominion in 1907.

Government branches: Executive—Queen Elizabeth II (chief of state, represented by a governor general), prime minister (head of government), cabinet. Legislative—unicameral House of Representatives, commonly called parliament. Judicial—four-level system: District Courts, High Courts, the Court of Appeal, and the Supreme Court, which in 2004 replaced the Judicial Committee of the Privy Council in London as New Zealand's highest court of appeal. There also are specialized courts, such as employment court, family courts, youth courts, and the Maori Land Court.

Political subdivisions: 12 regions with directly elected councils and 74 districts (15 of which are designated as cities) with elected councils. There also are a number of community boards and special-purpose bodies with partially elected, partially appointed memberships.

Political parties: National, Labour, ACT, United Future, Maori Party, Progressive Party, Green Party of Aotearoa New Zealand, and several smaller parties not represented in parliament.

Suffrage: Universal at 18.

Economy

GDP: (as of statistical year ended March 2008) U.S. $127 billion (NZ $177.5).

Real annual GDP growth rate: As of December 2008 real GDP growth is estimated to fall to 0.3% for the year due to recessionary pressures. This is a fall from 7% growth in GDP registered in March 2008.

Per capita income: (March 2008): U.S. $29,855.

Exchange rate: (average for January to December 2008): U.S. $1 = NZ $1.388 (U.S. $0.72 = NZ $1).

Natural resources: Timber, natural gas, iron sand, coal.

Agriculture: (4.78% of GDP) Products—dairy products, meat, forestry products.

Industry: (goods-producing industries 20.5% of GDP, service industries 68.8% of GDP) Types—finance, insurance, and business services;

manufacturing; personal and community services; transport and communication; wholesale trade; construction; government administration and defense; fishing, forestry, and mining; electricity, gas, and water.

Trade: (October 2008) Exports to U.S.—2.936 billion: frozen beef, casein, whey, timber, sheep meat, wine, unwrought aluminum, cheese, and butter. Imports from U.S.—$3.203 billion: consisting primarily of aircraft petroleum oils (crude), medical or veterinary instruments, motor vehicles, computers, aircraft parts, machinery, turbojets, insecticides, and telephone equipment. Major trading partners (rank ordered)—Australia, United States, People's Republic of China, Japan, Singapore, and Germany.

PEOPLE

Most of the 4 million New Zealanders are of British origin. About 15% claim descent from the indigenous Maori population, which is of Polynesian origin. Nearly 76% of the people, including a large majority of Maori, live on the North Island. In addition, 265,974 Pacific peoples live in New Zealand. During the late 1870s, natural increase permanently replaced immigration as the chief contributor to population growth and accounted for more than 75% of population growth in the 20th century. Nearly 85% of New Zealand's population lives in urban areas (with almost one-third in Auckland alone), where the service and manufacturing industries are growing rapidly. New Zealanders colloquially refer to themselves as "Kiwis," after the country's native bird.

HISTORY

Archaeological evidence indicates that New Zealand was populated by fishing and hunting people of East Polynesian ancestry perhaps 1,000 years before Europeans arrived. Known to some scholars as the Moa-hunters, they may have merged with later waves of Polynesians who, according to Maori tradition, arrived between 952 and 1150. Some of the Maoris called their new homeland "Aotearoa," usually translated as "land of the long white cloud."

In 1642, Abel Tasman, a Dutch navigator, made the first recorded European sighting of New Zealand and sketched sections of the two main islands' west coasts. English Captain James Cook thoroughly explored the coastline during three South Pacific voyages beginning in 1769. In the late 18th and early 19th centuries, lumbering, seal hunting, and whaling attracted a few European settlers to New Zealand. In 1840, the United Kingdom established British sovereignty through the Treaty of Waitangi signed that year with Maori chiefs.

In the same year, selected groups from the United Kingdom began the colonization process. Expanding European settlement led to conflict with Maori, most notably in the Maori land wars of the 1860s. British and colonial forces eventually overcame determined Maori resistance. During this period, many Maori died from disease and warfare, much of it intertribal.

Constitutional government began to develop in the 1850s. In 1867, the Maori won the right to a certain number of reserved seats in parliament. During this period, the livestock industry began to expand, and the foundations of New Zealand's modern economy took shape. By the end of the 19th century, improved transportation facilities made possible a great overseas trade in wool, meat, and dairy products.

By the 1890s, parliamentary government along democratic lines was well-established, and New Zealand's social institutions assumed their present form. Women received the right to vote in national elections in 1893. The turn of the century brought sweeping social reforms that built the foundation for New Zealand's version of the welfare state.

The Maori gradually recovered from population decline and, through interaction and intermarriage with settlers and missionaries, adopted much of European culture. In recent decades, Maori have become increasingly urbanized and have become more politically active and culturally assertive. New Zealand was declared a dominion by a royal proclamation in 1907. It achieved full internal and external autonomy by the Statute of Westminster Adoption Act in 1947, although this merely formalized a situation that had existed for many years.

GOVERNMENT

New Zealand has a parliamentary system of government closely patterned on that of the United Kingdom and is a fully independent member of the Commonwealth. It has no written constitution. Executive authority is vested in a cabinet led by the prime minister, who is the leader of the political party or coalition of parties holding the majority of seats in parliament. All cabinet ministers must be members of parliament and are collectively responsible to it.

The unicameral parliament (House of Representatives) usually has 122 seats, seven of which currently are reserved for Maori elected on a separate Maori roll. However, Maori also may run for, and have been elected to, non-reserved seats. Parliaments are elected for a maximum term of 3 years, although elections can be called sooner.

The judiciary consists of the Supreme Court, Court of Appeal, High Courts, and District Courts. New Zealand law has three principal sources—English common law, certain statutes of the U.K. Parliament enacted before 1947, and statutes of the New Zealand parliament. In interpreting common law, the courts have been concerned with preserving uniformity with common law as interpreted in the United Kingdom.

Local government in New Zealand has only the powers conferred upon it by parliament. The country's 12 regional councils are directly elected,

set their own tax rates, and have a chairperson elected by their members. Regional council responsibilities include environmental management, regional aspects of civil defense, and transportation planning. The 74 "territorial authorities"—15 city councils, 58 district councils in rural areas, and one county council for the Chatham Islands—are directly elected, raise local taxes at rates they themselves set, and are headed by popularly elected mayors. The territorial authorities may delegate powers to local community boards. These boards, instituted at the behest either local citizens or territorial authorities, advocate community views but cannot levy taxes, appoint staff, or own property.

Principal Government Officials

Last Updated: 11/12/08

Governor Gen.: **Anand SATYANAND**
Prime Min.: **Helen CLARK**
Dep. Prime Min.: **Michael CULLEN**
Min. of the Accident Compensation Corporation: **Maryan STREET**
Min. of Agriculture: **Jim ANDERTON**
Min. of Arts, Culture, & Heritage: **Helen CLARK**
Min. of Biosecurity: **Jim ANDERTON**
Min. of Broadcasting: **Trevor MALLARD**
Min. of Building Issues: **Shane JONES**
Min. of Civil Defense: **Rick BARKER**
Min. of Climate Change Issues: **David PARKER**
Min. of Commerce: **Lianne DALZIEL**
Min. of Communications: **David CUNLIFFE**
Min. of Community & Voluntary Sector: **Ruth DYSON**
Min. of Conservation: **Steve CHADWICK**
Min. of Consumer Affairs: **Judith TIZARD**
Min. of Corrections: **Phil GOFF**
Min. of Courts: **Rick BARKER**
Min. of Crown Research Institutes: **Steve MAHAREY**
Min. for Customs: **Nanaia MAHUTA**
Min. of Defense: **Phil GOFF**
Min. for Disarmament & Arms Control: **Phil GOFF**
Min. of Economic Development: **Pete HODGSON**
Min. of Education: **Chris CARTER**
Min. of Energy: **David PARKER**
Min. of Environment: **Trevor MALLARD**
Min. of Finance: **Michael CULLEN**
Min. of Fisheries: **Jim ANDERTON**
Min. of Food Safety: **Lianne DALZIEL**
Min. of Foreign Affairs: **Winston PETERS**
Min. of Forestry: **Jim ANDERTON**
Min. of Health: **David CUNLIFFE**
Min. of Housing: **Maryan STREET**
Min. of Information Technology: **David CUNLIFFE**
Min. of Immigration: **Clayton COSGROVE**
Min. of Industry & Regional Development: **Trevor MALLARD**
Min. of Internal Affairs: **Rick BARKER**
Min. of Justice: **Annette KING**
Min. of Labor: **Trevor MALLARD**
Min. for Local Govt.: **Nanaia MAHUTA**
Min. of Maori Affairs: **Parekura HOROMIA**
Min. of Pacific Island Affairs: **Luamanuvao Winnie LABAN**
Min. of Police: **Annette KING**
Min. for Racing: **Winston PETERS**
Min. of Research, Science, & Technology: **Pete HODGSON**
Min. of Revenue: **Peter DUNNE**
Min. of Senior Citizens: **Ruth DYSON**
Min. of Social Development & Employment: **Ruth DYSON**
Min. of Sports & Recreation: **Clayton COSGROVE**
Min. of State-Owned Enterprises: **Trevor MALLARD**
Min. of State Services: **David PARKER**
Min. for Tertiary Education: **Pete HODGSON**
Min. of Tourism: **Damien O'CONNOR**
Min. of Trade: **Phil GOFF**
Min. for Trade Negotiations: **Phil GOFF**
Min. of Transport: **Anette KING**
Min. of Transport Safety: **Harry DUYNHOVEN**
Min. in Charge of the Treaty of Waitangi Negotiations: **Michael CULLEN**
Min of Veterans Affairs: **Rick BARKER**
Min. of Women's Affairs: **Steve CHADWICK**
Min. for Youth Affairs: **Nanaia MAHUTA**
Min. of State: **Mahara OKEROA**
Min. of State: **Mita RIRINUI**
Min. of State: **Dover SAMUELS**
Attorney Gen.: **Michael CULLEN**
Governor, Reserve Bank: **Alan BOLLARD**
Ambassador to the US: **Roy FERGUSON**
Permanent Representative to the UN, New York: **Rosemary BANKS**

New Zealand maintains an embassy in the United States at 37 Observatory Circle NW, Washington, DC 20008 (tel. 202-328-4800, fax 202-667-5227). A consulate general is located in Los Angeles (tel. 310-207-1605, fax 310-207-3605). Tourism information is available through the New Zealand Tourism Board office in Santa Monica, California (toll-free tel. 800-388-5494) or through the following website: www.tourisminfo.govt.nz.

POLITICAL CONDITIONS

The traditionally conservative National Party and left-leaning Labour Party have dominated New Zealand political life since a Labour government came to power in 1935. During 14 years in office, the Labour Party implemented a broad array of social and economic legislation, including comprehensive social security, a large-scale public works program, a 40-hour workweek, a minimum basic wage, and compulsory unionism. The National Party won control of the government in 1949 and adopted many welfare measures instituted by the Labour Party. Except for two brief periods of Labour governments in 1957-60 and 1972-75, National held power until 1984. After regaining control in 1984, the Labour government instituted a series of radical market-oriented reforms in response to New Zealand's mounting external debt. It also enacted antinuclear legislation that effectively brought about New Zealand's suspension from the ANZUS security alliance with the United States and Australia.

In October 1990, the National Party again formed the government, for the first of three 3-year terms. In 1996, New Zealand inaugurated a mixed-member proportional (MMP) system to elect its parliament. The system was designed to increase representation of smaller parties in parliament and appears to have done so in the MMP elections to date. Since 1996, neither the National nor the Labour Party has had an absolute majority in parliament, and for all but one of those years, the government has been a minority one. The Labour Party won elections in November 1999 and again in July 2002. In 2002 Labour formed a coalition, minority government with the Progressive Coalition, a left-wing party holding two seats in parliament. The government relied

on support from the centrist United Future Party to pass legislation.

Following a narrow victory in the September 2005 general elections, Labour formed a coalition with the one-seat Progressive Party. The government also entered into limited support agreements with the United Future New Zealand and NZ First Parties, whose leaders were given ministerial positions outside of the cabinet. This gave Labour an effective one-seat majority with which to pass legislation in parliament. Labour has also secured an assurance from the Green Party that it will abstain from a vote of confidence against the government. There are 121 current members of parliament. The 2005 elections saw the new Maori Party win four out of the seven reserved Maori seats. There are currently two independent members of parliament (MPs) a former Labour Party MP and a former United Future New Zealand MP, both of whom left their respective parties in 2007.

The 2008 general election on November 8 was comfortably won by the John Key-led National Party. National won 45% of the popular vote

(58 seats) to Labour's 34% (43 seats). The Green Party won nine seats; ACT won five; the Maori Party picked up an additional Maori seat to bring its total number of seats to five; the Progressives and United Future won one seat each. New Zealand First, the party of former foreign minister Winston Peters, did not win enough votes to return to parliament. On November 16, Key announced the formation of a new National-led center-right government in coalition with the right-leaning ACT and the centrist United Future party. National also entered into a limited support agreement with the Maori Party. Collectively, this gives the government 69 votes to pass legislation in the new 122-member parliament, the two extra seats the results of an overhang from the election. The leaders of ACT and United Future were respectively given the local government and revenue ministerial portfolios. ACT's co-leader was given the consumer affairs ministerial portfolio. The co-leaders of the Maori Party were each given the Maori affairs and community ministerial portfolios, although their posts are outside of cabinet with the right to dissent on other policy issues outside portfolio areas. The government was sworn in on November 19, with Key becoming New Zealand's 38th prime minister. During her election night concession speech, outgoing Prime Minister Helen Clark announced that she would step down as Labour's leader after 15 years in charge. She was succeeded as party leader by Phil Goff. Clark will remain in parliament as Labour's foreign affairs spokesperson. The 49th parliament will commence on December 8, 2008.

ECONOMY

New Zealand's economy historically has been based on a foundation of exports from its very efficient agricultural system. Leading agricultural exports include dairy products, meat, forest products, fruit and vegetables, fish, and wool. New Zealand was a direct beneficiary of many of the reforms achieved under the Uruguay Round of trade negotiations, with agriculture in general and the dairy sector in particular enjoying many new trade opportunities.

The country has substantial hydroelectric power and reserves of natural gas, although the largest natural gas condensate and oil field—supplying nearly 75% of the country's hydrocarbons—is expected to be tapped out by 2009. Based on recent natural gas exploration between Australia and New Zealand, natural gas production is projected to increase by 3.5% by 2020. Leading manufacturing sectors are food processing, wood and paper products, and metal fabrication. Service industries, particularly financial, insurance, and business services, form a significant part of New Zealand's economy. As of March 2008 New Zealand had 1,506,000 Internet subscribers, amounting to approximately 65% of New Zealand households, ranking above Australia, the U.K., and the U.S.

Since 1984, government subsidies including for agriculture were eliminated; import regulations liberalized; tariffs unilaterally slashed; exchange rates freely floated; controls on interest rates, wages, and prices removed; and marginal rates of taxation reduced. Tight monetary policy and major efforts to reduce the government budget deficit brought the inflation rate down from an annual rate of more than 18% in 1987. The restructuring and sale of government-owned enterprises in the 1990s reduced government's role in the economy and permitted the retirement of some public debt. As a result, New Zealand is now one of the most open economies in the world.

In the statistical year ending March 2008 the economy was robust and grew by 7%, but recessionary pressure mid-year and the global financial downturn will see the year end with an estimated 2008 GDP growth rate of 0.3%. Demand for new housing is in part driven by immigration, but the net increase in new arrivals has begun to slow. The net permanent long-term migration inflow to New Zealand in the year ending February 2008 amounted to 4,600, down from a net inflow of 13,200 in 2007. As of October 2008, the net outflow of New Zealanders as permanent and long-term (PLT) to Australia was 34,600. This was up from 26,500 the previous year, and was higher than previous peaks recorded in January 1989 (33,700) and December 1979 (33,400). Over the statistical year ending September 2008, the unemployment rate increased to 4.2%, the highest level since December 2003. In September 2008, there were 94,000 people unemployed, 16,000 more than a year earlier.

Traditionally, New Zealand's economy has been helped by strong economic relations with Australia. New Zealand and Australia are partners in "Closer Economic Relations" (CER), which allows for free trade in goods and most services. Since 1990, CER has created a single market of more than 22 million people, and this has provided new opportunities for New Zealand exporters. Australia is now the destination of 25% of New Zealand's exports, compared to 14% in 1983. Both sides also have agreed to consider extending CER to product standardization and taxation policy. New Zealand has had a free trade agreement with Singapore since 2001. In July 2005, both countries joined with Chile and Brunei to form a Trans-Pacific Strategic Economic Partnership (TPP), liberalizing trade in goods and services between them. On September 22, 2008, comprehensive negotiations for the U.S. to join the TPP were launched, with talks scheduled to begin in early 2009. In April 2005, New Zealand initialed a free-trade deal with Thailand. In April 2008 New Zealand concluded a free trade agreement (FTA) with China and is negotiating an FTA with the Gulf Cooperation Council (GCC). New Zealand held its first round of the New Zealand-GCC FTA in Wellington in July 2007 with representatives from the Gulf states (Saudi Arabia, Kuwait, Bahrain, Qatar, the United Arab Emirates, and Oman). In December 2007, New Zealand and South Korea announced the beginning of a study group to explore the benefits of a bilateral free trade agreement. In June 2008, New Zealand and Japan established an

economic working group to review their bilateral economic relationship.

New Zealand's top six trading partners (total trade) ending statistical year October 2008 included Australia, the United States, the People's Republic of China, Japan, Singapore, and Germany. Australia continued as New Zealand's principal export market, worth $7.2 billion with exports to Australia rising by 30%. The United States and Japan were New Zealand's second- and third-largest export markets, receiving $2.9 billion and $2.5 billion worth of goods, respectively. New Zealand's fourth-largest export destination was China with exports worth $1.7 billion in statistical year ending October 2008.

The U.S. is the second-largest trading partner for New Zealand, with U.S. goods and services accounting for approximately 9% of all imports. The New Zealand dollar reached a 24-year high of over U.S. $0.80 in July 2007 (the highest since the New Zealand dollar was floated), but as of December 2008 the Kiwi dollar was trading at U.S. $0.55. New Zealand's total imports from the U.S., as of October 2008, amounted to U.S. $3.2 billion. The market-led economy offers many benefits for U.S. exporters and investors. Investment opportunities exist in chemicals, food preparation, finance, tourism, and forest products, as well as in franchising. The best sales and investment prospects are for whole aircraft and aircraft parts, medical or veterinary instruments, motor vehicles, information technology, hotel and restaurant equipment, telecommunications, tourism, franchising, food processing and packaging, and medical equipment. On the agricultural side, the best prospects are for fresh fruit, snack foods, and soybean meal.

New Zealand welcomes and encourages foreign investment without discrimination. The Overseas Investment Office (OIO) must give consent to foreign investments that would control 25% or more of businesses or property worth more than NZ$100 million. Restrictions and approval requirements also apply to certain investments in land and in the commercial fishing industry. OIO consent is based on a national interest determination. Foreign buyers of land can be required to report periodically on their compliance with the terms of the government's consent to their purchase. The OIO, part of Land Information New Zealand, took over the functions of the Overseas Investment Commission in August 2005. Full remittance of profits and capital is permitted through normal banking channels. As of March 2008, the U.S. accounted for 11.5% of all foreign direct investment in New Zealand, amounting to U.S. $7.72 billion.

A number of U.S. companies have subsidiary branches in New Zealand. Many operate through local agents, and some are in association in joint ventures. The American Chamber of Commerce is active in New Zealand, with its main office in Auckland.

NATIONAL SECURITY

New Zealand has three defense policy objectives—defend New Zealand against low-level threats, contribute to regional security, and play a part in global security efforts. New Zealand has considered its own national defense needs to be modest. Its defense budget generally has provided for selected upgrades in equipment. Shortly after winning the 1999 election, the Labour government canceled a lease-to-buy agreement with the U.S. for 28 F-16 aircraft. However, Labour did embark on a significant defense upgrade and acquisition plan. All three services have benefited from the upgrades/acquisitions. In 2001, the government contracted to purchase 105 LAVIIIs for U.S. $300 million, with delivery completed in 2005. The Army also purchased 321 Light Operational Vehicles to make its forces more mobile. In 2002, New Zealand announced planned upgrades of its P3 and C-130 Hercules aircraft, and purchased two Boeing 757 aircraft for U.S. $100 million. In 2006 New Zealand contracted with NH Industries to purchase eight NH-90 aircraft to start delivery in 2009. In 2007 they entered an agreement to purchase 12 A-109 light helicopters from Agosta to also start delivery in 2009. The P-3s, C-130s, and B-757s are all currently being upgraded/modified; one of the two B-757's modifications have been completed, and it has returned to service. In 2007, the Navy began accepting delivery of the Project Protector program, with an estimated value of U.S. $250 million, consisting of one multi-role vessel (MRV), two offshore patrol vessels (OPVs), and four inshore patrol vessels (IPVs). The Navy's two ANZAC frigates will receive ship support systems upgrades in late 2008/early 2009, and the Navy is requesting additional funding for weapons systems upgrades for 2010-2012.

In May 2001, the government announced it was scrapping its combat air force. New Zealand states it maintains a "credible minimum force," although critics maintain that the country's defense forces have fallen below this standard. New Zealand still maintains the fleet of A-4 Skyhawk jets and Aerromacche jets left over from the scrapping of its combat air force. Its attempts to sell the jets have thus far failed.

With a claimed area of direct strategic concern that extends from Australia to Southeast Asia to the South Pacific, New Zealand necessarily places substantial reliance on its defense relationship with other countries, in particular Australia. However, acknowledging the need to improve its defense capabilities, the government in 2005 announced the Defense Sustainability Initiative allocating an additional NZ$4.6 billion (U.S. $3.19 billion) over 10 years to modernize the country's defense equipment and infrastructure and increase its military personnel. The funding represented a 51% increase in defense spending since the Labour government took office in 1999.

New Zealand is an active participant in multilateral peacekeeping. It has taken a leading role in trying to bring peace, reconciliation, and reconstruction to the Solomon Islands and the neighboring island of Bougainville. New Zealand maintains a contingent in the Sinai Multinational Force and Observers and has contributed to UN

peacekeeping operations in Angola, Cambodia, Somalia, and the former Yugoslavia. It also participated in the Multilateral Interception Force in the Persian Gulf. New Zealand's most recent peacekeeping operations experience has been in Timor-Leste, where it initially dispatched almost 10% of its entire defense force and continues to sustain a modest force. New Zealand participated in Operation Enduring Freedom and has fielded a Provincial Reconstruction Team in Afghanistan's Bamian province. It continues to sustain that PRT and has deployed a frigate to the Gulf of Oman on three rotations, with the most recent in spring 2008. In support of the effort to reconstruct Iraq, New Zealand deployed an engineering team to the country.

New Zealand participates in sharing training facilities, personnel exchanges, and joint exercises with the Philippines, Thailand, Indonesia, Papua New Guinea, Brunei, Tonga, and South Pacific states. It also exercises with its Five-Power Defense Arrangement partners—Australia, the United Kingdom, Malaysia, and Singapore. Due to New Zealand's antinuclear policy, defense cooperation with the U.S., including training exercises, has been significantly restricted since 1986.

FOREIGN RELATIONS

New Zealand's foreign policy is oriented chiefly toward developed democratic nations and emerging Pacific economies. The country's major political parties have generally agreed on the broad outlines of foreign policy, and the current coalition government has been active in multilateral fora on issues of recurring interest to New Zealand—trade liberalization, environment, and arms control. New Zealand values the United Nations and its participation in that organization.

It also values its participation in the World Trade Organization (WTO); World Bank; International Monetary Fund (IMF); Organization for Economic Cooperation and Development (OECD); International Energy Agency; Asian Development Bank; South Pacific Forum; The Pacific Community; Colombo Plan; Asia Pacific Economic Cooperation (APEC); and the International Whaling Commission. New Zealand also is an active member of the Commonwealth. Despite the 1985 rupture in the ANZUS alliance, New Zealand has maintained good working relations with the United States and Australia on a broad array of international issues.

In the past, New Zealand's geographic isolation and its agricultural economy's general prosperity tended to minimize public interest in world affairs. However, growing global trade and other international economic events have made New Zealanders increasingly aware of their country's dependence on stable overseas markets.

New Zealand's economic involvement with Asia has been increasingly important through expanding trade with the growing economies of Asia. New Zealand is a "dialogue partner" with the Association of South East Asian Nations (ASEAN) and an active participant in APEC. As a charter member of the Colombo Plan, New Zealand has provided Asian countries with technical assistance and capital. It also contributes through the Asian Development Bank and through UN programs and is a member of the UN Economic and Social Council for Asia and the Pacific.

New Zealand has focused its bilateral economic assistance resources on projects in the South Pacific island states, especially on Bougainville. The country's long association with Samoa (formerly known as Western Samoa), reflected in a treaty of friendship signed in 1962, and its close association with Tonga have resulted in a flow of immigrants and visitors under work permit schemes from both countries. New Zealand administers the Tokelau Islands and provides foreign policy and economic support when requested for the freely associated self-governing states of the Cook Islands and Niue. Inhabitants of these areas hold New Zealand citizenship.

In 1947, New Zealand joined Australia, France, the United Kingdom, and the United States to form the South Pacific Commission, a regional body to promote the welfare of the Pacific region. New Zealand has been a leader in the organization. In 1971, New Zealand joined the other independent and self-governing states of the South Pacific to establish the South Pacific Forum (now known as the Pacific Islands Forum), which meets annually at the "heads of government" level.

U.S.-NEW ZEALAND RELATIONS

Bilateral relations are excellent. The United States and New Zealand share common elements of history and culture and a commitment to democratic principles. Senior-level officials regularly consult with each on issues of mutual importance. In March 2007, Prime Minister Clark visited Washington, DC, where she met with President George W. Bush, Secretary of State Condoleezza Rice, and Secretary of Defense Robert Gates.

The United States established consular representation in New Zealand in 1839 to represent and protect American shipping and whaling interests. Since the U.K. was responsible for New Zealand's foreign affairs, direct U.S.-New Zealand diplomatic ties were not established until 1942, when the Japanese threat encouraged close U.S.-New Zealand cooperation in the Pacific campaign. During the war, more than 400,000 American military personnel were stationed in New Zealand to prepare for crucial battles such as Tarawa and Guadalcanal.

New Zealand's relationship with the United States in the post-World War II period was closely associated with the Australian, New Zealand, United States (ANZUS) security treaty of 1951, under which signatories agreed

to consult in case of an attack in the Pacific and to "act to meet the common danger." During the postwar period, access to New Zealand ports by U.S. vessels contributed to the flexibility and effectiveness of U.S. naval forces in the Pacific. Growing concern about nuclear testing in the South Pacific and arms control issues contributed to the 1984 election of a Labour government committed to barring nuclear-armed and nuclear-powered warships from New Zealand ports. The government's anti-nuclear policy proved incompatible with long-standing, worldwide U.S. policy of neither confirming nor denying the presence or absence of nuclear weapons onboard U.S. vessels.

Implementation of New Zealand's policy effectively prevented practical alliance cooperation under ANZUS, and after extensive efforts to resolve the issue proved unsuccessful, in August 1986 the United States suspended its ANZUS security obligations to New Zealand. Even after President George H.W. Bush's 1991 announcement that U.S. surface ships do not normally carry nuclear weapons, New Zealand's legislation prohibiting visits of nuclear-powered ships continues to preclude a bilateral security alliance with the U.S. The legislation enjoys broad public and political support in New Zealand. The United States would welcome New Zealand's reassessment of its legislation to permit that country's return to full ANZUS cooperation.

Despite suspension of U.S. security obligations, the New Zealand Government has reaffirmed the importance it attaches to continued close political, economic, and social ties with the United States and Australia.

New Zealand is an active member of the global coalition in the War against Terrorism, and deployed SAS troops to Afghanistan, and naval and air assets to the Persian Gulf. New Zealand has worked closely with the U.S. to promote free trade in the WTO, the Asia-Pacific Economic Cooperation (APEC) group, and other multilateral fora.

The U.S. and New Zealand work together closely on scientific research in the Antarctic. Christchurch is the staging area for joint logistical support operations serving U.S. permanent bases at McMurdo Station and South Pole, and New Zealand's Scott base, (located just three kilometers from McMurdo Station in the Ross Sea region).

TRAVEL

Consular Information Sheet

September 22, 2008

Country Description: New Zealand is a highly developed, stable parliamentary democracy, which recognizes the British monarch as sovereign. It has a modern economy, and tourist facilities are widely available. The New Zealand Tourist Board, which has a wide range of information of interest to travelers, can be contacted via the internet at online http://www.newzealand.com/USA.

Entry Requirements: U.S. citizens eligible for a visa waiver do not need a visa for tourist stays of three months or less. For more information about visa waivers and entry requirements, contact the Embassy of New Zealand: 37 Observatory Circle NW, Washington, DC 20008, telephone (202) 328-4800; or the Consulate General of New Zealand in Los Angeles: 2425 Olympic Blvd Suite 600E, Santa Monica, CA 90404, telephone (310) 566-6555. Visit the Consulate of New Zealand web site at http://www.nzcgla.com for the most current visa information.

Safety and Security: U.S. citizens in New Zealand should review their personal security practices, be alert to any unusual activity around their homes or businesses, and report any significant incidents to local police.

For the latest security information, Americans traveling abroad should regularly monitor the Department of State, Bureau of Consular Affairs' web site at http://travel.state.gov, where the current Travel Warnings and Travel Alerts, as well as the Worldwide Caution, can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the

U.S., or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: Crime rates in New Zealand are low but have increased in recent years. The most prevalent crime is theft or attempted theft from cars, camper vans and hostels. To help protect against theft, do not leave passports, other valuable documents, or other items in unattended vehicles. Violent crime against tourists is unusual; however visitors who are traveling alone should be especially vigilant, and avoid isolated areas that are not frequented by the public.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. embassy or consulate for assistance. The embassy/consulate staff can, for example, assist you to find appropriate medical care, contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

In New Zealand, a private organization called Victim Support works both independently and with the NZ Police to assist victims of crime. Victim Support is available 24 hours per day on 0800-842-846, 0800-Victim, by email at victim@xtra.co.nz.

The local equivalent to the "911" emergency line in New Zealand is 111.

Medical Facilities and Health Information: Quality medical care is widely available, but waiting lists exist for certain types of treatment. High-quality medication (both over-the-counter and prescription) is widely available at local pharmacies, though the products' names may differ from the American versions. Serious medical problems requiring hospitalization and/or medical evacuation to the United States can cost thousands of dollars. Doctors and hospitals often expect immediate cash payment for health services. Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747); fax 1-888-CDC-FAXX (1-888-232-3299), or via the CDC's web site at http://wwwn.cdc.gov/travel.

For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith.

The U.S. Department of State is unaware of any HIV/AIDS entry restrictions for visitors to or foreign residents of New Zealand.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning New Zealand is provided for general reference only.

All traffic travels on the left in New Zealand, and drivers should exercise extra caution if accustomed to driving on the right. Driving on the wrong side of the road is a leading cause of serious injury and death for American tourists. Cars turning left must yield to oncoming cars that are turning right. Proceed carefully through intersections. Red means "stop"—do not turn at a red light.

New Zealand has only 100 miles of multilane divided motorways. Most intercity travel is accomplished on two lane roads. While these are in good condition, New Zealand's rugged terrain means motorists often encounter sharper curves and steeper grades than those found in the U.S. interstate highway system. Renting a car or camper is a popular way to enjoy New Zealand's natural beauty, but visitors unfamiliar with local conditions should drive particularly conservatively. Posted speed limit signs should be observed. Drivers should use caution to avoid animals when driving in rural areas.

Pedestrians are advised to look carefully in all directions before crossing a street or roadway, and to use crosswalks. Pedestrians do not have the right of way except in crosswalks. New Zealand law requires that cars yield to pedestrians in a crosswalk, and that cars stop at least two meters (approximately 6 feet) from a crosswalk that is in use. Traffic circles are common throughout New Zealand. When approaching a traffic circle, always yield to traffic coming from the right –noting that traffic already in the circle has the right-of-way—and merge to the left into the circle. Public transportation including buses, trains, and taxis is for the most part reliable and safe. In case of emergency, phone the local police at 111.

For specific information concerning the operation and rental of motor vehicles, contact the New Zealand Tourist Board via the Internet at http://www.newzealand.com/USA or the Land Transport Safety Authority at http://www.ltsa.govt.nz.

Aviation Safety Oversight: The U.S. Federal Aviation Administration (FAA) has assessed the Government of New Zealand's Civil Aviation Authority as being in compliance with International Civil Aviation Organization (ICAO) aviation safety standards for oversight of New Zealand's air carrier operations. For more information, travelers may visit the FAA's web site at http://www.faa.gov.

Special Circumstances: Some heavily populated parts of New Zealand are in areas of very high seismic activity. General information regarding disaster preparedness is available from the U.S. Federal Emergency Management Agency (FEMA) at http://www.fema.gov.

Many tourists come to New Zealand to participate in extreme adventure sports, such as bungee jumping, sky diving, hiking, rappelling, climbing, motorcycling, and kayaking. All too often, injuries and even death result from participation in such activities. Travelers are advised to employ caution and common sense when engaging in adventure sports. Never participate in such sports alone, always carry identification, and let someone else know where you are at all times. Before kayaking, check the river conditions and wear a life jacket. When hiking, rappelling, or climbing, carry a first aid kit, know the location of the nearest rescue center, and bring a friend along. New Zealand is an island nation, and the government is serious about preserving its delicate ecosystem. The Ministry of Agriculture and Forestry (MAF) imposes strict regulations regarding what can be imported to New Zealand. People failing to declare goods that could be quarantined can be fined up to $100,000 NZ and/or face up to five years in prison. People failing to declare risk goods such as fresh fruit, seeds, and plants can receive an instant fine of $200 NZ. When importing a pet, thorough veterinary documentation and a quarantine period is required. Unfinished wood products, used hiking shoes and gardening tools, fresh food items, and items such as used pet carriers may be seized and destroyed by MAF. More information can be found at http://www.biosecurity.govt.nz/personal-travel-belongings-and-mail/arriving-by-air/what-you-cannot-bring.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than those in the United States for similar offenses. Persons violating New Zealand laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession of, use of, or trafficking in illegal drugs in New Zealand are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in New Zealand are encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration web site so that they can obtain updated information on travel and security within New Zealand. Americans without Internet access may register directly with the nearest U.S. embassy or consulate. By registering, American citizens make it easier for the embassy or consulate to contact them in case of emergency.

The U.S. Embassy in Wellington is located at 29 Fitzherbert Terrace, Thorndon, Wellington. The telephone number is (64)(4) 462-6000. The fax number is (64)(4) 471-2380. The Embassy's web site is http://wellington.usembassy.gov. The U.S. Embassy in Wellington does not have a consular section and thus cannot provide assistance to American citizens. All consular services for American citizens are provided by the Consulate General in Auckland.

The U.S. Consulate General in Auckland is located on the third floor of the Citigroup Centre, 23 Customs Street East, between Commerce and Queen Streets. The telephone number is (64)(9) 303-2724. The fax number is (64)(9) 366-0870. See information on services to Americans at http://wellington.usembassy.gov/service.html. All consular matters are handled at the Consulate General in Auckland.

For after-hours emergencies anywhere in New Zealand, a duty officer can be contacted by telephone. Persons seeking after-hours assistance may call (64)(4) 462-6000; after listening to a brief recording, the caller may leave a message on the voice mail system, describing the nature of the emergency and giving a point of contact. The phone system will automatically call the duty officer in Wellington or in Auckland, who will listen to the message and take the appropriate action.

International Parental Child Abduction

November 2008

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *International Child Abduction* section of this book and review current reports online at www.travel.state.gov/childabduction.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is provided for general information only. Questions involving interpretation of specific foreign laws should be addressed to foreign legal counsel.

General Information: In New Zealand, married parents are the guardians (share custody) of any minor children unless there are court orders to the contrary. The parents of a child born out-of-wedlock have equal rights of custody if they were living together when the child was born, unless a court order has been made altering either parent's guardianship rights. In any New Zealand custody hearing, decisions are based on the "best interests" of the child and the gender of parent and/or child is not to play a role.

A child born in New Zealand is usually eligible for New Zealand citizen-

ship. If a child is born outside New Zealand and has a New Zealand citizen parent, that parent can file a claim for New Zealand "citizenship by descent" on behalf of the child at the nearest New Zealand Embassy or Consulate. The consent of the other parent is not required. Either parent can apply for a New Zealand passport; the signature/consent of the other parent is not required. A parent who does not want a New Zealand passport issued to his or her child must first obtain a New Zealand court order restricting the other parent's ability to apply for the child's passport. For more information, please contact a consular officer at the Embassy of New Zealand in Washington, D.C., telephone 202-328-4848. There is also a New Zealand Consulate in Los Angeles, California, telephone 310-207-1605. The Embassy maintains a website at http://www.nzemb.org.

For more information, please read the *International Parental Child Abduction* section of this book and review current reports online at http://travel.state.gov.

The Hague Convention: The United States is a party to the Hague Convention on the Civil Aspects of International Child Abduction. The Hague Convention entered into force between the United States and New Zealand on October 1, 1991. Therefore, the Convention's provisions concerning return would apply to children abducted to or wrongfully retained in New Zealand after October 1, 1991. Parents and legal guardians of children taken to New Zealand prior to October 1, 1991, may still submit applications for access to the child under the Convention in some cases.

The designated Central Authority for all of New Zealand is the Ministry of Justice. Their address is P.O Box #180, Wellington, New Zealand. The international telephone number is 011-64-4-918-8800 and the international telefax number is 011-64-4-918-8820. There is no public e-mail address.

For more information, please read the *International Parental Child Abduction* section of this book and review current reports online at www.travel.state.gov/childabduction.

Recognition and Enforcement of U.S. Custody Orders: There is no arrangement that allows U.S. court orders to be automatically recognized and enforced in New Zealand. It is necessary to retain a solicitor to file for a so-called "Consent Order" in the New Zealand court. The solicitor will be able to advise a left-behind parent on what documents would be relevant to the particular case. There are no filing fees in the Family Court for custody orders. Legal fees are a matter for the client and the lawyer to resolve.

Criminal Remedies: For information on possible criminal remedies relating to an international child abduction, please contact your local law enforcement authorities or the nearest office of the Federal Bureau of Investigation. Information is also available on the Internet at the web site of the U.S. Department of Justice, Office of Juvenile Justice and Delinquency Prevention at http://www.ojjdp.ncjrs.org. You should be aware that filing criminal child abduction charges in the United States against a taking parent may jeopardize a New Zealand Hague Convention case. For example, the New Zealand courts may be reluctant to issue or enforce a return order if a taking parent, returning to the U.S. for the purpose of pursuing a custody case, might be arrested.

Additional Information: The State Department has general information about welfare visits, hiring a foreign attorney, service of process, enforcement of child support orders, and the international enforcement of judgments, which may supplement the country-specific information provided in this flier. These documents are available on the Internet at http://travel.state.gov or by calling the State Department's Office of Overseas Citizen Services at 1-202-647-5225.

For further information on international parental child abduction, contact the Office of Children's Issues, U.S. Department of State at 1-888-407-4747 or visit its web site on the Internet at http://travel.state.gov. You may also direct inquiries to: Office of Children's Issues, U.S. Department of State, Washington, DC 20520-4811; Phone: (202) 736-9090; Fax: (202) 312-9743.

Intercountry Adoption

November 2006

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is based on public sources and current understanding. Questions involving foreign and U.S. immigration laws and legal interpretation should be addressed respectively to qualified foreign or U.S. legal counsel.

Please Note: New Zealand is a receiving, not sending country for intercountry adoption. New Zealand usually requires prospective adoptive parents to be permanent residents of New Zealand and to have lived in New Zealand for the two years immediately preceding an application to adopt. New Zealand follows the principle of not allowing New Zealand-born children to be adopted internationally when there are appropriate placements available for them in New Zealand.

If the birth mother selects a specific U.S. citizen as an adoptive parent, an otherwise qualified child will not be able to obtain a U.S. immigrant visa as an orphan unless the mother is the sole or surviving parent and is incapable of providing proper care.

Patterns of Immigration: Recent U.S. immigrant visa statistics indi-

cate that no orphans from New Zealand have received U.S. immigrant visas during the past five years.

Adoption Authority:
Department of Child, Youth & Family Services (CYF)
Adoption Information Services Unit (AISU)
P.O. Box 2620
Wellington, New Zealand
Web site: www.cyf.govt.nz
E-Mail for Adoption Inquiries:
webadoption@cyf.govt.nz

Eligibility Requirements for Adoptive Parents: Adoptions in New Zealand occur under the Adoptions Act of 1955 and the Adoptions (Intercountry) Act of 1997. This legislation is available at www.legislation.co.nz. The legislation requires applicants to have attained a minimum age for one adopting parent to be at least 25 years of age, and should be 20 years older than the child. For a relative/inter-family adoption the minimum age for adopting parent is 20 years. Both married couples and single people are eligible to adopt. However, unmarried couples (whether opposite-sex or same-sex) are not permitted to jointly adopt a child in New Zealand. In addition, the Adoption act requires applicants to be "fit and proper," a term that refers to prospective adoptive parents' mental and physical health, police record and ability to provide (including financially) for a child.

Residency Requirements: As was stated above, New Zealand usually requires applicants to be permanent residents of New Zealand and to have lived in New Zealand for the last two years prior to submitting an application to adopt.

Time Frame: For local adoptions by applicants resident in New Zealand the assessment process by CYF usually takes between three and nine months. Applicants then enter a waiting pool from which they can be selected by a birth mother to parent a child. The time spent in the waiting pool can range from one month to many years and there is no guarantee that a placement will be made. A birth mother is required to sign a release of her child through a lawyer. The birth mother has absolute control over whom she selects to adopt her baby.

Once the birth mother has chosen a family, the prospective adoptive parents apply to the court and are given custody of the child. The birth mother has one month to confirm her selection of the adopting parents, then the adopting parents apply for an interim order from the Court. A final Order usually takes nine months to be approved.

It is important to note that, under U.S. law, if the New Zealand citizen birth mother selects a specific U.S. citizen as an adoptive parent, an otherwise qualified child will not be able to obtain a U.S. immigrant visa as an orphan unless the mother is the sole or surviving parent and is incapable of providing proper care.

Adoption Agencies and Attorneys: An adoption in New Zealand can only be effected through CYF. There are no licensed or accredited agencies for local adoptions. For New Zealanders adopting from other countries that are party to the Hague Adoption Convention, there are two accredited agencies that may perform certain functions. The New Zealand central authority of Child, Youth & Family Services does all assessments for intercountry adoptions by New Zealanders and must approve all placements.

Attorneys are listed in the Yellow Pages of all New Zealand city telephone directories. The U.S. Consulate General in Auckland also maintains a list of attorneys. This is available at: http://wellington.usembassy.gov/lawyerlist.html.

The list does not constitute a recommendation of any specific attorneys' services, and the Consulate General cannot make recommendations of attorneys Americans may locate privately. However, CYF may be able to supply referrals.

Adoption Fees: For local adoptions there are no charges by government agencies (CYF and Court) but applicants pay for legal representation at court and this usually costs between NZ$2000 and NZ$4000. [As of the date of this flyer, the exchange rate is approximately NZ$1.41 to US$1.]

Adoption Procedures: There are two procedures for local and intercountry adoptions. For local adoptions, prospective adoptive parents are expected to appear in court for the Interim Order hearing and are sometimes requested to be present for the Final Order. There are no special considerations/short cuts for obtaining the adoption through the local system as the process is the same for all applicants. A pitfall to avoid would be trying to influence the outcome. It is illegal to advertise for a child to adopt. It is illegal to pay money in consideration of an adoption and it is illegal to take a child into a home for the purpose of adoption without either a Social Worker Approval or an Interim Order of Adoption. Penalties for breaches of these restrictions include fines and imprisonment. All applications for adoption in New Zealand must be investigated by NZCYF and their report is submitted to the court. No private practitioners or attorneys can report to the court.

Special provisions may apply if it is an inter-family adoption and the families concerned still should apply through NZCYF. In order take such a child into the U.S. the relevant requirements of U.S. immigration law on such adoptions must be met.

Required Documents: People resident in New Zealand who wish to adopt must complete an application form including references, consent to a police check, and a medical report. In the very rare case where a United States citizen is adopting in New Zealand (e.g., a relative of a child who needs adoption and cannot be placed with a relative in New Zealand), the process will be the same as for a local New Zealand adoption.

The applicants will be assessed (including a home study) by a CYF social worker or by an American equivalent in the United States.

New Zealand Embassy
37 Observatory Circle NW
Washington DC 20008
Ph: (202) 328-4848

email:nzcg.la@verizon.net

U.S. Immigration Requirements: Prospective adoptive parents are strongly encouraged to consult USCIS publication M-249, *The Immigration of Adopted and Prospective Adoptive Children*, as well as the Department of State publication, *Intercountry Adoptions*. Please see the *Intercountry Adoption* section of this book for more details and review current reports online at http://adoption.state.gov.

Additional Information: Specific questions about adoption in New Zealand may be addressed to the U.S. Consulate General in Auckland. General questions regarding intercountry adoption may be addressed to the Office of Children's Issues, U.S. Department of State, CA/OCS/CI, SA-29, 4th Floor, 2201 C Street, NW, Washington, D.C. 20520-4818, toll-free Tel: 1-888-407-4747.

NICARAGUA

Compiled from the September 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Republic of Nicaragua

PROFILE

Geography

Area: 129,494 sq. km. (59,998 sq. mi.); slightly larger than New York State.

Cities: Capital—Managua (pop. 1 million). Other major cities—Leon, Granada, Jinotega, Matagalpa, Chinandega, Masaya.

Terrain: Extensive Atlantic coastal plains rising to central interior mountains; narrow Pacific coastal plain interrupted by volcanoes.

Climate: Tropical in lowlands; cooler in highlands.

People

Nationality: Noun and adjective—Nicaraguan(s).

Population: (2005) 5.4 million.

Annual growth rate: (2005) 1.7%. Density—42 per sq. km.

Ethnic groups: Mestizo (mixed European and indigenous) 69%, white 17%, black (Jamaican origin) 9%, indigenous 5%.

Religions: Predominantly Roman Catholic, with rapidly growing percentage of Evangelical Protestants.

Languages: Spanish (official), English and indigenous languages on Caribbean coast.

Education: Years compulsory—none enforced (28% of first graders eventually finish sixth grade). Literacy—67.5%.

Health: Life expectancy—72.9 yrs. Infant mortality rate—29/1,000.

Work force: (2004 est.) 1.9 million.

Government

Type: Republic.

Independence: 1821.

Constitution: The 1987 Sandinista-era constitution was changed in 1995 to provide for a more even distribution of power among the four branches of government and again in 2000 to increase the Supreme Court and the Controller General's Office and to make changes to the electoral laws. The changes in 2000 allowed for the president to be elected with 35% of the popular vote so long as there was at least a five percentage point difference between the first and second place candidates.

Government branches: Executive—president and vice president. Legislative—National Assembly (unicameral). Judicial—Supreme Court; subordinate appeals, district, and local courts; separate labor and administrative tribunals. Electoral—Supreme Electoral Council, responsible for organizing and holding elections.

Political subdivisions: 15 departments and two autonomous regions on the Atlantic coast; 145 municipalities.

Political parties: Sandinista National Liberation Front (FSLN); Nicaraguan Democratic Block (BDN); Nicaraguan Liberal Alliance (ALN); Liberal Constitutionalist Party (PLC); Sandinista Renewal Movement (MRS).

Suffrage: Universal at 16.

Economy

GDP: (2007) $5.7 billion.

GDP real growth rate: (2007) 3.8%.

Per capita GDP: (2007) $1,023.

Inflation rate: (2007) 16.9%.

Natural resources: arable land, fresh water, fisheries, gold, timber hydro and geothermal power potential.

Agriculture and agricultural processing: (33% of GDP): Products—corn, coffee, sugar, meat, rice, beans, bananas, beef, dairy.

Manufacturing: (11% of GDP) Types—textiles, paper and wood products, metal products petroleum refining, plastics.

Services: (51% of GDP) Types—banking, wholesale and retail distribution, telecommunications, and energy.

Construction: (5% of GDP) Types—housing and infrastructure.

Trade: (2007 est.) Normal exports—$1.202 billion (f.o.b.): coffee, seafood, beef, sugar, industrial goods, gold, bananas. Free trade zone exports—$1.088 billion, mostly textiles and

apparel, automobile wiring harnesses. Markets—United States, Central American Common Market, European Union (EU), Mexico, Japan. Imports—$3.294 billion (c.i.f.): petroleum, agricultural inputs and equipment, manufactured goods. Free trade zone imports—$783.6 million. Suppliers—Central American Common Market, United States, EU, Mexico, Venezuela, China.

PEOPLE

Most Nicaraguans are of both European and Indian ancestry, and the culture of the country reflects the Ibero-European and Indian heritage of its people. Only the Indians of the eastern half of the country remain ethnically distinct and retain tribal customs and languages. A large black minority, of Jamaican origin, is concentrated on the Caribbean coast. In the mid-1980s, the central government divided the eastern half of the country—the former department of Zelaya—into two autonomous regions and granted the people of the region limited self-rule.

Roman Catholicism is the major religion, but Evangelical Protestant groups have grown recently, and there are strong Anglican and Moravian communities on the Caribbean coast. Most Nicaraguans live in the Pacific lowlands and the adjacent interior highlands. The population is 58% urban.

HISTORY

Nicaragua takes its name from Nicarao, chief of the indigenous tribe that lived around present-day Lake Nicaragua during the late 1400s and early 1500s. In 1524, Hernandez de Cordoba founded the first Spanish permanent settlements in the region, including two of Nicaragua's principal towns: Granada on Lake Nicaragua, and Leon east of Lake Managua. Nicaragua gained independence from Spain in 1821, briefly becoming a part of the Mexican Empire and then a member of a federation of independent Central American provinces. In 1838, Nicaragua became an independent republic.

Much of Nicaragua's politics since independence has been characterized by the rivalry between the Liberal elite of Leon and the Conservative elite of Granada, which often led to civil war. Initially invited by the Liberals in 1855 to join their struggle against the Conservatives, an American named William Walker and his "filibusters" seized the presidency in 1856. The Liberals and Conservatives united to drive him out of office in 1857. Three decades of Conservative rule followed. Taking advantage of divisions within the Conservative ranks, Jose Santos Zelaya led a Liberal revolt that brought him to power in 1893. Zelaya ended a longstanding dispute with Britain over the Atlantic Coast in 1894, and reincorporated that region into Nicaragua.

By 1909, differences had developed over a trans-isthmian canal and concessions to Americans in Nicaragua; there also was concern about what was perceived as Nicaragua's destabilizing influence in the region. In 1909 the United States provided political support to Conservative-led forces rebelling against President Zelaya and intervened militarily to protect American lives and property. With the exception of a 9-month period in 1925-26, the United States maintained troops in Nicaragua from 1912 until 1933. From 1927 until 1933, U.S. Marines stationed in Nicaragua engaged in a running battle with rebel forces led by renegade Liberal Gen. Augusto Sandino, who rejected a 1927 negotiated agreement brokered by the United States to end the latest round of fighting between Liberals and Conservatives.

After the departure of U.S. troops, National Guard Commander Anastasio Somoza Garcia outmaneuvered his political opponents—including Sandino, who was assassinated by National Guard officers—and took over the presidency in 1936. Somoza and two sons who succeeded him maintained close ties with the United States. The Somoza dynasty ended in 1979 with a massive uprising led by the Sandinista National Liberation Front (FSLN), which had conducted a low scale guerrilla war against the Somoza regime since the early 1960s.

The FSLN established an authoritarian dictatorship soon after taking power. U.S.-Nicaraguan relations deteriorated rapidly as the regime nationalized many private industries, confiscated private property, supported Central American guerrilla movements, and maintained links to international terrorists. The United States suspended aid to Nicaragua in 1981. The Reagan administration provided assistance to the Nicaraguan resistance and in 1985 imposed an embargo on U.S.-Nicaraguan trade.

In response to both domestic and international pressure, the Sandinista regime entered into negotiations with the Nicaraguan resistance and agreed to nationwide elections in February 1990. In these elections, which were proclaimed free and fair by international observers, Nicaraguans elected as their President the National Opposition Union candidate, Violeta Barrios de Chamorro, widow of the slain journalist and editor of the daily newspaper La Prensa, Pedro Joaquin Chamorro.

During President Chamorro's nearly 7 years in office, her government achieved major progress toward consolidating democratic institutions, advancing national reconciliation, stabilizing the economy, privatizing state-owned enterprises, and reducing human rights violations. Despite a number of irregularities—which were due largely to logistical difficulties and a baroquely complicated electoral law—the October 20, 1996 presidential, legislative, and mayoral elections were judged free and fair by international observers and by the groundbreaking national electoral observer group Etica y Transparencia (Ethics and Transparency). This time Nicaraguans elected former Managua Mayor Arnoldo Alemán, leader of the center-right Liberal Alliance. The first transfer of power in recent Nicaraguan history from one democratically elected president to another took place on January 10, 1997, when the Alemán government

was inaugurated. Presidential and legislative elections were held in November 2001. Enrique Bolaños of the Liberal Constitutional Party was elected to the Nicaraguan presidency on November 4, 2001, defeating FSLN candidate Daniel Ortega by 14 percentage points.

The elections, characterized by international observers as free, fair and peaceful, reflected the maturing of Nicaragua's democratic institutions. During his campaign, President-elect Bolaños promised to reinvigorate the economy, create jobs, fight corruption, and support the war against terrorism. Bolaños was inaugurated on January 10, 2002. FSLN candidate Daniel Ortega won the presidential elections of November 5, 2006 with 38% of the vote, defeating a divided opposition. ALN candidate Eduardo Montealegre garnered 29%; Jose Rizo of the PLC received 26%; and MRS' Edmundo Jarquin polled fourth with 6%. Ortega was inaugurated on January 10, 2007. In early 2008 Eduardo Montealegre left the ALN and formed his own movement, Vamos con Eduardo (VCE), and ran for mayor of Managua. The VCE and PLC formed an alliance and will compete under the same banner in the November 2008 municipal elections.

GOVERNMENT AND POLITICAL CONDITIONS

Nicaragua is a constitutional democracy with executive, legislative, judicial, and electoral branches of government. In 1995, the executive and legislative branches negotiated a reform of the 1987 Sandinista constitution, which gave extensive new powers and independence to the legislature—the National Assembly—including permitting the Assembly to override a presidential veto with a simple majority vote and eliminating

the president's ability to pocket-veto a bill. Changes to the constitution in 2000 allowed for the president to be elected with 35% of the popular vote so long as there was a five percentage point difference between the first and second place candidates.

The president and the members of the unicameral National Assembly are elected to concurrent 5-year terms. The National Assembly consists of 92 total deputies (90 elected from party lists drawn at the departmental and national levels, plus the outgoing president and the candidate who finishes second in the presidential race).

The Supreme Court supervises the functioning of the still largely ineffective, often partisan, and overburdened judicial system. In 2000, as part of the PLC-FSLN pact, the number or Supreme Court justices was increased from 12 to 16. Supreme Court justices are elected to 5-year terms by the National Assembly. Led by a council of seven magistrates, the Supreme Electoral Council (CSE) is the co-equal branch of government responsible for organizing and conducting elections, plebiscites, and referendums. The magistrates and their alternates are elected to 5-year terms by the National Assembly. Constitutional changes in 2000 expanded the number of CSE magistrates from five to seven and gave the PLC and the FSLN a freer hand to name party activists to the Council, prompting allegations that both parties were politicizing electoral institutions and processes and excluding smaller political parties.

Nicaragua's constitution guarantees the freedom of speech, peaceful assembly and association, religion, and movement within the country, as well as foreign travel, emigration, and repatriation. In the run-up to the November 2008 municipal elections the government has made attempts to limit some of these rights, including limiting free and open discussion in the media and academia, and peaceful assembly. The constitution prohibits discrimination based on birth, nationality, political belief, race, gender, language, religion, opinion, national origin, and economic or social condition. All public and private sector workers, except the military, public safety workers, and police, are entitled to form and join unions of their own choosing, and they exercise this right extensively. Nearly half of Nicaragua's work force, including agricultural workers, is unionized, and most Nicaraguan unions are affiliated with either the FSLN or liberal political parties. Workers have the right to strike. Collective bargaining is becoming more common in the private sector.

Political Parties

The 2006 national elections resulted in the following distribution of the 92 seats in the National Assembly (installed January 9, 2007): FSLN—38; PLC—25; ALN—24; MRS—5. Subsequently, the political parties shuffled their composition and the make-up of the Assembly is now FSLN—38; PLC—25; BDN—15; ALN—6; MRS—3; and Independent—5.

ECONOMY

With a gross domestic product (GDP) of $5.7 billion and a per capita income of $1,023 in 2007, Nicaragua is the second-poorest country in the Western Hemisphere. From 1991 to 2006, three successive administrations focused on free market reform as the path to recovery from 12 years of economic freefall under the Sandinista regime and civil war of the 1980s. They achieved macroeconomic stability, cutting inflation from 33,500% in 1988 to 9.45% in 2006, and dramatic debt reduction through the Heavily Indebted Poor Countries Initiative, the Multilateral Debt Reduction Initiative, and a $1 billion commercial debt buyback led by the World Bank. By the end of 2007, external debt as a percentage of GDP was 59.1%, down from more than 400% in 1990. Since 1995, real economic growth averaged 4.0%. In 2006 and 2007, it came in a bit less than average, at 3.7% and 3.8%, respectively.

The pace of economic growth slowed in 2008, as growth in the agricultural sector was offset by a decrease in investment and rising wages, food prices, and energy costs. Inflation, which had been in the single digits for several years, appears on track to exceed 20% in 2008. Official unemployment was 4.9% in 2007, but most do not believe this reflects reality. Sixty percent of all workers earn a living in the informal sector, where underemployment is high and the data is not clear. In 2007, Nicaraguans received $740 million in remittances from abroad, the majority of which from the United States. This equals almost 13% of GDP. Because Nicaragua has abundant arable land

and water resources, agriculture will always be an important component of the economy. About a third of GDP revolves around agriculture, timber, and fishing. Opportunities exist in food and timber processing and preparation for export. Currently, most agriculture is small-scale and labor intensive. Livestock and dairy production have seen steady growth over the past decade and have taken the greatest advantage of free trade agreements. Many export products, especially coffee, have benefited from the recent rise in international commodity prices. Manufacturing accounts for about 11% of GDP and the construction sector another 5%. Services (banking, transportation, trade, retailing, and tourism) accounts for about half of GDP.

Social indicators for Nicaragua have improved since 1991. The current population of Nicaragua is 5.4 million; life expectancy at birth is 72.9 years. Nicaragua has steadily improved prenatal care coverage and made impressive gains in infant mortality, dropping from 52 deaths per 1,000 live births in 1991 to 29 per 1,000 in 2006. The country has successfully controlled the spread of many diseases by achieving and maintaining high vaccination coverage (85%) and introducing vaccines, for example, the MMR vaccine in 1998, the pentavalent vaccine in 1999, and the rotavirus vaccine in 2006. Since 2004, infectious disease has fallen from fourth to fifth place among the leading causes of death, with the number of such deaths down nearly 50% since 1996.

In 2007, the Minister of Education reported school enrollment as 86.5%. Nicaragua's score on the United Nations Human Development Index rose by 40% from 1990 to 2004 (from 0.496 to 0.698). Despite these statistical gains, the benefits of economic development have been uneven. Blackouts, water shortages, and high energy prices disproportionately affect the poorest in the population. Over 50% of Nicaraguans fall below the poverty line and poverty reduction, including advances in health education in rural areas, has been slow. Since taking office again in January 2007, President Daniel Ortega has maintained the legal and regulatory underpinnings of the market-based economic model of his predecessors, but has rejected what he terms the "neo-liberal economic model," and along with it capitalism and the United States, which he refers to as the imperial power. Instead, he has allied himself with the Bolivarian Alternative for the Americas (ALBA), whose other members include Bolivia, Cuba, Dominica, and Venezuela. In 2008, Ortega declared that socialism was the only path for Nicaragua if the country wanted to alleviate poverty.

Nonetheless, Nicaragua under Ortega has stayed current with its U.S.-Central America-Dominican Republic Free Trade Agreement (CAFTA-DR) obligations and signed a three-year Poverty Reduction and Growth Facility (PRGF) with the International Monetary Fund (IMF) in October 2007. As part of the IMF program, the Government of Nicaragua agreed to implement free market policies linked to targets on fiscal discipline, poverty spending, and energy regulation. The lack of transparency surrounding Venezuelan bilateral assistance, channeled through state-run enterprises rather than the official budget, has become a serious issue for the IMF and international donors. On September 10, 2008, with misgivings about fiscal transparency, the IMF released an additional $30 million to Nicaragua, the second tranche of its $110 million of its PRGF.

On April 1, 2006, CAFTA-DR entered into force for Nicaragua. Since 2005, Nicaraguan exports to the United States rose 36.3% to $1.6 billion in 2007, about 55% of all Nicaragua's exports. Textile and apparel account for three-fifths of these exports, while automobile wiring harnesses add another 10%. Other leading exports include coffee, meat, cigars, sugar, ethanol, and fresh fruit and vegetables, all of which have seen remarkable growth under CAFTA-DR. Market opportunities created by CAFTA-DR have contributed to the growing diversity of Nicaraguan exports. During the first full year of the agreement, Nicaragua shipped 274 new products to the United States. Since 2005, U.S. exports to Nicaragua rose 43.6% to $846.8 million. Other important trading partners for Nicaragua are its Central American neighbors, Mexico, and the European Union, with which it is negotiating a trade agreement as part of a Central American bloc.

Foreign investment inflows totaled $337 million in 2007, including U.S. firm Cone Denim's $100 million mill and Mexican and Spanish investment of $120 million in telecommunications infrastructure. There are over 100 companies operating in Nicaragua with some relation to a U.S. company, either wholly or partly owned subsidiaries, franchisees, or exclusive distributors of U.S. products. The largest are in energy, financial services, apparel, manufacturing, and fisheries.

Despite important protections for investment included in CAFTA-DR, the investment climate has steadily worsened since Ortega took office. President Ortega's decision to support radical regimes such as Iran and Cuba, his harsh rhetoric against the United States and capitalism, and his use of government institutions to persecute political enemies and their businesses, has had a negative effect on perceptions of country risk, which by some accounts has quadrupled since he assumed office.

Poor enforcement of property rights deters both foreign and domestic investment, especially in real estate development and tourism. Conflicting claims and weak enforcement of property rights has invited property disputes and litigation. Establishing verifiable title history is often entangled in legalities relating to the expropriation of 28,000 properties by the revolutionary government that Ortega led in the 1980s. The situation is not helped by a court system that is widely believed to be corrupt and subject to political influence. Illegal property seizures by private parties, occasionally in collaboration with corrupt municipal officials, often go unchallenged by the authorities, especially in the Atlantic regions and

interior regions of the north, where property rights are poorly defined and rule of law is weak. Foreign investor interest along the Pacific Coast has motivated some unscrupulous people to challenge ownership rights in the Departments of Rivas and Chinandega, with the hope of achieving some sort of cash settlement.

The U.S. Embassy's Economic and Commercial Section advances U.S. economic and business interests by briefing U.S. firms on opportunities and challenges to trade and investment in Nicaragua, encouraging key Nicaraguan decisionmakers to work with U.S. firms, helping to resolve problems that affect U.S. commercial interests, and working to change local economic and trade ground rules in order to afford U.S. firms a level playing field on which to compete.

FOREIGN RELATIONS

The 1990 election victory of President Violeta Chamorro placed Nicaragua in the ranks of Latin American democracies. Nicaragua pursues an independent foreign policy. A participant of the Central American Security Commission (CASC), Nicaragua also has taken a leading role in pressing for regional demilitarization and peaceful settlement of disputes within states in the region. Nicaragua has submitted two territorial disputes—one with Honduras and the other with Colombia—to the International Court at The Hague for resolution. The dispute with Honduras was resolved by The Hague in October 2007, and Presidents Ortega and Zelaya (Honduras) met on October 8, 2007 to recognize the finality of the decision. In December 2007, the Hague issued an interim decision on the Colombia-Nicaragua dispute that granted sovereignty of the San Andres archipelago to Colombia, but urged both parties to work toward a mutually satisfactory resolution regarding the surrounding waters. Also in 2007, Nicaragua, Honduras, and El Salvador reached an agreement on fishing rights in the Gulf of Fonseca. On the San Juan River there have been disagreements regarding navigational rights in the Nicaragua-Costa Rica border area. Nicaragua and Costa Rica signed a 3-year agreement in September of 2002 to defer presenting these issues before the International Court of Justice (ICJ) for resolution. After the two governments failed to reach an amicable solution, Costa Rica filed a case before the ICJ. While the case is currently pending, the two countries jointly fund community development projects in the border area. At the 1994 Summit of the Americas, Nicaragua joined six Central American neighbors in signing the Alliance for Sustainable Development, known as the Conjunta Centroamerica-USA, or CONCAUSA, to promote sustainable economic development in the region.

Nicaragua belongs to the United Nations and several specialized and related agencies, including the World Bank, the International Monetary Fund (IMF), World Trade Organization (WTO), UN Educational, Scientific, and Cultural Organization (UNESCO), World Health Organization (WHO), Food and Agriculture Organization (FAO), International Labor Organization (ILO), and UN Human Rights Commission (UNHRC). Nicaragua also is a member of the Organization of American States (OAS), the Non-aligned Movement (NAM), the International Atomic Energy Commission (IAEA), the Inter-American Development Bank (IDB), and the Central American Bank for Economic Integration (CABEI).

U.S.-NICARAGUAN RELATIONS

U.S. policy aims to continue supporting the consolidation of the democratic process initiated in Nicaragua with the 1990 election of President Chamorro. The United States has promoted national reconciliation, encouraging Nicaraguans to resolve their problems through dialogue and compromise. It recognizes as legitimate all political forces that abide by the democratic process and eschew violence. U.S. assistance is focused on strengthening democratic institutions, stimulating sustainable economic growth, and supporting the health and basic education sectors.

Section 527 of the Foreign Relations Authorization Act, Fiscal Years 1994 and 1995, prohibits U.S. assistance and support to any country in which U.S. citizens have not received adequate and effective compensation for outstanding claims against the government for confiscated property, as is the case in Nicaragua. The law provides authority to the President, which is delegated to the Secretary of State, to waive the prohibition when it is in the national interest. In July 2008, the Secretary issued the 15th waiver of the Section 527 prohibition based upon Nicaragua's progress in resolving U.S. citizen claims.

Other key U.S. policy goals for Nicaragua are:

- Improving respect for human rights and resolving outstanding high-profile human rights cases;
- Developing a free market economy with respect for property and intellectual property rights;
- Ensuring effective civilian control over defense and security policy;
- Increasing the effectiveness of Nicaragua's efforts to combat transborder crimes, including narcotics trafficking, money laundering, illegal alien smuggling, international terrorist and criminal organizations, and trafficking in persons; and
- Reforming the judicial system and implementing good governance.

Since 1990, the United States has provided over $2 billion in assistance to Nicaragua. About $489 million of that was for debt relief, and another $488 million was for balance-of-payments support. The U.S. also provided $94 million in 1999, 2000, and 2001 as part of its overall response to Hurricane Mitch. In response to Hurricane Felix, the United States pro-

vided over $15 million in direct aid to Nicaragua to support humanitarian relief and recovery operations from the damage inflicted in September 2007. Aside from funding for Hurricanes Mitch and Felix, the levels of assistance have fallen incrementally to reflect the improvements in Nicaragua. Assistance has been focused on promoting more citizen political participation, compromise, and government transparency; stimulating sustainable growth and income; and fostering better-educated and healthier families. The Millennium Challenge Corporation's 5-year, $175 million compact with the Republic of Nicaragua entered into force on May 26, 2006. The Millennium Challenge Compact will reduce poverty and spur economic growth by funding projects in the regions of León and Chinandega aimed at reducing transportation costs and improving access to markets for rural communities; increasing wages and profits from farming and related enterprises in the region; and attracting investment by strengthening property rights.

TRAVEL

Consular Information Sheet

December 22, 2008

Country Description: Nicaragua's fragile democracy remains under stress. Following municipal elections in November 2008, in which opposition leaders have charged massive fraud took place, political tensions have increased significantly. The economy remains among the poorest in the hemisphere. Crime has increased significantly in recent months.

The national language is Spanish, although many residents of the Caribbean coastal areas also speak English and indigenous languages. The climate is hot and humid, with the "summer" dry season running mid-November through mid-May and the "winter" rainy season running from mid-May through mid-November. Terrain ranges from the hilly and volcanic to coastal beaches and tropical jungles. Geological faults run throughout the country, along which active volcanoes are situated. Earthquakes are common, but the last major earthquake, which destroyed the city of Managua, occurred in 1972.

Nicaragua lacks tourist infrastructure. Except in the cities and major thoroughfares, most roads are unpaved. Public transportation is unsafe and there are no sidewalks. Most essential services are sporadic. Most hospitals are substandard. Hotels in Managua are adequate, but primarily are oriented to serve a business or government clientele. Potential tourists may want to obtain information from the National Tourism Institute (INTUR), the governmental agency responsible for developing, regulating, and promoting tourism in Nicaragua at http://www.intur.gob.ni.

Entry Requirements: A valid U.S. passport is required to enter Nicaragua. Although there is a bilateral agreement that waives the six-month validity passport requirement, U.S. citizens are urged to ensure that their passports are valid for the length of their projected stay in the country before traveling. U.S. citizens must have an onward or return ticket and evidence of sufficient funds to support themselves during their stay. A visa is not required for U.S. citizens; however, a tourist card must be purchased for $5 upon arrival. Tourist cards are typically issued for 30 to 90 days. A valid entry stamp is required to exit Nicaragua. Pay attention to the authorized stay that will be written into your entry stamp by the immigration inspector. Visitors remaining more than the authorized time must obtain an extension from Nicaraguan Immigration at http://www.migracion.gob.ni. Failure to do so will prevent departure until a fine is paid.

There is also a $32 departure tax. Many airlines include this tax in the price of the ticket. If the tax is not

included in the ticket, payment can be made at the airline counter upon departure.

Per Nicaraguan law, individuals should exit Nicaragua with the same passport with which they entered the country. Dual national minors who entered Nicaragua on their Nicaraguan passports will be subject to departure requirements specific to Nicaraguan children under the age of 18, even though they may also be citizens of other countries. More information on these requirements can be found on the U.S. Embassy web site at http://nicaragua.usembassy.gov/dual_nationality.html.

According to Nicaragua's Laws for Foreigners, foreigners must be in possession of a valid identity document at all times while in Nicaragua and may be required to show it to Nicaraguan authorities upon request. Acceptable identity documents are: (1) a permanent residency card, (2) temporary residency card, or (3) valid passport or travel document accompanied by an entry stamp.

In June 2006, Nicaragua entered a "Central America-4 (CA-4) Border Control Agreement" with Guatemala, Honduras, and El Salvador. Under the terms of the agreement, citizens of the four countries may travel freely across land borders from one of the countries to any of the others without completing entry and exit formalities at Immigration checkpoints. U.S. citizens and other eligible foreign nationals, who legally enter any of the four countries, may similarly travel among the four without obtaining additional visas or tourist entry permits for the other three countries. Immigration officials at the first port of entry determine the length of stay, up to a maximum period of 90 days. Foreign tourists who wish to remain in the four-country region beyond the period initially granted for their visit are required to request a one-time extension of stay from local Immigration authorities in the country where the traveler is physically present, or travel outside the CA-4 countries and reapply for admission to the region. Foreigners "expelled" from any of the four countries are excluded from the entire "CA-4" region. In isolated cases, the lack of clarity in the implementing details of the CA-4 Border Control Agreement has caused temporary inconvenience to some travelers and has resulted in others being fined more than one hundred dollars or detained in custody for 72 hours or longer.

For the most current information about visas to visit Nicaragua, visit the Embassy of Nicaragua web site at http://www.cancilleria.gob.ni.

Safety and Security: Municipal elections took place across Nicaragua on November 9, 2008. Violent demonstrations followed as opposition groups questioned the authenticity of the results. Activities observed during protests included but were not limited to tear gas, rubber bullets, setting off fireworks, rock-throwing, tire burning, road blocks, bus and vehicle burning, and physical violence between law enforcement and protestors and between political rivals. Political demonstrations and strikes continue to occur sporadically, are usually limited to urban areas, and occasionally become violent. U.S. citizens are advised to monitor local media reports, to avoid crowds and blockades during such occurrences and to exercise caution when in the vicinity of any large gathering.

U.S. citizens are cautioned that strong currents and undertows off sections of Nicaragua's Pacific coast have resulted in a number of incidents of drowning. Powerful waves have also resulted in broken bones, and injuries caused by sting rays are not uncommon in popular resort bathing areas. Warning signs are not posted, and lifeguards and rescue equipment are not readily available. U.S. citizens contemplating beach activities in Nicaragua's Pacific waters should exercise appropriate caution.

Hiking in volcanic or other remote areas can be dangerous and travelers should take appropriate precautions. Hikers should have appropriate dress, footwear, and sufficient consumables for any trek undertaken. Individuals who travel to remote tourist or other areas for hiking activities are encouraged to hire a local guide familiar with the terrain and area. In particular, there have been instances of hikers perishing or losing their way on the volcanoes at Ometepe Island. While they may look like easy climbs, the terrain is treacherous and heavily overgrown.

Although extensive de-mining operations have been conducted to clear rural areas of northern Nicaragua of landmines left from the civil war in the 1980s, visitors venturing off the main roads in these areas are cautioned that the possibility of encountering landmines still exists.

Domestic travel within Nicaragua by land and air, particularly to the Atlantic side can be dangerous. Domestic airlines use small airstrips with minimal safety equipment and little boarding security.

For the latest security information, Americans traveling abroad should regularly monitor the Department's Internet web site at http://travel.state.gov, where the current Worldwide Caution Travel Alert, Travel Warnings and Travel Alerts can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S. and Canada, or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: Violent crime in Managua is increasing and petty street crimes are very common. Gang activity also is increasing, though not at levels found in neighboring Central American countries. Pick-pocketing and occasional armed robberies occur on crowded buses, at bus stops and in open markets like the Oriental and Huembes Markets. Gang violence, drive-by shootings, robbery, assault and stabbings are most frequently encountered in poorer neighborhoods, including the Ticabus area, a major arrival and departure point for tourist buses. However, in recent months it spread to more upscale neighborhoods and near major hotels, including the Zona Hippos. In 2008, a U.S. citizen was critically injured in a gang-motivated drive-by shooting

that occurred in the San Judas area. Another U.S. citizen was kidnapped and left for dead in the Villa Fontana area of Managua.

U.S. citizens are increasingly targeted shortly after arriving in the country by criminals posing as Nicaraguan police officers who pull their vehicles—including those operated by reputable hotels—over for inspection. In each case, the incidents happened after dark and involved gun-wielding assailants who robbed passengers of all valuables and drove them to remote locations where they were left to fend for themselves. Some assailants employed threats of physical violence. While the traditional scene of these attacks has been the Tipitapa-Masaya Highway, this activity has recently spread to the Managua-Leon Highway. The U.S. Embassy warns U.S. citizens to exercise extreme caution when driving at night from Managua's International Airport and to avoid traveling the Tipitapa-Masaya Highway at night.

U.S. citizens should exercise caution when approached by strangers offering assistance. Several U.S. citizens traveling by bus from San Juan del Sur to Managua have reported being victimized by fellow women travelers who offered to assist them in locating and/or sharing a taxi upon arrival in Managua. In all cases, upon entering the taxi, the U.S. citizens have been held at knife-point, robbed of their valuables, and driven around to ATM machines to withdraw funds from their accounts.

Violent criminal activities and petty crime are also increasing in the tourist destination of San Juan del Sur. In 2008, a U.S. citizen family was violently assaulted and kidnapped by several armed men. Other American citizens have been the victims of armed robberies by assailants wielding machetes, knives, and/or guns along the beaches in and around San Juan del Sur. U.S. citizens should exercise particular caution when visiting the following beaches: Maderas, Marsella, Yankee, Coco, and Remanso. Police coverage is extremely sparse outside major urban areas, particularly in Nicaragua's Atlantic coast autonomous regions. Lack of adequate police coverage has resulted in these areas being used by drug traffickers and other criminal elements. Street crime and petty theft are a common problem in Puerto Cabezas, Bluefields, and the Corn Islands along the Atlantic coast.

For security reasons, the Embassy has limited travel by its staff to the North and South Atlantic Autonomous Regions (RAAN and RAAS), including the Corn Islands. Given the area's geographical isolation, the Embassy's ability to provide emergency services to U.S. citizens who choose to travel in the Caribbean costal area is constrained. Police presence on Little Corn Island is made up of volunteers with little to no formal training, and is minimal on Corn Island and other remote areas.

In late 2007, a U.S. citizen was assaulted and violently raped while on vacation in Little Corn Island. U.S. citizens have previously been the victims of sexual assault on this island and other beaches in the country. The Embassy recommends traveling in groups when in isolated areas. Single travelers should exercise special caution while traveling in the Corn Islands and other remote areas of the country.

Throughout the country, U.S. travelers should utilize hotels and guest houses that have strong security elements in place, including but not limited to rooms equipped with safes for securing valuables and travel documents and adequate access control precautions.

Visitors should avoid walking and instead use officially registered taxicabs. Radio-dispatched taxis are recommended and can be found at the International Airport and at the larger hotels. Robbery, kidnapping, and assault on passengers in taxis in Managua are increasing in frequency and violence, with passengers subjected to beating, sexual assault, stabbings, and even murder. Several U.S. citizens reported brutal attacks in taxis during 2008, particularly around the International Airport area. Before taking a taxi, make sure that it has a red license plate and that the number is legible. Select taxis carefully and note the driver's name and license number. Instruct the driver not to pick up other passengers, agree on the fare before departing, and have small bills available for payment, as taxi drivers often do not make change. Also, check that the taxi is properly labeled with the cooperativa (company) name and logo. Purse and jewelry snatchings sometimes occur at stoplights. While riding in a vehicle, windows should be closed, car doors locked, and valuables placed out of sight.

Do not resist a robbery attempt. Many criminals have weapons, and most injuries and deaths have resulted when victims have resisted. Do not hitchhike or go home with strangers, particularly from nightspots. Travel in groups of two or more persons whenever possible.

Use the same common sense while traveling in Nicaragua that you would in any high-crime area of a major U.S. city. Do not wear excessive jewelry in downtown or rural areas. Do not carry large sums of money, ATM, or credit cards that are not needed, or other valuables.

Information for Victims of Crime:
The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance.

The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, contact family members or friends and explain how funds could be transferred.

Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

Medical Facilities and Health Information: Medical care is very limited, particularly outside Managua. Basic medical services are available in Managua and in many of the smaller towns and villages. However, treatment for many serious medical problems is either unavailable or available only in Managua. Emergency ambulance services, as well as certain types of medical equipment, medications and treatments, are not available in Nicaragua. Physicians and hospital personnel frequently do not speak English, and medical reports are written in Spanish. Patients must have good understand and an ability to speak Spanish in order to navigate the local medical resources.

In an emergency, individuals are taken to the nearest hospital that will accept a patient. This is usually a public hospital unless the individual or someone acting on their behalf indicates that they can pay for a private hospital. Payment for medical services is typically done on a cash basis, although the few private hospitals will accept major credit cards for payment. U.S. health insurance plans are not accepted in Nicaragua.

Dengue fever is endemic in Nicaragua. Currently, no vaccine or specific medication is available to prevent or treat Dengue fever. Malaria is endemic in the Atlantic coast region and anti-malarial medication should be taken before and after travel to this region. Travelers are advised to take a prophylactic regimen best suited to their health profile. No prophylaxis anti-malarial medication is required for Managua and the western, Pacific coast region. For both Dengue fever and malaria, the best prevention is the use of DEET insect repellant, as well as the wearing of protective clothing and bed-nets to prevent mosquito bites.

Tap water is not considered safe in Nicaragua. All persons should drink only bottled water.

Individuals traveling to Nicaragua should ensure that all their routine vaccinations are up to date. Vaccination against Hepatitis A, Hepatitis B, rabies and typhoid is strongly recommended. A yellow fever vaccination is not required to enter Nicaragua unless the traveler has recently visited a country where yellow fever is endemic. Travelers taking prescription medications should bring an adequate supply with them when coming to Nicaragua. Many newer combination medications are not available in local pharmacies.

The U.S. Department of State is unaware of any HIV/AIDS entry restrictions for visitors to or foreign residents of Nicaragua.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's Internet site at http://wwwn.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith/en.

Medical Insurance: The Department of State strongly urges U.S. citizens to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: Driving in Nicaragua poses many difficulties and risks, including mandatory arrest for drivers involved in accidents that result in death or serious injury until police are able to determine who is at fault.

Driving is on the right side of the road in Nicaragua. Motorists driving to Nicaragua should use the principal highways and official border crossings at Guasaule, El Espino, and Las Manos between Nicaragua and Honduras and Penas Blancas between Nicaragua and Costa Rica. Although some of the principal highways connecting the major cities are in generally good condition, drivers should be aware that seasonal, torrential rains take a heavy toll on road beds. With few exceptions, secondary roads are in poor repair, potholed, poorly lit, frequently narrow, and lack shoulders. Road travel after dark is especially hazardous in all areas of the country. Motorists are encouraged to prepare accordingly and may want to carry a cellular phone in case of an emergency.

Some of the major highways and roads are undergoing major repair, repaving, and upgrading. Be on the lookout for detours and slow traffic on these roads. In general, road signs are poor to non-existent. Bicycles, oxcarts, dogs, horses, and vehicles without lights are at times encountered even on main thoroughfares in Nicaragua. Motorcycles, often carrying passengers, dart in and out of traffic with little or no warning. Many vehicles are in poor condition, travel very slowly, and break down without warning. Drivers should be especially careful on curves and hills, as many drivers will pass on blind spots. Speed limits vary depending on the type of road, but because the government lacks the resources, traffic rules are rarely enforced.

Due to the age and disrepair of many vehicles, many drivers will not signal their intentions using turn indicators. Rather, it is common for a vehicle operator to stick his hand out the window to signal a turn. If you do drive in Nicaragua, you need to exercise the utmost caution, drive defensively, and make sure you have insurance.

Nicaraguan law requires that a driver be taken into custody for driving under the influence or being involved in an accident that caused serious injury or death, even if the driver is insured and appears not to have been at fault. The minimum detention period is 48 hours; however, detentions frequently last until a judicial decision is reached (often weeks or months), or until a waiver is signed by the injured party (usually as the result of a cash settlement). Visitors to Nicaragua might want to

consider hiring a professional driver during their stay. Licensed drivers who are familiar with local roads can be hired through local car rental agencies. In case of accident, only the driver will be taken into custody.

The Embassy has received an increasing number of complaints from U.S. citizens who have been stopped by transit police authorities demanding bribes in order to avoid paying fines. Motorists in rental cars and those whose cars have foreign license plates are more likely to be stopped by transit police. Transit police have seized driver licenses and car registration documents from motorists who refuse to or are unable to pay. Subsequently, these drivers have reported difficulties in recovering the seized documents. U.S. citizens are urged to ensure that their vehicles comply fully with Nicaraguan transit regulations, including being in possession of an emergency triangle and fire extinguisher, and that the vehicle is properly registered. If transit police authorities demand an on-the-spot payment, drivers should ask for the officer's name and badge number, as well as a receipt, and inform the Embassy of when/where the event took place. (Reports should be sent via email to ACS.Managua@state.gov.) Rental car agencies should also be advised if their vehicles have been deemed negligent in meeting Nicaraguan transit regulations.

As noted in the "Crime" section above, several groups of U.S. citizens driving from Managua's International Airport at night have been robbed and kidnapped by men dressed as Nicaraguan police officers. While the majority of these crimes have occurred on the Tipitapa-Masaya Highway, recent reports indicate similar activity along the Managua-Leon Highway. The U.S. Embassy warns U.S. citizens to exercise extreme caution when driving at night from Managua's International Airport and to avoid traveling the Tipitapa-Masaya Highway at night.

Avoid taking public transportation buses. They are overcrowded, unsafe, and often are used by pickpockets. Because of the conditions discussed above, traffic accidents often result in serious injury or death. This is most often true when heavy vehicles, such as buses or trucks, are involved. Traditionally, vehicles involved in accidents in Nicaragua are not moved (even to clear traffic), until authorized by a police officer. Drivers who violate this norm may be held legally liable for the accident.

Regulations governing transit are administered by the National Police. For specific information concerning Nicaraguan driver's permits, vehicle inspection, road tax, and mandatory insurance, you may wish to refer to the National Police web site at http://www.policia.gob.ni. You may also contact the Embassy of Nicaragua or a Consulate for further information.

Visit the website of the country's national tourist office and national authority responsible for road safety at http://www.mti.gob.ni.

Aviation Safety Oversight: The U.S. Federal Aviation Administration (FAA) has assessed the Government of Nicaragua's Civil Aviation Authority as not being in compliance with International Civil Aviation Organization (ICAO) aviation safety standards for the oversight of Nicaragua's air carrier operations. For more information, travelers may visit the FAA's Internet web site at http://www.faa.gov.

Purchasing Property: U.S. citizens should be aware of the risks of purchasing real estate in Nicaragua and should exercise caution before committing to invest in property. The U.S. Embassy has seen an increase in property disputes over the last several years. The 1979-90 Sandinista government expropriated approximately 28,000 real properties, many of which are still involved in disputes or claims. Land title remains unclear in many cases. Although the government has resolved several thousand claims by U.S. citizens for compensation or return of properties, there remain hundreds of unresolved claims registered with the Embassy. Potential investors should engage competent local legal representation and investigate their purchases thoroughly in order to reduce the possibility of property disputes.

The Nicaraguan judicial system offers little relief when the purchase of a property winds up in court. The Embassy is aware of numerous cases in which buyers purchase property supported by what appear to be legal titles only to see themselves subsequently embroiled in legal battles when the titles are contested by an affected or otherwise interested third party. Once a property dispute enters the judicial arena, the outcome may be subject to corruption, political pressure, and influence peddling. Many coastal properties have been tied up in courts recently, leaving the "buyer" unable to proceed with the intended development pending lengthy and uncertain litigation. In other cases squatters have simply invaded the land while the police or judicial authorities are unable (or unwilling) to remove the trespassers. Again, the Embassy advises that those interested in purchasing Nicaraguan property exercise extreme caution.

Please note that Nicaraguan law currently prohibits any individual from buying beach-front property (including islands) unless the original land title was registered before the 1917 Nicaraguan Agrarian Reform Law. Coastal properties with titles predating 1917 are not risk-free, however. In 1987 the Nicaraguan Constitution established the property rights of indigenous communities over territory they have traditionally occupied. The Embassy advises extreme caution when considering the purchase of coastal property in Nicaragua.

Currency and Credit Cards: U.S. dollars are widely accepted throughout the country, and major credit cards are also typically accepted in hotels, restaurants, stores, and other businesses in urban and tourist areas. Visitors who need to change dollars are encouraged to do this at their hotel since this is typically the safest place. ATM machines are available at banks in addition to some shopping centers and gas stations in urban and tourist areas.

However, individuals should exercise caution when using an automatict-eller machine since they are typically in or near uncontrolled areas and criminal elements can easily see them withdrawing cash. Traveler's checks are accepted at a few major hotels and may also be exchanged for local currency at authorized exchange facilities ("casas de cambio"). Visitors will also find enterprising individuals - "Cambistas" - waving wads of cash in the street. Changing money in this fashion can be dangerous and is not recommended.

The U.S. Embassy has noted an increase in credit card fraud. Although local police authorities have made several arrests in conjunction with credit card scam operations, the danger for abuse continues. Illegal use can include "skimming" or making a copy of the magnetic strip on the credit card or simply copying the number for later use. U.S. citizens who do continue to use credit cards in Nicaragua are advised to check statements frequently to monitor for abuse and/or to ask banks to email them when transactions exceed a certain number or size.

Disaster Preparedness: Nicaragua is prone to a wide variety of natural disasters, including earthquakes, hurricanes, and volcanic eruptions. General information about natural disaster preparedness is available via the Internet from the U.S. Federal Emergency Management Agency (FEMA) at http://www.fema.gov.

Boundary Disputes: On the Atlantic side, nautical travelers should be aware that there is an ongoing boundary dispute with Colombia over the San Andres Island archipelago and the surrounding waters, specifically the area east of the 82nd and up to the 79th meridian. Furthermore, the Government of Nicaragua has also begun to exercise sovereignty over territorial waters that were formerly controlled by Honduras but recently awarded to Nicaragua by the International Court of Justice. Since October 2007, the Nicaraguan Navy has impounded about a dozen vessels, including two U.S.-owned vessels, for allegedly fishing without a Nicaraguan permit in theses zones. Maritime boundary disputes also exist on the Pacific side. In late-2007, the governments of Nicaragua, Honduras, and El Salvador reached an accord regarding shared fishing rights in the Gulf of Fonseca; however, questions remain regarding boundary demarcations in the Gulf of Fonseca. Commercial fishing vessels should always ensure that they are properly licensed as problems have been reported in the areas off Cabo Gracias a Dios. As a result of these disputes, in June 2008, the U.S. Coast Guard published a Special Warning on Nicaragua in the U.S. Notice to Mariners, which can be found at http://www.navcen.uscg.gov/Lnm/d1/lnm01242008.pdf.

Travelers should also be aware that narcotics traffickers often use both the Caribbean and the Pacific coastal waters.

Customs Regulations: Before excavating archaeological materials, or agreeing to buy artifacts of historical value, all persons are strongly urged to consult with the National Patrimony Directorate of the Nicaraguan Institute of Culture. Nicaraguan law and a bilateral accord limit the acquisition, importation into the United States and commercialization of said goods. Severe criminal penalties may apply.

U.S. citizens planning to stay in Nicaragua for an extended period of time with the intention of bringing vehicles or household goods into the country should consult Nicaraguan customs officials prior to shipment.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating Nicaraguan laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Nicaragua are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States. The judicial system is subject to corruption and political influence.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: U.S. citizens living or traveling in Nicaragua are encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration web site so that they can obtain updated information on travel and security within Nicaragua. U.S. citizens without Internet access may register directly with the nearest U.S. Embassy or Consulate. By registering, U.S. citizens make it easier for the Embassy or Consulate to contact them in case of emergency.

The U.S. Embassy is located Kilometer 4 1/2 (4.5) Carretera Sur, Managua; telephone (505) 266-6010 or 268-0123; after hours telephone (505) 266-6038; Consular Section fax (505) 266-9943; E-mail: consularmanagua@state.gov; online: http://managua.usembassy.gov.

Intercountry Adoption

November 2008

The information in this section has been edited from a report available through the U.S. Department of State Office of Children's Issues. For more information detailed, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Nicaragua is not party to The Hague Convention on Protection of Children and Co-operation in Respect of Intercountry Adoption (Hague Adoption Convention). Nicaraguan law does

not allow for a Nicaraguan child to travel to the United States to be adopted. Therefore, prospective adoptive parents must obtain a full and final adoption under Nicaraguan law before the child can immigrate to the United States. Prospective adoptive parents can expect a lengthy process to adopt a child in Nicaragua.

Who Can Adopt? To bring an adopted child to United States from Nicaragua, you must be found eligible to adopt by the United States Government. For detailed information on these requirements for adoption, please review the *Intercountry Adoption* section of this publication and visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

In addition to the United States requirements for prospective adoptive parents, Nicaragua also has the following eligibility requirements for prospective adoptive parents.

Residency Requirements: Prospective adoptive parents must either be Nicaraguan citizens or have a permanent residence in Nicaragua and plan to remain in Nicaragua until the child reaches 21 years of age. In the cases of United States citizens with an approved I-600 or I-600A, however, this residency requirement is typically waived.

Age Requirements: officially, prospective adoptive parents must be between 25 and 40 years of age. However, the Ministry of Family has been somewhat flexible on this requirement on a case-by-case basis.

Marriage Requirements: Both single and married couples are eligible to adopt.

Who Can Be Adopted? Nicaragua has specific requirements that a child must meet in order to be eligible for adoption. In addition to these requirements, a child must meet the definition of an orphan under United States law for you to bring him or her home back to the United States. Learn more about United States immigration requirements.

Nicaragua's Adoption Authority: Mi Familia (Ministry of Family)

The Process: The first step in adopting a child from Nicaragua is usually to select a licensed agency in the United States that can help with your adoption. Adoption service providers must be licensed by the United States state in which they operate. Learn more about choosing the right agency.

Prospective adoptive parents must work directly with the Ministry of Family until the final stage of the adoption. Once the Ministry of Family authorizes the adoption, the prospective adoptive parents may hire a Nicaraguan attorney to complete the adoption procedures. To bring an adopted child from Nicaragua to the United States, you must apply to be found eligible to adopt (Form I-600A) by the USCIS. The Ministry of Family will verify that the prospective adoptive parent(s) has/have been approved by USCIS to adopt a child from abroad and that they have translated and notarized copies of the home study conducted in the United States.

If you are eligible to adopt, and a child is available for intercountry adoption, the central adoption authority in Nicaragua will place you on a waiting list until a child is identified. It is important to note that the Ministry of Family will go through a number of steps to ensure that the child has been abandoned and that no biological family members are willing to take in the child. During this time, you will remain on the waiting list pending further processing even if you have already selected a specific child. The Ministry of Family will then provide you with a referral to a child. The child must be eligible to be adopted according to Nicaragua's requirements. The child must also meet the definition of an orphan under United States immigration law.

Role of the Adoption Authority: Once all the data is evaluated and necessary investigations performed, the case is presented to the Ministry of Family's adoption advisory council for a final decision on the adoption. Either the adoptive parent(s) or their lawyer should be present for these proceedings.

Role of the Court: Once the Ministry of Family approves the adoption, the decision is then sent to a judge to formally order the decision. The judge has the authority to deny a case when there is a concern for the child's welfare. These are exceptionally rare cases, with only one case denied in the last ten years. The Nicaraguan court issues the final adoption decree.

Role of Adoption Agencies: Prospective adoptive parents must work directly with the Ministry of Family until the final stage of the adoption. Once the Ministry of Family authorizes the adoption, the prospective adoptive parents may hire a Nicaraguan attorney to complete the adoption procedures. This may be advisable due to the complexity of the Nicaraguan legal system. A list of attorneys is available from the United States Embassy in Managua.

Adoption Application: The prospective adoptive parents should file the application with the Ministry of Family.

Time Frame: A Nicaraguan adoption takes anywhere from six months to one year, and in some cases even longer, to complete.

Adoption Fees: The Ministry of Family does not charge fees for adoptions. Typical charges will be legal fees and fees for obtaining notarized legal documents. The legal fees generally range from $1,200 to $1,500 USD.

Documents Required: The following is a list of documents required for adoptions in Nicaragua:

- Original authenticated notice of approval (I-171H) issued by USCIS;
- Home study (I-600A fulfills this requirement);
- Psychological evaluation by a United States-based adoption agency;

- Birth certificate of prospective adoptive parent(s);
- Marriage certificate of prospective adoptive parents (if applicable);
- Letter of employment for the prospective adoptive parent(s);
- Unites States police record (FBI fingerprints fulfill this requirement);
- Medical examination of adoptive parent (s);
- Two 2" x 2" color photographs of the prospective adoptive parent(s) with a white background; and
- Letter from a United States-based adoption agency indicating that it will follow-up with the case in the United States once the adoption has been completed in Nicaragua. The Nicaraguan Ministry of Family requires a United States-based adoption agency to conduct at least two family visits during the first year after the adoption and to report on the welfare of the child.

For updates on document requirements and information on how to authenticate documents, visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

Bringing Your Child Home: Once your adoption is complete (or you have obtained legal custody of the child), there are a few more steps to take before you can head home. Specifically, you need to apply for several documents for your child before he or she can travel to the United States, such as a birth certificate, a passport or travel document for your child from the country in which he or she was born, and a U.S. Immigration Visa.

For detailed and updated information on how to obtain these documents, review the *Intercountry Adoption* section on this publication and visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

Child Citizenship Act: For adoptions finalized abroad: The Child Citizenship Act of 2000 allows your new child to acquire American citizenship automatically when he or she enters the United States as lawful permanent residents.

The Child Citizenship Act of 2000 allows your new child to acquire American citizenship automatically when the court in the United States issues the final adoption decree. To learn more, review the *Intercountry Adoption* section on this publication and visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

After Adoption: The Nicaraguan Ministry of Family requires a United States-based adoption agency to conduct at least two family visits during the first year after adoption and to report on the welfare of the child. These reports need to be sent directly to the Ministry of Family (Consejo de Adopción).

NIGER

Compiled from the September 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Republic of Niger

PROFILE

Geography

Area: 1,267,000 sq. km (490,000 sq. mi.); about three times the size of California.
Cities: Capital—Niamey (pop. approx. 1 million). Other cities—Tahoua, Konni, Maradi, Zinder, Diffa, Dosso, Arlit, and Agadez.
Terrain: About two-thirds desert and mountains, one-third savanna.
Climate: Hot, dry, and dusty. Rainy season June–September.

People

Nationality: Noun and Adjective—Nigerien(s).
Population: (2007 est.) 14,853,000.
Annual growth rate: (2005) 3.3%.
Ethnic groups: Hausa 53%, Djerma (Zarma) 21%, Fulani 7%, Tuareg 11%, Beri Beri (Kanuri) 6%; Arab, Toubou, and Gourmantche 2%.
Religions: Islam (99%); remainder traditional and Christian.
Languages: French (official), Hausa, Djerma, Fulfulde, Kanuri, Tamachek, Toubou, Gourmantche, Arabic.
Education: Years compulsory—6. Attendance—45% (men), 31% (women). Literacy (2005)—28.7% (15% for women).
Health: Infant mortality rate—150/1,000. Life expectancy—54.5 yrs.

Government

Type: Republic.
Independence: August 3, 1960.
Constitution: The constitution of December 26, 1992 was revised by national referendum on May 12, 1996 and again by referendum on July 18, 1999.
Government branches: Executive—president and prime minister. Legislative—unicameral National Assembly (113 MPs). Judicial—Constitutional Court, Supreme Court, Court of Appeals, High Court of Justice.
Political parties: Seven are represented in the National Assembly.
Suffrage: The constitution provides for universal suffrage for Nigeriens age 18 or older.
Political subdivisions: Eight regions subdivided into 36 districts (departments) and 265 communes (local councils).

Economy

GDP: (2006) $3.54 billion.
Annual growth rate: (2006) 4.8%.
Per capita GDP: (2006) $273.
Avg. inflation rate: (2006) 0.1%.
Natural resources: Uranium, gold, oil, coal, iron, tin, and phosphates.
Agriculture: (27.9% of GDP) Products—millet, sorghum, cowpeas, peanuts, cotton, and rice.
Industry: (10.5% of GDP) Types—textiles, cement, soap, and beverages.
Trade: (2006) Exports (freight on board—f.o.b.)—$275 million. Types—uranium, livestock, gold, cowpeas, and onions. Major markets—France 34.8%, Nigeria 16.7%, Japan 13.3%, Spain 9.5%, U.S. 0.3%. Imports (f.o.b.)—$792 million. Types—consumer goods, petroleum, foodstuffs, and industrial products. Major suppliers—France 16.3%, China 13.1%, U.S. 7.1%, Nigeria 6.6%, Cote d'Ivoire 6.3%, India 4.7%, Japan 3.9%.

PEOPLE

The largest ethnic groups in Niger are the Hausa, who also constitute the major ethnic group in northern Nigeria, and the Djerma-Songhai, who also are found in parts of Mali. Both groups, along with the Gourmantche, are sedentary farmers who live in the arable, southern tier of the country. The remainder of Nigeriens are nomadic or semi-nomadic livestock-raising peoples—Fulani, Tuareg, Kanuri, Arabs, and Toubou. With rapidly growing populations and the consequent competition for meager natural resources, lifestyles of agriculturalists and livestock herders are increasingly threatened.

Niger's high infant mortality rate is comparable to levels recorded in neighboring countries. However, the child mortality rate (deaths among

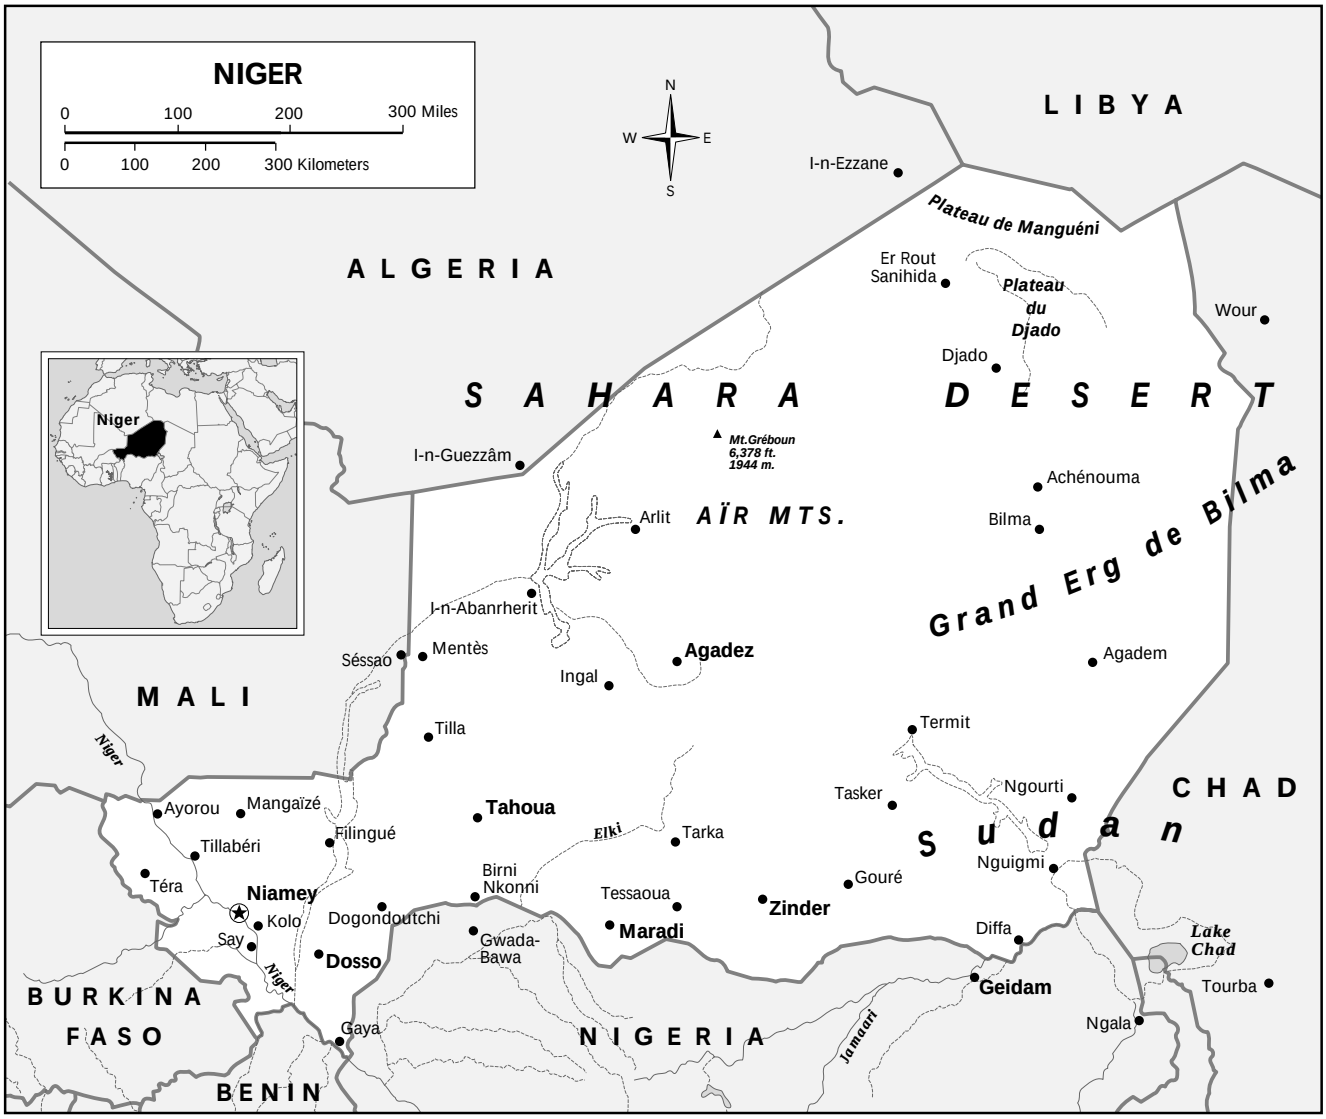
children under age of 5) is particularly high (198 per 1,000) due to generally poor health conditions and inadequate nutrition for most of the country's children. Nonetheless, Niger's fertility rate (7.8 births/woman), is among the highest in the world, and is far higher than the sub-Saharan African average of 5.4. Two-thirds (66.7%) of the Nigerien population is under age 25. Primary school net enrollment rate is 49% for boys and 31% for girls. Additional education occurs through thousands of Koranic schools.

HISTORY

Considerable evidence indicates that about 600,000 years ago, humans inhabited what has since become the desolate Sahara of northern Niger. Long before the arrival of French influence and control in the area, Niger was an important economic crossroads, and the empires of Songhai, Mali, Gao, Kanem, and Bornu, as well as a number of Hausa states, claimed control over portions of the area.

During recent centuries, the nomadic Tuareg formed large confederations, pushed southward, and, siding with various Hausa states, clashed with the Fulani Empire of Sokoto, which had gained control of much of the Hausa territory in the late 18th century.

In the 19th century, contact with the West began when the first European explorers—notably Mungo Park (British) and Heinrich Barth (German)—explored the area searching for the mouth of the Niger River. Although French efforts at pacification began before 1900, dissident ethnic groups, especially the desert Tuareg, were not subdued until 1922, when Niger became a French colony.



Niger's colonial history and development parallel that of other French West African territories. France administered its West African colonies through a governor general at Dakar, Senegal, and governors in the individual territories, including Niger. In addition to conferring French citizenship on the inhabitants of the territories, the 1946 French constitution provided for decentralization of power and limited participation in political life for local advisory assemblies.

A further revision in the organization of overseas territories occurred with the passage of the Overseas Reform Act (Loi Cadre) of July 23, 1956, followed by reorganization measures enacted by the French Parliament early in 1957. In addition to removing voting inequalities, these laws provided for creation of governmental organs, assuring individual territories a large measure of self-government. After the establishment of the Fifth French Republic on December 4, 1958, Niger became an autonomous state within the French Community. Following full independence on August 3, 1960, however, membership was allowed to lapse.

For its first 14 years as an independent state, Niger was run by a single-party civilian regime under the presidency of Hamani Diori. In 1974, a combination of devastating drought and accusations of rampant corruption resulted in a military coup that overthrew the Diori regime. Lieutenant Colonel Seyni Kountche and a small group of military ruled the country until Kountche's death in 1987. He was succeeded by his Chief of Staff, Brigadier General Ali Saibou, who released political prisoners, liberalized some of Niger's laws and policies, and promulgated a new constitution. However, President Saibou's efforts to control political reforms failed in the face of union and student demands to institute a multiparty democratic system. The Saibou regime acquiesced to these demands by the end of 1990. New political parties and civic associations sprang up, and a national conference was convened in July 1991 to prepare the way for the adoption of a new constitution and the holding of free and fair elections. The debate was often contentious and accusatory, but under the leadership of Prof. Andre Salifou, the conference developed consensus on the modalities of a transition government. A transition government was installed in November 1991 to manage the affairs of state until the institutions of the Third Republic were put into place in April 1993. While the economy deteriorated over the course of the transition, certain accomplishments stand out, including the successful conduct of a constitutional referendum; the adoption of key legislation such as the electoral and rural codes; and the holding of several free, fair, and nonviolent nationwide elections. Freedom of the press flourished with the appearance of several new independent newspapers.

Rivalries within a ruling coalition elected in 1993 led to governmental paralysis, which provided Col. Ibrahim Baré Maïnassara a rationale to overthrow the Third Republic and its President, Mahamane Ousmane, in January 1996. While leading a military authority that ran the government (Conseil de Salut National) during a 6-month transition period, Bare enlisted specialists to draft a new constitution for a Fourth Republic announced in May 1996. After dissolving the national electoral committee, Bare organized and won a flawed presidential election in July 1996 and his party won 90% of parliament seats in a flawed legislative election in November 1996. When his efforts to justify his coup and subsequent questionable elections failed to convince donors to restore multilateral and bilateral economic assistance, a desperate Bare ignored an international embargo against Libya and sought Libyan funds to aid Niger's economy. In repeated violations of basic civil liberties by the regime, opposition leaders were imprisoned; journalists often arrested, beaten, and deported by an unofficial militia composed of police and military; and independent media offices were looted and burned with impunity.

In the culmination of an initiative started under the 1991 national conference, however, the government signed peace accords in April 1995

with all Tuareg and Toubou groups that had been in rebellion since 1990, claiming they lacked attention and resources from the central government. The government agreed to absorb some former rebels into the military and, with French assistance, help others return to a productive civilian life.

In April 1999, Bare was overthrown and assassinated in a coup led by Maj. Daouda Mallam Wanke, who established a transitional National Reconciliation Council to oversee the drafting of a constitution for a Fifth Republic with a French style semi-presidential system. In votes that international observers found to be generally free and fair, the Nigerien electorate approved the new constitution in July 1999 and held legislative and presidential elections in October and November 1999. Heading a coalition of the National Movement for a Developing Society (MNSD) and the Democratic and Social Convention (CDS), Mamadou Tandja won the presidency.

In July 2004, Niger held municipal elections nationwide as part of its decentralization process. Some 3,700 people were elected to new local governments in 265 newly established communes. The ruling MNSD party won more positions than any other political party; however, opposition parties made significant gains.

In November and December 2004, Niger held presidential and legislative elections. Mamadou Tandja was elected to his second 5-year presidential term with 65% of the vote in an election that international observers called generally free and fair. This was the first presidential election with a democratically elected incumbent and a test to Niger's young democracy.

In the 2004 legislative elections, the National Movement for the Development of Society (MNSD), the Democratic and Socialist Convention (CDS), the Rally for Social Democracy (RSD), the Rally for Democracy and Progress (RDP), the Nigerien Alliance for Democracy and Progress

(ANDP), and the Social Party for Nigerien Democracy (PSDN) coalition, which backed Tandja, won 88 of the 113 seats in the National Assembly.

A previously unknown group, the Mouvement des Nigeriens pour la Justice (MNJ), emerged in February 2007. The predominantly Tuareg group has issued a number of demands, mainly related to development in the north. It has attacked military and other facilities and laid landmines in the north. The resulting insecurity has devastated Niger's tourist industry and deterred investment in mining and oil. The government has labeled the MNJ criminals and traffickers, and refuses to negotiate with the group until it disarms.

GOVERNMENT AND POLITICAL CONDITIONS

Niger's new constitution was approved in July 1999. It restored the semi-presidential system of government of the December 1992 constitution (Third Republic) in which the president of the republic, elected by universal suffrage for a 5-year term, and a prime minister named by the president share executive power. As a reflection of Niger's increasing population, the unicameral legislature was expanded in 2004 to 113 deputies elected for a 5-year term under a proportional system of representation. Political parties must attain at least 5% of the vote in order to gain a seat in the legislature.

Niger's independent judicial system is composed of four higher courts—the Court of Appeals, the Supreme Court, the High Court of Justice, and the Constitutional Court. In January 2007, the National Assembly voted to divide the Supreme Court into three high courts—an Administrative Court, a Supreme Court of Justice, and an Audit Court. The constitution also provides for the popular election of municipal and local officials, and the first-ever successful municipal elections took place July 24, 2004. The National Assembly passed in June 2002 a series of decentralization bills. As a first step, administrative powers have been distributed among 265 communes (local councils); in later stages, regions and departments will be established as decentralized entities. A new electoral code was adopted to reflect the decentralization context. The country is currently divided into 8 regions, which are subdivided into 36 districts (departments). The chief administrators in each region (Governor) and department (Prefect) are appointed by the government and function primarily as the local agents of the central authorities.

The current legislature elected in December 2004 contains seven political parties. President Mamadou Tandja was re-elected in December 2004 and reappointed Hama Amadou as Prime Minister. Mahamane Ousmane, the head of the CDS, was re-elected President of the National Assembly (parliament) by his peers. The new second term government of the Fifth Republic took office on December 30, 2004. In May 2007, Hama Amadou stepped down as Prime Minister following a vote of no confidence by the National Assembly related to allegations of his involvement in a corruption scandal, and President Tandja appointed Seini Oumarou Prime Minister as head of a new cabinet.

Principal Government Officials

Last Updated: 11/12/08

Pres.: **Mamadou TANDJA**
Prime Min.: **Seine OUMAROU**
Min. of Agricultural Development: **Moussa LABO**
Min. of African Integration & Nigeriens Abroad: **Saidou HACHIMOU**
Min. of Animal Resources: **Issiat KATO**
Min. of Basic Education & Literacy: **Ousame SAMBA**
Min. of Civil Service & Labor: **Kanda SIPTEY**
Min. of Commerce & Aviation: **Kindo HAMNI**
Min. of Commerce, Industry, & Standardization: **Halidou BADJ**
Min. of Community Development: **Saad SOULEY**
Min. of Culture, Arts, & Communication: **Oumarou HADARI**
Min. of Defense: **Djida HAMADOU**
Min. of Economy & Finance: **Ali Zeine LAMINE**
Min. of the Environment & the Fight Against Desertification: **Mohamed AKOTEY**
Min. of Equipment: **Omar SEYNI**
Min. of Foreign Affairs: **Aichatou MINDAOUDOU**
Min. of Health & Disease Control: **Issa LAMINE**
Min. of Interior & Decentralization: **Albade ABOUBA**
Min. of Justice: **Dagra MAMADOU**
Min. of Mining & Energy: **Abdoulahi MOHAMED**
Min. of Population & Social Work: **Mamadou Zilla BOUKARI**
Min. of Privatization & Enterprise Restructuring: **Lawali Rahamatou GAZOBI**
Min. of Professional & Technical Training: **Maizama HADIZA**
Min. of Relations With Govt. Institutions: **Salifou Madou KELZOU**
Min. of Religious Affairs & Humanitarian Action: **Labo ISSAKA**
Min. of Secondary & Higher Education, Research, & Technology: **Sidikou OUMAROU**
Min. of Territorial Management & Community Development: **Moussa MAMANE**
Min. of Tourism & Handicrafts: **Amadou Aissa SIDDO**
Min. of Transport: **Souleymane KANE**
Min. of Urban Development, Housing, & Land Registry: **Aissa Abdoulaye DIALLO**
Min. of Water Resources, Environment, & Desertification Control: **Tassiou AMINOU**
Min. of Women's Promotion & Child Protection: **Barry BIBATA**
Min. of Young Business People's Promotion & Public Companies: **Salou GOBI**
Min. of Youth, Sports, & Francophonie Games: **Seydou ABDOURAHAMANIE**
Ambassador to the US: **Aminata Djibrilla Maiga TOURE**
Permanent Representative to the UN, New York: **Aboubacar Ibrahim ABANI**

Next Elections Scheduled

Presidential elections—November/December 2009, two rounds; no date selected.

Legislative elections—December 2009; no date selected.

Local elections—Not scheduled, but expected in late 2008 or in 2009. Last local election was in July 2004.

ECONOMY

One of the poorest countries in the world, ranking last on the United Nations Human Development Index, Niger's economy is based largely on subsistence crops, livestock, and some of the world's largest uranium deposits. Traditional subsistence farming, herding, small trading, seasonal migration, and informal markets dominate an economy that generates few formal sector jobs.

Niger's agricultural and livestock sectors are the mainstay of all but 20% of the population. Fourteen percent of Niger's GDP is generated by livestock production—camels, goats, sheep, and cattle—said to support 29% of the population. The 15% of Niger's land that is arable is found mainly along its southern border with Nigeria. Rainfall varies and when insufficient, Niger has difficulty feeding its population and must rely on grain purchases and food aid to meet food requirements. In 2004 localized drought and locust infestations contributed to a drop in global harvests of 11% and led the Embassy to make a disaster declaration. This decrease, combined with chronic structural food insecurity, high malnutrition, and other market factors, triggered a food crisis which began in May-June of 2005. Although food security continues to be a concern, the food crisis has ended as a result of good cereal harvests in 2005, 2006, and 2007. Millet and sorghum are Niger's principal rain-fed subsistence crops. Cowpeas and onions are grown for commercial export, as are limited quantities of garlic, peppers, gum arabic, and sesame seeds.

In 2006, foreign exchange earnings from livestock (14.7%) were second only to those from uranium (55.4%), followed by gold (13.6%) and agricultural products (9.9%). Actual livestock exports far exceed official statistics, which often fail to detect large herds of animals informally crossing into Nigeria. Some hides and skins are exported, and some are transformed into handicrafts.

Recent global price increases have led to higher revenues for Niger's uranium sector, which provides approximately 55.4% of national export proceeds. The nation enjoyed substantial export earnings and rapid economic growth during the 1960s and 1970s; however, when the uranium-led boom ended in the early 1980s the economy stagnated. The French nuclear power concern AREVA owns controlling shares in Niger's two national mining companies. As a result of higher world prices in 2007, AREVA agreed to pay the Government of Niger double what it had been paying for uranium. In 2007 the U.S. public utility holding company Exelon Corporation signed a contract with the Government of Niger to buy 300 tons of uranium each year for the next 10 years. Although AREVA controls the only two existing uranium mines in Niger (COMINAK's underground mine and SOMAIR's open pit mine), in 2007 the Government of Niger awarded 122 new mineral exploration licenses to companies from France, China, Canada, Australia, India, South Africa, and the United States.

Exploitable deposits of gold are known to exist in Niger in the region between the Niger River and the border with Burkina Faso. On October 5, 2004 President Tandja announced the official opening of the Samira Hill Gold Mine in the region of Tera and the first Nigerien gold ingot was presented to him.

This marked a historical moment for Niger as the Samira Hill Gold Mine represents the first commercial gold production in the country. Samira Hill is owned by a company called SML (Societe des Mines du Liptako), which is a joint venture between a Moroccan company—Societe SEMAFO Inc.—and a Canadian company—ETRUSCAN. Both companies own 80% (40%–40%) of SML and the GON 20%. In 2006, gold was Niger's third most important export, accounting for 13.6% of the country's total exports. In 2007 the Anglo-American company Caracal Gold Burkina was awarded two permits to explore for gold in the Tillaberi region. Niger has oil potential. In 2006 an ExxonMobil-Petronas joint venture ceased exploration activities at what may be Niger's largest oil deposit, the Agadem block, located north of Lake Chad. In 2007 nineteen companies vied for exploration and production rights to the Agadem block, but none of these bids were accepted. The Government of Niger is trying to attract new bids on the Agadem block for 2008.

The parastatal SONICHAR (Societe Nigerienne de Charbon) in Tchirozerine (north of Agadez) extracts coal from an open pit and fuels an electricity generating plant that supplies energy to the uranium mines. There are additional coal deposits southwest of the current mines. Substantial deposits of phosphates, iron, limestone, and gypsum also have been found in Niger.

Niger enjoyed increased economic competitiveness following the January 1994 devaluation of the Communaute Financiere Africaine (CFA) franc. Annual economic growth rates vary widely, due largely to the effect of rainfall on agricultural output. In 2005 the economy showed strong growth (7.1% real GDP growth) as a result of the agricultural sector's recovery from the poor harvests of 2004, and the continued growth of non-agricultural sectors. In 2006, the real GDP growth rate was at 5.1%.

The government actively seeks foreign private investment and considers it key to restoring economic growth and development. With the assistance of the United Nations Development Program (UNDP), it has undertaken a concerted effort to revitalize the private sector. It revised the investment code (1997 and 2000), petroleum code (1992 and 2007), and mining code (1993) aimed at attracting investors.

Niger shares a common currency, the CFA franc, and a common central bank, the Central Bank of West African States (BCEAO), with seven other members of the West African

Monetary Union. The Treasury of the Government of France supplements the BCEAO's international reserves in order to maintain a fixed rate of 656 CFA to the euro.

Economic Reform

In January 2000, Niger's newly elected government inherited serious financial and economic problems, including a virtually empty treasury, past-due salaries (11 months of arrears) and scholarship payments, increased debt, reduced revenue performance, and lower public investment. In December 2000, Niger qualified for enhanced debt relief under the International Monetary Fund (IMF) program for Highly Indebted Poor Countries (HIPC) and concluded an agreement with the Fund on a Poverty Reduction and Growth Facility (PRGF). In January 2001, Niger reached its decision point and subsequently reached its completion point in 2004. The debt relief provided under the enhanced HIPC initiative significantly reduces Niger's annual debt service obligations, freeing about $40 million per year over the coming years for expenditures on basic health care, primary education, HIV/AIDS prevention, rural infrastructure, and other programs geared at poverty reduction. Debt service as a percent of government revenue was slashed from nearly 44% in 1999 to 10.9% in 2003 and will average 4.3% during 2010-2019. The debt relief cut debt service as a percentage of export revenue from more than 23% to 8.4% in 2003, and decreases it to about 5% in later years. In 2005, the IMF canceled all of Niger's debts to it (approximately $111 million) incurred before January 2005. In 2006, the African Development Fund canceled $193 million in debt for Niger. Furthermore, the World Bank announced that approximately $745 million in debt relief for Niger would be phased in over the next 37 years.

In its effort to consolidate macroeconomic stability under the PRGF, the government is also taking action to reduce corruption, and as the result of a participatory process encompassing civil society, has devised a Poverty Reduction Strategy Plan that focuses on improving health, primary education, rural infrastructure, agricultural production, environmental protection, and judicial reform. In late 2006, Niger qualified for the Millennium Challenge Corporation's (MCC) Threshold Program. Niger will focus its MCC efforts on promoting girls' education, fighting corruption, and improving the business environment. Under the auspices of the World Bank, the government launched a major privatization effort in 1998 to divest itself of monopolies in water, power, and telecommunications and to transfer other public enterprises to private sector management. In 2001 Niger successfully privatized its telecommunications monopoly; however, the privatization of other industries has stalled. The privatization of the state-owned electric utility (NIGELEC) and the national oil distribution company (SONIDEP) are on hold indefinitely.

Foreign Aid

The most important donors in Niger are France, the European Union, the World Bank, the IMF, and UN agencies—UNDP, UNICEF, FAO, WFP, and UNFPA. Other donors include the United States, Belgium, Germany, Switzerland, Japan, China, Italy, Libya, Egypt, Morocco, Iran, Denmark, Canada, and Saudi Arabia. While the U.S. Agency for International Development (USAID) does not have a Mission in Niger, the United States is a major donor, contributing on average $30 million each year to Niger's development. In early 2008 Niger concluded an agreement for a $23 million Millennium Challenge Account threshold program. Niger is a key participant in the Trans-Saharan Counter-Terrorism program. Niger also benefits from the largest non-emergency PL 480 food assistance program in West Africa. Foreign aid represents 8.3% of Niger's GDP and over 40% of government revenues.

DEFENSE

The Niger Armed Forces total 12,000 personnel with approximately 3,700 gendarmes, 300 air force, and 8,000 army personnel. The air force has four transport aircraft. The armed forces include general staff and battalion task force organizations consisting of two paratroop units, four light armored units, and nine motorized infantry units located in Tahoua, Agadez, Dirkou, Zinder, Nguigmi, N'Gourti, and Madewela. In 1991, Niger sent a 400-man military contingent to join the American-led allied forces against Iraq during the Gulf War. Niger provides a battalion of peace-keeping forces to the UN Mission in Cote d'Ivoire.

Niger's defense budget is modest, accounting for about 1.6% of government expenditures. France provides the largest share of military assistance to Niger. Approximately 18 French military advisers are in Niger. Many Nigerien military personnel receive training in France, and the Nigerien Armed Forces are equipped mainly with materiel either given by or purchased in France. Morocco, Algeria, China, and Libya are also providing military assistance. A small U.S. foreign military assistance program was initiated in 1983. A U.S. Defense Attaché office opened in June 1985 and assumed Security Assistance Office responsibilities in 1987. The office closed in 1996 following a coup d'état. The U.S. Defense Attaché office reopened in July 2000. The United States provided transportation and logistical assistance to Nigerien troops deployed to Cote d'Ivoire in 2003.

Additionally, the U.S. provided initial equipment training on vehicles and communications gear to a company of Nigerien soldiers as part of the Department of State Pan-Sahel Initiative. Military to military cooperation continues via the Trans Saharan Counter-Terrorism Partnership and other initiatives. EUCOM contributes funds for humanitarian assistance construction throughout the country. In 2007, a congressional waiver was granted which allows the

Niger military to participate in the International Military Education and Training (IMET) program, managed by the Defense Attache Office. This program funded $170,000 in training in 2007.

FOREIGN RELATIONS

Niger pursues a moderate foreign policy and maintains friendly relations with the West and the Islamic world as well as nonaligned countries. It belongs to the United Nations and its main specialized agencies and in 1980-81 served on the UN Security Council. Niger maintains a special relationship with France and enjoys close relations with its West African neighbors. It is a charter member of the African Union and the West African Monetary Union and also belongs to the Niger River and Lake Chad Basin Commissions, the Economic Community of West African States, the Nonaligned Movement, and the Organization of the Islamic Conference.

U.S.-NIGERIEN RELATIONS

U.S. relations with Niger have generally been close and friendly since Niger attained independence. Although USAID does not have a Mission in Niger, $30 million in annual official aid is administered through American and local non-governmental organizations with programs addressing food security, health, local governance, youth training, girls' education, corruption control, and improving the business environment. The U.S. Peace Corps program in Niger started in 1962. It currently has about 130 volunteers in country and celebrated its 45th anniversary in Niger in September 2007.

TRAVEL

Consular Information Sheet

March 3, 2008

Country Description: Niger is a developing, landlocked African nation whose northern area includes the Sahara Desert. Tourism facilities are minimal, particularly outside the capital city, Niamey, and the ancient caravan city of Agadez. Ecotourism and adventure tourism opportunities are plentiful.

Entry Requirements: A passport, visa, and proof of yellow fever inoculation are required. Travelers from countries without a Nigerien Embassy may be able to obtain a visa at the airport. Travelers from the United States should obtain a visa before arriving in Niger. Failure to do so could result in being denied entry to Niger. Travelers should obtain the latest information on entry/exit requirements from the Embassy of the Republic of Niger, 2204 R Street NW, Washington D.C. 20008, telephone: (202) 483-4224. Visit the Embassy of Niger web site at http://www.nigerembassyusa.org/for the most current visa information. Outside the U.S., inquiries should be made at the nearest Nigerien embassy or consulate.

Safety and Security: U.S. citizens are advised to avoid street demonstrations and maintain security awareness at all times. Large and small street demonstrations occur regularly in Niger. These demonstrations tend to take place near government buildings, university campuses, or other gathering places such as public parks. Although demonstrations can occur spontaneously, large student demonstrations typically begin in January and February and continue through May. American citizens are, therefore, urged to be particularly vigilant at these times. During previous student demonstrations, NGO and diplomatic vehicles bearing “IT"or “CD” plates have been targeted by rock throwing demonstrators. Many past demonstrations have featured rock throwing and tire burning, especially at key intersections in the city of Niamey.

Due to the abrupt nature of street demonstrations, it is not possible for the U.S. Embassy to notify American citizens each time a demonstration occurs. Consequently, Americans are reminded to maintain security awareness at all times and to avoid large public gatherings and street demonstrations. Americans are reminded that even demonstrations intended to be peaceful can turn confrontational without much advanced warning. While the U.S. Embassy will endeavor to inform citizens of ongoing demonstrations through the warden system when possible, local radio and television stations are good sources for information about local events.

As of May 17, 2007, the U.S. Embassy in Niamey prohibits official personnel from traveling into areas of Niger to the north of Abalak. All American cit-

izens are strongly urged to follow the same guidelines due to the escalation of violence by the local rebel group, Movement for Justice in Niger (MNJ). Northern Niger, particularly in and around the cities of Iferouane, Arlit, and Agadez, is affected by MNJ activities. In July 2007, MNJ ambushed a convoy in the Agadez region, kidnapping a Chinese citizen and holding him for ten days. Futhermore, landmines have been placed in the region and several have exploded killing military and civilian personnel. There were several landmine incidents in the south of Niger with the most recent on January 9, 2008 in Niamey. They are disturbing because they were the first to occur outside the northern region where MNJ has operated. MNJ did not take responsibility for these landmines. Most recently, MNJ attacked the town of Tanout, killing several troops and capturing arms and several people, including the prefet. Several international organizations, including private and nongovernmental groups, have temporarily relocated personnel from these areas. On August 27, 2007, the President of Niger declared a State of Alert for the region of Agadez, to include the cities of Agadez, Arlit, and Iferouane. This State of Alert means that all travelers in and around these cities are liable to be stopped and held for questioning. Moreover, the Nigerien military now has the authority to hold individuals for questioning, without cause, for more than the standard 48-hours.

Foreigners who elect to travel in northern Niger despite the current security situation must submit an approved travel plan through the office of the Governor of Agadez. Travelers should first contact the Syndicat de Tourisme in Agadez (telephone: 96 98 78 81) to enlist the services of a registered tour operator, who will formally coordinate with Nigerien government and security officials on tourist safety and security in the North and who can facilitate the submission of the required itinerary and intended route.

For travel in any remote area of the country, the Department of State urges U.S. citizens to use registered guides, to travel with a minimum of two vehicles equipped with global positioning systems (GPS) and satellite phones. Travelers are advised to avoid restricted military areas and to consult local police authorities regarding their itinerary and security arrangements.

For the latest security information, Americans traveling abroad should regularly monitor the Department of State, Bureau of Consular Affair's Internet site at http://travel.state.gov, where the current Travel Warnings and Travel Alerts, including the Worldwide Caution Travel Alert, can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S. and Canada, or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Note To Non Governmental Organization (NGO) Workers: Following the murder of a French tourist in the region of Agadez in December 2005, the Government of Niger (GON) began requiring that NGOs not only be registered and officially recognized but that they inform the GON of each mission they plan to undertake in Niger. To avoid detainment and/or expulsion by Nigerien authorities, Embassy Niamey strongly recommends that NGO workers make sure that their NGO has registered and received official recognition from the Government of Niger. For details on how to do this please visit the Managing Office of Decentralised Cooperation and Non Governmental Organizations (Direction De La Cooperation Decentralisee Et Des Organisations Non Gouvernementales) in the Ministry of Foreign Affairs (Ministre des Affaires Etrangères).

Carry with them a copy of the official recognition (Arrêté) of the right of their NGO to operate in Niger.

If their international NGO sponsor is without a permanent presence in Niger, American citizens should verify that their NGO group has informed the Ministry of Foreign Affairs at least two weeks prior to the start of a mission in Niger. This notice should be in written form and should include the purpose of the mission, names of the individuals who will be working for the NGO on the mission, the dates of the mission, where the mission will take place and the types & license plate numbers of the vehicles involved in the mission. The Ministry of the Interior should be copied on this notice of mission.

If their NGO is a national NGO, i.e., has a headquarters operation in Niger, the American citizens should verify that their group has informed the Ministry of Territorial and Community Development (Minstre de l'Aménagement du Territoire et du Développement Communautaire) at least two weeks prior to the start of a mission in Niger.

This notice should be in written form and should include the purpose of the mission, the names of the individuals who will be working for the NGO on the mission, the dates of the mission, where the mission will take place and the types & license plate numbers of the vehicles involved in the mission. The Ministry of the Interior should be copied on this notice of mission.

NGOs should ask for receipt of their notification provided to the Ministry of Foreign Affairs, Ministry of the Interior and Ministry of Territorial and Community Development. Embassy Niamey strongly recommends that in addition to the above, NGO workers present themselves at the Regional Governor's office prior to beginning their mission in a particular portion of Niger. Again, NGO workers should ask for receipt of their presentation to the Regional Governor. It would also be wise to provide the Regional Governor with the same written notification that was provided to the Ministries listed above.

Crime: Crime is at a critical level due primarily to thefts, robberies, and residential break-ins. Foreigners are particularly vulnerable to attempts of bribery and extortion by law enforcement authorities. Thefts and petty crimes are common day or night. However, armed attacks are normally committed at night by

groups of two to four persons, with one assailant confronting the victim with a knife while the others provide surveillance or a show of force. Tourists should not walk alone around the Gaweye Hotel, National Museum, and on or near the Kennedy Bridge at any time, or the Petit Marche after dark. These areas are especially prone to muggings and should be avoided. Walking at night is not recommended as streetlights are scarce and criminals have the protection of darkness to commit their crimes. Recent criminal incidents in Niger have included carjackings, sexual assaults, home invasions, and muggings. In December 2000, an American was killed in a carjacking incident in Niamey, and another American was gravely wounded in a carjacking incident outside of Niamey in 2004. In 2007, two American citizens were raped and two others attacked with a machete. Travelers should always keep their doors locked and windows rolled up when stopped at stoplights.

In August 2004, an attack against 2 buses on the Agadez-Arlit road left 3 dead and numerous persons wounded. A French tourist was murdered by bandits in the Agadez region in December 2005 during a robbery attempt. In August 2006, several Italian tourists were abducted near the Niger-Chad border. They were robbed of some of there possessions and later released. Due to continued sporadic incidents of violence and banditry and other security concerns, the Department of State urges U.S. citizens visiting or residing in Niger to exercise caution when traveling within the northern and eastern parts of the country, especially along the borders of Mali, Libya, Algeria and Chad. Given the insecurity along these border regions, the Department of State recommends that American citizens in Niger avoid traveling overland to Algeria and Libya. In previous attacks, groups of foreign travelers, including Americans, have been robbed of vehicles, cash and belongings. The government of Niger is taking steps to address crime/banditry but operates under severe resource constraints.

Use caution and common sense at all times to avoid thieves and pickpockets. An information sheet on safety and security practices is available from the Consular Section of the U.S. Embassy in Niamey.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

Medical Facilities and Health Information: Health facilities are extremely limited in Niamey and urban centers, and completely inadequate outside the capital. Although physicians are generally well trained, even the best hospitals in Niamey suffer from inadequate facilities, antiquated equipment and shortages of supplies (particularly medicine). Emergency assistance is limited. Travelers must carry their own properly labeled supply of prescription drugs and preventative medicines.

Malaria is prevalent in Niger. Plasmodium falciparum malaria, the serious and sometimes fatal strain in Niger, is resistant to the anti-malarial drug chloroquine. Because travelers to Niger are at high risk for contracting malaria, the Centers for Disease Control and Prevention (CDC) advises that travelers should take one of the following antimalarial drugs: mefloquine (Lariam), doxycycline, or atovaquone/proguanil (Malarone). The CDC has determined that a traveler who is on an appropriate antimalarial drug has a greatly reduced chance of contracting the disease. Other personal protective measures, such as the use of insect repellents, also help to reduce malaria risk. Travelers who become ill with a fever or flu-like illness while traveling in a malaria-risk area and up to one year after returning home should seek prompt medical attention and tell the physician their travel history and what antimalarials they have been taking. For additional information on malaria, protection from insect bites, and antimalarial drugs, please visit the CDC travelers' health web site at http://wwwn.cdc.gov/travel.

Tap water is unsafe to drink throughout Niger and should be avoided. Bottled water and beverages are safe, although visitors should be aware that many restaurants and hotels serve tap water. Ice made from tap water is also unsafe to consume.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's Internet site at http://www.cdc.gov/travel.

For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith/en.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Niger is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

Road safety throughout Niger is a concern, and visitors are strongly urged to avoid driving at night outside of major cities. The public transportation system, urban and rural road conditions, and the availability of roadside assistance are all poor. U.S. travelers should exercise caution on Niger's roads, as traffic accidents are frequent. The main causes of accidents are driver carelessness, excessive speed, poorly maintained vehicles, and poor to non-existent road surfaces. Other factors include the hazardous mix of bicycles, mopeds, unwary pedestrians, donkey carts, farm animals, and buses on roads that are generally unpaved and poorly lighted. Overloaded tractor-trailers, "bush taxis," and disabled vehicles are additional dangers on rural roads, where speeds are generally higher. Travel outside Niamey and other cities often requires four-wheel-drive vehicles, which creates an additional security risk since these vehicles—especially Toyota Land Cruisers—are high-theft items. Driving at night is always hazardous and should be avoided. Banditry is a continuing problem in northern and eastern Niger. There have been occasional carjackings and highway robberies throughout the country. While taxis are available at a fixed fare in Niamey, most are in poor condition, and do not meet basic U.S. road safety standards. Inter-city "bush-taxis" are available at negotiable fares, but these vehicles (minibuses, station wagons, and sedans) are generally older, unsafe models that are overloaded, poorly maintained, and driven by reckless operators seeking to save time and money. A national bus company (SNTV) operates coaches on inter-city routes and, since being reorganized in 2001, has provided reliable service and experienced no major accidents. Air Transport, Rimbo and Garba Messagé are private bus companies operating in Niger. There is some concern regarding the youth of drivers and the speed with which the private bus companies travel the Nigerien roads.

Visit the National Tourism Office on Rue de Grand Hotel in Niamey.

Aviation Safety Oversight: As there is no direct commercial air service between the United States and Niger, the U.S. Federal Aviation Administration (FAA) has not assessed Niger's Civil Aviation Authority for compliance with International Civil Aviation Organization (ICAO) aviation safety standards. For more information, travelers may visit the FAA's Internet web site at http://www.faa.gov.

Dress Restrictions: Local culture and Islamic tradition encourage conservative dress for both men and women. There have been incidents of groups of men assaulting women who are, or appear to be, African and who are wearing other than traditional garments.

Photography Restrictions: Tourists are free to take pictures anywhere in Niger, except near military installations, radio and television stations, the Presidency Building, airport, or the Kennedy Bridge. Tourists should not photograph political and student demonstrations.

Currency Regulations: The West African Franc (FCFA) is the currency Niger shares with several other West African francophone countries, and is fully convertible into Euros. Foreign currency exchange over 1 million CFA (about $2,000 at 500 CFA/$1) requires authorization from the Ministry of Finance (available from all major banks).

Telephone Service: Due to poor line quality, callers often experience delays in getting a telephone line, and faxes are often garbled. Cellular phone service is available in Niamey and in many major cities.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating Nigerien laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Niger are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in Niger are encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration web site so that they can obtain updated information on travel and security within Niger. Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency. The U.S. Embassy is located on Rue des Ambassades, mailing address B.P. 11201, telephone numbers (227) 20-72-26-61 through 64, and fax numbers (227) 20-73-31-67 or 20-72-31-46. The Embassy's after hours emergency number is (227) 20-72-31-41. Embassy's Internet address is http://niamey.usembassy.gov.

Intercountry Adoption

April 2006

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is based on public sources and current

understanding. Questions involving foreign and U.S. immigration laws and legal interpretation should be addressed respectively to qualified foreign or U.S. legal counsel.

Please Note: Nigerien law does not technically permit adoptions by couples with biological children. A long-standing policy of granting exceptions is under review by the Direction de la Protection de l'Enfant (DPE).

Patterns of Immigration: In the last seven years, no Nigerien children have received U.S. immigrant visas on the basis of being orphans adopted by U.S. citizens.

Adoption Authority: The government office responsible for adoptions in Niger is:

Centre d'Accueil des enfants en difficulté familiale
Direction de la protection de l'enfant,
Ministère du Développement Social, de la Population, de la Promotion de la Femme et de la Protection de l'Enfant
BP 11386
Niamey, Niger
Telephone: 011-(227)-73-30-68

Eligibility Requirements for Adoptive Parents: According to Nigerien law, the prospective adoptive parents must be married and one parent must be at least 35 years of age and they should have been married for a minimum of 10 years

Residency Requirements: There are no residency requirements for adoptions in Niger.

Time Frame: According to Nigerien authorities, the procedures as outlined above take one to three months. However, experience has been that they (the Nigerien government) generally take six months to a year.

Adoption Agencies and Attorneys: The sole agency authorized to handle adoptions in Niger is the "Centre d'Acceuil des Enfants en Difficulté Familiale," the Nigerien government entity cited above. However, this agency prefers that prospective adoptive parents work with an attorney who understands local law. Although not required by Nigerien law, it is recommended that prospective adoptive parent(s) hire a local lawyer to handle their case. The U.S. Embassy maintains a list of attorney's known to work with U.S. citizen, found at http://niamey.usembassy.gov/niger/attorney.html. This list does not imply an endorsement of specific attorneys by the Embassy.

Adoption Fees: Adoption fees vary from attorney to attorney and may include service fee for application filing, passport and birth certificate application, court fees etc.

Adoption Procedures: The prospective adoptive parent(s) must submit the documents listed below under "Documentary Requirements" to the Direction de la Protection de l'Enfant (DPE) at the Ministry of Social Development (MSD) For adoptions pursued from abroad, the adoptive parents are expected to hire a local attorney to represent prospective them.

Once the DPE has issued a favorable recommendation for the placement of a child with the prospective adoptive parents overseas, the latter can request the child to be provisionally placed with a foster family in Niger recommended by the adoptive parents until the final decision by the judge. If the prospective adoptive parents have not identified a Nigerien family to temporarily care for the child, then the child stays at the orphanage where he or she reides until the adoptive family arrives in Niger. Prospective adoptive parents resident in Niger can request provisional custody themselves at this same stage of the process.

Upon receipt of a request from prospective adoptive parents, the DPE reviews the file. After ensuring it is complete and fulfills the DPE's requirements, they forwards the case to the office of the Minister of Social Development for approval and transmission to the President of the Tribunal de la Justice for a hearing. The President of the Tribunal may direct a social worker to review the home study ("social survey") contained in the file. If the parents are adopting from overseas, a home study performed to meet the requirements of their country of residence will be sufficient (in the case of U.S. families, the I-600A home study), but must be accompanied by a French translation. Once the review of the file is complete, the greffier (court clerk) at the Tribunal schedules a hearing before the President of the Tribunal for the prospective adoptive parents. The President of the Tribunal sends a copy of the case file to the Procurer Général (District Attorney) and requests that office to direct a huissier (process server) to notify the prospective parents or their representative of the hearing date. This is the point at which the prospective adoptive parents must travel from the U.S. to Niger.

Unless the hearing reveals a documentary omission or other problems (depending on the individual case) the President of the Tribunal issues the formal custody decree at that time. After a two-month waiting period, during which the child may not leave Niger, the adoption becomes final and the adoptive parents can then proceed with obtaining a birth certificate for the child at the Etat Civil office at the Hotel de Ville (City Hall).

Documentary Requirements:

- A handwritten request/cover letter for the documents listed below delivered by the lawyer to the Direction de la Protection de l'Enfant at the Ministry of Social Development, signed by prospective adoptive parents;
- Marriage certificate of the prospective adoptive parents;
- Birth certificates of the prospective adoptive parents;
- Medical examination certificates for the prospective adoptive parents;
- ;Two photographs (b/w or color, any size) of the each of prospective adoptive parents;

- Sterility certificate for at least one prospective adoptive parent, if applicable. If neither is sterile, the prospective parents must state in the cover letter why they want to adopt a child;
- Nigerien police record for prospective adoptive parents is required for any time spent in Niger;
- Monthly or annual earnings statement;
- If the prospective adoptive parents (regardless of nationality) are resident in Niger, a certification of social survey ("home study") performed by a Nigerien social worker;
- A copy of the home study submitted to USCIS professionally translated into French will suffice. However, it must include a psychological evaluation of the parents;
- Nationality certificates or passports of prospective parents.

Nigerien Government Follow-Up: Nigerien officials may claim that the prospective adoptive parents must sign an agreement to pay for Nigerien social workers to travel and visit the family every two years until the adopted child reaches majority. This is not an actual Nigerien legal requirement. In practice, Nigerien authorities have accepted a letter from the social service agency with jurisdiction over the prospective parents' place of residence in the U.S. that it will monitor the child's post-adoption development.

Travel Document For Child: Some Nigerien authorities have taken the view that, once a Nigerien child has been adopted by a foreign couple, s/he no longer has Nigerien nationality under Nigerien law and thus is entitled only to a single-sheet temporary passport as a one-time travel document. The Nigerien passport office at the Direction Surveillance du Territoire at the Ministry of Interior, however, routinely issues Nigerien passports to children adopted by parents of various nationalities, and would do the same for those adopted by Americans. Using the Nigerien birth certificate listing them as the parents, the adoptive parents must submit the passport application through their attorney, but pay only the normal passport issuance fee. Depending on your attorney a service fee may be included in the attorney fees.

Embassy of Niger
2204 R. Street, NW
Washington, DC 20008
Tel. (202) 483-4224
Fax. (202) 483—3169

Niger also has a mission to the United Nations in New York, but it does not handle consular issues, including those related to adoptions.

U.S. Immigration Requirements: Prospective adoptive parents are strongly encouraged to consult USCIS publication M-249, *The Immigration of Adopted and Prospective Adoptive Children*, as well as the Department of State publication, *Intercountry Adoptions*. Please see the *Intercountry Adoption* section of this book for more details and review current reports online at http://adoption.state.gov.

U.S. Embassy
Rue des Ambassades, BP 11201
Niamey, Niger,
Tel. (227) 72-26-61
Fax. (227) 73-31-67
Email: consulateniamey@state.gov
http://niamey.usembassy.gov

Additional Information: Specific questions about intercountry adoption in Niger may be addressed to the U.S. Embassy in Niamey. General questions regarding intercountry adoption may be addressed to the Office of Children's Issues, U.S. Department of State, CA/OCS/CI, SA-29, 4th Floor, 2201 C Street, NW, Washington, D.C. 20520-4818, toll-free Tel: 1-888-407-4747.

NIGERIA

Compiled from the December 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Federal Republic of Nigeria

PROFILE

Geography

Area: 923.8 thousand sq. km. (356,700 sq. mi.) about the size of California, Nevada, and Arizona.

Cities: Capital—Abuja (pop. est. 452,000). Other cities—Kano (9.3 million), Lagos (9.01 million), Ibadan (5 million), Enugu (500,000).

Terrain: Ranges from southern coastal swamps to tropical forests, open woodlands, grasslands, and semi-desert in the far north. The highest regions are the Jos Plateau 1,200-2,400 meters above sea level and the mountains along the border with Cameroon.

Climate: Annual rainfall ranges from 381 cm. along the coast to 64 cm. or less in the far north.

People

Nationality: Noun and adjective—Nigerian(s).

Population: (2007) 148 million.

Total fertility rate: (avg. number of children per woman in 2006) 5.4.

Ethnic groups: (250) Hausa-Fulani, Igbo, Yoruba, and Ijaw are the largest.

Religions: Muslim, Christian, indigenous African.

Languages: English (official), Hausa, Igbo, Yoruba, Fulani, Ijaw, others.

Education: Attendance (secondary)—male 32%, female 27%. Literacy—39%-51%.

Health: Life expectancy (2006)—47 years.

Government

Type: Federal republic.

Independence: October 1, 1960.

Constitution: The 1999 constitution (based largely on the 1979 constitution) was promulgated by decree on May 5, 1999 and came into force on May 29, 1999.

Political subdivisions: 36 states plus Federal Capital Territory (Abuja); states divided into a total of 774 local government areas.

Total government expenditure: $23.4 billion, of which recurrent expenditures constitute $11.1 billion, capital expenditures $7.4 billion, statutory transfers $1.4 billion, and debt service $3.2 billion. Critical sectors—security and the Niger Delta (20%); education (8%); transportation (7%); agriculture and water (5%); and energy (5%).

Debt: including federal/state government debt, as percentage of GDP: 10.4%.

Economy

GDP: (2007) $166 billion (agriculture 33%; industry 39%; services 28%).

Real GDP growth rate (2007): 5.9%. Oil growth: -5.6%. Non-oil growth: 9.6%.

Per capita GDP: (2005 est.) $694.

Inflation: (2006) 8%.

Natural resources: Petroleum, natural gas, tin, columbite, iron ore, coal, limestone, lead, zinc.

Agriculture: Products—cocoa, palm oil, yams, cassava, sorghum, millet, corn, rice, livestock, groundnuts, cotton.

Industry: Types—textiles, cement, food products, footwear, metal products, lumber, beer, detergents, car assembly.

Trade: (2007) Exports—$65.5 billion: fuels and mining products (97%); agricultural products (cocoa, rubber, oil, nuts) (2.2%); manufactures (0.8%). Partners—United States (38.3%); European Union (21.8%); India (9.9%); Brazil (6.8%); Japan (4%). Imports—$29.5 billion: machinery; chemicals; transport equipment; manufactured goods (72.3%); agricultural products (23.7%), fuels and mining products (4%). Partners—European Union (33.2%); United States (15.6%); China 7.2%; Korea (2.8%); U.A.E. (2.6%); others (15%).

Foreign direct investment: (FDI, 2007) 6.2% of GDP.

Official development assistance: (2006) $11.434 billion.

Currency: Naira (119 Naira = U.S. $1 as of November 24, 2008).

PEOPLE

The most populous country in Africa, Nigeria accounts for over half of West Africa's population. Although less than 25% of Nigerians are urban dwellers, at least 24 cities have populations of more than 100,000. The variety of customs, languages, and traditions among Nigeria's 250 ethnic groups gives the country a rich diversity. The dominant ethnic group in the northern two-thirds of the country is the Hausa-Fulani, most of whom are Muslim. Other major ethnic groups of the north are the Nupe, Tiv, and Kanuri. The Yoruba people are predominant in the southwest.

About half of the Yorubas are Christian and half Muslim. The predominantly Catholic Igbo are the largest ethnic group in the southeast, with the Efik, Ibibio, and Ijaw (the country's fourth-largest ethnic group) comprising a substantial segment of the population in that area. Persons of different language backgrounds most commonly communicate in English, although knowledge of two or more Nigerian languages is widespread. Hausa, Yoruba, Igbo, Fulani, and Ijaw are the most widely used Nigerian languages.

HISTORY

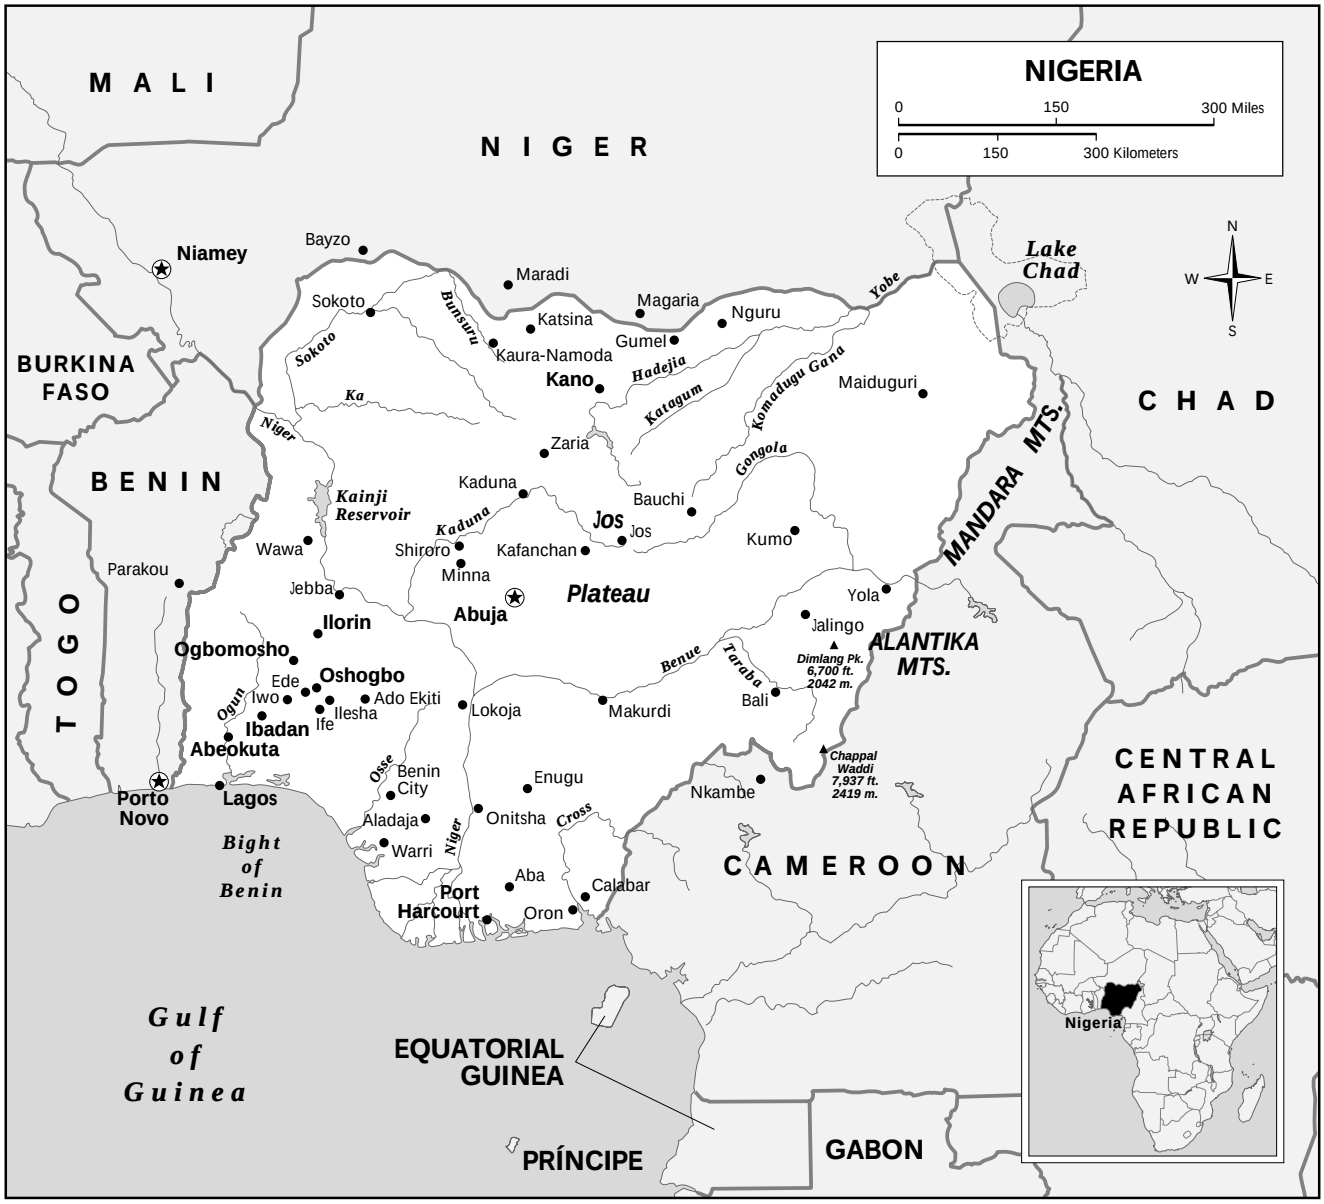
In the northern cities of Kano and Katsina, recorded history dates back to about 1000 AD. In the centuries that followed, these Hausa kingdoms and the Bornu empire near Lake Chad prospered as important terminals of north-south trade between North African Berbers and forest people who exchanged slaves, ivory, and kola nuts for salt, glass beads, coral, cloth, weapons, brass rods, and cowrie shells used as currency.

In the southwest, the Yoruba kingdom of Oyo was founded about 1400, and at its height from the 17th to 19th centuries attained a high level of political organization and extended as far as modern Togo. In the south central part of present-day Nigeria, as early as the 15th and 16th centuries, the kingdom of Benin had developed an efficient army; an elaborate ceremonial court; and artisans whose works in ivory, wood, bronze, and brass are prized throughout the world today. In the 17th through 19th centuries, European traders established coastal ports for the increasing traffic in slaves destined for the Americas. Commodity trade, especially in palm oil and timber, replaced slave trade in the 19th century, particularly under anti-slavery actions by the British Navy. In the early 19th century the Fulani leader, Usman dan Fodio, promulgated Islam and that brought most areas in the north under the loose control of an empire centered in Sokoto.

A British Sphere of Influence

Following the Napoleonic wars, the British expanded trade with the Nigerian interior. In 1885, British claims to a sphere of influence in that area received international recognition and, in the following year, the Royal Niger Company was chartered. In 1900, the company's territory came under the control of the British Government, which moved to consolidate its hold over the area of modern Nigeria. In 1914, the area was formally united as the "Colony and Protectorate of Nigeria."

Administratively, Nigeria remained divided into the northern and southern provinces and Lagos colony. Western education and the development of a modern economy proceeded more rapidly in the south than in the north, with consequences felt in Nigeria's political life ever since. Following World War II, in response to the growth of Nigerian nationalism and demands for independence, successive constitutions legislated by the British Government moved Nigeria toward self-government on a representative, increasingly federal, basis.



Independence

Nigeria was granted full independence in October 1960, as a federation of three regions (northern, western, and eastern) under a constitution that provided for a parliamentary form of government. Under the constitution, each of the three regions retained a substantial measure of self-government. The federal government was given exclusive powers in defense and security, foreign relations, and commercial and fiscal policies. In October 1963, Nigeria altered its relationship with the United Kingdom by proclaiming itself a federal republic and promulgating a new constitution. A fourth region (the midwest) was established that year. From the outset, Nigeria's ethnic, regional, and religious tensions were magnified by the significant disparities in economic and educational development between the south and the north.

On January 15, 1966, a small group of army officers, mostly southeastern Igbos, overthrew the government and assassinated the federal prime minister and the premiers of the northern and western regions. The federal military government that assumed power was unable to quiet ethnic tensions or produce a constitution acceptable to all sections of the country. Its efforts to abolish the federal structure greatly raised tensions and led to another coup in July. The coup-related massacre of thousands of Igbo in the north prompted hundreds of thousands of them to return to the southeast, where increasingly strong Igbo secessionist sentiment emerged.

In a move that gave greater autonomy to minority ethnic groups, the military divided the four regions into 12 states. The Igbo rejected attempts at constitutional revisions and insisted on full autonomy for the east. Finally, in May 1967, Lt. Col. Emeka Ojukwu, the military governor of the eastern region, who emerged as the leader of increasing Igbo secessionist sentiment, declared the independence of the eastern region as the "Republic of Biafra." The ensuing civil war was bitter and bloody, ending in the defeat of Biafra in 1970.

Following the civil war, reconciliation was rapid and effective, and the country turned to the task of economic development. Foreign exchange earnings and government revenues increased spectacularly with the oil price rises of 1973-74. On July 29,

1975, Gen. Murtala Muhammed and a group of fellow officers staged a bloodless coup, accusing Gen. Yakubu Gowon's military government of delaying the promised return to civilian rule and becoming corrupt and ineffective.

General Muhammed replaced thousands of civil servants and announced a timetable for the resumption of civilian rule by October 1, 1979. Muhammed also announced the government's intention to create new states and to construct a new federal capital in the center of the country.

General Muhammed was assassinated on February 13, 1976, in an abortive coup. His chief of staff, Lt. Gen. Olusegun Obasanjo, became head of state.

Obasanjo adhered meticulously to the schedule for return to civilian rule, moving to modernize and streamline the armed forces and seeking to use oil revenues to diversify and develop the country's economy. Seven new states were created in 1976, bringing the total to 19. The process of creating additional states continued until, in 1996, there were 36.

The Second Republic

A constituent assembly was elected in 1977 to draft a new constitution, which was published on September 21, 1978, when the ban on political activity, in effect since the advent of military rule, was lifted. Political parties were formed, and candidates were nominated for president and vice president, the two houses of the National Assembly, governorships, and state houses of assembly. In 1979, five political parties competed in a series of elections in which a northerner, Alhaji Shehu Shagari of the National Party of Nigeria (NPN), was elected president. All five parties

won representation in the National Assembly. In August 1983, Shagari and the NPN were returned to power in a landslide victory, with a majority of seats in the National Assembly and control of 12 state governments. But the elections were marred by violence, and allegations of widespread vote rigging and electoral malfeasance led to legal battles over the results.

On December 31, 1983, the military overthrew the Second Republic. Maj. Gen. Muhammadu Buhari emerged as the leader of the Supreme Military Council (SMC), the country's new ruling body. He charged the civilian government with economic mismanagement, widespread corruption, election fraud, and a general lack of concern for the problems of Nigerians. He also pledged to restore prosperity to Nigeria and to return the government to civilian rule but was stymied in his attempt to deal with Nigeria's severe economic problems. The Buhari government was peacefully overthrown by the SMC's third-ranking member, Army Chief of Staff Maj. Gen. Ibrahim Babangida, in August 1985.

Babangida moved to restore freedom of the press and to release political detainees being held without charge. As part of a 15-month economic emergency, he announced stringent pay cuts for the military, police, and civil servants and enacted similar cuts for the private sector. Imports of rice, maize, and wheat were banned. Babangida led a national debate on proposed economic reform and recovery measures, which convinced him of intense opposition to an economic recovery package dependent on an International Monetary Fund (IMF) loan.

The Abortive Third Republic

In early 1989, a constituent assembly completed work on a constitution for the Third Republic, and political activity again was permitted. In April 1990, mid-level officers tried and failed to overthrow Babangida, and 69 accused coup plotters were later executed after secret trials before military tribunals. In December 1990 the first stage of partisan elections was held at the local government level, followed by gubernatorial and state legislative elections in December 1991; turnout was low but nonviolent. However, Babangida canceled primaries scheduled for August and September 1992 due to fraud. All announced candidates were disqualified from again standing for president once a new election format was selected. After delayed promises for elections in 1990, the government finally held a presidential election on June 12, 1993.

In what most observers deemed to be Nigeria's fairest elections, early returns indicated that wealthy Yoruba businessman M.K.O. Abiola had won a decisive victory. But on June 23, Babangida, using several pending lawsuits as a pretense, annulled the election, throwing Nigeria into turmoil. More than 100 persons were killed in riots before Babangida agreed to hand power to an "interim government" on August 27. Babangida then attempted to renege on his decision. Without popular and military support, he was forced to hand over to Ernest Shonekan, a prominent nonpartisan businessman. Shonekan was to rule until new elections, slated for February 1994. Although he had led Babangida's Transitional Council since early 1993, Shonekan was unable to reverse Nigeria's ever-growing economic problems or to defuse lingering political tension.

With the country sliding into chaos, Defense Minister Sani Abacha quickly assumed power and forced Shonekan's "resignation" on November 17, 1993. Abacha dissolved all democratic political institutions and replaced elected governors with military officers. Abacha promised to return the government to civilian rule but refused to announce a timetable. Following the annulment of the June 12 election, the United States and other nations imposed various sanctions on Nigeria, including restrictions on travel by government officials and their families and suspension of arms sales and military assistance. Additional sanctions were imposed as a result of Nigeria's failure to gain full certification for its counter-narcotics efforts.

Although Abacha's takeover was initially welcomed by many Nigerians, disenchantment grew rapidly. Many opposition figures formed the "National Democratic Coalition (NADECO)" to campaign for an immediate return to civilian rule, and most Nigerians boycotted the May 1994 polls for delegates to a government-sponsored Constitutional Conference. On June 11, 1994, using the groundwork laid by NADECO, Abiola declared himself president and went into hiding. He reemerged and was promptly arrested on June 23. A series of strikes by petroleum workers and other unions initially brought economic life in Lagos and the southwest to a standstill, but by mid-August Abacha had dismissed the national union leadership, arrested his opponents, closed media houses, and moved strongly to curb dissent. In early 1995, Abacha alleged that some 40 military officers and civilians were engaged in a coup plot, including former head of state Obasanjo and his deputy, retired Gen. Shehu Musa Yar'Adua. After a secret tribunal, most of the accused were convicted, and several death sentences were handed down. The tribunal also charged, convicted, and sentenced prominent human rights activists, journalists, and others—including relatives of the coup suspects—for their alleged "anti-regime" activities.

In an October 1, 1995 address to the nation, Gen. Sani Abacha announced the timetable for a 3-year transition to civilian rule. Public turnout for his sham local elections in December 1997 and in April 1998 state assembly and gubernatorial elections was under 10%, and public reaction to Abacha's presidential nomination by the five accepted parties was apathy and a near-complete boycott. Widely expected to succeed himself as a civilian president on October 1, 1998, he remained head of state until his death on June 8 of that year. During the Abacha regime, the government continued to enforce its arbitrary authority through the federal secu-

rity system—the military, the state security service, and the courts. Under Abacha, all branches of the security forces committed serious human rights abuses. Abacha was replaced by General Abdulsalami Abubakar, who subsequently released almost all known civilian political detainees and decreased the number of reported human rights abuses.

Abubakar's Transition to Civilian Rule

During both the Abacha and Abubakar eras, Nigeria's main decision-making organ was the exclusively military Provisional Ruling Council (PRC) which governed by decree. The PRC oversaw the 32-member federal executive council composed of civilians and military officers. Pending the promulgation of the constitution written by the constitutional conference in 1995, the government observed some provisions of the 1979 and 1989 constitutions. Neither Abacha nor Abubakar lifted the decree suspending the 1979 constitution, and the 1989 constitution was not implemented. The judiciary's authority and independence was significantly impaired during the Abacha era by the military regime's arrogation of judicial power and prohibition of court review of its action. The court system continued to be hampered by corruption and lack of resources after Abacha's death. In an attempt to alleviate such problems, Abubakar's government implemented a civil service pay raise and other reforms.

In August 1998, the Abubakar government appointed the Independent National Electoral Commission (INEC) to conduct elections for local government councils, state legislatures and governors, the National Assembly, and president. INEC held a series of four successive elections between December 1998 and February 1999. Former military head of state Olusegun Obasanjo, freed from prison by Abubakar, ran as a civilian candidate and won the presidential election. Irregularities marred the vote, and the defeated candidate, Chief Olu Falae, challenged the electoral results and Obasanjo's victory in court. The PRC promulgated a new constitution, based largely on the suspended 1979 constitution, before the May 29, 1999 inauguration of the new civilian president. The constitution included provisions for a bicameral legislature, the National Assembly, consisting of a 360-member House of Representatives and a 109-member Senate. The executive branch and the office of president retained strong federal powers. The legislature and judiciary, having suffered years of neglect, are finally rebuilding as institutions and beginning to exercise their constitutional roles in the balance of power.

The Obasanjo Administration

The emergence of a democratic Nigeria in May 1999 ended 16 years of consecutive military rule. Olusegun Obasanjo became the steward of a country suffering economic stagnation and the deterioration of most of its democratic institutions. Obasanjo, a former general, was admired for his stand against the Abacha dictatorship, his record of returning the federal government to civilian rule in 1979, and his claim to represent all Nigerians regardless of religion.

The new President took over a country that faced many problems, including a dysfunctional bureaucracy, collapsed infrastructure, and a military that wanted a reward for returning quietly to the barracks. The President moved quickly and retired hundreds of military officers who held political positions, established a blue-ribbon panel to investigate human rights violations, ordered the release of scores of persons held without charge, and rescinded a number of questionable licenses and contracts let by the previous military regimes. The government also moved to recover millions of dollars in funds secreted in overseas accounts.

Most civil society leaders and most Nigerians saw a marked improvement in human rights and democratic practice under Obasanjo. The press enjoyed greater freedom than under previous governments. As Nigeria works out representational democracy, there have been conflicts between the executive and legislative branches over major appropriations and other proposed legislation. A sign of federalism has been the growing visibility of state governors and the inherent friction between Abuja and the various state capitols over resource allocation.

In the years following the end of military rule, Nigeria witnessed recurrent incidents of ethno-religious and community conflicts, many of which derived from distorted use of oil revenue wealth, flaws in the 1999 constitution, and age-old disputes over the distribution of land and other resources. In May 1999, violence erupted in Kaduna State over the succession of an Emir, resulting in more than 100 deaths. In November 1999, the army destroyed the town of Odi in Bayelsa State and killed scores of civilians in retaliation for the murder of 12 policemen by a local gang. In Kaduna in February-May 2000 over 1,000 people died in rioting over the introduction of criminal Shar'ia in the state. Hundreds of ethnic Hausa were killed in reprisal attacks in southeastern Nigeria. In September 2001, over 2,000 people were killed in inter-religious rioting in Jos. In October 2001, hundreds were killed and thousands displaced in communal violence that spread across the Middle-Belt states of Benue, Taraba, and Nasarawa. On October 1, 2001, President Obasanjo announced the formation of a National Security Commission to address the issue of communal violence. In 2003, he was re-elected in contentious and highly flawed national elections and state gubernatorial elections, which were litigated over two years. Since 2006, violence, destruction of oil infrastructure, and kidnappings of primarily expatriates in the oil-rich Niger River Delta have intensified as militants demanded a greater share of federal revenue for states in the region, as well as benefits from community development. For many reasons, Nigeria's security services have been unable to respond effectively to the security threat, which is both political and criminal.

In May 2006, the National Assembly soundly defeated an attempt to amend the constitution by supporters of a third presidential term for President Obasanjo. This measure was packaged in a bundle of what were otherwise non-controversial amendments. Nigeria's citizens addressed this issue in a constitutional, democratic, and relatively peaceful process.

Civilian Transition

Nigeria held state legislative and gubernatorial elections on April 14 as well as presidential and national legislative elections on April 21, 2007, in which more than 35 political parties participated. Nigeria missed an opportunity to strengthen an element of its democracy through a sound electoral process. Analysis of the process by most international observers did not conform to what Nigeria's National Electoral Commission (INEC) reported. U.S. and international observers reported overall a seriously flawed process with credible reports of malfeasance and vote rigging in some constituencies. The scope of violence that occurred also was regrettable. There were considerable degrees of difference in the conduct of elections among states, but serious differences were also observed within states during the two polling dates. The main opposition parties, All Nigeria People's Party (ANPP) and the Action Congress (AC), as well as numerous smaller political parties and the ruling People's Democratic Party (PDP) have filed petitions to challenge the results of gubernatorial elections in 34 of Nigeria's 36 states. Challenges to the presidential election have been filed by the ANPP, AC, and others in the Federal Court of Appeals, but the opposition is not unified, and mass protests have not materialized. INEC's principal problems included politicization and lack of independence, lack of transparency in its operations and decision-making, and persistent failure to make adequate logistical arrangements for both voter registration and polling. With INEC's certification of the ruling party's presidential ticket as the winner with over 70% of the vote, Nigeria experienced its first transition of power between civilian administrations when President Obasanjo stepped down on May 29, 2007. Newly-elected President Umaru Yar'adua, a moderate and a respected governor from the northern state of Katsina, pledged publicly to make electoral reform, peace and security in the Niger Delta, and continued electoral reform his top priorities.

Much reform remains to be implemented, but the Yar'Adua administration has shown unprecedented restraint in allowing the legislative and judicial branches to operate freely. In October 2007 Patricia Etteh, the Speaker of the Federal House of Representatives, resigned over allegations of corruption, after intense legislative and public pressure. Electoral tribunals and the courts had nullified at least six gubernatorial, nine Senate, 11 House, and 14 state-level House of Assembly elections from April 2007 based on technicalities. Of greater significance for Nigeria's system of checks and balances and the rule of law, on November 12, an appeals court upheld a lower court ruling that approved an opposition party's gubernatorial election appeal, effectively unseating the ruling party's incumbent in favor of the opposition candidate. On February 26, 2008 a tribunal upheld the results of the April 2007 presidential election. Two of the leading opposition candidates have appealed that ruling to Nigeria's Supreme Court, which might make a ruling in December 2008.

Principal Government Officials

Last Updated: 11/12/08

Pres.: **Umaru YAR'ADUA**
Vice Pres.: **Goodluck JONATHAN**
Min. of Agriculture & Water Resources: **Sayyadi Abba RUMA**
Min. of Commerce & Industry: **Charles Chukwuma UGWU**
Min. of Culture & Tourism: **Adetokunbo KAYODE**
Min. of Defense: **Mahmud Yayale AHMED**
Min. of Education: **Igwe AJA-NWACHUKWU**
Min. of Energy: **Umaru YAR'ADUA**
Min. of Environment & Housing: **Halima Tayo ALAO**
Min. of the Federal Capital Territory: **Aliyu Modibbo UMAR**
Min. of Finance: **Shamsuddeen USMAN**
Min. of Foreign Affairs: **Ojo MADUEKWE**
Min. of Health:
Min. of Information & Communications: **John Ogar ADEY**
Min. of Internal Affairs: **Godwin ABBE**
Min. of Justice: **Michael Kaase AONDOKAA**
Min. of Labor & Productivity: **Hassan LAWAL**
Min. of Mines & Steel Development: **Sarafa Tunji ISOLA**
Min. of Science & Technology: **Grace EKPIWWHRE**
Min. of Transport: **Deziani Alison MADUEKE**
Min. of Women's Affairs: **Saudatu Usman BUGUNDU**
Min. of Youth Development: **Akinlabe OLASUNKANMI**
Min. of State for Agriculture & Water Resources: **Adamu Maina WAZIRI**
Min. of State for Commerce & Industry: **Ahmed Garba BICHI**
Min. of State for Culture & Tourism: **Aliyu Idi HONG**
Min. of State for Defense: **Fidelia Auababa NJEZE**
Min. of State for Education: **Aishatu Kibril DOKKU**
Min. of State for Education: **Agada Anthony JERRY**
Min. of State for Energy (Gas): **Odusina Olatunde EMMANUEL**
Min. of State for Energy (Petroleum): **Henry Odin AJUMOGOBOA**
Min. of State for Energy (Power): **Fatima Balarabe IBRAHIM**
Min. of State for the Federal Capital Territory: **John James AKPANUDOEDEHE**
Min. of State for Finance: **Aderemi BABLOLA**
Min. of State for Foreign Affairs: **Baguda M. HIRSE**
Min. of State for Foreign Affairs: **Tijani Yahaya KAURA**
Min. of State for Health: **Gabriel Yajubu ADUKU**
Min. of State for Information & Communication: **Ibrahim Dasaki NAKADE**
Min. of State for Interior: **Hassan HARUNA**
Min. of State for Mines & Steel Development: **Ahmed Mohamed GUSAU**
Min. of State for Transport: **John Okechukwu EMEKA**
Min. & Dep. Chmn., National Planning Commission: **Muhammed Sanusi DAGGASI**

Min. & Chmn., National Sports Commission: **Abdulrahman Hassan GIMBA**

Governor, Central Bank: **Charles SOLUDO**

Ambassador to the US:

Permanent Representative to the UN, New York:

Nigeria maintains an embassy in the United States at 3519 International Place, NW, Washington, DC 20008, (phone. 202-986-8400, fax-202-362-6552) and a consulate general in New York at 575 Lexington Ave., New York, NY 10022, (phone. 212-715-7200).

ECONOMY

Trade

Nigeria is the United States' largest trading partner in sub-Saharan Africa, largely due to the high level of petroleum imports from Nigeria, which supply 11% of U.S. oil imports—nearly 46% of Nigeria's daily oil production. Nigeria is the fifth-largest exporter of oil to the United States. Two-way trade was valued at $29 billion in 2007. Led by machinery, wheat, and motor vehicles, U.S. goods exports to Nigeria in 2007 were worth $4 billion. U.S. imports from Nigeria were $25 billion in 2007. U.S. imports from Nigeria consisted predominantly of oil. However, rubber products, cocoa, gum arabic, cashews, coffee, and ginger constituted over $70 million of U.S. imports from Nigeria in 2007. The U.S. trade deficit with Nigeria was $21 billion in 2007. Nigeria is the 50th-largest export market for U.S. goods and the 14th-largest exporter of goods to the United States. The United States is Nigeria's largest trading partner after the United Kingdom. Although the trade balance overwhelmingly favors Nigeria, thanks to oil exports, a large portion of U.S. exports to Nigeria is believed to enter the country outside of the Nigerian Government's official statistics, due to importers seeking to avoid Nigeria's excessive tariffs.

The United States is the largest foreign investor in Nigeria. The stock of U.S. foreign direct investment (FDI) in Nigeria in 2006 was $339 million, down from $2 billion in 2004. U.S. FDI in Nigeria is concentrated largely in the petroleum/mining and wholesale trade sectors. Exxon-Mobil and Chevron are the two largest U.S. corporate players in offshore oil and gas production.

In April 2008, the United States and Nigeria met under the existing Trade and Investment Framework Agreement (TIFA) to advance the ongoing work program and to discuss improvements in Nigerian trade policies and market access. Among the topics discussed were cooperation in the World Trade Organization (WTO), market access, export diversification, intellectual property protection and enforcement, commercial issues, trade capacity building and technical assistance, infrastructure, and investment issues.

Dominated by Oil

The oil boom of the 1970s led Nigeria to neglect its strong agricultural and light manufacturing bases in favor of an unhealthy dependence on crude oil. In 2002 oil and gas exports accounted for more than 98% of export earnings and about 83% of federal government revenue. New oil wealth, the concurrent decline of other economic sectors, and a lurch toward a statist economic model fueled massive migration to the cities and led to increasingly widespread poverty, especially in rural areas. A collapse of basic infrastructure and social services since the early 1980s accompanied this trend. By 2002 Nigeria's per capita income had plunged to about one-quarter of its mid-1970s high, below the level at independence. Along with the endemic malaise of Nigeria's non-oil sectors, the economy continues to witness massive growth of "informal sector" economic activities, estimated by some to be as high as 75% of the total economy.

Nigeria's proven oil reserves are estimated to be 36 billion barrels; natural gas reserves are well over 100 trillion cubic feet. Nigeria is a member of the Organization of Petroleum Exporting Countries (OPEC), and in 2006 its crude oil production averaged around two million barrels per day. Poor corporate relations with indigenous communities, vandalism of oil infrastructure, severe ecological damage, and personal security problems throughout the Niger Delta oil-producing region continue to plague Nigeria's oil sector. Efforts are underway to reverse these troubles. In the absence of coherent government programs, the major multinational oil companies have launched their own community development programs. The Niger Delta Development Commission (NDDC) was created to help catalyze economic and social development in the region, but it is widely perceived to be ineffective and opaque. Oil accounts for 90% of Nigeria's exports and over 80% of government revenue. Significant exports of liquefied natural gas started in late 1999 and are slated to expand as Nigeria seeks to eliminate gas flaring by 2009.

Nigeria inspects all imports on arrival, rather than at ports of origin; as a result, about 95% of containers are physically examined. This procedure, along with Nigeria's uneven application of import and labeling regulations and poor infrastructure, complicates the movement of goods through Nigeria's notoriously congested ports and increases the cost of doing business. The government has promoted foreign investment and encouraged reforms in these and other areas, but the investment climate remains daunting to all but the most determined.

Agriculture has suffered from years of mismanagement, inconsistent and poorly conceived government policies, and the lack of basic infrastructure. Still, the sector accounts for about 30% of GDP and two-thirds of employment. Agriculture provides a big chunk of non-oil growth, which in 2006 reached 9%. Poultry and cocoa are just two areas where production is not keeping pace with domestic or international demand. Fisheries also have great potential, but are poorly managed. Most critical for the coun-

try's future, Nigeria's land tenure system does not encourage long-term investment in technology or modern production methods and does not inspire the availability of rural credit.

Oil dependency, and the allure it generated of great wealth through government contracts, spawned other economic distortions. The country's high propensity to import means roughly 80% of government expenditures is recycled into foreign exchange. Cheap consumer imports, resulting from a chronically overvalued Naira, coupled with excessively high domestic production costs due in part to erratic electricity and fuel supply, have pushed down industrial capacity utilization to less than 30%. Many more Nigerian factories would have closed except for relatively low labor costs (10%-15%). Domestic manufacturers, especially pharmaceuticals and textiles, have lost their ability to compete in traditional regional markets; however, there are signs that some manufacturers have begun to address their competitiveness.

Arguably Nigeria's biggest macroeconomic achievement has been the sharp reduction in its external debt, which declined from 36% of GDP in 2004 to less than 4% of GDP in 2007. In October 2005, the International Monetary Fund (IMF) approved its first ever Policy Support Instrument for Nigeria. In December 2005, the United States and seven other Paris Club nations signed debt reduction agreements with Nigeria for $18 billion in debt reduction, with the proviso that Nigeria pay back its remaining $12 billion in debt by March 2006. The United States was one of the smaller creditors, and received about $356 million from Nigeria in return for over $600 million of debt reduction. Merrill Lynch won the right to take on $509 million of Nigeria's promissory debt (accrued since 1984) to the "London Club" of private creditors. This arrangement saved Nigeria about $34 million over a simple prepayment of the notes., Nigeria faces intense pressure to accept multibillion dollar loans for railroads, power plants, roads, and other infrastructure.

Expanded government spending also has led to upward pressure on consumer prices. Recent high world oil prices had resulted in the government now holding $60 billion in foreign exchange reserves. State and local governmental bodies demand access to this "windfall" revenue, creating a tug-of-war between the federal government—which seeks to control spending—and state governments desirous of augmented budgets, preventing the government from making provision for periods of lower oil prices.

One of Nigeria's greatest success stories has been the completion in early 2006 of a major overhaul of its banking system under aggressive Central Bank supervision. Reforms have reduced the number of banks from 89 to 25, increased a bank's minimal capital requirement to $190 million, and required banks to hold 40% of their deposits in liquid assets. Retail, corporate, and Internet banking are seen as intensively competitive, and the home loan market is considered moderately competitive. Less than 10% of lending is believed to be made to individuals. About 65% of the economically active population is serviced by the informal financial sector, e.g., microfinance institutions, moneylenders, friends, relatives, and credit unions. Since 1999, the Nigerian Stock Exchange has enjoyed strong performance, although equity as a means to foster corporate growth remains underutilized by Nigeria's private sector. Rural communities remain largely unbanked, the real estate sector and small businesses receive a low level of lending, and the credit card market remains at an early stage of development.

Nigeria's publicly owned transportation infrastructure is a major constraint to economic development. Principal ports are at Lagos (Apapa and Tin Can Island), Port Harcourt, and Calabar. Docking fees for freighters are among the highest in the world. Of the 80,500 kilometers (50,000 mi.) of roads, more than 15,000 kilometers (10,000 mi.) are officially paved, but many remain in poor shape. Extensive road repairs and new construction activities are gradually being implemented as state governments, in particular, spend their portions of enhanced government revenue allocations. The government implementation of 100% destination inspection of all goods entering Nigeria has resulted in long delays in clearing goods for importers and created new sources of corruption, since the ports lack adequate facilities to carry out the inspection. Four of Nigeria's airports—Lagos, Kano, Port Harcourt and Abuja—currently receive international flights. There are several domestic private Nigerian carriers, and air service among Nigeria's cities is generally dependable. The maintenance culture of Nigeria's domestic airlines is not up to international standards.

Gradual Reform

Nigeria has made progress toward establishing a market-based economy. In recent years, it privatized the only government-owned petrochemical company and sold its interest in eight oil service companies. The Yar'Adua administration has paid especially close attention to due process by overturning or reviewing a number of suspect contracts awarded by its predecessor. Nigeria's implementation of non-tariff barriers has been arbitrary and uneven and continues to violate WTO prohibitions against trade bans. However, Nigeria has made some progress in its implementation of the Economic Community of West African States (ECOWAS) Common External Tariff by removing some textile items from its list of prohibited imports in 2006. In a September 2008 breakthrough, Nigeria decreased the number of banned import categories from 44 to 26 items, reduced a number of tariffs, and reiterated its commitment to harmonizing its tariff regime with its neighbors. Enforcement of criminal penalties against intellectual property rights (IPR) violations is weak, and firms that are successfully countering IPR piracy have generally done so through civil court cases. The government has created an intellectual property commission. Rules concerning sanitary and phytosanitary standards, testing, and labeling are well defined, but bureaucratic hur-

dles slow trade opportunities. The government is generally supportive of biotechnology cooperation, although legislation governing biosafety is sparse at best.

A co-member of the International Advisory Group of the Extractive Industries Transparency Initiative (EITI) initiated by the G8, Nigeria's federal government is playing an important role in having volunteered to pilot the new disclosure and validation methodologies. It has completed a comprehensive audit of oil sector payments and government revenues from 1999-2004.

The federal government has passed implementing legislation on public procurement and fiscal transparency, but now it must ensure that Nigeria's 36 states pass and implement similar bills. It is perceived that government contracting remains rife with corruption and kickbacks, and that many state and local officials continue to steal public monies outright.

Nigeria's economic team has enjoyed an excellent reputation in the international community. The team produced an encouraging body of work, notably budgets described as "prudent and responsible" by the IMF and a detailed economic reform blueprint, the National Economic Empowerment and Development Strategy (NEEDS).

Other positive developments have included: (1) government efforts to deregulate fuel prices; (2) Nigeria's participation in the EITI and commitment to the G8 Anticorruption/Transparency Initiative; (3) creation of what had been an effective Economic and Financial Crimes Commission (EFCC), which until 2008 had earned 150 convictions and recovered over $5 billion in mishandled funds; and (4) development of several governmental offices to better monitor official revenues and expenditures.

Nigeria is not on track to meet its Millennium Development Goals because of a lack of policy coordination between the federal, state, and local governments, a lack of funding commitments at the state and local levels; and a lack of available staff to implement and monitor projects on health, poverty, and education.

Investment

Although Nigeria must grapple with its decaying infrastructure and a poor regulatory environment, the country possesses many positive attributes for carefully targeted investment and will expand as both a regional and international market player. Profitable niche markets outside the energy sector, such as specialized telecommunication providers, have developed under the government's reform program. There is a growing Nigerian consensus that foreign investment is essential to realizing Nigeria's vast potential. Companies interested in long-term investment and joint ventures, especially those that use locally available raw materials, will find opportunities in the large national market. However, to improve prospects for success, potential investors must educate themselves extensively on local conditions and business practices, establish a local presence, and choose their partners carefully. The Nigerian Government is keenly aware that sustaining democratic principles, enhancing security for life and property, and rebuilding and maintaining infrastructure are necessary for the country to attract foreign investment.

DEFENSE

Active duty personnel in the three Nigerian armed services total approximately 76,000. The Nigerian Army, the largest of the services, has about 60,000 personnel deployed in two mechanized infantry divisions, one composite division (airborne and amphibious), the Lagos Garrison Command (a division size unit), and the Abuja-based Brigade of Guards. It has demonstrated its capability to mobilize, deploy, and sustain battalions in support of peacekeeping operations in the former Yugoslavia, Angola, Rwanda, Sierra Leone, Liberia, Sudan/Darfur, and Somalia. The Nigerian Navy (7,000) is equipped with frigates, fast attack, and coastal patrol boats. The Nigerian Air Force (9,000) flies transport, trainer, helicopter, and fighter aircraft, but most are currently not operational. Nigeria also has pursued a policy of developing domestic military production capabilities. Before the lifting of sanctions by many Western nations, Nigeria had turned to China, Russia, North Korea, and India for the purchase of military equipment and training.

FOREIGN RELATIONS

Since independence, Nigerian foreign policy has been characterized by a focus on Africa and by attachment to several fundamental principles: African unity and independence; peaceful settlement of disputes; nonalignment and nonintentional interference in the internal affairs of other nations; and regional economic cooperation and development. In pursuing the goal of regional economic cooperation and development, Nigeria helped create the Economic Community of West African States (ECOWAS), which seeks to harmonize trade and investment practices for its 15 West African member countries and ultimately to achieve a full customs union. Over the past decade, Nigeria has played a pivotal role in the support of peace in Africa. It provided the bulk of troops for the UN peacekeeping mission in Sierra Leone (UNAMSIL), the UN Mission in Liberia (UNMIL), and the African Union Mission in Sudan (AMIS), and is anticipated to do so also in Somalia.

Nigeria has enjoyed generally good relations with its immediate neighbors. A longstanding border dispute with Cameroon over the potentially oil-rich Bakassi Peninsula was addressed by International Court of Justice (ICJ) in The Hague in 2002. The ICJ awarded most of the disputed Bakassi Peninsula and maritime rights to Cameroon, and the UN established a Mixed Commission on implementing the ICJ ruling. On June 12, 2006 Nigerian President Obasanjo and Cameroonian President Biya signed an agreement in New York on implementing the ICJ

decision. Nigeria promptly withdrew its troops within 60 days. On August 14, 2008, Nigeria formally ceded Bakassi to Cameroon.

Nigeria is a member of the following international organizations: UN and many of its special and related agencies; World Trade Organization (WTO); International Monetary Fund (IMF); World Bank/IBRD; African Development Bank (AfDB); INTERPOL; Organization of Petroleum Exporting Countries (OPEC); Economic Community of West African States (ECOWAS); African Union (AU); Maritime Organization of West and Central Africa (MOWCA) and several other West African bodies; Commonwealth; Nonaligned Movement (NAM); and Organization of the Islamic Conference (OIC), among others.

U.S.-NIGERIAN RELATIONS

Since the restoration of basic democracy in Nigeria in 1999, the bilateral relationship has continued to improve, and cooperation on many important foreign policy goals, such as regional peacekeeping, has been excellent.

The government has lent strong diplomatic support to U.S. Government counter-terrorism efforts in the aftermath of the September 11, 2001 terrorist attacks. The Government of Nigeria, in its official statements, has both condemned the terrorist attacks and supported military action against the Taliban and Al Qaida. Nigeria also has played a leading role in forging an anti-terrorism consensus among states in Sub-Saharan Africa. An estimated one million Nigerians and Nigerian Americans live, study, and work in the United States, while over 25,000 Americans live and work in Nigeria. President Yar'Adua visited President Bush at the White House on December 13, 2007.

U.S. Foreign Assistance Priorities

Democratic and economic progress in Nigeria is challenged by poor governance, entrenched corruption, internal conflict, ineffective service delivery, and pervasive poverty. Nigeria remains mired near the bottom of the United National Development Program (UNDP) human development index. While there has been notable progress in macroeconomic policy reform over the past few years, these reforms have yet to bring measurable improvements to the lives of the people. U.S. assistance is trying to help Nigeria address these challenges by fostering transparent and accountable governance; engaging civil society and government partners to battle corruption; increasing professionalism of the military and law enforcement agencies; strengthening health and education systems to deliver quality services; growing the non-oil economy; and improving the environment for regional and international trade. With national and local elections scheduled for mid-2011, efforts are also focused on creating an environment for transparent and credible elections.

Peace and Security: Prior decades of military rule had a negative effect on the professional development of the Nigerian armed forces. The Nigerian military is still in need of reform efforts to professionalize the officer and noncommissioned officer corps to include a focus on promoting effective civilian oversight and respect for human rights and the rule of law. U. S. assistance continues to provide equipment and training for Nigerian peacekeeping forces, which are deployed to peacekeeping missions throughout the continent. Funding assists in developing the capacity of government institutions and civil society to prevent, manage, and mitigate conflict. The U.S. program also builds Nigeria's capability to address threats to maritime security, including narcotics trafficking, and attempts to improve Nigeria's human rights record and enhance public trust in the security services.

Governing Justly and Democratically: U.S. funding advances the rule of law by strengthening the capacity and transparency of the justice system and building judicial independence at the federal level. Good governance and anti-corruption reform is enhanced by creating more responsive governance structures at the national and local levels, improving service delivery, and strengthening budget management capacity and fiscal oversight. The United States works directly with a diverse cross-section of Nigerian civil society organizations, building their internal management capacity and strengthening their ability to engage with the government on issues of fiscal accountability, budget monitoring, and extractive industries transparency. To lay the groundwork for credible elections in 2011, the United States will help to build local capacity in managing and coordinating elections infrastructure, and to promote civil society input into electoral and constitutional reform dialogue and oversight of the electoral process.

Investing in People: Helping Nigeria address the fundamental health and education needs of its citizens directly impacts governance, stability, and economic growth. Nigeria ranks 70 out of 71 countries in the 2008 Report on the State of the World's Mothers. The national average maternal mortality is about 800 per 100,000 live births, but the rate is at least three times higher in the northern states. Health-care consumers often opt to forego treatment, or to pay for treatment from unskilled providers. Almost one-third of women receive no antenatal care. Sixty-six percent of deliveries take place in the home, with only 35% assisted by trained health care personnel. The United States supports increased access to quality family planning and reproductive health services, focusing efforts in selected states with high unmet demand. Maternal and child health efforts target routine immunization, polio eradication, birth preparedness, and maternity services, seeking to reduce catastrophic rates of maternal and young child mortality. With Nigeria's child malaria mortality burden of over 300,000

preventable deaths per year, U.S. assistance increases access to proven preventive and curative interventions, including insecticide treated nets, net retreatment kits, and artemisinin combination therapy treatment for children and pregnant women. Nigeria has the largest tuberculosis (TB) burden in Africa. To reduce death and disability, especially in the vulnerable co-infected HIV/AIDS population, U.S. assistance aims to double the case detection rate and halve the incidence of TB over the next 10 years. Funding supports equitable access to quality basic education through teacher training, infrastructure improvement, and community involvement, focusing on public schools as well as Islamiyyah schools that provide both secular and religious education. U.S. assistance fosters higher education partnerships between American and Nigerian universities, focusing on institutions in the north. Through the President's Emergency Plan for AIDS Relief (PEPFAR), Nigeria receives significant support to build partnerships with the host country to provide integrated prevention, care, and treatment programs throughout the country and support orphans and vulnerable children. As a result, in 2007 the World Bank noted that HIV-positive seroprevalence rates decreased to 3.1%.

Economic Growth: Funding will build trade and investment capacity and improve the enabling environment for agriculture and microfinance. The United States will continue to implement activities under the Global Food Security Response that will accelerate the uptake of proven production, processing, and marketing technologies, significantly increase the productivity of selected staple food crops, foster agricultural value chain development, and stimulate job creation through the growth of agribusiness enterprises. Customs regulation and policy reform will enhance regional trade, transport linkages, and smooth supply to regional markets, ensuring adherence to international standards. U.S. assistance will also focus on expanding investment opportunities, which are hampered by limited access to market-driven commercial financial services, including microfinance. U.S. assistance will also help expand access to credit through partnerships with commercial banks and increased capacity of microfinance institutions. The U.S. will partner with Nigeria's Central Bank to improve the policy environment for micro-, small, and medium-sized enterprises.

Ongoing presidential initiatives with Nigeria include the African Growth and Competitiveness Initiative, fighting avian flu, the Initiative to End Hunger in Africa, and the Trans-Sahel Counter-Terrorism Program. Nigeria's eligibility for other regional activities include the Famine Early Warning System; Anti-Corruption Initiative; trafficking in persons; and the Ambassador's Girls Scholarship Fund. Nigeria is a premier participant in the President's Emergency Plan for AIDS Relief (PEPFAR), for which about $467 million was committed in FY 2008.

TRAVEL

Consular Information Sheet

June 2, 2008

Country Description: Nigeria is a developing country in western Africa that has experienced periods of political instability. It has the largest population on the continent, estimated at 144 million people, and its infrastructure is not fully functional or well maintained.

Entry Requirements: A passport and visa are required. The visa must be obtained in advance. Visas cannot be obtained aboard planes or at the airport. Promises of entry into Nigeria without a visa are credible indicators of fraudulent commercial schemes in which the perpetrators

seek to exploit the foreign traveler's illegal presence in Nigeria through threats of extortion or bodily harm. U.S. citizens cannot legally depart Nigeria unless they can prove, by presenting their entry visas, that they entered Nigeria legally. Entry information may be obtained at the Embassy of the Federal Republic of Nigeria, 3519 International Court, NW, Washington, D.C., 20008, telephone (202) 822-1500, or at the Nigerian Consulate General in New York, telephone (212) 808-0301. Overseas, inquiries may be made at the nearest Nigerian embassy or consulate.

Visit the Embassy of Nigeria web site at www.nigeriaembassyusa.org for the most current visa information.

Safety and Security: The Department of State continues to caution U.S. citizens about the possible dangers of travel to some parts of Nigeria. [Please also see the Crime Section below.] In light of the risk of kidnapping, crime, militant activity, or armed attacks, the U.S. Mission restricts the travel of U.S. government personnel to the following states to official travel only: Delta, Bayelsa, Rivers and Akwa Ibom in the Niger Delta, and Edo and Imo in the south. Only essential travel by non-official Americans is recommended to these areas. In addition, the military's Joint Task Force patrols the creeks in the Niger Delta because of ongoing militant and piracy incidents, especially against oil-related facilities or infrastructure, so individuals may be questioned, detained or arrested when traveling in these sensitive areas without evidence of permission from the Nigerian government or for carrying electronic equipment such as cameras, recorders, etc. Periodically, travel by U.S. mission personnel is restricted in certain parts of Nigeria based on changing security conditions, often due to crime, general strikes, or student/political demonstrations or disturbances. See the Department of State's Travel Warning for Nigeria for more information.

For the latest security information, Americans traveling abroad should regularly monitor the Department's Internet web site where the current Travel Warnings and Travel Alerts, including the Worldwide Caution Travel Alert, can be found.

Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S. and Canada, or for callers outside the U.S. and Canada, by calling a regular toll-line at 1-202-501-4444.

Crime: Violent crime committed by individual criminals and gangs, as well as by some persons wearing police and military uniforms, is a problem, especially in Lagos, Abuja and other large cities, although it can occur anywhere. Some visitors and resident Americans have experienced armed muggings, assaults, burglary, carjacking, kidnappings and extortion, often involving violence. Home invasions are on the rise in Lagos, with armed robbers accessing even guarded compounds by following, or tailgating, residents or visitors arriving by car into the compound, subduing guards and gaining entry into homes or apartments. Armed robbers in Lagos also access waterfront compounds by boat. U.S. citizens, as well as Nigerians and other expatriates, have been victims of armed robbery on roads to airports during both daylight and evening hours. Law enforcement authorities usually respond to crimes slowly or not at all, and provide little or no investigative support to victims. U.S. citizens and other expatriates have experienced harassment and shakedowns at checkpoints and during encounters with Nigerian officials.

Nigerian-operated fraud scams, known as 419s, are noted for their cleverness and ingenuity. These scams target foreigners worldwide, posing risks of both financial loss and personal danger to their victims. Scams are often initiated through internet postings or from internet cafes, by unsolicited emails, faxes, and letters, or can involve credit card use. As anywhere else, no one should provide personal or financial information to unknown parties or via Nigerian telephone lines. The expansion of bilateral law enforcement cooperation, which has resulted in numerous raids on commercial fraud premises, has reduced the overall level of overt fraud activity, but new types of sophisticated scams are introduced daily.

American citizens are very frequently the victims of Nigerian confidence artists offering companionship through internet dating websites. These confidence artists almost always pose as American citizens visiting or living in Nigeria who unexpectedly experience a medical, legal, financial or other type of "emergency" that requires the immediate financial assistance of the American citizen in the United States. In these cases, we strongly urge the American citizen in the United States to be very cautious about sending money to any unknown person purportedly acting on their behalf, or traveling to Nigeria to meet someone with whom their sole communications have been via the internet. Other common scams involve a promise of an inheritance windfall, work contracts in Nigeria, or an overpayment for goods purchased on-line. For additional information on these types of scams, see the Department of State's publication, International Financial Scams.

Commercial scams or stings that targets foreigners, including many U.S. citizens, continue to be a problem. One needs to be alert to scams that may involve U.S. citizens in illegal activity, resulting in arrest, extortion or bodily harm. These scams generally involve phony offers of either outright money transfers or lucrative sales or contracts with promises of large commissions or up-front payments, or improperly invoke the authority of one or more ministries or offices of the Nigerian government and may cite, by name, the involvement of a Nigerian government official. In some scams, government stationery and seals are also improperly used to advance the scam. The ability of U.S. consular officers to extricate U.S. citizens from unlawful business deals or scams and their subsequent consequences is extremely limited. U.S. citizens have been arrested by police officials and held for varying periods on charges of involvement in illegal business activ-

ity or scams. Nigerian police or other law enforcement officials do not always inform the U.S. Embassy or Consulate immediately of the arrest or detention of a U.S. citizen. The U.S. Department of Commerce has advisories to the U.S. business community on a variety of issues that should be seriously reviewed with respect to doing business in Nigeria. To check on a business's legitimacy while in the United States, contact the Nigeria Desk Officer at the International Trade Administration, Room 3317, Dept. of Commerce, Washington, D.C. 20230, telephone 1-800-USA-TRADE or (202) 482-5149, fax (202) 482-5198. If you are abroad, contact the nearest U.S. Embassy or Consulate.

The Department of State encourages all travelers abroad to register their travel. The most convenient way to do so would be through the online travel registration page. Travelers may also register in person at the U.S. Embassy in Abuja or the U.S. Consulate General in Lagos. See the section on Registration/Embassy Location below.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

Medical Facilities and Health Information: Medical facilities in Nigeria are poor. Diagnostic and treatment equipment is most often poorly maintained, and many medicines are unavailable. Counterfeit pharmaceuticals are a common problem and may be difficult to distinguish from genuine medications. This is particularly true of generics purchased at local pharmacies or street markets.

While Nigeria has many well-trained doctors, hospital facilities are generally of poor quality with inadequately trained nursing staff. Hospitals often expect immediate cash payment for health services.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's internet site at http://www.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) website at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith/en.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether or not their policy applies overseas and if it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Nigeria is provided for general reference only and may not be totally accurate in a particular location or circumstance.

Roads in many areas are generally in poor condition, causing damage to vehicles and contributing to hazardous traffic conditions. There are few working traffic lights or stop signs. The rainy season from May to October is especially dangerous because of flooded roads and water-concealed potholes.

Excessive speed, unpredictable driving habits, and the lack of basic maintenance and safety equipment on many vehicles are additional hazards. Motorists seldom yield the right-of-way and give little consideration to pedestrians and cyclists. Gridlock is common in urban areas. Chronic fuel shortages have led to long lines at service stations, which disrupt or block traffic for extended periods.

Public transportation vehicles are unsafe due to poor maintenance, high speeds and overcrowding. Motorbikes, known in Nigeria as "okadas," are a common form of public transportation in many cities and pose particular danger to motorists, their own passengers and pedestrians. Motorbike drivers frequently weave in and out of traffic at high speeds and observe no traffic rules. Motorbikes are banned within Abuja's city limits. Passengers in local taxis have been driven to secluded locations where they were attacked and robbed. Several of the victims required hospitalization. The U.S. Mission advises that public transportation throughout Nigeria be avoided.

It is recommended that short-term visitors not drive in Nigeria. A Nigerian driver's license can take months to obtain, and to date an international driving permit is not recognized. Major hotels offer reliable car-hire services complete with drivers. Reliable car-hire services can also be obtained at the customer service centers at the airports in Lagos, Abuja, and Kano. Inter-city travelers must also consider that roadside assistance is extremely scarce, and as noted above medical facilities and emergency care are poor, meaning that being involved in a traffic incident might result in a lack of available medical facilities to treat either minor or life-threatening injuries.

All drivers and passengers are reminded to wear seat belts, lock doors, and raise windows. It is important to secure appropriate automobile insurance. It is also important to be aware that drivers and passengers of vehicles involved in accidents resulting in injury or death have experienced extra-judicial actions, i.e., mob attacks, official consequences such as fines and incarceration or involve-

ment with the victim's family. Night driving should be done with extreme caution, but it is recommended to avoid driving between 6:00 p.m. and 6:00 a.m. as bandits and police roadblocks are more numerous at night. Streets are very poorly lit, and many vehicles are missing one or both headlights, tail lights, and reflectors.

The Government of Nigeria charges the Federal Road Safety Commission with providing maps and public information on specific road conditions. The Federal Road Safety Commission may be contacted by mail at: Ojodu-Isherri Road, PMB 21510, Ikeja, Lagos; telephone [243] (1) 802-850-5961 or [234] (1) 805-684-6911.

Aviation Safety Oversight: AAs there is no direct commercial air service to the United States by carriers registered in Nigeria, the U.S. Federal Aviation Administration (FAA) has not assessed Nigeria'sCivil Aviation Authority for compliance with International Civil Aviation Organization (ICAO) aviation safety standards. For more information, travelers may visit the FAA's web site at http://www.faa.gov/safety/programs_initiatives/oversight/iasa.

The Port Harcourt International Airport, which was closed in mid-2006 for rehabilitation, resumed operations in December 2007 for domestic daylight flights. Installations and improvements needed for international flights and night operations are expected to be completed in 2008.

Special Circumstances: Permission is required to take photographs or videotape any government buildings, airports, bridges, and in areas where the military is operating throughout the country. These sites include, but are not limited to, Federal buildings in the Three Arms Zone (Presidential palace area, National Assembly, Supreme Court/Judiciary) of the capital of Abuja, other government buildings around the country and foreign Embassies and Consulates. Many restricted sites are not clearly marked, and application of these restrictions is subject to interpretation by the Nigerian security services and can result in detention. Permission may be obtained from Nigeria's State Security Services, but even permission may not prevent the imposition of penalties or detention. Penalties for unauthorized photography or videography may include confiscation of the still or video camera, exposure of the film or deletion of film footage, a demand for payment of a fine or bribe, and/or detention, arrest, or physical assault. For these reasons, visitors to Nigeria should avoid taking still photos or videotaping in and around areas that are potentially restricted sites, including any government sites.

The Nigerian currency, the naira, is non-convertible. U.S. dollars are widely accepted. Nigeria is a cash economy, and it is usually necessary to carry sufficient currency to cover the expenses of a planned visit, which makes travelers an attractive target for criminals. Credit cards are rarely accepted beyond a few upscale hotels. Due to credit card fraud in Nigeria and by cohorts in the United States, credit card use should be considered carefully. While Citibank cashes some traveler's checks, most other banks do not. American Express does not have offices in Nigeria; however, Thomas Cook does. Inter-bank transfers are often difficult to accomplish, though money transfer services such as Western Union are available. For further information, visitors may contact the U.S. Embassy or Consulate.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating Nigerian laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Nigeria are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in Nigeria are encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration website so that they can obtain updated information on travel and security within Nigeria and other general information.Americans withoutInternet access may register directly with the nearest U.S. Embassy or Consulate. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency.

The U.S. Embassy is located at 1075 Diplomatic Drive, Central Area, Abuja. American citizens can call [234] (9) 461-4176 during office hours (Monday through Thursday, 7:30 a.m. to 4:30 p.m.; Friday, 7:30 a.m. to 1:30 p.m.). For after-hours emergencies, call [234] (9) 461-4000. The email address for the Consular Section in Abuja is ConsularAbuja@state.gov.

The U.S. Consulate General is located at 2 Walter Carrington Crescent, Victoria Island, Lagos. American citizens can call [234] (1) 261-1215 during office hours (7:30 a.m. to 4:00 p.m.). For after-hours emergencies, call [234] (1) 261-1414, 261-0050, 261-0078, 261-0139, or 261-6477. The e-mail address for the Consular Section in Lagos is Lagoscons2@state.gov.

The Embassy and Consulate website is http://nigeria.usembassy.gov.

Intercountry Adoption

November 2008

The information in this section has been edited from a report available through the U.S. Department of State

Office of Children's Issues. For more information detailed, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Nigeria is not party to The Hague Convention on Protection of Children and Co-operation in Respect of Intercountry Adoption (Hague Adoption Convention).

Nigerian adoption laws are complex and vary from state to state. In general, prospective adoptive parents who intend to adopt a specific child must first obtain temporary custody of the child. Prospective adoptive parents are advised to obtain information on adopting in individual states through the state social welfare office where the adoption will take place.

Who Can Adopt? To bring an adopted child to United States from Nigeria, you must be found eligible to adopt by the United States Government. For detailed information on these requirements for adoption, please review the *Intercountry Adoption* section of this publication and visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

In addition to the United States requirements for prospective adoptive parents, Nigeria also has the following eligibility requirements for prospective adoptive parents.

Residency Requirements: Nigerian law requires that a parent-child relationship be established before the court decision can be considered final. Each state determines the length of time it takes to establish the parent-child relationship.

Age Requirements: In Abia, Akwa-Ibom, Anambra, Bayelsa, Cross River, Ebonyi, Enugu, Imo and Rivers, prospective adoptive parents must be at least 25 years of age and 21 years older than the child. For married couples, at least one parent must meet the age requirements.

Marriage Requirements: Both single individuals and married couples may adopt. Note that a single person will not be allowed to adopt a child of the opposite sex, except in extraordinary circumstances. In most states, married couples must adopt jointly.

Income Requirements: Nigeria does not have any income requirements for intercountry adoptions.

Who Can Be Adopted? In addition to Nigeria's requirements for the adoption eligibility, a child must meet the definition of an orphan under United States law for you to bring him or her home back to the United States.

Nigeria's Adoption Authority: The Magistrate Court (from the state where the child resides)

The Process: The first step in adopting a child from Nigeria is usually to select a licensed agency in the United States that can help with your adoption. Adoption service providers must be licensed by the United States state in which they operate.

To bring an adopted child from Nigeria to the United States, you must apply to be found eligible to adopt (Form I-600A) by the USCIS. If you are eligible to adopt, and a child is available for intercountry adoption, the central adoption authority in Nigeria will provide you with a referral to a child.

Role of the Adoption Authority: The social welfare office of the state where the child is located is considered the adoption authority. The application for adoption originates from the social welfare office of the state where the child is located. The Government office responsible for adoptions in Nigeria is the magistrate court of the state where the child is located.

Role of the Court: In most Nigerian states, the adoption process begins when an application for an adoption order is made in accordance with local requirements and submitted to the registrar of the competent court. The court then assigns a guardian ad litem for the child to represent him/her in the adoption proceedings. The guardian ad litem is the social welfare officer in charge of the area where the juvenile resides, or a probation officer or some other person suitably qualified in the opinion of the court of assignment. The guardian ad litem investigates the circumstances related to the proposed adoption and files a report to the court. The guardian ad litem represents the child's interests until the magistrate questions the prospective adoptive parents and grants the adoption order giving legal custody to the adoptive parents.

Role of Adoption Agencies: The United States Consulate General in Lagos is not aware of any legally recognized Nigerian agencies that assist adopting parents or any licensed Nigerian adoption agencies. Prospective adoptive parents can seek the assistance from a Nigerian attorney to facilitate the adoption process.

Adoption Application: The application is submitted to the registrar of the competent court.

Time Frame: Adoption procedures can take from a few months to over a year depending on the child's state of origin.

Adoption Fees: There are no standard fees charged apart from small filing fees to the court.

Documents Required: The paperwork involved in Nigerian adoptions is extensive and time-consuming to locate. Prospective adoptive parents are advised to consult with a Nigerian attorney about the document requirements for the state where they are adopting. The following is a list of some of the required documents:

- Birth certificates
- Marriage certificates
- Divorce decrees (where applicable)

Additional documents may be requested. If you are asked to provide proof that a document from the United States is authentic, we can help.

For updates on document requirements and information on how to authenticate documents, visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

Bringing Your Child Home: Once your adoption is complete (or you have obtained legal custody of the child), there are a few more steps to take before you can head home. Specifically, you need to apply for several documents for your child before he or she can travel to the United States, such as a birth certificate, a passport or travel document for your child from the country in which he or she was born, and a U.S. Immigration Visa. For detailed and updated information on how to obtain these documents, review the *Intercountry Adoption* section on this publication and visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

Child Citizenship Act: For adoptions finalized abroad: The Child Citizenship Act of 2000 allows your new child to acquire American citizenship automatically when he or she enters the United States as lawful permanent residents. For adoptions finalized in the United States: The Child Citizenship Act of 2000 allows your new child to acquire American citizenship automatically when the court in the United States issues the final adoption decree. To learn more, review the *Intercountry Adoption* section on this publication and visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

After Adoption: What does Nigeria require of the adoptive parents after the adoption? Nigerian law has no post-adoption requirements for adoptive parents. Parents should confirm any post-adoption requirements with their legal representatives.

Travel Warning

December 2, 2008

The U.S. Department of State warns U.S. citizens of the risks of travel to Nigeria and recommends avoiding all but essential travel to the Niger Delta states of Bayelsa, Delta, and Rivers. Violent crime is a problem in Lagos and other large cities as well as on the roads between cities. Tension between some Muslim and Christian communities, and between ethnic groups, occasionally results in violence, but is not directed specifically against American citizens. This replaces the Travel Warning for Nigeria dated October 30, 2007, to note restrictions on travel to the Delta region due to violence and to clarify regions of concern.

American citizens should defer all but essential travel to the Niger Delta states of Bayelsa, Delta, and Rivers because of the continued risks of kidnapping, robbery, and other armed attacks in these areas, especially against oil-related facilities and other infrastructure. A loose alliance of militant groups has conducted a number of attacks, mostly in Rivers state, against oil installations and posts of the Nigerian military's Joint Task Force (JTF), which is attempting to eradicate the militant camps. Since January 2008, over 44 foreign national oil workers or businesspeople in parts of the Niger Delta region have been kidnapped from off-shore and land-based oil facilities, residential compounds, and public roadways. The Nigerian government considers militant camps and surrounding areas in the Delta region states of Delta, Bayelsa, Akwa Ibom, and Rivers to be conflict areas. Travel by foreigners to these areas without prior consultation and coordination with local security authorities is not recommended, as the Nigerian Government may see this activity as inappropriate and potentially illegal. Nigerian authorities detained six American citizens, including journalists, on six separate occasions, in this same region in 2008. The Nigerian government interrogated these Americans for lengthy periods without bringing formal charges, and ultimately deported them. Journalists are required to obtain a license from the Ministry of Information prior to traveling to conflict areas in the Niger Delta region states.

Many foreign oil companies operating in the Niger Delta states of Akwa Ibom, Bayelsa, Delta, and Rivers have implemented "essential travel only" policies for their personnel. The U.S. Mission currently requires advance permission for U.S. Government travel to these states, as well as the states of Edo and Imo, given the safety and security risk assessments, and the U.S. Embassy or Consulate's limited ability to provide assistance to people detained by Nigerian authorities in these states. American citizens who are resident in these Niger Delta states are advised to review their personal security in light of the information contained in this Travel Warning when deciding whether to remain.

Violent crime committed by individuals and gangs, as well as by some persons wearing police and military uniforms, is an ongoing problem, especially at night. Crime is particularly acute in Lagos. Traveling outside of major cities during hours of darkness is not recommended due to both crime and road safety concerns. Visitors to Nigeria, including American citizens, have been victims of armed robbery on the airport road from Lagos and Abuja during both daylight and nighttime hours. Some visitors and resident Americans have experienced armed muggings, assaults, burglary, kidnappings, and extortion, often involving violence, as well as carjackings, roadblock robberies, and armed break-ins.

Religious tension between some Muslim and Christian communities occasionally results in acts of isolated communal violence that could erupt quickly and without warning. So far, American citizens have not been directly targeted. The states of Kano and Kaduna are particularly volatile. Rival ethnic groups have clashed violently in Delta state around Warri city and in North-Central Plateau state.

U.S. citizens who travel to or reside in Nigeria are strongly advised to register through the State Department's travel registration website, https://travelregistration.state.gov/ibrs. Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency.

U.S. citizens should contact the U.S. Embassy in Abuja or the U.S. Consulate General in Lagos for up-to-date information on any restrictions. The U.S. Embassy in Abuja is open Monday-Thursday 7:30 a.m. to 4:30 p.m. and Friday 7:30 a.m. to 1:30 p.m. The U.S. Consulate General in Lagos is open Monday-Thursday from 7:00 a.m. to 4:00 p.m. and Friday 7:00 a.m. to 1:00 p.m. The U.S. Embassy in Abuja can be contacted by phone at [234](9)461-4000. American citizens may contact the U.S. Consulate General in Lagos at [234](1)460-3600. You may also visit the U.S. Mission's website at http://nigeria.usembassy.gov.

U.S. citizens should also consult the Department of State's most recent Country Specific Information for Nigeria and the Worldwide Caution, which are located on the Department's web site at http://www.travel.state.gov. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll-free in the U.S. and Canada, or for callers outside the U.S. and Canada, a regular toll line at 1-202-501-4444. These numbers are available from 8:00 a.m. to 8:00 p.m. Eastern Time, Monday through Friday (except U.S. federal holidays).

NORWAY

Compiled from the October 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Kingdom of Norway

PROFILE

Geography

Area: (including the island territories of Svalbard and Jan Mayen) 385,199 sq. km.; approximately the same size as New Mexico.

Cities: (2007) Capital—Oslo (pop. 839,423, including suburbs). Other cities—Bergen (248,668), Stavanger (212,691, including suburbs) Trondheim (166,304).

Terrain: Rugged with high plateaus, steep fjords, mountains, and fertile valleys. Norway's northern regions lie within the Arctic Circle, where there are borders with Finland and Russia, while much of the long border with Sweden runs through the Scandinavian mountains. This range, sloping to the south-east, is 1,530 km in length and has its highest areas in the south of Norway, where Galdhøpiggen, Norway's highest point, reaches a peak of 2,469 m (8,100 ft). Almost all of Norway is high ground; in the north the country becomes narrower, with mountains overlooking the fjords and the islands along the coast, and in the centre and south the mountains form a high plateau, where there are permanent ice fields. The only area of low ground is around the Oslo fjord and along the coast to Stavanger. The principal rivers are the Glomma, the Lågen and Tanaelv. Some 6% of Norway's total area of 323,802 sq km (125,020 sq miles) is inland water—mostly long, thin lakes. Two-thirds of the country is tundra, rock or snowfields, and one-quarter is forested, so good agricultural land is rare. Less than 3% of Norway is cultivated, and these areas are in the south-east and in the river valleys. The mountains of Norway are rich in minerals; there are deposits of iron ore, copper, titanium, coal, zinc, lead, nickel and pyrites, and large offshore reserves of petroleum and natural gas.

Climate: Temperate along the coast, colder inland. Although Norway crosses the Arctic Circle, the climate is not as cold as might be expected, since the North Atlantic Drift brings warm, damp air to the whole country. The geographical conditions give rise to great climatic variation: it is cooler inland and to the north, where winters are long and dark with much snow, but where the sun shines day and night for part of the summer. It is wetter on the west coast, where about 2,000 mm (78.7 ins) of rain falls annually on Bergen; the mean annual rainfall in the capital, Oslo, is 730 mm, most of which falls during the summer. Temperatures in Oslo are highest in July, when the average is 17.3°C (64°F), and lowest in January, when the average falls to -4.7°C (24°F).

People

Nationality: Noun and adjective—Norwegian(s).

Population: (2007) 4,769,100.

Annual growth rate: (2006) 0.34%.

Population density: (2006) 15.2 per sq. km (excluding inland water).

Ethnic groups: Norwegian (Nordic, Alpine, Baltic), Sami, a racial-cultural minority of 40,000; foreign nationals (415,000) from Nordic and other countries.

Religions: (2004) Church of Norway (Lutheran), 88%; Pentecostal Christian, 1%; Roman Catholic, 1%; Other Christian, 2.4%; Muslim, 1.8%; other, none, or unknown, 8.1%.

Languages: Bokmål Norwegian (official), Nynorsk Norwegian (official), small Sami- and Finnish-speaking minorities, English is widely spoken (Sami is official in six municipalities).

Education: Years compulsory—10. Literacy—100%.

Health: Infant mortality rate (2007)—3.1 deaths/1,000. Life expectancy (2006 est.)—men 78.2 yrs; women 82.7 yrs.

Work force: (2007) 2.5million: Legislators, senior officials and managers—5.8%, Professionals–11.3%, Technicians and associate professionals–25.2%, Clerks–6.9%, Service workers and market sales workers–24.2%, Agricultural, forestry and fishery workers–2.5%, Craft and related trades workers–11.3%, Plant

and machine operators and assemblers–7.3%, Other occupations and unspecified–5.3%.

Government

Type: Hereditary constitutional monarchy.
Independence: 1905.
Constitution: May 17, 1814.
Government branches: Executive—king (chief of state), prime minister (head of government), Council of Ministers (cabinet). The Council is appointed by the monarch in accordance with the will of the Storting, to which the Council is responsible. Legislative—modified unicameral parliament (Storting, 165 members, elected for four years by universal adult suffrage). Judicial—Supreme Court, appellate courts, city and county courts.
Political parties: Labor, Progress, Conservative, Socialist Left, Christian Democratic, Center, Liberal.
Suffrage: Universal over 18.
Political subdivisions: 19 fylker (counties) and 431 municipalities, and Svalbard.
National holidays: (2008) January 1 (New Year's Day); March 20 (Maundy Thursday); March 21 (Good Friday); March 24 (Easter Monday); May 1 (Labor Day, Ascension Day); May 12 (Whit Monday); May 17 (Constitution Day); December 24 (Christmas Eve); December 25-26 (Christmas); December 31 (New Year's Eve).

Economy

GDP: (2007) $347 billion.
Annual growth rate: (2007) 3.2%.
Per capita GDP: (2006) Purchasing power parity $73,800.
Natural resources: Petroleum, natural gas, iron ore, copper, lead, zinc, titanium, pyrites, nickel, fish, timber, hydropower.
Arable land: 2.7%.
Agriculture: Products—dairy, livestock, grain (barley, oats, wheat), potatoes and other vegetables, fruits and berries, furs, wool, pork, beef, veal, fish.
Industry: Types—petroleum and gas, food processing, shipbuilding, pulp and paper products, aluminum, ferroalloys, iron and steel, nickel, zinc, nitrogen, fertilizers, petrochemicals, hydroelectric power, refinery products, timber, mining, textiles, fishing, transport equipment, electronics.
Trade: (2007) Exports (f.o.b.)—$159.2 billion. Major markets: UK 26.8%, Germany 12.3%, Netherlands 10.2%, France 8.3%, US 6.2%, Sweden 7.5%. Imports (f.o.b.)—$ 104.7 billion. Major suppliers: Sweden 14.5%, Germany 13.5%, UK 7%, Denmark 6.2%, China 6%, US 4.8%.
GDP by activity: (2007) Oil and gas—23%; Manufacturing, mining, electricity, building and construction–16%; General Government–14%; VAT etc. 11%; Commodities, vehicle repairs etc.–7%; Communication and transport–6%; Agriculture, forestry and fishing –1%; Other services (commercial, housing, financial, private health/education, hotel & catering etc)–22%.

PEOPLE

Ethnically, Norwegians are predominantly Germanic, although in the far north there are communities of Sami who came to the area more than 10,000 years ago, probably from central Asia. In recent years, Norway has become home to increasing numbers of immigrants, foreign workers, and asylum-seekers from various parts of the world. Immigrants now total over 400,000; some have obtained Norwegian citizenship.

Although the Evangelical Lutheran Church is the state church, Norway has complete religious freedom. Education is free through the university level and is compulsory from ages 6 to 16. At least 12 months of military service and training are required of every eligible male. Norway's health system includes free hospital care, physicians' compensation, cash benefits during illness and pregnancy, and other medical and dental plans. There is a public pension system.

Norway is in the top rank of nations in the number of books printed per capita, even though Norwegian is one of the world's smallest language groups. Norway's most famous writer is the dramatist Henrik Ibsen. Artists Edvard Munch and Christian Krogh were Ibsen's contemporaries. Munch drew part of his inspiration from Europe and in turn exercised a strong influence on later European expressionists. Sculptor Gustav Vigeland has a permanent exhibition in the Vigeland Sculpture Park in Oslo. Musical development in Norway since Edvard Grieg has followed either native folk themes or, more recently, international trends.

HISTORY

The Viking period (9th to 11th centuries) was one of national unification and expansion. The unification of Viking settlements along the Norwegian coast was well advanced by the death, in 1030, of St. Olav, who had overseen the population's conversion to Christianity. A period of civil war ended in the 13th century when Norway expanded its control overseas to parts of the British Isles, Iceland, and Greenland. Norwegian territorial power peaked in 1265, and the following year the Isle of Man and the Hebrides were ceded to Scotland. Competition from the Hanseatic League and the spread of the Black Death weakened the country. The Norwegian royal line died out in 1387, as the country underwent a period of union with Denmark under King Olaf; union with Sweden followed in 1397. Attempts to keep all three countries united failed, with Sweden finally breaking away in 1521. By 1586, Norway had become part of the Danish kingdom.

The Napoleonic War saw Denmark side with France in 1807, following the British attack on Copenhagen. With Sweden joining the coalition against Napoleon in 1813, the Treaty of Kiel in 1814 transferred Norway to the Swedish King following Denmark's defeat. The Norwegians ignored this international agreement and chose the Danish Prince as their king and adopted the liberal Eidsvoll Constitution. After a few months a Swedish-Norwegian union was agreed under the Swedish crown, with Norway being granted its own

parliament (Storting) and government. However, the Swedish King attempted unsuccessfully to revise this constitution in the 1820s and 1830s, and parliamentary control over the executive was only obtained following a struggle during the 1870s and 1880s. Norwegian nationalism was associated with the creation of a national standard for written Norwegian based on dialects, rather than the Danish-based official language. There were numerous disputes between the Norwegian Government and Sweden, notably over requests for a Norwegian consular service to reflect the importance of Norway's expanding merchant fleet. In 1905 the union between the two countries was dissolved following two plebiscites in Norway, one opting for independence and one for a constitutional monarchy. Danish Prince Carl was unanimously elected as King by the

Storting in 1905 and took the name of Haakon VII (after the kings of independent Norway) on his arrival in Norway. Haakon died in 1957 and was succeeded by his son, Olav V, who died in January 1991. Upon Olav's death, his son Harald was crowned as King Harald V.

Norway was a nonbelligerent during World War I, but as a result of the German invasion and occupation during World War II, Norwegians generally became skeptical of the concept of neutrality and turned instead to collective security. During the German occupation 736 Norwegian Jews perished; Norwegians saved more than 900 Jews by hiding them and smuggling them across the border into Sweden. Norway was one of the signers of the North Atlantic Treaty in 1949 and was a founding member of the United Nations. The first UN General Secretary, Trygve Lie, was a Norwegian. Under the terms of the will of Alfred Nobel, the Storting (parliament) elects the five members of the Norwegian Nobel Committee who award the Nobel Peace Prize to champions of peace.

GOVERNMENT

The functions of the king are mainly ceremonial, but he has influence as the symbol of national unity. Although the 1814 constitution grants important executive powers to the king, these are almost always exercised by the Council of Ministers in the name of the king (King's Council). The Council of Ministers consists of a prime minister—chosen by the political parties represented in the Storting—and other ministers. The 169 members of the Storting are elected from 19 fylker (counties) for 4-year terms according to a complicated system of proportional representation. After elections, the Storting divides into two chambers, the Odelsting and the Lagting, which meet separately or jointly depending on the legislative issue under consideration.

The special High Court of the Realm hears impeachment cases; the regular courts include the Supreme Court (17 permanent judges and a president), courts of appeal, city and county courts, the labor court, and conciliation councils. Judges attached to regular courts are appointed by the king in council after nomination by the Ministry of Justice.

Each fylke is headed by a governor appointed by the king in council, with one governor exercising authority in both Oslo and the adjacent county of Akershus.

POLITICAL CONDITIONS

Until the 1981 election, Norway had been governed by majority Labor Party governments since 1935, except for three periods (1963, 1965-71, and 1972-73). The Labor Party lost its majority in the Storting in the 1981 elections.

From 1981 to 1997, governments alternated between Labor minority governments and Conservative-led coalition governments. The first government coalition led by Christian Democrat Kjell Magne Bondevik came to power in 1997, but fell in March 2000 over the issue of proposed gas-fired power plants, opposed by Bondevik due to their impact on climate change. The Labor Party's Jens Stoltenberg, a Brundtland protégé, took over in a minority Labor government but lost power in the September 2001 election when Labor posted its worse performance since World War I. Bondevik once again became Prime Minister, this time as head of a minority government with the Conservatives and Liberals in a coalition heavily dependent upon the right-populist Progress Party.

The September 2005 elections ended the Bondevik government, and the Labor party came back with its most substantial victory in years, securing 60 of the 169 seats in Parliament. While this election result once more made Labor the undisputed heavyweight in Norwegian politics, Stoltenberg, chastened by his previous stint as the head of a minority government, reached out to the far left Socialist Left party and agrarian Center party to form a coalition government that commanded a majority of seats in Parliament. The current government is the first majority government in Norway in over 20 years, but the governing coalition has had to bridge substantial policy differences to build this majority.

The government that took office in October 2005 issued a Northern Policy that represented a compromise between petroleum, fishing and environmental interests in the use of Norway's northern offshore area. This "High North" strategy has remained one of the constant themes of this government and encompasses many of the government's highest priorities, including environmental protection, responsible development of energy resources, maintaining a security presence in the Arctic and developing Norway's relations with Russia.

Principal Government Officials

Last Updated: 11/12/08

King: **HARALD V**
Prime Minister: **Jens STOLTENBERG**
Min. of Children & Equality: **Anniken HUITFELDT**
Min. of Culture & Church Affairs: **Trond GISKE**
Min. of Defense: **Anne-Grete STROM-ERICHSEN**
Min. of Education: **Bard Vegar SOLHJELL**
Min. of the Environment & Development Cooperation: **Erik SOLHEIM**
Min. of Finance: **Kristin HALVORSEN**
Min. of Fisheries & Coastal Affairs: **Helga PEDERSEN**
Min. of Food & Agriculture: **Lars Peder BREKK**
Min. of Foreign Affairs: **Jonas Gahr STORE**
Min. of Health & Social Care: **Bjarne Hakon HANSSEN**
Min. of International Development: **Erik SOLHEIM**
Min. of Justice & Police: **Knut STORBERGET**
Min. of Knowledge: **Oystein DJUPEDAL**
Min. of Labor & Social Affairs: **Dag Terje ANDERSEN**

Min. of Local Govt. & Regional Development: **Magnhild Meltveit KLEPPA**
Min. of Modernization: **Heidi Grande ROYS**
Min. of Petroleum & Energy: **Terje RIIS-JOHANSEN**
Min. of Research & Higher Education: **Tora AASLAND**
Min. of Trade & Industry: **Sylvia BRUSTAD**
Min. of Transport & Communications: **Liv Signe NAVARSETE**
Governor, Bank of Norway: **Svein GJEDREM**
Ambassador to the US: **Wegger Christian STROMMEN**
Permanent Representative to the UN, New York: **Johan Ludvik LOVALD**

Norway maintains an embassy in the United States at 2720 34th Street NW, Washington, DC 20008 (tel. 202-333-6000) and consulates in Houston, Minneapolis (may be closed in 2008), New York, and San Francisco.

ECONOMY

Norway is one of the world's richest countries in per capita terms. It has an important stake in promoting a liberal environment for foreign trade. Its large shipping fleet is one of the most modern among maritime nations. Metals, pulp and paper products, chemicals, shipbuilding, and fishing are the most significant traditional industries.

Norway's emergence as a major oil and gas producer in the mid-1970s transformed the economy. Large sums of investment capital poured into the offshore oil sector, leading to greater increases in Norwegian production costs and wages than in the rest of Western Europe up to the time of the global recovery of the mid-1980s. The influx of oil revenue also permitted Norway to expand an already extensive social welfare system. Norway has established a state Petroleum Fundthat exceeded $388 billion by end of December 2007. The fund is primarily designed to help finance government programs once oil and gas resources become depleted. Norway is currently enjoying large foreign trade surpluses thanks to high oil prices. Although Norway's unemployment rate has had a slight increase due to the international credit crisis it still remains low (2.8%- range). As yet, the country does not have a significant industrial or manufacturing base and, in banking and financial services, the country is in the process of liberalizing and consolidating the industry. Norway's restricted labor market has limited the country's ability for mainland growth, although growth in the service sector has been stronger than in manufacturing. Labor costs have increased at a rate higher than its major trade rivals, causing a continued loss in Norway's competitive advantage. The Organization for Economic Cooperation and Development (OECD) has applauded Norway's strong economy, with growth expected to continue into 2008.

Norway voted against joining the European Union (EU) in a 1994 referendum. With the exception of the agricultural and fisheries sectors, however, Norway enjoys free trade with the EU under the framework of the European Economic Area. This agreement aims to apply the four freedoms of the EU's internal market (goods, persons, services, and capital) to Norway. As a result, Norway normally adopts and implements most EU directives. The present government has agreed not to open the question of full membership of the EU during the 2005–09 legislative term. Norwegian monetary policy is aimed at maintaining a stable exchange rate for the krone against European currencies, of which the euro is a key operating parameter. Norway is not a member of the EU's Economic and Monetary Union and does not have a fixed exchange rate. Its principal trading partners are in the EU; the United States ranks sixth.

Energy Resources

Offshore hydrocarbon deposits were discovered in the 1960s, and development began in the 1970s. The growth of the petroleum sector has contributed significantly to Norwegian economic vitality. Current petroleum production capacity is approximately 2.6 million barrels per day. Production in gas has increased rapidly during the past several years as new fields are opened, with crude oil production in decline. Total production in 2007 was about 238 million cubic meters of oil equivalents, approximately 50% of which was crude oil. This represents a decline in crude oil production over the past year, accompanied by sharp increases in gas and liquefied natural gas (LNG) production. Hydropower provides nearly all of Norway's electricity, and all of the gas and most of the oil produced is exported. Production increased significantly in the 1990s as new fields come on stream.

Norway is the world's fifth-largest oil exporter and third largest gas exporter, providing much of western Europe's crude oil and gas requirements. In 2006, Norwegian oil and gas exports accounted for over 50% of total merchandise exports. In addition, offshore exploration and production have stimulated onshore economic activities. Foreign companies, including many American ones, participate actively in the petroleum sector.

Petroleum resources are expected to become less abundant and less commercially exploitable over time and may be reaching a plateau. However, innovative use of extraction technologies has extended the lives of fields far beyond their expected closures. Declines in petroleum extraction revenue may be offset by increased revenue from the extraction of natural gas. For example, Norwegian natural gas production is projected to increase through new and existing fields, such as Snohvit and Troll. Note, however, that Snohvit's production has been severely affected by significant technological setbacks, including a cessation of operations in March 2008. Further, future gas production from the Troll (West) field has been limited by the government due to the field's declining oil resources. Given that the energy industry affects virtually every sector in the economy, diversification remains Norway's greatest challenge.

FOREIGN RELATIONS

Norway supports international cooperation and the peaceful settlement of disputes, recognizing the need for maintaining national defense through collective security. Accordingly, the cornerstones of Norwegian policy are active membership in the North Atlantic Treaty Organization (NATO) and support for the United Nations and its specialized agencies. Norway also pursues a policy of economic, social, and cultural cooperation with other Nordic countries—Denmark, Sweden, Finland, and Iceland—through the Nordic Council and bilaterally. In addition to strengthening traditional ties with developed countries, Norway seeks to build friendly relations with developing countries and has undertaken humanitarian and development aid efforts with selected African and Asian nations. Norway also is dedicated to encouraging democracy, assisting refugees, promoting a global response to climate change and protecting human rights throughout the world.

U.S.-NORWAY RELATIONS

The United States and Norway enjoy a long tradition of friendly association. The relationship is strengthened by the millions of Norwegian-Americans in the United States and by about 20,000 U.S. citizens residing in Norway. The two countries enjoy an active cultural exchange, both officially and privately.

TRAVEL

Consular Information Sheet

November 10, 2008

Country Description: Norway is a highly developed stable democracy with a modern economy. The cost of living in Norway is high and tourist facilities are well developed and widely available.

Entry Requirements: Norway is a party to the Schengen agreement. As such, U.S. citizens may enter Norway for up to 90 days for tourist or business purposes without a visa. The passport should be valid for at least three months beyond the period of stay. For further details about travel into and within Schengen countries, please see our fact sheet.

Contact the Royal Norwegian Embassy at 2720 34th Street NW, Washington, DC 20008-2714, Tel: 1-202-333-6000, web site: http://www.norway.org or the nearest Norwegian Consulate. Consulates are located in Houston, Minneapolis, New York City, and San Francisco. Information can also be obtained from the Norwegian Directorate of Immigration at http://www.udi.no.

Safety and Security: Norway remains largely free of terrorist incidents. However, like other countries in the Schengen area, Norway's open borders with its European neighbors allow the possibility of terrorist groups entering/exiting the country with anonymity. The U.S. government remains deeply concerned about the heightened threat of terrorist attacks against U.S. citizens and interests abroad. In the post-9/11 environment, Norway shares with the rest of the world an increased threat of international Islamic terrorism. Norway was among a list of countries named as legitimate targets in al-Qa'ida audiotapes released as recently as, 2006. Americans are reminded to remain vigilant with regard to their personal security and to exercise caution.

For the latest security information, Americans traveling abroad should regularly monitor the State Department's web site, where the current Worldwide Caution Travel Alert, Travel Warnings and Travel Alerts can be found.

Up-to-date information on security can also be obtained by calling 1-888-407-4747 toll free in the United States, or, for callers outside the United States and Canada, a regular toll line at 1-202-501-4444.

Crime Information: Norway has a relatively low crime rate. Most crimes involve the theft of personal property. Residential burglaries, auto theft, and vandalism to parked cars also occur. Most high-end value vehicles, especially in Oslo, have visible alarm system indicators to discourage joy riders or thieves. Persons who appear affluent or disoriented may become targets of pick-pockets and purse-snatchers, especially during the peak tourist season (May-September). Thieves frequently target tourists in airports, train stations, and hotels, particularly lobby/reception and restaurant areas.

Often such thieves work in pairs and use distraction as a method to steal purses or briefcases. While passports are frequently stolen in the course of these thefts, money, credit cards, and jewelry are the actual objects of interest. In some cases stolen passports

are recovered. Violent crime, although rare, occurs and appears to be increasing. Some thieves or burglars may have weapons.

In many countries around the world, counterfeit and pirated goods are widely available. Transactions involving such products may be illegal under local law. In addition, bringing them back to the United States may result in forfeitures and/or fines. More information on this serious problem is available at http://www.cybercrime.gov/18usc2320.htm.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. embassy or consulate for assistance. The embassy/consulate staff can, for example, assist you to find appropriate medical care, to contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney, if needed.

Norway has a program to provide financial compensation to victims who suffer serious criminal injuries. Claimants can obtain application forms from the Norwegian Criminal Injuries Compensation Authority at http://www.voldsoffererstatning.no/index.php?id=10. Please contact the U.S. Embassy in Oslo for further information. For further information about possible U.S. compensation, see our information for Victims of Crime.

The national emergency telephone numbers in Norway, equivalent to the "911" emergency line, are: Police 112, Fire 110, Ambulance 113.

Medical Facilities And Health Information: Medical facilities are widely available and of high quality, but may be limited outside the larger urban areas. The remote and sparse populations in northern Norway, and the dependency on ferries to cross fjords of western Norway, may affect transportation and ready access to medical facilities. The U.S. Embassy in Oslo maintains a list of emergency clinics in major cities.

The U.S. Department of State is unaware of any HIV/AIDS entry restrictions for visitors to or foreign residents of Norway.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's web site at http://wwwn.cdc.gov/travel.

For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith/en.

Medical Insurance: Healthcare in Norway is very expensive and healthcare providers sometimes require payment at time of service. The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Norway is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

Public transportation in Norway is generally safe, and the maintenance and condition of urban roads are generally good. Rural road conditions are fair and the availability of roadside assistance is limited. Most roadways beyond the city limits of Oslo and other major cities tend to be simple two-lane roads. In mountainous areas of Norway, the roads also tend to be narrow and winding, with many tunnels. The northerly latitude can also cause road conditions to vary greatly, depending on weather and time of year. Many mountain roads are closed due to snow from late fall to late spring. The use of winter tires is mandatory on all motor vehicles from November to April.

Norwegian law requires that drivers always use their vehicle headlights when driving. Norwegian law also requires drivers to yield to vehicles coming from the right. In some, but not all, instances, major roads with "right of way" are marked. Seatbelts are mandatory for drivers and passengers.

Norway has some of the strictest laws in Europe concerning driving under the influence of alcohol; those laws prescribe heavy penalties for drivers convicted of having even a low blood alcohol level. Frequent road checks with mandatory breathalyzer tests and the promise of stiff jail sentences encourage alcohol-free driving. The maximum legal blood alcohol content level for driving a car in Norway is .02 per cent.

Automatic cameras placed by the police along roadways help to maintain speed limits, which are often lower than in other European countries. Fines–and sometimes even jail time–are imposed for violations.

For specific information concerning Norwegian driver's permits, vehicle inspection, road tax and mandatory insurance, contact the Norwegian Tourist Board office at PO Box 4649, Grand Central Station, New York, New York 10163-4649 (tel.: 212-885-9700; fax: 212/885-9710) or visit their web site at http://www.norway.org/travel.

Aviation Safety Oversight: The U.S. Federal Aviation Administration (FAA) has assessed the Government ofNorway's Civil Aviation Authority as being in compliance with International Civil Aviation Organization (ICAO) aviation safety standards for oversight of Norway's air carrier

operations. For more information, travelers may visit the FAA's web site at http://www.faa.gov.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating Norway'slaws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Norway are strict and convicted offenders can expect long jail sentences and heavy fines. Engaging in illicit sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living in or visiting Norway are encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration web site, https://travelregistration.state.gov, and to obtain updated information on travel and security within Norway.

Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency.

The U.S. Embassy is located in Oslo near the Royal Palace at Henrik Ibsensgate 48; tel. 47/2244-8550 (24 hours), consular fax 47/2256-2751. The Embassy's web site is http://norway.usembassy.gov.

Intercountry Adoption

October 2006

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is based on public sources and current understanding. Questions involving foreign and U.S. immigration laws and legal interpretation should be addressed respectively to qualified foreign or U.S. legal counsel.

Please Note: There are very few children eligible for intercountry adoption from Norway, with a long waiting list of Norwegian prospective adoptive parents. While legally possible, intercountry adoption of a Norwegian orphan by foreigners is unlikely.

Patterns of Immigration: For at least the last five years, no Norwegian orphans have received U.S. immigrant visas. Within Norway, in 2003 (the latest year for which statistics are available), 870 orphans were adopted, most of them step-children.

Adoption Authority: The Norwegian Directorate for Children, Youth and Family Affairs (known by the Norwegian acronym "Bufdir"), a unit of the Ministry of Children and Family Affairs, is the authority on both domestic and intercountry adoptions in Norway. The Act on Adoption, which came into force on January 1, 1987, and government guidelines constitute the regulations for adoptions in Norway. Bufdir supervises the work of the Norwegian adoption organizations, maintains central adoption records and assigns a government grant to those who receive approval to adopt a child. Bufdir is also the Central Authority for the Hague Intercountry Adoption Convention, which came into force for Norway January 1, 1998.

Barne-ungdoms-og familiedirektoratet
Postboks 8113 Dep
Universitetsgata 7, 0032 Oslo
Tel: 47/2404-4000
Fax: 47/2404-4001
Email: post@bufdir.no
Web sites: www.bufdir.no

Eligibility Requirements for Adoptive Parents: Applications by parents who are 45 years or older than the prospective child are given additional scrutiny. There are cases, for example, in which one of the spouses is considerably younger than the other, or the family has already adopted a child. The prospective parents must show documents certifying their good health status, stable financial situation and have a clean police record. Those who apply together must be married, generally for at least two years. Persons living in registered partnership are not eligible to apply to adopt a child from outside Norway.

Residency Requirements: Temporary visitors to Norway cannot apply to adopt in Norway.

Time Frame: In general, it takes close to a year to prepare the required reports about the applying family.

Adoption Agencies and Attorneys: Prospective adoptive parents are advised to fully research any adoption agency or facilitator they plan to use for adoption services. For U.S.-based agencies, it is suggested that prospective adoptive parents contact the Better Business Bureau and/or the licensing office of the appropriate state government agency in the U.S. state where the agency is located or licensed.

Adoption Procedures: In nearly all cases, the adoption is arranged through one of three accredited adoption organizations (specified on Bufdir web site). In intercountry adoptions, the Professional Board for Adoptions, composed of a medical doctor and two psychologists/psychiatrists, is responsible for the procedure.

If Bufdir reaches a negative conclusion about a requested adoption, the matter may be appealed to the Ministry of Children and Family Affairs.

Required Documents: Documentary requirements include, but are not limited to:

- a social report detailing the prospective adoptive parents' background, marriage, everyday life, interests and motives for wanting to adopt a child from abroad;
- the social worker's written impression of the applicants and their suitability to be adoptive parents;
- birth and marriage certificates;
- doctor's reports;
- police certificates; and,
- documentation of financial standing.

Royal Norwegian Embassy in Washington
2720 34th St., NW
Washington, D.C. 20008
Tel: 202/333-6000

Additional Information: Specific questions about adoption in Norway may be addressed to the U.S. Embassy in Norway. General questions regarding intercountry adoption may be addressed to the Office of Children's Issues, U.S. Department of State, CA/OCS/CI, SA-29, 4th Floor, 2201 C Street, NW, Washington, D.C. 20520-4818, toll-free Tel: 1-888-407-4747.

International Parental Child Abduction

November 2008

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *International Child Abduction* section of this book and review current reports online at www.travel.state.gov/childabduction.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is provided for general information only. Questions involving interpretation of specific foreign laws should be addressed to foreign legal counsel.

Procedures: The Ministry of Justice and Police, the Department of Civil Affairs, has been designated as the Central Authority for Norway for the Hague Convention on the Civil Aspects of International Child Abduction.

Being an administrative authority, the Ministry itself has no jurisdiction to make a decision on whether the child should be returned or not. This jurisdiction belongs entirely to the courts.

Immediately upon receiving an application from the Central Authority of another contracting state, the Ministry will give the application a preliminary examination, to ensure that it is in conformity with the formal conditions laid down by the Convention, and that the documents required in Article 8 are enclosed.

If that is not the case, the application will immediately by returned to the requesting state for completion, or the lacking information will be asked for more informally by telephone or telefax to the requesting state. If the documents are not in English or Norwegian, the transmitting authority will be asked to provide a translation.

When all formal requirements are met, the application will immediately be sent to the competent local court for decision. The Act of 8 July 1988, Section 18, paragraph 1, lays down that the enforcement provisions of the Children's Act of 8 April 1981 and the general provisions of the Enforcement of Claims Act of 26 June 1992, shall apply correspondingly to decisions on the return of children.

The courts may also adopt an interim decision for the period up to the final judgment in the case, and may even adopt an interim decision before proceedings are instituted.

According to the Act of 8 July 1988, Section 18, paragraph 2, the judge may order that the Child Welfare Authorities shall take over custody of the child until the Hague application is finally decided, but this seldom happens.

According to the Act of 8 July 1988, Section 16, paragraph 1, the courts are to act quickly and without delay in dealing with applications for return of abducted children from another contracting state. If a court has not decided an application within six weeks of the application's filing, it shall report to the Central Authority of the requesting state the reasons for the delay—if the applicant or requesting state so demand.

Norway has made a reservation according to Article 42 of the Convention, provided for in Article 26, third paragraph. Norway will therefore not be obliged to assume any costs referred to in Article 26 that result from the participation of legal counsel or advisers, or from court proceedings, except insofar as those costs may be covered by Norway's system of legal aid and advice. An application for legal aid can be forwarded

through the Ministry to the competent authority (the County Governor).

Please note that the authority will do a means test of the application, based on the applicant's gross, net and capital income.

Norway has also made a reservation to Article 24 of the Convention. The Ministry will read and answer correspondence only in English. Correspondence in other languages will have to be translated by the submitting authority. The Office of Children's Issues is the U.S. Central Authority for the Hague Abduction Convention.

Central Authority for Norway
The Royal Norwegian Ministry of Justice and Police
Department of Civil Affairs
PO Box 8005 DEP.

E-mail: postmottak@jd.dep.no

More Information: For further information and/or assistance in either preventing or responding to an international parental child abduction, contact the Office of Children's Issues, U.S. Department of State at (202) 736-9090 or visit its web site at www.travel.state.gov/childabduction.

OMAN

Compiled from the June 2007 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Sultanate of Oman

PROFILE

Geography

Area: About 309,500 sq. km. (approximately the size of the State of New Mexico). It is bordered on the north by the United Arab Emirates (U.A.E.), on the northwest by Saudi Arabia, and on the southwest by the Republic of Yemen. The Omani coastline stretches 3,165 km.

Cities: Capital—Muscat. Other cities—Salalah, Nizwa, Sohar, Sur.

Terrain: Mountains, plains, and arid plateau.

Climate: Hot and humid along the coast; hot and dry in the interior; summer monsoon in the far south.

People

Nationality: Noun—Oman. Adjective—Omani(s).

Population: (2006 est.) 3.20 million (includes 577,000 non-nationals).

Annual growth rate: (2006 est.) 3.2%.

Ethnic groups: Arab, Baluchi, East African (Zanzabari), South Asian (Indian, Pakistani, Bangladeshi).

Religions: Ibadhi; Sunni Muslim, Shia Muslim, Hindu, Christian.

Languages: Arabic (official), English, Baluchi, Urdu, Swahili, Hindi and Indian dialects.

Education: Literacy—approx. 80% (total population).

Health: (2006 est.) Infant mortality rate—18.28 deaths/1,000 live births. Life expectancy—73.62 years.

Work force: 920,000 total; Agriculture and fishing—approx. 50%.

Government

Type: Monarchy.

Constitution: None. On November 6, 1996, Sultan Qaboos issued a royal decree promulgating the Basic Statute which clarifies the royal succession, provides for a prime minister, bars ministers from holding interests in companies doing business with the government, establishes a bicameral parliament, and guarantees basic rights and responsibilities for Omani citizens.

Government branches: Executive—Sultan. Legislative—Majlis Oman (bicameral: State Council and Consultative Council). Judicial—Civil courts are divided into four departments: Criminal courts handle cases under the penal code; Shari'a (Islamic law) courts oversee personal status and family law issues; Commercial courts adjudicate business and commercial matters; Labor courts oversee labor and employment cases.

Political parties: None.

Suffrage: Universal adult.

Political subdivisions: Eight administrative regions—Muscat Governorate, Dhofar Governorate, Musandam Governorate, Al-Buraimi Governorate, Al Batinah, Al Dhahirah, Al Dakhliya, Al Shariqiya, Al Wusta. There are 61 districts (wilayats).

Economy

GDP: (2006 est.) $39.50 billion.

Per capita GDP: (2006 est.) $13,845.

Real GDP growth rate: (2006 est.) 6.6%.

Natural resources: Oil, natural gas, copper, marble, limestone, gypsum, chromium.

Agriculture and fisheries: (2.1% of GDP). Products—dates, bananas, mangoes, alfalfa, other fruits and vegetables. Fisheries—kingfish, tuna, other fish, shrimp, lobster, abalone.

Industry: Types—crude petroleum (not including gas liquids) about 750,000 barrels per day; construction, petroleum refinery, copper mines and smelter, cement and various light industries.

Trade: (2006 est.) Exports—$18.69 billion. Major markets—Japan (22.1%), China (15.2%), Thailand (12.6%), South Korea (19.9%), U.A.E. (9.4%). Imports—$8.83 billion: machinery, transportation equipment, manufactured goods, food, livestock, lubricants. Major suppliers—U.A.E. 27.6%, Japan 16.7%, U.K. 7.4%, U.S. 6.9%, Germany 5%.

PEOPLE

About 55% of the population lives in Muscat and the Batinah coastal plain northwest of the capital; about 215,000 live in the Dhofar (southern) region, and about 30,000 live in the remote Musandam Peninsula on the Strait of Hormuz. Some 660,000 expatriates live in Oman, most of whom are guest workers from South Asia, Egypt, Jordan, and the Philippines.

Since 1970, the government has given high priority to education in order to develop a domestic work force, which the government considers a vital factor in the country's economic and social progress. In 1986, Oman's first university, Sultan Qaboos University, opened. It has continued to expand, recently adding a law college, and remains the country's only major public university. In total, there are about 20 public post-secondary education institutions in Oman, including technical colleges, teacher training colleges, and health institutes. More than 300 full and partial scholarships are awarded each year for study abroad.

There are three private universities and 20 private post-secondary education institutions in Oman, including a banking college, a fire and safety college, a dentistry college, and business and management colleges. Most of these public and private post-secondary education institutions offer four-year degrees, while the remainder provide two-year post-secondary diplomas. Since 1999, the government has embarked on reforms in higher education designed to meet the needs of a growing population. Approximately 40% of Omani high school graduates pursue some type of post-secondary education.

HISTORY

Oman adopted Islam in the seventh century A.D., during the lifetime of the Prophet Muhammad. Ibadhism, a form of Islam distinct from Shiaism and the "Orthodox" schools of Sunnism, became the dominant religious sect in Oman by the eighth century A.D. Oman is the only country in the Islamic world with a majority Ibadhi population. Ibadhism is known for its "moderate conservatism." One distinguishing feature of Ibadhism is the choice of ruler by communal consensus and consent.

Contact with Europe was established in 1508, when the Portuguese conquered parts of Oman's coastal region. Portugal's influence predominated for more than a century. Fortifications built during the Portuguese occupation can still be seen at Muscat.

Except for a period when Persia conquered parts of Oman, Oman has been an independent nation. After the Portuguese were expelled in 1650 and while resisting Persian attempts to establish hegemony, the Sultan of Oman extended his conquests to Zanzibar, other parts of the eastern coast of Africa, and portions of the southern Arabian Peninsula. During this period, political leadership shifted from the Ibadhi imams, who were elected religious leaders, to hereditary sultans who established their capital in Muscat. The Muscat rulers established trading posts on the Persian coast and also exercised a measure of control over the Makran coast (now Pakistan). By the early 19th century, Oman was the most powerful state in Arabia and had a major presence on the East African coast.

Oman was the object of Franco-British rivalry throughout the 18th century. During the 19th century, Oman and the United Kingdom concluded several treaties of friendship and commerce. In 1908, the British entered into an agreement of friendship. Their traditional association was confirmed in 1951 through a new treaty of friendship, commerce, and navigation by which the United Kingdom recognized the Sultanate of Oman as a fully independent state.

When Sultan Sa'id bin Sultan Al-Busaid died in 1856, his sons quarreled over his succession. As a result of this struggle, the Omani empire—through the mediation of the British Government under the "Canning Award"—was divided in 1861 into two separate principalities—Zanzibar, with its East African dependencies, and Muscat and Oman. Zanzibar paid an annual subsidy to Muscat and Oman until its independence in early 1964.

During the late 19th and early to mid-20th centuries, the sultan in Muscat faced a rebellion by members of the Ibadhi sect residing in the interior of Oman, centered around the town of Nizwa, who wanted to be ruled exclusively by their religious leader, the Imam of Oman. This conflict was resolved temporarily by the Treaty of Seeb in 1920, which granted the imam autonomous rule in the interior, while recognizing the sovereignty of the sultan elsewhere.

Following the discovery of oil in the interior, the conflict flared up again in 1954, when the new imam led a sporadic 5-year rebellion against the sultan's efforts to extend government control into the interior. The insurgents were defeated in 1959 with British help. The sultan then terminated the Treaty of Seeb and eliminated the office of the imam. In the early 1960s, the imam, exiled to Saudi Arabia, obtained support from his hosts and other Arab governments, but this support ended in the 1980s.

In 1964, a separatist revolt began in Dhofar Province. Aided by communist and leftist governments such as the former South Yemen (People's Democratic Republic of Yemen), the rebels formed the Dhofar Liberation Front, which later merged with the Marxist-dominated Popular Front for the Liberation of Oman and the Arab Gulf (PFLOAG). The PFLOAG's declared intention was to overthrow all traditional Arab Gulf regimes. In mid-1974, PFLOAG shortened its name to the Popular Front for the Liberation of Oman (PFLO) and embarked on a political rather than a military approach to gain power in the other Gulf states, while continuing the guerrilla war in Dhofar.

With the help of British advisors, Sultan Qaboos bin Sa'id assumed power on July 23, 1970, in a palace coup

directed against his father, Sa'id bin Taymur, who later died in exile in London. The new sultan was confronted with insurgency in a country plagued by endemic disease, illiteracy, and poverty. One of the new sultan's first measures was to abolish many of his father's harsh restrictions, which had caused thousands of Omanis to leave the country, and to offer amnesty to opponents of the previous regime, many of whom returned to Oman. He also established a modern government structure and launched a major development program to upgrade educational and health facilities, build a modern infrastructure, and develop the country's natural resources.

In an effort to end the Dhofar insurgency, Sultan Qaboos expanded and re-equipped the armed forces and granted amnesty to all surrendered rebels while vigorously prosecuting the war in Dhofar. He obtained direct military support from the U.K., Iran, and Jordan. By early 1975, the guerrillas were confined to a 50-square kilometer (20-sq. mi.) area near the Yemen border and shortly thereafter were defeated. As the war drew to a close, civil action programs were given priority throughout Dhofar and helped win the allegiance of the people. The PFLO threat diminished further with the establishment of diplomatic relations in October 1983 between South Yemen and Oman, and South Yemen subsequently lessened propaganda and subversive activities against Oman. In late-1987, Oman opened an embassy in Aden, South Yemen, and appointed its first resident ambassador to the country.

Since his accession in 1970, Sultan Qaboos has balanced tribal, regional, and ethnic interests in composing the national administration. The Council of Ministers, which functions as a cabinet, consists of 30 ministers (but only 28 ministries), all directly appointed by Qaboos. The bicameral Majlis Oman's mandate is to review legislation pertaining to economic development and social services prior to its becoming law. The elected Majlis al-Shura (Consultative Council) may request ministers to appear before it. In early 2003, Sultan Qaboos declared universal suffrage for the October 2003 Majlis al-Shura elections. Two women were elected to sit with 81 male colleagues in those elections, which were observed to be free and fair. Roughly 194,000 Omani men and women, or 74% of registered voters, participated in the elections. Since 2003, Sultan Qaboos has also expanded the Majlis al-Dawla, or

State Council, to 59 members from 53, including nine women. The State Council acts as the upper chamber in Oman's bicameral representative body.

In November 1996, Sultan Qaboos presented his people with the "Basic Statute of the State," Oman's first written "constitution." It guarantees various rights within the framework of Shariah and customary law. It partially resuscitated long dormant conflict-of-interest measures by banning cabinet ministers from being officers of public shareholding firms. Perhaps most importantly, the Basic Statute provides rules for the royal succession.

The northern tip of Oman, called the Musandam Peninsula, is strategically located on the Strait of Hormuz, the entrance to the Gulf, 35 miles directly opposite Iran. Oman is concerned with regional stability and security, given tensions in the region, the proximity of Iran and Iraq, and the potential threat of political Islam. Oman maintained its diplomatic relations with Iraq throughout the Gulf War while supporting the UN allies by sending a contingent of troops to join coalition forces and by opening up to prepositioning of weapons and supplies. In addition, since 1980 Oman and the U.S. have been parties to a military cooperation agreement, which was revised and renewed in 2000. Oman also has long been an active participant in efforts to achieve Middle East peace.

Following the terrorist attacks on the United States in September 2001, the Omani Government at all levels pledged and provided impressive support to the U.S.-led coalition against terrorism. Oman is a signatory of most UN-sponsored anti-terrorism treaties.

GOVERNMENT AND POLITICAL CONDITIONS

Sultan Qaboos bin Sa'id rules with the aid of his ministers. His dynasty, the Al Sa'id, was founded about 250 years ago by Imam Ahmed bin Sa'id Al Bu Said. Sultan Qaboos is a direct descendant of the 19th century ruler, Sa'id bin Sultan, who first opened relations with the United States in 1833. The Sultanate has neither political parties nor legislature, although the bicameral representative bodies provide the government with advice.

Oman's judicial system traditionally has been based on the Shari'a—the Quranic laws and the oral teachings of the Islamic Prophet Muhammad. Traditionally, Shari'a courts fell under the jurisdiction of the Ministry of Justice, Awqaf, and Islamic Affairs (since divided into the Ministry of Justice and the Ministry of Endowments and Religious Affairs). Oman's first criminal code was not enacted until 1974.

In 1999, royal decrees placed the entire court system under the financial supervision of the Ministry of Justice, though the 1996 Basic Law ensures the independence of the judiciary. An independent Office of the Public Prosecutor also has been created (formerly a part of the Royal Oman Police), as has a supreme court. Regional court complexes are envisioned to house the various courts, including the courts of first instance for criminal cases and Shariah cases (family law and inheritance).

The country is divided into 61 administrative districts (wilayats), presided over by appointed executives (walis) responsible for settling local disputes, collecting taxes, and maintaining peace. Most wilayats are small in area, but can vary considerably in population. The 61 wilayats are divided into eight regions. Four of those regions (Muscat, Dhofar, Musandam, and Buraimi) have been accorded a special status as governorates. The governors of those four regions are appointed directly by the Sultan and hold Minister of State or Under Secretary rank. Walis, however, are appointed by the Minister of Interior.

In November 1991, Sultan Qaboos established the Majlis al-Shura (Consultative Council), which replaced the 10-year-old State Consultative Council, in an effort to systematize and broaden public participation in government. Representatives were chosen in the following manner: Local caucuses in each of the 59 districts sent forward the names of three nominees, whose credentials were reviewed by a cabinet committee. These names were then forwarded to the Sultan, who made the final selection. Since then, reforms have permitted Omanis to freely run for office in contested elections featuring universal adult suffrage. The Consultative Council serves as a conduit of information between the people and the government ministries. It is empowered to review drafts of and provide recommendations on economic and social legislation prepared by service ministries, such as communications and housing, and to approve state financial plans. Service ministers also may be summoned before the Majlis to respond to representatives' questions. It has no authority in the areas of foreign affairs, defense, security, and finance.

Although Oman enjoys a high degree of internal stability, regional tensions in the aftermath of the Persian Gulf war, the Iran-Iraq war, and Operations Enduring Freedom and Iraqi Freedom continue to necessitate large defense expenditures. In 2006, Oman spent roughly $3.84 billion for defense and national security—over 33% of its public expenditures. Oman maintains a small but professional and effective military, supplied mainly with British equipment in addition to items from the United States, France, and other countries. British officers, on loan or on contract to the Sultanate, help staff the armed forces, although a program of "Omanization" has steadily increased the proportion of Omani officers over the past several years.

After North and South Yemen merged in May 1990, Oman settled its border disputes with the new Republic of Yemen on October 1, 1992. The two neighbors have cooperative bilateral relations. Oman's bor-

ders with all neighbors are demarcated, including a 2002 demarcation of the Oman-U.A.E. border that was ratified in 2003.

Principal Government Officials

Last Updated: 11/12/08

Sultan: **QABOOS bin Said al-Said**
Special Representative for His Majesty the Sultan: **THUWAYNI bin Shihab al-Said**
Prime Min.: **QABOOS bin Said al-Said**
Dep. Prime Min. for Cabinet Affairs: **FAHD bin Mahmud al-Said**
Min. of Agriculture: **Salim bin Hilal bin Ali al-KHALILI**
Min. of Awqaf & Religious Affairs: **Abdallah bin Muhammad bin Abdallah al-SALIMI**
Min. of Civil Services: **Muhammad bin Abdallah bin Isa al-HARTHI**
Min. of Commerce, Industry, & Minerals: **MAQBUL bin Ali Sultan**
Min. of Defense: **QABOOS bin Said al-Said**
Min. of Diwan of the Royal Court: **SAYF bin Hamad al-Busaidi**
Min. of Education & Teaching: **Yahya bin Saud al-SALIMI**
Chmn., Electricity & Water Ministry: **Abdallah bin Muhammad al-MAHRUQI**
Min. of Environment & Climate Change: **HAMAD bin Faysal al-Busaidi**
Min. of Finance: **QABOOS bin Said al-Said**
Min. of Fisheries: **Muhammad bin Ali al-QATABI**
Min. of Foreign Affairs: **QABOOS bin Said al-Said**
Min. of Health: **Ali bin Muhammad bin MUSA, Dr.**
Min. of Higher Education: **RAWYA bint Saud al-Busaidi**
Min. of Housing: **Muhammad bin Saif al-SHABIBI**
Min. of Information: **Hamad bin Muhammad al-RASHIDI**
Min. of Interior: **SAUD bin Ibrahim al-Busaidi**
Min. of Justice: **Muhammad bin Abdallah bin Zahir al-HINAI**
Min. of Labor: **Juma bin Ali bin JUMA**
Min. of Legal Affairs: **Muhammad bin Ali bin Nasir al-ALAWI**
Min. of National Economy: **Ahmad bin Abd al-Nabi al-MAKKI**
Min. of National Heritage & Culture: **HAYTHIM bin Tariq al-Said**
Min. of Oil & Gas: **Muhammad bin Hamad bin Sayf al-RUMHI**
Min. of Palace Affairs: **ALI bin Hamud bin Ali al-Busaidi**
Min. of Regional Municipalities & Water Resources: **Abdallah bin Muhammad bin Abdallah al-RUWAS**
Min. of the Royal Office: **ALI MAJID bin Mussabagh al-Mamari, Gen.**
Min. of Social Development: **SHARIFA bint Khalfan bin Nasser al-Yahya**
Min. of Sports: **Ali bin Masud bin Ali al-SUNAIDI**
Min. of Tourism: **Rajiha bint Abd al-Amir bin ALI**
Min. of Transport & Communication: **KHAMIS bin Mubarak al-Alawi**
Min. of State & Governor, Muscat: **SAYID al-Mutasim bin Hamud al-Busaidi**
Min. of State & Governor, Dhofar: **MUHAMMAD bin Marhun bin Ali al-MAMARI**
Min. Responsible for Defense Affairs: **BADR bin Saud bin Harib al-Busaidi**
Min. Responsible for Foreign Affairs: **Yusuf bin ALAWI bin Abdallah**
Special Adviser to His Majesty: **Salim bin Abdallah al-GHAZALI**
Special Adviser to His Majesty for Culture: **Abd al-Aziz bin Muhammad al-RUWAS**
Special Adviser to His Majesty for Economic Planning Affairs: **Muhammad bin ZUBAYR**
Special Adviser to His Majesty for Environmental Affairs: **SHABIB bin Taymur al-Said**
Special Adviser to His Majesty for External Liaison: **Umar bin Abd al-Munim al-ZAWAWI**
Special Adviser to His Majesty for Security Affairs: **Abdallah bin Salih Khalfan al-HABSI, Lt. Gen.**
Governor, Central Bank of Oman: **QABOOS bin Said al-Said**
Executive Pres., Central Bank of Oman: **Hamud bin Sangur bin Hashim al-ZADJALI**
Ambassador to the US: **Hunaina bint Sultan bin Ahmad al-MUGHAIRI**
Permanent Representative to the UN, New York: **Fuad bin Mubarak al-HINAI**

Oman maintains an embassy in the United States at 2535 Belmont Rd. NW, Washington, DC 20008 (tel. 202/387-1980).

ECONOMY

When Oman declined as an entrepot for arms and slaves in the mid-19th century, much of its former prosperity was lost, and the economy turned almost exclusively to agriculture, camel and goat herding, fishing, and traditional handicrafts. Today, oil and gas fuel the economy, and revenues from petroleum products have enabled Oman's dramatic development over the past 36 years.

Oil was first discovered in the interior near Fahud in the western desert in 1964. Petroleum Development (Oman) Ltd. (PDO) began production in August 1967. The Omani Government owns 60% of PDO, and foreign interests own 40% (Royal Dutch Shell owns 34%; the remaining 6% is owned by Compagnie Francaise des Petroles [Total] and Partex). In 1976, Oman's oil production rose to 366,000 barrels per day (b/d) but declined gradually to about 285,000 b/d in late 1980 due to the depletion of recoverable reserves. From 1981 to 1986, Oman compensated for declining oil prices by increasing production levels to 600,000 b/d. With the collapse of oil prices in 1986, however, revenues dropped dramatically. Production was cut back temporarily in coordination with the Organization of Petroleum Exporting Countries (OPEC)—of which Oman is not a member—and production levels again reached 600,000 b/d by mid-1987, which helped increase revenues. By 2000, production had climbed to more than 900,000 b/d; however, it declined to roughly 750,000 b/d for 2006.

Natural gas reserves, which will increasingly provide the fuel for industrial projects in Sohar and power generation and desalination plants throughout the Sultanate, stand at 24 trillion cubic feet. A liquefied natural gas (LNG) processing plant located in Sur was opened in 2000, with production capacity of 6.6 million tons per year (tons/yr), as well as unsubstantial gas liquids, including condensates. The completion of the plant's expansion in December 2005 has increased capacity to 10.3 million tons/yr.

Oman does not have the immense oil resources of some of its neighbors. Total proven reserves are about 4.8 billion barrels. Oman's complex geology makes exploration and production an expensive challenge. Recent improvements in technology, however, have enhanced recovery.

Agriculture and fishing are the traditional way of life in Oman. Dates, grown extensively in the Batinah coastal plain and the highlands, make up most of the country's agricultural exports. Coconut palms, wheat, and bananas also are grown, and cattle are raised in Dhofar. Other areas grow cereals and forage crops. Poultry production is steadily rising. Fish and shellfish exports totaled $104.7 million in 2006.

The government is undertaking many development projects to modernize the economy, improve the standard of living, and become a more active player in the global marketplace. Oman became a member of the World Trade Organization in October 2000, and continues to amend its financial and commercial practices to conform to international standards. Oman signed a Free Trade Agreement with the United States in January 2006, and continues to pursue, through the Gulf Cooperation Council, free trade agreements with a number of other key trading partners, including the EU and India.

Increases in agriculture and especially fish production are believed possible with the application of modern technology. The Muscat capital area has both an international airport at Seeb and a deepwater port at Mina Qaboos. The large-scale modern container port at Salalah, capital of the Dhofar Governorate, continues to operate at near-capacity levels. The government in early 2004 approved a project worth over $250 million to add two berths and extend the breakwater at the port. Port expansion is underway at Mina Qaboos, and a large industrial and container port is under construction in Sohar. A national road network includes a $400 million highway linking the northern and southern regions. The government will also expand passenger and cargo capacity at its main international airports at Seeb (Muscat) and Salalah, and will construct new airports at Sohar, Ras al-Hadd, and Duqm. In an effort to diversify the economy, in the early 1980s, the government built a $200-million copper mining and refining plant at Sohar. Other large industrial projects underway or being considered include an 80,000 b/d oil refinery, a large petrochemical complex, fertilizer and methanol plants, an aluminum smelter, and two cement factories. Industrial zones at Rusayl, Sohar, and several other locations showcase the country's modest light industries. Marble, limestone, and gypsum may prove commercially viable in the future.

The Omani Government embarked on its seventh 5-year plan in 2006. In its efforts to reduce its dependence on oil and expatriate labor, the government projects significant increases in spending on industrial and tourism-related projects to foster income diversification, job creation for Omanis in the private sector, and development of Oman's interior. Government programs offer soft loans and propose the building of new industrial estates in population centers outside the capital area. The government is giving greater emphasis to "Omanization" of the labor force, particularly in banking, hotels, and municipally sponsored shops benefiting from government subsidies. Currently, efforts are underway to liberalize investment opportunities in order to attract foreign capital.

Some of the largest budgetary outlays are in the areas of health services and basic education. The number of schools, hospitals, and clinics has risen exponentially since the accession of Sultan Qaboos in 1970.

U.S. firms face a small and highly competitive market dominated by trade with Japan and Britain and re-exports from the United Arab Emirates. The sale of U.S. products also is hampered by higher transportation costs and the lack of familiarity with Oman on the part of U.S. exporters. However, the traditional U.S. market in Oman, oil field supplies and services, should grow as the country's major oil producer continues a major expansion of fields and wells. Major new U.S. investments in oil production, industry, and tourism projects in 2005 totaled several billion dollars. Moreover, negotiations on the U.S.-Oman Free Trade Agreement (FTA) were successfully concluded in October 2005; the FTA was ratified by the U.S. Congress and signed by President Bush in 2006 and is currently awaiting implementation. Once implemented, the FTA should provide further impetus to bilateral trade and investment.

FOREIGN RELATIONS

When Sultan Qaboos assumed power in 1970, Oman had limited contacts with the outside world, including neighboring Arab states. Only two countries, the United Kingdom and India, maintained a diplomatic presence in the country. A special treaty relationship permitted the United Kingdom close involvement in Oman's civil and military affairs. Ties with the United Kingdom have remained very close under Sultan Qaboos.

Since 1970, Oman has pursued a moderate foreign policy and expanded its diplomatic relations dramatically. It supported the 1979 Camp David accords and was one of three Arab League states, along with Somalia and Sudan, which did not break relations with Egypt after the signing of the Egyptian-Israeli Peace Treaty in 1979. During the Iran-Iraq war, Oman maintained diplomatic relations with both sides while strongly backing UN Security Council resolutions calling for an end to the war. Oman has developed close ties to its neighbors; it joined the six-member Gulf Cooperation Council when it was established in 1981.

Oman has traditionally supported Middle East peace initiatives, as it did those in 1983. In April 1994, Oman hosted the plenary meeting of the Water Working Group of the peace process, the first Gulf state to do so. From 1996-2000, Oman and Israel exchanged trade offices. Oman closed the Israeli Trade Office in October 2000 in the wake of public demonstrations against Israel at the start of the second intifada.

During the Cold War period, Oman avoided relations with communist countries because of the communist

support for the insurgency in Dhofar. In recent years, Oman has undertaken diplomatic initiatives in the Central Asian republics, particularly in Kazakhstan, where it is involved in a joint oil pipeline project. In addition, Oman maintains good relations with Iran, and the two countries regularly exchange delegations. Oman is an active member in international and regional organizations, notably the Arab League and the GCC.

U.S.-OMANI RELATIONS

The United States has maintained relations with the Sultanate since the early years of American independence. A treaty of friendship and navigation, one of the first agreements of its kind with an Arab state, was concluded between the United States and Muscat in 1833. This treaty was replaced by the Treaty of Amity, Economic Relations, and Consular Rights signed at Salalah on December 20, 1958.

A U.S. consulate was maintained in Muscat from 1880 until 1915. Thereafter, U.S. interests in Oman were handled by U.S. diplomats resident in other countries. In 1972, the U.S. ambassador in Kuwait was accredited also as the first U.S. ambassador to Oman, and the U.S. embassy, headed by a resident charge d'affaires, was opened. The first resident U.S. ambassador took up his post in July 1974. The Oman embassy was opened in Washington, DC, in 1973.

U.S.-Omani relations were deepened in 1980 by the conclusion of two important agreements. One provided access to Omani military facilities by U.S. forces under agreed-upon conditions. The other agreement established a Joint Commission for Economic and Technical Cooperation, located in Muscat, to provide U.S. economic assistance to Oman. The Joint Commission continued in existence until the mid-1990s. A Peace Corps program, which assisted Oman mainly in the fields of health and education, was initiated in 1973 and phased out in 1983. A team from the Federal Aviation Administration worked with Oman's Civil Aviation Department on a reimbursable basis but was phased out in 1992.

In March 2005, the U.S. and Oman launched negotiations on a Free Trade Agreement that were successfully concluded in October 2005. The FTA was signed on January 19, 2006, and is pending implementation.

In 1974 and April 1983, Sultan Qaboos made state visits to the United States. Vice President George H. Bush visited Oman in 1984 and 1986, and President Clinton visited briefly in March 2000. Vice President Cheney visited Oman in 2002, 2005, and 2006.

TRAVEL

Consular Information Sheet

December 3, 2007

Country Description: The Sultanate of Oman, a land of great natural beauty on the southeast corner of the Arabian Peninsula, has a long and proud heritage. With a population of 2.6 million, Oman has seen rapid economic and social development in the past three decades. A monarchy governed by Sultan Qaboos bin Said, the country does not have political parties or a legislature, although a bicameral representative body (the lower house of which is directly elected) provides the government with advice and reviews draft legislation. While Oman is traditionally Islamic and Islam is the state religion, Omanis have for centuries lived with people of other faiths. Non-Muslims are free to worship at churches and temples built on land donated by the Sultan. The economy is largely dependent on the production and export of oil and natural gas, but is becoming increasingly more diversified. Excellent tourist facilities are available in the major cities of Muscat, Salalah, Sohar, and Nizwa and can increasingly be found elsewhere in the country. Travelers may wish to visit the Sultanate's tourism web site at http://www.omantourism.gov.om/ for more information.

Entry Requirements: A valid passport and visa are required for entry into Oman. Omani embassies and consulates issue multiple-entry tourist and/or business visas valid for up to two years. Omani immigration officials at the port of entry determine the length of stay in Oman, which varies according to the purpose of travel. Alternatively, U.S. citizens may obtain a 30-day visa by presenting their U.S. passports on arrival at all Oman land, sea, and air entry points. The validity period of the applicant's passport should not be less than six months. Adequate funds and proof of an onward/return ticket, though not required, are strongly rec-

ommended. The fee is Rials Omani 6.00 (approximately USD 16.00). This visa can only be extended for an extra 30 days; a completed extension application form and the fee of Rials Omani 6.00 (USD 16.00) should be submitted to the Directorate General of Passports and Residence or to its branches at regional Royal Omani Police offices. Other categories of short-term visit/business/work contract visas are available, but these must be arranged in advance through an Omani sponsor. To obtain a visa or for details on entry and travel requirements, please contact the Embassy of the Sultanate of Oman, 2535 Belmont Road NW, Washington, DC 20008, telephone (202) 387-1980/2. Evidence of yellow fever immunization is required if the traveler enters from an infected area. Visit the Embassy of Oman web site at www.omani.info for the most current visa information.

Forbidden items: The Sultanate prohibits pornographic materials and firearms from entering Oman. Local law limits each traveler to two bottles of alcohol. Items subject to confiscation at the airport due to content considered culturally inappropriate include, but are not limited, to compact discs, digital video discs, and video and audiocassettes.

Safety and Security: There have been no instances in which U.S. citizens or facilities in Oman have been subject to terrorist attacks. However, the Department of State remains concerned about the possibility of terrorist attacks against United States citizens and interests throughout the region. American citizens in Oman are urged to maintain a high level of security awareness. The State Department suggests that all Americans in Oman maintain an unpredictable schedule and vary travel routes whenever possible. Americans are also urged to treat mail or packages from unfamiliar sources with suspicion. Unusual mail or packages should be left unopened and reported to local authorities. U.S. citizens with security concerns are encouraged to contact local authorities and the Consular Section of the U.S. Embassy in Muscat.

For the latest security information, Americans traveling abroad should regularly monitor the Department's web site, where the current Worldwide Caution Travel Alert, Middle East and North Africa Travel Alert, Travel Warnings and other Travel Alerts can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S. and Canada or, for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: The incidence of street crime is low in Oman; violent crime is rare by U.S. standards, but can occur. Crimes of opportunity remain the most likely to affect visitors. Visitors to Oman should, therefore, take normal precautions, such as avoiding travel in deserted or unfamiliar areas and after dark. Visitors should also protect personal property from theft. In particular, valuables and currency should not be left unsecured in hotel rooms. Common sense and caution are always the best methods for crime prevention.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, contact family members or friends, and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

Medical Facilities and Health Information: There are a number of modern medical facilities in Oman. Local medical treatment varies from quite good to inadequate, depending in large part on location. Many Western pharmaceuticals can be found in Oman. Hospital emergency treatment is available. Doctors and hospitals often expect cash payment for health services. Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's web site at http://wwwn.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith/en.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Oman is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

Road Conditions and Hazards: Road conditions, lighting, and traffic safety in cities and on major highways are good. The condition of rural roads varies from good to poor. Travel between cities, especially at night, may be dangerous due to poor or no lighting, wandering livestock, and speeding drivers. The safety of public transportation is generally good. Taxis, minivans, and small buses may swerve to the side of the road to pick up passengers with little notice or regard for other vehicles.

Local Laws and Practices: Traffic laws in Oman are strictly enforced. Driving while under the influence of alcohol is prohibited, and there are stringent penalties for violating this law. Seat belt use is required, and the use of non-hands-free cellular telephones while driving is prohibited. In the event of a traffic violation and

fine, drivers should pay the fine as directed and should not attempt to pay or negotiate payment at the time of the traffic stop.

Effective June 1, 2007, the Royal Oman Police (ROP) introduced new procedures for minor Road Traffic Accidents (RTA) to reduce traffic jams. According to the ROP, the new procedure is currently in force in the Governorate of Muscat area and will eventually be implemented in the other governorates and regions of the Sultanate. American citizens considering driving in Oman are advised to familiarize themselves with the new procedures available on the ROP web site at http://www.rop.gov.om/english/index.asp under "Minor Road Traffic Accidents."

Note: Minor RTA are accidents causing minor damage to one or more vehicles that does not result in injuries, deaths, or material damage to public/private properties. Parties involved in such accidents should immediately move their vehicles to the side of the road.

American citizens involved in accidents outside of the Muscat area are advised not to move their vehicles from the accident location until the ROP gives them permission; moving a vehicle may be interpreted as an admission of guilt.

The use of European-style traffic circles is prevalent in Oman. However, unlike European traffic practice, the driver on the inside lane always has priority. A driver flashing his/her high beams is generally asking for a chance to pass. Turning right on a red traffic signal is prohibited.

Visitors should not drive without a valid license. Short-term visitors in possession of a valid U.S. driver's license may drive rental vehicles, but residents must have an Omani driver's license. To obtain an Omani license, a U.S. citizen must have a U.S. license that has been valid for at least one year or must take a driving test. Visitors hiring rental cars should insure the vehicles adequately against death, injury and loss or damage. Residents may insure their vehicles outside the Sultanate; however, third party liability insurance must be purchased locally.

Emergency Services: A modern ambulance service using American equipment and staff trained in the U.S. was instituted in 2004 and has been assessed as very good. The service currently serves only certain urban locations in Oman, including the capital area, but is eventually expected to provide coverage for motor vehicle accident victims throughout the entire Sultanate. For all traffic-related emergencies, the Royal Omani Police can be contacted by dialing "9999."

Visit the website of Oman's national tourist office and national authority responsible for road safety at http://www.omantourism.gov.om.

Aviation Safety Oversight: The U.S. Federal Aviation Administration (FAA) has assessed the Government of Oman's Civil Aviation Authority as being in compliance with International Civil Aviation Organization (ICAO) aviation safety standards for oversight of Oman's air carrier operations. For more information, travelers may visit the FAA's web site at http://www.faa.gov.

Special Circumstances: By Omani custom and law, expressing frustration either verbally or through otherwise innocuous hand gestures is considered insulting and abusive. Doing so could result in police action that may lead to a jail term and a fine. Confrontations of this nature occur mostly on Oman's roads, and visitors should exercise caution when dealing with difficult drivers.

Omani employers often ask that expatriate employees deposit their passports with the company as a condition of employment. While to an extent still customary, this practice is contrary to Omani law. The U.S. Embassy in Muscat advises Americans to exercise caution on the issue of permitting an employer to hold their passports, since this can operate as a restraint on travel and could give undue leverage to the employer in a dispute. U.S. passports are the property of the U.S. government. Islamic ideals provide the conservative foundation of Oman's customs, laws, and practices. Foreign visitors are expected to be sensitive to Islamic culture and not dress in a revealing or provocative style, including the wearing of sleeveless shirts and blouses, halter-tops and shorts. Athletic clothing is worn in public only when the wearer is obviously engaged in athletic activity. Western bathing attire, however, is the norm at hotel pools and beaches.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating Omani laws, even unknowingly, may be expelled, arrested, or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Oman are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in Oman are encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration web site and to obtain updated information on travel and security within Oman. Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency. The U.S. Embassy is located on Jamiat A'Duwal Al Arabiya Street, Al

Khuwair Area (Shatti Al-Qurum), in the capital city of Muscat. The mailing address is: PO Box 202, Medinat Al Sultan Qaboos 115, Sultanate of Oman, telephone: (968) 24-643-400, fax: (968) 24-643-535. The Embassy's Consular e-mail address is Consular-Muscat@state.gov and the web site is http://oman.usembassy.gov.

Intercountry Adoption

February 2008

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is based on public sources and current understanding. Questions involving foreign and U.S. immigration laws and legal interpretation should be addressed respectively to qualified foreign or U.S. legal counsel.

Please Note: Omani nationals who are Muslims must adopt Oman children.

Availability of Children for Adoption: To date, no Omani children have been adopted by American citizens.

Adoption Authority: The government office responsible for adoptions in Oman is the Ministry of Social Affairs. Please contact Ms. Batool Hassan, Deputy Director of the Office of Children's and Women's Affairs (968) 601-598.

Age and Civil Status Requirements: The Omani Government requires that individuals who wish to adopt Omani children must have Omani nationality and must be of the Muslim faith. Married couples are preferred but single women may also be eligible to adopt under special circumstances.

Adoption Agencies and Attorneys: All adoptions are processed by the Government of Oman.

Doctors: The U.S. Embassy maintains current lists of doctors and sources for medicines, should either you or your child experience health problems while in Oman.

U.S. Immigration Requirements: A Oman child adopted by an American citizen must obtain an immigrant visa before he or she can enter the U.S. as a lawful permanent resident. Prospective adopting parents are strongly encouraged to consult USCIS publication M-249, *The Immigration of Adopted and Prospective Adoptive Children*, as well as the Department of State publication, *Intercountry Adoptions.*

Please see the *Intercountry Adoption* section of this book for more details and review current reports online at http:/adoption.state.gov.

Questions: Specific questions regarding adoption in Oman may be addressed to the Consular Section of the U.S. Embassy Muscat, Oman. You may also contact the Office of Children's Issues, SA-29, 2201 C Street, NW, U.S. Department of State, Washington, DC 20520-2818, Tel: 1-888-407-4747 with specific questions.

International Parental Child Abduction

November 2008

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *International Child Abduction* section of this book and review current reports online at www.travel.state.gov/childabduction.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is provided for general information only. Questions involving interpretation of specific foreign laws should be addressed to foreign legal counsel.

General Information: Oman is not a party to the Hague Convention on the Civil Aspects of International Child Abduction, nor are there any international or bilateral treaties in force between Oman and the United States dealing with international parental child abduction. American citizens who travel to Oman are subject to the jurisdiction of Omani courts, as well as to the country's laws and regulations. American citizens planning a trip to Oman with dual national children should bear this in mind.

Custody Disputes: When child custody disputes arise between parents of any religion, the custody decisions by Omani courts are based on Islamic (Sharia) law. Custody cases can be very complex and are usually determined on a case-by-case basis. When making decisions regarding child custody matters, Omani courts consider the parents" religion(s), place(s) of permanent residence, income, and the parents" marital status. Omani law differentiates between custodianship and guardianship. Generally speaking, a custodian has been awarded custody of the child and is responsible for his/her upbringing including education and care. A guardian is responsible for the child's financial support.

Omani courts do not, as a general rule, award custody of "dual national" (U.S./Omani) children to an American mother or father, even one who is Muslim. A fundamental consideration of awarding custody is the parent's place(s) of permanent residence and degree of access to the children. Custody of very young children is generally granted to the mother as

long as certain restrictive conditions are met. Once the children come of age (for males completion of their seventh year of age, for females the onset of puberty), the father can appeal for, and will usually be awarded, full custody provided certain restrictive conditions are met. If a father were unable or unfit to be custodian of his children, the court may give custody to another family member. Sharia court judges have broad discretion in custody cases and often make exceptions to these general guidelines, particularly in cases in which a parent is from an influential family or has powerful connections in Oman.

Even when a mother is granted custody, the non-custodial father maintains a great deal of influence on the rearing of the children. In many cases, the father has been able to acquire legal custody of children against the wishes of the mother when she is unable or unwilling to meet certain conditions set by law for her to maintain her custodial rights. For example, if a mother refuses to give the father access to his child or attempts to leave Oman with the children without the court's permission, a mother's custody rights can be severed. The Omani court can sever a mother's custody if it determines that the mother is incapable of safeguarding the child or of bringing the child up in accordance with the appropriate religious standards. Either parent can lose custody by re-marrying a party considered "unmarriageable," or by residing in a home with people that might be "strangers." However, the final decision is left to the discretion of the Sharia court.

Sharia law forbids the removal of children from Oman without first obtaining permission from the court. The U.S. Embassy cannot prevent the Omani government from arresting and either deporting or prosecuting an American citizen who violates Omani law.

Persons who wish to pursue a child custody claim in an Omani court should retain an attorney in Oman. The State Department and the U.S. Embassy in Oman maintain a list of attorneys willing to represent American clients. A copy of this list may be obtained by contacting either office. It is the responsibility of the prospective client to assess the capabilities of an attorney. The Embassy cannot recommend any specific attorney, and makes no claim as to the ability or the integrity of the attorneys on the list. The Embassy cannot pay for any legal expenses incurred.

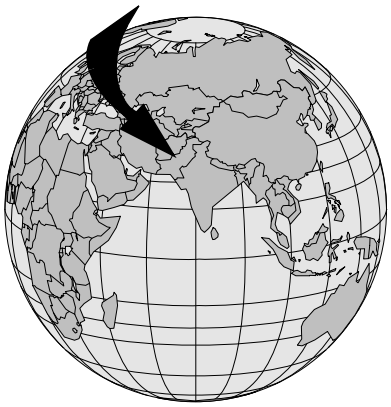
U.S. Embassy Muscat
Consular Section
P.O. Box 202
Madinat al Sultan Qaboos 115
Sultanate of Oman
Telephone: [968] 698-989
Fax: [968] 699-189
Website: http://www.usa.gov.om
Consular Section:
aemctcns@omantel.net.om

The workweek for the Embassy is Saturday through Wednesday from 8:00 AM to 4:30 PM.

Specific questions regarding child custody in Oman should be addressed to an Omani attorney or to the Embassy of Oman at:

Embassy of the Sultanate of Oman
2535 Belmont Road, NW
Washington, DC 20008
Telephone: (202) 387-1980
Fax: (202) 745-4933

Enforcement of Foreign Judgments: Custody orders and judgments of foreign courts are not enforceable in Oman if they potentially contradict or violate local laws and practices. For example, an order from a U.S. court granting custody to an American parent will not be honored in Oman if the parent intends to take the child to live outside Oman. Nor will Omani courts enforce U.S. court decrees ordering a parent in Oman to pay child support.



Visitation Rights: Non-custodial parents are generally entitled to visitation rights as determined by the Sharia judge.

Dual Nationality: Dual nationality is not recognized by the Sultanate of Oman. Children of Omani fathers automatically acquire Omani citizenship at birth and must enter and leave the country on Omani passports even if they are entitled to hold the passport of another country. Omani women cannot transmit citizenship to their children.

Travel Restrictions: When a custody case is pending with the Sharia court, children, regardless of their nationality, are generally subject to court-imposed travel restrictions. Either parent can request the court to restrict the travel of his/her minor children.

Criminal Remedies: For information on possible criminal remedies, please contact your local law enforcement authorities or the nearest office of the Federal Bureau of Investigation (FBI). Information is also available on the Internet at the web site of the U.S. Department of Justice, Office of Juvenile Justice and Delinquency Prevention (OJJDP) at http://www.ojjdp.ncjrs.org.

For further information on international parental child abduction, contact the Office of Children's Issues, U.S. Department of State at 1-888-407-4747 or visit its web site on the Internet at http://travel.state.gov. PAKISTAN

Compiled from the July 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Islamic Republic of Pakistan

PROFILE

Geography

Area: 803,943 sq. km. (310,527 sq. mi.); almost twice the size of California.

Cities: Capital—The city of Islamabad (pop. 800,000) and adjacent Rawalpindi (1,406, 214) comprise the national capital area with a combined population of 3.7 million. Other cities—Karachi (11,624,219) (2005 est.), Lahore (6,310,888) (2005 est.), Faisalabad (1,977,246) and Hyderabad (1,151,274).

People

Nationality: Noun and adjective—Pakistan(i).

Population: (July 2008 est.) 164,762,040.

Annual growth rate: (2008 est.) 1.81%.

Ethnic groups: Punjabi, Sindhi, Pushtun, Baloch, Muhajir (i.e., Urdu-speaking immigrants from India and their descendants), Saraiki, and Hazara.

Religions: Muslim 97%; small minorities of Christians, Hindus, and others.

Languages: Urdu (national and official), English, Punjabi, Sindhi, Pushtu, Baloch, Hindko, Brahui, Saraiki (Punjabi variant).

Education: Literacy (2005 est.)—49.9%; male 63%; female 36%.

Health: Infant mortality rate (2008 est.)—66.95/1,000. Life expectancy (2008 est.)—men 63.07 yrs., women 65.24 yrs.

Work force: (2004 est.) Agriculture—42%; services—38%; industry—20%.

Government

Type: Parliamentary democracy.

Independence: August 14, 1947.

Government branches: Executive—president (chief of state), prime minister (head of government). Legislative—Bicameral Parliament or Majlis-e-Shoora (100-seat Senate, 342-seat National Assembly). Judicial—Supreme Court, provincial high courts, Federal Islamic (or Shari'a) Court.

Political parties: Pakistan People's Party (PPP), Pakistan Muslim League-Nawaz (PML-N), Awami National Party (ANP), Pakistan Muslim League (PML), Muttahid Majlis-e-Amal (umbrella group) (MMA), and Muttahida Qaumi Movement (MQM).

Suffrage: Universal at 18.

Political subdivisions: 4 provinces (Punjab, Sindh, Balochistan, and Northwest Frontier); also the Federally Administered Tribal Areas (composed of 7 tribal agencies—Bajaur, Mohmand, Khyber, Kurram, Orakzai, North Waziristan, and South Waziristan) and the Pakistani-administered portion of the disputed Jammu and Kashmir region (Azad Kashmir and the Northern Areas).

Economy

GDP: (2007 est., official exchange rate): $143.8 billion.

Real GDP growth rate: (2005) 7.8%.

Per capita GDP: (2007 est., PPP) $2,600.

Natural resources: Arable land, natural gas, limited oil, substantial hydropower potential, coal, iron ore, copper, salt, limestone.

Agriculture: Products—wheat, cotton, rice, sugarcane, eggs, fruits, vegetables, milk, beef, mutton.

Industry: Types—textiles & apparel, food processing, pharmaceuticals, construction materials, shrimp, fertilizer, and paper products.

Trade: (2007 est.) Exports—$16.31 billion: textiles (garments, bed linen, cotton cloth, and yarn), rice, leather goods, sports goods, carpets, rugs, chemicals and manufactures. Major partners—U.S. 21%, United Arab Emirates 9%, Afghanistan 7.7%, U.K. 5.1%, China 5.3%. Imports—$30.33 billion: petroleum, petroleum products, machinery, plastics, paper and paper board, transportation equipment, edible oils, pulses, iron and steel, tea. Major partners—China 13.8%, Saudi Arabia 10.5%, United

Arab Emirates 9.7%, Japan 5.7%, U.S. 6.5%, Kuwait 4.7%, Germany 4.1%.

PEOPLE

The majority of Pakistan's population lives in the Indus River valley and in an arc formed by the cities of Faisalabad, Lahore, Rawalpindi/Islamabad, and Peshawar. Although Urdu is an official language of Pakistan, it is spoken as a first language by only 8% of the population; 48% speak Punjabi, 12% Sindhi, 10% Saraiki, 8% Pushtu, 3% Baloch, and 3% other. Urdu, Punjabi, Pushtu, and Baloch are Indo-European languages. English is the other official language, and is widely used in government, commerce, the officer ranks of the military, and in many institutions of higher learning.

HISTORY

Pakistan, along with parts of western India, contains the archeological remains of an urban civilization dating back 4,500 years. Alexander the Great included the Indus Valley in his empire in 326 B.C., and his successors founded the Indo-Greek kingdom of Bactria based in what is today Afghanistan and extending to Peshawar. Following the rise of the Central Asian Kushan Empire in later centuries, the Buddhist culture of Afghanistan and Pakistan, centered on the city of Taxila just west of Islamabad, experienced a cultural renaissance known as the Gandhara period.

Pakistan's Islamic history began with the arrival of Muslim traders in the 8th century in Sindh. The collapse of the Mughal Empire in the 18th century provided an opportunity for the English East India Company to extend its control over much of the subcontinent. The Sikh adventurer, Ranjit Singh, carved out a dominion that extended from Kabul to Srinagar and Lahore, encompassing much of the northern area of modern Pakistan. British rule replaced the Sikhs in the first half of the 19th century. In a decision that had far-reaching consequences, the British permitted the Hindu Maharaja of Kashmir, a Sikh appointee, to continue in power. Pakistan emerged from an extended period of agitation by Muslims in the subcontinent to express their national identity free from British colonial domination as well as domination by what they perceived as a Hindu-controlled Indian National Congress. Muslim anti-colonial leaders formed the All-India Muslim League in 1906. Initially, the League adopted the same objective as the Congress—self-government for India within the British Empire—but Congress and the League were unable to agree on a formula that would ensure the protection of Muslim religious, economic, and political rights.

Pakistan and Partition

The idea of a separate Muslim state in British India first emerged in the 1930s. On March 23, 1940, Muhammad Ali Jinnah, leader of the Muslim League, formally endorsed the "Lahore Resolution," calling for the creation of an independent state in regions where Muslims constituted a majority. At the end of World War II, the United Kingdom moved with increasing urgency to grant India independence. The Congress Party and the Muslim League, however, could not agree on the terms for a Constitution or establishing an interim government. In June 1947, the British Government declared that it would bestow full dominion status upon two successor states—India and Pakistan, formed from areas in the subcontinent in which Muslims were the majority population. Under this arrangement, the various princely states could freely join either India or Pakistan. Accordingly, on August 14, 1947 Pakistan, comprising West Pakistan with the provinces of Punjab, Sindh, Balochistan, and the Northwest Frontier Province (NWFP), and East Pakistan with the province of Bengal, became independent. East Pakistan later became the independent nation of Bangladesh in 1971.

The Maharaja of Kashmir was reluctant to make a decision on accession to either Pakistan or India. However, armed incursions into the state by tribesman from the NWFP led him to seek military assistance from India. The Maharaja signed accession papers in October 1947 and allowed Indian troops into the state. The Government of Pakistan, however, refused to recognize the accession and campaigned to reverse the decision. The status of Kashmir remains in dispute to this day.

Independence

With the death in 1948 of its first head of state, Muhammad Ali Jinnah, and the assassination in 1951 of its first prime minister, Liaqat Ali Khan, political instability and economic difficulty became prominent features of post-independence Pakistan. On October 7, 1958, President Iskander Mirza, with the support of the army, suspended the 1956 Constitution, imposed martial law, and canceled the elections scheduled for January 1959. Twenty days later the military sent Mirza into exile to Britain, and Gen. Mohammad Ayub Khan assumed control of a military dictatorship. After Pakistan's loss in the 1965 war against India, Ayub Khan's power declined. Subsequent political and economic grievances inspired agitation movements that compelled his resignation in March 1969. He handed over responsibility for governing to the commander in chief of the army, General Agha Mohammed Yahya Khan, who became President and Chief Martial Law Administrator.

General elections held in December 1970 polarized relations between the eastern and western sections of Pakistan. The Awami League, which advocated autonomy for the more populous East Pakistan, swept the East Pakistan seats to gain a majority in Pakistan as a whole. The Pakistan Peoples Party (PPP), founded and led by Ayub Khan's former Foreign Minister Zulfikar Ali Bhutto, won a majority of the seats in West Pakistan, but the country was completely split with neither major party having any support in the other area. Negotiations to form a coalition government broke down. On March 26, 1971, following a bloody crackdown by the Pakistan Army, Bengali

nationalists declared an independent People's Republic of Bangladesh. As fighting grew between the army and the Bengalis, an estimated 10 million Bengalis sought refuge in India. On April 17, 1971, Bengali nationalists formed a provisional government in an area bordering India, and in November 1971, India sent its military into East Pakistan to intervene on the side of the Bangladeshis. On December 16, Pakistani forces surrendered in Dhaka, and East Pakistan became the new nation of Bangladesh. Yahya Khan then resigned the presidency and handed over leadership of the western part of Pakistan to Bhutto, who became President and the first civilian Chief Martial Law Administrator.

Bhutto moved decisively to restore national confidence and pursued an active foreign policy, taking a leading role in Islamic and Third World forums. Although Pakistan did not formally join the Non-Aligned Movement until 1979, the position of the Bhutto government coincided largely with that of the non-aligned nations. Domestically, Bhutto pursued a populist agenda and nationalized major industries and the banking system. In 1973, he promulgated a new Constitution accepted by most political elements and relinquished the presidency to become prime minister. Although Bhutto continued his populist and socialist rhetoric, he increasingly relied on Pakistan's urban industrialists and rural landlords. Over time the economy stagnated, largely as a result of the dislocation and uncertainty produced by Bhutto's frequently changing economic policies. When Bhutto proclaimed his own victory in the March 1977 national elections, the opposition

Pakistan National Alliance (PNA) denounced the results as fraudulent and demanded new elections. Bhutto resisted and later arrested the PNA leadership.

Muhammad Zia ul-Haq

With increasing anti-government unrest, the army grew restive. On July 5, 1977, the military removed Bhutto from power and arrested him, declared martial law, and suspended portions of the 1973 Constitution. Chief of Army Staff Gen. Muhammad Zia ul-Haq became Chief Martial Law Administrator and promised to hold new elections within 3 months.

Zia released Bhutto and asserted that he could contest new elections scheduled for October 1977. However, after it became clear that Bhutto's popularity had survived his government, Zia postponed the elections and began criminal investigations of the senior PPP leadership. Subsequently, Bhutto was convicted and sentenced to death for an alleged conspiracy to murder a political opponent. Despite international appeals on his behalf, Bhutto was hanged on April 6, 1979.

Zia assumed the presidency and called for elections in November. However, fearful of a PPP victory, Zia banned political activity in October 1979, and postponed national elections. This same year Zia also passed into law the Hudood Ordinance, which provides for harsh Quranic punishments for violations of Shari'a (Islamic law).

In 1980, most center and left parties, led by the PPP, formed the Movement for the Restoration of Democracy (MRD). The MRD demanded Zia's resignation, an end to martial law, new elections, and restoration of the Constitution, as it existed before Zia's takeover. In early December 1984, President Zia proclaimed a national referendum for December 19 on his "Islamization" program. After non-party based polls were held for the National and Provincial Assemblies in 1985, President Zia appointed Muhammad Khan Junejo as the Prime Minister. He implicitly linked approval of "Islamization" with a mandate for his continued presidency. Zia's opponents, led by the MRD, boycotted the elections. When the government claimed a 63% turnout, with more than 90% approving the referendum, many observers questioned the figures.

Sharif and Bhutto Civilian Governments

On August 17, 1988, a plane carrying President Zia, American Ambassador Arnold Raphel, U.S. Brig. General Herbert Wassom, and 28 Pakistani military officers crashed on a return flight from a military equipment trial near Bahawalpur, killing all on board. In accordance with the Constitution, Chairman of the Senate Ghulam Ishaq Khan became Acting President and announced that elections scheduled for November 1988 would take place. Elections were held on a party basis. On one side was an eight-party alliance and on the other, the PPP. The PPP won 94 seats out of 207 and the Islamic Democratic Alliance (IJI) won 54. Muhammad Khan Junejo lost from his home constituency. The president was bound to invite the PPP to from the government, but he delayed doing so for two weeks in order to give the IJI time to muster the support of other groups. Ultimately, the president asked PPP Co-chairperson Benazir Bhutto to form a government.

The PPP, under Benazir Bhutto's leadership, succeeded in forming a coalition government with several smaller parties, including the Muttahida Qaumi Movement (MQM).

Differing interpretations of constitutional authority, debates over the powers of the central government relative to those of the provinces, and the antagonistic relationship between the Bhutto administration and opposition governments in Punjab and Balochistan seriously impeded social and economic reform programs. Ethnic conflict, primarily in Sindh province, exacerbated these problems. A fragmentation in the governing coalition and the military's reluctance to support an apparently ineffectual and corrupt government were accompanied by a significant deterioration in law and order. In August 1990, President Khan, citing his powers under the eighth amendment to the Constitution, dismissed the Bhutto government and dissolved the national and provincial assemblies. New elections, held in October 1990, confirmed the political ascendancy of the IJI. In addition to a two-thirds majority in the National Assembly, the alliance won control of all four provincial parliaments and enjoyed the support of the military and of President Khan. Muhammad Nawaz Sharif, as leader of the PML, the most prominent party in the IJI, was elected prime minister by the National Assembly.

Sharif emerged as the most secure and powerful Pakistani prime minister since the mid-1970s. Under his rule, the IJI achieved several important political victories. The implementation of Sharif's economic reform program; involving privatization, deregulation, and encouragement of private sector economic growth, greatly improved Pakistan's economic performance and business climate. The passage into law in May 1991 of a Shari'a bill, providing for widespread Islamization, legitimized the IJI government among much of Pakistani society.

However, Nawaz Sharif was not able to reconcile the different objectives of IJI's constituent parties. The largest religious party, Jamaat-i-Islami (JI), abandoned the alliance because of its antagonism to what it regarded as PML hegemony. The government was weakened further by the military's suppression of the MQM, which had entered into coalition with the IJI to contain PPP influence, and allegations of corruption directed at Nawaz Sharif. In April 1993, President Khan, citing "maladministration, corruption, and nepotism" and espousal of political violence, dismissed the Sharif government, but the following month the Pakistan Supreme Court reinstated the National Assembly and the Nawaz Sharif government. Continued tensions between Sharif and Khan resulted in governmental gridlock and the Chief of Army Staff brokered an arrangement under which both the President and the

Prime Minister resigned their offices in July 1993. An interim government, headed by Moeen Qureshi, a former World Bank Vice President, took office with a mandate to hold national and provincial assembly elections in October. Despite its brief term, the Qureshi government adopted political, economic, and social reforms that generated considerable domestic support and foreign admiration.

In the October 1993 elections, the PPP won a plurality of seats in the National Assembly, and Benazir Bhutto was asked to form a government. However, because it did not acquire a majority in the National Assembly, the PPP's control of the government depended upon the continued support of numerous independent parties, particularly the PML/J (Pakistan Muslim League-Junejo). The unfavorable circumstances surrounding PPP rule—the imperative of preserving a coalition government, the formidable opposition of Nawaz Sharif's PML/N (Pakistani Muslim League-Nawaz) movement, and the insecure provincial administrations—presented significant difficulties for the government of Prime Minister Bhutto. However, the election of Prime Minister Bhutto's close associate, Farooq Leghari, as President in November 1993 gave her a stronger power base.

In November 1996, President Leghari dismissed the Bhutto government, charging it with corruption, mismanagement of the economy, and implication in extrajudicial killings in Karachi. Elections in February 1997, resulted in an overwhelming victory for the PML/N, and President Leghari called upon Nawaz Sharif to form a government. In March 1997, with the unanimous support of the National Assembly, Sharif amended the Constitution, stripping the President of the power to dismiss the government and making his power to appoint military service chiefs and provincial governors contingent on the "advice" of the Prime Minister. Another amendment prohibited elected members from "floor crossing" or voting against party positions. The Sharif government also engaged in a protracted dispute with the judiciary, culminating in the storming of the Supreme Court by ruling party loyalists and the engineered dismissal of the Chief Justice and the resignation of President Leghari in December 1997. The new President elected by Parliament, Rafiq Tarar, was a close associate of the Prime Minister. A one-sided, anti-corruption campaign was used to target opposition politicians and critics of the regime. Similarly, the government moved to restrict press criticism and ordered the arrest and beating of prominent journalists. As domestic criticism of Sharif's administration intensified, Sharif attempted to replace Chief of Army Staff General Pervez Musharraf on October 12, 1999, with a family loyalist, Director General of the Interservice Intelligence Directorate, Lt. Gen. Ziauddin. Although General Musharraf was out of the country at the time, the army moved quickly to depose Sharif.

Pervez Musharraf

Following the October 12 ouster of the government of Prime Minister Sharif, the military-led government stated its intention to restructure the political and electoral systems. On October 14, 1999, General Musharraf declared a state of emergency and issued the Provisional Constitutional Order (PCO), which suspended the federal and provincial Parliaments, held the Constitution in abeyance, and designated Musharraf as Chief Executive. Musharraf appointed an eight-member National Security Council to function as Pakistan's supreme governing body, with mixed military/civilian appointees; a civilian Cabinet; and a National Reconstruction Bureau to formulate structural reforms. On May 12, 2000, Pakistan's Supreme Court unanimously validated the October 1999 coup and granted Musharraf executive and legislative authority for 3 years from the coup date. On June 20, 2001, Musharraf named himself as president and was sworn in.

After the World Trade Center and the Pentagon were attacked on September 11, 2001, Musharraf pledged complete cooperation with the United States in the war on terror, which included locating and shutting down terrorist training camps within Pakistan's borders, cracking down on extremist groups and withdrawing support for the Taliban regime in Afghanistan. In a referendum held on April 30, 2002, Musharraf's presidency was extended by five more years. The handover from military to civilian rule came with parliamentary elections in November 2002, and the appointment of a civilian prime minister, Mir Zafarullah Khan Jamali. Having previously promised to give up his army post and become a civilian president, General Musharraf announced in late 2004 that he would retain his military role. In August 2004, Shaukat Aziz was sworn in as prime minister, having won a parliamentary vote of confidence, 191 of 342 votes, in which the opposition abstained.

On October 6, 2007, Musharraf was elected president for a 5-year term. He relinquished his army post in November 2007.

The government was dissolved in November 2007 after the completion of its 5-year term. Legislative elections were held in February 2008, and Syed Yousaf Raza Gilani became prime minister in March 2008.

GOVERNMENT AND POLITICAL ORGANIZATION

Pervez Musharraf has been chief of state since June 20, 2001. A prolonged confrontation over authority between Parliament and the President ended in December 2002 with a compromise which permitted passage of the Legal Framework Order (LFO) of 2002, under the terms of which President Musharraf made his pledge to resign his military position as Commander-in-Chief in late 2004. However, in 2004 General Musharraf announced that he would retain his military role. On November 28, 2007, Musharraf relinquished his army post.

The Pakistan Constitution of 1973, amended substantially in 1985 under Zia ul-Haq, was suspended by the military government in October 1999. It was restored on December 31, 2002. Selected provisions of the Constitution pertaining to changes that President Musharraf made while the Constitution was suspended remain contested by political opponents.

The president is chosen for a five-year term by an electoral college consisting of the Senate, National Assembly, and the provincial assemblies. The prime minister is selected by the National Assembly for a four-year term. The bicameral parliament—or Majlis-e-Shoora—consists of the Senate (100 seats; members are indirectly elected by provincial assemblies) and the National Assembly (342 seats; 60 seats reserved for women, 10 seats reserved for minorities). Each of the four provinces—Punjab, Sindh, Northwest Frontier, and Balochistan—has a Chief Minister and provincial assembly. The Northern Areas, Azad Kashmir and the Federally Administered Tribal Areas (FATA) are administered by the federal government but enjoy considerable autonomy. The cabinet, National Security Council, and governors serve at the president's discretion.

The judicial system comprises a Supreme Court, provincial high courts, and Federal Islamic (or Shari'a) Court. The Supreme Court is Pakistan's highest court. The president appoints the chief justice and they together determine the other judicial appointments. Each province has a high court, the justices of which are appointed by the president after conferring with the chief justice of the Supreme Court and the provincial chief justice. The judiciary is proscribed from issuing any order contrary to the decisions of the President. Federal Sharia Court hears cases that primarily involve Sharia, or Islamic law. Legislation enacted in 1991 gave legal status to Sharia. Although Sharia was declared the law of the land, it did not replace the existing legal code.

The Pakistan Muslim League (PML), Pakistan People's Party (PPP), and Pakistan Muslim League - Nawaz (PML-N) are national political parties, while the Muttahid Majlis-e-Amal (MMA)—an umbrella group of six religious parties, including the Jamaat-il-Islami—gained significant influence during the 2002 election. After those elections, the Pakistani political system remained highly fragmented, with no group winning a substantial majority of seats in the National Assembly, and religious groups banding together in the MMA to earn a significant portion of seats for the first time.

According to the constitution, Pakistan is a federation of four provinces: Baluchistan, the North-West Frontier Province (NWFP), Punjab, and Sindh. Governors appointed by the president head the provinces. There is also the Federally Administered Tribal Areas (FATA), and the Islamabad Capital Territory, which consists of the capital city of Islamabad. These areas and territory are under the jurisdiction of the federal government. The Northern Areas are administered as a de facto "Union Territory" and are treated as an integral part of Pakistan. The Pakistani-administered portion of the disputed Jammu and Kashmir region includes Azad Kashmir, a separate and autonomous government that maintains strong ties to Pakistan.

Principal Government Officials

Last Updated: 11/12/08

Pres.: **Asif Ali ZARDARI**
Prime Min.: **Syed Yousuf Raza GILANI**
Senior Min.:
Min. of Commerce: **Chaudhry Ahmed MUKHTAR**
Min. of Communications: **Habib ur-RAHMAN**
Min. of Culture, Information, & Broadcasting: **Sherry REHMAN**
Min. of Defense: **Chaudhry Ahmed MUKHTAR**
Min. of Defense Production: **Rana Tanveer HUSSAIN**
Min. of Education & Minorities: **Ahsan IQBAL**
Min. of Environment: **Hameed Ullah Jan AFRIDI**
Min. of Finance, Revenue, Economic Affairs & Statistics: **Syed Naveed QAMAR**
Min. of Food, Livestock & Agriculture, & Narcotics Control: **Nazar Muhammad GONDAL**
Min. of Foreign Affairs, Petroleum, & Natural Resources: **Makhdoom Shah Mehmood QURESHI**
Min. of Frontier Affairs (States & Frontier Regions) & Sports: **Najmuddin KHAN**
Min. of Housing & Works: **Haji Rehmatullah KAKAR**
Min. of Industries & Production: **Syed Naveed QAMAR**
Min. of Kashmir Affairs & Northern Areas, & Ports & Shipping: **Qamar Zaman KAIRA**
Min. of Labor, Manpower, & Overseas Pakistanis: **Syed Khursheed Ahmed SHAH**
Min. of Law & Justice: **Farooq H. NAIK**
Min. of Local Govt. & Rural Development: **Haji Ghulam Ahmad BILOUR**
Min. of Population Welfare: **Mir Humayun Aziz KURD**
Min. of Privatization & Investment: **Syed Naveed QAMAR**
Min. of Railways: **Sardar Mehtab Ahmad KHAN**
Min. of Science & Technology: **Tehmina DAULTANA**
Min. of Social Welfare & Special Education: **Nawabzada Khawaja Muhammad Khan HOTI**
Min. of Water & Power: **Raja Pervaiz ASHRAF**
Governor, State Bank of Pakistan: **Shamshad AKHTAR**
Ambassador to the US: **Husain HAQQANI**
Permanent Representative to the UN, New York: **Abdullah Hussain HAROON**

Pakistan maintains an embassy in the United States at 3517 International Court NW, Washington, DC 20008 (tel. 202-243-6500). It has consulates in Los Angeles, New York, Chicago and Houston.

NATIONAL SECURITY

Pakistan has the world's eighth-largest armed forces, which is generally well trained and disciplined. However, budget constraints and nation-building duties have reduced Pakistan's training tempo, which if not reversed, could affect the operational readiness of the armed forces. Likewise, Pakistan has had an increasingly difficult time maintaining its

aging fleet of U.S., Chinese, U.K., and French equipment. While industrial capabilities have expanded significantly, limited budget resources and sanctions have significantly constrained the government's efforts to modernize its armed forces.

Until 1990, the United States provided military aid to Pakistan to modernize its conventional defensive capability. The United States allocated about 40% of its assistance package to non-reimbursable credits for military purchases, the third-largest program behind Israel and Egypt. The remainder of the aid program was devoted to economic assistance. Sanctions put in place in 1990 denied Pakistan further military assistance due to the discovery of its program to develop nuclear weapons. Sanctions were tightened following Pakistan's nuclear tests in response to India's May 1998 tests and the military coup of 1999. Pakistan has remained a non-signatory of the Nuclear non-Proliferation Treaty.

The events of September 11, 2001, and Pakistan's agreement to support the United States led to a waiver of the sanctions, and military assistance resumed to provide spare parts and equipment to enhance Pakistan's capacity to police its western border with Afghanistan and address its legitimate security concerns. In 2003, President Bush announced that the United States would provide Pakistan with $3 billion in economic and military aid over 5 years. This assistance package commenced during FY 2005.

ECONOMY

The World Bank considers Pakistan a low-income country. No more than 49.9% of adults are literate, and life expectancy is about 63 years. The population, currently about 167 million, is growing at 1.81% annually.

In 2000, the government made significant macroeconomic reforms: Privatizing Pakistan's state-subsidized utilities, reforming the banking sector, instituting a world-class anti-money laundering law, cracking down on piracy of intellectual property, and moving to quickly resolving investor disputes. After September 11, 2001, and Pakistan's proclaimed commitment to fighting terror, many international sanctions, particularly those imposed by the United States, were lifted. Pakistan's economic prospects began to increase significantly due to unprecedented inflows of foreign assistance at the end of 2001. This trend is expected to continue through 2009. Foreign exchange reserves and exports grew to record levels after a sharp decline. The International Monetary Fund lauded Pakistan for its commitment in meeting lender requirements for a $1.3 billion IMF Poverty Reduction and Growth Facility loan, which it completed in 2004, forgoing the final permitted tranche. The Government of Pakistan has been successful in issuing sovereign bonds, and has issued $600 million in Islamic bonds, putting Pakistan back on the investment map. Pakistan's search for additional foreign direct investment has been hampered by concerns about the security situation, domestic and regional political uncertainties, and questions about judicial transparency.

On October 8, 2005 a magnitude 7.6 earthquake struck Pakistan, India, and Afghanistan. The epicenter of the earthquake was near Muzaffarabad, the capital of Pakistani-administered Kashmir, and approximately 60 miles north-northeast of Islamabad. An estimated 75,000 people were killed and 2.5 million people were left homeless. The disaster of such a huge magnitude galvanized an international rescue and reconstruction effort in support of the affected region. The earthquake cost Pakistan $1.1 billion in resettling those affected.

U.S. assistance has played a key role in moving Pakistan's economy from the brink of collapse to setting record high levels of foreign reserves and exports, dramatically lowering levels of solid debt. Also, despite the earthquake in 2005, GDP growth remained strong at 6.6% in fiscal year 2005/2006. In 2002, the United States led Paris Club efforts to reschedule Pakistan's debt on generous terms, and in April 2003 the United States reduced Pakistan's bilateral official debt by $1 billion. In 2004, approximately $500 million more in bilateral debt was granted. Consumer price inflation eased slightly to an average of 8% in 2005/2006 from 9.3% in 2004/2005.

Low levels of spending in the social services and high population growth have contributed to persistent poverty and unequal income distribution. The trends of resources being devoted to socioeconomic development and infrastructure projects have been improving since 2002, although expenditures remain below global averages. Pakistan's extreme poverty and underdevelopment are key concerns, especially in rural areas. Officials have committed to using international assistance—including a major part of the $3 billion five-year U.S. assistance package—to address Pakistan's long-term needs in the health and education sectors.

Reform

The government started pursuing market-based economic reform policies in the early 1980s. These reforms began to take hold in 1988, when the government launched an ambitious IMF-assisted structural adjustment program in response to chronic and unsustainable fiscal and external account deficits. The government began to remove barriers to foreign trade and investment, reform the financial system, ease foreign exchange controls, and privatize dozens of state-owned enterprises.

Although the economy became more structurally sound, it remained vulnerable to external and internal shocks, such as in 1992-93, when devastating floods and political uncertainty combined to depress economic growth sharply. The Asian financial crisis seriously affected Pakistan's major markets for its textile exports. For example, average real GDP growth from 1992 to 1998 dipped to 4.1% annually. Economic reform also was set back by Pakistan's nuclear tests in May 1998, and the subsequent economic sanctions imposed by

the G-7. International default was narrowly averted by the partial waiver of sanctions and the subsequent reinstatement of Pakistan's IMF enhanced structural adjustment facility/extended fund facility in early 1999, followed by Paris Club and London Club re-scheduling. After taking power in late 1999, President Musharraf instituted policies to stabilize Pakistan's macroeconomic situation. Pakistan continues to struggle with these reforms, having mixed success, especially in reducing its budget and current account deficits.

Agriculture and Natural Resources

Pakistan's principal natural resources are arable land, water, hydroelectric potential, and natural gas reserves. About 28% of Pakistan's total land area is under cultivation and is watered by one of the largest irrigation systems in the world. Agriculture accounts for about 21% of GDP and employs about 42% of the labor force. The most important crops are cotton, wheat, rice, sugarcane, fruits, and vegetables, which together account for more than 75% of the value of total crop output. Despite intensive farming practices, Pakistan remains a net food importer. Pakistan exports rice, fish, fruits, and vegetables and imports vegetable oil, wheat, cotton (net importer), pulses, and consumer foods.

The economic importance of agriculture has declined since independence, when its share of GDP was around 53%. Following the poor harvest of 1993, the government introduced agriculture assistance policies, including increased support prices for many agricultural commodities and expanded availability of agricultural credit. From 1993 to 1997, real growth in the agricultural sector averaged 5.7% but declined to less than 3% in 2005. Agricultural reforms, including increased wheat and oilseed production, play a central role in the government's economic reform package. Heavy rains in 2005 provided the benefit of larger than average cotton, wheat, and rice crops, but also caused damage due to flooding and avalanches.

Pakistan has extensive energy resources, including fairly sizable natural gas reserves, some proven oil reserves, coal, and large hydropower potential. However, exploitation of energy resources has been slow due to a shortage of capital and domestic and international political constraints. For instance, domestic gas and petroleum production totals only about half the country's energy needs, and dependence on imported oil contributes to Pakistan's persistent trade deficits and shortage of foreign exchange. The government announced that privatization in the oil and gas sector is a priority.

Industry

Pakistan's manufacturing sector accounts for about 25% of GDP. Cotton textile production and apparel manufacturing are Pakistan's largest industries, accounting for about 70% of total exports. Other major industries include food processing, beverages, construction materials, clothing, and paper products. As technology improves in the industrial sector, it continues to grow. In 2005/2006, the manufacturing sector grew by 8.6%. Despite government efforts to privatize large-scale parastatal units, the public sector continues to account for a significant proportion of industry. In the face of an increasing trade deficit, the government seeks to diversify the country's industrial base and bolster export industries. Net foreign investment in Pakistani industries is only 0.5% of GDP.

Foreign Trade and Aid

Weak world demand for its exports and domestic political uncertainty have contributed to Pakistan's high trade deficit. In 2004, growth rebounded to approximately 6% with substantial improvement in public and external debt indicators and remained robust with 7.8% growth in 2005. Foreign reserves are at an all-time high of $11.5 billion. Pakistan's exports, which grew by 14.4% in 2005/2006, continue to be dominated by cotton textiles and apparel, despite government diversification efforts. Major imports include petroleum and petroleum products, edible oil, wheat, chemicals, fertilizer, capital goods, industrial raw materials, and consumer products, rising to 38.8% to $25.6 billion. External imbalance has left Pakistan with a growing foreign debt burden. The fiscal imbalance is reflected in a high level of total net public debt, which reached an estimated 92.6% of GDP in 2000-01, more than half involving external liabilities, but decreased to 72.7% in 2003. The fiscal deficit widened from 5.6% of GDP in 1994-95 to 7.7% in 1997-98 before declining to 4.5% in 2006. Despite a rise in tax collection, defense and development expenditure along with transfers to the provinces all rose in the 2006 budget, widening the deficit. Support for loss-making, state-owned enterprises and a weak domestic tax base are critical elements in the recurring fiscal deficits. The Pakistan Telecommunications Company Ltd. (PTCL) represented the largest of Pakistan's privatization programs for 2005. Despite its economic and political difficulties, Pakistan has taken steps to liberalize its trade and investment regimes, either unilaterally or in the context of commitments made with the World Trade Organization (WTO), IMF, and the World Bank. In 2004-2005, efforts in several crucial areas seemingly intensified, resulting in Pakistan becoming a more open and secure market for its trading partners.

Pakistan has received significant loan/grant assistance from international financial institutions (e.g., the IMF, the World Bank, and the Asian Development Bank) and bilateral donors, particularly after it began using its military/financial resources in the war on terror. The United States pledged $3 billion for FY 2005 to FY 2009 in economic and military aid to Pakistan. In addition, the IMF and World Bank have pledged $1 billion in loans to Pakistan. In 2004 to 2007 alone, the World Bank has pledged over $500 million in investment projects.

FOREIGN RELATIONS

After September 11, 2001, Pakistan's prominence in the international community increased significantly, as it pledged its alliance with the U.S. in the war on terror and made a commitment to eliminate terrorist camps on its territory. Historically, Pakistan has had difficult and volatile relations with India, long-standing close relations with China, extensive security and economic interests in the Persian Gulf, and wide-ranging bilateral relations with the United States and other Western countries. It expresses a strong desire for a stable Afghanistan.

India

Since partition, relations between Pakistan and India have been characterized by rivalry and suspicion. Although many issues divide the two countries, the most sensitive one since independence has been the status of Kashmir.

At the time of partition, the princely state of Kashmir, though ruled by a Hindu Maharajah, had an overwhelmingly Muslim population. When the Maharajah hesitated in acceding to either Pakistan or India in 1947, some of his Muslim subjects, later aided by tribesmen from Pakistan, revolted in favor of joining Pakistan. In exchange for military assistance in containing the revolt, the Kashmiri ruler offered his allegiance to India. Indian troops occupied the eastern portion of Kashmir, including its capital, Srinagar, while the western part came under Pakistani control.

India submitted this dispute to the United Nations on January 1, 1948. One year later, the UN arranged a cease-fire along a line dividing Kashmir but leaving the northern end of the line not demarcated and the Vale of Kashmir (with the majority of the population) under Indian control. India and Pakistan agreed to a resolution that called for a UN-supervised plebiscite to determine the state's future This plebiscite has not occurred because the main precondition, the withdrawal of both nations' forces from Kashmir, has failed to take place.

Full-scale hostilities erupted in September 1965, when India alleged that insurgents trained and supplied by Pakistan were operating in India-controlled Kashmir. Hostilities ceased 3 weeks later, following mediation efforts by the UN and interested countries. In January 1966, the leaders of India and Pakistan met in Tashkent, U.S.S.R., and agreed to attempt a peaceful settlement of Kashmir and their other differences.

Following the 1971 Indo-Pakistan conflict, President Zulfiqar Ali Bhutto and Indian Prime Minister Indira Gandhi met in the hill station of Shimla, India, in July 1972. They agreed to a line of control in Kashmir resulting from the December 17, 1971, cease-fire, and endorsed the principle of settlement of bilateral disputes through peaceful means. In 1974, Pakistan and India agreed to resume postal and telecommunications linkages and to enact measures to facilitate travel. Trade and diplomatic relations were restored in 1976 after a hiatus of 5 years.

India's nuclear test in 1974 generated great uncertainty in Pakistan and is generally acknowledged to have been the impetus for Pakistan's nuclear weapons development program. In 1983, the Pakistani and Indian Governments accused each other of aiding separatists in their respective countries—Sikhs in India's Punjab state and Sindhis in Pakistan's Sindh province. In April 1984, tensions erupted after troops were deployed to the Siachen Glacier, a high-altitude, desolate area close to the China border not demarcated by the cease-fire agreement (Karachi Agreement) signed by Pakistan and India in 1949.

Tensions diminished after Rajiv Gandhi became Prime Minister in November 1984 and after a group of Sikh hijackers was brought to trial by Pakistan in March 1985. In December 1985, President Zia and Prime Minister Gandhi pledged not to attack each other's nuclear facilities. A formal "no attack" agreement was signed in January 1991. In early 1986, the Indian and Pakistani Governments began high-level talks to resolve the Siachen Glacier border dispute and to improve trade.

Bilateral tensions increased in early 1990, when Kashmiri militants began a campaign of violence against Indian Government authority in Jammu and Kashmir. Subsequent high-level bilateral meetings relieved the tensions between India and Pakistan, but relations worsened again after the destruction of the Ayodhya mosque by Hindu extremists in December 1992 and terrorist bombings in Bombay in March 1993. Talks between the Foreign Secretaries of both countries in January 1994 ended in deadlock.

More recently, the Indo-Pakistani relationship has veered sharply between rapprochement and conflict. After taking office in February 1997, Prime Minister Nawaz Sharif moved to resume official dialog with India. A number of meetings at the foreign secretary and prime ministerial level took place, with positive atmospherics but little concrete progress. The relationship improved markedly when Indian Prime Minister Vajpayee traveled to Lahore for a summit with Sharif in February 1999. There was considerable hope that the meeting could lead to a breakthrough.

In spring 1999, infiltrators from Pakistan occupied positions on the Indian side of the Line of Control in the remote, mountainous area of Kashmir near Kargil, threatening the ability of India to supply its forces on Siachen Glacier. By early summer, serious fighting flared in the Kargil sector. The infiltrators withdrew following a meeting between Prime Minister Sharif and President Clinton in July. Relations between India and Pakistan were particularly strained during the 1999 coup in Islamabad. Then, just weeks after the September 11, 2001 attack on the United States, an attack on India's Parliament on December 13 further strained this relationship.

The prospects for better relations between India and Pakistan improved in early January 2004 when a summit meeting of the South Asian Association for Regional Cooperation (SAARC) permitted India's Prime Minister Vajpayee to meet with President Musharraf. Both leaders agreed to establish a Composite Dialogue to resolve their disputes. The Composite Dialogue focuses on eight issues: confidence building measures, Kashmir, Wullar barrage, promotion of friendly exchanges, Siachen glacier, Sir creek, terrorism and drug trafficking, and economic and commercial cooperation. The first round of the Composite Dialogue was held in New Delhi on June 27-28, 2004.

Relations further improved when President Musharraf met Indian Prime Minister Manmohan Singh in New York in October 2004. Additional steps aimed at improving relations were announced when Indian Foreign Minister Natwar Singh visited Islamabad in February 2005 and in April 2005 when President Musharraf traveled to India to view a cricket match and hold discussions. In a further display of improved relations, bus service commenced from Pakistan-controlled Kashmir to Srinagar in April 2005. After a destructive earthquake hit the Kashmir region in October 2005, the two countries cooperated with each other to deal with the humanitarian crisis.

Musharraf and Singh last met in September 2006 at the Non-Aligned Summit in Havana. At this meeting, the two leaders condemned all acts of terrorism and agreed to continue the search for options acceptable to both sides for a peaceful, negotiated settlement of all issues, including the issue of Jammu and Kashmir. The foreign secretaries of both nations opened the fourth round of the Composite Dialogue in Islamabad on March 13-14, 2007.

Afghanistan

Following the 1979 Soviet invasion of Afghanistan, the Pakistani Government played a vital role in supporting the Afghan resistance movement and assisting Afghan refugees. After the Soviet withdrawal in February 1989, Pakistan, with cooperation from the world community, continued to provide extensive support for displaced Afghans. Continued turmoil in Afghanistan prevented the refugees from returning to their country. In 1999, more than 1.2 million registered Afghan refugees remained in Pakistan. Pakistan was one of three countries to recognize the Taliban regime of Afghanistan. International pressure after September 11, 2001, prompted Pakistan to reassess its relations with the Taliban regime and support the U.S. and international coalition in Operation Enduring Freedom to remove the Taliban from power. Pakistan has publicly expressed its support to Afghanistan's President Karzai and has pledged $100 million toward Afghanistan's reconstruction. Both nations are also working to strengthen cooperation along their rugged border, including making preparations to hold joint jirgas in their restive border areas.

People's Republic of China

In 1950, Pakistan was among the first countries to recognize the People's Republic of China (PRC). Following the Sino-Indian hostilities of 1962, Pakistan's relations with China became stronger; since then, the countries have regularly exchanged high-level visits resulting in various agreements. China has provided economic, military, and technical assistance to Pakistan. Favorable relations with China have been a pillar of Pakistan's foreign policy. The PRC strongly supported Pakistan's opposition to Soviet involvement in Afghanistan and is perceived by Pakistan as a regional counterweight to India and Russia.

Iran and the Persian Gulf

Historically, Pakistan has had close geopolitical and cultural-religious linkages with Iran. However, strains in the relationship appeared following the Iranian revolution. Pakistan and Iran supported different factions in the Afghan conflict. Also, some Pakistanis suspect Iranian government support for the sectarian violence that has plagued Pakistan. However, relations between the countries have improved since their policies toward Afghanistan have converged with the fall of the Taliban. Both countries contend that they are on the road to strong and lasting friendly relations.

Pakistan historically has provided military personnel to strengthen Gulf-state defenses and to reinforce its own security interests in the area.

U.S.-PAKISTAN RELATIONS

The United States and Pakistan established diplomatic relations in 1947. The U.S. agreement to provide economic and military assistance to Pakistan and the latter's partnership in the Baghdad Pact/CENTO and SEATO strengthened relations between the nations. However, the U.S. suspension of military assistance during the 1965 Indo-Pakistan war generated a widespread feeling in Pakistan that the United States was not a reliable ally. Even though the United States suspended military assistance to both countries involved in the conflict, the suspension of aid affected Pakistan much more severely. Gradually, relations improved, and arms sales were renewed in 1975. Then, in April 1979, the United States cut off economic assistance to Pakistan, except food assistance, as required under the Symington Amendment to the Foreign Assistance Act of 1961, due to concerns about Pakistan's nuclear program.

The Soviet invasion of Afghanistan in December 1979 highlighted the common interest of Pakistan and the United States in peace and stability in South Asia. In 1981, the United States and Pakistan agreed on a $3.2 billion military and economic assistance program aimed at helping Pakistan deal with the heightened threat to security in the region and its eco-

nomic development needs. Recognizing national security concerns and accepting Pakistan's assurances that it did not intend to construct a nuclear weapon, Congress waived restrictions (Symington Amendment) on military assistance to Pakistan. In March 1986, the two countries agreed on a second multi-year (FY 1988-93) $4 billion economic development and security assistance program. On October 1, 1990, however, the United States suspended all military assistance and new economic aid to Pakistan under the Pressler Amendment, which required that the President certify annually that Pakistan "does not possess a nuclear explosive device."

Several incidents of violence against American officials and U.S. mission employees in Pakistan have marred the relationship. In November 1979, false rumors that the United States had participated in the seizure of the Grand Mosque in Mecca provoked a mob attack on the U.S. Embassy in Islamabad in which the chancery was set on fire resulting in the loss of life of American and Pakistani staff. In 1989, an attack on the American Center in Islamabad resulted in six Pakistanis being killed in crossfire with the police. In March 1995, two American employees of the consulate in Karachi were killed and one wounded in an attack on the home-to-office shuttle. In November 1997, four U.S. businessmen were brutally murdered while being driven to work in Karachi. In March 2002 a suicide attacker detonated explosives in a church in Islamabad, killing two Americans associated with the Embassy and three others. There were also unsuccessful attacks by terrorists on the Consulate General in Karachi in May 2002. Another bomb was detonated near American and other businesses in Karachi in November 2005, killing three people and wounding 15 others. On March 2, 2006, a suicide bomber detonated a car packed with explosives as a vehicle carrying an American Foreign Service officer passed by on its way to Consulate Karachi. The diplomat, the Consulate's locally-employed driver and three other people were killed in the blast; 52 others were wounded.

The decision by India to conduct nuclear tests in May 1998 and Pakistan's matching response set back U.S. relations in the region, which had seen renewed U.S. Government interest during the second Clinton Administration. A presidential visit scheduled for the first quarter of 1998 was postponed and, under the Glenn Amendment, sanctions restricted the provision of credits, military sales, economic assistance, and loans to the government. The October 1999 overthrow of the democratically elected Sharif government triggered an additional layer of sanctions under Section 508 of the Foreign Appropriations Act, which include restrictions on foreign military financing and economic assistance. U.S. Government assistance to Pakistan was subsequently limited mainly to refugee and counter-narcotics assistance.

The U.S.-Pakistan relationship changed significantly once Pakistan agreed to support the U.S. campaign to eliminate the Taliban in Afghanistan and to join the United States in the Global War on Terror. Since September 2001, Pakistan has provided extensive assistance in the war on terror by capturing more than 600 al-Qaida members and their allies. The United States has stepped up its economic assistance to Pakistan, providing debt relief and support for a major effort for education reform. During President Musharraf's visit to the United States in 2003, President Bush announced that the United States would provide Pakistan with $3 billion in economic and military aid over 5 years. This assistance package commenced during FY 2005.

Following the region's tragic October 8, 2005 earthquake, the United States responded immediately and generously to Pakistan's call for assistance. The response was consistent with U.S. humanitarian values and our deep commitment to Pakistan. At the subsequent reconstruction conference in Islamabad on November 19, 2005, the U.S. announced a $510 million commitment to Pakistan for earthquake relief and reconstruction, including humanitarian assistance, military support for relief operations, and anticipated U.S. private contributions.

In 2004, the United States recognized closer bilateral ties with Pakistan by designating Pakistan as a Major Non-NATO Ally. President Bush visited Pakistan in March 2006, where he and President Musharraf reaffirmed their shared commitment to a broad and lasting strategic partnership, agreeing to continue their cooperation on a number of issues including: the war on terror, security in the region, strengthening democratic institutions, trade and investment, education, and earthquake relief and reconstruction.

The United States and Pakistan concluded the sale to Pakistan of F-16 aircraft in late 2006, further reflecting their deepening strategic partnership. President Musharraf visited Washington in September 2006, where he held a bilateral meeting with President Bush and also participated in a trilateral meeting with President Bush and President Karzai of Afghanistan. The U.S.-Pakistan strategic partnership is based on the shared interests of the United States and Pakistan in building stable and sustainable democracy and in promoting peace and security, stability, prosperity, and democracy in South Asia and across the globe.

TRAVEL

Consular Information Sheet

November 21, 2008

Country Description: Pakistan is a parliamentary federal republic in South Asia, with a population of nearly 170 million people. Following successful elections in February 2008, Pakistan has a coalition government led by Prime Minister Yousef Gilani. Pakistan is a developing country, with some tourist facilities in major cities but limited in outlying areas.

The infrastructure of areas of Kashmir and the Northwest Frontier Province was devastated as a result of the October 8, 2005 earthquake and is not yet recovered.

Entry Requirements: All U.S. citizens traveling to Pakistan for any purpose are required to have valid U.S. passports and Pakistani-issued visas. Further information on entry requirements can be obtained from the Embassy of Pakistan at: 3517 International Court Avenue, NW, Washington, DC 20008; telephone: 202-243-6500; e-mail: info@pakistan-embassy.org; web site: http://www.pakistan-embassy.org.

Travelers may also contact one of the Consulates General of Pakistan in:

Boston: 20 Chestnut Street, Needham, MA 02492; telephone: (781) 455-8000; fax: (617) 266-6666; email: pakistan@tiac.net.
